The University of California, Santa Barbara is preeminent in education, research, and public service. Located 90 miles north of Los Angeles, ideally situated between the Pacific Ocean and the Santa Ynez Mountains, the campus has an undergraduate enrollment of 18,000 students and is highly selective in its admissions process. Applicants may view the Division of Student Affairs' home page at www.ucsb.edu.

Review of applications will begin April 1, 2001, and the position will remain open until filled. Interested candidates should submit a current vitae/resume, including the names, addresses and telephone numbers of at least five professional references. Refer to job number 2001-01-033. Materials should be sent to:

Elvira Clark
Human Resources Employment Office
University of California
Santa Barbara, CA 93106-3160

UC Santa Barbara is an Affirmative Action, Equal Opportunity employer committed to fostering diversity in its faculty, staff, and student body. All qualified applicants are encouraged to apply including minorities and women.

UC Santa Barbara is an Equal Opportunity/Affirmative Action Employer.
Book Review

By Mark Saad Saka

This is an essential book for any counselor, high school teacher, public school administrator, or advocate for the education of Latino youth. Anyone who fails to consider the seriousness of the issues that it addresses or the recommendations made has no business educating Latino youth.

Romo and Falbo studied the progress of 100 Mexican American students in the Austin Independent School District from 1989 to 1993. Through school records, personal interviews with the students, their parents, and extensive fieldwork in the communities, the authors followed students whom school officials designated as “at risk” for dropping out. The book describes how many of these youth defy tremendous odds, stay in school, and earn their diplomas. It is a testimony to the tenacity of youth who overcome entrenched school bureaucracies, severe economic constraints, structural impediments, gang involvement, teen motherhood, language difficulties, lack of parental education as a model, administrative gliches, and punitive school policies directed overwhelmingly against Mexican Americans in one of America’s largest urban school districts.

Among Whites and African Americans, high school dropout rates have steadily decreased over the past 30 years. The rate for Latino youth has remained constant at 35 percent. This issue is critical to the future of the U.S., its democratic values, and an economic system balanced in large part by a sizeable middle class. Latinos represent the fastest-growing U.S. population segment. By 2015, Mexican Americans are projected to be the largest ethnic group in the two largest states, Texas and California.

A nation or state that does not adequately address such a situation is in serious denial. America’s class structure might one day more closely resemble that of Brazil—with its extreme polarization of wealth, secluded and gated White suburban enclaves, large prison populations of people of color, and an uneducated urban proletariat—than that of an industrial democracy resting on a solid, educated middle class. This book could be one of the most important of the coming decades and failure to heed its recommendations, catastrophic.

Peppered throughout the text are the students’ personal histories and family biographies. Major issues affecting Latino youth and their access to education are laid out in a readable fashion. Case studies of Hispanic students tracked from even as early as kindergarten demonstrate that the tracking affected the rest of their lives—that the use of norm-referenced tests to track students seriously reduces the likelihood that Hispanic students will acquire the skills they need to graduate from high school, much less go on to higher education. The denial of honors-level courses to Latino youth was quite disturbing. Without access to challenging courses taught by excited and committed teachers, motivated students quickly lose interest and become susceptible to gang involvement and teen motherhood, sure tickets to nowhere.

A number of students who had dropped out later tried to return to school to complete their high school diplomas. The interviews reveal structural impediments that schools have established that prevent these “marginal” and “at-risk” students from returning, thus streamlining these students into obtaining their GED or, worse, simply moving into the job market as unskilled labor. The lack of Spanish-speaking counselors, administrators, and teachers in many schools surveyed brings to light the difficulty that Spanish-speaking parents had in understanding the needs of their children. By the time they learned of their child’s marginalization, it was usually too late.

The authors present far-reaching recommendations which, if implemented, could begin to address high school graduation and open the possibility of a greater number of college-bound Latino youth. These include putting student learning first—not that of career-oriented administrators; clarifying scholastic standards; intervening early to prevent student failure and retention; assigning meaningful homework; emphasizing hard work that motivates and interests students; improving school access for students and Spanish-speaking parents; and greater emphasis on the value of a high school diploma, which few of those interviewed believed would really make a difference in their career options.

I was reminded of the old saying in 19th-century New Mexico that “to educate a Mexican is to lose a sheepherder!” The structural imbalances and bureaucratic glitches permeating Southwestern educational systems could lead one to believe that very little has changed, that the American political economy rests upon the backs of unskilled peoples of color. Structural constraints prevent so many Latino youth from even reaching the doors of a university; this book offers the possibility of changing that scenario.

Dr. Saka, a Fulbright scholar, completed his Ph.D. at the University of Houston in 1995. A Mexican specialist, his interests include peasant social movement and agrarian unrest. An American of Arab ancestry, he has taught in the Department of History at Sul Ross State University, Alpine, Texas, since 1995.

NATIONAL INSTITUTES OF HEALTH
Undergraduate Scholarship Program

The UGSP is sponsored by the National Institutes of Health (NIH), the Federal Government's premier biomedical research and research training agency. NIH offers scholarships to qualified students who are committed to a career in biomedical research.

Scholarships of up to $20,000 per year support tuition, educational, and qualified living expenses (room, board, transportation) while students pursue an undergraduate degree.

For each award year, scholars work 10 weeks with salary/benefits in our research laboratories in Bethesda, Maryland. They are assigned mentors, participate in developmental and science enrichment seminars, and are provided with housing and transportation. After graduation, they work 1 year of full-time employment at NIH for each year of scholarship award.

THIS IS A SPECIAL OPPORTUNITY FOR SPECIAL STUDENTS!
Advise students to apply if they:
• Are committed to a career in biomedical research;
• Are from a disadvantaged background;
• Have a GPA of at least 3.5 or are in the top 5% of their class;
• Are a U.S. citizen, national, or permanent resident;
• Are enrolled or accepted for enrollment as a full-time student at a qualified accredited institution.

For more information, contact the UGSP at:
http://ugsp.info.nih.gov • E-mail: ugsp@nih.gov
Phone: 1-800-528-7689 • TTY: 1-888-352-3001
COMMUNITY COLLEGE SOUTHERN NEVADA

The Community College of Southern Nevada is a comprehensive community college with an average enrollment of more than 32,000 students. Facilities include 5 campuses and approximately 40 learning centers distributed throughout the four county districts. CCSN is a multi-campus institution, so travel between campuses in the Las Vegas Valley may be required.

USF University of South Florida

Founded in 1956 as the first U.S. university to be created wholly in the 20th century, the University of South Florida is now the largest metropolitan university in the Southeastern United States, with a student body of nearly 35,500 spread across four campuses. The rich, multicultural atmosphere of the university is evident not only on the main Tampa campus, but at its branches in St. Petersburg, Sarasota-Manatee, New College, and Lakeland. USF promotes delivery systems, curricula, programs and activities that reflect the diversity of South Florida.

The university is currently recruiting for the following faculty positions:

HISPANIC OUTLOOK 0 02/12/2001 50
**Network Technician**

The Division of Library and Information Services at Plattsburgh State University of New York seeks a motivated, team-oriented professional for the position of Network Technician. This twelve-month, renewable appointment reports to the Network Manager of Network Operations. Network Operations is currently comprised of a Network Services Coordinator and Network Manager. Network Operations provides the campus community with direction for network planning, installation services, and troubleshooting. The Network Operations staff plays a critical role in the development of new network services while maintaining existing installed services.

**Responsibilities Include:**
- Assisting with network planning and implementation; documentation of the campus network; troubleshooting network related problems; evaluating and testing new network hardware and software technologies; conducting site surveys to analyze project needs; installation and maintenance of network equipment across campus; and serving as a backup to the campus Network Manager.

**Qualifications:**
- A Bachelor's degree with a minimum of three years related experience; experience with network management; knowledge of local and wide area network topologies; and familiarity with common computer systems (DOS/Windows 3.1, Windows 95, Windows NT, Macintosh, OpenVMS/VMS, and Unix/Linux) and related software are required. Strong problem solving/troubleshooting skills; experience with computer programming (C, FORTRAN, and HTML scripting); and demonstrated proficiency in oral and written communication skills will be highly regarded.

**Applications from women and minority candidates are especially welcomed.** Plattsburgh State University of New York is an affirmative action, equal opportunity employer.

**Salary:**
- Beginning at $40,000, based on experience, with excellent benefits.

Review of applications begins immediately and continues until position is filled. Please submit letter of application, resume, and the names and telephone numbers of three references to: Chair, Search Committee (P#22 30-88), c/o Human Resources, Plattsburgh State University of New York, 101 Broad Street, Plattsburgh, NY 12901-2681. Fax: (518) 564-5060.

---

**Assistant Professor of Educational Technology**

The Education Department at Salisbury State University invites applicants for the position of Assistant Professor in Educational Technology. Requirements include: a completed doctorate or ABD in instructional or educational technology or in a related field in education; teaching experience using technology at the elementary, middle or secondary level; demonstrated effectiveness in teaching; expertise in technology integration into the curriculum and use of technology for inquiry and school reform. Knowledge of electronic portfolios is desirable. Responsibilities for this full-time tenure-track position will include teaching and advising graduate & undergraduate students, participating in a PT3 Implementation Grant, engaging in professional development in educational technology, providing leadership in program development and providing service to the department, school, and university. Preference will be given to candidates with teaching experience at the undergraduate or graduate level. Start date: August 15, 2001.

Send curriculum vitae, academic credentials and three letters of recommendation to:

Regina Royer, Co-Chair, Education Department, Salisbury State University, Salisbury, MD 21801. Review of applications will continue until the position is filled. Salary will be commensurate with qualifications and experience.

Salisbury State University is committed to employment equity and diversity in the workplace. We especially welcome and encourage applications from minorities, women, and persons with disabilities.

Our employment goals are to create a workforce graphic from a wide variety of backgrounds and experiences that will strengthen the values of a diverse university community.

Salisbury State University is an Affirmative Action/Equal Opportunity employer.

Review of applicants will begin February 1, 2001 until filled.

---

**Special Education Faculty Position**

Assistant/Associate Scholar Position starting June, 2001 or sooner.

This position involves assisting in the administration of the Center for Personnel Studies in Special Education (COPSS), teaching undergraduate and graduate courses, advisement, supervision, research, and service. COPSS is a federally funded research center, with a focus on studies of teacher supply and demand, teacher education, and certification and licensure. This position is split between work in the center and work in the department.

Eligibility requirements: Earned doctorate in an appropriate discipline (special education preferred), professional experience with children or youth with disabilities, and evidence of scholarly accomplishment. Preference will be given to candidates with experience in university teaching and supervision, proposal writing, and school-based research. Applicants must be committed to a collaborative, unified approach to teacher preparation, and an inclusion model of service delivery. Apply to: Dr. Paul T. Sindelar, University of Florida, PO Box 117050, Gainesville, FL 32611. Deadline: A letter of application, curriculum vitae, and reprints of two recent papers must be postmarked not later than September 15, 2001. Three letters of recommendation should be sent to the same address.

The University of Florida is an EEO/AA employer. Applications from women, minorities, individuals with disabilities, and individuals from underrepresented groups are especially welcome.
A member of the University of Wisconsin System, UW-Stout has 7,700 students enrolled in 17 graduate and 26 undergraduate programs. The university is located in Menomonie, Wisconsin, 60 minutes east of Minneapolis-St. Paul on Interstate 94. Located in the Chippewa Valley Region (population base of more than 186,000), Menomonie is a city of 14,600 surrounded by beautiful lakes, streams and woods. The university invites applications for the following positions:

The University of Wisconsin Oshkosh is an equal opportunity/affirmative action employer. Minority candidates are encouraged to apply.

THE UNIVERSITY OF NORTH CAROLINA
GREENSBORO

School of Education
Department of Educational Leadership and Cultural Foundations

POSITION: Departmental Chairperson

Context: The Department encompasses the areas of educational leadership and philosophical and social foundations. It offers a master’s degree in Educational Leadership and doctoral degrees in Educational Leadership (Ed.D.) and in Curriculum and Teaching (Ph.D.) with a focus on Cultural Studies. It is in the process of developing programs that emphasize the social context of schools, ethical concerns, and a transformative vision of educational change. Diverse modes of research and inquiry are encouraged.

Position: Departmental Chairperson, a ten-month position, beginning August 1, 2001. The Department seeks an individual with excellent interpersonal and leadership skills, a strong commitment to teaching, scholarship, research and support of service activities. Evidence of administrative ability and potential for growth is essential. The individual must be able to reflect and enhance the broad directions of the department. Specifically, this means a concern for issues of educational policy, leadership, and reform as grounded in the social, cultural and ethical context of schools and education. A strong research record is essential. The individual will play an important role in doctoral advising. A doctorate in educational leadership/administration, policy, or related fields is required. Candidates must qualify for appointment as a Professor or Associate Professor rank.

Starting Date: August 1, 2001

Application Deadlines: Review of all applications will continue until the position is filled.

Application Procedures: Send letter of application, vita, three letters of recommendation, and transcripts to:

Faculty Positions:
DEPaul University, School of Education, 2000-2001

Well known for its reputation for excellence and as the largest Catholic university in the United States, DePaul University has been educating Chicago for over 100 years. At DePaul, you will work in a collaborative environment that lives its values, supports diversity and encourages professional development. The School of Education's mission is to cultivate urban, professional, multicultural educators, and to provide educational experiences that facilitate social transformation. We encourage applications from candidates who are committed to issues of social justice and knowledgeable about current educational policies and practices that affect youth and education in public and private institutions. DePaul University has a strong commitment to building and maintaining a diverse community and seeks faculty who will enhance this mission.

The School of Education seeks applications for six approved and funded positions, beginning in the 2001-2002 Academic Year: Director of Ed.D. Program * Senior-Level Position; Assistant Professor * Educational Leadership; Assistant Professor * Human Development; Assistant Professor * Physical Education; Assistant Professor * Reading; Assistant Professor * Secondary Education. The School actively seeks to build and maintain a diverse faculty. For all positions, the School seeks faculty members who bring a critical perspective to the issues of urban education, diversity, multiculturalism, reflective practice, and social justice.

**Assistant Professor-Human Development:** The individual we seek requires expertise in Human Development or Developmental Psychology with a background in Cultural Psychology or cross-cultural research. Candidates should have a strong academic and experiential background in ethnographic research related to lifespan development in socio-cultural context. Primary teaching responsibilities will be graduate and undergraduate courses in human development across the lifespan, as well as courses in the social and cultural foundations of education and research methods at the graduate level. This individual should also have experience with culturally diverse urban populations.

**Assistant Professor-Physical Education:** The individual we seek will have expertise in Physical Education with particular emphasis in Fitness Management, Fitness Assessment and Health Education. The primary teaching responsibility will be undergraduate and graduate courses in the Physical Education Program that offers concentrations in Teaching K-12 and Fitness Management. Additionally, this individual will advise Fitness Management majors through their courses, clinical requirements, and internship. The successful candidate will work in our new $14+ million Fitness and Wellness Center, collaborate with the Director of the Recreation Facility, and contribute to community outreach programs.

**Assistant Professor-Reading:** The individual we seek will have expertise in Elementary Reading with an emphasis in Intermediate and Middle School Levels. Candidates should have experience in urban education, experience in elementary teaching, demonstrated ability to integrate theory and practice, and a clearly defined research agenda. Additional expertise in technology issues is welcomed.

**Assistant Professor-School:** The individual we seek will be a teacher educator with expertise in teacher professional development as the secondary level and commitment to helping anchor introductory general education courses at the undergraduate and graduate level. Requirements include an earned doctorate in teacher education, curriculum studies, curriculum and instruction or related field with a scholarly record or demonstrated scholarly interest in teacher's professional development. In addition, applicants will be expected to contribute and have an appropriate undergraduate or Master's degree in one of the following areas: History/Social Education (middle/high school focus), Science Education (elementary/middle school focus), or Technology Education. Some experience in teaching at the middle/high school level within a multicultural or urban setting is preferred. Responsibilities include teaching introductory secondary education courses and courses in areas of expertise. Applicants should possess the academic and experiential foundations to assist in the preparation of teachers committed to democracy, diversity, and social justice within an urban context. Women and members of under-represented groups are strongly encouraged to apply.

**Assistant Professor-Educational Leadership:** The individual we seek requires expertise in one or more of the following areas: school finance, school law, and capacity to integrate technology into administrative decision making and accountability. Recent administrative experience in a large urban school system with a culturally and linguistically diverse population is preferred. Committed to urban education. Applicant should be prepared to teach graduate courses in the Master's programs and the Ed.D. program in Educational Leadership. Guide students in their thesis/dissertations, sustain a scholarly agenda, collaborate with students and faculty in research and program development, and engage in service to the University/community.

**Required qualifications for all positions:** Earned doctorate required for position; defined research agenda; ability to work collaboratively within and across programs; two areas of expertise to contribute to the School/recent experience with culturally diverse urban populations; commitment to urban education; and excellence in teaching, service, and scholarship or demonstrated potential.

Salary is commensurate with qualifications and experience. Please send letter of application clearly delineating qualification for areas of expertise; complete and up-to-date vita and official transcripts; one example of recent professional publication/presentation; one page statement on philosophy of teaching; and three to five professional letters of reference sent directly. Review of applications will begin January 16th and continue until the positions are filled.

Send all applications and materials to: Nancy S. Williams, Associate Dean, School of Education, DePaul University, 3120 North Kenmore, Chicago, IL 60614. Fax: 773-325-7713. Applications received by e-mail will not be accepted. DePaul University is committed to diversity and equality in education and employment.

PROVOST AND VICE PRESIDENT FOR ACADEMIC AFFAIRS

Baruch College, a senior college of the City University of New York (CUNY), seeks nominations and applications for the position of Provost and Vice President for Academic Affairs.

Baruch College is an urban multicultural institution with an enrollment of approximately 15,500 students in undergraduate and graduate programs in three schools: the Zicklin School of Business, the Weissman School of Arts and Sciences and the School of Public Affairs. Baruch's special mission is business education. Baruch is the only public college in New York City to have all of its undergraduate and graduate programs in business accredited by their respective professional associations. The college serves as the University's center for research and teaching in business subjects; it offers several bachelor's and master's degrees, and programs leading to the Ph.D. in Business and in Industrial/Organizational Psychology.

Located in the Park Avenue South area of Manhattan on the edge of Silicon Alley, under the leadership of a new president, the college has a faculty of approximately 500 full-time and 450 part-time members and additional professional and support staff bringing the total to 1,500 full and part-time employees. The college budget is approximately $134 million. The college's academic ratings climb each year. It is a strongly endowed public university with a supportive and active group of alumni. An architecturally praised, technologically innovative, square-block vertical campus will open in the Fall of 2001.

The Provost and Vice President for Academic Affairs, the chief academic officer of the college, oversees the operations of the three schools (each headed by a dean), the Baruch Computing and Technology Center, the Newman Library, several research centers, and related units such as continuing studies, institutional research and analysis, skills assessment and testing, academic advising and student academic counseling centers and the Mishkin Gallery. Reporting directly to the president, he/she is responsible for:

1. Setting and maintaining standards of scholarship and academic productivity;
2. Evaluating all academic activities;
3. Planning for the strategic development of computing and technology;
4. Ensuring the educational development of the most ethnically and racially diverse student body in the country;
5. Allocating resources to the three schools, and several centers;
6. Exercising curricular leadership among the faculty;
7. Developing interdisciplinary academic programs which further the mission of the college;
8. Initiating collaborative activities with business, civic, and cultural organizations;
9. Overseeing ceremonial and celebratory activities.

The successful candidate should possess:
- An earned Doctorate;
- Academic credentials appropriate for appointment as a tenured full professor;
- A strong record of academic research, publications and teaching;
- Administrative experience, preferably in a business school setting, and a record of innovative leadership;
- Experience with developing initiatives to enhance the recruitment and retention of a diverse faculty;
- Experience in strategic planning for computer and technology development;
- A commitment to the role of public higher education in a dynamic urban environment.

The position is available Fall 2001. Two copies of letters of application and/or nomination, with vita should be sent via the mail by February 28, 2001 to: Ann Kern, Managing Director or Joan Sherry, Senior Engagement Manager, Korn/Ferry International, 200 Park Avenue, 37th Floor, New York, New York 10166.

Contact: Equal Opportunity/Affirmative Action/IRCA/Americans with Disabilities Act Employer.

Baruch College
The City University of New York

ASSISTANT PROFESSOR OR OF SPANISH

The candidate must be dedicated to foreign language instruction and be familiar with proficiency-based and communicative approaches to language instruction. In addition, interest in other areas such as Hispanic culture and literature, Hispanic and Latin American on-campus or foreign language pedagogy is welcome. Besides teaching and service to the university community, the position will be expected to participate in scholarly pursuits in a relevant field.

The Assistant Professor of Spanish will augment the current faculty in the program. Duties shall include, but not be limited to:
- Teaching a full course load: Elementary Spanish-I and/or 600 level Spanish and other levels of Spanish as needed.
- Supervising Spanish Club Activities.

Position is available Fall 2001. Salaried, 18 credits. Salary based on qualifications. Review of applications will begin March 1, 2001, and continue until positions are filled. ABD candidates are encouraged to apply. Page 1 of 2.

Lincoln University

Lincoln University, PA 19352

This position is available Fall 2001. Salary based on qualifications. Review of applications will begin March 1, 2001, and continue until positions are filled. ABD candidates are encouraged to apply.

Vanderbilt University

Peabody College of Education and Human Development

Peabody College of Vanderbilt University: Faculty positions in Human and Organizational Development (HOD). Beginning in the Fall of 2001, we expect to fill up to four tenure or tenure-track positions (rank open) in the following areas: counseling and adult development, and community studies or community development. We are particularly interested in persons with active research programs who can bridge two or more areas or have a background in organizational studies. We anticipate that most of these positions will be filled by individuals who are interested in and are able to provide senior leadership to the HOD program. Successful candidates will be expected to teach and advise at both the graduate and undergraduate levels. In addition to the HOD program, the largest undergraduate major at Vanderbilt University, we offer a range of related master’s programs in the areas listed above and are developing an interdepartmental doctoral program in Community Research and Action. There is currently a CACREP-accredited master’s program in Human Development Counseling (school and community agency). Review of applications will begin on March 1, 2001, and continue until the positions are filled. Candidates should send a curriculum vitae, representative reprints, a statement of research and teaching interests, and the names and addresses of three referees to: Professor Joseph Cunningham, c/o Rene Fielder; Box 90, Peabody College; Nashville, TN 37203.

Vanderbilt University is an equal opportunity employer and encourages applications from women, minorities, and persons with disabilities.
DEAN

The University of Maryland, College Park, invites applications and nominations for the position of Dean of the College of Information Studies. The College of Information Studies is a leading program in the field that advances understanding of the relationships among information, information technology, and users and users of information. The College has highly ranked programs in archives, records and information management, health information, and information systems, and is a participant in international education programs. The College offers both the Master’s and PhD degrees and is expanding its programs in continuing education and distributed education. For additional information see the college web site http://www.cis.umd.edu.

The Dean is expected to build upon these achievements to lead the College to an even higher level of academic excellence. Responsibilities include: ensuring that the program is dynamic in response to changing needs and opportunities; promoting research and its recognition as leading the field; fostering and leading cooperation with the many information related industries, government, and other agencies in the region; and maintaining and enhancing relations with alumni. The Dean is responsible for recruiting and retaining faculty of the highest caliber, promoting collaborative research enterprises, and managing a complex academic enterprise. The Dean reports directly to the Senior Vice President for Academic Affairs and Provost.

Qualifications: An earned doctorate, a record of scholarly accomplishment commensurate with appointment as a tenured professor in the College; a demonstrated capacity for effective leadership; a commitment to community service and leadership; and a dedication to fostering the goals of diversity and affirmative action.

Salary: competitive. Appointment date: July 1, 2001. Applicants should submit a letter of interest, curriculum vitae, and names and affiliations of at least four potential references who could be contacted by the search committee. Review of applications will commence on February 1, 2001, and continue until the position is filled. All materials should be sent to:

Dean, College of Information Studies
C/O Ms. Pauline Robinson
Room 1119, Main Administration
University of Maryland
College Park, MD 20742

The University of Maryland is an equal opportunity employer; and women and minorities are encouraged to apply.

ASU WEST

ASSISTANT PROFESSOR OF AFRICAN HISTORY

Required Qualifications: Ph.D. in appropriate discipline by August 1, 2001. Demonstrated potential for excellence in research and teaching and the ability to teach students. The College offers both the World surveys, World History surveys, and upper division courses in African and African American history.

Desired Qualifications: Evidence of commitment to interdisciplinary teaching, research, and program development; ability to contribute to American Studies, Ethnic Studies, or Religious Studies programs; ability to teach interdisciplinary courses in African history and culture; the African Diaspora, the slave trade, and comparative slave cultures in the Americas.

ASSISTANT PROFESSOR OF EUROPEAN HISTORY

Required Qualifications: Ph.D. in appropriate discipline by August 1, 2001. Demonstrated potential for excellence in research and teaching and the ability to teach World and European History surveys and upper division comparative history courses.

Desired Qualifications: Demonstrated ability to teach interdisciplinary courses on exploration and empire, particularly Spanish empire; ability to contribute to Ethnic Studies or Religious Studies program; commitment to interdisciplinary teaching, research and program development.

Application Deadline: March 15, 2001 or on the last day of every month thereafter until position is filled. We cannot accept email applications.

Application Procedure: Specifying which position you are applying for, send a letter of application, 3 letters of reference and curriculum vitae to:

History Search
College of Arts and Sciences
Arizona State University West
PO Box 37100
Phoenix, AZ 85069-7100

Arizona State University West, a vital component of ASU's multi-campus structure, serves more than 5,000 undergraduate and graduate students at its modern, growing campus in Phoenix, one of the country's most dynamic multi-cultural and economic environments. ASU West is an urban, commuter campus with a focus on learner-centered education. The University is committed to a balance of research and teaching, faculty-student research collaboration, interdisciplinary perspectives, and the development of University-community partnerships. ASU West is dedicated to increasing the diversity of its campus community; and encouraging an environment that offers students knowledge about local, national, and global communities.

ASU West is an AA/EEO employer in policy and practice.
WAYNE STATE UNIVERSITY

Chair Search, Department of Sociology

The Department of Sociology at Wayne State University, a Carnegie Doctoral/Research University-Exteme Institution, is searching for a Chair. The position carries tenure, and will commence in Fall 2001. The successful candidate must have a Ph.D. in Sociology and should possess an excellent publication record, appropriate for appointment at the rank of full professor. Field of specialization is open, though preference will be given to candidates working within major fields of the discipline and the department. The department's focus is on urban issues. Current strengths include medical, gerontology, family, and race and gender. We seek to develop other dimensions of urban sociology. The department's research is enhanced by existing relationships with programs and centers at the University. For instance, the department houses Parents and Children Together (PACT), a program for research and training that assists families at high risk for abuse and neglect. Moreover, departmental faculty often work with researchers in other units in the University, including the College of Urban, Labor, and Metropolitan Affairs (CULMA), the Institute of Gerontology, and the School of Medicine. Because the department houses undergraduate, M.A. and Ph.D. programs, the successful candidate must have a serious commitment to both graduate and undergraduate education. Experience with funded research is desirable. Salary is highly competitive.

The Detroit Metropolitan Area provides numerous opportunities for research and community outreach. In addition, The University campus is in an attractive urban location, situated in the cultural center of Detroit. Interested persons should consult our web site at: http://www.cla.wayne.edu/sociology for further information.

Applicants should send a letter of interest and three letters of recommendation (or the names of three references) to: Sociology Chair Search; c/o Lawrence A. Scalf, Dean; College of Liberal Arts; 2226 FAB; Detroit, MI 48202. Electronic Applications may also be submitted to L.Scalf@wayne.edu. Review of applications begins immediately and will continue until the position is filled.

Wayne State University is an equal opportunity/affirmative action employer.

DIRECTOR, Arnold O. and Mabel M. Beckman Institute for Advanced Science and Technology

The University of Illinois at Urbana-Champaign invites applications and nominations for the position of Director of the Arnold M. and Mabel M. Beckman Institute for Advanced Science and Technology. The Beckman Institute is a broadly-based interdisciplinary research institute with parallel programs in the physical sciences and engineering and in the life and behavioral sciences. Its programs are described at the website: http://www.beckman.uiuc.edu. The Director should be a strong leader with an exceptional record of scholarly accomplishments. A record of understanding and supporting multi-investigator interdisciplinary activities is highly desirable. Candidates must hold a doctoral degree in a discipline represented in the Institute. Those having achieved the rank of Professor in a leading research university and have a record of outstanding academic achievement and competitive funding will be preferred. Familiarity with the academic environment is essential; experience in academic administration is desirable. Salary is open. This full time (twelve month) position is available September 1, 2001.

To assure full consideration, nominations and applications (including a vita) should be postmarked by March 1, 2001, and sent to:

Search Committee for the Director of the Beckman Institute
s/o Office of the Provost
University of Illinois at Urbana-Champaign
Swanland Administration Building, Room 204
601 East John Street

The search committee will begin review of applications March 15, 2001, and continue until the position is filled.

The Department of Communication and Journalism has 18 faculty and 750 majors, including 40 master’s degree students. It offers majors in print journalism, mass communication, communication, and public relations. The Department is the largest department in Auburn University’s College of Liberal Arts. Auburn is a multi-cultural community located in the East Central portion of Alabama between Montgomery, AL, and Atlanta, GA. In addition, Auburn is within easy access of a large variety of cultural and historical sites, activities, and events. The University is located in Auburn with an enrollment of over 23,000 students.

Auburn University is an affirmative action, equal opportunity employer.

St. Thomas University
The Archdiocesan Catholic University of Florida

Vice President for Academic Affairs

Saint Thomas University invites nominations for the position of Vice President for Academic Affairs. This position is available immediately.

RESPONSIBILITIES: The University is seeking a strong, visionary academic leader with strategic planning skills to provide intellectual and administrative leadership for Academic Affairs. The successful candidate will work collaboratively to advance programmatic and instructional quality. As chief academic officer, responsibilities will include academic policy development, program review, planning, curriculum, faculty development, academic personnel administration, library and academic budgeting. This position builds partnerships, demonstrates a commitment to academic and service excellence, utilizes innovative approaches to distribute learning, and enhances the use of technology throughout the campus. Reporting directly to the Vice President are the Deans of Undergraduate Studies, Graduate Studies, and Adult and Continuing Education, Assistant Vice President, Director of Main Library, and the Registrar. This position reports directly to the President.

QUALIFICATIONS:

- Demonstrates ability to develop and implement a model of academic governance which furthers academic excellence and innovation in the academic dimension of the University.
- Experience in achieving an integration of academic and spiritual concerns maximizing the impact of the Catholic faith on the educational programs.
- A record as a decisive academic leader able to manage change with a high level of energy and persistence as well as teamwork and diplomatic skills.
- A record of improving academic quality through assessment.
- An entrepreneurial record of building academic partnerships with the external community, particularly a record with business community partnerships.
- Ability to work collaboratively with Senior Staff as well as faculty.
- Evidence of leadership in the area of enrollment (recruitment & retention).
- Leadership skills to attract and sustain a diverse faculty.
- Appropriate academic credentials, including an earned doctorate from a regionally accredited institution, as well as the teaching, service, and research record that will model high academic expectations.

DESCRIPTION OF THE UNIVERSITY: A young, but growing private comprehensive University committed to its Catholic mission, STU is triscalar, multiethnic and multicultural with a student population of more than 2,300 and a faculty dedicated to educating a diverse student body with innovative approaches to teaching and learning. As a Hispanic Serving Institution, the University has a strong commitment to recruitment, retention, and graduation of our students. Over 91 full-time faculty teach 24 undergraduate programs, 9 graduate programs, and the Law School. The Main Campus is situated on 170 wooded acres conveniently located between Miami and Ft. Lauderdale. The University is guided by a 5 Year Plan reflecting a deep commitment to the institution's mission of Student Success, Diversity, Catholic Identity, Partnerships, and Value-Oriented Education.

APPLICATION PROCEDURE: Applicants should submit a resume, 2-page statement addressing qualifications for the position, and the names, addresses, and telephone numbers of 5 professional references. Please include email addresses and fax numbers if available. Persons wishing to nominate a candidate can submit the candidate's name and resume. Southern Illinois University
Carbondale

Chancellor

Under the leadership of newly appointed President James E. Walker, the University community and Board of Trustees of Southern Illinois University invite applications and nominations for the position of Chancellor of Southern Illinois University Carbondale. SIUC is a NASULGC and AASCU member.

The position is available July 1, 2001 or earlier. Nominations and applications will be held in confidence except for finalists. For full consideration, nominations and applications should be received by March 9. Please address applications, nominations, and communications either to our executive search partner, Dr. Jan Greenwood, Vice President with A.T. Kearney, e-mail address jan.greenwood@atkearney.com, or to Professor Jill Adams, Chair, Chancellor Search Advisory Committee, 601 Office of the President, 1400 Douglas Drive, Southern Illinois University, Carbondale, Illinois 62901-6801. For further information see web site: http://www.siu.edu/chance_search/

Southern Illinois University Carbondale is an affirmative action/equal opportunity employer.
DIRECTOR OF GRADUATE MEDICAL EDUCATION

The University of Medicine and Dentistry of New Jersey-Robert Wood Johnson Medical School’s Department of Family Medicine is seeking a candidate to provide leadership and fulfill administrative and teaching responsibilities inherent in achieving program educational goals for their Residency Programs.

Must have demonstrated ability as a teacher, clinician and administrator, and five (5) years of full-time professional activity in Family Practice, as well as teaching experience in a Family Practice Residency Program. Must be currently Board Certified by the American Board of Family Practice and must be eligible to be licensed in New Jersey. Should have academic qualifications for appointment at or above the Assistant Professor level.

Please send all replies with Curriculum Vitae to: David E. Swee, M.D., Professor and Chairman, UMDNJ - Robert Wood Johnson Medical School, Department of Family Medicine, One Robert Wood Johnson Place, Box 19, New Brunswick, NJ 08903-0019. UMDNJ is an Affirmative Action/Equal Opportunity Employer, M/F/D/V, and a member of the University Health System of New Jersey. Regrettably, we can respond only to those candidates chosen for an interview. To learn more about us, visit our website: http://www.umdnj.edu/hrweb/

PURDUE UNIVERSITY

Position of UNIVERSITY ARCHITECT

Purdue University is seeking applications for the position of University Architect. This position serves as senior advisor to the Vice President for Physical Facilities and to other senior administrators in the University on matters of planning, design and placement of capital projects including the development of physical master plans for all Purdue campuses. The position directs the staff project managers in the programming, designing and coordinating of major renovations, additions and new buildings. Annual construction levels in the range of $60-70 million a year are anticipated to exceed $100 million a year in the near future.

QUALIFICATIONS:
- Bachelor’s degree in Architecture with not less than six years progressive managerial experience with the following required: budget planning and control; administrative supervisory responsibilities; policy, procedure and goal development.
- Knowledge of campus planning, facility design, construction, project management, interior design and landscape architecture.
- Must be a registered architect.

PURDUE UNIVERSITY

Purdue University is Indiana’s Land Grant University, and one of the nation’s leading institutions of higher education and research. Nearly 38,000 students are enrolled at the West Lafayette campus, with an additional 29,000 students enrolled at three regional campuses and through the Statewide Technology Program. The University is committed to increasing diversity throughout the campus and its academic programs. Purdue is located in Tippecanoe County, home to a broad base of high-tech industry and agriculture.

NOMINATIONS/APPLICATIONS:

Screening of applicants will begin on March 19, 2001. However, applications will be accepted until the position is filled. Interested applicants should send their cover letter, resume, and three professional references to:

Marions Bagland
Physical Facilities Human Resources
1663 South Campus Cts., Bldg C.
Posting #WLAD1 262
West Lafayette, IN 47907-1663

Purdue is an equal access/equal opportunity/affirmative action employer fully committed to achieving a diverse workforce.

WAYNE STATE UNIVERSITY

Department of English
Chair Search

Wayne State University seeks nominations and applications for the position of Chair of the Department of English beginning Fall 2001. Applicants should have administrative experience and a record of distinguished publications.

Wayne State University is a Carnegie Doctoral/Research Universities-Extensive institution, located in Detroit’s Cultural Center. The University is strongly committed to its historic urban mission. WSU’s enrollment is 31,000 students (18,000 undergraduates). The English Department has 36 faculty members in the professorial ranks, 13 full-time lecturers, 31 graduate teaching assistants, and 50 adjunct faculty. The department includes the fields of literature, cultural studies, film studies, composition/rhetoric, as well as creative writing, folklore, linguistics, comparative literature, and American Studies, together with an English Language Institute. The department grants BA, MA, and PhD degrees. There are currently 343 undergraduate majors, 130 masters students, and 65 doctoral students.

Applicants should send a letter of interest, curriculum vitae, and three letters of recommendation (or the names, addresses, and telephone numbers of three references) to: Lawrence A. Staff, Dean, College of Liberal Arts, 2226 Faculty Administration Building, English Dept. Chair Search, Wayne State University, Detroit, MI 48202. Electronic nominations/applications may also be submitted to: L. Staff@wayne.edu. Minorities and women are encouraged to apply. Review of applications begins immediately and will continue until the position is filled.

Wayne State is an equal opportunity/affirmative action employer.

DEAN
Social Science Division

Reporting to the Vice President of Educational Affairs, the Dean is responsible for the organization and administration of the Division that includes transfer and career programs in Anthropology, Criminal Justice, Early Childhood Education, Economics, Education, Geography, History, Human Services, Political Science, Psychology and Sociology.

QUALIFICATIONS: Requires a Master’s degree in, or closely related to, any of the disciplines included in the division, as well as teaching experience. Administrative experience preferred. SUBMIT completed application form, current resume, letter of interest, (3) letters of reference and official degree transcripts. Application review will begin March 9, 2001 and continue until position is filled. For application/information, call Human Resources at 847-543-2065, TDD# 847-223-5615, or by e-mail to personnel@clc.cc.il.us.

Dean—School of Education
University of California, Davis

The University of California, Davis, invites applications and nominations for the position of founding Dean of a new School of Education. The Dean, who will report to the Chancellor, will shape and lead a new School that builds upon the existing Division of Education.

The new School of Education will provide leadership for campus-wide involvement in K-12 education, while enhancing and improving on existing activities. Faculty in the basic disciplinary departments outside the School will provide expertise, collaborate in research, and teach in education programs. The core faculty of the School will be focused on research relevant to California’s diverse, multi-lingual population. At maturity, the School will have approximately 30 FTE faculty including full-time appointments and joint appointments, as well as additional positions for visiting scholars.

The School will support several innovative programs that link research, instruction, and service to K-12 schools. Institutes devoted to research and action in selected subjects will engage a broad spectrum of UC Davis disciplinary faculty. Possible focal areas for institutes are mathematics and science, language and literacy, and the social context of schooling. The CRESS Center will house a wide range of collaborative research and professional development projects with K-12 schools.

The goal of the teaching program of the School is to attract leaders for K-12 through undergraduate courses, the multiple-credit credential and single-subject credentials in selected areas; collaborative credential programs with CSU Sacramento; a campus-wide Ph.D. program; and an Ed.D. program offered jointly with CSU Fresno and other UC campuses.

We seek candidates who are committed to academic excellence whose primary scholarly work has been in one of these areas: educational research, or related disciplines. Qualifications include at least two years of experience of classroom teaching, and a strong record of research and publication. The position requires a Ph.D. or comparable terminal degree in a relevant field. The anticipated appointment date is September 2001. The position is a 12-month, full-time appointment with an initial term of five years.

Salary will be commensurate with experience and qualifications. The starting date is September 2001, or as negotiated. Screening will begin March 15, 2001 and the position will remain open until filled. Nominations and applications should be addressed to:

Larry N. Vanderhoof, Chancellor
Office of the Chancellor
University of California, Davis
One Shields Avenue
Davis, CA 95616

UCDavis

The University of California, Davis, is an equal opportunity/affirmative action employer committed to excellence through diversity.

Purdue University
Computer Information Systems & Technology

Purdue University’s Department of Computer Technology invites applications for two or more tenure-track, assistant professor positions at its West Lafayette home campus and various statewide outreach campuses, beginning in August 2001. The department’s mission focuses primarily on teaching, educational scholarship, and applied research, and industry/professional outreach. The West Lafayette position exists in the areas of web-based and client/server system design and application development courses involving contemporary technologies including SQL, Java, and XML. Other possible courses in web technologies (e.g., HTML), networking, and languages may be approved in applications programming (C++), telecommunications, and project management. West Lafayette candidates must participate in both undergraduate and graduate education assignments. Candidates for state-wide outreach positions should be able to teach a variety of foundation courses in end-user computing, application programming, database management, and design, and data communications. All candidates must have an earned Master’s degree in a relevant field. The Ph.D. is not a requirement for employment; promotion, or tenure for these positions. At least three years of full-time, relevant, industrial experience in information systems and business computing is also preferred. Applications will be accepted until the position is filled. Send a detailed resume and academic transcripts to:

CPT Search and Screen Committee, Ad Com HOHE, Department of Computer Technology, Purdue University, 1421 Knoll Hall 242, West Lafayette, IN 47907-1421. Questions should be directed to Professor Jeffrey L. Whittemore (West Lafayette) at phone (765) 494-4545, or on the Internet at jlwhtmwr@purdue.edu.

Purdue University is an equal opportunity, affirmative action employer.

St. John's University, one of the largest Catholic universities in the U.S., boasts an enrollment of 18,300 students pursuing bachelors, masters, doctoral and professional degrees in six colleges. St. John's University, New York invites applications for the following positions for Fall 2001.

**COLLEGE OF PROFESSIONAL STUDIES**
Tenure Track and Non-Tenure Track Positions

**Division of Communications, Journalism and Media Studies**

**Three Assistant/Associate Professors**
The Division invites applications for three tenured professors. The first candidate will teach such courses as Advertising, Marketing, Management and Public Relations, all in conjunction with the communication arts. Ph.D. plus professional experience are required. The second candidate will teach such courses as Publication Graphics, Multimedia Design and Fundamentals of Media Graphics. M.F.A. and professional experience are required. The third candidate will teach such courses as Broadcasting, Newswriting, the Business of Radio and Print Journalism. Ph.D. and professional experience required. Send letter of application, resume and three letters of reference to Dr. Frank Brady, Chair, Division of Communications, Journalism and Media Studies. Or e-mail: bradyf@stjohns.edu

**Division of Computer Science, Mathematics and Science**

**Three Assistant/Associate Professors**
The Division of Computer Science, Mathematics and Science has three exciting tenure track positions available. We seek highly motivated individuals to teach a wide variety of programming, telecommunications, networking and mathematics courses. The successful candidates should have a strong commitment to quality undergraduate education and professional growth. A doctorate is preferred; however, equivalent experience will be considered. Send letter of application, resume and three letters of reference to Dr. Richard O'Landor, Chair, Division of Computer Science, Mathematics and Science. Or e-mail: olandor@stjohns.edu

**Division of Criminal Justice and Legal Studies**

**Three Assistant Professors**

**Criminal Justice**
The Division of Criminal Justice and Legal Studies invites two candidates holding a doctoral degree in criminal justice, public administration or a related field to teach undergraduate and graduate courses in the Criminal Justice Program. Applicants must demonstrate the potential for excellence in teaching and scholarly research. Preference will be given to candidates who have held senior executive positions in law enforcement or corrections.

**Legal Studies**
The Division of Criminal Justice and Legal Studies invites an attorney licensed to practice law in the State of New York to teach in the Legal Studies Program. The candidate must have appropriate and sufficient experience working with and/or supervising legal assistants in a law office environment. The Legal Studies Program is an American Bar Association approved program. Send letter of application, resume and three letters of reference to Professor Bernard G. Heldorfer, Chair, Division of Criminal Justice and Legal Studies. Or e-mail: heldorfb@stjohns.edu

**Division of Hotel, Restaurant, Sports, Travel and Tourism**

**One Assistant/Associate Professor**
The Sports Management Program invites applications for a tenure track position. The successful candidate will be expected to teach courses on the undergraduate level and also participate in the preparation of a curriculum supporting a Master of Professional Studies degree in Sports Management. A doctorate in Sports Management or a related field is required as well as both teaching and professional experience in the field. Send letter of application, resume and three letters of reference to Professor Nancy McGeever, Associate Dean. Or e-mail: mcgeever@stjohns.edu

**UNIVERSITY LIBRARIES**

Tenure and Non-Tenure Track Positions

**Information Literacy**

**Two Non-Tenure Track Positions**
The Queens Library of St. John’s University invites applicants for two non-tenure track faculty positions in Information Literacy. The successful candidates will have a strong background in instructional design and technology for libraries, will work collaboratively to develop and teach information literacy components of the University’s new core curriculum. Additional duties will be assigned in either the Division of Public Service or the Division of Collections and Information Management. Candidates must possess the LMS. Send letter of application, resume and three letters of reference to Dr. James Benson, Dean of Libraries. Or e-mail: bensonj@stjohns.edu

**Division of Collections and Information Management**

**One Assistant Professor**
The Libraries seek an Electronic Collections Librarian to lead in the coordination of intellectual access to electronic resources, including their cataloging. ALA-accredited MLS (or equivalent) and 1-3 years’ experience required, as is a commitment to providing user-centered technical services. Send letter of application, resume and three letters of reference to Dr. James Benson, Dean of Libraries. Or e-mail: bensonj@stjohns.edu

**SCHOOL OF EDUCATION AND HUMAN SERVICES**

Tenure Track Positions

**Department of Early Childhood, Childhood and Adolescent Education**

**Three Assistant/Associate Professors**

**Early Childhood Education**
The Department invites applications for a tenure track assistant or associate professor of Early Childhood Education. Responsibilities include teaching undergraduate and graduate courses in a newly created program of early childhood education. An earned doctorate and experience in urban settings are required. Research, publication and participation in securing and implementing grants are also mandatory. Send letter of application, resume and three letters of reference to Dr. Rebekah Fassler, Department of Early Childhood, Childhood and Adolescent Education. Or e-mail: fassler@stjohns.edu
**Childhood Education**
The Department invites applications for a tenure track assistant or associate professor of Childhood Education. Responsibilities will include teaching undergraduate and graduate courses geared to grades K-6, with an emphasis on urban schools including "low performing" and "alternative" settings. An earned doctorate and experience in urban settings are required. Research, publication and participation in securing and implementing grants are also mandatory. Send letter of application, resume and three letters of reference to Dr. Peter Quinn, Department of Early Childhood, Childhood and Adolescent Education. Or e-mail: quinnp@stjohns.edu

**Adolescent Education**
The Department invites applications for a tenure track assistant or associate professor of Adolescent Education. Responsibilities include teaching undergraduate and graduate courses geared to grades 7-12 (or 5-12 including Middle Schools) with an emphasis on urban settings, and including "low performing" and "alternative" schools. An earned doctorate and experience in urban settings are required. Research, publication and participation in securing and implementing grants are also mandatory. Send letter of application, resume and three letters of reference to Dr. William Sanders, Chair, Department of Early Childhood, Childhood and Adolescent Education. Or e-mail: sandersw@stjohns.edu

**Department of Counseling and Human Services**
**One Assistant/Associate Professor**
**Reading**
The Department invites applications for a tenure track associate professor of Reading. Responsibilities include teaching graduate level courses in theory and practice of literacy instruction, application of technology in literacy instruction including students with special needs; working cooperatively with field-based personnel to improve literacy instruction in the schools. An earned doctorate as well as a record of research and publications and presentations in reading/literacy demonstrating grant-writing ability and experience at emergent literacy levels are required. Send letter of application, resume and three letters of reference to Dr. Richard Sinatra, Chair, Department of Human Services and Counseling. Or e-mail: sinatrar@stjohns.edu

**Department of Administrative and Instructional Leadership**
**Two Assistant/Associate Professors**
**Educational Administration**
The Department invites applications for a tenure track assistant or associate professor of Educational Administration. Responsibilities include teaching courses in educational leadership; participating in a major revision of the School's leadership programs at the masters' and doctoral levels; and helping to create a Leadership Academy. An earned doctorate is required.

**Higher Education**
The Department invites applications for an assistant or associate professor of Higher Education. Responsibilities include directing the current student development practice in higher education program, creating new programs to serve the higher education community, and conceiving new curricula to prepare doctoral graduates for the professorate. An earned doctorate is required as well as a strong background in research and experience in higher education program administration. Send letter of application, resume and three letters of reference to Dr. Gene Gelsert, Chair, Department of Administrative and Instructional Leadership. Or e-mail: gelsertg@stjohns.edu

**THE PETER J. TOBIN COLLEGE OF BUSINESS**
**Tenure and Non-Tenure Track Positions**
**Department of Economics and Finance**
**Two Assistant/Associate Professors**
The Department of Economics and Finance invites applications for tenure track and one year contract positions for candidates who possess strong research capabilities as well as demonstrated high quality teaching performance in Finance and International Finance. Ph.D. in Finance required. Candidates are expected to conduct research that leads to publication in recognized refereed and professional journals.

**Department of Management**
**Two Assistant/Associate Professors**
The Department of Management invites applications for tenure track and one year contract positions for candidates who possess strong research capabilities as well as demonstrated high quality teaching performance in Organizational Behavior or Management Information Systems. Ph.D. in Management required. Candidates must show evidence of an interest in pursuing scholarly work and have substantial practical management or consulting experience in that field.

**Department of Marketing**
**One Assistant/Associate Professor**
The Department of Marketing invites applications for tenure track or one year contract positions for candidates who possess strong research capabilities as well as demonstrated high quality teaching performance in Advertising and Integrated Marketing Communications. Ph.D. in Marketing required. Candidates are expected to also demonstrate evidence of excellent communication skills and demonstrated potential to conduct applied research.

Send letter of application, resume and three letters of reference to: Dr. Nejdet Delenur, Associate Dean for Academic Affairs. Or e-mail: delenur@stjohns.edu

**ST. JOHN'S COLLEGE OF LIBERAL ARTS AND SCIENCES**
**Tenure and Non-Tenure Track Positions**
**Department of Biological Sciences**
**Two Assistant Professors**
The Department of Biological Sciences invites applications for two non-tenure track professors to teach introductory courses to majors and non-majors. One appointment (3 years) is at the University's Staten Island campus, and the second position (1 year) is at the Queens campus. Applicants should have a Ph.D. or equivalent in the Biological Sciences. Send letter of application, resume and three letters of reference to Dr. Irvin N. Hirshfield, Chair, Department of Biological Sciences. Or e-mail: hirshfield@stjohns.edu

**Department of English**
**Three Assistant/Associate Professors**
The Department invites applications for a tenure track assistant professor in 18th Century British Literature, and two tenure track assistant professors in Medieval Literature. Secondary interests may include Cultural Studies, Women's Studies and Critical Theory. An earned doctorate is required and applicants should show promise of significant potential for scholarly publication. Send letter of application, resume and three letters of reference to Dr. Stephen Sicari, Department of English. Or e-mail: sicari@stjohns.edu
Department of Fine Arts
Assistant/Associate Professor
The Department of Fine Arts is seeking a tenure-track assistant or associate professor in the area of art history with expertise in the history of visual communications, to serve diverse and growing department with multiple visual arts majors. Ph.D. or Ph.D. candidate required. Send letter of application, resume and three letters of reference to Belenna Lauto, Chair, Department of Fine Arts. Or e-mail: lautob@stjohns.edu

Department of History
Assistant/Associate Professor
The Department of History invites applications for a tenure-track assistant professor in Colonial American history. An earned doctorate in history is required, and applicants should show potential for significant scholarly publication. Send letter of application, resume and three letters of reference to Dr. Dolores L. Augustine, Chair, Department of History. Or e-mail: augustid@stjohns.edu

Division of Library and Information Sciences
Assistant/Associate Professor
The Division of Library and Information Science invites Ph.D. applicants for a tenure-track assistant or associate professor in Digital Libraries/Information Technology or a cognate area. The successful candidate will have a strong background in information technology, will work collaboratively to develop curricula and programs in the area of digital libraries, and will be able to teach all aspects of digital library design and implementation. Send letter of application, resume and three letters of reference to Dr. James Benson, Department of Library and Information Science. Or e-mail: bensonj@stjohns.edu

Department of Mathematics and Computer Science
Three Assistant/Associate Professors
Computer Science
The Department of Mathematics and Computer Science has two tenure-track positions in computer science on the University's Staten Island campus. Responsibilities include teaching both major and non-major courses. Applicants should possess a Ph.D. in computer science and have a demonstrated record of teaching and research.

Mathematics
The Department of Mathematics and Computer Science has one tenure-track position in mathematics on the Queens campus. Responsibilities include teaching both major and non-major courses. Applicants should possess a Ph.D. in mathematics and have demonstrated record of teaching and research.

Department of Philosophy
Two Assistant Professors
The Department of Philosophy invites applications for two, one-year, non-tenure track positions for its University's Staten Island campus. Rank: assistant professor. AOS: Open. AQC: Ethical Theory, Metaphysics. Teaching Load: 4/4. Ph.D. and teaching experience required. Send letter of application, resume and three letters of reference and teaching evaluations to: Dr. Arthur Giganelli, Chair, Department of Philosophy. Or e-mail: giganelli@stjohns.edu

Department of Psychology
Two Assistant/Associate Professors
Quantitative Methods
The Department invites applications for one tenure-track assistant or associate professor in quantitative methods. The position involves teaching undergraduate and graduate courses in statistics and graduate courses in measurement and multivariate statistics. Additional strength in another area of psychology is desirable. Current or previous research grants are a plus.

Clinical Psychology
The Department invites applications for one tenure-track assistant or associate professor in clinical psychology. The position involves teaching undergraduate and graduate courses and supervising graduate students in research. We are particularly interested in applicants who do research in areas of assessment. Current or previous research grants are a plus. Send a statement of research and teaching interests, a current vita, copies of representative publications and/or proposals, and three letters of reference to: Alice S. Powers, Acting Chairperson, Department of Psychology. Or e-mail: powersa@stjohns.edu

Department of Speech, Communication Sciences and Theatre
Two Assistant/Associate Professors
Speech and Rhetorical Studies
The Department invites applications for a tenure track Speech Communication generalist at the assistant professor rank for the University's Staten Island campus. Responsibilities include teaching both major and non-major courses. Applicants should possess a Ph.D. in communication and have a demonstrated record of teaching and research.

Department of Theology and Religious Studies
Two Assistant/Associate Professors
Moral Theology
The Department invites applications for a tenure track specialist in moral theology, with a research focus on moral theology, especially Catholic social teaching, to teach on the University's Queens campus. This faculty member will be expected to teach both major and non-major courses. Applicants should possess a Ph.D. in moral theology and have a demonstrated record of teaching and research.

Systematic Theology
The Department invites applications for a tenure track specialist in systematic theology, to teach on the University's Staten Island campus. This faculty member's principal teaching responsibilities will be in the undergraduate core curriculum in theology and religious studies. This faculty member will also be expected to teach both major and non-major courses. Applicants should possess a Ph.D. in systematic theology and have a demonstrated record of teaching and research.

All positions will remain open until filled. Please send all applications, noting appropriate contact name, to:

Search for Department Chair
Department of Anthropology

Wayne State University, Dept. of Anthropology invites applications and nominations for the position of Chair, beginning fall 2001. WSU, one of the leading urban research universities in the United States (designated a Carnegie Research University-Extensive Institution), is located in downtown Detroit, and serves a diverse student population. The Department has 14 full-time faculty with important linkages to WSU Schools of Business, Law, and Medicine, and the College of Engineering. The Department is committed to a four-field approach and offers BA, MA, and PhD degrees in anthropology, and an applied MA in medical anthropology, and has an outstanding program of funded research. Departmental strengths include industrial/organizational and medical anthropology, with ongoing international study programs. The successful candidate will hold a Ph.D. in any field of anthropology with a record that will qualify him/her for appointment as Professor. We are looking for a colleague with a national reputation in the field, and experience with funded research, a specialty that complements our current faculty, and a dynamic vision for the future of anthropology. Review of applications begins immediately and will continue until the position is filled. Applications should include a full vita, and names/addresses/phone numbers/emails of 4 academic references, of whom at least one can comment on administrative experience. Applications should be sent to: Search Committee for Anthropology Chair, c/o Lawrence Schafft, Dean, College of Liberal Arts, 2226 Faculty/Administration Building, Wayne State University, Detroit, Michigan 48202, or may be submitted directly to LScuff@wayne.edu.

Wayne State University is an equal opportunity/affirmative action employer.

The School of Engineering and Applied Science
Faculty Positions
in Science and Engineering of Nanoscale Systems

The School of Engineering and Applied Science at the University of Pennsylvania announces three new faculty positions in the area of Nanoscale Science and Engineering. Appointments may be made in Electrical Engineering, Chemical Engineering, Mechanical Engineering, or Materials Science and Engineering. Applications are encouraged from all relevant areas of engineering, physics, and chemistry.

Successful candidates are expected to have or to develop internationally recognized research programs, excel in undergraduate and graduate teaching, and take a leadership position in defining this field.

Applications are being accepted at all ranks with compensation commensurate with experience. Interested persons should include a resume, list of publications, statement of teaching and research interests, copies of a few representative publications, and names and contact information for several references. These should be sent to the chair of the search committee.

The search will remain open until the positions are filled.

Assistant to the Vice President
For Academic Affairs
Community College of Philadelphia

Community College of Philadelphia, an urban multi-campus institution, invites applications and nominations for the position of Assistant to the Vice President for Academic Affairs. This staff position reports directly to the Vice President for Academic Affairs, and assists the Vice President in matters related to faculty and instruction. The Assistant to the Vice President is responsible for coordination of program and curriculum audits, accreditation self-studies and feasibility studies, will work with Deans and faculty in development, review, evaluation and production of courses, programs, and curricula and is responsible for student academic support.

Qualifications:
- Doctorate preferred; Master's required.
- Five years of directly related, progressively responsible academic administrative experience.
- Ability to work collaboratively with various constituencies.
- In-depth familiarity with regional and specialized programmatic accreditation.
- Understanding and support of community college mission.
- Demonstrated ability to write well is essential.

Excellent salary and fringe benefits. Qualified candidates must submit resume, cover letter and three letters of recommendation by March 15, 2001 to: Karen Cary, Academic Affairs Office, Community College of Philadelphia, 1700 Spring Garden St., Philadelphia, PA 19130. The College encourages applications from individuals from traditionally under-represented groups. AA/EOE. Information about the College can be found at http://www.ccp.cc.pa.us.

Community College of Philadelphia

Vice Chancellor for Administration

The University of Michigan – Flint seeks a Vice Chancellor for Administration (VCA), who is the CFO as well as the chief business and administrative officer of the campus, reporting to the Chancellor. UM-Flint, located on over 70 acres along the riverfront in downtown Flint, is one of three campuses of the University of Michigan, serving 6,500 commuting students and offers 61 undergraduate and 8 master's degree programs with a budget of $50 million.

The position works closely with administrative and academic leaders, within a shared decision-making environment, to develop and plan the financial goals, objectives and strategies of the university and to execute these plans with discipline. This individual is responsible for overseeing six administrative units, including the business and auxiliary services, human resources, facilities management, environment, health and safety, recreation center, and public safety. In addition to managing these areas, this person will be working closely with the community and state funding sources.

An ideal candidate would have 7 to 10 years in a financial management role in an institution of higher education or a complex private, public or not for profit organization, or equivalent financial and management experience. It will be important for this person to possess creative problem-solving skills and have the ability to assess and formulate future development strategies. Further, a successful candidate would have been responsible for managing several activities simultaneously, with outstanding skills in communication and leadership.

An undergraduate degree is required, with strong preference given to those with advanced degrees in either business, public administration or accounting.

Applications should be submitted to the following address including a resume. Review of applications will continue until the position is filled although initial screening of candidates will begin on February 15, 2001. Please include a cover letter indicating how you fit with this position and names of five references with their contact information. UM-Flint is an equal opportunity/affirmative action/equal access employer and supports the principle of diversity.

Sierra Nevada College-Lake Tahoe (www.sierranevada.edu) is a four-year independent, nonsectarian liberal arts college in the process of building a new campus. We are seeking faculty for fall semester, 2001, who are innovative, energetic, technologically astute, have a commitment to undergraduate education, and a vision of their program area which will help to shape its future growth.

Chair of the Computer Science Program, a 10 month full-time administrative and instructional position to lead a new computer science major initiative fall, 2000. This position is receiving special support from a community advisory board composed largely of highly successful entrepreneurs in computer technology. The program is affiliated with Carnegie Mellon University through its subsidiary, CTE. Responsibilities: program faculty supervision, budget development, academic advising, student recruitment, administration, instruction of classes as required. Requirements: Masters, Ph.D. or equivalent in computer science, successful teaching and administrative experience in higher education, state of the art knowledge of computer technology, entrepreneurial orientation. Sue Welsch, Search Director.

To apply please send your vita, a one-page vision statement, and a list of three references to Sue Welsch, Sierra Nevada College, 999 Tahoe Blvd., Incline Village, NV 89451 by March 1.
Wayne State University
Dean, College of Science

Wayne State University invites applications and nominations for the position of Dean of the College of Science. The College of Science consists of 9 departments: Audiology and Speech-Language Pathology, Biological Sciences, Chemistry, Computer Science, Geology, Mathematics, Nutrition and Food Sciences, Physics and Psychology. There are over 200 tenured and tenure-track faculty members and more than 300 graduate teaching and research assistants in the College. The general-fund operating budget for FY 2001 is $23,340,000; in addition the College received $1,730,000 in gifts and approximately $15,200,000 in grants, with the majority of these funds derived from NIH, NSF and other federal agencies. The University was ranked 45th in R&D expenditures (FY1998) among public universities and 61st overall with $148M in the most recent NSF ranking for research support, with several of the departments in the College of Science ranked between 40 and 70.

Located in the heart of the Cultural Center of a major industrial city, more than 40% of Wayne State’s students are in graduate and professional programs. Over 4,100 students were enrolled in the College of Science in the Fall, 2000 semester. During the past year approximately 600 degrees were granted, including over 60 Ph.D’s. The College and the University anticipate that research and graduate education will continue to be strengthened in the coming years with emphasis on the life sciences, physical sciences and engineering and with the development of interdisciplinary centers and institutes. With a statewide initiative to create a Life Sciences Corridor in Southern Michigan, Wayne State has a tremendous opportunity to be on the forefront of life sciences research that will benefit all Science disciplines. The Dean will participate in the development of the core technologies for the Corridor program.

The Dean is the chief academic and administrative officer of the College and will be expected to provide leadership for academic and research programs, including management of budgets, recruiting of faculty members and development of new or restructured programs bridging the various academic disciplines.

The successful candidate for Dean should be qualified for appointment as a tenured professor in one of the departments in the College and should have established a strong record of research, teaching, and academic administration.

Additional information about the College of Science and Wayne State University can be obtained from the following web sites: http://www.science.wayne.edu http://www.wayne.edu.

Nominations and applications should be submitted immediately to:

Sociology - Master's degree with 18 graduate hours in sociology. Reference #10348-HO

Speech - Bachelor's degree with 18 graduate hours in speech. Reference #10349-HO

Speech/Theatre - Master's degree with 18 graduate hours in theatre and 18 graduate hours in speech or the commitment to obtain the 18 graduate hours in speech. Reference #10350-HO

NOW HARRIS MONTGOMERY COMMUNITY COLLEGE DISTRICT

Now the fifth-largest community college district in Texas, NHMCCD comprises North Harris College, Kingwood College, Tomball College, Montgomery College, six satellite centers, and The University Center. Cy-Fair College, the fifth comprehensive community college in the district, is expected to open in fall 2003. More than 25,000 credit students enroll each semester with 15,000 more in continuing education, workforce development and customized training.

Full-time faculty positions are anticipated and subject to budgetary approval by the NHMCCD Board of Trustees. Faculty members should possess knowledge of and commitment to the mission of a comprehensive community college, a passion for continuous learning and self-improvement, a commitment to excellence in teaching and student achievement, and superior communication skills. Faculty positions require a strong commitment to institutional and community service as well as to continuing professional development. Faculty members must be willing to teach a diverse student population using a variety of modern methodologies with tools such as computers, multimedia, interactive TV, Internet, and video. Fluency in Spanish and multicultural experience is highly desirable.
the classroom. Distance education certification or willingness to obtain within one year. Reference #30247-HO

Engineering Technology (Networking/Telecommunications/Cisco CCNA) - Associate’s degree in an appropriate field. C.C.N.A., M.C.S.E. or C.N.A. certification or willingness to obtain within two years. Work experience in the networking/telecommunications field. Proficient in MS Office and Windows software packages. PC hardware knowledge. Two years teaching or training experience. Experience in curriculum design and development. Ability to integrate and use technology within the classroom. Distance education certification or willingness to obtain within one year. Reference #30248-HO

English (two positions) - Master's degree with 18 graduate hours in English. Experience teaching basic composition courses and literature survey courses (American, British, and World). Reference #30249-HO

ESL/Developmental Studies - Bachelor's degree in developmental composition or English as a second language with teaching experience in developmental reading. Reference #30250-HO

General Business - Master's degree with 18 graduate hours in business. Work experience in industry. Two or more years of teaching or training experience, ability to integrate and use technology within the classroom. Proficient in MS Office software packages. Experience in curriculum design and development. Distance education certification or willingness to obtain within one year. Reference #30251-HO

Government (two positions) - Master's degree with 18 graduate hours in political science. Reference #30252-HO

Management/Marketing (two positions) - Master’s degree in an appropriate field. Work experience in management and/or marketing. Two or more years of teaching or training experience, ability to integrate and use technology within the classroom. Proficient in MS Office software packages. Experience in curriculum design and development. Distance education certification or willingness to obtain within one year. Reference #30253-HO

Math - Master’s degree in math including a minimum of 18 graduate hours in math with ability to teach developmental as well as college transfer classes. Reference #30254-HO

Speech - Master’s degree with 18 graduate hours in speech or applicable communications courses. Reference #30255-HO

MONTGOMERY COLLEGE

Biology - Master’s degree with 18 graduate hours in biology, biochemistry, biotechnology, microbiology, or molecular biology. A combination of hours in these fields may be used to meet the 18-hour requirement. Reference #40241-HO

Computer Information Systems - Master’s degree in computer field. Preferred: three years community college experience and industry standard certifications such as MCSE, etc. Active in professional organizations and community service. Reference #40242-HO

Computer Information Systems - Bachelor’s degree in the computer field. Earned credit towards MCSE 2000 certification. Professional experience in the computer networking field. Two or more years teaching or training experience. Commitment towards timely completion of Master’s degree in the computer field. Reference #40243-HO

English - Master’s degree with 18 graduate hours in English (e.g., literature, composition studies, creative or technical writing, rhetoric, or literary/cultural studies). Ability to teach all of the following: composition, developmental reading and writing, and surveys of literature. Reference #40244-HO

Psychology - Master’s degree with 18 graduate semester hours in psychology. Reference #40245-HO

Wellness/Physical Education (12 month position) - Bachelor’s degree in a field directly related to wellness/fitness. Two years wellness/fitness experience required (educational or private setting). Philosophy of student responsibility for personal wellness and healthy lifestyle. Reference #40246-HO

* Finalists will be asked to submit a detailed professional portfolio for Montgomery College positions. Information on portfolio content is located at http://job.nhmc.edu. Interviewees will be selected from the list of finalists submitting portfolios. The interview will include an interactive teaching demonstration.

Application Review

Review of application materials will begin 2/26/01 and will remain open until filled. Applicants should submit a letter of application specifically addressing the qualifications including the job title and reference number; statement of teaching philosophy; extended resume; names, addresses, and telephone numbers of five job-related references; and copies of transcripts of all college work. If applying for multiple positions a separate cover letter and application material should be submitted for each position. Applicants with foreign credentials should submit a US transcript evaluation. Material may be mailed, faxed or forwarded electronically to:

North Harris Montgomery Community College District
Human Resources
250 N. Sam Houston Parkway E.
Houston, TX 77069
or email jobs@nhmccd.edu or Fax to 281-260-3186

REGISTRAR

Emerson College invites applications for the position of Registrar. Reporting to the Vice President for Enrollment and Student Affairs, the Registrar will provide overall leadership of the Registrar’s Office, and will manage all operations in records management, registration, degree audit, graduation, transfer credit, evaluation, enrollment verification and course scheduling. In addition, the Registrar will assist in the maintenance of Web-based applications and will continue the development of technical solutions to streamline office processes and the collection and analysis of enrollment data for the purposes of evaluation and planning. Bachelor’s degree required. Master’s preferred, and a minimum of three to five years of management-level experience in similar capacity. Knowledge of F.E.R.P.A. and other applicable federal and state laws, proficiency in MS Office, working knowledge of an on-line student information system and Web-based applications, and the ability to collect data and produce enrollment reports desired. Send cover letter and resume to: Office of Human Resources, Emerson College, 120 Boylston Street, Boston, MA 02116. Emerson College is an equal opportunity-affirmative action employer focused on workforce diversity. Visit our website at: www.emerson.edu.
DEAN OF INTERNATIONAL STUDIES

The University of Wisconsin-Madison, one of the top ranked research universities in the United States, invites nominations and applications for the position of dean of International Studies. The university seeks a talented and visionary individual who will provide leadership for its international programs as we advance into the 21st century. Founded in 1848, the University of Wisconsin-Madison is one of the largest land-grant universities in the United States. The university has approximately 2,175 faculty, 6,300 professional and administrative staff, 5,000 classified employees, over 41,000 students, and a budget of more than $1.5 billion.

UW-Madison has one of the richest arrays of programming in international studies in the country. The campus is home to the International Institute, a cross-college partnership of 16 area and international studies programs, including the federally funded National Resource Centers, the federally funded Center for International Business Education and Research, and established international programs in schools and colleges ranging from agriculture to law to engineering. The dean of International Studies provides general leadership across the institution in the broad area of international education, and is responsible for its strategic planning and coordination. The dean promotes faculty collaboration and initiatives in international research programs. Reporting to the chancellor and the provost, the dean has three primary roles and areas of responsibility: serve as the senior international education officer for the university; serve as the director of the International Institute; and serve as the director of the Office of International Studies and Programs. More comprehensive information about these areas can be accessed at the following web sites:

http://www.wiscinfo.wisc.edu/udlp/
www.wiscinfo.wisc.edu/global/
www.wiscinfo.wisc.edu/internationalinstitute/
www.wiscinfo.wisc.edu/studyabroad/

Major qualifications for this position include a relevant background in scholarship and teaching, evidence of leadership and experience in the management of interdisciplinary and international programs; a proven record in program development, strategic planning, administration and supervision of professional staff; demonstrated ability to respond to students' needs effectively and compassionately; the ability to work effectively with individuals and groups from a variety of cultures; and academic accomplishments as a scholar and teacher that meet the standards for a tenured appointment as full professor at the University of Wisconsin-Madison. Candidates should be aware of intellectual developments in area and international studies; work well with other deans, faculty, and people in universities around the world; and with the public and private sectors; have the capacity to manage substantial operations, and the ability to raise funds from public and private sources.

Applications and nominations must be received by 31 March 2001 to ensure consideration. Later applications and nominations may also be considered. The committee particularly encourages applications and nominations of women and persons of underrepresented groups. Applicants should include a current resume or curriculum vita and a cover letter that addresses how their strengths and experience match the qualifications for the position, and what they see as challenges and opportunities of the position, as well as the names and addresses of five references. Candidates will be informed before references are contacted. Please note that under Wisconsin statutes the names of nominees and applicants who explicitly request confidentiality will not be made public. However, the university is required to release the names of the finalists who will be interviewed by the chancellor. Submit applications and nominations to:

Dean of International Studies Search and Screen Committee
Professor Mark Beisinger, Chair
University of Wisconsin-Madison
500 Lincoln Drive, 133 Bicentennial Hall
Madison, WI 53706
(608) 262-9337
Fax: (608) 265-7806

The University of Wisconsin-Madison is an Equal Opportunity/Affirmative Action Employer.
INSTITUTE FOR LIBERAL ARTS AND INTERDISCIPLINARY STUDIES

VISITING SCHOLAR: AMERICAN STUDIES

The Institute for Liberal Arts and Interdisciplinary Studies at Emerson College invites applications for a Visiting Scholar in American Studies. This position is a one-year, non-tenure-track appointment (renewable annually for up to three years) which will begin September 1st, 2001. We are seeking an interdisciplinary scholar with a background in Anthropology, Literature, Visual or Media Arts, or Performance Studies whose research and teaching focus on one or more of the following areas: The cultures of the Americas, Urban Experience and Social Change, Transnational Film/Media. Teaching responsibilities for this position will be three courses per semester, and will include at least one first year seminar on topics such as "The Caribbean Imagination" or "The City." This person will also be expected to maintain a record of active scholarship and participate in faculty colloquia, teaching workshops, and other academic programs organized by the Institute. Ph.D., teaching experience, and a strong commitment to interdisciplinary approaches to the liberal arts are required.

VISITING SCHOLAR: SCIENCE AND TECHNOLOGY STUDIES

The Institute for Liberal Arts and Interdisciplinary Studies at Emerson College invites applications for a Visiting Scholar in the History, Sociology, or Philosophy of Science and Technology. This position is a one-year, non-tenure track appointment (renewable annually for up to three years) which will begin September 1st, 2001. We are seeking a scholar whose research and teaching focus on one of the following areas: Cultures of Computing, Cognitive Science/Artificial Intelligence, Environmental Science/Urban Ecology. For this position, we are also seeking someone with experience using digital communication and web-based technologies in a classroom context. Teaching responsibilities for this position will be three courses per semester, including one section of a course in either Science and Society or Environmental Humanities. This person will also be expected to maintain a record of active scholarship and participate in faculty colloquia, teaching workshops, and other academic programs organized by the Institute. Ph.D., teaching experience, and a strong commitment to interdisciplinary approaches to the liberal arts are required.

Applications, including a cover letter, curriculum vitae, selected publications, evidence of teaching excellence, and the names and contact information for three references, should be sent to: David Bogen, Executive Director, Institute for Liberal Arts and Interdisciplinary Studies, Emerson College, 120 Boylston Street, Boston, Massachusetts 02116-1946. Review of applications will begin on March 1, 2001, and will continue until the position is filled. Emerson College is an Affirmative Action/Equal Employment Opportunity Employer. For more information about the Institute for Liberal Arts and Interdisciplinary Studies at Emerson College go to: http://www.emerson.edu/acadpts/institute/
Dean of Admissions and Financial Aid

Swarthmore College seeks nominations and applications for the positions of Dean of Admissions and Financial Aid, a newly expanded position.

Founded in 1864 by the Religious Society of Friends, the College is located on a 330-acre campus in the greater Philadelphia area. Dedicated to academic excellence and encouraging social responsibility, the College has an enrollment of approximately 1,400 undergraduates from 50 states and 66 countries who work closely with an outstanding faculty of 160. The College offers the Bachelor of Arts degree and, in engineering only, a Bachelor of Science. The student to faculty ratio is 8:1.

Working closely with the President of the College, the other senior officers, and the faculty, the Dean of Admissions and Financial Aid will develop and implement a strategy to attract and support a student body of outstanding intellectual ability, committed to a better society, and representative of a diverse range of backgrounds. The Dean reports directly to the President and oversees the offices of admissions and financial aid, which include approximately 25 employees and an operating budget of $2 million. The College annually awards more than $12 million in student financial aid.

The ideal candidate will have a deep appreciation for, and the ability to articulate, the complex academic and social mission and aspirations of Swarthmore College. In addition, the candidate will have outstanding leadership and oral and written communication skills, extensive relevant experience in a highly complex and technical field, knowledge of the uses of information technology in admissions and financial aid, and a proven record managing a complex project, respected for their intelligence and experience, and encouraged to communicate freely. A bachelor’s degree is required, with an advanced degree preferred.

The search committee will begin reviewing applications immediately and will continue until the position is filled. Minority candidates are especially encouraged to apply. For fullest consideration, please send materials not later than February 28, 2001. Nominations and expressions of interest should be forwarded, in confidence, to:

Shelly Weiss Storbeck, Managing Director
A.T. Kearney, Inc.
333 John Carlyle Street
Alexandria, VA 22314
703/739-4613 (phone)
703/518-1782 (fax)
shelly.storbeck@atkearney.com (email)

For more information about the College, please consult the website: www.swarthmore.edu

Swarthmore College is an equal opportunity employer committed to excellence through diversity.

C O L B Y

Colby, a highly selective private liberal arts college of 1750 students located in central Maine, seeks applicants for the following position:

DIRECTOR OF FINANCIAL PLANNING

The Director of Financial Planning will oversee the development and management of Colby’s $90 million budget, maintain and enhance the College’s long-term financial model, coordinate risk management activities, and perform contract review and approval. She/he will work closely with department and program directors in developing, monitoring, and analyzing institutional budgets and operations. The Director will provide extensive assistance to the President’s staff in analyzing and developing long-range institutional plans. Reporting to the Administrative Vice President, the Director of Financial Planning will serve as a key member of Colby’s administrative management team.

Qualifications include: M.B.A. is required; extensive knowledge of finance management, accounting, and integrated information management systems required; excellent demonstrated financial analysis and computer modeling skills required; excellent written, verbal, analytical, and organizational skills required; a minimum of five years of increasingly responsible financial management experience; must possess a high degree of self-motivation. Prior College/University experience is preferred.

Interested candidates should submit two copies each of a cover letter and resume, including the names and telephone numbers of three references, to: Douglas C. Terry, Director of Personnel Services, Colby College, 5500 Mayflower Hill, Waterville, ME 04901-8855. A review of applications will begin immediately and will continue until the position is filled.

Colby is an Equal Opportunity/Affirmative Action employer. Applications and nominations of women and minorities who would enrich the diversity of the campus community are strongly encouraged.

For more information about the College, please visit the Colby website: www.colby.edu

Director of the University Honors Program

Northeastern University invites applications and nominations for the position of Director of the University Honors Program. Established in 1986, the program has grown and developed to its current stage that supports a typical enrollment of 1600 students. Northeastern University is an urban Carnegie Doctoral/Research Extensive University that is student-focused and dedicated to a cooperative education-experiential learning model. A diverse student body of 16,000 undergraduates and 4,000 graduate students is enrolled in seven undergraduate colleges, nine graduate and professional schools, and two part-time undergraduate divisions.

The Director is responsible for providing leadership in the development and implementation of the program's curricula within each college, the development of effective recruitment strategies, the administration of the University's competitive academic scholarships, the coordination of applications/competitions for national scholarships, and participation in external development activities.

Applicants must have a Ph.D., significant administrative experience, and a strong record of scholarship and teaching commensurate with rank of Professor or Associate Professor. The successful applicant will also possess effective interpersonal and communication skills along with an ability to be visionary and innovative in directing the Honors Program. The expected start date for this 12-month position is July 1, 2001.

Please submit an application letter, curriculum vitae, and three references to Dr. Gilda Barabino, Vice Provost for Undergraduate Education, Northeastern University, 112 Hayden Hall, Boston, MA 02115.

Northeastern University is an Equal Opportunity/Affirmative Action, Title IX Employer.
Housing Services
Residence Life - Positions for Fall 2001
Residence Director

The University of Massachusetts Amherst invites applicants for the position of Residence Director. The Residence Director is a full-time professional staff member with live-in responsibilities that include the comprehensive management of the residential program for the 275,675 students housed in 1,300 residence halls. Duties include: coordination of a dynamic student development program with an emphasis on leadership and community development; promotion of diversity-sensitive approaches in all aspects of the position; supervision of graduate and undergraduate staff; instruction of a seminar for new Resident Assistants; opportunity to serve on chair temperament and Student Affairs committees or task forces; management of facilities systems; implementation of student disciplinary procedures.

Qualifications: Master's degree in a related field such as Student Development, Higher Education, or Counseling plus one year post-baccalaureate experience required as a live-in staff member to include crisis intervention and work with diverse student populations (degree must be completed by date of hire); demonstrated experience and initiative with student and community development; supervision and staff training; advising student groups; creation and implementation of management systems. Also, demonstrated commitment and ability to operationalize affirmative action and non-discrimination policies, regulations and principles. Some evening and weekend work plus on-call/call-back duty.

Hiring Salary: $77,695 as of July 2001 for a 43-week contract, a furnished apartment the value of which is considered part of compensation, salary adjustment for on-call duties, and benefits including tuition waiver options.

To receive priority consideration, send letter of application, resume, a copy of your academic transcript(s), and the name and telephone number of three references by February 23, 2001. We will be interviewing at ACPR. Applications will be accepted after the priority deadline until all vacancies are filled. Send materials to:

Michigan State University
Director of Supportive Services

Responsibilities: Reporting to the Assistant Provost for Academic Student Services and Multicultural Issues, the Director of the Office of Supportive Services will: oversee the Office of Supportive Services (OSS). This Office consists of the College Achievement Admissions Program (CAAP), the Ronald E. McNair program, the Summer Research Opportunity Program (SROP), the Undergraduate Research Opportunity Program (UROP), and the Summer University Program Excellence Required (SUPER). Work closely and collaboratively with colleges and academic units in designing programs and activities utilizing a diagnostic and consulting model of student success in order to promote the achievement of academic excellence of CAAP students enrolled or planning to enroll at Michigan State University. Engage in research, support the evaluation of the quality and effectiveness of supportive services for CAAP students, and design and utilize evidence-based interventions. Maintain all records documenting program services, compliance with program requirements, and performance outcomes as they relate to Federal TRIO requirements and University expectations. Actively participate in proposal development and solicitation of external funding for office activities. Provide direct supervision for the staff, budget, and operations of the Office of Supportive Services. Actively participate in State, Regional, and National TRIO organizations. Participate as a member of the Assistant Provost for Academic Student Services and Multicultural Issues leadership team.

Requirements: Candidates must have a successful track record as a leader who has demonstrated knowledge of first generation, low-income, educationally disadvantaged students and their issues. Successful candidates must also have an understanding of technology, effective service delivery systems, and skills in designing and implementing interventions for students with various learning needs and styles. The position requires strategic planning and planning skills, strong written and interpersonal communication skills, and the ability to work collaboratively with colleges, departments, faculty and administrators at all levels in a complex, diverse community. Extensive supervisory experience is desired. A Doctorate degree is required.

Please send resume and letter of application by February 28, 2001 to Ms. Penny Wall, Office of the Assistant Provost for Academic Student Services & Multicultural Issues, 155 Student Services Building, East Lansing, MI 48824.

Michigan State University is an Affirmative Action, Equal Opportunity Institution.

Empire State College
State University of New York

Area Coordinator of Science, Math, & Technology
Center for Distance Learning

SUNY Empire State College is a national leader in non-traditional education with a mature distance learning program established in 1975 and located in Saratoga Springs. The college is grounded in the approach that education begins with the goals and interests of its adult students. The Center for Distance Learning provides both individual courses and complete undergraduate degrees at a distance. The Center coordinates 11,000 course enrollments a year using Web-based delivery and print-based course packages for adult learners studying independently or through groups on the web. ESC faculty are expected to work with both undergraduate and graduate students. The Academic Area Coordinator in Science, Math, and Technology (Assistant professor, full-time, tenure track), working with other full-time and part-time faculty in the Center, is responsible for curriculum development, delivery and maintenance of courses in the broad area of Science, Math, and Technology. This position will most likely have direct supervision over development in technology and information systems. The Area Coordinator also mentors students, providing individual academic advisement. The Area Coordinator teaches at a distance in areas of her or his expertise.

Earned Ph.D. or Ed.D. in appropriate field is strongly preferred. Candidates with other academic credentials, including at least a Master's degree and relevant professional experience will also be considered. Minimum three years teaching experience preferred (contains work with adult students, non-traditional teaching format preferred); practical experience in Information Systems, technology or other areas of interdisciplinary science desirable; the ability to think creatively about teaching and learning; particularly as educational delivery options and resources are expanded by the use of technology is essential. Salary and benefits are competitive. Anticipated hire date: 7/1/01. For more information, please visit our web site (www.escc.edu/CDL).

ESC an AA/EEO/IRCA/ADA employer, is committed to excellence through diversity in its faculty.

VICE PRESIDENT FOR FINANCE AND ADMINISTRATION

The college is seeking a vice president for finance and administration. Reporting directly to the president, the vice president serves as the chief operations and financial officer for the college. The vice president is involved in the development and implementation of fiscal policy and budget decisions that support academic and administrative priorities; oversees business and budget management, human resources, computing/information services, public safety, facilities management, buildings and grounds and auxiliary services. Must have a master's degree and at least 8 years of experience in leadership positions at a large institution. More information see our Web site at www.nyctc.cuny.edu. Resumes to: Michelle Harris, Human Resources, NYCTC, 300 Jay Street, Namm 321, Brooklyn, NY 11201.
President

Regis College, a leading Catholic college for women in Weston, Massachusetts seeks an exceptional person to serve as its ninth President. This is an opportunity for a visionary leader to build on a tradition of pride and excellence and take an important liberal arts institution to its next level of achievement. Rooted in a strong tradition of academic distinction and commitment to education of women as whole persons, Regis College was founded in 1927 by the Congregation of the Sisters of St. Joseph of Boston.

Consistently ranked by U.S. News and World Report as one of the top ten liberal arts colleges in the Northern United States, Regis College grants Bachelor's degrees in twenty fields, as well as providing interdisciplinary and individually designed majors. At the graduate level, it grants the Master of Arts in Teaching, the Master of Science degree in Nursing, and the Master of Science in Leadership and Organizational Change. The College has a total of approximately 880 undergraduates and 250 graduate students. The faculty of 67 full-time and 68 part-time members possesses a highly developed commitment to teaching, and a low student-faculty ratio allows Regis to afford its students a distinctive level of individualized instruction.

The Regis campus, located on an attractive 168-acre site approximately twelve miles from Boston, has undergone major modernization in recent years. With a total non-faculty staff of approximately 250, the College's total operating budget for the fiscal year 2000 was approximately $24 million.

Working closely with faculty, staff, trustees, alumnae and other colleagues, the next President will craft and implement a unified vision and strategy to lead the College and advance its mission in the future. She will build and empower a strong leadership team, strengthen lines of communication within the College, fortify the College's financial position, and enhance its visibility, reach and reputation in the greater Boston community and beyond. The President will also embrace and advance the distinctive character of Regis as a Catholic college sponsored by the Congregation of the Sisters of St. Joseph.

The successful candidate will be an outstanding leader with a thorough understanding of the goals and values of a liberal arts education, and how it supports and intersects with professional preparation, a special sensibility and commitment to education and leadership development for women, and a deep appreciation for Regis College's purpose and values as a Catholic college. She will possess a flair for fundraising and external relations, a naturally collaborative and accessible leadership style, and successful experience leading an organization of similar scale and complexity, with a budget and staff of comparable size.

Regis College will search nationally for candidates, with special attention to distinguished educators and administrators from Catholic colleges and universities. The Presidential Search Committee is open to considering individuals with significant experience in other settings whose intellectual vitality, leadership qualities, and personal convictions indicate the capacity and commitment to lead the Regis College community.

Inquiries, applications and nominations should be directed in confidence to: Lisa Saveried, Vice President and Director, Isaacson Miller, 334 Boylston Street, Suite 500, Boston, Massachusetts 02116; Email: lsaveried@imsearch.com. Regis College is an equal opportunity/affirmative action employer committed to increasing the diversity of its staff. More information on Regis College can be found at http://www.regiscollege.edu.

ASSOCIATE EXECUTIVE VICE CHANCELLOR— CAMPUS COMMUNITY RELATIONS

University of California, Davis

The University of California, Davis, invites applications and nominations for the new position of Associate Executive Vice Chancellor—Campus Community Relations. The Associate Executive Vice Chancellor reports jointly to the Provost and Executive Vice Chancellor, and will serve as a primary advisor on matters of campus community relations to deans, vice provosts, and other senior campus administrators. The incumbent will help the campus chart a course that will ensure attention to those components of our social environment that affect community, campus climate, diversity and inclusiveness, and will identify strategies that motivate all levels of the organization to participate in community building.

The Associate Executive Vice Chancellor will develop, in collaboration with a broad and diverse cross section of the campus community, a strategic plan that embodies our Principles of Community and serves as our blueprint for the first decade of the 21st century.

The Davis campus is a member of the Association of American Universities (AAU) and has three colleges (Agricultural and Environmental Sciences, Engineering, Letters and Science), four professional schools (Graduate School of Management, School of Law, School of Medicine and School of Veterinary Medicine); the Division of Biological Sciences; the Division of Education; and a University Medical Center in Sacramento. The Davis campus winter 2001 enrollment is 26,000 students and the annual budget is $1.6 billion.

We seek candidates with exceptional communication and interpersonal skills, clear understanding of the complex challenges and opportunities presented within a diverse campus community, a deep understanding of organizational dynamics, excellent speaking and writing skills, the ability to plan well, and a proven record of leadership in a large organization, preferably a research university.

The successful candidate will demonstrate a superior ability to work with confidence and credibility among our campus community members including faculty, students, staff and administrators. Further, the successful candidate will bring to the position a history of working successfully within a multicultural environment, of effective social environmental planning, and of development and implementation of academic programs or social programming addressing issues of community and diversity. Education: a terminal degree is desirable.

Salary will be commensurate with experience and qualifications. To apply send a letter of interest, résumé and a list of four professional references. The position is open until filled; for full consideration, applications should be received by March 22, 2001. Nominations and applications should be addressed to:

Robert D. Grey
Provost and Executive Vice Chancellor
Office of the Chancellor
University of California, Davis
One Shields Avenue
Davis, CA 95616-8358

UCDAVIS

The University of California, Davis, is an equal opportunity/affirmative action employer committed to excellence through diversity.

ASSISTANT VICE PRESIDENT FOR STUDENT AFFAIRS BUDGET AND HUMAN RESOURCES

California State University, Fullerton is searching for an energetic and dynamic person to serve as the principal budget and personnel officer for the Division of Student Affairs. Reporting to the Vice President for Student Affairs, the Assistant Vice President is responsible for the development and maintenance of budget and human resources policies and practices that are consistent with University requirements. The Assistant Vice President supervises staff members and coordinates, prepares and submits required reports to the Vice President. The Assistant Vice President works collaboratively with division managers and advises the Vice President on budget and personnel matters. The incumbent has broadly delegated authority for administrative functions and is expected to exercise significant judgment in the development and implementation of administrative policies and procedures relating to fiscal and personnel management, information systems, and safety issues.

Qualifications A Master’s degree is required, preferably in higher education, student development, business administration, public administration or related field. Ph.D. desired. Knowledge of general accounting principles and budget management skills involving statistical and arithmetical presentations of data and use of computers in accounting functions and technology systems is required. Knowledge of human resources/personnel functions is necessary to manage the human resources functions of the division. Excellent interpersonal, written and oral communication skills are essential. Experience in working cooperatively with many different offices and personalities is policy interpretation and compliance.

Salary The starting salary is competitive and commensurate with qualifications and experience. The position includes a broad and attractive benefit package. The University seeks to fill this position as soon as possible.

Application Procedure Application materials must be received by March 5, 2001 to ensure full consideration. Please send a letter of interest with a statement of qualifications, resume, and the names, addresses and telephone number of three references to Dr. Silas H. Agrego, Chair, Search Committee for Assistant Vice President for Student Affairs Budget and Human Resources, Office of the Vice President for Student Affairs, LH 805, California State University, Fullerton, P.O. Box 6300, Fullerton, California 92834-6830. (714) 278-2486. To learn more about Cal State Fullerton and Student Affairs, visit our website: www.fullerton.edu

AA/EO Institution
Ivy Tech State College - Sellersburg

...by providing quality technical education to students across Indiana and by providing a dynamic and exciting work environment where your contribution is appreciated. Ivy Tech is seeking a dynamic and visionary leader to serve as Chancellor for the Sellersburg, Indiana region.

Chancellor

Ivy Tech State College is Indiana’s third largest public post-secondary institution with 23 campuses located throughout the state. Ivy Tech will enroll over 70,000 students statewide this academic year and offers the Associate of Science and Associate of Applied Science degrees, Technical Certificates, industry and skills-specific certifications, and business, industry and apprenticeship credit and non-credit training.

The Ivy Tech Sellersburg Campus is located just 10 minutes from downtown Louisville in beautiful southern Indiana. The 96,000 square foot main facility sits on 50 rolling acres with an additional facility located in downtown Sellersburg. The Sellersburg campus serves the Indiana counties of Floyd, Clark, Crawford, Scott, Harrison, Orange and Washington, as well as metropolitan Louisville. As part of the competitive Louisville market, Ivy Tech Sellersburg is one of two more than 20 institutions of higher learning within a thirty-mile radius. The campus achieved double digit enrollment increases in 2000 and enrolled more than 2,500 students in the Fall semester.

The Ivy Tech system is administered by a President within the policies established by a state board of trustees. Each geographic region of the state (typically 4 to 8 counties) is administered by a Chancellor, who meets regularly with and receives advice, counsel and direction from a regional board of trustees.

The College seeks applications and nominations for the position of Chancellor for the region served by the Sellersburg campus. The Chancellor provides the direction, planning and leadership to assure that the educational and training needs of the students and employers in the Sellersburg and surrounding area are met. The Chancellor will provide executive oversight for the deans and directors assigned to the academic affairs, student affairs, business affairs, human resources, facilities management, public relations, business and industry training and development functions of the regional administration. The Chancellor will establish and maintain a positive presence in the academic, business and service communities and provide personal leadership in the development (fund-raising) efforts of the college.

Qualifications:

A Master's degree in education, public administration, business administration or a related field is required. A Doctorate and previous post-secondary teaching experience are preferred.

Position requires substantial leadership and management experience, preferably in a post-secondary education environment. Previous experience with budget development and administration are pluses.

The successful candidate will be a visionary, have strong interpersonal skills and a collaborative working style and possess the ability to function effectively with faculty, staff, students, trustees, state and local college administrators, legislators and the general public.

Ivy Tech offers a comprehensive compensation package, including TIAA-CREF. To ensure consideration, submit a letter of application that describes your educational management philosophy and your salary requirements by February 28, 2001; however, applications may be considered until the position is offered. To apply, send application materials to: Ivy Tech State College, Attn: Todd Voigt, Director of Human Resources, 8224 Highway 311, Sellersburg, IN 47172.

Ivy Tech is an Accredited/Equal Opportunity/Affirmative Action State College

Highline is an equal opportunity employer and operates under an affirmative action plan.
Colby, a highly selective private liberal arts college of 1750 students located in central Maine, seeks applicants for the following position:

ASSOCIATE DEAN/DIRECTOR OF ADMISSIONS AND FINANCIAL AID
DIRECTOR OF MULTICULTURAL ENROLLMENT

Colby seeks a talented, energetic, imaginative professional to direct its multicultural enrollment efforts. This is an extremely important position at the College, given its deep and longstanding institutional commitment to campus diversity.

The person hired will be involved in virtually all aspects of admissions, including travel, interviewing, evaluation of applications, and will have the specific responsibility to lead an entire admissions and financial aid staff in enrolling students of diverse cultural, racial, and ethnic backgrounds. The clear articulation of an enrollment strategy for African-, Latinoa-, Asian-, and Native-American students, an effective implementation of this strategy, and fastidious follow-through will be essential.

Excellent interpersonal, communication, and leadership skills are a must. Candidates must also have a strong commitment to education in a small, residential, liberal arts college and at least 3-5 years of admissions experience. Possession of a Master's degree or higher is preferred.

Interested candidates should submit two copies of a cover letter and two copies of a resume, including the names and telephone numbers of three references, to: P. N. French Associates, Inc., Attn: Multicultural Enrollment Search, 126 Nowell Farme Road, Carlisle, MA 01741.

For additional information regarding this position, please contact Peter French at 978) 369-4569. Applications may also be directed to: Douglas C. Terp, Director of Personnel Services, Colby College, 550 Mayflower Hill, Waterville, ME 04901; 8855. A review of applications will begin immediately and will continue until the position is filled.

Colby is an Equal Opportunity/Affirmative Action employer. Applications and nominations of women and minorities who would enrich the diversity of the campus community are strongly encouraged.

For more information about the College, please visit the Colby web site: www.colby.edu

THE UNIVERSITY OF IOWA

Iowa City, Iowa

The University of Iowa (UI) is seeking an innovative and forward thinking communications professional to become its next Vice President for External Relations. UI is a highly ranked Carnegie I University in the Big Ten enrolling over 28,000 students, with a world class health science center. The University is located in a community known for excellent quality of life and diversity. (http://www.uiowa.edu)

The Vice President will report directly to the University President. The VP will collaborate and coordinate with various constituents design comprehensive communications strategies plans for internal and external audiences, supportive of the mission and strategic initiatives of UI, and will implement these plans within a decentralized communications structure. The position will direct all major central university communications, including news services, broadcasting services and related activities.

The successful candidate will be an excellent strategist, facilitator and communicator with demonstrated leadership in implementing an integrated communications plan (marketing and public relations) in a complex, sophisticated environment. Exceptional in team building and staff development, the individual should have the ability to work effectively with a wide range of publics and demonstrate success promoting diversity. Must be successful in media relations and knowledgeable of traditional and evolving communications technologies. Must be able to manage resources responsibly and function in a public sector institution.

The ideal candidate will have an advanced degree in related field, at least ten years progressively responsible experience in public relations/marketing, including five years of management experience (preferably some portion within a university setting), or an equivalent combination of education and experience.

Screening of applications will begin immediately and continue until the successful candidate is identified. Applications should be submitted in writing to:

Vice President for External Relations
600 Karen Otto/Nick Fraunfelder, EMN/VP/ER, 2015 Spring Road, Suite 510, Oak Brook, IL 60523 (e-mail: iowaver@emn.org)

For confidential inquiries: Nick Fraunfelder 949751-5070 or Karen Otto 630/575-6145

The University of Iowa is an affirmative action/equal opportunity employer. Women and minorities are encouraged to apply.

AFFIRMATIVE ACTIONS IN RECRUITMENT, ADMISSION, AND FINANCIAL AID

As a scholarly enterprise, higher education, to be successful, must be grounded on diversity of perspectives. How much diversity depends on the nature of the community it purports to serve. Over the last 20 years, public institutions committed themselves to the taking of affirmative actions to enhance the diversity of their student bodies. Most of them used group underrepresentation or and ethnicity as “plus” factors in their selection processes. This honest use of ethnicity generated many debates. These debates produced more heat than light; heat that may engulf us all, if we don’t follow the few points of light.

We must follow the few points of light to educate students for living and working in our multi-ethnic society; we must provide to all qualified students an equal opportunity to contribute to and benefit from higher education; we must consider potential contributions of any student to diversity as a “plus” factor in decisions regarding campus visitations, summer institutes, transfer or articulation agreements, waiving of fees, matching of scholarships offered by other institutions, awarding of scholarships to automatic-admits, or mentoring and counseling services.

We must follow the points of light and insist that merit be revisited to include skills, abilities, and experiences needed to contribute to and succeed in higher education. Whenever appropriate, we should consider factors such as underrepresentation in a field of interest, ability to relate to people from various backgrounds, demonstrated maturity, socio-economic background, geographic origin, persistence in overcoming discrimination, community services, language abilities, employment history, leadership, cross-cultural communication, perseverance in the face of adversity, relative freedom from prejudices, and willingness to serve in specific geographical areas. All students will benefit from this revamping of our flawed selection systems.

In states where use of ethnicity is not prohibited, we should use it as a “plus” factor if our procedures have been found to have an unfair disparate impact on any ethnic group. This use of ethnicity should be narrowly tailored, and should not depend on more than necessary. It should allow for exceptions, it should not preclude availability of seats or scholar-

ships for other students, and should be reviewed periodically to assess the extent to which it is still warranted.

In states where use of ethnicity is prohibited, we still can use it as a factor if it is a qualification without which an activity cannot be carried out; we can still use it as stipulated in programs authorized by state or federal governments; and we can allocate scholarships for women athletes. We can also consider allocation of university funds to multi-ethnic organizations for award of scholarships to their members in a nondiscriminatory fashion, as done by the National Science Foundation; and we can continue to administer ethnicity-based scholarships as stipulated by private donors. Furthermore, we can encourage the development of women and minority scholarships programs funded and administered by corporations who are striving to diversify their workforces.

Let us remember with the Law School Admission Council that the goal of an admission committee is not simply to admit the “best” individual applicants as measured by test scores but to assemble the “best class [by] ... bringing into the learning environment the real-world perspectives, values, and experiences of the larger society in which students will practice.”

Let us remind our institutions that Federal Judges have recently ruled, in Washington and in Michigan, that the Equal Protection clause of the Constitution permits university admissions programs which consider ethnicity for other than remedial purposes, and that educational diversity is a compelling governmental interest that meets the demands of strict scrutiny of ethnic-conscious measures.

Let us remember that affirmative actions are more about ensuring fair and open competition than about atonement, reparation, or compensation; let us remind our institutions that affirmative actions are more about denying preferential treatment to unqualified European American males than about granting preferential treatment to Asian-Americans, African-Americans, Hispanic Americans, Native Americans, and European American females. We owe it to our kids, we owe it to higher education, and we owe it to America.

If interested in submitting a ¡Punto Final! “think piece,” please e-mail us at sloutlook@aol.com for guidelines.

PERALTA COMMUNITY COLLEGE DISTRICT

SEEKING CANDIDATES FOR PRESIDENTS

College of Alameda • Merritt College • Vista Community College

The Chancellor of the Peralta Community College District is pleased to announce the official search process to identify and select the presidents for College of Alameda, Merritt College, and Vista Community College, three of the four colleges in the District. The Peralta Community College District is located in the beautiful Oakland/San Francisco Bay Area, an area which leads the world in technology and innovation. The District is seeking to appoint three campus presidents who will become part of the Chancellor’s team responsible for implementing an ambitious agenda in advanced training and higher education to serve all segments of a culturally diverse urban community. The Peralta Community College District serves six cities in the East Bay Area. The District is renowned for its support of education and has a national reputation for developing effective approaches to serving the varied interests and needs of the community. The Peralta Community College District, founded in 1964, serves 27,000 students, and is one of the top community college districts in the State of California in transferring students into the University of California system.

Individually is invited to apply who are interested in joining a team of educational leaders, who understand the principles and distinction of excellence in management and commitment to visionary leadership, and who are committed to community service and academic excellence. Presidents serve as the chief executive officers of their colleges and report to the Chancellor of the District.

Mission Statement • The mission of the Peralta Community College District is to provide accessible, high quality adult learning opportunities to meet the educational needs of the multicultural East Bay community.

College of Alameda

College of Alameda, California’s only island-based community college, offers both park-like tranquility and easy access to urban bustle. Having served almost a quarter of a million day, evening and weekend students since its 1970 founding, College of Alameda enjoys a well-deserved reputation for excellence in its academic, vocational, and student-support programs. The College is proud of its strong ties to the City of Alameda and is recognized for its strong partnerships with the local business community. The College’s nearly 5,500 students benefit from a lively and dynamic campus and academic and vocational offerings including Aviation Maintenance Technology, Computer Science, and Computer Information Systems, Anthropology, and the Vietnamese language studies.

Merritt College

Nestled in the hills of East Oakland on an 125-acre site above San Francisco Bay, Merritt College offers students the opportunity to study in one of the most dramatic natural settings in Northern California. With a panorama that includes the Golden Gate Bridge and the Pacific Ocean, Merritt’s striking vistas provide a breathtaking backdrop for its packed roster of first-rate academic and vocational programs. Merritt’s nearly 6,500 students benefit from a variety of courses of study including acclaimed programs in Administration of Justice, Landscape Horticulture, and Nursing.

Vista Community College

Just two blocks from the University of California at Berkeley, the energetic urban campus of Vista Community College stands on the cutting edge of community college education. University preparation and occupational training classes form the core of Vista’s curriculum, which also features model programs in fields as diverse as American Sign Language, Biotechnology, and Multimedia. A special arrangement allows Vista students to complete lower-division requirements in evening and Saturday classes at the UC Berkeley campus. Vista’s more than 4,000 students represent the Bay Area’s ethnic, cultural and economic communities.

PREFERRED QUALIFICATIONS - The Chancellor will consider educational background, professional experience, accomplishments, reputation and character in the search for the president. Leading candidates will have demonstrated success in entrepreneurial and innovative approaches to the challenges and opportunities outlined in the presidential search profile.

APPLICATION PROCESS - Individuals interested in submitting application materials for any of these three positions are encouraged to obtain an application packet that includes the challenges and opportunities and preferred qualifications for each college. This information can be obtained by accessing the District's web page at www.peraltacc.ca.us/presidents.htm, or contact:

Larry Hardy, Associate Vice Chancellor for Human Resources
Peralta Community College District
333 East 8th Street, Oakland CA 94606

A separate advisory selection committee has been appointed for each of the colleges. Individuals are encouraged to apply for one or more of the vacancies. The three presidential advisory selection committees will begin reviewing nominations and applications on Monday, February 26, 2001 and will continue until the position is filled. To ensure full consideration, application materials should be received no later than 4:30 p.m. (WST), March 7, 2001. For additional information, contact:

Narcisa Polonio, Director
Association of Community College Trustees (ACCT)
1740 "N" Street, NW, Washington, D.C. 20036
Telephone: (202) 775-4667 or (202) 276-1983
E-mail: NPolonio@acct.org

APPLICATION INSTRUCTIONS - Individuals interested in the position(s) of College President must submit a separate application package for each position. The application package should state in a brief letter (maximum five pages) how they would address each college’s challenges and opportunities and how they meet the elements of the presidential profile.

Applicants should also submit a current resume and the names, business and home telephone numbers of eight references: two supervisors; two subordinates (including one classified or support staff); two faculty members; and two business or community members. (Applicants from sectors other than higher education should submit comparable references.) Note: references will not be contacted without the applicant’s permission.

Application materials should be submitted to: Presidential Search Committee, c/o Larry Hardy, Associate Vice Chancellor for Human Resources
Peralta Community College District
333 East 8th Street
Oakland, CA 94606-2844

Sexual harassment is a real and serious problem at all levels of our society, including some colleges and universities. It can affect any student, regardless of sex, race, or age.

Harassing behavior, if ignored or not reported, is likely to continue and become worse rather than go away. Its impact on a student's educational progress and attainment of future goals can be significant and should not be underestimated. A student might, for example, have trouble learning, drop a class or drop out of college altogether, lose trust in college officials, become isolated, fear for personal safety, or lose self-esteem. A college should not excuse the harassment with an attitude of "boys will be boys," by deeming it a matter of "emerging adolescent sexuality," nor should it be ignored for fear of damaging a professor's reputation. That does nothing to stop the harassment and can even send a message that such conduct is accepted or tolerated by the college. When a college makes it clear that sexual harassment will not be tolerated, trains its staff, and appropriately responds when harassment occurs, students will see the college as a safe place where they can learn.

Definitions

Sexual harassment can take two forms: quid pro quo and hostile environment.

Quid pro quo harassment occurs when a college employee causes a student to believe that he or she must submit to unwelcome sexual conduct in order to participate in a college program or activity, or causes a college official to believe that the employee will make an educational decision based on whether or not the student submits to unwelcome sexual conduct. For example, quid pro quo harassment occurs when a teacher threatens to fail a student unless the student agrees to date the teacher.

It does not matter whether the student refuses to submit to the teacher's demands and suffers the threatened harm, or does what the teacher wants and thus avoids the harm. In either case, the harassment by the college employee is unlawful.

Hostile environment harassment occurs when unwelcome sexually harassing conduct is so severe, persistent, or pervasive that it affects a student's ability to participate in or benefit from an education program or activity, or creates an intimidating, threatening, or abusive educational environment. It can be created by a college official, another student, or even someone visiting, such as a student or employee from another college.

Immediate Action

Whichever type occurs, a college must take immediate and appropriate steps to stop it and prevent it from happening again. The judgment and common sense of teachers and administrators are important elements of any response. But the school is responsible for taking all reasonable steps to ensure a safe learning environment.

Under federal law, a college is required to have a policy against sex discrimination and to notify employees and students of the policy. A policy against sex discrimination, particularly one that specifically addresses sexual harassment, is an extremely effective method for preventing sexual harassment.

A college is also required to adopt and publish grievance procedures for resolving sex discrimination complaints, including complaints of sexual harassment. Good procedures provide an effective means for promptly and appropriately responding to those complaints. Finally, a college is required to have at least one employee responsible for coordinating efforts to comply with Title IX.

Everyone can recognize blatant sexual advances, but what else is characterized as inappropriate? Some such behaviors are displaying or distributing sexually explicit drawings, pictures, graffiti, and written materials; sexual gestures, sexual or "dirty" jokes; touching oneself sexually; or talking about one's sexual activity in front of others.

Exceptions

Not all physical contact is considered sexual in nature. For example, an athletic coach hugging a student who makes a goal is not harassment. A lot of common sense is necessary and prevails. Can a male compliment a female on her appearance? Of course, a good guideline is that one can say whatever one would say if one's wife were present.

Sexual conduct must be unwelcome in order to be sexual harassment. Conduct is unwelcome if the student, or anyone else, does not request or invite the conduct, and views it as offensive or undesirable.

It is important to remember that just because a student does not immediately speak out or complain does not mean that the sexual conduct was welcome.

A student might feel that objecting would only result in increasing the harassing conduct. Sometimes students feel intimidated by the conduct and/or feel too embarrassed, confused, or fearful to complain or resist. Also, a student who willingly participates in conduct on one occasion might on a subsequent occasion decide that the same conduct has become unwelcome.

Both faculty and college officials should encourage students to speak out and complain about unwelcome sexual conduct—to the harasser and then, if it doesn't end, to an appropriate college official.

Sexual harassment can occur at any college activity and can take place in classrooms, halls, cafeterias, dormitories, and other areas. Too often, the behavior is allowed to continue simply because students, faculty, and staff are not informed about what sexual harassment is or how to stop it. Students and college staff must be able to recognize sexual harassment, understand what they can do to prevent it from occurring, and how to stop it if it does occur.

Dr. Mellander is a professor at George Mason University.
Esquina
Editorial

Latinas are increasingly breaking through society's gelatinous ceiling and entering the professional ranks in many disciplines. They are earning more advanced degrees, becoming doctors, lawyers, publishers, social scientists, athletes, engineers, investors, professors, etc. Yet despite our respective positions in the workforce, our earning potential and contributions, I sometimes ponder the reality that things have not changed all that much. Is being a woman and/or a person of color still "a millstone about our necks," despite society's broad but unanimous acceptance of diversity's positiveness?

We have certainly made progress, availing ourselves of opportunities that have opened up for us. But many Latinas, to date, still are expected to take on traditional family roles, no matter how many degrees earned, how large a staff she might supervise, how many lives she's saved behind enemy lines, or how many zeros in her salary. At home, it seems that she will always be the ama de casa.

Many women, Latinas included, dream of a career, marriage, and children, and not necessarily in that order. It's not an impossible trinity. Unfortunately, the balance of the three is what is difficult to attain. If she can afford to delegate some domestic tasks to lighten her load, she's fortunate, or if she marries someone who'll share the household responsibilities, she's fortunate too. But generally speaking, many Latina professionals shoulder more, not less, responsibility—managing a business planner while managing household operations as well.

One article looks at the Latina women's rights movement and how it still struggles behind that of non-Hispanic women. While women of color have benefited from the rightfully earned "privileges" of the women's movement, perhaps Latinas need to spearhead a movement of their own in order to address parochial interests.

One place to start is at the elementary stage—from K-12. "NMSU's MAXIMA to the Rescue" showcases a program at New Mexico State University through which K-12 teachers are involved in instructional development so they can help young Latinas think outside the box about their future.

Our next issue will hone in on community colleges. We'll examine the role of community colleges and how the community college system is evolving, current statistics, and more.

The contributions of Latinos and Latinas have long been overlooked by mainstream historians of the U.S. Few people know about Mercedes Cebrián, the first Cuban-American woman to become a lieutenant colonel in the U.S. Army and the first to be elected to the U.S. Army Intelligence Hall of Fame; María Amparo Ruiz de Burton, a Mexican-American novelist and the first Latina to write in English about the Southwest after it was taken over by the United States; Puerto Rican feminist Luisa Capetillo; or Guatemalan labor and civil rights activist Luisa Moreno.

"Many of these women were well known in their communities, but they were not well known outside of their communities," said historian Vicki L. Ruiz, chair of the Chicana and Chicano studies department at Arizona State University in Tempe. "It is important to recognize these women because the history of Latinas is often overlooked not just in U.S. history texts but also in women's history and Latino history books. Latinas have been an important part of the American experience since the expedition of Francisco de Coronado in 1540 and the founding of Saint Augustine in 1565."

Ruiz and Virginia Sánchez Korrol, head of the Brooklyn College Puerto Rican and Latino studies department, have launched a project titled *Latinas in the United States: An Historical Encyclopedia*, a two-volume book honoring Latinas who made their mark in politics, arts, media, and business between the 16th century and the 1970s. It is slated for publication in 2003 by Indiana University Press.

"What we want to do is give a sense of the historical, regional, and cultural breadth of Latinas in U.S. history," said Ruiz, adding that she and Korrol decided to stop their work in the 1970s because they did not want the encyclopedia to become a *Who's Who*. Rather, they want an academically rigorous account of an overlooked history of the contributions of Latina women of different national descents.
“Part of the joy of the project and part of the challenge is trying hard not to overlook anyone,” said Ruiz.

Sánchez Korrol said they initially worried about not gathering enough material for the project. But as word of their work has spread, they’ve been inundated with letters from people across the country who want a family member or someone they know included in the encyclopedia. They continue to accept recommendations.

“About one-third of our entries are coming from people who heard about our project and wrote to us about it,” she added.

Ruiz said that when she was growing up, what she read about Latino history in the U.S. was limited and seemed to involve only men—Pancho Villa, Herman Cortes, those who died at the Alamo. The texts certainly never included the stories she was regaled with that focused on the hard-earned accomplishments of the women in her family. Ruiz learned about her Mexican American heritage at the kitchen table, hearing tales of the past from her mother and grandmother. She heard about coal-mining struggles, labor activism, strikes, farm workers, and politics. Sánchez Korrol’s experience was the same—she read little about the important contributions Latinos have made in U.S. history—and as time went on, she wanted to learn more, especially about Latinas.

“It was our story, and we wanted to get it out there,” she said. “We want people to understand that each of these groups shares a unique history.”

Both women have spent their professional careers studying and writing about Latinas and Latinos. The stories they have told reflect the interests of their respective departments—Mexican American women for Ruiz and Puerto Rican women for Sánchez Korrol and the accomplishments and challenges of each in often unheralded lives. Sánchez Korrol is the author of *From Colonial to Community: The History of Puerto Ricans in New York City*. But, when the opportunity arose, both were ready to take the next step and work on a collaborative effort that encompassed the stories of all Latinas.

Ralph Carlson, who published a two-volume work on Black women, had approached Ruiz several times about undertaking a project on the accomplishments of Latinas, but Ruiz was busy finishing another book for publication—*From Out of the Shadows: Mexican American Women in the 20th Century*. Once that was completed, she was ready to take on the bigger project, the history of all Hispanic women in the U.S. She turned to Korrol for help.

Despite the geographic distance between the two—Sánchez Korrol living in New York and Ruiz living in Arizona—the historians have managed to build a close working relationship. Though different in their cultural upbringings, the two share strong professional interests that have created ties that bind. Both women were the first to get college degrees in their respective families as well.

“There is really no separation,” said Sánchez Korrol. “We’re in tune.”

She recalls that when she was growing up, people around her had negative attitudes toward Latinos. She hopes that the project will put the Latino community in a different and more positive light.

“People would say ‘You’re not like the others,’ but I was like the others,” she said. “I was lucky. I made it.”

Before her tenureship at Brooklyn College, Sánchez Korrol was an English teacher and taught American literature to high school students. She said she was always looking for Latinos in the texts and never seemed to find them, and as she started a family, her desire to find more about Latino contributions in history grew.

“When I had children, I had a tremendous urge to let them know who they were,” said Sánchez Korrol. “I wanted them to know we have an important history here.” The encyclopedia project arose and gave her the opportunity to tell the history.

Nearly three years ago, the two historians began planning their work on
the encyclopedia. In addition to the 800 entries on prominent women, the historians also plan to include some 500 photographs as well as essays about Latinas in religion, the arts, politics and labor unions, and marriage across cultural and racial lines.

"The hardest part is making sure their voices come through," said Ruiz. "We want people to see their warmth and humor. We want this to be an engaging project. We want people to say, 'Wow, I want to know this person.'"

Sánchez Korrol said the women who make the final cut will be women who played pivotal roles in "advancing our communities or working for the community in ways that maintained the viability of our communities."

The enormity of the project is not lost on any of the people so far involved in carrying it to publication in 2003.

"It's an ambitious project," said their managing editor, Carlos Cruz, who has undertaken a number of tasks to help the books along, including coordinating graphics, photos, and computer-related issues. The historians plan to develop CD-ROMs based on the encyclopedia and to develop an interactive website based on the works in the encyclopedia where interested people can ask questions and get answers culled from the book.

Cruz called the project important and vital. "Latinas have been marginalized in history—because they are women and because they are Hispanic women."

"Finding the financing for carrying out such a massive project has been one of the biggest challenges. They received $140,000 from the Ford Foundation."

"There are tremendous challenges in completing this project, but the most acute is financial," she said. "The project itself is an expensive one."

Sánchez Korrol said much of the expense of putting together such a project involves travel between the co-authors for collaboration, gathering photos from families and archives nationwide, meeting with all of the associate editors, and doing basic research. The two have compiled a group of associate editors to help them on the project, a group that Ruiz said brings an "array of talents and networks." They include Célia Álvarez of Arizona State University, West; Louise Año Nuevo Kerr; University of Illinois, Chicago; Lillian Castillo-Speed, University of California, Berkeley; Barbara Cruz, University of South Florida; María Cristina García, Cornell University; and Nélida Pérez, Hunter College-CUNY.

Sánchez Korrol worries about the funding, but her optimism is infectious.

"This history is still marginal to the mainstream," she said. "We have to take this history and make it more important. If you don't see yourself in the past, how will you invest in the future? Women always have been primary movers. That's important to bring out. It's important for our children to see this."

Sánchez Korrol said the warm and welcoming public response to their project has helped the authors get through some of the challenging moments of putting such a project together.

"We didn't expect this interest," she said. "It made us feel very humble. It made us feel we have a tremendous responsibility to cumplir. We owe them. We just have to do it despite the challenges."

"The encyclopedia will be an important publication because "so much of the work on the Latino communities in the United States is segregated into national movements," she noted. "Then there is the scholarly audience. There is nothing like this available in this area. It can be used by public schools and libraries."

But the historians hope that the work will mean much more to the Latino community and that it will push other historians to include Latina history in their own texts of U.S. history.

"We don't want this to just stay on the shelves of the library," said Ruiz. "We want this to be readable, to be the type of book people buy for their mothers as a gift."

Ruiz said she hopes the books will also inspire other women to keep pursuing their dreams. She cited statistics that concern her deeply about Mexican American Latinas. The 1990 census, for example, indicated that only five percent of Mexican American women in the Southwest who were 25 years or older and employed full time reported having attended four years of college. Moreover, she said, 38 percent of those women reported having eight years or less of elementary school.

"We hope young women will read the encyclopedia and say, 'I can do this,' and will see these women as role models," said Ruiz. "We hope the encyclopedia will be an important educational tool in reaching young Latinas."

The public is encouraged to submit information and ideas for the project at vsankorr@brooklyn.cuny.edu. Also, Ruiz can be reached at (602) 965-5091, and Sánchez Korrol, at (718) 951-5561.
Room at the Top—For Improvement

Women Up 100%; Hispanics Up 1%

BY ISIS ARTZE

The largest increase in the percentage of women presidents was at two-year institutions, where they represented nearly eight percent of presidents in 1986 and more than 22 percent in 1998.

More specifically, ACE found that in 1998, when the study was conducted, 89 percent of college presidents were Caucasian and 81 percent were male.

Alarming statistics? Absolutely, say the few minority and female college presidents who have broken the mold.

“This is a job like many top-level jobs that should draw on the widest pool possible,” says Nannerl O. Keohane, president of Duke University in Durham, North Carolina. If the selection pool is limited by race or gender, she says, “it is reduced to a dangerously small size.”

“There is also a very strong role-model effect in these high-power jobs,” Keohane says. First, there is a sense of identification. Women who see women at the top and minorities who see minority leaders are given “a sense of possibility.” Second, but equally important, she says, when individuals are exposed to leaders of different backgrounds and gender, it makes a “conscious and unconscious impression” about what characterizes a leader. If they see only males or a certain race as president, Keohane explains, they will think all leaders are—and are “meant to be”—of that race and gender.

Another consideration, says Antonio Pérez, president of the Borough of Manhattan Community College (BMCC) in New York, is that “colleges have to reflect the people they serve.”

Moreover, it is essential to have minorities and women represented at the college presidential level, says Ricardo Romo, president of the University of Texas at San Antonio, because they “can effect change.”

Ruth J. Simmons is a staunch advocate of such change. She has made many efforts toward opening higher education—especially elite private institutions—to disadvantaged minorities, an objective she has described as “a matter of national salvation.”

This is not to say that all the ACE findings are bleak. It reports that “since 1986, the percentage of women college presidents doubled, from 95 percent to 19 percent, and the percentage of minority presidents increased from eight percent to 11 percent.”

In 1998, Hispanics comprised three percent of the total number of college presidents, up one percentage point from 1986.

But these advances are not enough, concedes ACE. “If the pro-

Dolores M. Fernández, Hostos Community College president
portion of women who serve as senior administrators and as full-time faculty provides a standard for equity,” it states, “then women, as presidents, remain underrepresented. Forty percent of faculty and senior administrative staff in higher education are women” (versus 19 percent as presidents).

Likewise, minorities accounted for 14 percent of faculty and senior staff in 1995, according to ACE, but only 11 percent of college presidents in 1998.

Who’s the Boss?

One such minority president is Dr. Sylvia R. Ramos, president of Houston Community College-Southeast (HCCS) in Texas. As a Latina, she tips the scale for both women and minorities. "I’ve known I was going to be a president since I was in the fourth grade,” she says. “I just didn’t know what I was going to be a president of.” “My first step was to become fully credentialed,” she says.

By 1974, she had trained in administration and obtained principal certification and all-level certification. In 1987, she earned her doctorate in higher education administration.

“I had the preparation, which gave me a license to practice my skills,” Ramos continues. “When you have credentials, you’re automatically looked at for upward mobility.” She has served as president of HCCS since 1991 and was recently named Educator of the Year by the League of United Latin American Citizens (LULAC).

Unlike Ramos, Dolores M. Fernández, president of Eugenio María de Hostos Community College in the South Bronx, New York, did not follow a direct path to the college presidency. Actually, says Fernández, she had been told she had no chance of becoming a professional.

When she graduated from high school, she was advised to enter the workforce instead of higher education. It wasn’t until age 26 that Fernández enrolled in college, and by then, she was already the mother of two. She had her third child before completing her bachelor’s, she adds, but proceeded, with the support of her mother and extended family, to earn her master’s and her Ph.D.

Dr. Adriana Barrera, who became president of Los Angeles Mission College in late 1999, says she too had no plans to become a college president. “It was a fortuitous accident,” she says. In 1983, after obtaining a doctoral degree in social psychology, Barrera was looking for a part-time job that would pay the bills and give her the flexibility to complete her dissertation. She found such a job at Austin Community College, working half time on a grant-funded project.

The college president, Dr. Dan Angel, a proponent of resource development, noticed Barrera’s skill in attaining grants, and named her grants officer for the college district—thereby inciting her interest in higher education, she says.

The Road to the Top

Barrera’s experience with Angel is similar to that of her peers, many of whom also attribute their current position to the influence of a mentor.

“He provided me with avenues to become involved and meet people,” Barrera says of Angel. “He took me under his wing, shaping me, and helping me see my own potential.” He also nominated Barrera for the ACE fellows program, she says, which broadened her perspective about higher education and the presidency.

Romo, president of UT-San Antonio, says he was assisted by several mentors, including Robert M. Berdahl, chancellor of the University of California at Berkeley, and Mark G. Yudof, president of the University of Minnesota. “I benefited greatly from the ability to net-
work and have good relationships," he says. "They helped me understand higher education."

Fernández says she too was "pushed" by a mentor. While a student at State University of New York—Old Westbury, she became aware of a Title VII fellowship program for the preparation of bilingual teachers through the administrator of the program, William Bird Forteza. Without his advice and without the fellowship, she says, she could never have afforded to continue her education.

Later, while serving as New York City Public Schools deputy chancellor for curriculum and program development, Fernández was contacted by the chancellor of the City University of New York to assume the position of interim president at Hostos, where the former president resigned in a whirl of controversy.

"I had prepared a speech with all the reasons I would not take the job," she says, but her decision was soon made for her.

Fernández was attending an activity during which a Black minister said to the audience, "All of you who are sitting here with degrees in your hands, I'm challenging you to look back to your community and pay back."

"I started to cry," she says, and thought, "My community is calling me." And she took the job.

What sets them apart?

This sense of giving back to the community is one affinity among minority and female college presidents. It is consistent with the findings of ACE that "the largest increase in the percentage of women presidents was at two-year institutions, where they represented nearly eight percent of presidents in 1986 and more than 22 percent of presidents in 1998."

Barrera explains that "by their nature, community colleges serve underrepresented populations, and demonstrate an openness and willingness to have broader participation." In fact, a December 1, 2000, article in The Los Angeles Times announcing Barrera's presidential inauguration described her as "in tune with the needs of her community."

Another ACE finding is that "more than half of Hispanic presidents led institutions with enrollments greater than 5,000, compared with less than 10 percent of Caucasian presidents. This may be because Hispanic presidents were more likely to lead public institutions, which tend to enroll more students than private colleges and universities."

Pérez, president of BMCC, attributes this finding to the fact that public institutions are "not controlled by boards," he says. "They have a great response to social issues, while private institutions have less pressure to diversify."

Female, African American, and Hispanic presidents were also more likely to have earned doctoral degrees, ACE reports. Barrera says, "I do think it would have been more difficult for me to reach the presidency without the doctorate." And Fernández says the figure demonstrates what she's always told her children: "We have to have more of everything."

ACE reports that "one more striking difference between women and men presidents continues to be marital status. Most men presidents were currently married (90 percent), compared with 57 percent of women presidents."

Barrera says she's not surprised. "It is a hard schedule to maintain," she explains. "You're out early and back late, have evening and weekend engagements, and there are a lot of pulls for your attention."

"I don't know whether men, as partners," she adds, "can adapt to the supportive role."

Fernández thinks this is due to societal expectations. "It's not yet customary for men to get up and move," she says. "That aspect of women's rights is not yet solidified."

But Ramos, who's been married for 30 years, says she's proof that it can be done—that it is possible for women to maintain a family and a career. "Men are not yet acclimated to

---

**In 1998, Hispanics comprised three percent of the total number of college presidents, up one percentage point from 1986.**
following their wives,” she concludes, “but women themselves are still trying to figure out if they can do both.”

“There are not that many women out there to show us that we can. But women need to know that they can do both.”

**Prescriptions for Change**

For the first time, the ACE report contains information on the presidential search process. Using this new data, as well as hiring trends, the Council attempts to determine what the future holds for American college presidents.

It found that “twenty-five percent of all newly hired presidents in 1998 were women, compared to 19 percent of all presidents.”

“If current hiring practices continue,” says ACE, “it’s not unreasonable to anticipate that one-quarter of all institutions—and more than one-third of community colleges—will have women presidents.”

Unfortunately, the future does not seem as hopeful for minority presidents. “According to current hiring rates for minority candidates among newly hired presidents,” predicts ACE, “minority representation is unlikely to increase significantly—unless hiring practices are altered.”

Which begs the question: What needs to be done?

ACE itself is playing a significant role in effecting change. Its Office of Minorities in Higher Education provides assistance to colleges and universities seeking to improve their recruitment and retention of minority students, faculty, and administrators.

Its Office of Women in Higher Education offers advice to women who want to assume leadership positions in higher education and includes “The Network,” a nationwide system of campus presidents, designed to “unify women in higher education.”

 Gladys Brown, director of the Office of Women, says ACE has also organized an advisory board of college presidents “to put the respon-

sibility on the shoulders of current presidents,” and learn from their experiences.

Pérez is one of the presidents who serves on this commission. “I feel it is my responsibility to nominate and coach potential leaders,” he says. Pérez also advises individuals to be persistent. Determined to be a college president, Pérez interviewed for 15 to 20 positions over the years, he says, which gave him practice with the interviewing process.

“It’s not for the weak of heart,” Pérez adds. “The experience itself can be threatening and, at times, demeaning.”

Barrera says she supports leadership programs such as those run by ACE. “These programs get results more readily,” she says. “What I do is a drop in the bucket compared to what a Ford or Kellogg foundation can do.”

Sara Aleman, Ph.D., associate professor of sociology at Northern Arizona University and a frequent member of search committees to select college presidents, says the problem is that “historically, Latinos have not been in the pipeline of higher education.” She advises initiatives to target young people, as early as high school, and help them think about themselves as leaders in the academic world.

Based on her experience in presidential selection committees, Aleman says the people on the selection board “are only willing to consider people who look like themselves” and that “these people are mainstream Americans.”

Keohane says she is aware of these prejudices, and that, in response, the members of search committees must be informed of the successes of minorities and women in office. “They need to know about Ruth Simmons, who was recently named president of Brown,” she says, and about other minorities and women who serve as examples.

Ramos was recently invited to Southwest Texas State University to discuss the lack of women in administrative leadership positions. She told them that the first step was to identify a pool of potential candidates. “Look at the department chair ranks,” she told them. “Who’s working with them? Who’s meeting with them?” she notes, explaining that they have to look beyond the usual places to find prospective leaders.

Women, for their part, have to spend more time networking, she says. Ramos also says it is the responsibility of those in office—that opportunities to groom more Hispanic leaders are going to lie on the shoulders of the current group of Hispanic U.S. college presidents, who numbered 74 in 1998.

To fulfill this duty, Ramos serves on TACHE, the Texas Association of Chicanos in Higher Education, of which she was once president, and Kaleidoscope, a leadership training institute for women of color.

Romo says advances in this area require sacrifices. Some, for instance, should leave behind scholarship to assume administrative responsibilities, he says.

Fernandez’s prescription for change comes from a young Latina who was honored by a group of entrepreneurs. She was describing the experience of being mentored, says Fernandez. The young woman said it was difficult, at first, that it felt “like she was trying to move through the eye of a needle.” But then, suddenly, “a hand had come through the eye and pulled her through.”

“Turn around and take someone’s hand and help them,” entreats Fernandez. “If we all make that level of commitment, our numbers will grow.”
Anthropologist Ruth Behar Talks with *HO*

*The Essential Homeland of the Imagination*

BY

MICHELLE ADAM

Ruth Behar looked up at the two nightgowns hanging on the back of her door as she recounted the event that led her to her novel-in-progress, *Nightgowns from Cuba*.

The honeymoon nightgowns, she explained, once belonged to her mother, who left them and the furniture and the apartment with the family caretaker, Caridad Martínez, when they moved to Israel in 1961 and then on to New York City a year later.

Behar was then five. Caridad remained in the apartment until authorities kicked her out. She had only enough time to take a few belongings, and chose the nightgowns. Years later, after many visits between Behar and Caridad in Cuba, Caridad gifted the nightgowns back to Behar's family.

Now about halfway into her novel, Behar says she isn’t clear why the nightgowns inspired her to begin her fiction writing, and that she has yet to weave them into the work. But for the Jewish Cuban American anthropologist, that is part of the mystery of embarking into fiction. After much acclaim for her non-fiction and
anthropology-- The New York Times named Translated Woman: Crossing the Border with Esperanza’s Story Notable Book of the Year in 1993--Behar is now combining autobiography and anthropology with fiction to tell the story of her family’s journey from Europe to Cuba to the United States as seen through the eyes of her caretaker, Caridad.

Behar has dedicated her career as an anthropologist to writing about her experience of border crossing. From the late 1980s until today, as professor of anthropology at the University of Michigan, she has sought to understand the meaning of home through the multiple lives and stories of others. And she has been in a good position to do so. Her own story is that of a true diaspora that reaches back beyond Cuba to her Jewish roots in Eastern Europe (Poland) and the Mediterranean (Spain, Turkey).

Behar began her first writing journey in Spain, the home of her paternal ancestors. Her book, The Presence of the Past: in a Spanish Village: Santa Maria del Monte, published in 1988, related how a small village negotiated its relationship to the past in the wake of the social transformation of the late Franco years that removed people from the land.

“I was very aware that these people in Spain were very rooted. They knew what their land was. They did not feel being connected,” said Behar. “I found it a contrast to my uprootedness.”

Behar’s “love for the culture that comes from Spain, which got replanted in Latin America,” led her to her second book, Translated Woman. During her stay in rural Mexico in the early ‘80s, Behar established close ties with Mexican women, and became especially fascinated with the story of Esperanza. The book is an account of her friendship with this bold Mexican woman, who walks out of an abusive marriage and becomes a street peddler, raising her child on her own.

The book was a turning point for Behar. It not only won acclaim from the Times and was adapted for and brought to the stage—it was an important personal project. “Esperanza returned me to the love of storytelling—to the love of women,” she said. “Esperanza was a vital force for me in those years. I learned a lot about feminism through her. I learned that you can leave behind situations that are unfulfilling. She was radical in seeking what she wanted and not being afraid. I learned to think more of the freedom we want as women but fear.”

Asked why she thought Translated Woman became such a huge success, Behar pointed to her unique approach.

“There aren’t many books that look closely at the life of Mexican women, and specifically of a woman who talked openly about abuse and violence, and showed both rage and redemption,” said Behar. “And it may have been one of the first books to answer why we bring stories back over the border—that dealt with the politics of bringing stories across the border for consumption.” Rather than hearing witness only to Esperanza’s story, Behar wrote too about her own life, of being “a more privileged Cuban American woman” who had her struggles coming into academia. “I offended a lot of people,” she said, by bringing academia into the picture. “I put all the issues on the table in ways not done before. I think of myself as someone who mixes so many cultures and points of view that others don’t, as someone who wants to build bridges across all kinds of differences.” To this day, Behar receives calls thanking her for writing the book. “It has been amazing how this story has affected people.”

In 1996, Behar published The Vulnerable Observer: Anthropology That Breaks Your Heart, a controversial and widely discussed collection of six personal essays that places the emotion of loss, mourning, and the search for home at the center of anthropology and all acts of witnessing. She has also edited various books, such as Bridge to Cuba/Puentes a Cuba, an anthology that paved the way for more interchanges and became a highly praised forum for the voices and visions of Cubans on the island and in the diaspora. With feminist scholar Deborah Gordon, she co-edited Women Writing Culture, an anthology of creative and critical writings that has become a required book in discussions of the history of anthropology. Her personal essays and poems, some of which have been published in Spanish, have ranged the gamut of her diverse heritage as well, relating her life as a Jewish Cuban woman. She has even stepped into the film world as director and producer of Adios

Canidad Martinez with Ruth Behar and granddaughter Amanda at El Valle Yumun, Cuba
Querida/Goodbye Dear Love: A Cuban Sephardic Journey, a feature-length film about the search for identity and memory among Sephardic Jews living in Cuba, Miami, and New York. She expects to complete the film this summer.

Behar writes from a place without borders, yet seeks to discover what home is within this context. Asked what she considers home to be, as a woman, as a Jew, and as a Cuban, she provides a different answer for each.

"Isn't there a line in Virginia Wolff where she says 'as a woman, I have no country?'" says Behar. "In a sense, I am country-less." As a Jew, Behar describes herself as "a Jew of the diaspora." "I will always be this. My grandparents were part of the diaspora, and my parents were part of the diaspora." And as for Cuba, "I am connected to Cuba with strong emotional ties. I have nostalgia for that island," she said. "It's where I took my first step. That was my beginning. But I came here, and all my education was in English. I am also a creature of that displacement."

Although Behar has brought her love of philosophy, travel, and intellectual discourse to her career in academia as an anthropologist, writing is her most deeply seated passion.

"I always knew, from the time I was 12, that I loved writing," she said. "But I needed a framework, and anthropology has been the tree trunk from which all the other limbs have emerged."

Through anthropology, Behar has returned to the multiple homelands of her ancestors and of her memory. But, beyond the tangible sense of home, she has discovered something else as a writer.

"The essential homeland," she said, "is in the imagination and in the memory. And the only real homeland you can count on is that of imagination, of that shared imagination."

That shared imagination, whether fiction or non-fiction, whether as anthropologist or writer, has been that of her Jewish Latin roots, and of her role as a woman. "Bringing together the voices of women of different cultures is important to me—women who are very smart and gifted but do not have the pen," said Behar. "I want to give them the pen."

For now, pen to paper, she brings voice to the women of her own family—to her grandmother, her mother, herself, and Caridad—embarking on a journey into that deepest place of the imagination.

Asked if she might choose fiction over anthropology once Nightrains from Cuba is completed, Behar responded, "If writing this novel brought me to a place where I write novels for the rest of my life, I would be delighted. It would be a wonderful ending to the story."

Although many college officials talk about promoting multiculturalism, administrators at Smith College, a recognized leader in liberal arts education for women, have made a strong commitment. A major factor in this effort is President Ruth J. Simmons, whose 1995 appointment as Smith's ninth president was hailed as an historic moment in higher education. She became the first African American woman to head a Seven Sisters college. She now earns yet another distinction. In July, she will become the first woman president of Brown University and thus the first African American to head an Ivy League institution.

Under Simmons, Northampton, Massachusetts-based Smith has developed its programs and infrastructure in ways that have greatly enriched students' experiences and raised standards for quality and access in higher education nationwide. A committed and outspoken advocate for diversity in higher education, Simmons has worked tirelessly to ensure that the high-quality education offered at private colleges such as Smith is accessible to students from all economic, racial, and ethnic backgrounds. At Smith, she initiated projects designed to recruit and retain a more multicultural faculty and student body.

"Diversity for me," says Simmons, "is about the way we live our life on a daily basis. It is about what we teach, research, and study. It is about how we interact with one another, acknowledge our differences, and learn to adopt broader perspectives. Smith College was founded to promote social justice. An important component of meeting that mission today is overcoming the legacy of denial of equal access and opportunity."

Smith College was founded in 1871 and opened for classes in 1875, funded by a $400,000 bequest from Sophia Smith, who had inherited a large sum of money at age 65. After much deliberation and advice, she decided her inheritance should be used to found a women's college.

She wrote in her will, "I hereby make the following provisions for the establishment and maintenance of an institution for the higher education of young women, with the design to furnish for my own sex means and facilities for education equal to those which are..."

afforded now in our colleges to young men. It is my opinion that by
the higher and more thorough Christian education of women, what
are called their 'wrongs' will be redressed, their wages adjusted, their
weight of influence in reforming the evils of society will be greatly
increased; as teachers, as writers, as mothers, as members of society;
their power for good will be incalculably enlarged."

The bequest purchased the first land, erected the first buildings,
and began an endowment. Today, Smith is consistently among the top
private liberal arts institutions in gift income. Gifts, grants, and
bequests to Smith College in 1998-99 totaled $51,931,811, including
$9,420,954 raised through the annual Alumnae Fund. Smith's endow-
ment (as of June 30, 1999) is $885 million.

The gates of Smith College open onto lively downtown
With a population of 30,000, Northampton combines small-town
charm with metropolitan culture and educational opportunities. Its
campus consists of 125 contiguous acres with 105 academic, admin-
istrative, residence, and maintenance buildings. Students live in 35
self-governing houses that accommodate between 10 to 100. Most
houses include women from all four college classes.

There are 2,500 undergraduates in Northampton and 250 study-
ing elsewhere. Smith has more than 43,000 alumnae (including grad-
uate degree recipients) in all 50 states and more than 100 countries.
There are 110 active Smith clubs and affinity groups. Approximately
1,000 courses are offered in more than 50 areas of study, with 29
department majors and eight interdepartmental majors, 37 depart-
mental minors, and 16 interdepartmental minors. The average class
size is 15 students, and many upper-level courses and labs have fewer
than 10. About 30 percent of each junior class studies abroad. Half
enroll in Smith's own programs in Florence, Geneva, Hamburg, or
Paris; the rest study throughout the world. More than 75 percent of
Smith students participate in internships, including the Semester-in-Washington and the Smithsonian Internship programs, during their four years at Smith. The College's new Praxis program provides funding for summer internships and pays a student $2,000 for 220 hours of eligible work.

Smith has consistently been among the top national liberal arts colleges in rankings published by U.S. News and World Report. Smith is ranked 14th among U.S. News' top liberal arts colleges in per-student financial resources. In the last decade, Smith women have received some of the most prestigious academic fellowships and honors. The list includes 20 Fulbright Awards, 13 National Science Foundation Fellowships, four Truman Awards, two Mellon Fellowships, a Goldwater Scholarship, a Beinecke Award, two Rhodes Scholarships, a Luce Foundation Award for study in East Asia, and a Bosch Foundation Fellowship for work in Germany.

"One of the reasons that Smith is in such an enviable position today is that it has had extraordinary presidents," observes Shelly Lazarus, chair of the board of trustees. "Ruth Simmons has continued that tradition. Her hard and enlightened work on behalf of the College has ensured that Smith's future remains bright." Since coming to Smith, Simmons is said to have galvanized the campus through an ambitious campus-wide self-study that has resulted in a number of landmark initiatives.

Praxis is a program that allows every Smith student the opportunity to elect an internship funded by the College. The program, which assures that every student will have access to at least one paid internship during her undergraduate career, funded 500 summer internships during each of the two years since it was established.

The Picker Program in Engineering and Technology, the first undergraduate engineering program at a women's college, and one of very few at liberal arts colleges, is now in its first full year. The program has attracted support from the Ford Motor Company, the Institute of Women in Technology, Hewlett-Packard, and Women in Technology International. Ford Motor Company awarded Smith $2.5 million for scholarships and other initiatives designed to accelerate the growth of the engineering program. Through its association with the Institute of Women in Technology, Smith has become a site for one of seven IWT Virtual Development Centers and has received a $250,000 equipment grant from Hewlett-Packard.

Students of color don't just enroll at Smith, says Simmons, "they learn to excel and succeed here as well." With programs such as the Peer Monitoring Program for Underrepresented Students in the Sciences, Smith is encouraging the participation and success of African American, Latina, and Native American students. The Union of Underrepresented Science Students, a campus organization, is dedicated to increasing the retention of minority students in the fields of science and math. Retention rates, or the percentage of students who graduate within five years, are high—81 percent of all women of color who entered Smith in 1993, the most recent year for which statistics are available, have graduated.

According to figures cited by President Simmons, Smith has more than a 7 percent minority student population: four percent African American, three percent Latina/o, nine percent Asian American, and one percent Native American. The president mentions that at Smith, "our faculty is seven percent minority; our staff is 11 percent." There are approximately 265 professors in 37 academic departments and programs, with a student-faculty ratio of 10:1.

"While some are understandably concerned that the current legal and political climate leaves little room for progress in these areas," says Simmons, "I believe that if we are steadfast and prudent, these evolving constraints will not impede our efforts. We will be inclusive in our decisions and broad in our efforts to seek out the very best students." She says that last year Smith launched a small program to test whether admission criteria are too narrow to identify all of the most gifted students who apply to Smith.

The SUCCESS program will seek high-achieving students from every racial group who have had to overcome considerable disadvantage in their academic work. We all know such students; they might not offer the traditional secondary school record that most of our students present, but there are clear signs that they are on the right path and might become exceptional students and leaders. Through these students who are admitted with a somewhat different profile, we expect to learn more about how to recognize potential for academic success and viability. In such ways as this, we will continue to seek out the best students of every race and of differing economic circumstances; our academic environment will be made stronger by the presence of individuals who have proven exceptional in their personal qualities and promising in their intellectual potential. These are a few of the many efforts now under way to ensure that we continue to attract the most able students to Smith."

It is certainly true that bright young women from all 50 states and as many countries and "from almost every ethnic, political, social, economic, religious, and cultural background" come to Smith.
"But
Can She Cook?"

Family Expectations Weigh Heavily on Latina Students

BY INÉS PINTO ALICEA

Rebekah Rosas remembers family members telling her when she was ready to enter college that she should work on finding a good man who was rich and who could take care of her.

"I told them I didn't need that because I could take care of myself," said the sophomore from Bryn Mawr College, in Bryn Mawr, Pa.

Dr. Lois Méndez-Catif, assistant dean of the undergraduate dean's office, said Rosas' experience with gender expectations is encountered by many college-bound Latinas. In her study of Latina students at the private, predominantly White Bryn Mawr and at a public Hispanic Serving Institution, New Mexico Highlands University (NMHU) in Las Vegas, New Mexico, Méndez-Catif found that while family members encouraged the Latinas to pursue their higher education dreams, often the young women were expected to assume the role of homemaker or family caretaker after graduation, even while pursuing a career.

The mothers weren't telling their daughters that their degrees were useless, but they were saying that in addition to having a job and a career, you still have to take on the traditional roles, said Méndez-Catif. "You can't give up anything. It means taking on more work." Even though the Latino community is getting more educated, it is still of the mindset, she said, that women take care of the household. The Latina women's rights movement, she said, has not progressed as much as that of White women.

Méndez-Catif's study, "Are We There Yet? The Impact of Higher Education on Hispanic Gender Roles," showed that while Hispanic females have made great strides in participating in higher education and in receiving baccalaureate degrees, "the basic assumptions of the Hispanic culture about the male's dominant role are very strong and a dominant force in women's educational experiences."

"Latinas feel a lot of pressure from a lot of places," said Rosas. "When we feel we did badly, it's multiplied. We carry a lot Latinas are always told, 'You still have this and this to do.'"

The study was based on the responses of 318 undergraduate NMHU students and 16 Bryn Mawr students who answered a self-administered questionnaire and participated in focus groups. Students on both campuses shared some similarities—both groups had GPAs of 3.0 or higher, about half of each group's mothers had earned bachelor's degrees, most in each group attended full time, and both schools suffered from a lack of Latina role models in upper-level positions. There were differences, too.

At New Mexico, only seven percent of the respondents' mothers had earned a graduate or professional degree compared to 13 percent of their fathers. At Bryn Mawr, an equal number had earned a graduate or professional degree. Half the Pa. mothers held professional positions compared to seven percent at NMHU. At Bryn Mawr only 20 percent of the mothers were homemakers compared to 40 percent at NMHU, said Méndez-Catif.

"The NMHU Latinas expressed concern about the usefulness of their degree while the Bryn Mawr women felt no restraints: 100 percent of them had plans for graduate or professional school," said Méndez-Catif. The New Mexico girls, she said, were encouraged to go to college but then had to return home and eventually assume the traditional role of wife, mother, and homemaker. "The degree was a fail-safe device in case her future husband lost his job or left the family."

Still, Méndez-Catif said, the Pa. women did note that there are distinct gender roles.

The Bryn Mawr women reported that some of their mothers, though pursuing nontraditional gender roles and encouraging their daughters to do the..."
same, "still catered to the notion of the woman as ensuring that the family and the men were comfortable and satisfied," wrote Méndez-Catlin in the study.

Méndez-Catlin recalls how upset her own family members were when she decided to go back to work and place her child in day care.

"My grandmother pushed me to be all I could be—but she was asking me. How can you leave your child to be cared for by someone else? You should take care of your child," said Méndez-Catlin. Anglo women in the U.S., she said, "can now make a choice—stay home or hire a babysitter or do both. We can't as easily make that choice. In our culture that is still an expected role."

Karen Moreno, a law student at Rutgers University (N.J) who graduated with a bachelor's degree from Bryn Mawr, said she often feels as if she is leading a double life, taking on a typical Latina role of catering to the men at family gatherings and another life in which she is a professional woman trying to complete her studies.

"My parents want me to become a professional and become a lawyer," said Moreno, who is of Dominican ancestry. "But then they start, 'Oh, I want to be a grandmother.'"

Marisa Rivera, assistant to the vice president for student affairs at Marquette University in Milwaukee, Wis., said she has had a similar experience. When she told her parents she wanted to pursue a master's degree in the Midwest, her mother asked her if she were crazy.

"What man is waiting for you there? No woman in her right mind leaves the security of her family to move to a place that she knows nothing about and where she knows no one! Who will take care of you?" quoted Rivera, recalling her mother's comments.

Méndez-Catlin said that geographic location influences the challenging of traditional gender roles. Since Bryn Mawr was located 20 minutes from a large metropolitan city, many of the students had already taken steps to move away from the family in pursuit of their career goals. New Mexico Highlands is located in a small community that offers fewer career opportunities. College graduates from NMH would have to move from the area after college to advance their careers, something that family members were reluctant to have them do.

"When Latinas get a job that takes them away from their families that's when the real problems start," said Méndez-Catlin.

Rosas said that she since she was raised by a single mother, she did not feel the same gender stereotyping in her household as did other

friends. But she does feel a responsibility to excel—for a variety of reasons.

"Few people in my family have gone to college, and I want to show them that you can go to college and beyond," Rosas said. "As a Latina and a part of a small minority group on campus, I have a responsibility to show other students that we can do well."

Rosas said she was a little intimidated initially in the classroom because the students seemed to speak so eloquently, but she soon overcame her fears and began to speak up in her classes.

Méndez-Catlin said her study found that Latina students tended to be "more reserved and compromising...not because they did not know the material...but because they were taught to be silent." But she added that as more entered higher education, the women became more independent, more self-confident, and their self-esteem rose. Many students became more assertive and vocal with this newfound confidence, particularly by the time they entered graduate school, she said. But at times, the Latina students who became vocal encountered sexism, as exemplified by a comment from a male faculty member in her study—"these new women no longer just shut up and sit back."

Guadalupe Corona, assistant director of student activities and staff member to the United Front Multicultural Center at the University of San Diego in California, said that even though more Latinas than Latinos are entering colleges nationwide, many Latinas are still pursuing careers in traditional areas such as education and social work. The Latino community needs to encourage more Latinas to pursue degrees in engineering, science, and math, she said.

In her work as a mentor to minority students on her campus, Corona said she regularly finds herself helping Latinas deal with some of the pressures they face in the higher education environment. For example, one being pressured by a boyfriend to quit her college pursuit and come home to him eventually broke off the relationship.

"It seems as if the more education you get, the fewer men there are to date," Corona said, reflecting upon conversations she has had with many Latinas about the social challenges of college.

Rosas said she has felt some of the male backlash from pursuing an education. At home in Idaho, she said, some Latino males don't even talk to her and act as though to say, "Who do you think you are with your nose up in the air?"—which she finds hurtful. And once, while visiting a cousin, a male friend told her to get into the kitchen where she belonged.

"I don't enjoy that kind of work," she said. "I wanted to find something to use my brain, not my back."
Moreno said family members tease her that she will never find a husband if she does not learn how to cook. “They always ask, ‘Can you cook?’” Moreno said. “My grandmother is convinced I’m an old maid...and I’m only 34.”

Méndez-Catlin said her study participants echoed Corona’s and Rosas’ statements, finding that their pursuit of higher education often threatened relationships and resulted in their “not being in a strong, permanent relationship and missing out on that part of life.”

“We need to be as equal as non-Latina women,” said Méndez-Catlin, adding that because she demands equality, “some people say I’m diluting the culture—but I’d like to think I’m enhancing it and making it stronger and better because I am contributing more equally.”

Méndez-Catlin said her study showed that New Mexico Highlands University was doing a good job at retaining Latina students and that other higher education officials could learn from its approach. Méndez-Catlin said only one in 10 Latinos/as who enter college in the United States gets a degree.

“That attrition rate indicates a crisis for higher education,” she said. “It is important to conduct research that identifies the characteristics of the Hispanic college experience and offers suggestions to enhance persistence and ultimately increase retention and graduation rates. More research will create a more defined and all-encompassing picture of Latinas’ status in higher education and the effect on their relationship with traditional gender roles. Hispanics have been on the higher education agenda for at least 30 years and are still not understood nor their experiences well documented.”

Rivera said not only was her family unsupportive as she pursued a master’s degree and doctorate but also that many people she encountered in higher education at Midwest institutions “did not understand and had many stereotypes about what ALL Puerto Ricans were like.” She recalls getting numerous comments that because she was Puerto Rican, she was probably lazy, on welfare, or had no goals or aspirations.

“I can recall visiting with my advisor to pick up my registration materials and inquiring about a post-it note on my file. He responded that people like me usually take more time to complete a Ph.D. than the majority students,” Rivera said. “I was required to take three undergraduate classes prior to being fully admitted as a doctoral student—this was after having obtained my master’s! I can go on and on with similar and more devastating examples. My experience in graduate school was extremely devastating to my self-esteem and confidence.”

Méndez-Catlin said colleges and universities can take proactive steps other than conducting research on Latinas to improve their retention and graduation rates. More Latina role models should be recruited to colleges and universities and encouraged to serve as mentors for students. Colleges and universities can sponsor outreach programs to high school students to better prepare them for the college environment and address the gender-defined roles. Schools can also ensure that families are actively courted when recruiting students.

“The family is the core of our foundation and brings a sense of centrality and belonging,” she said. “These are but a few of the strategies that could be used to nurture and retain college students.”

She remembers the importance of her family in her own decision to go to college. Her grandmother visited every campus she was interested in attending.

“If she had felt uncomfortable at a school, I would not have gone there,” she said. “At colleges here, they feel that once students get to college, the umbilical cord is cut. They just want to deal with the students, not with the families. With the Hispanic culture, that is the wrong thing to do.”

At Bryn Mawr, Méndez-Catlin started a program called On Target to better meet the needs of Latinas on campus and improve their retention. On Target is a mentoring program that pairs students with faculty members, staff, and administrators as well as fellow students of color.

“We do a lot of talking in higher education rather than enacting our goals,” she said. “I was willing to take the risk and start this program.”

Rivera said a mentor does not necessarily have to be Hispanic. She said there are many people who “can be encouraging and supportive and be truly empathetic to the plight of a minority student.” Her mentor was a Hispanic woman.

“She became someone I regularly communicated with and a strong champion of mine,” she said. “Whenever I wrote her and told her how difficult the journey was becoming, she would write back and remind me that I was not alone, and that as a Puerto Rican woman, single parent, this degree was not just about me but rather it would reflect the entire female Hispanic community. Because there are so few, just one person’s quitting would make a world of difference.”
Linguistic and Cultural Diversity in the European Schools: THE CASE OF SPAIN

BY EIRINI GOULETA

Bilingualism and bilingual education are not new phenomena in Europe. For centuries, different nations have lived together on the old continent. They spoke different languages, carried different cultures, and followed different religious paths. This is one of the reasons that in Europe, many individuals are bilingual or even multilingual.

Although bilingualism is an old phenomenon, its high frequency in some particular countries is relatively new. The reason for that is the creation of the European Union, the fall of the Soviet Union, the increase of immigration, and the emphasis on the rights and prospects of European minorities (religious, linguistic, cultural, ethnic, etc.). In many European countries, in addition to the existing minorities, immigration has created new minorities. Even though immigration has a history in some European countries, such as Germany, France, and the Netherlands, in others, such as Spain, Greece, and Italy, it is new.

Many European countries, although multicultural in nature, for centuries presented a monolingual, monolingual profile to the world. They dealt internally with minority issues without making a lot of noise about these issues to the external world. Nowadays, trends have changed, and things are different. European countries take pride in their actions to improve the life conditions and education of their minorities, and they report their progress to the European Union.

Immigrant and minority issues often create conflicts in the interior of the countries. Some citizens support the rights of the minorities to maintain and develop their cultural and linguistic identities, some believe that minorities should assimilate and acculturate into the mainstream culture, and some are indifferent.

One of the major issues being faced is the education of minority students. It is questionable how ready some European school systems are to educate linguistic and cultural minorities in a successful manner. There are many facets to the problems that the Spanish educational system must deal with in reference to bilingualism and multiculturalism in schools.

The Case of Spain

Spain is a Mediterranean European country with a population of 49,404,000 people, and it is slightly larger than California. The culture of Spain is a product of many influences and many ethnic groups, such as the Phoenicians, Romans, some Germanic tribes, the Moors/Arabs, Jews, and others. Today the main religion in Spain is Roman Catholic.

The government of Spain has gone from empire to republic to dictatorship to kingdom to the current constitutional monarchy. After nearly two centuries of a centralized administrative system, the Estado de las Autonomías was introduced, and today Spain is divided into 17 autonomous communities/regions. Some of the autonomous regions have assumed full power on certain issues, such as education; others still depend on the state. However, all autonomous communities are under the power of the state to a great extent and must respect the limits that are set by the state.

According to the educational reform law of 1990, Ley Orgánica de Ordenación General del Sistema Educativo (LOGSE), education is compulsory and free of charge up to the age of 16. It includes general and special education. General education includes nursery-infant education (0-6 years), and compulsory primary education (6-12 years), compulsory secondary education (12-16 years), and compulsory postsecondary education, which includes the baccalaureate and the middle grade of vocational training, upper-grade vocational training, and university education.

The main languages spoken in Spain are Spanish (Castillian), Catalan, Galician, Basque (Euskara), Valencian, and some other local dialects. Castilian is Spain's official language. Catalan is spoken in Catalonia, Valencia is the
regional language of Valencia, and Mallorquin is the main dialect of the Balearic Islands. Galician is similar to Portuguese, and Euskara is spoken in the Basque country. All of these dialects have ancient roots. Their uninterrupted use by the inhabitants of the different Spanish regions has saved the dialects from extinction.

Since Spain has been multilingual for centuries, Spaniards learned how to deal with the linguistic minorities of their country, and many individuals understand and/or speak to some extent some of the regional dialects. However, nowadays, with the entrance into the country of thousands of immigrants, new languages are spoken within the Spanish national borders, such as Russian and other Slavic languages, Romanian, Chinese, Arabic, French, and more. The immigrants in Spain come mainly from Latin America; Morocco, other African countries such as Somalia and Ethiopia; the Middle East, and other Arab areas; China; Russia and other Slavic countries; Romania, etc.

According to the second fundamental proposition of the Constitution, which calls for participation, and the second Article of the Constitution, which calls for a decentralized education structure, the autonomous communities have the power to regulate the basic teaching of the Spanish language and to instruct students in the regional language. The different regions are reportedly able to develop and promote within their boundaries a successful bilingual system, but have many difficulties integrating immigrant students who speak neither Spanish nor the regional language. Usually, the method of instruction for these students is with “pull-outs” from the main classroom. However, there are many educators who believe that integration is very important because native speakers in the classroom motivate second-language learners; they provide critical language input and other opportunities for meaningful use of language. In general, teachers and school administrators report their frustration with not knowing how to include and instruct immigrant students.

The problem does not seem to be only the language but also the cultural differences of the immigrant students. Although for centuries Spain was the country of three cultures, the Jewish, Spanish/Catholic, and Arabic/Islamic, since the 1492 decision of the Catholic monarchs, Fernando de Aragón and Isabel de Castilla, to deport all non-Catholics, Jews, Muslims, and others, it became the country of one nation and culture (the Spanish) and one religious (the Catholic). Today, after five centuries of monoculturalism, Spain is becoming again, slowly but steadily, a multicultural, multilingual, multireligious nation with heterogeneity and many changes that affect the public life and education.

Teachers report that immigrant students can be divided into two categories in terms of their ability to adjust in the Spanish schools. In the first Spanish schools face challenges with the Gypsy students, who are migrants and almost totally absent from the classroom. According to the Gypsy culture, the education that children receive through the mouths of the elders is enough to help them lead a successful and independent life. Children are viewed from an early age as a micrograph of the adults and are expected to work and contribute financially to the family. Representatives from the Ministry of Education report that in Spain there is no penalty for parents who don’t send their children to school every day and that, even if there were, it would be difficult to enforce since most Gypsies have no fixed address.

Most educators and administrators in Spain call for more teacher training in second-language instruction. The new wave of immigrant students has found the Spanish schools, like the Greek schools, unprepared to deal with bilingualism and multiculturalism. In its efforts to solve the problem, the Spanish Ministry of Education organizes teacher exchange every year with the United States and with other European countries so that Spanish teachers will receive training in countries where immigration is an old phenomenon. In addition, seminars and other training opportunities for teachers in second-language learning and multicultural education are organized. Things seem to progress, and many officials appear optimistic about the future of bilingual and multicultural education in Spain. However, the reality is that the immigrant students are in high risk of dropping out of school and have very slim possibilities of attending a university.

The above information has been obtained through interviews with officials from the Spanish Ministry of Education in Madrid, Granada, and Toledo, from the Spanish Ministry of Education website, and from the Educational Reform laws of 1990 and 1995.

Latinas Research Yesterday’s
Madness and Today’s Language Skills

Groundbreaking Work by SDSU Scholars

BY RENEE HIX

Cristina Rivero Garza just won an award for her riveting book, *No One Will See Me Crying* (Nadie me verá llorar), which is based on five years of intensive research on La Castañeda, an insane asylum in Mexico during the 1920 revolution. Garza is an assistant professor of history at San Diego State University.

Another SDSU scholar, Vera F. Gutiérrrez-Celis, has made it her passion to evaluate the language skills of bilingual elementary school students so that she can develop an assessment procedure for clinicians that differentiates normal language development and language impairment.

Each of these women is clearly true to her roots but also reflects the caliber of Hispanic teacher-scholars at SDSU. Each contributes to the university’s reputation as a top producer of Hispanic graduates in California and number six nationwide.

Cristina Rivero Garza

Garza’s book, *Nadie me verá llorar*, was named “Best Published Novel” by Impac, the Institute of Culture and Arts in Mexico and the University of Tecnológico of Monterey, Mexico. In 1991, her manuscript was named “Best Novel” by the National Institute of Fine Arts in Mexico, the Institute of Cultural Michoacán, and Tusquests Press.

Garza was inspired to write her novel while conducting research for a history book she is also authoring.

“Through my research, I had access to rich files full of human tales on mental illness in Mexico during that time period, but these tales could not be easily incorporated into a history book,” said Garza. “To be faithful to my material, I decided to write a novel—mainly to give voice to those patients in the institution who didn’t have a voice back then. It’s easy to stereotype madness. I wanted to show the more human side of mental illness.”

The main character of the book, Matilda Burgos, is based on a patient...
file accessed by Garza. The patient's name is different, but Garza developed the character's life story around the experiences of the actual patient. Garza used material from the file to portray life in La Castañeda during the Mexican Revolution.

Even though Garza has a very strong faith in her work, she did not expect to be honored with two major awards.

"I passionately conduct my research and write with integrity, but I really did not know my book was going to be so well reviewed and well received."

Thus far, No One Will See Me Crying has been published only in Mexico, but Garza is in touch with editors in Mexico about an English translation for publication in the U.S.

Garza is using a National Endowment for the Humanities grant to finish her history book, Mad Encounters: Psychiatrists and Inmates Debate Gender, Class and the Nation in Mexico, 1910-1930. This book will be published by the University of Nebraska Press, responsible for one of the most popular Latin American history book series in the nation.

"Madness has fascinated a lot of people throughout history. With my historical account, I am trying to address the revolution of Mexico through people who hadn't been well documented previously. I wanted to find out what being mad and insane meant beyond the cliché—basically to humanize this issue," said Garza.

"Also, this has been an issue that has been studied extensively in both the U.S. and Europe but very little in Latin America."

When she's not writing and researching, Garza lectures students on modern Latin America, modern Mexico, genders in Latin America, and growing up in Latin America. And provides an historical perspective of suffering and redemption, which she's been working on at SDSU for the past three years. Prior to SDSU, Garza taught at DePaul University and at Autónomous National University of Mexico, at which she earned a bachelor's degree. Her master's and doctorate are from the University of Houston.

"I accepted the job here because at SDSU we are doing something that other universities should be doing, which is paying attention to one of the most important groups in society today—Hispanics. I take it as my responsibility to assist in this effort both academically and personally."

Garza is in the final stages of another novel, one that deals with issues and differentiation of gender in contemporary Mexican society.

**Vera E. Gutiérrez-Clellan**

Gutiérrez-Clellan, SDSU professor of communicative disorders, is immersed in a research project to assess and determine appropriate clinical and educational interventions of children ages four to seven from language minority backgrounds. She says it is the only study in the United States looking at language development and disorders in this age group of Spanish-speaking children.

"These children should not have their speech and language skills tested only in English," said Gutiérrez-Clellan. "It is easy for language professionals to assume that the young ones have speech and language impairments when, in fact, they are linguistically and developmentally normal. What is really happening is the children aren't understanding the test because they don't have full proficiency in the test language—English."

"One of the most serious and challenging problems confronting the delivery of speech and language services in schools today is how to assess and determine the appropriate educational placement of children from cultural-linguistic minority backgrounds," she said.

Current assessment methods and instruments have proven to be inadequate for these children, resulting in an overrepresentation of Hispanics in special education and of true language-learning-disabled children underserved in regular bilingual classrooms. In order to meet the needs of these children, Gutiérrez-Clellan began a research program designed to develop clinical methods that are both culturally relevant and based on appropriate language norms.

"As part of my research program, I have conducted studies with young children to obtain basic data on normal language development in Spanish and in English," said Gutiérrez-Clellan. "For example, I collected data on infants and tod-
als requires that students respond to the issues through problem-solving and inquiry. Consistent with my teaching philosophy, I believe in giving students sufficient freedom and flexibility to experiment and grow on their own.”

Gutiérrez-Clellan has taken students into the community and has engaged them in clinical research activities oriented to the development of new assessment instruments and methods. These activities include free communication screenings for the participating children and their families. Students are involved in providing direct clinical services, collecting and analyzing data needed for development of language assessment instruments, as well as learning about language development delays.

These are disciplines that require a strong integration of theoretical research-based, clinical, and service skills in order to provide adequate services to individuals with disabilities. Gutiérrez-Clellan teaches her students to advocate for their clients by applying data-driven research and procedures to their clinical and academic training experiences.

And her work isn’t limited to her department but, in fact, extends across the University. She contributed to the development of the Bilingual School Psychology Project in the Department of Counseling and School Psychology in SDSU’s College of Education by designing and teaching two courses in the area of nondiscriminatory assessment. She has also served as a mentor through her active participation in SDSU’s College of Health and Human Services, Ethnic Mentor Undergraduate Program, and Health Career Opportunities Program.

Gutiérrez-Clellan believes her efforts to facilitate students’ academic success have resulted in a larger representation of minority students in the program. Her advice, support, and student advocacy are further evidenced in her roles of faculty mentor requires collaborations with the few researchers in the country who are attempting to collect data with this extremely heterogeneous population. In collaboration with Aquiles Iglesias at Temple University and Elizabeth Peña at University of Texas at Austin, Gutiérrez-Clellan wrote

and was awarded a contract to develop an assessment instrument for identification of language disorders in bilingual preschool children. This is the second time in the history of the National Institute of Deafness and Other Communicative

will allow them to diagnose language disorders accurately and prevent current misdiagnosis and over-referral rates. Preventing over-referrals is as important as preventing under-referrals, but the social implications of mislabeling a child as disordered can have devastating consequences for the family and the child. In addition, these research activities give SDSU the national recognition and visibility as a research and training institution.

“We are attracting the best bilingual students in the country to our Bilingual Certificate in communicative disorders because of their desire to participate in the development of the project. The project provides students with unique research training and experiences that are directly applied to the most current knowledge on assessment of bilingual children’s language.”

The six-year-long project involves data collection in three major regions in the country (California, Texas, Philadelphia/New Jersey areas) and will culminate with the first language test in the field that will address the cultural and linguistic diversity of Hispanic children in the U.S. Gutiérrez-Clellan’s research program has received national and international recognition. Her work in bilingual development and disorders has been presented and published in articles in England, Spain, Colombia, and the U.S.

San Diego State University is in the forefront of educating Hispanics. Its location generates a natural and necessary commitment to Mexican American language and area studies.

Cristina Rivera Garza and Vera Gutiérrez-Clellan are blazing the trails of knowledge through very personalized intense research that will continue to enhance our understanding and appreciation of the Hispanic culture.
Integrating Multiple Perspectives into Curricula and Teaching

Resources for Getting Started

This past spring, as assistant director for The New Jersey Project on Inclusive Scholarship, Curriculum, and Teaching, I gave a presentation at one of the two-year colleges in our state. My topic was “Inclusive Education: Race, Class, Gender, and Sexuality in the Curriculum and in the Classroom.”

This was our first visit to the college, which is located in one of the farthest western reaches of New Jersey, a less populated area, and I wanted to be as concrete and specific as possible in case either my theoretical points or my strategy suggestions or both were completely new and potentially confusing or even threatening to the faculty and administrators attending. For specific examples of some points, I drew heavily on a book that I find exceptionally provocative and useful (albeit disturbing in a number of ways), Nathan McCall’s Makes Me Wanna Holler: A Young Black Man in America (Vintage, [paper] 1995).

At the end of my presentation, during discussion, one teacher commented that he thought I was unduly focusing on African Americans, resulting in a regrettable black/white dichotomy. Frankly, I was taken aback. Dichotomous/dualistic/binary thinking is so … patriarchal, and I am a feminist teacher. But on reflection, Yes. He was absolutely right. My conscious intent had been to provide especially articulate, vivid, and concrete examples of many concepts and strategies, and even to entice individuals into reading and benefiting as I had from Makes Me Wanna Holler, but if one of my objectives was to model inclusive curriculum and teaching—and it was, I had not achieved that because I hadn’t done the work. I had taken the easy way, relying on what I already knew, a body of ideas that I had probably ceased even to bring fresh questions to unless they were especially insistent.

For teachers, I know, it is hard work to integrate multiple perspectives into curricula and into classroom teaching/learning strategies. But the need is compelling.

The identities of the students in our new-millennium classrooms are more diverse than ever before. They are, for example, more racially/ethically diverse. In my county, Passaic County, in northeast New Jersey, to cite one region, between 1990 and 1999, the White population decreased by 13 percent; the Black population grew by 125 percent; Hispanics, up by 257 percent; and Asians Americans, up by 592 percent (U.S. Census Bureau. “Growing Diversity,” The [Hackensack, N.J.] Record 30 August 2000: A-17).

A New York Times article (Wilkerson, Jodi, “Swell of Minority Students Is Predicted at Colleges” 24 May 2000: A-16+) predicted a “swell” of minority students at colleges. Enrollments, it said, based on a study by the Educational Testing Service, will grow “by some two million students—to 19 million—over the next 15 years, with Black, Hispanic and Asian-American students accounting for 80 percent of the growth.”

The identities of today’s students are widely recognized as more multiple than ever before. Their identities are multifaceted—dealing with race, class, gender, sexual orientation, religions, physical and/or mental ability,
and political party, tastes in music, job/professional interests, and so on—any of which can be terrifically significant and powerful—multilayered, shifting, and variously embraced or denied.

To my mind, the only question is this: Shall we react to this fact of great diversity and multiplicity constructively or destructively; shall we use it positively in the interests of expanding knowledge and making our schools and workplaces and communities and nation ever more inclusive, or shall we, by resisting it, use it negatively in the interests of keeping knowledge limited and creating ever more conflict-provoking exclusiveness?

If we choose to follow a positive course of action, we teachers will want to transform our curricula, challenging every assumption that we ever had about the accepted, socially constructed "knowledge" in our respective fields and about the most effective ways of teaching it. We will—for the many simple and complicated rewards that it brings to our students and to us—want to move through the recognized stages of curriculum and pedagogy transformation in an endlessly evolving process.

The work of transformation is difficult and challenging personally and professionally, but the resources available are staggeringly rich both in number and quality. If the will is there, the way is clear.

Here are some resources—a miscellany, if you will—that I have found especially helpful. Most, to be sure, are intended for the newcomer to the idea of curricula/pedagogy transformation, but hopefully there is something for everyone. And do not be concerned that many of these have publication dates in the '90s: the content is timeless. If you have resources to suggest, send them to me in care of The Hispanic Outlook in Higher Education at outlook@sprintmail.com ("Attention Mia Anderson" as the subject), and I will collect them for a future update.

Transformations: The New Jersey Project Journal: A Resource for Curriculum Transformation and Scholarship http://transformations.tcnj.edu/ is a fine continuing resource for faculty across the disciplines. The Spring 1999 issue, to cite a single example, contains:

- "All right, then, I'll go to hell!: The Power and Pitfalls of Literature across the Curriculum," by Gayle Pemberton (William R. Kenan professor of the humanities in the English Department and chair of African American Studies at Wesleyan University);
- "Transformative Teaching of Renaissance Literature through Intertextual Discursive Constellations";
- "Transforming a Developmental Psychology Course to Reflect Student Diversity";
- "In the Guise of the Gods: Returning Women Students and Mentored Learning";
- "The Impact of Business School on Student Attitudes toward Diversity";
- "A Woman's Place Is in the Curriculum K-12: A Multicultural Approach";
- "Teaching Gender and Technology in the Same Room: A Case Study";
- "Curriculum Development: Transforming Biology of Women Courses"; and
- "Science, Epistemology, and Difference";
- and four book reviews.

(Resist, please, being put off by the term feminist—as much as anything else, it translates to inclusive. For that matter, should you be so inclined, please don't be put off by the fact that a good-sized piece of the discussion of diversity happens under the umbrella of women's studies. Again, best understood, women's studies translates into inclusive human studies.)

Another excellent starting place is Liza Fish-Matta and Marian K. Chamberlain's Women of Color and the Multicultural Curriculum: Transforming the College Classroom: With a Segment on Puerto Rican Studies (Feminist Press, 1994), which includes both overview essays and essays relating to very specific disciplines, all organized under the headings "Faculty Development," "Model Undergraduate Curriculum," and "Focus on Puerto Rican Studies."

Faculty in the social sciences—and any faculty seeking a broader, deeper understanding of U.S. diversity in all its complexities—will definitely want to read and will, I assure you, return again and again to Paula Rothenberg’s *Race, Class, and Gender in the United States*, 5th ed. (Worth, 2001).

All higher education faculty will want to read the “Multiculturalism and Diversity in Higher Education” special issue (edited by Jack Meacham) of *American Behavioral Scientist* (November/December 1996). And community college faculty (and others) will want to look at the “Curriculum Transformation in Community College: Focus on Introductory Courses” special issue of *Women’s Studies Quarterly* (Fall/Winter 1996).

For a fuller understanding of issues relating to multiple socioeconomic class perspectives—which growing numbers view as perhaps the most divisive of all categories of difference in U.S. society—see Gregory Mantsios’ “Living and Learning: Some Reflections on Emergence from and Service to the Working Class” and other essays in *Janet Zandy’s Liberating Memory: Our Work and Our Working-Class Consciousness* (Rutgers UP, [paper] 1994); also see the collection in “Teaching Working-Class Studies,” a special issue of *Women’s Studies Quarterly* (Feminist Press, 1995) edited by Zandy.

For classroom teaching strategies, I highly recommend back issues of *The Hispanic Outlook in Higher Education*. Angela Provitera McGlynn has written articles providing many strategies that help accommodate varying learning styles—and thus maximize student learning. See, for example, “Teaching Strategies That Promote Equal Opportunity: Parts One [12/03/99] and Two [12/17/99],” and “Communication Patterns in the Classroom: Gender Differences: Parts One [09/08/00] and Two [09/22/00].” Also wonderfully thoughtful and concrete is Shari Saunders and Diana Kardia’s “Inclusive Classrooms: Part I: Choosing Course Content/Increasing Awareness of Problematic Content [04/21/00] and Part II: Planning Considerations, Getting to Know the Students, and Decisions, Comments, and Behaviors during the Teaching Process [05/05/00].”

A well-worth-considering website covering diversity matters across the disciplines is www.inform.umd.edu/diversityweb, where you’ll also find links to many other excellent resource sites. Visit the websites of colleges and universities known to have diversity and/or curriculum transformation projects, teaching excellence centers, and the like, such as the University of Michigan (especially its Center for Research on
Learning and Teaching at www.crlt.umich.edu [see, for example, the “multipappers” there!], the University of Colorado at Boulder (www.colorado.edu/ftep/support/diversity), The Ohio State University (www.acs.ohio-state.edu/edcato/ftid/library/multicultural/education.html), and University of Maryland (www.umbc.edu/wmst/wmsstic.html, www.umbc.edu/cwu/syllabi.html, and www.infor.umd.edu/edres/topic/diversity/specific/gender/womensstudies).

Bringing multiple perspectives into the curricula, it seems to me, provides the best possible opportunities for developing critical thinking skills, the very skills that are most in demand in the workplace (more, even, than knowledge of specific subject matter) and in the interests of national and global citizenship.

There are those, of course, who charge that “multiple perspectives” are an attempt at indoctrination—a political agenda. What these individuals fail to understand is that the curriculum has always been a political agenda—and that until recently, the traditional curriculum reflected only a single group, probably the smallest group (albeit possessing the greatest power). Again, it comes down to inclusion as opposed to exclusion.

Knowledge is socially constructed. It’s that simple—and that complex. What I know—or think I know—is filtered, framed, shaped because I happen to be a White, middle-class female who is heterosexual, spiritual rather than religious, politically progressive, currently physically able, currently not married, a mother, etc., etc. Because I am white-skinned rather than black- or brown- or yellow- or red-skinned or some mixed-shaded-skinned, I see and experience and thus “know” things differently. Because I am currently physically able and am ambulatory, I don’t, for example, notice curb cuts or stair steps that might enable or hinder my access to many offices and services. Day after day, because I am heterosexual, I see positive images of my sexuality in the media, and I don’t hear—and thus don’t know—the negative reactions of people when I talk about my social activities.

It is a function of my White privilege that I have not had to learn about—let alone grow to appreciate and value—the many cultures different from my own; I do not need to know other cultures in order to go about my daily life with relative ease. If I were Asian or Hispanic or lesbian or Jewish or a member of any other “minority” group, I would have to learn about the dominant culture in order to survive there. And any assumption on my part that members of marginalized groups wish every day to join the dominant society and be “just like us” is yet another reflection of my unearned privilege.

Of course our human similarities are worthy of our focus, but we rob ourselves of the richness of multiple different experiences and views—from which we might all come to learn something that will be recognized as beneficial, including discussion of family and friends, before the business agenda is approached.

All knowledge needs to be continually re-examined. About any piece of knowledge we can ask, all the while being careful to acknowledge that within any given group there is a wide range of individual viewpoints. What would be the African American perspective on this? What would a different socioeconomic group’s perspective be? What light might Buddhist teaching shed on this? And so on. Teaching is never more exciting and fulfilling.

In an “American Literature” class, for example, our students and we will have a much fuller and more accurate understanding and appreciation of the literature that has been produced in this country if we look also at narratives by Native American peoples, by African Americans held in slavery and indentured servants, by immigrants and migrant workers; at the poems and stories and novels written by women and all people of color; at the many works by gay men and lesbians; and so on. The so-called classics of the U.S. literary canon are such only because of the selection criteria, which were based on an extremely limited perspective. And the parallel situation is true in every discipline there is.

The next time I give a presentation, I will be sure to include perspectives and examples from multiple groups. I have work to do. It will take time, time for doing the research—at the library, on the Internet, and in conversation with colleagues. But I will certainly be personally enriched and will provide a better model for inclusive teaching.

I watched Remember the Titans recently and was gratified to note Coach Boone insisting that his racially diverse athletes get to know each and every other team member. He instinctively sensed that until you know a different perspective, there can be only fear and distrust and division. There is a better way.

Dr. Anderson, senior editor at HO, is professor emerita from Bergen Community College in Paramus, NJ, where she taught in the humanities division for 25 years. She has served as assistant director of The New Jersey Project on Inclusive Scholarship, Curriculum, and Teaching since 1994.
Una Voz Rising

"Hablamos el mismo idioma"

BY ADALYN HIXSON

The marriage of two innocent words under the aegis of an Internet search can yield some of the strangest bedfellows known to prose or politics or even pornography.

Looking on the Web for “Latina organizations” yielded 211 possibilities, few of which happened to be organizations of or for Latinas. Guide to Salsa Dancing in Amsterdam seemed vaguely relevant, but All-Star Dried Pasta Recipes seemed rather more Italian than Hispanic, and not a whit organizational.

A print search proved more traditional. A listing in the 1999 Encyclopedia of Associations of 134 Hispanic organizations came right after “Hirsutism Association of America, Daughters of.”

Just a handful, though, are for Latinas only, and of that small number, some were marked “defunct” or “address unknown,” and others proved to have out-of-date e-mail addresses and websites. But there is nothing defunct about Latinas, and many new alliances are emerging.

One is Una Voz, National Association for the Empowerment of Hispanic Women, Inc., founded in early 1999 by a group of professional women who felt that career development and support was lacking for Hispanic women from all walks of life. “The mission of Una Voz is a simple one,” says its website: “to promote the development of opportunities for women of Hispanic heritage throughout the United States.”

This alliance has already garnered support from several top corporations and is now hard at work on its second annual conference, slated for Miami in late March.

Una Voz

HO spoke with Una Voz founder and executive director Gary Rosario about the what, why, how, and who of it.

“Tobe frank,” said Rosario, “the whole inspiration for Una Voz came out of a song by Gloria Estefan. I was cleaning my house one Saturday to

929
the CD, Mi tierra, and ‘Hablamos el mismo idioma’ started playing.

‘I live in upstate New York in a neighborhood where there are hardly any Hispanics—maybe four families. That same week, my son had come home all excited because in school there was a boy just like him. When I asked him, ‘What do you mean…just like you?’ he answered, ‘He is half Puerto Rican and half Dominican.’ And I saw it in his eyes—not just excitement, but a sense of pride of belonging.

‘I looked around my house that whole day. I was a long way from the Bronx. I was living the American dream—vice president of a corporation, two cars, a four-bedroom house, two kids, and a professional husband. What was I giving in return? What was I doing for my people? For people just like me?’

That was the moment, said Rosario, when Una Voz, the National Association for the Empowerment of Hispanic Women, was conceived.

Getting Started

Rosario told HO she founded Una Voz after 20 years in the corporate world, running a legal research company, National Corporate Research.

‘At National, I had the opportunity of attending many conferences, seminars, and workshops nationwide, and in many of these meetings, especially the conferences, there were very few women. And usually I was the only Hispanic woman.

‘Incorporating was as easy as 1, 2, 3. After all, that is what I did for a living. Drafting the mission statement, bylaws, and code of ethics was another inspiration. And then I had a great board, consisting of friends and acquaintances that I had met over the years.’ All of the back and forth between the members of the board to get things in place was achieved with great professionalism, she said. And, it seems, at a record-breaking rate of speed.

HO asked how long it took from conception to birth.

‘It took us three months—to create an image, a logo, a website, bylaws, code of ethics, mission statement, member benefits.’

‘My sister, Ana Winans, designed our website; my brother, Juan Mota, designed and redesigned our Access database; my husband, Luis Rosario, designed the logo and put together our first brochure, our mailers, our application. My mother, Mercedes Mota, stuffed envelopes; my kids, Tatiana, 9, and Christopher, 12, put on stamps; and my friends made calls and got donations and more contacts. It has been mostly a family-and-friends kind of help. Bag stuffers until wee hours of the morning were my ever-faithful friends Judy Esposito and Liz Espinosa.

‘Then we had our first kickoff meeting with a group of founding members, and it just seems to have grown and continues to grow from there. Women are hungry to belong to a professional network; men have been doing it for years.’

Marketing Una Voz

An event, said Rosario, is “a recruitment tool as well as living up to our mission. We have had really good success with all our one-day seminars.”

That first meeting was in Albany and featured a Dale Carnegie seminar, in part because Rosario herself was a Dale Carnegie graduate and knew its benefits. The event drew 65 women.

The second was in the New York City Borough of Queens, at La Guardia Community College, with a theme “Business Writing When English Is Your Second Language.” Attendees totaled 58. A third, “Thinking Outside the Box,” was in Amsterdam, New York. “In Amsterdam, with 15 inches of snow, we still had 47 women,” said Rosario. These are very commendable numbers, especially for a non-profit organization in its early stages.

In Albany, an Una Voz fundraising dinner that included Latin dance lessons drew 163 people.

“We had a network event, a business card exchange at the Campbell’s Apartment in Grand Central Station, NYC, which was a huge success.” Indeed, it was almost too successful. Campbell’s Apartment, now a bar, was once a residence of a railroad owner of that name. “Only single people in New York know it,” said Rosario. Una Voz had reserved part of it.

“Due to the size of the upstairs balcony we had reserved,” said Rosario, “we only sent out 125 invitations, expecting 35-40 people to show.” Instead, “we had 54 people squeezed against a pool table that could not be moved from the middle.”

“For some reason,” she said, “this was the most popular event—to this day, people want us to repeat it.”

“The Minority on Wall Street Seminar” at Hostos Community College was a one-day event with 137 people. The Wàwàwà Retreat in Lake George holds 60 women comfortably, and it was sold out our weekend.”

Strategic Thinking…and Dancing…and Drumming

Last August, Una Voz held a “strategic thinking” meeting for
women at the nonprofit retreat Wiwakwa in Lake George, N.Y. Una Voz board members and women from other women's organizations were invited. Rosario called it "a very powerful weekend."

"We had two days of creative thinking," led by business development expert Sandra McGarrah, "and were able to develop the first stages of our business plan by the end of it," said Rosario.

"These women bonded for a lifetime. They stayed up until all hours of the night singing all Spanish songs, and poems; they played congas, timbales, and danced all night." The deejay for the weekend, María Pérez, "played different country rhythms and explained the origins."

"What amazed me," said Rosario, "is how these bankers, lawyers, doctors, executives, professors were able to let their hair down in the evening and be coherent and so amazingly bright in the morning during the meeting.

"I have to tell you that by the end of the weekend, Sandra and three other ladies who were staying at the retreat signed up to be members of Una Voz--none of them were Hispanics, but the energy was such..."

Una Voz hopes to repeat the retreat this August.

Latinas in the Arts

The Wiwakwa meeting was not the only Una Voz undertaking to involve the arts. Una Voz board member and artist Elisa Pritzker, who is Argentinean, organized a month-long exhibit last March of 18 Latina artists at the Highland Cultural Center in Albany.

"This was in answer to a challenge," said Rosario. "We were told there were no Latina artists in the area."

The exhibit garnered a lot of media coverage, said Rosario. Members of Congress from the district attended the reception for the artists. Asked by HO whether there were positive outcomes for any of the artists, Rosario said they were all established and doing very well.

"We just wanted the public to know that they were Latinas... recognition of Latina contributions to our society."

Pritzker herself has received a Congressional Award for her "achievements and service in the area of Community Arts and Culture" and has exhibited in the U.S., South America, Spain, Italy, Germany, Israel, and Taiwan. Her work is available for study through a permanent file kept at the National Museum of Women in the Arts, Washington, D.C.

In November and in January, Una Voz sponsored, along with Chase Manhattan Bank, a play that deals with women's issues, Casa propia, at El Repertorio Español in New York City.

Governing Board

Una Voz is incorporated as a not-for-profit organization, has applied for 501(c)3 status, and is currently under the umbrella of an affiliate association. HO asked Rosario about its governing board.

"I tried to put together a board from different countries in order to promote diversity. We've already had some changes, as expected. The founding board was made of family members, and close friends start to work with. After the first year, a lot of these faithful friends and family were replaced by one-third corporate, one-third community leaders, one-third professionals."

"We have on board Puerto Rican, Dominican, Mexican, Spaniard, French, Cuban, Argentinean, Italian, African American, and Colombian. Our membership is even more diversified, and from across the nation."

Rosario's own background includes "many schools and many countries." "My father was Secretary to the Dominican Embassy in Uruguay, so my primary years were in Uruguay, then Dominican Republic, then NYC for junior high school, and Walton High School in The Bronx, then Queens, then Dominican Republic again, then Flushing, N.Y., and then Albany, N.Y., where I have lived for the last 15 years."

Many of the Una Voz board members are in banking or other occupations related to money. This factor alone distinguishes Una Voz from many women's organizations.

Michelle Medina, a native New Yorker of Puerto Rican and Mexican descent, was named "the most promising Hispanic in Corporate America" by the Wall Street chapter of image in 1988. A top performer in sales and marketing while at Xerox, she now analyzes existing and emerging markets in Latin America, the U.S., and Canada for IBM, where she is active with its Hispanic, African American, and women's networks. A graduate of York College with a BSBA, Medina works too with Inroads, a nonprofit program that prepares minority high school and college students for the corporate world.

Helen Rodriguez-Burmaster, board president, develops and analyzes N.Y. State budgets for child welfare, delinquency, teen pregnancy, day care, adoption, foster care,
Americorps, and more. A Puerto Rican who grew up in New York City, she graduated from Russell Sage College and has done graduate work there and at SUNY-Albany.

Diomaris Inirio-Akutey is a senior financial analyst with GE Capital Corporation. María Díaz is vice president of the Sakura Bank Ltd., N.Y. branch, heading a department that processes and prices money markets, foreign exchanges, and more. Nydia Pérez is with Chase Manhattan Bank.

Frances G. Adami, vice president and nominating committee chair, a graduate of Pace, of the Westchester Business Institute, and of the University of Badajoz, in Spain, is a buyer for the Philip Morris Management Corporation, specializing in minority vendors.

Ana de la Moneda, secretary, is president of In Search Of Inc.

Vanessa Giocaman is executive vice president in San Francisco for City Mutual Financial, which she helped become the primary lender for the Hispanic community. She also taught that community through finance seminars and radio talk shows. A graduate of UC-Berkeley with a double major in rhetoric and legal studies, she earned a master's in political management at George Washington University. Giocaman co-founded the Latin American Federation, dedicated to educating the Hispanic community in immigration law, finance, taxes, college, and employment.

Dr. María Muñoz-Kantha, New York State Commissioner on Human Rights, is president of 100 Hispanic Women of Westchester.

Noreen K. Cadieux owns and directs a Montessori school. Guillermína Colón is with the U.S. Postal Service.

Ana Luisa Lorena Diana, a fashion designer with a thriving business in her native Mexico, graduated with a BS from the Universidad Autónoma del Noreste before attending design school in Guadalajara. Now she lives in the US, and has presented several collections since 1995.

Judith Esposito, who chairs membership and networking, is with the Healthcare Association of New York State (HANYS).

Board members whose occupations are not known by the editors are lawyer and finance chair Michelle Cruz and Anthony Miranda.

There are two lawyers on the board. Norma Ortiz, Esq., a much end up as a lawyer, just like my father and all his brothers.” Strengthening Una Voz seems an admirable alternative.

Annual Conference

March 29, 30, and 31, Una Voz holds “Una Voz-Una Meta’ National Women’s Conference 2001, in Miami, at the Radisson Mart Plaza Hotel. Its initial conference, held last May in Albany, was sponsored by AT&T, Mutual of Omaha, Rums of in Leadership, Women’s Health, and Building Wealth.

“We had great sponsors last year,” said Rosario, “and this year we also received sponsorship from Chase Manhattan Bank and Philip Morris.” Rosario is aggressively seeking additional sponsors, targeting the businesses that target women. The job is not an easy one.

Many companies, she said, “are hesitant to promote professional growth. They are more into the social issues, such as domestic violence, substance abuse—not that these issues are not important, but they are not the only issues facing women today.

“In New York, we only just elected the first woman senator. We have a long way to go. We need more women CEOs, VPs, doctors, engineers, lawyers, and astronauts.”

¡Viva Una Voz! ¡Viva Latinas!

After the first year, a lot of these faithful friends and family were replaced by one-third corporate, one-third community leaders, one-third professionals.

honored native New Yorker of Puerto Rican descent, and a second-generation lawyer, graduated from CCNY and from NYU Law School, and worked for the U.S. Department of Justice before entering private practice, primarily business law. She and her father, Frank Ortiz, a Harvard law graduate, are active in civic and community issues.

Annette Rodríguez-Soriano, Esq., graduate of the College of New Rochelle and the CUNY law school at Queens College, worked for N.Y. governor Mario Cuomo for 12 years, is now in private practice, and has taught family law in the CUNY system.

Executive Director Rosario has a human services degree, a bachelor’s in liberal arts, and attended La Universidad Autónoma de Santo Domingo with the intent of becoming a doctor, but decided against that path. She told HO: “I still may Puerto Rico, Prudential, LatinaStyle, the U.S. Postal Service, Oyster Financial, Hispanic Business, and Hispanic Magazine. It drew about 150 women, quite a healthy start for a new organization, and a good showing too during a month with many competing events and annual meetings. Women came from California, New Mexico, Florida, Pennsylvania, New Jersey, Chicago, Arizona, even Nebraska. And of course, from New York.

“Last year,” said Rosario, “we had six tracks... and people were stressing over the choices. They did not want to have to choose. They wanted to attend it all.”

This year there will be three tracks—Working Woman, Women Entrepreneurs, and Electra Latina—endorsed by the Hispanic National Bar Association. Each track will offer four workshops. And there will be three panels—Women the Una Voz Mission

• promote, develop, and create opportunities for the professional, educational, and economic advancement of women of Hispanic heritage throughout the United States;
• help facilitate the exchange of ideas and information regarding leadership and empowerment;
• advocate for the rights of Hispanic and other women in all fields of endeavor; and
• seek public recognition for the important contributions that Hispanic women make to our society.
MANA

Women Informed and Active

Four in Five Members Hold Degrees

BY MARI CARMEN SARRACENT

"Como berMANAs podemos alcanzar las estrellas y asegurar el futuro de nuestras berMANAs, hijas, y nuestra comunidad Latina."

"As sisters we can reach the stars and ensure the future for our sisters, daughters, and the Hispanic community."

That is the goal of MANA, a pioneer organization for Latinas that has since 1974 reached out and created a Hispanic sisterhood for the betterment of all Latinas.

Last June, MANA announced its new CEO and president, Alma Morales Riojas, an activist and proponent of a fine quality of life for Hispanics for decades. CEO Riojas describes the vision and mission of MANA: "In its over 26 years of existence, MANA has served as a foundation to support Latinas in their professional and personal endeavors. In doing so, Latinas have been empowered to build stronger communities, benefiting Hispanics and strengthening the nation's infrastructure."

"Today the environment is filled with new inventions, re-inventions, and technological advancements at an astounding rate never seen before. Changes are happening so fast that we hardly learn a new phase and another change has replaced what we just learned. Whatever age we are, we are struggling hard to keep up, for if we do not, we know we will lose whatever edge we had managed to gain."

Prior to taking on the MANA presidency, Riojas, a native of San Antonio, Texas, worked in private, public, and nonprofit sectors. She worked as an expert consultant with the Washington Headquarters Service of the Pentagon and developed the first affirmative action and federal equal opportunity recruitment plans for the Office of the Secretary of Defense and Joint Chiefs of Staff. She held leadership positions at the National Network of Runaway and Youth Services, the National Alliance of Veteran and Family Service Organizations, Federally Employed Women, Inc., and ALMA Consulting Services. Earlier, she spent 10 years as regional manager of an insurance company in San Antonio.

Riojas has earned many awards for her leadership and service efforts. In 1998, the National Association of Hispanic Federal Executives gave her its President's Outstanding Achievement Award. She currently serves on the boards of the National Hispanic Women's Council and Women in Community Service.

MANA History

In 1974, a group of Chicana activists conceived the Mexican American Women's National Association, which, in 1994, became MANA, a National Latina organization "in honor of the growing diversity of Latinas, whose heritage spans North, Central, and South America, and the Caribbean."

Based in Washington, D.C., MANA has chapters nationwide. Its mission is to empower Latinas through leadership development, community service, and advocacy. Its members range in age from 11 to 65 and up. They
are homemakers, college students, government employees, appointed officials, and professionals across many disciplines. According to MANA, more than 80 percent of the members have a university degree, and approximately 30 percent have earned an advanced degree.

What are the benefits to MANA members? Each member becomes part of a nationwide community network and receives publications concerning Latinas, such as the MANA Newsletter and the MANA Practicista Bulletin, which soon will be available on its website. Members are also invited to participate in educational programs, conferences, and institutes, and they have access to grant opportunities.

Riojas comments on the reasons why programs offered by MANA are so important. Latinas have set out to establish a record, that of being the fastest growing segment of new businesses in the entire country despite the odds that Latinas are at a disadvantage in education, employment, economics, housing, health, and politics. Riojas notes that Latinas have also entered the political arena in record numbers at the local, county, state, and national levels. And many of those elected Latinas point to MANA as the foundation and spark that ignited and fanned their political fire and ganas to run and be elected. Some of these women leaders have been named as Las Primeras, a MANA program that recognizes Latinas who have accomplished a “first.”

For MANA’s website, Bea Fernández, MANA’s national chair, prepared a message to all Latinas who might be interested in seeking membership: “Why do I think YOU should join MANA? Join us because you believe that Latinas have much to offer to our herMANAS, to our familias, and to our communities. Join us because you believe that we have a responsibility to help create a better life for all Hispanics. We are at a special place in history. As a group, we have come of age in how we view ourselves as a growing power, and on how others see us. We can change the direction of public policy and influence decisions that impact our communities at the federal, state, and local levels, but we can’t do it without you. MANA women are known for being informed about issues and acting on issues. We are ‘informed activists’ who believe we can make a difference. In fact, our dicbo (saying) is ‘LATINAS CAN!’”

MANA Today

In order to nurture more Latina leaders in the future, MANA recognizes how important it is to mentor Latinas from a young age. HERMANITAS is one such program.

Riojas reaches out to Latinas nationwide: “If you care about the future of Latinas, become a mentor to an hermanita. If you are a young Latina between the ages of 11 and 18, ask MANA to match you with a mentor through our HERMANITAS program, including our online mentoring program. And if you are a corporation or foundation, learn how you can support this effort.

“America holds immeasurable promise for all. In order to make that a reality for Latinas of all ages and of all national origins, we must join hands and minds, knowing that together the mountains in front of us will be ones we can climb and not monumental barriers to our success.”

HERMANITAS, or little sisters, empowers young Latinas through education, leadership development, health and cultural awareness, and community action. Since 1986, MANA chapters have developed local HERMANITAS initiatives nationwide as a national stay-in-school, leadership development, community service, and mentoring effort whose primary audience is teenage Latina girls.

The mission of HERMANITAS is to help these young Latinas excel in school by: providing studying alternatives; advanced education planning, and career options for the future; strengthening the family unit; engaging adults with young Latinas as mentors; participating as leaders in their communities by creating opportunities for service.

The HERMANITAS Summer Institute (NSI), a five-day leadership development program, is a component of the HERMANITAS program. Approximately 100 to 120 high school Latinas from around the country take part. The Institute includes interactive workshops, reflections and inspirational journal writing, Latina speakers of distinction, cultural and social activities, and resource information.

At the beginning and closing of the Institute, participants have the opportunity to set and evaluate goals, and establish objectives for NSI and their respective futures.

Regional and national conferences and Las Primeras, a national celebration of Latina achievement held annually in Washington, D. C., is part of Avanzamos, a primarily member- and chapter-based formal leadership development program.

Last year’s regional conference, “Strengthening and Empowering Latina Community,” took place at Sidney Lanier High School in San Antonio, Texas. In recognition of Domestic Violence Awareness Month, Philip Morris Companies, the lead sponsor, assembled a panel featuring national and
local leaders recognized for their involvement in efforts to end domestic violence. Individuals from the National Network to End Domestic Violence; the University of Wisconsin-Madison School of Nursing; AYUDA Clinica Legal Latina; The P.E.A.C.E. Initiative, a San Antonio-based advocacy group; the City of El Paso, Texas; and Kraft Foods participated.

The 2000 Las Primeras Awards Luncheon recognized the following individuals:

Polly Baca, a member of the Colorado State Legislature for 12 years, is the first Latina elected to a U.S. state legislature, the first minority woman elected to the Colorado State Senate (1978-86), and the first Hispanic woman to serve in a leadership role in a state senate in the U.S.

Congresswoman Irma Rangel (D-TX) is the first Latina elected to the Texas House of Representatives (1976), the first Latina chair of the Mexican American Legislative Caucus, and the first Mexican American chair of the House Committee on Higher Education.

Congresswoman Belda Garza (D-MI) is the first Hispanic Democrat elected to the state office in Michigan. She was elected to her first term in office in November 1998 with 85 percent of the vote.

HerMANO/HerMANA recipients were Senator Orrin G. Hatch (R-UT), who hired and promoted Anna Escobedo Cabral to the position of director of the U.S. Senate Republican Conference Taskforce on Hispanic Affairs (which he established in 1984) and deputy director of the Judiciary Committee; Congressman Bob Filner (D-CA), who was instrumental in the election of the first Latina to the San Diego, California, City Council; and Ada Díaz Ahmed, president of Soloella.com, New York, a bilingual website for and by Latinas.

(Article compiled from materials provided by MANA.)

**Upcoming MANA Events:**
- May 4-5, 2001
  Regional Conference—Chicago, IL
- July 5-7, 2001
  National HERMANITAS Summer Institute—Washington, D.C.
- September 23-27, 2001
  MANA National Conference—Washington, D.C.
- September 28, 2001
  Las Primeras Awards Luncheon—Washington, D.C.
  (Partnered with the Congressional Hispanic Caucus Institute)

For more information on MANA, check out its website at www.hermana.org, or call (202) 833-0060, fax to (202) 496-0588, or e-mail to hermana2@aol.com.
Program Helps Latinas and Their Teachers See Possibilities

Sociotransformative Constructivism to the Rescue

BY MICHELLE ADAM

Julieta Marta remembers only too well arriving in the U.S. from Mexico and entering fifth grade. Knowing not a word of English and unfamiliar with this new culture, it was, in her own words, “more scary than anything else.” She also came carrying with her the values and culture that her parents and society had already taught her. Specifically, as a girl, that meant always doing as you are told and being quiet. Although she broke out of one of the mores by playing sports, she remained shy and true to cultural expectations.

Marta doesn’t stand alone in her example. Today she teaches bilingual fourth grade classes at University Hills Elementary in Las Cruces, New Mexico, where about 90 percent of the students are Latino. She continues to see girls, and especially Latinas, falling into the same patterns of behavior that she displayed as a youngster.

“Many Latina girls are apprehensive. They are not much of go-getters. Many of our students are traditional that way,” said Marta.

Marta’s own experience has inspired her to push her girls and “help them think positively.” It has also been the impetus for her involvement in a three-year professional development and research program, MAXIMA, at New Mexico State University in Las Cruces. The program, funded by a $750,000 grant from the National Science Foundation and the New Mexico Commission on Higher Education, is exploring new ways of teaching math and science to elementary and middle school girls and enhancing their potential for becoming scientists. Since last summer, MAXIMA has been working with teachers such as Marta and students at five area elementary and middle schools, using an inquiry-based and multicultural approach to teaching math and science.

Teachers like Marta have seen their female students, especially Latinas, holding back in most classes. MAXIMA is addressing the subject area and the career fields in which most girls and women specifically fall far behind. Studies have shown that while the number of women earning college degrees has increased over the past 10 years, a very small percentage of these degrees were awarded in the science, math, and engineering fields, especially among Latinas, said Alberto Rodríguez, assistant professor at New Mexico State University College of Education, and founder and co-principal investigator of MAXIMA.

“What is shocking,” he said, “is that Latinas are the fastest growing group of people in the United States, but only 35 percent of all science degrees awarded last year were earned by Latinos and Latinas. We want to change girls’ attitudes about science, mathematics, engineering, and technology so they can see themselves as potential scientists. We targeted girls in this project because they are more likely not to pursue science-related careers, especially minority women such as Latinas.”

Like Marta, Rodríguez embarked on the MAXIMA program because of his own observations. While a professor in his Methods classes at the University of Wisconsin, Rodríguez was literally the only minority present. And when it came to those students who wanted to become physics and chemistry teachers, they were mostly men. “I started wondering why I was the only minority in the classroom,” said Rodríguez. “Later I wondered why there were more men than women in the classrooms.”

Approximately three years ago, Rodríguez moved from Wisconsin to Las Cruces, New Mexico, because of the opportunity he would have to work with a more diverse group of students than he had encountered up north. “I hit the ground running here,” said Rodríguez, noting
that since his arrival, he has been working incessantly on research grants and running their programs. In less than three years, he has received more than a million dollars in research grants.

Rodríguez’s latest program, MAXIMA, is built on bringing issues of culture, gender, and individuality into the classroom as a constructive and useful tool to better learning and to empowering students while they are learning. MAXIMA is the culmination of Rodríguez’s own research into the use of Sociotransformative Constructivism (STC) in the classroom. Rodríguez says that STC deconstructs “existing power structures that might interfere with meaningful learning in the classroom. In this way, students are encouraged to formulate their own knowledge and contrast it with the accepted knowledge and norms. At the same time, students are urged to reflect on whose knowledge has become the accepted norm, whose interests are being represented by this knowledge, and who the people are who have access or power to continue creating the accepted knowledge.”

The MAXIMA program also encourages the teaching of science and math with an emphasis on hands-on learning and making curricula more relevant to the actual lives of the students. For example, teachers would relate architecture to the styles of New Mexico or make students aware of the names of Latino scientists.

The girls who participate in the program start in fourth grade and continue through sixth grade. Each year, they have the opportunity to work with their regular teachers and with student teachers who have gone through a MAXIMA professional development seminar, one of which was held last summer at NMSU. The girls are then interviewed three times a year by researchers to access their views on math and science. These data are used to create better math and science curricula. In addition, members of the MAXIMA team visit the classrooms and offer their teachers support, not only in teaching but in helping to pay for equipment needed for more hands-on teaching practices.

For Marta, the MAXIMA program was inspiring from the beginning. “Once we were in their summer institute, that really motivated me,” she said. “It was so helpful in areas I have to teach this year. We were reaching toward the same goal the whole time we were there.” Marta joined other teachers in the two-week-long summer institute program offered by MAXIMA every summer to inspire and help train teachers in math and science.

Mary Lessman, a sixth and seventh grade teacher at Lynn Middle School in Las Cruces, also has been involved with the MAXIMA program from the very beginning. She recalled how they initially asked her what she needed to learn in science for her classroom. And, in turn, she gave them various ideas, including that of learning more about robotics. “I’ve never had an institute where they want to know what you want to study,” said Lessman. “They matched our needs to what we felt our classroom needs were. That’s novel. What’s also novel is that they come by and are supportive. It’s very unusual for university people to do that.”

The partnership that Rodríguez is building between his university and local schools is novel indeed—at least for him it is. Most research projects are short-term, with much less time and concern for teachers and students than MAXIMA offers, explained Rodríguez. This project goes far beyond merely writing theories and testing them in order to receive tenure. For him, as it is for the teachers involved, it is an opportunity to work in partnership in the interest of directly impacting and transforming the face of female students, and others as well, in sciences and math. “We believe that the classroom climate is very complex. That is why we want a three-year study, to see if Socio-transformativ Constructivism is really having a positive impact on the girls,” said Rodríguez.

Lessman joined MAXIMA because of concerns for the girls in her classes, as did Marta. “A lot of girls have low expectations for themselves,” she said. “I’d rather have them think of not only going to college but also of graduating from there.”

“I know family is so important to them,” she added, referring to the Latinas, “but I am hoping that can be balanced with career.” Lessman went on to describe how just a week earlier, several people from the Mexican American Engineers and Scientists organization came into her classroom and “inspired the students.”

Before teaching about architecture, Lessman

Mary Lessman, School Teacher, MAXIMA Participant

“What’s also novel is that they come by and are supportive. It’s very unusual for university people to do that.”
Through MAXIMA, Lessman has attended meetings with elementary school teachers, an opportunity that she describes as very unusual in her profession. “It helps me know what experiences my students have had from elementary school,” she said.

Cathy Zozakiewicz, co-principal investigator with Rodríguez, brings to the table her own background in multicultural education and gender issues. She came to New Mexico from Wisconsin for more exposure to an opportunity to work with a more diverse population.

“Everyone will benefit from the research we do,” said Zozakiewicz. “In creating a different kind of collaboration between the university and the schools, this program will help transform.”

For Zozakiewicz, “schooling and gender are very closely tied.”

And as she has witnessed in the classrooms that she now visits all the time as part of MAXIMA, teachers are beginning to think about gender and cultural issues every day. While many programs for girls are offered outside the classroom, after school, or as a brief curriculum in themselves, Zozakiewicz is quick to proclaim that “there is nobody else like us—doing what we are doing. I think there are huge silences in schools in talking about gender. We help burst open these silences.” The first step to the program, she described, “is having teachers be aware and having space to open students up and talk about these things.”

Zozakiewicz gave several examples of MAXIMA classrooms that are incorporating race and gender issues in curricula. In a math class, while measuring the carpet in a room, students were asked how many fathers AND mothers had tape measures at home. In another class where space was the subject matter, the teacher talked about the first Hispanic astronaut. “Kids remembered that one!” she said.

While Zozakiewicz is a key player in MAXIMA because of her own interest in gender and learning, she is aware of the challenges to addressing issues such as gender and race in the classroom. But she explained that MAXIMA is “not only about gender and race but about everyone having a hand at creating knowledge—kids being builders of knowledge.”

MAXIMA is also putting into action what in the past five years has been a strong movement called “science for all,” a nationwide push for more inclusive science teaching. The rhetoric in teaching for diversity has been strong, said Rodríguez, saddened by the lack of action behind the push for diversity. But what he and Zozakiewicz hope to do through MAXIMA is to bring this rhetoric into actual form in the classroom—not only to tell teachers about the importance of inclusive education but to assist them in attaining this goal. “Teachers are already saying to us that this boosts their confidence,” said Rodríguez. “Being there and helping teachers put activities together builds an essential connection between the university and the classroom. Just because we are there…it reminds them of what we have talked about.”

For Rodríguez, the MAXIMA program is all about “going against the MTV crowd, the constant images the girls see of themselves on television.” It is rather about “helping their own female teachers serve as role models when they get excited about science and math,” he said. “The STC approach requires as researchers that we not only go to classrooms and collect data. But it demands of us that the participants are benefiting too. I see teachers benefiting. We also think that over a period of three years, this encouraging environment will help students see themselves as a scientist along the way,” said Rodríguez.

For him, seeing this possibility has been “really wonderful.”
Women Not Affected by 209, Says Connerly

Others at UC and Elsewhere Disagree

BY JEFF SIMMONS

The paper was titled “The Impact of Proposition 209 on Education, Employment, and Contracting: Opportunities for Women in California.” Prepared for Equal Rights Advocates, a northern California group, it drove home several significant points.

It might be too soon to tell whether 209, an anti-affirmative action measure, will dramatically pare opportunities for women, but advocates maintain that the future appears to be bleak—at least in some areas.

“Women who will suffer from the elimination of race and gender preferences in the admissions process are Latinas and African American women,” wrote ERA former Director of Programs and Litigation Beth H. Parker.

Parker maintained that the measure wouldn’t dramatically change the overall number of women enrolled in postsecondary education. Women, she said, had been major beneficiaries of affirmative action policies since their inception in the 1970s. The measures gave women the chance to become more successful in education and in the public sector, and at winning contracts in California.

Statistics bear out her thesis. Prior to Proposition 209, female high school graduates were more likely to enter colleges or universities than were their male counterparts, and women earned more than half of the bachelor’s degrees within the UC system, she points out.

In 1970, only 8.2 percent of women age 25 and older had completed four years of college. But this number climbed to 18.4 percent by 1990, she cites.

Affirmative action also balanced the scales of hiring more toward women than in the past. UC reported that 21.3 percent of all new faculty employees in 1979 to 1981 were women, and that number grew to 30.5 percent in 1991 to 1993.

Still, gains in some areas were moderate at best. Men still outnumbered women in many fields in California higher education systems. Men more often held top administrative positions and faculty appointments at postsecondary institutions. Few women secured academic jobs in the field of science.

Parker questioned whether other states will adopt similar anti-affirmative action measures, and reasoned that the impact in California is going to be dramatic, particularly beyond the walls of higher education.

There is, she wrote, strong resistance to women in nontraditional construction trades. Most women believe they have thrived in that field because affirmative action measures provided incentives.

Parker also notes a decline in opportunities for women to bid on state contracts.

While the University of California system had initially watched a dramatic decrease in African American, Latino, and Native American enrollments, the overall female enrollment did not drop. But the number of female members of those racial and ethnic groups did fall.

“I think when they do get hired, they have a harder road to travel, during the tenure process, than any other group,” Wilson says of women faculty.
Parker concluded, "What this means in a post-affirmative action world is as yet unknown. It appears that women of color in time may experience lower wages if their opportunities for advancement decrease. These concerns may become significant as the numbers of minority women in California continue to grow in the new millennium."

In many areas, the jury is still out on the long-term impact of Proposition 209 on women in California. But questions abound as do measures to counterbalance its impact—to determine whether advances will now reverse into retreats.

ERA, like other advocates opposed to Proposition 209, questioned whether state agencies will continue to hire women in proportionate numbers despite its passage, whether women will advance appropriately in these agencies, and whether discrimination will become more rampant.

Liberal camps viewed the proposition as the start of the end of affirmative action and equal education for all, particularly for minority students across the United States.

In November 1996, voters approved the measure, entitled the California Civil Rights Initiative. However, it didn’t go into effect until August 28, 1997, after the Ninth Circuit Court of Appeals upheld it.

The measure read: “The state shall not discriminate against, or grant preferential treatment to, any individual or group on the basis of race, sex, color, ethnicity, or national origin in the operation of public employment, public education, or public contracting.”

Proposition 209 came months after University of California officials voted in 1995 to prohibit such consideration in admissions, though its policy didn’t go into effect until 1998.

Since that time, enrollment by African Americans and Hispanics initially plummeted. That has caused quite a few states to contend that the end of affirmative action efforts would elicit inequality and prevent minorities from admission.

New systems began to evolve in an attempt to ensure greater numbers of minority admissions. The so-called “percentage systems” guarantee admission to state colleges of students who attain certain academic ranking in high school.

In California, for example, admission is guaranteed to students in the top four percent of high school graduating classes across the state. Additionally, there has been one recent proposal by the University of California president to expand that percent and grant provisional admission to the top 125 percent.

That, he said, would yield 12,000 more students, a third of whom would be minority.

Supporters of 209 say there has been a comforting increase in the number of Hispanic, African American, and American Indian enrollees.

In early 2000, University of California officials announced their numbers had even surpassed the level reached when affirmative action measures were in effect. This past semester, enrollment of minority first-year students at the system’s eight schools grew to 7,336, up from 7,236.

Nevertheless, the numbers aren’t distributed evenly, and they display what critics maintain is a two-tiered system, with the more competitive, elite campuses becoming much whiter.

At the Berkeley campus, for instance, minority enrollment has wavered. In 1997, it was 1,778, then plummeted to 717 the next year, increased to 990 in 1999, and then to 1,169 this past fall.

Supporters of 209 reason that
students aren’t slipping through the cracks; they are simply being redistributed to other, less competitive campuses.

Since Proposition 209, campuses have extended outreach programs to target the disparities, to boost teacher education, and to advise students early on about academic requirements for attending a college or university.

The Faculty Front

Ron Wilson, assistant executive vice chancellor of Opportunity and Diversity at the University of California’s Irvine campus, recently compared University statistics for the four years prior to 209’s enactment with the four years after it went into effect. The analysis left him dismayed: there wasn’t much change, he says, and that wasn’t good.

“Our campus has not met our goal of recruiting, hiring, and retaining Native American Indian, African American and Chicano/Latino faculty,” Wilson wrote in a recent issue of Cooperative for Problem Solving.

The reality, he says, is that his campus and others have not made substantial strides since California’s ban on affirmative action. Wilson says the faculty front warrants a hard look. He reports that at all UC campuses, there were 137 American Indian, African American, and Chicano/Latino tenured and non-tenured faculty before 209 was in place. That amounted to 97 percent of all appointments.

Currently, he reports, there are 100 minorities in those positions, or 73 percent. Non-tenured minority appointments dropped from 101 percent before 209 to 83 percent afterwards.

At the Irvine campus, the disparity is even greater. Of the 141 tenured and non-tenured faculty appointments, 16, or 11.3 percent, were minority before 209. Now, only nine, or 5.1 percent, of the 169 appointments are minority.

As for non-tenured appointments there, 12 of the 98 positions, or 12.2 percent, were minority before 209, and that has fallen dramatically to 4.7 percent (six of the 128 positions are minority) since 209.

Wilson says the University shouldn’t feel comforted that other campuses are facing similar situations. He blames the decreases on a failure to “diligently and aggressively” pursue a more diverse workforce.

He also maintains that affirmative action efforts also had benefit African Americans, Hispanics, and women. As he noted during the war over the measure, diversity is one thing; special treatment is another.

He also has denounced critics who have grouped women with minorities to make a general statement about the effects of the proposition.

“This is the unfortunate part about looking at issues through a racial lens,” he says. “You tend to generalize and say all women and all minorities, however you define that term, are equally affected by preferential policies, and they are not.

“Women are affected differently,” he says, maintaining that affirmative action policies didn’t favor women as much as Blacks and Hispanics, and calls critics’ assertions political manipulation.

“If you look around the country, the way the affirmative action debate unfolded was always women and minorities versus White males. That is political calculation, knowing that when you lump women and people of color together, you are talking about 65 percent of the population versus the 35 percent of White males.”

He adds, “The evidence does not suggest at all that women are negatively affected by the removal of affirmative action programs. In fact, on many college campuses, the big debate is whether men should get affirmative action to level out the number of women.”

He points out, as well, that the pool of women in certain academic areas such as mathematics and science was very small prior to Proposition 209.

“So if you’re talking about hiring female faculty members in the math and sciences, those numbers probably haven’t gone up,” he says, noting, “and they haven’t dropped dramatically since the pool was short to begin with. I think overall, 209 hasn’t had very much effect.”

The group Chinese for Affirmative Action and Equal Rights Advocates disagree. In 1998, they surveyed 68 government agencies across California to determine whether program changes affected minorities and women.

The analysis, titled “Opportunities Lost: The State of Public-Sector Affirmative Action in Post-Proposition 209 California,” found that the measure eroded the gains made by women in the state, most often when it came to public contracting opportunities.

Some organizations, such as the state’s American Civil Liberties Union, maintain that the measure has curbed opportunities, and they’ve filed suit since its inception. A spokeswoman for the San Francisco-based ACLU says the case is still pending.

Parker maintains that discrimination lawsuits might be the way to go to remind agencies that discrimination won’t be tolerated. The hope is, she wrote, that discrimination no longer exists.

“Until that time, however, the civil rights community needs to be vigilant in fighting discriminatory practices and monitoring the implementation and enforcement of affirmative action policies.”

In the UC system, non-tenured minority appointments dropped from 10.1 percent before 209, to 8.3 percent afterwards.
ACT Develops Standards for College-Bound Students

IOWA CITY, IOWA

Standards-based education reform was a familiar topic of the past political season. And setting standards to measure students' academic achievement was a frequent subject of debate. But reaching a national consensus on the issue is a difficult task.

People use test scores to compare students, to reward schools, or to compare states. But what do the scores mean in respect to students' knowledge and abilities? That is the question.

For those who want to know more, ACT Inc. has developed descriptions of students' skills in English, math, reading, and science, the four subjects tested on the ACT college-entrance exams. These descriptions are called Standards for Transition.

"The standards communicate educational expectations for students making the transition from high school to college," said Sherri Miller, director of elementary and secondary school programs for ACT. "From their test scores, students can identify the knowledge and skills they've mastered and those they need to improve to succeed in college."

In math, for example, students are told what kinds of problems they are able to solve in nine separate areas, from basic operations to trigonometry. One thing an ACT math score of 18, on the ACT scale of 1-36, means is that a student can find the average of a group of numbers. A score of 22 means he or she can solve problems of greater difficulty, including basic algebra.

"Teachers can use our standards to identify their students' strengths and weaknesses, and they can plan their teaching accordingly," Miller said. "Our standards literature includes instructional guides that we call Pathways for Transition. They list the kinds of classroom activities that should benefit students at the different score levels. Teachers can help students improve by guiding them along a pathway of activities to the level they need to reach to be successful."

ACT's Standards for Transition aren't just for teachers and students. They're also for parents and policymakers—anyone who wants a better idea of what college-entrance test scores mean, and anyone who wants to see test scores and student achievement improve.

DOE Report Finds Professional Development Key to Quality Performance in Math and Science

WASHINGTON, D.C.

Immediately improving teacher quality is the key to enabling the nation's children to become world-class learners in math and science, says the U.S. Department of Education (DOE).

The DOE's National Commission on Mathematics and Science Teaching for the 21st Century, in its report "Before It's Too Late," said, "The way to interest children in mathematics and science is through teachers who are not only enthusiastic about their subjects, but who are also steeped in their disciplines and who have the professional training—teachers—to teach those subjects well."

The report is the result of a yearlong investigation into the quality of K-12 mathematics and science teaching in America's schools. In the summer of 1999, U.S. Secretary of Education Richard Riley launched the 25-member panel, appointing former U.S. senator and astronaut John Glenn as chair.

"It is imperative to move swiftly," said Glenn. "Two-thirds of the nation's teachers will leave their positions over the next decade, giving us an unprecedented opportunity for improvement."

The Glenn Commission called for a number of efforts to improve math and science teaching. High-quality professional development—including summer institutes, inquiry groups, and incentive programs—should be made available to all teachers.

The report asserts, "Teachers must be given the time they need within the school day to keep up with new developments in their fields, teaching aids, materials, and technology."

Principal Carol Daniels, who was invited to the press conference in September announcing the release of the report, attributed the turnaround of student performance at Jeb Stuart Middle School in Jacksonville, Fla., to its ongoing professional development program.

"The change took place with the teachers. Simply, they became better at teaching the complicated subject of mathematics," she said.

Increasing the salaries of math and science teachers to compete with wages offered in the private sector is among the Commission's recommendations. Statistics show that teachers earn 29 percent less than other workers with a bachelor's degree—$35,048 per year compared to $49,362 per year in 1997.

The Commission also pointed out that teachers are just one of the groups with a stake in mathematics and science education. It targeted six other stakeholder groups—parents, administrators, school board members, higher education institutions, state political leaders, and business leaders—as also responsible for raising student achievement.

The report "Before It's Too Late" is available online at www.ed.gov/innov/Math/glenn/.
NRCCUA and e2 Communications Create Online Service to Offer High School Students Targeted Information from Colleges

KANSAS CITY, Mo.

Beginning in the spring, high school students will have a new mode of contact with prospective colleges and universities. In the past, colleges have promoted themselves through traditional direct mail and college fairs. This spring, they will begin to communicate with prospective students via e-mail.

The National Research Center for College and University Admissions (NRCCUA), a non-profit organization dedicated to connecting college-bound young adults with universities, and e2 Communications, a leading technology firm, are launching an online service that allows students to express qualities they seek in a college and facilitates targeted communication between those students and the institutions that feature those preferences.

NRCCUA’s Post-Secondary Planning Survey enables more than 35 million high school students to indicate their career and college preferences—including size, geographic area, type of institution, etc.—to more than 850 member colleges and universities nationwide. e2 Communications’ service will facilitate communication between these students and the institutions in the more efficient and affordable mode of e-mail.

“Traditionally, both students and colleges have cast a wide net with regard to the college application process,” said Don Munce, president of NRCCUA. “Students are inundated with college information from friends, family, guidance counselors, and college mailings. Colleges invest significantly in direct mailing, which at times targets students who may not be applying to or attending their institution. Our e-mail service will provide both students and colleges with focused, targeted, and cost-effective communication that will enhance the application and recruitment process.”

Uniquely, the partnership protects student privacy while allowing colleges and universities to exchange information via e-mail using e2 Communications’ technology with a content screening process approved by NRCCUA. Students will be able to request removal from online participation in the program at any time, and their privacy will be ensured as student information will be kept in a safe, protected server instead of being released directly to colleges and universities.

“We want to ensure students have access to information about colleges and universities, but we want the information to be conveyed in a manner they can control,” continued Munce. “Through our partnership with e2, we know this can be accomplished. We also want parents and students to feel confident that none of the information they share will be used for purposes unrelated to college recruitment.”

Ford Foundation Launches International Fellowships Program

NEW YORK, N.Y.

The Ford Foundation announced a major international graduate fellowships program and a complementary undergraduate initiative to help prepare a new generation of future leaders for the challenges of the 21st century.

The $330 million commitment features a new Ford Foundation International Fellowships Program (IFP) that will provide $280 million over the next 10 years to support post-baccalaureate study for Fellows from Africa, the Middle East, Asia, Latin America, and Russia. The IFP, which will award 350 new graduate fellowships annually, assisting a total of 3,500 Fellows over the next decade, represents the largest single grant in the Ford Foundation’s history. An additional $50 million will support programs that seek to broaden opportunities for undergraduate education in these regions.

“Societies around the world face the challenges of globalization, advancing technology, peace and security, and the widening gap between rich and poor,” said Susan V. Berresford, president of the Ford Foundation. “To tackle these challenges successfully, we need people from all sectors of society who can bring fresh vision, expert knowledge, and strong leadership skills. In many countries, however, the rapidly increasing need for advanced education far exceeds available resources, which is why we feel this is the right moment to commit to a large-scale fellowships program.”

The graduate fellowships will support up to three years of master’s or doctoral study at universities anywhere in the world. Fellows will be selected on the basis of their leadership potential, academic excellence, and commitment to community or national development. They may pursue their studies in any fields that further the Ford Foundation’s goals of strengthening democratic values, reducing poverty and injustice, promoting international cooperation, and advancing human achievement.

The IFP aims to broaden the talent pool of future leaders by making a special effort to recruit exceptional individuals who would otherwise lack opportunities for advanced study. This will include women, people who belong to particular ethnic, racial, or religious groups, and those who live outside capital cities or in countries in conflict or post-conflict situations.
Santa Ana Journalism Program Sets Record

Santa Ana College's (Calif.) award-winning journalism program received Associated Collegiate Press (ACP) National Pacemaker Awards for el Don, considered the best college newspaper in the country for the eighth year in a row, and the student-run magazine West 17th. Santa Ana College is the only two- or four-year college to simultaneously win both ACP honors, which were announced at the National College Media Convention in Washington, D.C.

The Pacemaker competition, co-sponsored by ACP and the Newspaper Association of America Foundation, is based on coverage and content, quality of writing and reporting, leadership on the opinion page, evidence of in-depth reporting, design, photography, art, and graphics. Pacemakers are selected by the editorial staff of a professional newspaper in the host city. The judging panel of the latest competition consisted of members of The Washington Post.

el Don was one of four newspaper publications, out of more than 200, competing for the top coveted award that many acknowledge as the Pulitzer Prize of collegiate journalism.

Anzaldúa Speaks at Miami University

Gloria Anzaldúa, one of the country's best-known Chicana writers, presented the lecture "Nepantla: Shifting Identities and Racial Categories" at Miami University in Ohio.

Nepantla, a reference from the Aztec meaning torn between ways, is a primary theme in Anzaldúa's work, which combines poetry, history, cultural anthropology, and memoir.

One of the principal founders of Chicana feminism, Anzaldúa has received a National Endowment of the Arts Fiction Award, the 1991 Lesbian Rights Award, and the 1992 Sappho Award of Distinction. Her book Borderlands/La Frontera: The New Mestiza was chosen as one of the 100 best books of the 20th century by the Hungry Mind Review, and Making Face, Making Soul/Haciendo Caras: Creative and Political Perspectives by Feminists of Color, which Anzaldúa edited, won the Lambda Literary Best Small Book Press Award.

Otero Associate Dean of UNM University College

Rosalie Otero was appointed associate dean of interdisciplinary programs at the University of New Mexico's University College.

Otero was elected president of the National Collegiate Honors Council, an organization that creates, identifies, and enhances opportunities responsive to the needs of exceptionally able and highly motivated undergraduates. Previously, she was associate professor and director of the University honors program.

Otero said that because of her involvement with both the regional and national honors councils, she can bring regional and national visibility to her new position.

Nazareth Names Multicultural Recruiter

Nazareth College in New York appointed Pamela E. Douglas multicultural staff recruiter. Her responsibilities include developing and implementing a recruitment plan to attract and hire qualified, diverse staff candidates.

Douglas previously was a senior human resources recruiter/supervisor with Geneseo Region Home Care. She also worked at Eastman Kodak Company, coordinating its college and university recruitment program. Douglas has a bachelor's degree from Utica College of Syracuse University.

Union County ESL Students from 82 Nations

According to a 2000 nationality survey of students studying ESL, conducted by Union County College's (N.J.) Institute for Intensive English, students from 82 foreign nations plus Puerto Rico are enrolled at the institution. Colombia is dominant, with 303 students enrolled.

The Institute is a full-time program of concentrated instruction in English for persons whose native language is not English. After placement testing, students enter one of six levels of instruction, commensurate with their abilities. The curriculum covers structure, listening, conversation, and study skills, as well as reading and academic writing.

Nunez in New Post at University of Kansas

Santos Nunez was promoted to program director for the Multicultural Resource Center at the University of Kansas. At Kansas for nearly a year, Nunez already had been overseeing the Center. She is a graduate of the University of North Texas and the University of South Carolina.

University of Florida Students Exhibit Work

An exhibition in Alachua County, Fla., "Costa Rica in Words and Pictures," presented the overseas work of 14 University of Florida journalism students.

Featured were more than 20 photographs and written excerpts from a 19-day trip to Santa Cruz, Costa Rica. Graduate and undergraduate photographers and writers worked in teams during the trip to document community and culture in the rural province of Guanacaste. The trip was part of an international journalism program nicknamed the
Florida FlyIns, developed in the fall by the College of Journalism and Communications at the University of Florida. The practicum is sponsored by The St. Petersburg Times and is part of an advanced journalism course designed to bring together writers and photographers to develop their international journalism skills in Latin America. Pulitzer Prize winner John Kaplan and Dr. Kurt Kent, faculty members in the College's department of journalism, conceived and developed the course.

**Pasadena City Presents Hispanic Theater**

The Latin American Issues Through the Arts Club at Pasadena City College in California presented Palabra, an evening of Hispanic theater. Palabra included 18 scenes presented by 12 student actors inspired by the works of Hispanic writers throughout the ages. The Latin American Issues Club worked on the project with Gustavo Geirola, professor and Latin American theater director.

**UNM to Offer New Teaching Approach**

"Language, Performance, and Identity in Nuevomexico Culture," with theater and dance Professor Dorothy Baca, linguistics Professor Eduardo Hernández-Chávez (pictured), and Spanish and Portuguese Professor Enrique Lamadrid, is one of the new courses that will be taught at the University of New Mexico (UNM) in the fall 2001 semester.

Eighteen UNM faculty members will teach core courses in novel interdisciplinary, thematic clusters in a new, "enhanced" teaching approach. Dr. Nancy Uscher, interim associate provost, and Dr. David Stuart, associate provost for academic affairs, are the co-principal investigators of the $150,000 grant from the William and Flora Hewlett Foundation General Education in Research Universities Program provides the funding for the new approach. The grant is matched with $150,000 from the UNM office of the provost.

The clusters will be open to all lower-division undergraduate students as part of UNM's efforts to strengthen undergraduate education and address retention issues.

**Moore College Honors Philadelphia Students**

Moore College of Art and Design in Pennsylvania honored 48 students from the School District of Philadelphia at its 17th annual holiday art contest. Open to area public school students, the contest invited participants to create a drawing that expresses their individual interpretation of Christmas, Hanukkah, or Kwanzaa.

"This contest gives Philadelphia school students the opportunity to experiment with art, display their creativity, and discover a new talent," said Happy Fernández, Moore College president.

Pedro A. Ramos, president of the Philadelphia School Board, was among members of the Philadelphia community and Moore College faculty on the panel of judges.

Pictured (l to r) are Fernández, Sheppard School art teacher Ellen Smedly, and her student, Richmary Ramirez, who is the fourth grade winner of the 17th annual art contest.

**Long Beach Names Cordero to New Post**

Long Beach City College (LBCC) in California named Gloria Cordero the new director of governmental relations.

Cordero spent the past 16 years with Southern California Edison (SCE) as its public affairs regional manager and educational representative. During that time, she monitored local government activities and issues, served as a liaison between government agencies and SCE, and helped 25 school districts learn about energy and career education and electric safety.

Cordero has a bachelor's degree from CSU-Long Beach and a master's from the University of Southern California. She is also an alumna of LBCC, where she studied from 1970-72. Among her many honors are the Martin Luther King Memorial Award Long Beach and a humanitarian award from the National Conference for Community and Justice.

**HACU Lauds NASA for Helping Minorities**

The Hispanic Association of Colleges and Universities (HACU) offered its congratulations and thanks to NASA for a decade of efforts in introducing thousands of Hispanics and other minority students to college and potential careers in science, engineering, mathematics, and technology.

Through NASA's now 10-year-old Minority University Research and Education Division, minority students and the colleges serving the largest concentrations of those students have benefited from programs designed to reverse the historic shortage of minorities in those career fields.

Last year, NASA awarded a fourth $1 million grant in four years to HACU in support of the NASA/HACU Proyecto Access program, which has steered hundreds of minority middle and high school students toward college each year to continue their studies in science, mathematics, engineering, and technology. HACU member colleges and universities also have benefited from the Model Institution for Excellence and Institutional Research Awards programs initiated by the NASA Division.

**Florida A&M Expands Internationally**

Florida A&M University launched a new $700,000 initiative that will permit students living 5678 miles away to earn a doctorate in educational leadership while remaining in their home country. "I wanted to expand global opportunities for Florida A&M faculty and students and support international outreach," said Frederick S. Humphries, Florida A&M president. The $700,000 grant from the U.S. Agency for International Development (USAID) provides support for a distance learning program that Florida A&M will offer at the University of Cape Coast in Ghana, West Africa.

Florida A&M also has been using a $100000 grant from USAID to establish a certificate program in community and economic development at the University and at the Universidad Iberoamericana in Mexico.

Further, a cooperative agreement signed with Pontificia Universidad Católica Madre y Maestra's campus in Santo Domingo has enabled Florida A&M students to study abroad in the Dominican Republic.
Texas A&M-Corpus Christi Gets State Dollars for Minority Nurses

Two nursing professors at Texas A&M University-Corpus Christi were awarded $473,235 from the Texas Department of Health and Human Services, Basic Nurse Education and Practice Program. Dr. Mary Jane Hamilton's and Dr. Judith Sutherland's proposal, "Affirming At-Risk Minority Nursing Students for Success (ARDS)," seeks to increase enrollment of underrepresented minorities in the B.S. in nursing and registered nurse programs. Other objectives are to increase graduation rates and improve performance on professional license exams.

"According to the Texas Nurses Association, nursing programs need to double the current number of registered nurse graduates by the year 2007 due to the deepening nursing shortage in Texas and the United States," said Hamilton. "Of particular concern is the lack of cultural diversity represented in the nursing workforce."

According to Sutherland, only seven percent of practicing nurses report their ethnic background as Hispanic.

L.A. Opera Hosts Plácido Domingo Awards

Hispanics for Los Angeles Opera honored four outstanding supporters at the fourth annual Plácido Domingo Awards dinner following a performance of La Bohème in California. The honorees were tenor Aquiles Machado, Jorge Gamboa Patrón, and Edward and Alicia García Clark.

The Awards, named for the world-renowned tenor, honor Hispanic opera artists who have distinguished themselves in their careers, as well as those who have contributed to the success of opera in the Latino community of Los Angeles. Domingo, Los Angeles Opera's artistic director, has been honorary chair of Hispanics for Los Angeles Opera, a support and audience development group, since its founding in 1991.

Machado, born in Venezuela, has performed frequently in concert across the globe. Gamboa Patrón has been in the Mexican tourism industry for nearly 20 years and heads the Mexican Tourism Office. Ed and Alicia Clark, married in 1970, were asked by Los Angeles Opera in 1991 to help reach out to the Hispanic community; the couple organized and founded Hispanics for Los Angeles Opera.

$10 Million to UT-Austin for Latin American Studies

Joe and Teresa Lozano Long announced a gift of $10 million as a permanent endowment for research, scholarships, and other educational endeavors at the Institute of Latin American Studies at the University of Texas-Austin. Sixty percent of the endowment is earmarked for student support, including undergraduate scholarships, graduate fellowships, and grants for field research and study abroad—the remainder for teaching fellowships and joint faculty research projects.

"This is our way of acknowledging the importance of Latin America in the future of this country and, therefore, the critical role that the Institute continues to play in forging closer ties to Latin America," said Teresa Lozano Long. "We hope that this investment will help to attract the very best graduate students from the United States and Latin America."

The Institute will be renamed the Teresa Lozano Long Institute of Latin American Studies.

Master Trombonist Salutes Bossa Nova at Ramapo

Master trombonist Slide Hampton brought to life the sounds of Brazil and the music of bossa nova legend Antonio Carlos Jobim (pictured) at Ramapo College of New Jersey. Hampton was backed by an all-star ensemble, including bassist John Lee, vocalist Mauch Adnet, pianist Helio Alves, tenor saxophonist Andréso Bolarsky, and drummer Dukuka Da Fonseca. A master trombonist, composer, arranger, Grammy Award-winner, and teacher, Hampton is a formidable champion of the jazz tradition and an innovative herald of jazz evolution.

In the late 1950s, Jobim, poet Vinicius de Moraes, and vocalists João Gilberto and Nara Ledo created a distilled form of the samba known as the bossa nova. Jobim's haunting score for the movie Black Orpheus garnered him worldwide fame, and in 1962, he recorded Jam Samba with guitarist Charlie Byrd and tenor saxophonist Stan Getz, a recording that established bossa nova in the U.S.

Latinos Launch Alum Chapter at San Diego State University

In California, San Diego State University's (SDSU's) Chicano/Latino alumni celebrated the establishment of Los Aztecas, the University's newest alumni chapter, during the SDSU Aztecs' football game with the University of Nevada-Las Vegas.

"SDSU is among the top 10 universities in the country that award degrees to Hispanic students," said Theresa Mendoza, SDSU vice president of university advancement. "Establishing the Los Aztecas chapter creates an overdue opportunity for SDSU alumni and students to reunite with colleagues, faculty, and staff and gives us the chance to publicly acknowledge the legacy of the Chicano/Latino heritage of SDSU and this region."

Los Aztecas officers are Al Araiza (pictured), chapter president; Frank Uríasan, San Diegoport commissioner and chapter vice president; Guadalupe Corona, president of the Latino/Latina Unity Coalition and chapter secretary; and Marco Cortez, past president of the Hispanic Chamber of Commerce.

Texas Southern Named Top 10 Law School for Hispanics

The Texas Southern University (TSU) Thurgood Marshall School of Law was ranked No. 7 on a list of top 10 law schools for Hispanic students by Hispanic Business magazine.

An article in the magazine citing academic faculty stature, career goals, and cost as factors noted, "Hispanics typically have additional concerns, such as minority recruitment and retention—among both faculty and students—and support services such as student associations and mentoring programs."

Dean John C. Brittain said, "Hispanics in large numbers have been taking advantage of Thurgood Marshall's mission to provide..."
access to a legal education, which includes more open criteria for admissions than other law schools.” Brittain added that while nearly 90 percent of the state’s lawyers are Anglo, three-fourths of the students at Thurgood Marshall are African American or Hispanic.

Dennis Chávez Symposium at UNM

The University of New Mexico (UNM) hosted the Dennis Chávez Symposium, providing an opportunity for people to discuss topics the New Mexico senator addressed during his tenure: civil rights, gender issues, Native American issues, and how his work bridged the new millennium. Chávez died in 1962.

UNM Vice Provost for Extended University Dr. Jerónimo Domínguez moderated a civil rights panel. "As a minority who grew up in a part of the state that didn’t respect or promote diversity, I strongly believe in what Dennis Chávez did to give a voice to Hispanics and others," said Domínguez. "As an educational diagnostician, I saw firsthand how children were labeled because they couldn’t perform well on tests. It wasn’t that they weren’t smart enough; it was that their first language was Spanish.”

The civil rights panel was one of four. Rose Díaz, 1999 Dennis Chávez Fellowship recipient, moderated “Gender Issues: ‘It Wasn’t That the Men Weren’t Listening’,” Ron Toya, chair of the Commission on Higher Education, moderated a panel on Native American issues; and Carolyn Gonzales, UNM public affairs department, moderated the panel “Dennis Chávez: Bridging the Millennium.”

News from Texas-Pan American

- The University of Texas-Pan American (UTPA) is among 29 Hispanic-serving institutions nationwide to be awarded 15 computer workstations from the U.S. Department of Commerce. Recent studies show that Hispanic and other minority populations trail non-minority populations in Internet and information technology access.
- Milcha Sánchez-Scott, one of the country’s foremost Latina playwrights, is the first Maryalice Shary Shivers chair of fine arts at UTPA. Serving on the department of communication faculty this semester, she is teaching courses in theater, television, film, and writing techniques.
- Fifteen UTPA students are pursuing their dreams of a college degree, thanks to the Gates Millennium Scholars Program. The awards range from $4,060 to nearly $9,000 for the 2000-2001 academic year.
- UTPA was designated a Census Information Center by the Commerce Department’s Census Bureau. The number of these nonprofit agencies serving the disadvantaged in the United States and Puerto Rico has increased from five to 59. Census data helps in planning, needs assessment, defining service areas, developing policy, developing new business enterprises, and conducting race- and ethnicity-related research.

Garaicoa Exhibit at Bronx Museum

A survey exhibition of work by Havana-based artist Carlos Garaicoa is on display at The Bronx Museum of the Arts in New York until March 4. “Carlos Garaicoa: The Ruins, The Utopia” features more than 30 drawings, photographs, mixed-media, and video installations, as well as photographic documentation of many of the artist’s public interventions and performances. The exhibition is organized by the Biblioteca Luis Ángel Arango del Banco de la República in Bogotá, Colombia, and curated by its director of visual arts, José Ignacio Roca. Bronx senior curator Marysol Nieves coordinated the presentation at The Bronx Museum.

Although part of a younger generation of artists, Garaicoa and his work are closely linked to that of Cuban artists (José Bedia, Consuelo Castañeda, and Arturo Cuenca, among others) working in the ’80s who were heavily influenced by conceptual art practices. His work is a meditation on Havana in ruins as a metaphor for issues of desire, history, personal and collective identities, memory, and power.

Pictured here is Garaicoa’s 1991 installation (in Havana, Cuba), “Tribute to Hotel San Carlos.”

Padrón Named Year’s Best Hispanic Role Model

In Florida, the Miami-Dade County Hispanic Affairs Advisory Board (HAAB) chose Dr. Eduardo J. Padrón, Miami-Dade Community College president, as its Hispanic role model of the year.

The annual award recognizes a Hispanic who has contributed to the enhancement and development of business, culture, or education in the county. Padrón was cited in part for his efforts in enabling non-resident students to afford a state college. He has been the main advocate of this change, which affects thousands of new immigrants who reside in the county.

Josie L. Carvajales, HAAB chair, is shown presenting Padrón with the award.

Queensborough Opens Immigration Center

Queensborough Community College (N.Y.) students and their families were helped to apply for U.S. citizenship at the opening of the new Center for Immigration—held in conjunction with the City University of New York (CUNY) Citizenship Naturalization Project and the CUNY Law School. Pictured here, father and daughter Santiago and Silvia Pastor are guided through the process by Angel Caraballo, coordinator of transfer admissions at the College.

The Center offers free legal advice regarding immigration issues, including immigration rights, green card eligibility, adjustment of status, and work authorization.

News from ACCD

- Twenty-five pre-school children, mostly children of single mothers, each received a $1,000 scholarship to attend an Alamo Community College District (ACCD) college. The funds were donated by the League of United Latin American Citizens (LULAC) Roy Fee Scholarship Committee, Inc., will be held in trust until the recipients graduate from high school. Their parents, many of them first-generation "college-goers," will receive support services and help in securing financial aid to allow the youths to complete their college education.
- Palo Alto College (PAC) is among 15 colleges and universities sharing $55 million in grants from the U.S. Department of Housing and Urban Development (HUD). PAC will receive $362,720 to create the PAC El Pueblo community center. The grant application was spearheaded by Mike Flores, PAC director of institutional research, planning, and development, under the Hispanic Serving Institutions Assisting Communities grant program from HUD.
The ACCD and Northwest Vista College will use $642,000 in funds awarded by the Texas Workforce Commission (TWC) to train workers for 132 new jobs in Bexar County. A $427,000 skills development grant will help train workers for 113 new jobs in the semiconductor manufacturing industry and upgrade 283 jobs at companies that need highly skilled employees. A $250,000 grant from the TWC Self-Sufficiency Fund, which helps welfare recipients move into the workforce and off public assistance, will help train workers for 40 new jobs in customer service.

George Fox Offers Workplace Diversity Training

Businesses, churches, and organizations can learn about workplace diversity through one-day workshops offered by George Fox University, Oregon.

"Bridges to Understanding—Exploring Differences in the Workplace" helps employees and organization members learn how they personally react to diversity issues, including gender, ethnic, and multicultural differences. Daryl Dixon, director of multicultural services at George Fox since 1999, teaches the four-hour workshops. He led the program last spring for George Fox employees.

Each workshop offers five sessions, each on a different aspect of diversity awareness. Participants take the "Discovering Diversity Profile," which assesses individual attitudes and reactions to a number of issues. The confidential, self-directed profile aims to help participants understand how they think, act, and relate to others.

Grand Valley State Presents Venezuelan Drama

Grand Valley State University's (Mich.) theater program launched its eighth season of ethnic dramas with a production of the 1995 play Who Ever Said I Was a Good Girl?

The tense Venezuelan drama, by South American author Gustavo Ott, deals with punk gangs and urban street violence. Set in the back streets of an unnamed large city, it centers on the lives of six teenage gang members, led by Lulu, a vicious killer in her 20s. The main conflict involves the rivalry between Lulu and her one-time protégée, 15-year-old Trixi, when Lulu suspects that Trixi will abandon the gang. Violence, murder, auto theft, gun-selling, drugs, and armed robbery are daily occupations of the youth as they struggle to gain respect and influence in the dead-end world of modern urban punk culture.

Ott is a graduate of the Universidad Católica Andrés Bello in Caracas, Venezuela. He participated in the University of Iowa's playwriting program.

ACE Reports on AAC&U Survey

The American Council on Education reported that a national survey released by the Association of American Colleges and Universities shows many of the nation's colleges and universities require students to take a diversity course before graduating or are in the process of developing this type of requirement.

Fifty-four percent of the 543 respondents had a diversity requirement in place, eight percent had one in process. The survey is the first national examination of diversity requirements in undergraduate education. Completed surveys came from a cross section of institutional types from every region.

Of requirements in place, 45 percent were established within the last five to 10 years, and 30 percent, less than five years ago. At a majority of the schools with requirements (58 percent), students had to enroll in at least one diversity course, while 42 percent of the institutions required two or more.

Corzo Lectures on Mexican Cultural Policy at UT-Austin

Dr. Miguel Angel Corzo, president of the University of the Arts in Pennsylvania, presented the Hackett Lecture for 2000 at the University of Texas-Austin. The title was "Quetzalcoat!, Siqueiros and MTV: Mexican Cultural Policy at the Crossroads."

Corzo headed the Getty Conservation Institute for 10 years before becoming University of the Arts president. He has been an active observer of, and participant in, the Mexican culture scene for all of his professional life. Of particular note was his central involvement with Mexico's initiative in cultural diplomacy, "30 Centuries in Mexican Art," which was associated with the campaign for NAFTA approval.

Historic Signing Launches Kennesaw State's Center for Hispanic Studies

Gonzalo Gómez Dacal, director of the Office of Education at the Embassy of Spain, Washington, D.C., signed a formal memorandum of understanding with Kennesaw State University (Ga.) establishing the Center for Hispanic Studies. Pictured with Gómez Dacal at the signing is KSU President Betty L. Siegel.

Designated by the Spanish Embassy as a Spanish Language Resource Center, the Center at Kennesaw State will promote the teaching and learning of Spanish, work to improve cultural preparation of classroom teachers, and promote understanding among cultures. It will provide resources for businesses and the community, and will offer workshops to help classroom teachers better understand Hispanic students and parents. A further mission is to form collaborative relationships and exchange programs with Latin American and Spanish universities.

To support these efforts, the Embassy of Spain will provide language instructors and print and multimedia materials. Although the Spanish government initiated the idea and will provide financial and human resources, the Center is intended to promote the culture of all Spanish-speaking countries.

Nieves Named President of Middlesex Community-Technical College

Dr. Wilfredo Nieves was selected president of Middlesex Community-Technical College in Connecticut. Formerly the vice president for academic affairs at Baltimore City Community College, Nieves replaces Dr. Cathryn Addy, president of Tunxis Community-Technical College, interim president at Middlesex since July.
Lawrence Zollo, chair of the board of trustees, cited Nieves' work in establishing enrollment partnerships with universities, colleges, and public schools, and in facilitating the construction of a $185 million academic facility, as significant accomplishments, along with his record of educational leadership.

Nieves has a bachelor's degree from Kean University, two master's from Columbia University, and a doctorate from Rutgers. He is a member of the Baltimore Mayor's Committee on Hispanic Affairs, and author of Baltimore City K-16 Partners in Education: Developing Stronger Linkages and Appreciating Cultural Differences through Awareness and Sensitivity.

Spanish Language Adventure Program at Alma a Success

Experts assert that early childhood is the most opportune time to learn a foreign language. Michigan educators who enrolled elementary school children in Alma College's Spanish Language Adventure Program (SLAP) are hoping young students will be able to do just that.

The early results are positive. After only five weeks of approximately one-hour class sessions, fourth grade students knew vowels, could count to 20, and could identify many pictures. Moreover, the students are being exposed to other cultures and introduced to other world communities.

SLAP, developed by Dr. Deborah Dougherty, associate professor of Spanish at Alma, is a service-learning project that combines classroom instruction with community service. Participating Alma College students benefit by developing teaching methods that might make them more responsive.

Despite the program's success and benefits, its future is uncertain. The money needed to continue the program is running out. Dougherty hopes that Spanish instruction will become part of the elementary school curricula, and that Alma students will continue to be involved.

News from USHLI

- The United States Hispanic Leadership Institute (USHLI) is getting ready for its fourth annual Midwest Hispanic Student Leadership Conference to be held at the Midland Hotel in Chicago, Ill., April 13 and 14. Last year's conference featured leaders representing more than 40 student organizations from 35 college campuses; workshops on advanced leadership skills development; and motivational speakers Dr. Angelina Pedroso from Northeastern Illinois University and Randy Parranz, a field representative for the Western Region of the AFL-CIO. For more information, contact: Yolanda Bueno, (312) 427-8683; website, www.ushli.com.

- The second Northeast Hispanic Student Leadership Conference will be held April 6 and 7 in Philadelphia, Pa. The conference, primarily for students in higher education, promotes dialogue, collaboration, and leadership development in the Latino community. Students representing 30 organizations from 20 campuses around Pennsylvania, New Jersey, New York, Connecticut, and Massachusetts attended last year's conference, which held workshops on social, political, and cultural issues. For more information, contact: Rafael Collazo, (215) 223-9445; website, www.ushli.com.

- USHLI offers assistance to those interested in organizing Career Days for high school students. Career Days are designed to bring sophomores and juniors together with young role models in 12-15 vocations and professions to learn more about their respective fields and academic requirements. Students can determine what they need to learn in high school in order to pursue a degree in higher education, and what they need to consider in selecting a college or vocational school. For more information, contact: Yolanda Bueno, (312) 427-8683; website, www.ushli.com.

San José State Names Development and Alumni Affairs Managers

In California, two San José State University (SJSU) administrators, Fred Najjar and Virginia Rivera, were named to management positions in the University's advancement division, which includes SJSU's fundraising, alumni relations, governmental affairs, and communications activities.

Najjar, formerly executive assistant to the vice president for student affairs, became associate vice president for alumni affairs and executive director of the SJSU Alumni Association. Rivera, previously director of major and planned giving for university advancement, is the new associate vice president for development. She now oversees planned giving, major gifts, corporate and foundation gifts, and the annual fund.

Since 1995, alumni and friends of SJSU have contributed more than $51 million in personal, corporate, and foundation gifts to support student scholarships, library acquisitions, capital improvements, and a wide range of projects not covered by state funding.

Mt. SAC Professor Expands Student Horizons

Kurt Kemp, in his first year as a full-time teacher at Mt. San Antonio College (SAC) in California, is helping students explore a different culture, a different perspective.

"Being bilingual and bicultural is important, because the world is becoming a smaller place," said Kemp. "And having the perspective of another culture makes you a better human being." That dual perspective, he said, allows people to see another side of issues, events, and life in general in a more humanistic context. Often his classes involve what he calls culture projects. Those might include music, dance, food, history, crafts, travel, or popular culture, and require that students try something that they haven't experienced before.

Kemp graduated from Mt. SAC, has a bachelor's degree from California State University-Fullerton, and a master's from the University of California-Los Angeles.

NYC Technical College Professor Directs $1.8 Million Project

Dr. Estela Rojas, a New York City Technical College professor of mathematics, is directing a five-year, $1.8 million U.S. Department of Education Title V grant geared to help the College's 11,000 students reach their educational and career goals. Title V monies
are targeted to schools with a 25 percent or higher Hispanic enrollment that serve low-income students. City Tech's student body is 27 percent Hispanic, and the College ranks second in the nation in the number of Hispanic students enrolled in the engineering technologies, according to data published in Community College Week.

"More than ever before, our students will feel welcome and will be an integral part of the life of City Tech from the moment they first step through our doors," said Rojas. "That sense of connectedness and the enriched learning environment provided will have a very positive effect on student motivation and performance."

Florida International NSIS Program Ranks High

A recent report in the Academy of Management Journal ranked the Florida International University College of Business Administration's decision sciences and information systems department as the 11th best management information systems unit in the United States. The rankings, which stem from a study of more than 700 accredited MBA programs nationwide, are based on faculty research productivity over the 1986-1998 period.

According to its authors, the study was designed to balance the ranking systems used in Business Week and U.S. News & World Report, which focus primarily on teaching and job placement and ignore universities' research mission.

For the 1994-1998 period, the College of Business Administration faculty as a whole ranked 71st among the 700-plus business schools examined.

Delgado Steers Cal State-San Bernardino Diversity Initiatives

Charged with helping to broaden California State University-San Bernardino's role as an effective source for students and the ethnic community at large, English professor Juan Delgado is coordinating the campus' diversity initiatives and special projects.

A professor at Cal State since 1987, Delgado has been active in reaching out to students at the local, state, and federal levels for the past 10 years. Connecting the campus with possible educational partners, working on grants to foster collaboration with national Hispanic organizations, and expanding the University's community involvement are on Delgado's "A" list. He also will help in the recruitment of underrepresented faculty.

Cal State is seeking closer working relations with federal agencies as a federally designated Hispanic serving institution.

**PUBLICATIONS**

**Magical Urbanism: Latinos Reinvent the U.S. Big City**

By Mike Davis

A fascinating account of the "Latinization" of the American urban landscape. According to the Bureau of the Census, Latinos will supply fully two-thirds of the nation's population growth between now and the middle of the 21st century, when nearly 100 million Americans will boast Latin American ancestry. How are Latinos attempting to translate their urban demographic ascendency into effective social power?

**Profession 2000**

Phyllis Franklin and Carol Zuses, eds.

*Profession* is a journal of opinion about and for the modern language profession. The editors select articles covering topics of professional concern, trying to give voice to Modern Language Association members working in diverse subject areas and situations. Here, a few authors talk about "their commitments as human beings engaged as they saw it in the most exacting intellectual work, with its own set of norms, obligations, and unsparring loyalties." Other authors talk about the study and teaching of the humanities outside the United States.

**Critical Race Theory: The Cutting Edge, 2nd ed.**

Richard Delgado and Jean Stefancic, eds.

In challenging orthodoxy, questioning the premises of liberalism, and debating sacred wisdom, critical race theory scholars writing throughout the past few years have indelibly changed the way America looks at race. Groundbreaking scholarship provides immediate entrance to current trends and developments in critical civil rights thought.

**Critical White Studies: Looking Behind the Mirror**

Richard Delgado and Jean Stefancic, eds.

More than 100 closely edited selections look at such questions as: How was Whiteness invented, and why? How has the concept of Whiteness changed over time? Why did some immigrant groups, such as the Irish and Jews, start out as non-White and later become White? Can some individuals be both White and non-White? At what point does pride in being White become White power or White supremacy? What can Whites concerned about racial inequity or White privilege do about it?

**Historical Dictionary of Colombia, 2nd ed., (Latin American Historical Dictionaries Series)**

By Robert H. Davis

Only too often, drugs, violence, and coffee are all that the foreigner knows of Colombia,
writes the series editor, Laurence Hallewell (Columbia University). There are other, happier, aspects of this country. He cites, for example, the secular, if quixotic, dedication to the cause of Hispanic American unity, for example, as expressed in the perpetuation of the very name of the liberator's (Simón Bolivar's) dream: Colombia, "land of Columbus." There is also a tradition of high regard for the life of the intellect.

We Are a People: Narrative Multiplicity in Constructing Ethnic Identity
Paul Spickard and W. Jeffrey Burroughs, eds.

As the 20th century closes, ethnicity stands out as a powerful force for binding people together in a sense of shared origins and world view. But this emphasis on a people's uniqueness can also develop into a distorted rationale for insularity, inter-ethnic animosity, or, as we have seen in this century, armed conflict. Ethnic identity clearly holds very real consequences for individuals and peoples, yet there is not much agreement on what exactly it is or how it is formed.

The Essential Ilan Stavans
Ilan Stavans, ed.

Ilan Stavans, one of the leading Latino public intellectuals today, gives voice to the intricacies of multiculturalism in America. Living in Massachusetts as a Mexican Jew whose native languages are Yiddish and Spanish, Stavans has made a career of exploring the tensions, contradictions, and possibilities within the complex notion of a multicultural identity.

Latin America in Crisis
By John W. Sherman

This book builds a clear-eyed consideration of the fundamental economic and political realities of Latin America today onto a framework of introductory history. It is a concise core text for Latin America survey courses that require both a historical perspective and an attention to contemporary issues.

Black Cuban, Black American: A Memoir
By Evelio Grillo

Growing up in Ybor City (now Tampa), Fla., in the early 20th century, the young Evelio Grillo experienced the complexities of life in a horse-and-buggy society demarcated by both racial and linguistic lines. Life was different depending on whether one was Spanish- or English-speaking, a White or Black Cuban, a Cuban American or native-born U.S. citizen, well-off or poor. Grillo relates his increasing assimilation into Black American society.

Folklore and Literature: Studies in the Portuguese, Brazilian, Sephardic, and Hispanic Oral Traditions
By Manuel da Costa Fontes

Folklore and Tradition shows how modern folklore supplements an understanding of the early oral tradition and enhances the knowledge of the early literature. It documents how writers incorporated folklore into their works and helps readers to understand crucial passages whose learned authors took for granted a familiarity with the oral tradition, those passages restored to their intended meaning.

Short Fiction by Spanish-American Women
Evelyn Fishburn, ed.

Characteristics of the short story include brevity, intensity, concentration on few characters in an often confined setting, and the telling of a single anecdote. Each of the five stories here—written at different times and in different parts of Spanish America—relates to these “qualifiers” in different ways. This book was conceived in response to a growing interest both in Spanish American fiction and in women’s writing.

Publications of the Modern Language Association of America
Martha Baxa, ed.

PMLA, published six times a year, welcomes essays of interest to those concerned with the study of language and literature. Representing a large and heterogeneous association, the journal is receptive to a variety of topics, general or specific, and to all scholarly methods and theoretical perspectives. The ideal PMLA essay exemplifies the best of its kind, whatever the kind; addresses a significant problem; draws out clearly the implications of its findings; and engages the attention of its audience through a concise, readable presentation.

ISSN 0030-8129 January, March, May, October issues, $12.00 ea. September issue, $50.00. November issue, $500. MLA. (212) 475-9500.

Women Authors of Modern Hispanic South America: A Bibliography of Literary Criticism and Interpretation
By Sandra Messinger Cypess, David R. Kohut, and Rachelle Moore

The authors searched many disparate sources for citations of critical and interpre-
tive studies of Hispanic American women authors, including not only major authors but also “minor” ones. This volume covers Hispanic South America; the countries included are Argentina, Bolivia, Chile, Colombia, Ecuador, Paraguay, Peru, Venezuela, and Uruguay.

Many publications featured in this section are available through amazon.com.

AAHE 2001 National Conference on Higher Education
March 24-27

The American Association for Higher Education presents “Balancing Private Gain and Public Good.” The conference will anticipate issues, debate ideas, highlight innovation and best practice, foster leadership and professional development, and provide networking opportunities. At the Marriott Wardman Park Hotel in Washington, D.C.

National Association for Ethnic Studies Annual Conference
March 29-31

This year’s conference theme: “Race, Ethnicity, and Pedagogy in the 21st Century.” In New Orleans.

Contact: Susan L. Rockwell, (602) 965-2197; e-mail, susan.rockwell@asu.edu.

International Mentoring Association Annual Conference
March 29-31

This year’s conference theme: “Diversity in Mentoring.” In Washington, D.C.

Contact: at Western Michigan University, (616) 387-4174.

NCA-CHE Annual Meeting
March 31-April 2

2001 Southern Region CUPA-HR Conference
April 1-4

The Southern Region of the College and University Professional Association for Human Resources, the premiere national association of higher education human resource professions, will convene its conference at the Richmond Omni Hotel, Richmond, Va.
Contact: Stewart Mixon, Chair, (252) 328-4009; e-mail, mixons@mail.ecu.edu.

Mexican American Opportunity Foundation National Conference
April 6-7

The MAOF holds its 24th National Hispanic Women's Conference, one of the nation's oldest and largest events recognizing Latina accomplishments. At the Regal Bitmore Hotel in Los Angeles.

Contact: (323) 890-9600

Center for the Study of Diversity in Teaching and Learning in Higher Education National Conference
April 18-21

"The Global Perspective: Teaching, Learning, and Student Equity" includes, among other conference highlights, concurrent sessions on critical thinking skills, curriculum, pedagogy, collaborative and interdisciplinary learning, and learning communities. At Hotel Inter-Continental, Miami.

Contact: Dr. Toni Forsyth, (408) 864-8309/8993; website, www.TeachLearn.edu.

AACRAO 2001 Annual Meeting
April 22-25

The 87th annual meeting of the American Association of Collegiate Registrars and Admissions Officers. At the Washington State Convention and Trade Center in Seattle, Wash.

Latino Book and Family Festival
May 12-13

The first Latino Book and Family Festival in New York will be held at the Jacob K. Javits Convention Center in Manhattan.

Contact: (760) 434-7474.

MALDEF Annual Fundraiser
May 16

The Mexican American Legal Defense and Educational Fund will host its annual fundraiser in Washington, D.C.

Contact: (202) 629-2512.

NISOD 2001
May 27-30

The National Institute for Staff and Organizational Development along with the Community College Leadership Program present their 23rd annual international conference, "Making a World of Difference..." a unique mix of professional development activities for a unique audience of outstanding community college administrators and faculty. In Austin, Texas.

Contact: John Rouech and/or Su anne Rouech, (512) 471-7545.

LULAC 72nd National Convention and Exposition
June 3-9

The League of United Latin American Citizens will hold its annual event at the Civic Plaza Convention Center in Phoenix, Ariz.

Contact: (202) 833-6135.

Association of Jesuit Colleges and Universities 20th Annual Meeting
June 13-15

This 20th annual meeting/conference on multicultural affairs will be held at Saint Peter's College in Jersey City, New Jersey.

Contact: Robert Perry, (201) 915-9288; e-mail, perry_rob@spc.edu.

The Smithsonian Center for Latino Initiatives Workshop
June 18-29

The Smithsonian Center for Latino Initiatives will sponsor a ten-day workshop, "Interpreting Latino Cultures: Research and Museums." In Washington, D.C.

Contact: Laura Ortiz, ortiz-hobzal@si.edu; website, www.latino.si.edu.

Deaf Education Technology Conference
June 25-29

"Instructional Technology and Education of the Deaf: Supporting Learners, K-College," the first symposium in seven years to present current research and state-of-the-art practice for educators of the deaf, will be hosted by the National Technical Institute for the Deaf. At Rochester Institute of Technology, Rochester, N.Y.

Contact: E. William Clymer, (716) 475-6894 (v) or (716) 475-6704 (tty); e-mail, techsym@rit.edu; website, www.rit.edu/~techsym.

2001 NACUBO Annual Meeting
July 28-31

The annual meeting of the National Association of College and University Business Officers. At the New York Hilton and Towers and at the Sheraton New York Hotel and Towers in New York City.

TeleLearning 2001
October 6-9

The International Telecommunications Council and The TeleLearning People will sponsor "TeleLearning 2001," "the premier event in distance education and educational telecommunications." At Hilton Hotel Costa Mesa, Costa Mesa, Calif.

**Correction**

Book Review

By Johnnie Spraggins, Jr.

The European Tribe was first published in 1987 by Farrar, Straus, and Giroux in the United States and by Faber & Faber Limited in London. This edition contains a valuable afterward to the original edition. The afterward is appreciated, as the descriptions contained in the text often refer to political realities that no longer exist (e.g., the USSR, a divided Germany), and acknowledging this is useful to the reader, as well as increasing its contemporaneity. This book could be described many ways, including a travelogue, a narrative, a self-searching monologue. Phillips, who grew up in the United Kingdom, writes of his encounters with a wide geographical range of Europeans from Italy to Moscow, as well as his impressions of geography, politics, sociology, and literature.

This book will be useful for classes that want to explore the sociology of race and ethnic relations. The author's skills as a writer are considerable, and the insights he provides in terms of gaining a European education are constructive. The book will make a valuable contribution to education and writing courses as well. It is suitable for undergraduate courses in sociology, anthropology, English, education, cultural geography, political science, and international relations.

Phillips' tenure in the United Kingdom began when his mother settled there from her native Caribbean (neither the island nor the country is specified by the author; we learn from the book notes that he was originally from St. Kitts, West Indies). She arrived in Britain via Italy and France. His characterization of life in Britain as a Black man provides us with essential understanding of why his travels to the U.S. were so valuable later. The value of the book for Hispanic higher education lies in his rich, insightful remarks on the treatment he received and his reactions to this treatment as a visible minority.

Phillips' travels include a journey to the Caribbean in search of his essence. There his curiosity about Europeans only increases, as his previous early departure from the Caribbean precluded much memory. The tenure to the United States is particularly striking, and insightful for U.S. educators. Phillips mentions that in the United Kingdom, his university education was not inclusive of Black writers. This missing element is a privileged university education in the U.K. became a turning point. Phillips tells us that his eyes, as well as his mind and emotions, were opened by reading Black writers who were suggested to him in the United States. This insight into the value of including writers who address diversity from experience is useful information for educators. Anyone who advocates a diverse curriculum will find support here. He gains the ability to discover not only the significance of his own voice, but that his reactions, feelings, and experiences have value for himself and that he can provide priceless information to the generations that will have access to any writings he might leave. This encouraging tone might hearten our own students.

The book is rich in detail yet spare with words. The landscapes he creates have all the meaning of a Hopper painting and as much information. Phillips offers enticing glimpses of private conversations with James Baldwin; the charge that Paris and London share not only striking physical resemblances but social and cultural ones; a visit to Anne Frank's Amsterdam; to Casablanca; to Moscow. His choice of places to visit is meaningful and adds to the interest and information we gain. Phillips explains the logic behind his choices, and the reasoning is woven into the description. For instance, a visit to Casablanca contrasted to the romantic notions conjured up by the popular movie is striking. Likewise, a consideration of contemporary Amsterdam in light of the lessons gleaned from Anne Frank shows sensitive reflection.

Race permeates the narrative. Phillips draws on his experience as a Black man in England, how this influenced the education he received in terms of others' reactions to him, and how race is played out in various contexts in Europe. Interestingly, he finds racism permeates France in much the same way as in the United States, and the history of the ghetto in Venice is astutely described. The incredibly poor treatment he receives on the clear basis of race in Norway is illuminating. He found that even money could not dampen prejudices and fears in Oslo. The increasingly diverse demographies of Scandinavia are driving the direction toward change, and the way that individual countries deal with this fact is telling.

The volume bridges the personal experience of one man and the contextual politics of a changing, diverse society. His ability to speak to many disciplines is perceptive. The main drawback to the book will be the reaction of students who view it as dated. This, however, might well prove to be its strength as we learn more about the implications of race and perception in a rapidly changing world.

Dr. Spraggins teaches in the Department of Sociology at Randolph-Macon College in Ashland, Virginia.

SCIENCE FACULTY!
Opportunities for Outstanding Students
NATIONAL INSTITUTES OF HEALTH
Undergraduate Scholarship Program

The UGSP is sponsored by the National Institutes of Health (NIH), the Federal Government's premier biomedical research and research training agency. NIH offers scholarships to qualified students who are committed to a career in biomedical research.

Scholarships of up to $20,000 per year support tuition, educational, and qualified living expenses (room, board, transportation) while students pursue an undergraduate degree.

For each award year, scholars work 10 weeks with salary benefits in our research laboratories in Bethesda, Maryland. They are assigned mentors, participate in developmental and science enrichment seminars, and are provided with housing and transportation. After graduation, they work 1 year of full-time employment at NIH for each year of scholarship award.

 THIS IS A SPECIAL OPPORTUNITY FOR SPECIAL STUDENTS!
Advise students to apply if they:

- Are committed to a career in biomedical research;
- Are from a disadvantaged background;
- Have a GPA of at least 3.5 or are in the top 5% of their class;
- Are a U.S. citizen, national, or permanent resident;
- Are enrolled or accepted for enrollment as a full-time student at a qualified accredited institution.

For more information, contact the UGSP at:
http://ugsp.info.nih.gov  E-mail: ugsp@nih.gov
Phone: 1-800-528-7689  TTY: 1-888-352-3001

Qualified applicants will be reviewed without regard to race, creed, color, age, sex or national origin.

OKLAHOMA STATE UNIVERSITY  
Assistant/Associate Professor in Early Childhood Education

Responsibilities: Teach undergraduate and graduate courses in early childhood education; develop and maintain an active research program that includes seeking extramural support; advise graduate and undergraduate students; engage in outreach consistent with the land grant; collaborate with colleagues. Qualifications: Candidates should have an earned doctorate in Early Childhood Education, Child Development, Curriculum or related field and evidence of teaching. Preferred qualifications include experience in early childhood education; a record of scholarly publication; distance education experience; participation in professional activities at the national level, and evidence of ability to work cooperatively with public schools and university faculty. Send letter of application, current curriculum vita, copy of transcripts, selected reprints, and three letters of reference to Margaret J. Weber, Chair, Early Childhood Education Search Committee, Department of Family Relations and Child Development, Oklahoma State University, 242 HES, Stillwater, OK 74078-5122. Application deadline is March 12, 2001 or until filled. OSU is an AA/EEO Employer committed to multicultural diversity.

INDIANA UNIVERSITY SOUTH BEND
Management Information Systems: Two tenure track positions are open in the MIS area, beginning Fall 2001. Each position has a teaching load of three courses, nine semester hours, at the undergraduate and/or graduate levels in MIS. These positions require a D.B.A. or Ph.D. from an AACSB accredited school in MIS or a closely related field. ABD candidates nearing degree completion will be considered. Preference will be given to individuals who show promise of excellence in teaching and research. A research or teaching background in electronic commerce, enterprise resource planning (especially SAP R/3), project management, telecommunications, decision support systems, business process re-engineering, or web development techniques is highly desirable. The salary is competitive. The IUSB School of Business and Economics is accredited by the AACSB.

Candidates must submit a letter of application, a curriculum vitae, a copy of graduate transcripts, evidence of teaching ability, copies of research publications and three letters of reference. The letter of application must clearly indicate the position for which the application is made and the rank desired. Applicants who are not U.S. citizens must state their current visa and residency status. Although the position will remain open until filled, the review of complete applications will begin February 16, 2001; applications not received by that date will not be considered. Indiana University is an affirmative action/equal opportunity employer, and minority group members, women, and disabled individuals are encouraged to apply. Send a letter of application, and other material to: Dr. Wayne Bartholomew, Chair, Search and Screening Committee, School of Business and Economics, Indiana University South Bend, 1700 Mishawaka Ave., P.O. Box 7111, South Bend, IN 46634 Phone: (219) 337-4397 FAX: (219) 237-4866, E-Mail: wbarthol@iusb.edu.
University of Houston - Where Diversity Counts

One of the highest priorities of the University of Houston is ensuring that members of diverse communities have access to the full range of educational opportunities provided. And UH is succeeding; approximately 53% of our students are female and women earn 55% of the degrees awarded; no one ethnic group constitutes a majority of the student body.

Information Session March 11!

Prepare for Something Wonderful: Your Life in Georgia Court College

Information Session: Sunday, March 11, 1 pm
Optional—For those who would like to join us, Mass will be celebrated in the Catherine McAuley Chapel at noon.

The key word is prepare. Wonderful lives don't just happen. They take careful preparation and hard work.

Georgia Court, a Catholic college, offers women's day and coed evening and graduate programs. You may earn a B.A., B.F.A., B.S., or B.S.W. degree on the undergraduate level and an M.A., M.B.A., or M.S. in our graduate program. Generous financial aid available if qualified.

Visit our beautiful campus. Meet faculty, staff, and students. Tour our facilities. For more information and to reserve your place, please call 1-800-1-LUV-GCC. Visit us on the web at www.georgian.edu. On-campus housing guaranteed for undergraduate women.

Your Success Is in Our Court.

Georgia Court College
900 Lakewood Avenue • Lakewood, NJ 08701

Georgia Court College, established in 1908, is a Catholic comprehensive college with a strong liberal arts core and a special concern for women, founded and sponsored by the Sisters of Mercy.

Director - Latino/a Student Cultural Center

Above and beyond access to higher education, the LSCC'S goal is to foster retention, graduation and successful futures for those we serve. Counsel students to help them meet their financial, academic and social needs. Foster collaboration among student organizations and the Center. Create access to career opportunities through internships and cooperative education. Create a pipeline for Latino students from the Greater Boston Area Public Schools and make presentations to high school students. Advise in the development of relationships with Latino alumni. Create working partnerships to promote financial commitment from corporate sectors.

Create, implement, supervise and evaluate all programs/activities, finances and personnel issues related to the LSCC including hiring and supervising office and professional staff; budget preparation and transactions; assist in the development of grant proposals. Computer skills including data management, interpretation, and analysis. Must have Master's degree in Human Services or related field. Ph.D. preferred. Knowledge of political, economic, cultural and educational issues affecting the Latino community. Excellent communication skills in English and Spanish. Minimum of 5-7 years' administrative experience including student advising. For full consideration send resume by March 13, 2001 to: J. Keith Motley, 104 Eill Hall, Northeastern University, 360 Huntington Avenue, Boston, MA 02115.

Northeastern is an Equal Opportunity/Affirmative Action, Title IX Employer.

02/26/2001 • HISPANIC OUTLOOK 61
The Florida International University School of Architecture invites nominations and letters of application for the position of Dean, the academic and administrative leader of the school. Florida International University is a Carnegie "Doctoral/Research University Extensive," firmly committed to excellence in teaching, research and community service.

The mission of the School of Architecture is to provide both excellence and access to all qualified students in the fields of architecture, landscape architecture and interior design. The school offers comprehensive undergraduate, nonprofessional degree programs in architectural design and interior design, structured around the University's rigorous liberal arts core curriculum, supplemented by courses offered in the School of Architecture. The five primary goals of the School of Architecture are 1) to provide an excellent education in architecture, interior design and landscape architecture, 2) to generate new knowledge through a vigorous and ambitious commitment to research, 3) to encourage creativity by fostering an atmosphere conducive to the expression of ideas, artistic development and communication with the external community, 4) to serve the School of Architecture's external community, with special attention to the South Florida region, and 5) to foster greater global understanding as a major center of international design education for the people of the Americas and the international community.

Florida International University's location in Miami, a culturally vibrant and ethnically diverse metropolitan community at the crossroads of the Americas, offers a rich source of distinguished practicing professionals as faculty, who, in turn, have a profound effect on the programs. Miami offers students an urban and natural laboratory unparalleled in simulation and opportunities for research. The School of Architecture is presently comprised of 54 faculty and a diverse student body of 550. Students are offered two undergraduate degree programs in Architecture and Interior Design, and two graduate degree programs in Architecture and Landscape Architecture.

The School of Architecture seeks an individual committed to providing the leadership necessary to implement the standards of unqualified excellence which the school enjoys. The Dean will affirm the mission of the School while overseeing its continued evolution within an institution engaged in community-wide study and planning efforts. Candidates must demonstrate a significant contribution to the culture of architecture and other design professions, through their work in education, practice and/or writing. Applicants and nominees for the position of Dean should possess a professional degree in architecture, interior design or landscape architecture and a terminal degree in one of these professions or related field; strong academic leadership in a multidisciplinary environment; demonstrated ability to collaborate with students, faculty, staff and administrators; vision to build on the strengths of the school; a demonstrated commitment to external relations and generating external funding and a commitment to building ties with Latin America and the Caribbean.

Letters of application and nominations will be accepted until March 15, 2001. The salary is competitive and will be commensurate with qualifications. Letters of application should include a brief statement of intent and a detailed curriculum vitae. Applications will be reviewed in confidence. Florida International University, a member of the State University System of Florida, is an Equal Access/Equal Opportunity Employer. Materials should be addressed to:

Libraries
(3 Positions)

Instruction Coordinator (Search Re-opened)

Newly created position will develop and oversee a comprehensive information literacy program. The Coordinator will lead a planning process focused on infusing information literacy across the curriculum, working with library colleagues, faculty, and administrators. The Coordinator will be responsible for planning an instruction program transcending traditional library instruction, in collaboration with the university's technology-across-the-curriculum initiative, the writing-across-the-curriculum program, and the general education program.

Specific responsibilities include development and oversight of web-based tutorials, course-related modules, one-on-one instruction initiatives, outreach to the campus on information literacy, and support of library staff involved in the instruction program. The Coordinator will have opportunities to collaborate with other campus units in developing the program, including the University's computing services, the Division of Instructional Improvement and Instructional Technologies, and the planned Teaching and Learning Center. The position reports to the Associate University Librarian for Public Services.

QUALIFICATIONS: Required: ALA-accredited MLS or ALA-recognized foreign equivalent; Significant professional collection development experience in an academic library; In-depth knowledge of academic publishing; print and electronic; Experience with large-scale or in-depth collection evaluation projects (RLG Compatus s plus); Demonstrated ability to coordinate peer responsibilities in a non-supervisory environment; Excellent leadership and communication skills. Preferred: Excellent IT skills. Excel and Access; Budgetary expertise; Demonstrated supervisory experience; Electronic resources management experience, especially with licensing. An advanced degree in an academic discipline. Appointment: 12-month Professional faculty appointment. Salary competitive, commensurate with experience, from a minimum of $40,000.**

EXCELLENT BENEFITS: Health plan options and paid life insurance; several retirement plans, including TIAA-CREF; 24 vacation days and 11 paid holidays; tuition waiver for self. APPLICATION: Send letter of application, resume, and names, addresses (including e-mail), and phone numbers of three current references to:

Chair, <Position Title> Search Committee
Library Administration, MSN 2FL
George Mason University
Fairfax, VA 22030-4444

Review of applications will begin March 15, 2001. AAE/EOE employer; minorities are encouraged to apply.

San Francisco State University

TENURE-TRACK LIBRARY FACULTY

San Francisco State University invites applications for a tenure-track faculty position in the J. Paul Leonard Library beginning August 6, 2001. The successful candidate will be expected to fulfill a combination of responsibilities in the areas of instruction, reference, collection development and liaison work with discipline-based faculty. Primary subject responsibilities in the biological sciences and health sciences. Librarians have full faculty status. Appointment is expected to be at the rank of Senior Assistant Librarian with a minimum salary of $46,488. As faculty, librarians are expected to meet faculty requirements for tenure and promotion. Tenure is normally granted with seventh year reappointment.

REQUIRED QUALIFICATIONS: ALA-accredited Masters in Library and Information Science. Academic background and/or professional experience in the biological sciences and/ or health sciences. Ability to provide research advice and instruction at a general reference desk on the use of print and electronic resources, including government sources. Working knowledge of new and emerging technologies and familiarity with their impact on higher education and research. Ability to work independently and as a member or leader of a team. Ability to work effectively with culturally diverse campus constituency. Excellent oral and written communication skills. Strong service ethic. Able to work evenings and weekends.

DESIRABLE QUALIFICATIONS: At least one year professional post-MLS academic library experience with instruction and reference responsibilities. Experience and demonstrated knowledge in the teaching of electronic resources, including information retrieval and database searching. Working knowledge of electronic resources and understanding of the issues related to their delivery and access. Knowledge of and experience with collection development and management of print and electronic resources supporting university curricula. Potential to support other subject areas. Experience with Web development and/or management.

Information about the J. Paul Leonard Library, and an enhanced position description are available at: www.library.sfsu.edu.

San Francisco State University, a member of the California State University system, serves a diverse student body of 27,000 undergraduate and graduate students. The mission of the University is to promote scholarship, freedom, human diversity, excellence in instruction, and intellectual accomplishment. SFSU faculty are expected to be effective teachers and demonstrate professional achievement and growth through continued research, publications and/or creative activities.

APPLICATION PROCEDURE: Review of applications will begin April 2, 2001 and continue until the position is filled. Interested candidates should submit a letter of application, resume, and the names, postal and e-mail addresses and telephone numbers of three references to:

Pam Kullberg, Personnel Coordinator
J. Paul Leonard Library
San Francisco State University
1630 Holloway Avenue
San Francisco, CA 94132-4030

San Francisco State University is an affirmative action/equal opportunity employer. Minorities, women, individuals with disabilities are encouraged to apply.
The University of Toledo

Dean
College of Education

The University of Toledo invites nominations and applications for the position of Dean of the College of Education. The University is a Carnegie Doctoral/Research Extensive state-supported university with an enrollment of approximately 18,000 students. The faculty of the seven colleges within the University are represented by the AAUP. The Dean will report to the Provost.

The College of Education is situated in a suburban, residential neighborhood on the wooded 255-acre university campus. The University is integral in the civic, cultural, and commercial life of the Greater Toledo community. The region affords a range of cultural opportunities that include a renowned museum of art, zoo, symphony orchestra, metropolitan park system, and science museum. Toledo is located on the western shore of Lake Erie, in close proximity to major cities in the Midwest.

The successful candidate will demonstrate evidence of administrative experience in higher education; earned doctorate in a discipline related to a program within the College; distinguished credentials in teaching, scholarship/creative endeavors, and service; merit appointment with tenure at the rank of professor; record of management and support of externally funded faculty research; comprehensive understanding of trends and issues in teacher education and graduate education; knowledge of and experience with technological innovations, e.g., distance learning; success in fostering inter-disciplinary and intra-university collaborations in research and teaching; familiarity with alumni relations and fund-raising.

Responsibilities include: provide leadership and innovation in teaching and learning; effectively advocate for the College within the University; nurture dynamic undergraduate and graduate programs that foster intellectual rigor, reflective practice, and social inquiry; increase graduate and undergraduate enrollment through development of recruitment and retention strategies; create and foster effective partnerships with schools, institutions of higher education, community organizations, industry, and government; commitment to promoting diversity in recruitment and retention of faculty, staff, and student populations; enhancement of multicultural initiatives in curriculum and program development; effectively mentor faculty through tenure and promotion; establish strong communication and promote collaborative decision-making within the College; coordinate national and regional accreditation, e.g., NCATE and NCA.

Review of applications will begin on March 10 and continue until the position is filled. Salary and other considerations will be consistent with the commitment of The University of Toledo to recruit and select the most qualified candidate. Additional information about the University and College is available at the website: www.utoledo.edu.

Interested candidates should submit a cover letter addressing stated qualifications and responsibilities, Curriculum Vitae, and the names, addresses, phone numbers, and e-mail addresses of three (3) references to:

Joel P. Epstein
Managing Director • Stratford Group
1760 Manley Road • Maumee, OH 43537
Fax: 419/893-2491 • Email: joel@stratfordgroup.com

The University of Toledo is an Equal Access, Equal Opportunity, Affirmative Action Employer and Educator.

DIRECTOR OF THE JULIAN SAMORA RESEARCH INSTITUTE
AT MICHIGAN STATE UNIVERSITY

Michigan State University invites applications and nominations for the position of Director of the Julian Samora Research Institute (JSRI), a leading multidisciplinary national research and outreach center for Latino/Chicano studies (see web site at http://www.jsri.msu.edu/). The mission of the JSRI is to generate, disseminate and apply research-based knowledge germane to Latino/Chicano communities in the United States with a focus on Michigan and the Midwest. The Director will provide leadership to develop and foster multidisciplinary basic and applied research initiatives capable of attracting extramural funding. The Director of JSRI currently reports directly to the Dean of the College of Social Science. The successful candidate must have:

- A Ph.D. and qualifications for an appointment at the rank of full professor with tenure in an academic unit at Michigan State University.
- Demonstrated commitment to Latino/Chicano scholarship and to the development of Latino/Chicano scholars.
- Familiarity with Latino/Chicano communities in the United States.
- A record of extramural funding for research and demonstrable administrative and leadership abilities.

Nominations and applications (including a CV and a letter explaining how your experiences have prepared you for the position, and the names of three references) should be sent by March 1, 2001 to:

Professor Antonio A. Nunez (nuneza@msu.edu)
Chair, JSRI Director Search Committee College of Social Science
Office of the Dean
203 Bork Hall
Michigan State University, East Lansing, MI, 48824-1111

The anticipated starting date for the new Director of JSRI is August 16, 2001. The review of applications will begin March 1, 2001, but applications received after that date will be considered until the position is filled.

MSU is an Affirmative Action/Equal Opportunity Institution. Handicapped have the right to request and receive reasonable accommodation.

RESIDENCE HALL DIRECTOR 2
Office of Residence Life
Division of Student Affairs
BOWLING GREEN STATE UNIVERSITY

Bowling Green State University is accepting applications for the position of Residence Hall Director 2. The Residence Hall Director is responsible for the residential life of an undergraduate residence hall housing between 300 and 850 students. The responsibilities may include the supervision of secretary, graduate hall director, resident advisor staffs, and hall security and desk staff; oversight of facility issues; advising of hall government; and the coordination of hall judicial affairs. Minimum qualifications are a Master's degree in College Student Personnel or related field and related assistance experience. To be successful in this position, the Residence Hall Director must have excellent interpersonal communication and organization, administration, and supervision experience. In addition, the Residence Hall Director must have a demonstrated desire to live and work in a developmental community setting with diverse individuals and groups. Must possess crisis intervention skills and conflict management skills. Salary is competitive and commensurate with education and experience, and includes a furnished apartment and board plan. Full benefits package available. Review of applications will continue until the position is filled. To apply, please submit a letter of application, resume, and the name, address, and telephone number of three professional references to:

Office of Human Resources
Search S-009
100 College Park Office Building
Bowling Green State University
Bowling Green, OH 43403

Bowling Green State University is an AA/EEO educator/employer.
Position Description: Two positions available. Teach undergraduate and graduate courses in literacy education; be responsible for academic advising (graduate and undergraduate); participate in departmental and collegewide service functions; scholarly activities leading to publication and presentation.

Required Qualifications: Doctorate in reading education or related field from an accredited university. ABD will be considered for a lecturer position (with program completion date within one year). Department of Psychology
University of Denver
Denver CO 80208

The University of Denver is committed to enhancing the diversity of its faculty and staff and encourages applications particularly from women, minorities, veterans, and people with disabilities.
HEAD, INFORMATION SERVICES DEPARTMENT
SOUTHEAST MISSOURI STATE UNIVERSITY

RESPONSIBILITIES: Provide vision and dynamic leadership for development of staff, collections, and both electronic and traditional information services. Supervise and coordinate the daily and long-term development and operation of the department including reference, bibliographic instruction, government documents, and instructional materials center. Supervise 6 library faculty and 2 professional staff. Participate in provision of information services and in the comprehensive collection development program. Develop active working relationships with university students, faculty and administrators in order to identify and assess information needs. Work closely with the dean and other department heads to plan, implement, and develop library programs and policies.

REQUIRED QUALIFICATIONS: ALA accredited MLS. At least 3 years of successful supervisory experience which include hiring, training, supervising and evaluating 8-10 staff or at least 3 years in responsible professional work experience in an academic library. Commitment to high quality service. Excellent analytical, interpersonal, and written and oral communication skills. Demonstrated initiative, leadership and mentoring ability. Experience with library technologies. Experience with planning and policy development. Demonstrated commitment to the teacher/scholar model, public and university service, and a culturally diverse learning environment. Ability to work well as a member of a group as well as individually in a demanding and rapidly-changing environment.

PREFERRED QUALIFICATIONS: Second masters or doctoral degree. Teaching experience.

SETTING: Southeast Missouri State University is a comprehensive student-centered university of five colleges and two schools offering more than 120 academic programs. Campus is located in the heart of Cape Girardeau, a Mississippi River town of about 40,000, located on Interstate 55 between St. Louis and Memphis. Student enrollment is 8,500 with a student/faculty ratio of 18:1. Library collections include over 400,000 bound cataloged volumes and current subscriptions to approximately 2,500 periodicals and a growing number of electronic databases. Staff includes 13 library faculty, 6 professional staff, and 22 clerical positions. The library has added positions, led development of a $12 million dollar renovation plan, established a library strategic plan, and increased support for the development of services and collections. While currently using NOTIS, Kent Library is one of 50 academic libraries in Missouri which have formed a consortium to purchase and implement a common library platform from Innovative Interfaces with all installations to be complete in 2002.

SALARY RANGE: $45,000 - $55,000, depending on qualifications and experience. 12-month full-time tenure track faculty appointment. Must meet established criteria, including a second masters or doctoral degree, for promotion and tenure. Tuition remission part of benefit package.

APPLICATIONS: Applications received by March 23, 2001 will receive first consideration. Preferred starting date August 1, 2001. Position will remain open until filled. Send letter of application specifying desired position which addresses qualifications for the position, resume, transcripts and names, addresses, phone numbers, and email addresses of three references to:

Dr. Sarah Mort Cron
Dean, Academic Information Services
Kent Library - MS 4600
Southeast Missouri State University

An Equal Opportunity/M/F/Affirmative Action Employer.

Arizona International College
TUCSON ARIZONA

INTERDISCIPLINARY FACULTY POSITIONS

Arizona International College is an interdisciplinary liberal arts undergraduate college of The University of Arizona and a student-centered teaching institution. All programs are based on a distinctive, holistic, and practical interdisciplinary liberal arts core curriculum and involve internship programs and other activities that emphasize an integrated approach to knowledge and learning. There is a strong global/international perspective across the curriculum. For further information, visit the Arizona International web site at: www.azint.edu.

Arizona International College anticipates filling four interdisciplinary faculty positions, subject to final budget approval. Candidates must have a Ph.D. or equivalent. The college is interested in candidates who are broadly trained and comfortable with teaching in an integrated, interdisciplinary curriculum that requires knowledgeable collaboration with faculty from other areas of study. The College is seeking applications for:

• Three continuing positions:
  1) Math, Physics, or Chemistry to teach basic math, applied statistics and research methods;
  2) Chinese Language and Culture with demonstrated expertise in sustainable development;
  3) Performance Arts, MFA or Ph. D. in teaching area required. Demonstrated expertise in African Studies highly desirable.

• Additionally, the college is seeking to fill a one-year position to teach first year writing, with experience in the use of computers for the teaching of writing.

Faculty must be dedicated to teaching and learning at the undergraduate level; have excellent written and presentation skills; be innovative and creative; be willing to deal with new ideas and structures; be willing to be a contributing member of a team; be able to actively participate in the development of an interdisciplinary curriculum. Candidates must be comfortable with an institution not organized along departmental lines.

Specifically, we are looking for people who advocate and have experience with learner-centered education and mentoring; are willing to help recruit students and serve as academic advisors; have worked with students in career preparation and civic involvement; are experienced in working with diverse learner populations; are interdisciplinary in teaching and have a demonstrated record of applying global and multicultural perspectives to course and curriculum development. Proficiency in a second language and familiarity using information technology, telecommunications, and multimedia are highly desirable. There is a strong preference for candidates with substantial international experience.

AIC employs faculty in a contractual system rather than a tenure system. Applications must be received no later than March 9, 2001. Successful candidates are expected to start August 2001.

To apply, send (1) a letter of application, specifying the teaching areas you are qualified to teach and detailing your qualifications for each teaching area; (2) a curriculum vitae; (3) one letter of recommendation specifically addressing how you fit the job qualifications; and (4) a list of three additional people who can be contacted as a later date. The letter of application must carefully explain your qualifications, educational philosophy and how your background and experience fit the mission of Arizona International College. For further information about the college, visit our website at: www.azint.edu. Send application materials to:

Tucson, AZ 85721

Arizona International is committed to a diverse workforce
The University of Arizona is an EEO/AA Employer - M/W/D/V
Dean of Education (Search Extended)

Millersville University of Pennsylvania invites applications and nominations for the position of Dean of the School of Education. Millersville University, founded in 1855, is one of 14 institutions of the PA State System of Higher Education. As a student-centered institution, the University is highly regarded for offering quality instruction and its strong commitment to the principles of client services and diversity. Nationally ranked as one of the top regional public institutions of higher learning by U.S. News and World Report, Millersville is also listed among Kiplinger’s 100 best-value universities in the nation. The University has an honored history of providing excellent teacher education and a strong liberal arts curriculum in the arts, sciences, and humanities. The University enrolls 7.500 undergraduate and graduate students, and employs 550 staff and 350 full-time faculty. Millersville’s and the School’s programs are approved by the appropriate accrediting bodies including but not limited to the Pennsylvania Department of Education and NCATE. Millersville is a charter member of the Renaissance Group and the Project 30 Alliance. The School of Education enrolls 26% of Millersville’s undergraduate students and 55% of its graduate students. Located in historic Lancaster County, the campus is within three hours drive of numerous cultural and recreational opportunities in the cities of Baltimore, Philadelphia, Washington, New York, the Pocono Mountains, and the Atlantic Ocean beaches. Because of its economic diversity, Lancaster County is among one of the most prosperous counties in the country. For more information, contact the Millersville University Webpage at www.millersville.edu.

RESPONSIBILITIES: The Dean is the chief academic officer of the School and reports directly to the Provost and Vice President for Academic Affairs. The Dean provides academic and administrative leadership, direction, and support for instructional, research, and professional activities to the faculty in the departments of:

- Educational Foundations
- Psychology
- Elementary and Early Childhood Education
- Special Education
- Industry and Technology
- Wellness and Sport Sciences

The Dean must be able to assume a University-wide perspective and work and communicate effectively with students, faculty, administrators, external organizations and institutions, and a diverse community. The Dean must encourage and promote the recognition, understanding, and respect of cultural and human diversity in the School’s faculty, staff, students, and curriculum, and must be committed to increasing diversity within the School, as well as on campus. A capacity and willingness to listen, create consensus, solve problems, and assume responsibility are essential.

QUALIFICATIONS: Candidates must demonstrate the capacity to be an innovative and visionary leader committed to excellence in teaching and learning and partnership with community and schools. Applicants must possess an earned doctorate in one of the disciplines in the School of Education. Also essential is a record of quality scholarship; teaching and service in higher education; a commitment to faculty development, the liberal arts, and academic freedom; and evidence of success in building an inclusive community. Applicants must demonstrate a knowledge of critical issues and best practices in teacher education, experience with accreditation processes and an understanding of state licensing and certification procedures. Candidates need to present a record of progressive administrative experience which demonstrates potential for success in activities such as: planning, program development, fundraising, grant writing, advocacy for all the School’s disciplines, evaluation of teaching effectiveness, assessment of programmatic outcomes, and personnel and budget management in a public university setting. Candidates must demonstrate an appreciation of the role of technology in an educational institution. The ability to function effectively in a team-oriented collective bargaining environment and a successful interview are crucial.

NOMINATIONS AND APPLICATIONS: Applicants should include a letter detailing their experiences relating to the qualifications for the position; curriculum vitae; and the names, addresses, and telephone numbers of at least three professional references. Full consideration will be given to complete applications received by March 5, 2001. Electronic submissions will not be accepted. Nominations and applications should be sent to:

Dr. Duncan Perry, Chair, Dean of Education Search/HQ226, MILLERSVILLE UNIVERSITY, P.O. Box 1002, Millersville, PA 17551-0302. An Equal Opportunity/Affirmative Action Institution.

Council for Opportunity in Education

The Council for Opportunity in Education, a nonprofit organization, whose mission is access to higher education for low-income students, announces the following employment vacancy:

Community Affairs Director - Coordinates outreach efforts to Historically Black and Hispanic Serving Colleges and Universities and to Washington DC area colleges and agencies to develop proposals, and manage grant programs. Master’s degree preferred. Must have strong leadership skills and be able to handle multiple responsibilities. Should have knowledge of MS Office applications. The person selected for this position can expect a salary in the range of $55,000 annually, commensurate with qualifications and experience.

The Council considers applicants for all positions without regard to race, color, religion, creed, gender, national origin, disability, marital, political, or veteran status, sexual orientation or any other legally protected status.

fax information to 610-861-5070
or e-mail in MSWord format to ksiegfried@northampton.edu

Deadline: April 1, 2001 or until a suitable candidate is identified.

Northampton Community College is located in Bethlehem, Pennsylvania, and is in close proximity to Philadelphia, New York City, and the Pocono Mountains. Northampton is a dynamic, two year institution offering more than 60 career and transfer programs at both our main and Monroe County campuses. Currently, approximately 6000 credit and over 15,000 non-credit students are enrolled. We are a learning and student-centered institution with a staff dedicated to providing quality educational opportunities for a diverse student population. We offer a competitive salary and excellent fringe benefits package, which includes health, dental, term life, long-term disability, retirement, and educational assistance.

NCC is an Equal Opportunity/Affirmative Action Employer.
California State University San Marcos invites nominations and applications for the position of Director, Student and Residential Life. The Director of Student and Residential Life is responsible for the oversight and management of programs and services that enhance the quality of living and learning for undergraduate and graduate students at CSUSM. Qualifications: (1) a master’s degree in Student Personnel Services or related field, (2) 3-5 years experience in the management of a dynamic and diverse student services department in higher education, (3) experience in a higher education setting, specifically associated with housing and student life operations. Compensation: The salary for this position is competitive and commensurate with experience and qualifications. The position is included in the CSU Management Plan and includes a liberal benefits package.

Application: Applications received by March 29, 2001 will be given first consideration. Review of applications will begin March 30, 2001, and continue until the position is filled. To apply for the position, call our 24-hour Job Hot-Line 760-750-4410, Hearing Impaired 760-750-3238. Ref: Req#1232. Visit <http://www.csusm.edu/hr/> to see full position description.

Equal Opportunity/Affirmative Action Employer

HEAD, MARINE GEOSCIENCES SECTION
NATIONAL SCIENCE FOUNDATION
Arlington, VA 22230

NSF’s Directorate for Geosciences seeks candidates for the Head, Marine Geosciences Section position in its Division of Ocean Sciences. The incumbent provides leadership and direction to NSF program activities supporting research and education in Ocean Drilling, Marine Geology and Geophysics.

Appointment to this Senior Executive Service position may be on a career basis, on a 2- to 3-year limited term basis, with a current salary range of $120,261 to $131,615. Alternatively, the incumbent may be assigned under Intergovernmental Personnel Act provisions. Announcement #2001-089 is posted on the NSF Home Page at: http://www.nsf.gov/home/chart/work.htm#hrm

The announcement includes position requirements and application procedures. Applicants may also obtain the announcement by contacting the Executive Personnel and Development Branch on 703-292-8755 (Hearing impaired individuals may call TDD 703-292-8044). Applications must be received by April 30, 2001.

NSF is an equal opportunity employer committed to employing a highly qualified staff reflecting the diversity of our nation.

THE DONALD AND CECILIA PLATNICK PROFESSORSHIP
IN RESTORATIVE DENTISTRY

The Department of Restorative Dentistry at Temple University School of Dentistry is pleased to announce the establishment of the Donald and Cecilia Platnick Professorship in Restorative Dentistry. An internationally based search is now open to qualified candidates. The Donald and Cecilia Platnick Professor of Restorative Dentistry will provide a new dimension of leadership in research and scholarship within the Department of Restorative Dentistry.

Candidates should possess a dental degree, and preferably advanced education in materials science, operative dentistry, general dentistry, or prosthodontics. An advanced research degree (MSc, PhD) is desirable. Previous funded basic or clinical research in materials science, restorative dentistry, or implant prosthodontics is required, along with a substantial record of publication in the peer-reviewed dental scientific literature. Documented excellence in clinical and/or didactic teaching is expected. Salary and academic rank will be commensurate with experience and qualifications.

Temple University School of Dentistry offers:

- Potential for tenure track appointment
- Ongoing multidisciplinary research activities with excellence school and university-based support
- Modern facilities for basic clinical research
- Generous university research incentive policy
- Diverse multidisciplinary Department of Restorative Dentistry with 20 full-time and 36 part-time faculty
- Recognized 1st and 2nd Year AEGD Program in Department of Restorative Dentistry
- Predoctoral DentSim educational program
- Active research thesis-based MS in Oral Biology degree program at school (PhD program proposed)
- Outstanding computer infrastructure support from the school’s Department of Dental Informatics
- Large urban patient population and state-of-the-art clinical facilities

Interested applicants should send a cover letter indicating date of availability and curriculum vitae to: Dr. Sarah Gray, Associate Dean for Academic Affairs and Chair, Search Committee, Temple University School of Dentistry, 3223 North Broad Street, Philadelphia, PA 19140. Minority and female applicants are encouraged to apply. An equal opportunity/affirmative action employer.

Highline Community College

To ensure full consideration your materials should be received by March 5, 2001.

Highline is an equal opportunity employer and operates under an affirmative action plan.
Dean, University Libraries

Northeastern University seeks a dynamic and innovative leader for the University Libraries. Reporting to the Provost and serving as a member of the Deans’ Council, the Dean of University Libraries will serve as the chief advocate of the Libraries and will be responsible for the collection, programs, and services of the Libraries.

Northeastern University is a major private urban research university founded in 1898, known for its professional education, liberal arts and sciences and cooperative education programs. Located in Boston, the University enrolls approximately 19,000 full and part-time undergraduate and 4,500 graduate and professional students in eight schools. The University Libraries have a collection of 915,000 volumes, including 18,800 serial titles; 89 permanent staff; and an annual budget of $8.3 million. Northeastern University is a member of the Boston Library Consortium.

The Position: The Dean will:
- Provide visionary leadership and strong management for the University Libraries which includes a Snell Library and two branches; facilitate coordination with the Law Library
- Advocate for the Libraries with internal and external constituencies, including active fund-raising
- Lead the Library team in setting goals, establishing priorities, and fostering collegiality

Requirements:
- An MLS from an ALA accredited program or equivalent; advanced degree preferred
- Five or more years of successful, varied and progressively responsible administrative experience in a university library, including grant and fund-raising
- Ability to integrate new technologies with traditional library collections and services; demonstrated knowledge of emerging information resources
- Excellent managerial and communication skills
- Ability to work collaboratively with faculty and staff at all levels in a complex and diverse environment

For full consideration, send resume and cover letter by March 16, 2001 to: Elizabeth Habich, Chair, Search Committee, Administrative Services Office, Northeastern University, 320 Snell Library, 360 Huntington Avenue, Boston, MA 02115.

Please contact Margot Lansing at Lansing & Associates (781) 237-1754 or Lansing@mediasine.net for further information.

Northeastern is an Equal Opportunity/Affirmative Action, Title IX Employer.

**AACJC**
PROVOST/VICE CHANCELLOR FOR ACADEMIC AFFAIRS

The University of Wisconsin-Madison invites nominations and applications for the position of provost/vice chancellor for academic affairs. Founded in 1848, the institution is one of the top-ranked research universities in the United States, as well as one of the largest land-grant universities. The university has approximately 2,175 faculty, 6,300 professional and administrative staff, 5,000 civil service employees, over 41,000 students, and a budget of more than $1.5 billion.

The provost/vice chancellor for academic affairs is the chief operating officer of the university and deputy to the chancellor in the overall academic leadership and administrative management of the university. The provost serves as deputy chancellor in the chancellor’s absence. Primary responsibilities of the position include: academic program planning involving 12 schools and colleges; faculty and staff development and personnel oversight; budget planning and management; the General Library System; information technology; diversity initiatives; outreach and extension programming; as well as collaboration with other vice chancellors in the areas of facilities planning and management, student affairs, and law and policy administration. The provost works closely with the deans and with faculty, staff and student committees in the exercise of shared governance of the institution. Please visit the following websites for more comprehensive information about the Office of the Provost and the university:

http://www.wisc.edu/provost/ and http://www.wisc.edu

Major qualifications for this position include: a successful record of administrative leadership in higher education; nationally recognized academic accomplishments as a scholar and teacher that meet the standards for a tenured appointment at the rank of full professor at the University of Wisconsin-Madison; strong communication and fund raising skills; the capacity to relate effectively to faculty, staff, and students; a commitment to advance undergraduate and graduate learning, instruction, research, and outreach; a demonstrated commitment to diversity; an understanding of the diverse missions of a major university and its tradition of shared governance; and the ability to represent the university effectively in external forums including educational, governmental, public, and alumni groups.

Applications and nominations should be received by 31 March 2001 to ensure consideration. Later applications and nominations may also be considered. The committee particularly encourages applications and nominations of individuals from underrepresented groups. Applicants should include a current curriculum vita and cover letter that addresses how their strengths and experience match the qualifications for the position, and what they see as challenges and opportunities of the position, as well as the names and addresses of five references. Candidates will be informed before references are contacted. Please note that under Wisconsin statutes the names of nominees and applicants who explicitly request confidentiality will not be made public. However, the university is required to release the names of the finalists who will be interviewed by the chancellor. Submit applications and nominations to:

Provost Search and Screen Committee
Professor Richard Moss, Chair
University of Wisconsin-Madison
133 Bascom Hall, 500 Lincoln Drive
Madison, WI 53706
(608) 262-9337
Fax: (608) 265-7806

The University of Wisconsin-Madison is an Equal Opportunity, Affirmative Action Employer.

EDUCATIONAL FOUNDATIONS
Ed. Psych./Teacher Education
Assistant Professor

Full-time, tenure-track, beginning August 2001. Primary teaching responsibilities include Psychological Foundations of Teaching (undergraduate teacher preparation) and Advanced Educational Psychology (master’s level). Secondary responsibilities may include teaching (master’s level) Educational Inquiry/Research or secondary teaching methods, or the supervision of secondary student teachers. Faculty members are expected to pursue scholarly interests and to participate in university governance and curriculum development. Required: ABD (dissertation must be completed by January 30, 2002); substantial preparation in educational psychology and instructional methodology with critical perspective regarding the integration of theory and practice; evidence of successful North American full-time K-12 teaching experience; evidence of potential for scholarly contribution; evidence of strong commitment to teaching excellence; demonstrated ability to integrate technology in instruction; strong communication skills; and a successful interview and teaching demonstration. Preferred: Ph.D., D.Ed., or Psy.D.; urban experience or experience in multicultural settings or with diverse populations; and successful post-secondary teaching experience. Full consideration given to applications received by 3/1/2001. Send letter of application, curriculum vitae, copies of all transcripts, and the names, addresses, and phone numbers of three references to:

Dr. Cheryl T. Desmond, Chair, Educational Foundations Department/H10226, Millersville University, P.O. Box 1002, Millersville, PA 17551-0302.
An EO/AA Institution.

FACULTY POSITIONS

Pace University School of Education, Westchester and NYC campuses each invite applications for two tenure track faculty positions at the assistant or associate level to begin September 2001. One position on each campus is in Literacy and one position on each campus in Secondary Education.

In these roles, you will teach undergraduate and graduate students in preservice and inservice programs in teacher education. You will assist in curriculum development for programs that meet New York State teacher certification regulations.

Literacy applicants should have a background integrating reading within the other strands of writing, listening and speaking; Secondary Education applicants must have a specialization in a secondary subject area and a solid background in Educational Foundations, Child Development, and/or Educational Psychology. Expertise in instructional technology or ESL is strongly preferred. All candidates must have a doctorate, K-12 teaching experience (preferably in urban schools), and a record of scholarship in the discipline.

We offer competitive salaries, generous benefits and a stimulating academic environment. To apply, submit a letter of application, vita, and names of three references. All letters and applications should be directed to Dr. Rita Silverman, Chair, Literacy Search Committee; send all Secondary Education applications to Dr. Sandra Flank, Chair, Secondary Education Search Committee. Mail to School of Education, Pace University, 861 Bedford Road, Pleasantville, NY 10570.

EOE/AA M/F/H/V. Pace University is committed to a diverse learning and work environment. Women and minorities are encouraged to apply.
DIRECTOR OF BEYOND LMU
POST-BACCALAUREATE AWARDS, FELLOWSHIPS, & OPPORTUNITIES

Loyola Marymount University invites applications and nominations for the immediate opening of a newly created position of Director, "Beyond LMU," Office for Post-Baccalaureate Awards, Fellowships, and Opportunities. This position will report directly to the Academic Vice President and be responsible for identifying, recruiting, and tracking undergraduate students eligible for prestigious post-baccalaureate scholarships, awards, and other prestigious opportunities. The Director will serve undergraduates in all four colleges that include the College of Liberal Arts, College of Communications and Fine Arts, College of Science and Engineering, and the College of Business Administration.

The successful candidate must possess a doctorate or equivalent and have previous teaching/advising experience at the undergraduate level, expertise/interest in the process of obtaining post-baccalaureate awards, excellent writing, oral, and presentation skills, and ability to work collaboratively with students, faculty, and staff. Grant writing experience preferred. Duties include identifying, recruiting, and tracking undergraduate students eligible for post-baccalaureate scholarships, awards, and other prestigious opportunities; assisting and preparing students in the application process; maintain resources for identifying opportunities; assisting faculty and staff in guiding and supporting students for award competitions; maintain records of student applications and awards. The incumbent will also assist students in planning for graduate school. Appointment as an adjunct faculty member and occasional teaching at the undergraduate level is possible.

Application screening will begin March 5, 2001 and continue until the position is filled. Applicants should send a letter of intent, curriculum vitae, and list of three references to:

Dr. Kenyon Chan
Chair, Director of Beyond LMU Search Committee
Loyola Marymount University
7900 Loyola Boulevard
Los Angeles, CA 90045-8319

LOYOLA MARYMOUNT UNIVERSITY, ESTABLISHED IN 1911, IS THE ONLY PRIVATE CATHOLIC UNIVERSITY IN METROPOLITAN LOS ANGELES. Loyola Marymount University is an Equal Opportunity, Affirmative Action Employer

ONE-YEAR LECTURER/SCHOLAR-IN RESIDENCE
VISUAL JOURNALISM/VISUAL COMMUNICATION

The Department of Journalism within the School of Communication, Management and Public Policy seeks to appoint a one-year visitor with a specialty in visual literacy and/or communication and experience working in at least one visual journalistic medium (videography, photography or graphics/web design). Teaching experience in a project-based classroom or work environment is highly desirable. The visiting faculty member will play a central role in helping to design, coordinate and teach a required course of all sophomore majors called "The Images of News." This course combines lecture, skills training and projects to introduce students to the aesthetic, content, production and ethical issues involved in using pictures, sound and graphics to convey the news. Students will receive hands-on training, provided by lab instructors assigned to the course, in video shooting and editing, audio recording and editing, digital photography, and basic web coding and design. Candidates for this position need not be expert in all production areas but should be knowledgeable about the general principles and practices of visual communication, and be interested in coordinating an innovative course that introduces these to a journalism curriculum. Competitive salary and benefits.

Initial review of applications begins March 1, but applications will be accepted until the position is filled. Please submit a letter of application, CV, three reference letters and examples of publications/visual work, to: Professor Jerry Lanson, Chair, Department of Journalism, Emerson College, 120 Boylston St., Boston, MA 02116. Emerson College is an Affirmative Action/Equal Opportunity employer. Visit our website: www.emerson.edu.
The Temple University Center for Research in Human Development and Education is an interdisciplinary center for the study of emerging problems and challenges facing children, youth, and families. Its overall goal is to investigate the basic forces that affect human development and schooling. An important focus of the Center’s work is to identify and shape effective responses to these forces through far-reaching changes in institutional policies and practices.

The Center has approximately 82 full-time employees and an annual operating budget of over 10 million dollars. The Center is the home for major externally funded grants and contracts, including a five-year contract with the U.S. Department of Education to operate the Laboratory of Student Success, the Mid-Atlantic Regional Research Laboratory. The Executive Director of the Center reports to the Dean of the College of Education, who has administrative accountability for the Center under the supervision of the Provost.

Duties of the Executive Director of the Center for Research in Human Development and Education include the following: (1) provide intellectual and administrative leadership and direction for the Center; (2) general supervision of personnel within all components of the Center; (3) provide leadership in the development and expansion of programs to enhance the capacity of the Center; (4) represent the Center in forums internal and external to the University; (5) pursue external funding opportunities in-line with the Center’s mission and University policies; and (6) facilitate interdisciplinary arrangements and forge strategic alliances between the Center and related programs in the University; (7) recognize and nurture diverse talents among the staff in building the intellectual capital of the Center.

Qualifications: (1) national reputation and a distinguished record of scholarship in an area directly related to the scope of work within the Center’s mission; (2) a doctoral degree in a discipline relevant to the broad research and service operations of the Center; (3) the ability to provide substantive leadership in defining and implementing a comprehensive scope of work that is research-based and field responsive; (4) demonstrated ability to make connections to expand the capacity of the Center; (5) at least 3-5 years of substantive administrative experience that includes supervisory responsibilities preferred; (6) demonstrated leadership in developing highly competitive grants or contracts; (7) the academic credentials to be eligible for appointment as a senior professor at Temple University.

Applications will be reviewed until the position is filled. Preferred start date is July 1, 2001.

Interested applicants should forward resume with cover letter to:

Executive Director Search Committee, c/o Dr. Richard M. Englert, Temple University, 1801 N. Broad St., Room 403, Conwell Hall, Philadelphia, PA 19122.

EO/AA M/F/D/V.

ALBRIGHT COLLEGE

Albright College seeks applications for a full-time tenure track position in the Education Department beginning August 2001.

The College is undertaking a nationwide search for persons committed to undergraduate and graduate instruction in a liberal arts setting, whose teaching styles reflect a learner-centered approach. The College offers Pennsylvania approved teacher certification programs in Elementary Education, Special Education, Early Childhood Education, and twelve Secondary Content Areas. Rank and salary will be commensurate with qualifications and experience. Candidates should have Ph.D. or Ed.D. and a minimum of three years teaching experience. Specific training in and ability to teach a variety of general Education courses and to supervise student teachers preferred. College teaching experience highly desirable. Located in southeastern Pennsylvania on a scenic 110-acre campus, 60 miles from Philadelphia and within easy access to New York and Washington. Albright College is a competitive, coeducational liberal arts college of approximately 1,100 students in all programs. It is a United Methodist-affiliated in emphasizing a values-based education. Further information about the College is available at http://www.albright.edu or by calling the Department of Education at 610-921-7790. Send a cover letter, statement of teaching philosophy, a current resume, and the names, addresses, and telephone numbers of at least three references to: Office of Vice President for Academic Affairs and Dean, Albright Education Search, Chair, 610-921-7656. Applications will be accepted until the position is filled.

Albright College is an AAEO/EO/A employer and is actively committed to diversity within its community.
PERALTA COMMUNITY COLLEGE DISTRICT
SEEKING CANDIDATES FOR
MANAGEMENT EMPLOYMENT OPPORTUNITIES

The Peralta Community College District is located in the beautiful Oakland/San Francisco Bay Area, an area which leads the world in technology and innovation. The District is seeking a group of highly qualified and diverse individuals who will become part of the Chancellor's team responsible for implementing an ambitious agenda in advanced training and higher education to service all segments of a culturally diverse urban community. The Peralta Community College District serves six cities in the East Bay Area. The District is renowned for its support of education and has a national reputation for developing effective approaches to serving the varied interests and needs of the community. The Peralta Community College District, founded in 1964, serves 27,000 students, and is one of the top community college districts in the State of California in transferring students into the University of California system.

Individuals are invited to apply who are interested in joining a team of educational leaders, who understand the principles and distinction of excellence in teaching and instruction and commitment to visionary leadership, and who are committed to community service and academic excellence.

Mission Statement: "The mission of the Peralta Community College District is to provide accessible, high quality adult learning opportunities to meet the educational needs of the multicultural East Bay community."

College of Alameda
College of Alameda, California's only island-based community college, offers both park-like tranquility and easy access to urban hustle. Having served almost a quarter of a million day, evening and weekend students since its 1970 founding, College of Alameda enjoys a well-deserved reputation for excellence in its academic, vocational, and student-support programs. The College is proud of its strong ties to the City of Alameda and is recognized for its strong partnerships with the local business community.

Laney College
Laney College, the largest of the Peralta Colleges, is in the heart of downtown Oakland adjacent to the Oakland Museum of California and beautiful Lake Merritt. The campus, designed to reflect its unique setting, is served by public transportation hubs and in walking distance to the famous Jack London Square. Laney College offers associate degrees and certificate programs in more than thirty vocational, liberal arts and science fields.

Merritt College
Nestled in the hills above San Francisco Bay, Merritt College offers students the opportunity to study in one of the most dramatic natural settings in Northern California. With a panorama that includes the Golden Gate Bridge and the Pacific Ocean, Merritt's striking vistas provide a breathtaking backdrop for its packed roster of first-rate academic and vocational programs.

Vista Community College
Just two blocks from the University of California at Berkeley, the energetic urban campus of Vista Community College stands on the cutting edge of community college education. University preparation and occupational training classes form the core of Vista's curriculum.

Search for Dean of the School of Education Purdue University

Purdue University invites applications and nominations for Dean, School of Education. The school has approximately 110 faculty, 80 staff, 1550 graduate students, and 2250 undergraduates on three campuses, (West Lafayette, Calumet, and North Central) in the Purdue University system. Another 850 undergraduates from other schools are in its teacher education programs at West Lafayette.

Formed in 1989, the School of Education is a flourishing academic community poised to make major contributions to educational excellence in the decades ahead. You can visit the School on the web:

www.soe.purdue.edu

As the School’s chief academic officer, the Dean is expected to support an intellectual and cultural environment that encourages research and program development and to facilitate collaboration among programs within the School and University, including the regional campuses; and to coordinate the School’s efforts with school districts, other colleges and communities, and with state, federal, and international agencies.

Major qualifications for the position include academic accomplishments as a scholar and teacher that meet the standards for a tenured appointment at the rank of Professor within one of the School’s departments; a successful record of administrative leadership in higher education; skills in securing and allocating resources to provide quality undergraduate and graduate instruction, research, public service and outreach activities; ability to work with other deans and administrators in developing goals and programs; experience in strategic planning; qualities such as intellectual curiosity, energetic leadership, effective communication; and strong management skills. The position is available July 1, 2001. Review of applications will commence on March 16, 2001, and continue until the position is filled.

Nominations and applications should be sent to Dean Margaret Moan Rowe, Chair, Selection Advisory Committee for Dean of Education, LAEB 1290, Purdue University, West Lafayette, Indiana 47907. Telephone (765) 494-3661. Applicants must submit a statement of interest in the position that also expresses briefly their conception of a School of Education within a comprehensive university; a curriculum vitae, and the names and addresses of at least four references. Purdue’s strong commitment to diversity makes applications from women and members of minority groups especially welcome.

Purdue University is an equal opportunity/affirmative action employer.

HEAD OF REFERENCE SERVICES
Assistant or Associate Professor

Under the direction of the Associate Librarian for Public Services, provides leadership in planning, evaluation and implementation of reference services and in-service training of support staff in the Reference Department; supervises and evaluates reference staff, and the quality and quantity of the reference service collaboration with reference librarians. Work collaboratively to create and implement new services that respond to the needs of faculty and students. Participates in reference services including reference services and web services, library instruction and collection development. Represents the Libraries on appropriate College, University committees.

Qualifications:
- MLS, or its equivalent from an ALA-accredited library school, plus an additional Master's degree or PhD.
- Highly desirable: Strong interpersonal, increasingly responsible managerial and supervisory experience, and excellent written and oral communication skills. Previous experience in academic reference, collection development, and library instruction. Familiarity with electronic resources, Internet/WWW, demonstrated commitment to public service, ability to foster college environment, ability to meet tenure and promotion requirements. Excellent fringe benefits.
- 35 hour, 5 day work week.

EVENING/SATURDAY SERVICES LIBRARIAN INSTRUCTOR OR ASSISTANT PROFESSOR

Reporting to the Assistant Librarian for Public Services, is responsible for operation and closing of Main Campus Library during evenings and Saturday hours, including processing and supervising part-time staff in Access Services; participates in evening reference service, library instruction, and collection development; assists patrons in the use of OPAC, CD-ROM, online services, and Internet/WWW, develops instructional materials in various formats. May supervise computer lab. May be assigned as needed to other divisions of Hunter College Libraries.

Qualifications:
- Instructor: MLS, or its equivalent from an ALA-accredited library school. Assistant Professor: MLS, or its equivalent from an ALA-accredited library school, and an additional Master’s degree or Doctorate. Highly Desirable: Minimum two years experience in library public services or circulation, with some supervisory experience preferred; academic library reference, electronic materials, and bibliographic instruction skills; excellent communication and interpersonal skills; ability to meet requirements for promotion/renewal. Salary commences with qualifications and experience. Excellent fringe benefits. 35 hour, 5 day work week (up to 4 evenings until closing and Saturday each week during academic year).

Instructor:
- $31,197 - $44,284
- Assistant Professor:
- $32,703 - $57,049
- Associate Professor:
- $42,616 - $68,774

Review of applications will begin immediately and will continue until the position is filled. Send resume and names (with addresses, telephone, fax numbers, email addresses) of at least three current references to:

Dr. Louise S. Sherby, Chief Librarian, Hunter College Libraries 695 Park Avenue New York, New York 10021.

HUNTER CITY UNIVERSITY OF NEW YORK

Equal opportunity/affirmative action employer. Women, minorities, disabled persons, and veterans are encouraged to apply.

INSTRUCTIONAL TECHNOLOGY SPECIALIST

The Division of Library and Information Services of Plattsburgh State University of New York is seeking a motivated, service-oriented professional for the position of Instructional Technology Specialist. This twelve month, renewable appointment reports to the Instructional Technology Coordinator. PSUNY has an active commitment to teaching and learning with technology. The technology infrastructure of the campus includes numerous PC-based computer and multimedia classroom environments, a newly opened high-tech Instructional Technology Resource Center, and fully wired offices and dorms.

Responsibilities Include: working with faculty and staff in the design and production of presentations, web materials, and multimedia files to support instruction; serving as consultant to faculty and staff in the Instructional Technology Resource Center; offering workshops on the creation and effective use of technology-assisted production tools; and helping to develop and run workshops assisting the Instructional Technology Coordinator in the production of help-sheets and online documentation; reporting on the ongoing campus-wide technical projects, and working with technical units in the planning and implementation of campus-wide technology initiatives.

Qualifications: Master’s degree in English, Communication, Education or a related field; at least one year of relevant experience in the creation or support of technology-enhanced learning resources and materials; University or college level teaching experience; familiarity with a range of PC-based software applicable to the creation of multimedia, websites, and presentations; demonstrated proficiency in oral and written communications skills and exceptional interpersonal skills are required. A background that includes journalism, English education and knowledge of design and web technologies is highly regarded. Successful candidates will be able to work in a team-oriented environment that serves a diverse population.

Applications from women and minority candidates are especially welcomed. Plattsburgh State University of New York is an affirmative action, equal opportunity employer.

Salary: Beginning at $38,000, dependent upon experience, with excellent benefits. Review of applications will begin immediately and continue until position is filled. Please submit letter of application, resume, and the names and telephone numbers of three references to: Chair, Search Committee (PSU 2526-808), c/o Human Resources, Plattsburgh State University of New York, 101 Broad Street, Plattsburgh, NY 12901-2681. Fax: (518) 564-5060.
AUDREY COHEN COLLEGE

Kathryn E. Newcomer, Chair
Department of Public Administration
The George Washington University
302 Monroe Hall
Washington, DC 20052

For more information, contact Professor Newcomer at newcomer@gwu.edu (phone 202-994-6295; fax 202-994-6792). Also see our web site at http://www.gwu.edu/~pad/

The George Washington University is an Equal Opportunity/Affirmative Action Employer

Public Administration/Public Policy

Applications are invited for a tenure-track position in the Department of Public Administration, School of Business and Public Management, beginning in Fall 2001. The position is at the Assistant Professor rank.

The Department is committed to delivering the highest quality in graduate public service education. Our MPA, MPP and PhD programs are grounded in a strong image of the public interest and a deep commitment to the integration of theory and practice. Both masters' programs incorporate both management and policy issues in an intergovernmental context, and focus on developing critical intellectual capacities, sound applied research skills and sensitivity to the ethical and value concerns central to the traditions of the field.

The Department has well established and well-regarded MPA, MPP and Ph.D. programs that balance public management and policy building on a strong base of public service values and applied research methods.

We want to attract the best available people to match the core concerns of our programs, rather than hiring narrowly to fit particular courses or fields. Applications are welcome from those in a range of traditional public administration fields and also from those specializing in public policy. Preferred candidates would be those ready to teach in both the MPA and MPP programs.

Evidence of scholarship potential is especially desirable. A doctoral degree in public administration, public policy, or closely related field is required.

Review of applications will begin on February 15, 2001 and will continue until the position is filled.

Interested candidates should send a letter indicating preferred fields/courses and three academic references, and a full curriculum vita to:

HISPANIC OUTLOOK 02/26/2001
Saint Joseph College
West Hartford, CT
Nursing Faculty Appointments

The Division of Nursing at Saint Joseph College, CT, is seeking applications for two full-time appointments beginning Fall 2001 for its community-based curriculum. The Baccalaureate and Master's programs is NLN accredited and CCNE approved. Candidates must be master's prepared (doctorate preferred) with a Masters in Nursing, demonstrate a strong commitment to and potential for excellence in teaching, and have flexibility to teach collaboratively across the nursing curriculum. One position will be focused on medical-surgical nursing; the other position may be one of the other nursing specialties. The successful candidates will possess a nursing philosophy that is built on caring and is consistent with the mission of the College.

Interested applicants should send a letter of application and statement of teaching philosophy, vita, transcripts, and names of three references to Human Resources, Nursing Search Committee, Saint Joseph College, 1678 Asylum Avenue, West Hartford, CT, 60617. Review of applications will begin mid-March and will continue until the positions are filled. Saint Joseph College, located in residential West Hartford, CT, midway between Boston and New York City, provides a rigorous liberal arts and professional education for a diverse student population while maintaining a strong commitment to developing the potential of women.

An EOE/M/F/D/Y employer. Women and minorities are encouraged to apply. Learn more about Saint Joseph College at www.sjc.edu.

DePaul University
SOCIAL STUDIES SPECIALIST

The Department of Secondary Education seeks an individual for a tenure-track position, rank open; preference for multicultural and social studies background. Requires doctorate in social studies education at time of appointment and three years public school teaching experience. See http://personnel.depaul.edu (2-104) for full description. Send letter of application, vita and three letters of reference to Dr. Grace Huerta, Search Committee Chair, Department of Secondary Education, Utah State University, Logan, UT 84322-2815. Review begins March 16, 2001; open until filled. A/A/EEO

Morton College
MATHEMATICS INSTRUCTOR

Morton College, a community college serving mostly Hispanic students near Chicago, invites applications for Mathematics Instructor, starting in Fall Semester 2001. DEPARTMENT OF HUMAN DEVELOPMENT
MEASUREMENT, EVALUATION, AND STATISTICS
Professor, Open Rank

Position: Scholar with research interests in psychometric/measurement theory, strong statistical skills, and an interest in applications of measurement theory to improve educational measurement and instruction. The Department is research oriented and houses programs in cognitive psychology, developmental psychology, and sociology as well as in measurement and evaluation methods and applied statistics. The Program in Measurement, Evaluation, and Statistics prepares doctoral students for college teaching of measurement and quantitative methods, for roles in testing agencies and civil organizations, and for research positions in industry and consulting. It also provides service courses in statistics and measurement to students.

Rank: Open rank, Tenured or Tenure track.

Responsibilities: Teach graduate courses in measurement, psychometric theory, and statistical methods; maintain active research program; advise students; and supervise doctoral research.

Qualifications: Earned doctorate in psychology, education, or related field. Strong background in statistical methodology. Record of accomplishment or potential for significant contributions to research in educational measurement, psychometric theory and methodology, or applied statistics in the fields of psychology or education.

Send CV, a letter of Intent, three recent publications or preprints, and the names of three references to Professor James Corter, Search Committee Chair, Box 41.

Review of applications will begin in early March, and continue until the position is filled. Appointment begins September 2001.

Teachers College,
Columbia University
525 W. 120th St., New York, NY 10027
http://www.tc.columbia.edu/
William Paterson University is a comprehensive public institution of higher learning, committed to promoting student success, academic excellence, and community outreach with opportunities for lifelong learning. Featuring nationally ranked programs, the University maintains a low-student-faculty ratio (12:1) and small class size (21) for its 30 undergraduate and 18 graduate degree programs, supported by state-of-the-art information and communications technology. The University enrolls 10,000 students from the country and from over 60 foreign nations. William Paterson University is situated on a beautiful suburban campus in Wayne, New Jersey, twenty miles west of New York City.

Reporting to the Vice President for Administration and Finance, manages the financial affairs of the University and prepares financial analysis for management. Major responsibilities include: overseeing the business services operation of the university; responsibility for the university’s accounting and reporting function; preparing and submitting all federal and state financial reports; analyzing, recommending and instituting appropriate fiscal policies, procedures and controls; compiling and analyzing financial data; coordination of the annual external audit process.

Candidates should have an understanding of and appreciation for the current trend in management, the nature of the academic community, a multicultural environment and shared governance. The candidate must be able to function with minimal direction and possess excellent oral and written communication skills.

Bachelor’s degree in accounting; and MBA in a related field and/or CPA certification required; at least 10 years management experience in accounting and fiscal management; Higher Education experience is preferred; knowledge of an on-line administrative financial systems is essential; in-depth knowledge of CASB, PASB and GAAP and their application in a university environment is required; strong PC computer skills; knowledge of current professional accounting and financial reporting standards of colleges and universities; experience in re-engineering of business service procedures; and a demonstrated record of effective leadership, business/accounting expertise and a customer service orientation.

Assistant Controller

An innovative and dynamic individual to serve as a principal aide to the Controller responsible for the University’s general accounting functions including supervision of the accounts payable function.

Reporting to the University Controller, the Assistant Controller will lead and manage the staff in a total customer service approach to serving the University community. The Assistant Controller will ensure that the University is kept informed of changing federal and state regulations. Encourages staff development by utilizing cross-functional training. Additional responsibilities include establishing unit goals and performance based standards in accordance with University policies and goals; recommends revisions to accounting policies and procedures; and program operations and performances and recommends changes as required; provide guidance and counsel to the staff; serves as a member of the CASB 34 and 35 Implementation committee.

A bachelor’s degree in accounting and a master’s degree in business or CPA certification preferred; major must be in accounting or finance if bachelor’s degree is not in accounting. At least 5 years supervisory-level experience in business or financial affairs required; Higher Education experience preferred. Experience with an on-line financial software system is essential.

Assistant Vice-President for Capital Planning, Design & Construction

A construction industry professional with thorough knowledge of facilities planning design and construction. Reporting to the Vice President for Administration and Finance, will oversee a department responsible for all facilities planning and construction activities associated with new construction and renovation projects. Also responsible for space inventory and space utilization management, capital asset assessment and analysis, formulation of space and planning policies and the strategic planning that relates to long term campus facilities planning.

Responsibilities include assisting senior management in decision making regarding the identification, feasibility and priority of projects. Act as Vice President’s primary representative during the project programming, design and construction phases. Prepares and makes informational presentations to internal and external constituencies.

The successful candidate must have a minimum of 15 years of progressively responsible relevant experience with substantial capital and renovation projects, of which at least five years must be at a senior managerial level. Demonstrated exceptional performance establishing and maintaining productive collaborative relationships with a full range of internal and external constituencies. Demonstrated code review and compliance experience working with local, state and federal authorities. Candidate must function with minimal direction and possess excellent oral and written communications and presentation skills. Must have strong project management skills. Higher Education experience is highly preferred. Experience with project administration and scheduling software and AutoCAD preferred. A bachelor’s degree in Architecture, Planning, Construction Management or Engineering (preferably mechanical, civil or electrical) with professional registration (NJ or the ability to obtain such) is required. A Master of Business Administration degree is a plus.

Please submit a letter of intent, specifying position, salary history, resume and the names and addresses of three references (as calls or faxes) to Stephen Bolyai, Vice President for Administration and Finance, Drawer HO, William Paterson University, P.O. Box 913, Wayne, NJ 07474-0913

Director, Training and Development

The Director of Training and Development has responsibility for initiating, planning, developing, coordinating and evaluating all human resource development and training activities throughout the University. The selected candidate implements development and training initiatives and programs at all employee levels and ensures accessibility to these programs.

Bachelor’s degree and a minimum of 3 years related experience required. Strong analysis, instructional design, facilitation and organizational skills are essential. Understanding of a university environment. Must have demonstrated strong oral and written communication skills.

Please forward letter of application, resume and list of three references to: Mr. Rafael Valentin, Associate Vice President, Human Resources, Drawer HO, William Paterson University, College Hall, P.O. Box 913, Wayne, NJ 07474-0913

All positions offer a comprehensive benefits package including free tuition for dependent children after one year of employment. Salary is negotiable and commensurate with expertise and experience. The review of applications will begin immediately upon receipt and continue until the positions are filled.

EOE/AA/ADA

Diane and William Paterson University

WAYNE, NEW JERSEY

An Equal Opportunity Institution Committed to Diversity
FACULTY POSITIONS ~ MUSIC DEPARTMENT

The Music Department invites applications for the following tenure-track Assistant Professor positions beginning September 2001. An earned doctorate or ABD candidate is desired for all positions.

Assistant Professor of Music in String (cello/bass) and Music Education
Seeking a versatile musician who can teach undergraduate studio lessons in cello and bass and coordinate string activity in the Department including coordination of string juries and involvement in incoming undergraduate auditions. Responsibilities: recruitment of string players, especially cello and bass students; teaching in the following areas: beginning and intermediate class strings, orchestra literature for teaching, junior instrumental practicum, and supervision of student teachers; and the ability to work with the orchestra director with string sections. Additional duties may be assigned according to the candidate's individual strengths. Qualifications: substantial concert performing credit on major instrument, substantial public school teaching experience in strings and general music, and evidence of an awareness of general principles of music education.

Assistant Professor of Music (Jazz/Brass Specialist)
Seeking a versatile brass musician who can serve as Brass Area Coordinator and develop, instruct and maintain a high-quality jazz ensemble(s). Responsibilities: teaching classical studio lessons in the specialist's area (trumpet will be given highest priority); coordinating brass auditions and juries; conducting workshops and the Brass Choir. In addition, the successful candidate will be expected to recruit musicians (both brass and jazz), create and teach brass and jazz-related courses, and host brass and jazz festivals and concerts. Qualifications: strong evidence of successful studio and classroom teaching at the college/university level must be shown, as well as evidence of outstanding ensemble conducting.

Assistant Professor of Music in Piano and Keyboard Studies
Responsibilities: seeking a keyboard studies specialist whose duties would include coordination of the piano students of the department, the piano auditions and juries of the department, recruiting piano students for the department, and giving private studio instruction for Music Education and Piano Performance Majors. Additional duties will include a selection of courses based on candidate strengths and departmental needs; Art of Accompanying, Piano Pedagogy, Keyboard Harmony for the Piano Major, and Keyboard Skills for the Teaching Musician, and Beginning Class Piano. Qualifications: strong evidence of successful accompanying, as well as studio and classroom teaching at the college or university level must be documented. The candidate should have knowledge of the needs of the classroom-based musician (K-12) and how keyboard can be used to aid and enhance teaching. Ability and experience in accompanying and concert performance also a must for the successful candidate.

To apply, submit letter of application, including the position of interest, vita, three current letters of recommendation, and related materials (such as representative recordings) to: Dr. Suzanne Hickman, Chair, Personnel Committee, Department of Music, The College of New Jersey, P.O. Box 7718, Ewing, New Jersey 08628-0718. Deadline for submission of materials is March 15, 2001.

The College is a highly selective, comprehensive institution with 5,800 undergraduate students. Located on a 283 acre tree-lined suburban campus, TCNJ is close to Princeton, with easy access to New York and Philadelphia. For further information about The College, please visit our web site at: www.tcnj.edu. To enrich education through diversity, The College of New Jersey is an Equal Opportunity Employer.
ARIZONA STATE UNIVERSITY seeks a Dean of the College of Liberal Arts and Sciences on the main campus in Tempe. The College consists of 23 departments and numerous interdisciplinary programs, Centers, Research institutes and Laboratories representing the humanities, social and behavioral sciences, and mathematical and natural sciences. Its 800 faculty members offer 34 programs leading to a bachelor's degree, 22 leading to a master's degree, 20 leading to a doctoral degree, and interdisciplinary graduate programs in cooperation with other colleges. Customized undergraduate interdisciplinary degree programs are also available. Current enrollment includes 11,300 undergraduate and 2,300 graduate majors. The College budget for the current fiscal year is $70 million, including fringe benefits. External research funding accounts for an additional $42 million.

The Dean reports directly to the Senior Vice President and Provost. He or she provides academic and administrative leadership, and represents the College both within and outside the University. The Dean must be committed to working with faculty, staff, and others to plan, develop, and maintain an academic, research, and service program that is recognized at the national level. The Dean will have the following responsibilities:

- Prepare and present a budget for the College for the subsequent fiscal year.
- Maintain and strengthen the College's administrative structure and organization.
- Oversee the academic programs of the College in coordination with University administrators and faculty and staff.
- Oversee the planning and development of the College's research and scholarly activities.

The Dean will possess a Ph.D. or equivalent degree in an appropriate field, a record of successful academic leadership, and at least five years of experience as a department or division head. Strong leadership, administrative, and interpersonal skills are required.

QUALIFICATIONS

A successful candidate must exhibit leadership and strategic vision and have:

- A terminal degree in a discipline and a strong record in research and teaching that merits appointment as a Professor with tenure in a department of the College.
- A demonstrated commitment to enhancing the diversity of the faculty, students and staff.
- A demonstrated commitment to promoting excellence in research.
- A demonstrated commitment to promoting a quality learning environment at all levels, undergraduate through graduate.
- A demonstrated understanding of the research, instructional and service needs of a large and diverse college.

ARIZONA STATE, a forward-looking member of the PAC-10, ranks among the first-rate research universities in the country and in the top 20 in the number of National Merit Scholars. It is comprised of twelve colleges: Architecture and Environmental Design, Business, Education, Engineering and Applied Sciences, Extended Education, Fine Arts, Graduate College, Honors College, Law, Liberal Arts and Sciences, Nursing and Public Programs. Current enrollment exceeds 44,000 students, 10,000 of whom pursue graduate studies. Of the total, 24% of the students come out of state and 20% are minorities. Its attractive, modern campus boasts excellent resources, including a leading research library system, extensive computing facilities and support, state-of-the-art research laboratories, and outstanding facilities for the visual and performing arts. Tempe, a nationally recognized college town, is part of the metropolitan Phoenix area. By design, the university is fully engaged in the life of this cosmopolitan, culturally diverse community of nearly three million people.

NOMINATIONS AND APPLICATIONS must be mailed or emailed to:

Morton E. Munk, Chair
Search Committee for Dean of the College of Liberal Arts and Sciences
Office of the Senior Vice President and Provost
Arizona State University
P.O. Box 872903
Tempe, AZ 85287-2903
(480) 965-4087
Email: chas.dean.search@asu.edu

Applications must include a curriculum vitae, a letter that highlights important qualifications and the basis of interest in the position, and the names and contact information (including email if possible) of five references who are qualified to comment on scholarship, teaching and administrative ability. APPLICATION MATERIALS WILL BE HELD IN CONFIDENCE AND NO REFERENCES WILL BE CONTACTED WITHOUT APPROVAL OF THE CANDIDATE.

The deadline for receipt of applications is March 9, 2001. Applications will be accepted after the deadline and reviewed on a weekly cycle as necessary until the position is filled. The preferred starting date is July 1, 2001, but the date is negotiable. The salary is competitive.

Arizona State University is an Equal Opportunity, Affirmative Action Employer.
SENIOR VICE PRESIDENT FOR ACADEMIC AFFAIRS AND PROVOST

Applications and nominations are invited for the position of Senior Vice President for Academic Affairs and Provost at the University of Maryland, College Park.

The university, the flagship of a statewide system of higher education in Maryland, is a nationally recognized public research university with top-ranked programs, extraordinary educational opportunities, and important research objectives. The University of Maryland offers comprehensive undergraduate and graduate programs organized in 13 colleges and schools. It is a member of the Association of American Universities (AAU) and a Doctoral/Research - Extensive institution enrolling 24,000 undergraduates and 9,000 graduate students annually. Committed to quality undergraduate education, excellence in research and graduate study, and service to the citizens, governments, and industries of the region, the university has achieved prominence in a variety of areas, including engineering, business, computer science and technology, mathematics, economics, physics, public policy and journalism. The campus is located 8 miles from Washington, D.C., and 36 miles from Baltimore, Maryland, on 1,500 rolling acres in a suburban environment.

The Senior Vice President for Academic Affairs and Provost, as second to the President, is the chief academic officer of the university with responsibility for guiding the academic development and direction of the institution in accordance with the university’s mission; ensuring that programs and faculty are of the highest caliber; building the diversity of our students, faculty and staff; and building academic excellence across the university. The dean of the 13 colleges and schools at the university report to the Senior Vice President/Provost as do the deans for undergraduate studies, graduate studies, and continuing education, the dean of the libraries, and the director of international programs. The Senior Vice President/Provost oversees the development, review, and implementation of all academic policies and regulations; consults closely with the University Senate and other faculty advisory groups on academic programs and policies; and serves as liaison with other university divisions in strategic and long-range planning. The Senior Vice President/Provost also represents the campus on a number of University System of Maryland bodies and other external organizations. The Senior Vice President/Provost has budget responsibility for campus academic programs and resources, and is responsible for ensuring the quality of all academic activities through the coordination of academic program review, providing advisory recommendations to the President on all tenure and promotion matters, reviewing all academic appointments, and promoting organized research on campus.

The University of Maryland is one of the fastest rising comprehensive research universities in the country, thanks to generous funds for enhancement from the state, and the Senior Vice President for Academic Affairs/Provost, together with the President, allocates these resources. The university’s recently adopted strategic plan, Building on Excellence: The Next Steps, lists strategies and actions intended to expand the breadth of our excellence and strength of our programs, and the President’s Provost/Provost has primary responsibility for implementation of the plan. University strategic plans and educational policies are developed with a strong commitment to the principle of shared governance, which the Senior Vice President/Provost must embrace fully. With the state’s support and the efforts of an outstanding faculty, the university’s academic reputation has increased significantly during the past decade, and the successful candidate must have the qualifications, academic achievement, vision, and energy to continue this momentum.

The University of Maryland takes very seriously its commitment to diversity and affirmative action, and strongly encourages the application and nomination of both female and minority candidates. The university is an Affirmative Action, Equal Opportunity Employer.

Qualifications: Candidates should have a record of scholarly achievement and qualifications for appointment at the Professor rank. Substantial academic managerial and administrative experiences, and qualifications that demonstrate exceptional capacity for academic leadership are also required. Candidates should have a record of fostering and achieving academic excellence and achieving diversity goals.

In order to be assured full consideration, applications and nominations should be received by March 15, 2001. Correspondence should be addressed to:

Dr. Charles F. Welford
Chair, Senior Vice President/Provost Search Committee
Office of the President
1101 Main Administration Building
University of Maryland
College Park, MD 20742

Review of applications and interviews of candidates are expected to begin during the Spring 2001.

TEXAS TECH UNIVERSITY

DEAN
COLLEGE OF BUSINESS ADMINISTRATION (COBA)

TTU invites applications and nominations for the position of Dean of the Jerry C. Rawls College of Business Administration. The Dean is expected to provide dynamic, visionary leadership to enhance the prominence of the undergraduate, graduate, outreach programs of the college. TTU is committed to providing substantial investments towards developing the strengths and reputation of the faculty and the college infrastructure.

The COBA, accredited by the AACSB has approximately one hundred and ten (110) full-time equivalent faculty and sixty (60) graduate faculty members. The COBA has an annual budget of approximately one (1) million dollars and an endowment of sixty-five (65) million dollars. Bachelor’s, Master’s, and Doctoral degrees in accounting, finance, information systems are offered and joint degree programs with other TTU colleges and reciprocal international programs have been established. The COBA and the TTU Health Sciences Center jointly direct the MBA/MD program, the only one of its kind in the country. Spring 2001 undergraduate enrollment include two-thousand-four-hundred (2400) upper division undergraduates, four-hundred-twenty (420) masters, and about sixty (60) doctoral students. The COBA houses the Center for Professional Development and the Texas Center for Productivity and Quality Work Life.

QUALIFICATIONS AND CHARACTERISTICS

- An earned doctorate in business or related discipline. Academic experience is desirable, but not required.
- Significant and successful administrative experience and successful interface with business through direct experience, consulting, or field-based research.
- A capacity for administrative as well as intellectual leadership. The successful applicant should be able to formulate, articulate, and implement a strategic vision for the future of business education at Texas Tech University.
- Dedication to student achievement, faculty development, and creation of an environment that promotes collegiality, pride, cultural diversity, and commitment to excellence.
- An ability to develop and sustain partnerships with a supportive business (corporate and local) and alumni community, and to successfully accomplish fund-raising efforts.
- Responsive to the various constituencies that comprise the College and the skills to work cooperatively with other academic units within the University.
- Ability to communicate with students, faculty, university administrators, business, government, foundations, and alumni.

Review of applicants will begin immediately; serious candidates should apply by April 1, 2001. Applications will continue to be reviewed until the position is filled. Candidates should submit a letter of application; curriculum vitae; and names, telephone numbers, and addresses of three references. Nominations, applications, and confidential inquiries should be sent to:

Dr. Bill Marcy
Texas Tech University
College of Engineering
Box 43103
Lubbock, Texas 79409-3103
Phone: (806) 742-3451
Fax: (806) 742-3493
e-mail: william.marcy@ttu.edu

Desired beginning date is September 2001, but is negotiable. Texas Tech University is located in Lubbock, a city of approximately two-hundred-thousand (200,000) situated in the High Plains of West Texas and is the only university campus with a School of Medicine, a School of Law, and a comprehensive university on the same campus. The University holds the Carnegie Foundation Doctoral, Extensive Research classification with expenditures in excess of forty million (40,000,000) dollars in sponsored and projects annually. Enrollment is approximately twenty-five thousand (25,000) and includes almost three-fourth-five-hundred (3,500) graduate students and degrees offered in more than one hundred and fifty (150) undergraduate, one hundred (100) masters and sixty (60) fields of study.

EEO/AADA Employer
Dean, Division of Business, Science and Technology

Community College of Philadelphia, an urban multi-campus institution, invites applications and nominations for the position of Dean, Business, Science and Technology Division. The Division serves 14,000 students per semester supported by 250 full and adjunct faculty and an annual budget of approximately $13 million. The Division includes programs in the academic areas of science, math, electronics, engineering, business, and computer studies.

This senior-level position reports directly to the Vice President for Academic Affairs. The Dean provides academic and administrative leadership to the Division to support the mission of the College, directs daily operations and supervision of department heads and administrative staff in the management of their areas of responsibility.

Qualifications:

- Doctorate strongly preferred; Master's required in one of academic areas listed above
- Five years of directly related progressively responsible academic/administrative experience
- College teaching experience
- Ability to work collaboratively with various constituencies
- In-depth familiarity with regional and specialized programmatic accreditation
- Understanding and support of community college mission

Excellent salary and fringe benefits.

Community College of Philadelphia is an affirmative action, equal opportunity and equal access employer. The College encourages applications from individuals from traditionally under-represented groups. AA/EOE.

Additional information on the College is available on our website:
http://www.ccpccpa.us

Director of the Honors College

Oakland University seeks applications and nominations for the position of Director of the Honors College: A baccalaureate/graduate-intensive public institution, Oakland University serves an enrollment of over 25,000 students. It offers 99 undergraduate and 65 graduate programs. Selected for the last several years by US News and World Report as one of the nation's top regional universities, Oakland University has a strong commitment to outstanding teaching and research. The University is located in suburban Oakland County, on 1,500 park-like acres, thirty miles north of Detroit. Oakland County, well known for its cultural diversity and quality of life, is home to over five hundred multi-national corporations.

The successful candidate will have responsibility for leading a dynamic, growing Honors College. The Honors College is currently the intellectual home for approximately 300 Oakland University students with majors from across the institution. The Honors College is housed in a new, multi-level, glass-structured facility that acts as a symbol of innovation and inspiration. The Honors College provides an environment of high standards and academic rigor with a fully effective program of undergraduate research and scholarly activity. The College offers a variety of high honors courses and advanced placement opportunities, which have been recognized by the University's Senate and the Board of Trustees.

Qualifications for the position include:
- Experience with honors programs or honors college in a university setting
- Administering programs in an academic Department or program
- Demonstrated evidence of effective curricular planning and implementation
- Commitment to serving students and evidence of effective oversight of student projects
- Ability to work collaboratively with students, faculty, and administrators
- Commitment to diversity
- Commitment to innovation and high academic standards
- A Ph.D. or equivalent terminal degree and an academic record of excellence in scholarship and teaching that will allow faculty appointment at a senior rank in one of Oakland's academic units

Preference will be given to candidates who demonstrate:
- Familiarity with national developments and best practices in honors programs
- Experience in fund-raising
- Experience in an institution with mid-to-large enrollment

Salary and fringe benefits are competitive and commensurate with experience and qualifications. Screening of candidates will begin April 9th and continue until the position is filled. A letter of application, curriculum vitae, and three letters of recommendation should be submitted to:

Susan Ambrew, Vice Provost for Undergraduate Education
Chair of Honors College Search Committee
520 O'Dowd Hall
Oakland University
Rochester, Michigan 48309

President

University System of New Hampshire

The Board of Trustees of the University System of New Hampshire and the faculty, staff and students of the College for Lifelong Learning seek a creative and dedicated leader, with vision and commitment to advise the mission of the College within the overall mission of the University System. The College provides higher educational opportunities to individuals, primarily adults, who do not have access to campus-based programs or who cannot achieve their goals through traditional educational programs.

For additional information, visit the College's web site: www.cll.edu.

Qualifications: Earned doctorate, demonstrated understanding of traditional and non-traditional educational settings, successful managerial experience, excellent communication skills.

Review of applications and nominations begins March 3 and should be sent to:

Trustee Merle Stotan, Chair
C.I.L. President Search Committee
UNH Chancellor's Office
25 Concord Road
Durham, New Hampshire 03824-3545

C.L.L.- UNH is an equal opportunity and affirmative action employer.
**SOCIAL WORK FACULTY POSITION**

Baylor University invites applications for a full-time, tenure-track social work faculty position, beginning August 2001. Rank is flexible and will depend upon the candidate's qualifications.

Applicants should possess the following: an M.S.W. degree from a CSWE-accredited program, two years of post-master's experience, a doctorate in social work or a related field, demonstrated ability to conduct and publish research, a commitment to collaboration with the community and its agencies including religious organizations and faith communities, and enthusiasm for the mission of this program.

Faculty will teach at both the baccalaureate and graduate levels. Preference will be given to applicants with graduate teaching experience.

Send curriculum vita, graduate transcript, and three letters of reference to Dennis R. Myers, Chair, Search Committee, School of Social Work, Baylor University, PO Box 97320, Waco, TX 76798-7320. Phone: 254-710-6411. Fax: 254-710-6455.

E-mail: Dennis_Myers@baylor.edu

Review of applications begins February 15, 2001 and will continue until the position is filled. To ensure full consideration, your application must be completed by 01 April 2001.

Baylor University is an affirmative action/equal opportunity employer. Baylor encourages minorities, women, veterans, and persons with disabilities to apply.
Southern Connecticut State University
Dean of the School of Arts and Sciences

The Position: The Office of Academic Affairs invites applications for the position of Dean of the School of Arts and Sciences. The Dean is the senior administrative officer of the School, providing leadership and administering the programs and affairs of the University within the School. Under the direction of the Vice President for Academic Affairs, the Dean formulates institutional policies and develops plans pertaining to the disciplines and programs within the jurisdiction of the School. The Dean is responsible for the efficient and effective operation of the School. Specific duties of the Dean include:

- Developing and enhancing, in cooperation with the deans of other schools and the faculty, the programs, courses, standards and services of the School.
- Making recommendations regarding personnel actions of faculty in accordance with the procedures in the collective bargaining agreement.
- Hearing issues regarding students, faculty and staff as appropriate.
- Participating in the outcomes assessment and strategic planning processes of the University.
- Monitoring processes for personnel development and program evaluation, institutional assessment, and student recruitment and retention relating to the School.
- Preparing and administering the School's operating budgets, planning documents, and reports.
- Representing the School in the community and in appropriate functions of the University.
- Additional responsibilities as requested by the Vice President for Academic Affairs.

Qualifications: An earned doctorate in an academic discipline within the School of Arts and Sciences. A record of teaching, scholarship and service equivalent to the rank of professor. A minimum of five years of demonstrated successful experience in higher education academic administration at the level of department chairperson or higher. Demonstrated commitment to outcomes assessment, strategic planning, and the role of educational technology. A dynamic vision of the role of arts and sciences in a state university. Evidence of successful leadership attributes and collaborative managerial skills. Experience in contract administration and collective bargaining in the public sector a plus.

The University: SCSU is a comprehensive metropolitan public university of some 12,000 students, located in historic New Haven. The School of Arts and Sciences is composed of 17 academic departments, several major multidisciplinary programs, and some 200 full-time faculty. The University is currently engaged in strategic planning, comprehensive academic planning and institutional assessment initiatives.

The Process: Screening of candidates will begin on March 15, 2001. Anticipated starting date is July 1, 2001. Salary is competitive and commensurate with qualifications and experience. Applications should include a resume and a letter that includes detailed description of the qualifications and experience for the position. Please also provide the names, addresses and telephone numbers of at least five references. Send application materials to:

Dr. J. Philip Smith
Vice President for Academic Affairs
Engleman Hall, Room 125
Southern Connecticut State University
501 Crescent Street
New Haven, CT 06515 - 1355

Southern Connecticut State University is an equal opportunity/affirmative action employer, seeking to enhance the diversity of its instructional and administrative staff. The University encourages women and minorities to apply.

Arizona State University West is seeking an individual to initiate, develop, and lead a campus-wide Learning Enhancement Center. This Learning Enhancement Center will house and coordinate several existing campus programs. The Director will be responsible for providing leadership in the curriculum and teaching services, among others. The Director will coordinate and expand effort into a comprehensive, online-based program of comprehensive student academic support. The main responsibilities of the Director will include supervision of a tutoring/writing center and its staff, development of academic support systems for the campus's learning communities and lower division programs, specifically supplemental instruction, and regular communication and consultation with faculty about learning support programs and issues.

The Learning Enhancement Center will be housed in the Division of Collaborative Programs, the Community College, and its institutional support programs, and the Director will report to the Dean of Collaborative Programs. The Director will also hold a tenured faculty position in one of the campus's instructional units and will teach one course per year for that unit.

The successful candidate must have a Doctorate or its equivalent, a record of teaching and scholarship commensurate with an appointment as an associate or full professor in one of ASU's colleges, and experience working with university learning support programs. Specific experience in Writing Across the Curriculum programs, supplemental instruction, multi-lingual and multi-cultural academic support programs, institutional assessment and measurement, and/or mathematical support programs is desirable.

Application deadline is March 26, 2001, and the 26th of every month thereafter until the position is filled. Interested candidates should send a letter addressing required and desired qualifications, curriculum vitae, and names, addresses and telephone numbers of three references to Allysse Ross, Arizona State University West, P.O. Box 37160, MC 2851, Phoenix, Arizona 85069. For further information regarding ASU West please visit http://www.west.asu.edu.

Arizona State University is an equal opportunity/affirmative action employer.

Connecticut's Community Colleges are seeking graduate students interested in Administrative or Teaching Fellowships through the DIVERSITY FELLOWSHIP PROGRAM:

- Experience the excitement and challenges of the two-year college sector where 50% of the nation's undergraduates begin their higher education
- Gain valuable professional experience
- Enhance the ethnic, racial, and intellectual diversity that the colleges seek to promote (Emphasis will be placed on increasing the participation of African American and Hispanic applicants in the program)
- Serve as a role model for students
- Develop professional relationships in your field
- Earn financial support for your educational expenses: $3,000 per semester

The selected candidates should be currently enrolled at least in the second year of a graduate program. All candidates should be in good academic standing, willing to spend 6 hours per week in classroom-related activities or in a structured administrative setting under the direction of a mentor. These individuals will be involved in faculty and staff meetings, Minority Fellowship Orientation, and will assume increased responsibilities as the Fellowship year progresses.

For further information contact: Kenneth G. Armstrong, System Officer for Diversity Awareness, Connecticut Community Colleges, Board of Trustees, 61 Woodland Street, Hartford, CT 06105, (860) 725-6606.

The Board of Trustees is an affirmative action/equal opportunity employer M/F.
Outreach/Community Resources Librarian (New Position)

San Diego State University Library and Information Access is seeking an energetic, highly motivated librarian to provide leadership to improve and increase outreach to faculty, students, and the external community. The successful candidate will take a lead role in:

- developing active partnerships with teaching and Library faculty to enhance campus, international and distance learning courses;
- designing, marketing, delivery and evaluation of the Library's outreach program.

Other duties include:

- developing a community resources collection that supports the curricular and research needs of the campus and community, with an emphasis on business, public health, regional planning, the environment and border issues;
- supporting subject and special collections bibliographers in identifying and acquiring locally produced information;
- providing research assistance, including some nights and weekends;
- participation in the Library's instructional program;
- creation and management of Web content;
- service on Library and University committees.

Required:

- Desire to play a visible role in the academic community;
- Ability to address the needs of students, staff, colleagues, teaching faculty, and the research community in a dynamic and culturally diverse environment;
- Demonstrated success working with faculty, researchers, and students;
- Evidence of a strong service commitment;
- Evidence of entrepreneurial accomplishment and ability to manage projects;
- Ability to work effectively in a collaborative environment;
- Knowledge of traditional and electronic reference services and resources;
- Experience designing and creating Web-based and print instructional/learning materials;
- Excellent oral, written, analytical, and interpersonal communication skills;
- Demonstrated potential for meeting the requirements for tenure and promotion under the Library's criteria for library service effectiveness, professional growth and development, and service for the University and the community;
- ALA accredited degree or equivalent foreign degree.

Preferred:

- Experience working in an academic setting;
- Second masters or doctorate;
- Active involvement in professional development activities with a record of scholarly contributions and achievements in the profession;
- Proficiency in Spanish.

This is a full-time, twelve-month, tenure track faculty position. Award of tenure is dependent upon evidence of continuing library service effectiveness, professional growth and development, and service for the University and the community. Rank of Senior Assistant Librarian, starting salary range of $46,488-$58,740 or Associate Librarian, starting salary range of $51,460-$74,352. Excellent benefits package, including 24 days annual vacation.

San Diego State University is the second largest academic institution in California and the oldest in the region. It serves an ethnically diverse student body of approximately 30,000 students and 2,700 faculty members. The University offers bachelor’s degrees in 76 areas, master’s in 98 and doctorate’s in 11. Its mission is to provide well-balanced, high-quality education for undergraduate and graduate students, and to contribute to and address the problem of problems through excellence and distinction in teaching, research and service. Additional information is available at http://libweb.sdsu.edu/san diego.html.

In support of this mission, Library and Information Access has a collection of over one million volumes, a budget of $10,063,065, provides access to numerous electronic resources and offers a variety of user-focused services, including operation of state-of-the-art electronic classrooms, support of over 500 computers and 25 servers, software training and management of the campus Student Computing Center. Services are provided by 30 librarians, 78 staff members, and over 200 student assistants. Additional information is available at http://libweb.sdsu.edu, the Library's Web site.

SDSU fosters and appreciates ethnic and cultural diversity among its faculty, students, and administrative staff and encourages applications from women, ethnic minorities, veterans, and individuals with disabilities.

Send letter of application, resume, and have letters of recommendation from five professional references sent separately to:

Helen Henry
Director, Administrative Operations
Library and Information Access
San Diego State University
5500 Campanile Drive
San Diego, CA 92182-8050

A duplicate may be submitted by email. Send to librarymail@sdsu.edu. Please indicate the position for which you are applying. To ensure full consideration, applications should be received by April 16, 2001, when the Appointment Committee will begin screening.

Director of Admissions & Records
University of Illinois at Springfield

The position's primary function is to provide overall leadership and direction for the student recruitment, admissions, registration, and records functions with responsibility for policy development, programmatic and budgetary direction, and management of areas of responsibility. The Director of Admissions and Records reports to the Vice Chancellor for Student Affairs and is responsible for the supervision of professional and support staff of admissions and records.

Duties and responsibilities include: leading and directing the admissions, records, and registration functions; providing immediate leadership in the recruitment and admission of students; providing programmatic and budgetary direction and management for those units supervised; providing oversight and direction for credential evaluation, articulation agreements, initial advising of students, and technological systems for recruitment and admissions tracking; contributing to the development and coordination of web-based services for relevant areas; coordinating efforts with other university and campus units, and consultants, as appropriate; developing and administering budgets; and supervising professional and support staff.

Minimum qualifications: Master's degree, doctoral degree preferred; professional experience in student services in higher education, preferably in a college or university setting with a comprehensive set of degree programs and with a traditional as well as non-traditional adult student populations; five years of progressively responsible experience in admissions and records areas with a primary emphasis in admissions and recruitment in a selective campus environment; and demonstrated achievement in the development and implementation of student recruitment and enrollment plans with quantifiable results. Additional minimal qualifications include excellent skills and experience, as well as theoretical background, in administration and planning; knowledge of recent research and trends in demographics, student recruitment and enrollment, and student retention in higher education; expertise in devising outstanding recruitment strategies utilizing appropriate tools and technology; and demonstrated human relations skills and a collaborative, team-building leadership style.

Located in the state capital, the University of Illinois at Springfield is one of three campuses of the University of Illinois. The UIS campus serves approximately 4,000 students in 19 graduate and 20 undergraduate programs. The academic curriculum of the campus emphasizes a strong liberal arts core and professional programs, extensive opportunities in experiential education, and a broad engagement in public affairs issues of the day. The campus offers many small classes, substantial student-faculty interaction, and a technology enhanced learning environment. Its diverse student body includes traditional, non-traditional, and international students. Its faculty are committed teachers, active scholars, and professionals in service to society.

Applications and nominations should be sent to:

Chair, Director of Admissions and Records Search Committee
Office of the Vice Chancellor for Student Affairs
SAB 23
University of Illinois at Springfield
P.O. Box 19243
Springfield, IL 62794-9243

Applications should include a resume; a discussion of the candidate's academic and administrative accomplishments and interest in the position; and the names, addresses, and telephone number of five references. Applications will be screened ongoing until an appointment is made. The anticipated start date for the appointment is as soon as possible. Salary commensurate with experience and qualifications. For more information about the University of Illinois at Springfield, visit our web site at: www.uis.edu.

The University of Illinois is an affirmative action/equal opportunity employer. Persons with disabilities, women and minorities are encouraged to apply.
DEAN OF ENROLLMENT AND EDUCATIONAL SERVICES

Founded in 1832, Gettysburg College is a private, four-year residential institution whose founding principles include a rigorous liberal arts education that fosters a global perspective, a spirit of collaboration, dedication to public service, and an enriching campus life. Gettysburg’s 2,000-acre campus, adjacent to Gettysburg National Park, serves approximately 2,300 students representing 40 states and 30 foreign countries. Approximately 50% of the students live on campus in more than 18 residence halls including theme halls, a Residential College, and special interest housing. The institution offers 31 majors with the opportunity for special majors, double majors, and area studies programs.

The Position
Reporting to the President, the Dean of Enrollment and Educational Services will oversee the offices of admissions, financial aid, institutional analysis, and athletics and will serve as an institutional leader in issues of student retention. The Dean of Enrollment and Educational Services is responsible for managing a successful enrollment program and the College, strategically using financial aid in the enrollment process, weaving athletics effectively into campus life, ensuring the comprehensive collection of institutional data, and serving as liaison between the enrollment unit and all campus communities. The Dean chairs a committee on retention and is the staff resource to the Board of Trustees Enrollment Committee.

Qualifications
The preferred candidate will possess a bachelor’s degree however, a master’s degree is preferred, with proven experience in building and sustaining a successful institutional enrollment program. The successful candidate will demonstrate experience in changing the institutional student profile, improving student retention rates, and in the strategic and effective use of financial aid to develop a class of students. Data analysis skills, marketing skills, strong management skills, and a demonstrated ability to coordinate and lead the work of multiple offices in support of institutional goals are important in the selection of the new Dean of Enrollment and Educational Services. Appreciation for a Division I athletics program and its role in the campus community is also greatly desired.

Applications and Nominations
Review of applications will begin immediately and will continue until the position is filled. Nominations of individuals for this position may be made to the individual indicated below. Applications for this position should include a cover letter, resume, and the names and telephone numbers of three references sent to: Dean of Enrollment and Educational Services Search, Attention: Cheryl R. Miller, Executive Assistant to the President, 300 North Washington Street, Pennsylvania Hall, Gettysburg, PA 17325-1486. Fax: 717-337-8098. E-mail: cmiller@gettysburg.edu

Amherst College

ASSISTANT/ASSOCIATE
DEAN OF ADMISSION

Amherst College, a private, coeducational, liberal arts college founded in 1821, has an opening for an Assistant or Associate Dean of Admission beginning July 1, 2001.

Candidates must be familiar with and supportive of the mission of a selective liberal arts college. General admission responsibilities include recruitment travel, decision making and interacting effectively with the computerized Admission Office database. Projects will include, but are not limited to, the management of the student of color recruitment program and supervision of student interns.

Qualifications: Bachelor of Arts or Science degree required; and at least three years of admission or related work experience. Candidates must possess computer skills and be able to communicate effectively, both orally and in writing, with varied constituencies including prospective applicants, parents, secondary school personnel, alumni, faculty and other staff.

Interested candidates should send a letter, resume, and the names and addresses of three references to: Assistant/Associate Dean Search, Wilson Admission Center, Amherst College, PO Box 5000, Amherst, MA 01002-5000. A review of applications will commence on April 2, 2001 and continue until the position is filled.

Amherst College is an Equal Opportunity/Affirmative Action employer and encourages women, minorities and persons with disabilities to apply.
ELECTRICAL ENGINEERING FACULTY POSITION

Manufacturing Engineering Department seeks applicants for an electrical engineering tenure track faculty position, at the Assistant Professor rank, starting January 2002. Primary responsibilities are to teach undergraduate courses, develop electrical engineering curricula and labs; conduct research, perform service, and advise students. Required qualifications include a Ph.D. in electrical engineering or related fields; strong knowledge in electrical & electronic engineering, as well as engineering science. Desired qualifications include teaching experience, industrial experience, and strong knowledge of computer control of automated manufacturing and/or computer interface systems.

Miami University, located 35 miles north of Cincinnati, has 14,000 undergraduate and 1,800 graduate students. Miami, established in 1809, was selected, in the past few years, among the top 10 schools, in undergraduate education, in efficiency, and as a best buy. The engineering programs at Miami have been ranked 19 out of 139 in the country, for programs without a Ph.D. The Manufacturing Engineering Department is one of only 16 accredited manufacturing engineering programs in the country. The students' pass rate in the Fundamentals of Engineering exam has been over 90% for the past four years.

Screening of applications will begin mid-March and continue until the position is filled. Interested applicants should submit a letter of application, a curriculum vita, and at least three letters of recommendation to: Professor James Moller, Chair of Search Committee, Manufacturing Engineering Department, School of Engineering and Applied Science, Miami University, Oxford, Ohio 45056.

We encourage applications from a broad spectrum of individuals, including women and members of ethnic minorities. Miami University is an affirmative action/equal opportunity employer.

Smith College

PRESIDENT

EQUAL OPPORTUNITY, AFFIRMATIVE ACTION, SECTION 504, TITLE IX EMPLOYER

02/26/2001 HISPANIC OUTLOOK 89
Huston-Tillotson College, under the leadership of a new President, is recruiting dedicated professionals to assist in providing leadership in a dynamic and promising change environment. Founded in 1875, Huston-Tillotson College is Austin’s first institution of higher education. The College is an independent, liberal arts, church-related, historically black institution located on a 22-acre tree-lined campus near downtown Austin, Texas. The College is affiliated with The United Methodist Church, the United Church of Christ, and the United Negro College Fund (The College Fund). Undergraduate, four-year degrees in business, education, the humanities, natural sciences, and social sciences are awarded. Huston-Tillotson College is multi-cultural, multi-ethnic, and multi-faith, and welcomes students of all ages, races, and religions. While faculty are engaged in a range of activities, their primary focus is teaching. The student-teacher ratio is 15 to 1, which allows an environment of personalized attention to students. Applications are invited for the following positions:

The Vice President for Administration and Finance reports directly to the President and is responsible for managing, directing and controlling the administrative and fiscal affairs of the College. Unit managers are responsible for the Academic Program, Accounting, Finance, Business Administration, or related field, doctoral degree and CPA preferred, and seven years of progressively responsible experience in accounting and administrative experience in higher education.

The Dean of Academic Affairs will monitor, coordinate all aspects of the academic program, including the curriculum, educational policies, academic budget, and academic personnel-in-consultation with the President for Academic and Student Affairs, Division Chairs, and the faculty. This position reports to the Vice President for Academic and Student Affairs. The Ph.D. or its equivalent required as well as experience in a faculty member and/or academic affairs administrator.

The Dean of Student Affairs will monitor and coordinate all aspects of campus life and student development to include student activities, counseling center, residence halls, dining facility, public safety, and career placement. This position reports to the Vice President for Academic and Student Affairs. Masters in a suitable discipline required, doctorate preferred, experience with developmental education and management of direct services to students.

The Director of Development is responsible to plan, coordinate and supervise areas of gift income, planned and deferred giving, alumni affairs and church relations. Works with the President to develop ongoing dialogue and relationships with program officers of corporations, foundations, governmental agencies, and selected individuals to solicit major gifts in support of the programs of the College. Organizes and manages an annual campaign of solicitation of corporate, foundation, and individual gifts. Broad-based and successful marketing, advancement, or related experience at a senior level expected, preferably at an institution of higher education. An undergraduate degree is required with an advanced degree preferred.

The Division Chair for General and Liberal Studies serves as the administrator for the following academic programs: General Studies, Economics, English, Languages, Music/Fine Arts, Philosophy and Religion, Political Science, Psychology, and Sociology. The Ph.D. or its equivalent in one of the above disciplines is required as well as administrative experience.

The Division Chair for Professional Studies serves as the administrator for the following academic programs: Business Administration, Business Management, Finance, Physical Education, and Teacher Education. The Ph.D. or its equivalent in one of the above disciplines is required as well as administrative experience.

The Division Chair for Science and Technology serves as the administrator for Biological Sciences, Chemistry, Computer Science, Information Science, and Physical Sciences, which include Mathematics and Physics. The Ph.D. or its equivalent in one of the above disciplines is required as well as administrative experience.

The Director of Information Technology provides leadership, planning, and management for all areas of information technology including academic computing, administrative systems, voice and data communication, information technology security, training and user support. Bachelor’s degree in Computer Science or related field required, graduate degree and experience in an institution of higher education preferred. Comprehensive experience in computer systems development, including local area networks, and various personal computer database management and other application software.

Candidates should submit a letter of interest establishing qualifications for the position, current vitae, official transcripts, and at least three letters of recommendation. Salaries will be commensurate with qualifications and experience. The deadline for applications is March 15, 2001. While negotiable, the preferred starting date is May 15, 2001. Forward application packets to:

**Director of Human Resources**
**Huston-Tillotson College**
**900 CHICON ST.**
**AUSTIN, TX 78702-2795**
SUFFOLK UNIVERSITY
Dean
The Frank Sawyer School of Management

Suffolk University invites nominations and applications for the position of Dean for the Frank Sawyer School of Management.

The Dean is the chief executive officer of the School and is responsible for the faculty and programs, administrative staff, facilities, and budget.

Suffolk University consists of three faculties, the Law Faculty, the Faculty of Arts and Sciences, and The Frank Sawyer School of Management. The Sawyer School serves over 1,000 undergraduate students and 1,200 graduate students and offers 50 undergraduate and graduate degree and certificate programs and is one of 300 schools nationwide named in Barron’s Best Buys in College Education. There are more than 60 full-time faculty members, 95 percent of whom hold Ph.D. degrees, giving the Sawyer School of Management one of the highest faculty Ph.D. ratios in the country. The University has innovative programs built on scholarship and is responsive to the market demand for graduates. The University is incorporating new technology, including an online MBA program, to reach wider markets and to enhance the excellent service to their traditional student body. The University is located on Boston’s historic Beacon Hill as well as other locations in the Boston area and abroad.

Qualifications: The Dean for The Frank Sawyer School of Management provides leadership to a diverse and innovative community that values excellence in scholarship and teaching, in a culture of cooperation, teamwork, transparent and fair processed of accountability and rewards, and continual change. It is desired that the Dean have an academic record that merits a senior tenured appointment to the Faculty of Management. The successful candidate will have a record of distinguished scholarship and administrative accomplishments; experience in personnel management and fiscal responsibilities; an understanding of the potential of technology to transform the delivery of management education and effective servicing of student needs. The successful candidate will be a dynamic person with a clear vision for management education and research. Preferred candidates will have earned doctorate or other appropriate terminal credential. Candidates with executive level experience outside of higher education are welcomed.

Nominations and Applications: For best consideration, materials should be submitted prior to March 12, 2001. Review of applications and nominations will begin immediately and will continue until an appointment is made. Application materials should include a letter of application addressing how the candidate’s experiences match the position requirements, a curriculum vitae, and the name, title, e-mail, business address, and business and home telephone numbers of at least five references. Submission of materials as an MS Word attachment is strongly encouraged. Individuals wishing to nominate candidates for the position should submit a letter of nomination, including the name, position, address, and telephone number of the nominee.

Nominations and applications will be considered in confidence and should be sent to:

EMPIRE STATE COLLEGE
State University of New York

COMMUNITY AND HUMAN SERVICES
FACULTY/FULL-TIME
Tenure Track

SUNY Empire State College, a national leader in non-traditional education with locations throughout New York State, seeks to fill four full-time faculty positions in Community and Human Services at different locations throughout the State. Founded in 1971, ESC is a recognized leader in designing and delivering innovative programs that meet the needs of more than 10,000 students each year. Students, mostly working adults, enroll in associate, baccalaureate and master’s programs through instructional locations across New York State and at several international sites, as well as in the College’s distance learning program. At ESC, faculty members serve as mentors to students and work with them in person in one-on-one, small group and residency formats, as well as in online and print-based distance formats. Drawing on strong interdisciplinary and generalist interests, ESC faculty members establish unique, collaborative relationships with students as they design individualized degree programs and pursue their academic studies.

Empire State College is a highly distributed organization and all faculty members are expected to be proficient in computer use. ESC’s internal network provides personal and other electronic forms of support for faculty. The College’s professional staff members offer both technical and instructional design support. For all of the positions advertised, preference will be given to candidates who have experience in, or demonstrated ability to teach in non-traditional ways and to work with diverse populations, including adult learners.

All of the openings are assistant professor, tenure-track positions, and are expected to be filled by Fall 2001. ESC faculty are expected to work with both undergraduate and graduate students. Ph.D. or other appropriate terminal degree is required for a tenure-track appointment. Salary and benefits are competitive.

For each position, submit a letter of application outlining subject areas of expertise and explain any experience or training. Send to: Application materials to: Dr. John Adams, Dean, SUNY ESC, Empire State College, 219 Walton Street, Syracuse, NY 13202.

Central New York Center

The Central New York Center is located in Syracuse and annually serves about 1,200 students. Preference to candidates with significant work background outside of academic. Application materials to: Dr. John Adams, Dean, SUNY ESC, Central New York Center, 219 Walton Street, Syracuse, NY 13202.

Geneese Valley Center

The Genesee Valley Center is located in Rochester and annually serves about 1,100 students. Doctorate broadly related to the field of social work, human services, and counseling required. Preference to candidates with expertise in human services and social work (policy, practice, and social justice) and human development, MSW and significant human service practice experience. Application materials to: Dr. Robert Milton, Dean, SUNY ESC, Genesee Valley Center, 1475 Winton Rd. North, Rochester, NY 14609-5803.

Hudson Valley Center

The Hudson Valley Center is located in the lower Hudson Valley area and annually serves about 1,200 students. Program materials to: Dr. Robert Trullinger, Dean, SUNY ESC, Hudson Valley Center, 200 North Central Avenue, Hartsdale, NY 10530-1999.

Long Island Center

The Long Island Center serves students at three locations: Old Westbury, Hauppauge and Riverhead, and annually enrolls about 1,500 students. LIC is seeking a faculty member for its Hauppauge unit. Preference to candidates who have a MSW with a concentration in policy and planning (in addition to a relevant doctorate) and expertise in such areas as program planning and problems, outcomes measurement in social programs, and public policy in America. Application materials to: Dr. Antonietta Nania, Dean, Long Island Center, SUNY ESC, 223 Store Hill Road, P.O. Box 130, Old Westbury, NY 11568.

For additional information about the College, please visit the College’s web site (www.escc.edu).

ESC an AA/EEO employer, is committed to excellence through diversity.

SELF RELIANCE FOUNDATION

Self Reliance Foundation, based in Washington, DC is national Hispanic-serving nonprofit that develops national media and outreach campaigns to help Hispanics gain access to vital information and community-based services. DIRECTOR OF ASSESSMENT SERVICES

SUNY Empire State College, Saratoga Springs, NY, seeks a Director of Assessment Services. The Director is the lead College administrator for prior learning assessment and individualized degree program review. Responsibilities include recommending policies; promoting best practices in local and College-wide assessment processes; overseeing relevant publications and communications (print and on-line); developing generic prior learning evaluations and other resources that support assessment services; maintaining relationships with relevant professional organizations; and training and leading regional assessment professionals. Priorities include developing and promoting on-line services and resources and supporting elements of ESC's student outcomes assessment agenda. The Director manages documentation of prior learning, credit awards and degree program approval and supervises staff and office operations. This is a new position designed to enhance the College's prior learning assessment and individualized program design services and resources.

ESC is a recognized leader in delivering innovative programs for students who enroll at locations across NYS and at a distance to the associate, baccalaureate and master's levels. The College features individualized study and program design, assessment of prior learning for college credit, and distance learning using educational technology to support its mission of access for adults to quality academic programs. Master's degree and significant academic experience in higher education, including in-depth experience with prior learning assessment theory, practice and policy, required. Appropriate doctoral degree; project management and supervisory experience; excellent communication skills; ability to function effectively in a collaborative, technology-rich, distributed environment; and the ability to provide leadership for experienced professionals in regional offices, preferred. Salary and benefits competitive. Review of applications begin after March 9 for appointment beginning on or after April 1, 2001. Letter of application and resume to: Dr. Duncan Ryan Mage, Office of Academic Affairs, SUNY ESC, One Union Avenue, Saratoga Springs, NY 12866. For additional information, visit the College's web site (www.esc.edu).

ESC an AA/EEO/IRCA/ADA employer, is committed to excellence through diversity.

Faculty Position

We are seeking a tenure track Assistant or Associate Professor in the Department of Counseling and Applied Psychology for fall 2001. The position requires a doctoral degree in Counseling Psychology (or related field) and ability to teach at the graduate level. Eligibility for licensure in Massachusetts as a Psychologist and/or Mental Health Counselor is necessary. The department has Master’s degree programs, specialist level (Certificate of Advanced Graduate Study) and an (APA-approved) doctoral program combined School/Counseling Psychology.

The position will be primarily involved in the Master of Science in Counseling Psychology degree program which offers four elective concentrations: forensic counseling; health psychology; child and adolescent counseling; and culture, gender and political psychology. The program has a commitment to an ecological perspective that integrates multicultural, gender and social-structural forces. The successful applicant will develop areas of teaching suited to Master level practice and the needs of the department. The candidate will be expected to have an active research program. She will also advise students, participate in program development, and department, university and community service. The person who fills this position would have the opportunity to participate in the doctoral program.

The University’s commitment to urban, student-centered and practice-oriented education, and excellence in applied research supports the department’s commitment to interdisciplinary, multicultural and ecological approaches.

We will begin reviewing applications in January and continue until the position is filled. Those interested in applying for the position should send a letter of interest, vita, names of three references whom we may contact. Additionally, a statement of position on Master level mental health practice, teaching philosophy and sample scholarship should be mailed to: Dr. Mary Ballow, Chair, Search Committee, Department of Counseling and Applied Educational Psychology, 203 Lake Hall, Northeastern University, Boston, MA 02115. ballow@neu.edu

AFFIRMATIVE ACTION—AN OBITUARY
AND A CALL TO ACTION

Affirmative action is in its death throes. The reasons vary from critic to critic, but most agree: it is time to scrap a well-mean but bungled attempt to promote workplace equality.

Its end closes a door that never opened more than a crack in the first place—the end of opportunities grudgingly offered and erratically maintained, the end of overt attempts, covertly sabotaged, to right old wrongs and to dictate tolerance in an intolerant nation.

In academe, the death of affirmative action may be most discussed and least felt. Real gains have been modest at best. Any concessions—a showcased faculty member here, a minority scholarship there, a recruiting goal, a minority studies course—have distracted attention from the bigger picture. Whatever the platitudes, academe perpetuates an environment of entrenched privilege and privileged bias.

Consider these case studies.

The Affirmative Action Hieree: An academic department secures funding for a permanent post paid first from affirmative action monies set up by the board of regents, then from the college budget. It recruits and hires a Hispanic male for a two-year tenure track. The hiree must do in two years what usually takes six. If he succeeds, he will be showcased; if he fails, the department retains the line and can rehire without being restricted to minority candidates.

The Affirmative Action Appointee: A dean resigns unexpectedly. A search committee, discovering that the college’s popular choice for interim dean is a senior faculty member whose style and philosophy differ dramatically from its own, invokes affirmative action to justify appointing a minority, mid-level professor of limited administrative experience but willing to learn/eager to please. After a year, the appointee is publicly discarded, and the college’s non-minority second-in-command assumes the position.

The Affirmative Action Program: In a largely minority state, a college announces an aggressive program to hire minority faculty to better reflect its constituency. At the start, the faculty is 12 percent minority, most clustered in the lower ranks. After 20 years, the faculty is 17 percent minority, with most still in the lower ranks. At that rate, it will take 160 years to match the state’s ethnic mix. Periodic announcements of new initiatives and progress help placate a minority-run state legislature and keep public monies flowing.

Affirmative action failed in all three situations, but always for the same reason. Affirmative action initiatives and rhetoric have been made to serve the political interests of those controlling the system—in academe, primarily the Anglo-Caucasian majority.

Are Anglo faculty and administrations wholly to blame? No. But affirmative action could have worked in academe if those in positions of power had believed in it and had wanted it to work!

What next? Open season on academic minorities? Not necessarily. The injunctions of the 1964 Civil Rights Act against discrimination remain in force. But instead of relying on the affirmative action system to enforce and watchdog progress, ethnic and racial minorities must act and react on their own behalf.

Our advice might shock some and appall others, but without a strong and even aggressive stance, minorities’ tenuous toehold in academe will be lost in the backlash.

Be prepared to exceed standards. It is not fair, but necessary. Be better as a teacher, researcher, and author. Campaign for positions and assignments that affect policy—search and curriculum committees, promotion and tenure boards. Speak up often and too loudly to be ignored. Be wary of assimilation. Forgetting who and where you are promotes vulnerability. Be thick-skinned enough to persevere but thin-skinned enough to recognize the slights and slurs that redflag bias and hidden agendas. Be ready to demand your rights when negotiation and reason fail. Bigotry is a bully that responds to nothing less than a no-holds-barred assault. Be willing to organize, protest, sue, and counter-sue.

The demise of affirmative action could mean the beginning of the end or the end of a false beginning for minorities. If the former, we can expect even fewer minority hires and promotions over the next decade. To ensure the latter, we must re-energize the civil rights movement, and use social, judicial, and political action to strive again for the equity that affirmative action promised but never delivered.

If interested in submitting a ¡Punto Final! “think piece,” please e-mail us at sloulook@aol.com for guidelines.

A Century of Innovation

Bonus Circulation to High School Guidance Counselors!
27th Annual Conference

American Association for Affirmative Action

March 28 to 31, 2001 • The Riviera Hotel • Las Vegas, Nevada

The most comprehensive and relevant conference program to date on affirmative action, access, equity, and diversity.

Featured Speakers:

Christopher Edley, Jr., Professor, Harvard University Law School
U. S. Civil Rights Commissioner, Not All Black and White

Antonia Hernández, President and General Counsel of MALDEF

Helen Zia, Author/journalist, Asian American Dreams

Andrew Imparato, President and CEO, American Association of People with Disabilities

Cherie Brown, Executive Director, National Coalition Building Institute

Faye Crosby, Psychology Professor, University of California, Santa Cruz, Sex, Race, and Merit

Joyce Tucker, Attorney/Consultant, Former Commissioner, EEOC

Alfred Ross, President, Institute for Democracy Studies

Beth Wilson, Attorney/Consultant, AAA Immediate Past President

Gary Siniscalco, Attorney and Partner, Orrick, Herrington, & Sutcliffe

America's Greatest Higher Education Invention

By Gustavo A. Mellander

This issue is dedicated to the nation's community colleges. They have been characterized by scholars as America's greatest 20th-century higher education invention. Our four-year colleges and universities were fashioned upon English and other European models. Degrees such as our Ph.D. were borrowed from Germany and France.

But the two-year college was born and bred in the United States. Today they are usually called community colleges and are an outgrowth of the idea inaugurated with the founding of Joliet Junior College in 1901. It is a movement that changed the educational map of the United States, if not the world, by opening the doors of higher education to millions who heretofore had been denied access to colleges and universities.

Alan Greenspan, the influential chair of the Federal Reserve Board, has time and time again complimented the movement. Recently he said, "The remarkable expansion in community colleges is something that has really had a major positive effect on our workforce."

Most Hispanic college graduates began at a community college. Presently, 55 percent of all community college students nationwide are Hispanics. No other ethnic group is so well and highly represented.

Dubbed by some as the People's College, community colleges have been trailblazers in arena after arena. They were the first to reach out to working adults, to those seeking career changes, and to those who needed direction as their personal lives changed, to women, and to minorities.

Today, the nation's 1,151 two-year degree-granting institutions—1004 public institutions and 147 independent—serve more than 104 million students. That student body comprises 44 percent of all U.S. undergraduates. Sixty-three percent attend part-time, and 58 percent are female.

Successful as they have been for 100 years, they are not resting on their record. One initiative for the next century is to broaden their learning network even further. As the nation's largest and most accessible sector of higher education, community colleges want to assume greater responsibility to train a workforce that is literate and technologically competent.

It has been suggested that in keeping with their community-based philosophy, they should also set a standard for good citizenship, help prepare leaders in and out of the classroom, and foster networks to address an ever more interconnected global society.

Community colleges have been urged to grow beyond their grass-roots service areas to build a network of learning that ensures the equal access and opportunity on which they were founded. Many are doing so.

"The Knowledge Net" report represents a national effort to assess the current state of the community college and to set a common agenda for the future. Co-sponsored by the American Association of Community Colleges and the Association of Community College Trustees, the report received major funding from the Kellogg Foundation.

White papers commissioned on critical issues, plus more than 40 public forums and nationwide focus groups, provided the basis for the report's findings. The more than 300 contributors included college administrators, faculty, staff, and trustees, as well as representatives of state and local governments and the business community.

The 59 resulting recommendations focus on three key areas: connections to the community, connections across a highly diverse student population, and connections within the educational community—both K-12 and postsecondary.

A few of the report's recommendations follow:

- View the preparation and development of the nation's workforce, and basic literacy, ESL, and remedial programs, as a primary part of their mission, and communicate this role to policy-makers.
- Collaborate with other providers of community services to reduce duplication and optimize service.
- Increase and expand programs for global understanding, including language and culture, that will help connect the various cultures in their own communities.

By their enthusiastic support of these recommendations, the nation's community colleges once again show themselves to be leaders in access and opportunity and in forward thinking.

For a complete copy of the "The Knowledge Net" report, call (202) 728-0200, ext. 205, or visit the AACC website at www.TheKnowledgeNet.org.

Dr. Mellander is a professor at George Mason University.
¡Hola!

Did you know that 60 percent of today's undergraduates attend more than one school, 30 percent attend more than two, and of the 60 percent, nearly half cross state lines in the process? (Percentages from U.S. Department of Education 1996 National Transcripts Data.) Community colleges are part of this equation, and they fill the bill for 21st-century students—many of whom have to rearrange their pursuit of higher education around jobs and family demands.

Articles in this issue applaud the vision and mission of community colleges and many of their accomplishments. The TOP 50 list highlights those schools which record the highest Hispanic enrollment and have awarded the most associate's degrees to Hispanics. Miami-Dade still reigns at No. 1. (Its comprehensive website alone should galvanize other community colleges to follow in its footsteps.)

Celebrating its 100th anniversary, the community college system has proven to offer more than an introduction to higher ed and an associate's. It is no longer the stepchild of postsecondary education, but rather an established, accredited, and respected path toward educational fulfillment. Community colleges offer not a means to an end for underachieving and undeserved individuals, but an accessible start of a journey toward individual enrichment and development. Amidst this click-of-a-mouse-speed era when everything is due yesterday, these two-year institutions continue to be magnets for students from all walks of life who seek convenient, flexible, affordable, and even mobile education. First-generation students, especially, stand to benefit.

Some ongoing challenges for community colleges include additional teaching space to accommodate the burgeoning enrollment, the development of technology partnerships, and the need to nurture ties with former alumni.

Our next issue will take a look at the ACT assessment, a linguistic phenomenon (Spanglish), a report on Color Gap Alliance for Equity, Harvard University, and more.

M. Sussert

Letters To HO

CUNY Alumnus Opines

I have just finished reading the cover story in your magazine on City University of New York ("Vision Spells Change for CUNY," Jan. 8). As a former undergraduate, and now a graduate student at CUNY, I was shocked at the minimal effort that went into creating the piece. I suspect that the author was put under serious restrictions as to what she was allowed to report on. The entire article put a shine on Herman Badillo. In reality, he has been a one-man wrecking crew at CUNY in terms of eroding students' rights and attempting to bring the institution back to the Stone Age of closed admissions. Where was the balance in terms of talking to students? To professors? You know, the ones who actually make CUNY run day in and day out. I am sure you would have had quite a different article if you would have chosen to talk to any of them.

And what of Benno C. Schmidt, Badillo's right-hand man? He was absolutely despised at Yale during his tenure there for being anti-student, and he is doing the same at CUNY, but you do not mention him once. If you are truly concerned about Latino issues, dig a lot deeper next time and you will not find a "vision" for CUNY to move forward, but a vision to stifle it. It is CUNY's many successes over the past 30 years in opening the doors for people of color that have made it a threat, not this ridiculous notion of an "Institution Adrift." These are code words for locking out communities of color, and you would do well to give the Latino community the real story about what is happening, unless, of course, you support such a move.

Sincerely,
Jorge Rodríguez
Bronx, N.Y.
AMERICA'S COMMUNITY COLLEGES

100

A Century of Innovation

BY MARILYN GILROY

It is the largest and most diverse segment of higher education, enrolling more than 55 million students in credit courses and employing close to 300,000 full-time and part-time faculty members. This is the nation's community college system, described by some as "the most democratic enterprise in higher education in the world," offering opportunity to anyone who has the desire to succeed, regardless of race, economic circumstances, or even past missteps.

The community college movement is 100 years old this year. Its centennial celebration is an occasion to examine achievements to date and consider the challenges that lie ahead.

Many believe that its greatest contribution has been to provide opportunities for those who, until lately, have not been accommodated by the higher education establishment. These students fell into various categories: some could not afford tuition and were not able to go to school on a full-time basis; others lacked adequate preparation for college but needed additional training to obtain a job; many did not know what they wanted to do with their lives; and some individuals had physical and/or learning disabilities. The local community colleges became the place that helped these students reach their potential.

But experts such as Richard Coley of the Educational Testing Service (ETS) say that despite a record of solid accomplishments providing vital education and essential services to citizens, the community college can secure its future only by strengthening its ability to do what it is has done so well in the past—adapting to the changing needs of the society it serves.

History—from One to 1,600...

The term community college refers to 1,600 diverse institutions that have evolved to include a variety of configurations. There is North Carolina's huge 58-campus system that serves more than 800,000 people in its credit and noncredit programs, while at the other end, there is the Community College of Vermont, which owns no buildings and has no full-time faculty. Instead, CCV rents classroom space in 12 centers throughout the state and relies heavily on distance learning.

How did community colleges become so disparate?

The first community college began in 1901 as an experimental postgraduate high school program in Joliet, Illinois. It was the brainchild of J. Stanley Brown, superintendent of Joliet Township High School, and William Rainey Harper, president of the University of Chicago. Initial enrollment was six students. Brown and Harper's innovation created a junior college that academically paralleled the first two years of a four-year college. It was designed to accommodate those who desired to remain within the community and still pursue a college education. In 1902, the board of trustees sanctioned the program and made postgraduate high school courses available on a tuition-free basis. In 1916, the board gave the institution its official name of Joliet Junior College. The following year, JJC was accredited, with an enrollment of 82.

Today the College serves more than 10,000 students in credit classes and 21,000 students in noncredit courses.

Like Joliet, many public community colleges were known as junior colleges. The prevalence of these institutions received a boost in the early 1900s when California passed legislation authorizing state and county support for junior college students, and provided for independent junior college districts that had their own boards, budgets, and procedures. At the
same time, Wisconsin legislated support for two-year colleges as an extension service of the University of Wisconsin.

By 1920, there were enough two-year colleges to spur the founding of the American Association of Junior Colleges. The term community college was popularized by Jesse Bogue, executive secretary of the AAJC, who used it in his 1950 book entitled *The Community College*. The name was further legitimized in a 1947 federal report, *Higher Education for American Democracy*, which called for the establishment of a network of public community colleges that would charge little or no tuition, serve as cultural centers, be comprehensive in their program offerings, and serve the area in which they were located. The widespread circulation of the report caused hundreds of existing and new public two-year colleges to include community in their names.

The current transformation of the community college name was completed in 1992 when AAJC members voted to drop the junior from its name and adopt the name American Association of Community Colleges.

The Association has enjoyed strong leaders, including the recently retired David Pierce, the first president of the Association to have graduated from a public community college. The current president is Dr. George R. Boggs, who became the ninth president of AACC last August.

**Through the Looking Glass**

The centennial celebration has been a catalyst for several reports that examine current community college students and programs and offer suggestions for the future.

One major study conducted by the American Association of Community Colleges and ACT Inc., *Races of the Future: A Portrait of America’s Community College Students*, is the first national effort to survey both credit and noncredit courses at 255 community colleges in 41 states. Remarkably, statistics show that 45 percent of all U.S. undergraduates are enrolled in community colleges. The average age of the student is 29; 64 percent attend part-time, and about one-third receive some form of financial aid.

More significantly, findings reveal that more than half of community college students are first-generation college-goers. Twenty-two percent of those surveyed reported household incomes of less than $20,000, and they were more likely to come from homes where English is not the primary language spoken. The report concludes that community colleges are the best and sometimes the only hope to ensure career and earning competitiveness for the least skilled and most economically disadvantaged.

The Institute of International Education also added to the snapshot of community college enrollment by issuing data showing that international students are registering at the colleges in record numbers. Enrollment has risen more than 46 percent since 1993—much faster than the overall 15 percent growth experienced at colleges in general. According to the report, these students enroll for the same reason as native U.S. students, "to get a good education at a lower cost." The result has been an internationalizing of two-year college campuses, bringing a diverse presence to urban, suburban, and rural colleges. Northern Virginia Community College has 3300 international students, and nearby Montgomery College, in Rockville, Maryland, reports that 13 percent of its 37,411 student body comes from overseas, with students representing 170 nations.

Audree Chase, coordinator of international services at AACC, recently stated, "In today’s world, community colleges are playing a vital role in fostering a globally competent citizenry. Not only does a community college afford great opportunity for an international student, it provides a global perspective to U.S. students who under normal circumstances might never interact with another culture."

It is evident from reviewing publications and websites at most community colleges that the international students are impacting the cultural and social life on campus. Clubs catering to Asian, Middle Eastern, Slavic, and other nationalities abound. They hold festivals, sponsor speakers, and publish newsletters to aid communication and understanding among students. International students have also become involved in governance, assuming leadership roles in student government and key roles in campus media outlets.

**R-E-S-P-E-C-T**

But though it seems that community colleges have secured their place in the American higher education system, the sector still struggles for the respect that its leaders feel it deserves. Officials at AACC will spend much time and energy this centennial year trying to polish the image of the community college, which they describe as a "much undervalued institution in this country."

To do this, AACC has developed ad campaigns to point out that notables such as Jeanne Kirkpatrick, H. Ross Perot, Walt Disney, Clint Eastwood, Jim Lehrer, Calvin Klein, Rita Mae Brown, Jackie Robinson, and Annette Bening all went to a community college.

AACC also shored up its political base by conducting a survey to determine how many of the members of the 105th Congress had a connection to community colleges. Connections were defined as having attended a community college, taught at a community college, or had a family member attend. Eighty-two of the 535 members of Congress—153 percent—had some direct connection with community colleges. There were 44 members of the 105th Congress who attended a community college, and nearly half of them
"The remarkable expansion in community colleges... is something which has really had a major positive effect on our workforce..."

Subsidized - 5.9%
Unsubsidized - 5.1%
PLUS - 1.2%

Average Tuition & Fees for Public and Independent Colleges:
$1704

Degrees & Certificates Annually:
More than 450,000 associate degrees
Nearly 200,000 two-year certificates

Training:
95% of businesses and organizations who use them would recommend community college workforce education and training programs.
Employers choose community college because they are convenient and cost effective, and offer customized training and quality instruction.

Revenue Sources: (Public Colleges)
42% - state funds
23% - tuition and fees
18% - local funds
5% - federal funds
10% - other

Governance: (Public Colleges)
More than 800 boards of trustees
6,000 board members
29 states - local boards
16 states - state boards
4 states - local/state boards

Graduate Income:
Average expected lifetime earnings for a graduate with an associate degree are more than $1 million, about $250,000 more than an individual with a high school diploma.

Information Technology:
More than 95% of community colleges are Internet connected. In recent years, average starting salary for graduates of IT programs has increased more than 24%.

Hot Jobs:
Community colleges offer programs in the most in-demand fields - from IT to allied health, from truck driving to mechanical engineering.

1000
A Century of Innovation

In 2001, community colleges celebrate their centennial year of service.
obtained the associate's degree. Some, such as Richard Neal from the 2nd District in Massachusetts, began his education journey at Holyoke Community College and returned years later to serve on its board of trustees.

Other aspects of the centennial campaign are aimed at reinforcing the concept that value and quality are part of a community college education.

According to AACC, the annual cost of attending a community college is roughly $1,500 per year, about one-tenth the cost of tuition and fees paid at independent four-year colleges. This is coupled with the fact that full-time faculty spend more hours in the community college classroom than they do in any other sector of higher education. A study by the Association of Governing Boards of Universities and Colleges showed that community college faculty members spent 72 percent of their time teaching while their colleagues at four-year schools spent 57 percent of their time teaching. Community colleges also spend more than 75 percent of their budgets directly on student-related expenditures.

To highlight the quality ingredient, AACC points to data showing that students who start at a two-year institution and transfer to a four-year institution do as well or better than do their counterparts who began there. In addition, transfer students who complete their bachelor's degree do as well in their careers as measured by earnings as do students who began at the four-year institutions.

Companies have also supported community colleges as a means of providing workforce education. Texas Instruments, Motorola, National Semiconductor, Intel, and AMD participate in programs at 80 community colleges for the training of semiconductor fabrication technicians. Microsoft has given a boost to the community college mission by contributing more than $7 million to fund information technology training at 25 schools.

One of the most unique partnerships has been formed in the state of Iowa, where community colleges are using innovative financing techniques to make training available. Fifteen community colleges have issued more than $326.5 million in tax-exempt and taxable bonds for job-training programs. This has resulted in 1,300 contracts with business and industry to train employees.

In the 21st century, there will probably be more pressure for education and lifelong learning than ever before. There is a further realization that individuals will probably have to enhance their skills throughout their working lives. And as is often the case, when government creates programs that require temporary training, such as welfare-to-work, officials turn to community colleges for assistance. On top of this, enrollments will be boosted by the HOPE scholarships, which some consider to be the most significant federal legislation since the G.I. Bill was passed 50 years ago.

**What About the Future?**

Last year, AACC and the Association of Community College Trustees released the results of a 21-month study to assess the current state of the community college and to set a common agenda for the next decade. Funding for the report came in part from the Kellogg Foundation while Robert Atwell, president emeritus of the American Council of Education, served as chair of the project.

The report's findings are based on input from more than 40 public forums, nationwide focus groups, and 390 contributors, including college administrators, faculty, staff, and trustees. There are 59 recommendations, some of which seem obvious, such as requiring computer literacy of all
students and faculty and addressing the needs of a global society. Other suggestions call for a renewed commitment to basic literacy, English-as-a-second-language, and remedial programs as essential parts of the community college mission because of their positive effects on the national economy and democracy.

But according to an ETS policy report, "The American Community College Turns 100," community colleges could be hurt by increasing pressure to educate students who are unprepared academically. They point to two large higher education systems, California State University and City University of New York, which are cutting back on remedial services and redirecting these students to community colleges. Critics of these policies have sounded warnings that such actions could "ghettoize community colleges." These concerns have been echoed in recent newspaper editorials and opinion pieces arguing that open admissions policies have led to a decline in curriculum standards and graduation requirements.

Nevertheless, AACC will use the centennial to bypass controversy, celebrate past successes, and anticipate the good things to come.

The Association is coordinating nationwide efforts to help community colleges celebrate the occasion. A generic ad campaign has been designed to highlight the community college as an institution providing access to all. Colleges can order a specially designed centennial flag for their campuses and take advantage of press kits, suggestions for media coverage, and other promotional strategies provided by AACC. In April, students representing the Phi Theta Kappa honor society will participate in a torch relay event that will finish in Chicago, the site of the American Association of Community College's annual convention.

The intense pride of the centennial year is reflected in the ad campaign that calls the community college "a uniquely American invention, founded on the ideals that reflect our nation at its best—equity and opportunity for all."

PAST AND PRESENT

BY JEFF SIMMONS

This year, the American Association of Community Colleges honors the 100th anniversary of the community college—marking a century in which the schools have helped more than 100 million people to learn and achieve personal goals.

The Association will hold a special ceremony at its annual meeting in Chicago in April, and will recognize centennial scholars, the highest-achieving students from 50 community colleges across the nation.

It will be a ceremony steeped in tradition and celebration. Since the first community college prototype opened its doors, the experiment has flourished: "They have evolved to an incredible degree," says Norma Kent, director of community relations for the Washington, D.C.-based association. "When the first community college, Joliet Junior College, first formed, it was housed in a high school, and there were only a few rooms for classes.

"Over time, we have grown to become the largest sector of all of higher education. We educate almost half of all undergraduates. We are particularly important for those students who might not have access otherwise."

Joliet is still around, in Joliet, Ill., and considered the oldest continuously existing public two-year college in the nation. From its struggling roots have grown dozens, then hundreds, and now more than 1,500 public and independent community colleges.

There is now at least one community college in every state, and the future holds promise of more, as new ones with carefully crafted identities crop up and existing ones design new annexes.

"They are an entryway to a baccalaureate education," says Kenneth Sherrill, a political science professor at Hunter College in Manhattan, N.Y. "They offer a whole range of career and professional programs and continuing education, services to communities and businesses, citizenship education."

In this new century, the community college faces daunting tasks to overcome gender, racial, Department of Education—points out where colleges began, where they stand, and where they are going.

Within its 160 pages, charts detail the significant issues that impact the structure and survival of community colleges: funding, enrollment, links to students and communities, staffing and retirements, and technology. It stresses that to comprehend the community college of the present and future, educators must first understand its origins.

"The cornerstone of the community college philosophy is access," Kent says. "We work very hard so that everyone who wants to go to higher education can do so, regardless of income."

Early History

Emerging at the start of the 20th century, "junior" colleges served as bridges between high schools and traditional four-year colleges and universities. It was maintained that the first two years of college could be handled by secondary schools.

But many students were financially strapped, so the schools became the ticket to opportunity for many young people who otherwise would not have been able to attend.

On the heels of Joliet came a growth spurt in California, when state legislators earmarked funding for high school programs that offered the first two years of college coursework. By 1921, the state maintained the largest system—21 percent of the nation's public junior colleges, most of them embracing liberal arts studies.

The focus of such colleges evolved as well. The Great Depression of the 1930s prompted the

schools to put forth job-training programs. After World War II, there was a drive for more higher education options. In 1948, for instance, the Truman Commission recommended establishing a series of public community-based colleges that would address local needs.

With the 1960s came a giant leap forward. Community colleges evolved into a nationwide network with the opening of 457 public community colleges—more than had ever been opened before. Coming-of-age baby boomers packed the classrooms as parents accepted college as a necessity. Opposition to the Vietnam War spurred participation in the classroom. Between 1960 and 1970, at least one community college opened its doors each week. The report's authors note too that from 1965 to 1975, community college enrollment grew 350 percent. That surge took its toll on private schools, from which many parents removed their kids so they might attend instead the low-cost to no-cost community colleges. Many eventually converted from two-year to four-year colleges and developed heady fundraising efforts to make ends meet.

During the late 1960s and early 1970s, the tribal college came into being—designed initially to perpetuate Native American cultures in hopes of recruiting college-educated Native Americans to return to reservations to teach. There are 31 today. Those colleges primarily have offered associate degrees as their highest degrees.

Open admissions and low tuition remain common core goals of community colleges, but each has embraced its own mission. Colleges have their own trustees, either elected or appointed, who establish their mission statements and direction.

Enrollment steadily grew in the 1980s and '90s. Tightened purse strings in the last decade have sparked tuition increases, though the costs are still well below those of private and senior colleges.

Outreach efforts became a central part of what a community college was all about—the ability to forge ties with surrounding neighborhoods and weave them into the fabric of college life. Colleges forged partnerships with businesses and groups, and made their space available for meetings and programs.

College Prep

Over the last decade changes, fueled by funding limitations and by attacks on open admissions policies, such as those of New York City, have altered who attends junior and senior colleges and there has been much focus on the preparation needed for college.

Community colleges require students to take basic computation, composition, and reading

SOURCE: National Center for Education Statistics, 1999
classes. They must meet prerequisites and requirements in order to achieve an associate's degree.

Steep numbers of entering students require remedial assistance, but, the authors note, decisions about remedial education have threatened to erode open admissions policies.

During the '90s, greater numbers of students than ever before required basic academic instruction. In Texas in 1997, 235,545 community college students were in remedial courses.

Elected officials and top school administrators began to question how many times, for example, a student could repeat a remedial course. That became a focal point of debate on the campus of the new century.

Despite those issues, the numbers keep on growing. Community colleges graduate more than half the nation's undergraduates: 93 million people took credit courses at community colleges during the 1996-97 academic year.

The persuasive factors tend to be low tuition, convenient location, open admissions, and comprehensive course offerings. Many colleges also have fostered transfer agreements with bachelor’s institutions, by which the senior schools accept community college credits toward four-year degree requirements, so spending the initial two years at a community college becomes a cost-cutting measure.

Another five million took noncredit courses and/or, classes in career development, or honed technical or vocational skills. The report focuses on credit enrollment at community colleges simply because there is no accurate national data on noncredit activity.

The authors attribute much of the continued growth to newly built institutions and to a change in structure of several institutions. A number converted from technical institutions to regionally accredited colleges that award degrees.

As of 1998, there were 1,132 community colleges. But when the statisticians included branches, that number swelled to 1,600. California, which embraced junior colleges early on, is still at the fore, with 118 community colleges. The closest to that is Texas, with 75; then New York, with 61; North Carolina, with 60; and Illinois, with 56.

Enrollment has continued to climb and is predicted to grow, although it has dipped somewhat in recent years.

Independent community college enrollment fell over the last six years from 243,608 to 241,153, a 1.2 percent drop—the largest decrease of any category of institution.

Enrollment in public four-year colleges also dropped slightly over the last six years, and over the last three-and-a-half decades did not grow as dramatically as in community colleges.

Community colleges enroll more part-time than full-time students because the students are more likely to be combining work and family responsibilities. Currently, more than 80 percent of community college students balance their studies with full- or part-time work.

Frequency of attendance has remained largely the same in the last decade. In 1991, for instance, 64.7 percent of students enrolled at public community colleges were part-time. For 1997, 64.0 percent.

Demographics

Women continue to enroll in greater numbers than men, 57.8 percent in 1997. The authors note that for women entering or re-entering the workforce, the proximity of a community college often eases the transition.

It was always the case during the 1990s, says Kent Phillippe, the Association's senior research associate. But he points out, "The higher you go up in education, the more the trend reverses. By the time you get to doctoral programs, students are much more likely to be male than female."

Most community college students—40 percent—are 25 years old or older, 32 percent are 30 or older. Thirty-six percent are 18 to 22 years old, and 13 percent, 22 to 24 years old. But the number of part-time students under age 18 increased by 206
percent between 1993 and 1997. The authors note that this reflects an increase in the number of students attending high school and community college courses at the same time.

The college campus also continues to increase in diversity, though often it still lags behind the demographics of the population. African American, Hispanic, and other traditionally minority students make up 30 percent of community college enrollments nationally. At some urban campuses, half of the students belong to one minority group or another. Minority enrollment at community colleges increased from 25 percent in 1992 to 30 percent in 1997.

Hispanics

Students of Hispanic origin are the fastest-growing racial or ethnic group at community colleges, and most identify as Mexican, Mexican American, or Chicano.

In 1992, Hispanics accounted for 9.3 percent of enrollment, and in 1997, 11.8. They were 36.8 percent of the total minority enrollment in 1992, and 39.3 in 1997. In hard numbers, 525,540 Hispanic-Identified students were enrolled in the fall of 1992, and 637,813, in the fall of 1997.

The report details that during 1995-96, 62.5 percent of Hispanic students at community colleges identified as Mexican American, Mexican, or Chicano, more than at public four-year, independent, or private institutions.

Trailing that category was one in which students identified as being of “some other Hispanic origin,” at 26 percent. Six-and-a-half percent identified as being Puerto Rican, and 32 percent, as Cuban.

Seven percent of students attending community colleges that year said Spanish was the primary language spoken at home. That was second to English, at 875 percent.

During the 1996-97 academic year, community colleges conferred nine percent—or 41,532—of the associate's degrees to African Americans. Another 33,327—or seven percent—went to those of Hispanic origin, while 74 percent—or 357,585—went to those who were White.

Proximity, as the authors noted, continues to be a deciding factor. Ninety-six percent of the community college students attend a campus within their home state right after high school.

Over the years, there has been an increasing demand placed on community colleges to serve greater numbers of students with disabilities. A number of campuses have expanded services to accommodate those with mild to severe disabilities. From 1992 to 1995, the percent continued to climb, from 35 to 36 percent. “Colleges by their very nature have very open access, and they are used to dealing with a wide variety of students and diverse populations,” Phillippe says.

Curriculum and Faculty

Societal demands, inflation, and changing demographics of the population all tend to influence the survival and direction of the community college. In recent years, the Bureau of Labor Statistics has forecast a wide range of opportunities for those involved in computer technologies, healthcare services, management, and public relations. Overall, the number of occupations requiring at least an associate's degree was expected to
rise to more than 20 percent by 2006.

In 1996-97, 170,000 students earned certificates, and more than 450,000 students attained associate's degrees. Community colleges confer nearly all of the associate's degrees awarded each year.

The majority, 167,448, were enrolled in liberal arts, general studies, or humanities programs during that academic year. Trailing that were the 76,848 in the health professions and related sciences, 71,766 in business management and administrative services, and 20,208 in engineering-related technologies.

Across the board, top administrators in higher education and elected officials have lamented the struggle in recent years to diversify the ranks of not only administration but also faculty and staff on campus. Community colleges have been no exception.

During the '90s, there were countless retirements among faculty and administration, and with the loss of wisdom and experience came a burst of fresh idealism and ideas. Many colleges have viewed the turnover as an opportunity to embrace more inclusive staffs and to increase the ranks of Hispanics, African Americans, and women.

Women represented roughly one-third of all community college presidents hired during the 1997-98 school year. Women comprise 18 percent of all community college chief executives overall.

"I think that it's a positive thing...any time you try to infuse a certain population to administrative positions," Phillippe says, adding, "I would like to see it happen more quickly. I would like to see the population reflecting the students the institutions are serving, but it's a trend that's going to take some time."

The population of community college presidents has become slightly more diverse, as more women, Hispanics, and African Americans step into leadership roles. In 1999, 89 percent of presidents were male, and 11 percent female. By 1996, 82 percent were male, and 18 percent were female.

In 1999, 11 percent of college presidents were minority, and 89 percent were White. In 1996, 14 percent were minority, and 86 percent were White. Interestingly, the median salary during the 1995-96 academic year for those in the chief leadership positions was higher for minorities than Whites. In that year, the median administrator's salary for a CEO or equivalent was $133,636 for a minority and $105,227 for a non-minority, and $110,192 for men overall and $96,500 for women overall.

Phillippe explains that geography plays a role. "The probability is that the Hispanic CEO is going to be at a larger urban institution."

As the salary gaps between full-timers teaching at two- and four-year campuses have narrowed, community colleges have moved toward bringing more adjuncts into the fold. They are paid much less than tenure or non-tenure-track faculty.

Often, adjuncts have other income sources, and are hired on a course-by-course, per-semester basis. The authors note that this has its drawbacks: many are hired weekly for classes that begin, so there is little planning. Adjuncts aren't given proper pedagogical assistance, and there is less face-to-face time with students. Full-timers worked at least 496 hours per week in 1993, whereas part-timers averaged 304 hours weekly.

During 1997-98, there were 92,532 full-time faculty members at community colleges, and 76,609 part-time. The reverse holds when you look at four-year colleges. Two-thirds of faculty members at public community colleges are part-time employees, and three-fourths of faculty members at independent community colleges are full-time employees.

Still, some say the community campuses provide better opportunities. Diana Castillo, operations officer at Southeast College, within the Houston Community College system, says the community college campus provides more individualized attention.

"It has smaller classrooms and a caring faculty, and there are more mentoring opportunities," she says. "Students need that in order to feel they are part of a system. I would say students have a good opportunity to be in true partnership with their instructors and take responsibility for their own education."

Over the last few years, more community colleges have opened up their doors not just to students but to neighborhoods as well. Local theater companies have been invited to use campus theaters, and civic groups have provided lectures there.

Urban campuses now offer special services on everything from senior citizen outreach to AIDS prevention to economic development. In increasing numbers, educators are extending their reach into area high schools to spark interest in higher education.

School officials are more likely to provide childcare services on campus. And some schools have made themselves launching pads for welfare reform efforts.

Community colleges also have crossed oceans to forge ties. International outreach has flourished. Most—133 colleges in 1996—have forged ties with schools in Japan. In that year, 131 schools worked with those in the United Kingdom, 98 with Mexico, and 38 with Spain.

Possibly as a result, international enrollment has grown at community colleges. Total international enrollment at the Miami-Dade Community College system was up to 19,595 in 1996. At Glendale Community College in Arizona, it was at 15,450 that year, and at Northern Virginia Community College, enrollment climbed to 10,247.

The federal government is now the primary source of financial aid, and more than 30 percent of all Pell Grants, federally funded grants based on financial need, are awarded to community college students. Federal student loans also increased in size and number during the past decade.

Salaries and benefits remain the largest part of a community college's budget, eating up 30 percent of expenditures during the 1996-97 academic year.

Recent financial cutbacks have forced colleges to collaborate more and more with other institutions and corporations, especially to incorporate new technology on their campuses.

The authors note that tuition has increased to make up for funds lost from various governmental agencies, and due to voter demands for tax relief. Direct federal appropriations dropped since 1980 replaced by federal grants and contracts.

During 1976-77, the report places the average community college tuition and fees at $283. During 1997-98, it was at $1,318—a 365 percent increase. Tuition and fees at four-year independent colleges rose 428 percent, from $2,534 to $13,932, and at four-year public colleges, and up 404 percent, from $617 to $3,100.

Nevertheless, enrollment is predicted to rise. In California, where 19 million students attended 106 public community colleges in 1997, enrollments are expected to mushroom by 50 percent by 2005. The prediction is that the Hispanic and African American populations on campus will rise by even greater percentages.

The number of high school graduates will increase at least through 2008, when there will be 3 million. Community colleges will confer more associate's degrees, which will climb to 11 percent by the 2007-08 academic year to roughly 75,000.

The authors stress that technology is the "driving force" behind the newest test of a community college's agility. Cost might be an issue initially, but as the computer becomes as omnipresent as the telephone, colleges will advance more toward distance learning and other services to help people in remote areas.

"They will change very dramatically," Phillippe says. "Colleges have become much more diverse in their mission, the populations they serve. Their role is to prepare students to transfer and to prepare them for current and future jobs, to do better in the workforce, and to change the workforce."

The authors note that the coming years will require community colleges to attract and retain technology experts, to build a better sense of responsibility in their neighborhoods, and to invest in capital construction. "We think the electronic age will be a very exciting time for community colleges," adds Norma Kent. "They're already moving in those directions...as we make sure our workforce is the best in the country and the world."

Borough of Manhattan Community College

Out of the College and INTO the Community

BY ROGER A. DEITZ

Borough of Manhattan Community College President Antonio Pérez says that when he became president of BMCC in 1995, "it was an exciting moment in my life. I am even more excited today because of the progress we have made—and continue to make—toward achieving our goal of making BMCC the premiere community college in the country." Then he asks and answers, "How are we doing this? It is a tremendous group effort, with faculty, staff, administrators, students, and the community working together to make things happen at the College and in the Borough of Manhattan."

President Pérez says that one of his goals for the College is "that it be not just the only community college in Manhattan, but the community college for all of Manhattan." The words community college are stressed. The president notes that the institution has established a number of initiatives in neighborhoods outside of its own geographic home community of Tribeca. These include the Uptown Initiative at Theresa Towers in Harlem, BMCC's continuing education programs at George Washington High School in Washington Heights, and an intensive language-immersion program in Chinatown. "Each of these," says Pérez, "is a sterling example of how BMCC is taking higher education out of the college and into the community."

Meanwhile, on its home turf of downtown Manhattan, BMCC formed a partnership with Salomon Smith Barney, Inc., to benefit more than 100 of the company's employees as they work toward earning their associate's degrees in business-related fields at the College. Also, the Institute for Business Trends Analysis at BMCC provides essential data and information to the Manhattan business community, while the board of directors of the BMCC Fund, Inc., raises valuable scholarship money for the school's students and provides an essential bridge between the College and downtown businesses.

Borough of Manhattan Community College was founded in 1963 and opened in 1964. BMCC's physical expansion mirrors its growth from a small, decentralized institution to the largest community college in the City University of New York (CUNY) system. When it began operations in 1964, the College rented two floors of commercial space to accommodate its student body of fewer than 500. By 1974, enrollment had increased to more than six thousand students, and BMCC

had expanded to seven sites scattered throughout midtown Manhattan. In January of 1983, the current self-contained campus was constructed, situated on more than four acres in lower Manhattan. BMCC's main building spans four blocks, and its length is the equivalent of the Empire State Building if lying on its side and minus its tower.

The structure contains classrooms, seminar rooms, laboratories, three lecture halls, a modern library, and three theaters, the largest of which seats one thousand. The building houses a collegiate-sized swimming pool, a fitness center, a dance studio, and a large gymnasium. The College also contains a fully staffed early childhood center; a distance learning lab; a media center with state-of-the-art television and audio studios, multimedia labs and post-production facilities; two dining facilities; and a bookstore.

BMCC established the only nationally accredited paramedic program in New York State. The BMCC Chess Team has won three national championships in the last six years. The Shirley Fitenman Art Gallery was created to enrich cultural life in downtown Manhattan. BMCC's Math Team has won major competitions against other two-year colleges and, in 1998, was ranked ninth in the country. The Institute for Business Trends Analysis was created to provide valuable data to the downtown business community.

BMCC truly reflects the best of the neighborhood in which it exists: the culture of Tribeca, the vibrancy of Wall Street, the inspiration of the World Trade Center, and the promise of The Statue of Liberty. It is a college rich in diversity, alive with ideas and innova-
Minority Fellowship Program this past fall term. President Pérez explains: "Our goal is to implement a new initiative to attract more minority scholars, mentor them, and promote them to faculty positions when appropriate openings become available." BMCC awards more associate's degrees to minority students than any other college in the Northeast, yet Pérez notes that, as yet, "The BMCC faculty does not reflect the full diversity of our student body." The Minority Fellowship Program is an answer to this situation. It recruits minority doctoral students and recent doctors as teaching fellows. Fellows must be either recently graduated doctors with limited teaching experience or doctoral candidates in good academic standing who have completed all of their coursework. They must be members of minority groups underrepresented in the profession. The program lasts for one academic year, during which the fellow teaches two courses a semester. A senior member of the faculty works closely with the fellow as a mentor, and the fellow meets regularly each week with his or her mentor for guidance and for a discussion of the fellow's teaching and research work. In addition, the fellow spends some time each week participating in professional development activities. He or she is also invited to participate in student academic and extra-curricular activities. "It is our hope that the fellow will stay at BMCC and join the ranks of the faculty," Dr. Pérez points out, adding that "After they complete the program, fellows will be given an opportunity to interview for appropriate faculty positions at BMCC when they become available. We also help them find faculty positions in other CUNY community colleges."

Glenda Carpio was selected as the first minority fellow. Born in Guatemala, she came to the United States when she was 12. Carpio was graduated from Vassar College. She is writing her dissertation on "interpretations of the slave experience in contemporary fiction and art." She taught two courses this past inaugural semester at BMCC and is working closely with her mentor, Professor Nancy McClure. Carpio appreciates the opportunity she got at BMCC, and learned much from the teaching experience.

"The students at BMCC bring a lot of lived experience to the course, which really makes the text flourish," she observes. Carpio recalls that in one class, she discussed an essay called "Green Card," which concerns changes in people as a result of immigration. "We have students from Poland, Antigua, Ethiopia, and Trinidad, among other places, in the class," she says. "It's important for them to see that their experience is particular—but also part of a larger narrative. It's like building a mosaic."

President Pérez promises that "a quality education to all regardless of his or her background is paramount."

"In order to be most effective in fulfilling that aspect of our mission," he says, "the College has demonstrated creativity, ingenuity, and innovation in developing new courses and programs, in locating and securing resources, and in providing our students with the best facilities and the latest technologies. Our new degree program in multimedia programming and design is a good example of that. The sense of innovation that was used in crafting this worthwhile curriculum is what sets BMCC apart as a place where great things can happen."

The president suggests that there are other innovations afoot. Fiterman Hall, a new facility, will provide much-needed teaching and administrative space. The Hall will also house a 400-workstation virtual library, offering faculty, staff, students, and the community 24-hour-a-day access to the vast resources of the College, The City University of New York, and the Internet. Another big part of this facility is the New York TeleMedia Accelerator, a partnership dedicated to fostering research in digital video.

A pioneering public-private venture in business development, the TeleMedia Accelerator opened last September at BMCC, providing a "hothouse environment" for startup companies developing digital broadband content, the technologies that enable the delivery of that content, and the services that facilitate e-commerce around broadband content. Investors include the New York City Investment Fund, Bear Stearns Constellation Ventures, Psilos Group, Global Accelerator, and BMCC.

Unlike other business incubators located on university campuses, the TeleMedia Accelerator represents the first public-private partnership in this arena. It occupies a 22,000 square-foot, state-of-the-art facility on the BMCC campus, serving as a pilot site for a CUNY-based network that will eventually comprise five campuses. This marks the first attempt anywhere in the world to build a network of interrelated accelerators that provide young, technology-based companies with space, seed funding, and other services to speed their growth.

Another mark of excellence, BMCC's Study Abroad program, launched in 1973, is the most comprehensive of any community college in The City University of New York. The program is a four-week or more course of study in which students travel to locations such as Senegal, Italy, and Puerto Rico. While there, they not only explore the history and culture but additional subjects that might relate to their own course of study or interests. The course is intensive and challenging. An average day consists of twelve and more hours of study and travel: attending lectures by professors at affiliated colleges and universities, undertaking research related to course assignments, studying and participating in local customs and traditions, interacting with local residents, and discussing their experiences with professors and fellow students.
A Glance at Some of the Community Colleges

BY MARI CARMEN SARRACENT

The community college system has long been the higher education entry point for many Americans. Over the years, enrollment and graduates have increased exponentially, the former due especially to the “baby boom echo,” which refers to the offspring of the baby boomers.

Many first-generation college students and individuals in the 18 to 24 age group seeking affordable and accessible education attend community colleges. Another expanding cohort includes people seeking enrichment programs and job training, many of whom already have bachelor’s degrees. Women continue to be the dominant gender in two-year colleges with regard to enrollment and the number of associate’s degrees granted.

Allen Cissell, senior education specialist of the Community College Liaison Office in the U.S. Department of Education, said that, overall, community colleges expect a five to 10 percent enrollment increase in the next few years.

Cissell added, “Community colleges have been extraordinary in bringing in first-time students and American minorities for all sorts of reasons. These institutions are close to home, accessible, students can take classes while they’re working, course offerings are adaptable to different kinds of schedules, etc.”

In conversations with community college presidents, Cissell also has learned that “as high as 15 to 20 percent of students who already have bachelor’s degrees are attending community colleges in order to learn to use computers and upgrade their skills.”

Some Stats

According to U.S. Department of Education data based on 1998-99, only four of the TOP 50 community colleges awarding the most associate’s degrees to Hispanics graduated more Hispanic men than Hispanic women.

Florida’s Miami-Dade Community College once again topped the TOP 50 list on both counts—most associate’s degrees conferred to Hispanics and for Hispanic enrollment, with a grand total of 29,780 Hispanic students enrolled in 1999. Of 4,754 associate’s conferred, 2,693 went to Hispanics. Where at most schools women outnumber men graduates, at Miami-Dade, Latino men and women were relatively close—1,085 and 1,608 respectively.

California is home to 22 of the TOP 50 com-

Source: National Center for Education Statistics 1999c
munity colleges awarding the most associate's degrees to Hispanics—starting with East Los Angeles College, which conferred 564 out of 823 degrees to Hispanics. The state is followed by Texas and New York (9 and 8 schools respectively), Florida (5), Arizona (3), in New Mexico—New Mexico State University—Don Ána, in Virginia—Northern Virginia Community College, and in New Jersey—Berkeley College.

Miami-Dade in Florida and El Paso Community College in Texas have consistently ranked No. 1 and 2 in the number of associates awarded to Hispanics and enrollment. El Paso reported 15,553 Hispanic students in 1999—9614 women and 5,939 men.

Five City University of New York institutions are among the Top 50. CUNY LaGuardia Community College is in the lead, granting 571 associate's to Hispanics out of 1,492. CUNY Borough of Manhattan Community College reported 511 out of 1,902 associate's conferred. CUNY Bronx Community College granted 381 associate's degrees to Hispanics out of 884, and CUNY Hostos Community awarded 323 degrees out of 486.

Some of the Top Schools

The Top 50 list alone adds up to more than 300,000 Hispanic students enrolled in community colleges, and the number continues to eclipse previous totals. Measurable staff increases are also down the pike.

Overall, noted Cissell, there is a high percentage of part-time faculty employed at community colleges nationwide. Consequently, the faculty development issue is a priority on the agendas of most community college presidents, he said. "Sixty-five percent of all community college faculty are part-time. Unfortunately, there is difficulty in keeping those people as they are paid on a much lower scale than full-time faculty."

"The goal for community colleges is to train part-time faculty to teach a more diverse student body, and to retain high quality part-time faculty, particularly in the technology areas," Cissell adds. Ultimately, part-time faculty members would move into full-time teaching positions.

As of Fall 2000, Miami-Dade Community College's Factbook reported 2,296 full-time employees, 65 percent of whom are ethnic minorities, and 56 percent female. Part-time employees total 3,371. Hispanics account for 40 percent of all full-time employees. Seventy-one percent of full-time faculty have earned a master's degree; 21 percent have doctorates. Hispanic faculty totaled 173.

Miami-Dade keeps a close eye on transfer rates. It most recently tracked its 1996-97 graduates. Within a year after graduation, of the Associate in Science graduates, 87 percent were in jobs related to their degrees, and nine percent of these graduates continued their education. Thirty-two percent of Associate of Arts degree recipients furthered their education, and 32 percent were employed in fields related to their degrees. Miami-Dade also reported that graduates who enrolled in the State University System had satisfactory upper-division GPAs during their first year.

LaGuardia Community College ranks No. 3, in granting the most associate's to Hispanics. Its institutional profile for 1999, based on Fall 1998 data, shows that there were 246 full-time faculty members on board. Tenured professors numbered 91, and tenured associate professors totaled 31. Hispanic faculty totaled 23—11 females and 12 males. Part-time faculty accounted for 416—186 females and 230 males. Forty-seven percent of full-time faculty has earned a doctorate, 49 percent earned a master's, and four percent bachelor's.

While starting salaries for LaGuardia graduates have steadily increased since 1994, a large number are enrolling in senior colleges. According to the College, about 56 percent of its 1997-98 graduates reported having continued

---

**Percentage of Community College Enrollment Aged 40 or Older by Enrollment Status and Type of Institution: 1993, 1995, 1997**

their education within six months of graduation. Almost 72 percent of these students said they had planned to attend a four-year college after graduation, and nine percent said they had decided on additional education subsequent to enrolling at LaGuardia. Many graduates are both working and attending a four-year institution.

An enrollment profile of LaGuardia students from Fall 1994 to Fall 1998 indicates that nearly six out of 10 new students are entering degree programs, and have not been to college before. In 1994, first-generation students accounted for 63 percent of enrollment, transfer students totaled 17 percent, and non-degree candidates, 20 percent. In 1998, the percentages shifted somewhat, with non-degrees increasing to 24 percent and first-time students declining to 59 percent.

South Texas Community College ranked No. 32 in degrees awarded to Hispanics and No. 4 in the number of Hispanic enrollees. Thirteen percent of its students in the 1998-99 academic year transferred to UTSA in the fall of '99 from the College's various divisions, including business, math and science, liberal arts and social sciences, nursing and allied health, and technology. Based on the results from STCC's 2000 graduate follow-up survey, 59 percent are working in their chosen field of study. Twenty-nine percent are enrolled in college, and not working in their major field, or not working; seven percent are working out of their field and not enrolled in college; four percent are seeking work and not enrolled in college; and, lastly, one percent are not working and not seeking work and not enrolled in a college.

STCC staff totaled 520, of whom 247 are Hispanic. Full-time faculty number 282, part-time number 238.

Down the Line

Among the activities that the Community College Liaison Office conducts are multi-agency funding workshops at selected community colleges around the country. "We take program officers from various government agencies that have programs that would be of interest to community colleges. As a result, [the schools] develop programs in the technology area and create 21st-century learning centers."

As we go to press, the Community College Liaison Office awaits a new political headship. But Cissell adds that the new administration seems to support the Office's history and activities. "There are positive signs. Secretary of Education Rod Paige understands the nature of community colleges and the mission. And the associations in town will help to keep community colleges at the forefront in policy. You just don't ignore institutions that enroll 48 percent of America's students. It's also the 100th anniversary of community colleges, so they will get a lot of visibility."

While many students are successfully completing their "first" round in higher education at community colleges, the challenge to increase the transfer rate to four-year institutions and graduation rates, retain and train part-time faculty, grow the number of full-time faculty, expand and enrich the curriculum, and narrow the technology gap are objectives that are keeping college administrators diligently involved.

Meanwhile, countries abroad are trying to emulate the U.S. community college model. Cissell stated, "Other countries are looking to the U.S. as a model for development and training. There are 60 community college startups in China, we've done some work in South Africa, and there is a large partnership between the Ministry of Education of Brazil and the U.S. Department of Education."

Commencement is ultimately what the students and postsecondary institutions aim for. Longitudinal research available reveals that community colleges are a good avenue for achieving this end. Clifford Adelman, senior research analyst, U.S. Department of Education, provided some statistics comparing two cohorts—one group tracked traditional-age students from 1972-84, and the second group included students from 1982-93 Of all the students in the first group who earned more than 10 credits from a community college and formally transferred to a four-year institution, 71 percent earned a bachelor's degree by age 30. Of the second group, those students who started at a four-year institution, 65 percent earned a B.A. by age thirty. Adelman emphasized, "If done the right way, community colleges can produce a higher percentage of graduates."

Teaching and Learning: Student Tutors Take on Both

Innovative Program at Columbia Basin College

BY VIRGINIA SLIMAN

Take a two-year state grant and combine it with several industrious, concerned community college students. Place them in a public school system with a large Hispanic population, and the result is a marriage between community and college that benefits both.

Washington state's innovative 10-year-old Community Service Projects program has provided state work-study resources for a number of community programs, including the Bilingual Reading Outreach Program, a two-year pilot project that placed Columbia Basin College students in local elementary schools as Spanish reading tutors.

The Community Service Projects' goal is to provide opportunities for work/study-eligible students to serve the community while they earn money and gain relevant experience.

And CBC students have taken advantage of the opportunity.

When Veronica Partida was a first and second grader, she went to special classes to get one-on-one tutoring in reading. Veronica spent her first two years of college tutoring first and second graders at Captain Grey Elementary School in Pasco, Wash., in the very thing she herself needed help with not so long ago. She plans to become an elementary school teacher.

"I hadn't really connected my childhood experience with the tutoring I've done until recently," Partida said. "In a way, I kind of think this was meant to be. I've experienced both ends of it."

College student/tutor Shannon McFadden has also seen "both ends of it," but in a different way. "I used to be scared of the ESL students when I was in grade school," she said. "Now, I think those kids kind of get ignored and set on the sidelines. People forget about them." McFadden said that she sometimes got stares from people last year when she walked down the halls of Pasco's Emerson Elementary with a group of bilingual students.

All elementary schools in the program used the English-immersion approach, according to CBC Spanish instructor and former bilingual program coordinator Antonio Cruz. But even though classes are taught in English, some students are monolingual, speaking only Spanish.

So the College's student tutors needed to be bilingual—speaking, reading, and writing Spanish—Cruz said, although they didn't necessarily have to be Hispanic. "We've had Anglo tutors as well as African American and Asian tutors in the past."

Spanish language skills are important because the College tutors usually worked one-on-one with students who had remedial language deficiencies.

"The kids I work with have their situations stacked against them."

MICAH FLAJOLE, CBC STUDENT, HELPS A STUDENT WITH A MATH PROBLEM IN MRS. ROBERT'S FOURTH AND FIFTH GRADE CLASS AT MARK TWAIN ELEMENTARY SCHOOL IN PASCO, WASHINGTON.
For student tutors, this usually meant reading to a child in Spanish and then having the child read to the tutor in Spanish. "We talked about the story ahead of time and made guesses about what the story line would be," said CBC student tutor Micah Flaiole. "After we read, I asked them comprehension questions."

The tutoring benefited both parties. "We saw improvements in the kids I worked with frequently," Flaiole said. "I had been reading with Sam every day and the teacher thought he was getting help from his dad, but he wasn't. I'm sure that the reading we did was helping."

"Personally, I learned compassion," Partida said, "and patience. With two years of tutoring behind her, Partida says she learned from teachers' successes as well as from their mistakes. "Teachers who were more patient and stood their ground have more disciplined classrooms," she said.

McFadden agreed. "It was really a teacher training kind of thing."

Most student tutors also noticed their Spanish language skills improve. "At the beginning of the year, when I was called on in my first-year Spanish class, all I could say was, 'Ummm. Ummm.',$" McFadden said. "By the end of the year, I just talked." Are around. You have to smile even if you're having a bad day. They soak in everything like a sponge."

And sometimes the modeling comes from real-life experience. "They all seemed to have a real lack of motivation. I just told them, 'You'll read for the rest of your life.' But I remember thinking the same thing not too long ago. I didn't get serious about high school until I was a junior and decided to start doing my homework."

All three tutors agreed that remaining professional—drawing that line between student and tutor—was often difficult.

Flaiole said he felt like a friend as well as a mentor to his students. But when one student asked Flaiole if he was going to attend Miguel's birthday party, the 19-year-old said no.

"Sometimes it's harder to draw the line. "I didn't realize what an impact they were having on my life until migration," McFadden said. "That season I had five kids leave. I left the classroom that day in tears."

MICAH FLAIOLE

Columbia Basin College student Micah Flaiole is motivated by his desire to make a difference. Just as others have made a difference in his life.

Flaiole admits he wasn't always the best student himself. "All I knew how to do was cheat and weasel myself by to get passing grades." He struggled with drugs and family problems until the 10th grade when an older brother's visit had a profound impact on him. "My brother Jesse came up here for Christmas. He talked to me, and by the time he was done talking to me, he was crying. That really affected me."

Although Micah struggled with depression for a long time, he committed himself to God and started to build a healthier life for himself. In the middle of his 10th grade year in high school, he started doing his schoolwork again. "It was a hard road to gain back what I'd missed. I don't know if I ever get back to the level I wanted, but I improved. I did my work and established a direction in my life."

One step led to another, and after high school graduation, Flaiole enrolled in Columbia Basin College, wanting to learn Spanish and Tonying with the idea of becoming a teacher.

Enter the College's director of student employment, Theo Dobie, with a workshop on student job opportunities. Flaiole's interest in education and Spanish made him an ideal candidate for the Bilingual Tutoring Outreach Program, a program that allowed Flaiole to tutor

"I didn't realize what an impact they were having on my life until migration."

SHANNON McFADDEN SHOWS OFF A CLASS PICTURE OF THE FIRST GRADERS SHE TUTORED AT EMERSON ELEMENTARY IN PASCO.
interpreting in Mexico.

A work/study student at Columbia Basin College and a first-year Spanish student, Shannon, like Flajole, was eligible to tutor Spanish-speaking children in local elementary schools through the Bilingual Reading Outreach Program.

Shannon tutored Spanish-speaking first and second graders at Emerson Elementary School in Pasco. Shannon learned a lot from talking to teachers, watching their successes and mistakes. She even got to teach class a couple of times.

And then there was the language. "I was kind of timid at first. Spanish wasn't my strong point," she said. But she started tutoring at the same time she started Beginning Spanish in college. "I knew words, but didn't do sentences." Taking Spanish classes concurrently with tutoring children in Spanish improved Shannon's language skills.

"I felt more confident in my Spanish class because I'd worked with bilingual kids. With them, you mess up, and you just get over it."

A year of tutoring and Spanish language classes equipped Shannon to translate for her church group during a two-week trip to Mexico last summer. The group built a house for a Mexican youth pastor and his wife.

"I still get mixed up on my verbs," Shannon said, confiding that after the house was finished, she told the couple that the church group would be back in one year to live with them. She meant to say they would be back to visit.

But in spite of an occasional mix-up, she noticed that she had more of a relationship with the family because of her ability to speak Spanish.

Working with first and third graders at Emerson also helped Shannon understand Mexican culture better. One image stays in her mind: "We met a 12-year-old girl who stayed home to take care of her six brothers and sisters, ages six months to eight years, while her parents worked. She didn't go to school."

Currently attending Portland Bible College, Shannon plans to major in education and minor in music or Spanish.

VERONICA PARTIDA

Veronica Partida wasn't sure what she wanted to do when she enrolled at Columbia Basin College two years ago.

"I just came to see what would happen," the 20-year-old said.

Work/study approval happened first, and that led Veronica to the Bilingual Outreach Tutoring Program. Tutoring first and second graders at Captain Grey Elementary School in Pasco happened next.

"The first year went by, and I had a lot of fun with it," Veronica said. In her second year of tutoring, she started seeing improvements in her students. "Teachers told me, 'Thanks for all your work with this child. We didn't have to hold him back last year.'"

It was then that Veronica started thinking about her own childhood struggles with learning. She had needed one-on-one help in reading and math through most of her school years. "If I hadn't had the extra help when I was younger, who knows if I'd be here," she said. Her teaching, she said, is, in a way, "conquering what I've been struggling with my whole life."

A third-generation Mexican American, Veronica will be among the first in her family to graduate from college. Her parents, born and raised in the United States, worked in the fields as children, moving with the harvest and jumping from farm to school. When they finally settled in Eastern Washington, Veronica's mother dropped out of school in the eighth grade to help her parents in the fields. Her father finished high school and one year of college before going on to various jobs.

Today, Veronica's mother, who earned her GED several years ago, is a para educator at a local elementary school. Her father, a recovering alcoholic, is a drug and alcohol counselor at a nearby correctional facility.

Veronica will finish her second year at CBC in Fall 2000. She plans to enter Eastern Washington University in January and major in education.

Virginia Sliman works in the communications department at Columbia Basin College and is an adjunct faculty member in the English department. She edits the faculty/staff newsletter in which this article on the Bilingual Reading Outreach Program first appeared.
Community colleges experienced growth in enrollments during the past two decades and will continue to experience significant growth in the coming years, according to the primary advocacy organization for the nation's 1,151 two-year degree-granting institutions.

The American Association of Community Colleges (AACC) reported in its recently released "National Profile of Community Colleges: Trends & Statistics," third edition, that the fall headcount enrollment at community colleges grew to 5.5 million in 1997 from nearly 4 million in 1975. Community colleges grant more than 450,000 associate's degrees annually. The enrollment growth at four-year colleges was not nearly as substantial, growing to 8.8 million from 7.2 million.

By 2007-2008, the number of
high school graduates is expected to increase by 17 percent to 3.1 million. The number of college students, nearly 14 million in 1995, will grow to more than 16 million by 2007.

Dr. George Boggs, president of the organization, said that since the enrollment in community colleges will grow, one of his concerns is whether “we will have the capacity to accommodate the increase in students.”

Boggs has said he is beginning to see some parts of the country taking steps to address the increase in students. North Carolina has agreed to build more community colleges. A number of community colleges are moving toward expanding services through distance learning.

Because of growing enrollments and shrinking budgets, community colleges are having to be creative in carrying out their work. One of the big trends among community colleges wanting to meet the needs of the communities they serve is the formation of partnerships. Stan Ikenberry, retiring president of the American Council on Education, said community colleges have an important role of being what he called an “alliance broker,” where the community colleges have formed partnerships and relationships with a variety of institutions and organizations to create a network.

Foothill College in Los Altos Hills, Calif., is a good example of how a community college is key in forming partnerships. The school’s career programs focus on the technology industry because of its location in California’s Silicon Valley. The College enjoyed one of its earliest partnerships in the 1970s when Hewlett Packard built a semiconductor manufacturing lab so that Foothill students could learn how to make semiconductor chips, said President Bernadine Chuck Fong.

Later, Tandem Computers, since bought out by Compaq, donated a mainframe system and 200 computers to Foothill in exchange for the College’s providing customer and employee training on Tandem equipment, she said. The company later upgraded the equipment and donated an automated library system. The College continues to form strong partnerships with other companies, she added.

Ikenberry said many community colleges across the country have enjoyed growing interest from the community in the last decade.

“The visibility of community colleges has increased in the past ten years,” said Ikenberry. “They are more visible to the American public. A lot of that might be because the Clinton Administration has used community colleges frequently in discussions about higher education.”

Community colleges have been around since 1901, when the Joliet Junior College first opened, but it was not until the 1960s that their popularity began to grow. Between 1960 and 1970, the number of community colleges increased two and a half times, opening at a rate of nearly one per week, said the AACC report.

As a result, many are beginning to show signs of aging, particularly among faculty and administrators.

In the future, Boggs said, community colleges will experience high turnover in faculty and administrators because many are reaching retirement age. The upcoming retirements, he said, are an opportunity to further diversify faculty and administrations of community colleges nationwide. In 1992, 24 percent of full-time faculty were 55 years or older, said Boggs, noting that one study showed that an estimated 68 percent of community colleges would lose their presidents between 1996 and 2006.

“It is important for the new leaders to understand the core values of community colleges and protect them,” said Boggs, adding that in the future, community colleges will continue to distinguish themselves through their core values of open access and responsiveness to their communities.

Boggs said that another interest-

**SOURCE:** AACC Research Brief
ing phenomenon occurring at the community college level is the development of private foundations for community colleges. Since public funds are becoming more restricted and limited, community colleges increasingly are turning to their own private foundations to raise money for certain expenses, particularly for scholarships. The AACCC said that nearly all community colleges have or are establishing a foundation. Moreover, the endowments have grown significantly over the past decade. In 1989, the largest endowment at a public community college was $20 million. By 1995, the largest was $138 million. Most of the colleges use funds from the endowments for scholarships, student support, program support, and/or equipment. The colleges tend to rely most heavily on funding from local businesses and industry and private individuals not affiliated with the institution.

"Community colleges also try to tap alumni, but that is more challenging for community colleges because the students are so mobile that it is hard to track them," said Boggs.

Boggs said states traditionally funded a substantial portion of community college budgets. But more and more states are dedicating larger portions of their budgets to building jails and to boosting funds for public schools so community colleges are facing smaller budgets from the states.

Moreover, when states or localities give funds, said Boggs, the funds are tied to performance-based standards, so schools are being asked to provide graduation rates, transfer rates, and employment placement rates, among other data, to show that they are having positive results with the funds that are given to them.

Boggs said performance standards are not a bad idea but that some of the standards imposed by legislators, such as completion and transfer rates, are difficult for community colleges to meet because many students attend community colleges only for a few courses, not to complete a degree or transfer to a four-year college.

Another trend in the budget area has to do with the handling of financial aid for students. Boggs where the educational programs were weak so "the students from those areas would be disadvantaged by merit-based programs."

multi-campus institution in the greater-Detroit area with an enrollment of nearly 30,000 students per semester. Lorenzo once published a regular piece on trends in community colleges.

"One of the assumptions about community colleges that remains valid is that the changes that take place in the community colleges more closely mirror the changes in the community than any other educational institution," said Lorenzo. "So the changes in the social conditions will be felt more quickly by a community college than anybody else. The trends impacting most community colleges tend to mirror the trends in the communities they serve."

George B. Vaughn, author of The Community College Story, a booklet published by the AACC, agreed with Lorenzo's comments, adding that "in the 21st century, the community college's success will continue to depend on its ability to respond to a changing environment."

As such, one of the major trends occurring in community colleges is the high demand for courses that allow people to change professions or improve their job skills. Boggs said that while community colleges still emphasize associate's degrees and general requirements, there is a growing movement toward skills certification and credentialing programs.

"We're seeing more and more students who already have degrees and who are just interested in a particular course or a series of courses," said Boggs, who was president of Palomar Community College District near San Diego before taking the helm of the Washington, D.C.-based AACC.

Lorenzo said that since the economy is strong, many students are attending community colleges to upgrade their skills and take advantage of the high salaries being offered by many employers. Lorenzo said 26 of 28 community colleges in Michigan reported that enrollments had dropped for degree-credit programs but that those same schools saw

"The faculty at community colleges must be able to teach students who differ vastly in ages, computer literacy, professional and educational experience, and in their readiness to learn, which can encompass a variety of challenges, including limited English proficiency."

ALBERT L. LORENZO, PH.D., MACOMB COMMUNITY COLLEGE PRESIDENT

Less than two percent of students attending public community colleges receive merit-based financial aid, said the AACC report.

Dr. Albert Lorenzo is president of Macomb Community College, a

enrollments jump for skills-specific and work-development programs.

"In a hot economy, the students can stick to the skills and skip the arts and sciences," said Lorenzo. "Most employers tell us they value critical thinking, interpersonal skills, and abilities developed by a liberal arts education, but when the economy is strong, they will hire someone with the basics just to get the job done." 

But, Dr. Antonio Flores, president of the Hispanic Association of Colleges and Universities, calls the expansion of roles of community colleges a positive step. "The community college has become a very comprehensive institution that provides almost anything a community needs," said Flores. "These institutions provide a college track, job training, upgrade training, and self-actualization. It is good that all of these things are available at an affordable cost. Community colleges do fulfill a number of important goals for society."

Flores said community colleges will continue to play an important role in the Latino community. Fifty-five percent of Latino college students attend community colleges, and Latinos represent the fastest-growing racial/ethnic group at community colleges. Latinos represented nearly 12 percent of all community college students in 1997, according to the AACC study. Flores said more older Latinos will begin to turn to community colleges to enhance their skills for employment and increase their wages. Students who complete the requirements for an associate's degree at a community college earn 24 percent more than people who just have a high school diploma, said the AACC. The growing number of older Latinos returning to college simply mirrors what is occurring in U.S. society overall.

"The basic mission of the community college has not changed in the past decade; however, our areas of emphases may have changed, depending upon the nature of our students," said Chuck Fong. "For example, there is considerably more emphasis on workforce development and lifelong career development since so many people change jobs and/or occupations multiple times."

Lorenzo said community colleges are dealing with a diversity of students that makes teaching challenging. He said the faculty at community colleges must be able to teach students who differ vastly in ages, computer literacy, professional and educational experience, and in their readiness to learn, which can encompass a variety of challenges, including limited English proficiency. About 45 percent of all first-time college students attend a community college, and about 51 percent of college students are first-generation college-goers in their family, according to the AACC.

Lorenzo said he increasingly hears of students with Ph.D's returning to community colleges for training to change career path, and they are sitting in the same class with students new to the higher education system, which can make it challenging to teach both levels of student.

"It is difficult to find a single approach that works well in a diverse classroom," said Lorenzo. "For example, the young students are very familiar with computers while some of the older students might not know how to turn one on. What do you assign to a class like that? That wasn't an issue 10 years ago. Communities will continue to become more diverse. In the next 10 years, we'll just have to become more creative in how we approach the learner."

Lorenzo said technology might be the key to meeting the vast needs of different learners. He said, for example, that a limited-English-proficient student, who might take a little longer than would other students to learn certain material for a class because of the language barrier, might be able to benefit greatly if the class is CD-ROM-based and the student could proceed at his or her own pace.

But Lorenzo said he does not believe community colleges will be taken over completely by teaching through technology like distance learning because the personal relationships between the students and teachers is what has made community colleges so successful. He said his community college sends out questionnaires to upcoming graduates about their experience at the school. The students consistently report that one special moment or exchange with a faculty member made a difference or had a positive impact on their experience in the college.

Chuck Fong said Foothill College was the first community college in California to begin offering online credit classes to students in 1994-95 and the program has been a success.

"We now have 70 courses and a degree program available online," said Chuck Fong. "We find this has provided two-thirds of our traditional students with the means to take a course that they could not ordinarily fit into their schedule. In addition, we have enrolled many other students through our online program who receive all of their instruction and services online, thus allowing us to be accessible to many students all over the country and the world."
Virginia's Community Colleges

Building Blocks for a Better Future

BY
NELLY MELLANDER AND
GUSTAVO MELLANDER

"The future requires a much more flexible form of learning—and far more nimble institutions—that don't rely on traditional convoy approaches to education...."

STATE CHANCELLOR ARNOLD OLIVER

The Virginia Community College System (VCCS) was founded in 1966. By the early 1970s, it included 23 colleges and 33 campuses. In the past decade, another six new campuses were developed. Enrollment surged by nearly 12,000 full-time equivalent students (FTEs), to more than 80,000 FTEs. On an annual basis, nearly half of the students who enroll in public higher education institutions in Virginia attend a community college.

Like community colleges across the nation, they provide access to quality higher educational opportunities and workforce training. Their graduates have moved on to responsible and fulfilling careers.

Programs

Virginia's community colleges offer more than 200 programs in occupational/technical fields, liberal arts and sciences, general education, continuing adult education, and industrial training. The 23 colleges in the System are indeed the
Commonwealth's "building blocks to a better future" for all of its citizens.

Last fall, approximately 70 percent of students were returning students; 20 percent, first-time students; and about 10 percent, transfers. About 59 percent of enrollees were female.

During the 1999-2000 year, the VCCS served the equivalent of 223,370 full-time students, including 80,588 individual students who enrolled in credit courses. Twenty-nine percent of VCCS students attend full-time, with 71 percent attending classes on a part-time basis.

In addition to credit courses, the VCCS serves Virginia business and industry through Workforce Development Services. More than 70,000 students take noncredit courses each year.

Of all students enrolled in public higher education institutions in Virginia, 47 percent attend a community college—one-third of the full-time-equivalent enrollment in those institutions.

Approximately 32 percent of the students are minorities: 19 percent are Black; six percent, Asian; four percent, Hispanic; and three percent, other minorities.

Occupational/technical programs include Associate in Applied Arts or Applied Science degrees as well as programs that lead to certificates or diplomas.

For those pursuing a baccalaureate, there are transfer opportunities at all Virginia community colleges. About a third of the students each fall enroll in transfer programs; 29 percent, in occupational/technical programs. Ninety-four percent are in-state students. Approximately 12,300 degrees, diplomas, or certificates were granted during 1999-2000.

The 1990s were very good years. Among the positives was a continuing change in student profiles. There are substantially more women, minorities, and older students, including an identifiable cohort of very well-educated, baccalaureate and beyond, older working students.

Given our interest in Hispanics in higher education, we asked State Chancellor Arnold Oliver about Hispanic enrollments. He said they continue to grow substantially. The number of Hispanic students at Virginia's community colleges more than doubled during the decade of the 1990s, going from 2,339 in 1990 to 5,352, or about four percent of total students, this past fall, a 150 percent increase.

He said the goal to recruit and retain Hispanic students has been successful, and added that "this is as it should be if we truly believe in what community colleges are."

From the perspective of faculty and administrative openings, he noted that he had seen a growing number of well-qualified Hispanic applicants in the employment pools. He was optimistic this would translate into more being hired in coming years.

Invited to say a word or two to encourage young and not-so-young Hispanics to go to their local community college, the chancellor said, "If education is such an essential element to higher earnings and a fuller participation in the American dream, as I and many others believe, then any young person would be foolish to pass up a chance to participate in higher education by not going out to his or her local community college."

He reminded us that it is impossible to work at a community college and not know firsthand a number of students who came just to take one course—and discovered that it changed their lives. Every profession in the country today has leaders who began just by taking one class at a community college.

In the last ten years, under Oliver's focused and dynamic leadership, the community colleges invested heavily on five fronts: professional development, workforce services, distance education, capital construction, and technology.

Professional Development

A comprehensive study of community college faculty and staff a few years ago revealed that lack of time, funding, and support were barriers to
a successful state professional development program. A systematic process of renewal was developed that creates an environment for learning and growth. At its heart lies the recognition that enhanced faculty and staff learning results in enhanced student learning.

The majority of VCCS faculty and staff are between 40–59 years of age and have been with the system for more than 12 years. The average teaching load is five courses per semester; many also teach one course as overload. The question was not how to prompt faculty and staff to teach and serve more, but rather how to continue to ensure they are teaching and serving students enthusiastically, and with the latest discipline knowledge, instructional practices, and technological advances.

In 1993, to address the obvious needs, the state board and Chancellor Arnold Oliver launched an initiative unparalleled in the Commonwealth's higher education history. The VCCS Professional Development Initiative invested in faculty and staff to harness their creative energies and talents to increase institutional vitality and provide the impetus for educational transformation.

Central to the initiative was the recognition that the responsibility for professional development must be shared by each individual, the 23 community colleges, and the Virginia Community College System Office.

The initiative is structured around four developmental components: discipline development, to build knowledge and skills within the academic discipline or professional specialty; instructional development, to improve classroom teaching, learning, and assessment techniques; career development, to provide tools for effective personal planning and organizational development, enhancing administrative leadership skills to fulfill the institutional mission of the community college.

These components form the model for college professional development plans (college commitment) and individual development plans (individual commitment), which are implemented at the 23 community colleges.

The system commitment is manifested in statewide efforts designed to expand professional opportunities and interaction among colleagues. Time, funding, and support are provided to colleges, faculty, and staff through seven programs: Peer Group Meetings, Research Grants, Teleconferences, Minority Faculty Recruitment, Leadership, Classified Staff, and Learning Technology Skills.

This multi-million-dollar investment has resulted in a nationally recognized professional development program.

Workforce Services

Major investments in this area during the past decade have made these colleges the provider of choice in workforce development services. The General Assembly invested $9 million in new dollars to develop community colleges as the critical resources they are. Further, by following these guidelines and goals in the Code of Virginia, community colleges are now a significant portion of the VCCS mission.

Distance Education

Multi-million-dollar investments help blur the distinctions between time and space when it comes to offering academic courses through distance education. The number of students involved in all kinds of distance education—now often called distributive education—continues to mushroom as students choose compressed video courses and Web-based courses as well as other forms of nontraditional course formats. The number of students participating in these classes, more than 28,000, is larger than the size of many individual classes.
This year, students found their foreign language course options greatly expanded. Fifteen of Virginia’s 23 community colleges participated in the Virtual Foreign Language Classroom (VFLC). Northern Virginia Community College, right outside Washington, D.C., offers Arabic, Chinese, French, German, Japanese, Latin, Russian, and Spanish to community college students around the state.

Community colleges across Virginia have signed on to receive language instruction per their individual needs. The goal is to provide language instruction in eight foreign languages to all students in the commonwealth.

The courses are offered via compressed video (video conferencing) and are synchronous (done in real time), so students and instructors can interact and ask and answer questions. The mission of the VFLC is “to offer excellent teaching and learning opportunities in the foreign languages to all students and to provide them with equal access to the foreign language faculty of the VCCS.”

Foreign language instruction is also geared to the business community and the adult learner. Two Spanish courses, Spanish 103 and Spanish 163, are designed to meet the needs of law enforcement personnel and health professionals, respectively.

Capital Construction

The last ten years have been a period of the most rapid growth since the early days of the VCCS. $300 million was invested in capital construction, not merely to create buildings but to create access.

That is where Virginia’s community colleges continue to focus—on the access they provide to quality, cost-efficient, and thorough education.

Technology

More than 100 million dollars have been invested in technology over the past decade, to take the colleges to the cutting edge of where technology is in higher education. The network is among the most advanced in the country, carrying voice and data in increasingly innovative and interactive ways.

Courses are beginning to be offered, through distributive learning, beyond Virginia’s boundaries. Presently, six foreign languages are offered at any of the campuses in Virginia. It is a short step to send those classes virtually anywhere in the world.

“Our faculty,” said Chancellor Oliver, “heavily armed with professional development and high-quality technology resources, can compete with any institutions or organizations around the country. The future requires a much more flexible form of learning—and far more nimble institutions—that don’t rely on traditional convey approaches to education, for example, the outmoded model of classes that meet three times a week over the course of a semester.”

Resignation

With these successes and others on the planning board, why would an energetic man, age 55, resign as chancellor? The answer is to return to teaching.

Dr. Arnold R. Oliver, chancellor of the Virginia Community College System since 1992, has announced he will leave his post this year to return to teaching. Come next fall, he’ll be doing that at Eastern Shore Community College, in Melfa.

Robert B. Seidensticker, chair of the State Board for Community Colleges, noted, “Dr. Oliver’s legacy will be particularly felt in three areas: the award-winning professional development program he has initiated, far-reaching technology gains we have achieved for all of the community colleges throughout the state, and implementation of a distance learning program that is making good on our promise to provide access for thousands of students today.”

“For some time, I have been looking for an opportunity to return to the classroom,” said Oliver. “I’ve been chancellor for almost 10 years,” he said, “longer than I ever expected to stay. I miss being on a campus. The longer I have served in administration, the more deeply committed I’ve become to finishing my career in the noblest profession: a community college professor.”

“In any organization,” he continued, “it is critical for leadership positions to have turnover. Long-serving leaders have difficulty maintaining enthusiasm and creativity; it becomes a challenge to build a new-shared vision. But even beyond that, it is actually quite easy to walk away from a leadership position when your vision of yourself does not completely match your job title. I have had an extremely rewarding career in educational administration in the Virginia Community College System. But there has always been this little inner voice suggesting that where I really should be is interacting more with the students we serve, as well as engaging in academic pursuits such as writing and research.

“I see this as a capstone to my career, the opportunity to teach and to write. The State Board has been very supportive in allowing me to make this move.”

The Mellanders teach at George Mason University.
BY MICHELLE ADAM

Alumni programs at two-year Hispanic Serving Institutions?

Berta Vigil Laden, contributing author, Two-year Colleges for Women and Minorities, tells HO, “It’s an area waiting to be explored.” Multiple interviews with colleges and experts throughout the country confirm that the subject of alumni programs at two-year colleges, let alone Hispanic Serving Institutions, has barely been addressed. With few exceptions, the concept is only now getting some consideration.

In 1986, at the National Workshop on Two-Year College Alumni Programs of the Junior Community College Institute, Jennifer Kerns spoke to the issue. “The development of alumni programs at public community and junior colleges has been a recent phenomenon about which there is no repository of information,” she said.

At that time, she noted that the most likely reasons for their low numbers and/or lack of success were that two-year college graduates hadn’t been in the workforce long enough to be able to give financial support and that those who transferred to four-year colleges might have transferred their loyalties as well.

Researching this matter more than 10 years later, HO hears some similar comments from college personnel, but discovers, too, a recent burgeoning of alumni programs both at two-year colleges and at those that are also Hispanic Serving Institutions.

Hillsborough

Eleanor Gilder, director of institutional advancement at Hillsborough Community College, an HSI in Florida, has directly witnessed this growth. Fifteen years ago, she was engaged in a master’s thesis on alumni programs at two-year colleges.

“I think there wasn’t any support for this idea back then. They felt that two-year colleges have funding and shouldn’t be in the business of development,” she said. “They felt it would be a social club back then. But we now realize it is big business. Community colleges are late in getting started, but there is a lot community colleges can do with their alumni help.”

Gilder described how, since the launching of most community colleges in the ’60s, a number of resources, including financial ones, are supporting their growth. But, with less state funding today, more accountability, and increased competition among colleges and universities, community colleges have been forced to seek support elsewhere. “Community colleges are coming into their own,” said Gilder. “We have graduates now that have prominent positions in the community.”

Hillsborough College, with its four campuses in Tampa, Florida, has had an active alumni association for close to six years. “I complain about our program being shabby,” said Gilder, “but I have people calling from all over for my help.” For
most community colleges, six years might seem a long time to have had such a program in place.

Until now, Hillsborough's approach has been to mail out occasional newsletters to alumni and invite them to functions. Fundraising efforts were not formalized. But recently, with the approval of a new database, Gilder is excited and preparing for significant progress. With the database program, the school will be better able to track former graduates. From there, Gilder intends to form alumni clubs through the various departments on campus. “We feel the best route to take is to work with graduates of programs,” said Gilder. She suggests that the college should provide alumni with health benefits, credit cards, travel programs, and other perks.

“There are a lot of neat things alumni and colleges can do for each other,” said Gilder. “But more than anything, they sell the school. Our alumni are our greatest ambassadors. They do more to promote our colleges than our promotion efforts.” And despite concerns that two-year colleges are less likely to have successful alumni programs, Gilder sees the positive aspects as well. An important element of the community college, said Gilder, is that students have excellent one-on-one contact with faculty. “We have found a lot of alumni through our faculty. And many would admit that had it not been for the community college, they wouldn’t have made it.”

A national survey was conducted in 1997 by the Junior and Community College Institute to gather information on the status of alumni programs. Surveys were sent to 422 two-year institutions. The results revealed that 92 of the colleges had alumni programs and the programs were primarily run by volunteers, with their focus being public relations rather than fundraising. Of the institutions interviewed by HO, many had only just been established, and their primary mission was public relations as well. As the school moved further into the program, and was able to maintain it—a challenge for the two-year colleges in the past—fundraising efforts would become more sophisticated.

Riverside and Laredo

As with many schools, Riverside Community College in Riverside, Calif., began a volunteer alumni association 10 years ago, but it didn’t last. The college re-energized its alumni group only when it decided to create an “alumni house” and purchased a home across from its campus for that purpose. “It is about so much more than fundraising. It is about having your alumni as resources for the community and for students,” said Amy Cardullo, director of the Riverside Community College Foundation. “We want students to be able to relate to their alumni as mentors.” Although Cardullo admits that an alumni program “is a different animal at a two-year college,” she too confirms that alumni have closer relationships to their teachers here than at many four-year colleges.

Another Hispanic Serving Institution, Laredo Community College in Texas, officially began its alumni program in 1997. When Laredo celebrated its 50th anniversary, it began an alumni fund for scholarship money. Dr. Ramón H. Dovalina, Laredo’s president, initiated the fund as part of a larger effort to reach out to the community for support. An alum himself, he knows that most of those in his community have been students at the College at some point.

“When I speak to community groups, people always ask me what kind of impact the College has had on the community. I ask them to raise their hands if at any point they have attended—and roughly 90 percent in the room have taken courses,” said Dovalina.

At the first alumni meeting, 25 people attended—most of them employees who happened to have been students. But since then, through gatherings and invitations, the school has built a large support network.

“We need people to know what we are doing, and we need advice. We need community input—and more than that, has gotten to know students you’ve seen in the past,” said Dovalina. He went on to list prominent community members—state senators, city managers, and county judges—who are graduates of Laredo. “There are a lot of people in the community who had their start here. It belongs to the community,” he said. “We went, our kids went, and our grandkids will come.”

San Antonio and Modesto

At San Antonio College, where 51 percent of the students are Hispanic, promoting the visibility of the school within the community has been a key factor in building its alumni program. “We thought that even though we haven’t been here for 75 years and have had a huge impact on the community, we didn’t have the status and recognition that we deserved,” said Dr. Robert Zeigler, executive vice president.

Several years ago, the College applied for a Title III grant in order to have the funds to begin an alumni program. At first, Zeigler felt some hesitation about embarking in this direction. “I wasn’t sure how successful this would be,” he said. “But now that we are into it, people are relatively enthusiastic about it.” And he added, “In the past, community colleges didn’t really think of outside funding sources, of building contacts in the com-
munity for help. We are now realizing it is important to build support from the community.

Beyond contacting alumni and inviting them to a recent 75th anniversary event, the school has published its first alumni association magazine. It is also working closely through the association with high schools and middle schools “in a whole outreach program that has been increased in the past several years.”

Modesto Junior College in Modesto, California, has also recently begun an alumni program. Tim Flemming was hired a year ago as the institution’s first foundation director, specifically for that purpose. He has since had old alumni who have remained connected by their field of study, come to him to help strengthen their role in the College. They have helped promote continuing education programs and supported younger students. Flemming gives out “I am an alumni at Modesto Junior College” car stickers wherever he goes, and with a database of 12,000 so far, he has invited alumni back to major events. “You can’t afford to buy this kind of advertising that alumni can do for you,” he said.

Long Beach

Not all such programs are in their infancy. At Long Beach City College, the alumni program has been in existence since 1979, and alumni programs have come and gone since 1929. At one point, the school’s program served as a model, and its director, Gail Stewart Garber, provided workshops for other colleges.

Garber begins her alumni campaign by speaking to students at graduation about the organization and sending them letters of introduction. “Most people are surprised when I speak at graduation,” she said. “A lot of them disappear thinking they are automatically a part of the alumni association.” Garber was able to enlist 10 new people into the association from this past graduation class.

What Garber relies on more than anything is her detailed alumni database of 26,000 names. Programs and events for targeted groups of alumni attract them back to the school. She saturates the community newspapers with notices of events the school is hosting. “It’s bringing them back and finding out their key interest. The community is my alumni,” she said.

Noticing that minority students were not among the primary groups coming back to campus, Garber organized an African American history event. Four hundred new faces attended. Then she hosted Hispanic Day and invited leaders, whether with financial support or giving of their time. We need these people. They make the educational package an entire package.”

While alumni primarily have served as mentors and have helped create an image for the school, Long Beach City College has received solid financial support as well. The financial aspect is handled, however, through the school’s foundation, which shares a database and resources with the alumni program.

“A lot of them disappear thinking they are automatically a part of the alumni association.” Garber was able to enlist 10 new people into the association from this past graduation class.

What Garber relies on more than anything is her detailed alumni database of 26,000 names. Programs and events for targeted groups of alumni attract them back to the school. She saturates the community newspapers with notices of events the school is hosting. “It’s bringing them back and finding out their key interest. The community is my alumni,” she said.

Noticing that minority students were not among the primary groups coming back to campus, Garber organized an African American history event. Four hundred new faces attended. Then she hosted Hispanic Day and invited leaders, whether with financial support or giving of their time. We need these people. They make the educational package an entire package.”

While alumni primarily have served as mentors and have helped create an image for the school, Long Beach City College has received solid financial support as well. The financial aspect is handled, however, through the school’s foundation, which shares a database and resources with the alumni program.

The financial aspect is handled, however, through the school’s foundation, which shares a database and resources with the alumni program.
I didn't expect to be inspired to write a book of poems by teaching college composition. Riding a motorcycle cross country for a month or being a single father or working in a nursing home for nearly 10 years or moving from Minnesota to Laredo, Texas, on the U.S.-Mexico border, or even teaching creative writing in a federal prison all would seem to make better subjects.

But no. What happened was this: on the first day of my sixth semester of teaching freshman comp at Laredo Community College, I asked my students to introduce themselves to me in writing. They were to write between 150 and 200 words. They should write their best first-draft prose. They were to do this so that I could get better acquainted with them and with their ability as writers. They had 20 minutes. And I had 20 minutes. So I did what I often do when I ask my students to write—I wrote.

I began only with the vague intention of trying to write a draft of a poem since I hadn't written anything new in a couple of weeks, and writing something—anything—often helped me get unstuck. I started with a question one of the students had asked earlier: "Why is there a skeleton in this room?" A simple question for which there was a simple answer: "We're in the nursing building, and this room is typically used to teach nursing classes." But as often happens when I write, I imagined things differently, and so on my page, he also asked, "Is that one of your former students?" It was a sarcastic question to which I offered no reply.
but imagined several sarcastic answers.

At this point, the 20 minutes were nearly up, and students gathered their books and papers, handed me their writing, and walked past the skeleton on their way to the door. I pushed the paper on which I had scribbled these few lines in my pocket and went back to my office.

At home that evening, I took out the paper, sat down at my word processor, typed out the lines I had written, added a few more, and finished the draft. I felt good about having written something new, slept well that night, and taught the next day's classes. However, the following day, after the same freshman comp class met in the nursing building for the second time, I was tempted to write another poem. I did, this time about teaching them to use specific details in their writing. And so began a pattern of teaching and writing that I maintained from January until the end of May and which resulted in a collection of 59 sonnets called Composing Ourselves.

Since that time, I've gone on to other projects and to other students, but the question that I've only recently begun to try to answer is this: Why did this happen? One answer concerns the students at Laredo Community College. Over 95 percent of them are Hispanic; many learned English as a second language and face a variety of challenges when they aspire to attend college and even more once they've enrolled in classes and begun the work. The details of their lives are so different from mine, so strange even in ordinary ways, that writing about them was a way for me to make sense of them, to understand how to respond to them in their work and in conversation. And as anyone who has taught school knows, a sense of humor is needed, not to make light of people or their problems but to keep things in perspective and to find realistic, workable ways of addressing everyday circumstances:

**Before Responding, I Observe a Few Moments of Silence for a Late Paper**

"I was in pain and took bicarbonate of soda, sir. I think it must have been the nachos, frito pie, or peppers that I ate. And, of course, my Gremlin wouldn't start again. Did I tell you, sir, of Tiá's old cat who shook and gasped as if she had a heart attack though it was only diarrhea? I couldn't just leave her there in such a bad way. I'm sure you still want to know why my paper is late. Well, my aunt's cat got thin, so thin. What was I supposed to do? The cat died, and then Tiá. Now their ghosts haunt me."

"It's called a deadline," I reiterate, "but not because your cat, aunt, and paper all are late."

Another reason for writing this sequence of sonnets concerns my philosophy as a community college teacher. I know that there is only so much that I can do, that much of the responsibility for education rests with students. However, the way that I as a teacher view my students and the messages—implicit or explicit—that I send clearly affect how they view themselves.

**Why These Poems Must Rhyme**

---

I spoke of my students one afternoon with a mockingbird perched on the top limb of a bare poplar. He sings the songs strewn through the mesquite and over tiled roofs—hymns from Iglesia de Cristo; thick sap thumping from louriders; curved shouts and horns of El Mariachi Loco; a scrap of tejano accordion; sounds borne by red ants streaming up the scarred tree trunk, by tone-deaf crows carousing on updrafts, by the gray-faced man who yells like he's drunk from the middle of the street on my behalf.

The mockingbird interprets, doesn't mime, and when he sang, my students' voices rhymed.

Finally, the system, the assumptions made about students are the last part of the answer. Statistics, I admit, are useful in seeing the big picture, in recognizing patterns and helping institutions and teachers decide where to direct their resources and attention. But too often our ability to use computers to crunch numbers in infinite combinations and the ease with which we can do it causes us to neglect seeing and treating our students like individuals, like human beings. When we allow numbers to color our perceptions of students, they and we are in serious trouble.

**Thoughts of Last Summer and the Bell Curve**

In Real de Catorce, Mexico, high in the Sierra Madre, the bells are rung on the quarter hour by la mano de Dios—a thin, robed man who sells rosaries, St. Francis on magnets and key chains, and images of La Virgen out of the cluttered shadows of a stand near the entrance to the church. Near dawn when burros broughy and the mountains were still black, when the wick of moon and stars had been trimmed, I watched him work the clapper ropes, his cassock swinging as though the clamor of bells came from him.

We hear what we will, believe even when we mistake the bell's curve for that of the man.

I continue to write, as do my students, to teach, and to consider life on the border between the United States and Mexico, between teacher and student, and between reader and writer, searching for new ways to compose my students and myself.
Driven to Make a Difference

Raúl Valdés-Pages, DeVry University

Raúl Valdés-Pages wants to make a difference. Driven by a strong need to touch people and help them improve their lives, he lives his life with the attitude, "I can do anything I put my mind to." This attitude, instilled by his grandfather and uncle, has helped motivate him to positively impact the lives of others, helping them reach their goals and their dreams.

As vice president of new program development at DeVry University, a division of DeVry, Inc., Valdés-Pages has followed a career path that has led him from the classroom to corporate America and on to higher education.

After growing up in Cuba, Valdés-Pages and his family moved to Puerto Rico in 1960, soon after Fidel Castro came to power in Cuba. The family continued to relocate every few years—Argentina, Michigan, and then Illinois—allowing him to experience new cultures and learn new languages.

As he struggled to master those languages, Valdés-Pages developed a love of learning. Challenged by his teachers, they became role models and strong influences throughout his career.

"My instructors pushed me and motivated me to do my best, encouraged me to get past the language barriers, and helped me learn to love the process of acquiring new knowledge," said Valdés-Pages. His first career opportunity as a teacher provided even more inspiration. As a student at Rockford College in Rockford, Ill., he taught English-as-a-Second-Language classes. Having experienced firsthand the struggle of learning a new language, the job was ideal, allowing...
him to share his experiences and his motivation with his students.

"This was one of the most rewarding experiences of my career," he said, "because I could share in their frustrations and celebrate their accomplishments."

Although he loved teaching, Valdés-Pages took a slightly different career path after college. As director of community relations for a government-funded Manpower program, he helped retrain and place dislocated workers, allowing him to combine his teaching experience and his desire to help others succeed.

"When I worked with people to help give them a second chance, I felt like I had found my niche, and my experience forced me to think seriously about a career in education. I suddenly realized that I could help people improve their lives through education, and the possibility excited me," he said.

A few years later, in the mid-1970s, Valdés-Pages began working as the marketing manager for DeVry, then a division of Bell & Howell, and he began to realize that a career in higher education was where he really belonged. "Once the education bug bit me, I was hooked and knew that education was where I needed to be," he said.

He recognized that he needed to gain experience in the corporate world to provide him with a business perspective, and he felt such a move would help confirm that he was making the right decision.

To help achieve this goal, Valdés-Pages worked for Olin Corporation, a basic materials company, as the manager of new products and acquisition. But soon he realized how much he missed working in education. Seizing a unique opportunity, he combined his love for education, his desire to help others, and his business expertise into a new venture. With some assistance from partners, he purchased an engineering/drafting school in Denver, Colorado.

As president of the school, he saw an opportunity for future growth through new programs and increased enrollment.

"My goal was to build a school based on the needs of employers, which would truly give students the skills they needed to succeed," he said.

The first school of its kind in Colorado, the engineering/drafting school dramatically changed under his leadership and direction. Computer science and electronics engineering technology programs were added to the curriculum, for all levels of education. He presented a proposal to the DTC board of directors and received approval for a new program to evaluate competency-based education—the Skills Guarantee Program.

This program, the first of its kind in the nation, provides important feedback to students, employers, and educators through an exam taken by graduating seniors to determine if they have acquired the knowledge and skills needed to succeed in the workplace. If a student passes the exam, an employer is given a guarantee that the student hired will have the skills needed to succeed. If the student fails to demonstrate the necessary skills, DTC will reimburse the employer the graduate's first month's salary—up to $1,500. The program has served as a model for other institutions across the country. The Skills Guarantee Program also led Valdés-Pages to Capitol Hill. In 1993, he testified before the Education and Labor Committee of the United States Congress in support of the National Skills and Standards Bill, which was subsequently passed and put into law.

His desire to help students succeed also led Valdés-Pages to key roles in other higher education initiatives. A member of the Colorado Skills 2000 Coalition, he testified before the Colorado State Committee on Health, Environment, Welfare and Institutions on technical education in Colorado. He has lobbied for more accountability in education at both the state and local levels as a member of the Colorado Guaranteed Student Loan Program's...
DeVry Stats

Enrollment
• 47,000 students on 21 campuses
• Enrollment at the affiliated Keller Graduate
  School of Management is about 7,000

Student demographics
White—42 percent
African American—20 percent
American Indian—1 percent
Asian—12 percent
Hispanic—12 percent
Not known—12 percent
Women—27 percent
Men—73 percent
Average age—26 (46 percent are 25 years and older)

Faculty
• 700 full-time; 850 part-time
• Faculty salary: $50,000 average

Tuition
• $3,950 per term (three terms per year) =$11,850
• Average cost of degree completion is
  $31,100—$35,000 for a BS; $19,475 for an AA
  degree

and in 1998, he was recognized for his achievements when the Denver Business Journal selected him for inclusion in “Who’s Who of Colorado Higher Technology.”

Today, Valdés-Pages continues to work toward improving higher education. In 1999, he sold Denver Technical College to DeVry Inc. and is currently the vice president of new program development for DeVry University. Though he still maintains ties to Denver Technical College, his new responsibilities include managing the expansion of current curriculum offerings and helping to create and launch new products and program initiatives throughout the DeVry system.

He devotes much of his time to developing and implementing the High-Tech Boot Camp, a program designed for those who currently hold a bachelor’s degree from an accredited institution. This program allows students to re-boot their careers in as little as 21 weeks by earning a certificate in network and systems administration, information systems programming, or telecommunications.

“Raúl brings to this position an outstanding track record of successful program expansion and a thorough understanding of higher education issues,” said Ronald L. Taylor, president and chief operating officer of DeVry Inc.

“As a result of his experiences in various educational processes and programs, Raúl clearly understands the needs of students, educators, and employers—and he is very dedicated to improving our educational system to meet everyone’s needs.”

Raúl Valdés-Pages continues to work toward improving education in the United States, a goal that has remained with him throughout most of his career.

“Making a difference in people’s lives and helping them succeed is my most important priority,” Valdés-Pages said. “I want to help others improve their lives and their careers by providing them with the best educational opportunities possible.”

The Road to Success

Raúl Valdés-Pages offers the following advice to students and educators:

• Students should commit to college when they are ready—and stick with it. Many enter college right after high school without really thinking about what they want to achieve. Because of this, some drop out; or end up with degrees they really didn’t want. I feel students should take the time to discover what they want from college, and eventually their time and money will pay off. This way, students feel that they are truly investing in themselves.

• For educators to successfully connect with both students and faculty members, they need good organizational skills, strong leadership skills, a clear vision, high expectations, and an involvement with education inside and outside of the classroom. To make it possible for students to succeed in the class-

room, they need to keep up with the changes outside of the classroom and expect the best out of students. The work of an educator doesn’t just end with the final bell.

• I believe that educators need to embrace the changing world and change with it to gain more knowledge. With the use of computers at an all-time high and the introduction of online education, it might seem that one day educators could be eliminated. But educators have some things that computers don’t—the ability to challenge, motivate, and intrigue students. As long as educators continue to learn and grow, the physical presence of a teacher will never be obsolete.

• Convince students to see themselves in different roles in life and to explore different avenues. I find that this is particularly important for first-generation college students, who need role models to show them the importance of getting a college degree and the success it can bring them in the future.

DeVry Inc. is the holding company for DeVry University and Becker Conviser Professional Review. DeVry University is composed of DeVry Institutes, Denver Technical College, and Keller Graduate School of Management, which offers bachelor’s and master’s degree programs in business and technology. Becker Conviser Professional Review is a leading provider of preparatory coursework for the Certified Public Accountant, Certified Management Accountant, and Chartered Financial Analyst exams. For more information about DeVry Inc., visit www.devry.com.
My friendship with Rudolfo Anaya began in the late '70s when I taught the first Chicano literature course on the Sul Ross State University campus. I patterned the class after one I had taken when I was enrolled in the doctoral program at Texas Tech University, in Lubbock. Taught by the legendary Edmundo García-Girón, prolific writer and master professor, my course introduced me to *Bless Me, Ultima*.

When I designed the syllabus, I knew that *Ultima* would be the novel, nestled among the short stories, plays, poetry, and children's books written by some of the most prominent Chicano writers in the world. The course was a tremendous success and became a feature on the departmental list of courses.

That was 1978—and two decades later, I find myself teaching Rudolfo Anaya's literature and arranging teleconferences with him. He always complies. My students relish those conversations and are held spellbound by the man renowned as the godfather of Chicano literature.

In 1993, I structured an advanced English course entitled *Life and Works of Rudolfo Anaya*. It was very well received by my students; in fact, I have offered the course several times since then. As he continues to publish, I add his newest literature to my syllabi.

*Bless Me, Ultima*, the book for which Anaya is best known, was published by Quinto Sol (Berkeley) in 1972. Since then, he has written an impressive collection of novels, short stories, plays, essays, and children's books. Most noted among these works are his novels, *Heart of Aztlan* (1976) and *Tortuga* (1979), which complete the trilogy set in New Mexico.

His stories are narrated in luminous prose, combining magical realism with the folklore of...
the Southwest to produce a rich blend of Chicano literature. His characters are rural people who know the silence of the campo, or those fighting the harsh realities of street life in the city.

Over the last decade, Anaya has turned his attention to children’s stories and has written four popular books for children ages boys 5-9. Public school teachers include these selections in their interdisciplinary curricula to provide an important multicultural component. The books are also read in bilingual education and ESL classes offered for those students who come from Spanish-dominant environments and are learning to master the English language.

To offer a change from the requisite state-adopted texts, elementary teachers search for books that contain folktales, fables, myths, legends, riddles, and rhymes. *Roadrunner’s Dance* is the fourth children’s book that Rudolfo Anaya has written since the appearance of *Foolish of Christmas*, the celebrated book beautifully illustrated by Edward Gonzales of Santa Fe, New Mexico, published in 1987 and again in 1995.

Anaya’s *Roadrunner’s Dance* is a classic example of the famous *pourquoi*, or riddle, which provides answers to questions pertaining to the creation of the universe and its mysteries. In a voice that reminds readers of Geoffrey Chaucer and his *Canterbury Tales*, most especially “The Manciple’s Tale,” which explains the reasons for the crow’s feathers being black, Rudolfo Anaya presents Roadrunner, the state bird of New Mexico, as the protagonist of this beautiful folktales set in the beautiful Southwestern desert.

Hispanic children hear tales of their ancestry at home from *Cueto, Gustria* (Abuelo, Abuela), *Mami, Papi*, and their *padinos* (godparents), as well. Most noted among the folktales is the ubiquitous *Llorona*, the Weeping Woman whose tragic story has transcended almost five centuries of mestizo history and culture. They read legends of the eagle with a serpent in its talons perched atop a *nopal* that graces the Mexican flag, representing the founding of Tenochtitlan, the cradle of Mexican history. The image of the serpent is very important in Anaya’s book.

In the opening scenes of *Roadrunner’s Dance*, Snake has become king of the road and frightens a family walking home from a cornfield. The elders of the village gather to discuss the situation and decides to seek help from Desert Woman, who lives on Sacred Mountain. Having created all the animals, Desert Woman is concerned about Snake’s actions and places a rattle on his tail while he sleeps. *El cascabel*, or rattle, will serve as warning signal for all the creatures.

When Snake awakens, he discovers his new and their regard for him as strange and awkward.

When he tries to run, he falls on his face. Desert Woman gives him the advice that forms the central theme of Anaya’s book.

“You need only to practice,” Desert Woman tells Roadrunner. The little bird bumps into a cactus, leaps over a horse to的道路, and lands on the back of a desert toad. “I will never get it right,” he laments. But with more encouragement from his creator, he practices until he begins to swirl like a twister. Just like the Ugly Duckling created by Hans Christian Andersen in the 19th century, Roadrunner is now a graceful dancer who must confront his fears.

When Roadrunner attempts to cross the road, Snake stops him and warns him as he has done all the other animals. Roadrunner challenges Snake, drawing the attention of all the desert animals. Snake hisses so loudly that his rattle sounds like a thunderstorm. Angry because he cannot catch Roadrunner, he exerts himself to the point of exhaustion and becomes dizzy. His eyes become crossed, and his tongue hangs limp out of his mouth. He finally concedes by saying, “You win! You win!” to Roadrunner. Rattlesnake slithers into a hole in the ground.

Roadrunner forces his nemesis to promise not to antagonize those who use the road, drawing thunderous support from people and creatures alike. “Now we can visit our neighbors in peace and go to our cornfields without fear,” the elders proclaim. Roadrunner emerges as the hero, but when Owl declares that Roadrunner is the new king of the road, the little bird says, “No, now there is no king of the road. Everyone is free to come and go as they please. And the likes of Rattlesnake had better watch out because I’ll make sure the roads stay safe.”

In an interesting author’s note, Rudolfo Anaya presents the reason that roadrunners, to this day, keep roads safe from rattlesnakes. But like all creatures of the desert, the little bird has to be careful of cars and trucks driven by people who are not always considerate of God’s little creatures in the wild.

He further explains that a couple of roadrunners built a nest in a Russian olive tree in the backyard of the Anaya home in Albuquerque, New Mexico. Rudolfo and his wife, Patricia, noted that the two birds cared for the eggs in the nest until they hatched. They taught their young to look both ways before crossing the road, a lesson that all parents teach their children.

Rudolfo Anaya () and Abelardo Baca (c)
In the closing comment, Anaya mentions that many people think roadrunners are awkward and unattractive in appearance. But every creature has a role in nature, just like all people have a purpose in life. With the gifts that he is given by Desert Woman and his friends, Roadrunner learns to use them wisely. Most of all, he learns to keep practicing. That is the key to living a fulfilling life. Unlike the arrogant little bird seen in “El Pajarito Pelon” (“The Bald Little Bird”), found in Stories That Must Not Die by Juan Sauvageau, Roadrunner does not abandon those friends who helped Desert Woman to create him and give him his special talents and characteristics.

Chicano literature is a major vein in the body of American literature. Still in its infancy, the works of writers such as Rudolfo Anaya have influenced a large number of university professors to research and write scholarly works based on their themes, language, and culture.

Roadrunner's Dance will be part of the curriculum I will offer in my upcoming Children's Literature in Spanish course. I will combine it with Farolitos of Christmas (1987) and reprinted in 1995), Maya's Children: The Story of La Llorona (1997), and Farolitos for Abuelo (1999), all published by Hyperion Books for Children of New York.

I have told Rudolfo Anaya that I am a big fan of Wile E. Coyote, Roadrunner's No. 1 nemesis, in today's pop culture. In Anaya's book, Roadrunner defeats Rattlesnake and opens the road of life for people and creatures of the desert. I will await with anticipation the final challenge between the little bird who lost his awkwardness through practice and the sly coyote who has been chasing him for 50 years in the popular children's cartoons.

The final dance between Roadrunner and Wile E. Coyote is one that my students will never forget. With the book already published, can the animated film version of Roadrunner's Dance be far behind?

MAN OF AZTLÁN: An Excerpt

Rudolfo Alfonso Anaya was born on October 30, 1937, in Pastura, a small town in Santa Rosa in eastern New Mexico. His mother, Rafaelita, was the daughter of Liborio Marquéz, a farmer from Puerto de Luna Valley. His father, Martín, was a vaquero from the llano (plains). From that union came seven children—Larry, Martin, Edwina, Angelina, Rudolfo, Dolores, and Loretta. Soon after Anaya's birth, the family moved from Pastura to Santa Rosa. There, Anaya attended elementary school while his older brothers served in the military during World War II.

The family moved to Albuquerque in 1952 when Anaya was fifteen years old. He attended Washington Junior High School and Albuquerque High School. When was sixteen years old, Anaya was seriously injured in a diving accident. He graduated from high school in 1960 and attended Browning Business College, hoping to become a CPA. After working in various jobs, including keeping books for a neighborhood bar, he entered the University of New Mexico.

He graduated with his B.A. (1963) and M.A. in English (1968) from the University of New Mexico. From 1963 to 1970, he taught English in the public schools in Albuquerque before accepting the directorship of counseling services at the University of Albuquerque, a small liberal arts college. Four years later, after the success of his first novel, Bless Me, Ultima, he joined the English faculty at the University of New Mexico, teaching all levels of English from composition and rhetoric to Chicano literature and creative writing.

In 1976, he published his second novel, Heart of Aztlan, the story of the Chávez family and the problems they encounter in moving from a small town called Guadalupe to Albuquerque. The third novel of the trilogy, Tortugas, appeared in 1979 and focuses on the tribulations of a young boy who is hospitalized with a broken back, and life becomes a panacea of pain and suffering.

Since then, Anaya has published numerous short story anthologies, plays, children's books, and novels. In the 1990s, Anaya wrote four mystery thrillers—Albuquerque (1992), Zia Summer (1995), Rio Grande Fall (1996), and Shaman Winter (1999). The hero of the first novel is Abrán González, a former Golden Glove champ from the Barelas barrio. The latter three feature detective Sonny Baca, investigating a series of bizarre crimes committed in and around the city.

Retired from his professorship in 1993, Anaya resides in Albuquerque with his wife, Patricia. He writes, lectures, and travels extensively. He has been awarded six honorary doctoral degrees. With a writing background that spans three decades, he has earned the title that Southwestern writer Tony Hillerman describes as "godfather and guru of Chicano Literature."

ANAYA'S MAINSTREAM SUCCESS

As he was about to retire from his professorship, Rudolfo Anaya sold two children's books to Hyperion Press. The year after, 1993, he signed three contracts with Warner Books, a Time-Warner Company. They covered the reprinting of his highly acclaimed Bless Me, Ultima, which had already sold 300,000 copies in 21 printings by Quinto Sol; a Spanish language edition—a first-ever for Warner Books; and several new novels, among them Zia Summer, the mystery story that introduced private eye Sonny Baca amid what its inside cover calls "Albuquerque's treacherous political arena—and a passionate environmental battle over nuclear waste transport and disposal."

A review by Ray González in The Nation, July 13, 1994, called Bless Me, Ultima "the most important and influential Chicano novel ever written."

"After all these years," wrote González, "Bless Me, Ultima endures because Anaya had the vision to see and capture the past, the present, and the future of his people in one work of art."

William Clark wrote about the contracts in Publishers Weekly: "What may be most striking about the six-tile, six-figure book deal... is that this major recognition has been so slow in coming."

"With nice poetic justice," Clark continued, "the success of several younger Latino writers, such as Ann Castillo and Sandra Cisneros, for whom Anaya provided inspiration and a role model, has helped create the climate for their mentor's breakthrough."

González wrote, "Up to now, his books have appeared through small and university presses, which meant consistent publication but limited distribution. This was the norm for the majority of Chicano writers until recently. With the boom in Latino literature in the late 1980s and its present flowering, many younger Latino writers—I'm thinking of Cristina García, Julia Álvarez, Dagoberto Gilb and Denise Chávez, for example—will not have to 'pay dues' for the length of time that Anaya has."

Dr. Baeza is professor of English and Spanish at Sul Ross State University, a Chicano literature specialist, he has written a number of journal articles and one other book about Anaya, Keep Blessing Us, Ultima: A Teaching Guide to Bless Me, Ultima, also published by Eakin Press. Last fall, Dr. Baeza was appointed coordinator of the new Title V program at Sul Ross, charged with transforming its teacher education programs so they will graduate effective teachers of diverse learners, emphasis on Hispanics.
ACE Cites Report Showing More American College Students Are Studying Abroad

WASHINGTON, D.C.

The American Council on Education reported that research done by the Institute of International Education shows that the number of U.S. students studying abroad has increased by more than 45 percent over the past four years, reaching a record high of 129,770 in the 1998-99 academic year.
- The number of U.S. college students who received credit for studying abroad rose by nearly 14 percent in 1998-99 from the previous year—slightly less than the 15 percent increase recorded in 1997-98, but higher than the 11 percent increase in 1996-97.
- Data show that most U.S. students who studied abroad were involved in short-term programs (less than eight weeks long). For college students from all types of institutions, the proportion of students in short-term programs has increased from 28 percent to 46 percent over the past 13 years. Ninety percent of American students who studied abroad in 1998-99 did so for one semester or less.
- Many countries that hosted only a few American students five years ago experienced an increase in students in 1998-99, including Brazil (594 students, a 7 percent increase from the previous year), Cuba (498, up 172 percent), Egypt (267, up 38 percent), Hungary (448, up 13 percent), the Czech Republic (999, up 19 percent), Nepal (296, up 25 percent), and South Africa (891, up 44 percent).
- Countries that hosted the most American students included the United Kingdom (27,720 in 1998-99, up 7 percent from the previous year), Spain (12,392, up 18 percent), Italy (11,281, up 11 percent), France (10,479, up 7 percent), and Mexico (7,365, down 3 percent).
- The leading fields of study for American students abroad were social science (20 percent), humanities (15 percent), business and management (18 percent), foreign languages (8 percent), and fine or applied arts (8 percent).

NCLR Urges Senate to Confirm Mel Martínez as Secretary of HUD

WASHINGTON, D.C.

Raúl Yzaguirre, president of the National Council of La Raza (NCLR), sent a letter to members of the U.S. Senate urging confirmation of Mel Martínez as the secretary of the department of housing and urban development (HUD). The letter read, in part:

...NCLR rarely takes positions on nominations since, as a general rule, it is our belief that presidents should be granted great deference in their selection of cabinet members. However, Mr. Martínez’s nomination represents several important milestones for the Latino community and we are optimistic given his track record and recent remarks before the Senate Banking Committee that he is a sound choice to lead an agency so vital to the interests and concerns of the Hispanic community.

...Not only would Mr. Martínez be the first Cuban American member of a presidential cabinet, he would be the first Latino immigrant to serve in such a capacity. His nomination is an important reminder that Latino immigrants are, and can be, working and contributing to the well-being of all Americans at every level in this society.

Mr. Martínez...has a long history of success as an attorney and businessman in the private sector and an extensive community service record, including a stint as head of the Orlando Housing Authority. As chairman of Orange County, Fla., he has shown a willingness to take positions based on the best interests of his constituents, rather than relying strictly on personal ideology. For example, he has advocated “smart growth” policies to minimize burdens on already overcrowded schools in the Orlando area.

...His testimony before the Senate Banking Committee was very reassuring to those of us who advocate for better housing for minority and low-income Americans. He stressed his concern over the low levels of homeownership among African Americans and Latinos and emphasized his strong interest in making housing more available and affordable to these communities. In addition, he expressed strong support for the Community Reinvestment Act, which has had a profound impact on building communities and improving neighborhoods across the country, and for increasing financial counseling to low and moderate-income families.
MALDEF Opposes Nomination of John Ashcroft

WASHINGTON, D.C.

The Mexican American Legal Defense and Educational Fund (MALDEF) voiced its opposition to President George W. Bush's nomination of John Ashcroft as United States attorney general.

"We believe that any fair and impartial review of Sen. Ashcroft's record will raise serious questions regarding his ability to fairly enforce the law, especially on behalf of Hispanic Americans," said Antonia Hernández, MALDEF president and general counsel. "Ashcroft has opposed virtually every policy position supported by Latino organizations."

According to the non-partisan National Hispanic Leadership Agenda's scorecard on votes that would have benefited the Hispanic community, Ashcroft received a score of 25 percent for the second session of the 106th Congress, 14 percent for the first session of the 106th Congress, and zero percent for the entire session of the 105th Congress. What those percentages translate to is a record of votes against the Latino community.

Employers Report Higher Turnover of New College Hires, Says NACE

BETHLEHEM, Pa.

Of the new college graduates they hire, employers say that nearly 10 percent leave their jobs within a year's time. The employers reported on staff turnover—and the reasons behind it—as respondents to the 2000 Employer Benchmark Survey, conducted by the National Association of Colleges and Employers (NACE).

The survey found that the turnover rate for college hires within one year of employment peaked at 9.6 percent, up from 8.6 percent a year earlier. Within five years of employment, the turnover rate reached 24.8 percent, compared to 22.4 percent in 1999.

Based on exit interviews conducted by the survey respondents, the top three reasons for staff turnover center on compensation, opportunities for career advancement, and relocation. Interestingly, respondents to NACE's 2000 Graduating Student & Alumni Survey ranked salary sixth out of 12 key considerations when weighing job offers. Conversely, respondents to the Employer Benchmark Survey cited higher salary as the top reason why new college hires leave a company.

NACE is one of the leading sources of information about the college market, for career services practitioners who advise students and alumni in career planning and the job-search process, and for human resources professionals who recruit and hire college graduates.
Fullerton College a Leader in California College Transfers

Contrary to news reports suggesting that California's community colleges are not preparing students for transfer to the UC and CSU systems, Fullerton College continues to increase its student transfer rates.

According to data released recently, Fullerton ranks eighth overall in the state for UC and CSU transfers combined, and third in transfers to CSU alone. During the 1999-2000 academic year, 126 students transferred to UC campuses while an astounding 1,100 made the leap to the CSU system—a 22.3 percent increase in UC transfers and a 14.4 percent increase in CSU transfers over the past two years.

Fullerton College ranks first in Orange County in the number of transfers of underrepresented students to the CSU system.

NACME Honors Manhattan College Students

Eleven Manhattan College (N.Y.) engineering students were chosen to participate in the National Action Council for Minorities in Engineering (NACME) Corporate Internship Program.

The program offers high-performing students financial assistance, corporate mentoring, paid summer internships, and professional leadership development. Students chosen receive up to $5,000 a year based on academic performance. Manhattan College student participants are David Acosta, Ezechiel Agard, Sherard Hall, Arturo Henríquez, Anthony Jara, Alexander Jiménez, Christopher Larca, Christian J. Martínez, Feliz Miranda, Wilson Nazario, and Winston Peters.

Union County College Website User-Friendly

Thanks to a user-friendly website, Fabian Pedroza of Colombia was able to enroll at Union County College (UCC) in New Jersey, where he completed ESL instruction at the Institute for Intensive English—the state’s largest provider of ESL instruction—and will study in UCC’s mechanical engineering technology program.

Already a successful project engineer in Colombia, Pedroza wanted to come to the United States to further his education and advance his career. With access to the Internet at his job, he shopped for schools after work hours, using the World Wide Web. He settled on UCC so he could stay with an aunt who lives in northern New Jersey. After e-mailing his questions about admissions and the application process to Dr. Helen Aron, Institute for Intensive English director, Pedroza applied to UCC online, finding it relatively simple to make most of his arrangements.

For more information on UCC and the Institute for Intensive English, contact www.ucc.edu.

NYC Technical College Honors Badillo

New York City Technical College President Fred W. Beaufait presented the President's Award to City University of New York (CUNY) board chair Herman Badillo in recognition of his lifelong support of public education and of his commitment to CUNY and to principles of opportunity and excellence.

Badillo was appointed chair of the CUNY board of trustees by Gov. George Pataki in 1999, after serving two years as vice chair and nearly a decade as trustee. He has been an education advisor to New York City Mayor Rudolph Giuliani since 1993.

Pictured (l. to r.): Beaufait, CUNY Chancellor Matthew Goldstein, and Badillo.

Cal State-Fullerton Student a Gates Millennium Scholar

Angelita García, a first-year liberal studies major at CSU-Fullerton, is in the inaugural class of college students selected nationally to be Gates Millennium Scholars.

“Since I was 16 years old, I wanted to attend Cal State-Fullerton and pursue a career in teaching,” said García. “Being a Gates Millennium Scholar will fulfill my lifelong dream.”

García has been on her own since high school. While attending classes at Anaheim High School, she worked at Baskin-Robbins and, later, UPS. García says her role model is Cal State-Fullerton alumna Laurel K. Giroux, a health teacher at Anaheim High. Giroux had read to García the book Oh, the Places You'll Go!

Global Finance Center at Pace

Pace University’s (N.Y.) Lubin School of Business established a Center for Global Finance and named Jorge Pinto its director.

Pinto comes to the Lubin School from the Mexican Consulate in New York, where he was responsible for modernization and exponential expansion of its operations, including the launching of the Mexican government’s first website in 1995. Pinto has offered conferences related to Mexico’s current affairs and U.S.-Mexico relations. He was executive director of the World Bank for two years and ambassador of Mexico to Sweden for three.

“The Center for Global Finance will develop research and academic programs that respond to the challenges that the new and changing economic global environment is imposing on business today,” said Pinto.
Madonna University Open House Benefits Latinas

The office of multicultural affairs at Madonna University in Michigan sponsored an open house for students of the Southwest Detroit Women's Educational Empowerment Project (SWEEP), which is designed to expand access to higher education for women, primarily Latinas. Students met with faculty and staff, discussed educational and career goals, and interacted with other SWEEP students.

Established in 1998 as a collaborative effort between Madonna University and The Religious of the Sacred Heart, SWEEP takes a holistic approach to empowering women in terms of their economic conditions and to developing their potential for improving their communities through civic and political activities.

Osaldo Rivera, director of multicultural affairs at Madonna, said SWEEP is important because many of the women involved did not believe they were college or university material.

San Diego State Names Presidential Fellow

San Diego State University (SDSU) in California appointed Denise Moreno Ducheny as its first presidential fellow in residence. Ducheny will be an ambassador for the University—working with local leaders and the community to solve regional issues. Selection of these fellows is based on their close working relationships with the community, commitment to public service, strong leadership skills, and understanding of both the education and legislative process.

Ducheny will address the continued availability of a high-quality, affordable college education; San Diego’s economy; the environment; and the political and social well-being of the region. She has a bachelor’s degree from Pomona College and a juris doctor from Southwestern University School of Law, and has practiced law in South San Diego since 1979.

Escobar in New Post at UTSA

Daniel Escobar, longtime director of the University of Texas-San Antonio (UTSA) office of multicultural programs (formerly the office of minority affairs), was named associate director of the advanced placement initiative and honors program in the UTSA office of K-16 initiatives.

In the newly created position, Escobar will help the director of the University honors program and be a counterpart to the associate director of K-16 initiatives, established last year to increase the University's collaborations and partnerships with schools, business and industry, and foundations.

Nation’s Oldest Higher Ed Association Names Leaders

Dr. Gregory M. O’Brien, chancellor of the University of New Orleans, was named chair of the National Association of State Universities and Land-Grant Colleges (NASULGC). Dr. Graham B. Spanier, president of Penn State University, was named chair-elect.

As chancellor since 1987, O’Brien has emphasized creation of partnerships with business and the surrounding community in economic development, research and technology transfer, educational improvement, cultural enrichment, and civic involvement. Penn State, led by Spanier since 1995, has embarked on a $1 billion capital campaign and increased support for Penn State Cooperative Extension to expand outreach to citizens and local communities.

NASULGC, founded in 1887, is a voluntary association of 212 public research universities, land-grant institutions, and state university systems. Its members enroll more than 3.2 million students, award approximately a half-million degrees annually, and have an estimated 20 million alumni.

Santiago Canyon Unveils New Facilities Plan

More than 150 community, business, and education leaders from Orange County, Calif., witnessed the unveiling of Santiago Canyon College’s (SCC) new master facilities plan. Rancho Santiago Community College District and SCC officials presented details of the plan, which includes a new library, science building, student activity and sports center, and expanded parking.

“The facilities master plan charts the College’s future,” said Dr. Mark Rocha, SCC president. “It transforms SCC’s current 52-acre campus with more than 8,000 students into a 64-acre campus that will serve the educational needs of a projected 17,000 students.”

Pictured: Rocha officially launches the College’s new Brick-by-Brick fund drive to pay for extensive capital construction needs that lie ahead.

M-DCC Opens New Flight Training Center

Miami-Dade Community College (M-DCC) in Florida opened a new flight training center at Kendall-Tamiami Executive Airport.

The opening of the Eig-Watson School of Aviation, Homestead Campus, marks the first time in eight years that the College’s aviation students will be able to complete flight, simulator, and ground training in one location. Destruction at Tamiami Airport by Hurricane Andrew forced the College to move the ground school and simulators to a Miami International Airport site, with flight training remaining at Tamiami.

In addition to pilot training, the center will offer other courses for aviation students, such as meteorology; noncredit courses, such as glider ground school; and simulator training for industry.

Aviation training was one of the first programs offered by M-DCC 40 years ago, and, despite its near destruction by Hurricane Andrew in 1992, it remains one of its strongest and most enduring programs.

Pictured (l. to r.) are student Joe Hernández Jr.; Yoel Hernández, M-DCC professor and aviation department chair; and students Quintin Bradley and Suhey Cruz.
DaimlerChrysler Offers Online Guide for Hispanic Students

DaimlerChrysler Corporation is helping put students on the “Information Highway” to college with a new online version of its popular *On the Road to Higher Education: Guide to Hispanic Financial Aid Opportunities*, at www.hispanicscholarship.com, along with an update of the printed guide.

Both the 2000-2001 printed edition of *Guide to Hispanic Financial Aid Opportunities* and the Internet version provide information on requirements and deadlines for hundreds of scholarships, fellowships, grants, and other college financial aid programs available to Hispanic undergraduates and graduate students.

Research indicates that for most Latinos, financial constraints are a major barrier affecting college attendance and completion, according to Dr. Edward Codina, executive director of information and policy analysis, Hispanic Association of Colleges and Universities.

UTSA Sociologist Named Fulbright Chair

Juanita M. Firestone, professor of sociology at the University of Texas-San Antonio (UTSA), was selected for a Fulbright Distinguished Chair, the most prestigious Fulbright scholar designation.

She will become the inaugural holder of the Fulbright Distinguished Chair in Gender Studies at the University of Klagenfurt, Austria, where she will teach honors courses and mentor doctoral students completing their dissertations on gender studies during the 2001-2002 academic year.

Firestone is the first UTSA faculty member to receive a Fulbright Distinguished Chair. She joined the University in 1988 and is widely cited in her literature and by the news media in her research on military sociology, women in the military, gender roles in society, and gender issues in public administration. She has a master's degree and a doctorate from UT-Austin.

Santa Monica Feeding into CSU System

Increasing its transfers by a hefty 20 percent over the previous year, Santa Monica College moved into the top 10 of feeder community colleges to the California State University system in 1999-2000.

"We have been the No. 1 transfer institution to the University of California (UC), the University of Southern California (USC), and other private colleges for more than a decade, but it's gratifying to make such a significant inroad in transferring students to the Cal State campuses too," said SMC president Dr. Piedad F. Robertson (pictured).

Dan Nannini, SMC's Transfer Center coordinator, attributed its success to its strong academic program, more aggressive outreach by Cal State schools, and tougher admission standards for UC campuses and USC.

Mt. Hood Offers Career Classes in Spanish

Mt. Hood Community College (OR) is offering free classes in Spanish for single parents and homemakers looking to develop their job potential.

Its Transiciones program has given Spanish-speaking students a chance to learn more about furthering their education and exploring career options. To qualify, students need to have completed the highest level of ESL classes or tested at that level on the College Placement Test.

Transiciones offered a Life Planning class this term. Those who successfully complete it will advance to the second and final class, Career Development, in the spring. Students who complete both classes are then prepared to take standard college courses.

Both classes, taught by instructor Maria Casas, a native of Mexico, emphasize how native Spanish-speakers can utilize their potential—particularly their bilingual ability—on the job, as many employers are seeking bilingual employees.

National Honors for Baltimore Professor

Dr. Richard Bucher of Baltimore City Community College (BCCC) received the 2000 Maryland Professor of the Year Award from the Carnegie Foundation for the Advancement of Teaching and the Council for Advancement and Support of Education. The award is given in recognition of extraordinary dedication to teaching, commitment to students, and innovative instructional methods.

Bucher, a professor of social and behavior sciences, received a doctorate in sociology, with a specialization in race and ethnic relations, from Howard University. From 1991 to 1996, he was the first director of BCCCs Institute for Intercultural Understanding (III). Under his leadership, the III gained national recognition as an innovative diversity education program.

An editorial consultant on diversity for Prentice Hall, Bucher recently wrote the book *Diversity Consciousness: Opening Our Minds to People, Cultures, and Opportunities*. The book empowers students by helping them to understand how the development of their diversity consciousness leads to success at school, work, and in their personal lives.

UT-Austin Student a Rhodes Scholar

Sara Galván, a Plan II honors program/architecture/Spanish student at the University of Texas (UT)-Austin, is one of 32 Americans recently awarded a Rhodes scholarship.

Dr. Richard Lariviere, dean of UT-Austin's College of Liberal Arts, said that Galván's area of study—Plan II and architecture—is an unusual combination, "but Sara has, to an unusual degree, the ability to integrate the practical aspects of her study with a humanistic sense of history and society. Hence, her junior fellows project on the fate of synagogues in Spain, and her insistence on learning Serbo-Croatian when she had the chance last summer to participate in a city reconstruction project in Bosnia."

Galván will study toward a second bachelor's degree in anthropology and archeology.

The Rhodes scholarship, created in 1902 by British philanthropist Cecil Rhodes, offers two years of study at Oxford University in England.

News at Rockland Community College

Five outstanding Hispanic Rockland Community College students were honored at an awards ceremony for their ac-
ademic leadership and personal achievements. Marcos Cabrera, Edward N. Celiz, Melissa Fernández, Jill Jakubowski, and Mary D. Núñez each received a plaque and $200 award.

Eduardo González, an educator with Cornell Cooperative Extension, shared his views in a panel discussion, "Latinos, It's Not Machismo Anymore." Ricky Sánchez, Haverstraw Village trustee, and attorney Eva Guardarramos participated in a talk on "Hispanic Political Power."

The College library hosted "Out of the Dollhouse," an exhibition of the work of Latino artist Orlando Rodríguez Cuebas, sculptor, illustrator, and director of Jersey City's municipal arts program.

John Carro, former justice of the Appellate Division of the New York State Supreme Court, took part in a panel discussion on Latinos in politics, moderated by Justice Joseph Suárez, counsel to the sheriff.

**Millersville University Hosting Latino Lectures**

**Millersville** On March 13, Millersville University of Pennsylvania will host a Latino Celebration lecture, "Stories of the Frontier," by Dr. Roberta Fernández, professor of romance languages and literature and women's studies at the University of Georgia. On April 4, journalist Roberto Suro of The Washington Post will give a Latino Celebration lecture, "Strangers Among Us: Latino Lives in a Changing America."

Millersville recently held its Ninth Annual Latino College Student Leadership Conference.

**Pima Expertise Valued in Mexico**

Pima Community College (PCC) in Arizona has long been involved with public schools and businesses in Mexico as well as educational consortia on both sides of the border.

PCC was the only U.S. community college invited to make a presentation at the Ninth Annual Conference of Higher Education Advisors of the National Federation of Mexican Private Universities held in Hermosillo, Sonora, Mexico. PCC's director of multidisciplinary education services, Dr. Candido Mercado, and PCC international advisor Beatriz Padgett presented "Advising Strategies in a Multicultural Education Context" to 150 conference participants. They also spoke about Pima's new One Stop Student Services centers and its structured Student Success Model, which promotes retention and academic achievement.

**Texas A&M-Corpus Christi Presents Stories by Rivera**

Texas A&M University-Corpus Christi's Readers Theatre presented "...and the Earth Did Not Swallow Him," a production featuring the work of Tomas Rivera, at Hector P. García Plaza. Dr. James Carlsen, director of University Theatre, adapted the stories. Theatre instructor J. Don Luna (pictured) directed the cast and crew. The performance ensemble included 15 students from the Readers Theatre class.

Rivera, a native Texas who taught at the University of Texas, became the first Hispanic chancellor of the University of California. His work concentrates on the immigrant lifestyle of the Mexican American people.

**Calvin Students Hold Hunger Banquet**

Two student organizations at Calvin College in Michigan, the Environmental Stewardship Coalition and the Social Justice Committee, spotlighted the problem of world hunger at the second annual Hunger Banquet.

Participating students were given a random number signifying one of three "income levels," which determined what sort of meal they would get. Approximately 60-65 percent of the students ate a meal of rice and water. Twenty-five percent received rice, water, and beans and had to eat sitting on the floor. The final 10-15 percent sat at tables and ate a four-course steak dinner, served by waiters. The proportions were intended to represent food distribution and hunger on a global basis.

Rachel Medema (pictured), a member of the Environmental Stewardship Coalition, helped coordinate the banquet.

**Community College of Baltimore-Essex Gets NSF Grant**

The Essex Campus of The Community College of Baltimore County (CCBC), in Maryland, was awarded $270,000 from the National Science Foundation to provide educational opportunities to low-income, academically talented students through scholarships and relevant student support services. The project is designed to promote full-time enrollment and degree achievement in one of the campus' six computer science/engineering/math associate's degree programs. It provides student support through a one-week summer orientation in addition to mentoring, advise-ment, and peer tutoring services.

The two-year project also fosters an informal consortium between CCBC-Essex and the College of Notre Dame of Maryland—specifically targeting women and other underrepresented groups such as African Americans, Hispanics, Native Americans, and persons with disabilities to enroll in various science, math, and engineering degree programs. Forty scholarships of $2,500 each will be awarded annually.

**Columbia Launches First of 80 Web Courses**

Columbia Interactive Arts & Sciences, a collaboration between The School of Arts & Sciences at Columbia University (N.Y.) and Cognitive Arts, a company that explores commercial uses of software-based teaching, launched and delivered the first of 80 Web-based courses in January.

Cognitive Arts bases its online coursework on the theoretical work and design strategies of its founder, renowned learning technologist Dr. Roger Schank, a leader in the scientific understanding of how people learn, remember, and reason. Schank has written more than 20 books on the subject, most recently, Coloring Outside the Lines. His theories have been implemented successfully in software design courses tailored for Fortune 500 companies such as GE Capital, IBM, Target, and Deloitte Consulting; additionally, Cognitive Arts has worked with institutions such as Northwestern University and Harvard Business School.

The creation of Columbia Interactive represents a major step forward in extending educational opportunities—both intellectual and professional development—to students who would not ordinarily have access to an Ivy League university.
HACU Career Power Program Champions Success

Hispanic Association of Colleges and Universities (HACU)-member College of the Sequoias (COS), of California, has a 25 percent Hispanic population and a Hispanic community that makes up more than 10 percent of the population. These numbers make COS a perfect HACU Career Power institution. Career Power is funded through the Department of Labor (DOL) to help welfare-to-work recipients improve their work-related skills at their job sites. The program improves basic skills such as reading and math, and, most importantly, reinforces positive work habits.

Career Power champions Hispanic success partly because of the leadership of HACU Career Power Executive Director Jo Marie Cano. Cano prepares and negotiates the fiscal and programmatic terms of the Career Power grant. She oversees compliance with the fiscal and program requirements and is the liaison between a DOL grant officer and HACU program activities to ensure that HACU complies with federal grant requirements.

Violence Prevention Grant Goes to Texas Southern

Texas Southern University’s (TSU’s) Center on the Family received a $759,000 grant to participate in the 2000-2003 Family and Community Violence Prevention (FCVP) program. For six years, the TSU Center has implemented the FCVP program under the auspices of the Office of Minority Health, Department of Health and Human Services, and Central State University in Ohio, with significant positive results.

Dr. Bobbie Henderson, executive director of the Center, states that violence in the U.S. has been characterized as a “public health epidemic.” Children are exposed to violence on multiple levels in their families, their schools, and their communities. Documented evidence reflects that violence in Houston mirrors the range of national statistics.

The program will be guided by one primary goal—to develop and implement educational, informational, and enrichment activities to reduce violence and substance abuse among minority youth and families in selected schools and communities in Houston and Harris County.

M-DCC InterAmerican President New HACU Secretary

Dr. José Vicente, president of Miami-Dade Community College’s (M-DCC) Inter-American Campus in Florida, was elected secretary of the governing board of directors of the Hispanic Association of Colleges and Universities (HACU). Vicente will play a key role in promoting HACU’s emphasis on improving the quality of and access to postsecondary education for Hispanic students.

Vicente is known as an advocate for expanding academic options, especially those of minorities. “Community involvement is a duty professionals must engage in, both at the local and national levels. It is a privilege for me to serve HACU in this new capacity and to contribute to this fine organization,” said Vicente.

Vicente is on the board of the National Community College Hispanic Council and other organizations.

Community College of Baltimore Honors González Sullivan

The Essex Campus of The Community College of Baltimore County (CCBC) unveiled a portrait in honor of former campus president Dr. Leila González Sullivan, who served from 1996 to 1999.

The first woman president in its 40-year history, she had been president of Middlesex Community-Colleges and Technical College and interim president of Gateway Community-Technical College. Of the 1,350 community colleges in the United States, women lead about 200. González Sullivan was one of that 200 and also one of only 14 Hispanic women presidents of community colleges throughout the nation.

She was on the board of the American Association for Women in Community Colleges (AWCC) for three years and was its national president from 1991-1993. Secretary of the National Community Colleges Hispanic Council, she served on the AACC Commission on Learning and Communications Technologies. She received the AWCC’s Carolyn D. Desjardins President of the Year Award.

Pictured l. and r. of portrait are CCBC Chancellor Irving Pressley McPhail and current Essex President R. Wayne Branch.

Texas A&M-Corpus Christi Student Chosen as ¡Adelante! Fellow

Raúl Coronado, a pre-med student at Texas A&M University-Corpus Christi, was chosen as an ¡Adelante! U.S. Education Leadership Fund Fellow, an award given to qualified business students of Hispanic descent who maintain a 3.0 GPA or better. Coronado, who is working on a bachelor's degree in hospital healthcare administration, was given a $3,000 scholarship, a paid leadership institute, and a possible summer internship in a major business or corporation.

NEIU Alumnus Legislator of the Year

Northeastern Illinois University (NEIU) alumna Miguel del Valle, an Illinois state senator, received the Legislator of the Year Award from Anixter Center, a Chicago-based social service agency for people with disabilities.

Combining his background in education, his commitment to human service organizations, and his advocacy for healthcare issues, the senator helped GALOR, a division of Anixter Center, expand its HIV prevention education program. The Center is a nonprofit, charitable organization whose mission is to help people with disabilities to live and work successfully in the community.

Del Valle has both a bachelor's degree and a master's from NEIU.

St. Mary's (Texas) Professor Selected for American Law Institute

Law professor Charles E. Cantú of the St. Mary's University (Texas) School of Law was selected to be a member of the American Law Institute. Membership is based on professional achievement by those with a demonstrated interest in improving the law. Members of the
Philadelphia-based organization, founded in 1923, include eminent federal and state judges, distinguished lawyers, and respected law professors.

Cantú, at the St. Mary's law school since 1966, is among the longest-serving Hispanic law professors in the nation. An expert in contracts, torts, product liability, the Texas Deceptive Trade Practices Act, introduction to law, and related subjects, he has received many honors and awards from students, the law school, and the University, including being named the first South Texas Distinguished Professor of Law. He has a bachelor's degree from UT-Austin, a juris doctorate from St. Mary's, a master's from Southern Methodist University, and a master's from the University of Michigan.

Pre-Law Scholarships for Stetson Students

STETSON

Six Stetson University (Fla.) students were awarded $7,000 scholarships through the Florida Minority Participation in Legal Education (MOPLE) Pre-law Scholarship Program.

The Program is designed to address the underrepresentation of historically disadvantaged minority attorneys practicing in the state. Scholarships are applied toward tuition, room, board, books, supplies, and preparation for the Law School Admission Test. The pre-law scholarship component of the program helps to identify and prepare a strong group of future candidates for MOPLE law school scholarships and for Florida's law schools.

Pre-law awardees for 2000-2001 are Lauren Fernández, Luis Maldonado, Belkys Torres, Rokaisha Bell, Latarsha Brown, and Bianca Lee.

Barry Alumni Association Awarded Teagle Grant

The Teagle Foundation awarded Barry University (Fla.) a three-year, $465,000 grant to enhance communication and connect more closely with its nontraditional alumni, announced William E. Fenton Jr., vice president for institutional advancement.

Nontraditional alumni, the fastest-growing segment of Barry graduates, are those who attained their Barry degrees as working adults rather than immediately after high school.

Barry will use the money to conduct alumni surveys and focus groups, and to establish programs and activities aimed mostly at non-traditional alumni. The plan calls for establishing alumni chapters around the nation. Fenton and Carol Evancho, director of Barry's Alumni Association, will direct the project.

The New York-based Teagle Foundation, a private philanthropic organization, makes grants that further broad strategic initiatives designed to strengthen private colleges and universities.

LIU-Brooklyn Students Win Gates Scholarships

Four current Long Island University (LIU)-Brooklyn students were chosen to be Gates Millennium Scholars.

Candidates are eligible if they are African American, Native American, Asian/Pacific American, or Hispanic; have a cumulative GPA of 3.3; and are in financial need.

Funded by a $1 billion grant from the Bill and Melinda Gates Foundation and administered by the United Negro College Fund, the Gates program aims to provide full scholarships for about 1,000 students per year for the next two decades. The program seeks "to expand opportunity and access to higher education to those citizens who will help reflect the diverse society in which we live." The goal is to promote academic excellence and "to enable thousands of outstanding students to reach their full potential."

The student-scholars are Hayley Fisher (pictured L), Zaida Ogando (r), Carlton Huff, and Victoria Hippolyte-Agard.

Arias Speaks at St. Francis

Dr. Oscar Arias, Nobel Peace Prize recipient and former president of Costa Rica, spoke at St. Francis College in New York in February. His presentation was part of the Thomas J. Volpe Lecture Series on Global Business and Finance.

Arias promotes the ideas of human development, global governance, and human dignity. He has proposed that any country wishing to purchase arms must meet certain criteria, including the promotion of democracy, the protection of human rights, and transparency in military spending. He also proposes the prohibition of arms sales to nations that support terrorism and to states that are engaged in aggression toward other nations or peoples. In addition to that, he encourages preventive diplomacy to avert regional arms races and conflict.

The Lecture Series is designed to better prepare future business leaders to create new opportunities in a world strained by cultural and economic pressure. It is hoped Arias' firsthand appreciation of the knowledge and creativity needed to succeed in peace negotiations will inspire the next generation of global leaders.

Consortium Meets at Trinity to Target Minorities

Representatives from some of the country's leading liberal arts colleges and universities convened at Trinity College in Connecticut to focus on developing programs that promote the academic success and satisfaction of students of color in liberal arts settings.

The Consortium for High Achievement and Success was formed last year. Trinity President Dr. Evan S. Dobelle's invited leaders of selective liberal arts colleges to join Trinity in exploring ways to ensure the academic success of students of color. The Nellie Mae Foundation awarded Trinity a planning grant to establish the Consortium. Task forces have been created to address recruitment, financial aid, social and cultural life, peer study groups, and supplemental instruction. The strategies and programs developed in the workshops might become models for colleges and universities nationwide.

Art in General Exhibits Cuban Artwork Never-Before Seen in U.S.

Cuban artist and critic Antonio Eligio Fernández, known as Tonel, is acknowledged throughout the world as one of the pivotal figures in contemporary Cuban art. Yet his biting satire and sometimes scatological drawings have never been exhibited in the United States—until now.

Art in General, a nonprofit arts organization in Lower Manhattan, N.Y., redressed that situation Jan. 27, when it opened "Lessons of Solitude," the first retrospective ever organized of Tonel's work. The exhibition remains on view through March 31.

Tonel has been active in Havana since 1973 as an artist, critic, and art historian. He gained national and international attention for his artwork in the late 1980s, and he has been a featured participant in major international forums.
In this "Digital-Only-Publication," a former Library of Congress official says that as a result of the anxieties they feel from the way they experience success and failure, Americans do not perform at their highest potentials. The current all-or-nothing success/failure dogma should be replaced by a system of incremental progress/rewards that squeezes failure out of existence.

American Conversations: Puerto Ricans, WhiteEthnics, & Multicultural Education
By Ellen Bigler

In this ethnographic study of a community in conflict, educator and anthropologist Ellen Bigler explores one city's heated dispute that arose over bringing multiculturalism and bilingual education into its citizens' lives and its schools' curricula. Bigler illuminates the nature of racial politics in the United States and how both sides in the debate over multicultural education struggle to find a common language.

Between Race and Empire: African-Americans and Cubans before the Cuban Revolution
Lisa Brock and Digna Bustamante Puertas, eds.

This collection, edited by a Black Cuban and a Black American, traces the relations between Cubans and African Americans from the abolitionist era to the Cuban Revolution of 1959.

Educating by Design: Creating Campus Learning Environments That Work
By C. Carney Strange and James H. Banning

Two nationally recognized experts on campus environments describe the principles and concepts that define effective person-environment interactions and examine how these principles work through four different environmental components: physical, aggregate, organizational, and socially constructed. They also discuss the four conditions for successful learning: inclusion, safety, involvement, and community.

Lessons from High-Performing Hispanic Schools: Creating Learning Communities
Pedro Reyes, Jay D. Scribner, and Alicia Paredes Scribner, eds.

Substantial evidence exists as to why Hispanic students fail in schools. But not much emphasis has been given to Hispanics who have overcome the obstacles and barriersimpeding success. This practical volume provides school administrators and teachers with the tools they need to transform ordinary schools into high-performing schools.

The Man Who Stopped the Trains to Auschwitz: George Mantello, El Salvador, and Switzerland’s Finest Hour
By David Kranzler

David Kranzler reveals the unknown story of the greatest single rescue effort during the Holocaust—the rescue of more than 14,000
Jews of Budapest, the last reservoir of Jews in Nazi-occupied territories. The rescue was accomplished by George Mantello, a Jewish diplomat in the Salvadoran Consulate in Geneva, Switzerland, with the help of a Romanian diplomat, several outstanding Swiss theologians, and virtually the entire Swiss population. With a foreword by Sen. Joseph I. Lieberman.

Colonial Angels: Narratives of Gender and Spirituality in Mexico, 1580-1750

By Elisa Sampson Vera Tudela

Spain's attempt to establish a "New Spain" in Mexico never fully succeeded, for Spanish institutions and cultural practices inevitably mutated as they came into contact with indigenous American outlooks and ways of life. This original, interdisciplinary book explores how writing by and about colonial religious women participated in this transformation, as it illuminates the role that gender played in imposing the Spanish empire in Mexico.

Phenomenology of Chicana Experience and Identity: Communication and Transformation in Praxis

By Jacqueline M. Martinez

Using narrative descriptions of the author's own lived experience of her ethnic heritage, Martinez offers a systematic interrogation of the social and cultural norms by which certain aspects of her Mexican American cultural heritage are both retained and lost over generations of assimilation. Combining semiotic and existential phenomenology with Chicana feminism, the author charts new terrain for pursuing anti-racist, anti-sexist, and anti-homophobic work.

Unfettered Expression: Freedom in American Intellectual Life

Peggie J. Hollingsworth, ed.

Nine major thinkers address fundamental questions of intellectual freedom both within and without the academy. The origins of this volume lie in a particular infringement of academic freedom that occurred at the University of Michigan (UM) in 1954. Three professors were suspended, two of them ultimately terminated, after invoking their constitutional rights and refusing to answer questions about their political orientations in front of the House Committee on Un-American Activities. In 1990, UM established a lecture series to provide a venue and a time to think about the fundamentals of academic freedom.

Locating Filipino Americans: Ethnicity & the Cultural Politics of Space

By Rick Bonus

This ethnographic study of Filipino American communities in Los Angeles and San Diego presents a multidisciplinary cultural analysis of the relationship between ethnic identity and social space. Rick Bonus argues that alternative community spaces enable Filipino Americans to respond to and resist the ways in which larger society has historically and institutionally rendered them invisible, silenced, and "racialized."

Esau and Jacob

By Joaquim Maria Machado de Assis

At one level, this is the story of twin brothers in love with the same woman, and her inability to choose between them. At another level, it is the story of Brazil itself, caught between the traditional and the modern, and between monarchical and republican ideals. Instead of a heroic fable, the author gives us a story of petty squabbles, conflicting ambitions, doubts, and insecurities that define the human condition and plague society. Translated from Portuguese by Elizabeth Lowe.

The Library of Latin America series, of which Esau and Jacob is a part, makes available in translation major 19th-century authors whose work has been neglected in the English-speaking world.

Las obreras: Chicana Politics of Work and Family, Aztlan Anthology Series Vol. 1

Vicki L. Ruiz, ed.

A reprint of the very popular Aztlan, Vol. 20, about Chicana politics, this book offers an insightful new guide to the memory, voice, and lived experiences of Chicanas in the family and workplace. Updated with four new essays and an introduction.

Año 501: La Conquista Continúa

(English)

By Noam Chomsky

With chapters on Haiti, Latin America, the new global economic order, the Third World at home, and much more, this is a powerful treatise on the not-so-new New World Order. Translation of Year 501 from English to Spanish by Loreto Bravo de Urquía.

Many publications featured in this section are available through amazon.com.
CONFERENCES

2001 ASCD Annual Conference and Exhibit Show
March 17-19

Among the Distinguished Lecturers at this year's conference of The Association for Supervision and Curriculum Development will be Jaime Escalante. The conference theme is "Reaching for Balance: Resolving Educational Dilemmas" in Boston.

NHMA 5th Annual Conference
March 23-25

The National Hispanic Medical Association's 5th Annual Conference, "Healthy Hispanic Families," includes, among many other sessions, "Culture and Belief: Their Roles in Health and Well-Being," with among the speakers Elena Avila, R.N., M.S.N., curandera and author of Women Who Glow in the Dark; Roberto Gomez, M.D., assistant dean for multicultural affairs at University of New Mexico School of Medicine; and David Hayes-Bautista, Ph.D., director, Center for the Study of Latino Health and Culture, UCLA School of Medicine. At the L'Enfant Plaza Hotel in Washington, D.C.

Contact: NHMA, (202) 628-5895.

AAHE 2001 National Conference on Higher Education
March 24-27

The American Association for Higher Education presents "Balancing Private Gain and Public Good." The conference will anticipate issues, debate ideas, highlight innovation and best practice, foster leadership and professional development, and provide networking opportunities. At the Marriott Wardman Park Hotel in Washington, D.C.

National Association for Ethnic Studies Annual Conference
March 29-31

This year's conference theme: "Race, Ethnicity, and Pedagogy in the 21st Century." In New Orleans.

Contact: Susan L. Rockwell, (602) 965-297; e-mail, susan.rockwell@asu.edu.

International Mentoring Association Annual Conference
March 29-31

This year's conference theme: "Diversity in Mentoring." In Washington, D.C.

Contact: at Western Michigan University, (616) 387-4174.

NCA-CHE Annual Meeting
March 31-April 2

2001 Southern Region CUPA-HR Conference
April 1-4

The Southern Region of the College and University Professional Association for Human Resources, a national association of higher education human resource professions, will convene its conference at the Richmond Omni Hotel, Richmond, Va.

Contact: Stewart Mixon, chair, (252) 328-4009; e-mail, mixons@mail.ecu.edu.

HACU 2001 National Capitol Forum on Hispanic Higher Education
April 2-5

Leading Hispanic higher education advocates and college campus presidents from throughout the country will meet with key White House, congressional, government agency, corporate, and community leaders about legislation and policy issues of importance to the nation's youngest and fastest-growing minority population. At Hotel Washington in Washington, D.C.

Contact: Acting Public Affairs Director Aileen Salinas at (210) 692-3805 ext. 3242; website, www.hacu.net.

Mexican American Opportunity Foundation National Conference
April 6-7

The MAOF holds its 24th National Hispanic Women's Conference, one of the nation's oldest and largest events recognizing Latina accomplishments. At the Regal Bilmore Hotel in Los Angeles.

Contact: (323) 890-9600.

Center for the Study of Diversity in Teaching and Learning in Higher Education National Conference
April 18-21

"The Global Perspective: Teaching, Learning, and Student Equity" includes, among other conference highlights, concurrent sessions on critical thinking skills, curriculum, pedagogy, collaborative and interdisciplinary learning, and learning communities. At Hotel Inter-Continental, Miami.

Contact: Dr. Toni Forsyth, (408) 864-8309/8993; website, www.TeachLearn.fhda.edu.

AACRAO 2001 Annual Meeting
April 22-25

The 87th annual meeting of the American Association of Collegiate Registrars and Admissions Officers. At the Washington State Convention and Trade Center in Seattle, Wash.

Latino Book and Family Festival
May 12-13

The first Latino Book and Family Festival in New York will be held at the Jacob K. Javits Convention Center in Manhattan.

Contact: (760) 434-7974.

MALDEF Annual Fundraiser
May 16

The Mexican American Legal Defense and Educational Fund will host its annual fundraiser in Washington, D.C.

Contact: (202) 629-2512.

NISOD 2001
May 27-30

1052
The National Institute for Staff and Organizational Development, along with the Community College Leadership Program, present its 23rd annual international conference, "Making a World of Difference..." a unique mix of professional development activities for a unique audience of outstanding community college administrators and faculty. In Austin, Texas.

Contact: John Roueche and/or Suanne Roueche, (512) 471-7545.

LULAC 72nd National Convention and Exposition
June 3-9

The League of United Latin American Citizens will hold its annual event at the Civic Plaza Convention Center in Phoenix, Ariz.

Contact: (202) 633-6135.

Association of Jesuit Colleges and Universities 20th Annual Meeting
June 13-15

This 20th annual meeting/conference on multicultural affairs will be held at Saint Peter's College in Jersey City, New Jersey.

Contact: Robert Perry, (201) 915-9288; e-mail, perry_rob@spc.edu.

The Smithsonian Center for Latino Initiatives Workshop
June 18-29

The Smithsonian Center for Latino Initiatives will sponsor a 10-day workshop, "Interpreting Latino Cultures: Research and Museums." In Washington, D.C.

Contact: website, www.si.edu.

The Barahona Center Summer Workshops 2001
June 25-27
July 9-11
July 23-25

The Barahona Center for the Study of Books in Spanish for Children and Adolescents at California State University-San Marcos will again hold three three-day workshops: Books and Reading Strategies for English Language Learners in Grades K-8, Books in Spanish for Young Readers, and (conducted in Spanish) Literature in Spanish for Children and Adolescents/la literatura en español dirigida a los lectores infantiles y juveniles at CSU-San Marcos.

Contact: Isabel Schon, director, (760) 750-4070; e-mail, jschon@csusm.edu.

Deaf Education Technology Conference
June 25-29

"Instructional Technology and Education of the Deaf: Supporting Learners, K-College," the first symposium in seven years to present current research and state-of-the-art practice for educators of the deaf, will be hosted by the National Technical Institute for the Deaf. At Rochester Institute of Technology, Rochester, N.Y.

Contact: E. William Clymer, (716) 475-6894 (v) or (716) 475-7694 ( tty); e-mail, techsym@rit.edu; website, www.rit.edu/~techsym.

2001 NACUBO Annual Meeting
July 28-31

The annual meeting of the National Association of College and University Business Officers. At the New York Hilton and Towers and at the Sheraton New York Hotel and Towers in New York City.

TeleLearning 2001
October 6-9

The International Telecommunications Council and The TELELEARNING People will sponsor "TeleLearning 2001," the premier event in distance education and educational telecommunications. At Hilton Hotel Costa Mesa, Costa Mesa, Calif.

Bowdoin College seeks as its Dean of Admissions and Student Aid a creative and experienced admissions professional committed to enhancing the academic strength and diversity of the student body. Reporting directly to the President, the Dean coordinates and directs the activities of the 20 professional and support staff of the admissions office and supervises the Student Aid Office, which administers roughly $13 million of need-based aid annually. The Dean plays the leading role in shaping admissions and financial aid policies and in designing recruitment and retention strategies. In addition to planning and supervising all recruitment activities, the Dean oversees the selection of all new students and serves as an ambassador for the college with applicants and their families. Minimum qualifications for this position include a Bachelor's degree (graduate degree preferred) and significant supervisory and management experience in the field of admissions. The successful candidate will have a full understanding of the purpose of a highly selective liberal arts college, excellent writing and speaking skills, and experience in the effective use of technology and of institutional research. Creativity, high energy, commitment to the values of liberal arts education, and an appreciation for diversity are essential.

Located in mid-coast Maine 21/2 hours north of Boston and 1/2-hour north of Portland, Maine's largest city, Bowdoin College, founded in 1794, is a highly selective, liberal arts college of 1500 students that has produced many of the nation's leaders in government, business, science, the arts, and the professions.

Members of the Search Committee are reviewing applications during March and early April and will continue to do so until the position is filled. Applications, nominations, inquiries and expressions of interest should be forwarded in confidence to the Chair of the Search Committee/c/o:

Bowdoin College is committed to equal opportunity through affirmative action.
Book Review

By Elizabeth Coonrod Martínez

If you decide, as I did early in the read, that this novel is light, the book's true meaning will be missed. This novel packs a punch halfway through and provides an interesting lesson for students as well as mainstream readers.

This is a marvelously constructed book. Demetria Martínez, the author, not only compels the reader into enjoying an apparently light story that includes New Mexican cultural emblems such as piñon nuts, green chile, and the historic Albuquerque downtown plaza; she also subtly weaves a second story around the first: a carefully crafted comparison of life on the edge, both in El Salvador and in the U.S. Southwest, for a poor, young Hispanic woman. Both protagonists seek answers for their respective society's actions and, by means of the same, his or her individual identity. The Salvadoran, José Luis, and the New Mexican, Mary, eventually share their disturbing previous experiences, whereupon the novel seems to blow up. By the end of this story, their lives epitomize a need for understanding of two facets of contemporary life.

Martínez has been a journalist for many years, both for an Albuquerque newspaper and for the weekly National Catholic Reporter in Kansas City. She is also a successful creative writer. She is one of three authors of the book of poetry Three Times a Woman, published by the Bilingual Review Press in 1989. The publication of her novel, Mother Tongue, was followed by her own book of poetry in 1997, Breathing Between the Lines. Her poems, which often contain strong political messages, also appear in various anthologies.

But Martínez is more famous for being put on trial with other Sanctuary movement participants. In 1987, she was the subject of newspaper stories across the country when the federal government prosecuted her for harboring illegal immigrants (two Salvadoran women she interviewed in a car during their clandestine trip from El Paso to Albuquerque) and for not turning over her notes declaring their identities. In court, Martínez appealed for the protection and confidentiality of reporters' notes, but the government wanted to punish her for willingly breaking immigration laws. Fortunately, her defense prevailed, and she was acquitted in 1988. Some of this experience obviously inspired her novel.

Martínez's goal in the novel seems to be to bring diverse societies to a deeper understanding of each other. As Soledad, an older woman for whom Mary is house-sitting in Albuquerque, demonstrates in her many letters to Mary, and by the articles around her house, U.S. mainstream society has no idea of Salvadoran reality for its common people. Moreover, José Luis, a recent Salvadoran refugee, has no idea what life has been for the young Hispanic woman. He assumes it was/is much better than his own. Martínez uses the José Luis character to demonstrate that U.S. society also needs to pay better attention to its own common people.

The U.S. populace is uninformed about lives tortured and lost during El Salvador's so-called civil war of the late 1970s and 1980s. Martínez notes in a foreword to her novel that more than 75,000 people died or disappeared during the 12-year struggle. Many others fled the country. Many Salvadoreans and Guatemalans now live in the United States and Canada, and are sometimes confused with a Mexican or Hispanic populace.

The second half of Martínez's story empowers and enlightens the U.S. Latina or Hispanic experience. Mary's working single mother occasionally leaves her with a neighbor who abuses her, unbeknownst to the mother. Later, when Mary is barely an adult, her mother dies of cancer.

The novel's physical construction enhances greater understanding. Martínez uses letters from Soledad, newspaper articles, and quotes from great Salvadoran poets Roque Dalton and Claribel Alegría, to provide background and history. There is day-to-day narrative of the characters' actions and dialogue, as well as changes to first-person introspection by Mary and José Luis. Finally, there are also poems and letters from José Luis to Mary, and a poem written by his murdered Salvadoran fiancée.

The story weaves from present to past and back to present, and then thrusts several years into the future. The early information is needed to provide understanding of the shattered lives of the characters, who must find a place in society and go on living.

The Central American voice is seldom heard or considered in the U.S. mainstream culture. This novel helps project its existence into our day-to-day lives, together with the experience of other U.S. voices seldom considered. It would make an excellent text for literature, history, or sociology classes.

Elizabeth Coonrod Martínez, associate professor in Spanish and Latin American literature, and chair of the Department of Modern Languages & Literatures at Sonoma State University, received her Ph.D. from the University of New Mexico in Albuquerque. She has published articles on Mexican and U.S. Latina writers and non-fiction books on Hispanic culture. Her book Before the Boom: Latin American Revolutionary Novels of the 1920s is being published this year by the University Press of America.

SCIENCE FACULTY!
Opportunities for Outstanding Students

NATIONAL INSTITUTES OF HEALTH
Undergraduate Scholarship Program

The UGSP is sponsored by the National Institutes of Health (NIH), the Federal Government's premier biomedical research and research training agency. NIH offers scholarships to qualified students who are committed to a career in biomedical research. Scholarships of up to $20,000 per year support tuition, educational, and qualified living expenses (room, board, transportation) while students pursue an undergraduate degree. For each award year, scholars work 10 weeks with salary benefits in NIH laboratories in Bethesda, Maryland. They are assigned mentors, participate in developmental and science enrichment seminars, and are provided with housing and transportation. After graduation, they work 1 year of full-time employment at NIH for each year of scholarship award.

THIS IS A SPECIAL OPPORTUNITY FOR SPECIAL STUDENTS!

Advises students to apply if they:

- Are committed to a career in biomedical research;
- Are from a disadvantaged background;
- Have a GPA of at least 3.5 or are in the top 5% of their class;
- Are a U.S. citizen, national, or permanent resident;
- Are enrolled or accepted for enrollment as a full-time student at a qualified accredited institution.

Florida International University
Assistant Professor
Public Administration
School of Policy and Management
College of Health and Urban Affairs

Florida International University, The State University in Miami

The Public Administration Program (PAP) at Florida International University is seeking to fill a tenure-earning line at the rank of Assistant Professor for the Fall 2001 Semester. Ph.D. in Public Administration or related discipline is required by the time of appointment. The position’s teaching and research focus is urban management, politics, and policy. Contributions to graduate research methods instruction is expected; integration of geographic information systems, information technology and related tools in an interdisciplinary environment is a plus.

The PAP awards a BPA, NASPAA-accredited MPA, and a research-oriented Ph.D. with an outstanding placement record. A distinguished faculty has garnered an international reputation for the excellence of its teaching and research. The School of Policy and Management is affiliated with the Institute for Public Affairs and Service, the Institute of Government, and the Metropolitan Center, all of which are actively engaged in training, technical assistance, and policy planning and evaluation. FIU is a Carnegie I Research Institution with over 30,000 students. Miami provides an exciting and culturally diverse laboratory for policy research, with ready access to the Latin Rim and Caribbean.

The University offers excellent library and computer facilities, with a rapidly expanding infrastructure for sponsored research and extramural funding. Salary and benefits are competitive. Florida International University is an Equal Opportunity/Auditing Access Employer.

Closing date for the position is April 20, 2001. Please submit a current resume, a writing sample, and at least three letters of reference.

ASSOCIATE DIRECTOR, RESIDENCE LIFE

California State Polytechnic University, Pomona invites applications for the position of Associate Director, Residence Life. Cal Poly Pomona, noted for its scenic 1,400-acre campus, is located 30 miles east of downtown Los Angeles and is part of one of the most dynamic economic and cultural regions in the country.

This position is responsible for the development of services and programs, which produce a residential experience that ensures the quality of life, well being, and personal development of up to 1,400 diverse students. The incumbent will work closely with the Director in managing a $1 million operating budget for the residence life unit; establishing policies and procedures in the residence halls; developing and planning both long and short range student housing programs and services; advising and facilitating the resident student government; coordinating the safety and security of residents; and working with other campus offices to provide support services to residents.

Master’s degree in counseling, student development/personnel, educational leadership, higher education or related field AND five years of progressively responsible experience in student housing, residential life, judicial affairs, student life/activities, multicultural education, or counseling. Ability to demonstrate successful examples of work in multicultural education, partnerships with faculty, student conduct, and/or first year leadership programs desired.

The annual starting salary is $58,000 to $63,000 and will be negotiated depending on qualifications. The position is open until filled. First consideration will be given to complete application packages received no later than April 9, 2001. Early response is encouraged.

For information, visit our website at http://www.csupomona.edu/~hrs; call (909) 869-3733 for application materials or visit Human Resource Services, California Polytechnic University, CLA Building 96, Room B1-20, 3801 W. Temple Avenue, Pomona, CA 91768. If applying on-line, please refer to job 9029-SA-01.
George Mason University invites applications and nominations for the position of Dean of Admissions and Enrollment Development. The Dean of Admissions reports to the Provost and serves on the President’s Council. Responsibilities include:

- Providing overall leadership and management for the Office of Admissions, assuring that the office mission is well communicated and relates clearly to the mission and goals of the university.
- Lead university efforts to attract students of the highest caliber who are diverse in background and experience.
- Coordinate recruitment efforts at all levels.
- Develop benchmarks for measuring recruiting effectiveness.
- Collaborate with Academic Support, Financial Aid, University Life and University Relations on planning, marketing, retention and progression.

Qualifications: advanced degree (doctorate preferred), record of progressively responsible experience in admissions including developing and implementing successful marketing campaigns; proven leadership and track record of success in a complex, competitive university environment, including documented efforts implementing ideas and strategies for recruiting high caliber, diverse, and international applicants; proven managerial skills for supervision of professional staff and creative use of information technology; outstanding interpersonal, oral, and written communication skills; creativity, high energy, flexibility, and a sense of humor.

First consideration will be given to applications received by March 30, 2001, with the search continuing until the position is filled. Interested candidates should submit a letter of application, curriculum vitae, and names of at least three professional references to:

CHAIR SEARCH COMMITTEE
DEAN OF ADMISSIONS/
ENROLLMENT DEVELOPMENT
OFFICE OF THE PROVOST
MSN 3A2
GEORGE MASON UNIVERSITY
FAIRFAX, VIRGINIA 22030

George Mason University is a dynamic public teaching and research university in the Virginia suburbs of Washington, D.C. Half of its 24,000 students are full time, forty percent are graduate students, a quarter are minority students, and ten percent live on campus. The growing reputation of George Mason University as an exciting institution derives from its innovative undergraduate programs in both traditional disciplines and integrative studies, as well as its increasing number of post-baccalaureate certificate and degree programs. Further information about the university can be found on the web at: www.gmu.edu.

George Mason University is an Equal Opportunity, Affirmative Action Employer. The University offers a competitive salary and benefits package. Applications from and nominations of women and minority candidates are strongly encouraged.
Assistant Professor/ Director of Developmental Education

Department of Interdisciplinary and Special Programs

UNIVERSITY COLLEGE

The University of Toledo is a Carnegie Doctoral/Research Extensive state-supported university with an enrollment of approximately 18,000 students. The faculty of the seven colleges within the university are represented by the AAUP. The Department of Interdisciplinary and Special Programs seeks to fill a newly created position, Director of Developmental Education. The successful candidate will possess the educational, experiential and scholarly background for rank of Assistant Professor and potential to earn tenure. Doctoral degree in education, composition, or related field with expertise in developmental writing or reading is required. A combination of five years experience in teaching developmental writing and developmental program administration is required. At least two years administrative experience guiding developmental education, and academic support programs strongly preferred. Must possess knowledge and/or experience with assessment, instruction and evaluation, and curriculum development. Willingness to teach diverse student population and employ a variety of modern teaching technologies, including the use of computers, in lecture, laboratories, distance learning and multi-media preferred.

The individual holding this position will: provide overall leadership in the development and implementation of developmental education curriculum and pedagogy in the areas of writing, reading, and study strategies; coordinate scheduling of DE courses and sections within the department, work closely with Department of Mathematics to coordinate scheduling of DE math classes; hire, train, supervise and evaluate part-time DE instructors; promote the DE program university-wide; teach developmental writing or other DE courses; work closely with advisers, tutors and other academic support personnel to coordinate the delivery of these services to students; and other related duties as necessary for the success of the program.

This is a nine-month tenure-track appointment; 12-month or summer appointment is negotiable. Salary is negotiable upon consideration of qualifications.

Search remains open until filled; review of applications begins April 9, 2001. To apply, send letter of application, resume, and the names, addresses (e-mail preferable) and telephone numbers of three references to:

Ms. Brenda Grant, Business Manager
MS400 • 2801 W. Bancroft Street • Toledo, Ohio 43611

The University of Toledo is an Equal Access, Equal Opportunity, Affirmative Action Employer and Educator.

Please include job number EOE
DEAN OF EDUCATION

Manhattanville College seeks an outstanding, innovative educational leader to assume the position of Dean of the School of Education, which includes more than 300 undergraduate and 600 graduate students. The Dean is required to exercise vision, leadership and advocacy in academic affairs and curricular matters in the School of Education and in the Community. The ideal candidate will have:

- An earned doctorate and record of academic achievement that warrants rank as a full professor and related experience in educational reform
- The skill to establish the reputation of the School as a center for innovation in teacher education and education reform through creative program development, research and pre-service and in-service opportunities for professional development
- A commitment to and expertise in external funding for the School to assure the development of new and enriched paradigms for teacher education and educational administration
- Experience with technological innovations related to teaching, service and scholarship in the classroom
- The ability to recognize and respond effectively to the needs of underfunded school districts with diverse and underserved populations
- Strong interpersonal communications skills and an ability to interact productively as an advocate for the college among the faculty, administration, students and staff in ways that promote diversity and collegiality
- Operational knowledge of state and national requirements, funding policies with an awareness of contemporary critical issues in education
- Demonstrated administrative planning, managerial and budget experience

Jonathan Kozol has agreed to serve as a consultant to the committee. Send resume to: Professor David Eisenshaver, c/o Human Resources, Manhattanville College, 2900 Purchase Street, Purchase, NY 10677. Fax 914-332-5322. Email: humanresources@mvcollege.edu

We are an equal opportunity employer actively encouraging applications from candidates with diverse backgrounds.

TEXAS A&M UNIVERSITY

MINORITY HEALTH. The Department of Health and Kinesiology at Texas A&M University seeks a senior level individual in the area of minority health. The University has committed substantial funds to this initiative to develop an interdisciplinary minority health program involving Health Education, Health Psychology, the Race and Ethnic Studies Institute (RESI) and the School of Rural Public Health. Successful candidates must demonstrate a record of research in minority health. Candidates should demonstrate ability to secure extramural funding in minority health and have experience in developing students for a multicultural society. Candidates should possess a doctorate in health education/health behavior, prevention science or a related field.

Responsibilities include teaching, conducting research, scholarly publications and presentations, serving on departmental committees, directing master and doctoral student research and seeking funding to support research. Responsibilities include participation in the mission of RESI. Salary and benefits are competitive. This position is anticipated to begin September, 2001.

To apply, please provide (1) a letter of application, (2) a current, comprehensive vitae, and (3) names and addresses of 3 references.

Submit materials to:
Steve M. Dorman, Ph.D., M.P.H.
Chair, Division of Health and Safety
Texas A&M University
College Station, Texas 77843-4243
Phone: 979-845-3124
Email: sdorman@hkm.tamu.edu

Review of applications will begin on April 12, 2001 and continue until position is filled.

Texas A&M is an Affirmative Action/Equal Opportunity Employer and encourages applications from minority group members and women.

FREDONIA

SUNY Fredonia is an equal opportunity affirmative action employer and actively seeks and encourages nominations of and expressions of interest from minority and female candidates.

THE BOARD OF TRUSTEES OF THE CITY UNIVERSITY OF NEW YORK has approved the establishment of the new Department of Teacher Education at York College, which will house the Education components of existing programs in Elementary Education (Elementary Education, Bilingual Education (Pro-Ed), and Secondary Education (7-12) in Biology, Chemistry, Geology, Mathematics and Spanish). We are seeking to fill several new Teacher Education tenure-track positions to work closely with other faculty, both in the new department and throughout the College.

CHAIRPERSON, DEPARTMENT OF TEACHER EDUCATION ASSOCIATE PROFESSOR OR PROFESSOR

As the senior faculty member in this new department, the successful candidate will also serve as department chairperson for approximately three years, after which the position will be subject to renewal at the discretion of the Provost. The successful candidate will be responsible for the oversight of selecting and developing faculty and staff, budgeting and planning, and ensuring compliance with State requirements for teacher certification including eventual professional program accreditation. Teach undergraduate courses, pursue grant opportunities; develop collaboration with public and private schools, government agencies, foundations, and the NYC Board of Education. Doctorate in appropriate discipline required; proven academic leadership and administrative capabilities; distinguished record of teaching, scholarship and service to qualify for appointment as Associate Professor or Professor; strong communications skills; expertise in one or more of the following areas: Curriculum, Elementary Education, Early Childhood Education, Secondary Education, Instructional Technology, Literacy, Education Administration, commitments to the incorporation of institutional technology in the curriculum; record of support for cultural and ethnic diversity within the College community; and the ability to work productively with all constituencies. Preferred candidates will also demonstrate a comprehensive knowledge of regulatory, certification, and accreditation requirements and a thorough understanding of national, state and urban education climates. Salary (commensurate with salary history, qualifications and experience): Associate Professor: $49,900 - $57,118; Professor: $52,896 - $61,324. Please refer to job order: CITE.

ASSISTANT OR ASSOCIATE PROFESSOR (3 positions)

Three new tenure-track positions are anticipated in the new Department of Teacher Education. Educational generalists and specialists are encouraged to express interest. The areas of Elementary Education, Foundations, Literacy, Science Education and Mathematics Education will be given the highest consideration. Doctorate in appropriate area and college teaching experience required. Experience in high needs elementary schools and/or schools, and expertise in student-teacher supervision is preferred. Candidates must have evidence of an understanding of the role of urban education and a commitment to working collaboratively with faculty in the arts and sciences and with public school teachers. Salary (commensurate with salary history, qualifications and experience): Assistant Professor: $33,703 - $40,000; Associate Professor: $42,560 - $50,000. Reference to job order: T365.

These searches will remain open until positions are filled; however, it is anticipated that a review of applications will begin on March 1, 2001. Send three (3) copies of application (two (2) copies of cover letter, curriculum vitae, and the names, addresses and telephone numbers of three (3) references), indicating position(s) of interest, to:

YORK COLLEGE
PSYCHOLOGY INSTRUCTOR

Brookdale Community College is recognized for its focused commitment to its students and community. Brookdale provides a world of opportunities for study, learning, and working experience, in the traditional classroom, via the internet, through experiential learning opportunities, and by distance education courses. Brookdale has grown dynamically into an institution with limitless horizons, as it continues to meet the evolving needs of its students and its community. Located on 220 acres in central coastal New Jersey, the sprawling campus provides a pastoral setting and is approximately 50 miles south of New York City and 70 miles north of Philadelphia.

The College invites applications for an INSTRUCTOR, PSYCHOLOGY position for September 2001. Brookdale is an innovative and comprehensive open admissions two-year college with an enrollment of 11,500 credit students (approximately 7,500 FTE). We seek colleagues who share our unequivocal commitment to quality instruction, collaborative relationships and who value service, diversity, innovation and technology literacy. This is a full time, tenure track entry-level position.

Master's degree in Psychology required. Expertise plus experience in teaching Developmental Psychology, Introduction to Psychology, and Physiological Psychology preferred. Some experience in using technology as a teaching tool desired. Additional preferences: Position may require participation in community-based activities. Candidates invited for an in-person interview may be required to present a teaching demonstration.

Compensation: Annual salary range for instructor level for September 2001 is currently under negotiation (salary range for 9/1/00-8/30/01 was $33,906-$38,060). Position is entry-level and salary is commensurate with qualifications/experience within the identified range. Faculty members teaching extra courses during the academic year and in the summer receive additional compensation.

Application deadline: March 23, 2001. Application process: Applicants interested in this position should submit letter of application (indicating desired position), curriculum vitae, unofficial copy of graduate transcripts and three letters of recommendation via email to hdsmtl@brookdale.cc.nj.us, by fax: (732) 224-9270, or mail to the address listed below, attn: Human Resources Office.

Brookdale Community College
765 Newman Springs Road • Lincroft, NJ 07738
Visit our website: http://www.brookdale.cc.nj.us

Brookdale Community College is an Equal Opportunity/Affirmative Action Employer and its staffing process is pursued through an unwavering commitment to diversity, not only as a compliance responsibility, but as an active conscious effort to build and develop diversity within the faculty and staff.

Tarleton State University
Executive Director

Tarleton State University, a member of the Texas A&M University System, is seeking qualified candidates for the position of Executive Director of the Tarleton University System Center - Central Texas (The Center) located in Killeen, Texas. The University System Center, an extension of Tarleton, was created in 1999 to meet the needs for a public, upper-level university in central Texas. The Center is located on the campus of Central Texas College near Fort Hood.

Tarleton is seeking an individual of integrity and enthusiasm to lead The Center in its next phase of development. The successful candidate must possess an earned doctoral degree and have a minimum of five years of administrative experience, preferably in higher education. The successful candidate's career must reflect continuous advancement and a proven track record of administrative assignments. Qualified candidates must possess an extensive record of effective leadership, excellent communication and interpersonal skills, and the ability to maintain sound judgment. Qualified candidates must have thorough knowledge of the academic community, and must have the ability to represent the Center at various meetings, conferences and forums locally, statewide, and nationally. Experience in academic planning, institutional development, educational marketing, use of technology, and governmental relations is highly preferred.

The Executive Director serves as the chief operating officer for The Center and reports directly to the University President. The Executive Director will work closely with the President's Council, the Central Texas Advisory Council, and with local civic, education, and military leaders. Responsibilities include executive leadership for The Center; overall coordination of academic, administrative, and student services; vision and guidance in strategic planning, collaboration with external constituencies (including community, business, and state leaders); and compliance with organizational policies and procedures.

For more information about Tarleton State University and the Tarleton University System Center-Central Texas, visit our website at: http://www.tarleton.edu.

The search committee will begin review of applications on March 8, 2001, and will continue until the position is filled. The desired starting date is May 1, 2001, but is open to negotiation. The salary will be commensurate with the applicant's qualifications. Nominations are welcome. Interested candidates must send a letter of application which includes previous accomplishments and philosophy of administration, a completed official application form (which can be obtained from our website at http://www.tarleton.edu/hr/application.pdf), and a current resume to Dr. Wanda Mercier, Chair, Executive Search Committee, Tarleton State University, Box T-0501, Stephenville, TX 76402. Names and addresses of the professional references may be required as a later date.

Tarleton State University, an Equal Employment Opportunity and Affirmative Action Employer and Educator, is committed to excellence through diversity.

THE UNIVERSITY OF ILLINOIS AT CHICAGO

Director of Campus Retail Operations

The University of Illinois is seeking a creative, dynamic manager to be the Director of Campus Retail Operations. The successful candidate must be committed to customer service, student learning, employee development, financial success and facility improvement.

To support the university's academic mission and enrich campus life, Retail Operations provides merchandise, services, and amenities to UIC's 25,000 students, 12,000 faculty and staff, and the general public. The director is responsible for:

- a 72,000 square-foot traditional college bookstore (annual sales of $18+ million)
- medical, dental and trade bookstores
- central stores (for departmental supplies)
- two computer stores
- four convenience stores
- five copy shops and numerous self-service copiers
- miscellaneous vending services and sales areas

All of these facilities are self-operated and self-supporting. In addition, the director is responsible for leased retail operation.

The successful candidate will possess these qualifications:

- a minimum of 10 years experience as a retail professional
- experience in running a complex retail operation and creating new markets
- a bachelor's degree (master's preferred)
- strong interpersonal and communication skills

Remuneration is extremely competitive, as is the excellent benefits package, which includes a tuition waiver.

Candidates should submit a resume detailing work and educational experience and a one-page summary statement of how they will approach directing a retail operation in an academic setting.

Ms. Shauna Williamson-Stissac
Search Coordinator
Campus Auxiliary Services Employment (618 117)
756 South Halsted Street, Room 702
Chicago, Illinois 60667

For fullest consideration, apply by April 6, 2001.

Proud of its diverse population and commitment to multiculturalism, UIC is an affirmative action, equal-opportunity employer.

A more detailed position announcement is available at http://www.cupomona.edu/adm_affairs/.

Cal Poly Pomona is an AA/EOE.

AMHERST COLLEGE

CURATOR OF AMERICAN ART

Amherst College, a private undergraduate liberal arts college for men and women, with 1650 students and 170 faculty, seeks a dynamic, experienced, team-oriented curator for its renowned collection of American paintings, drawings, prints, photographs, sculpture and decorative arts. The Mead Art Museum, an AAM-accredited institution, just reopened after major facility renovation. Located in western Massachusetts, Amherst participates with Hampshire, Mount Holyoke and Smith Colleges and the University of Massachusetts in the Five College Consortium.

Responsibilities will include the organization of special exhibits; interpretation of the collection including research, educational outreach, and addressing scholarly inquiries; advising on acquisitions; establishing conservation priorities; organizing lecture series; maintaining peer contacts especially in the 5-Colleges community. Since the Museum is a campus-wide academic resource, a collegial relationship with faculty is requisite and although no teaching is required, there is ample interaction with student interns and docents. The small institutional environment and diverse collections require an individual willing to assume other responsibilities in collaboration with museum colleagues, as well as interest in other collection fields such as Latin American art, African art, or Asian art to work with faculty and other guest curators.

Qualifications: M.A. and minimum of five years of previous museum curatorial experience required. Ph.D., professional publications, and some academic teaching preferred. Candidate should possess excellent oral and written communication skills. Small staff size as well as constant reliance on computer software for collections management and cataloging data entry, digitized images of American art, Internet research, and e-mail communication require familiarity with MS Word, Web-based e-mail, Adobe Photoshop, and electronic database reporting tools as well as interest in further development of Web-based materials.

Interested candidates should submit a letter of interest, resume, and the names and addresses of three references to: Office of Human Resources, Amherst College, P.O. Box 5000, Amherst, MA 01002-5000. A review of applications will begin on April 16, 2001.

Amherst College is an Equal Opportunity/Affirmative Action employer and encourages women, minorities and persons with disabilities to apply.

UIC

DEAN OF THE COLLEGE
OF URBAN PLANNING
AND PUBLIC AFFAIRS

The University of Illinois at Chicago (UIC) invites applications and nominations for the position of dean in the College of Urban Planning and Public Affairs (CUPPA).

Nationally recognized as a Carnegie Doctoral/Research-Extensive university, UIC is the largest in Chicago, with 25,000 students, 12,000 faculty and staff, 15 colleges and the state's major public medical center. As a comprehensive university in the heart of one of the nation's largest metropolitan areas, the three central elements of the mission of the university-teaching, research and public service—are shaped by and relevant to its urban setting as well as the University of Illinois's pursuit of excellence. The economic development role of the University of Illinois is embedded in and bridges this important triad.

The mission of CUPPA is to create, disseminate, and apply multi-disciplinary knowledge about urban and public affairs. The College houses the following units and academic and professional degree programs: the Great Cities Institute, the Institute for Research on Race and Public Policy, the Natalie P. Voorhees Center for Neighborhood and Community Development, the Survey Research Laboratory, the Center for Urban Economic Development, the Urban Transportation Center, and the Great Cities Urban Data Visualization Program; a Master's and Ph.D. in Public Administration, a Ph.D. in Public Policy Analysis (Urban Planning), and a Master's and Ph.D. in Urban Planning and Policy. Through its academic programs and research centers the College prepares students to assume leadership roles in urban and public affairs; provides assistance with issues confronting policy makers in the government, community and private sector; and emphasizes urban-oriented interdisciplinary research.

The successful candidate must have achieved national stature in his or her scholarly field; have a demonstrated commitment to academic excellence and diversity; and be able to provide leadership in advancing the College's research, education and service missions. He or she will have credentials commensurate for appointment at the level of full professor. The ability to work collegially and effectively with faculty, staff and multi-disciplinary constituencies within UIC, and to continue to develop and enhance relationships with external partners is essential. Administrative experience sufficient to demonstrate the capacity to lead a college containing large multi-disciplinary academic and research units is required.

Review of nominations and applications will continue until the position is filled; however, for fullest consideration, nominations and applications should be received by April 30, 2001. Applications, which consist of a letter of intent, complete curriculum vitae, and a list of references, should be sent to:

Professor Judith Russi Kirshner, Chairperson Search Committee for Dean of the College of Urban Planning and Public Affairs Office of the Provost (MC 105) The University Illinois at Chicago 601 South Morgan Street Chicago, IL 60607-7128 (e-mail: ayui2@uic.edu) http://www.uic.edu/cruppa

The University of Illinois is an Affirmative Action/Equal Opportunity Employer.

HISPANIC OUTLOOK 03/12/2001 1061
ASSOCIATE VICE CHANCELLOR, UNIVERSITY RELATIONS

The University of California at Berkeley invites nominations and applications for the position of Associate Vice Chancellor for University Relations.

Reporting directly to the Vice Chancellor for University Relations and serving as a key member of his leadership team, the Associate Vice Chancellor (AVC) serves as the Director of Development for University Relations, and the Vice President of the UC Berkeley Foundation. The AVC is the lead fundraiser for the campus and directly solicits leadership gifts from its most influential and generous friends. In collaboration with other campus leaders, the AVC creates the comprehensive national and international fundraising strategies and plans that promote and ensure the success of the Chancellor’s campus-wide initiatives.

The management function is of critical importance. The AVC manages all development programs within the central development office and coordinates activities with unit development operations in the schools and colleges. The AVC oversees a staff of 146, and directly supervises the following positions: Principal and Major Gifts, International Development, Corporate and Foundation Relations, Planned Giving, Annual Programs, Development Communications and Events, and Development Operations. The AVC is also responsible and accountable for developing and implementing comprehensive annual budgets and for reviewing budgets of development managers.

The University seeks an exceptional leader who has demonstrated significant success as a highly effective fundraiser and manager. Candidates must have experience leading major fundraising campaigns, preferably in a major research university, and knowledge of fundraising strategies relevant to large public institutions. Proven leadership qualities include: creativity and the ability to manage and inspire high productivity and collegiality in a complex, diverse workforce; the ability to think strategically and to develop and implement effective planning, budgeting and personnel management policies; and the ability to communicate effectively in public forums, interpersonally, and in oral and written communications.

Compensation includes a competitive salary and superior benefits package, and is designed to attract a dedicated and talented professional.

The review of resumes will begin immediately. Please submit a cover letter, resume and three references to:

Belvedere Partners
P.O. Box 1275
Belvedere, CA 94920

The University of California, Berkeley is an equal opportunity employer.
GEORGIA SOUTHERN UNIVERSITY
UNIVERSITY SYSTEM OF GEORGIA

The Division of Student Affairs at Georgia Southern University is under new leadership and reorganization. The following positions are currently available, applications are being accepted, review of resumes will begin immediately and continue until the positions are filled. We are seeking applicants who are highly motivated, enthusiastic, creative, and dedicated to the principles of student learning and holistic development. The successful candidates will appreciate cultural, ethnic, and individual differences in a diverse student setting. In addition, successful candidates will demonstrate evidence of excellent organizational and communication skills, the ability to thrive in a team-oriented workplace, and effective vision, planning, and leadership. The ability to work with a diverse population is preferred. All positions offer the opportunity to teach in the University’s outstanding first year experience program.

CAMPUS RECREATION AND INTRAMURALS

**Fitness Program Director.** Reporting to the Associate Director of Campus Recreation, the Fitness Program Director oversees effective delivery of a comprehensive fitness program. The Fitness Director is responsible for developing and maintaining group exercise, personal training, and specialized fitness programs. This individual will recruit, hire, train, and supervise a diverse student fitness instruction staff for each fitness program. He or she will develop and manage a comprehensive risk management program and maintain a record keeping system for all areas within the fitness program. The Director will also create and enforce policies and procedures as related to the program. The position is a 12-month appointment, and the salary is competitive and commensurate with qualifications and experience. Minimum Requirements: Master's degree in exercise science, Kinesiology, physical education or related field. preferred field completed prior to start date; two or more certifications from the following organizations (ACSM, CSCS, NSCA, AFAA/ACE). Preferred Qualifications: certifications in both strength/personal training and aerobic training; first Aid and CPR certification. Instructor preferred. Exercise evaluation and prescription experience; experience in programming in aerobics and personal training programs; experience in staff management; a strong desire to work in an educational and recreational environment.

**Outdoor Program Director.** Reporting to the Associate Director of Campus Recreation, the Outdoor Program Director will provide experiential outdoor opportunities. The director will be responsible for the overall management and supervision of the Outdoor Recreation Program, with half time dedicated to the operation of a new university challenge course. The other fifty percent will be dedicated to the Southern Adventures Center adventure trips, climbing walls, equipment rentals, research library, and workshops. This individual will recruit, hire, train, and supervise a diverse student staff for both the challenge course and the Southern Adventures Center. He or she will develop and manage a comprehensive risk management program and maintain a record keeping system for the program. The Director will also create and enforce policies and procedures related to the Outdoor program. The position is a 12-month appointment, and the salary is competitive and commensurate with qualifications and experience. Minimum requirements: Master’s degree in Recreation, Sport Management, or related field completed prior to start date, or any equivalent combination of education and experience; First Aid and CPR certification; Wilderness First Responder certification; Red Cross Lifesaving certification. Experience in leading adventure trips required (examples include backpacking, camping, canoeing, hiking, rafting, and sea kayaking); two years experience in ropes/challenge course operation; a strong desire to work in an educational and recreational environment.

RUSSELL UNION

**Assistant Director of Programs.** Reporting to the Director of the Russell Union, this position is responsible for supervising several professional staff members, an administrative secretary, graduate assistant, and student employees. The Assistant Director is responsible for advising and coordinating programs and organizations as diverse as Homecoming, Student Government, Student Programming Board and its eight committees, and the Office of Volunteer Services. This position also provides a wide range of services for the 150 student organizations, and supervises eight budgets in excess of $250,000. The Assistant Director oversees all contract negotiations and coordinates needs assessment for the Russell Union. Minimum requirements: Master’s degree in student personnel, higher education administration, or related area required. At least three years experience in advising students and student groups, specifically student programming bodies required. Experience in contract negotiation, marketing, and events planning required. Excellent organizational, communication (verbal and written), and human relations skills required. Experience in major entertainment productions is helpful. Ability to work with diverse populations is a plus.

**Administrative Coordinator for Leadership Development.** Reporting to the Director of the Russell Union, this position is responsible for creating, developing and implementing a comprehensive leadership program. She or he will develop and implement a recognition and awards program for student leaders, student organizations and faculty/staff advisors; coordinates the Emerging Leaders Program, Southern Leaders Cookout and Recognition Ceremony, and advises the Freshman Council. The coordinator is responsible for marketing, recruiting, and selecting Southern Lead scholars; developing and implementing leadership programs for high ability high school students and Camp Eagle for incoming freshmen. The Office of Leadership Development maintains a leadership library and leadership transcript. Minimum requirements: Master’s degree in student personnel, higher education administration, or related area required. At least three years experience in Student Affairs or a related area required. Experience in advising students and student groups desirable. Excellent organizational, communication (verbal and written), and human relations skills required. Ability to work with diverse populations preferred.

COUNSELING CENTER

**Counseling Psychologist.** Reporting to the Director of the Counseling Center, the responsibilities include individual and group counseling, psychological and vocational testing and interpretation, crisis intervention and assessment, and consultations. This staff member will also provide programming on a variety of mental health issues. Experience in providing counseling and outreach services to minorities preferred. Minimum requirements: Doctoral degree required. Specialization in developmental concerns of college students highly desirable. Eligibility for licensure as a psychologist preferred.

CAREER SERVICES

**Director.** Reporting to the Associate Vice president for Student Affairs, this person will provide leadership and direction to the comprehensive career services unit of the University. The director will establish guidelines, set policies, supervise the operation of the Career Services Office and its satellite office in the College of Business Administration; prepare, allocate, monitor, and manage budgets, gifts, grants, and bequests; lead the department professional and support staff in the coordination of experiential education and professional full-time employment programs; cultivates strong employer relations, coordinates various career days/fairs, enhances the on-campus recruiting program, develops experiential education opportunities, and makes career services available to the total university community. She or he will function as a member of the Deans and Directors management team of the Division of Student Affairs. Minimum requirements: Master’s degree in business administration, higher education, student personnel, counseling, or related field. Five or more years in management, of which at least three have been in a career services or placement area of a higher education setting.

**Recruitment Coordinator.** Reporting to the Director of Career Services, this position serves as the primary liaison between the career services office and the employer community. This position is responsible for on-campus recruiting and resume referral programs for full-time professional and experiential education employment opportunities. The Coordinator will work with employers from various industries to participate in Georgia Southern University’s recruitment services. She or he works with employers in retrieving resumes from the Career Connections database for resume referrals and setting up on-campus interviews; and hosts employers. The Coordinator assists students in resume development, critiques resumes, conducts mock interviews, develops and presents career related programs using the Career Resource Center, and develops information material to assist students as needed. Minimum requirements: Applicants must have a bachelor’s degree. Preference will be given to candidates who have a masters degree. A minimum of one year of career services, student advisement, or student services is highly desirable. Must also have excellent organizational, interpersonal, communication and computer skills.

74 HISPANIC OUTLOOK 03/12/2001
MULTICULTURAL AND INTERNATIONAL STUDENT CENTER

**Director.** Reporting to the Associate Vice President for Student Affairs, the Director educates the student body and university community regarding issues of diversity, international student affairs, and differences. The Director provides vision for the Center and leadership of a wide range of diversity programs and services for U.S. and international students to advance the University's strategic theme of transcultural opportunities. Advocacy for diversity and inclusion is a major aspect of the responsibility entrusted in the Director of the Multicultural and International Student Center. He/she cultivates close working relationships with students, faculty, and staff in order to promote the awareness of multiculturalism, inclusion, and pluralism. Prefer a record of successful programming and advising diverse and international students. Minimum requirements: Master’s degree in Higher Education, College Student Personnel Administration, Public Administration, business administration, or related field required. Minimum of three years experience in student personnel administration required. A record of successful programming and advising diverse and international students is required.

EDUCATIONAL OPPORTUNITY PROGRAMS

**Director.** Reporting to the Associate Vice President for Student Affairs, the Director supervises the staff of the Upward Bound, Educational Talent Search, and Ronald McNair Post-Baccalaureate Achievement Programs which are designed to prepare low income and potential first generation middle school, high school, and out of school students for success at post-secondary schools and college students contemplating graduate school. The Director is responsible for administering over $800,000 annually in federal and state grants. Successful grant-writing and negotiation experience a must, preferably in TRIO Programs. Demonstrated experience working with students from disadvantaged backgrounds is a plus. Minimum requirements: Masters degree in social science, education, or business. Minimum of three (3) years of demonstrated administrative experience. Successful grant-writing and negotiation experience a must, preferably in TRIO Programs.

UNIVERSITY HOUSING

**Area Director.** Reporting to the Director of University Housing, the Area Director provides direction, oversight, and management for an area of 1,400 students, including supervision of two professional hall directors, 2-4 graduate student hall directors and 30-35 resident advisors. She or he will be responsible for academic initiatives within communities, development of student leadership, community development, and discipline. The position is an integral part of the department leadership team responsible for goal setting, budget management, and departmental committees. The Area Director is the Instructor of record for an RA class and/or freshmen seminar course. Minimum requirements: Master’s degree required. Two years of post-masters experience preferred. Furnished apartment and excellent benefits.

**Hall Director.** There are two positions available. The Hall Director will coordinate the residence life program in a hall of 250-430 students; set goals and provide direction for academic learning community; train and supervise an 8-16 student staff, chair departmental committees; mentor graduate staff, have the opportunity to instruct an RA and/or freshmen seminar class. Minimum requirements: Bachelors and residence hall experience required. Masters preferred. Furnished apartment and excellent benefits. Understanding of college student issues and ability to succeed in team atmosphere is a must.

Screening of applications begins immediately and will continue until the positions are filled. Most positions begin July 1. 2001. A complete application consists of a letter addressing the qualifications cited above, a curriculum vita, and the names, addresses, e-mail addresses, and telephone numbers of at least five professional references. Applications and nominations should be sent to: Division of Human Resources, c/o (name of the position), Georgia Southern University, Post Office Box 8104, Statesboro, GA 30460-8104.

The names of applicants and nominees, vitae, and other non-evaluative information may be open to public inspection under the Georgia Open Records Law. Georgia Southern University is an Equal Opportunity, Affirmative Action Institution. Individuals who need reasonable accommodations under the ADA in order to participate in the application process should contact the search chair.

Dean, School of Nursing
Bouve College of Health Sciences

Bouve College of Health Sciences invites applications and nominations for the position of Dean of the School of Nursing. The Dean is the chief academic officer of the School of Nursing, Associate Dean of the College of Health Sciences, and reports directly to the Dean of the Bouve College of Health Sciences. The School of Nursing is nationally known for its community-based approach to undergraduate and graduate nursing education. The School works in partnership with surrounding urban neighborhoods and institutions for clinical and co-operative placements as well as research, practice, and community service.

Duties and Responsibilities
   The Dean is responsible for providing leadership for the School of Nursing's service-related functions, teaching activities, and research projects within a tradition of shared governance. The Dean also represents the Bouve College on nursing-related boards, commissions, and associations. The Dean is responsible for curriculum, budgets, personnel matters, and strategic planning in the School. The Dean will provide leadership and work with the Dean of Bouve to design and conduct developmental activities for the School of Nursing.

Qualifications
   Leadership, creativity, and vision are required to prepare the School for the expanding role of nursing practice in the clinical setting and the health care industry. The successful candidate must possess a doctorate in nursing or related field, have experience in research, education, and practice, and an established record in obtaining external funding for research and program development. An outstanding record of scholarship with an appreciation of diverse modes of inquiry, and a demonstrated increase in levels of administrative responsibilities are expected. Candidates should have strong interpersonal and communication skills, commitment to co-operative education, and evidence of a strong dedication to the goals of a national research university that is student-centered and urban. An active commitment to principles of interdisciplinary education, research and service that underlie the creation of the Bouve College of Health Sciences is expected. The candidate must have experience in, or a demonstrated commitment to, achieving and maintaining diversity in the workplace.

A competitive salary commensurate with qualifications and experiences is provided and includes an outstanding benefits package.

Application review process will begin April 2, 2001 and continue until the position is filled. Please direct inquiries and applications to: Barbara R. Kelley, RN, EdD, Associate Professor, Chair, Dean Search Committee, c/o Faculty Senate Office, 442 RV, Northeastern University, Boston, MA 02115.

Richard Stockton College is an innovative, residential, liberal arts and sciences college with a student body of 6,000 located on a 1600-acre wooded campus in southern New Jersey, 15 miles from the Atlantic Ocean, 1 hour from Philadelphia and 2-1/2 hours from New York City. Stockton College has a national reputation for academic excellence and innovation. It is recognized by the Carnegie Foundation, US News and World Report and Kiplinger as a nationally ranked liberal arts institution.

Salary is based on qualifications and experience. Screening begins March 26, 2001 and will continue until position is filled. Send letter of application, resume and names, addresses and telephone/email addresses of at least three references to Mark Jackson, Director, Media Services & Distance Education, The Richard Stockton College of New Jersey, PO Box 195, Pomona, NJ 08240-0195.

Stockton is an AA/EOE. Women and minorities are encouraged to apply. R013516

DEAN ~ SCHOOL OF SCIENCE

The College of New Jersey invites applications and nominations for the position of Dean of the School of Science, a new school composed of the departments of biology, chemistry, physics (and earth sciences), mathematics (and statistics), and computer science. The new school will have 60 full-time faculty and 1,100 majors in bachelor degree programs and will be located primarily in adjoining new facilities totaling more than 200,000 square feet.

The College (website: www.tcnj.edu) is one of the most selective public colleges in the nation. Primarily residential and undergraduate, it has 5,800 FTE students and 350 full-time faculty. The beautiful 289-acre campus is located 10 miles from Princeton and is convenient to Philadelphia and New York as well as the Jersey shore and the Pocono Mountains.

The Dean will report directly to the Provost of the College. Specific responsibilities include: program and faculty development; advancing the quality of instruction; promoting faculty scholarship and undergraduate research opportunities; fostering interdisciplinary initiatives in both teaching and research; managing the school budget and personnel recruitment.

Preference will be given to applicants who have a:
• Ph.D. in a discipline representing a department within the school;
• Distinguished record in teaching and scholarship that would merit appointment as a full professor;
• Relevant leadership and administrative experience;
• Proven ability in fundraising and external grants;
• Commitment to participatory management and the development of collaborative programs within the school, across the schools of The College, and with entities outside of the College.

Applications and/or nominations will be reviewed beginning immediately and will be accepted until the position is filled. We anticipate beginning the interview process in late March. Applications will be held in confidence and should include a letter of interest along with a detailed vita and the names, addresses, and phone numbers of three references. Send to: Search Committee – Dean of Science, Office of Academic Affairs, The College of New Jersey, PO Box 7718, Ewing, NJ 08628-0718. Materials may also be submitted electronically to: academic@tcnj.edu. To enrich education through diversity, The College of New Jersey is an Affirmative Action/Equal Opportunity employer.
UNIVERSITY OF WISCONSIN MILWAUKEE

DEAN
OF THE COLLEGE OF LETTERS AND SCIENCE

The University of Wisconsin-Milwaukee invites nominations and applications for the position of the Dean of the College of Letters and Science (L&S). The Dean is the chief administrative officer of the College, reporting to the Vice Chancellor for Academic Affairs & Provost, and participating in a shared governance system with faculty and staff.

The University of Wisconsin-Milwaukee (UWM), Wisconsin's major public urban research university, is located in an attractive setting near the shores of Lake Michigan, and only minutes from the center of metropolitan Milwaukee. UWM offers a comprehensive liberal arts and professional education at the undergraduate and graduate levels to its 23,000 students and is one of the two doctoral-granting campuses of the University of Wisconsin System. The College of L&S is the largest academic unit of the University, with approximately 450 full-time faculty and professional academic staff. The College offers 46 undergraduate degree programs, 23 Master's programs, and 12 Ph.D. programs.

QUALIFICATIONS: The position of Dean requires an earned doctoral degree and experience as a college or university faculty member and administrator. Candidates must be eligible for a tenured appointment as full professor in a department within the College of Letters and Science. Candidates will also be evaluated on their proven ability to:

- Support diversity and inclusiveness in the recruitment, development and retention of faculty, staff and students;
- Promote excellence in undergraduate and graduate education;
- Provide leadership in sustained development of scholarly research and extramural funding;
- Encourage collaboration among the College of Letters and Science, the university, the community, and other institutions of higher education;
- Engage in advancing educational technology;
- Administer effectively within a shared governance system;
- Contribute successfully to initiatives in fundraising and alumni relations.

APPLICATION PROCEDURE: This position is available August 1, 2001 but the start date is negotiable. Applications must include a letter of interest, curriculum vitae, and the names, addresses and telephone numbers of five reference persons. Review of applications will begin on March 26, 2001, and continue until a qualified candidate is selected. Please submit applications or inquiries to:

Professor Cortiss Philabaum, Chair
Search and Screen Committee for
Dean of the College of Letters and Science
The University of Wisconsin-Milwaukee
P.O. Box 413, Mitchell Hall 225
Milwaukee, WI 53201
Or
Fax to: (414) 414-229-518
E-Mail to: tammyh@uwm.edu

We are being assisted in this search by Dr. Jean Dowdall, A.T. Kearney Executive Search. She can be contacted at jean.dowdall@atkearney.com.

Additional information about the University of Wisconsin-Milwaukee can be obtained from our Web site at: www.uwm.edu. For more information about the College, please visit: www.uwm.edu/lsei.

UWM is an AA/EO employer.
MICHIGAN STATE UNIVERSITY

Director of Residence Life

Michigan State University invites applications and nominations for the position of Director of Residence Life.

Michigan State University, a member of the Association of American Universities (AAU), is one of the nation's leading research-intensive, land-grant institutions. Its fourteen colleges offer 200 programs of undergraduate study and 76 areas of graduate study including three colleges of medical education. Of the approximately 43,000 students, over 14,000 live in the campus residence halls and 2200 live in university apartments. MSU has a long tradition of public service in addition to a strong emphasis on teaching and research. The University's campus neighbors the state capitol with close proximity to a wide variety of cultural and recreational activities.

Responsibilities:

Reporting to the Vice President for Student Affairs and Services, the Director of Residence Life will:

- Provide leadership to the University for the Residence Life program that integrates the intellectual, developmental, personal, social and recreational interests of students in a learning community.

- Work closely with academic colleges to develop a learning environment in the residence halls that supports the University's academic goals.

- Work closely with the faculty, all departments within the Division of Student Affairs and Services (including Office of Judicial Affairs), the Office of Minority Student Affairs, and other support services within the University, in order to foster and ensure communication for the successful development of the Residence Life program.

- Provide direct supervision for the staff, budget, and operations of the Department of Residence Life.

- Develop and maintain an effective staff development and training program for professional staff and residence assistants.

- Work collaboratively with University Housing Management to ensure the maintenance of facilities.

- Participate as a member of the Vice President's leadership team.

Requirements:

Candidates must have a successful track record (five to eight years) as a leader who has demonstrated knowledge of student development, collaborative learning, residence hall programming, building learning communities, and staff development. This Executive Management Position requires strategic planning and thinking skills, written, verbal and interpersonal communication skills, and the ability to work collaboratively with faculty, staff, administrators and students at all levels in a complex diverse environment. A master's degree is required (a doctorate is preferred).

Please send resume and cover letter by March 19, 2001 to:

Ms. Penny Wall
Office of the Vice President
For Student Affairs and Services
153 Student Services Building
East Lansing, MI 48834-1113

EEO/AA

DIRECTOR

NJ School of Conservation

Responsible for developing and implementing a strategic School vision for the 21st century. Responsible for developing and implementing a strategic School vision for the 21st century. Represent the School before the general public, the University community, professional organizations, and government, private and corporate agencies. Serve as a link between the School and local, national and international environmental field centers and related institutions to maintain the School's currency. As senior manager on site, responsible for overall administration of the School. Provide leadership and vision to the personnel, fiscal planning and programmatic functions. Specific duties include developing and implementing budgets; identifying and securing supplemental funding from State, Federal and private sources; identifying and implementing a staff development program that enhances the goals of the School; overseeing the evaluation of faculty, graduate assistants and staff, providing direction to instructional, research and outreach programs of the School; advising School and University faculty as they develop and implement educational and research agendas that are consistent with the goals of the School; developing programs for expanded audiences in New Jersey and the surrounding region; and developing and implementing a long-term strategic plan for upgrading School facilities and infrastructure.

Qualifications: Doctorate in environmental field science, natural history or a closely related discipline with a minimum of five years of professional experience. Demonstrated ability to interact effectively with a broad range of constituents including clients and potential clients, members of the faculty and staff, students, supporters and potential supporters of the School, representatives of local and state agencies that monitor the operation of the School and the general public. Candidates should provide evidence of appropriate managerial experience. Broad knowledge of forestry, wildlife management, water ecology, geology and meteorology will be most helpful.

Starting Salary: $61,755 - $92,641
Starting Date: September 1, 2001
Apply By: Screening of applications begins March 12, 2001 and continues until position is filled.
Send letter and resume (including V&I) to: Dr. Kenneth C. Wolf, Montclair State University, Human Resources, College Hall Box C316-V#56/HLH, Upper Montclair, NJ 07043

MONTCLAIR STATE UNIVERSITY
Marine Science and Ocean Engineering at the University of New Hampshire

New Hampshire Sea Grant
Center for Coastal and Ocean Mapping
Cooperative Institute for New England Marine and Fisheries
Cooperative Institute for Coastal and Estuarine Environmental Technology
Ocean Process Analyses Laboratory in the Institute for the Study of Earth, Oceans, and Space

The Marine Program, including:
Center for Ocean Engineering, Center for Ocean Sciences, Center for Marine Biology

Director of the Marine Program

The UNH Marine Program provides the administrative framework for a significant portion of the University's marine research, education, and outreach activities. In addition to involvement in undergraduate and graduate academic programs, Marine Program faculty members conduct a number of research activities, which are funded in excess of $6 million dollars per year by competitive grants and contracts and the Hubbard Endowment Fund. Numerous facilities support the functions of the Marine Program, including: Jackson Estuarine Laboratory, the Coastal Marine Lab, and the RV Gulf Challenger.

Responsibilities: Reporting to the VP Research & Public Service and with guidance from the Marine Program Board, the MP Director will administer all aspects of the Program, will develop and maintain facilities, and will advocate internally and externally for marine related research conducted at UNH. Essential functions include facilitating marine related faculty and academic program development; developing marine related research programs and proposals; enhancing funding; providing general oversight for MPH labs, vessels, and other physical facilities; coordinating MP activities with those of related programs; developing long term strategic plans and annual program plans; administering MP state and federal grants and overseeing budgets; supervising MP administrative, vessel, and diving staff; increasing program visibility internally and externally; representing UNH and UNH related and national organizations in committees and boards; and advising administration on matters relating to the Program; chairing the MP Executive Committee and participating as a member of the Marine Program Board.

Qualifications: Ph.D. in life sciences, physical sciences, or engineering, with an emphasis on Marine science/engineering. Ten years experience in marine related research and development. Demonstrated ability to conceive and conduct original research. Demonstrated success in attracting external funding for research. Experience in program development and implementation. Experience with institutions of higher education. Excellent oral and written communication skills. Ability to work with a variety of constituencies. Salary: Competitive and commensurate with experience. This is a full time, 12 month position.

Application Review: Begins March 15 and will continue until position is filled. Start date as early as May 1, 2001. Applicants should send a letter of intent, curriculum vitae, and the names, addresses, and phone numbers of 3 references to: Chair, MP Director Search Committee at the address below:

Director Of The NOAA/UNH Cooperative Institute For New England Marine and Fisheries (CINEMar)

Established by Memorandum of Understanding between the NOAA Office of Oceanic and Atmospheric Research (OAR) and UNH, the mission of CINEMar is to serve as a regional and national center in which representatives from universities, industry, federal and state programs, and non-governmental organizations may work together on issues in three broad program areas: 1) marine culture, 2) fisheries, and 3) marine policy.

Responsibilities: Reporting to the VP Research and Public Service, the CINEMar director will oversee the planning and operation of the Institute. Essential functions include: developing and implementing strategic plans, annual program plans, and operating budgets, and annual evaluation of activities; providing the UNH Open Ocean Aquaculture Demonstration Project that serves as the Institute's program in marine culture, and providing leadership and vision in developing the fisheries and marine policy components; developing a summary statement for the UNH physical facilities and equipment related to CINEMar, exercising responsibility for all business and financial matters relating to the Institute's operation; overseeing the research and associated administrative activities of UNH participants; supervising the CINEMar administrative and support staff; establishing an Advisory Board with representation from industry, academia, federal and state agencies and programs, and non-governmental organizations; working with UNH administrators and faculty in advancing partnerships with the appropriate industry, state and federal program, and NGO representatives to pursue Institute goals; and promoting the Institute through presentations and written material.

Qualifications: Ph.D. in marine science or appropriate terminal degree is a relevant field of science or engineering. Minimum of five years experience in fisheries and/or aquaculture research and development. Demonstrated ability to administer a large R&D program; and to successfully attract external funding. Excellent oral and written communication skills. Supervisory experience. Ability to work effectively with a variety of constituencies.

Additional desirable qualifications: Demonstrated ability to work with the commercial fishing community and to conduct marine research in fisheries and/or aquaculture. Entrepreneurial experience in the aquaculture industry. Salary: Competitive and commensurate with experience. This is a full time, 12 month, grant-funded appointment.

Application Review: Begins March 15 and will continue until position is filled. Start date as early as May 1, 2001. Applicants should submit a letter of intent, curriculum vitae, and the names and contact information for 3 references to: Chair, CINEMar Director Search Committee at the address below:

IUPUI Purdue University Indianapolis

The Division of Student Life & Diversity at IUPUI was recently established to advance an ambitious agenda of student services, programs, policies, and facilities that will significantly enhance student leadership, diversity, and graduation, working in collaboration with the 23 schools that comprise IUPUI.

We are currently seeking outstanding candidates for three positions:

Must have strong interpersonal and organizational skills, demonstrated ability to lead a comprehensive transformation of the human resources function, ability to work well in a fast-paced team environment, and a commitment to the mission of the university.

THE UNIVERSITY:
The University of Wisconsin-Milwaukee, located in the City of Milwaukee in an attractive setting near the shores of Lake Michigan, offers baccalaureate, masters and doctoral degrees in twelve colleges and schools serving more than 23,000 students, including 4,000 at the graduate level. The campus also maintains vigorous outreach, extension and continuing education programs.

QUALIFICATIONS:

- Master’s Degree plus 5 years of progressively responsible human resources management experience -OR- Bachelor’s Degree plus 8 years of progressively responsible human resources management experience;
- Human resources experience, to include solid working knowledge of and experience in diverse HR specializations (e.g., compensation, position classification and analysis, training/employee development, recruitment, performance appraisals, benefits management, and labor relations), as well as a working knowledge of information technology applications for HR functions;
- Human resources management experience in higher education or the public sector highly desirable.

APPLICATION PROCEDURE:

Screening of all candidates will begin March 19, 2001, and continue until a qualified candidate is chosen. Salary is competitive, dependent on qualifications. Please send a letter of application, resume, and names and addresses and phone numbers for three professional references to:

John Wanat
Provost & Vice Chancellor
University of Wisconsin-Milwaukee
P. O. Box 413
Milwaukee, WI 53201-0413
Phone: 414.229.4896 - FAX: 414.229.2481
WEB: www.uwm.edu/Hr/HR

Candidates may also email application materials to bkemp@uwm.edu

UWM is committed to diversity and equal employment opportunity in education and employment. We particularly encourage applications/nominations from individuals who would enhance and diversify our workforce.

DEAN ~ SCHOOL OF EDUCATION

The College of New Jersey invites applications and nominations for a Dean to lead its nationally recognized School of Education and to build upon the programmatic and partnership initiatives that characterize its mission of Creating Exemplary Professionals. With a full-time faculty of 60, the School serves 1,300 undergraduate and 1,000 graduate students, and offers bachelor’s, master’s and educational specialist degrees and certificates in counseling, teacher education, educational leadership, educational technology, reading, special education, education of the deaf and hard of hearing, and speech pathology and audiology. The School of Education has a Professional Development School Network partnership with fourteen public school districts. Its global teaching and international teacher certification and master’s programs are recognized for their quality and continuity.

The School of Education is accredited by the National Council for Accreditation of Teacher Education (NCATE), the Council for Accreditation of Counseling and Related Educational Programs (CACREP), the Council for the Education of the Deaf (CEED), and the American Speech-Language-Hearing Association (ASHA). Its programs have received the Best Practice Award of the American Association of Colleges for Teacher Education for Global and International Teacher Education (1998), Comprehensive Services in Education (1999) and Gender Equity (2001).

The College (website: www.tcnj.edu) is one of the most selective public colleges in the nation. Primarily residential and undergraduate with targeted graduate programs, it has 5,600 FTE students and 350 full-time faculty. The beautiful 289-acre campus is located 10 miles from Princeton and is convenient to Philadelphia and New York as well as the Jersey shore and the Pocono Mountains.

The Dean will report directly to the Provost of the College. Specific responsibilities include: program and faculty development; advancing the quality of instruction; promoting faculty scholarship and student research opportunities; fostering interdisciplinary initiatives in both teaching and research; coordinating partnerships with schools and agencies; managing the school budget; and personnel recruitment.

Preference will be given to applicants who have an:
- Earned doctorate in a discipline representing a department within the school;
- Distinguished record in teaching and scholarship that would merit appointment as a full professor;
- Relevant leadership and administrative experience in university and professional settings;
- Record of promoting diversity and fostering a collaborative, multicultural, and global perspective;
- Proven ability in fundraising and external grants;
- Commitment to participatory management and the development of collaborative programs within the school, across the schools of The College, and with entities outside of the College.

Applications and/or nominations will be reviewed beginning immediately and will be accepted until the position is filled. We anticipate beginning the interview process in late March. Applications will be held in confidence and should include a letter of interest along with a detailed vita and names, addresses, and phone numbers of three references. OAKTON Community College

OAKTON COMMUNITY COLLEGE is a dynamic, comprehensive community college with two campuses serving the North Shore suburbs of Chicago. The College is known for its academic programs, commitment to serving students, and a strong financial position. With an annual budget of $60 million and an enrollment of 20,000 students, Oakton is seeking candidates to fill the position of Director of Resource Development. Oakton receives over $20 million in grant funds annually, and this position is critical to the College’s financial health. In collaboration with other College administrators, the Director implements grant-supported programs and ensures compliance. The position requires strong organizational and interpersonal skills, including the ability to work with a diverse group of stakeholders, including government funding agencies.

Responsibilities

- The successful candidate will be responsible for overseeing the Office of Resource Development, working closely with faculty and staff to identify and fundraise for student grants in the College’s five academic divisions.
- The position requires strong organizational and interpersonal skills, including the ability to work with a diverse group of stakeholders, including government funding agencies.
- The successful candidate will be expected to develop and maintain effective communication with all stakeholders, including government funding agencies and the public.

Requirements

- Minimum of 8 years of administrative experience
- Bachelor's degree in Business Administration, Finance, or related field
- Experience in grant writing and resource development
- Strong interpersonal and communication skills

To apply, submit your resume and cover letter to:
OAKTON Community College
Human Resources
1600 E. Golf Road, Des Plaines, IL 60016-1268
(847) 635-1675, fax: (847) 635-1764, e-mail: admsearch@oakton.edu
Nominations may be submitted to Human Resources at the above address or via e-mail to clwermann@oakton.edu

Additional information about Oakton can be found at www.oakton.edu

Confidential screening of applicants will begin March 21, 2001 and continue until the position is filled. Preferred starting date is July 1, 2001.

Michigan State University invites applications and nominations for the position of Director of Career Services and Placement.

Michigan State University, a member of the Association of American Universities (AAU), is one of the nation’s leading research-intensive, land-grant institutions.

Responsibilities

Reporting to the Vice President for Student Affairs and Services, the Director of Career Services and Placement will:

- Oversee the Career Services and Placement Office (CSP). This office consists of Career and Placement Services, Student Employment Office, Service Learning Center (Experiential Learning), College of Engineering, and the Career Development Center.
- Work collaboratively with the Office of Career Development and the Career Development Center to provide career services to students.
- Work collaboratively with the Undergraduate Division, Counseling Center, and academic advising and student affairs offices in the college in order to provide career services to students.
- Provide programmatic and leadership direction and development for the array of services that contribute to the placement of MSU students and alumni in jobs that are meaningful, national and international.

FINANCIAL AID OFFICE
DIRECTOR POSITION
SUNY COLLEGE AT FREDONIA

The College at Fredonia seeks applications for the position of Director of Financial Aid. Reporting to the Vice President for Student Affairs, the position is responsible for managing a comprehensive financial assistance program awarding over 28 million annually in compliance with federal and state regulations.

Applicants should possess an understanding and commitment to enrollment management, the strategic use of financial aid and a proactive approach to student services. The position requires a Master’s Degree and a minimum of five years of progressively responsible financial aid experience. Must have experience in financial aid computing system, specifically SCT Banner and excellent writing, oral presentation and counseling skills. Demonstrated ability to work effectively with supervisors and colleagues.

Review of applications will begin on April 2, 2001 and continue until the position is filled. Please send cover letter, resume and two letters of reference to Harry Watters, Director of Residence Life, Gregory Hall, SUNY at Fredonia, Fredonia, NY 14063.

SUNY Fredonia is an equal opportunity/affirmative action employer. We actively seek and encourage applications from minorities, women and people with disabilities.

ASSISTANT PROFESSOR, HISTORY
Plattsburgh State University of New York is a comprehensive, coeducational, public institution of nearly 6,000 undergraduate and graduate students. Located on the shore of Lake Champlain, the College is the intellectual and educational center for the Lake Champlain/Adirondack region of New York State. The small city character of Plattsburgh and neighboring Burlington, VT provides a quality of life unsurpassed for the whole family. Outdoor activities abound along Lake Champlain, in the Adirondack High Peaks and nearby Olympic resort village of Lake Placid while the urban, multicultural lifestyle is rich in neighboring Montreal, Canada, one hour’s drive from campus. Plattsburgh is easily accessible to New York City and Boston via air, bus, train and Interstate 87.

The History Department at Plattsburgh State University of New York invites applications for a full-time, tenure track position at the rank of assistant professor to begin Fall 2001. Qualifications: Historian with a specialization in environmental history, an ability to teach U.S. or global history surveys; potential for long-term scholarly research. Ph.D. by September 2001 required; teaching experience and scholarly publications preferred. Responsibilities: Nine credit hours per semester.

Applications from women and minority candidates are especially welcome. Plattsburgh State University is an affirmative action, equal opportunity employer.

Salary: $38,000-$43,000 with excellent benefits. Review of applications begins immediately and continues until position is filled. Please send or fax letter of application, a statement of teaching philosophy, three letters of reference, and other pertinent materials to: Chair, Search Committee (P22529-808), c/o Human Resources, Plattsburgh State University of New York, 101 Broad Street, Plattsburgh, NY 12901-2681. Fax (518) 564-9060.

The Office of Residence Life at Bowling Green State University is seeking creative, dynamic professionals for the following key positions:

Area Coordinator
1-2 Anticipated Vacancies

The Area Coordinator is responsible for the overall operation of an area of undergraduate residence halls which house between 1500 and 1900 students. Responsibilities include the supervision of a secretary, full-time hall director, part-time graduate hall director, and hall security and staff. Administration of the area budget, oversight of area facility issues; and the coordination of area parital affairs. Minimum qualifications are a Bachelor’s degree in College Student Personnel or related area and previous full-time residence hall experience. To be successful in this position, the Area Coordinator must have excellent interpersonal communication skills, organizational skills, supervision experience and administrative experience. In addition, the Area Coordinator must have a demonstrated desire to work in a residential setting and be a strong advocate for diversity and personal growth in the residence hall environment.

Assistant Director of Residence Life for Housing Administration

The Assistant Director of Residence Life for Housing Administration will manage residency hall assignment process for all co-op residence halls and serve as the primary contact person for students, parents, or visitor questions and issues related to the housing assignment process. In addition, the Assistant Director will coordinate all prospective visitation programs that occur during the academic year and be the primary residence life participant in the summer orientation and registration program. Minimum qualifications include a masters degree in College Student Personnel or related field, with 3 years of full-time work experience in housing or residence life. Starting salary range is $35,995 to $37,500. Full benefit package available. To apply submit a letter of application, resume and three letters of recommendation. Applications are being accepted at Office of Housing Resources (Search #025), 100 College Park Office Building, Bowling Green State University, Bowling Green, OH 43403.

Assistant Director Of Residence Life For Educational Initiatives

The Assistant Director of Residence Life is responsible for the administration of specific educational initiatives designed and supported by the Office of Residence Life. These responsibilities include the selection and training of administrative and support staff who work in the residence units, supervision of a graduate assistant, development and implementation of all diversity activities for the office, administration of co-curricular programs, system-wide programming, the coordination of programs and services for students who live in campus residences, and working as a liaison with the Academic Affairs staff. Minimum qualifications are a Masters degree in a College Student Personnel Administration or related field. Three years full-time experience in responsible leadership at a college or university is required. This is a full-time administrative staff position. Administrative grade level 4; salary range is $35,295 to $37,500. Salary is commensurate with experience and a full benefits package is available. To apply submit a letter of application, resume and 3 letters of recommendation. Applications are being accepted at Office of Housing Resources (Search #025), 100 College Park Office Building, Bowling Green State University, Bowling Green, OH 43403.

Coordinator of Greek Affairs

Anticipated Vacancy

The Coordinator of Greek Affairs is responsible for the administration of all student organizations and activities for the University-owned fraternity and sorority chapters. Responsibilities include the selection, training, and supervision of graduate House Directors and House Assistants; program coordination and development; public relations; member recruitment; historical research; coordinating Greek Week; advising and serving as a liaison between the Office of Residence Life and all university departments. Minimum qualifications are a Masters degree in Education Administration or related field; five years of full-time experience with fraternity and sorority supervision, preferably in a residential setting, or residence life; student organization advising experience. Knowledge of residence hall operations, supervisory experience, excellent interpersonal and communication skills; strong organizational skills; organization advising experience, knowledge of student development learning theory and practice, basic computing experience, strong administrative skills, crisis management experience, training and development experience, demonstrable knowledge of Greek Letter organizations; full-time administrative staff position. Administrative grade level 3; salary range is $35,600 to $38,000. Salary is competitive and commensurate with education and experience. Full benefits package available. To apply submit a letter of application, resume and names, addresses and telephone numbers of three professional references to Office of Human Resources (Search #027), 100 College Park Office Building, Bowling Green State University, Bowling Green, OH 43403. Review of applications will begin on March 30, 2001 and continue until the positions are filled. Bowling Green State University is an Affirmative Action/Equal Opportunity Employer and Educator. We are committed to a multicultural environment and strongly encourage applications from women, minorities, women and persons with disabilities. BGSU employs only those individuals authorized to work in the United States.

ASU WEST
ARIZONA STATE UNIVERSITY WEST

Learning Enhancement Center

President

ASU West is seeking an individual to initiate, develop, and lead a campus-wide Learning Enhancement Center. This Learning Enhancement Center will house and coordinate several existing campus programs—the Center for Writing Across the Curriculum and Tutoring Services, among other—and further expand their offerings into a coherent and broad-based program of comprehensive student academic support. The main responsibilities of the Director will include supervision of a tutoring/writing center and its staff, development of academic support systems for the campus’s learning communities and lower division programs, particularly supplemental instruction, and regular communication and consultation with faculty about learning support programs and issues.

The Learning Enhancement Center will be housed in the Division of Collaborative Programs, the campus unit that houses cross-campus, -university, and institutional programs, and the Director will report to the Dean of Collaborative Programs. The Director will also hold a tenured faculty position in one of the campus’s instructional units and will teach one course per year for that unit.

The successful candidate must meet the following qualifications:
- Doctorate of Education or doctorate degree in a related field
- A record of teaching and scholarship that demonstrates a record of achievement in one of ASU West’s colleges, and experience working with university learning support programs
- Specific expertise in Writing Across the Curriculum programs, supplemental instruction, digital multimedia, and multicultural academic support programs
- Institutional assessment and measurement, and/or mathematical support programs is desired.

Applicants should submit a current resume, letter of interest and nomination letters. Three references should be submitted to Allison Ross, Arizona State University West, P.O. Box 37100, MC 2851, Phoenix, Arizona 85069. For more information regarding our campus, please visit www.west.asu.edu

DARTMOUTH COLLEGE
ETHICS INSTITUTE AT DARTMOUTH COLLEGE

Executive Director

Working with the half-time Faculty Director, the successful candidate will formulate, organize and implement programs and initiatives consistent with the Institute’s mission as a faculty consortium, the primary goal of which is to promote interdisciplinary teaching and research in applied and professional ethics at Dartmouth College. The Executive Director will serve as a financial leader of various institutional and departmental initiatives and/or professional activities, and will be an active participant in faculty, departmental, or university committees and decision-making processes. The Director will also serve as a consultant to Dartmouth College, the Faculty, and/or the University.

Minimum Qualifications:
- Master’s degree or other postgraduate degree and strong liberal arts background; training in conceptual and analytical work in ethics or a related field
- 2-3 years of experience in administrative/management, preferably in a research/academic setting; or a Bachelor’s degree with similar training and 4-5 years of similar experience or the equivalent

Review of applications will begin on March 28, 2001 and continue until the position is filled. Send cover letter, resume, and salary expectations to Executive Director Search Committee, Ethics Institute at Dartmouth College, 6031 Parker House, Hanover, New Hampshire 03755-3500 or email applications to ethics.institute@dartmouth.edu

Dartmouth College is an Equal Opportunity/Affirmative Action Employer.
Assistant Director
Graduate Admissions

Princeton University's Woodrow-Wilson School of Public and International Affairs seeks an Assistant Director of Graduate Admissions to assist with the recruitment and admissions processes for the Master's and Ph.D. degree programs and the Junior Summer Institute. Individual will develop and implement recruitment strategies of students and professionals historically underrepresented in graduate programs and careers of public and international affairs. Extensive travel to colleges and universities, graduate admission fairs, and abroad for international recruitment is needed. Duties include participating in the admissions process; supervising recruitment mailings; conducting information sessions; creating and maintaining professional contacts; evaluating applications; calculating financial aid; and reviewing and editing catalogs and brochures for WWS graduate programs.

Position requires a BA and exceptional interpersonal skills. Candidate should have the personality to work amicably with a variety of people through the admissions process while communicating effectively with applicants, recruiting contacts, current students, staff, faculty and alumni. Superb writing, speaking, and presentation ability is essential, as is the ability to convey information in a clear and compelling manner to diverse audiences. Admissions or administrative experience in a higher education environment representing historically underrepresented students is preferred. MPA or equivalent degree and knowledge of professional education desirable.

For full consideration, please apply by March 31, 2001. Princeton provides an exceptional benefits package. Interested candidates should apply online at: http://www.princeton.edu/hr/emp or send resume and salary requirements to: Human Resources, One South 1350-HHE, Princeton University, Princeton, NJ 08544-5264. NO FAXES, PLEASE. An equal opportunity employer.

Princeton University
University of Missouri-St. Louis

Vice Chancellor for Academic Affairs

Applications and nominations are invited for the position of Vice Chancellor for Academic Affairs at the University of Missouri-St. Louis. The Vice Chancellor for Academic Affairs is the principal academic officer for the University of Missouri-St. Louis. The Vice Chancellor, working collegially with the Chancellor, deans, directors and faculty, provides leadership for the University's academic programs.

Responsibilities of the Vice Chancellor include general supervision of 47 undergraduate programs, 50 master's programs, seven pre-professional programs, 12 doctoral programs and one professional degree program, which exists in seven schools. The Vice Chancellor has responsibility for the general supervision of numerous research centers; three libraries; research grants administration; faculty personnel matters; admissions and student retention. The Vice Chancellor also serves as the primary academic liaison between the campus and the UM system.

Reporting to the Vice Chancellor are deans of the College of Arts and Sciences, College of Business Administration, College of Education, Barnes College of Nursing, School of Optometry, the Evening College, the Pierre Laclede Honors College, the Division of Continuing Education-Extension, and the Joint Program in Engineering with Washington University. The Vice Chancellor also provides oversight for distance education and cooperative relationships with other cultural and educational institutions.

General Information about the University of Missouri-St. Louis

The University of Missouri-St. Louis is a dynamic urban campus founded in 1963. As one of the four campuses constituting the University of Missouri, it shares the University of Missouri's land-grant mission and status as the only public, comprehensive research university in Missouri. The University of Missouri-St. Louis is committed to its unique urban metropolitan mission, contributing to economic development and improving the quality of life throughout the region. Through careful integration of scholarly research, teaching and community service, UMSL-St. Louis plays a leadership role in advancing scholarship and providing quality instruction at the baccalaureate, master's, doctoral and professional level to more than 16,000 students.

Qualifications and Applications Process

The successful candidate for this position must have an earned doctorate and be eligible for a tenured senior faculty appointment in an academic unit of the University. The candidate must have an outstanding record of academic administration, with demonstrated effectiveness in working with a culturally diverse group of university administrators, faculty, staff, students, alumni and community members. He or she must be able to work effectively in campus budgeting and planning.

Applications will be accepted until the position is filled, but should be received before March 15, 2001 to guarantee consideration.

A letter of application or nomination should be mailed, with a comprehensive resume, to:

Dr. Donald Driemeier
Chair, Search Committee for Vice Chancellor of Academic Affairs
University of Missouri-St. Louis
401 Woods Hall
8001 Natural Bridge Road
St. Louis, MO 63121-4499

ECU
Women, minorities and other protected classes are encouraged to apply.

Northeastern University, nationally recognized for its cooperative education program, is a private, non-sectarian university located in the heart of historic Boston. It is an integral part of the city's thriving educational and cultural life, dedicated to excellence in research and scholarship, and highly committed to individual and community needs. Northeastern is dedicated to fostering gender equity, cultural and ethnic diversity among its faculty, staff and is proud of its diverse student/resident population.

Complex Coordinator

Direct responsibility for student development functions and the effective administration of a diverse residential community. The housing population ranges from 600 to 1100 students with 1 to 24 full-time staff members (professional, paraprofessional, and graduate). The primary purpose of this position is to develop and maintain an environment conducive to students' academic success through social and intellectual growth. Responsibilities include behavior management, judicial administration, building and security management, and staff supervision. This live-in position assumes full responsibility for the safety and well-being of the students and the complex. Must be capable of excellent autonomous judgment. Required: Master's Degree in College Student Development, Higher Education Administration or a related field; two to five years of experience as a full-time, live-in residence hall professional; excellent written and oral communications skills; effective administrative, supervisory, and organizational skills; experience in conflict mediation and resolution; evidence of excellent decision-making skills. Interviewing at ACDA in Boston.

Assistant Residence Director

Assist in the development and maintenance of a community environment conducive to the personal growth and academic success of resident students. Assist with the operational and administrative functions by managing: facility issues, programming and events records, staff supervision, student behavior and disciplinary meetings, theme and interest housing development, policy enforcement, crisis intervention, staff meetings, occupancy updates, hall openings and closings, and intercession management. Provide on-campus duty coverage; assist in staff recruitment and selection process. Must have a Bachelor's Degree and a minimum of two years live-in experience as a Resident Assistant, Graduate Assistant, or residence hall-based student government leader in a university setting. Prior leadership experience, effective administration, organizational and communication skills required. Interviewing at Oshkosh Placement Exchange in Oshkosh, WI.

Candidates for both of these positions must have demonstrated understanding of diverse academic, socioeconomic, cultural, and ethnic backgrounds. These positions maximum duration is three years. A fourth year is possible with the permission of the Director of Residential Life.

Please send resume to: Richard Stevens, Associate Director of Residential Life, 6 Speare Hall, Northeastern University, 360 Huntington Avenue, Boston MA 02115

New School University

HUMANITIES PROFESSOR

New School University seeks an accomplished senior scholar to provide intellectual leadership in the creation of an innovative humanities program for undergraduates. Qualifications include at least 7 to 10 years of college teaching, a record of publication and participation in professional activities, and a career that demonstrates an engagement with contemporary thinking about humanities education and new approaches to it. Candidates should have an earned doctorate in a literary field, comparative literature, or related fields in Humanities. Send CV and cover letter to: Chair of Humanities Search Committee, Eugene Lang College, Office of the Dean, 65 West 11 Street, 3rd Floor, New York, NY 10011; fax to: (212) 229-5625; or e-mail to: NSUjobs@newschool.edu

Please indicate: Humanities Professor Search in the subject line to ensure proper distribution of resume. AA/EOE

New School University

Special Assistant to the President for Diversity Initiatives/Affirmative Action Officer

Salisbury State University is seeking candidates and nominations for the position of Special Assistant to the President for Diversity Initiatives. The position includes developing a comprehensive plan to enable Salisbury State University to move towards achievement of its diversity goals, including advising university departments in developing action plans to increase and retain historically under-represented faculty, staff, and students and advising campus groups on equitable, professional hiring and search practices; and mentoring student opportunities and strategies in all areas of the University.

Responsibilities of the position include e) developing a comprehensive plan to enable Salisbury State University to move towards achievement of its diversity goals, including advising university departments in developing action plans to increase and retain historically under-represented faculty, staff, and students and advising campus groups on equitable, professional hiring and search practices; and mentoring student opportunities and strategies in all areas of the University.

Qualifications: Doctorate preferred. Master's degree with 5-8 years relevant experience required. As experience working with individuals of various cultural backgrounds. The successful candidate will possess excellent critical thinking and interpersonal skills, the ability to speak and write clearly and effectively, and the desire to work in a shared governance environment. Experience in higher education administration and demonstrated familiarity with federal and state anti-discrimination laws preferred. Experience in developing and implementing programs and workshops and/or grant writing a plus. Applicant must understand diversity issues, be self-motivated, and able to work independently. Salary will be commensurate with qualifications and experience. Screening of applications will begin immediately and continue until the position is filled. To apply, submit a letter of interest, resume, and list of three references to: Dr. Ellen Zinser, Chair of the Special Assistant Search Committee, Office of the President, 1101 Camden Avenue, Salisbury, State University, Salisbury, MD 21801. Salisbury State University is a selective, comprehensive, 6400-student institution within the University System of Maryland. The University is close to ocean beaches and the Chesapeake Bay and 2-3 hours from the metropolitan areas of Washington, Baltimore, Philadelphia, and Norfolk. Salisbury State University has earned significant national attention for its academic programs in recent years, including mention in U.S. News & World Report as one of the Top 10 regional universities in the North and inclusion in The Princeton Review's Best 331 Colleges. For additional information, see our website: www.ssu.edu. Salisbury State University is committed to employment equity and diversity in the workplace. We especially welcome and encourage applicants from minorities, women, and persons with disabilities.

Our employment goals are to create a workforce from a variety of backgrounds and experiences that will strengthen the values of a diverse university community. Salisbury State University is an Affirmative Action/Equal Opportunity employer.

All correspondence and application materials are a matter of public record in accordance with the Florida Sunshine Law.
Colgate University invites expressions of interest in the position of director of communications to manage the college’s public information, publications, and public relations programs.

Located in the Village of Hamilton in the Leatherstocking region of upstate New York, Colgate is a highly selective, coeducational residential liberal arts college of 2,700 undergraduates with a small graduate program. Colgate’s financial position is strong, its campus is widely regarded as one of the most beautiful in the nation, and the college is generally considered one of the top twenty small colleges in the country.

Reporting to the Office of the President, the director of communications will have overall management responsibility for efforts that advance Colgate’s reputation among the important publics. As a member of the president’s senior staff, the director will provide public relations counsel to the members of the senior administration and participate in planning and communicating college initiatives.

Specifically, the director coordinates and oversees staff efforts that provide media relations; public information elements of the university web-site; a bimonthly periodical, design and editorial support for a variety of regular and one-time publications; and photographic support for public information/publications. The director also has a policy responsibility in the area of athletic communications for the university’s Division I athletics program. The director will collaborate with the vice president for university relations and the dean of admission on communications that support student recruitment, alumni communications, and fundraising.

The successful candidate will have a proven record for creative and collaborative management of an effort that has advanced the reputation of an enterprise that is comparable to a national college or university. She or he will have extensive writing and editorial background, a working knowledge of publication production, and entrepreneurial approach that will attract and enlist in college advancement team. A minimum of a bachelor’s degree and five years professional experience is expected.

Review of background materials will be confidential and will continue until a qualified candidate is hired. Reply with a letter, resume, and selected work samples to:

Colgate University is an Equal Opportunity/Affirmative Action employer.

The Evergreen State College

Dean of Enrollment Services for The Evergreen State College, Olympia, WA. Provide visionary leadership to the offices of Admissions, Financial Aid, Student Employment, Part-Time Studies Outreach, and Registration and Records in a progressive, public liberal arts college; work collaboratively with offices and committees that provide support and services to forward the mission of Enrollment Services and the College in a time of growth, commitment to diversity, technological challenges and student financial need. The Evergreen State College is located in the state capital of Olympia, WA. Since opening its doors in 1971, Evergreen has earned a national reputation for leadership in developing innovative interdisciplinary, collaborative, team-taught academic programs. The college enrolls more than 4,000 students, including approximately 260 graduate students.

Applicants must have a master's degree; three years of progressively responsible experience within a college or university at the director, assistant dean or associate dean level; three years of supervisory experience of full-time professional and support staff; demonstrated ability to recruit students; and demonstrated experience collaborating with financial aid and registration and records in a college setting.

Review begins March 16, 2001. For application materials, contact: Human Resource Services, The Evergreen State College, Olympia, Washington 98505; Telephone: (360) 867-6595 (voice); (360) 867-6695 (TTY); Internet: http://www.evergreen.edu

An Equal Opportunity/Affirmative Action Employer

Bellevue Community College

Bellevue Community College is committed to increasing cultural diversity among its professional staff. Applicants with multicultural experience and/or backgrounds, which will add cultural richness and diversity to Bellevue Community College, are encouraged to apply.

THE COLLEGE:
Bellevue Community College is a comprehensive two-year college located about 10 miles east of Seattle, Washington, between Lake Washington and the Cascade Mountain foothills. The college enrolls more than 21,000 students (9,500 FTES) annually. It offers both college transfer and occupational programs. It maintains strong ties with local business, industry, and the City of Bellevue, and is continually expanding its services in this rapidly growing district. BCC is recognized nationally for its leadership in faculty professional development and professional/technical education. In its October 15, 1998 issue, Rolling Stone magazine included Bellevue Community College in its listing of "ten of the best" community colleges in America," largely because of its high-quality digital technology programs.

MILLS COLLEGE
PUBLIC POLICY MAJOR
PROGRAM DIRECTOR

Mills College is seeking qualified applicants for the position of Director of a Public Policy program within the Division of Social Sciences, including a new Public Policy major and minor at the College. The position entails the following functions and responsibilities:

1. Active leadership in the development of the major and minor -- including promoting new courses and technologies where needed, fostering enrollment growth in the program, and cultivating new connections between the major and minor and existing programs at the College;

2. Teaching at least two courses in the policy program -- an analytic methods course and a course devoted to a substantive area of public policy;

3. Serving as faculty advisor to students in the major and supervising the senior projects undertaken by students in the major;

4. Seeking grants and outside funding to support the program;

5. Overseeing the student internship program, including developing new internship possibilities for students in governmental and non-profit organizations, and serving as faculty supervisor for many of these internships;

6. Planning and organizing an annual speakers series in support of the major;

7. Working with faculty to identify and invite visiting faculty fellows to participate in Mills public policy program;

8. Representing the policy program to potential donors, speakers, internship sponsors and student applicants outside the College.

Preference will be given to applicants with a Ph.D. in the social sciences. Applicants should have a distinguished record of teaching, social science research and/or participation in the policy-making process. Applicants should have a familiarity with a substantive area of policy-making and American or comparative policy-making institutions.

The position of Director will be a full-time position, with a three-year contract, with the academic rank of full or associate professor, depending upon qualifications. The contract is renewable, depending upon the needs of the College and the performance of the Director.

Submit letter of application, C.V., evidence of teaching effectiveness and scholarly activity as well as the names of three references to Dr. Marianne Sheldon, Dean of the Division of Social Sciences, Mills College, Oakland, CA 94613.

Applications are due by March 30, 2001, but will continue to be accepted until the position is filled. Located in the San Francisco Bay Area, Mills is a selective liberal arts college for women, with coeducational graduate programs. See www.mills.edu for more information on the College. Persons of color and those committed to working in a multicultural environment are encouraged to apply.

MILLS COLLEGE
Oakland, CA
FACULTY 2001-2002

Harrisburg Area Community College (HACC) announces tenure-track positions available for 2000-2001. Believing a committed and diverse faculty to be the College's most important resource and teaching and learning its most important mission, the President and Board of Trustees seek to strengthen the institution by filling the full-time faculty positions listed below.

Established in 1964 as Pennsylvania's first community college, HACC is now a multi-campus institution offering a variety of degree, certificate and diploma programs that prepare students for the job market or continuing studies at a four-year institution. The college also plays a vital role in improving the quality of life in central Pennsylvania by providing high-quality, low-cost educational opportunities, strengthening the local economy, training the region's workforce, and sharing our cultural and educational resources with the community to enable people to make the most of their potential.

The College's Wildwood Campus is located in Harrisburg; other campuses are located in Lebanon (35 miles from Harrisburg) and Lancaster (40 miles from Harrisburg), with the Gettysburg Campus located 42 miles from Harrisburg. Head Count Enrollment (Fall credit) was 7,572 (Wildwood), 1,003 (Lancaster), 785 (Lebanon), and 614 (Gettysburg).

The College's priorities emphasize multicultural initiatives, workforce development, a strengthened student-centered learning environment, employee development and collegiality, and quality and consistency of standards. The College, a multi-campus institution with over 10,000 credit students, seeks enthusiastic faculty members who share a commitment to these beliefs and priorities.

TENURE-TRACK FACULTY POSITIONS AVAILABLE

All positions require a related Master's degree as specified in position announcement materials (unless otherwise indicated), a demonstrated knowledge of and commitment to the community college mission, and active involvement in college/division committees and professional development activities. College teaching experience and knowledge of instructional technology are desirable. Salaries are between $31,500 and $42,200 for 9-month positions and between $39,375 and $52,875 for 12-month positions based on experience and education. All positions and salaries are pending Board approval. Excellent fringe benefits. Application review begins March 26, 2001. Position Identification Numbers follow each position title.

DIRECTOR OF STUDIES

Princeton University invites applications and nominations for the newly defined position of Director of Studies for each of the five residential colleges, which serve as the centers of residential life for all Princeton freshmen and sophomores.

Under the Office of the Dean of the College, the Director of Studies, in conjunction with the Dean of the residential college, has responsibility for the oversight of academic advising and the implementation of academic regulations for the approximately 450 freshmen and sophomores who live in each college. The Director of Studies advises individual students on their academic programs and works closely with faculty advisors in monitoring students' course selections and academic progress. Under the Office of the Dean of Undergraduate Students, the Director of Studies is responsible for the implementation of student life regulations, the adjudication of disciplinary sanctions for minor infractions of University rules of conduct, the promotion of community values, and the personal counseling of the undergraduates who live in the college. The Director of Studies works with college staff, including the Resident and Minority Affairs Advisors, to promote the Residential Education Program and other efforts that support undergraduate residential life. He or she collaborates closely in every regard with the residential college Dean, as well as with the residential college Master, who has overall responsibility for the college.

Applicants should have had experience in teaching and academic advising at a college or university, and should be familiar with a liberal arts curriculum. They should possess some knowledge of issues relevant to residential college life, and must be sensitive to the needs and concerns of a diverse student population. Excellent written and verbal communication skills and strong managerial skills are essential. Although this is a full-time position, there may be opportunities for some limited teaching in the appropriate academic department, the freshman seminar program, or the freshman writing program. A Director of Studies is expected to hold the Ph.D. degree in a discipline taught at Princeton.

Send curriculum vitae and names of at least three references to Princeton University, Office of Human Resources, One New South Road, 1634, Princeton, NJ 08544. For full consideration, applications must be received by March 30, 2001. The positions will be available on or about July 1, 2001.
UNIVERSITY OF WISCONSIN
MADISON

ASSOCIATE DEAN OF STUDENTS

UNIVERSITY OF WISCONSIN-MADISON

The University of Wisconsin-Madison invites applications and nominations for the position of Associate Dean of Students. As the senior deputy for the Dean of Students, the Associate Dean shares a leadership role in fostering the creation and maintenance of a multicultural, competent, and diverse institution that addresses the concerns of students in a compassionate manner, honors the contributions of a variety of student populations and assists students to realize their academic, civic, and personal potential. With a budget of approximately $9.5 million, the 55 Dean of Students staff provide information and ombuds services; welcome and orientation programs; support for students with disabilities; assistance to international students; programs for students of color; assistance to gay and lesbian students; non-academic and academic student misconduct code administration; and advising/training for student organizations including the student arm of the UW's shared governance system.

The Associate Dean will facilitate shared governance with the Dean to reflect and renew priorities and effectiveness of Dean of Students programs; assist Dean to directly supervise assistant dean and director staff; mentors and designs professional development opportunities for DM of Students divisional staff facilitates collaborative relationships among student affairs/services, students, academic programs, faculty/staff; and collaborates with other campus units to enhance the undergraduate and graduate experience on campus. He or she also oversees the internal operations of the central Dean's office in the provision of ombuds services, crisis response, coordination and follow-up, administration of the student misconduct processes and consultation assistance to faculty/staff on student issues; collaborates with the Dean to facilitate the development of seamless, holistic, and multiculturally competent learning environments for all students; represents the University in a public role; interprets University policy with campus and community constituents; serves in the central leadership of the University; facilitates program development, program assessment and fiscal development; and other duties as assigned.

Major requirements for this position include a strong theoretical and practical understanding of student development, student cultures and organizational development in student affairs; a minimum of 7 years of progressively responsible administrative experience in student affairs, student services or related area; and at least a Masters degree in student affairs, higher education or related area. (A completed PhD is preferred.) Candidates should possess a proven record in the areas of supervision and leadership, program development and assessment, fiscal management, facilitation of shared decision making and problem-solving, and collaboration with faculty and staff to maintain and improve the quality of undergraduate and graduate student services. The position also will require demonstrated ability to respond to student needs effectively and compassionately; and the ability to work effectively with individuals and groups from a variety of identities, cultures, backgrounds, and ideologies as well as personal and social orientations.

Applications must be received by April 2, 2001 to ensure consideration. Later applications may also be considered. Applicants should include a current resume or vita and a cover letter that addresses how their strengths match the requirements of the position; what they see as the challenges and opportunities of the position; and names and contact information for five references. Candidates will be informed before references are contacted. Please note that under Wisconsin statutes the names of nominees and applicants who explicitly request confidentiality will not be made public. However, the university is required to release the names of finalists. Submit applications to:

Associate Dean of Students Search and Screen Committee
University of Wisconsin-Madison
75 Bascom Hall, 500 Lincoln Drive
Madison, WI 53706-1380
Phone (608) 263-5700

Hood Community College, Human Resources Office, 2800 SE Stark St., Gresham, OR 97030 (503) 491-7200, FAX (503) 491-7257, TDD (503) 491-7202, e-mail: hr@mhcc.co.or.us. Application materials are available on the College website: www.mhcc.co.or.us. Mt. Hood is an Equal Opportunity/Affirmative Action Employer.
The Graduate School of Education at George Mason University is a dynamic professional school committed to excellence in teaching, research, and service, especially through collaborative field-based programs and initiatives with schools, businesses, and community agencies. Just 16 miles west of Washington DC in Fairfax, Virginia (with additional programming at the University’s Arlington and Prince William campuses), George Mason University - a state-supported institution enrolling 34,000 students - is located in a region characterized by excellent K-12 schools, leadership in technology and rapidly growing to the state’s diversity by 100 – working together. The Graduate School of Education provides an ideal site for educational researchers and scholar-practitioners with an applied, collaborative orientation and an interest in preparing education professionals for the challenges of the 21st century.

In recent years the Graduate School of Education has experienced accelerated growth and has emerged as one of the nation’s top 90 ED schools (US News and World Report rankings) by attracting a diverse blend of experienced and newer faculty to work in an environment that values equity, intellectual creativity, strong faculty governance, and opportunities to affiliate with multiple programs. The School is now seeking to add to its roster of 80 full-time faculty by filling eight faculty vacancies (six funded, two pending funding) in its state-approved and NCATE accredited teacher education, school and agency counseling, and education leadership programs. All positions are tenure-track, open rank, with an initial start date of August 25, 2001. Candidates with School and University priorities in technology and diversity preference will be given in each search to candidates who are experienced in applying and using educational technology and who can demonstrate expertise in training education professionals for multilingual and multicultural environments. Applications from women and minority candidates and persons with disabilities are especially encouraged.

Applicants should send a letter of interest highlighting their qualifications, a current vita, and the names, addresses, and telephone numbers of three persons who can serve as references upon request. Inquiries and application materials should be addressed to Martin Ford, Acting Dean, MSN 2F1, Graduate School of Education, George Mason University, 4400 University Drive, Fairfax VA 22030-4444. Please clearly indicate the position you are applying for in your cover letter.

Review of applications will begin on March 26, 2001 and will continue until the positions are filled. George Mason University is an equal opportunity affirmative action employer committed to ensuring the needs of its increasingly diverse student body through appropriate personnel selection practices and procedures.

Education Policy

Vice President for Development and Alumni Relations

The University at Buffalo, one of America’s major public research universities and the largest campus in the 64-unit State University of New York system, invites applications and nominations for the position of Vice President for Development and Alumni Relations.

Reporting to the President, the Vice President for Development and Alumni Relations serves as the university’s senior officer for development and alumni relations, fostering a climate for philanthropy among UB’s senior administrators, faculty, alumni and friends. The Vice President provides leadership to a staff of over 100 – working in alumni relations, major gifts, corporate and foundation relations, annual giving, planned giving, development communications, prospect research, donor relations, and 13 school-based development programs.

The University at Buffalo, which has an enrollment of approximately 16,000 undergraduate and 8,000 graduate and professional students as a member of the Association of American Universities. UB’s 168,000 alumni live in all 50 states and more than 100 foreign countries; the university is expanding its network of regional, national, and international alumni chapters. Currently in the public phase of a fund-raising campaign that will conclude in 2003, the University at Buffalo has experienced significant growth in its fund-raising operation in recent years.

We seek an experienced, dynamic, imaginative individual with extensive development and management experience who can communicate well with UB’s diverse audiences. Substantial professional experience in fund-raising is required, with considerable experience in a large university setting preferred. Salary is very competitive, commensurate with qualifications and experience. Expected starting date is on or before June 1, 2001.

The Buffalo metropolitan area is a dynamic community with a population of 1.2 million. Located on the U.S.-Canadian border and Lake Erie, the region has excellent schools, a rich cultural life encompassing both the arts and professional sports, superb recreational facilities ranging from skiing to sailing, and very affordable housing.

Please direct inquiries, nominations, and applications to the consultants assisting the University at Buffalo with this search:

Direct of Development and External Affairs

The Michael C. Carlos Museum (MCCM) at Emory University announces a position opening for a Director of Development and External Affairs. The director will report to the Director of the MCCM and to the Associate Vice President for University Development. As the chief fund raising officer for the MCCM, the director of development is responsible for overseeing the identification, cultivation, solicitation, and stewardship of major gift donors, individuals, corporations, and foundations. The ideal candidate should have experience with capital campaign planning and execution, and an appreciation of the role the arts play in the life of a university. In the area of external affairs, the director will oversee public relations, marketing of special events, and the MCCM membership program. The director for External Affairs will also work closely with the MCCM Director to guide and develop the board of directors. The ideal candidate will have at least five years of increasingly responsible levels of fund raising and staff management experience; effective communication skills, both oral and written; and an understanding of the arts. Experience in higher education a plus.

Send nominations and applications for both positions to: Alicia A. Franck, Associate Vice President for University Development, Emory University, 289 Administration Building, Atlanta, GA 30322; FAX: 404-727-4492; or Email to: clothes@emory.edu. All Email submissions must have resume attached in MSWord. This position is open until August 1. An Affirmative Action/EQ Opportunity Employer.

www.emory.edu

Associate Vice President for Human Resources

The University of San Diego is seeking an Associate Vice President for Human Resources. USD, an independent Catholic university located on 180 acres overlooking San Diego’s Mission Bay, is committed to a values-centered, liberal arts education, and enrolls approximately 6,600 undergraduate and graduate students in five colleges and schools (Arts and Sciences, Business, Education, Nursing, and Law). USD seeks gender, cultural, and ethnic diversity in its administration, faculty, staff, and student population.

The Associate Vice President for Human Resources, managing a total staff of 23, serves as the chief human resources administrator and works under the general supervision of the President, operationally reporting to the Vice President for Finance and Administration. This executive plans, organizes, directs, and evaluates the development, administration, and direction of the University’s human resource function including employee relations, payroll, personnel record-keeping, training, benefits, risk management, employment staffing, and compensation. This individual will be a leader with a contemporary vision for human resources in higher education and will develop a long-range plan and implement strategies to guide the Department and the University over the next decade.

We seek a professional with at least seven years of experience at a senior level in human resources, preferably in higher education. Must be a broad-based generalist with proven management and leadership capabilities. Must have a proven ability to efficiently and effectively administer a human resources information system. Recent experience implementing an HRIS is strongly preferred. We offer a competitive salary and excellent benefits package. Interested professionals should send a resume to our executive search firm: Gary Kaplan & Associates, Attn: Stacey Meyer, Vice President, 201 South Lake Avenue, Suite 600, Pasadena, CA 91101; or fax to (626) 796-1003; or e-mail to smeyer@gkapsearch.com.

Director, Environmental Health Sciences Center
Oregon State University

Oregon State University invites nominations and applications for the position of Director of the Environmental Health Sciences (EHS) Center. Funded by an NIHES Center grant of approximately $1 million in annual direct costs, this 34-year-old Center is internationally recognized for expertise and research programs of 25 EHS Center faculty members. The EHS Center is a national resource for multidisciplinary approaches to problems in human environmental health. Details on this EHS Center's activities are available on its website at http://www.ohsc.ore.st. The Director will hold a 1.00 FTE twelve-month appointment (0.60 FTE as director; 0.40 FTE in an academic department) with a nine-month tenure commitment at the rank of professor within an academic department and college that is appropriate to the appointee's background.

We are looking for a well-established scientist to provide scientific and administrative leadership for the EHS Center within the policies of NIHES and Oregon State University. A distinguished record of scholarly accomplishment and leadership is required for continued program development and EHS Center support. The Director must hold an M.D. or Ph.D. degree in physical or life science and have research and teaching experience related to environmental health sciences.

Nominations should include name and address of the nominee and a letter addressing the qualifications of the individual. Applicants should submit a letter of interest, a resume, and request three letters of reference be sent to:

Dr. Lawrence R. Curtis, Chair
EHS Center Director Search Committee
Department of Environmental and Molecular Toxicology
Oregon State University
1007 A.S. Building
Corvallis OR 97331-7301
E-mail: Larry.Curtis@orst.edu

Review of applicants will begin on April 16, 2001, and the position shall remain open until filled. The position is available July 1, 2001.

OSU is an AA/EEO employer and has a policy of being responsive to dual-career needs.

Empire State College State University of New York

Coordinator of Instructional Design and Curriculum Development

SUNY Empire State College is a national leader in non-traditional education with a mature distance learning program established in 1979 and located in Saratoga Springs, New York. The college is grounded in the approach that education begins with the goals and interests of its adult students. The Center for Distance Learning provides courses and complete undergraduate degrees. The Center coordinates 11,000 course enrollments a year using Web-based delivery and print-based course packages for adult learners. Ten faculty administer the design of courses with 160 adjunct faculty and the coordinator assists these faculty in instructional design for web courses and adapting and using new technologies. The coordinator will also assist with curriculum development and procedures. We seek an educator with higher education teaching experience, as well as familiarity with designing, developing, teaching and evaluating asynchronous computer-mediated courses. Ph.D. in a related field is preferred, but persons with a master's degree and substantial related experience will also be considered. Experience in several of these areas: faculty development; curriculum design; instructional design, quality review; use of technology for asynchronous delivery; and some Internet programming language and Internet-based communications. A demonstrated record of innovation and success in design and delivery will be expected to keep current with new technological developments in the field of distance education methodology and technology.

Anticipated hire date: 6/1/01 or after. Review of applications begins 4/2/01 and continues until position is filled. Letter, resume, and names and telephone numbers of three references to: Bernice Kennedy, Search Committee Coordinator, Center for Distance Learning, SUNY ESC, 3 Union Avenue, Saratoga Springs, NY 12866. FAX: 518 587-2660, Bernice.kennedy@esc.edu.

ESC is an AA/EEO employer, committed to excellence through diversity.
Kutztown University enrolls approximately 8,200 students in graduate and undergraduate programs. The University is located in the borough of Kutztown in a charming rural setting, but is within 20 minutes driving time of the diverse metropolitan areas Allentown/Bethlehem and Reading, and within 60 minutes of the Philadelphia metropolitan area. As a state regional university, Kutztown University is committed to serving the multicultural populations in its region. The University is very interested in employing faculty who have had extensive experience with diverse populations, especially African American and Latino populations represented in these adjoining metropolitan areas.

Associate Provost and Dean of Graduate Studies & Extended Learning

Kutztown University invites nominations and applications for the position of Associate Provost and Dean of Graduate Studies & Extended Learning. This management position reports directly to the Provost and Vice President for Academic Affairs. Responsibilities include supervision of staff and leadership for the graduate studies and extended campus. This person will provide leadership; for graduate education, for faculty in delivery of graduate education offerings in innovative formats, for the extended campus, and for the International Studies program, and will oversee the Division of Academic Affairs, Performance Outcomes Plan, and program review process. Additionally, the successful candidate will collaborate with faculty and university offices to enhance the use of technology and distance education offerings and programs. Qualifications: Doctorate in suitable discipline required, significant years as a university faculty member and significant years experience as an academic affairs administrator. Desired experience includes graduate recruitment and retention, extended education, international studies, and strategic planning, budgeting and accreditation. Successful interview and demonstration of ability are required. Review of application will begin March 16, 2001 and continue until position is filled. No fax or electronic mail applications. Submit letter of interest, vita, names, addresses, email, telephone number of at least five professional references to: Acting Dean Sandra Hammann, College of Graduate Studies, Kutztown University of Pennsylvania, P O Box 730, Kutztown, PA 19530.

Assistant to the President for Enrollment Management

The Assistant to the President for Enrollment Management reports to the President, is a Cabinet level staff position, and is responsible for the development and coordination of the University’s enrollment management program, policies and procedures, which crosses divisional lines into admissions, financial aid, scholarship administration, housing, student retention and advising functions and is responsible for working with the faculty and staff to create a positive enrollment management environment throughout the university. The responsibilities include developing and implementing strategic and operational enrollment management plans, strategies, priorities, and assessment. A master’s degree with experience in an enrollment management environment and a thorough knowledge of strategic enrollment management principles and the abilities to apply them effectively in a highly competitive market are required. An understanding of technology applications in enrollment management, a commitment to diversity and the ability to work well with people are necessary characteristics. Marketing and research experience are desirable. Finalist candidates will be required to complete a successful on-campus interview. Candidates for the Assistant to the President for Enrollment Management must submit the following materials: a letter of application, resume and three current letters of reference. Application materials should be addressed to Mr. Richard Zera, Chair, Enrollment Management Search Committee, P O Box 730, Kutztown University of Pennsylvania, Kutztown, PA 19530. Review of applications will begin on March 23, 2001.

Kutztown University of Pennsylvania is an affirmative action/equal opportunity employer. Women, minorities and the physically challenged are encouraged to apply. A member of Pennsylvania’s State System of Higher Education.

THE LESSON

Norma Cano-Alvarez was born in the small and rural city of Lorain, Ohio. Her parents had migrated there from Puerto Rico in the early '50s, when Ford Motor Company recruited men for its plant in Cleveland. Her father made a good living by today's standards, but had completed only the sixth grade and could not be promoted, despite his hard work. Her parents constantly stressed the importance of education in the United States. Her mother, fortunate enough to graduate from high school, spoke often to her daughters about going to college to become independent women, telling them that to be educated meant to be heard and seen, to make decisions without the authority of another, to not have to work in a factory where you are treated contemptuously because you barely speak English, as she had to do.

She went to school every day with gladness and enthusiasm, learned many things, met many people, saw many things she liked, and some she did not understand, among them, why certain students were whisked away to special classes—to flout or violin lessons, to French class. One day in fourth grade, her curiosity more than she could bear, she asked her social studies teacher, Mr. Brown, why those students were in special classes. "Because they are special," he said. And she asked, "What makes them special?" And he said, "Their grades."

She wondered why she, who had all As but for one B, wasn't considered special. The next morning, she asked Mr. Brown if she who had all As but for one B could take one of those special classes. He said, "No, you must be selected, and obviously you were not selected, so you were not invited." The girl walked away with so many questions in her head and in her heart.

Much later in life, during a class about issues in multicultural education, the girl learned that her treatment in school was an example of institutional discrimination. Because she was different—the only Hispanic girl in a fourth grade class—it was not believed that she could succeed in the special studies. The majority of the others were children of Polish immigrants. It was at that moment that she made the commitment to go to college and become a teacher—the best that she could be.

Many years passed, and the girl did become a teacher—a teacher of Spanish and English, the gift of communication. A teacher of the adoption process, helping people become parents. A teacher of interviewing skills, helping people get better jobs. And today she teaches first-year students to navigate the university bureaucracy, to reach for their own success.

She teaches, too, about her cultura—a culture so strong that even the bitterly cold Ohio winters could not weaken it. A favorite story is the Christmas tradition of the parrandas. In Puerto Rico during the Christmas holidays, people get together, with musical instruments, visiting family and friends until the wee hours of the morning. The parranderos are welcomed into homes to eat, drink, and dance. They invite their hosts to join them as they go on to the next home, and the next, sometimes into the following day. Imagine this tradition in a rural Ohio city with temperatures well below freezing and a foot of snow. Yet it was so important to carry on the cultura. She learned many important, significant tradiciones that live on because her familia was and is a strong gente.

Y mi punto final... We, you and I, as educators—Hispanic educators—try to reach and capture the spirit, el alma, of our students. We must teach them to value their culture and their language as the precious jewels that they are. Today, Norma is a happy, educated, independent woman who continues her parents' lucha for equality through education for all who want it. She has made her parents very proud.

If interested in submitting a ¡Punto Final! "think piece," please e-mail us at sloutlook@aol.com for guidelines.
Higher Ed Welcomes New Education Chief
Wharton County Junior College

PRESIDENT

The Board of Trustees of Wharton County Junior College invites applications and nominations for the position of President. The President is the chief executive officer of the college reporting directly to a nine-member, publicly elected Board of Trustees.

WCJC is a public two-year, comprehensive community college established in 1945. Its service area covers Wharton, Ft. Bend, Matagorda, Colorado, and parts of Jackson and Austin Counties. The main campus is located 56 miles south of Houston, in Wharton, a rural community with a population of 11,000. WCJC has two campuses located in Ft. Bend County (one of the ten fastest growing counties in the U.S.), one in Sugar Land and a new campus to open this summer in Richmond. Academic, technical, continuing education and workforce development programs are offered to WCJC students. WCJC’s 272 full-time faculty and staff are strongly committed to providing a quality, student focused learning environment to its 4,400 students.

Requirements:
1. Minimum of a bachelor’s degree from a regionally accredited institution of higher learning. (Photocopy of transcripts conferring degrees must accompany application for employment.)
2. Minimum of five years of executive administrative experience in higher education, at the level of dean or above.
3. Integrity and highest ethical standards; outstanding communication skills; commitment to diversity.
4. To be able to apply, candidates should document a successful record of accomplishment in the following areas:
   a. Establishing productive partnerships with (a) business and industry; (b) public schools; (c) other institutions of higher education; (d) nonprofit and philanthropic organizations; (e) local, state, and federal agencies and elected officials; and (f) a diversity of community constituents (service organizations, chambers, economic development councils, and individuals).
   b. Improving an institution: financial resources through (a) additional revenue streams (noncredit workforce training, avocational offerings, credit programs), (b) acquiring and administering grants to improve services and operational efficiency, and (c) fund-raising for special projects and enhancement of ongoing activities and programs.
   c. Maintaining high standards of educational quality, while optimizing enrollments.
   d. Providing state-of-the-art technological support, including distance education, for students, faculty, and staff.
   e. Providing effective facilities planning and management; maintaining and improving both instruction and non-instructional equipment.
   f. Improving salaries for faculty and staff.
   g. Maintaining a favorable working relationship with faculty and staff.
5. Letter of interest, not to exceed five pages, addressing the above items should be submitted with the official WCJC application for employment.

Search begins immediately. Prefer to fill the position during Summer 2001. Qualified applicants should submit a completed application packet to:

WCJC Human Resources Department, 911 Boling Rd., Wharton, Tx. 77488 by 5:00 p.m. on April 10, 2001, to be considered for this position. To request application information, please consult our web site at www.wcjcc.edu or call us at (979)-532-6591.

WCJC is an equal opportunity employer.

Saying What You Mean, Meaning What You Say 33
Many Hispanics find themselves well ensconced in the middle class, but a very large number, more than 7.4 million, still struggle with low incomes. Difficulty with English, adjustment to a different culture, and less than adequate education are hurdles yet to be overcome. Sometimes it takes a generation or two to "move up." The 1990s were good years for such upward mobility.

Census Reports

Even seasoned researchers wish the Census Bureau would learn to write prose instead of inundating us with raw data. But its facts are useful for those trying to get beyond the media and political blunet. Two recent reports, "Money Income in the United States: 1999" and "Poverty in the United States: 1999" are very revealing and, it is hoped, accurate.

They indicate that the nation's poverty rate dropped from 12.7 percent in 1998 to 11.8 percent in 1999—the lowest rate since 1979—and real median household income reached $40,816, the highest level since the Census Bureau first recorded it in 1967.

Census Bureau spokesperson Daniel Weinberg reported: "Every racial and ethnic group experienced a drop in both the number of poor and the percent in poverty, as did children, the elderly, and people ages 25 to 44."

"Declines in poverty," he continued, "were concentrated in metropolitan areas, particularly central cities." That's good news, for many Hispanics live in urban areas. Eighty-one percent of the net decline in the number of poor occurred in Hispanic-rich central cities of metropolitan areas. That's where three out of 10 people reside, and four out of 10 poor people live. Rural Hispanics continue to have a difficult time.

According to the very fact-laden poverty report, 22 million fewer people were poor in 1999 than in 1998—32.3 million versus 34.5. In addition, despite stories to the contrary, the percentage of people 65 and over living in poverty was a low 9.7 percent in 1999, and the proportion of the nation's children in poverty was the lowest since 1979—16.9 percent.

Despite the drop, children under age 6 remain particularly vulnerable to this condition; those living in families with a female householder and no husband present experienced a poverty rate of 50.3 percent. That figure is more than five times the rate for children under six years of age in married-couple families (nine percent).

The percentage and number of poor declined in the Northeast and West and remained unchanged in the South and the Midwest. The poverty rate in the South did not change significantly from the 1998 measured low for that region.

Except for Whites, the 1999 poverty rates for the nation's major racial and ethnic groups set or equaled historic lows. The rate for African Americans, 23.6 percent, was the lowest ever measured by the Census Bureau, and about 700,000 fewer African Americans were poor in 1999 (8.4 million) than in 1998 (9.1 million).

The poverty rate for non-Hispanic Whites, 7.7 percent, equaled its measured low reached in 1989. Between 1998 and 1999, the number of poor non-Hispanic Whites dropped from 15.8 million to 14.9, a decline of 900,000.

In 1999, the poverty rate among Hispanics (any race) was 22.8 percent, which statistically equaled its measured low last reached in 1979. The number of Hispanics in poverty fell by 600,000 between 1998 and 1999, to 74 million. The number and percentage of poor non-Hispanic White and Hispanic families fell in 1999 to 25- and 20-year lows, respectively. African American families had no change in the number of their poor or in their poverty rate.

The poverty rate for Asians and Pacific Islanders decreased to 10.7 percent in 1999, from 12.5 percent in 1998, also equaling its lowest measured value. The number of poor Asians and Pacific Islanders decreased from 1.4 million in 1998 to 1.2 million in 1999.

A three-year average (1997-1999) poverty rate for American Indian and Alaska Natives was 25.9 percent, with an estimated 700,000 living in poverty. This is the first time that the Census Bureau has shown poverty data for this population. The average was used because the population is relatively small and multi-year averages provide more reliable estimates.

Income

Using three-year averages for 1997-1999, the real median household income for Alaska ($51,046), though not statistically different from that of Maryland, New Jersey, and Connecticut, was higher than the median of any of the remaining 46 states and the District of Columbia. Arkansas' income ($28,398), though not statistically different from West Virginia, was lower than the remaining 48 states and the District of Columbia.

The median income level for the nation's households rose, in real terms, by 2.7 percent, from $39,745 in 1998 to $40,816.

Real median income for households inside metropolitan areas rose 2.1 percent, and the median for households inside central cities rose 50 percent between 1998 and 1999. Median income for households in the suburbs and outside metropolitan areas remained statistically unchanged from 1998.

The 1999 median income was the highest ever recorded for non-Hispanic White ($44,366), African American ($27,910), and Hispanic ($30,735) households.

As with the poverty data, the report also marked the first time the Census Bureau showed income data for American Indians and Alaska Natives. The three-year average (1997-1999) median household income for American Indian and Alaska Natives was $30,784.

Median household income recorded highs in the Midwest ($42,679) and the South ($37,442), but was statistically unchanged from 1998 in the Northeast ($41,984) and West ($42,720).

All in all, the 1990s was a great decade for Hispanics and many other Americans.
¡Hola!

A new chapter in the annals of education has begun. Roderick Paige is the new man in charge, giving the nation new hope and a fresh opportunity to narrow the "inexcusable" achievement gap, raise scores, and level the playing field across ethnic lines.

While it shouldn't matter to what ethnic group Paige belongs, so long as he gets the job done, his confirmation was greeted with some objections from the Latino community, for fear that Hispanics will not be heard nor their issues given due priority. HO's cover story discusses Mr. Paige's career and points out the dichotomous reception his appointment to Secretary of Education has generated.

As former superintendent of the Houston Independent School District, Paige was faced with children unable to read at basic levels, and low math and science scores. These concerns are not specific to Houston. Cities around the country are experiencing similar issues. So one hopes that as the "champion of reform," as President Bush referred to Paige at the swearing in ceremony, that Paige, with educators and the nation at his side, can successfully rise to the challenge, and move forward President Bush's plan entitled No Child Left Behind, a Blueprint for Education Reform. President Bush noted, "In his distinguished career, Rod Paige has seen firsthand what works. He has not just talked about education reform, he's practiced it....He has shown an ability to reach across party lines, to cross old divisions for the sake of our children. I value all these qualities and our country needs them." Paige replied, "When each and every child in this country can receive a quality public education, we have made history together. Together, we can." Education reform should keep in mind all our children, so that no one is left behind. Entonces, si, juntos podemos.

Up next, HO will feature stories on Hispanic Doctorates, the Rockefeller Bros. Teaching Program, research universities and more.

Buen provecho

M. Lasscert
Latino Perspectives on Paige, New Secretary of Education

BY INÉS PINTO ALICEA

Inés Pinto Alicea said the nomination of former Houston Independent School District Superintendent Roderick Paige for the job of education secretary, Latino leaders presented a more mixed reaction.

Paige, the nation’s first Black education secretary, is credited with turning around the nation’s seventh largest school district, where he oversaw a sharp improvement in standardized test scores, a rise in the number of charter schools, the privatization of many noneducational services, new accountability measures for principals, and the passage of the largest school construction bond package in Texas history—$678 million. Even his staunchest critics say he brought stability to a once-troubled district during the seven years he managed the district with a $1.6 million budget and 210,000 students, many of whom are poor.

“Anyone who runs the educational system of Houston will have a good understanding of Hispanics and African Americans,” said Richard Tapia, the Noah Harding Professor of Computational and Applied Mathematics at Rice University in Houston. The HISD has a student population that is 88 percent Latino and Black, and 71 percent of the students are said to be poor. “He understands these communities and the needs of our communities, and that makes me feel good. It is the first time we have a secretary of education who understands urban America and minorities.”

HO reviewed Paige’s record in Houston and interviewed a number of people who worked with Paige or are familiar with his work in Houston to glean some clues as to what we might expect over the next four years.

“President Bush has found someone eminently qualified for this position,” said Max Castillo, president of the University of Houston-Downtown, who has worked with Paige on a number of issues affecting Houston education over the years. “He’s been at both ends of the spectrum, and he gives a broader perspective on the issues.”
Esther Campos, one of three Latinos on the nine-member HISD school board and a former assistant principal, said Paige was a good listener, very professional even when they were in disagreement, and very persistent.

“He would bring ideas to the board when he thought he had enough support for them, but if he didn’t have the support, he would withdraw them and revise them until he got the support,” said Campos, who serves on the HISD’s committee to find a replacement for Paige.

Gumercido Salas, vice president for governmental relations at the Hispanic Association of Colleges and Universities, said his organization welcomed Paige’s nomination, particularly because prior to joining the HISD, Paige, 67, was head football coach and later dean of the School of Education at Texas Southern University, a historically Black university. Paige also established the University’s Center for Excellence in Urban Education, a research facility that concentrates on issues related to instruction and management in urban school systems.

“We’re excited about that because we have worked closely with historically Black colleges and universities,” said Salas, adding that Paige’s tenure at Texas Southern gives him a strong background on the needs and operations of minority-serving institutions. Salas said HACU will try to win a boost in funding from Congress and the president to $100 million from the current $68.5 million for the nation’s 196 Hispanic Serving Institutions (HSIs) and that Latino education leaders hope to garner Paige’s full support. President Bush has called for an increase to $80 million, which Castillo of the University of Houston-Downtown said was the first time a president has himself sought an increase for HSIs.

“In the past, we’ve had to propose the increase ourselves and get the Senate to help,” said Castillo. “There is hopefulness.”

Tapia, through his work as a member of the National Science Foundation board and through his interest in HISD as a city resident and father, came to know Paige, and praised Paige for his good sense of humor, his ability to give credit when credit is due, and his professional demeanor.

“Rod Paige will make the changes that are in the best interest of our country,” said Tapia.

But Angela Valenzuela, who did in-depth research on the Houston schools for her book Subtractive Schooling: U.S. Mexican Youth and the Politics of Caring, said she is concerned about Paige’s being education secretary because her research indicates that many of the measures he adopted in Houston and wants to adopt nationally had a negative impact on schools.

“It is laughable in Texas—this concept of the Texas miracle,” said Valenzuela, associate professor of curricular instruction and Mexican American studies at the University of Texas at Austin. “It is not evident and not apparent to the people here.”

Valenzuela said she believes the HISD dropout rate was exacerbated by Paige’s policies that tied the jobs of school administrators to the success or failure of students’ standardized test scores.

Valenzuela argues that because school leaders feared losing their jobs if students scored poorly, or were striving to get a financial bonus if students scored well, the school leaders took a number of measures to manipulate the test scores, to the detriment of students. For example, she said schools would seek test-taking exemptions for low-performing students to keep their scores from lowering the overall school score. Administrators would find ways to hold students back from moving on to the next grade, particularly if they were moving into a key year for standardized test-taking. Administrators would place students in bilingual education or special education to assure those students didn’t take the standardized tests that determined their school’s success or failure. Valenzuela said the laws changed in 1998 to make that tactic more difficult.

“Shortcuts are taken to maximize performance,” said Valenzuela. The testing factor, she says, affects how students are discussed, and some become worthy of special treatment and others “get thrown in the dust bin” because they aren’t going to get the school over the test hump.

Leonel J. Castillo said he regularly worked with Paige on a variety of HISD issues in his current job as education liaison for Houston Mayor Lee P. Brown. Castillo, head of the Immigration and Naturalization Service under President Jimmy Carter, said Paige was instrumental in getting businesses involved in improving the HISD, but that he sometimes struggled with how to include the Latino community.

“That’s been the one area of difficulty for him,” he said. “How do you bring in the Latino community? That is something that will continue to be an issue in Washington.”

For example, in 1994, Paige’s nomination to be superintendent raised tensions with Houston’s Latino community, which felt excluded from the selection process. Leonel Castillo said Paige was a board member of HISD at the time and Latinos felt as though the board had “picked one of their own.”

“The Latinos didn’t take issue with his competence or his ability to lead,” said Max Castillo. “They just felt it was a very internal search.”

Later, Houston Latino leaders felt as though they were left on the sidelines when Paige and the school board adopted a more aggressive policy.
on bilingual education to hasten students to learn English without offering waivers from the standardized tests, said Campos. Paige asked a non-Hispanic board member and a non-Spanish-speaking Hispanic board member to formulate the new policy, she said. Latino students’ scores dropped significantly after the policy was adopted, and school board members are watching to see if the situation improves, said Campos.

“At one point, he was supportive at a rhetorical level, but he didn’t demonstrate a commitment,” said Valenzuela of the bilingual education issue “The Latino community was vehemently opposed.” The board and Paige, she said, “dismissed us completely. It wasn’t the first time.”

But, Campos said she felt Paige worked hard to “mend feelings” within the Latino community. Campos said many of the new schools that were built were in largely Latino areas of Houston. Leonel Castillo said Paige increased the numbers of Latino teachers and principals throughout the HISD, where 54 percent of the student population is Hispanic. Moreover, Paige pushed for strong certification standards for bilingual education teachers as part of an urban education teacher preparation program launched at the University of Houston-Downtown, said Castillo.

Leonel Castillo said Paige was very interested in the growth of charter schools in Houston. Indeed, Paige’s bio said he was instrumental in launching 20 charter schools that have broad authority in decisions regarding staffing, textbooks, and materials. But Castillo said the movement toward charter schools is “dangerous because it siphons off your talent from other issues.”

“Much of the Latino leadership in education in Houston was diverted into creating charter schools, and it takes a lot of energy and money to maintain these schools,” said Castillo. “So the Latino leaders were not there to ‘raise a lot of Cain’ about the public schools.”

Charter schools were not his only interest at HISD. Under his leadership of the school system, Paige contracted with private businesses to manage most nonacademic services, declared English literacy a goal for all students, shifted toward phonics-based reading instruction, and beefed up high school graduation requirements. Some of the privatization he undertook included contracting out the management of school maintenance, food services, payroll and personnel management, and the district’s $65 million employee-benefits programs.

Tapa said he hopes Paige will accomplish across the nation what he has been able to move forward in HISD—the homogeneity of the preparation of students so that all students get equally strong educational backgrounds.

“I would like to see the gaps closed between underrepresented groups and the majority on the knowledge base. I hope HISD can serve as a role model for the rest of the country.”

But Valenzuela said she is concerned about spreading the HISD policies across the country because there has been an over-reliance on standardized testing to determine the success or failure of the school.

“There has been a misuse of the single indicator,” she said. “Critics will argue for multiple indicators like grades and student portfolios and not just multiple tests. People are just ready to buy the assumption that higher scores mean more learning, and that simply is not true.”

It seems that the HISD is indeed a model upon which President Bush has paralleled many components of his first major education initiative. In his testimony before the Senate committee that handled his nomination confirmation, Paige said that while there are pockets of excellence, the nation as a whole is in the grips of “an education recession” marked by low student achievement and chaotic schools. Those maladies, he said, most often affect low-income and minority students.

Paige said the downturn can be reversed if the nation pursues a reform agenda touted by Bush. That plan includes demanding accountability as measured by tests, higher standards, parental choice, giving local school systems more control over federal money, adopting a reading program that blends phonics and whole language, and improving school safety, most of which were elements of the program Paige undertook in Houston, with varying degrees of success.

One element that stirred some controversy for the HISD was the accountability system adopted by the district, under which a lot hinged on how students fared on standardized tests. The district offered incentive bonuses of up to $7,500 for administrators whose schools scored “exemplary” on the tests, and administrators of persistently low-performing schools would get additional funds to improve or eventually could be reassigned if there still was no improvement, said Campos.

Under Paige’s leadership, the HISD had 87 “exemplary” or “recognized” schools this year and only 18 “low-performing” schools under the state accountability system, compared to only four “exemplary” and “recognized” and 55 “low-performing” schools in 1993.

Between 1994 and 1999, the proportion of students passing the Texas Assessment of Academic Skills (TAAS) in Houston rose from 49 percent to 74 percent. But, Leonel Castillo said the TAAS is not a strong indicator of how successful students are at learning.

“When you pass the TAAS test, you’re doing the minimum,” said Leonel Castillo. “A lot of schools spend a lot of time on TAAS.”

During his confirmation hearing before the Senate, Paige defended his
wide use of standardized tests in Houston schools. He said that those who object to rigorous use of standardized tests to measure the effectiveness of instruction and the performance of educators seem “to imply that if you have low or no standards, more people will stay in school.” He added that some researchers have found that his testing regimen has enhanced student achievement. But Paige also told the Senate committee that multiple tests are needed to determine the success of a school.

“The purpose of the test is not to deny people things or to bring about negative impact,” he said. “The purpose of the testing is to determine whether or not we’ve been effective in whatever efforts and methods that were using.”

Campos also defended the use of the standardized tests, which she said can help the schools make budgetary and personnel changes to improve the schools, based on the outcomes of the tests.

But, Valenzuela argues that those skilled in pedagogy would look at additional data to get a clearer picture of the HISD. She cited the city’s dropout rate as a major indicator of serious problems with some of the policies adopted by Paige and the HISD. Indeed, the dropout rate in Houston hangs as a shadow over the rankings touted by the Bush Administration. A recently released report at a Harvard University education conference said that Houston has one of the worst dropout rates of the nation’s 100 largest school systems.

Max Castillo said many of Texas’ school districts fared poorly in the report because the state has an aggressive system of reporting dropout rates. But Castillo said that many of the school districts moved toward more stringent standardized testing without adequately funding efforts to upgrade the curricula or teacher preparation. Moreover, some Texas districts eliminated the practice of social promotion, which he said contributed to the increase in the dropout rate.

Still, Max Castillo said Paige should be hailed for his many accomplishments in the once-troubled HISD because of his management style and his results-oriented approach. “The superintendency of a major urban district,” he said, “is a very complex job.”

Another issue familiar to Paige that is likely to set off a firestorm in Washington, D.C., is that of vouchers that allow parents to use public funds to pay private school tuition. Bush has proposed allowing students in persistently poor-performing schools to use a portion of the schools’ federal Title I aid—coupled with state funds where allowed—to help pay for private schools. While Bush has repeatedly said that vouchers will not be a deal-breaker with the Democrats over his education reform package, he and his staff are using a public relations tactic of calling vouchers “parental choice.” It is a tactic Paige himself used skillfully in Houston. Only a handful of children within the HISD are reported to have used the voucher program.

Though Paige called himself a “passionate promoter of public education,” he called parental choice “a necessary condition to effective public education.” He said that even though the term vouchers has taken on a negative tone in recent years, the concept should be part of a mix of school choice options available to parents.

“The power of informed parental choice can change the status quo,” Paige said. “Failing schools should be given a definite period to change. If they fail to do so, children of low-income parents should have the option of transferring to another public school or using their share of federal funds to pay for another option, including tutoring, a charter school, or a nonpublic school.”

Leonel Castillo said Paige was able to win passage of the voucher program in Houston because he is skilled at giving his ideas a positive spin. Paige hired a $125,000 public relations person to promote his and the HISD’s efforts.

“He was able to change the image of the district,” said Campos. “When good things happened at the schools, you can be sure that everyone who should know did know. It was a good thing because how things are handled can make or break the image of a district or superintendent.”

As a trustee and officer of the board of education of the HISD from 1989 to 1994, Paige co-authored “A Declaration of Beliefs and Visions,” a board statement of purpose and goals for the school district that called for fundamental reform through decentralization, a focus on instruction, accountability at all levels, and development of a core curriculum. This document launched the ongoing, comprehensive restructuring of HISD.

Later, as superintendent, Paige created the Peer Examination, Evaluation, and Redesign Program (PEER), which solicits recommendations from business and community professionals for strengthening school support services and programs. He saw to it that HISD paid teachers salaries competitive with those offered by other large Texas school districts. Paige made HISD the first school district in Texas to institute contracts modeled on those in the private sector, whereby senior staff members’ continued employment with the HISD is based on their performance. He also introduced teacher incentive pay, which rewards teachers for outstanding performance and creative solutions to educational problems. In keeping with his business-like approach to education, Paige also adopted a management system at HISD called Main-Event Management that is widely used throughout the business world. It helped the school district garner nationwide acclaim for efficiency and accountability.

The Council of Great City Schools bestowed on him its Richard R. Green Award as the outstanding urban educator of 1999. In 2000, Paige was awarded the Harold W. McGraw, Jr., Prize in Education for his "extraordinary commitment to the improvement of education."
Spanglish: A Hybrid That's Here to Stay

BY ISIS ARTZE

Whether you know it or not, whether you speak it or not, and whether you like it or not, Spanglish is everywhere. Etymologically, the term is a combination of the words Spanish and English. The American Heritage Dictionary defines it as "Spanish characterized by numerous borrowings from English." The nearly 35 million U.S. Hispanics know it as their idioma, the language they speak on the streets and in their casas. It grace the covers of national magazines, is featured on advertisements, and is heard in popular song lyrics. Our president's nephew, George P. Bush, even spoke the language on the campaign trail.

To Ilan Stavans, the foremost scholar of this linguistic phenomenon, it is an anthropological journey. But to its opponents, Spanglish is a threat that must be defused.

In one way or another, Spanglish has been around for nearly 150 years, says Stavans, professor of Spanish at Amherst College in Massachusetts.

Asked about the future of Spanglish, Stavans replies that "the future is here," asserting that the language "has already played a dramatic role, not only in the way words are shaped, but also in grammar and construction."

If you trace the development of dictionaries in the Spanish-speaking world, it becomes clear that Spanglish has been silently evolving for quite some time, he says.

Toward the end of the 19th century, and in the beginning of the 20th, he adds, the frequency with which dictionaries of Anglicisms were published was accelerated. "Words like lasso, rodeo, amigo, maína, and tortilla made it into English; mister and money, into Spanish," he specifies.

So why all the recent fuss?

For starters, Spanglish has a new status.

"Once viewed as degenerate Spanish, Spanglish suddenly has cachet," writes Jennifer Bingham Hull. She points to the tremendous success of Latina magazine, whose cover headlines, nearly always written in Spanglish, have attracted 200,000 subscribers.

And again, one can look to Stavans for the answer, for it is precisely his two latest endeavors on the part of Spanglish that have made it such a hot topic.

First, Stavans is teaching a three-credit undergraduate course at Amherst, tracing the development of Spanglish, from a literary and anthropological perspective, "to try to understand what is happening with our language," he says.

The course, first offered in the fall of 2000, attracted nearly 60 students, a noteworthy accomplishment for a small, liberal arts college.

Second, and perhaps more important--Stavans has recently completed The Sounds of Spanglish: An Illustrated Lexicon, an extensive dictionary of Spanglish, being published by Basic Books.

"The buzz the course and the dictionary have created on National Public Radio and in newspapers around the globe has brought home to me just how much interest the subject of Spanglish arouses these days," says Stavans.

"But it also generates anxiety and even xenophobia," he adds. "In the United States, it announces to some people an overall hispanización of society, abroad, it raises the specter of U.S. cultural imperialism and the creation of a McLengua."

Opposition and Rebuttal

One of the most outspoken Spanglish dissidents is Roberto González Echevarría, professor of comparative literature at Yale University.

His stance, he says, is clearly documented in an article he wrote for The New York Times in March 1997. In it, Echevarría states that "Spanglish, the composite language of Spanish and English that has crossed over from the street to Hispanic talk shows and advertising campaigns, poses a grave danger to Hispanic culture and to the advancement of Hispanics in mainstream America."
“The sad reality is that Spanglish is primarily the language of poor Hispanics, many barely literate in either language. They incorporate English words and constructions into their daily speech because they lack the vocabulary and education in Spanish to adapt to the changing culture around them.

“Educated Hispanics who do likewise have a different motivation: some are embarrassed by their background and feel empowered by using English words and directly translated English idioms.”

Ana Veciana-Suárez, a columnist for the Miami Herald, partially echoes this concern in an article titled “We may know Spanglish, but teach it?”

“If we formally sanction Spanglish, are we allowing proper grammar to take a back seat to convenience?” she writes. “Are we giving the nod of approval to linguistic laziness and ignorance? Will the next step be to excuse our children’s lack of verbal achievement?”

“Teach them Spanglish, and teach them to settle for substandard English and menial jobs,” she concludes.

To this concern, Stavans responds that, to a certain extent, he agrees. “I don’t think the classroom should be used to teach it,” he says, explaining that, for now, the only course on Spanglish he advocates is one similar to his own, that is, taught from an anthropological standpoint.

In her argument, Veciana-Suárez also compares the recent Spanglish debate to that held four years ago in California over Ebonics.

And, in her comparison, she has a valid point, given that Stavans has dedicated a considerable amount of time, in his study of Spanglish, to an analysis of Ebonics.

Both are “intraethnic vehicle[s] of communication, used in the United States...to establish empathy among [groups],” he says.

“But the differences with Ebonics are sharp,” Stavans adds. “For one thing, Ebonics is not a product of mestizaje, the cross-fertilization of two perfectly discernible codes: Spanglish is.

“Spanglish is also not defined by class, as people in all social strata, from migrant workers to politicians, academics, and TV anchors regularly use it, both in the United States and south of the Rio Grande.”

In many ways, Stavans says, Yiddish is closer to Spanglish than Ebonics is: “Like Spanglish, Yiddish was never a unified tongue, but a series of regional varieties. Between Spanish and English, or ‘code switching,’ as linguists call it, these people will often use Spanish to express emotions and English for analytical thoughts. They also use Spanglish as a short-cut, replacing long Spanish words and phrases with shorter English ones.”

On the other hand, she writes, the popularity of Spanglish in Miami can reflect a lack of fluency in Spanish. “Though more than half of Miami-Dade County’s population is Hispanic,” she explains, “only three percent of its public school students graduate from high school fluent in Spanish.

“Moreover, while both Yiddish and Spanglish started as intraethnic minority languages, both quickly became transnational verbal codes.”

The presence of Yiddish in Stavans’ own upbringing in Mexico, in a small Jewish enclave, was crucial to his later fascination with Spanglish, he says.

Blessing or Burden

In her article, Hull also addresses the role of Spanglish in Miami, where it is undeniably a predominant language. She writes that, on the one hand, the prevalence of Spanglish demonstrates the dexterity of its users: “For those who are truly bilingual, Spanglish can reflect impressive verbal skills as speakers choose from two languages for just the right expression. “Switching back and forth

“Miami business leaders complain that the prevalence of Spanglish in South Florida is symptomatic of a larger problem they face finding employees who are truly bilingual.”

To this notion that Spanglish might hinder social advancement, Stavans says the complete opposite is true: “For Latinos to succeed in the U.S., English has to be learned,” he concedes, “but you are worse off if you don’t speak Spanglish.”

Another common critique of this linguistic practice, also articulated by Echevarría, is the “purist” view that the Spanish language must be protected. He writes that “Spanish is our strongest bond, and it is vital that we preserve it.”

Echevarría anticipates that some will challenge him, comparing the development of Spanglish, from Spanish and English, to that of Spanish as a branch of Latin: “I suppose my Medievalist colleagues will say that without the contamination of Latin by local languages, there would be no Spanish (or French or Italian),” he writes.

“We are no longer in the Middle Ages, however, and it is naive to think that we could create a new language that would be functional and culturally rich. Literature in Spanglish can only aspire to a sort of wit based on a rebellious gesture, which wears thin quickly,” he adds, concluding that “those who practice it are doomed to writing not a minority literature but a minor literature.”

“Languages are living things,” tavans replies, “they are constantly changing and evolving.” It is spoken by everybody, even by those who reject it, he adds, “and if we’re using it, it’s proof that it’s needed.”

Another adamant defender of the Spanish language is La Real Academia Española (RAE). To encourage the use of proper Spanish, it has established a website at www.rae.es, where it offers an interactive service, Español al Día, to answer questions about the correct use of Spanish.

Nevertheless, last October, during a visit to University of Oviedo library in Spain, RAE director Victor García de la Concha and Language Academies Association secretary Humberto López Morales said that Spanglish does not threaten the Spanish language but does threaten English.

So long as schools and the Spanish-language U.S. media continue to uphold correct grammar, “there is no danger,” López Morales argued, adding that his organization’s project to create a dictionary of Latin American words and expressions (Diccionario de Americanismos), which was launched in 1996, will be completed in four years and will include 125,000 entries.

Their suggestion that Spanglish poses a threat to English, as opposed to Spanish, seems political in nature,

and stands in complete opposition to Echevarría’s final critique.

“To permit and promote Spanglish—if it actually exists—is to surrender to the globalization and the predominance of English,” he says.

“Politically,” Echevarría adds, “Spanglish is a capitulation; it indicates marginalization, not disfranchisement.”

One could rebut both arguments by saying that, in Spanglish, English encroaches upon Spanish to an extent comparable to that at which Spanish encroaches upon English, thereby resulting in a somewhat politically neutral verbal code.

“If it’s in the dictionary…”

Another debate is specific to Stavans’ dictionary. The heading “If it’s in the dictionary,” which appeared in an article in The Arizona Republic by Daniel González, captures the essence of the conflict, suggesting that once a dictionary is published, its contents become authoritative.

The book itself is said to contain approximately 6,000 words, mini essays, descriptions of how words are used in context, and a critical apparatus indicating whether the word has been previously recorded in a dictionary, and whether words are regionally or sub-culturally specific. It will list entries as Spanglish-English and Spanglish-Español.

What some consider the alarming component of the physical presence of this text is that, even now, Spanglish is an oral tradition, so that seeing it in black and white, in dictionary form, changes its essence.

“The question of the role that dictionaries play in the shaping of a language” is an issue Stavans addresses in his course. He assures that his dictionary “is not prescriptive.” It is not to teach people, nor is it to be used as a guide when writing school papers, he asserts. Instead, for the time being, it serves an anthropological purpose: it documents a language that is spoken throughout America.

“For me, it is a way to legitimize a linguistic phenomenon that has been around for some time,” says Stavans. “More than a fashion that comes and goes, it’s part of a trend that ultimately will reshape the way we speak.”

Who will use the dictionary? “People interested in the phenomenon,” Stavans anticipates, but perhaps it will serve other purposes in years to come, he adds.

The Sounds of Spanglish contains words used in nearly every facet of daily life. One recurring subject is sports, including words like los doubles (tennis), el corner, and el ofafú (soccer). Another predominant category is Cyber-Spanish, a result of our increasingly Internet-driven lives and the American domination of this enterprise. Cyber-Spanish comprises nearly 10 percent of the words in Stavans’ dictionary. Words like chatear (to chat), forardear (to forward), and el mouse (the computer mouse) do not have recognizable and readily used Spanish translations.

The acceptance of Cyber-Spanish “was a hard-fought battle from the ’60s through the ’80s,” says José Carrero Caldrón, director of the Department of Communication at the Iberoamerican University in Mexico City, in a New York Times article dated August 6, 2000.

“But the nationalists and purists are in retreat, especially because in the cybernetic world, many English words have no easy equivalent.”

Enthusiastic about his work, his course, and his upcoming dictionary, Stavans’ only message to academia reiterates the sentiment he expresses in an essay, “Against the Ostrich Syndrome.” “In the academic world, we choose to bury our head, in the ground, not wanting to see what’s around us.”

“We need to stop ignoring Spanglish, to realize it’s there, and that languages are in constant change.”
REACHING ACROSS THE AMERICAS

The David Rockefeller Center for Latin American Studies at Harvard

BY EDWARD RUBIN

The Birth of a Center

The moment was ideal. The cold war was over, every Latin American nation, with the exception of Cuba, was being led by a democratically elected leader; the region's economies were beginning to stabilize, and anti-Americanism was on the wane. For Rockefeller and Rudenstine, "now" was the time, Harvard was the place.

The University had long been involved with Latin American studies, but it wasn't until late 1994 that its president, Neil Rudenstine, and David Rockefeller, former chair and CEO of Chase Bank, put their heads together and created the David Rockefeller Center for Latin American Studies. With the appointment of John Coatsworth, a world-renowned historian on Latin American affairs, to direct the Center, a powerful triumvirate was in place. And Harvard University began to take Latin American affairs most seriously.

The joining of these three, all deeply involved, highly committed, and intricately connected to Latin America, was a ménage made in heaven.

Rockefeller's interest in Latin America could be traced back to his family's interest in the old Standard Oil Company. Rudenstine, relatively new to Harvard and to the issues of Latin America, had cut his teeth at the Mellon Foundation, where he researched and wrote a pivotal report on the state of Latin American studies at U.S. universities. His prime goal at Harvard was "to bring the University closer together." He was also keen on strengthening Harvard's commitment to Latin American studies. Instinctively, he knew that in any large institution, there was a need for increased collaborative scholarship. His thrust was fueled by a vision of a Harvard that could unite its nine distinct faculties and bring its vast, but decentralized resources to bear on important problems facing society. Rudenstine was to pass this mandate on to the Center.

The mission of the Center, as Rockefeller stated in a letter to Rudenstine, was "to teach future generations and future leaders more about Latin America."

"The new Center," he wrote, "will not only promote such learning at Harvard but will serve as a hub to gather people with different perspectives to address concerns of the entire hemisphere."

"Harvard is uniquely positioned," said Rockefeller, "to bring together its 'best minds and most qualified scholars and practitioners on issues affecting the governments and more open economies in Latin America, and because of its history and reputation, has the unique capacity to legitimize issues literally put them on the map and to insist that they are important."

To back up his words, Rockefeller, an alumnus of Harvard and longtime supporter, committed $11 million to help endow the Center and agreed to have it bear his name.

As director of the David Rockefeller Center for Latin American Studies, John Coatsworth, professor of history and Monroe Gutman Professor of Latin American Affairs, is the glue that holds it together. With many books and other publications on Latin America, countless lec-
tures, and visiting professorships throughout the region to his credit, he is seems to be the scholar of the group. His duties are to guide Center strategy and set its main policies and priorities with faculty colleagues across the University.

"The Center's first goal," according to Coatsworth, "was to improve communication among Harvard's many researchers, to inspire conversations that would not otherwise take place."

Right off the bat, he brought together two groups on campus that didn't know each other. One, housed in the Harvard School of Public Health, was studying air pollution in Mexico City and its impact on public health. The other, in the Graduate School of Design, was considering urban design issues in the same exploding metropolis. "That was six years ago," said Coatsworth. "Now, with our website, program, and publication linkages, thousands of researchers on campus and worldwide--through the efforts of our Center--are exchanging information."

Since the Center was inaugurated on December 4, 1994, it has grown tremendously. "We started as a small committee of 16 faculty members (mostly from arts and sciences), a small budget, about a hundred employees, two small offices, a weekly seminar for about 20 or so students and faculty, and no publications," Coatsworth said.

"Today it directly involves over 80 faculty from throughout the University's nine schools. Our annual budget last year was $2.2 million. We employ eight full-time staff, four part-time program associates (coordinators), and about 20 or so part-time student interns and numerous administrative and advisory support committees. With the addition of new staff and a growing slate of programs and our numerous publications, all dealing with Latin American topics, we are rapidly outgrowing our once ample quarters."

In just a few years, DRCLAS, as the Center is commonly referred to, has become a major player in the affairs of Latin America. On any given day, presidents, ambassadors, and ministers of Latin American governments, not to mention scholars and government officials from all over the world, can be found on Harvard's campus, giving and attending speeches, lectures, and conferences, many of them sponsored or co-sponsored by DRCLAS. Its schedule of events is mind boggling.

Last year alone, the Center organized 112 major international conferences and 98 additional workshops, seminars, and special events ranging from economic roundtables to poetry readings. In addition, there were 12 regularly scheduled Tuesday Latin American Seminars, 12 Latino Cultures Seminars, seven History Workshops, three art exhibitions, and two Corporate Partner Seminars.

Last Spring, in recognition of its good works, DRCLAS was designated a National Resource Center through the U.S. Department of Education's Title IV Program. Title IV funding supports and enhances the Center's outreach projects and allows it to create and develop new programs to foster a greater understanding of Latin America among the general public, business leaders, journalists, and educators, especially those teaching in local area primary and secondary schools.

**Inner Workings**

Such fast-track blossoming is no accident. At the core of the Center's growth is a passionate, highly disciplined, hardworking staff. All are thoroughly immersed, each in a unique way, above and beyond their job duties, in Latin American affairs. Before taking their posts, they are rigorously interviewed by many committees and individuals to make sure the fit is right.

As one might expect, the staff has taught, worked, and traveled widely in Latin America and other parts of the world. Many have written and are currently writing books. They are academic polyglots.

Overseeing the day-to-day administrative activities of DRCLAS is Steve Reifenberg, the Center's executive director. His "baptism" took place in Chile.

"After graduating from the University of Notre Dame, I went to Santiago and worked two years at a small orphanage and then later at a human rights organization in Santiago. Nothing was ever the same after that."

Supporting both staff and Center is a host of administrative, policy, and advisory committees. The sheer number of layers resembles a government unto itself. The Executive Committee, chaired by Coatsworth, consists of eight senior faculty members who serve three-year renewable terms. It meets each month to advise the director on Center policies and operations. This university-wide, interdisciplinary team plays a critical role in the internal governance of the organization, as well as providing links to external constituencies inside and outside the organization. Committee members also serve as spokespersons, opportunity spotters, and network builders. In addition, each has taken leadership responsibility for a major activity of the Center, roles that include orchestrating major conferences, or chairing separate research, planning, or student grants committees.

The Policy Committee, also chaired by Coatsworth, has 36 members drawn from Harvard's eight professional schools and from the faculty of arts and sciences. They meet each term to guide the Center's development and to recommend to the University president candidates for the Robert F. Kennedy Visiting Professorship of Latin American Studies. All eight Executive Committee members also serve on the Policy Committee.
Though academic committee work is time-consuming and strenuous, and doesn’t come with a paycheck, it is more than a labor of love. The perks are incalculable. In addition to being engaged in the Center’s governance and programmatic advancement, participating faculty benefit from grants to support their research and course development. They also publish their work within the Center’s Work Paper Series and take advantage of the Center’s publications and events—large public conferences, seminars, lectures, and panel discussions within which to share their ideas. Most importantly, they are there, on the ground floor, when things start popping.

The Advisory Committee, which could be termed the third arm of DRCLAS government, is comprised of 43 distinguished individuals from the United States and Latin America. Chaired by David Rockefeller, its members are widely recognized as the region’s leading figures in international business, industry, and the world of arts and culture. Through their service on the Committee, which meets twice a year, members offer advice and counsel to help shape the Center’s growth and development. The contributions of Committee members, including their expert guidance and significant financial support, are of critical importance in enabling the Center to carry out its mission. Not surprisingly, slightly more than half of the members are from the U.S., Mexico, Brazil and Argentina, countries with the strongest economies.

Programs and Benefits

DRCLAS is the campus clearinghouse for all things Latin. The Center’s quiet little building at 61 Kirkland Place in Cambridge is the first place where students and faculty interested in Latin America go to find out what is happening on and around campus.

"Given that we don’t have majors, and can’t ourselves offer classes or hire faculty, we, by necessity, have to think of ourselves as a service organization," said Reifenberg. "This means we work with every part of the University—students, faculty, and administrators—to provide greater opportunities to study and to research about Latin America, as well as to travel and connect with the region in all kinds of different ways.

"Though there is no major—what is called a concentration here at Harvard—in Latin American studies, what the Center does offer is a Certificate in Latin American Studies. Undergraduate students who fulfill specific course requirements, demonstrate proficiency in Spanish or Portuguese, and present an honors thesis on a topic relating to Latin America may apply for the certificate.

"For graduate students, the certificate is awarded to Ph.D. candidates who apply and write a dissertation related to one or more of the Latin American countries or Brazil." Upon meeting these criteria, the Center issues the certificate.

"This and our summer research and travel grants are among our most popular programs among students," says Reifenberg.

To hear it from the students, DRCLAS research and travel grant programs are indeed the most cherished and, in many cases, the most critical to their careers. Ellen Schneider, a Harvard senior studying Latin American history, spent her summer working as an intern at the U.S. Embassy in Nicaragua.

"I was able to take the unpaid internship due to substantial support from the Center’s internship grant. What’s more, it was DRCLAS’ letter of recommendation that got me the job. It has the most wonderful resources."

Gordon McCord, a junior at Harvard, concentrating in economics, spent his summer in Rio, where he worked for PlanetaVida.com, an online health information and health services provider.

"It was my first trip to Brazil, and although I received a salary, the trip would have been impossible without the DRCLAS grant. This summer, I plan to do research on my thesis in Peru. I’ll use the Center’s resources for finding the right people in Peru, at the various universities in Lima, who are doing research or have access to the data I need. If I am lucky, the Center will help fund this trip too."

John Courriel, currently studying at Harvard’s School of Law, related his experiences. "I received a very generous DRCLAS traveling fellowship to do my thesis research in Buenos Aires. I had the good fortune to be matched up with Luis Moreno Ocampo, an Argentinean-based friend of the Center’s. We interviewed scores of government personnel and executives at multinational corporations about U.S. anti-corruption policies and their impact on the local market. When I came back to the States after six weeks, my friends at the Center helped me keep in touch with Argentina throughout the writing process. I simply couldn’t have written my thesis without the Center."

Echoing the sentiments of countless Harvard students, Courriel’s last words were, "The Center is a gold mine for students and academics interested in Latin America. Its staff is professional and kind. We’re blessed to have such a great resource."

A popular DRCLAS program is its Weekly Tuesday Seminars on Latin America. Preceded by a light lunch, these lectures, held from 12:00 to 2:00 p.m., are widely attended. Students are especially enchanted with the variety of speakers and their topics—so much so that some students, among them Ellen Schneider, schedule their classes so as not to conflict with the lectures. This year, the topics ranged from the politics of Venezuela to the behavior of monkeys in the galley forests in Argentina—from "The Dollarization"
Trend in Latin America” to “Making Bad Matters Worse: U.S. Policy Towards Colombia,” the latter delivered by Ambassador Robert E. White, former U.S. ambassador to El Salvador, and president of the Washington, D.C.-based Center for International Policy, which provides critiques of U.S. policy, especially toward Latin America.

DRCLAS also sponsors major conferences to focus attention on areas of importance. Like the lectures, topics of interest, always extremely varied, range from economic, institutional, and political reform to health, the environment, immigration, and philanthropy and Latino studies. Participants come from all over the world.

To cite but a few, in January of last year, 40 agronomists, economists, and ecologists from Argentina, the United States, and Europe assembled for a three-day workshop, “Globalization and the Rural Environment.” Transgenic crops, trade, and sustainably agriculture issues dominated the discussions. In March, U.S. scholars convened at Harvard to discuss and develop an agenda for basic research on Latinos, now the fastest-growing ethnic group in the United States. Since many Latinos keep close contact with their home countries through visits and remittances, their fortunes have a direct impact on those countries, especially Mexico, parts of Central America, and the Caribbean. The title of this workshop was “Latinos in the 21st Century: Mapping the Research Agenda.”

Spreading the Written Word

A large part of the Center’s reputation and success, on campus and beyond, resides in the very busy and capable hands of its publications director, June Carolyn Erlick. A Fulbright Scholar and former overseas journalist in both Latin America and Europe for 18 years, Erlick is currently working on a biography of a Guatemalan journalist, Irma Flaqueur, who disappeared in 1980. Erlick, like many of the Center’s prime staffers, has found her métier at DRCLAS. Here, she is happily ensconced “as a practicing journalist in a stimulating academic environment.”

The Center’s publications range from informative brochures to student, faculty, and professional staff directories; Latin American course guides; a monthly calendar; a newsletter; a book series; a working paper series; and a lengthy annual report. It is these “bibles” that spread the news of the Center’s countless events to researchers, faculty, students, and followers of Latin American issues and events at Harvard and beyond.

Hands down, the most popular and widely distributed Center publication is DRCLAS NEWS. Published three times a year, with a circulation of 6,000, this newsletter cum magazine contains articles contributed by students, researchers, faculty, and working professionals from all walks of life and from all over the world. Its focus is on current Latin American and Latino issues as well as reports on conferences, new publications, research, and other initiatives related to Harvard University’s programs.

“All of the issues have themes,” said Erlick. “Last year we published issues on Health in the Americas, Cuba Today, and Discovering Latinos. This year, upcoming issues will tackle art in the Americas, Mexico, tourism, and philanthropy. Our primary audience is academic, a little less than half here at Harvard, but an audience that encompasses undergraduates and graduate students, faculty of all levels, and visiting scholars. There is also a growing audience in the community and non-profit sectors, as well as an overseas audience.”

Reaching Out

With the Center rapidly expanding its activities organized for groups outside the University, outreach has become a core component of its mission. As the newest member of the staff, Jill Netchinsky Toussaint, coordinator of outreach programs at DRCLAS, who arrived about the same time the Center received its Title IV designation, is thrilled with her job.

“I have always been involved with cultural activities, as a poet myself and community organizer, most often connected to Latin American and U.S. Latino issues. For many years, I have taught language, literature, and culture at the university level. In former lives, I worked as a museum educator and teacher in a bilingual public school in New York City. This job came along at a perfect juncture for me. I get to put my Latin Americanist background to use, have a positive impact on my local community, and practice new skills. What else could I ask for?”

Local school visits that pair students in grades six through 12 with Harvard scholars and artists involved in the Latin American and Latino Art Forum are a key component of DRCLAS outreach efforts. During one outing, 35 bilingual students, ages 11 to 14, from Martin Luther King Middle School in Dorchester, Massachusetts, talked with guest artist Dominique Pepin, whose photos of “Reflections and Ceremonies: Meeting with a Mazatec Shaman” were on exhibit, and then set off for a guided tour of Harvard’s Peabody Museum Mayan collection. The students hailed from several Latin American countries, a few arriving in the U.S. just a few weeks earlier.

“Their enthusiasm that day was infectious,” said Toussaint. “The students found respect afforded their diverse cultural backgrounds, teachers found lively resources to weave within state curriculum frameworks, and the visiting artist found herself inspired.”

The Center’s newest and fastest-growing initiative is its Corporate Partners Program, which extends the Center’s outreach to the international business community. Corporate Partners have
access to all Center events, including two seminars organized especially for them. They in turn provide generous unrestricted support for the Center, a minimum pledge of $10,000 per year. Last year’s Seminars debated divergent perspectives on dollarization for Latin America and discussed the impact of July 2000 elections on Mexico’s future.

Challenges of the Future

Today, there are more than 30 million Latinos or people of Latin American origin in the United States, constituting roughly 11 percent of the total population. Census projections now suggest that by the year 2050, fully a quarter of the U.S. population will be of Latino origin. The population is growing, and so is the Center.

“So far,” said Reifenberg, “we have raised close to $40 million in endowments and current-use gifts. Most of these resources are to create chairs or professorships at Harvard related to Latin American studies, as well as fellowships for visiting scholars and fellows, and programs, publications, and research. There were originally two chairs devoted to Latin American studies. Since the Center was founded, five new chairs have been created.

“Mostly we are planning year by year, but I think we’re realizing we need to do more of the long-term planning, both for us and to be able to let people know what we are up to. We certainly are one of the fastest-growing centers for Latin American studies in the U.S. or the world. We’d like to think that we are also one of the most innovative, building bridges across disciplinary divides, linking faculty doing basic research with those interested in applied work, creating all kinds of dynamic linkages to individuals and institutions in the region, and having a broad definition of what a center for Latin American studies is all about. We consciously don’t limit ourselves to the physical territory that is Latin America, but also include all the folks of Latin origin living in the U.S. and other parts of the world.”

Summing it up, Coatsworth acknowledges that the rapid changes occurring in Latin America will certainly affect DRCLAS.

“I hope they will inspire us to do more and to do it better,” he said. “One area that needs a huge amount of work is that of increasing the quality and coherence of U.S. policy toward the region. I hope we can find a way to be more helpful to the policy committee in the U.S., but that’s a pretty tall order given that so much of what we are doing now tends to be self-defeating and counterproductive.

“We have already given priority to several areas where we think Harvard could and should be doing more in teaching, research, or setting a better example. Four areas we are devoting a lot of attention to now are Latino studies, Brazil, Cuba, and Latin American art.

“Our biggest challenge, I think, is to keep up with the tremendous interest and enthusiasm the Center has inspired at Harvard and elsewhere. Our main responsibilities are to foster the creation of new knowledge and understanding, educate our students and future citizens, train future experts and teachers, and share what we have learned with the larger community. If we can keep doing this well, we’ll succeed.”

Based in New York City, Edward Rubin is the field director of Audits & Surveys Worldwide, an international research company. Last year, his slide lecture La Vida Loca: The Life of the Artist in Cuba was presented at Cooper Union in NYC and at the University of Texas, in Galveston. Tuesday, April 10, 2001 he will present a new slide lecture, One Long Singular Sensation: The London Artworld from Frances Bacon to Damien Hirst, at Cooper Union’s Great Hall, NYC. Bob lectures are available for booking. Edward Rubin can be reached at erubin5000@azl.com.

University of Michigan-Ann Arbor

A Place of "Incredible Possibility"

BY ROGER A. DEITZ

ow does one characterize an institution as large and diverse as the University of Michigan? The University seems to defy simple description. U-M is comprised of 19 different schools and colleges at Ann Arbor with an additional four each at Dearborn and Flint, over 200 undergraduate majors and 600 degree programs, and students who hail from 50 states and over 134 countries. With all that, educators at the institution respond that U-M is a place of "incredible possibility," a place where students "shape that possibility according to their own interests, goals, energy, and initiative."

President Lee C. Bollinger puts it this way: "The University of Michigan, a leader in undergraduate and graduate education and one of the premier research universities, offers rigorous academic programs, outstanding faculty, and diverse cultural and social opportunities in a stimulating intellectual environment." As to the school's impact, he adds, "The U-M's more than 400,000 living alumni--more than any other American college or university--include 24 Rhodes Scholars, astronauts, and such American icons as Mike Wallace, Jessye Norman, Arthur Miller, and former president Gerald R. Ford. Among the strengths of the Ann Arbor campus are its more than 700 student clubs and organizations, 25 varsity sport teams, a dozen museums and galleries, plus several nature areas. The 24 University libraries contain some seven million volumes, including the largest collection of papyri in the Western Hemisphere--now available online to scholars and the public. The acoustically acclaimed Hill Auditorium and numerous smaller theaters provide inspiring venues for student and professional performers as well as for faculty composers. The writing talents of students are celebrated through the Hopwood Awards Program. Director and screenwriter Lawrence Kasdan, playwright Arthur Miller, and poet Marge Piercy are among the many Hopwood winners who have gone on to successful writing careers."

"Upon reflection," Bollinger continues, U-M's "size, complexity, and academic strength, along with the breadth of its scholarly resources and the quality of its faculty and students, contribute to a dynamic intellectual environment for students as they encounter new people, cultures, and ideas. From those experiences, individuals come away from Michigan forever enriched."

total. Annual tuition and fees for an incoming first-year student run to
about $6,525 for in-state students and $20,536 for out-of-state students.

Most Michigan students choose to join a Michigan Learning Community
as “experience the best of both worlds”—the immense intellectual
resources and traditions of a world-class public university combined
with a small-college atmosphere that offers them personal attention and
the possibility of forging lifelong friendships. The Learning Communities
are both supportive and expansive. They encourage students to broaden
their academic accomplishments and assume leadership roles.
Undergraduates can choose from many options, including classes held in residence halls, guest lectures, mastery study workshops, intensive language study, personalized advising, research opportunities, mentoring, community service, social clubs, field trips, athletic trips, and more.

The Michigan Community Scholars Program is a living/learning program that focuses on community and change, in particular, the transition from high school to college. It offers a supportive community of students, staff, and faculty that fosters learning and collaboration inside and outside of the traditional classroom setting. Students are required to participate in a one-credit seminar, community service projects, mastery workshops that accompany selected academic courses, and other program activities. Campus organizations that have a Hispanic interest include Alianza, which promotes Hispanic culture; La Salud, a community service health organization for Hispanic students; and La Voz Mexicana, which promotes academic, cultural, political, social, and professional needs of Hispanics. There is a Latino Law Association, a Puerto Rican Association, and an Organization of Latino/o Social Workers, as well as a Society of Hispanic Professional Engineers.

The founding of the University in 1817 came with a grant of 1,920 acres of land ceded by the area Indians for “a college at Detroit.” The territorial legislature planned “a university of Michigania” as a territory-wide public educational system. The school moved to Ann Arbor in 1837, the same year in which Michigan became a state. The school relocated to take advantage of an offer made by local entrepreneurs—40 acres of land at the edge of town. The original acreage ceded by the Indians was sold, and the proceeds remain part of the University’s permanent endowment. The University of Michigan Endowment Fund was valued at $2.8 billion on December 31, 1999. That makes it 17th among 508 institutions and 4th among 157 public institutions, according to a 1998 study.

The University of Michigan-Flint opened in 1956 with a gift from the Mott Foundation. The University of Michigan-Dearborn followed in 1958, situated on the land of the Henry Ford estate, a gift from the Ford Motor Company. The Ann Arbor campus is located 40 miles west of Detroit, along the Huron River. It is comprised of five major areas: Central Campus, East Campus, North Campus, Medical Center, and South Campus. The location now totals 3,129 acres, with 551 major buildings and 1,506 family housing units. The total book value of the physical plant is $71 billion.

President Bollinger says that the University's commitment to research dates back to 1892, to the inaugural address of President Henry P. Tappan, who unveiled plans for connecting the classical course of education with scientific learning. President Bollinger says U-M spends half a million dollars for research expenditures for 1998-99 ran to $493,721,931—the largest research outlay among U.S. universities.

“In 1998-99, for the eighth year in a row, the University had the largest volume of research in the nation, as measured by dollars spent on research and scholarly work through peer-reviewed sponsored activity and institutional funds. The ranking is based on results of an annual survey conducted by the National Science Foundation,” notes the president. Federal agencies provided the largest portion of the funds—695 percent—with most of the remainder from U-M funds (12.2 percent), industry (7.2 percent), foundations (3.6 percent) and professional associations (1.6 percent). President Bollinger reports that the University is investing significant resources in the life sciences with the building of a new Life Sciences Institute—a research complex that will serve as a hub for cross-disciplinary research and teaching in the life sciences.

The Institute, says the president, “is part of the U-M’s broader Life Sciences Initiative, a campus-wide effort to coordinate and expand research and teaching in the rapidly advancing fields of biological and biomedical sciences, as well as other areas of study that bear on and are influenced by the life sciences.

“More than 40 years ago, U-M confirmed the safety and effectiveness of the Salk polio vaccine. Today, U-M scientists are developing cancer vaccines, discovering how cells communicate, and creating bioartificial organs that some day could provide life-saving treatment for thousands of people. The U-M Health System, one of the world’s largest healthcare complexes, treats more than one million patients annually.”

Bollinger sees diversity as an important issue, but not a new topic at U-M. “Throughout our more than 180-year history, the University has been committed to educating a wide range of students and has aspired to provide a first-rate education to a diverse student population, based on the premise that a truly remarkable education is one that creates the opportunity for students to learn about differences as well as similarities. Alumn/i and students of this University have a strong attachment to the principle that encountering differences, rather than one’s mirror image, is an essential part of a high-quality education. My own experiences as a student, a member of the faculty and a parent, as well as the experiences of others whose views have been expanded through the prism of new ideas and different viewpoints, underpin my belief that the University must remain a community that embraces variety.”
NJCU Builds on New Name and New Initiatives

President Explores Worldwide Methods

What's in a name?

Just ask Dr. Carlos Hernández, president of New Jersey City University, known as Jersey City State College until 1998, when it attained university status.

"Even though there were immediate psychological benefits from the new name, it was apparent that we couldn't just change our label and expect to be a more worldly institution," said Hernández. "I asked the faculty and staff to think about what this means, to begin a process of self-inquiry and consider the questions: What do we want to be? How should this new title affect our programs?"

The name change created multiple opportunities and challenges. As Hernández explained, it offered a chance to polish the school's somewhat tarnished image. As an urban public campus, located across the Hudson River from New York City,

NJCU's reputation suffered during economic cycles that brought budget crises and decay to its home base of Jersey City, NJ, one of the most ethnically diverse and densely populated areas of the country.

"The public perception of urban institutions like Jersey City State College was one of a somewhat run-down facility not offering quality education," said Hernández.

But Hernández believes that view is a misperception, based on the fact that urban campuses are used differently than are sprawling suburban campuses. The nature of the campus is more compact and vertical, rather than horizontal, he explains. The high density of population on campus and in the surrounding area can lead to overuse of facilities, so there must be a conscientious effort to maintain buildings and property.

"If the physical environment is
not conducive to learning, then academics suffers,” said Hernández. For this reason, the University has been involved in major construction and capital improvement projects to create first-class facilities. The 30-year-old library was recently redesigned and modernized to support current and future information technology, with a special emphasis on users’ access to worldwide resources.

"The building is designed specifically to enhance the learning and working environment of artists,” said Hernández. “We need this type of imaginative investment, not just in the intellectual future but also in the physical future of the University.”

The institution’s future is very much on the mind of Dr. Hernández as he completes his seventh year as president.

One focus of his administration has been to increase its international character and address professional and cultural differences present in the global marketplace. Hernández is committed to making the University a center of international learning and opportunity.

“American universities can no longer teach or operate with an insular mentality,” he said.

"We live in a globalized community, and we must encourage international perspectives, exchanges, and approaches to thinking, teaching, and learning. Ultimately, the success and survival of our institutions will depend on a globalized approach to scholarship and teaching.”

To this end, the University will continue to implement a U.S. Department of Education Title VI Undergraduate International Studies and Foreign Language Program grant entitled “World Languages and Cultures in Urban Education.” The grant supports the internationalization of the curriculum, the revision of teaching certification for foreign language teachers, the enhancement of education-abroad advising and infrastructure, and the acquisition of books and multimedia resources for research and courses.

Some of NJCU’s newest internationalization
initiatives include:
• an intensive foreign language exchange program in Spain and Germany;
• International Studies Presidential Scholarships, which provide financial assistance to students pursuing studies abroad;
• hosting a cultural exchange program between a local Jersey City, N.J., high school and the City Technology College of Kinghurst in Birmingham, England;
• a Visitor Lecture Series that brings two experts on international education, one from China and one from Mexico, to lecture and meet with faculty administrators and students; and
• the inauguration of international sports competition.

Last May, NJCU’s basketball teams traveled to France, where they challenged local teams in Monte Carlo and Venice, France. The Venice team was hosted by NJCU last fall.

Hernández is particularly excited about the grant component that offers study abroad opportunities for NJCU students.

“Our students often don’t have the financial means to undertake study abroad, so we created the presidential scholarships to help them,” said Hernández. “It is an intensive program whereby they live in host homes in other countries and receive college credit for their studies.”

The University is also developing a relationship with INTERNEXUS, an organization that has offered study abroad and language training for 50 years.

“They have an infrastructure that supports these endeavors,” said Hernández. “We would like to send NJCU students to their sites and accept 15 to 20 of their students on our campus.” He adds that Jersey City is an ideal location for students from abroad since it offers a cosmopolitan atmosphere where language and cultures from many countries are represented.

The student body itself is also one of the most diverse in the area. NJCU enrolls 9,400 students—28 percent Hispanic, 20 percent African American, and 10 percent Asian. As a result, there are many programs to enhance the success of Hispanics and other minorities.

“Our programs may serve a preponderance of Hispanics, but they benefit all students on campus. This is not an issue of ethnicity but rather one of serving a first-generation population, and that was our mission even before we became a university,” said Hernández.

One initiative aimed at this goal is Proyecto Access, sponsored jointly by HACU and NASA, and designed to encourage Latinos’ interest in the disciplines of math and science, where they tend to be underrepresented. NJCU brings middle and high school students on campus during the school year and in the summer to work with college first-year students and sophomores on projects that make math and science fun. They use experiments that help the younger students understand logic, scientific research, and use of laboratory equipment. Through games such as chess, the University mentors show underlying concepts of probability and statistics. The visiting students are tutored and helped by faculty and staff.

Another program, The Learning Communities (TLC), funded through the U.S. Department of Education, was created to improve retention and graduation rates for Latinos and other minorities. It targets a cohort of first-year students who receive intense support and mentoring to help them through college. The program is in its third year and has produced a 60-70 percent retention rate.

The University has also received an $1.8 million grant from the United States Department of Education through the Title V, Developing Hispanic-Serving Institutions Programs. The five-year grant for NJCU’s “Re-Organizing to Support Student Success” project will run through September 2005.

The NJCU grant funds faculty professional development that supports instructional and curricular innovation; the development and adoption of a Summer Bridge program for first-year students; the implementation of a First-Year Experience model that teaches academic thinking; and faculty-driven revision and refinement of NJCU’s General Studies Program.

Under the grant, New Jersey City University will also establish a Center for Instructional and Technological Innovation, to expand the faculty’s bank of cutting-edge teaching strategies.

While these projects have helped NJCU make great strides in fulfilling its mission of educating a diverse, urban population, it faces other challenges that are part of a widespread conundrum in higher education. One of those challenges is that of diversifying the faculty, a movement that has not kept pace with the changing faces of student enrollment. The New Jersey Commission on Higher Education recently released a report showing that 80 percent of college faculty in the state is still White.

“That’s a problem that all institutions face, although we are doing better than most,” said Hernández. “We have been able to bring in minority faculty in areas where conventional wisdom says they are not available, such as philosophy, computer science, and natural science.

“But the problem of diversity in the ranks of faculty is almost a generational one, and it is not going to turn around soon. You’re talking about a group of people who were trained 20 years ago and are still teaching. As we get significant retirements, we will make more progress in this area.”

Hernández is not as hopeful about the prospects of more Hispanic presidents in higher education.

“I look at the decreasing number of Hispanic presidents in our state,” said Hernández. “When I became president in 1993, there were several of us. Now I am the only one!”

Hernández is proud of his accomplishments and amazed at the course his life has taken. His career in higher education began 27 years ago, when he entered the academy as a psychology professor at Jersey City State. At the time, he did not even think about becoming president. Even though Hernández spent 27 years at the same institution, he developed a vision of global education through research and travel.

Hernández’s research explores technology-based instruction models, which he has witnessed in all parts of the world. What he has seen has given him a new perspective.

“In the United States, we think of ourselves at the top of the pyramid. Most students from around the world would love to study here, and we have a lot to offer, but we have a lot to learn from other countries,” said Hernández. “For example, places like India are lagging behind in technological education, but they have an advantage because they have not committed to one particular approach in technology. They are willing to explore and try other methods. As a result, there are all types of types of group teaching and learning models that we have not seen because of our one-person, one-computer model.”

Hernández has been invigorated by the process of transforming the learning environment at NJCU. But he also faces issues that confound many of his counterparts at public institutions.

“Universities such as ours and CUNY are struggling to maintain standards and open admissions,” he said. “We are also scrambling to find funding for the needs of our increasingly complex institutions.

“But we must continue the tradition of access and excellence. Students need such access. And our efforts to maximize learning through global information and resources are preparing them for the future and providing lifelong learning skills.”

The NJCU Office of Public Information contributed to this article.
Composite Scores Up, Up, Up

Hispanic Takers Up Too

BY
JEFF SIMMONS

It was a major achievement—a decade of progress that is holding firm.

Last fall, high school seniors maintained high scores on the ACT Assessment college entrance and course placement exam. That yielded some applause, but the chorus of praise was even louder because the achievement was longer.

Those scores—the highest ever—were not only equivalent to those achieved by college-bound seniors the year before, but for the last three years. Students crossed the decade’s finish line in dramatic fashion: maintaining an ever-increasing national average.

“We haven’t seen a decline in the national average since 1989,” says Richard Ferguson, president of the Iowa-based ACT Inc. “From the 1960s through the ’80s, the national average score fluctuated constantly. Decreases outnumbered increases, and increases were seldom consecutive.”

It was the fourth consecutive year in which the composite ACT score reached 21 out of a possible 36. It had begun at 20.6 in 1990, and slowly inched upwards, reaching 21 by the year 1997 and maintaining that level for three more years.

That represents the highest level the composite score has reached since ACT reconfigured its grading scale in 1989, and one of the highest ever in its 42 years.

ACT initially was called the American College Testing program, but now is known simply as ACT Inc.

Last year, greater numbers of students than ever before—1,065,138—took the exam. That increase of
about 46,000—bringing the total increase since 1990 to an estimated 250,000—meant that roughly 38 percent of all graduating students in the nation took the ACT.

"It means to me that students are more aware of what it takes to be prepared for college and are taking appropriate action," says Julie Noble, principal research associate at ACT.

The authors of "The High School Profile Report," which examines the scores of the graduating class of 2000 and looks at students' academic abilities, contend that their findings paint a portrait of achievement.

The annual report unveils large differences in achievement between those who take more rigorous courses and those who don't in high school.

Those differences for the Spring 2000 class cut across all racial, ethnic, and gender groups and occurred at all socioeconomic levels. The report contains information about the scores of graduating seniors in the Class of 2000 who completed the ACT Assessment as seniors, juniors, or sophomores. The report's authors caution that those seniors who took the test shouldn't be considered representative of the total population of graduating seniors.

Just as they do with the Scholastic Assessment Tests, colleges and universities look at the ACT Assessment to determine whether students are qualified to attend an institution. While college administrators stress that they look at more than grades, the scores nevertheless serve as a barometer of achievement.

The Washington, D.C.-based National Association of College Admissions Counselors reports that college and university administrators look first at a student's grade point average when reviewing college applications, and second at test scores.

Six percent did so in New Hampshire; five percent, in Maine; and three percent, in Delaware.

"Virtually any campus today will accept either test," including Yale, Harvard, and Cornell, says Harden.

Still, the ACT, much like the SAT, has drawn criticism because of what some view as an over-reliance by colleges on test-scores.

"The ACT is a different test; it's not necessarily a better test. It's misused in much the same manner as the SAT is misused by admissions offices that have cutoff scores, which is a violation of the ACT's own test-use guidelines," says Bob Schaeffer, public education director with the Cambridge, Mass.-based group, Fairtest. "It ends up damaging kids who are scoring lower—Hispanic and Black students."

Core Curriculum Payoff

The ACT exams are proctored throughout the school year, including April and June. Students must complete all four sections each testing period. That has meant that more are taking tougher college-prep courses to prepare.

A decade ago, fewer than half the graduates reported taking a "core curriculum." A core program includes four years or more of English; three or more of mathematics—including algebra, trigonometry, calculus, and computer science; three or more of social studies—including American history and government, economics, and geography; and three or more of natural sciences—including biology, chemistry, and physics.

As the scores climbed, so did the number of test-takers completing the tougher courses, and that increase was much more substantial.

In 1990, 48.4 percent of the ACT-tested graduates reported taking that core curriculum. That has climbed every single year, reaching 60.5 percent by 1996, and 62.2 percent with the Class of 2000.

The disparity in achievement becomes apparent when reviewing test scores in mathematics and science. Students who completed more of those courses attained higher ACT scores. This has prompted ACT leaders to insist that higher scores mean more opportunities.

"Students with more math and science courses achieve much higher average scores," Ferguson says. "Not only on the ACT subject tests, but also on the composite score. Those higher scores, in turn, typically translate into scholarship opportunities, more postsecondary options, and better academic performance during the critical first year of college."

Students who completed three or four years of science courses achieved a 21.7 composite average on the ACT; those who took two or less scored at 18.7. When it came to math, those with four or more courses achieved a 22.6 composite aver-

Several students still aren’t completing three or four years of math and science, despite nationwide efforts to boost academic standards and maneuver more high schoolers into those classrooms.

Sights Too High?

Additionally, ACT questions the test-takers about their postsecondary school goals, and finds that many set their sights too high. ACT notes that many students want to enroll at prestigious colleges but aren’t fully aware of the higher expectations at those institutions, so they don’t adequately prepare.

ACT leaders note that the majority of first-year students accepted at the upper echelon of colleges are from the top 10 percent of their graduating classes. Yet, one-fourth of the ACT-tested students—24 percent—whose first choice was a highly selective college had scores at or below the national average.

A majority—61 percent—with scores at or below the national average set more reasonable expectations to attend traditional colleges, ones at which the majority of first-year students are in the top 50 percent of their class.

"To some extent, students aren’t aware enough," says Noble. "There seems to be a large discrepancy between expectations in terms of what students want to be when they grow up as opposed to what it takes to get there."

ACT leaders stress that there is a need for more high school career counseling, including up-to-date information about the labor market and the national job outlook.

ACT noted that in 1998, only four percent of college-bound high school graduates were interested in careers in computer engineering or science. The following year, that rose, but only slightly, to 4.5 percent. And this past year, it rose to more than five percent.

Ferguson views this as an encouraging sign, but still the situation is troubling. The Information Technology Association of America recently stated that 1.6 million new technology jobs opened up in 2000 but half would likely go unfilled because of little talent, he says.

So where do students expect to land in college?

ACT assesses this as well, and notes some interesting differences along gender lines.

Gender Differences

Females—26 percent—prefer a career in the health sciences, whereas only 10 percent of males do. Males—12 percent—select a career in business and management, but only nine percent of females so select.

Females are twice as likely—10 to five percent—to prefer a career in social sciences. Males are overwhelmingly encouraged to pursue engineering—11 percent compared to two percent—and computer science—8 percent for males and two.
percent for females.

Only 10 percent of college-bound high school graduates want to pursue a career in education, 8 percent of Hispanic students, and 6 percent of African American students. The only group showing increased interest was Asian students, among whom interest moved from four to five percent, and Whites, 11 to 12 percent. “Teaching both genders averaging the same score on science reasoning.

**Hispanic Test-Takers**

Among Hispanic students, females did better than did males in English (18.1 to 17.6) and reading (191 to 190), and males fared better in math (196 to 184), science (196 to 188), and composition (191 to 188).

The most significant gains by level of high school coursework, composite scores dropped among Mexican American, Chicano, and Latino test-takers. In 1996, that score was 198 for students who took a core curriculum or better, and then rose in 1997 to 199. But it has since fallen to 196 for two years, and then to 195 in 2000. Composite scores for those who

Students whose families brought home more than $50,000 scored higher than did those with lesser incomes. For example, among all Mexican Americans, Chicanos, and Latinos with family incomes of less than $18,000, the average composite score was 17.2. It was 20.6 among those in the higher bracket.

For Puerto Rican, Cuban, and

isn’t often considered lucrative,” Noble says.

More females than males take the ACT. Since 1990, 160,860 female graduates were tested and only 82,507 males. Gains have been incremental, with the average composite score for females up by 0.6 point, and for males, by 0.2 point.

But males score better. Males raised their composite average from 21.1 to 21.2, and scores increased in reading and science reasoning. The composite average for females in the Class of 2000 came in at 20.9.

With one exception, in each racial or ethnic group, females outpace males in English and reading, and males outscore females in science reasoning and math. Black students are the exception, with among minority students overall came in the science reasoning test, in which Asians raised their average science reasoning score by 0.2 point.

Numbers of Hispanic test-takers have nearly doubled over the last decade, from 32,884 in 1990 to 57,815 graduating students in the Class of 2000. Still, this is about half the number of African Americans.

Hispanic scores, says Noble, have been relatively stagnant. ACT reports that Hispanics scored 179 in English, 189 in math (the only increase), 191 in both reading and science reasoning, and 189 in composite.

Based on requests from test-takers themselves, officials separate categories of students within the Hispanic test-taking population.

took less than a core curriculum for that group are higher at 175 than they were in 1996, 175 vs. 174.

On the other hand, composite scores for those identifying as Puerto Rican, Cuban, or other Hispanic climbed among students, regardless of curriculum. For those taking less than the core curriculum, scores rose from 174 in 1996 to 18.0 in 2000.

Average ACT composite scores overall for various racial and ethnic groups show similar trends. For Mexican Americans, Chicanos, and Latinos, scores dipped from 18.7 in 1996 to 18.6 in 2000.

The reverse holds for Puerto Rican, Cuban, and other Hispanic students. Scores climbed from 189 in 1996 to 195 in 2000.

**The Income Connection**
A College and Its Community

BY

MICHÉLLE ADAMS

Located in an idyllic setting in Amherst, Massachusetts, Hampshire College sets itself apart from the more traditional colleges and universities within the United States. With many institutions, the percentage of minority students outpaces the percentage of minority faculty and administration. Hampshire College is working in the opposite direction. This small school boasts 18 percent minority faculty, and the minority student population stands at 13 percent.

Hampshire College is stronger in minority faculty than in minority students because it was established with an alternative approach to education—one that strongly emphasizes an inclusive multidisciplinary and multicultural education. This mission has made it crucial for the College to attract a diverse faculty. But the fact that it is a young school with small endowments has made it harder for minority students, and especially the large number of first-generation Hispanic students, to attend the College.

“For many first-generation students, Hampshire College isn’t on their radar screen. We don’t offer, at first glance, reassuring professional degrees,” said Norman Holland, associate dean of faculty for multicultural education, and a native Panamanian.

Minority faculty is drawn to the school because of its alternative and multicultural commitments. Jaime Dávila came to Hampshire from the extremely diverse City College in New York City almost two years ago to be a full-time computer professor. Dávila admits that on deciding to work at Hampshire, he was concerned about the lack of diversity among its student population. But after six months on the job, he discovered that the surrounding communities with which Hampshire works closely do have the diversity he sought, and that Hampshire’s approach to education offers tremendous opportunities to intricately weave these communities and those beyond into their educational process. “When I look around at the younger faculty, I see that a great effort has been made to increase the diversity here,” he said. “That helps motivate the students.”

Hampshire’s alternative approach is rooted in the late 1960s, the post-Sputnik era during which new forms of knowledge were emerging and traditional colleges were unable to experiment. The trustees of Amherst, Smith, Mount Holyoke, and the University of Massachusetts began strategic planning around how to incorporate new methods of learning at their schools. Their solution was actualized in the late 1960s when they created a new school, separate from their own but supported by them, that would be established with an entirely different educational model.

“They were looking for a new way and realized that the way colleges are structured around departments prevents interdisciplinary work. Rather than undo their structures, they thought to start from scratch,” said Holland.

Hampshire College was established without departments, a model that persists to this day. The students shape their own course of learning and create their own majors, with professors acting as mentors and guides. The majors can include various subjects in combination. A student interested in majoring in the Renaissance would perhaps combine art history, philosophy, and English. While they do attend classes, students complete large amounts of independent work that they themselves initiate and negotiate with faculty advisors. Rather than grades, Hampshire students receive written and oral evaluations, and progress is measured by actual academic accomplishment.

The College opened its doors in 1970 in a climate of social unrest. “The early classes were very interested in social issues and political issues,” said Holland. “We were one of the few schools to ask our trustees to no longer invest in South Africa. This helped us see how local movements are tied to the global market.” Areas of study that became popular and central to the campus—aside from the more traditional subject matters—were women’s studies, ethnic studies, and Black studies. “Our structure allowed us to respond to these issues in different ways,” said Holland.

In 1984, Hampshire created what it then called the Third World Expectation, since renamed the Multiple Cultural Perspective Requirement. This expectation, however, was developed out of the school’s fundamental belief that an education would be incomplete without a substantial understanding of differences and commonalities across
cultures. It was seen as an organic part of a liberal arts education.

"As part of a graduation requirement, students need to present evidence that they have had a substantial encounter with issues or peoples or cultures or societies different than their own," said Holland. Students would be expected to consider how other cultural perspectives could be woven into their area of study, whether a part of their subject area or not.

Several years after this expectation was developed, the office of multicultural education was opened. It was established to support faculty of color and international faculty, as well as students and staff. The department would be responsible, as it is today, for distributing fellowships for underrepresented faculty and for supporting their recruitment and retention. It also works with admissions to strengthen publications sent to potential students in order to more effectively attract minority groups.

In 1992, Hampshire established the Baldwin Scholarship, which offers a select group of talented African American and Latino students a free transition year before college in which to improve general academic skills and prepare for the rigors of college. The fund was named after noted author James Baldwin, who used to teach at Hampshire.

Other Cultures

One way in which students at Hampshire are able to learn about other cultures is through international programs offered through the school. Whether traveling to Mexico, Cuba, Costa Rica, or China, the way that students study abroad mirrors the unique approach the College has toward education. For instance, social science and natural science professors have joined students in traveling to Mexico, where they work directly with grassroots organizations. They meet with local groups and look in depth into issues such as women's struggle for democracy, the Zapatista movement, and sexual and reproductive rights in Mexico. The faculty also takes students on anthropological excursions, bringing classroom discussions to life in another culture.

Hampshire is working directly with the national union of writers and artists in Cuba as well. Students decide what it is they specifically want to do and study, and how this fits into their curriculum. Next year, several photography and film students are expected to travel to Cuba to help with digital archiving of the restoration of Old Havana. Film students will record the process and then screen the film around the United States, donating any proceeds to the project.

Other examples of international study include internships in which students will live and work with different organizations in Central America, such as one focused on women growing medicinal herbs, and write about their experiences. For another, faculty will take students to banana plantations in Costa Rica to look at their use of pesticides and how this affects the local community.

"We try to educate students to operate in the world at large," said Christine Carey, assistant dean of faculty for international education. "The programs really give some experiential and theoretical meat to come back with."

Part of Hampshire's international focus has been to bring issues of diversity and multiculturalism to their own backyard as well. As Carey explained, "We are trying to develop curriculum where students want to go to Central America and
come back and see the nuances between there and the diaspora here."

Carey’s reference to the “diaspora here” refers very much to the communities and people in Hampshire’s own back yard. One such community is Holyoke, which has the largest and poorest Hispanic community in Massachusetts. As students are expected to bring in perspectives of other cultures within the global community, the same consideration is made toward the diverse cultures within the campus area. Community service has been an integral part of curricula developed by students at Hampshire, and part of this requirement includes working directly with the diverse local organizations and people.

One such community project that will soon go into effect is the Digital Community Newspaper. Jaime Dávila and other computer instructors, and a group of students from the school’s Digital Design Center, will mentor about 30 Holyoke youths in journalism, community leadership, entrepreneurship, digital photography, and Web design during a two-year period. As part of an $80,000 grant through MCI WorldCom’s Making a Civil Investment program, Holyoke students will be trained to develop their own news journal on the Web, with a printed version as well. The first team of students mentored will in turn become journalism and Internet experts and mentors to other Holyoke youth, and will help recruit more students to the project. Since most of the students in Holyoke are Hispanic, it is this community of people that will be best served by the project.

Dávila will also participate in “The Day at the Lab,” which brings about 40 students from the neighboring town of Springfield to the College for workshops with faculty. This requires faculty to establish relationships with the teachers in the high schools, explained Dávila.

Another computer program brings Holyoke high school students to the College every Friday to be taught computer skills and webpage creation. “All these programs are able to create a pipeline from the high schools to the College,” said Dávila.

The College and its students work with neighborhood communities through many local organizations, among them, El Arco Iris Youth and Community Arts Center, an after-school program with a focus on arts, culture, and youth empowerment; the Housing Discrimination Project; and the Greater Holyoke Youth Service Corps. The school has made financial and service commitments to local programs as well. One is the Bridge to the Future program, established by a community group. The Latino Scholarship Association, which raised money for scholarships for Latino youth and for an after-school program at Holyoke High School. When the organization’s funds ran dry, Hampshire College started funding this program, and its students actively assist there.

Several years ago, a natural science student embarked on a project that remains with the Hispanic community of Holyoke to this day. Working with a Holyoke group, he studied the history of Puerto Rican immigration in the area. As part of his work, he launched a community garden, now a part of an organization called Nuestra Raíces. Recently, another student decided to work with Nuestra Raíces in Holyoke to study the ecology of the area. She developed a “green map” to identify recycling centers, gardens, cafes, and also toxic and negative sites of the area. This student got young people to do research in their own community. “Our students learn a lot from working with people in Holyoke,” said Myrna Breitbart, dean of the school of social science and professor of geography and urban studies, and faculty advisor to the Community Partnerships for Social Change program.

The ‘green map’ student, said Breitbart, learned about housing discrimination and about discrimination young people experienced in school, and learned what sustains a community.

This past semester, two students have been documenting the work of young people who’ve helped design a canal walk. Another student has been mentoring Hispanic girls creating a mural. Students and faculty decided to bring Puerto Rican photographers and an exhibit of their work to the area, and invited the local community to meet with the photographers.

“There are many ways that our work with the Puerto Rican community has changed Hampshire,” said Breitbart. “I used to teach urban studies with a focus only on the problems, especially with populations marginalized as a result of global restructuring and changing economies,” she added. But now, as she has worked with local artists helping uncover indigenous works of art of the local community, Breitbart has a different take. “I spend more time working with studies and telling the assets and strengths of these communities.”

Although the ties with the community are strong, and working with the people of the area is an integral part of students’ work at Hampshire, the school is taking another step forward in improving this relationship between community and college. Mary Bombardia, director of the Community Partnerships for Social Change Program at Hampshire, is preparing for the new Tiegel Faculty Seminar in Community-Based Learning to do exactly this. For this seminar, residents submit applications to become fellows to the school. This selected group of local people meet with faculty on a continuing basis and mentor another on how to better improve the relationship between the College and community.

“We want community to have more access to the College,” said Bombardia. “Although Hampshire has always been at the forefront of this work, the dialogue has now evolved into how do we create better partnerships with community services.”

Bombardia is also seeking ways to make sure programs last beyond one semester, where other students can pick up where the last one left off, and even be mentored by earlier students. Dr. Madeline Márquez, director of the Center for Innovative Education, explained: “We judge ourselves on how we partnership with the larger community. We have tried to form strong relationships with organizations so we can hear from them and hear what they need from us. That’s a switch from what I have seen in the past. Both should gain. Partnership is an important word.”

Because of the way in which Hampshire is structured, it is always changing, always looking for new ways to expand the possibilities within the framework of what it calls education. The Hispanic community within this structure has played an important role, a role in which those outside of academia have become the teachers of the real classroom and the real possibilities of visions and ideas. What remains is for Hampshire to draw more minority students into this alternative approach to education.
The growing number of college presidents across the country has raised concerns about the adequacy of minority representation in senior administrative positions. In a recent study by the American College Association (ACA), researchers found that the percentage of minority presidents has increased, but the rate of increase has not been consistent across all institutions.

The study, conducted by the ACA, examined data from 2,300 presidents across the country and found that the percentage of minority presidents has increased from 5% in 1985 to 10% in 2010. However, the percentage of women presidents has remained relatively stable, with 23% in 1985 and 24% in 2010.

The study also found that the pace of change varies significantly among institutions, with some universities seeing a faster increase in minority representation than others. The researchers suggest that these differences can be attributed to a variety of factors, including institutional culture, leadership styles, and the effectiveness of search committees.

The study highlights the need for continued efforts to increase diversity in higher education leadership, particularly among women and minorities. The researchers recommend that institutions develop and implement strategies to increase the diversity of their presidential candidates, such as creating diversity task forces and establishing partnerships with minority-serving institutions.

Overall, the study underscores the importance of continuous monitoring and evaluation of diversity in higher education leadership to ensure that institutions are making progress towards achieving a more representative and inclusive leadership structure.
According to the study, while the numbers of minority presidents grew by 40 percent, minorities remain underrepresented in the top spots of academia. In 1998, six percent of all presidents were African American, representing more than half of all minority presidents. Native Americans and Asian Americans represented one percent each of all college presidents. The percentage of Hispanic presidents grew from 2.2 in 1986 to 3.2 percent in 1998.

"Minority presidents continued to be underrepresented relative to the higher education workforce, where minorities accounted for 14 percent of faculty and senior staff in 1995," said the report. "Until colleges and universities improve the pipeline of minority faculty and senior staff, progress in recruiting minority presidents will continue to be slow. According to current hiring rates for minority candidates among newly hired presidents, minority representation among all presidents is unlikely to increase significantly—unless hiring practices are altered."

Minority presidents were most highly represented at public master’s and baccalaureate institutions, where they led 25 percent or more of institutions in those categories. Hispanic presidents were most highly represented at public baccalaureate institutions—eight percent, which was also true in 1986, when they were six percent. Minority presidents were least well represented at private master’s institutions; in that sector, minorities made up just two percent of presidents. As a result, minority presidents were more likely than Caucasian presidents to lead larger institutions. Nearly half of African American presidents and more than half of Hispanic presidents led institutions with head-count enrollments greater than 5000, compared with less than 30 percent of Caucasian presidents.

"This may be because Hispanic presidents were more likely to lead public institutions, which tend to enroll more students than private colleges and universities," said the report.

The proportion of ethnic or racial minority presidents of public baccalaureate, public specialized institutions, and private doctorate-granting institutions more than doubled from 1986 to 1998, although minority presidents’ total representation at private doctorate-granting institutions was still below five percent. Minorities also now represent less than two percent of all presidents of private master’s institutions and less than four percent of all presidents of private two-year institutions; both figures represent decreases from 1986.

"We need to push very hard for Latinos to become CEOs at colleges nationwide, not just at Hispanic Serving Institutions (HSIs),” said Antonio Flores, president of the Hispanic Association of Colleges and Universities, based in San Antonio, Texas. HACU has conducted some seminars in fundraising and financial management to prepare future Latino leaders for senior leadership positions in higher education, but Flores said the organization is striving to do more to prepare them "before they get into presidencies.”

Flores said that HACU is seeking funds to start its own leadership development program.

Ross, who is also director of the ACE Fellows Program, which prepares education officials for senior leadership positions in higher education, said that more minorities need to be involved in leadership development programs, particularly

---

"We need more Latinos to step forward and be competitive. I don’t see that happening.”

Latinos. Her ACE Fellows Program receives many applications from African American higher education officials for the training, but few Latinos apply, she said.

"One of my concerns is that we have insufficient numbers of Latinos in the pipeline," said Ross. "We need more Latinos to step forward and be competitive. I don't see that happening."

Leadership development programs, whether through ACE or through other organizations, are important because they foster confidence and they help the participants build strong personal and professional networks that give them job contacts and advocates when they are ready to move to a higher position, said Ross. She added that it is important for people who want to move up to form various networks at the national, state and local levels through affiliations with national, state, and local groups.

"The more networks they're in, the more visible they become to people who are in a position to help them move ahead," said Ross.

Bernadine Chuck Fong, president of Foothill College in Los Altos Hills, Calif., said the network she became a part of on her own campus helped her immensely.

"My situation is probably unique, because I am president of the college where I taught for several years as a faculty member and then later moved through the administrative ranks to the presidency," said Dr. Fong. "My experience has been an extremely positive one, and I received very strong support from my [presidential] predecessors when I was dean and then vice president. My doors were opened for me by these men, and I didn't even have to knock."

The ACE study offered a variety of other findings, for example, that minority presidents did not differ significantly in age or marital status from their Caucasian counterparts. The average ages of Hispanic, African American, and Caucasian presidents were within a year of one another.

The spouses of Hispanic and African American presidents were more likely than those of Caucasian presidents to have paid employment. Two-thirds of the spouses of both Hispanic and African American presidents worked, compared with 52 percent of the spouses of Caucasian presidents.

The most common field in which minority and non-minority presidents had earned their highest degrees was education; for African American presidents, 51 percent; for Hispanic presidents, 47 percent; and for Caucasian presidents, 39 percent.

Caucasian presidents had been in office somewhat longer than had their minority counterparts, and had spent at least one year more in their prior positions than had African American or Hispanic presidents.

Several differences between minority and non-minority presidents are noteworthy. Minority presidents were more likely to be women. About one in four Hispanic (24 percent) and African American (26 percent) presidents was female, compared with 19 percent of Caucasian presidents. Still, Hispanic males held a larger number of college and university presidencies than did Latinos—56 to 18.

Piedad Robertson, president of Santa Monica College in Santa Monica, Calif., said she is heartened to see that women are taking more presidential positions.

"If you happen to be a woman, that's great," said Robertson. "If you happen to be a Latina, that's great. But you are at the table because you are a person of value. If you bring the perspectives of a woman and a Latina, it just enriches the discussion."
Hispanic and non-Hispanic presidents differed in the type of positions held. More than one in five Hispanic presidents (21 percent) headed a multi-campus institution or system, compared with 12 percent of Caucasian presidents and less than eight percent of African American presidents.

Minority presidents—Hispanics in particular—were more likely than were Caucasian presidents to hold a tenured position as a faculty member both in their current and prior positions. About one-quarter of the presidents of HSI's and HBCUs had been a president in their prior position, and about one-third had been recruited from within the institution. Half the presidents at HSIs had their highest degree in education.

"This may be related to the fact that minority presidents were more likely to serve at public institutions, where faculty tenure for administrators is more common than at private institutions," the report said.

The majority of Hispanic Serving Institutions were headed by a Caucasian president; only one-third were headed by a Hispanic president. More than one in four presidents of these institutions was a woman.

"When you say one-third, it almost makes me feel good, but it shouldn't—because Latinos are only 3.8 percent of community college presidents," said Flores.

Presidents of HBCUs and HSIs reported spending the largest amount of time on fundraising while presidents of women's colleges spent the largest amount of time on financial management.

Dr. Robertson said she was fortunate because she had lobbying experience and experience with finances prior to her presidency.

"Fundraising and financial management are not necessarily what one learns in a Ph.D. program in graduate school," said Fong. "I had the opportunity to serve on several boards of trustees for private college and universities, including Stanford University, so I already had a lot of exposure to these issues before I became president."

In 1986, the American Council on Education's Center for Leadership Development established a research program to collect longitudinal data on college presidents. As in the previous studies, the National Presidents' Study solicited information from all presidents of regionally accredited, degree-granting U.S. higher education institutions. The study included institutional presidents, chancellors, and heads of college systems. Questionnaires were mailed to 3,126 presidents in the winter of 1998-1999. Ultimately, the study garnered 2,830 responses, a number consistent with previous studies.

"The profile of the typical college president is changing slowly but continues to be Caucasian (89 percent) and male (81 percent). The typical president in 1998 was 58 years of age, held a doctoral degree, and had served in his current position an average of seven years. Seventy percent of presidents had experience as a faculty member. More than half of all presidents identified themselves as Protestant. Twenty-seven percent of the presidents reported that they were Catholic. Forty percent of college and university presidents had received their highest degree in education."

Ross said that the most traditional path to the presidency still is by being a professor, associate professor, or dean at a college or university. The percentage of presidents coming from outside higher education had grown from 17 percent in 1986 to 25 percent in 1998, but the most common route to the presidency is still via academia.

**Other Presidential Highlights**

In 1998, thirty percent had never been a full-time faculty member; in 1986, 25 percent.

Presidents in 1998 spent more time teaching prior to their presidency than did those in 1986: 78 years vs. 64.

About one-fifth felt that they did not have a clear understanding of some aspect of the campus or job at the time they took the position.

Search consultants were used to recruit half of those recently hired—up from 16 percent of those hired before 1985.

One-third of new presidents at two-year colleges were women.

Presidents were most likely to wish that they had more training in fundraising and financial management.
Dr. Carlos Cortés: Writer, Lecturer, and Consultant to a Multicultural Society and a Shrinking World

Dr. Carlos E. Cortés draws strength from diversity. In fact, he has made a career of it. His own diverse background has empowered him to succeed as an award-winning international lecturer and professor emeritus of history at the University of California, Riverside, California. Dr. Cortés regularly speaks on topics such as ethnicity, multiculturalism, and Hispanic culture.

He is well qualified to do so. As the son of a Mexican Catholic immigrant father and an Austro-Russian Jewish mother, Carlos Cortés grew up witnessing the interaction between different cultures in his own home. His formative years proved to be a great training ground for his life's work. He notes in a recent interview published in Teaching Tolerance magazine, "I guess Mom and Dad were ahead of their time. When a Mexican Catholic immigrant boy from Guadalajara and an Austro-Russian Jewish girl from Kansas City met, married, and had a son named Carlos more than a half century ago, they had to deal with opposition from both of their families. And I had to deal with the ramifications of coming from such a background."

His "oddball status" clearly gave him a unique perspective on the world and the people in it. "At that time, my parents were relative oddities, and so was I, the offspring of a very mixed marriage. My oddball status was hypertrophied in school. In contemporary psycho-jargon, I had nobody ethnically quite like me with whom I could identify—no other students, no teachers, no faces or stories in textbooks," explained Cortés in his May 1999 article, "The Accelerating Change of American Diversity," featured in Teaching Tolerance.

Ironically, it was textbooks that launched his career. "I sat on a statewide text book task force in 1971 when I taught in public schools. Our job was to evaluate social studies textbooks. It was pretty evident, even at that time, that textbooks didn't really address ethnicity and a changing American population. What many of the social studies books did, though, was take a Eurocentric view of history and not address much else. They were really pretty bloody awful," said Cortés.

This experience helped Cortés identify a need for a multicultural education, which in turn called for multicultural textbooks in the classroom. When asked what his societal curriculum encompasses by Teaching Tolerance magazine director Jim Carnes, his response was suffused with 30 years of thinking and writing. "I break it down into four components. The first I call the immediate curriculum, which consists of family, community, peers, and those other immediate human influences around you. The second I call the institutional curriculum—things like churches, synagogues, YMCAs, Boy and Girl Scouts, the many institutions one comes across as one grows up. As you get older, you might add groups like unions and professional associations."

Another two types of curriculum take advantage of a concept of a larger classroom that Cortés envisions. "Third is the serendipitous curriculum—the chance encounters that happen to everyone throughout their lives. For each person, there is a different set of chance events. They're not structured, and they don't come..."
out of a special institution. It could be a trip you went on, someone you met. It may be a particularly bad experience with someone of a certain ethnic background that suddenly changes your attitude toward that group of people," he noted.

His current and major research emphasis is to do with *media curriculum*, his fourth research emphasis. While Cortés recognizes the media as an institution, he also considers it as part of the larger societal curriculum. When asked how a teacher might use media images in the classroom, Cortés responded, "I think it's more important to have students weigh the strengths and weaknesses of the media treatment of diversity, the contributions of media to intergroup understanding or misunderstanding, than to have the teacher didactically assert, "This image is positive; this is negative." I try and keep teachers and students from simply talking about positive and negative because I think that ignores the nuances and complexity of the issue."

Dr. Cortés also sees patterns outside of the university. "It leads to trying to put every media treatment into one of those two categories—good and evil—which is a very American tendency." Cortés' advice for teachers is to not fall into that trap. "I tell teachers, 'Whatever you do, don't assign kids to go out and look for stereotypes, because then you've already given them the answer: You will find stereotypes. Then every time you see an image or a depiction, they'll be likely to assume it's a stereotype. But if you have students look for patterns, then they can discover for themselves: Aha! This looks like a pattern. We're not sure if it's a stereotype, but let's look further.'"

Cortés' reasons for asking teachers to ask their students to look for patterns are sound. They don't ask anyone to presuppose how the media treats diversity, but they do ask students to see and discover the answer for themselves, thereby offering more of an emotional, informative, and deep satisfaction to the researcher-student. "This is fairly straightforward. By identifying patterns, students can come to their own conclusions about what the media are teaching and the kinds of possible stereotypes they should be aware of when they're reading or viewing media throughout their lives. This also reinforces the lesson that they're going to be lifelong learners about diversity through the media," he explained.

Diversity has also translated to a *multicultural curriculum* in schools. In his recent article, in the *Instructional Leader* magazine, published by the Texas, Elementary Principals and Supervisors Association, Cortés expounded on the media's role in shaping such a curriculum. "The media, in short, have created a sweeping—if largely unplanned and often conflicting—multicultural curriculum. Yet media teaching power about diversity does not mean that school educators are powerless. Quite the contrary. The mass media can serve as a rich curricular resource. By drawing selectively upon the media, teachers can help students in a variety of areas—for example analytical thinking, media literacy, understanding the process of stereotyping, serious discussion of a variety of diversity topics, and self reflection about their own intergroup beliefs."

As a father and grandfather, Dr. Cortés also believes in the role of the parent. "Parents, too, play a role in regard to the media curriculum. In some respects, they serve as media gatekeepers by monitoring what enters and does not enter the home. Particularly with young children, they can help select what media they see, listen to, or read. Interestingly, research suggests that when parents and children watch television together, [what is viewed] reflect[s] parental priorities, not the priorities of children. Moreover, parents serve as media spin-doctors. Sometimes they can teach directly by interpreting media, sharing their opinions, asking questions, or responding to their children's inquiries about a show or media-related story. Without realizing it, they may also 'spin' media by accident, such as by talking about movies or media-disseminated stories concerning diversity within earshot of their children. Some developmental psychologists opine that as much as 90 percent of young children's learning may be 'incidental' as a result of overheard conversations," wrote Dr. Cortés.

With regard to defending the existence of a multicultural education, Dr. Cortés believes the need to do so is obsolete. In the conclusion to this same article, he acknowledges the power of media as it influences curriculum. "Should there be a multicultural education? The omnipresence of media teaching about diversity has rendered the question obsolete. Multicultural education will occur, even if it doesn't take place, at least intentionally, in schools. This leaves two options for educators. They can ignore the media and thereby squander their opportunities for drawing upon them to foster constructive interpersonal and intergroup knowledge, perceptions, attitudes, and behavior. Or, as I discuss in my book, we can actively and consciously integrate the media treatment of diversity into the curriculum as a step toward forging a finer nation characterized by intergroup understanding, equality, and civility."

As a teacher, Dr. Cortés lives what he writes and speaks about. In fact, his list of credentials and awards is testament to spreading the word about the value of diversity and its place in and out of schools.

Dr. Cortés is a lecturer and consultant for educational institutions, media, government, businesses, and organizations throughout the United States, Europe, Latin America, Asia, and Australia. In fact, he is a former guest host of the PBS national television series *Why in the World* and was the featured presenter on the *Video Journal of Education 1994* training video, *Diversity in The Classroom*. Since 1990, he has been a member of the summer faculty of the Harvard Institutes for Higher Education.

A widely published author, with many books, articles, film and television commentaries, and educational materials to his credit, he continues to write and publish with astonishing speed and depth. Some of the books and works he has authored are *Gaucho Politics in Brazil, Three Perspectives on Ethnicity: A Filmic Approach to the Study of Historical Dilemmas*, and *Beyond Language: Social and Cultural Factors in Schooling Language Minority Students*; he also has edited book series such as *The Mexican American, The Chicano Heritage, and Hispanics in the United States.*

Dr. Cortés has also served as the senior consultant for Scott Foresman's 1996 *Literature and Integrated Studies* series for grades 6-12 and McGraw-Hill's *K-6 Adventures in Time and Place* social studies series. He has also been the recipient of many awards for his work in a stunning 30-year career. Some of the awards include the 1976 Distinguished Teaching Award, UC-Riverside; the 1980 Distinguished California Humanist Award of the California Council of the Humanities; the 1980 Fulbright Travel Grant to Yugoslavia; the 1983 Bildner Fellowship of the Association American Schools in South America; the 1986 Japan Foundation Travel Fellowship; the 1986-1987 Rockefeller Foundation Research Fellowship; the 1989 National Multicultural Trainer of the Year Award of the American Society for Training and Development; the 1992-1993 Faculty Public Service Award, UC-Riverside; the 1993-1994 Smithsonian Institution Public Lecturer; and the 1995 Hilda Taba Award of the California Council for the Social Studies.

Dr. Cortés is currently a professor emeritus of history at the University of California-Riverside. Since 1990, he has served on the summer faculty of the Summer Institute for Intercultural Communication.

His most recent book, *The Children Are Watching: How the Media Teach about Diversity*, was published in March, 2000, by Teachers College Press. Although it is Dr. Cortés' latest book, one would be hard pressed to believe it is his last.
A new report released by national education leaders cites an alarming racial disparity between students and teachers in our nation’s schools that “threatens to impact the quality of education for all students.”

“It’s a strong report with powerful data and solid recommendations,” said Penelope Earley, vice president for the American Association of Colleges for Teacher Education.

“A lot of the information is not new, but it is the nicest compilation of this information I have seen. It shows how all persons of color are underrepresented in teaching. What the report doesn’t do is ask why the government hasn’t responded to these recommendations in the past. We need to ask that.”

Nine out of ten teachers nationwide are White, while students of color represent 37 percent of elementary and secondary schools, the study states. Minority students will make up 44 percent of total school enrollments by the year 2020, and by 2050, the “minority” will be the majority at 54 percent.

Education leaders representing more than 320 colleges and universities call for a major shift in national education policy, with at least $100 million in federal funds to support the “model” teacher programs of minority-serving institutions (MSIs). MSIs produce nearly half of all minorities with teaching degrees nationwide, the report states, and have “unparalleled success” in training and graduating them, despite being “chronically underfunded” and endangered institutions. The report, “Educating the Emerging Majority,” was commissioned by the Alliance for Equity in Higher Education, a coalition of MSIs representing historically Black, Hispanic-serving (HSIs), and Tribal colleges and universities.

Jamie Merisotis, president of the Washington-based Institute for Higher Education Policy, the nonprofit research organization that conducted the study on behalf of the Alliance, said the work is unusual because previous research has looked solely at MSIs or Tribal colleges while this body of work looks at MSIs as a group.

“Investing in these institutions would be a way of narrowing the gap,” said Merisotis. “Increasing the investment will be critical in confronting the demographic realities of this growing population of students.”

The study said several factors led to the limited supply of teachers of color, including “substandard K-12 academic preparation and educational experiences of students of color, family background, and social issues, and the disincentives of low salaries and the lack of respect and prestige associated with teaching, as well as discrimination within the profession.”

Enrollment of minority students in elementary and secondary schools has increased by 73 percent over the last 25 years, compared to 19 percent for White students. Minority enrollment in teacher education programs, however, accounts for only 16 percent of all students, while White students make up more than 80 percent, an inequity due to “substandard K-12 academic preparations as well as social and economic factors,” the study reported. The disparity between students and teachers of color adds to the overall crisis in both quality and shortages of teachers nationwide in elementary and secondary education.

“For African American, Hispanic, Asian, and American Indian children, having a teacher of color means having a role model,” said the study. “For
White students, having a teacher of color presents an opportunity to learn from an individual who reflects the broad cultural and social diversity that is the bedrock of our national unity.  

Merisotis said critics might argue that having a minority teacher does not automatically mean higher grades for minority students, but the evidence shows that having a role model from your culture generally leads to higher self-esteem among students, which in turn leads to higher grades.

"There is convincing evidence that role models are directly linked to the increased aspirations of students and, therefore, there is an increase in their academic success," said Merisotis.

Moreover, a study entitled "Why Minority Teachers Matter" showed that the increased presence of minority teachers benefits minority children.

In a study of Texas school districts that examined the relationship between several political and educational resources and academic success among minority students, it was shown that the percentage of minority teachers was an important variable. Greater percentages of minority teachers were related to greater pass rates among both Hispanic and African American students on the Texas Assessment of Academic Skills (TAAS) exit exam. The Hispanic-African American and Black-White pass ratios were also positively related to the presence of minority teachers.

This positive effect could result from a number of processes, including role modeling effects, increased sensitivity to minority student needs, and influence on policies that affect minority students' success.

Ana María Villegas, a professor of curriculum and teaching at Montclair State University in Montclair, N.J., said, moreover, that children learn by connecting new ideas with what they know and with what they are familiar:

"They build connections with prior knowledge and experiences," said Villegas.

"When teachers know the cultural background of kids, they can use examples from their lives to teach concepts, and they can select materials more appropriate and of greater interest to kids. When the teacher doesn't have access to that, those bridges to learning are much more difficult to establish."

But, Villegas argues, that it is not the only good reason to recruit teachers of color. Villegas said cultural expertise is lacking in the teaching profession and that the teachers of color who are recruited "need to be educated to use the expertise they bring so they can be a resource not only to the kids but also to their White colleagues."

"We need to give them the tools to use that expertise for pedagogical purposes. That point is often overlooked in discussions about increasing the diversity of the teaching force."

In 1996, 36 percent of students enrolled in public elementary and secondary schools were considered part of a minority group, an increase of 12 percentage points from 1976, according to a recently published report from the National Center for Education Statistics. Yet only about 12 percent of teachers are members of minority groups. This jump in minority student populations was largely due to the growth in the percentage of Hispanic students.

The report strongly criticizes long-standing federal underfunding of MSIs and program evaluations that are "dangerously" linked to that funding and that use narrow outcome measures such as pass rates on licensure and certification tests. The report suggests that these measurements unfairly endanger MSIs while ignoring their unique challenges, successes, and vital needs in developing minority teachers in response to these shortages.

"Of particular concern is the use of licensure and certification tests as the sole criterion of quality in these programs," said the study. "These tests discount the importance of effective interaction with students, innovative approaches to classroom instruction directed toward individual learning styles, and other pedagogical techniques. While demonstrated competency in the subject matter being taught is imperative, the transmittal of knowledge from
teacher to student is equally, if not more, important.”

Merasotis said that MSIs face a tougher challenge in educating their students than do majority institutions because many students who attend MSIs tend to have educational disadvantages, either because they come from lower-income families or they come from K-12s that have offered poor educational preparation.

“There is a challenge to educating those students, and that challenge requires resources,” said Merisotis.

In 1998, when Congress reauthorized the Higher Education Act, it created new accountability measures involving the reporting of pass rates on teacher examinations.

“These new federally mandated reporting requirements and the resultant state and national report cards could have significant repercussions at MSIs. Under the new provisions, federal money will be tied to the performance of teacher education programs as measured almost exclusively by students’ scores on teacher certification and licensing exams.”

Merasotis said the Alliance will work on this policy area with the new Congress and that the single set of criteria used to determine the acceptance of teacher education programs nationwide will be an important legislative part of the group’s agenda.

“This is a train wreck that is about to happen in higher education.”

The law said that teacher preparation programs that are determined to be low-performing by the states cannot receive funding for professional development activities and cannot accept or enroll students who receive aid through a certain federal program under Title IV, said Merisotis.

The result is that some MSIs are refusing entry to students in teacher preparation programs if they had low scores on several standardized admissions tests, the study said.

“Using higher test scores as a gatekeeper will reduce significantly the pool of minority teacher candidates and undermine MSIs’ mission.”

Despite receiving 36 percent less funding than did other colleges, MSIs award 46 percent of teacher education bachelor’s degrees for African American students, 49 percent for Hispanics, and 12 percent for American Indians, far higher levels than the proportion of all minorities that these schools enroll (MSIs educate one-third of all minority students). The study revealed that in subject areas of high national need, such as math and science, these institutions produce 54 percent of bachelor’s degrees for Hispanic students and 41 percent for African Americans. MSIs’ unique success in educating low-income, educationally disadvantaged students is to be teachers is the result of keeping tuitions low, providing open admissions access, and offering unique cultural experiences within community-based settings.

The report said that federal funding to support the development of MSIs under the Higher Education Act has been a modest $210 million, awarded competitively to just a fraction of all MSIs even though MSIs educate more than 10 percent of all college students. In addition, federal programs such as TRIO and GEAR that target student populations like those served by MSIs serve only a small percentage of eligible students. For example, less than five percent of the 11 million students eligible for TRIO can be served under current federal funding, the study said.

Recommendations of the Alliance’s report include:

- Target an initial $100 million in federal resources to MSIs to improve the success of students of color in teacher education programs.
- Broaden quality assessments of teacher education programs to include incentive-based bonus grants that rely on a diverse set of criteria—not just single measures.
- Increase public investment in opportunities for students of color and low-income individuals by allocating a predetermined percentage of federal budget surpluses to areas such as student aid, college awareness, and facilities.
- Raise the salaries of teachers to levels of other professions that make invaluable contributions to society.
- Develop partnerships among institutions serving students of color.
- Conduct a national study to identify the factors that lead to changes in
enrollment among minorities in teacher education programs to expand the knowledge of what works on campus.

Merisotis said that additional funding could help teachers make the transition to first-time teaching jobs as well as strengthen existing teachers through increased professional development, which improves retention of teachers. “We want to encourage them to stay in the teaching profession and to stay in the communities.”

“We are losing the fight for the diversity of our nation’s teachers and jeopardizing the very programs that can help us achieve it,” said the leaders in a prepared statement to the Alliance organizations.

“The severe shortage of teachers of color deprives minority students of role models and denies all students the benefits of a truly diverse educational experience. As a nation, we must invest in educating more teachers of color or run the risk of widening the racial, cultural, and economic gaps that endanger our collective future.”

Earley said an important next step to this study would be to create a shorter document based on the study that can be used for lobbying purposes because the college presidents and elementary and secondary school educators will have to lobby hard. She cited a recent survey, conducted by the Education Commission of the States, in which lawmakers, school officials, and other education and political leaders were asked to list priorities in elementary and secondary education. Equity was not on the list of the top 17 priorities the lawmakers cited for their concerns on education, said Earley. “The issues being raised by the report are not being voiced by the people running for office. They must care about something else. Society is concerned about what happens to White middle-class kids so the policy decisions will reflect that. These issues are not on the radar screen.”

Earley said the report is a great starting point in building “a crescendo” on the issues raised. She said the MSI presidents are a powerful group of people who can lead the way in making the political community understand the “sense of urgency and frustration” they feel over the issues in the report.

“If you are going to get something done in the policy community, you need to express a great deal of frustration and create a sense of urgency. From the report, I got the idea that there was a sense of frustration, but the sense of urgency was not as clear. I’m not sure that that is the responsibility of the authors. That is something the MSI presidents will need to address. It’s a very good report. Now they need do a shorter report that builds on it and provides that sense that there is that necessity to move.”

Her organization tracks the activities of states in teacher preparation. She said the organization has seen a significant drop in the number of programs and funds directed at minority teacher recruitment. Moreover, the only federal program designed to boost the recruitment of minority teachers was effectively killed by Congress last year when it did not receive funding.

The organizations in the Alliance joined forces under the Alliance to “speak with one voice on policy issues,” said Merisotis. Representatives from the organizations meet regularly at the institute’s office to discuss issues that they have in common. Support for the Alliance is provided in part by the W.K. Kellogg Foundation. The next policy report the group expects to publish will cover the technology gap facing minority-serving institutions and minorities.

College Board Study: Adult Students 2001—Older, Better Educated, Career Conscious

NEW YORK, N.Y.

In the most comprehensive study of adult college students in 20 years, The College Board has found that, contrary to the common stereotype, the typical adult college student is a highly computer-literate, White, 40-year-old female who works full time.

The study, Adult Students 2001, represents a major nationwide investigation of the motivation and learning patterns of adult students, conducted by The College Board’s office of adult learning services. More than 80,000 households were screened to locate Americans who were at least 25 years of age and had recently enrolled in undergraduate, graduate, or noncredit programs. The data reveal that the most powerful impetus driving adults to return to college is the need to gain new competencies to advance or change careers, and to stay current in their fields. The study also showed that a surprising 90 percent of these adult students have access to a computer to take college courses.

Some of the key findings from the study include:
- There is always a trigger, a life event, that sets the time for returning to school—like divorce, loss of job, upgrading of job, changing technologies, and moving into a new community. Yet more than 70 percent are seeking degrees.
- About 35 percent of undergraduate adult students already have four years of college, and 30 percent of graduate students already have a master’s degree.
- More than 30 percent of adults study on a full-time basis; and almost as many study during the day as in the evening—quite often not on a main campus.
- The large majority of adults pay their own way through college—using personal funds.
- While the majority are working and married, more than 50 percent are active in cultural, civic, and voluntary activities. They read the newspaper daily, read up to 10 books a year, listen to the radio at least seven hours a week, and 30 percent regularly use a fitness or recreation center.

The findings and interpretations of this study are important in understanding the nearly seven million adults in the country who return annually to college for undergraduate and graduate programs—almost 50 percent of all college students. The study also explains how highly educated, professional adults, some 50 million in 2001, return to learn on a noncredit basis.

America’s adult college students know well what Thomas Friedman, author of The Lexus and the Olive Tree, asserts in his book about societal change and globalization. “In this world, security does not come from a union card, from lifetime employment at a big company, or from government. It will only come from the skills you carry with you. Without the opportunity for life-time learning, you’re never going to be able to thrive in this system.”

Fundación Cisneros and OAS Agree to Expand Distance-Learning Programs for Teachers throughout Latin America

WASHINGTON, D.C.

Patricia Phelps de Cisneros, founding chair, Fundación Cisneros; César Gaviria, president and secretary general, the Organization of American States (OAS); and Ronald Schermer, director general, the OAS Inter-American Agency for Cooperation and Development (IACD), signed a formal agreement to create strategic programs to address the complex education challenges of Latin America. The new agreement—one of IACD’s first cooperative ventures with a private institution—calls for the organizations to work together to expand Fundación Cisneros’ highly successful teacher-training program, Actualización de Maestros en Educación (Updating Teachers in Education), or AME.

The signing ceremony took place at the Hall of the Americas, OAS, in Washington, D.C.

Patricia Cisneros commented, “Today Fundación Cisneros reaches a major milestone in its efforts to improve the lives and future of Latin Americans. By joining efforts with the Inter-American Agency for Cooperation and Development of the Organization of American States, AME will better achieve its goal of becoming the most effective distance-learning teacher-training service in the region.”

Gaviria said, “This is the first of what the OAS hopes will be a series of cooperative efforts with the business community and private institutions to help ensure that we can more effectively address the complex challenges of the 21st century.”

And according to Schermer, “Education is the most critical challenge facing Latin America today, and this agreement will go far to help IACD meet its goal to fashion an effective response to this challenge. Success will require the widest participation of individuals and institutions, both private and public.” The new agreement complements IACD’s mission to use information technologies to address the region’s educational needs.”
College Bound Says Institutions of Higher Education Report Rise in Admission of Minorities

EVANSTON, ILL.

College Bound, in its 15th annual National College Admissions Trends Survey, looked at what 110 colleges and universities across the nation said about their minority applications, international student acceptances, tuition and financial aid, and what advice admissions officers offered to counselors and students on applying for 2001.

Fifty-one percent of the colleges and universities surveyed said they admitted more Asian American students; 50 percent admitted more African American students; and 50 percent admitted more Hispanic students in 2000 than in 1999. Fifty percent admitted the same number of Native American students in 2000 as in 1999.

The percentage of minority students on campuses ranged from two percent at the University of Maine to 45 percent at Loyola Marymount University. Carnegie Mellon University and the University of Iowa reported that nine percent of their student bodies are made up of minority students. Other examples include Creighton University, 21 percent; the University of Chicago and Vassar College, 12 percent; Williams College, 24 percent; Dartmouth College, 25 percent; Princeton University and Duke University, 30 percent; and Harvard University, 37 percent.

Minority retention rates also appear to be increasing at colleges and universities across the nation. In fact, at some colleges, the retention rate for minority students is close to, or above, the retention rate for all students. Other colleges report that they do not track retention rates. This is a subject deserving greater attention in the future as minority students, parents, and guidance counselors look for schools that work to see that minority students graduate in a timely fashion.

Colleges and universities in College Bound's survey accepted more international students in 2000 than in 1999. In fact, 44 percent of the colleges and universities surveyed nationwide accepted more international students in 2000, compared to 25 percent that reported they accepted fewer. Twenty-seven percent of the colleges accepted the same number as in the previous year.

This percentage increase is slightly down from 1999, when 48 percent of the colleges College Bound surveyed accepted more international students. But it is an increase from 1998, when the increase in international students was flat, with 34 percent of the colleges accepting the same number of students as the previous year.

HACU and ASHE Join Forces to Promote Hispanic Higher Education Research

WASHINGTON, D.C.

The Hispanic Association of Colleges and Universities (HACU) joined the Association for the Study of Higher Education (ASHE) in a new partnership designed to promote Hispanic higher education research and institutional development initiatives.

A formal memorandum of understanding was signed in Sacramento, Calif., at the annual meeting of ASHE following planning efforts led by ASHE past president Laura Rendon and HACU executive director of information and policy analysis Edward Codina. "This agreement will allow us to leverage our resources and expertise to attract additional resources to address the pressing problems that face Hispanic higher education," Codina said.

HACU and ASHE will work in partnership to attract private and public funding and other resources for research and scholarly work, including fellowships for graduate studies and dissertations germane to Hispanic education issues. The agreement outlines issues ranging from pre-collegiate readiness to graduation.

Rendon, who holds the Vessie Milstead Jones Endowed Chair in the College of Education at California State University-Long Beach, said the collaboration can lead to research that can guide future practice and policy at Hispanic-serving institutions (HSIs).

"We want to work collaboratively with the leaders of HSIs and HACU to provide the research that will fill in the gaps relative to the kinds of questions that remain unresolved about students and the way that HSIs operate," Rendon said. "How can we collaborate so that this leadership can implement programs and strategies that will make a difference for Hispanic students and help them to succeed?"

The partnership also will focus on efforts to provide sabbatical and fellowship opportunities for faculty at HACU-member HSIs and within the membership of ASHE for collaborative academic work.

ASHE, a scholarly society with more than 1,200 members dedicated to the study of higher education issues, has its headquarters at the University of Missouri-Columbia. ASHE publishes the highly regarded journal The Review of Higher Education and has earned continued recognition for including graduate students in association activities.
People-Places-Publications-Conferences

Ramapo Hosts Papo Vázquez
The Angelica and Russ Berrie Center for Performing and Visual Arts at Ramapo College of New Jersey hosted “Pirates and Troubadours”—a concert performance by Papo Vázquez.

Vázquez, trombonist, composer, and arranger with a huge Afro-Cuban Latin jazz sound, has played with such legends as Tito Puente and Celia Cruz, Dizzy Gillespie, and Wynn Marsalis. The New York Times called Vázquez “one of the best trombonists in town, with a smokin’ new record.”

The show featured Willie Williams on tenor saxophone.

Both a teaching facility and a community resource, Ramapo’s Berrie Center offers a diverse schedule of exciting programs—from exhibitions of contemporary arts, private collections, and student work to presentations of jazz and classical music, dance, and theatrical events. Outreach efforts include special programs for families and school-time performances for elementary, middle, and high school students.

Jones International Offers Online Programs in Spanish
To serve the needs of its expanded global student base, Jones International University (JII) in Colorado, which claims to be the first fully accredited online university, started offering Spanish-language degree programs. JII introduced a Spanish-language online MBA program in January, and plans to add other Spanish degree programs within the next year.

In order to convert the courses into a different language, the University employed academics from the relevant regions, not only to translate the content, but also to recreate the courses in a way that reflects the peoples and cultures of the Spanish-speaking world.

SBC Supports Texas Education Program
SBC Communications, Inc., awarded its “Parents as School Partners in Math and Science” grants to two Houston-area public schools.

Texas Rep. Kino Flores (pictured l.) presented a grant to E.B. Reyna Elementary in Palmview on behalf of SBC. Alma Ortega (center), the school principal, accepted on behalf of the school. Sonia Pérez (r.), coordinator of SBC at the grant presentation.

Texas Rep. Juan Hinojosa presented a SBC grant to Jefferson Elementary in Edinburg. Victor Cantú, an instructor at the school, accepted the grant for the school.

Corpus Christi Diversity Program Receives National Award
Texas A&M University-Corpus Christi’s multicultural diversity programs were honored with a Presidential Award for Best Practices in Diversity Initiatives at a national conference in New York. The diversity programs, directed by multicultural programs coordinator Lucy Torres (pictured), are affiliated with the National Coalition Building Institute (NCBI), sponsored by the U.S. Department of Education.

Torres said the Corpus Christi-NCBI programs are dedicated to ending the mistreatment of every group, whether it stems from nationality, race, class, gender, religion, sexual orientation, age, physical ability, job, or life circumstance. The NCBI team on campus began with a three-day Train-the-Trainer seminar. Over the past year, more than 1,042 participants have completed a four-hour “Celebrating Diversity” workshop at A&M-Corpus Christi, including faculty, staff, students, administrators, and local community members.

Elms College Student Wins National Accounting Award
Jacqueline M. Luna received the National Achievement Accounting Award for Hispanic Men and Women. Luna, an accounting major with the Class of 2001 at Elms College in Massachusetts, was the only New England recipient. Of the 85 applicants from across the U.S., 21 undergraduate and graduate students were recognized at an awards ceremony held in Los Angeles, Calif.

In addition to her studies, Luna helped prepare tax returns for the Income Tax Assistance Program as a volunteer and spent time as an accounting tutor at Springfield Technical Community College while beginning her accounting studies there.

Asked about the recognition, Luna stated, “It was an honor. I want to let other young minority women know that accounting is open to them, and it is a career where they too can succeed.”

College Board Review Expands Editorial Board
The award-winning magazine The College Board Review, in an effort to become more timely, provocative, and thought-provoking, appointed a distinguished panel of educators to its editorial board.

Nine named so far are: David W. Breneman, university professor and dean, Curry School of Education, University of Virginia; Howard Evers, vice president of academic initiatives, The College Board; Kurt F. Geisinger, academic vice president and professor of psychology, Le Moyne College, N.Y.; Brice W. Harris, chancellor, Los Rios Community College District, Calif.; Gene I. Maeroff, director, Hechinger Institute on Education and the Media, Teachers College, Columbia University, N.Y.; Floretta D. McKenzie, chair and CEO, the McKenzie Group; Joyce
Slayton Mitchell, director of college advising, Nightingale-Barnford School, N.Y.; Amina S. Rachman, special assistant to the president, United Federation of Teachers, N.Y.; Neill F. Sanders, dean of undergraduate enrollment policy and management and adjunct associate professor of history, University of Rochester, N.Y.

**New Meadows Museum to Open**

A new facility housing the internationally acclaimed Meadows Museum Collection is opening at Southern Methodist University in Texas. The freestanding building doubles the exhibition space for the collection and significantly expands the facilities for research, educational, and public programming.

The Meadows Museum Collection is the most comprehensive and one of the largest collections of Spanish art outside of Spain. It consists of masterworks by Spanish artists dating from the 10th to the 20th century. The 670 objects include paintings, sculpture, and works on paper by artists such as Velázquez, Ribera, Montañés, El Greco, Murillo, Goya, Picasso, and Miró.

The museum will continue to present four to five special exhibitions a year, substantially increasing their quality and scope.

**Rodríguez Speaks at ENMU-Roswell Graduation**

David Rodríguez, president of the Phi Theta Kappa chapter at Eastern New Mexico University (ENMU)-Roswell, was the featured speaker at the 34th commencement ceremony. The ENMU-Ruidoso Orchestra provided the music.

Rodríguez, 35, is a two-time member of the National Dean's List, and a member of the All-State Academic Team. He plans to continue his education at ENMU's main campus, pursuing a bachelor's and a master's in business administration, majoring in accounting.

**St. Bonaventure's Wolf Den Promotes Ed Tech**

St. Bonaventure University (SBU) in New York is promoting the use of technology in education throughout the area in the form of the Wolf Den, an after-school program that took its name both from SBU's wolf mascot and as an acronym for "Where Outside Learning is Fun." The program enables SBU sophomore elementary education majors to visit an elementary school and partner with students, working with them on computer learning games and projects that allow both to develop their skills. The Wolf Den is supported by a $1.16 million U.S. Department of Education grant, part of the Preparing Tomorrow's Teachers to Use Technology initiative, known as PT3.

Pre-service teachers design, teach, and evaluate lessons involving technology as they intern in area classrooms, supported by SBU and school-based faculty. They are required to use technology in instructional settings, including demonstrating competence in technology, developing an electronic portfolio, and sharing their technology-based lessons on an interactive, Web-based database.

One participant, Danielle Navarra, used technology in developing a unit plan to teach photosynthesis to fourth graders at an elementary school in Pennsylvania.

**Manhattan School of Music at Jazz Educators Conference**

Manhattan School of Music's (N.Y.) jazz department was represented at this year's 26th annual International Association of Jazz Educators Conference. Department chair Justin DiGiacco, internationally recognized as one of the foremost jazz educators of our time, presented a clinic on "Jazz Ensemble Techniques." The Manhattan School of Music Afro-Cuban Jazz Orchestra, directed by Bobby Sanabria (picured), made its debut performance. Sanabria, the son of Puerto Rican parents, is an esteemed drummer, percussionist, composer, arranger, recording artist, and educator. Percussionist John Santos, raised in the Puerto Rican and Cape Verdean traditions of his family, was a guest soloist. In a separate formal exhibition, renowned Brazilian-born pianist Eleana Elias performed her original music with the school's jazz orchestra. Performing separately was the school's jazz quintet, featuring students Miguel Zenon, Dana Leong, Tim Collins, Steve Kirby, and Jeff Davis.

**Georgetown Professor on Inter-American Juridical Committee**

The Organization of American States (OAS) named Georgetown University (Washington, D.C.) law professor Carlos Manuel Vázquez a member of the Inter-American Juridical Committee (IAJC). Vázquez was nominated to replace the late Keith Hight, whose term runs through the end of 2003.

The IAJC is the legal advisory body to the OAS on juridical matters and to promote progressive development, codify, and harmonize international law among countries of this hemisphere. The committee has 11 elected members, each nominated by a member state and elected by the general assembly. The committee holds two sessions a year and organizes a month-long course on international law, held each year in Río de Janeiro.

Vázquez received his undergraduate degree from Yale University and his law degree from Columbia University Law School, where he was articles and book reviews editor of Columbia Law Review. He has written and taught primarily in the areas of constitutional law, international law, and federal courts.

**UNM's Santos Exhibit Displayed in Andorra**

An exhibit featuring northern New Mexico santos was displayed in Andorra, a principality between Spain and France on the Iberian Peninsula. The santos were originally part of the "Cuando Hablan Los Santos" exhibit from The University of New Mexico's (UNM's) Maxwell Museum of Anthropology.

The exhibit, organized by the museum's chief curator, Mari Lyn Salvador; featured 60 santos from 13 master santoros and 22 young santoros. "The exhibit strengthens the connection between Andorra and the United States," said Garth Bawden, museum director. "It highlights growing appreciation on both sides of the Atlantic of the shared heritage of the two countries."

**Moreno Performs at Cal Poly Pomona**

Carmencristina Moreno, singer, guitarist, and composer, performed in concert at California State Polytechnic University-Pomona as part of the music department's Renowned Artist Series.

Moreno was born into a rich musical background. Her father, Luis M. Moreno, composed
Mexican ranchera music. Her mother, a Texas native, was a singer and musician. As Carmen Cristina’s talents matured, her music illustrated her diverse background. She became musically bilingual, influenced not only by the varied styles of Mexican music but also the sounds of North American rock ‘n roll and pop.

Moreno performed songs from her new CD, Train from Tenochtitlán, an anthology of Mexican music.

NEIU President Receives Professional Development Award

Northwestern Illinois University (NEIU) president Dr. Salme H. Steinberg was given the Outstanding Commitment to Professional Development Award from the Committee on Opportunity and Equity (COE), of the Council for Advancement and Support of Education (CASE) International’s board of trustees.

The award was developed to renew and reaffirm the commitment that CASE will nurture and maximize the talents of all people and their ethnic cultures, and to renew and reaffirm its educational obligation to promote diversity on behalf of the greater good of society. Steinberg was selected as the winner for 2000 in recognition of her enhancement of career opportunities for multicultural professionals.

As president of NEIU since September 1995, Steinberg has shown great commitment to diversity. U.S. News and World Report named NEIU the “most diverse university in the Midwest” since it first began ranking diversity in higher education.

UTB/TSC President Enters Texas Women's Hall of Fame

Dr. Juliet V. Garza, president of The University of Texas-Brownsville and Texas Southmost College, joined a distinguished list of the Lone Star State’s most successful and influential women as an inductee into the Texas Women’s Hall of Fame. Garza is the first Mexican American woman to become president of a college or university. As the year’s single inductee from the field of education, Garcia was described as “a tireless campaigner for educational opportunities for the people of South Texas.”

In announcing the selection, then-Gov. George W. Bush’s office noted that, during Garcia’s tenure, “student enrollment and graduation rates have increased, the number of new baccalaureate degree programs has doubled, the number of master’s degree programs has tripled, and the campus has expanded from 47 to 300 acres.”

Texas A&M-Corpus Christi Co-Hosts NALAC Conference

The National Association of Latino Arts and Culture (NALAC) held its third national conference on vital Latino cultural issues. The historic event was hosted by Texas A&M University-Corpus Christi, the South Texas Institute for the Arts, and the Corpus Christi Hispanic Chamber of Commerce, with assistance from Del Mar College. The conference celebrated the diversity of the Latino culture, addressed organizational issues facing Latino arts organizations, and explored the nexus between U.S. Latinos and their counterparts in their countries of origin.

The Art Museum of South Texas and the NALAC 2001 National Conference presented “El papel del papel, A Boricua Chicano Exhibition of Works on Paper,” a visual arts exhibition of 120 works by 56 Chicano and Puerto Rican artists from all over the U.S. and Puerto Rico. The exhibition was on display at the Art Museum of South Texas during the conference and all of January.

Texas-San Antonio Receives NEH Funding

For the second consecutive year, the University of Texas-San Antonio (UTSA) received National Endowment for the Humanities (NEH) funding for a unique summer institute that will immerse 28 secondary teachers in bicultural literature for a month.

The NEH Division of Research and Education Programs awarded $70,000 to UTSA to renew Derrumbando fronteras/Breaking Boundaries: Summer Institute for Integrating Mexican American and Latino Literatures and Culture into the Secondary Curriculum. The program is designed to help teachers from across the nation revamp curricula to be more inclusive of the Latino experience. It promises a provocative exploration of Mexican American and Latino literatures using a combination of traditional classroom exchanges and high-tech tools.

Institute co-director Ellen Rojas Clark (pictured), an associate professor of bicultural studies, said the UTSA program will be one of a limited number of NEH-funded summer institutes during 2001, and it is the only one to focus on the literature and culture of U.S. Latinos. Other institute co-directors are assistant professors of English, classics, philosophy, and communication Louis Mendoza and Ben V. Olguin.

Time Recognizes Notre Dame Professor

The Rev. Virgilio Elizondo, associate director of the Institute for Latino Studies and visiting professor of theology at the University of Notre Dame (Ind.), was cited by Time magazine as one of the nation’s leading spiritual innovators. As part of the series “Time 100: The Next Wave,” the weekly news magazine featured the innovative men and women likely to be the most influential in the future in 18 fields, including religion, politics, music, technology, science, design, and justice. The series was a sequel to the popular “Time 100” survey of the leading figures of the 20th century.

Elizondo was recognized for instituting Mexican religious customs and traditions into the church Mass at San Fernando Cathedral in San Antonio, Texas, and for initiating an internationally televised bicultural service. He also was cited for developing a theology that speaks to the mestizo experience. Time said that his book Galilean Journey has found “resonance beyond the Mexican American community because of the linkage he suggests between Jesus and the mestizo experience.”

Albertson Students Study in Cuba

A group of Albertson College (Idaho) students recently traveled to Cuba for three weeks to study the island’s unique geography, literature, and society. It was the first time the college had sent a group to a communist nation that is under a U.S. embargo. Led by
professors of literature, geology, and sociology, the students visited tobacco factories, schools and universities, geologic sites, hospitals, museums, historical sites, and monuments. They had the option of attending cooking schools and boxing matches.

The U.S. Treasury Department granted Alberson College representatives a special academic license to travel to the island. Professors leading the trip were Dora Gallegos, lecturer in geology; Robin Lorentzen (l), professor of sociology; and Diane Raposh (r), professor of English. The group based itself in Havana, but took a round-trip excursion to Santiago de Cuba, located near Guantánamo Bay, on the opposite side of the island.

Alamo CCD Hosts Ambassador

In San Antonio, Texas, Oliver P. Garza (pictured), U.S. ambassador to Nicaragua, delivered the keynote address at the Alamo Community College Districts (ACCDs) kickoff of International Education Week. Sharon Garcia of the city’s international affairs office read a proclamation from the mayor’s office. Chancellor Robert W. Ramsay and Dr. Eduardo Conrado, ACCD director of international programs, spoke of the district’s plans to expand international education opportunities and partnerships. International students from the district’s four colleges attended, and two, Shakara Samuels of Jamaica and David Montenegro of Guatemala, shared their experiences with the audience.

Garza congratulated ACCD on its successful international student programs and partnerships and applauded the district’s role in helping Nicaragua to overcome the devastating effects of Hurricane Mitch by training Nicaraguan construction managers.

UT-Austin Forum Addresses Equity for Underprivileged

The University of Texas (UT)-Austin hosted “Latinos & Educational Equity,” a public forum addressing the quality of the educational process provided for historically underprivileged youth in Texas—most of them African Americans and Latinos.

Bringing together nationally recognized scholars who have played a major role in public-policy debates on education reform, the forum focused on the effectiveness of Texas’ Top 10 Percent Law and the current system of accountability for public school students, teachers, and administrators in grades 3-12.

José Limón (pictured), director of the Center for Mexican American Studies at UT-Austin, said high-stakes testing is a key part of the educational pipeline for historically underprivileged students, because it is a requirement for graduation from high school as well as a major criterion for promotion and retention decisions.

Governor Recognizes Hispanic Heritage Activities at Edinboro

Pictured (l to r): Wilfredo Vélez of Erie’s Perseus House in Pennsylvania presented a proclamation from Gov. Tom Ridge to Edinboro University of Pennsylvania president Dr. Frank Pogue, while Dr. Jerry Kiel, associate vice president for enrollment management and retention, and Dr. Denise Ohler, associate dean of enrollment management and director of career services, looked on. The proclamation recognizes Edinboro’s Hispanic heritage activities as well as the growth and value of Latino communities in cities across the state and the major social and economic impact they will have on Pennsylvania’s future.

Vélez has been instrumental in the success of Edinboro’s Latino leadership development program, a residential program that brings Latino high school students to Edinboro and Erie for a week of activities focusing on academic, leadership, and career skills. Vélez is on the board of the Hispanic American Council of Erie, and he is on the Erie County Human Relations Commission.

M-DC Student Wins Security Scholarship

The Miami, Fla., chapter of the American Society for Industrial Security presented Miami-Dade Community College (M-DC) student Evanides Delima a $1,000 scholarship and chapter membership. It was the first time the scholarship was awarded in a competition open to Miami-Dade County students planning a career in the security profession.

Delima, a single mother with son, is a graduate of the College’s private sector security training program. She is currently a business student at the Kendall Campus and works as a security officer. She plans a career in security, hoping to own her own agency someday.

The M-DC private sector security training program offers classes for the “D” and “G” license as well as numerous in-service courses. Classes are regularly scheduled at the North, InterAmerican, Kendall, and Homestead campuses.

Cal State L.A. Promotes Chicano/ Latino Awareness

California State University-Los Angeles celebrated Chicano/Latino Awareness Month 2001 with entertainment, food, panel discussions, and speakers in the University-Student Union. The program featured events exploring the revolutionary struggles and achievements of the Chicana/o-Latina/o community.

“An Afternoon with Josefina López” featured the Emmy Award-winning screenwriter, playwright, and performer whose works draw upon her life experiences in East L.A. “An Afternoon with Ray González” spotlighted the critically acclaimed and award-winning Chicano writer. A lecture on Emiliano Zapata and Pancho Villa debated whether the two were violent criminals or revolutionary Robin Hoods, robbing the rich to give to the poor. During the lecture “Fronteras: The Struggles of Immigrants,” individuals discussed their real-life struggles in crossing the border to enter the United States. They talked about their experiences with racism, anti-immigrant
legislation, and economic struggles while trying to adjust to life in this country.

**AACC Honors Allan Hancock Alumna**

The American Association of Community Colleges named Allan Hancock College (Calif.) alumna Winifred Hervey one of its 12 Outstanding Alumni Award recipients for 2001. The traditional award (since 1982) honors individuals who attended community colleges and are making outstanding contributions in their chosen fields at a national or international level.

Hervey is currently the executive producer and creator of the *Steve Hervey Show* on the Warner Bros. Network. She has written for comedic greats Robin Williams (another Allan Hancock alum), Bill Cosby, Robert Guillaume, Betty White, Bea Arthur and Penny Marshall, while contributing to comedy programs that have revolutionized the genre on television. In her 19 years as a professional writer and producer of television comedy, Hervey has won an Emmy, two Golden Globes, and a NAACP Image Award.

**NYU's King Juan Carlos I of Spain Center Hosts Special Events**

The King Juan Carlos I of Spain Center, New York University (NYU), recently held several special events, including a two-day conference on the legacy of Américo Castro in the field of cultural studies, held in both English and Spanish.

The Center hosted two colloquia, "On the Trail of Pierre Manerzt," led by Juan Salas, department of performance studies, NYU; and "On Góngora and Baroque Painting," led by Humberto Huerto, Carleton College.

Alberto Medina, Georgina Dapico-Black, James D. Fernández, Susan Martín Márquez, Rafael Lamas, Francisco Javier Hernández Adrián, José del Valle, and Jaime Martí Olivella participated in the Américo Castro conference, "La península ibérica."

**ENMU-Roswell Receives Quality Award**

Quality New Mexico gave Eastern New Mexico University (ENMU)-Roswell the prestigious Roadrunner Award for excellence. State legislators honored ENMU-Roswell and others with a recognition ceremony.

Dr. Judy Armstrong, dean of instruction, said the award application filled the criteria for an annual quality review by an external agency under the University's new accrediting process, the Academic Quality Improvement Project (AQIP). Unlike the traditional accreditation process, the AQIP model is designed to align accreditation with an institution's program of continuous quality improvement in order to meet the rapidly changing needs of educational institutions in the 21st century.

ENMU-Roswell was also a Roadrunner recipient in 1997.

**Texas-Brownsville/Texas Southmost Receives $2 Million Gift**

The University of Texas-Brownsville and Texas Southmost College (UTB/TSC) received a gift of $2 million from the Houston Endowment, Inc., the largest private philanthropic foundation in Texas. It is the largest gift UTB/TSC has ever received from a foundation and the largest donation the Houston Endowment has made in the Rio Grande Valley in South Texas.

The gift will fund scholarships for students and establish the first endowed chairs in science, mathematics, technology, border studies, and leadership studies at the University. Endowed chairs are prestigious faculty and staff positions designated to facilitate research.

The Houston Endowment ranks among the largest private foundations in the nation and is dedicated to the support of charitable undertakings. In 1997, the foundation gave the University a generous $1.25 million gift that was used to purchase equipment and computers for bachelor's programs in the College of Science, Mathematics, and Technology.

**Palo Alto Students Place in Jazz Competitions**

Palo Alto College (Texas) musicians recently performed in state and international concerts, after winning competitions.

Five Palo Alto College jazz students took top honors at two Texas Junior College Music Competitions. Jeremy Valdez, Jason Valdez, Richard Rosas, and Thomas Jimenez placed in the All-State Junior College Jazz Orchestra. Donald O'Dell placed in the All-State Junior College Wind Ensemble. "The students from our jazz orchestra who placed worked very hard on this project," said Palo Alto music instructor Arminda Marmolejo (pictured). "It is an honor for them to be part of this elite group."

The All-State Jazz Band performed at the Texas Music Educators Association Convention in San Antonio. In addition, Valdez, Valdez, and Rosas were named to the International Association of Jazz Educators' All-Star Junior College Jazz Orchestra. They performed at the 2001 International Association of Jazz Educators Convention in New York City.

**St. Thomas Holds Cuban Poetry Readings**

The Felix Varela Center for Cuban Studies at St. Thomas University in Florida presented "Voces (1): Readings by Cuban and Cuban-American Poets," co-sponsored by the Latin American Art Museum, *Catalogo de Letras*, and Bacardi-Martini, USA. All of the programs were held in Spanish.

The opening exhibit "No tengas miedo," by artist Xavier Cortada, commemorated the third anniversary of the visit to Cuba by Pope John Paul II. Soren Triff of *Catalogo de Letras Cultural Review* and Olga Connor of *El
Nuevo Herald presented the book Cuaderno interrumpido, by Alejandro Armengol. "Two Cuban Voices" featured readings by Uva de Aragón of Florida International University and Rita Martín of the University of North Carolina-Chapel Hill. Francisco Morán, Reina María Rodríguez, Pedro Marques de Armas, German Guerra, and Felix Lizarraga led "La isla en su tinta," a presentation of the new anthology of Cuban poetry. Rosa Leonor Whitmarsh moderated "Homenaje a José Martí: Poetas del Presidio Político," readings by former political prisoners honoring Cuban poet and patriot José Martí—featuring Angel Cuadra, Angel Pardo, and Jorge Valls.

Pictured here l. to r. are Martín de Aragón; Juan Carlos Espinosa, director; Father Félix Varela Center for Cuban Studies, St. Thomas University; and Triff. In the background is a work by Cuban artist Xavier Cortada.

**Telecom Innovator Endows Wyoming Program**

University of Wyoming (UW) alumnus Solomon D. Trujillo, former chair and CEO of U S West Inc. and current chair, CEO, and president of Gravion, Inc., and his wife Corrine, committed $1 million to endow the Solomon D. Trujillo Center for e-Business within the UW College of Business. Beginning in June, the College will offer a new Master of Science degree program in e-business, among the first such programs in the nation.

"There is no question that e-commerce will continue to change the way businesses interact with consumers and each other," said Trujillo. "Current estimates by the authoritative Forrester Research see over-the-Web commerce swelling to an astronomical $1.3 trillion by 2003."

Solomon Trujillo earned a bachelor's degree and a master's at UW. Corrine Trujillo has a bachelor's from UW.

**Laredo Professor Nets National Appointment**

Tracy Wensing, an English instructor at Laredo Community College in Texas for 17 years, was appointed to the language Policy Committee (LPC) of the Conference on Composition and Communication—a national group that focuses on language diversity and "multilingualism."

Tara Samander of the Conference on Composition and Communication said, "Tracy's perspective, coming to the LPC from a community college that serves a large population of non-native English speakers, will be valuable. Among her contributions, Tracy will bring voice to relevant U.S.-Mexico border issues, as well as to issues affecting two-year colleges, for the benefit of the committee."

The functions of the LPC committee include developing strategies for educating legislators, policymakers, and the public about the values of language diversity and multilingualism.

**Penn State to Create Family Literacy Institute**

As part of a substantial educational spending bill signed by former President Bill Clinton, Penn State's College of Education will receive $6 million to establish the Goodling Institute for Research in Family Literacy—an initiative spearheaded by William F. Goodling.

Goodling recently retired from the U.S. House of Representatives, where he chaired the Committee on Education and the Workforce. Throughout his 24-year congressional career, he has been a champion of education programs and a nationally recognized leader in the adult literacy community. David Monk, dean of Penn State's College of Education, has been discussing a potential role for Goodling with the new institute.

**Universities of Colorado and Denver Co-Create Minority Law Program**

The Colorado Pledge to Racial and Ethnic Diversity, in conjunction with the University of Colorado (CU)-Boulder School of Law and the University of Denver (DU) College of Law, announced the creation of a summer clerkship program.

The Colorado Pledge to Diversity Law Firm Group consists of Denver law firms that have signed a pledge to increase racial and ethnic diversity in Colorado law firms. Implementation of the summer clerkship program is one of the most significant actions undertaken by the group since it renewed the pledge last year. Sixteen prestigious Denver metropolitan area law firms agreed to participate in the program.

The initial goal of the program—which was strongly supported by Dean Hal Bruff of the CU Law School and Dean Mary Ricketson of the DU College of Law—is to increase the number of minorities taking part in large law firm clerkship programs, which ultimately would lead to more minority hires at large firms.

**UTSA Math Professor Receives Prestigious Award**

University of Texas-San Antonio (UTSA) mathematics professor Manuel P. Berriozábal received the Gung-Hu award from the Mathematical Association of America for his dedicated years of service.

Berriozábal has been a professor at UTSA since 1976, and he originated the successful Freshman Engineering Program, which has been copied by other communities statewide and nationally. The goal of the program is to identify high-achieving students from grades 6-11 with potential to become engineers or scientists, and give them needed reinforcement and encouragement.

Berriozábal was recently inducted into the Texas Science Hall of Fame.

**Delaware Hosts Foreign Policy Lecture Series**

Former White House spokesman Mike McCurry (l.) kicked off a major foreign policy lecture series at the University of Delaware. McCurry, who spoke for President Clinton from the White House podium during most of the 1990s, also was the chief foreign policy spokesman at the Department of State. His was the first of seven lectures by prominent global affairs specialists.

Other speakers in the series "Global Agenda 2001" include: Jamie Shea, director of public affairs for NATO in Brussels; Marwan Muasher, Jordan's ambassador to the United States; Harriet Elam, U.S. ambassador to Senegal and a career foreign service officer;
Jaime FlorCruz (x), Time magazine’s correspondent in China, and Beijing bureau chief for nearly three decades; Robert Peirce, counselor at the British Embassy in Washington, D.C., responsible for political and public affairs; and David Hoffman, foreign editor of The Washington Post.

News from Río Hondo

• Dr. Jesús Carreón, president of Río Hondo College in Whittier, Calif., was an honorary co-chair of the Presidential Inaugural Awards Luncheon committee, which welcomed Roderick R. Paige, secretary designate of the U.S. Department of Education. The theme of the event, held in Washington, D.C., was “Leave No Child Behind.” Carreón, who has helped increase the national, regional, and local visibility of community colleges, was selected for the committee due in part to his national prominence in the field of education. He is president of the National Community College Hispanic Council and a board member of the American Association of Community Colleges.

• Don L. Jenkins is the new president of the Río Hondo Community College District board of trustees. Jenkins, an eight-year veteran of the board, is supported by Dr. Barbara Stone, vice president, and Gary Méndez, clerk. Jenkins is on the board of the California Community College Trustees, an organization that represents trustees statewide.

The Poem and the Insect: Aspects of Twentieth-Century Hispanic Culture

By David Spooner

Author David Spooner discusses the works of Rueda, Lorca, Dámaso Alonso, Aleixandre, Antonio Machado, Cernuda, Salinas, Pablo Neruda, Octavio Paz, and more. While he includes Spanish text along with a translation when quoting poems, prose passages have been translated usually without the original Spanish for reasons of reading flow. In the case of prose-poems, both the original and translation appear.

Aztlán: A Journal of Chicano Studies, Vol. 25, No. 2

Chon A. Noriega, ed.

This issue, which completes Aztlán’s 30th anniversary, includes essays on the Chicano movement, the Vietnam War, Bronson Cutting, and—In Spanish—an essay about letters between migrant workers and their families. The front art is a painting from Eugene Rodríguez’s series Interruptions, “an attempt to reengage Chicano/Latino gay men outside both traditional and stereotypical notions of sexual/social identity.”

Polarizing Mexico: The Impact of Liberalization Strategy

By Enrique Dussel Peters

The primary objective of this book is to understand Mexico’s present socio-economic conditions and challenges. Based on a detailed and in-depth analysis of the government’s economic and social policies, the book includes—implicitly and explicitly—alternatives to policies imposed in Mexico since the 1980s.

Manuel Puig and the Spider Woman: His Life and Fictions

By Suzanne Jill Levine

Manuel Puig (1932-1990), Argentinian author of Kiss of the Spider Woman and pioneer of high camp, stands alone in the pantheon of contemporary Latin American literature. Strongly influenced by Hollywood films of the ‘30s and ‘40s, his many-layered novels and plays integrate serious fiction and popular culture, mixing political and sexual themes with B-movie scenarios. His way of life was as unconventional as his fiction.

The Magic Lantern: Having a Ball and Christmas Eve

By José Tomás de Cuéllar

José Tomás de Cuéllar (1859-1894) was a Mexican writer noted for his sharp sense of humor and gift for caricature. Having a Ball and Christmas Eve are two novellas written in the carúmbrita style, made popular in the mid-19th century by the periodical press in which these sketches of contemporary manners...
were first published. The stories are a sensitive reflection of the effects of modernization brought by an authoritarian regime dedicated to order and progress. Translated by Margaret Carson. Edited by Margo Glantz.

**A Map of Hope: Women's Writing on Human Rights—An International Literary Anthology**

Marjorie Agosín, ed.

More than half a century after the United Nations Declaration of Human Rights, women throughout the world still struggle for social and political justice. Many fight back with the only tools of resistance they possess—words. *A Map of Hope* presents a collection of 77 extraordinary literary works documenting the ways women writers have spoken out about human rights.

**Intercollegiate Athletics and the American University: A University President's Perspective**

By James J. Duderstadt

Former president of the University of Michigan James J. Duderstadt argues that universities must regain control of intercollegiate athletics by de-emphasizing and realigning them with the university's educational mission. He asserts that if burgeoning athletic programs cannot be brought back into the fold, then universities must recognize them for what they are—commercial, professional, and independent entertainment businesses.

**Beyond the Border: A New Age in Latin American Women's Fiction**

Nora Erro-Peralta and Caridad Silva, eds.

This collection showcases a rich and important body of fiction by Latin American women, including acclaimed writers such as Isabel Allende and Luisa Valenzuela as well as dynamic new voices. Ranging across boundaries of geography and gender, the stories deal with a variety of subjects—incest, race, politics, sexual needs, love, old age, and child abuse—and incorporate a variety of narrative forms.

**King David's Harp: Autobiographical Essays by Jewish Latin American Writers**

Stephen A. Sadow, ed.

In this collection of 15 essays, Jewish Latin American writers speak for themselves about their lives, their literary work, their formative experiences, and the Jewish communities in Latin America and the United States.

**Succeeding in an Academic Career: A Guide for Faculty of Color**

Mildred García, ed.

Aside from promoting diversity, faculty of color offer different ways of knowing their field and different lenses through which to examine their disciplines. Yet when they enter the academy, all too often they receive little guidance about what it takes to carve out a career in higher education. This collection of success stories shares lessons of survival. It offers thoughtful analyses, multiple blue-prints, and specific strategies for shaping a successful and satisfying academic career.

**The Iceworker Sings and Other Poems**

By Andrés Montoya

Andrés Montoya's poems evoke a world of machines and violence as they confront and cry out against a culture that has abandoned the aesthetic of hope. His poems are stories, prayers, and letters that foster a spiritual resolve in the midst of a chaotic and concrete reality that denies the holy. Primarily urban and intensely personal, his poetry is nonetheless universal in dealing with issues of the day.

**Garden of Exile: Poems**

By Aleida Rodriguez

This first full-length collection of poems by Aleida Rodriguez reveals a life enriched by layers of language and culture. Rodriguez was born in Cuba and emigrated to the Midwest at age nine via Operation Pedro Pan. These poems are psalms that celebrate the pleasures of experience made palpable through language. Winner of the 1998 Kathryn A. Morton Prize in Poetry (selected by Marilyn Hacker).

**Kokopelli: The Making of an Icon**

By Ekkehart Malotki

Kokopelli the flute-player is an icon that American culture has adopted from the Native peoples of North America. But what exactly is Kokopelli? Just how Native
American is the ubiquitous flute-player? Hopi scholar Ekkehart Malotki describes the development of the Kokoříni phenomenon in American mass culture from its beginning to Kokoříni’s present status as pan-Southwestern icon.

The Three Secular Plays of Sor Juana Inés de la Cruz: A Critical Study

By Guillermo Schmidtuber

Traditionally, scholars have attributed only one complete play to Sor Juana, but in 1989, Guillermo Schmidtuber discovered a lost play, The Second Celestina, which he proved conclusively to be Sor Juana’s earliest comedia. This is the first study dedicated solely to her secular dramas and the first to confirm her authorship of three dramatic pieces. Translated by Shelby G. Thacker.

CONFERENCES

2001 Southern Region CUPA-HR Conference

April 1-4

The Southern Region of the College and University Professional Association for Human Resources, a national association of higher education human resource professionals, will convene its conference at the Richmond Omni Hotel, Richmond, Va.

Contact: Stewart Mixon, chair, (252) 328-4009; e-mail, mixons@mail.euc.edu.

HACU 2001 National Capitol Forum on Hispanic Higher Education

April 2-5

Leading Hispanic higher education advocates and college campus presidents from throughout the country will meet with key White House, congressional, government agency, corporate, and community leaders about legislation and policy issues of importance to the nation’s youngest and fastest-growing minority population. At Hotel Washington in Washington, D.C.

Contact: Acting Public Affairs Director Aileen Salinas at (202) 261-5080 ext. 3242; website, www.hacu.net.

Princeton University Spring 2001 Latin American Studies Events

April 3-May 3

The Program in Latin American Studies (PLAS) at Princeton University has 9 events scheduled in April and May to which faculty and graduate students based at colleges and universities in the greater New York-Philadelphia corridor are cordially invited to participate.

Contact: PLAS, (609) 258-4148; e-mail, plas@princeton.edu.

2001 Teleconference Series

April 5, 1:00-4:00 p.m. EST

The National Resource Center for the First-Year Experience & Students in Transition, in cooperation with Distance Education and Instructional Support at University of South

Contact: website, www.sc.edu/fye.

**Mexican American Opportunity Foundation National Conference**  
April 6-7

The MAOF holds its 24th National Hispanic Women’s Conference, one of the nation’s oldest and largest events recognizing Latina accomplishments. At the Regal Bilmore Hotel in Los Angeles.

Contact: (323) 890-9600.

**Center for the Study of Diversity in Teaching and Learning in Higher Education National Conference**  
April 18-21

“The Global Perspective: Teaching, Learning, and Student Equity” includes, among other conference highlights, concurrent sessions on critical thinking skills, curriculum, pedagogy, collaborative and interdisciplinary learning, and learning communities. At Hotel InterContinental, Miami.

Contact: Dr. Toni Forsyth, (408) 864-8309/8993; website, www.TeachLearn.FHDA.edu.

**AACRAO 2001 Annual Meeting**  
April 22-25

The 87th annual meeting of the American Association of Collegiate Registrars and Admissions Officers. At the Washington State Convention and Trade Center in Seattle, Wash.

**2001 Teleconference Series**  
April 26, 1:00-4:00 p.m. EST

The National Resource Center for the First-Year Experience & Students in Transition, in cooperation with Distance Education and Instructional Support at University of South Carolina, presents “Engaging Commuter Students: Redesigning Campuses for the Majority of America’s College Students.” Among the panelists is María Vallejo, provost/CEO, Palm Beach Community College (Fla.). Live and interactive via satellite.

Contact: website, www.sc.edu/fye.

**NILD Leaders 2001**  
Newport, R.I., April 29-May 3

Phoenix, Ariz., May 20-24

While the National Institute for Leadership Development, based upon a philosophy of inclusivity and diversity, is for women and men in community colleges, the Leaders 2001 programs are for women. The programs are sponsored by Phoenix College, Maricopa Community Colleges, and League for Innovation in the Community College.

Contact: NILD, (602) 223-4030; e-mail, nild@pcmial.maricopa.edu.

**Latino Book and Family Festival**  
May 12-13

The first Latino Book and Family Festival in New York will be held at the Jacob K. Javits Convention Center in Manhattan.

Contact: (760) 454-7474.

**3rd Annual Latino Education Conference**  
May 13-15

“Critical Issues Affecting Latino Educational Achievement in the 21st Century” is the theme of this year’s ASPIRA, Inc. of New Jersey conference. Confirmed keynote speakers include Carlos Hernández, president, New Jersey City University; Antonia Pantoja, founder, ASPIRA National Association; and Sara Martínez Tucker, president, Hispanic Scholarship Fund. At Bally’s Park Place Hotel and Casino, Atlantic City, N.J.

Contact: Carmen Torres, (973) 484-7554, or e-mail, cторres@nj.aspira.org; website, www.aspira.org.

**MALDEF Annual Fundraiser**  
May 16

The Mexican American Legal Defense and Educational Fund will host its annual fundraiser in Washington, D.C.

Contact: (202) 629-2512.

**NISOB 2001**  
May 27-30

The National Institute for Staff and Organizational Development, along with the Community College Leadership Program, present their 23rd annual international conference, “Making a World of Difference...” “a unique mix of professional development activities for a unique audience of outstanding community college administrators and faculty.” In Austin, Texas.

Contact: John Rouche and/or Suanne Rouche, (512) 471-7545.

**NMCI 16th Annual National Conference**  
May 31-June 3

The National Multicultural Institute’s 2001 theme is “Creating a National Agenda: Multicultural Partnerships for Change.” The major goals of this conference are to: (1) offer an opportunity for in-depth diversity training and skills-building; (2) focus on some of the unique issues that professionals face in working with a culturally diverse population; and (3) create a multicultural environment in which an open, cross-cultural dialogue can occur. At the Hyatt Regency Washington on Capitol Hill Hotel, Washington, D.C.

Contact: NMCI, (202) 737-1234 or (800) 233-1234; website, www.nmci.org.

**LULAC 72nd National Convention and Exposition**  
June 3-9

The League of United Latin American Citizens will hold its annual event at the Civic Plaza Convention Center in Phoenix, Ariz.

Contact: (202) 833-6135.

**Association of Jesuit Colleges and Universities 20th Annual Meeting**  
June 13-15

This 20th annual meeting/conference on multicultural affairs will be held at Saint Peter’s College in Jersey City, New Jersey.

Contact: Robert Perry, (201) 915-9288; e-mail, perry_rob@spc.edu.

**The Smithsonian Center for Latino Initiatives Workshop**  
June 18-29

The Smithsonian Center for Latino Initiatives will sponsor a ten-day workshop, “Interpreting Latino Cultures: Research and Museums” in Washington, D.C.

**HERS, Mid-America Summer Institute**  
June 24-July 20
The University of Denver’s HERS, Mid-America presents its 26th annual summer institute for women in higher education administration.

Contact: Betsy Metzger, (303) 871-6866; e-mail, bmetzger@du.edu.

Deaf Education Technology Conference
June 25-29

“Instructional Technology and Education of the Deaf: Supporting Learners, K-College,” the first symposium in seven years to present current research and state-of-the-art practice for educators of the deaf, will be hosted by the National Technical Institute for the Deaf. At Rochester Institute of Technology, Rochester, N.Y.

Contact: E William Clyne; (716) 475-6894 (v) or (716) 475-6704 (tty); e-mail, tech-sym@rit.edu; website, www.rit.edu/techsym.

AFT QuEST 2001 Conference
July 12-15

The American Federation of Teachers presents QuEST 2001, a conference on Quality Educational Standards in Teaching (QuEST), for Pre-K-12 teachers, school staff, and state and local education leaders, including from the higher education sector. At the Marriott Wardman Park Hotel in Washington, D.C.

2001 NACUBO Annual Meeting
July 28-31

The annual meeting of the National Association of College and University Business Officers. At the New York Hilton and Towers and at the Sheraton New York Hotel and Towers in New York City.

TeleLearning 2001
October 6-9

The International Telecommunications Council and The TeleLEARNING People will sponsor “TeleLearning 2001,” “the premier event in distance education and educational telecommunications.” At Hilton Hotel Costa Mesa, Costa Mesa, Calif.

INSTRUCTIONAL DESIGNER
CENTER FOR INSTRUCTIONAL MEDIA & TECHNOLOGY

THE RICHARD STOCKTON COLLEGE OF NEW JERSEY is seeking to fill the position for Instructional Designer within the Center for Instructional Media and Technology. This professional position involves applying all aspects of the instructional design process to course development. The instructional designer provides assistance and training to Richard Stockton College faculty members with instructional design for electronic course delivery. This position will have the opportunity to work with the Institute for the Study of College Teaching.

Two years professional experience in course development using emerging technologies preferably in higher education with a master’s degree in instructional design, or related field, or any equivalent combination of experience, education and training that provides the following knowledge, skills and abilities: Course development and project management; Proven ability to design, develop and implement instructional multimedia products in conjunction with individual faculty; Demonstrated ability to work collaboratively with others including strong communication, interpersonal and organizational skills; Thorough knowledge of learning theories; Ability to meet schedule commitments; Solid understanding of academic courseware: Proficiency in Microsoft Office, email, WebCT and html.

Richard Stockton College is an innovative, residential, liberal arts and sciences college with a student body of 5,000 located on 160-acre wooded campus in southern New Jersey, 15 miles from the Atlantic Ocean, one hour from Philadelphia and 2-1/2 hours from New York City. Stockton College has a national reputation for academic excellence and innovation. It is recognized by the Carnegie Foundation, US News and World Report and Kiplinger as a nationally ranked liberal arts institution.

Salary is based on qualifications and experience. Screening begins April 2, 2001 and will continue until position is filled. Send letter of application, resume and names, addresses and telephone/email addresses of at least three references to Mark Jackson, Director, Media Services & Distance Education, The Richard Stockton College of New Jersey, PO Box 195, AAS1, Pomona, NJ 08240-0195.

Stockton is an AA/EOE. Women and minorities are encouraged to apply. R013638

VICE PRESIDENT FOR BUSINESS AND FINANCE

THE UNIVERSITY OF NEW MEXICO

The University of New Mexico invites nominations and expressions of interest for the position of Vice President for Business & Finance. As the chief financial officer for the University, the Vice President provides leadership and direction to the institution’s business and support functions, and is a member of the President’s executive council. The Vice President oversees the Budget Office, Business Policies, Controller’s Office and other treasury functions (Payroll, General Accounting, Contracts and Grants, Cashiering, etc.), Dispute Resolution, Electronic Management, Endowment Management, Facility Planning, Human Resources, Physical Plant, Printing Services, Purchasing and Material Management, Real Estate, Risk Management (including Campus Safety), Department of Intercolligate Athletics and fiscal oversight of auxiliary enterprises. The Vice President ensures that business transactions and support services meet the university’s short- and long-term goals and objectives. The University of New Mexico is a Carnegie Doctoral-Research-Extensive University and one of only four that is also Hispanic-serving, and is the largest and most comprehensive of the state’s institutions of higher education. Founded in 1889, the University serves a diverse student population of nearly 31,000 on five campuses (approximately 24,250 at its Albuquerque main campus). The University enrolls approximately 5,200 graduate and professional students. It offers master’s degrees in 66 fields and doctorates in 38 fields in addition to the J.D. degree and M.D. degree. It hosts the state’s only schools of architecture and planning, law, medicine, and college of pharmacy, and is well poised to participate in the further development of the Rio Grande Research Corridor, in collaboration with the nearby national and federal laboratories and other research organizations in the region. The University operates on a budget of nearly $1 billion, of which $219 million is attributed to research and sponsored projects. The University of New Mexico is the fastest-growing university in federal research funding, based on a 1990-98 research and development expenditures, as reported by the National Science Foundation.

Minimum qualifications for the position include a Masters Degree in Business Administration, Management, or related field. More than ten years experience directly related to the duties and responsibilities specified. For a complete listing of the position description include the desired qualifications and application procedures you may access the job posting on UNM’s website at [http://www.unm.edu/unn/12595/0/01000000.html](http://www.unm.edu/unn/12595/0/01000000.html). You may also request a copy of the position announcement from Diane Gwinn, Search Coordinator, 107 Farris Engineering Center, UNM, Albuquerque, NM 87131, (505) 277-1412, dgwinn@unm.edu.

The University of New Mexico is an Equal Opportunity/Affirmative Action Employer/Educator.
Book Review

By Virginia Sánchez Korrol

For teachers, students, and general readers, this is a long-awaited book. Jiménez de Wagenheim’s interpretive history does much to satisfy the steadfast reader.

Incorporating an extensive synthesis of the literature in Spanish as well as in English, the author further imbues the text with her own meticulous research on 19th-century Puerto Rico. More often than not, she attempts to present the perspective of the colonized population, interspersed with cutting-edge research on gender, race, and class throughout the various periods covered in the volume. She ably situates Puerto Rico within the currents of Latin America, Europe, Africa, and the United States. Ending with the American occupation of Puerto Rico following the Spanish-Cuban-American War in 1898, this volume covers the historical periods up to 1900. A second volume documenting the 20th century is in progress.

The author makes informed decisions in organizing the text that are beneficial to novice readers and others unfamiliar with Puerto Rican history. The monograph is divided into ten chapters, five focused on the 19th century. Each is referenced and lists suggested readings pertinent to the period. A good selection of charts, maps, graphs, tables, and archival photographs of past centuries provides illustrative aids. The photographs chosen to highlight diverse aspects of colonial life are especially appealing, though the headers are often too small.

Another student-friendly feature, the opening chapter, offers a present-day discussion of the land, geography, topography, waterways, and natural resources. Puerto Rico includes several offshore islands, one of which, Vieques, is currently and controversially a military bombing site for U.S. Marine and Naval trainees. Situating the island in the present allows the instructor to explore, albeit briefly, the complex political relationship between Puerto Rico and the United States, the meaning of American citizenship as it applies to Puerto Ricans, and the reasons for creating diasporic, transnational communities. For my students, such discussions set the stage for learning about the past to better understand the present.

That past is introduced through the islands’ Amerindian inhabitants, the Archaics, Igneri, Ostionoid, and, later, the Taino, who are fleshed out in greatest detail. On the eve of the Spanish conquest, Tainos had developed a sophisticated, socially stratified civilization that spread beyond Puerto Rico into the Dominican Republic and Cuba. A matrilineal society structured on the advanced cultivation of yucca, the Taino were engaged in ongoing warfare with the Caribes, who steadily encroached on island strongholds from their encampments in the Lesser Antilles.

But the book is far more than a re-telling of the Amerindian experience. The author delves into four centuries of political, economic, and socio-cultural development in Puerto Rico within the Spanish imperial system. Crown policies, including relaxation of trade regulations or other aspects of the Bourbon Reforms, are tested in Puerto Rico before implementation in the Viceroyalties of New Spain and New Granada. Administrative redistricting, or controlled immigration, such as that of the Canary Islanders, resonates with policies practiced in Texas and other frontier settlements. Throughout, the author conveys the more traditional interpretations of political and economic evolution along with the maturation of a vibrant, resilient Puerto Rican society that survives and thrives against great odds.

The sections on women explore their very active contributions to education, emancipation, revolution, and organization in the 18th and 19th centuries, despite the juridical, social, or moral restrictions placed on females in the Spanish American world. Distinctions between rural and urban settings clarify the significance of class and race, wealth, power, and poverty in colonial society. The dynamics between the ruling Spanish elite and the emerging island-born Criollos provide the groundwork for understanding the 19th-century conflicts. The author provides the multi-layered analysis necessary for understanding the uniqueness of Puerto Rican society, as well as its points of convergence, within a world and hemispheric context.

By the end of the 19th century, Puerto Rico has undergone vast transformations. Inhabited by close to one million, the creation of towns and cities proliferates. Transportation and communication are improved. Modernization of land holdings, including mechanization, wage, labor and workers’ organizations, is well under way. The island’s economic base shows promise as Puerto Rican coffee and sugar are exported to global markets. But on July 25, 1898, the United States invades and occupies Puerto Rico. Following two years of a military government, Puerto Rico becomes a colony to a new master and a new social order, opening a chapter of island history that continues to the present.

Virginia Sánchez Korrol is author of From Colonia to Community: The History of Puerto Ricans in New York City, and co-author with Marysa Navarro of Women in Latin America and the Caribbean. She is professor and chair of the Department of Puerto Rican and Latino Studies at Brooklyn College, CUNY.
THE NATIONAL ACADEMIES
Advisors to the Nation on Science, Engineering, and Medicine

NATIONAL RESEARCH COUNCIL
Postdoctoral Research Awards • Senior Research Awards
Opportunities for research in:
Chemistry • Physics • Life & Medical Sciences
Space & Planetary Sciences • Earth & Atmospheric Sciences
Engineering, Mathematics & Applied Sciences
Also teaching/research opportunities at the US Military Academy in
Mathematics, Physics & Mechanical Engineering

• 300 awards for independent research at over 120 laboratories
representing nearly all US Government agencies with research facilities
• 12-month awards renewable for up to 3 years maximum
• Annual stipend for recent PhD or MD graduates $34,000 to $55,000 depending
upon sponsoring laboratory; stipend appropriately higher for senior researchers
• Support for relocation and professional travel; health insurance program offered
• 3 annual award competitions for most participating laboratories

Application postmark deadlines are January 15, April 15 and August 15.
Further information and application materials may be obtained from our web site at

Director of Institutional Research

The College of Wooster seeks to appoint a Director of Institutional Research. The Director will have
responsibilities to: collect, organize, analyze and interpret institutional data for purposes of decision-making,
planning, and evaluation of programs and activities; develop and manage databases useful to institutional
management and longitudinal analysis; publish an annual Fact Book, both in printed and Web versions;
respond to surveys as well as other internal and external requests for data and information; design and
undertake special research projects; prepare and edit reports; and assist faculty in preparing institutional data
for grant proposals.

These duties will relate particularly to the offices of Admission, Finance & Business, Financial Aid,
Development, and Registrar and will also provide support to efforts in marketing, assessment, and retention.
The Director will report to the President.

Requirements: B.A. or B.S., with M.A. or M.S. preferred, in a related field such as mathematics, statistics,
computer science/computer information systems, applied science/social science with quantitative analysis.
Three years experience (or the equivalent) in managing higher education data and information. Also:
experience with computer information systems and software such as Word, Excel, Filemaker, SAS or SPSS,
UNIX, HTML; demonstrated competence in survey and research design; skills in written and oral
communication, particularly the presentation of technical and highly quantitative information; professional
integrity regarding confidentiality of information; effective interpersonal skills; and ability to handle detail and
the pressure of multiple priorities.

Applications received prior to April 1, 2001 will receive full consideration. Submit applications to:
Office of the Secretary
The College of Wooster
Wooster, OH 44691-2363

1149 03/26/2001 0 HISPANIC OUTLOOK 57
2001 URBAN EDUCATION RESEARCH FELLOWS PROGRAM
LOS ANGELES UNIFIED SCHOOL DISTRICT

LAUSD, the nation's second largest school district, announces a program to develop urban education research professionals. LAUSD's Program Evaluation and Research Branch will accept up to two candidates per year to a program that provides both professional development and financial support to graduate students at universities in the Los Angeles area.

Graduate Student Fellowship. Selected student-researchers will receive the following: Full tuition reimbursement; half-time employment with a professional-level salary; training in research and evaluation methods; research and evaluation experience; and post-graduation employment for a minimum of three years. Fellowships begin in September 2001.

Qualifications. Candidates must meet the following criteria: Enrollment in a research-focused graduate program in education, the social sciences, or human development at a regionally accredited university; completion of at least one graduate course or two undergraduate courses in educational research methods, social research methods, and/or program evaluation coursework, data projects, and/or experiences providing evidence of a commitment to education in urban settings; ability to represent the perspectives and experiences of urban residents; and ability to represent the perspectives and experiences of one or more historically underrepresented populations. Applications are due on April 15, 2001.

American Association of State Colleges and Universities

Millennium Leadership Initiative (MLI)
Preparing the Next Generation of Presidents and Chancellors

The American Association of State Colleges and Universities is accepting applications for its MLI Institute on intensive hands-on leadership program designed to strengthen the preparation and eligibility of persons who are traditionally underrepresented in higher education leadership for the position of college or university president/chancellor.

Eligibility-Senior and mid-level administrators in the education, government or private sector who have demonstrated the willingness and potential to provide presidential and presidential-level leadership in higher education. Candidates should be at the dean's level of above (or have equivalent experience within or outside the academic community) and must be nominated by their chief executive officer.

Institute-August 10-14, 2001 in Washington, D.C. Experts will teach participants how to interview successfully, develop media and political savvy, negotiate a contract, and approach critical issues in higher education. Participants will write professional development plans, assemble a portfolio and continue professional development through a year-long mentoring program.

Registration-$1,500 AASCU member and $2,100 nonmember. Includes registration fee, institute program, curriculum materials, meals (except one dinner) and lodging. Participants assume transportation costs.

Applications-Completed applications with nominations by CEO must be submitted to AASCU by April 16, 2001. Application materials have been mailed to all AASCU member presidents. Application form available on AASCU's web site www.aascu.org or contact: Danita Young, 1307 New York Avenue, 5th Floor, NW, Washington, DC 20005-4781; phone 202-478-4677 or youngd@aascu.org.

Buffalo State
State University of New York

Assistant/Associate Professor
Educational Leadership and Facilitation Program (Administration)

Buffalo State is seeking candidates for a tenure-track assistant/associate professor in the Educational Leadership and Facilitation Program, to begin fall 2001. Salary is competitive. Teach postgraduate courses in site-based leadership (also known as "principalship") and school-community relations, supervise interns, advise students; provide service to department, college, community, and profession; engage in research.

Required Qualifications: Ph.D. or Ed.D. in educational leadership (and/or administration) or comparable discipline, with specialized academic or experiential qualifications in principalship and school-community relations; successful teaching and principalship experience in K-12 schools; established (or potential to establish) scholarly research agenda in educational leadership, including collaborative applied professional research endeavors with regional schools and school districts; familiarity with instructional technology; capability in teaching graduate courses through a variety of distance delivery modalities.

Preferred Qualifications: Experience as an administrator in a unionized educational environment; successful college/university teaching experience at the postgraduate level.

To apply: Submit letter of application addressing each of the required and preferred qualifications, résumé or CV, and contact information for five references to: Peter Loehr, Ph.D., Search Chair, Bacon Hall 302, Buffalo State College, 1300 Elmwood Ave., Buffalo, NY 14222. Review of applications will continue until the position is filled. For more information about the college, visit www.buffalostate.edu.

Buffalo State is the largest four-year comprehensive college in the State University of New York (SUNY) system. The campus is located in the museum district of Buffalo, the second largest city in New York State. The area offers a variety of cultural and recreational activities.

Buffalo State is an affirmative action/equal opportunity employer and encourages applications from women, racial/ethnic minorities, persons with disabilities, and Vietnam-era veterans.

University of South Florida

Founded in 1956 as the first U.S. university to be created wholly in the 20th century, the University of South Florida is now the largest metropolitan university in the Southeastern United States, with a student body of nearly 35,500 spread across four campuses. The rich, multicultural atmosphere of the university is evident not only on the main Tampa campus, but at its branches in St. Petersburg, Sarasota-Manatee, New College, and Lakeland. USF promotes delivery systems, curricula, programs and activities that reflect the diversity of South Florida.

More than twenty-three percent of the student population is African American, Hispanic, Asian American, Native American or other nationality. Students come from every state and more than 100 foreign countries.

The university is currently recruiting for the following faculty positions:

Position Title

| Provost & Vice President-Dean |
| Associate Dean for Research-Instructional Specialist (2 positions)-Associate Professor/Professor-Assistant Professor (2 positions)-Research Associate (Clinical Veterinary) -Associate Dean |

National Service Fellowship Opportunity

The Corporation for National Service (CNS) plans to support up to 12 ten-month National Service Fellowships (NSF) starting September of 2001. Full-time ($26,500) and part-time ($13,250) Fellowships are available. We will accept proposals on topics relevant to CNS programs/operations and the national service field. To qualify, you must be a U.S. citizen or a permanent resident alien. For a copy of the Request for Proposal, to be issued around 3/2001: (1) Download it from our website www.nationalservice.org (2) E-mail fellowships@cns.gov; or (3) Write to NSF Program, c/o Deena Johnson, CNS, 1201 New York Avenue, NW, #9100-A, Washington, DC 20525.
DIRECTOR
WOMEN'S EDUCATIONAL CENTER

The Director of the newly established Women’s Educational Center will provide leadership and advocacy in the development of programs, services, and research that address the needs, interests, and concerns of women on the University of Michigan-Flint campus. The director will oversee the operation of the Center and will be responsible for ensuring its growth and development as a resource and referral center for women. The director will work directly with women students, staff, and faculty to meet their needs and address their concerns. The director will work closely with academic and student development departments, especially the Women’s and Gender Studies Program, counseling services, and the planned Early Childhood Development Center, to enhance the campus climate for women.

Requirements: Master’s degree or an equivalent combination of education and relevant experience; evidence of success; and a commitment to diversity.

Qualifications: Bachelor’s degree; at least two years of experience in admission or related field; strong leadership and organizational skills; demonstrated interest in community engagement; ability to work effectively in a fast-paced environment; and a commitment to diversity. A salary range of $65,000 to $75,000 is expected.

Application deadline: A review of applications will begin immediately and continue until the positions are filled. EOE/AA/SAE/ADA Employer.

SMITH COLLEGE

SMITH COLLEGE, the largest private women’s college in the U.S., seeks two energetic and experienced admission professionals.

Assistant Director of Admission

The Assistant Director is responsible for recruitment and evaluation of prospective students. Responsibilities include: reviewing regional travel including eight weeks of travel to recruit high school students and meet with alumnae; interviewing; program planning; could also include supervision of student volunteers and assisting with multicultural recruitment. Qualifications: Bachelor’s degree; minimum of two years experience in admission or related field, or an equivalent combination of education and relevant experience; bilingual (English/Spanish desirable); demonstrated organizational and interpersonal skills; excellent oral and written communication skills; valid driver’s license; good humor and grace under pressure appreciated. The ability to articulate the values of the selective liberal arts college to prospective students, parents and secondary school personnel is important. Starting salary for this full-time position is competitive and includes a comprehensive benefits package.

Admission Counselor

The Admission Counselor is responsible for assisting the associate director for multicultural recruitment with all aspects related to the recruitment of students of color. Responsibilities include: conduct recruitment travel for approximately eight weeks; read and evaluate admission applications; conduct interviews and group information sessions; work on special projects; and assist with on-campus programming. Qualifications: Bachelor’s degree; demonstrated organizational and interpersonal skills; excellent oral and written communication skills; understanding and commitment to the value of a liberal arts education in a residential college setting; commitment to diversity; and the ability to work effectively with the many constituencies in a college environment. A valid driver’s license is required. Must be able to travel extensively and work weekends and evenings as needed. The salary for this two-year appointment is competitive and includes a comprehensive benefits package.

Review of applications will begin immediately and continue until the positions are filled. Forward a letter of application indicating position of interest: resume and the names and phone numbers of three professional references to:

Search Committee, Office of Admission, Smith College
Box 395, 7 College Lane, Northampton, MA 01063

Smith College is an equal opportunity employer encouraging excellence through diversity.

1155 03/26/2001 63
MECHANICAL ENGINEERING PROFESSOR

Tenure System, 9-month basis, 100% time.

DUTIES:
The Department has available a senior faculty position in the broad area of manufacturing, with an emphasis on science-based modeling of manufacturing processes. The position is one of leadership, requiring an individual who has a clear vision of research development prospects, as well as the skills and desire to involve others in realizing the vision. A strong set of junior faculty members forms a collegial base. Excellent collaborative opportunities exist with the Composite Materials and Structures Center, the Micrometeorology Engineering Center, and the Manufacturing Research Consortium, all in the College of Engineering. The College also has a long record of collaboration with faculty members in the Colleges of Natural Science and Business. Focused development of manufacturing research activities and the building of a strong graduate program in manufacturing are college priorities. The successful candidate will be expected to teach at both the undergraduate and graduate levels and to lead a successful research program. Teaching responsibilities will be commensurate with other demands.

QUALIFICATIONS:
Must have an earned doctorate and a strong record of manufacturing research. Industrial experience will be given favorable consideration.

APPLICATIONS:
Due August 31, 2001. Late submissions will be considered if a suitable candidate pool has not been identified by the deadline. Send a letter summarizing your qualifications, a vita, and the names of three references to the Chairperson, Manufacturing Search Committee, Department of Mechanical Engineering, Engineering Building 2555, Michigan State University, East Lansing, MI, 48824-1226.

ASSOCIATE DIRECTOR, RESIDENCE LIFE

California State Polytechnic University, Pomona invites applications for the position of Associate Director, Residence Life. Cal Poly Pomona, noted for its scenic 1,400-acre campus, is located 30 miles east of downtown Los Angeles and is part of one of the most dynamic economic and cultural regions in the country.

This position is responsible for the development of services and programs, which produce a residential experience that ensures the quality of life, well being, and personal development of up to 1,400 diverse students. The incumbent will work closely with the Director in managing a $1 million operating budget for the residence life units; establishing policies and procedures in the residence halls; developing and planning both long and short range student housing programs and services; advising and facilitating the resident student government; coordinating the safety and security of residents; and working with other campus offices to provide support services to residents.

Master’s degree in counseling, student development/personnel, educational leadership, higher education or related field AND five years of progressively responsible experience in student housing, residential life, judicial affairs, student life/activities, multicultural education, or counseling. Ability to demonstrate successful examples of work in multicultural education, partnerships with faculty, student conduct, and/or first year leadership programs desired.

The annual starting salary is $58,000 to $65,000 and will be negotiated depending on qualifications. The position is open until filled. First consideration will be given to complete application packages received no later than April 9, 2001. Early response is encouraged.

For information, visit our website at https://www.cppomona.edu/hr or call (909) 869-3733 for application materials or visit Human Resource Services, California Polytechnic University, CLA Building 98, Room B1-20, 3801 W. Temple Avenue, Pomona, CA 91768. If applying on-line, please refer to job #029-SA-01.

VICE PROVOST FOR STUDENT AFFAIRS

Position: The Vice Provost is the senior student affairs officer of the University, with primary responsibility for enrollment management and support for student success. The Division of Student Affairs includes the offices of Admissions and Records, Career Services, Counseling and Psychological Services, Educational Equity Programs and Services, Financial Aid, Information and Academic Support Center, Student Development, Office of Student Affairs, and Student Health Services.

The successful candidate will demonstrate the following: ability to conceptualize, articulate, and implement a student affairs vision for PSU; effective organizational and managerial skills - planning, goal setting, assessment, financial and personnel management; implementation of user-friendly voice and on-line technologies for enrollment and advising; strong academic orientation that will be credited to the faculty; commitment to quality educational experiences and services for a diverse urban student population; record of building an inclusive, multicultural community; ability to interpret and analyze data, and to use data to inform decisions; strong written and oral communication skills.

Candidates should have a minimum of five years of progressively responsible university experience in the management of enrollment services, academic and/or student support services, student life programs, or related areas and a Master’s degree. An earned doctorate is preferred. The position is available beginning July 1, 2001. Applications must include a letter addressing candidate interest, qualifications, key experience and administrative qualities, a curriculum vitae, and names, complete address and contact information of five professional references. Screening of applications will begin on April 1, 2001, and continue until the position is filled. Portland State University is an Affirmative Action/Equal Opportunity institution. Applications and letters of nomination should be sent to:

Dr. Terrel L. Rhodes

Clemson University

POSITION ANNOUNCEMENT
ASSISTANT/ASSOCIATE OF COUNSELING AND EDUCATIONAL LEADERSHIP

Clemson University’s School of Education invites nominations and applications for a tenure track faculty position at the assistant or associate professor level beginning in August 2001.

The Educational Leadership area offers the M.Ed., Ed.S., and Ph.D. degrees, as well as administrative certification programs for the State of South Carolina. There are two areas in Educational Leadership: K-12 administration and Higher Education administration. The Counseling program has four concentrations: community counseling, elementary and secondary school counseling, student affairs administration, and student affairs counseling. The Counseling Program is CACREP approved.

Responsibilities Include:
- Graduate teaching in K-16 administration and Counseling;
- Participation on master’s and doctoral committees;
- Collaboration with educational organizations; maintaining an active research agenda; and service to professional associations and related community organizations.

Minimum Qualifications:
- Doctorate in education administration with a counseling cognate or related field of study from a regionally accredited institution;
- Competency in educational technology, alternative delivery, or distributive learning;
- Demonstrated commitment to multicultural education;
- Interest and potential to conduct research and grant writing in the above areas;
- Leadership and experience in K-16 administration (central office, department chair, director, or relevant other);
- Demonstrated ability to teach graduate courses in K-16 administration and counseling;
- Demonstrated ability to advise master’s and doctoral students and serve on dissertation committees.

Salary is competitive and commensurate with experience and qualifications.

Applications should include:
- A letter of application that includes a statement of teaching and research interests;
- A curriculum vitae;
- A name, address, and telephone numbers of three references.

For more information, please contact Dr. Watson at 864.656.5115 or lemuw@clemson.edu

The Government Department of Colby College seeks applications from recent PhDs or advanced ABDs for a one-year appointment as a Faculty Fellow in American Government, beginning September 2001. The successful applicant will teach four courses including, either minority Group Politics or Religion and American Politics. He or she will participate in the introduction to American Politics course and offer two upper level courses of her or his choosing.

Applications including a curriculum vitae, any teaching evaluations, and three letters of recommendation should be sent to: Professor L. Sandy Maisel, Chair, Faculty Fellow Search Committee, Department of Government, Colby College, Waterville, ME 04901.

Review of applications will begin immediately and continue until the position is filled. Colby College is an Equal Opportunity/Affirmative Action employer. Applications and nominations of women and minorities who would enrich the diversity of the campus community are strongly encouraged. For more information about the College, please visit the Colby web site: www.colby.edu
Financial Vice President
& Treasurer

COLGATE UNIVERSITY
Hamilton, New York

Located in the Village of Hamilton in the Leatherstocking region of upstate New York, Colgate is a highly selective, coeducational, residential, liberal arts college of 2,700 undergraduates with a small graduate program. Colgate’s financial position is strong, its campus is widely regarded as one of the most beautiful in the nation, and the College is widely considered among the top twenty liberal arts colleges in the country. Academic, cultural, and working relationships at Colgate are easy and informal elements of “the Colgate spirit” that has continued through generations of alumni, faculty, students, and staff.

The Financial Vice President & Treasurer of the University is a member of Colgate’s senior administration, reporting directly to the President and serving as an elected officer of the Board of Trustees. The Financial Vice President is responsible for financial planning and management including budgeting, decision support, investments, capital project finance, accounting and control, risk management, and student financial aid. The operating budget for 2006-07 is $100 million and the current value of the endowment is $450 million.

The position requires knowledge of the broad issues of higher education and the goals of liberal learning; demonstrated experience in financial planning and management; and investment strategy and debt financing; superior administrative and organizational skills; open and collaborative style of leadership; strong decision-making skills; and excellent communication skills. Applicants must have a minimum of eight to ten years of management experience in a similar environment and an MBA or other relevant professional degree.

Applicants should submit a statement of interest describing their qualifications, institutional vitae, and three references. Letters of nomination or application may be submitted, in confidence, to:

Financial Vice President & Treasurer
Colgate University
Attn: Judith Auerbach or Nicholas Brill
C/O Auerbach Associates
65 Franklin Street Suite 400
Boston MA 02110

or Nick@Auerbach-Assoc.com

Additional information about Colgate is available at the University’s website, http://www.colgate.edu.

Colgate University is an Affirmative Action/Equal Opportunity Employer. Developing and maintaining a diverse faculty and staff furthers the University’s educational mission.

Colgate does not discriminate against any applicant on the basis of race, color, religion, sex, sexual orientation, age, national origin, veteran or disability status. The University encourages minorities, women, and disabled veterans to apply.
George Mason University
GMU FOUNDATION
UNIVERSITY DEVELOPMENT SYSTEMS

Director of Development Systems

The Director of Development Systems manages the comprehensive, central database for the George Mason Community that includes alumni, donors, and friends. Reporting to the Foundation President/VP of Development and Alumni Affairs, the director is responsible for providing support for all aspects of the Alumni/Development/Foundation information system. The director will manage a technical staff, a gift processing staff, and computing equipment to provide an uninterrupted computing service to fund-raising, foundation and alumni affairs staff. The director will also plan and administer the budget related to the development system and computing support. The director is a member of the senior management team, with responsibility for strategic planning and coordination of information systems within the department projects.

Minimum Requirements: a Bachelor’s degree, preferably an advanced degree in information technology, or equivalent experience; minimum of five years of experience in a leadership position; demonstrated ability to manage and coordinate multiple staff and staff functions; ability to manage complex databases and plan budget; have a knowledge of fund-raising and outreach programs; and ability to multi-task and communicate clearly. Experience in a university setting is desired. For more information on the Foundation, Development Office, and Alumni Affairs, visit http://www.gmu.edu.

Review of applications will begin March 16, 2001, and continue until the position is filled. Interested candidates, please send your application to:

University of Idaho
DEAN
COLLEGE OF ART AND ARCHITECTURE

The University of Idaho (UI) is a comprehensive, doctoral/research-extensive, land-grant institution founded in 1889. Through its ten colleges, the University offers a wide range of undergraduate programs and graduate education and research. There are 9,000 undergraduate students and 4,200 graduate and professional students. For further information, please visit the UI website at www.uidaho.edu.

The Dean reports to the Provost and is the chief academic and executive officer of the College. He/She will supervise three department chairs (art, architecture, landscape architecture), an administrative staff of eight, and a $2.6 million annual operating budget. Candidates should have a record of teaching, research, professional accomplishment, and service commensurate with the faculty rank of tenure full professor in one of the College’s departments. Ideally, they should have a strong record of effective academic administrative experience with demonstrated understanding of systems, administration, strategic planning, effective fiscal management, and personnel supervision. Candidates with leadership experience in the design professions will also be considered. Public speaking skills, strong interpersonal and communication skills, and the potential for, or experience with, grant writing and fund development are essential. Ideally, candidates will have experience with educational program review and accreditation, as well as experience in student recruitment, retention, marketing, and promotion. A terminal degree in one of the disciplines of the College, or a closely related field, is required. Salary DOEEAA. For the complete position description, see www.morrisberger.com. Send resume and cover letter to:

Morris & Berger
201 S. Lake Ave., Ste.700
Pasadena, CA 91101
Fax or E-mail: (626)795-6330, mb@morrisberger.com

COLUMBIA
PROVOST/VICE PRESIDENT

Columbia College is accepting applications and nominations for a Provost/Vice President for Academic Affairs. Screening for this position will begin immediately and continue until the position is filled.

The Provost/Vice President for Academic Affairs works closely with the President and the College’s other Vice Presidents to develop and maintain quality teaching and research at the undergraduate and graduate levels. Additionally, the selected individual will be prepared to work towards excellence in all aspects of the academic program and the enhancement of our commitment to social responsibility, in order to realize our objective of recognition as the best arts and media college in the country. The Provost serves as the chief policy, personnel and budget officer for academic affairs. A terminal degree, substantial experience in college level teaching and a distinguished background in the arts, media, or liberal arts is required. Qualified candidate will have demonstrated success in motivating and directing a high quality academic program. Experience in educational leadership and management, strategic planning, complex fiscal planning and fundraising is needed. Additionally, the successful candidate will possess a commitment to the educational mission of the College.

We offer a competitive salary and excellent benefits package. Minority and Women applicants are especially encouraged to apply. Nominations, letters of interest and resumes are assured confidentiality. Applications and nominations should be addressed to Columbia’s retained search consultants as indicated below.

**HISPANIC OUTLOOK**

**UNIVERSITY OF MARYLAND**

**DIRECTOR**

Networking and Telecommunications Services Operations
Office of Information Technology

**UNIVERSITY OF MARYLAND**

The Director of Operations for Networking and Telecommunications Services (NTS) is responsible for leadership, vision, planning, and operations for networking and telecommunications for the University. The Director provides strategic direction for planning, implementation and operations of all communications (voice, data, video) services and equipment. By employing technical and administrative expertise, the Director oversees all operational activities of NTS; develops policies and procedures; serves as liaison with service providers; formulates and manages budgets; and maintains overall responsibility for 24 x 7 uninterrupted operations of communications systems; administers service provisioning and manages project management for projects of a complex or sensitive nature. The Director provides guidance for ensuring that reliable, efficient and quality networking and telecommunications services are provided for the university and its associated regional and national networks.

The successful applicant will have seven years of progressively responsible experience in the leadership and administration of major technology/service units within a university environment, a thorough knowledge of planning, operation, and management within a public sector organization, experience in customer service and the management of self-support and revenue generation budgets, and strong interpersonal skills. The successful applicant will also have demonstrated successful experience in leading and managing networking and telecommunications units; managerial skill in planning, organizing, evaluating, and delegating; a vision for the oversight of major technology/service units; demonstrated successful experience in managing unit and departmental budgets; ability to communicate effectively with all levels of staff; ability to lead, manage, and motivate workforce as well as to develop staff capabilities; technical competency in the areas of networking and telecommunications operations; ability to work collaboratively with faculty, researchers, technical staff, and administrators as well as constituents outside of the university; ability to represent the university at local, state, regional, and national forums.

A Bachelor's Degree is required for this position, and a Master's Degree is preferred. Preferred areas of concentration include engineering, administration, and technology management. Salary for this position is commensurate with experience. This position is open until filled; submit resume and three professional references to: NTS Director of Operations Search Committee, c/o Michelle Solter Evers, Office of Information Technology, Patuxent Building, University of Maryland, College Park, MD 20742-4911.
GALLAUDET UNIVERSITY

DEPARTMENT OF EDUCATION

Position Announcement

FACULTY POSITION(S)

The successful candidate for a faculty position in the Department of Education at Gallaudet University must demonstrate excellence in teaching with experience in elementary or secondary school classrooms. In addition to excellence in teaching, the successful candidate must demonstrate strong potential for scholarship and program leadership. The Department of Education is a world leader in the area of Deaf Education, providing its students the best in regular and deaf education in its NCATE-accredited and NASDTEC-approved teacher education programs. Department members are active locally, nationally, and internationally in scholarship and service to the field.

The Department of Education is seeking new faculty with a commitment to excellence, imagination and collaboration. The department seeks diversity in background and experience. Department faculty engage in a reflective model of teaching and are committed to continuously improving the teacher education program through collaborative relationships with school partners. New faculty are provided support to engage in scholarship and service to the field in addition to participating in program development, teaching, and mentoring students.

The Department of Education at Gallaudet University has both regular education (undergraduate programs) and deaf education (masters and doctoral programs). All students are expected to graduate with strong backgrounds in regular education subject matter and pedagogy as well as knowledge and skills in deaf education. The Department of Education is committed to excellence in communication and strongly supports students' rights to clear visual communication. Faculty are expected to be effective communicators and demonstrate competence in sign language before promotion or tenure. Candidates with strong backgrounds in deaf education and/or regular education are encouraged to apply.

Candidate's specialization areas may include:

- Deaf Education:
  Early Childhood Education, Elementary, Secondary, and Multiple Disabilities

- General Education:
  Math, English, Social Studies, and Science Education, Literacy, Instructional Technology

Qualifications:

1. Demonstrated excellence in elementary or secondary classroom teaching: 3 or more years.
2. An earned doctorate in Education, Deaf Education or related field. (Exceptional candidates who are nearing completion of the degree will be considered)
3. Experience working with new teachers in practical or mentoring relationships.
4. Demonstrated knowledge and skills in pedagogy and content relevant to the candidate's specialization.
5. Demonstrated excellence in visual communication and sign language (strongly desired).
6. Demonstrated potential for excellence in scholarship, program leadership, and service to the field.
7. Demonstrated excellence in interpersonal skills and faculty/student/school collaboration.

Responsibilities:

1. Teach courses in regular and/or deaf education.
2. Supervise students in practice.
3. Provide academic advisement and professional mentoring.
4. Work collaboratively with school partners.
5. Engage in scholarship, including research and program development.
6. Participate in Department and University faculty activities.

Rank and Salary:

Commensurate with experience.
(1 tenure track position; 1 one-year renewable position).

Starting Date: August 14, 2001.

Application Deadline: April 1, 2001

Application Procedure:

Send letter of interest and vita/resume.

Gallaudet University is an Equal Opportunity Employer/Education Institution. Programs and services offered by Gallaudet University receive substantial financial support from the United States Department of Education.
The School of Social Work is interested in developing a pool of potential instructors with excellent practice experience who enjoy teaching M.S.W. students. Practitioners who wish to diversify their experience, enjoy mentoring and teaching students, like to be energized by academic interactions, and want to be affiliated with The University of Michigan School of Social Work may find this to be an attractive opportunity. The School of Social Work offers a rich curriculum with a wide variety of courses.

In recent years, the School of Social Work has been hiring part-time adjunct faculty to teach in the School. These adjunct faculty teach across the curriculum - foundation, interpersonal practice and macro practice, aging, children and youth, community and social systems, health, mental health filling in for faculty on sabbaticals, with administrative appointments or with major research responsibilities. Adjunct faculty in the School are appointed on a term-by-term basis and compensated at a fixed rate. These temporary appointments are made each term by the Associate Dean in consultation with the School’s Adjunct Advisory Committee.

You may learn more about the School and the course offerings by visiting our Web site: www.ssw.umich.edu.

If you are interested in being considered for an Adjunct Instructor position in the School of Social Work, please send your curriculum vitae, a statement of teaching interest and teaching background, if any, and the names of three references to:

Dr. Sri Jayaratne, Associate Dean
School of Social Work Building
1080 South University
Ann Arbor, MI 48109-1106

Your name will be kept on file and you will be contacted by the Associate Dean depending on the needs of the School.

The University of Michigan is a Non-Discriminatory, Affirmative Action Employer.

NEW YORK CITY TECHNICAL COLLEGE
The City University of New York

California State University, San Bernardino
Associate Vice President for Student Affairs/Enrollment Management

California State University, San Bernardino is a public 4-year comprehensive institution located approximately 60 miles east of Los Angeles. Founded in 1965, CSUSB offers both bachelor's and master's degrees and serves over 15,000 students. An expanding curriculum, new facilities, and increasing enrollment characterize this innovative institution.

The Position
Reporting to the Vice President for Student Services, the Associate Vice President will be responsible for developing and implementing strategic recruitment strategies and enrollment management models, as well as general enrollment management functions that include oversight of Admissions and Recruitment, Records, Registration, Evaluations, Financial Aid, International Student Services, and Upward Bound. Additional responsibilities include the identification of preferred university student enrollment profiles, analysis of student recruitment markets, assessing recruitment programs, training and supervising staff, collaborating with faculty and other administrative divisions, maintaining accurate and thorough reports, and managing the unit’s budget. The Associate Vice President will serve as the place of the Vice President for Student Affairs when appropriate.

Qualifications
The successful candidate will possess a bachelor’s degree, master’s degree preferred, with at least five years of progressively responsible admissions experience. A proven track record of success in managing a complex admissions operation, excellent supervisory and leadership skills, and understanding of diversity and the non-traditional student will be strong factors in the selection of the Associate Vice President.

Application and Nomination
Review of applications will begin on April 9, 2001 and will continue until the position is filled. Nominations of individuals for this position may be made to The Spelman & Johnson Group as indicated below. A resume, with an accompanying cover letter, may be submitted by email attachment to mail@spelmanandjohnson.com or online at www.spelmanandjohnson.com. If you are unable to submit materials electronically, please mail a resume and cover letter to:

The University of Wisconsin-Madison is an Equal Opportunity/Affirmative Action Employer.

DEAN OF THE SCHOOL OF BUSINESS
The University of Wisconsin-Madison invites nominations and applications for the position of dean of the School of Business. Founded in 1846, the university is located in the heart of Money Magazine’s “Best Places to Live in America.” It is one of the nation’s top ranked research universities, and is home to many highly ranked academic units including its School of Business.
The dean of the School of Business serves as the chief academic and executive officer of the school with responsibility for faculty and staff development, personnel oversight, budget planning and management, curriculum, student academic affairs, and fund raising. The school, with a budget of $34 million, is comprised of approximately 80 tenured and tenure track faculty, 70 professional staff, 55 service staff, 1300 undergraduate students, and 550 graduate students. It offers very highly regarded undergraduate, master’s and doctoral degrees in the major fields of business, as well as executive and executive education programs. The school features: modern, state-of-the-art facilities in its building Grainger Hall; and its new Flomo Center for Executive Education; a substantial endowed; nationally recognized niche programs in areas such as supply chain management, security analysis, real estate, insurance, and actuarial science; a tradition of strong alumni support; and many strategic partnerships with business; and with departments across campus including engineering, economics, international studies, law, mathematics, and statistics. More comprehensive information about the school and the university can be found at these websites:
https://wiscinfo.delt.wisc.edu/bschool/ and http://www.wisc.edu

Major qualifications for this position include: a record of successful visionary leadership, strong management, communication and fund raising skills; the capacity to relate effectively to faculty, staff, students and external constituencies; a demonstrated commitment to advance learning, research, public service, and diversity; an understanding and appreciation of the diverse missions and constituencies of a major public research university with a tradition of shared governance; the ability to represent the school and university effectively in educational, governmental, business, alumni, and public forums; and nationally recognized accomplishments that meet the standards for a tenured appointment at the rank of full professor at the University of Wisconsin-Madison.

Applications and nominations should be received by 30 April 2001 to ensure consideration. Later applications and nominations may also be considered. The committee particularly encourages applications and nominations of individuals from underrepresented groups. Applicants should include a current vita and cover letter that addresses how their strengths and experiences match the qualifications for the position, as well as the names and addresses of five references. Candidates will be informed before references are contacted. Please note that under Wisconsin statutes the names of nominees and applicants who explicitly request confidentiality will not be made public. However, the university is required to release the names of the finalists who will be interviewed by the chancellor. Submit applications and nominations to:

UCDAVIS

OPPORTUNITIES IN GENOMICS

The University of California, Davis, is establishing the UC Davis Genome Center through a major campuswide initiative in genomics. The new center is part of a broader campus commitment to build on existing strengths in the life sciences and to establish an internationally recognized program in genomics research. The center will:

1. involve faculty scientists from the School of Medicine, School of Veterinary Medicine, College of Agricultural and Environmental Sciences, Division of Biological Sciences, Division of Mathematics and Physical Sciences, and College of Engineering
2. be co-located with programs in molecular medicine, pharmacology, and biomedical engineering in a new 200,000-sq.-ft. building that includes a modern mouse vivarium, small animal imaging facility, and genomics research core facility
3. provide research space and administrative support for 25 new state-funded faculty positions in genomics (10), pharmacology (6), veterinary medicine (2) and bioinformatics and computational biology (7).

Additional recruitment in these areas is expected in departments throughout the campus.

DIRECTOR, UC DAVIS GENOME CENTER

UC Davis invites applications and nominations for the founding director of the UC Davis Genome Center. The director will provide leadership in faculty recruitment in genomics as well as in development of academic research and teaching programs in genomics across the entire campus. We seek a director with a vigorous research program and sufficient breadth of experience and interests to provide intellectual leadership for genomics programs in medicine, veterinary medicine, agriculture, and fundamental life sciences. The director's research could be in any area of genomics, but a focus in functional or comparative genomics is desired. The director will be appointed at the professorial level in an appropriate academic department in one of six schools, colleges, or divisions. The position will remain open until filled. Applicants should send a letter of interest, a curriculum vitae, and the names and addresses of at least five references by May 1, 2001, to: Dr. Craig Benham, Chair, UC Davis Genome Center Director Search Committee, c/o Dean's Office, Division of Biological Sciences, University of California, One Shields Avenue, Davis, CA 95616.

CHAIR, MEDICAL PHARMACOLOGY AND TOXICOLOGY

The UC Davis School of Medicine seeks a chair of medical pharmacology and toxicology. The chair will provide prominent leadership in the development and enhancement of research and educational programs. He or she will be responsible for strengthening the Department of Pharmacology and Toxicology with five additional new state-funded faculty positions and new research space in close association with the UC Davis Genome Center and the Department of Biomedical Engineering. Preference will be given to candidates who investigate the genomic, genetic or proteomic basis of therapeutics in cancer, infectious diseases, or neurological disorders, emphasizing mouse, primate or human systems. The successful candidate will be a recognized scientist of international stature who will be appointed to a tenured position at the full-professor level. Candidates must possess an M.D., Ph.D., M.D./Ph.D., or equivalent. The position will remain open until filled. For full consideration, each applicant should send a letter describing his or her administrative, research and teaching background; a curriculum vitae; and the names and addresses of five references by May 1, 2001, to: Dr. Larry Hjemland, Chair, Search Committee for Chair of Pharmacology and Toxicology, c/o Dean's Office, School of Medicine, Medical Sciences 1-C, University of California, One Shields Avenue, Davis, CA 95616.

Further information about genomics at UC Davis is available at http://genomics.ucdavis.edu

The University of California is an affirmative action/equal opportunity employer.
Executive Director for Student Benefits, Health and Wellness

The University of Idaho is pleased to announce the creation of an innovative new area to include Student Health Services, Student Benefits, Student Counseling Center and a new department tentatively named University Wellness.

The Executive Director for Student Benefits, Health and Wellness reports to the Vice President for Student Affairs/ Vice Provost and serves as a member of the student life management team. The Executive Director provides leadership for the Student Health Center and a new department tentatively named University Wellness, and for the operation of a comprehensive student health insurance/benefit program. The Executive Director will take a leadership role in the development of an innovative and comprehensive approach to health care in a higher education setting. The Executive Director will be responsible for initiating a Student Health Insurance Program and for integrating, as appropriate, employee benefits for wellness programs into a university-wide program scheduled to phase-in 2002.

Responsibilities include implementing and promoting an ambitious strategic initiative to encourage health and wellness services; to broaden and clarify health related services to provide financial and operational management; to lead in the planning and development of the health facility; to interpret for the students and community the implementation of a comprehensive health plan; and to lead the development of a comprehensive health plan with medical insurance providers and local providers for health services. This collaborative effort among University departments will further enhance the overall goal of aligning the "Residential Campus of Choice" in the West.

Minimum Qualifications: Bachelor’s Degree w/ 10 or more years experience in the college health field through direct administration or management consulting; five or more years general experience managing health insurance/benefit programs; national perspective on trends for college health programs; experience with professional staff; strong written communication skills.

Preferred Qualifications: Experience implementing health care financing and/ or ensuring compliance for primary care services and student health insurance/benefit programs; experience developing and implementing alternative funding arrangements for student health insurance/benefit programs; experience developing and implementing insurability requirements for health insurance as a condition of enrollment; experience developing and implementing agreements with private sector entities to support the operation of student health insurance/benefit programs through external and formal agreements for promotion purposes; higher education administrative or management experience; demonstrated ability to interact effectively with professionals at all levels; ability to develop and present training and other presentations to professional audiences; familiarity with state and university policies and procedures; strong oral and written communication skills.

Consideration of applications will begin on April 20, 2001. This position will be filled pending State Board of Education approval. To apply, send a cover letter, resume, and the names, addresses, and telephone numbers of three references to:

Greg Taham, Screening Committee Chair
Division of Student Affairs
University of Idaho
PO. Box 442522
Moscow, ID 83844-2522

The University of Idaho is an equal opportunity/affirmative action employer.

Applications and nominations are being accepted for the following positions at Rockland Community College. RCC, located in the Hudson Valley thirty miles north of New York City, is an open enrollment, public community college with a 40 million-dollar budget, serving more than 6000 diverse, multi-ethnic students.

DEAN OF ENROLLMENT MANAGEMENT

This dynamic individual will be responsible for identifying, developing, and monitoring enrollment patterns at the college as well as recommending marketing strategies and supervising various departments.

Requirements: Bachelor's in Student Personnel Management, Education, Marketing or a related field; experience in marketing and/or enrollment management and strong technical abilities. Ph.D. with 7 years of higher education experience and 3 years of progressive supervisory experience preferred.

DEAN OF ACADEMIC SERVICES

This multidisciplinary individual will provide leadership and overall management for the Library, Instructional Technology, Media Services, Study Abroad Programs, Tutoring/Academic Support Services, Dual Enrollment, Distance Learning, Honor Programs, Faculty Development and Evening/Weekend Sessions.

Requirements: Master's, Ph.D. preferred, and 6 years minimum of academic experience at the department head level or above in a community college setting. Applicant must possess significant fiscal analytical skills and the ability to integrate technology into the classroom.

We offer a comprehensive benefit package and paid vacation. Salaries are commensurate with experience and applications will be accepted until the positions are filled. All positions subject to budget approval. Please forward resume and cover letter indicating position of interest and a list of three professional references to:

AA/EOE
Monroe Community College (MCC), a multi-campus comprehensive community college and a member of the League for Innovation in the Community College invites applications and nominations for the position of Vice President of Academic Services.

Located in Rochester, New York, MCC serves a metropolitan area of over one million people and is the home of several institutions of higher education and Fortune 500 companies. The Greater Rochester area is a high-tech, manufacturing and export-intensive community that is equally renowned for its arts and culture events. The college is immersed in the community and is committed to supporting the educational, workforce training and economic development needs of the region. Monroe Community College has headcount enrollment of nearly 30,000 full and part-time students (credit and non-credit) offering more than 70 degree and certificate programs. Fully focused on the success of its students, MCC’s ranked in the top one percent of community colleges in the number of degrees awarded. Graduates transfer successfully to a multitude of excellent senior institutions. Likewise, career program graduates readily find employment in the area.

Responsibilities:
As the chief academic officer of the College, the Vice President is responsible to the President for providing a quality academic learning environment aimed at student success. The Vice President provides direction and oversight of all College academic programs and services. The individual provides academic and administrative leadership in support of the College’s mission through effective policies, services, programs, personnel and resources. Through a divisional structure the Vice President oversees 20 academic departments and a full time, part time and adjunct faculty of nearly 1000 members. As a college officer, the individual is expected to actively represent the College in the community and at the state and national level.

Minimum Qualifications:
An earned doctorate; College teaching experience; a minimum of five years in a senior level academic administrative position (preferably in a community college).

Desirable Qualities:
The individual should be skilled in academic services administration; possess strong leadership and organizational skills; demonstrate an ability to work effectively with college constituencies and community leaders; possess excellent interpersonal skills; be adept in the application of technology in support of student learning; demonstrate a bias for innovation and action. Multi-campus experience a plus.

Expected Date of Employment:
As soon as possible, but no later than September 1, 2001

Compensation:
Salary and benefits competitive and commensurate with experience and qualifications.

Application Process:
MCC will begin screening applications on April 23, 2001 and will continue until an appointment is made. Initial materials should be limited to: resume; names, addresses and phone numbers of three references; letter of interest identifying proven achievements that address the qualifications and desirable qualities identified for this position (limit to 4 pages). Additional materials will be requested as needed. Send application to: Sherry Raitson, Director of Human Resources, Monroe Community College, 1000 E. Henrietta Rd., Rochester, NY 14623-5780.

Confidentiality:
The College will make every effort to maintain the confidentiality of the applicant until finalists have been identified at which time names and background information will be public. Finalists will be notified in advance.

http://www.monroecoc.edu

MCC is a unit of the State University of New York.
The University of Idaho seeks applications and nominations for a dynamic, innovative, and visionary leader for the position of Director of Teaching, Learning, and Leadership. The director provides leadership for the division and, as a member of the College of Education administrative team, assists the dean in carrying out the role and mission of the college and university.

The University of Idaho is a comprehensive, land grant, Carnegie Research Extensive institution located in Moscow, Idaho, a community of 18,000 people. The University of Idaho has approximately 11,000 students and 700 faculty. It is comprised of ten colleges that award degrees at the undergraduate, graduate, and professional levels. The College of Education is one of the largest colleges with approximately 1,150 undergraduate students and 675 graduate students. It is organized into three divisions: Adult, Counselor, and Technology Education; Health, Physical Education, Recreation, and Dance; and Teaching, Learning, and Leadership. The Division of Teaching, Learning, and Leadership includes programs in elementary education, secondary education, special education, educational leadership, and higher education administration.

The Director of Teaching, Learning, and Leadership, in collaboration with college administrators and the division faculty, provides dynamic leadership and vision while developing, implementing, and articulating the mission and goals of the college and the division. The Director also provides a professional link with University of Idaho academic departments, school districts, and other educational, business, and policy-making communities. The director will accomplish this through:

1. Providing leadership in the development and implementation of the division action plan consistent with the university strategic action plan.
2. Fostering excellence in teaching, scholarship, and outreach for faculty, students, and staff.
3. Securing and facilitating partnerships with K-12 schools, two- and four-year institutions, state agencies, community agencies, and private enterprises.
4. Enhancing the college's mission to promote cultural pluralism, ethnic diversity, and gender equity.
5. Coordinating, expanding, and developing innovative strategies for the use of distance technologies and strategies to enhance program delivery throughout Idaho.
6. Enhancing funding of division initiatives by initiating and supporting development, grant, contract, and other funding efforts.
7. Effectively leading, supervising, and evaluating the unit's faculty and staff.
8. Promoting effective management of personnel and departmental resources.
9. Providing open communication with faculty and staff.
10. Effectively representing all constituents of the division.

Qualifications: The successful candidate must have an earned doctorate and qualify for appointment as an associate or full professor with tenure within the College of Education. Applicants are expected to demonstrate excellence in teaching, scholarship, and outreach in the field of education. Excellent communication skills in leading, speaking, writing, listening, and working as a team member are necessary to fulfill the variety of duties. Highly desired qualifications include successful administration and teaching at various levels, experience with innovative teacher preparation programs, experience working with personnel in K-12 school, knowledge and use of current technologies, and a record of garnering external funds.

The position is available beginning July 1, 2001. Review of applications will begin April 13, 2001 or when a suitable pool of applicants is identified. Salary is commensurate with experience.

Applicants should include a letter of interest detailing their background and experience related to the position, a curriculum vitae, transcripts, and the names, addresses, telephone numbers, and email addresses of five references familiar with your experience. Send applications and nominations to: Jerry Yenchek, Associate Dean and Search Committee Chair, University of Idaho, College of Education, PO Box 443080, Moscow, Idaho, 83844-3080. For more information about the University of Idaho, see website at http://www.uidaho.edu.
WASHINGTON STATE UNIVERSITY
VANCOUVER

ASSISTANT PROFESSOR
Secondary & Teacher Education

The Dept. of Teaching and Learning at WSU Vancouver, a growing branch of WA State’s land grant institution, with a student population of 1650, seeks candidates for permanent, tenure-track position in Secondary Education. This Program is dedicated to constructivism, democratic, field-based teacher education, cultural diversity, and self-study. Competitive salary commensurate with qualifications and experience.

Responsibilities: Teach curriculum, instruction and secondary teacher preparation; research and publish in refereed journals; help develop and maintain programs and K-12 partnerships; assist with student recruitment; advising, supervision and retention.

Required Qualifications: Earned doctorate in education or related field by 8/01, plus demonstrated commitment to secondary/teacher education, agency and school cooperation, research, content expertise in appropriate field, experience teaching public school 4-12 and mentoring diverse students.

Preferred: Expertise in educational technology, principal supervision and record of, or potential for scholarly publication.

To Apply: Send letter addressing the qualification criteria, 3 current letters of recommendation, 2 copies each of 2 samples of scholarly work, curriculum vitae, and evidence of quality teaching to: Dr. Richard Sawyer, Chair, Education Coordinator Search Committee, Washington State University Vancouver, 14284 NE Salmon Creek Avenue, Vancouver, WA 98686. Screening April 23, 2001 until position is filled.

**EDUCATION**

**Director of Communications**

The Director of Communications is responsible for developing the development and implementation of an effective, consistent and comprehensive communications strategy to position Northeastern University as an academic leader, locally, regionally and nationally.

Northeastern University is a national research university that is student-centered, practice-oriented and urban. Currently, it is comprised of 13,783 full-time undergraduate students, 5,917 part-time undergraduate students, 2,075 full-time graduate students and 1,636 part-time graduate students.

We are seeking a seasoned communications professional who will serve as the University’s primary official spokesperson, while managing a team of public relations professionals and the President’s speechwriter. This individual is responsible for handling crisis communications, providing a structure that will support individual college’s public relations needs, overseeing proactive media relations efforts and managing an external public relations agency.

The successful candidate must be a seasoned communications professional with core strength in public relations; experience in higher education and advertising is desirable. The candidate must have solid crisis communications and media relations experience. Exceptional relationship building and management skills coupled with sound judgment are required. Northeastern University embraces the wealth of diversity in their community. Experience or, a demonstrated commitment to, working with a diverse staff or student population is essential.

Salary and benefits are competitive and commensurate with qualifications. Applicants should submit a letter of interest, resume, and names and telephone numbers of three references to: Lisa Metropolis, The Ward Group, 8 Cedar Street, Woburn, MA 01801 or email to info@wardgrp.com.

Northeastern University is an Equal Opportunity/Affirmative Action Title IX Employer. Minorities, women and people with disabilities strongly encouraged to apply.
DEAN OF THE COLLEGE OF ARTS & SCIENCES

Salary Range: Compensation will be commensurate with experience.

Job Description/Qualifications: The University at Buffalo, The State University of New York, a major public research institution and a member of the AAU, invites nominations and applications for the position of Dean of the College of Arts and Sciences (CAS).

The Dean is responsible for academic, administrative and fiscal leadership of the College, and reports directly to the provost. The College currently provides programs leading to BA, BS, MA and PhD degrees in the disciplines represented by 26 departments and in a variety of interdisciplinary programs, centers and institutes. These programs involve approximately 400 faculty FTE, 7600 undergraduates and 1700 graduate students with an annual budget of approximately $75M from all sources. The Search Committee is especially interested in candidates with vision, energy and the ability to work with diverse faculty and an administration committed to major improvements in academic standing and research posture.

Preferred candidates will:
* Have a record of scholarly achievement.
* Demonstrate leadership ability.
* Have administrative experience at the level of department chair or above.
* Have a valid license to practice at all levels of the curriculum.
* Have a commitment to the university's responsibility to promote Equal Opportunity and Affirmative Action.
* Have a commitment to high standards of scholarship and service.

The preferred starting date is August 1, 2001 or before. Review of applicants will begin immediately and continue until the position is filled.

Applicants should submit curriculum vitae and a list of publications, four references (names, addresses, phone and fax numbers, and e-mail addresses), and a letter outlining their view of the position and qualifications for it. The committee encourages nominations from third parties.

Send resume and cover letter to: Professor Bruce D. Combe, Chair, College of Arts and Sciences Dean Search, University at Buffalo, The State University of New York, 810C Clemens Hall, Buffalo, NY 14260. Fax number: (716) 645-3888 Email: CAS-search@ucsb.buffalo.edu

WSU is an EEO/AA employer.
Director, Housing and Residential Life
SAN DIEGO STATE UNIVERSITY
San Diego State University, founded in 1897, is one of 23 campuses of the California State University system. SDSU enrolls over 31,000 students and offers 151 Degree Programs. The campus employs approximately 2,050 full-time and part-time faculty members and 1,722 staff.

SDSU is located in San Diego, a vibrant and widely diverse city of over 1.2 million which offers exciting opportunities because of its emerging biotechnology and telecommunications community, its location on the border with Mexico and the Pacific Rim, and its culturally diverse community. Extensive opportunities for recreation, tourism, education and business have drawn a highly educated population. For additional information, please visit SDSU's Web site at http://www.sdsu.edu.

SDSU offers a variety of on-campus housing choices with seven co-ed residence hall complexes accommodating approximately 2,800 students. Currently under construction are two six-story residence halls with a central dining commons, due for occupancy in Fall 2001. This complex will house 694 residents. The University maintains a professional staff working with residence hall students to develop a community concept within the housing facility to strengthen the student's educational experience at SDSU. Facilities are operated to enhance the educational, social and recreational opportunities available to each student.

The Director of Housing and Residential Life is responsible to the Vice President for Student Affairs and has a secondary reporting relationship to the Vice President for Business and Financial Affairs and Finance resource management. The Director is responsible for the overall planning, organization, implementation, and supervision of all on and off-campus housing services, summer conferences, and the residence halls.

The successful candidate will have five to eight years' housing experience with at least four years at the Associate or Director level. Possession of a master's degree in a related field is required, doctorate preferred. Qualifications should include outstanding leadership, business and communication skills with innovative ideas, the ability to work effectively with others. Must be open-minded, flexible and creative with proven success in housing programs.

APPLICATION PROCEDURES: Applicants should send a letter of application along with a resume listing three professional references to San Diego State University, The Center for Human Resources (16160), San Diego, CA 92182-1625, or email to: employ@mail.sdsu.edu. Review of applications will begin on Monday, April 9, 2001 and the position will remain open until filled.

Associate Vice President for Facilities Management

The University of West Florida, one of the ten state universities in Florida, is located in Pensacola, Florida, and enrolls over 8,200 students at its Pensacola and Ft. Walton Beach campuses. This position is located on the Pensacola campus of approximately 1,000 acres that has been designed as a nature preserve. Over 1,000,000 students live on campus with another 2,000 living nearby. The University seeks a qualified individual to serve as Associate Vice President for Facilities Management.

Responsibilities: The position reports to the Vice President for Administrative Affairs and serves as the chief facilities and operations officer of the University, providing leadership and directing the areas of facilities planning, design, facilities operations and maintenance, environmental health and safety, utilities, campus master planning, project program development, architecture and engineering design, construction, and overseeing the development of the annual capital budget planning and long-term capital projects.

Qualifications: Minimum qualifications are a master's degree in architecture, urban planning, construction management, or related technical field, with doctorate preferred, and seven years of experience as a senior level administrator with a record of proven and progressively responsible experience in facilities planning, facilities construction, facilities management, facilities operations, and organizational skills in a higher education environment; or a bachelor's degree in architecture, urban planning, construction management, or related technical field and nine years of experience as noted above. Additional consideration will be given to candidates with private sector construction industry management experience.

Salary: The salary will be competitive.

Application: UWFP is an equal opportunity employer: Women and minorities are especially encouraged to apply. To ensure full consideration, candidates are asked to submit the following: cover letter summarizing qualifications, desired resume; and name, mailing address, e-mail address, and telephone number for 3 -5 professional references. Deadline is April 27, 2001. Desiring starting date is June 1, 2001.

Send application to:

Pensacola, Florida 32514

An Equal Opportunity/Access/Affirmative Action Employer
BOWLING GREEN STATE UNIVERSITY

The premier learning community in Ohio and one of the best in the nation seeks nominations and applications for the position of:

DIRECTOR OF THE PRESIDENT'S LEADERSHIP ACADEMY

Bowling Green State University (BGSU) invites applications and nominations for the position of Director of the President's Leadership Academy (PLA). As a state-assisted doctoral degree granting institution enrolling 19,000 students (approximately 16,000 undergraduates and 3,000 graduate students) with a strong enrollment profile, BGSU is located in Bowling Green, Ohio (population 25,000), 27 miles south of Toledo, 120 miles from Cleveland, and 150 miles from Columbus, the state capital. The University is highly residential with approximately 7,000 students living on campus. Founded in 1997 by BGSU President Sidney Ribeau, the PLA was established to prepare the Academy's students to make meaningful contributions to society and develop their leadership skills for the benefit of the campus as well as the larger community. Reporting to the Office of the President, the Director of the PLA is responsible for the recruitment, retention, and holistic development of students admitted to the program. Additionally, the Director should exemplify the attributes of leadership which characterize the Academy.

Duties and Responsibilities: The Director of the President's Leadership Academy is responsible for: designing and implementing the curricular and co-curricular and on and off campus programming for the four-year emerging through advanced leadership development program; partnering with college deans, campus faculty and staff, school districts, community and business leaders; and teaching a leadership development course for the Academy. Additionally, the Director of the PLA is responsible for: the development of internship and service learning opportunities for students in the Leadership Academy; outreach to local and regional high schools in an effort to recruit new students into the PLA; and the coordination of scholarship programs for Leadership Academy students working with the Office of Financial Aid, the Office of Admissions and the Division of University Advancement. Finally, in conjunction with the university advancement staff, the Director of the PLA is responsible for the preparation of grants and the identification of other funding sources for the leadership academy's programs.

Qualifications: In identifying qualified candidates, the University seeks a leader with the following proven qualifications: a leader's degree as in an appropriate area; knowledge of student development theory; a minimum of five years of appropriate professional experience in leadership development programming; an awareness of strategic planning and assessment principles; an appreciation for diverse populations; and an unyielding intellectual curiosity. The successful candidate must possess an administrative style that is open and collegial, and a proven willingness and capacity to work in a collaborative manner with all of the university's internal and external constituencies.

Possessing a strong commitment to values exploration, character development, civic engagement and ethical leadership, the successful candidate is an individual whose moral values encompass integrity, advocacy for lifelong learning, the promotion of personal and professional development and the discovery of new ideas. Ultimately, the successful candidate is an individual with the vision, expertise and experience to further develop and lead the comprehensive leadership program, building upon the traditions of excellence at BGSU, and mirroring the vision of the University...to become the premier learning community in Ohio and one of the best in the nation.

Application Procedures: BGSU seeks to fill this position as soon as possible. Review of candidate credentials will begin immediately and continue until finalists are identified for campus interviews. Interested individuals should send: a letter of interest which addresses the above stated requirements and qualifications; a current resume and the names, titles, addresses and telephone numbers of 3-5 references who can assess the candidate's qualifications for this position. Nominations and applications should be addressed or faxed to:

Connecticut College
New London, Connecticut

President

Connecticut College. A highly selective, coeducational, and privately supported liberal arts college, seeks an exceptional leader to serve as its President.

Connecticut College consistently ranks among the top private, liberal arts colleges in the nation. Founded in 1911 and located on a hilltop campus overlooking Long Island Sound, the College is distinguished by innovative academic programs and a faculty dedicated to teaching and scholarship. The diverse student body of 1,670 men and women represents 43 states and 59 countries. The College's mission is to prepare its students for a lifetime of intellectual endeavor and leadership. Recognized for its academic rigor and a strong tradition in the liberal arts, Connecticut College has further enhanced its reputation over the past decade with new international programs and a strong interdisciplinary focus. The new President must be capable of building on the successes of the past and leading with creativity and vision.

Inquiries, applications, and nominations should be directed in confidence to: John Isaacsom, Managing Director, or Barbara R. Stevens, Vice President and Director; Isaacsom, Millhouse, 334 Boylston Street, Suite 500, Boston, MA 02116. Email: jisaacsom@imsearch.com or bstevens@imsearch.com

Connecticut College is an Equal Opportunity/Affirmative Action Employer. More information on Connecticut College can be found at www.conncoll.edu

POSITION AVAILABLE

Academic Coordinator III
Center for Latin American Studies
University of California, Berkeley

The University of California at Berkeley, Center for Latin American Studies invites applications for a position as Academic Coordinator III, to begin June 1, 2001.

The VC Chair will be responsible for coordinating all aspects of the intellectual and programmatic activities of the Center. The VC Chair will have responsibility for program development and implementation which include conferences and events, visiting scholar, faculty funding, tri-annual newsletter, web site (http://www.clas.berkeley.edu/clas), working papers and outreach.

Responsibilities include initiating, writing and supervising grant proposals and reports to university government, foundation and private funding sources; hiring and general supervision of staff and coordination of Center administrative staff; and communication with the faculty executive committee.

The successful applicant must show evidence of success at raising scholarship and academic funds from government agencies, foundations and/or private sources as well as administrative skill and experience. Applicants are normally expected to have an advanced degree in a field relevant to the Center program in Latin American Studies and must have advance competence in at least one of the major languages of the region. Excellent writing skills are essential.

The position will be full time with an annual salary range of $39,400-$52,800. Depending on experience and qualifications.

Applicants should submit a letter of application accompanied by a current curriculum vitae and names/addresses of three references by April 15, 2001 to:

Professor Lydia Chavez
Center for Latin American Studies
University of California, Berkeley
2354 Bowditch St.
Berkeley, CA 94720-2132

Saying What You Mean, Meaning What You Say

From its very beginnings, America has wrested mano a mano with the moral, ethical, and socioeconomic challenges of diversity and the inconsistencies of the "melting pot" philosophy.

The awkward use of the terms "minority" and "majority" to characterize population groups in the U.S. is no longer appropriate. This "plus and minus" terminology has outlived its usefulness. "Minority" population enclaves are the new "majority" population in many congressional districts across the country.

Concern for diversity has shifted to a new imperative promulgated by the quantum leap in the country's immigrant populations and a perceived need to offer them high quality educational opportunities.

The situation challenges America's colleges and universities, which have not often of late moved from cultural pluralism and diversity as a theoretical construct to implement the practices that can make it a working reality.

While lending verbal support to affirmative action and espousing tolerance and appreciation of cultural diversity and pluralism in the pasting of new faculty and staff positions, higher education, more often than not, has fallen far short in delivering on the expectations aroused. "Saying what they mean, and meaning what they say," or "walking the talk," has become higher ed's Pandora's box in terms of diversity, cultural pluralism, and tolerance.

A strikingly different demographic profile is emerging from the K-12 educational pipeline across the nation, a more racially and culturally diverse population that education historically has not been too successful at educating. More workable approaches to this diversity will be required.

Promising new planning and evaluation approaches are surfacing.

A three-stage iterative process is called for: (1) making and sticking to a commitment to change; (2) taking appropriate ownership of and actions to direct the change by doing the things that have to be done; and in the process, (3) learning and reflecting from doing what has to be done.

Essential ingredients include: knowledge ("what-to-do" and "why-to-do" behaviors and attitudes); skills ("how-to-do" processes and behaviors); and desire and commitment ("want-to-do" behaviors and attitudes). These skills manifest themselves over time as outcomes in the form of new, more effective, habits across a campus.

The process requires higher education to ask a question many still can't answer: What would a campus that is both espousing and practicing diversity look like? What are the actual benchmarks for achieving our vision? Benchmarking in this context is the process of evaluating campus operations, policies, and practices to pinpoint weaknesses in the diversity area and then to help identify, study, and imitate or model the behaviors of organizations that excel in those areas. Working in this manner, campuses can catapult themselves ahead of their current dilemma and situation—perhaps even surpass the "benchmarks for diversity." Specialists in promoting cultural pluralism have identified seven critical performance indicators for the organizing process and the transformation. They include:

1. Student body profiles—numeric and qualitative—that speak to conditions and resources the campus provides for the success of all students, in particular those from diverse backgrounds.
2. Faculty and staff diversity profiles—descriptive numeric and qualitative data on faculty, staff, and students (permanent and temporary, part-time and full-time, and non-tenured)
3. Quality of the relationship between/among members of the campus community and the academic programs.
4. Degree of "synchronization" of student values and perspectives with the institutional norms, behaviors, mission, goals, and faculty.
5. Articulated commitment that all educational campus programs work collaboratively to educate all students about the full range of diversity issues and concerns that characterize modern societies.
6. Campus policies, procedures, and practices for dealing with diversity conflicts on campus across students, faculty, administrators, and staff.
7. Institutional efforts to clarify perceived conflict between diversity and educational quality or excellence as operating campus assumptions, policies, and practices.

To me, these seven areas offer a conceptual framework for diversity accountability and for options for creating a continuum along which a campus can rank its progress.

And in the process, campuses can learn to say what they mean, and mean what they say!

If interested in submitting a Punto Final! "think piece," please e-mail us at outlook@aol.com for guidelines.
She spoke out for justice
... when she argued Roe v. Wade.

She served as a Texas state legislator and Assistant to the President on women's issues under the Carter administration. Today Sarah Weddington — professor, author, and speaker — continues to shape the future for women and girls.

Two million, two million.

How many times did we hear those words from former Secretary of Education Richard Riley? What was he talking about? Quite simply, it was his estimate of how many new teachers will be needed over the next ten years.

That's a high number. Some have quibbled with his estimate, but most agree that an enormous shortage of teachers looms on the horizon.

Why is that? There are at least three reasons: demographics; increasing enrollments, especially in K-12, which, in the fullness of time, will lead to increased enrollments in higher education; and, finally, normal attrition.

Demographics

America's teachers and professors are aging. A large percentage, nationwide, are in their mid-50s. All those who entered teaching in the late 1960s and 1970s and stayed have either retired or soon will. Many retire at the age of 60. Very few work beyond 65.

Enrollments

The baby boomers, those born between 1948 and 1965, who changed America in so many ways, have yet a few more roles to play. The U.S. Census Bureau estimates that seven Americans turn 50 every minute. That's a cute way of saying that more than 10,000 baby boomers turn 50 every day.

Some are retiring early but wish to remain active. They are seeking further education for second careers or for an enhanced retirement. Their enormous numbers will affect higher education in the years ahead. Others either married late or started second families. Their children are now in our middle schools.

Secondly, the recent wave of immigrants has been young. Many came with children and continued to have large families. Their children are already in our elementary schools.

Attrition

Education has long been a high-attrition profession. Society's diminished appreciation of teachers has added to why so many leave the professions. In some school districts, a full three out of every five teachers leave not only that district but teaching itself within three years. Only those who have actually taught understand and appreciate the daily stresses and frustrations of teaching.

Meeting the Demand

The classified ads in The Chronicle of Higher Education and in our own publication reveal an ever-increasing number of teaching vacancies. Disciplines such as history, which had very few full-time openings for decades, now list multiple vacancies in state after state.

How does graduate education address society's needs for more teachers? In the past, many schools of education created their own worlds and produced K-12 teachers. They were heavy on methodology and theory and all too often weak on the subject material their students were going to teach. Watered-down courses such as "Math for Teachers," etc., cluttered many a curriculum. Many graduated ill-prepared to teach their subject matter.

But that has been changing. Many schools of education have become graduate schools and offer education courses only to students who have a baccalaureate in a discipline and want to teach. Some universities have established five-year programs to meet that goal.

Those still offering a bachelor's in education have strengthened their teaching discipline requirements. Students complete their core teaching courses in other parts of the university. The combination of teaching techniques, learning theories, practicums, and a solid introduction to their teaching disciplines is preparing a whole generation of teachers better than ever before. There is reason to be hopeful and optimistic.

College Teaching

In the past, college teachers came from the arts and sciences side of the nation's colleges and universities. They were trained in their discipline. Period. No attention was given to teaching as a skill to be learned. Education courses and theories were ridiculed and disparaged. Students acquired the prejudices and absorbed the age-honored ignorance of their professors.

Later, many a hapless college student struggled with newly minted "teachers." Teachers "who knew their subject matter but could not teach." How could they? They were never taught to teach. Many never had any instruction on how to teach all the way through their Ph.D. studies. Later, when lost in their classrooms, they daren't seek help on how to teach because they had been conditioned to disparage education realities.

Their students suffered year after year. Eventually some, by "hit and miss," became effective teachers. But think of all those wasted years and ill-served students And of those--you fill in the names--who never did learn how to teach.

The Future

The learning of a discipline in detail is important, indeed the essential first step, to being a good teacher. But one must also learn how to impart that knowledge to others. It is not a matter of parroting what one has learned, using one's old class notes, or outlining a book.

In the past, both schools of education and arts and sciences colleges were wrong in their narrow approach to training teachers. This is so obvious, it is painful to note that some "still don't get it." We should take the best from both worlds and graduate knowledgeable and skilled teachers.

Dr. Mellander is a professor at George Mason University.

HD
Editorial

¡Hola!

Having the title Professor or Dr. precede one's name is an indication of academic distinction, or celebrity, if you will. Generally, your credentials stand above those of more junior professors, instructors, adjuncts, and TAs. For the most part, being "Professor" means you have successfully defended your dissertation, paid your dues, and assiduously gone through the ranks. Surviving a Ph.D. program is an important step that most professors-in-training must endure and complete. As one of our articles suggests, it's the "union card" for those seeking a career in academia.

Several articles in this issue discuss how Hispanics fare in doctoral programs, how many more are pursuing Ph.D.s, and what some of the concerns are. One issue is the reported decline in Hispanic numbers among Ph.D.s. Statistics show that while in the last 40 years, the increase in doctorates has averaged 3.8 percent per year, Hispanics represented the one minority group that registered a decrease in 1999.

Sixteen percent of all doctorates in 1999 went to students of color. Will Latinas/os do better in this category? Earning a Ph.D. might not be a goal that many aspire to. And depending on one's career choice, it might not even be necessary, nor should it be expected—although it's certainly an impressive and respected entry on a CV. In an age when stories of people successfully climbing the career ladder with only a high school diploma and hard work (and perhaps the blessing of a padrino) are seldom heard, one can't ignore the increasing emphasis placed on official credentials. More often than not in the professional world, traditional experience can't hold a candle to accredited knowledge. Something to think about.

In the next issue, we'll feature articles on the minority graduation gap, a new "national report card" that ranks each state, and the potential pitfalls of standardized testing.

Hasta la próxima,

M. Lassieur

Editor's Note

One of our readers missed our original correction regarding an error an article about the Ivy League schools in the October 9, 2000, issue. He writes, "We can all make mistakes. My students are confused about your non-response. To maintain validity as a publication, you must print a retraction."

Excerpt from the December 4, 2000 issue correction box.

Two thoughtful readers from Van Nys, California, and Newark, New Jersey, wrote to HO to express their "dismay," "agitation," and "nervousness" over our erroneous inclusion of MIT, Stanford, and the University of Chicago among the Ivy League Schools in our October 9 issue. Our reaction was much the same.

There are only eight institutions that comprise the Ivy League, which, in fact, started out as a football consortium with only four schools—Harvard, Yale, Princeton, and Cornell. Columbia, Brown, Dartmouth College, and the University of Pennsylvania are the other four...

Our apologies to our readers and the three institutions, whose sterling reputations need no enhancement.
Professional Development and the Administrator of Color

BY RENÉ TRUJILLO JR.

The value of professional development is rarely challenged. What could be better for staff morale and development than a week of reflection and interactive study away from the daily fires and chaos of the office? While particular programs are deemed better or worse than others, most of us have an almost unassailable belief in the benefits of professional development both for the individuals involved—who gain insight into their practices—and the institutions that sponsor their participation. Given this faith, it is difficult to understand why so few administrators of color participate in the most significant programs available throughout the country.

Participation of Black administrators appears to be on the rise at programs such as the Management Development Program offered by
the Harvard Institutes for Higher Education, but other groups—primarily Latino, Asian, and Native American—still lag behind in attendance, despite recruitment efforts.

I was fortunate as an administrator at the National Hispanic University (NHU) to receive the institutional support necessary to attend Harvard’s program. NHU’s provost/academic vice president, to whom I reported, had been a community college president and had attended a similar professional development program at the Harvard Graduate School of Education. Although he was personally very pleased with his experience and encouraged me to apply, he also warned me that I would not see many people like me. Very few Latinos attended the program, and he predicted that the same would be true in my case. He told me that the folks at Harvard seemed to be recruiting from our ranks in earnest, but that the results were less than satisfying. We discussed the dynamics of this frustrating and all-too-common scenario.

If quality programs in professional development are generally considered worthwhile, what barriers exist for administrators of color? The answer is complex, having to do with the status and presence of people of color in university administration.

Though progress has been made in their recruitment and retention, people of color are still underrepresented in the administrative ranks of colleges and universities. A handful of minorities in those roles find they are asked to carry a disproportionate burden of service. In addition to their regular duties, they may serve as role models, mentors, and recruiters for other members of the college community. Many welcome these opportunities, but the heavy reliance on their day-to-day presence on campus often prevents them from attending lengthy development programs off campus.

Because administrators of color still predominantly serve in middle management, they must contend with layers of bureaucracy before getting approval to attend professional development programs. Most middle managers do not have direct access to the president and marketing brochures promise. Rigorous and of high quality, they expose participants to top researchers and best practices. Participants gain a sense of the interrelatedness of university functions and how to work within (or redefine) institutional constraints more creatively and effectively.

At their home institutions. This tends to make the exchange of ideas freer and promotes creative resolution of intransigent problems.

Finally, but perhaps most importantly, there is the opportunity for forging lasting relationships with colleagues who may become lifelong resources. Given the precarious position of many administrators, the advantages of such opportunities should not be taken lightly.

We must personally encourage all administrators—but particularly administrators of color—to take advantage of these opportunities, and we must work with our institutions to support such experiences. The success of such endeavors depends on an appreciation that both the individual and institution will benefit, recognition of barriers to participation, and a genuine commitment to overcome them.

Though progress has been made in their recruitment and retention, people of color are still underrepresented in the administrative ranks of colleges and universities.

René Trujillo Jr., Ph.D., is the former associate provost of curriculum and assessment at The National Hispanic University and a member of the Leadership Development Initiative (LDI) Advisory Board organized by the Harvard Institutes for Higher Education. Made possible by the generous support of the Plan for Social Excellence, LDI activities are designed to increase professional development opportunities for higher education administrators of color.

The Research Connection

HSIs: A Solid Piece of the Pipeline

Hispanic and Doctorates

By Michelle Adam

It is common knowledge that Hispanics are underrepresented in undergraduate education, although their numbers are growing at a rate much faster than those of any other minority group nationwide. Between 1976 and 1996, the number of enrolled Hispanics increased 202 percent, compared with only 13 percent for Whites and 44 for Blacks, yet Hispanics still made up only 10 percent of undergraduate degree recipients in 1996.

Look a the highest levels of academia, at doctoral programs, and the figures are even more daunting. According to The Digest of Education Statistics 1999, only 1,098 of 45,394 doctorates—exactly 1.8 percent—went to Hispanics between 1996 and 1997. And in subject areas where Hispanics were lowest in numbers—math, science, and engineering—the figures drop further.

From 1996 to 1997, only 18 Latinos of 1,174 students obtained a doctorate in math; only 65 out of 4,474, in physical sciences and science technologies; and only 91 out of 6,201, in engineering.

Nearly half of all doctorates received in these fields during that time went to overseas students. For example, of 6,201 Ph.D.s in engineering, 3,006 were earned by foreign students. It is these kinds of statistics that have given rise to efforts to increase the number of U.S. citizens obtaining Ph.D.s, and especially the large pool of minorities most underrepresented as doctorate-holding researchers in science, math, and engineering.

With the support of national programs through such entities as the National Science Foundation (NSF) and the National Institutes of Health (NIH), high-level research institutions have been pushing extra hard to bring more Hispanics into doctoral research programs.

The Hispanic Outlook investigated those institutions that are both high-level research institutions, according to the Carnegie classifications, and Hispanic Serving Institutions. HSIs, labeled as such under the White House Initiative on Educational Excellence for Hispanic Americans. An HSI is any college or university serving a student population that is 25 percent or more Hispanic. Among schools considered Carnegie-classified research institutions are those that offer a full range of baccalaureate programs and are committed to graduate education through the doctorate, giving a high priority to research. These institutions award 50 or more Ph.D.s each year, with the Doctoral/Research Universities-Extensive category receiving $40 million or more in federal support each year, and the Intensive receiving between $15.5 to $40 million annually.

According to our findings, only four HSIs within the mainland United States are also considered high-level research universities—University of Miami, New Mexico State University, University of New Mexico, and Florida International University. While we looked at other quite reputable non-HSI Carnegie Research Universities, which serve a fair number
of Hispanics—such as University of California-Los Angeles—we focused primarily on HSIs to see what large populations of Hispanics gained from learning at a large research institution. What we discovered as well was how these students have benefited from national programs and funds currently targeting such universities.

"is getting minority students to stay on as graduate students. What happens primarily is we get these students interested in research at the undergradu-
ate level, and then we send them somewhere else to do graduate-level work. We have a program where we pay students [Hispanic and other minority stu-
dents especially] to go to graduate school somewhere so they can come back as faculty."

Thanks to their exposure to research and their growing interest in science, it is now difficult to tell one ethnic group from another in terms of aca-
demic discipline. "There are a variety of majors across all ethnic groups," said Cunningham.

Glen Kuehn, biochemistry professor and director of NIH programs at NMSU for the past 26 years, has personally helped move minorities, and especially Hispanics, through Ph.D.s in sci-
ence. During this time, 70 to 73 Ph.D.s in science have been earned by minorities who were undergraduates of NMSU. "Those numbers are
modest, but are yet the best around," he said. "I bet we are among the top three."

Kuehn credits these statistics to the Minorities Biomedical Research Program and the Minorities Access to Research Careers Program, two pro-
grams that have helped bring minorities into science as research scientists. As undergraduates, these students are paid to work in research groups with a total of 15 to 20 graduate profes-
sors. "When they are done with undergraduate work, they are very well trained," said Kuehn.
"Most can enter a graduate program at any place and begin contributing easily." Nearly one half of all undergraduates who continue on to graduate school are then sent to other institutions, fully paid, so that they can return as faculty to NMSU.

New Mexico State University

New Mexico State University in Las Cruces, New Mexico, is an example. This land-grant institution is classified as both a Carnegie Doctoral/Research
University-Extensive and an HSI, with 24 doctoral programs limited primarily to agriculture, education, engineering, and the sciences. With 39 percent
of its 13,449 students being Hispanic, the University specifically benefits from programs and funding provided by NSF, NIH, and NASA.

To draw more Hispanic and minority stu-
dents into research-level programs, New Mexico State University, in a manner similar to that of other universities, encourages undergraduates to take part in research projects in order to attract more of its minority students to graduate school. Because of national concerns about underrepresent-
ation in research, the University is able to work in conjunction with national programs that stimulate greater production of Hispanic Ph.D.s.

"We have strong research programs in all our academic areas. And our research programs employ a lot of our students," said Gary Cunningham, vice president of research. "We make efforts to recruit Hispanic students into this."

"The problem everywhere," noted Cunningham.

What Cunningham and others have witnessed is that Hispanic students, traditionally more interested in liberal arts and social sciences, have become, in the past few years, more interested in engineering, physical sciences, and mathematics.

(Hispanic faculty in these research fields are hard to find, said Cunningham). Whether they undergo graduate research work at NMSU or not, the fact that their research programs are strong and available to undergraduates increases the chances of
producing more minority Ph.Ds.

The success stories remain vivid for Kuehn. One student, Eduardo Dávila, came to NMSU with a switchblade in his boots, tattoos on his arms, and a recent stint at a reform school for street gang activities. He was one of many who were paid to work in research as an undergraduate, specifically in biochemistry. Turned on by the work, Dávila not only graduated, but is now married, has children, and is working on two graduate degrees at Mayo Graduate School in Rochester, Minnesota. He is pursuing a medical doctorate and Ph.D.

Said Kuehn, “I’ve always maintained that research is a great equalizer. You are both working together to create a solution. Students finally see that they are in an environment where they can contribute and they are equal.”

Florida International University

Like NMSU, Florida International University, recently named a Carnegie research institution, has made much effort to bring more minority students into research. Since the school maintains a population of 55 percent Hispanics among approximately 32,000 students, the University is an ideal place for this population to be exposed to research-level work. Graduate-level research programs are available to undergraduate students throughout the campus, but one place where minority students are especially exposed to top-level research is at the University’s Hemispheric Center for Environmental Technology.

The Center was launched by the Department of Energy six years ago under the directorship of Ali Ebadian, who, in collaboration with the DOE, is hiring undergraduates and graduates to conduct research and development for DOE projects “I always had a vision to create a center to give students more hands-on experience dealing with businesses and research,” said Ebadian. “DOE realized there was a tremendous potential in the international aspect of our university.”

In an address to the school’s graduates in 1999 then-Secretary of Energy Bill Richardson himself emphasized the importance of building upon FIU’s predominantly minority student population in research. “The energy needs in Central and South America are expected to double in the next 20 years. FIU is excellent because it focuses on science, engineering, and research domestically as well as internationally,” he said.

One hundred students—about 65 percent Hispanic and 20 percent African American—are hired by the Center each year. They become involved in hands-on research and development and meet with clients from the onset of projects. The Center works with multiple federal agencies, and, depending on the disciplines of individual students, they work in such areas as the environment, information technology, and energy. Students are exposed to national conferences and work alongside faculty from throughout the campus, who provide ongoing mentoring.

Dade, where approximately 52 percent of high school students are Latino and 32 percent are African American, the school boasts about 28 percent Hispanics of its 16,000 undergraduate and graduate students. But, as is typical nationwide, only 14 of the 149 or so who received doctorates between 1998 and 1999 were Hispanic.

As a research university with 60 doctoral programs, UM has the potential to bring undergraduate students into research at an earlier age. “What distinguishes a research university is the ability for undergraduates to participate in research opportunities,” said Michael Gaines, chair of the graduate department of biology. “We’re really trying to promote research for undergraduates because we can offer it.”

As program director of The Howard Hughes Medical Institute Undergraduate Program and The Bridge Program, funded by NIH, Gaines has been providing research opportunities for primarily Hispanic and African American undergraduate students. With the Hughes Program, 15 students at each level are paid a stipend to take research-related courses for their first two years. During the third year, these students conduct research and produce research papers in the biomedical field. Since UM has a strong medical school, a large percentage of these students follow that path. However, as is the aim of the Howard Hughes grant, some are inspired to pursue doctorates and potentially join the ranks of academia in science.

NIH is also funding a program to pay students at Miami-Dade Community College to come to the University and work in research. These students—20 from each level—are also given scholarships while at Miami-Dade. Once they complete their two years, they can become Howard Hughes scholars, if they continue their education at UM. “We’ve had some good results,” said Gaines. “We’ve had community college students go on to graduate school. Those are wonderful stories.”

The University of Miami also places undergraduates in research positions through its office of undergraduate research. Its coordinator, Joyce Biederman, said her job was created a year and a half ago to centralize placement of students in research. During that time, she has helped position about 200 students in mentorships with faculty of all disciplines. “They want to do research,” said Biederman. “Some of them go on to publish papers, and some go on to graduate school.”
University of New Mexico

Another HSI that also falls into the category of a Carnegie research university (Extensive) is The University of New Mexico. Of approximately 30,000 students on its main campus and at various branches, more than 28 percent are Hispanic, a population that clearly is in a position to benefit from the research capabilities of the school. Of its Hispanic students on the main campus in 1999, 145 received master's; 17, doctorates (of 184); and 65, professional degrees. In 1990, 20 Hispanic students received Ph.D.s, then an all-time high.

Although these numbers might appear small—reflecting the low national statistics—UNM is also working to draw more Hispanic and minority undergraduates into research-level work in order to produce more graduate students.

"Since we have the faculty for 100 graduate degree programs—well-recognized and published faculty—we have the opportunity to put juniors and seniors to work with the very best," said Dr. José Rivera, special assistant to the vice provost for research. "The infrastructure of our research institutes, labs, and facilities is available to the undergraduate student. And in terms of research, you want to be on the cutting edge and learn from the very best."

Several programs that pair up graduate professors with undergraduate minority students, of which more than 70 percent are Hispanic, are the Ronald E. McNair Scholars Program, nationally funded, and the Research Opportunities Program, which is state-funded. Through both programs, first-generation low-income undergraduate students are prepared to succeed in graduate-level work. About 20 students attend workshops and classes to learn about writing, networking, and preparing for graduate school. Beyond this, however, students are matched up with graduate faculty and, especially during the summer, are paid to conduct research with faculty support. "They can't believe the feeling they get from being in this program," said Tim Gutiérrez, senior program manager of special programs. "They come in, and they are not sure, but as they do research and see the different possibilities, the fire in them builds."

Programs that exist within UNM's departments include MEMS and the Biomedical Research Program. MEMS, the minority in Engineering, Math, and Science program, is run out of the engineering department, attracting high school students to campus during the summer. The Biomedical program works with students on campus as well, offering them hands-on research experience. Aside from that, UNM has been selected by NASA as one of three HSls to receive funds of up to one million for research and development. Recently it also received an AGEP grant from NSF, forming with other New Mexico schools the New Mexico Alliance for Graduate Education and the Professoriate. NSF is helping build alliances between schools specifically to increase production of minority doctorates for the teaching profession.

"Nationally, people are recognizing the importance of educating minority populations, getting them to the professoriate level in education," said Gutiérrez. "The emphasis and push is there, and the push is getting stronger here as well."

Other research universities with Hispanic populations in the teen-percentages have also been making efforts to attract more Hispanics and minorities to research-level work. In the past year, top research schools such as the University of California at Berkeley and at Los Angeles were honored by The Quality Education for Minorities Network for their contribution to the number of doctoral degrees in the fields of math, science, and engineering granted to minorities. UC-Berkeley ranked No. 1 with 89 minority students granted Ph.D.s between 1990 and 1997, and UCLA with 39, of whom 30 were Hispanics.

To attract students to its graduate programs, UCLA invites California State University students to its campus in the summer to work in research areas and thus expose them to graduate work. UCLA also receives support through a statewide grant from NSF to enhance recruitment of underrepresented minorities in science, math, and engineering.

It is hard to quantify to what degree efforts made by research universities to give Hispanic undergraduates exposure to their doctorate programs have contributed to an increase in Ph.D.s among Hispanics. But the recent results of a baccalaureate-origins study, soon to be published by Marcel Quintana-Baker, might help clarify the issue. For her recent dissertation at American University's School of Education, she tracked the number of Hispanic students (who were U.S. citizens by birth or naturalization) who had received a Ph.D. in science, math, or engineering from 1993 to 1997. She focused on math, science, and engineering because it is within these fields of study that Hispanics are least represented. By looking at the graduate school from which each student received his or her Ph.D. Quintana-Baker was able to trace back to each student's baccalaureate school.

Her goal was to develop a productivity index of the baccalaureate-granting institutions that were most successful in producing future Hispanic Ph.D. recipients in math, science, and engineering. She, like many other researchers, used M.E. Tidball's pioneering baccalaureate-origins methodology, which allows comparison of institutional productivity regardless of size. For example, if she were measuring a larger school, such as UC-Berkeley, an accurate measurement would be based on the ratio of the size of the school to the number of Hispanic students who received a Berkeley undergraduate degree in science, math, and engineering prior to receiving a Ph.D.

"I discovered that HSI institutions figured prominently among the top producers in math, science, and engineering," said Quintana-Baker. Among the top producers for all Latinos combined, 10 out of 20 schools were HSls. These ten included the University of Texas at El Paso, University of the Incarnate Word, New Mexico Highlands University, University of Miami, St. Mary's University at San Antonio, University of New Mexico, New Mexico State University, Sul Ross State University in Texas, St. Peter's College in New Jersey, and The University of Texas Pan American. For women, Our Lady of the Lake University in San Antonio figured prominently as well. Quintana-Baker explained that it is important to note that because they exist in a totally different cultural and linguistic context, HSls located in Puerto Rico are not included in this list, even though they are highly productive.

"Out of these institutions that figured the most productive, only three were research institutions," said Quintana-Baker. She is currently attempting to discover what recruitment and retention practices were in place at several of the HSls in order to discover the key to their success.

Although Quintana-Baker has to investigate further, she did reveal that among the characteristics that these schools have in common are research opportunities for undergraduates. It is her hope, she said, "that funding agencies and institutions will look at this research and agree that there are policy implications for the funding of HSls." "My goal is to find out why these HSls have been successful in generating future Ph.D.s in science, math, and engineering, hoping that those practices can be replicated by not just HSls but other institutions that have high numbers of Latinos enrolled."
A Revolution In Academia

The PhD Project: A Seven Year Report

Changing the Face of Business Faculty

Sponsors Give $10 Million to Boost Number of Minorities

BY MARILYN GILROY
ike many diversity programs, The PhD Project has an admirable goal—to increase the number of minority professors who teach at the nation’s business schools. The Project was created in hopes of improving some abysmal statistics, such as the 1999 Business Week survey that showed only 375 minority Ph.D. business school faculty members out of a total of 22,000. In fact, many “B-schools” have no tenured minority professors at all.

However, unlike other programs, The PhD Project has achieved extraordinary quantitative results during its seven and a half years of existence. Remarkably, it has managed to double the number of minorities in business doctoral programs. The ripple effect is already being felt as these participants receive their degrees and accept jobs at colleges and universities throughout the country. By 2004, Project officials predict that there will be 850 minorities with doctoral degrees in the ranks of business school faculty.

How did the Project come so far so fast?

It began in late 1993 when a group of corporate and academic representatives came together to develop a strategy to attract more minorities to careers as business professors. Though there had been progress in equal opportunity for people of color in American society, business schools and the corporate workplace were still way behind in reflecting the diversity of society.

“We knew that there were too few students of color in the business classrooms and in the corporate world,” said PhD Project founder, Bernard Milano, executive director and trustee of the KPMG Foundation.

Milano enlisted an impressive roster of supporters for the Project from the corporate, academic, and nonprofit sectors. Although KPMG contributed the most start-up money, the Project has many sponsors—including the foundations of Citigroup, Ford Motor Company, Chrysler, Fannie Mae, Abbott Laboratories, Merrill Lynch, Bristol-Myers Squibb, Chase Manhattan Bank, Seagram & Sons, and Motorola, and 93 participating universities—that help the Project recruit Ph.D. candidates.

Milano describes the program as “a comprehensive, long-range effort to substantially increase minority faculty and, ultimately, student representation in the nation’s business schools.” It is an outgrowth of research that links increased minority enrollment in business schools to the presence of minority faculty. Ultimately, the Project’s originators hope to increase the number of minority business faculty and, subsequently, the number of minority MBAs who are needed for management and leadership positions in corporations.

In developing objectives, the Project’s founders noted that faculty have a great deal of influence on the courses of study selected by students, serving as role models and as sources of encouragement for the direction students take in their studies. Minority business professors would prove to be valuable mentors to those considering careers in business. Consequently, more minority business students would create a diverse applicant pool for corporate America.

The logic behind the Project’s goal was irrefutable; however, the challenge was more daunting than expected. Statistics revealed that out of 1,045 business doctorates completed in 1993, only 38—a mere 3.6 percent—were awarded to African Americans, Hispanic Americans, and/or Native Americans, a group that collectively makes up nearly 25 percent of the U.S. population. Quite simply, most students in business schools have never encountered a minority professor. If Milano and his colleagues succeeded, that phenomenon would become less and less likely. But the big question was: where would the Project find hundreds of minority business Ph.D. candidates?

The answer was close to home. The PhD Project decided to mount a recruitment campaign aimed at minorities already working in corporations. They used an aggressive direct-mail approach to reach potential Ph.D. candidates, hoping to lure them to the first annual PhD conference to learn more. Additional mailing lists were supplied by the National Black MBA Association and the National Society of Hispanic MBAs.

The direct-mail pieces went out to businesspeople such as Patricia Martínez, who received her first brochure from The PhD Project when she was working in a management position in training and development at Transamerica.

Remarkably, The PhD Project number of minorities in The normal dropout rate for 25-33 percent, but for The PhD
“I was contacted through the Project’s first mail campaign in 1994,” said Martínez. “The flyer asked: have you ever considered getting a Ph.D. and pursuing a career in teaching and serving as a role model for other students?”

Martínez joined the program and will complete her Ph.D. this summer at the University of California-Irvine. She has already accepted a position as assistant professor of management at the University of Texas at San Antonio, beginning Fall 2001.

“if it weren’t for the PhD Project, I would not be going to the University of Texas as a professor,” she said. “I didn’t know anything about getting a Ph.D. I was in the process of applying for an MBA. I didn’t know anyone who had pursued a Ph.D., so I had no one to turn to. But I had taken the Graduate Management Admissions test, and they had supplied my name to the Project.”

Martínez attended the Project’s first annual Ph.D. conference, an intense experience offering a comprehensive orientation to the lifestyle of the Ph.D. student. Airfare and room and board were paid for by the Project. The annual conference has become an important event for current students and prospective ones.

“They showed me clearly what this opportunity looked like and what it would take for me to pursue it,” said Martínez. “There is simply no better way to become informed.”

Conference presenters include corporate executives, business school faculty, and, most importantly, Ph.D. candidates who explain the application process, the cost and funding opportunities, the various programs of study in the Ph.D. track, the value and rewards of teaching careers, and even how to get published.

Many attendees are surprised to learn that tuition is often paid for with funds from the doctoral-granting institution, private foundations, and government agencies.

One of the more unusual aspects of the conference is that it brings all participating universities and colleges together in one place to recruit potential doctoral students.

Much of the work at the conference is devoted to countering myths about the Ph.D. process. Many individuals thought that they needed an MBA to pursue a Ph.D., but in fact, the master’s is not required. Others thought they could never afford the tuition. However, most doctoral programs offer stipends and fellowships that actually pay for tuition during the four-year period.

But the biggest obstacles were often emotional ones, such as: How do I walk away from a successful career and financial security? Can I handle college again after being away from this environment for years?

Conference organizers try to present the process realistically so that applicants are armed with the accurate information needed to make this important decision. They acknowledge the “down sides” of pursuing a Ph.D. in business. It can be a lonely process, especially since there are few minorities. And there is definitely a financial adjustment going from the salary of a full-time job to the earnings of a doctoral student.

“When you go back to school after working full-time and having a professional career, you can take a steep pay cut,” said Martínez. “By comparison, you earn very little as a student.”

Martínez added that the doctoral program is nothing like a master’s program.

“It is at a completely different level,” she explained. “It is very challenging and requires a total commitment. It’s a huge adjustment, but those of us who go through The PhD Project have a realistic view because they prepared us so well. The conference tends to weed people out; those that have their doubts don’t end up applying.”

While the initial outreach and the annual conference have contributed greatly to The PhD Project’s success, there is one more ingredient that is essential to the program’s high retention rate. The normal dropout rate for doctoral business students is 25-35 percent, but for The PhD Project, it is 4 percent. That’s because participants enjoy a mentoring and peer-support network, which the founders built into the program. It comes in the form of doctoral student associations covering all five business disciplines: accounting, finance, management, marketing, and information systems.

**has managed to double the business doctoral programs. doctoral business students is Project, it is 4 percent.**

1195 04/09/2001 © HISPANIC OUTLOOK 15
Growing Number of Minority Business Professors

Once accepted into a doctoral program, minority students are invited to join one of the associations. The Project pays all travel and hotel expenses for them to attend the annual conference for each discipline. There they have access to professors, experts who help them enhance their skills in their fields, and editors of professional journals. Some students present research and receive feedback that is generally helpful in completing their dissertations. The national conferences are also the source of a strong support system for students, who are often the only minorities in their program on campus.

"One of the wonderful things about the association is that I know almost every minority doctoral management candidate in the country," said Martínez. "There are about 120 of us."

As the students pursue their doctorates, their presence has far-reaching effects on campus. In some cases, minority doctoral students undertake important research relating to race and business. As teaching assistants, they bring this research into the classroom, where diversity issues are often neglected. Topics such as segregation in consumer goods delivery, ethnicity and accent bias in employment interviewing, and marketing to ethnic minorities have been presented by PhD Project participants.

According to the most recent PhD Project report, research in these fields, which has largely been ignored by non-minority doctoral students and professors, now enjoys a more favorable climate because of the visible corporate support for diversity initiatives.

Sometimes Project participants work with faculty who are not used to working with minorities, and then a learning curve has to take place. One doctoral student reported that she had explained to a fellow faculty member the variety of cultures and national origins that comprise the lump term "Hispanic."

As they complete their doctorates, Martínez and her peers from the first round of The PhD Project look forward to making their mark at their respective universities.

"It is wonderful to be recruited by universities that take to heart diversifying their faculty and recognize you not only for your academic accomplishments but also for your personal goals and values," said Martínez.

"The dean and faculty at UT-San Antonio made me feel that there is no better place for me to go in terms of peer support, being valued, and feeling that I can make a contribution."

Martínez is also pleased with her compensation package, which includes summer support for research and a relocation bonus.

Project participants typically earn salaries that range from $65,000 to more than $100,000 for the nine months of the academic year. Consulting fees for private-sector work commonly supplement this income.

Although Martínez will be concentrating on teaching and research, she will still find time to attend the annual PhD conference. She will be on the other side of the podium, addressing the hundreds of new attendees who are exploring the option of earning a Ph.D.

"Every year that I have been a participant, I have gone back to the conference," she said. "I help recruit, and I am on panel discussions. My new UT-San Antonio colleagues are very enthusiastic about that connection."

This year's conference is expected to include record numbers, with more than 400 potential applicants in attendance.

"I think the people that put this together didn't even realize the tremendous impact that they would have," said Martínez. "But they did everything first rate. The information that they provide and the support system that they established for us have made the difference. They had incredible foresight and have impacted more people than they could possibly have predicted."

HD
The University of Texas at Austin is the largest single-campus institution of higher learning in the nation—it's Texas-sized, one might say. Overlooking the campus is the famous 307-foot-tall UT-Austin Tower, designed by Paul Cret of Philadelphia and completed in 1937. Through the years, the Tower has served as the University's most distinguishing landmark. The observation deck offers a spectacular view of the UT campus and of the Austin area in all directions. Thanks to a cooperative effort of students, staff, and the University administration, the deck was remodeled and reopened to the public on September 16, 1999, for the first time in nearly 25 years. As a part of the renovation process, people with disabilities now have access to this monumental view. Access and vision are important at UT-Austin in other areas as well.

Larry R. Faulkner, president of UT-Austin, says, “Our mission is to serve the people of Texas and the world. Although the University of Texas contributes to society in many ways, educating a student body that reflects the diverse population of Texas and the nation may be the most important service we can provide. Because in doing so, we transform lives and enable social mobility—while training the leaders of tomorrow.”

“Ours is a diverse campus,” continues Faulkner, “that is home to students from all 254 Texas counties, all 50 states, and more than 115 foreign countries.” He says that UT is No. 5 in the nation in baccalaureate degrees awarded to minorities, and adds, “We are No. 1 in the nation in doctorates awarded to Hispanics, according to The Hispanic Outlook [Top 100 schools data provided by the Department of Education]. For bachelor's degrees conferred on Hispanics, we are No. 4 nationally, and first among the prestigious institutions of the Association of American Universities. While we can do better, we should not overlook the fact that UT-Austin is making a major contribution to minority education in the United States, and has been doing so for many years.”

A public institution, UT-Austin was founded in 1883 on 40 acres near the state capital. It is the academic flagship of the UT System's 15 component institutions. Its reach extends well beyond its 357-acre main campus. Austin itself is the 21st largest city in the nation, located among the rolling hills and lakes of Central Texas. Technology and related industries have helped the city grow and prosper in recent years, and a

Larry R. Faulkner, the University of Texas at Austin president

low unemployment rate provides excellent job opportunities.

Other components of the University include the J.J. Pickle Research Campus, a 476-acre tract, eight miles north of the main campus, that houses research organizations in engineering, science, and the social sciences. The Brackenridge tract of 445 acres borders Town Lake, where research is conducted in life sciences. Montopolis Research Center is situated on 94 acres in southeast Austin. In addition, the University owns the Marine Science Institute at Port Aransas, the McDonald Observatory near Fort Davis, the Winesdale Historical Center near Round Top, the Bee Cave Research Center west of Austin, and J. Frank Dobie's ranch at Paisano. With 2,580 faculty members and 11,000 full-time and part-time staff members, the University is one of Austin's largest employers. Austin prides itself on being the "Live Music Capital of the World," and for those who like the outdoors, there are many parks throughout the area.

The University enrolls approximately 49,996 students—38,162 undergraduate, 10,428 graduate, and 1,406 law students. About 25 percent are in graduate and professional programs, giving UT-Austin the distinction of awarding the greatest number of doctoral degrees of any university in the nation.

For Texas residents, the average cost of tuition and fees for the 2000-2001 academic year was $3,800. Non-resident tuition and fees average $9,390. The most popular majors for incoming first-year students are liberal arts, natural sciences, and engineering. University-wide, the Hispanic enrollment was 11.8 percent for the Fall 2000 semester. Bachelor degree recipients for the Spring 2000 graduating class included 1,041 Hispanics out of a total of 7,805 undergraduate students. The number of Hispanic students during Spring 2000 who received bachelor's, graduate, or law degrees, out of a total of 11,572 graduates, was 1,311.

For the Fall 2000 semester, 132 of the University's 2,580 faculty members are Hispanic. UT faculty rank among the top scholars and scientists, distinguished nationally and internationally. Members recently received prestigious honors such as a MacArthur Fellowship
and the Pauling Medal. Others have won the Nobel Prize and Pulitzer Prize. Five current UT-Austin faculty have received the National Medal of Science, and one was granted the National Medal of Technology.

A major highlight of the University's development effort has been the substantial expansion of privately funded endowments for faculty positions. The University has more than 1,100 such endowments.

The Faculty & Staff Mentor Program uses the positive impact of students' relationships with faculty and staff outside the classroom to target first-year students from underrepresented populations in the University community. Students are provided with role models who share with them a perspective on dealing with academic, career, and personal issues.

The Gateway Program offers entering first-year students the opportunity to enroll in regular University courses with small class size that allows for individual assistance. It is designed to facilitate and enhance the students' transition from high school to college throughout their first and sophomore years. The program is administered through the office of the provost and the retention services area of the office of the dean of students. Gateway strives to make students feel at home, helps them succeed, and supports them on their journey of self-discovery at UT-Austin.

The Preview Program is a yearlong transition program that provides a head start in life and learning at the University. Preview begins with an introductory summer semester, including peer advising and activities relevant to the first-year-student experience that continue through the first year. The Program offers support and opportunities for students to adjust to the demands of the University environment both in and out of the classroom.

UT-Austin is one of three Southwestern members of the Association of American Universities, which is comprised of the 61 leading universities in the United States and Canada. The University leads all institutions in the South in the quality of its graduate programs, as well as in the number of doctoral degrees awarded. A total of 118 undergraduate degree programs and 196 graduate degree programs are offered by the University's 15 colleges and schools, including the Graduate School and Division of Continuing Education. Seven doctoral programs at UT-Austin rank in the top 10 in the nation, and 22 others rank in the top 50, according to a comprehensive study of the quality of graduate schools conducted by the National Research Council. Among Texas schools, UT-Austin is ranked No. 1 in 30 of the 37 fields in which it was evaluated. The report, titled Research-Doctorate Programs in the United States—Continuity and Change, covered more than 5,000 research-doctorate programs at more than 270 institutions in 41 fields of study. UT-Austin programs ranked in the top 10 are: civil engineering, computer sciences, aerospace engineering, classics, astrophysics/astronomy, chemical engineering, and ecology, evolution and behavior. The University offers more than 50 honors programs. Its "Plan II" liberal arts honors program is a national model. Adding international dimensions to campus scholarship are eight centers focused on Latin American, Asian, Middle Eastern, Mexican American, Argentine, African and Afro-American, Australian, and Soviet/East European studies.

President Faulkner reports, "The institute of Latin American Studies (ILAS) is widely regarded as the premier Latin American institute in the U.S., with more than 100 affiliated members who work primarily in the area of Latin America. In academic subjects related to Latin America, we graduate more students at the bachelor's, master's, and doctorate levels than any other U.S. university. UT-Austin's Benson Latin American Collection contains more than 70,000 volumes and is exceeded only by the Library of Congress. The Harry Ransom Humanities Research Center recently acquired a major collection of papers by renowned Argentine author Jorge Luis Borges. The collection contains more than 400 rare items, including several unpublished manuscripts and personal notebooks. UT's Latin American art collection includes works by more than 250 Latin American artists. A large portion of the new Jack S. Blanton Museum of Art will be dedicated to Latin American art."

Faulkner also points out the UT Press is the leading publisher of Latin American subjects in the United States, with more than a third of its book list pertaining to Latin America. Also of note is the UT-LANIC, the Latin American Network Information Center, the world's premier electronic gateway to Latin American subjects on the World Wide Web. LANIC is administered by the Institute of Latin American Studies, receives more than two million hits a month, and maintains links to more than 12,000 websites.

It is clear that Faulkner recognizes the importance of South Texas and Latin America to the future of Texas. He observes, "Latin America will play an enormous role in world affairs in this century. Many people have yet to recognize that fact." He says that one of his administration's major initiatives is to firmly establish UT-Austin as the leading university in Latin American studies in the United States, concluding, "That goal is within reach. In fact, we are already regarded as the best in the country by many observers. But quality is a moving target, and we intend to grow and improve in order to maintain our national status."
Ismael Rivera, Sr., often took his young son with him as he made his daily rounds in Puerto Rico.

“One of the things I used to do during my free time and my vacation time was go around with him and help organize workers to become members of the union,” said Ismael Rivera, Jr., from his office in Maryland. “In many instances, officers of the government would go to Puerto Rico to fight the organized movement. That’s when I first started to realize that something had to be done—going back to my teenage years.”

The tenets of such a movement—vocal leadership, determined willpower, and an astute awareness of shifting political winds—are crucial to his current position. On the cusp of his second year as president of the American Association for Affirmative Action, Rivera says there is a movement afoot in America, and a pressing need to marshal forces against it.

Increasingly, proposals at the ballot box are asking voters whether they want to dismantle the affirmative action measures constructed decades ago. Supporters of such propositions—in California and Florida, for instance—reason that such actions are necessary to combat preferential treatment, and have labeled affirmative action unworkable.

But those, such as Rivera, who have risen to challenge the proposals, say the measures should stay in place, that the political spin is out of control and navigating down a baseless path. Though soft-spoken, Rivera does not mince words when he is confronted with such opposition. Indeed, he savors debate like a prizefighter awaiting his next bout in the ring.

During an online chat on washingtonpost.com
last year, Rivera was lobbied questions striking at the heart of affirmative action. He challenged myths and insisted in no uncertain terms that “affirmative action is necessary because discrimination still exists.”

The American Association for Affirmative Action (AAAA), founded in 1974, brings together professionals who manage affirmative action, diversity, equal opportunity, and human resource programs. Its mission is to combat discrimination based on race, gender, or ethnicity, and to lobby for affirmative action and equal opportunity efforts.

Rivera rose through the ranks of the organization, serving as chair of its legislative committee, interim chair of its personnel committee, and co-chair of the 2000 annual conference. He represented the Association on the national board of the Leadership Conference on Civil Rights in Washington, D.C. And then last April, after a stint as first vice president, he took the reins of the 1,200-member group.

“In his administrative style, he is a very organized individual, very task-oriented, very goal-oriented, and focused,” says William Savage, AAAA’s first vice president. “I have seen under his administration an excellent management style of making sure the work of the Association is carried out in a most efficient and effective manner.”

“He’s a motivator, and he works hard to involve and engage others who have responsibilities within the Association,” says Savage, who is an assistant to the chancellor at the University of Pittsburgh and was chair of the AAAA’s 27th annual conference in Las Vegas in March.

Rivera is also the Association’s first president from the private sector. When he stepped into the role, he was the director of human resources operations and equal employment opportunity officer for the American Psychological Association in Washington.

Recently, he took a job as the vice president of client services for Berkshire Associates, Inc., a human resources and affirmative action software consulting firm. There, he directs audits and helps to develop affirmative action plans and training programs.

His résumé, though, displays fervor for accomplishment beyond the corporate walls. Rivera played varsity baseball at Ohio Wesleyan University and, along with his father, organized a cultural exchange for the team. The University team played four exhibition games in Puerto Rico, so players learned about the Hispanic culture.

Rivera once dreamed of hitting home runs in the big leagues, but opted to pursue another route. Though he remains a rabid sports fan, loyal to the Baltimore Orioles, he now hopes to pinch-hit for a cause more universal than baseball.

Just as Jackie Robinson broke boundaries when stepping up to the plate, Rivera hopes to break boundaries as well.

The Hispanic Outlook spoke with Rivera about his tenure, his goals, and the status of affirmative action in the country.

HO: Tell me about your organization.

RIVERA: The American Association for Affirmative Action is a nonprofit professional membership organization with a mission to provide the necessary resources for affirmative action officers or equal employment officers to network. They have an opportunity to share information and use our resources to enhance their profession.

The Association also provides an opportunity for affirmative action officers to share some of their knowledge and expertise with those who are starting in the profession—or perhaps to share experiences on how they have handled specific situations they are confronted with on a daily basis.
**HO:** How do you view affirmative action today?

**RIVERA:** Unlike the perception of many people that affirmative action is either dead or a non-issue, no longer a public policy, affirmative action is still as relevant and as strong as it has been in the past.

Clearly, from a public relations perspective and a political perspective, affirmative action has become a much more recognized policy. And usually when that happens, people become either more suspicious or more misinformed by different events that have occurred in the last five or six years.

For example, when Proposition 209 was being debated, there was a lot of misinformation being used by its opponents to try to eliminate affirmative action within the state of California. When a similar initiative came up on the ballot in Washington, there was a lot of misinformation about that, too, and what its intended purpose is.

**HO:** Then what is it and what is it intended to do?

**RIVERA:** Affirmative action is a policy that is sometimes easier to describe by what it is not than by what it is. It is not a statute to prohibit discrimination. That is what Title VII of the Civil Rights Act of 1964 is about.

Affirmative Action is a public policy that provides equal access and equal opportunity to individuals who might be in the minority with respect to issues of employment, with respect to opportunities for business and its creation and development. It also provides opportunities and access to education.

Those are the three main areas in which affirmative action operates: employment in business and development, contracting with higher education, and in providing higher education opportunities for admissions to colleges and universities.

It also provides a system by which employers are in essence required to keep certain data that would allow, if necessary, a determination of whether there was some kind of bias. There might be some underrepresentation of a particular class in the workforce—it doesn’t have to be discrimination.

With respect to contracting, it would allow an opportunity for women-owned businesses or minority-owned businesses to have equal access to state, local, or federal contracts—one where they would not be on a level playing field at first.

**HO:** Where do we stand on propositions, such as those in California and other states, to dismantle affirmative action efforts?

**RIVERA:** Nationally, affirmative action is still the law of the land. The focus allows the federal government to enforce affirmative action policy under Executive Order 11246, within the Department of Labor.

For the last two sessions of Congress, there has not been a move to abolish affirmative action the same way that it existed under the leadership of Newt Gingrich. He was trying to abolish a lot of the affirmative action programs at the federal and national level. I have not seen any further initiatives being presented—other than the one presented last year in the state of Florida, and within that state, there was not as much public support as [some] thought there would be.

**HO:** Will there be a stepped-up movement to abolish affirmative action?

**RIVERA:** I think there will be, but it will be at the judicial level, not on the legislative front. The strategy has shifted from pursuing the legislative branch to finding and looking at specific cases that can make it up to the U.S. Supreme Court, particularly now. If the Court becomes more conservative, they will have a better chance of getting a majority vote in the Supreme Court to abolish affirmative action through law.

**HO:** What are the myths about affirmative action?

**RIVERA:** One of the biggest myths about affirmative action is that it is reverse discrimination. One of the biggest myths about affirmative action is that it gives unqualified individuals the ability to compete. One of the myths is that it equals quotas. One of the myths is that it is detrimental to White males or affects White males negatively.

**HO:** Critics say the most qualified people don’t always get the jobs.

**RIVERA:** That’s a myth. That’s a good way to get an emotional reaction. We are a country that is a majority non-color, a majority White country. The truth of the matter is that the reason that the person was not hired was because he or she was not qualified for the job, or did not perhaps compare as favorably as the person who was selected.

It’s the easy way out—denouncing affirmative action and using it as an excuse when it was not the real reason why certain individuals may not have gotten the position or business contract.

**HO:** Why is affirmative action necessary?

**RIVERA:** There is a disproportionate impact in the opportunities being provided. And if there is not any incentive to any organization to become more diversified, we clearly would not be able to...
address that impact. Without a particular incentive and without the ability to measure progress, there is no way to become a more diverse and equal and open society, and that's important.

HO: The theme of the 27th Annual National Conference in Las Vegas is “forging a new beginning.” What separates this year’s convention from its predecessors?

RIVERA: This is the first time we are looking at affirmative action in a much broader perspective, not only as a public policy. We are looking at the bigger picture. As the theme indicates, it involves equity, it involves diversity.

Affirmative action is not an “it.” You have to provide access, and once you provide access, you open the doors. There has to be some equity in the process once people get through the door. If you have all of the things lined up, you clearly have the diversity to allow you to be more competitive in the future.

HO: In what ways has affirmative action changed your life?

RIVERA: In my life in college and in my profession, there have been instances when the fact that I brought a different approach, a different view, a different set of values, based on my cultural background, provided me with an advantage. At the same time, it provided benefits to the organizations I have been involved with—benefits they would not have received had it not been for the access provided to me.

HO: Your organization does not make political endorsements, but it publicly criticized George W. Bush’s nomination of Linda Chavez for secretary of labor. What would have happened had she secured that position?

RIVERA: I think clearly there would have been fewer appropriations and less funding and less of an emphasis on enforcement of affirmative action. Organizations would not have had the initiative to follow affirmative action and would become less interested in doing so. Knowing that enforcement would be lacking, they wouldn’t be concerned about their conduct and behavior.

Politically, I don’t think they would come out and say, “We are going to abolish affirmative action,” but we’re just going to squeeze it to the point where it would become completely ineffective.

HO: What was your reaction to her nomination?

RIVERA: I was surprised by it because of her longstanding, extreme-conservative views. If he thought that just because she was Hispanic, she would not be subject to criticism from even Hispanic groups, then I think he miscalculated. It’s not necessarily who the person is but what kind of ideas does he or she bring to the table and represent. A number of Hispanic organizations were displeased by her nomination.

If Bush wanted to follow up on his philosophy of being a uniter, not a divider, and wanted to extend an olive branch—I think he poured salt on the wounds.

HO: How do you see your role as president?

RIVERA: In order for affirmative action to be stronger than it is today, there has to be more and better networking of groups and organizations that support it. That’s one reason why we were not as successful in the past in combating initiatives like the ones in California and Washington. It’s because we did not do as good a job as we should have in educating and in public relations, and putting out our success stories on what affirmative action has done for this country and can continue to do for this country.

Frankly, one of the limitations of being a nonprofit organization is that we do not have the financial resources that other organizations have to combat the public relations war.

HO: Growing up, what do you recall seeing that created a disparity of opportunities for people of color?

RIVERA: Look at history and realize that this country has a legacy that cannot be completely and fully ignored, from the foundation of the country all the way to the recent history, in terms of how individuals of color were seen as not equal under the law, through slavery and the right to vote. There is a history that lingers today, when, in the year 2004, we’re still debating whether or not the Confederate flag should be flown in public buildings. When we still deal today with racial profiling. When a tremendously disproportionate number of males in the judicial process still happen to be members of colored groups.

Look at education and the fact that many Black and Hispanic and Native American kids who are going to school are in systems where the quality of schools is not on a par with that of the schools of the non-minorities.

HO: You are the first AAAA president from the private sector, not from an institution of higher learning. Was there concern you would not understand higher education’s needs?

RIVERA: Affirmative action is more global. It involves the private sector as much as the public and higher education. There has not been any concern. . . . We have an international and diverse group of individuals not just from higher education but also from the private and public sectors. I think we are a stronger organization because of those perspectives.

HO: Why are you so impassioned about this?

RIVERA: Growing up, I could see how Puerto Ricans were being treated differently and how there was a misconception about the quality of work they could do. There was some misapplication of policies and procedures that adversely affected Puerto Ricans working in Puerto Rico. I think that’s what opened my eyes.

HO: How would you describe that feeling, that awareness?

RIVERA: In Puerto Rico you never see statistics kept that you are a black or white Puerto Rican. You’re just plain and simple a Puerto Rican. What I always find interesting, and this is something I caught early on in my childhood, is that if my parents were to have lived here in the United States, my father would be considered White because he is light-skinned and my mother would be considered Black because she is dark-skinned.

When we lived as a family in Puerto Rico, this was not an issue. When I came here to the United States, I realized how different our lives would be if we lived here, only because of the color of our skin. I was confused by it, and I wondered why it made a difference.

HO: Have things changed much since then?

RIVERA: Are things better now than they were in the ’60s? Yes, they’re better. But are they good enough that we can say we follow the language of our Constitution and there’s justice for all? No. I still don’t think we’ve reached that stage. I think people are still being looked at and treated based on the way they look, not on who they are.
Voices of Insight & Power

Rockefeller Brothers Fund

BY MARILYN GILROY
Recruiting the best teachers, meaning those who are bright, well-educated, and committed, is one of the most critical problems facing the public schools in the next decade. The need for minority teachers is even more pressing because of changing demographics in both urban and suburban districts.

Some school systems, such as that of New York City, are experimenting with programs that extend teaching opportunities to hundreds of individuals who want to change careers but do not have traditional education degrees or qualifications. It is a risky venture, and many of those who joined the program last fall have found it to be extremely challenging, requiring much more preparation and stamina than they ever dreamed.

The Rockefeller Brothers Fund (RBF) has an approach to recruiting teachers that operates on a much smaller scale but achieves a greater rate of success. The Fund's Fellowships for Minority Students Entering the Teaching Profession, launched in 1992, has recruited 150 minority undergraduate students and given them the financial and professional support needed to enter teaching. These students have come from some of the nation’s finest colleges and universities and, in general, have strong liberal arts and sciences backgrounds. They did not major in education; rather, they became interested in teaching through the encouragement of faculty mentors who actively reached out and urged them to apply for the fellowship.

"These students were selected because their liberal arts education has given them exposure to a variety of subjects and they have the potential to become good teachers," said Ivey Allen, director of the RBF fellowship program for three years. "We believe in choosing them at this level and helping them get the proper experience and training in education in graduate school."

Recruiting the Best and the Brightest

Designing a program to increase the proportion of minority teachers was no easy task, not even for the venerable Rockefeller Brothers Fund. There are many barriers that deter talented minority college students from entering teaching, most notably the low prestige and salaries that come with working in the public schools. In addition, minority students' families often have higher aspirations for their sons and daughters, many of whom are the first in their families to attend college. The applicants themselves had doubts about their financial and emotional capacity to attend graduate school, even though their talents and enthusiasm were apparent.

"They knew that they could earn much more as doctors, lawyers, or accountants," said Allen. "But in the end, they were very committed. They realized that they could make a difference by being role models in the lives of their students."

"Administrators for the fellowship program recognized that they would have to provide awards and incentives to students, but they also understood that the participants needed plenty of mentoring and reinforcement along the way. And so, the recruitment and selection process was a careful blend of trying to attract the best possible candidates and sustaining their interest in the teaching profession."

"As undergraduates, the fellows already have a mentor on campus," explains Allen. "Someone who has encouraged them to apply and guides them through the screening process."

Each of the 25 participating colleges and universities can nominate up to three candidates. Institutions use a variety of criteria to choose among applicants, including academic performance, communication skills, commitment to public service, letters of recommendation, and interviews.

The Fund screens the applications and forms a committee to choose finalists, who are eligible for up to $16,000 in financial assistance for education. Once the 25 fellows have been selected, they are awarded a stipend to complete a project in the field of education during the summer between their junior and senior years. They then receive financial assistance as they complete college and are eligible for grants to help pay for graduate school.

"They can go to graduate school anywhere," said Allen. "Some elect to stay where they are, but others take this opportunity to relocate."

After they have entered graduate school, fellows are invited to summer workshops where previous fellowship recipients make presentations on their graduate school experiences and set up counseling sessions for those who need one-on-one advice.

According to Miriam Anes, fellowship program administrator, these links to former fellows are tremendously helpful and an important component of the program. The summer workshops continue throughout the program and after participants have secured teaching positions.

"They come back every year to visit and get reacquainted with each other, but also to exchange information," said Anes. "They talk about frustrations
and challenges in teaching, including discipline problems, lack of parental involvement, and the unavailability of mentors in some schools that have high turnover in their teaching staff. They also help us recruit new fellows."

Anses said that for many fellows, the workshops are a lifeline to a valuable support network of minority teachers. Some of the fellows have selected difficult teaching assignments in urban areas where the need is great but so are the challenges. It is often a personal choice, born out of their own experience as minorities and a sense of the special role they play as teachers of color.

"Our only requirement is that they must teach in a public school," said Allen. "They can choose the district. The beauty of this program is seeing the commitment the fellows have made to teaching and their students."

But commitment is sometimes not enough when teaching becomes grueling and frustrating, as it often does for even the best teachers. That is where the continuing support provided by the fellows network can make a difference. One participant recalled that through the fellowship, she made lasting friends with whom she shares "the joys and troubles of teaching...giving me the endurance and motivation to work day by day."

There is also a hope that former fellows will become leaders in the field of teaching. The fellowship program began a leadership component in 1998 for fellows with three years of classroom experience. Participants are awarded grants to conduct programs for educational change and to engage in professional growth activities.
"We want them to be leaders in their field and advocates for teachers," said Allen.

Officials at the fellowship program are proud of their accomplishments and are just completing the selection process for the Class of 2001. As of this writing, 120 fellows have stayed in teaching or in education-related fields. According to Allen, Latino fellows as a group have demonstrated the most "staying power."

"Their commitment is inspiring," said Allen.

**A Tale of Two Fellows**

William Marroquin (pictured below) is currently a teacher of math at Fremont High School in Sunnyvale, Calif. His journey to the classroom began in San Salvador when he watched his father write out numbers related to his job earnings and family expenses. Eventually, the numbers showed that the family would have to move north if it wanted a better life. They settled in Los Angeles, where Marroquin's father found work.

Marroquin attended Belmont High School, which was noted for a high degree of gang violence. But even in that tough environment, he found a teacher who nurtured his interest in education, especially mathematics. With the support and encouragement of his high school mentor, Marroquin entered college and completed his study at the University of California-Riverside. He applied for and received a Rockefeller Brothers Fund fellowship, which enabled him to attend Stanford University for graduate work in education.

"The fellowship program helped me to attend Stanford, the graduate school of my dreams," he said. "But it also gave me strong ties with people who care about education, and this gave me inspiration to continue my schooling. I gained self-confidence in my abilities, and the Rockefeller name opened doors for me."

Marroquin tries to pass that confidence on to his students who come from economically and racially diverse backgrounds. He is able to stimulate his students' interest in mathematics by bringing reality into the classroom and helping them apply abstract concepts and formulas to very practical problems. For example, one day he asked them to use measurements from skid marks at highway accidents to determine the speed at which cars had been going before they braked.

Another project involved developing measurements for building a 3,500 square foot house while keeping the volume of the rooms as small as possible in order to save on air-conditioning and heating costs. Marroquin also assigned his students the task of budgeting for a quinceañera, the traditional party for Latin American girls turning 15.

"From the beginning of time," Marroquin said in an interview, "people have used math to figure out things they need to know. I believe that we have to go back to those simple ideas and needs that people have for math. It's time to bring some of that back into teaching."

Across the country in Arlington, Virginia, Marroquin's counterpart, Carmen de la Cruz (pictured opposite page), teaches third graders at Francis Scott Key Elementary School. She teaches in an immersion program that helps the students, half of whom come from Spanish-speaking families, learn the written and spoken English needed to master their schoolwork. It is a journey that de la Cruz is familiar with for she was thrown into an English-speaking school in Brooklyn, where her parents had brought her after emigrating from the Dominican Republic.

Because she was treated like a "dumby" in her new environment, de la Cruz struggled through classes and fell further behind. But one of her teachers, a Puerto Rican, recognized that she was having problems with the language, and he let her turn in some assignments in Spanish. This helped her overcome both a sense of inferiority and other obstacles that were holding her back.

Today, de la Cruz is determined to minimize her students' sense of embarrassment and uncertainty as they navigate learning in two languages.

"I'm a total believer in the immersion program," she said. "I only have to think back to when I was in sixth grade. There was one room where I
could be successful because I had an understanding teacher—it was OK to be who I was. But in the other rooms, it wasn’t OK—I wasn’t respected for who I was. That’s what made me so militant and what has since made me a role model to my students. I can look at them and say, ‘I’ve been there.’”

De la Cruz says that the RBF fellowship allowed her to afford graduate school and be selective about which university she attended. She has completed her student loan payments and is enthusiastic about both the financial and emotional support she received from the Fund.

“Thanks to the support of the Fund, I was able to complete a dream,” said de la Cruz. “Through the fellowship program, I have also met wonderful, inspiring people. They have given me the opportunity of my life.”

Permission to print the Fellows’ profiles in this article was granted by the Rockefeller Brothers Fund, Inc.

Institutions selected to participate in the program are:
- Amherst College
- Brown University
- City University of New York
- Dartmouth College
- Duke University
- Emory University
- Howard University
- Macalester College
- Montana State University
- Mount St. Mary’s College
- Oberlin College
- Pace University
- Pomona College
- Princeton University
- Spelman College
- Swarthmore College
- Southwest Texas State University
- Tulane University
- University of California-Riverside
- University of Michigan
- University of Pennsylvania
- University of Texas at El Paso
- Wellesley College
- Wesleyan University
- Williams College

ABOUT THE ROCKEFELLER BROTHERS FUND

Founded in 1940, the Rockefeller Brothers Fund initiated its education program to strengthen the numbers of and quality of teachers in American public education through support of the identification, training, induction, and continuing development of individuals of the highest quality in the teaching profession.

Twenty-five colleges and universities participate in the fellowship program. Each institution was selected on the basis of its undergraduate program, its record of commitment to the education of minorities, and its stated goals to improve teaching in the public schools.
Hispanic Doctorates Down in 1999

Only Minority with Decrease, Says New Report

BY GUSTAVO A. MELLANDER

In the 19th century, American higher education became convinced of the value of European, especially German, doctorates. Those who possessed them were eagerly hired. Many a young man—and most were men—in those days went off to Europe to earn a doctorate to secure their place in America's higher education firmament. Later on, American universities began to produce their own doctorates.

From the very beginning, a doctorate has been the "union card" for those seeking a career in academia. Even community colleges that don't require a doctorate of hires have their percentage of Ph.D.s.

The thirty-third in a series of reports on research doctorates awarded by colleges and universities in the U.S. has just been published. The overall response rate for the 1999 survey was 91.7 percent.

"Doctorate Recipients from United States Universities" for 1999 is the most comprehensive annual document issued. It reviews overall trends in seven broad fields. Trends in doctorate awards by gender, race/ethnicity, citizenship, parental education, and time to degree are also described. The report concludes with a discussion of the sources of financial support during graduate school, and the postgraduation status and plans of doctorate recipients.

Trends and Rates of Change

After 13 consecutive years of annual increases in the number of research doctorates received, a 36 percent decrease from the previous year occurred in the 1999 academic year. For the twelve-month period ending June 30, 1999, U.S. universities awarded 41,140 research doctoral degrees, down from 62,683 in the previous year. The only annual drop that was larger was the 37 percent decrease between 1976 and 1977.

For the last 40 years, the increase in U.S. doctorates has averaged 3.8 percent per year. Between 1961, when the number awarded exceeded 10,000 for the first time, and 1967, the annual growth rate was almost 12 percent, and the number awarded virtually doubled (20,409).

Four years later, in 1971, the annual total topped 30,000 (31,867) for the first time. The decades of the 1970s and 1980s saw periods of more modest increases, and in seven of those years, even the annual totals declined. The total figure did not exceed 40,000 until 1994 (41,034), 23 years after hitting the 30,000 plateau. And not until 1989 did the annual total—34,327—exceed the previous high-water mark of 33,755 set in 1973.

Over the past few years, annual rates of increase have become smaller than in the first half of the 1990s, showing gains of only 0.3 percent per year for both 1997 and 1998; thus the 1999 total number of doctorates is approximately the same as it was five years ago (41,140 versus 41,034).

Overall in 1999, 57 percent of the doctorate recipients were male, about two-thirds were U.S. citizens, approximately 64 percent were White, and about 6 in 10 were currently married or living in a marriage-like relationship. The typical recipient was slightly under 34 years of age when the degree was awarded.

Doctorates by Gender

The aggregate decrease in doctorates between 1993 and 1999—36 percent—varied by gender. For males, there was a 4.8 percent decline; for females, only 2.0. The numbers awarded both to men and to women fell in 1999: 1,193 fewer men and 365 fewer women than in 1998.

The net effect is that for 1999, females received 42.7 percent of all doctorates, up from a highest ever of 42.0 percent in 1998. This marks the fourth consecutive year of over 40 percent for women.

Five years earlier (1994), females earned 38.7 percent of all doctorates; 10 years earlier (1989), 36.5; and 25 years earlier (1974), 31.

As for distribution across broad fields of study, for 1999, women earned 64.2 percent of all education doctorates, 54.5 percent in the social sciences, and 48.9 in the humanities. In the physical sciences, only 23.4 percent, and in engineering, 14.8.
But even these still-low percentages have shown a remarkable change over time. 25 years ago, when females were only 19.5 percent of all doctorate recipients, they constituted 77 percent and 10 percent in the physical sciences and engineering, respectively. Similar long-term trends are discernible in other broad fields, like the life sciences.

In 1999, females represented 36.4 percent of science and engineering doctorate recipients and 48.2 percent of degrees in non-S&E fields. Of 25 subfields reflected in the report, women were the majority of doctorate recipients in seven fields, of doctorates earned by whites, 47.1 percent were awarded to women; for Blacks, various Hispanic groups, and American Indians, women were in the majority, earning between 55 percent and 62 percent of doctorates received by persons of those races or ethnicities. Among Asian Americans, women were only 41.7 percent of the total. For U.S. citizens as a whole, 47.9 percent of all doctorates awarded in 1999 went to women, up from 47.7 percent in 1998 and continuing a long-term trend of U.S. women approaching parity with their male counterparts. For example, in 1975, among U.S. citizens, women earned only 31.0 percent of all doctorates.

In fact, the number of male U.S. citizens earning doctorates was more than 3,000 higher in 1979 than in 1999, and in the 1990s, while the number of doctorates going to U.S. males is relatively level, the number earned by U.S. women has increased every year except 1999.

By Race/Ethnicity

Nearly 16 percent of all doctorates awarded to U.S. citizens in 1999 were earned by U.S. racial/ethnic minority groups. This is the largest percentage ever, and continues a steady upward trend. Among the 27,177 doctorates earned in 1999 by U.S. citizens who identified their race/ethnicity (98.4 percent of all U.S. citizen doctorates), 1,996 doctorates were earned by Blacks; 1,109 were earned by Hispanics; 1,324, by Asians; and 297, by American Indians.

The broad fields with the largest percentages of minorities were education, in which Blacks were the predominant minority, and engineering, in which Asians were predominant. While the total number of doctorates fell between 1998 and 1999, for U.S. citizens, the minority aggregate increased 5.1 percent. Within race/ethnic categories, Asians and American Indians showed the largest percentage gains, 12.8 percent and 15.9 percent, respectively; the corresponding figure for Blacks was 7.6 percent.

Hispanics were the only minority group to register a decrease in the number of doctorates in 1999, falling by 7.4 percent. White recipients fell 1.8 percent. A total of 4,248 doctorates were awarded to members of U.S. racial/ethnic groupings in 1999, an increase of 38 percent over 1994 and nearly double the number for 1989.

U.S. minorities received more doctorates in 1999 than in 1998 in five of the seven groupings, in only one area—education—did the number fall; for engineering, the 1998 and 1999 totals were identical. If 1994 is compared with 1999, two years in which the total numbers of
doctorates awarded were virtually the same, minorities registered sizable gains in all seven broad fields, ranging from a 22.6 percent increase in the physical sciences to a 56.4 percent increase in the social sciences. Over that same period, the number of doctorates awarded to Whites fell by 37 percent.

Racial or Ethnic Grouping
Asians and Blacks showed increases in every one of the seven broad fields between 1998 and 1999. Hispanics and American Indians registered gains in some fields but declines in others.

In general, the leading institutions awarding doctorates to Hispanics lie in the Southwest, particularly in California, and in Puerto Rico. The top 10 account for 22.9 percent of all Hispanic doctorates.

The concentration of U.S. minority doctorate recipients among institutions is considerably greater than for the doctoral population as a whole. In 1999, for percent of those with firm employment commitments noted higher education as their intended work sector. About one-fifth (21.9 percent) indicated industry or self-employment; 87 percent said some level of government; the remaining 12.6 percent indicated "other.”

the only to register a number of 1999, falling by Among the earned in citizens who race/ethnicity 1,109 were Hispanics.

Bottom Line: The Future, Employment
About 70 percent of the new Ph.D.s had definite postgraduation commitments for employment or continued study when they completed the survey. Of those, 69.8 percent will work, and 30.2 percent will continue their studies as post-doctorates. For U.S. citizens, 51.7

This article is based on data presented in the annual "Survey of Earned Doctorates,” a census of research doctorate recipients who earned their degrees between July 1, 1998, and June 30, 1999. The survey, conducted since 1958, is sponsored by six federal agencies: the National Science Foundation, the National Institutes of Health, the U.S. Department of Education, the National Endowment for the Humanities, the U.S. Department of Agriculture, and the National Aeronautics and Space Administration.

NSH MBA Bestows Prestigious Brillante Award

Recipients include IBM, Andersen Consulting, Rice University Graduate School of Management, and Emilio Estefan

BY INÉS PINTO ALICEA

The Spanish word brillante translates in English into bright, radiant, and shining.

The National Society of Hispanic MBAs (NSH MBA) uses this Spanish word and its English equivalents to describe the recipients of its prestigious annual honor.

The Brillante Award was established to recognize those who "foster Hispanic leadership through graduate management education and professional development in order to improve society," said Henry Hernández, Jr., executive director of global diversity leadership for Pitney Bowes, Inc., of Stamford, Conn. Hernández is one of the principal co-founders of NSH MBA, the organization's first national president, and a co-creator of the award.

The society's membership nominees potential recipients, and the group's national board of directors makes the final selection.

The Brillante Awards are given under several categories for exceptional contributions to the Hispanic community. Those categories are: educational institution, NSH MBA member, corporate, individual, and not-for-profit organization. The 2000 awards were presented at the NSH MBA annual conference last November in Orlando.

Rice University's Jesse H. Jones Graduate School of Management won the 2000 Brillante Award. It was the third year that an educational institution was honored by the organization. Previous educational institutions honored are the Anderson School at UCLA and the Graduate School of Management at the University of Dallas.

"We're very pleased to have our efforts to serve both our students and the larger community recognized by the National Society for Hispanic MBA's Brillante Award," said Gilbert R. Whitaker, Jr., dean of the Jones School at Rice.

"Successful business people must be comfortable with diversity; they must understand that the best business decisions come from multiple perspectives. The Jones School actively promotes diversity in our faculty and students and in our approach to teaching business leadership."

"The Jones School has provided exemplary leadership and resources in a variety of diversity initiatives," said Martha Salinas, a database marketing specialist for Compaq Computer, who nominated the Jones School because it revitalized and strengthened the Houston NSH MBA chapter, of which she is president.

For example, the Jones School and NSH MBA have for the past three years co-sponsored the Houston Hispanic Professional Leadership Day, and hosted a regional leadership development conference for the central region of NSH MBA. It also conducts diversity workshops as part of the MBA curriculum and regularly offers an executive education course in "Leading the Workforce of the Future."

"Not a lot of people will go out of their way to help," said Salinas. "This is a big way to say thanks for helping our mission."

Other recipients for 2000 were:

Pictured from left are: Rosendo Cruz Jr., NSH MBA national fund-raising chair; Kay Henry; Henry Hernández, NSH MBA founder and board strategic adviser; and Diane Summers. The awards ceremony was held during NSH MBA's 11th Annual National Conference and Career Expo held at Walt Disney's Coronado Springs Resort.

32 HISPANIC OUTLOOK 04/09/2001
Corporate Category—International Business Machines, which created a series of task forces in 1995, including the Hispanic Task Force and IBM Hispanic Leadership.

These two task forces have been instrumental in creating change and getting the company recognized for its diversity efforts. Latino executives in the company grew from 46 to 64, and the company now has 11 Latino Diversity Network Groups in the United States for professional mentoring, coaching, and teaming.

Corporate Executive—Nelie González, the North American diversity director for Andersen Consulting. She helped develop a minority scholarship program, established a Local Office Diversity Committee now replicated in 25 other locations, and created a North East Diversity Alliance Group by joining with other companies to share best practices in diversity.

Entrepreneur Award—Emilio Estefan, Jr., the founder and chair of Estefan Enterprises, is a five-time Grammy winner who heads a multimillion-dollar conglomerate that includes Crescent Moon Studios (called the Motown of Latin music) as well as restaurants and holdings in the hospitality industry. He has been instrumental in managing the successful entertainment career not only of his wife, Gloria Estefan, but also of entertainers Carlos Ponce, Shakira, and Jon Secada.

NHS MBA Member Service Award—Luis Colón, a member of the NHS MBA Denver chapter and e-business strategist with XOR Inc. in Boulder, Colorado, specializing in e-business solutions for corporations. Colón was instrumental in development, planning, and training recruitment for the central region's Leadership and Chapter Development Workshop. The program focused on strategic goals, organizational structure, succession planning, and knowledge transfer for the presidents and executive vice presidents from NHS MBA's central region chapters to strengthen the impact of each chapter and prepare officers for national leadership.

Non-profit Award—the Hispanic Austin Leadership Program of the Greater Austin Hispanic Chamber of Commerce. The Program builds civic awareness and leadership skills of 35 selected Hispanic leaders annually. These community advocates are given structured opportunities to learn skills and strategies to effect proactive changes required to create equity, opportuni-

ty, and a better quality of life for all of Austin's citizenry. The Program identifies emerging Hispanic leaders and exposes them to other community leaders with opportunities in community development and decision-making. It engages these leaders in hands-on intern-leadership experiences on policymaking boards that can allow them to accept future community leadership roles.

The shape of the award is that of a flame. The flame is made of crystal and sits on a base of marble. Hernández, a recipient himself of the Brillante award, said the award was initially created to help the group become better known across the country and was the brainchild of one of the group’s founding members who has since passed away.

"He wanted to make sure that whatever we did made us known," said Hernández.

"We thought about what it would take, and we decided to create some kind of award that would recognize others but at the same time would get our organization known.”

The group decided to honor three recipients in 1989—a corporation, an individual, and a nonprofit organization. The first three recipients of the award were Pepsico, the former Mayor of Los Angeles, Richard Riordan, who had developed a program at the University of California at Los Angeles to get youths to consider a business career; and the Consortium for Graduate Study in Management, which helps recruit minorities for MBA programs. The award has since been expanded to honor recipients in other categories.

"That award was our way of becoming known," said Hernández. "It worked. It gave us some credibility.”

Other past institutional and corporate winners of the Brillante Award include the United States Hispanic Chamber of Commerce, the Kellogg Foundation, Kraft General Foods, American Express, Berger King Corp., Anoco Corp., US West Communications, Boys & Girls Clubs of America, the National Hispanic Scholarship Fund, ASPIRA, AT&T, Citigroup, ARCO, Hewlett Packard, the Prudential, and the Quaker Oats Company.

NHS MBA officials said it is important to honor those who strive to increase the numbers of Latinos pursuing graduate management education because the numbers are still small, even though they are growing.

In the 1976-77 school year, Latinos comprised 572 or 1.2 percent of the 46,157 total MBA graduates. In the 1996-97 school year, Hispanics were 3.2 percent or

* Total Degrees Granted as the only figures available. 
Source: National Society of Hispanic MBAs based on data obtained from the U.S. Department of Education.

3,163 of the 97,809 of all MBA graduates, according to NSH MBA. Blacks that same year comprised 65 percent of all MBA graduates. Moreover, Latinos comprised less than two percent of Fortune 1000 CEOs five years ago, and that percentage has doubled since, according to Hernández, but is still very low.

But officials of the Dallas-based NSH MBA are optimistic. "The best is yet to come," said John Honaman, NSH MBA national executive director. "We've grown so much and so fast that it is difficult to believe that we have more than 2,100 registered members. I believe that for our community and for us, the best is yet to come in the 21st century, what many are calling the Hispanic Century."

The nonprofit organization now has 21 chapters across the country, with four more in formation. The organization hopes to increase its members to 4,000 by 2003.

To enhance the business skills of NSH MBA members, professional development programs are offered at both the national and chapter levels. Leadership workshops and seminars are held during the national conference and career expo. These sessions, which provide business skill building, are led by nationally known business leaders. Some sessions offer Continuing Professional Education credits. Throughout the year, individual chapters offer professional development seminars on topics such as entrepreneurship, financial management, and business leadership.

The organization has five goals, all related to Hispanic business professionals: to increase Hispanic enrollment in graduate management programs; assist in their recruitment, career development, and promotion in public and private sectors and small business settings; provide networking opportunities; promote their leadership and entrepreneurship through professional development; and provide an infrastructure to support goals.

Salinas said the organization needs to develop more programs for MBAs who have been working for more than a decade, to build the organization's membership.

"People have limited time, and we are competing with other organizations for their membership," said Salinas. "The key is getting them interested and wanting to participate."

From the NSH MBA website (www.nshmba.org) to the job fair for Hispanic professionals and MBA students, NSH MBA offers a variety of career services to members. Corporate human resources departments and search firms regularly access its Career Center online resume database to search for qualified candidates. Chapters receive open position listings from companies located in their local areas and distribute them to members via newsletter or at chapter events.

The organization also offers help to students pursuing graduate studies in management or business. In 1991, NSH MBA established a scholarship program for Hispanic students pursuing a master's degree in management or business. One is for $10,900. Others range from $2,000-$5,900. NSH MBA presented 88 students with $285,900 in scholarship monies in 1999. To find out more about the scholarship program, see the organization's website, call the national office at 1-877-467-4622, or write NSH MBA Scholarship Program, 8004 Elmbrook Street, #255, Dallas, TX 75247. The deadline for the scholarship program is mid-July.

From its beginnings, NSH MBA sought to remedy the lack of Hispanic leaders in the executive suites and boardrooms of corporate America (according to the Washington-based Hispanic Association of Corporate Responsibility, Latinos comprise only 1.57 percent of all board seats on Fortune 1000 companies) and the public sector. The organization was founded in 1988 and quickly expanded to chapters in cities with large Latino populations: Los Angeles, San Francisco, Chicago, New York, Miami, and Houston.

"I never envisioned this kind of growth," said Hernández. "To this day, I look back and say I can't believe we grew this fast...."

Hernández attributes the bulk of the rapid growth to the tremendous amount of interest from potential MBAs and sponsors. The organization, he said, filled "an unmet need."

"People take a liking to the values that the organization has and the types of people it attracts," said Hernández. "I like to call us the fastest growing Hispanic professional group, and I think we are. We came up from nowhere, and there were plenty of skeptics. But we're MBAs; we're very entrepreneurial. We applied our skills and abilities we had developed as graduate business students, and we succeeded."

HD
The mission of ACE, NASA’s Autonomous Control Engineering program, is to develop new science and technology concepts that are of immediate use to both NASA and U.S. industry.

The vision of ACE is to become a vital resource for cost-effective research in control and other technologies related to NASA’s mission. ACE plans to become a self-supporting group with a reputation for delivering quality results on time, and within the budget. ACE also plans to create commercial products for the national economy.

In 1995, NASA’s ACE program at the University of New Mexico (UNM) took a chance and set a lofty goal of helping 50 minority students obtain their postgraduate degrees in a five-year period.

It was a gamble, but at the end of the five years, the goal was surpassed, and 56 students earned their degrees. Twelve students received Ph.D.s, and 44 students received master’s degrees. The majority of these students graduated from UNM, with some 35 percent coming from North Carolina A&T State University.

Mo Jamshidi, founding director of the ACE Center and regents professor of electrical and computer engineering at UNM, says he knew ACE would follow through with its goal and is proud of ACE’s accomplishments and commitment. He says that ACE helps increase the opportunities and possibilities of science and technology education and research for all minorities.

“The percentage of minorities with engineering and science degrees is pretty low in America,” Jamshidi says. “It is important that UNM help increase the number of minorities in top-level engineering and science fields, including minority faculty members.”
According to Jamshidi, UNM is leading the way in helping students achieve their goals. And ACE is committed to augmenting diversity in science and engineering while enhancing public understanding of science and engineering and ethics in those fields. In addition, ACE prepares high school students for science/engineering disciplines in college. The program makes scholarships available to bring qualified students to UNM, and helps them through their graduate studies. Program professors advise and guide students through their courses of study. The program boasts state-of-the-art laboratories and equipment to help students with class projects, theses, and dissertations. And it fosters contacts with numerous government, academic, and industrial partners to help all graduates transition smoothly into the work force.

Up-and-Coming Students

Of the 30 students enrolled in UNM ACE last fall, 10 were undergraduates, 11 were master's students, and nine were working on Ph.D.s. ACE has many other students at other locations and fellows around the nation. Each student works on various research projects with help from research professors and mentors.

Greg Chávez, a newcomer to ACE from Taos, N.M., says the program has motivated him to pursue a higher degree. He received his bachelor's degree in civil engineering from New Mexico State University and worked in private industry, but wanted to further his education. As an undergraduate, Chávez participated in several programs, but says that ACE gives students the edge in working with some of the best researchers in the field.

“I am excited to be a part of the program, and, more importantly, I am grateful that I will be able to learn new ways to help society,” Chávez says, adding that he is interested in learning how to be a better civil engineer. “I am interested in the design of buildings and structures, and I want to learn more about highways and roads. They are the lifelines for society.” Chávez appreciates the assistance from the program. “My mentor in the program has given me the confidence I need to succeed,” he says. “I plan to be a research assistant for now, then eventually will be able to conduct my own research.”

Jonathan Lucero, a Ph.D. candidate from Denver, Colo., received his master's in civil engineering at UNM. He says he likes the exposure he receives as a student at the ACE Center and enjoys working and communicating with professional electrical engineers.

“The experience I am receiving crosses the traditional boundaries of civil engineering,” he says. “I feel like I am part of something really big, and I enjoy the one-to-one contact with various professors and researchers.”

Lucero is working on fuzzy-logic solutions to partial differential equations and distributed parameter systems. What does that mean? He says it means solving complex systems using rules of expert knowledge. The problems are computer-based.

His advice to minorities interested in pursuing degrees in science and engineering is to make sure they follow their dreams and take advantage of the opportunities offered to minorities. “A nice part of ACE is the experience I am getting by presenting my research to a variety of people,” Lucero says. “My first challenge was learning how to present and be confident in explaining my research.”

Ana Martínez, a native of El Paso, Texas, became involved with ACE in 1999. She received her undergraduate and master's degrees at University of Texas-El Paso and attended graduate school at the University of Illinois at Urbana-Champaign for one year. But her heart was in the Southwest, and she knew that ACE was the program for her. In addition to working on her Ph.D. at the UNM ACE Center, Martínez started working at Sandia National Laboratories on communication systems.

“It’s definitely a challenge,” Martínez says. “The challenge of solving real problems and doing something with applied science is phenomenal. The bottom line is helping people.” Martínez says her goal after getting her Ph.D. is to work full-time in industry and teach as an adjunct professor. “I’m sticking to my goals and going full swing,” she says, adding that she attributes her perseverance to her family, especially to her parents.
“My grandfather would ask when I would get to go to the moon,” she says. “But hopefully someday my research will assist more than just getting to the moon.”

Stellar Graduates in the Field

ACE graduates put their degrees to good use for the nation. Many are now working for some of the country’s biggest corporations, including IBM, Honeywell, Lucent Technologies, Lockheed Martin, and others, and many are also working in national laboratories. Five ACE graduates are currently at NASA field centers. Some graduates plan to come back for additional education and research.

Former ACE scholar Denise Padilla is now a researcher at Sandia National Laboratories. She is part of a research team developing a MEMS micro-gyroscope and is also involved with developing obstacle-detection algorithms and techniques for autonomous mobile robots.

Padilla says that ACE involves each student in real engineering problems and research, and encourages team efforts. “Engineering is a vast field of interesting work. Diversity is the key to success in any area of business,” Padilla says. “Time management is one of the most beneficial skills brought out of ACE.”

Doctoral ACE graduate Edward Tunstel is now a senior robotics engineer at the NASA Jet Propulsion Laboratory. He does research and flight development of mobile robots for space exploration. His current research projects include development of autonomous rover navigation and control technologies that allow for asteroid exploration, planetary rover outposts on Mars and the moon, and safe long-distance travel by rovers in challenging Martian terrain. He is also involved in algorithm and software development for a flight rover to be deployed on an asteroid surface for NASA.

Robert Álvarez, a UNM ACE fellow, received his Ph.D. with the help of ACE and currently is employed as the manager of TASC, Inc., in Albuquerque. He says he has never seen a program that focuses on caring for its students for so long. Álvarez says ACE is a full-service program that reaches out to a diverse audience.

ACE assists students at UNM, New Mexico State University, North Carolina A&T State University, and New Mexico Highlands University. ACE also has a national fellowship program for minority Ph.D. students. ACE fellows have graduated from the University of Southern California, University of Alabama at Huntsville, New Mexico State University, UNM, and Texas A&M University. As of last October, ACE had six doctoral fellows at University of Arizona, UNM, Northwestern University, and University of Maryland at College Park.

On the Road to Success

Jamshidi says that ACE now has a national reputation for doing a big service to the nation in minority education. He receives many calls and visits from universities around the nation, and most recently from the United Kingdom, concerning the success of the program. ACE was acknowledged for its commitment to higher education for minorities by the Honorable Dan Goldin, the NASA administrator, at a NASA conference.

“We are doing the right thing at the right time for NASA,” Jamshidi says. “Autonomy is cheaper and faster, and NASA recognizes what ACE has done in this field. In short, UNM is really making giant strides in space agency goals and plans. Not only for ACE, but for all campuses.”

ACE experiments and research projects include: “Modeling Unknown Environments Using Multiple Camera Views,” “Autonomous Distributed Control for a Cooperative Satellite Array,” “Autonomous Power Control in CDMA Cellular Systems,” “Hierarchical Intelligent Behavior Control of Rovers,” “Sharing Research Equipment Over the Internet,” and many more.

Jamshidi says NASA funded UNM for another five years. “It is important that we continue to reach out to minorities interested in engineering and science,” he says. The plan for 2000-2005 will be to continue to produce the best-quality graduates from the U.S. ethnic minority population by significant numbers.

“We will once again set a goal of graduating 50-plus students with master’s and Ph.D.s,” says Jamshidi.

“A major goal of the program for the next five years is also to work on cutting-edge technology including robotics, space-bound aging of the astronauts, and work in the area of aeronautics.”

When you shoot for the stars, you get there.
Rice University Program Aims to Triple Minority Ph.D.s in Science, Math, and Engineering

By Inés Pinto Alicea

When Luis Melara met Dr. Richard Tapia at an engineering conference several years ago, the 26-year-old had never met an Hispanic math professor before, and that chance meeting had a huge impact on the young man's life.

Today, Melara, who was born in El Salvador and raised in Los Angeles, is part of a program sponsored by the National Science Foundation and is working toward a Ph.D. in computational and applied mathematics at Rice University in Houston, Texas. Tapia, the Noah Harding Professor of Computational and Applied Mathematics at Rice, heads the program known as the Alliance for Graduate Education and the Professoriate (AGEP) at Rice, a program that is having success in raising the numbers of minorities pursuing and finishing their Ph.D. programs in science, math, and engineering (SME) and getting them into the professoriate.

Twenty doctoral institutions across the country offer the program through alliances they have created with other doctorate-granting institutions to improve diversity in those fields and in the professoriate.

"Students of color who drop out of doctoral programs hardly ever drop out for academic reasons," said Dr. Roosevelt Y. Johnson, the National Science Foundation's program director for AGEP. "They usually drop out for other reasons. We want to address that other."

Johnson said the program emphasizes that the recipients form alliances not only within their universities but with other universities because previous NSF programs that have provided funding solely to individual institutions have met limited success in increasing the "number of minorities enrolling in and successfully completing doctoral programs."

"This lack of participation represents a tremendous loss of opportunity for minorities at a time when our nation's desire to remain globally competitive in the SME arena places increased importance on developing a diverse human resource pool from which to recruit," said Johnson. "AGEP provides an invaluable set of tools to build institutional infrastructures to increase diversity at the graduate level and beyond."

The NSF distributes about $11 million yearly among all participants. Each primary recipient gets about $500,000 yearly. Along with Rice, the primaries are

"We educate departments; they need to undergo a cultural change."

Richard Tapia, Noah Harding Professor of Computational and Applied Mathematics at Rice
Arizona State University, City University of New York, Georgia Institute of Technology, Howard University, North Carolina State University, State University of New York at Stony Brook, University of Michigan, University of Alabama at Birmingham, University of California (all nine campuses), University of Florida, University of Massachusetts, University of Mississippi, University of Missouri-Columbia, University of North Carolina at Chapel Hill, University of Puerto Rico, University of Colorado-Boulder, and University of New Mexico. Each has partnered with up to 10 other institutions to carry out the program.

Johnson said that two major breakthroughs have strengthened AGEP. The University of California Alliance for Graduate Education and the Professoriate (UC-AGEP) united all nine UC System campuses to coordinate and mobilize system-wide and campus-based support for the AGEP mission. Each UC campus has developed links to undergraduate institutions that graduate large numbers of minority students with bachelor's degrees in SME. The UC Office of the President has assumed responsibility for routine coordination, data management, and communication with NSF regarding funding and reporting requirements. To facilitate intercampus communication and collaboration, two working groups—one in northern and one in southern California—have been formed and will meet at least twice each year.

The American Association for the Advancement of Science (AAAS) and the Georgia Tech AGEP jointly sponsored Workshop 2000: A National Dialogue to Move Minority Graduate Education Forward. The workshop audience included NSF/AGEP grantees as well as representatives of higher education, corporations and foundations, and government. A format of keynote addresses, panels, and breakout sessions allowed participants to interact and engage in dialogues leading to action agendas throughout the education continuum.

The alliance strategy has proved successful at undergraduate institutions in another NSF-funded program, the Louis Stokes Alliance for Minority Participation (LSAMP) program, said Johnson. "There have been significant increases in the number of minorities earning baccalaureate degrees in SME that can be directly attributed to the LSAMP program," said Johnson. "The effectiveness of the LSAMP program can be attributed to a variety of factors, including leveraging of shared resources, thinking creatively to produce a more supportive and proactive undergraduate infrastructure, and committing to attaining ambitious goals with respect to increasing baccalaureate production."

Johnson said the alliance strategy is showing early signs of success in AGEP as well. "The University of Michigan enrolled 21 AGEP fellows in SME fields during the 1998-99 academic year. This represents a 34 percent increase in doctoral minorities entering SME fields. Furthermore, there was also a 50 percent increase in minority Ph.D. graduates in SME fields from 1998 to 1999."

The Mississippi AGEP enrolled 42 students in SME doctoral programs in 1999 compared to 29 in 1998—an increase of 45 percent. The University of California-Irvine reported an increase of more than 50 percent in the size of the first-year Ph.D. minority graduate enrollment in SME fields (Fall 2000 compared to previous years).

"AGEP provides an opportunity for individual institutions to create more nurturing graduate environments without sacrificing the standards that have made graduate education in the United States the best in the world by many standards," said Johnson. "AGEP institutions have pledged to triple the number of underrepresented minorities earning doctorates in science, math, and engineering. The success of this program will mean tremendous gains for minorities in the professoriate."

Melara said AGEP has been instrumental in keeping him focused on his goal. AGEP "has helped me a lot as far as staying in the program," said Melara. "After all, its one thing to be accepted and another to make it."

Johnson said that since colleges and universities are facing a large number of retirements, the AGEP program is in a unique position to vastly diversify the faculty of departments nationwide.

The replacement of collegiate faculty represents a challenge for college administrators and an opportunity for minority SME professionals prepared to enter the professoriate," said Johnson. "This is an area in which AGEP institutions can have historical impact, both in the preparation of highly qualified minority faculty candidates and in the hiring of highly qualified minority candidates. Proactively increasing the diversity of AGEP institutions at the faculty level affords a unique opportunity to foster lasting cultural change in academe."

Each AGEP institution has created its own unique program to increase minorities in SME at the doctoral level. To qualify for funding, the universities had to demonstrate four capabilities: to provide quality educational and research opportunities that would prepare students for successful SME careers; to align with existing programs within or outside the alliance to ensure a comprehensive and integrated effort; awareness of factors affecting the successful transition of minority students from undergraduate through graduate study to academic career entry in SME fields; and to demonstrate prior success in dealing with affective (non-academic) components of graduate education necessary to ensure success of minority students in obtaining SME doctoral degrees.

AGEP at Rice

At Rice, students who participate in the program get a number of benefits, including full tuition and a stipend. But, Tapia said, the program is designed to give them more of a sense of community so the students don't feel isolated in the pursuit of a doctoral degree. The program also expands their horizons professionally, giving them opportunities to network with SME leaders, participate in conferences in their chosen field, get feedback on their different projects and guidance in preparing their dissertations, and improve their oral and written communications skills with sessions tailored specifically toward that goal.

Some of the topics the AGEP students have addressed include affirmative action, the role of women in the sciences, the tenure process, and professional issues tied to the field of science.

For Melara, the enthusiasm of the students in the program helped recruit him to Rice and get him involved in the AGEP program.

"I liked the subject and wanted to learn more," said Melara. "The graduate students in AGEP looked excited about what they were doing. There are so many things mathematicians can go into."

At Rice, students can participate in an AGEP program just for the summer, or they can participate throughout the academic year. For the summer of 2000, 18 students participated in AGEP activities at Rice, and 42 students participated in the academic-year program.

"You can go to people for help," Melara said. "People will help you rehearse for presentations and provide you feedback. Their encouragement helped."

Tapia said Rice launched the program in 1998 with funding from the NSF, but Tapia had been running a successful similar program in his
department for 10 years. The NSF funding helped expand his efforts to other departments and the University of Wisconsin.

At Rice, interested students must submit applications to their designated department and to the AGEP program. The departments involved in the program determine which promising minority students would benefit greatly from AGEP. Students selected are offered tuition waivers and stipends to pursue a Ph.D. in SME.

"The departments know that if they identify a student who has talent and can make it in the program but they don't have the funds to support them, we do," said Tapia, adding that he often advocates for promising students that certain departments might be hesitant to take on. "I don't tell the departments what to do, but if I don't hear from a department about a student, I'll call them, and I will tell them, 'Here's a good student.'"

Tapia said the focus of the AGEP program at Rice is on retention of minorities in SME. Many of the activities of the program—including the guest speakers, the mentoring, the conferences, the social activities—are all geared at keeping the students focused on the final goal—finishing the degree. If that means Tapia must help a student make friends on campus or work out a personal problem, Tapia said he is there.

"We create an extended community and have get-togethers," said Tapia. "We provide an extended family. Admission is just part of it. I am an advocate for the students. Retention through the degree is extremely critical."

Tapia said that many times students find that they are the only minority in a department, so AGEP helps them meet minorities pursuing Ph.D.s in other departments so they can collaborate, share, and discuss issues related to their degree.

"I will find out if a student is having problems from a network of students," said Tapia. "Often the other students help them get past the hurdles. It can help them get through the problems everyone has, but they think they are the only ones."

Tapia said one challenge is getting departments to change the way they operate to create a more welcoming environment for students. Some are reluctant, fearing that a welcoming environment translates to a less rigorous program. Tapia disagrees with that assumption. Instead, Tapia said, a welcoming environment means success for the university department, which as a result has diversified its student body and its graduates, leading to greater success for minority students in SME.

"We're producing leaders, and there aren't that many around," said Tapia.

Tapia said that many departments focus on standardized test results to pick students for their Ph.D. programs and that this focus has a negative impact on minority students in that many fully capable students do not fare well on such tests.

"We educate departments," said Tapia. "They need to undergo a cultural change. The way they recruit needs to be reevaluated. The way they retain needs to be reevaluated. So we restructure and change things."

Cristina Villalobos, an assistant professor in mathematical sciences at the University of Texas at El Paso, said AGEP helped her reach farther educationally and professionally than she had dreamed possible.

"When I was an undergraduate, I was going to become a teacher," said Villalobos, who finished her Ph.D. in applied mathematics at Rice in 1999. "With this program, I realized there was more out there for me. I had had no idea."

The program, she said, gave her teaching experience, since she worked with K-12 teachers, and guided her at several stages in formulating her dissertation and in conducting the related research.

Ricardo Vargas, who is in year four of his Ph.D. program in electrical engineering, said the AGEP program provided him with a support network, something he initially did not find in his chosen department, which he said included "hardly any" minorities.

"I really felt alone. My program has not been easy. When I got together with Tapia's group, it felt really nice to have someone to share experiences."

Vargas said AGEP helped him make numerous professional contacts through meetings with guest speakers and professional conferences, but it also has given him a lot of useful feedback on his Ph.D. work. AGEP also encourages him to consult students in other Ph.D. fields to help solve problems in his own area of concentration.

"I've grown so much as a professional," said Vargas. "I talk to mathematicians and people in other sciences, and I get a new vision of my problem. It has been good for me."

But, Vargas said, the friendships he has created through the program have been as valuable if not more so.

"Tapia has these barbecues, and he makes us dance merengue," said Vargas. "I have found many things in common with the other students in Tapia's group other than academics. Tapia reminds us that we're a family and that we are part of a group. I try to give back to the new students as well."

"It's probable that the support won't come from your department," said Vargas. He suggested that students who feel alone in their departments need to reach beyond them to find the support network they need to survive the rigors of pursuing a Ph.D.

College of American Pathologists Launches Bilingual Pap Test Reminder Website

NORTHFIELD, III.

Thousands of Latinas in the United States risk their lives each year by not getting an annual Pap test, a lifesaving test that could reduce the likelihood of their developing cervical cancer. The Pap test, introduced in the U.S. after World War II, is the most effective cancer-screening process known to medical science. It uncovers treatable abnormalities before they turn into cancer.

According to a Center for Disease Control and Prevention study, more than 25 percent of Hispanic women failed to get a Pap test in the last year.

To combat this problem, the College of American Pathologists (CAP) is providing a free bilingual Internet-based service that will help remind women to schedule their annual Pap tests. Registering for this simple reminder could save their lives.

One quick visit to www.papsmear.org allows a woman to select the day within the next year that she would like to schedule a Pap test. On the date she chooses, an e-mail will be sent reminding her to call her doctor or other healthcare provider and schedule an appointment. Annual Pap tests are critical in the prevention of cervical cancer.

According to a study by Cheskin Research, in the past two years, household computer penetration has increased approximately 68 percent among U.S. Hispanics, compared to about 43 percent in the general U.S. population.

This website takes only seconds to set up the reminder," said Dr. Filiberto Cavazos, pathologist and associate professor at Ohio State University. "Many women are so busy with their careers and families, they don’t take time for their own health—including receiving a Pap test each year, but those seconds it takes to set up the reminder could save a woman’s life.”

Pathologists, doctors who treat patients through laboratory medicine, and other healthcare providers know that having an annual Pap test is one of the most important things a woman can do to help prevent cervical cancer. In fact, pathologists recommend that every woman who is over the age of 18 or who is sexually active should have a Pap test every year. Since it came into common usage more than 60 years ago, the Pap test has reduced cervical cancer deaths in the U.S. by 70 percent, making it the most effective cancer-screening tool known to medicine.

National Community for Latino Leadership Releases Study

WASHINGTON, D.C.

The National Community for Latino Leadership, Inc. (NCLL), a leadership think tank and clearinghouse, released findings from the largest, most comprehensive empirical study of Latino leadership. The findings of more than 3,000 Latino respondents reflect, but also diverge from, non-Latino mainstream views on leadership. Latinos have a unique view of leadership that emphasizes community service and compassion. The report is especially important in today’s economic and political climate where national leaders are aggressively courting Latino constituencies and markets.

“The growing presence of Latinos in the United States has profound implications for the future of leadership in our nation,” said NCLL president Alfred Ramírez. “As the youngest, fastest-growing, and soon-to-be largest minority group, Latinos will play a larger role in determining the caliber of leadership in the U.S. [political community]. Leaders will benefit from our research on what Latinos want from a leader.”

Report findings include:

- Latinos are twice as likely to find their heroes in their family than the general population.
- The leadership qualities Latinos deemed most important were honesty, trustworthiness, and integrity (50 percent); followed by intelligence, experience, and education (8 percent); being respectful of persons and community (46 percent); community “servanthood” (41 percent); and being loving and compassionate (41 percent).
- The Latino community’s perspective on leadership bridges racial, class, political, and cultural lines. Contrary to expectations, Latino ethnic groups do not differ significantly among each other with respect to what they seek in a leader.

- Among Latino respondents, there was a striking underlying consensus on their views and values toward leaders—no significant differences exist between Latino young adults and seniors, citizens or non-citizens, or between Latinos and Latinas.
- Unlike other cultures that emphasize individualism, Latinos emphasize collectivity, belonging, and group benefit.

Based on NCLL survey results, the 20 most desired leadership qualities are clustered into four general leadership traits. “We have taken these traits and categorized them as the ‘Four Cs of Latino Leadership,’” said Ramírez. “Latinos want leaders to demonstrate character in their public dealings and private lives, be competent, express compassion in their exercise of leadership, and work as a community servant.”
NCLR Receives $6.7 Million Gates Foundation Grant

WASHINGTON, D.C.

The Bill and Melinda Gates Foundation took an enormous step toward fixing what's wrong in American education. After conducting comprehensive studies throughout the United States of what works and what doesn't, the Gates Foundation awarded major grants to start and support model schools that offer small, personalized learning environments in which all students learn successfully.

The National Council of La Raza (NCLR) is among the recipients of the first round of grants. NCLR is receiving $6.7 million to open 15 new charter schools, most of them in California, over the next five years.

With the aid of its affiliate network, NCLR has identified prospective charter school sites in hereofore-underserved communities with large Latino populations. Key components of the new schools will include more effectively involving Hispanic families in the education of their children, building community-school partnerships, and promoting the use of linguistically and culturally appropriate curricula and assessment tools.

"Education is the single most important issue in the Latino community," said NCLR president and CEO Raúl Yzaguirre, speaking at a community event in the Barrio Logan Mercado Apartments in San Diego, which provide affordable housing to the low-income Latino community. "This generous and timely grant from the Bill and Melinda Gates Foundation will help ensure that Hispanic community-based organizations across the country play a major role in improving educational outcomes, and closing the 'achievement gap' for one of this country's most valuable future assets—Latino children."

The new charter schools will be operated in collaboration with NCLR's affiliates. By the end of the five-year grant period, NCLR hopes that the new schools will be serving historically underserved communities in San Diego, Oakland, Los Angeles, and San Jose. At least five of the 15 schools will be high schools.

ACE Survey Shows Americans Value Higher Ed, But Remain Skeptical about Some Issues

WASHINGTON, D.C.

College and university presidents can find a lot to like—and a few things to dislike—in the results of a national public opinion poll on higher education policy issues released by the American Council on Education (ACE).

On the positive side, Americans continue to place high value on a college education and overwhelmingly believe that U.S. colleges and universities offer high-quality programs. They are somewhat less worried about the affordability of college than in recent years; they strongly support increased funding for university research; and they believe campuses are safe places to live and learn.

However, Americans continue to grossly overestimate tuition prices and believe colleges do not work hard enough to keep tuition levels affordable for most families. They know very little about college presidents and are skeptical about intercollegiate athletics and distance learning.

These and other findings are outlined in the ACE report "Taking Stock: How Americans Judge Quality, Value, Affordability, and Leadership at U.S. Colleges and Universities," which is based on a national telephone poll of 850 Americans conducted by KRC Research and Consulting.

Among key findings:

- Americans continue to place a high value on higher education....Roughly three-quarters of the respondents rated the quality of four-year colleges as excellent or good. Sixty-six percent rated two-year colleges as excellent or good....Americans claimed to be less worried about the cost of a college education than they were in a similar survey conducted in January 1998—although the topic remains a major concern for the vast majority of families. Thirty-two percent said in May 2000 that they worry “a little” about the cost of college, compared to 25 percent in 1998. Fifty-four percent said they worry “a lot,” compared to 65 percent in 1998....While 90 percent of the public claimed to know a lot or a good amount about what it costs to attend college, many respondents overestimated the cost of tuition and fees at a public, two-year community, junior, or technical college, and a four-year public college. Americans came closer to estimating the cost of attending a private college or university....The public knew very little about distance learning, and was somewhat skeptical about the quality of such classes and degree programs.
Austin’s Club Sembradores Holds Fundraiser in Texas

Club Sembradores de Amistad, which means “Sowers of Friendship” in Spanish, is an international nonprofit headquartered in Monterrey, N.L., Mexico, and dedicated to helping underprivileged college students. It held a black-tie Valentine’s Day Ball to support scholarship endowments at the University of Texas (UT)-Austin and three other educational institutions. Raúl Álvarez, Austin city council member, was master of ceremonies.

Dr. Roberto Miranda, president of the Austin chapter, said that preference for scholarships is given to Central Texas students who are among the first generation of their families to attend college and who qualify as “financially and educationally disadvantaged.”

Endowments Committee Chair Hilbert R. Maldonado said nine local families established the Austin Sembradores chapter with the help of a long-established chapter in San Antonio. Sembradores gala proceeds go toward endowment funds at UT-Austin, Concordia University-Austin, Huston-Tillotson College, and St. Edward’s University.

Saragoza Addresses Allan Hancock’s All-Staff Convocation

University of California (UC) system-wide vice president for educational outreach Dr. Alex M. Saragoza was the keynote at Allan Hancock College’s all-staff convocation, attended by about 600 faculty and staff members. He spoke on community college transfers to UC.

Saragoza, the son of farmworkers from California’s Central Valley, received his bachelor’s degree from Fresno State, master’s from Harvard University, and doctorate from UC-San Diego. From 1979 to March 2000, he was a faculty member at UC-Berkeley, most recently in the department of ethnic studies. He is the author of numerous articles and essays on Mexican culture and history, the mass media and Mexican history, and the history of Mexican immigrants to the U.S.

In his post, Saragoza oversees a complex and far-reaching effort by UC to prepare larger numbers of underrepresented minority students for admission to the University.

Yale Professor Honored in Mexico

Then-president of Mexico Ernesto Zedillo (pictured l.) received Professor Gustav Ranis (r.), director of the Yale Center for International and Area Studies (Conn.), at his official residence, Los Pinos. Ranis was visiting Mexico for a Festschrift colloquium on “The Mexican Economy at the End of the Century: Prospects and Realities,” held in his honor and hosted by the Center for Economic Studies at El Colegio de Mexico.

Ranis spent a year at the Colegio in 1970-1971 as a Ford Foundation visiting professor and published an article, “Is the Mexican Miracle Turning Sour?” at a time when Mexico had enjoyed many years of “growth with stability.” Thirty years later, at the Festschrift, leading Mexican economists acknowledged that his analysis had pinpointed structural problems that Mexico has been forced to address in recent years.

Nebraska-Lincoln Hosts Forum on Vieques, Reparations

The Scholarship in Society lecture series at the University of Nebraska-Lincoln featured a discussion of the U.S. Navy’s training operations on the Puerto Rican island of Vieques. Roberto Clemente, assistant professor of educational leadership, counseling, and postsecondary education at the University of Northern Iowa, delivered a lecture, “Reparations: Vieques, Puerto Rico, and Latin Bilingual Identity of the United States of America.”

Clemente described how the U.S. Navy appropriated three-fourths of the 25-square-mile island at the start of World War II and still uses it as a field for military training operations. “For more than 50 years, the residents of this island have been living under constant conditions of war,” destroying the health, wealth, and, at times, lives of the islanders, Clemente has written.

The lecture series is aimed at modeling the myriad career possibilities, scholastic and non-academic, available to students upon receiving a graduate education.

Felician Welcomes Director of Health Sciences

Dr. Muriel M. Shore was appointed director of the division of health sciences at Felician College in New Jersey.

Shore, the mayor of Fairfield, N.J., has been for the past three years the director of health and rehabilitation for Essex County, N.J., and chief executive officer of the Essex County Hospital Center. She is a partner with the Mosaic Group, L.L.C., a consultant group specializing in all facets of Joint Commission on Accreditation of Health Care Organizations standards compliance.

Shore has both a bachelor’s degree and a master’s from the Seton Hall University College of Nursing and a doctorate from Seton Hall College of Education and Human Services.

Felician College, a co-educational Catholic college founded by the Felician Sisters in the Franciscan tradition, offers undergraduate and graduate degree programs in arts and sciences, teacher education, and health sciences.
Laredo President Honored by City Newspaper

Dr. Raúl H. Dovalina, president of Laredo Community College (LCC) in Texas, was named "Laredoan of the Year" for 2000 by the Laredo Morning Times.

Editors of the newspaper cited Dovalina's genuine commitment and concern for LCC's student body, faculty, staff, and community as reasons for the selection. Under Dovalina's administration, LCC experienced dramatic improvements, including the completion of a multimillion-dollar infrastructure improvement project on its campus and national attention for piloting the use of innovative learning technology in the South Texas region.

Dovalina became the fifth president of LCC in 1995.

Ramírez Secures Brazilian Art for Blanton Museum of Art

Mari Carmen Ramírez (pictured), curator of Latin American art at the University of Texas (UT)-Austin's Jack S. Blanton Museum of Art, secured the acquisition of an art piece by renowned Brazilian artist Regina Silveira. One of a series of works that established her reputation, "Masterpieces: In Absentia (M.D.)" is a large-scale drawing, printed on vinyl, and projected, like the shadow of an absent object, on the gallery wall. It pays homage to Marcel Duchamp's "Bicycle Wheel."

The Blanton also offers a behind-the-scenes look at art conservation pieces through the display of an important 1967 sculpture by Argentinean artist Gyula Kosice, a founding member of the Madi movement and a pioneer of art incorporating light and water.

The museum is completing the first research phase of a comprehensive catalogue of its Latin American art collection. The publication will make available a significant portion of the museum's unique holdings for research and teaching, while providing invaluable documentation of the trajectory of 20th-century Latin American art.

From mid-January to early March, the Blanton's curatorial team presented "Building Your Collection," an intensive three-evening seminar centered on the exhibition "Reinbrantd to Rauschenberg: Building the Collection." The Blanton's curators have wide-ranging areas of expertise—from contemporary to Latin American, European painting to prints and drawings. The seminar showed how to begin, advance, and refine one's art collection.

University of Washington Study Shows Minority Drop after I-200

The number of Black, Hispanic, and American Indian first-year students enrolling at all universities and colleges in Washington dropped in 1999 following the passage of Initiative 200, which eliminated many affirmative action programs in the state. Most of the declines in minority enrollment came at the University of Washington (UW), the state's largest educational institution, according to a study by UW sociologists.

Although the actual number of Blacks and American Indians admitted to UW in 2000 rebounded slightly, the percentage of underrepresented minorities enrolled at the University dropped from 9 percent in 1998 to 6 percent in 2000, according to Charles Hirschman, UW sociology professor and co-author of the study. The drop among Hispanic students was the most pronounced, falling from just under 5 percent of the 1998 first-year student class to less than 3 percent in 2000. "These declines were in stark contrast to a substantial rise in non-Hispanic, White freshman enrollments," said Hirschman.

The declining minority enrollment following voter approval of I-200 in November 1998 appears to be more complex than the popular perception that UW is admitting fewer minorities, said Hirschman and Susan Wierzbicki, a sociology doctoral student. The key appears to be a declining number of applications from underrepresented minority students.

Cornell Distance-Learning Course Connects Students in 7 Countries

It is the class heard 'round the world: a Cornell University (N.Y.) distance-learning course in which undergraduate and graduate students from the Americas, Europe, Australia, and India are linked electronically.

Students came together for Global Seminar ALS 480, a spring semester course that examines international food issues and formulates positions on worldwide agricultural sustainability. The global classroom communicates using Internet-, telephone-, and satellite-based video. Cornell organizes the class with equal participation from eight other universities, including Wageningen University and Research Center, the Netherlands; the Open University of the Netherlands; Universidad EARTH, Costa Rica; University Zamorano, Honduras; Uppsala University, Sweden; the Swedish University of Agricultural Sciences; the University of Melbourne, Australia; and Acharya N.G. Ranga Agricultural University, India.

In this class, "you learn cultural sensitivity, and you become exposed to people with different beliefs, attitudes, and values," said Cornell alumnus Robert McMeneny, who took the class in 1999 and was a teaching assistant a year ago.

Rodríguez New Vice Provost at UT-Austin

Dr. Victoria Rodríguez, associate professor in the Lyndon B. Johnson School of Public Affairs, was appointed vice provost at the University of Texas (UT)-Austin. Key areas of responsibility in her new role include advancement of the University president's Latin American initiative, faculty recruiting and hiring, and the K-12 initiative.

President Larry R. Faulkner has said he places a high priority on strengthening both Latin American studies on campus and UT-Austin's ties with Latin American countries. Rodríguez said her vision as vice provost is to concentrate efforts in four countries—Mexico, Brazil, Argentina, and Chile.

Mexican Consul General Rogelio Gasca Neri, on behalf of Mexico's Ministry of Foreign Relations, presented Rodríguez and her husband Peter Ward with the "OhlÍ¡ Medal. The highest award granted by the Mexican government outside of the country, it is given to those whose work, research, and academic or cultural services are deemed significant to the furtherance of U.S.-Mexico relations.

NAHJ Conducting Journalism Project in Phoenix

The National Association of Hispanic Journalists (NAHJ) will hold an intensive three-day journalism campus project prior to the
Texas A&M- Corpus Christi Hosts Renowned Latino Groups

Texas A&M University-Corpus Christi hosted an evening of musical entertainment in its University Center-Lonestar Ballroom in conjunction with the National Association of Latino Arts and Culture 2001 National Conference.

Grupo Tayer of Monterrey, Mexico, a band dedicated to the compilation and artistic performance of "El Viejo Canto Norestense," performed music of Northeastern Mexico and South Texas that has been passed down from generation to generation through oral tradition. It utilizes guitars, bass, accordion, and other folk instruments.

The internationally acclaimed group Mono Blanco performed "son jarocho," the traditional music and dance of Vera Cruz, Mexico. Los Pleneros de la 21, from New York City, performed Puerto Rican-based music, including Caribbean, salsa, and dancers. Los Pleneros de la 21 is also a community organization dedicated to performing, disseminating, developing, and teaching the African-related music and dance forms of Puerto Rico, plena y bomba.

NCCE—A Resource for Faculty Teaching Education Courses

National Council on Economic Education (NCCE) develops and distributes innovative materials, curricula, and teacher training through a nationwide network to help educate students in grades K-12 about how the world works—before they go to work in it.

NCCE publications and online courses provide teachers with lessons on economics and financial concepts that can help teach math, personal finance, language arts, science, and social studies. Courses include teaching guides, lesson plans, and student activities. The programs work in classrooms and home schools and cover levels from K-12.

NCCE catalogs are available. Call (800) 338-1192; or visit the NCCE website, www.ncce.net.

Cuban Cultural Award to Santa Monica President

Santa Monica College (SMC) president Dr. Piedad F. Robertson received the Honor of White Rose from Patronato José Martí, a Cuban cultural organization in Los Angeles, Calif. The organization is named after Martí, a Cuban nationalist hero and cherished journalist and poet. The white rose is a symbol of Martí.

Robertson, SMC president since 1995, is an established leader in innovative educational programs, workforce and economic development, fundraising, and community and government relations, and serves on the Gates Millennium Scholars Program Advisory Council, which oversees the $1 billion scholarship endowment created in 1999 by Microsoft founder Bill Gates.

Robertson is one of five prominent Cuban Americans to receive the award—Dr. Alberto Sánchez Bustamante, physician and president of the Cuban Heritage Foundation; Nicolás Quintana, internationally renowned architect and Florida International University professor; Belkis Cuza Malé, editor, Linden Lane magazine; and Fernando Marquet, businessman and civic leader.

SMC is the No. 1 transfer institution to the University of California (UC) and California State University systems combined. SMC was also first in transfers of Chicano/Latino, African American, and Asian students to the UC system.

Limón Feded upon Retirement from Loyola Marymount

Loyola Marymount University (LMU) Professor and Chair of the department of Chicano/o studies Graciela Limón was honored at a special event to acknowledge her retirement after 35 years of teaching at LMU in California.

Limón, an award-winning novelist, read from her published works. Acclaimed singer/songwriter and cultural worker Francisco Herrera performed. At Limón's request, the proceeds benefited a Latino community organization, the Libros Revolución Bookstore, a progressive Los Angeles bookstore that provides community outreach and important academic and literary works in Spanish.

Limón has a bachelor's degree from Marymount College and a master's from the Universidad de las Américas in Mexico City, and completed doctoral studies at the...
University of California-Los Angeles. She began her career at LMU as a Spanish professor at Marymount College, prior to its merger with LMU, and became department chair and president of the faculty senate. She began writing novels later in life and was recognized as a leading Chicana author, publishing five novels in the 1990s. Limón retired in May 2000.

**NHMA Sponsors Leadership Program**

NHMA (National Hispanic Medical Association), representing licensed Hispanic physicians in the U.S., is sponsoring the NHMA Resident Leadership Program, part of a collaborative effort with Stanford University Medical School and Cornell University Weill Medical College. The goal is to develop the leadership skills of Hispanic residents interested in primary care, academic, and/or policy careers.

For each of the next five years, NHMA will select 20 uniquely qualified Hispanic medical residents from around the nation to participate in policy institutes in Sacramento, Calif., Albany, N.Y., and Washington, D.C. The program is funded by the U.S. Department of Health and Human Services Health Resources Services Administration. Established in 1994, NHMA aims to improve the health of Hispanics and other underserved populations and build a network of highly motivated Hispanic physician leaders.

**Cuyahoga Holds Latin Dance Workshops**

Connie Fagan, professional dance instructor and former Southern California salsa competitor and Mayan champion, taught Latin, salsa, ballroom, swing, and general social dances in workshops held at Cuyahoga Community College in Ohio.

Participants learned the basics, such as how to lead and follow, and a few variations of salsa, merengue, and the cha-cha during six one-hour salsa and Latin rhythm workshops; the workshop Burn the Floor taught the basics of international ballroom, the quick-step waltz, and the tango; and a swing workshop featured the music of popular bands, old and new.

**New World School of Arts Gets New Provost**

The New World School of the Arts (NWSA) in Miami, Fla., has a new provost, Stephen Sumner. Sumner was director of the division of fine and performing arts at the University of Tulsa in Oklahoma. A frequent speaker at national conferences, he presented "Cultural Diversity: Teaching Art Values within the Multi-Ethnic Classroom" at the National Conference on Multicultural Perspective, University of Colorado.

Sumner has a bachelor's degree from the University of Michigan and a master's from the University of Massachusetts, and received two Fulbright Fellowships for photographic projects in Latin America.

NWSA, founded in 1987 and located in downtown Miami, is a Center of Excellence for the performing and visual arts. The school is a partnership of the State University System of Florida, Miami-Dade Community College, and Miami-Dade Public Schools—both the University of Florida serving as the State University System representative. It offers academic and artistic studies for talented high school and college-level students leading to a high school diploma, the Associate in Arts degree, and the Bachelor of Fine Arts and Bachelor of Music degrees. More than 450 high school and more than 300 college-level students are enrolled.

**Northern Essex Hires Workforce Developer**

Northern Essex Community College in Massachusetts hired Carlos Matos of Lawrence to head a new workforce development initiative. Working with a grant funded by the U.S. Department of Labor, Matos will be project manager of the College's "Third Tier Cities" project, being conducted in conjunction with Northeastern University and the Holyoke Chamber of Commerce.

Both Lawrence and Holyoke are considered "third tier" cities in that they are smaller urban areas with high unemployment and high degrees of poverty. The project objective is to identify and eliminate barriers that area residents face in attaining self-sufficiency, and to determine the needs of area businesses in regard to education and skill levels of employees.

Matos is a former teacher in the Lawrence Public School System and former legislative assistant to both state Rep. José Santiago and Rhode Island Lt. Gov. Charles Fogarty. He has a bachelor's degree from Saint Anselm College and is completing graduate work at the University of Massachusetts.

**Mellon Minority Program at Barnard Highly Successful**

Fewer than 10 percent of the 43,000 or so doctorates awarded yearly in the U.S. go to underrepresented minorities, according to Lydia English, director of the Andrew W. Mellon Foundation Minority Undergraduate Fellowship program, MMUF.

MMUF program provides a unique long-range plan that encourages minority students to earn doctorates in core fields in the arts and sciences. Since 1988, more than 2,000 African American, Latino, and Native American undergraduate students have been selected by their colleges and universities as Mellon Fellows and awarded research grants, stipends, and faculty mentoring. The nationwide program is showing positive results, with 33 percent of students entering graduate schools.

Columbia University's Barnard College (N.Y.) MMUF program, only in its third year, has achieved excellent results and, according to English, ranks as one of the top three MMUF programs around the country, with 42 percent of its students going on to doctoral programs. Other MMUF programs in New York City are at Columbia University, Brooklyn College, Queens College, and Hunter College.

**Laredo's Quality Lauded in SACS Accreditation Report**

Courses, degrees, and services offered by Laredo Community College in Texas exceeded the rigorous standards of the Southern Association of Colleges and Schools (SACS) and received full re-accreditation for another 10-year period.

Re-accreditation affirms to Laredo students and potential students that, in addition to its affordable tuition, they can expect their courses to meet the same quality standards as those offered by colleges and universities throughout the nation. In a letter to college president Ramón H. Dovalina, SACS accepted a report prepared by the College as part of the accreditation process.

Of 257 colleges and universities that submitted follow-up reports after SACS review visits, only a few—among them Laredo—received full re-accreditation without the need to submit additional reports. Laredo
was one of two schools considered exemplary by commission members. The follow-up report was prepared by the College team of Dr. Estelle J. Sit, dean for institutional effectiveness and distance education; Francisco Martínez Jr., co-chair of the college steering committee for SACS re-accreditation; and Eleazar González, director of institutional research and planning.

**Latino Musicians to Perform at Cal State-Northridge**

The musical act Sol y Canto will play at the Center for the Visual and Performing Arts, California State University-Northridge (CSUN), April 21. Built on Brian Amador's versatile Spanish guitar and Roci Amador's crystalline voice, this group, according to the *Boston Phoenix*, "does Latin music right...their vocal harmonies are peerless and they value top-shelf jazz improvisation."

On May 4, El Vez, the Mexican Elvis, comes to the Center. More than entertainment, El Vez is said to be a thinking man's Elvis, a postmodern King with a Latin twist. Presenting the Chicano experience through the songs of Elvis, this international sensation croons his tales in such hits as "Huraches Azules" ("Blue Suede Shoes"). Don't miss "Elvis con salsa," says *People*.

On May 5, the CSUN music department presents a Latin Music Gala, a Cinco de Mayo celebration featuring mariachi, salsa, flamenco guitar and dancers, Spanish violin, Argentinean tango, and more. Directed by Jacqueline Salas, it is part of the CSUN music department's May Festival.

**Nassau Community Hosts La caperucita roja**

The popular series "Classics for Kids (And Grownups Too)" returned for its 22nd season at Nassau Community College (NCC) in New York this winter. Parents and children alike delighted in the array of entertainment sponsored by NCC's Cultural Program.

In February, NCC hosted *Little Red Riding Hood/La caperucita roja*, a bilingual telling of the traditional story, performed by New York's only professional Latino children's theater company, the Society of the Educational Arts' (SEAS) Los Kabayitos Puppet and Children's Theater, an Hispanic arts-in-education organization.

Manuel Antonio Moró wrote and directed. Music was by Ivan Alexander Bautista. The show included some of the work of Puerto Rican puppeteer José López (winner of the UNIMA Citation of Excellence Award, the "Tony" of puppetry).

**West Chester Discovers Treasures of Peru**

From the jungles of the Amazon to the peaks of the Andes, Peru's landscape came alive at West Chester University of Pennsylvania through the extensive research and exceptional filmmaking of Dwayne L. Merry. Merry, producer of an award-winning television series broadcast throughout the United States and Canada, presented the program "Treasures of Peru."

Merry is an accomplished photojournalist with more than 30 years experience in anthropology and archeology. He explored the remains of mighty civilizations at sites that included Chan Chan, Pachacamac, and Machu Picchu, and learned of the fame and excavation activity of Thor Heyerdahl of Kon Tiki.

West Chester is one of the 14 institutions that comprise Pennsylvania's State System of Higher Education.

**Garden City Adapts to Cultural and Ethnic Diversity**

Garden City, Kan., has been on the edge of America's future for more than a decade, and those attending the recent 10th Annual Five-State Multicultural Conference, sponsored by Garden City Community College, heard an up-to-the-minute report on the community's ongoing adaptation to ethnic and cultural diversity. Dr. Donald Stull, an anthropologist whose work shed light on the Southwest Kansas town in 1990, presented his latest findings, valuable information for other communities throughout the country.

About 40 percent of the city's residents are from minority backgrounds, with a large contingent of Hispanic immigrants. Minority enrollment in the public school system is close to 50 percent, and Stull considers school counts a better picture of a given area than U.S. census figures. More than 1,000 adults sign up each year to learn English at the Finney County Community Learning Center. Bilingual ability has become a common employment prerequisite.

Stull's presentation was one of three keynote presentations. The others were "Faces of America," a one-person theatrical pro-

**Todd Named Kentucky's 11th President**

The University of Kentucky (UK) board of trustees named Lee T. Todd University president-elect. Todd officially will begin his term as UK's 11th president July 1, when Charles T. Wethington, Jr. steps down.

Todd, 54, a UK engineering graduate, takes over the University in the midst of its move, mandated by the state legislature, to achieve top-20 public university status by the year 2020. This goal is driving the state's largest fundraising campaign and the improvement of many facilities and programs across the University. Todd said the top-20 goal is an ambitious one that can bring great stature and economic benefits to Kentucky.

The president-elect will leave behind his post as senior vice president of Lotus Development Corp. He has a bachelor's degree from UK and a master's and doctorate from the Massachusetts Institute of Technology. He is a member of Kentucky's Council on Postsecondary Education.

**Fresno State Professor Speaks to AAUW**

Dr. Candice Skrapc, associate criminology professor at California State University-Fresno, spoke to the American Association of University Women (AAUW) about her work helping investigate the killing of women and girls in Juárez, Mexico. An internationally known criminologist with experience in New York and Canada focusing on violent crimes, Skrapc provided insight into crimes against women and what can be done about them. Her talk benefited the AAUW Legal Advocacy Fundraiser.

**Governor Davis Taps MALDEF President for State Board**

California Governor Gray Davis announced the appointment of Antonia Hernández, who is in her 15th year as president and general counsel of the Mexican American Legal Defense and Educational Fund (MALDEF), to the California Community Colleges Board of
Governors. Davis had named Hernández to the California Complete Count Committee in November 1999.

Hernández, as head of MALDEF, directs all litigation and advocacy programs, manages a $6.2 million budget and a 75-person staff. She is a prominent proponent of school reform, including higher education. Hernández has a bachelor's degree from the University of California-Los Angeles (UCLA), and a juris doctorate from the UCLA School of Law, and is a member of the American Bar Association, Mexican American Bar Association of Los Angeles, and Los Angeles Bar Association.

Barry Names Director of Dominican Studies Center

Barry University, a Catholic international university in Florida, appointed Jennie Weiss Block director of its new Center for Dominican Studies, established for research, graduate studies, and programs dedicated to celebrate and support the Dominican traditions of theology, spirituality, history, and the arts. The Center is a collaborative partnership of the Adrian Dominican Sisters, Barry University, and the Friars of the Province of St. Martin de Porres Southern. The Dominican Sisters and the Friars donated $100,000 and $50,000 respectively.

The creation of the Center provides scholars concentrating on Dominican themes with an environment consisting of appropriate library collections, material resources, and a supportive atmosphere. It provides a community center of study and common prayer exemplifying contemplation and theological reflection that has been the ideal of the Dominican intellectual life.

Cincinnati Professor Named to College Board Program

Virginia González, a new faculty member with the University of Cincinnati (UC) College of Education in Ohio, is among the first group of educators named to The College Board's new Visiting Scholars program, an effort to attract and establish continuing relationships with nationally renowned scholars.

González, an associate professor with UC's Teaching ESL program, will conduct research and advise The College Board on issues of instruction and assessment for ESL learners. She has an extensive background researching the struggles that ESL learners face, particularly Spanish-speaking children, a growing population in the U.S. The College Board works to ensure that students around the world have the opportunity to succeed in higher education.

In an article in this month's College Board Review, González examines how the American dream continues to hold promise for immigrants trying to escape poverty and lack of opportunity at home. She will conduct two seminars this year, one at The College Board office in New York City and the other at its office in Puerto Rico.

UTSA Welcomes Saldivar

The University of Texas-San Antonio (UTSA) hosted the 14th annual Brackenridge Distinguished Visiting Professorship series. Ramón Saldivar spoke on "America Paredes and the Transnational Imaginary" and "Bilingual Aesthetics."

Saldivar, a professor of English and comparative literature at Stanford University, has a bachelor's degree from the University of Texas-Austin and a master's and doctorate from Yale. He is the author of Figural Language in the Novel: The Flowers of Speech from Cervantes to Joyce and Chicano Narrative: The Dialectics of Difference. His articles have appeared in major journals, including Modern Language Notes, English Literary History, Comparative Literature, and American Literary History.

His honors include the John Simon Guggenheim Memorial Foundation Fellowship, National Council on Chicanos in Higher Education grant, and Students Association Teaching Excellence Award at Stanford. He is currently researching Chicano modernity and postmodernity.

Matching Retired Community College Leaders and Interim Posts

Therese Pauly, president of Pauly Group, Inc., an academic search consulting firm specializing in recruiting, referencing, and on-campus services for two-year institutions, finds that many newly retired administrators are ready to enjoy the rewards of retirement but are not quick to give up their active affiliations and commitment to academic service. At the same time, many colleges face more difficult and time-consuming searches to find strong, qualified candidates for key positions.

Pauly Group launched the Interim Assignment Program to help bridge administrative gaps during these transitions. Its consultants identify and refer to a college a select group of candidates with appropriate credentials, qualifications, and experience. The company maintains an in-house registry of former community college CEOs, senior administrators, and other high-ranking academic leaders who have expressed interest in interim appointments.

Ramírez to Chair Ramapo Board of Trustees

Arthur C. Ramirez, managing partner of The Christopher Company, was elected to chair the Ramapo College of New Jersey board of trustees. A trustee since 1994, he has been vice chair, finance chair, executive committee member, and liaison to the Educational Opportunity Fund program.

According to Ramírez, Ramapo College "has definitely become a school of choice, and we want to maintain that momentum."

Ramírez is an arbitrator with the National Association of Securities Dealers, handling disputes between clients and brokers and between brokers and brokers. He previously was an ethics panelist and fee dispute arbitrator for the New Jersey Supreme Court, vice president and trustee of the New Jersey Aviation Museum and Hall of Fame, vice president and trustee of the Girl Scout Council of Bergen County, and trustee of the Hackensack Medical Center Foundation.
Nebraska Press Wins Award

The 2000 J. Franklin Jameson Award in Educational Achievement from the American Historical Association was given to Rolena Adorno and Patrick Charles Pautz for Álvar Núñez Cabeza de Vaca: His Account, His Life, and the Expedition of Pánfilo de Narváez, University of Nebraska Press. The three-volume set also won the Western History Association’s Dwight L. Smith (ABC-CLIO) Award and earned a spot for the press’ senior designer Richard Eckersley in the American Institute of Graphic Arts “50 Books/50 Covers of 2000” in the University Press category.

Perpetuating Power: How Mexican Presidents Were Chosen

By Jorge G. Castañeda

With opposition candidate Vicente Fox’s momentous victory on July 2, 2000, the Mexican succession mechanism as we know it has come to an end. Jorge Castañeda gives his own reflections on this historic event, raising key questions concerning the future of Mexico before focusing on the archaeology of presidential succession and its inherent significance to the people and society of this country.

The Mirror of Spain, 1500-1700: The Formation of a Myth

By J.N. Hillgarth

J.N. Hillgarth investigates how non-Spaniards saw Spain in the period when it was the leading power in Europe. He brings together a wide range of sources that elucidate Spanish history and Spanish character, demonstrating the ways in which propaganda has distorted both, in the past and into the present.

Vidas im/propias: Transformaciones del sujeto femenino en la narrativa española contemporánea

(Spanish)

By María Pilar Rodríguez

This analysis of six Spanish novels, one for each decade from the 1940s through the 1990s, proposes a new concept of the novel of feminine development and emphasizes the importance of the voicing of women’s sentiments, passions, desires, and opinions that have not been expressed before in the literature of Spain.

The U.S.-Mexican Border in the Twentieth Century: A History of Economic and Social Transformation

By David E. Lorey

Where and what is the U.S.-Mexican border region? Why does it merit attention as a separate entity? The most general goal of this book is to advance the notion that the pressing issues facing North America must be addressed in a new regional context, a context that includes Mexico the United States, and the boundary area that unites them.

Feminism Is for Everybody: Passionate Politics

By bell hooks

Cultural critic bell hooks applies her critical analysis to the most contentious and challenging issues facing feminists today, including reproductive rights, violence, race, class, and work. hooks calls for a feminism free from divisive barriers but rich with rigorous debate. She encourages us to demand alternatives to patriarchal,
This book provides an in-depth look at the pivotal movement that drew thousands of Mexican Americans into national electoral politics for the first time, elevated Mexican American reform issues to the national liberal agenda, and helped elect John F. Kennedy as the first Catholic president of the United States.

Renewing the Maya World: Expressive Culture in a Highland Town

By Garrett W. Cook

Each year in the Highland Guatemala town of Santiago Momostenango, Maya religious societies, dance teams, and cofradías perform the annual cycle of rituals and festivals prescribed by Costumbre (sacred Maya Christian religion), which serves to renew the cosmic order. This richly detailed ethnography explores how these festivals of Jesucristo and the saints derive from and reenact three major ancient Maya creation myths.

Whitebread Protestants: Food and Religion in American Culture

By Daniel Sack

Protestants like to think their religion is not materialistic. Its theology, spirituality, and liturgy are rooted in concepts and words, and any religious practice that involves material objects or invokes the senses is suspect—dismissed as papist or shunned as idolatrous. But the place of food within American Protestant church life calls this anti-materialism into question.

Women of the World: Laws and Policies Affecting Their Reproductive Lives—Latin America and the Caribbean

By CRIP and DEMUS, Estudio para la Defensa de los Derechos de la Mujer

This well-researched and documented manual from the Center for Reproductive Law and Policy (CRIP) focuses on the laws and policies affecting reproductive health—family planning, contraception, abortion, sterilization, STDs, rights within marriage, and economic and social rights—in Latin America and the Caribbean.

The Right to Live Without Violence: Women's Proposals and Actions

By Latin American and Caribbean Women's Health Network

This book reports on the Tribunal on Violations of Women's Human Rights (El Salvador, 1993) and examines legal provisions and recourse in dealing with violence in the region. It includes conceptual essays and research findings on violence, especially domestic and sexual violence.

Forging the Tortilla Curtain: Cultural Drift and Change along the United States-Mexico Border from the Spanish Era to the Present

By Thomas Torrans

The border region between Mexico and the United States is more dynamic than ever since its transition into a sort of Mexamérica—a world fueled by corporate colonialism, NAFTA, and con-
trumband of every stripe, from illegal drugs to illegal aliens. This sweeping history of the 2000-mile-long borderlands reveals how the region got to be that way.

The Spirit of Lorca

Filmed on location in Spain, this vintage program profiles the immortalized poet/dramatist Federico García Lorca. Extracts from his poems, plays, and letters demonstrate his duende—burning passion—for the arts, while the details of his life and violent death present a thoughtful perspective on Spain's revered literary icon.

(75 min., color) #FFH 10092

FIVE LATIN AMERICAN AUTHORS SPEAK

This series spotlights five of Latin America's preeminent authors, all now deceased, whose writings represent a rich legacy to the world. Programs include:

Octavio Paz

The Nobel Laureate addresses a variety of subjects, including his ongoing interest in politics, his views on relations between Mexico and Spain, the aesthetics of surrealism, and the characteristics of great writers.

(Spanish, 89 min., b&w) #FFH 10608

Rosa Chacel

The author discusses her memories of Valladolid and her childhood isolation; her productive exiles in Rome, Brazil, and Argentina; her persistent anger toward the Spanish people; plus three of her books: *Estación, ida y vuelta*, a remarkable antecedent of the nouveau roman; *Teresa*; and the autobiographical *Desde el amanecer*.

(Spanish, 37 min., b&w) #FFH 10609

Julio Cortázar

The author reflects on his view of reality, the creative process, his sentimental nature, and other topics. In addition, he talks about several of his books, including *Rayuela*, a significant contribution to the novel and paradigmatic of the Boom; the politically charged *El libro de Manuel*, *Octaedro*, *Las armas secretas*, *Historias de cronopios y famas*; and *Los premios*.

(Spanish, 2 parts, 74 min. and 49 min., b&w) #FFH 10610

Juan Rulfo

The author—a leading exponent of magic realism—analyzes his works *Pedro Páramo* and *El llano en llamas*. He describes his tragic childhood as well, including the Cristero revolt, his family's financial ruin, the death of his father and mother, and his life in an orphanage in Guadalajara.

(Spanish, 47 min., b&w) #FFH 10611

Alejo Carpentier

The author/musicologist elaborates on his *Los pasos perdidos*, *El siglo de las luces*, and *Concierto barroco*, while providing an understanding of the impact of surrealism and the influence of the Generation of '98 on his writing, the political atmosphere of Cuba, and his childhood in France.

(Spanish, 91 min., b&w) #FFH 10612

CONFERENCE

Center for the Study of Diversity in Teaching and Learning in Higher Education National Conference

April 18-21

"The Global Perspective: Teaching, Learning, and Student Equity" includes, among other conference highlights, concurrent sessions on critical thinking skills, curriculum, pedagogy, collaborative and interdisciplinary learning, and learning communities. At Hotel Inter-Continental, Miami.

Contact: Dr. Toni Forsyth, (408) 864-8509/8993; website, www.TeachLearn.fthda.edu

Puerto Rican/Hispanic Task Force Conference

April 20-21

The 14th Annual New York State Assembly/Senate Puerto Rican/Hispanic Task Force Conference, "Latinos: Redrawing 'Political' Agendas in the 21st century," expected to draw over 8,000 attendees, is one of New York's largest gatherings of the Puerto Rican and Hispanic communities at the Empire State Plaza in Albany, N.Y.

Contact: (718) 931-2620 or (518) 455-3608.

AACRAO 2001 Annual Meeting

April 22-25

The 87th annual meeting of the American Association of Collegiate Registrars and Admissions Officers. At the Washington State Convention and Trade Center in Seattle, Wash.

Contact: website, www.aacrao.org

2001 Teleconference Series

April 26, 1:00-4:00 p.m. EST

The National Resource Center for the First-Year Experience & Students in Transition, in cooperation with Distance Education and Instructional Support at University of South
Carolina, presents “Engaging Comuter Students: Redesigning Campuses for the Majority of America’s College Students.” Among the panelists is María Vallejo, provost/CED, Palm Beach Community College (Fla.). Live and interactive via satellite.

Contact: website, www.sc.edu/fye.

NILD Leaders 2001
Newport, R.I., April 29-May 3
Phoenix, Ariz., May 20-24

While the National Institute for Leadership Development, based upon a philosophy of inclusivity and diversity, is for women and men in community colleges, the leaders 2001 programs are for women. The programs are sponsored by Phoenix College, Maricopa Community Colleges, and League for Innovation in the Community College.

Contact: NILD, (602) 223-4030; e-mail, nild@pcmail.maricopa.edu.

Latino Book and Family Festival
May 12-13

The first Latino Book and Family Festival in New York will be held at the Jacob K. Javits Convention Center in Manhattan.

Contact: (212) 434-7674.

3rd Annual Latino Education Conference
May 13-15

“Critical Issues Affecting Latino Educational Achievement in the 21st Century” is the theme of this year’s ASPIRA, Inc. of New Jersey conference. Confirmed keynote speakers include Carlos Hernández, president, New Jersey City University; Antonia Pantoja, founder, ASPIRA National Association; and Sara Martínez Tucker, president, Hispanic Scholarship Fund. At Bally’s Park Place Hotel and Casino, Atlantic City, N.J.

Contact: Carmen Torres, (973) 484-7554, or e-mail, cторres@nj.aspira.org; website, www.aspira.org.

MALDEF Annual Fundraiser
May 16

The Mexican American Legal Defense and Educational Fund will host its annual fundraiser in Washington, D.C.

Contact: (202) 629-2512.

NISOD 2001
May 27-30

The National Institute for Staff and Organizational Development, along with the Community College Leadership Program, present their 23rd annual international conference, “Making a World of Difference...,” “a unique mix of professional development activities for a unique audience of outstanding community college administrators and faculty.” In Austin, Texas.

Contact: John Roueche and/or Suanne Roueche, (912) 471-7545.

NMCI 16th Annual National Conference
May 31-June 3

The National Multicultural Institute’s 2001 theme is “Creating a National Agenda: Multicultural Partnerships for Change.” The major goals of this conference are to: (1) offer an opportunity for in-depth diversity training and skills-building; (2) focus on some of the most unique issues that professionals face in working with a culturally diverse population; and (3) create a multicultural environment in which an open, cross-cultural dialogue can occur. At the Hyatt Regency Washington on Capitol Hill Hotel, Washington, D.C.

Contact: NMCI, (202) 757-1234 or (800) 233-1234; website, www.nmci.org.

LULAC 72nd National Convention and Exposition
June 3-9

The League of United Latin American Citizens will hold its annual event at the Civic Plaza Convention Center in Phoenix, Ariz.

Contact: (202) 833-6035.

Association of Jesuit Colleges and Universities 20th Annual Meeting
June 13-15

This 20th annual meeting/conference on multicultural affairs will be held at Saint Peter’s College in Jersey City, New Jersey.

Contact: Robert Perry, (201) 915-9288; e-mail, perry_rob@spc.edu.

The Smithsonian Center for Latino Initiatives Workshop
June 18-29

The Smithsonian Center for Latino Initiatives will sponsor a ten-day workshop, “Interpreting Latino Cultures: Research and Museums” in Washington, D.C.

Contact: website, www.si.edu.

HERS, Mid-America Summer Institute
June 24-July 20

The University of Denver’s HERS, Mid-America presents its 26th annual summer institute for women in higher education administration.

Contact: Betsy Metzger, (303) 871-6866; e-mail, bmetzger@du.edu.

Deaf Education Technology Conference
June 25-29

“Instructional Technology and Education of the Deaf: Supporting Learners, K-College,” the first symposium in seven years to present current research and state-of-the-art practice for educators of the deaf, will be hosted by the National Technical Institute for the Deaf. At Rochester Institute of Technology, Rochester, N.Y.

Contact: E. William Clymer, (716) 475-6894 (v) or (716) 475-6704 (tty); e-mail, techsym@rit.edu; website, www.rit.edu/~techsym.

AFT QuEST 2001 Conference
July 12-15

The American Federation of Teachers presents QuEST 2001, a conference on Quality Educational Standards in Teaching (QuEST), for PreK-12 teachers, school staff, and state and local education leaders, including from the higher education sector. At the Marriott Wardman Park Hotel in Washington, D.C.

Book Review

By Jesse Estrada

Francisco Manzo-Robledo’s Lugar de Avispas is an excellent political satire. Written in Spanish, the novel examines the systemic corruption of politicians, administrators, church officials, and other groups with power in Mexico. The theme can be extracted from the author’s inscription: Para mi querido pueblo, que cada día me duele más (For my beloved town, that each day causes me more pain).

Through its character depiction, vulgar language, and humorous wordplay, the novel successfully captures the ways in which greed and immorality affect the lower classes in a stratified society.

The book offers a pastiche of characters ranging from corrupt university administrators to greedy Catholic Church officials. The novel focuses primarily on the gobernador (the governor) and his many money-making schemes. Like most of the characters, he is vulgar, amoral, disrespectful, and clearly unqualified for his position. The other characters are microcosms of the governor and his insatiable appetite for money. These characters step in and out, sometimes without clear descriptions. What the reader constructs relies heavily on the dialogue.

In one instance, a teacher with any of the female students in the class. He pretends to be furious at the proposal and ends with “No puedo creer que llegue a tanto su desesperación y falta de vergüenza... Y dice que puedo estar a la que yo quiero?” This, like much of the dialogue in the book, indicates that moral or idealistic principals do not drive these disembodied voices. The maestro’s mock indignation demonstrates how greed and sexual appetites preclude his will to do what is right. The obscenities in the book also reflect the lack of humanism.

Manzo-Robledo interweaves profanities in the dialogue throughout the novel. These vulgar expressions expose the characters’ lack of integrity. Whether bishops, university professors, businesswomen, and so forth, they all ascribe to this low manner of speaking. Except for a few, such as the grassroots priest who is a liberation theologian, the characters are immersed in filthy discourse that runs their everyday activities: scheming, extortions, sexual degradation, murder, and exploitation.

The author uses humor and wordplay such as Spanglish, satirical acronyms, ridiculous organizational names, dichos (sayings), and so on. Interwoven are American cultural references, such as the Wall Street slogan “Time is money,” references that allude to the adverse effects the US. is having on Mexico, but that are interjected to add to the hilarity of the work. All these techniques convey the absurdity in the decision-making by these figures. When the governor is asked to give funds to the university, by someone who has been embezzling funds from the school, the governor replies, “Aquí no hay moral para todos. Si yo me baño, debe cuidar que los que estan a mi alrededor reciben una salpicada, ¡pero que no comiencen a dar brincos como si fuera la ballena Willie chapoteando en el mar de la abundancia, haganme el favor!” The analogy of sharing the wealth in terms of splashes from Disney’s Willie is unique and entertaining.

Manzo-Robledo also uses comical dichos, such as “Bienaventurados los borrachos porque ellos verán a Dios dos veces.” The bastardization of this Biblical saying points to drinking debauchery that occurs in the text.

These various elements, the pastiche of characters, demeaning portrayals of authority figures, humor, etc. could potentially categorize this as a post-modern novel and at the same time be construed as weaknesses. To be sure, the novel lacks traditional plot development and detailed descriptions of character and place. The chronology is sketchy, and the setting, ambiguous. Based on the author’s inscription, it could be set in Chihapacingo, which means place of the wasps, a direct translation of the book’s title.

But the setting could be anywhere in contemporary Mexico, given the references to electronic fund transfers and allusions to the Internet. These elements make the novel difficult to follow at points, but they heighten the strongest feature of the novel, the extreme stereotypes. Although they could be seen as problematic, these stereotypes effectively heighten the corruption and oppression in the various hegemonic structures at work in the text. Coupled with the dialogue, these characters, with their twisted ideologies and vulgar language, enrich the novel. Manzo-Robledo’s talents as a political satirist rest heavily on his exaggerated characters.

Overall, this book is an excellent one for a Spanish literature class and, where applicable, a creative writing class, as the piece shows ingenuity in its dialogue and wit. The text is also entertaining for the reader who enjoys political fiction.

Originally from Yuma, Ariz., María de Jesús “Jesse” Estrada is a doctoral candidate in the rhetoric and composition program in the English department at Washington State University. Currently her main areas of study are Latina representation on the Web and issues of technological stratification based on class, race, and gender.

Director of Building Services
Physical Facilities Department

The Ohio State University is seeking applicants for the Director of Building Services for the Physical Facilities Department. Reporting to the Assistant VP of Operations, the Director of Building Services will be responsible for the administration and operation of various activities related to the delivery of high quality housekeeping services for approximately 200 buildings for a total of 11.1 million square feet on the main campus of The Ohio State University. The Director of Building Services provides leadership and direction to 2 Assistant Directors, 2 Managers, 7 Supervisors and approximately 250 support staff. Responsibilities include procurement of supplies and equipment, planning and coordinating with academic and administrative units for daily cleaning activities and for special events, overseeing custodial contract specifications, and development and implementation of effective staff and development programs. The Director monitors departmental budgets, expenditures, and staffing levels, while working to develop quality-focused processes to meet customer service expectations.

Minimum qualifications: Bachelor's degree required. Master's degree desired in Business Administration or related discipline or equivalent combination of education and experience desired. Considerable experience in custodial services administration relating to resource and budget management skills in a university setting is desired. Ability to effectively predict and respond to campus and departmental needs while displaying leadership skills which impact quality and customer service principles to the organization. Excellent human relations skills and the ability to develop multifunctional teams is needed. Experience working with labor unions desired.

Salary: Commensurate with education and experience.

Application Deadline: May 12, 2001

For more information please visit our website: www.physfac.osu.edu

To apply, please submit a letter of interest, salary requirement and resume to: The Ohio State University, Department of Physical Facilities, Attn.: Heather Hudnell, 2003 Milkin Road, Columbus, OH 43210-1268. hudnell.1@osu.edu

The Ohio State University is an Equal Opportunity/Affirmative Action employer. Women, minorities, veterans, and individuals with disabilities are encouraged to apply.

DIRECTOR MULTICULTURAL AFFAIRS

The University of Nebraska at Omaha seeks a committed professional to provide leadership in promoting, advocating and delivering supportive services to students of color, especially first-year students, by (i) establishing and implementing on-campus programs and services which will have a positive impact on campus involvement and the graduation rate of students of color; and (ii) working collaboratively with faculty/staff to improve students' retention rate.

The position requires a master's degree in student personnel, counseling, education or a related field, plus five years administrative experience in program planning, preferably with academic support and multicultural services in a collegiate environment; excellent communication skills including conflict resolution and team building; and the ability to relate to diverse groups of students, faculty, staff and external constituencies. Spanish speaking capabilities desirable.

The position will be available in early summer. Submit letter of interest, resume, and the names/addresses of three references to Human Resources, University of Nebraska at Omaha, 6001 Dodge Street, Omaha, NE 68182-0263.

An affirmative action/equal opportunity employer.
DEAN
COLLEGE OF BUSINESS ADMINISTRATION (COBA)
(REVISED ADVERTISEMENT)

The College of Business Administration at Texas Tech University was named the Jerry S. Rawls College of Business Administration on February 8, 2001, as a result of his generous gift of $25 million. The endowment includes $12 million for faculty chairs, graduate fellowships, technological improvements, faculty development, and for Dean's excellence. The person selected for this position will have a unique opportunity to shape the future vision of the college.

TTU is now inviting applications for the position of Dean of the Jerry S. Rawls College of Business Administration. The Dean is expected to provide dynamic, visionary leadership to enhance the prominence of the undergraduate, graduate, and outreach programs of the college. TTU is committed to providing substantial investments toward developing the strengths and reputation of the faculty and the college infrastructure.

The COBA is accredited by the AACSB, has approximately 110 full-time equivalent faculty and 60 graduate faculty members. The COBA has an annual budget of approximately $12 million, yearly research and sponsored project expenditures of approximately $1 million, and an endowment of $65 million. Bachelor's, Master's, and Doctoral degrees in accounting, finance, information systems, management, marketing, and quantitative sciences are offered, and joint degree programs with other TTU colleges and reciprocal international programs have been established. The COBA and the TTU Health Sciences Center jointly direct the MBA/MD program, the only one of its kind in the country. Spring 2001 enrollment includes 4,300 undergraduates, 350 masters, and about 58 doctoral students. The COBA houses the Center for Professional Development and the Texas Center for Innovative Organizations.

Qualifications and Characteristics

- An earned doctorate in business or a related discipline is preferred.
- Academic experience is desirable, but not required.
- Significant and successful administrative experience and successful interface with business through direct experience, consulting, or field-based research.
- A capacity for administrative as well as intellectual leadership. The successful applicant should be able to formulate, articulate, and implement a strategic vision for the future of business education at Texas Tech University.
- Dedication to student achievement, faculty development, and creation of an environment that promotes collegiality, pride, cultural diversity, and a commitment to excellence.
- An ability to develop and sustain partnerships with a supportive business (corporate and local) and alumni community, and to successfully accomplish fund-raising efforts.
- Responsiveness to the various constituencies that comprise the College and the skills to work cooperatively with other academic units within the University.
- Ability to communicate with students, faculty, university administrators, business, government, foundations, and alumni.

Review of applicants will begin immediately. Applications will continue to be reviewed until the position is filled. Candidates should submit a letter of application, curriculum vitae, and the names, telephone numbers, and addresses of three references. Nominations, applications, and confidential inquiries should be sent to the Chair of the Search Committee:

William M. Marcy, PhD, PE
Dean of Engineering
Texas Tech University
Box 43103
Lubbock, Texas 79409-3103
Phone: (806) 742-3451
Fax: (806) 742-3493
e-mail: william.marcy@ttu.edu
Electronic submissions are preferred.

Desired beginning date is September 2001, but that is negotiable. Women and members of underrepresented groups are especially encouraged to apply. Texas Tech University is located in Lubbock, a city of approximately 200,000, situated on the High Plains of West Texas and is the only university campus in Texas with a School of Medicine, a School of Law, and a comprehensive university on the same campus. The University holds the Carnegie Foundation Doctoral, Extensive Research classification with expenditures in excess of $40 million in sponsored projects annually. Enrollment of approximately 25,000 includes almost 3,500 graduate students, and degrees are offered in more than 150 undergraduate, 100 masters, and 60 doctoral fields of study.

EEO/AA/ADA Employer

WASHINGTON COLLEGE OF LAW

CLINICAL TEACHING JOB ANNOUNCEMENT

The Clinical Program at American University, Washington College of Law is seeking a visiting professor or a practitioner-in-residence interested in clinical teaching to fill an opening in the Community and Economic Development Law Clinic. Students in the Community and Economic Development Law Clinic represent small neighborhood-based nonprofits and minority entrepreneurs in underserved areas of the District of Columbia. Students assist their clients in deciding on choice of entity, gaining tax exempt status, in acquiring property and funding, in dealing with licensing and zoning issues, and in other transactional matters. The Clinic's clients include tenants' associations in public and low-rent private sector housing, traditional shelter, day care centers, and community development corporations.

The Clinic teacher studies through supervision of their cases, simulations, a seminar and weekly case staffings. The candidate will supervise students in their fieldwork and case staffings, and plan classes for and teach in the seminar in collaboration with the faculty director of the Clinic. In addition, the candidate will participate with other clinical faculty in the Office of Clinical Programs in periodic small seminar reviewing issues in lawyering and clinical teaching. The candidate will also have the opportunity to engage in scholarly research and write for publication with the encouragement, feedback and support of interested colleagues.

The visiting or practitioner-in-residence position is for one year beginning in the summer of 2001, to replace a professor on sabbatical. Minimum qualifications include outstanding academic qualifications, and at least 5 years of experience as a lawyer, preferably in any field of transactional or community development law relevant to the work of the program. Applicants should demonstrate a commitment to working in low-income communities.

Applicants should send a cover letter and curriculum vitae to Prof. Peter Jazwi, Director of the Appointments Committee, American University, Washington College of Law, 4801 Massachusetts Ave., N.W., Washington, D.C. 20006, via a copy to Professor Susan Bennett, the Director of the Community and Economic Development Clinic.

American University is an equal opportunity employer and actively encourages applications by a diverse group of candidates.

Buffalo State
State University of New York

Assistant to the Vice President for Student Affairs

Provide administrative support to the VP, coordinate daily operation of the Office of the Vice President for Student Affairs. Supervise clerical and student employees: coordinate preparation and distribution of documents, manuals, and selected publications; assist in organizing and planning annual and special events; serve as administrative liaison between the office and other administrative offices, faculty, staff, and students. Establish and supervise systems for reviewing, processing, filing, and retrieving documents and correspondence; drafting speeches, meeting agendas, and reports; setting up and maintaining databases.

Required Qualifications: Bachelor’s degree and two years of responsible administrative experience. Demonstrated writing, proofreading, and editing skills. DEAN OF ADMISSION AND FINANCIAL AID
WILLIAMS COLLEGE
Williamstown, Massachusetts

Williams College invites applications and nominations for the position of Dean of Admission and Financial Aid. The Dean is responsible for leading and coordinating the admission and financial aid programs at one of the nation’s preeminent liberal arts colleges. Williams College is committed to need-blind admission, need-based financial aid, and to meeting the full need of students qualifying for aid. The Dean reports to the Provost and is an integral part of the College’s administrative team.

Candidates are expected to have significant experience leading admissions and/or financial aid efforts at a college or university, an in-depth knowledge of admission and financial aid issues facing liberal arts colleges, a commitment to a diverse campus community, and a record of achievement that includes evidence of successful planning, creative problem-solving, and effective management. The Dean is expected to be an effective communicator for the College with external audiences, including prospective students and their parents, college counselors, and the admissions profession, alumni, faculty, and colleagues. The departments of admissions and financial aid have a total staff of 23 and a combined operating budget of $1.6 million.

Williams College is a highly selective, residential, privately endowed, coeducational undergraduate liberal arts college located in Williamstown, Massachusetts. With roughly 2,000 undergraduates and 220 tenure-track faculty, Williams has an operating budget of $110 million and an endowment of $1.5 billion.

Screening of materials will begin immediately and continue until the position is filled. Nominations and applications should be submitted to the consultants supporting Williams College in this search:

Williams College is an Affirmative Action, Equal Opportunity Employer.

NEW MEXICO STATE UNIVERSITY

VICE PRESIDENT FOR UNIVERSITY ADVANCEMENT

New Mexico State University invites nominations and applications for the position of Vice President for University Advancement. New Mexico State University is the state’s land-grant institution located in Southern New Mexico, and is one of the 152 Universities on the Carnegie Foundation’s list of Doctoral/Research Universities-Extensive level, a Title III Minority Institution, and a member of the Hispanic Association of Colleges and Universities. New Mexico State University serves a multi-cultural student population of more than 23,100 students on five campuses.

The Vice President for University Advancement reports to the President and will have responsibility for the emerging capital campaign, institutional advancement, annual and deferred giving, major gifts, alumni relations, and university communications including media relations and publications. The selected individual will also serve as the Executive Secretary of the NMState Foundation.

Candidates must have a minimum of a bachelor’s degree from an accredited institution of higher education, and solid administrative experience in managing all aspects of a university relations office. The successful candidate must possess seven years of senior development experience, a demonstrated record of success in fundraising, working with foundations, corporations, major donor prospects, faculty and staff, volunteers, officials and dignitaries. This candidate must have experience in developing, implementing and concluding a successful capital campaign, articulating the mission, goals, needs and achievements of the university. Familiarity with university communications and marketing, is highly desirable. The candidate must have an understanding of and commitment to the cultures, values and traditions of the Southwest.

Screening of applications will begin April 16, 2001, and continue until the position is filled. Offers of employment contingent upon verification of individual’s eligibility for employment in the United States.

Applications, nominations and letters of interest should be submitted to:

R. William Funk

Korn/Ferry International Education Practice
2106 McKinney Avenue, Suite 1800
Dallas, Texas 75201
Fax: (214) 954-1849
email: cynthia.graser@kornferry.com

New Mexico State University is an equal opportunity/affirmative action employer.
University of North Florida

STUDENT CONDUCT OFFICER/ASSOCIATE GENERAL COUNSEL

The University of North Florida (UNF) invites applications for Student Conduct Officer/Associate General Counsel. The position, which reports to both the Associate Vice President for Student Affairs and the General Counsel, serves as the institution's chief Student Conduct Officer and also as an Associate General Counsel. UNF is one of ten institutions within the State University System of Florida and is accredited by the Southern Association of Colleges and Schools (SACS). It is a comprehensive, urban university with a nationally recognized academic reputation offering degree programs at the baccalaureate, master's and doctoral levels. Current student enrollment is 12,800.

UNF is located half way between downtown Jacksonville and the Atlantic Ocean.

The Student Conduct Officer is responsible for administering and interpreting the Student Code of Conduct and for establishing appropriate procedures to implement the code. A major responsibility is educating students about misconduct and its impact on the community as well as about procedures for implementing the code. The Student Conduct Officer resolves alleged violations of the code through procedures outlined in the code, trains the Student Conduct Hearing Panel members and serves as an advisor to students, faculty and staff. The position provides leadership, oversight and training of student conduct officers and is responsible for statistical reporting on student conduct violations and disseminating this information as necessary.

In the role of Associate General Counsel, the successful candidate will provide legal advice and guidance to university divisions on a wide array of issues. This will include the preparation and review of contracts; the drafting and promulgation of University rules and policies; the interpretation of State and Federal laws, and University rules, policies and procedures; and the provision of advice and guidance to university clients on other matters as needed. Thus, the Associate General Counsel must possess outstanding problem solving, analytic and research skills and must be able to communicate and work well with diverse groups.

Applicants must have an earned law degree from an accredited American law school, and a minimum of two years legal experience and two years experience working with university student conduct issues. Applicants with experience as in-house counsel to a college or university are preferred. Candidates must be admitted to practice in at least one state and be a member of or eligible for immediate admission to the Florida Bar.

Nominations are welcome. Applications should include a cover letter, a detailed resume, and at least three letters of reference, and must be postmarked no later than 4/30/01.

Nominations and applications should be sent to:

Dr. Mark E. Workman
Chair, Student Conduct Officer/Associate General Counsel Search Committee
University of North Florida/Office of the President
4507 St. Johns Bluff Rd. S.
Jacksonville, FL 32224

Associate Dean for Research
Syracuse University
College of Human Services and Health Professions

Applications and nominations are invited for the position of Associate Dean for Research in the College of Human Services and Health Professions, Syracuse University, Syracuse, New York.

Syracuse University has recently founded the College of Human Services and Health Professions, an integration of the existing College of Human Development (Child and Family Studies, Marriage and Family Therapy, Nutrition and Hospitality Management), College of Nursing, and School of Social Work. The new college is seeking a senior research scholar who will provide visionary leadership to the further development of inter-disciplinary research productivity within the college.

Description of the Position: The Associate Dean for Research will report directly to the Dean and is responsible for promoting a sound research infrastructure for the new College. The Scholar is expected to provide leadership for the development of inter-disciplinary research activities that contribute to the further development of research capacity of faculty and students; stimulate collaborations among researchers within the College, the University and with other organizations; maintain an active program of research; and obtain research funding.

Qualifications: Candidates must be recognized scholars with a demonstrated track record of funded research. They must possess an earned doctorate in a health related discipline, with a strong background in research. Candidates must have familiarity with public and private funding sources; the ability to work effectively with administrators, faculty, students, and staff; the ability to develop and lead inter-disciplinary research; and noteworthy accomplishment in scholarly publications. Strong written, oral, organizational, and interpersonal skills are required. The candidate's background and expertise must qualify him or her for appointment at the rank of professor in an academic department.

University & College Description: Syracuse is an independent Research II University and a member of the American Association of Universities. It has an enrollment of 18,000 students. For further information about the University, see http://www.syr.edu. The College of Human Services and Health Professions has an interdisciplinary faculty of over 65 full time equivalent members (45 tenure track positions) and an enrollment of approximately 1300 students undertaking studies and research at the baccalaureate, masters and doctoral levels. For further information about the College, see http://hsbh.syr.edu.

Compensation for this position is competitive. Review of applications and nominations will commence immediately, and the position will remain open until filled. Nominations and/or applications, including a letter of interest, curriculum vitae, and names, addresses, and phone numbers of five references, should be sent to: Professor Bruce W. Lagay, Chair of the Search Committee, College of Human Services and Health Professions, Hinds Hall, Suite 320, Syracuse University, Syracuse, New York 13244-1190.

Syracuse University is an affirmative action, equal opportunity employer. Applications from individuals from traditionally underrepresented groups are encouraged.

State System of Higher Education
The System Works for Pennsylvania

Chancellor

On behalf of its fourteen member universities and their presidents, faculty, staff, and students, the Board of Governors for Pennsylvania’s State System of Higher Education seeks an experienced executive to serve as Chancellor. Reporting directly to the Board, the Chancellor, as chief executive, provides vital leadership in advancing the Board of Governors’ change agenda through strategic initiatives focused on learner centeredness, collaboration, and accountability, and in working collaboratively with the presidents in enhancing the state-owned universities.

The State System of Higher Education is led by a 20-member Board of Governors, including four legislators and three students. The Board has overall responsibility for planning and coordinating the development and operation of the System. The Board will appoint a chief executive to replace Dr. James McCormick, the founding chancellor. The System comprises the Commonwealth’s 14 publicly owned universities, four branch campuses, several regional centers, and the McCorker Environmental Learning Center. The System universities offer a range of associate, bachelor’s, master’s, and doctoral degree programs. There are more than 250 degree and certificate programs in more than 120 areas of study. As Pennsylvania’s largest higher education provider, the System currently serves more than 96,000 students, the majority of whom are Pennsylvanians. The System is the Commonwealth’s 17th largest employer, with a budget of $1.4 billion and more than 12,600 employees. There are nearly 70,000 alumni of State System universities worldwide, more than 361,000 alumni live in Pennsylvania and contribute to the Commonwealth in many ways. The System has an economic impact of approximately $2.2 billion annually into the economy of Pennsylvania.

The successful candidate will have at least seven years of successful executive leadership experience and management of a diverse, complex organization. An advanced degree desired, and an earned doctorate or terminal degree is preferred. Completion of a successful interview and background verification of accomplishments relevant to the position description is required.

Salary, benefits, contract details, and other terms of employment are negotiable and competitive and are subject to the agreement between the Board of Governors and the successful candidate.

For best consideration, applications should be submitted prior to April 23, 2001. Applicants should submit a letter of interest addressing the problem areas, a current résumé, and the names, addresses, business, and home telephone numbers of six (6) references. Individuals wishing to nominate candidates for the position should submit a letter of nomination including the name, organization, position, address, and telephone number of the nominee. Applications and nominations should be sent to: Dr. Jan Greenwood, Vice President, A.T. Kearney, Inc.; Chancellor Search; Pennsylvania’s State System of Higher Education, 333 John Carlyle Street, Alexandria, VA 22314; greenwoodt@atearney.com. Review of applications will begin immediately and will continue until an appointment is made.

The State System of Higher Education is an equal opportunity/affirmative action employer and encourages applications from minorities, women, veterans, and persons with disabilities. www.schechanu

Washington College of Law
Practitioners-in-Residence, Intellectual Property Clinic

The Washington College of Law at American University is seeking two Practitioners-in-Residence to teach in a new Intellectual Property Clinic, to commence in Fall 2001. Each practitioner will supervise eight students and teach the classroom components of the clinic with other faculty. These non-tenure-track faculty appointments can typically be held for two consecutive one-year periods. Excellent support for scholarship is available. Requirements include a good academic record, significant practice experience (preferably in IP or a related area), and strong interest in a law teaching career.

The American University and Washington College of Law are committed to a diverse faculty and student body and encourage the applications of women and minorities. The American University is an EEO/AA employer.

HISPANIC OUTLOOK
ASSOCIATE VICE PRESIDENT – INFORMATION TECHNOLOGY SERVICES
INFORMATION SERVICES DIVISION

Kent State University invites applications and nominations for a newly created position of Associate Vice President of Information Technology Services. The Associate Vice President will provide leadership, expertise, and direction for information technology services (IT), including the areas of administrative software development, telecommunications, data administration, computer operations and production services, throughout the University’s eight-campus system. The Associate Vice President, who reports to the Vice President for Information Services/Chief Information Officer, will work closely with faculty, administration, and staff to ensure an integrated information network that fosters the effective use of technology consistent with the University mission.

Responsibilities include:
- Assist the Vice President in the development and implementation of Division mission, objectives and administrative functions;
- Establish goals, objectives, and strategies; develop and implement programs and activities to accomplish goals;
- Evaluate emerging technologies and plans for the integration of IT into workflow and administrative functions;
- Provide direct and indirect support across departments through a team of administrative, professional, and support staff;
- Analyze and assess existing IT programs; develop and implement change; and
- Provide leadership in matching technological opportunities to institutional goals.

Required Qualifications:
- Master’s degree in information/computer science or relevant field;
- Minimum of ten years of progressively responsible IT experience in developing and supporting administrative systems;
- Five years of experience in an academic environment or complex organization and an understanding of issues impacting higher education as they relate to IT systems;
- Experience in serving on IT strategic planning;
- Experience in the management of technical personnel;
- Experience in the management of technical personnel;
- Proven record of building collaborative relationships with stakeholders;
- Significant fiscal/budgetary experience; and
- Technical expertise related to mainframe and server technologies.

Preferred Qualifications:
- Experience in developing plans for implementation of appropriate technical applications;
- Technical expertise in the operation and management of multi-node telecommunications infrastructure (multiple PEX’s, voice mail and automated billing systems); and
- Experience in the operation and management of multi-site video network.

University: Founded in 1910, Kent State University is Ohio’s third-largest public university, committed to preparing students with the knowledge and skills necessary for the twenty-first century workplace.

Kent State, with its optimum blend of a full range of baccalaureate programs and strength in targeted research areas, is among an elite group of Doctoral/Research University-Extensive institutions designated by the Carnegie Foundation. From pioneering breakthroughs at the renowned Liqui Crystal Institute, to innovative learning techniques at the Moulton Hall Technologies and Learning Center, Kent’s academic and research programs have earned regional, national and international recognition. The Kent Campus is at the center of the University’s eight-campus system, serving nearly 30,000 students. Kent’s seven Regional Campuses, located throughout Northeast Ohio, comprise one of the largest regional systems in Ohio and one of the largest in the nation.

For more information, visit the Kent State University website at http://www.kent.edu

Salary / Benefits: The University offers a comprehensive benefits package that includes health and dental insurance, vision care, life and accidental death insurance, tax deferred annuities, state or alternative retirement plans, and flexible reimbursement accounts and tuition waivers. Salary is competitive and commensurate with experience.

Applications Process: Review of applications will begin April 30, 2001 and continue until the position is filled. To apply, interested candidates should forward their resume, letter of application and contact information for at least three references to: Ms. Deborah Bell, Assistant Vice President, Office of the Vice President for Information Services/Chief Information Officer, Kent State University, P.O. Box 5190, Kent, OH 44242-0001.

Equal Opportunity/Affirmative Action Employer.
Vice Provost For Adult And Continuing Education And Dean Of University College

Northeastern University seeks a dynamic and experienced leader with a record of entrepreneurial success in higher education for the position of Vice Provost for Adult and Continuing Education and Dean of University College.

Northeastern University is a major private urban research university founded in 1889, known for its professional education, liberal arts and sciences, and co-operative education program. Located in Boston, the University enrolls approximately 19,000 full and part-time undergraduate and 4,500 graduate and professional students. Long recognized as a world leader in innovative education through its cooperative education plan, Northeastern University offers a variety of curricula through seven undergraduate colleges, nine professional schools, a significant part-time undergraduate division, and a number of continuing and special education programs and institutes.

The Vice Provost for Adult and Continuing Education and Dean of University College is the intellectual and administrative leader for the nontraditional programs including University College, Network Northeastern, Continuing Education and the English Language Center, as well as special summer and distance education programming across the University. The future direction of University College will focus primarily on professional and graduate education with special emphasis on the use of emerging technologies in distance learning. The Vice Provost reports directly to the Provost and sits on the University Council of Deans.

Requirements: Candidates should have demonstrated management and significant budgetary experience in nontraditional academic programs, expertise in the professional and graduate part-time and adult markets, a documented record of achievement in distance learning and related technologies and a proven record of success in the field of entrepreneurial, market-oriented programming essential to University College.

The position requires strategic thinking, organizational, and planning experience, strong written, oral, and interpersonal communication skills, and the ability to work collaboratively with faculty and staff at all levels in a diverse environment. An earned doctorate degree is preferred.

Review of Applications will begin May 13, 2001. Please submit cover letter and resume to: Patricia Maguire Messner, Vice Provost and Chair of the Search Committee, Northeastern University, 112 Hayden Hall, 360 Huntington Ave., Boston, MA 02115.

For further information, please contact: Lanning & Associates, 781-237-1774 or lansing@medialn.com. Northeastern University is an Equal Opportunity/Affirmative Action Title IX Employer. Individuals of color and women are encouraged to apply.

Saint Joseph College

Child Development/Educational Psychology
Faculty Position

Saint Joseph College, located mid-way between Boston and New York City, provides a rigorous liberal arts and professional education for a diverse student population while maintaining a strong commitment to developing the potential of women.

Candidates nearing completion of their doctoral program are invited to apply for a one year visiting faculty appointment to begin in August 2001. In respect to the College's commitment to partnerships in multi-cultural school settings, we especially encourage applications from people of color. Responsibilities will include teaching child study and educational psychology courses in graduate and undergraduate programs in the Department of Child Study, Education and Special Education.

Qualifications include a doctorate (or candidates for doctorate) in child development, educational psychology, or a related field. Professional experience in schools is highly desirable. The successful candidate shall understand and support the College's mission.

Send letter of application, curriculum vitae, copies of transcripts, and three letters of reference from people who have supervised your work to the Human Resource Department, Child Development/Educational Psychology Search, Saint Joseph College, 1678 Asylum Avenue, West Hartford, CT 06117.

Review of applications will begin immediately and continue until the position is filled.

An EO/M/F/V/D employer. Women and minorities are encouraged to apply. Learn more about Saint Joseph College at www.sjc.edu.
**HUMANITIES**
(Position 01-245) English, Speech/Communication, Reading, Fine Arts, Religion, Philosophy

**MATHEMATICS**
(Position 01-237) Mathematics or related field (Engineering)

Individuals will be responsible for providing leadership to the appropriate faculty and staff under the supervision of the campus Dean of Academic Services. Primary responsibilities are to maintain standards of instruction that challenge students academically and to maintain an academic climate conducive to teaching and learning. This is a twelve-month, tenure track position with faculty rank and will require some teaching.

Master’s degree required with a minimum of 18 semester (30 quarter) hours of graduate credit in the discipline (see above). Doctorate preferred. A minimum of three years of college-level teaching experience and at least three years administrative or comparable experience in higher education is required. Experience with academic planning and assessment, curriculum development, faculty evaluation, promotion and tenure processes, course scheduling, faculty and staff recruitment and hiring, development and management of budget.

Salary is $54,615 (commensurate with education and experience) with excellent benefits. Initial appointment will be for a term of up to four years with reappointment at the discretion of the President. Position will start July 1, 2001. Review and screening of applications will begin on 4/27/01 and may continue until the position is filled.

Applicants should reference the appropriate position number and send the following as a single packet:
(1) letter of interest, (2) resume, (3) unofficial copy of graduate transcript(s), and (4) list of five professional references (names, addresses, e-mail addresses, telephone numbers) to:

Georgia Perimeter College, Human Resources Dept., Judy Chastanoy
3291 Panhersley Rd., Decatur, GA 30034.

**DIRECTOR OF THE CALTECH WOMEN'S CENTER**

The California Institute of Technology is an independent, privately supported university offering education at both undergraduate and graduate levels. It is one of the world’s major research centers in science and engineering. The Caltech Women’s Center was founded in 1993 to work for the advancement of women in science and engineering and for the advancement of all women at Caltech. The Center works to support the central mission of the Institute, which is to educate and guide the development of scientists and engineers through teaching and research. Thus, the Director of the Women’s Center is responsible for developing and maintaining an environment conducive for the professional, intellectual, and scientific achievement of excellence at Caltech for all women, and devising programs and other strategies to address the needs of women at Caltech. The Director will establish connections with various campus organizations as well as work independently to provide workshops, seminars and educational programs for the Caltech community. The director also will be available to assist with ad hoc crisis management. The position reports to both the Provost and the Vice President for Student Affairs.

The Women’s Center operates as a central meeting place, program center, information and referral resource, and crisis management and advocacy center, for the entire Caltech community. The Director’s general activities include providing assistance and services for women: participating as an active leader on campus; working with all campus organizations and academic units to coordinate programs and advance the status of women on campus; advocating for women on campus; implementing educational and professional programming; administering the daily activities of the Center; and working as a catalyst for change.

Candidates must possess a Master’s degree or preferably a Ph.D. degree along with 5 to 7 years of experience in administering a women’s center program. A knowledge of women’s issues in higher education and issues facing women in science and engineering is required. The successful applicant must have the ability to communicate and work effectively with faculty, administration, students and staff. The director must have the ability to assess, design and implement effective programming and policies that address gender issues in higher education. In addition, the director must have the ability to supervise staff, student workers and volunteers and work with an advisory board.

Please send a statement of interest, resume and the names, addresses and phone numbers of three references to:

Dr. Sharilyn Slavin Miller, Search Committee
Assistant Vice President for Student Affairs
MC 108-31
California Institute of Technology
Pasadena, CA 91125

Application Deadline:
Monday, April 23, 2001

Caltech is an Affirmative Action/Equal Opportunity Employer. Women, minorities, veterans, and disabled persons are encouraged to apply.

**CHEROKEE STUDIES SEQUOYA PROFESSORSHIP**

Western Carolina University invites applications and nominations for the Sequoya Professorship in Cherokee Studies. Candidates for this endowed position must have a graduate degree and a distinguished record of scholarship, publication, or artistic work concerned with the Cherokee. The initial appointment will be for one to three years and may be renewed by mutual agreement. Responsibilities may include teaching and course development, research or production of artistic works, consultation, and outreach. Applicants should have an exemplary record of research or artistic production focused on the Cherokee. The successful candidate will be one who wishes to teach, while continuing a significant agenda of scholarly research, publication, or artistic production.

The Sequoya Professor will assist in expanding existing curricular offerings and WCU’s mission to preserve and study Cherokee culture. The discipline of the candidate is expected to be in the humanities, with likely academic areas of expertise in anthropology, art, history, language, literature, or other relevant field.

The University is 20 miles from the reservation of the Eastern Band of the Cherokee, with rich cultural resources such as the Museum of the Cherokee Indian, the Cherokee Historical Association, Cherokee artists and craftsmen, and the Journal of Cherokee Studies. Other area resources include WCU’s Mountain Heritage Center and one of the largest university library collections related to the Cherokee.

Western Carolina University is a regional comprehensive university and one of the sixteen public institutions of the University of North Carolina. Courses are offered on the Cullowhee campus and at centers in Asheville and Cherokee. A faculty of 335 serves 6,700 students. Undergraduates choose from more than sixty-five majors in one of the four colleges. While the Graduate School offers 12 master’s degrees in over 50 areas, the Ed.S., and the Ed.D. Hunter Library has over 300,000 holdings, 2500 periodicals, and extensive electronic resources. All faculty members and students can access the Internet from their offices and all residence hall rooms. All degree-seeking freshmen are required to own their own personal, networkable computer.

The 230-acre campus is located in a beautiful mountain setting 50 miles west of Asheville, and 140 miles north of Atlanta. The Blue Ridge Parkway, Great Smoky Mountains National Park, and nearby resort areas offer golf, skiing, fishing, hunting, hiking, mountain biking, water sports, and other recreational opportunities.

Applications should include a letter of interest, current resume, and names, addresses and telephone numbers of three references. Applications and nominations should be addressed to: Dr. Brian Bollack, Chairperson, Sequoya Professorship Search Committee, Department of English, Western Carolina University, Cullowhee, NC 28723.

The search committee will begin screening applications and nominations on April 2 and will continue to accept them until the position is filled. The position will be available as early as August 1, 2001.

The University is an equal opportunity employer and encourages applications from a broad spectrum of people. Visit web site http://www.wcu.edu for further information about the University and this position.
MIDDLESSEX COUNTY COLLEGE
VICE PRESIDENT FOR FINANCE & ADMINISTRATION
The College, Middlessex County College is a comprehensive community college in Central New Jersey located on a 200 acre campus in Edison, with outreach centers in New Brunswick and Perth Amboy. In addition to a credit enrollment of approximately 11,000, the College has an extremely active program of corporate and community education. The total operating budget of the College is approximately $90 million, and the present physical plant is valued at approximately $80 million. Middlesex County College is a highly rated comprehensive community college, the largest single source of transfer students to New Jersey’s major state and technical universities. For additional information, please consult the College’s web page at: www.middc.edu

Role and Responsibilities. The college is seeking a qualified individual to serve as its chief financial officer in the position of Vice President for Finance & Administration. This is a critical role: the incumbent will have primary responsibility for improving the College’s financial systems and, as a member of the leadership team, for providing essential information and other inputs into the College’s planning and priority-setting processes.

More specifically, the incumbent directs the development of operating, capital, and grant proposal budgets; manages all departments within the Division of Finance and Administration and approves its annual plan and budget; provides for the development and maintenance of accounting and payroll systems; reviews, forecasts, and analyzes all College and sub unit receipts and disbursements; develops financial and accounting policies; and supervises and leads professional and support staff in all of these areas of responsibility. These core responsibilities may be further augmented in the future.

Qualifications. At a minimum, candidates will have: a master’s degree in business administration or a closely related field (e.g., Accounting); Senior level financial management responsibility preferably in public higher education; and experience and familiarity with computerized accounting and administration systems. Additionally, must have: the highest personal integrity; the capacity to work effectively as a member of a team; and the ability to communicate and work effectively with corporate and community leaders.

Applicant Information. Candidates should submit a current resume, a letter outlining their qualifications to the responsibilities and criteria listed above, and the names, addresses, and telephone numbers of three or more references. Applications and nominations are encouraged to be submitted by email using Word attachments. Application and nomination materials should be submitted to: Human Resources Office; Middlessex County College; 2600 Woodbridge Avenue; Edison; New Jersey 08818. Email: Jane_bevis@mmnj.edu

The College is being assisted in this search by Charles Bunting and Steve Lee, A.T. Kearney Education Practice. Questions may be directed to them at: charles.bunting@atkearney.com and (703) 739-4630; steve.lee@atkearney.com and (703) 739-4631. 100 John Carlyle Street, Alexandria, Virginia 22314.

WILLIAM PATTERSON UNIVERSITY

William Paterson University is a comprehensive public institution of higher learning, committed to promoting student success, academic excellence, and community outreach with opportunities for lifelong learning. Members of the faculty are highly distinguished and diverse teachers and scholars, many of whom are recipients of prestigious awards and grants from the Fulbright Council (24 scholars), the Guggenheim Foundation, the National Endowment for the Humanities, the National Science Foundation and the American Philosophical Society. Featuring nationally renowned academic programs, the University maintains a low student/faculty ratio (12:1) and small class size (21) for its 30 undergraduate and 18 graduate degree programs, supported by state-of-the-art information and communications technology. The University enrolls 10,000 students from across the country and from over 40 foreign nations. William Paterson University is situated on a beautiful suburban campus in Wayne, New Jersey, twenty miles west of New York City.

Resident Director 2 Positions

The Resident Director is a full-time, twelve-month, live-in professional position in the Department of Residence Life. Based on a commitment to student development theory, the Resident Director provides a staff of 6-12 undergraduate Resident Assistants along with student office assistants, and administers the physical and personal aspects of a residence hall area housing approximately 250-500 students. The Resident Director serves on various student life committees, and coordinates a comprehensive educational programming effort in his/her hall area. Reports directly to the Area Coordinator, and works with that person in the execution of his/her job responsibilities. The Resident Director is expected to be available three to four evenings a week.

Bachelor’s degree and one (1) year experience above the undergraduate level in residence hall administration in a college or university setting required. Master’s degree in Student Personnel/Counseling or related area strongly preferred.

The successful candidate should possess supervisory skills; knowledge of facilities management; experience as a hearing officer; strong interpersonal, organizational, and oral/written communication skills.

Starting salary is $28,374. The position offers a comprehensive benefits package including tuition waiver for dependent children after one year of full-time employment.

Please forward letter of application, resume, and list of three references to: Kathleen P. Hallissey, Assistant Director, Department of Residence Life, Drawer HQ, William Paterson University, 300 Pompton Road, Wayne, NJ 07470. The reviews of applications will begin immediately upon receipt and continue until the position is filled. Additional information about the University can be found at http://www.wpunj.edu. An AA/EEO
PRESIDENT

The Board of Trustees of Cleveland State University invites nominations and applications for the position of President.

Founded in 1964, Cleveland State University is a growing, urban university with 40 buildings spread over an 85-acre campus. With a faculty of over 500, the University offers a broad mix of bachelor’s and graduate programs in the humanities, natural sciences and social sciences as well as the professions.

One hundred and seventeen degree and program choices are offered through CSU’s seven colleges: The College of Arts and Sciences, the James J. Nance College of Business Administration, the Fenn College of Engineering, the College of Education, the Maxine Goodman Levin College of Urban Affairs, the Cleveland Marshall College of Law and the College of Graduate Studies. CSU enrolls a diverse student body of approximately 16,000 students, including 700 international students from 62 countries. More than one-fourth are graduate students.

The President has overall academic and administrative responsibility for the University and reports to the Board of Trustees.

Candidates should possess an earned doctorate or other terminal degree and demonstrate a continued commitment to academic excellence. Significant academic leadership experience is essential. The best candidates will show a clear understanding of the opportunities for growth in an urban university and a creative sense of how to further the University’s teaching and research missions. The President must be a community-minded individual with a strong commitment to open access to educational opportunities.

The Presidential Search Committee will begin the review of applications immediately and will continue to the time of selection. Applications should include curriculum vitae and references with titles, complete addresses and telephone numbers. Please visit us on our Cleveland State University web site and submit applications to our retained consultant.

University of Houston

COORDINATOR OF MULTICULTURAL AND INTERNATIONAL STUDENT SERVICES

University of Houston-Clear Lake seeks a Coordinator of Multicultural and International Student Services to assist the Director in planning, implementing, and assessing programs, services, and activities which lead to the continued development and enrichment of a culturally diverse campus environment. UHCL is a public, upper-division university with a predominately commuter, non-traditional student population serving approximately 7,000 juniors, seniors and master’s students from diverse backgrounds. The Coordinator develops programs, advises students, and consults with faculty, staff, and the community on multicultural and international student issues and awareness. Minimum requirements: Baccalaureate degree with a master’s in progress in student personnel, higher education administration, intercultural communication, or related field with experience working in a higher education setting with ethnically diverse and international students. Knowledge of student development; skills in developmental programming; understanding of multicultural and international student issues and cultures; excellent management and organizational skills; individual and group advocacy skills; excellent verbal and written communication skills, especially for those who are English as a second language. An Affirmative Action/Equal Opportunity Employer

Eastern Michigan University

DEPARTMENT HEAD, POLITICAL SCIENCE

Eastern Michigan University seeks applications and nominations for the position of Head of the Department of Political Science to begin on or about July 1, 2001. The Department’s 20 faculty offer undergraduate programs in Political Science, Public Law & Government, and Public Administration for some 250 majors; another 80 majors pursue a NASPAA accredited MPA program.

Qualifications: Earned Ph.D. in Political Science or equivalent; demonstrated instructional effectiveness and commitment to students; established record of scholarly publications and evidence of service to department, college, university and/or community; minimum of five years college/university teaching experience. Preferred candidate should be qualified for appointment at associate or full professor rank; consideration will be given to previous administrative experience.

Eastern Michigan University is located in southeastern Michigan adjacent to Ann Arbor, offers excellent salary and benefits based on qualifications, and is an ICPSR member. For consideration, please send a letter of interest, detailed vita and a list of three references to the address listed below. Review of applications will begin immediately and continue until the position is filled. Direct any inquiries to (734) 487-3113.

Chair, Department Head Search Committee
Position APAA 0001
202 Bowen
Eastern Michigan University
Ypsilanti, MI 48197

EMU is an affirmative action/equal opportunity employer and encourages women and members of minority groups to consider this opportunity and to identify themselves when applying if they wish.
UNIVERSITY OF CINCINNATI
ASSOCIATE PROVOST AND DIRECTOR
OF THE DIVISION OF PROFESSIONAL PRACTICE
(20UC6102) The Associate Provost and Director of the Division of Professional Practice provides leadership and management of the institution's cooperative education, which is recognized both nationally and internationally as a best practice model. The position carries with it direct participation in University-wide academic and administrative planning and governance and reports to the chief academic officer for baccalaureate and graduate education.

The successful candidate would most likely be a professional in the field of Higher Education, Cooperative Education, or related fields; or would have had significant experience with industry. Demonstration of excellent communication skills and the ability to interact effectively with students, faculty, administrators, corporate partners, and a variety of other publics involved in the activities of the Division; a track record that reflects steady growth in professional responsibilities and accomplishments; and an understanding of budgets and institutional planning are key factors in the selection process.

The University of Cincinnati is a Carnegie Doctoral/Research University-Extensive and is one of the two comprehensive state universities in Ohio. The Division of Professional Practice offers learning opportunities to more than 3000 students in 36 disciplines. The division has one of the largest cooperative education programs in a public higher education institution in the country. It is a centralized unit responsible for cooperative education programs in five colleges within the university. It is a selected unit responsible for cooperative education programs in five colleges within the university. The curriculum is one of 10 in the country that is accredited by the Accreditation Council for Cooperative Education. The division's 15 co-op tenure track faculty regularly receive distinguished honors and its alumni have achieved notable successes in their professions.

The selected individual will be required to have a master's degree or equivalent. The ideal candidate will have a doctorate.

Applications and/or nominations will be reviewed beginning April 9, 2001, and will continue until the position is filled. Applications must include a letter of interest that addresses the position responsibilities and (noting control #), curriculum vitae and three references (to be contacted later with permission of candidate).

Send applications and nominations to: Jeanette Taylor, Chair, Professional Practice Search Committee, University of Cincinnati, PO Box 210039, Cincinnati OH 45221-0019.

The University of Cincinnati is an affirmative action/equal opportunity employer. Women, minorities, disabled persons, Vietnam-era and disabled veterans are encouraged to apply. UC is a smoke-free environment.

UNIVERSITY OF SAN DIEGO
Employment Opportunities
VICE PRESIDENT FOR STUDENT AFFAIRS/DEAN OF STUDENTS
The University of San Diego, a Roman Catholic and Carnegie Intensive Institution, was chartered in 1949 and currently offers academic degrees in the arts and sciences, business administration, education, nursing, and law. The University has approximately 7500 students, 600 faculty, 1000 administrative and staff employees and more than 36,000 alumni. The University's operating budget is approximately $100 million and the endowment is currently valued at over $100 million.

San Diego, the nation's seventh largest city, is noted for its beauty, mild climate and quality of life. The University's 180-acre campus is centrally located on a mesa overlooking Mission Bay and the Pacific Ocean, and offers access to cultural, business, residential and recreational areas across southern California.

The Position: The Vice President for Student Affairs/Dean of Students is responsible for providing leadership and direction in the development, implementation, and direction of programs and services to support the educational and personal growth of students within the context of the Catholic Mission and values of the University. The candidate must be a committed Roman Catholic.

The Vice President of Student Affairs reports to the President and is responsible for athletics and intramurals, health services, housing and residence life, dining services, student resource center, public safety, discipline, international resources, community service, special events, summer conferences, multicultural programs, and student activities and organizations.

Qualifications: Candidates should have a minimum of ten years of significant, increasingly responsible administrative experience and a comprehensive vision of student affairs. Preference will be given to candidates with university experience serving in a like capacity. The successful candidate will have knowledge, understanding, experience and competence in the following areas: leadership, legal issues in student affairs, development of students, commitment to diversity, strategies for short- and long-range planning, budget administration, communication skills, and crisis management. An earned doctorate is preferred.

Application and Nomination Procedure: Interested persons should request an Application Packet for this position from the Director, Human Resources noted below. The Packet contains Information Designed to assist Individuals to return a complete candidate portfolio. The position is available July 1, 2001. The Search Committee will begin reviewing completed applications beginning April 2, 2001. The position will remain open until filled. Nominations, requests, and questions should be directed to:

Thomas Barnett, J.D.; Acting Director, Human Resources; University of San Diego; 5998 Alcala Park; San Diego, CA 92110-2492
619.260.4994. Ext. 6650; Barnettt@uscd.edu

BRYN MAWR COLLEGE
Associate/Assistant Director of Admissions
For Multicultural Recruitment

Bryn Mawr College is accepting applications and nominations for the position of Associate/Assistant Director of Admissions for Multicultural Recruitment. We seek a dynamic, admissions professional to lead our multicultural recruitment effort. If you are an individual committed to the philosophy of a rigorous liberal arts education, and challenged by the opportunity to be part of the team responsible for the enrollment of an academically talented and diverse student body, Bryn Mawr will provide you with an environment conducive to professional growth.

Responsibilities include planning, coordinating and implementing on and off campus programs designed to recruit students of color; planning and participating in recruitment travel; interviewing prospective students; evaluating applications, analyzing and maintaining recruiting records and writing summary reports.

A bachelor’s degree, excellent communication skills, the ability to speak before large groups, and a willingness to travel extensively required. Enthusiasm in working with college bound students, strong sense of teamwork and a valid driver’s license also necessary.

We offer an excellent benefits package. Level and salary will be commensurate with experience. Please send cover letter, resume, and list of three references to: Human Resources, Bryn Mawr College, 101 N. Merlion Ave., Bryn Mawr, PA 19010-2899. EOE/MI. The review of materials will begin immediately and continue until the position is filled.

WILLIAM PATTERSON UNIVERSITY

William Patterson University is a comprehensive public institution of higher learning, committed to promoting student success, academic excellence, and community outreach with opportunities for lifelong learning. Members of the faculty are highly distinguished and diverse teachers and scholars, many of whom are recipients of prestigious awards and grants from the Fulbright Council (24 scholars), the Guggenheim Foundation, the National Endowment for the Humanities, the National Institutes of Health, the National Science Foundation and the American Philosophical Society. In featuring nationally renowned academic programs, the University maintains a low student/faculty ratio (12:1) and small class size (21) for its 30 undergraduate and 18 graduate degree programs, supported by state-of-the-art information and communications technology. The University enrolls 30,000 students from across the country and from over 40 foreign nations. William Patterson University is situated in a beautiful suburban campus in Wayne, New Jersey, twenty miles west of New York City.

Area Coordinator
2 Positions

The Area Coordinator is a full-time, twelve-month, line-in-profession position in the Department of Residence Life. Based on a commitment to student development theory, the Area Coordinator supervises a staff of 3 Resident Directors, and 24/29 undergraduate Resident Assistants, along with at least 1 full-time secretary and student assistants, and administers the physical and personal aspects of a residence hall housing approximately 825-1100 students. The Area Coordinator serves on various student life committees, acts as appeals hearing officer, and coordinates a comprehensive educational programming effort in his/hers hall area.

Bachelor’s degree and two (2) years experience in residence hall administration above the undergraduate level required. Master’s degree in Student Personnel Counseling or related area and three (3) years in residence hall administration preferred.

The successful candidate should possess supervisory skills; knowledge of facilities management; experience as a hearing officer; strong interpersonal, organizational and oral/written communication skills.

Starting Salary is $31,284. The position offers a comprehensive benefits package including tuition waiver for dependent children after one year of full-time employment.

Please forward letter of application, resume, and list of three references to: Kathleen P. Hallissey, Assistant Director, Department of Residence Life, Drawer HO, William Patterson University, 300 Pompton Road, Wayne, NJ 07470. The review of applications will begin immediately upon receipt and continue until the position is filled. Additional information about the University can be found at http://www.upnj.edu. William Patterson University is an Equal Opportunity Institution Committed to Diversity.

Office of the Dean
203 Berkey Hall
Michigan State University, East Lansing, MI, 48824-1111

The anticipated starting date for the new Director of JSRI is August 16, 2001. The review of applications will begin March 1, 2001, but applications received after that target date will be considered until the position is filled.

MSU is an Affirmative Action/Equal Opportunity Institution. Handicapped have the right to request and receive reasonable accommodation.
EQUITY and DIVERSITY OFFICER

The University of Scranton is inviting applications for the position of Equity and Diversity Officer.

Reporting to the President, the Equity and Diversity Officer is responsible for the coordination, communication, and monitoring of an effective diversity program to support the University's commitment to social justice and multiculturalism for students and employees. Additional responsibilities include: advocating for social justice; dealing with issues of gender, diversity, disability, sexual orientation, and HIV; coordinating training related to compliance, sensitivity, and acceptance of differences; coordinating student and employee requests for accommodations for learning and physical disabilities; monitoring and enforcing University policies related to diversity and equal opportunity; and ensuring the University's compliance with various federal, state, and local regulations.

Qualifications for the position include deep familiarity with and commitment to Catholic and Jesuit ideals and traditions, an advanced degree in a relevant field, and five or more years of professional experience with equity, diversity, and affirmative action programs, preferably within institutions of higher education. Also, the successful candidate will have in-depth knowledge of government regulations as they relate to the EEO/AA requirements, sound presentation skills, and the ability to work collaboratively with all employees and students.

The University of Scranton is a broadly regional institution of 4,800 undergraduate and graduate students located in northeastern Pennsylvania near the Pocono Mountains. Recognized nationally for the quality of its education, Scranton is one of 28 Jesuit colleges and universities in the United States. It is committed to providing liberal arts education and strong professional and pre-professional programs in the context of Ignatian educational principles, especially the care and development of the whole person.

The University of Scranton is proud of its mission of liberal arts education in the Catholic and Jesuit tradition and spirit. The successful candidate is expected to make her/his contributions to this mission.

The Equity and Diversity Officer is a twelve-month position available 1 August 2001. Review of candidates begins on 14 May 2001 and continues until the position is filled. Interested candidates should submit a cover letter, resume and the names, addresses, and phone numbers of three references to:

Employment Manager
Human Resources
The University of Scranton
Scranton, Pa 18510

The University of Scranton is an AA/EOE Employer/Educator and welcomes application information from minorities and women.

SUMMER 2001

 CENTER FOR INTERNATIONAL STUDIES

 MADRID - SPAIN

 Scholarship Program for Teachers, Counselors & School Administrators

Three or six weeks of intensive Spanish language study from July 5 to July 26, 2001, or July 5 to August 16, 2001, at the Center for International Studies in Madrid, Spain.

Includes: round trip airfare, instruction, three meals a day and room accommodations at Colegio Mayor Santa Maria de Europa of Universidad Complutense of Madrid. From: $1,999.

For information, Write or Fax your request to:

Center for International Studies
42-32 De Bruin Drive
P.O. Box 451
Fair Lawn, NJ 07410-0451

Tel.: (201) 845-9744
FAX: (201) 368-0433
Applications and nominations are invited for the position of Dean of the Henry Samueli School of Engineering and Applied Science, effective Fall 2001. The dean has responsibility for the academic and administrative operation of the school, which has 152 faculty positions, 2,760 undergraduate students and 1,080 graduate students. The school houses six departments—Chemical Engineering, Civil & Environmental Engineering, Computer Science, Electrical Engineering, Materials Science & Engineering and Mechanical & Aerospace Engineering—as well as responsibility for one interdepartmental graduate degree program in Biomedical Engineering.

As a vital professional school located in the industrial center of Southern California, the School of Engineering will grow substantially in both students and faculty over the next decade. Growth will include the construction of a new research building and strong partnership in the recently funded California NanoSystems Institute.

Acting under authority delegated by the Chancellor, the Dean participates in campus-wide planning and is responsible for supervision of the School's budget, allocation of resources, review of faculty development and administration of academic and research programs, and direction of the School's professional and industrial relations. Candidates should have academic qualifications appropriate to the rank of full professor. Salary will be commensurate with background and experience.

For additional information, please go to: http://www.apo.ucla.edu/apoweb/SEASdean/

To be ensured of full consideration, nominations and applications should be sent by May 1, 2001 to:

SEAS Dean Search Committee
ca/o Rene Dennis
Office of the Chancellor
University of California
3109 Murphy Hall
Los Angeles, CA 90095-1407

Please view the Position Description as well.

UCLA is an equal opportunity employer.

UNIVERSITY OF WEST FLORIDA

ASSISTANT VICE PRESIDENT FOR ADMINISTRATIVE AFFAIRS

The University of West Florida, one of the ten state universities in Florida, is located in Pensacola, Florida, and enrolls over 8,200 students at its Pensacola and Ft. Walton Beach campuses. This position is located on the Pensacola campus of approximately 1,600 acres that has been designed as a nature preserve. Over 1,000 students live on campus with another 2,000 living nearby. The University seeks a qualified individual to serve as Assistant Vice President for Administrative Affairs.

Responsibilities: The position reports to the Vice President for Administrative Affairs, and is responsible for providing leadership and fiscal oversight of activities related to the University's auxiliary entities, with special emphasis on budget planning and control of auxiliary resources.

Qualifications: Minimum qualifications are a master's degree in an appropriate area and six years of appropriate experience; or a bachelor's degree in an appropriate area and eight years of appropriate experience. MBA is preferred. Additional consideration will be given to candidates with experience in food services and vending operations, bookstore operations, parking services, and management of a university student center.

Salary Range: $70,000-$85,000

Application: UWF is an equal opportunity employer. Women and minorities are especially encouraged to apply. To ensure full consideration, candidates are asked to submit the following:

- cover letter summarizing qualifications
- detailed resume; and
- name, mailing address, e-mail address, and telephone number for 3-5 professional references.

Deadline is April 27, 2001. Desired starting date is June 1, 2001.

Send application to:

Dr. Cornelius Wooten, Vice President Administrative Affairs
The University of West Florida
11000 University Parkway, Building 10
Pensacola, Florida 32514

An Equal Opportunity/Access/Affirmative Action Employer

University of Colorado
Vice President for Academic Affairs and Research

The President of the University of Colorado is seeking a dynamic and visionary leader for the position of Vice President for Academic Affairs and Research. The University of Colorado is a four-campus system with 46,000 plus students, a $450 million annual grants and contracts operation, and a $1.3 billion annual budget.

The Vice President for Academic Affairs and Research reports directly to the President and works with the four Chancellors and other campus officials to coordinate the development and review of undergraduate academic programs and graduate/professional programs. In addition, the Vice President will be expected to provide leadership in the University’s efforts to promote teaching, research, creative work, technology transfer and public service within the four-campus System and to champion ethnic and cultural diversity in the System. The Vice President is also responsible for providing leadership in the University’s planning for and use of technology to enhance learning, research, creative work, service, and administrative support.

In addition to these responsibilities, the Vice President will also be expected to take the leadership role in developing the Colorado Tobacco Institute, a research and education program; the University’s technology transfer activities; the CU Coleman Institute for Cognitive Disabilities; and any other additional system-wide academic initiatives and programs or institutes that may arise.

Required Qualifications: The candidate must have demonstrated significant academic leadership, possess awareness of multicultural university systems and provide evidence of successful (a) promoting undergraduate and graduate programs, (b) providing leadership in the planning for and implementation of academic policy and program initiatives, (c) understanding and developing approaches for the most effective use of technology in higher education, (d) working with technology transfer operations, (e) supporting effective methods to enhance diversity in the university community, and (f) working effectively with internal and external constituencies. Earned terminal degree required, and credentials commensurate for the rank of full professor in the applicant’s department.

Salary: Competitive and commensurate with experience.

To Apply: Nominations should include the individual's current occupation and address and any additional information deemed pertinent. Nominations may be faxed to (303) 492-6772. Applicants should be accompanied by a curriculum vitae. Review of applications will begin immediately and continue until finalists are selected.

Please submit nominations and applications to:

Philip F. DiStefano, Chair Search Committee
Vice President for Academic Affairs and Research
University of Colorado
Campus Box 935
914 Broadway
Boulder, CO 80309-0035

Colorado Revised Statues (C.R.S. 24-71-204) require that applicants "make a written request that records be kept confidential at the time of submission of the records." Records of applicants who do not make a written request for confidentiality must be disclosed upon request.

Questions regarding this position may be addressed to:

Philip DiStefano
Phone: 303-492-5537
Fax: 303-492-8861
Email: phil.distefano@colorado.edu

The University of Colorado is committed to diversity and equality in education and employment.

04/09/2001  O HISPANIC OUTLOOK  33
CULTURAL EXCHANGES VITAL TO FUTURE U.S./CUBA RELATIONS

We need to reacquaint ourselves with our neighbor to the south. Cuba is almost an unknown country to us now. Its political and social path over the past forty-two years, so different from ours, is a painful and baffling mystery. Many hope and believe the U.S. embargo will end soon and that our relations will normalize. I do too, and I like to think that in the good new days, we'll be neighbors who respect and approach one another constructively. How can we accomplish this?

I believe a way to begin is through cultural exchanges. Our governments must believe so too, from the number and scope of activities being allowed. Thousands of Americans were in Havana for the seventh Bienal de la Habana, the great international visual art event put on by the Cuban government in November and December. Literary conferences, film festivals, jazz festivals, architectural tours—the events that draw professionals, students, and culture mavens to Cuba—multiply yearly.

Maybe my own personal experiences aren't earthshaking. But the advantages of interpersonal contact, of learning about the other's history and values, grow exponentially with the number of persons who experience it. I am one, but I am one of many.

From my time spent in Cuba in art and literary exchanges, I have learned much from the Cubans' inventiveness in creating marvels of art and culture in narrow circumstances and by their sense of community and individual responsibility to society.

I was born—and still live—in Tampa, the city where both José María and Fidel Castro raised funds for their revolutionary activities within the Cuban cigar worker community of Ybor City. Author José Yglesias called it "a radical union town." Fed on arroz con pollo, fríoles, and flan, I rode my bike down South Tampa streets called Obispo, Obraa, Ybor, and Empeñado, never knowing they were named after streets in Old Havana. Cuba was a constant presence, even though, after the Revolution, our neighbor suddenly became remote, unknown, scary, like the house on the hill.

Two years ago, I first traveled to Cuba as part of my work at the University of South Florida in Tampa, and I was amazed to feel so at home. At USF's Graphicstudio, an art research and art-making workshop, we have collaborated with Cuban artists. After we invited a printer and a photographer to come to Tampa to work in our studios, we were invited to Havana to participate in the seventh Bienal, where we put on an exhibition and gave faculty talks.

Planning for future technical workshops we hope to offer to Cuban artists, we toured the Instituto Superior de Arte, the country's premier art school. The beautiful '60s modernist architecture is crumbling; the studio facilities are cramped and underdeveloped. Materials like paper, drawing pencils, and chemicals for photography are in very short supply.

But even under these conditions, the institute educates some of the finest artists in the world. The technically refined, aesthetically lush, and politically savvy art of Cuba is about the hottest item going, to judge by the overwhelming presence of Americans in Havana for the Bienal. The artists develop superior skills in 12 years of schooling. Moreover, their art has little of the self-referential and self-involved quality so present in the art of the United States, but rather it is subtly yet emphatically political, despite censorship—or maybe because of it. Cuban artists seem to be more concerned about society than about individuals. I find this attitude refreshing and revitalizing.

And now I write these lines from Cuba, where I am participating in the Second Annual U.S.-Cuba Writers Conference. We are fifty-old fiction writers, playwrights, performance artists, memoirists, poets, and translators. We attend workshops and daily forums on Cuban literature presented by noted authors. The Cubans are very fond of reading and writing crime fiction, and they particularly admire our American works. However, in the seminar dedicated to this genre, they were careful to distinguish between theirs and ours. A Sam Spade or a Kinsey Millhone could not exist in Cuba, because there are no private eyes. The investigation and punishment of crime is a function of the state, in the person of the police. Crime fiction in Cuba answers to the Revolution and the individual's responsibility to it. Our American obsession is with the lone hero and his idea of individual justice. This fundamental difference is illuminated by literature and is one I would not understand if not for the cultural exchange.

It's no mystery—for me and for thousands of Americans and Cubans—cultural exchanges offer unusually revealing opportunities for reacquainting ourselves. They are vital to a future of respect and mutually constructive relations between our countries.

If interested in submitting a ¡Punto Final! "think piece," please e-mail us at sloutlook@aol.com for guidelines.
The Grades Are In
Pitzer College seeks as its fifth president, a person of exceptional energy and passion. This leader will look forward to challenges and be adept at identifying invigorating, exciting, attainable opportunities for our young, but now mature, college. We envision a leader who, by the demonstrated example of past experience, can:

- Promote a commitment to learning and to the liberal arts, and to the engagement of that learning in responsible action.
- Embrace, reinvigorate, and gain recognition for the distinctive aspects of Pitzer’s curriculum, pedagogy, and research goals.
- Represent and support Pitzer’s commitment to the importance of empowering student academic autonomy in the context of a residential community.
- Support faculty scholarship and creative work.
- Foster openness and participatory governance that includes faculty, students and staff of the college.
- Build ties between the Board of Trustees, the emerging alumni and the entire campus community and continue to build a strong Student/Alumni/Board base for the college.
- Demonstrate interest and commitment to student life issues and be a presence on campus.
- Develop and lead an effective, talented, and committed staff.
- Continue, advocate and strengthen the college’s commitment to diversity.
- Manage conflict creatively and successfully.
- Advance the common goals of Claremont Colleges Consortium and represent Pitzer’s perspective in the Council of Presidents.
- Build endowment actively by the successful completion of the current comprehensive campaign, the overseeing the master-planning process, and the immediate launching of a program for capital campaign development and building renovations.
- Articulate the intellectual mission of the college before different audiences in a wide variety of forums.
- Seek opportunities to invigorate the intellectual lives of students, faculty and staff.
- Represent the college as an exemplar of its mission and values.

College Profile
Founded in 1963, Pitzer College emphasizes close faculty/student relationships and a strong democratic ethos. With about 850 students, Pitzer College is one of five undergraduate colleges and two graduate institutions that comprise the Claremont Colleges Consortium. The campuses are physically contiguous and share a central library, bookstore, medical center and other facilities. Joint programs are available in the sciences, music, theatre and interdisciplinary studies.

Pitzer’s educational philosophy emphasizes the development of students’ autonomy within the context of a residential community. Students create academic programs in close collaboration with their academic advisors. Those programs pursue Educational Objectives that focus on interdisciplinary perspectives, intercultural understanding, and social responsibility. The Educational Objectives also include the acquisition of a broad knowledge in the arts, humanities, social and natural sciences combined with in-depth knowledge in a particular field of study. Throughout the curriculum, Pitzer College integrates the development of critical thinking, formal analysis, and effective oral and written expression.

Pitzer’s commitment to democratic participation is seen in the inclusion of student representatives on all of the College’s standing committees. Students, staff and faculty participate in College Council, Pitzer’s decision-making body. Pitzer’s alumni and vescues are actively engaged in supporting the vision, goals and objectives of the College.

Pitzer celebrates cultural diversity and intercultural understanding. Ethnically diverse students come from throughout the United States and nearly 20 other countries. Students are encouraged to participate in one of Pitzer’s many language and cultural immersion programs. These choices include Botswana, China, Costa Rica, Ecuador, Italy, Japan, Nepal, Ontario (California), Turkey, Venezuela and Wales, as well as other locations.

Pitzer fosters interdisciplinary perspectives in individual courses and in many of its programs. Students may concentrate in a current array of 19 explicitly interdisciplinary programs.

Pitzer develops personal and social responsibility by emphasizing a concern for the social consequences and ethical implications of knowledge and action. Pitzer students can take courses that embrace this objective and can participate in numerous community-based and off-campus projects here and abroad.

The College is currently engaged in several endeavors to advance its educational mission. It is building an endowment fund to increase student and faculty diversity through scholarships and professorships. Pitzer is engaged in a Master Planning process to reinvent the residential living and learning environments. It is exploring ways to further invigorate intellectual life at the College through, among other things, enhanced support for faculty scholarship and creative work, curricular development, and campus-community partnerships in learning.

Application/Nomination Information
Applications and nominations should be directed to:

John N. Tierny, Chair
Presidential Search Committee - Pitzer College
1140 North La Brea Avenue
Los Angeles, CA 90038

Applications should include a letter of interest, detailed vita, and the names, addresses, and phone numbers of at least five references. Applications and nominations will be accepted until the position is filled.

Who's not on line?

Why not?

By Gustavo A. Mellander

With so many glowing reports that more and more Americans are online every day and that the growth of the Internet is bound to grow exponentially, it is interesting to read a sliver that represents another viewpoint. The Pew Internet and American Life Project released such a report in Washington. It has a title that never ends: "Who's not online: 57 percent of those without Internet access say they do not plan to log on." Nonetheless, it is an interesting report.

Gray Gap

The report, based on phone surveys, is both comforting and surprising. Among its major findings is that Internet access or non-access is often a function of age. Those who are young tend to be online or eager to go online; those who are older tend not to be online and tend not to be interested in going online. They dub the phenomenon the "gray gap."

The "gray gap" arises in that aging Baby Boomers and senior citizens are the most resistant to the Internet: 87 percent of those 65 and over do not have Internet access, and 59 percent of those between the ages of 50 and 64 do not go online.

The strongest Internet holdouts, older Americans, are fretful about the online world and don't believe it can bring them any benefits. In contrast, a substantial majority of those under 30 who are not currently online say they plan to get access, though the expense of going online still looms as a major issue to them. This suggests that over an extended period of time, perhaps in a generation, Internet penetration will reach the levels enjoyed by the telephone, which is used by 94 percent of Americans, and by television, which is used by 98 percent of Americans.

Comparisons

Of those under age 30, 65 percent have Internet access. Seventy-four percent of those over 50 who are not online say they don't plan to get Internet access, while 65 percent of those under 50 say they plan to get Internet access. Forty-five percent of those under 30 believe they are missing out by not being online. Just 26 percent of those over 64 believe that. Forty-seven percent of those under 30 believe the Internet is too expensive, and just 29 percent of those over 64.

Sixty-three percent of parents with children under 18 who don't now have Internet access say they will probably or definitely go online.

Internet Naysayers

Half the adults in America do not have Internet access, and 57 percent of those non-users are not interested in getting online. This suggests that the booming growth of the American Internet population in the past few years will slow. Thirty-two percent of those without Internet access now say they definitely will not get Internet access. That comes to about 31 million Americans.

Another 25 percent of non-Internet users say they probably will not venture online. Twelve percent of those without Internet access say that they definitely will go online. Twenty-nine percent of non-Internet users say they probably will get Internet access.

Concerns of the Digital Have-nots

This generational story is often overlooked in discussions of the digital divide. Significant numbers of non-users cite issues besides the cost of computers and Internet access as problems when they think about the online world.

• 54 percent of those not online believe the Internet is a dangerous thing.
• 51 percent of those not online say they do not think they are missing anything by staying away from the Internet.
• 39 percent of those not online say the Internet is too expensive.
• 36 percent of those not online express concern that the online world is a confusing and difficult place to negotiate.

Gender, Race, and Ethnicity of Those Offline

There is gender parity in the Internet population—50 percent of those online are women, and 50 percent are men. However, women still lag behind men in their relative participation in the online world.

When it comes to race and ethnicity, Whites are notably more likely to have Internet access than are Blacks or Hispanics. Still, there are striking similarities in the online and offline population once the economic situation of various groups is taken into account.

Fifty-four percent of women do not have Internet access; 49 percent of men do not. Fifty percent of Whites have access, as do 36 percent of Blacks and 44 percent of Hispanics. Seventy-eight percent of Whites, 79 percent of Hispanics, and 69 percent of Blacks in households earning more than $75,000 are online. Sixty-eight percent of Whites, 75 percent of Blacks, and 74 percent of Hispanics in households earning less than $30,000 are not online.

Internet Dropouts

More than a tenth of those without Internet access once were online. Younger Americans are the most likely to have dropped or lost access. Thirteen percent of those who are not online, or about 12 million Americans, have used the Internet sometime in the past and have since dropped out. Of those who dropped out, 21 percent say they no longer have a computer, 14 percent say they changed jobs, 11 percent say paying for Internet access was too expensive, nine percent say they didn't find the Internet very interesting or useful, and eight percent say they were worried about their privacy.

The report has more figures and data than most of us want or need, but it is a lodestone nonetheless. For the full report, see http://www.pewinternet.org/reports/toc.asp?Report=21.

Dr. Mellander is a professor at George Mason University.

HISPNIC OUTLOOK
¡Hola!

Recently, I had the pleasure of meeting 12 young master’s and doctoral students at the American Association for Higher Education (AAHE) conference in Washington, D.C. Each one had a story to tell about the road traveled toward educational attainment. Many of these students strived against odds such as time and cultural restrictions, financial issues, academic impatience and uncertainties, to name a few. What impressed me was their unequivocal stamina, long-term thinking, vision, and confidence that they each were enrolled in the “right” institution, and that upon graduation they’d find a place to lay roots and begin to make personal and professional contributions as future faculty and academic leaders. Despite the obstacles (glass ceilings, blatant and quiet racism that some of them have encountered) that would have diminished opportunity for these students, it was wonderful to see how they’ve overcome. (A profile on this student group will be forthcoming this summer.)

With the support and guidance of AAHE’s cadre of seasoned and distinguished professors, and their belief in a free flow of information exchanges, these future faculty can be assured success, as they have found a place and educators who’ve “made it” willing to listen to their questions and concerns and to offer answers. Providing a guiding light for students at all academic levels is mutually beneficial. It does more than assist students along their education journey. If I may borrow the phrase coined by Jaime Chabin, Ph.D., associate professor, dean of the College of Applied Arts at Southwest Texas State University, and recipient of the AAHE’s The Outstanding Latino/a in Higher Education Creativity and Publications Award, in his acceptance speech, “it’s about relationships.”

Once a rapport is established between students and their respective universities and organizations, an anchor is set and a student’s commitment to education and serving education is affirmed. And the very institutions that nurtured them can count on alumni’s support when the time comes because “it’s about relationships.”

Our next issue will feature the Top 100 schools for Hispanics based on recent data from the Department of Education, stories on the prestigious Rhodes Scholar program, diversity at Rutgers University, Florida International University’s new Carnegie distinction, and more.

Hasta la próxima.

M. Lassere

Grading the States:
A Report Card on Higher Education

BY MARILYN GILROY

THE STATE-BY-STATE REPORT CARD
FOR HIGHER EDUCATION
Despite the accomplishments of American higher education, its benefits are unevenly and often unfairly distributed and do not reflect the distribution of talent in American society. Geography, wealth, income, and ethnicity still play far too great a role in determining the educational opportunities and life chances of Americans.

These wide disparities in higher education across the nation are part of the findings of a comprehensive report entitled Measuring Up 2000, compiled by the National Center for Public Policy and Higher Education. The Center has issued grades from A through F to all 50 states in assessing how well they deliver college education to their residents. It is said to be the first-ever attempt to grade the states on their performance in higher education.

The report card is a product of two and a half years of planning, research, and data analysis by the National Center, an independent, nonprofit, nonpartisan organization with offices in San Jose, Calif., and Washington, D.C. The Center was established in 1998 through a grant from the Pew Charitable Trusts, but several other organizations, including the Ford Foundation, contributed funding to support the publication and dissemination of Measuring Up 2000. The report's purpose is to stimulate public policies that will improve the effectiveness and accessibility of higher education, and it went to those officially responsible for same—governors, legislators, and other state officials.

“Our hope is that Measuring Up 2000 will be an impetus for state leaders to address some of the higher education policy challenges they face,” said Patrick Callan, president of the National Center. “Certainly there is no single blueprint that can ensure that a state will excel in higher education.”

Measuring Up 2000 is different from publications that offer rankings and ratings of individual institutions. This survey targets each state as a whole and identifies its strengths and weaknesses in six categories related to how it prepares students for college, helps them afford tuition, and ensures that they graduate.

The Center graded six areas, which represent aspects of education over which states exercise substantial policy influence. They are:

- PREPARATION: How well are students prepared to take advantage of college? This category measured high school completion rates and examined students' proficiency levels in math, reading, and writing.
- PARTICIPATION: Do state residents enroll in

“We have had overwhelming media reaction and positive and constructive reactions from the states.”

JONI FINNEY, VICE PRESIDENT OF THE NATIONAL CENTER FOR PUBLIC POLICY AND HIGHER EDUCATION

“We wanted a report that was based on data, not just people's opinions.”

PATRICK CALLAN, PRESIDENT OF THE NATIONAL CENTER FOR PUBLIC POLICY AND HIGHER EDUCATION
college-level programs? Does the state provide enough spaces and types of educational programs for its residents? High school-to-college rates are included as well as working-age adult enrollment.

- **AFFORDABILITY:** Can students and families afford to pay for higher education offered in the state? Percentage of family income needed plus financial aid availability and student borrowing are included.

- **COMPLETION:** Do those who enroll complete their degrees or certificates in a timely manner? The rate at which students returned for their sophomore year is examined and the percentage of full-time first-time students who earn a bachelor's degree in five years.

- **BENEFITS:** What economic and civic benefits does each state receive from the education of its residents? The relationship between higher education rates and the state's economy was examined. The report card also correlated voting percentages and charitable giving patterns to educational achievement.

- **LEARNING:** All states were awarded the grade of "I" for incomplete. Although many conduct assessment activities, there are no common benchmarks for student learning that would allow meaningful state-to-state comparisons; thus, no competitive grade could be assigned.

And yet, as the report states, "how much and what students learn is perhaps the most important criterion for measuring success in higher education."

This lack of a national assessment system for the postsecondary sector is an issue that has been raised for the last 10 years by the U.S. Department of Education, but none of its proposals has been funded. One of the National Center's board members said, "We know nothing about essential outcomes of all this. We cannot answer the most basic question—is anybody learning anything?"

Furthermore, the report points out, "states employ very different methods when they assess college students, if they do so at all. And states can mandate testing only in the public colleges and universities—they have no authority to assess students enrolled at private institutions."

To close this information gap, the Center recommends that college-level academic achievement be measured at two stages: when students make the transition from lower division to upper division and again when they receive their baccalaureate degrees.

Despite a lack of clarity in the learning category, there was a significant amount of data and stati-
PARTICIPATION

In this category, we look at whether state residents have sufficient opportunities to enroll in higher education beyond high school.

The complete report card, which is 188 pages, gives state profiles, state comparisons, and a national picture of each performance category.

States such as New Jersey and Illinois send a high percentage of their students on to college (54 percent and 49 percent respectively) while others, such as North Carolina, enroll only 34 percent. James Hunt, a former governor of North Carolina, attributed the low numbers to the state's prior history of having a lackluster economy and to the fact that a high number of its minority citizens have not been given good opportunities.

But other states are also lagging in providing the preparation needed for college. In some cases, students do not have the chance to take challenging high school courses. In Massachusetts, 59 percent of high school students take upper-level math, but in Alabama, less than one-third do. Very few states can even provide data on the numbers and types of upper-level courses that students take in the humanities and social sciences, information that is equally important to examining the picture of how well students are prepared for college.

The category of affordability was graded primarily on tuition levels and available financial aid subsidies. The report indicates that while 78 percent of American college students are enrolled in state colleges and universities, states...
differ greatly in how much they help their residents pay for education. States such as California, Minnesota, and North Carolina performed very well in the affordability category because they have kept tuition low or have offered substantial financial aid opportunities, especially for low-income families. Other states, among them New Hampshire and South Dakota, do very little to help low-income families and students attend college.

The complete report card, which is 188 pages, gives state profiles, state comparisons, and a national picture of each performance category. Measuring Up 2000 is the largest project undertaken by the Center since its founding. Prior to publication of the report, officials such as Barry Munitz, former chancellor of the California State University System and current president of the J. Paul Getty Trust, publicly suggested that the Center must prove something significant in order to justify its existence and maintain funding.

The staff at the Center think that they have hit their mark and that the report is producing the kind of results that they had hoped for. “We have had overwhelming media reaction and positive and constructive reactions from the states,” said Joni Finney, vice president of the Center.

“We sent the report to legislators, especially those on education and appropriations committees, and governors, who have found the information to be quite useful.”

Finney cited specific ways in which the various states had responded to the report card. In Missouri, Governor Bob Holt said the report was very helpful and, consequently, his state is focusing its efforts on improving its participation grade of C by examining how to get more people into college.

Maryland addressed its grade of D in affordability by holding a joint meeting of the state’s appropriations and higher education committees.

South Dakota, which has neither need-based nor merit-based college aid, is currently examining its policy.

In some cases, staff from the National Center have gone out to meet with state officials about the grades.

“In Florida, we met with the governor’s task force that is dealing with reorganization of high-

er education in that state,” said Finney. “We have also been in contact with officials in Texas and Washington.”

“Our focus right now is to work with the states that have asked us to help them improve performance,” she said.

Some states, Kentucky, for example, are using the report as a template to look in depth at higher education and issue their own detailed report card. Others are using the information to decide where they would like to be in the year 2002.

report card, it has also developed some recommendations of its own. One suggestion deals with tracking students who migrate across state lines and who move from one college to another.

Other specific recommendations ask that the following information be collected for inclusion in future reports:

1. Calculate rates of college participation for recent high school graduates by income group. Rates exist for all students and for those of different racial groups; however, the Center believes that rates by family income group are essential information for policymaking in admissions and student aid.

2. Determine unmet financial need for eligible and qualified students. Examined at the national level, there are no state-level data available.

3. Measure degree-completion rates after six and 10 years. Existing data on baccalaureate degree completion within five years does not take into account many working-age adults who take longer than five years due to professional and family responsibilities.

4. Improve measures of civic engagement. The report card measured voting and philanthropic giving but was unable to get a picture of volunteerism and leadership by graduates as compared to nongraduates.

5. Include a category for “cost effectiveness”—a measurement of state spending related to specific public policy outcomes, thus allowing states to assess their comparative level of performance, given the available resources.

Like all report cards, Measuring Up 2000 ends by softening the blow of the less-than-stellar performance of many of the states.

The good news, says the report, is that many states are examining their higher education systems and trying to initiate reforms that will help them educate citizens to meet the demands of the new century.

"Geography, wealth, income, and ethnicity still play far too great a role in determining the educational opportunities and life chances of Americans."

Measuring Up 2000

“We are satisfied that we got attention focused on the issues of opportunity and achievement,” said Finney. “These discussions are necessary to building an agenda.”

The report acknowledges that some states have important initiatives in progress that could not be reflected in grades this time but could affect future scores. Kentucky has been especially aggressive in increasing higher education spending, which has doubled in the last four years, and is projected to be about 16 percent of that state’s total fund revenue by 2002. Georgia has awarded its own version of HOPE (Helping Outstanding Pupils Educationally) scholarships to 65,000 in an effort to reverse a “brain drain” and keep talented students in the state.

“We will be issuing report cards in the year 2002 and 2004 and issuing special reports in the off years that address progress,” said Finney.

While the National Center has encouraged discussion and action on issues raised by the
Not Counting Heads,
BUT Making Heads COUNT

"If we want to ensure organizations that their culture can make adjustments and change, and benchmark what they are doing right,

Samuel Betances is one of the most familiar names in the field of diversity and diversity training. He has appeared on The Phil Donahue Show, was a keynoter with Oprah Winfrey, and a guest expert on a Peter Jennings’ special on prejudice and children.

As one of the leading motivational speakers in America today, he is sought after by such Fortune 500 companies as AT&T, McDonald’s, Merrill Lynch, and Coca-Cola for his expertise in diversity training. He has covered all 50 states, as well as Japan, Europe, Latin America, the Caribbean, and the Pacific, with his message.

After more than 15 years of speaking to the issue of diversity and providing workshops across the country and globe, Betances will now be speaking in his hometown of Chicago as part of..."
Northeastern Illinois University’s new Workforce Diversity Institute, launched in October. As part of this center, which provides diversity training and awareness, Betances, along with his company, Soudre, Betances and Associates, will act as a senior consultant and is expected to draw in local companies and groups with his name.

“The Institute is unique in the sense that it recognizes the need to provide services to organizational leaders who are interested in learning how they must do things differently,” said Betances.

A part of Northeastern going back to the early ’70s, Betances was together with Betances to develop this idea and, over a two-year period, brought the project to fruition. With the financial and moral support of the legislature, policymakers, and top University administrators, the Institute opened its doors, with Duster as its director.

“This Institute stands apart because we recognize that in order for schools to work efficiently, and companies to work effectively, continuous changes in the workforce need to be understood,” said Duster.

The Institute comes at a time of a shrinking workforce and a large aging population, with more women and minorities entering the workforce and fewer White males, explained Betances.

Interviewed by the California Department of Education in 1992, he said, “We need to prepare for the 21st century, when 80 percent of the people entering the workforce will be made up of women, immigrants, and the groups we now label minority. It is estimated that by the year 2009, the typical high school graduating class will be only 20 percent White male. When we see diversity as a plus, we will challenge White males and not participate in bashing them. We need to thank White males for building the house of abundance. But we also need to tell them that what is done in the future must result from the collaborative efforts of all Americans.”

What the new Institute and Betances’ 15 years in the field will provide is course offerings, lectures, public forums, and distance-education programs so that businesses and organizations not typically able to afford such services can learn how to work more effectively in an increasingly diverse workforce. Not only will it help working with “difference” in a collaborative setting, but about how to best take advantage of this for a more productive global economy.

“One of the most important reasons why there has not been any openness to diversity is because a lot of organizations confuse diversity with equity, and they feel that diversity is nothing more than affirmative action with a smile on its face.” Diversity training is viewed with suspicion, he explained, as a kind of reverse discrimination, in which those in traditionally minority groups are a threat to the jobs of White men. It is seen as more of the same, as part of “coercive legal requirements that are legally driven that have nothing to do with the bottom line.” Said Betances, “As long as people in leadership see diversity as more of the same, they will continue to resist. Diversity is not about counting heads, which is what they fear. It is about making heads count.”

Betances blamed “White male bashing” as part of the problem as well. “Minority people, when we take on the task as diversity practitioners, participate in White male bashing. We give the impression that this is a women- and minority-driven initiative. And as a result, we provide fodder to the confusion, and in the end, we lose an opportunity to unleash the full potential of all the members of the workforce in achieving bottom-line goals,” he said.

“We make a strong, bold opening statement in our training that clearly says there is no room for White male bashing in diversity training. The end goal that we want to achieve is making and empowering productive, collaborative, and inclusive teams.”

While equity issues focus largely on obeying the law and implementing procedures based on legislation, the diversity training that Betances speaks to emphasizes being conscious of the changing workforce and the practical need for leaders to unleash the full potential of all of their employees.
Doing so has a positive effect on the bottom line of an organization and business, he says.

"We need to make coalitions of interest rather than coalitions of color," said Betances. "Diversity is not having differences in your organization, but having diversity represented at every level of the organization. When you do it that way, you don't see the differences just symbolically, but structurally. And people will take it for granted that, as Maya Angelou says in her poem, 'In minor ways we differ, in major we are the same.'"

Betances himself did not have an easy time of it. Born in New York's Harlem, he says he was abandoned by both parents, and then raised by relatives in Puerto Rico. He came back to New York City to attend high school but dropped out in 1956 at age 16.

With the support of someone who believed in him, however, and who demanded he rise to his full potential, he ultimately earned a master's and doctorate at Harvard University. He has learned firsthand what it means to unleash one's full potential, which allows people, regardless of race or gender, to be players in a society that will come to depend on their talent.

Issues of diversity were all too prevalent for Betances, as well as the rest of the nation, during the civil rights struggles of the '60s. He was a graduate student leader at Harvard back then, from 1968 to 1973. As a sociology professor at Northeastern for 23 years, until the mid-'90s, Betances also witnessed the challenges of diversity in the classroom. For him, that showed up in students of working-class backgrounds who couldn't compete with the middle-class students who were and are often blessed with nurturing in such areas as abstract thinking, theoretical ways of knowing, an expansive view, and a proficient vocabulary. Bridge programs were especially vital to help the less advantaged students obtain the needed support needed to be better prepared for college.

Later, as a diversity consultant, Betances worked with Denny's Restaurant, implementing diversity approaches in response to the class-action discrimination lawsuit lodged against them in the mid-'90s. Fortunately, with Betances' support, Denny's has since been named the No. 1 company for minorities and women by Fortune magazine.

It is not unusual for companies to seek Betances' assistance only after they have been threatened with lawsuits or when their bottom line is clearly at risk. Coca-Cola, Mitsubishi, and Texaco, all of which were battling sexual harassment issues, sought his guidance.

The concern for diversity is not confined to the U.S., he says. For example, the Germans and the English, despite having fought each other in past world wars, are now having to learn to work together to benefit the European economy. "They are discovering diversity isn't an American issue," said Betances.

To Betances, the academic set-

American. Its location is the world-class city of Chicago. And, according to Duster, its administration stands out in diversity as well. She quoted renowned Harvard Professor Cornel West, who tours extensively as a speaker on diversity, equity, and gender, has said he had "never seen such a diverse administration in all my travels."

"We stand apart," said Duster, "in the sense that we are a living laboratory."

The first steps of the Institute have been to produce workshops and lectures based on the immediate training needs of interested clients. But Duster foresees students, faculty, and the University as a whole benefiting from the center. One goal is for all administrators and managers to participate in training, and in the long run, all faculty and employees as well. Duster also envisions that in perhaps 10 years, the University library will participate in storing data and research authored by faculty on issues of diversity, gender, and the like. Students in multicultural classes and those preparing to teach might likely also benefit from the center, she said.

"We want to train trainers," said Betances. "If we want to ensure organizations that their culture can make adjustments and changes, and benchmark what they are doing right, our best hope is to be able to train diversity practitioners who can then become facilitators and workshop leaders."

While Betances brings his Hispanic roots to his work, he made it clear that "diversity impacts all of us."

"We need to make a real good effort at working with African Americans, White males, women's groups, Asians, Pacific Islanders, and Native Americans." The Institute, he said, is going to be a forum "that will continue to add value to every person of good will who wants to see our society prosperous and embracing of our diversity—making it work for our bottom line and mission."

Murrell Duster, dean of academic development at Northeastern
The University of Texas at Austin has created a program to aggressively recruit students, early in their college years, into teaching careers in math, science, and computers to help address the state's shortage of K-12 teachers in these areas of critical need.

"Texas is confronted with teaching shortages in the areas of math and science, yet statistics show the demand for teachers in these fields is forecast to increase by 22 percent over the next decade," said Dr. Mary Ann Rankin, dean of the College of Natural Sciences, which runs the program jointly with the College of Education and the Austin Independent School District.

"As a flagship institution, UT-Austin is well positioned to do something to remedy the crisis."

The program, called UTeach, nurtures the next generation of math, computer, and science teachers for Texas through a collaborative approach to secondary teacher preparation, which has shown promise in attracting new students. UTeach combines practical experience and scholarly investigation with early and ongoing fieldwork, which prepares the University students for the classroom.

"We wanted to induce students to pursue this path as a first career choice," said Rankin. "We wanted to create a program that would attract our strongest students and one that students themselves would view as highly prestigious and desirable. And, one that they could complete in four years with certification."

Immediately upon being accepted into the College of Natural
Sciences, beginning students are sent a letter asking them if they have ever considered teaching. If they choose to sign up for the UTeach program, the College will cover tuition for the first two one-hour classes of teaching.

"We recruit them actively," said Mary Long, coordinator of UTeach. "We send them a letter that basically says, 'Have you ever thought about teaching? Have we got a program for you?'" Like other states, Texas has been confronted with serious shortages of teachers in these fields as college students opt for careers in the higher-paying business and high-tech worlds. Prior to the launch of UTeach, the University graduated only 20 to 30 teachers per year, said Long.

The program had 28 students when it began in 1997; in the fall of '99, 148; and currently, 264. The goal is to increase the number to 500, which would enable the College to produce more than 100 new teachers a year.

About one-third of the UTeach students are minorities—twice as many as in the overall UT undergraduates. Of the 264 enrollees, 20 percent or 51 are Latino, said Long.

"UTeach has enjoyed phenomenal success," said Rankin.

According to a program brochure, retention rates for UTeach students have been far better than those of their undergraduate College of Natural Sciences peer group. A post-baccalaureate program is being developed for current seniors and college graduates.

"The success is ascribed to pervasive field experience, a cohort approach that fosters close, interdependent relationships among participating students, and guidance from nationally recognized faculty and master teachers," said the brochure.

Long said the success of the program can be directly attributed to several other factors as well, including the strong collaboration between the two colleges, the early outreach to students, and the incentives the University has created to help attract students to the teaching profession. Students are paid for the internships they participate in.

"They have had quite a bit of field experience by the time they graduate," said Long.

Field-based experiences take place primarily in inner-city schools with high-minority, low-socioeconomic student populations.

"This exposes students to the challenges of teaching in an urban setting and to observe the difference that enthusiastic teachers can make to their students," said the UTeach brochure. The focus on teaching in an urban setting is likely to give a boost to minority populations, which tend to live in urban areas. The proportion of school-age children from minority groups is expected to reach 54 percent by 2050. According to a booklet published by the Institute for Higher Education Policy, "Why Minority Teachers Matter," studies of culturally diverse and low-SES (self-esteem) students indicate that their success particularly is affected by teachers who have information about the home lives and cultural backgrounds of their students, have knowledge about the relationship between developmental needs and learning, and believe that they can successfully teach this group of students. Interestingly, one study showed that confidence in the ability to teach low-SES minority students was stronger among African American than non-African American teachers (predominantly Caucasian, in this case) and that this positive characteristic increased with experience in the urban school setting.

Also, minority teachers are more likely to serve in high-poverty and urban areas.

Analysis of national survey respondents indicated that 57 percent of minority teachers—including African American, Hispanic, and American Indian—reported that their most recent teaching job as of 1997 was at a school where more than 50 percent of the students received free or reduced-price lunch compared to 21 percent of White teachers.

In addition, 56 percent of minority teachers reported that their last teaching job as of 1997 was at a school located in a central city, compared to 28 percent of White teachers.

The UTeach program has quickly become a nationwide model. Long said that universities considering a similar program often have noted how difficult it would be to have collaboration between two colleges or departments.

"We've been fortunate to work things out," said Long.

The program has earned endorsements from educational policymakers across the country, Rankin said. The National Research Council has expressed interest in piloting a program at UT-Austin to train Ph.Ds. as secondary science and math teachers, based in large part upon the UTeach program. The Education Trust in Washington, D.C., an organization promoting college and university support for K-12 reform efforts, has selected UTeach as a model to be included in an upcoming white paper, Rankin said.

"It's a real service we provide the community as well as helping our students," said Long. "There is a desperate need for excellent science, math, and computer science
teachers."

UTEach involves a program of study in which new teaching techniques, research opportunities, field experience, and the study of math and science are fully integrated. Students give up some of their electives to take the required UTeach coursework and finish the program in four years. New streamlined classes replace the traditional education courses of the old degree plans. Students are encouraged to move through the program together, teaching and motivating one another. Students in the program take introductory classes together. "We put them with the best teachers so they see excellent teacher models," said Long.

In addition to regular faculty, the College of Natural Sciences has hired three master high school teachers for the program as instructors, advisers, and field supervisors.

"I wanted to involve superb teaching models in student advising and instruction—not just good college teachers, but excellent high school teachers who really know what it takes to be successful at that level," Rankin said.

One key element of UTeach is early classroom exposure. As early as their beginning year, University students experience the public school classroom and teach for progressively longer periods of time under a mentor, an Austin Independent School District teacher. The students receive a lot of coaching and tutoring throughout the program to improve and strengthen their teaching skills, said Long. They are required to have one semester of student teaching prior to graduation.

"Those who have an affinity for the profession will be hooked," Rankin said. "Those who don't will find out early and pursue other options. It's basically a reality check."

Gayleen Porterpan, a UTeach participant who taught an earth science class at Porter Middle School, agrees. "It would be horrible to discover when you are a senior—after several years of preparation—that you actually hate getting up in front of students."

David Carrasco Villalobos, a mathematics student from San Antonio, said teaching is something he always wanted to do, and UTeach confirmed his decision and made the process easier.

"I did think about teaching before joining the program because I have always enjoyed it," said Villalobos. "This program has helped me tremendously in becoming a better math teacher...has allowed me to enter the classroom sooner and allowed me to get the experience I need to be the best teacher...."

Villalobos said that through UTeach, he has had the experience to teach lessons at an elementary, middle, and high school in Austin, and is particularly proud of a class he taught on probability. The lesson required the students to count the numbers of M&Ms in a 50-cent bag, count the number of each color M&Ms in the bag, determine the probability of getting each color from the bag, and graph their data, using graph paper that he and his teaching partner supplied. The students enjoyed the lesson very much, he said.

Villalobos said that while at Austin's Travis High, "I not only taught, but I got good feedback from the students on how to become a better teacher."

UTEach is currently open to any first-year student accepted into the College of Natural Sciences. Students must major in math, science, or computer science and maintain a 2.5 GPA. Some upper-class and post-baccalaureate students have also been accepted into the program. Students interested in participating are asked to fill out an application. As long as they have been accepted into the College, they have been accepted into UTeach, said Long. But the program might soon become more competitive because it is quickly reaching peak capacity.

"We're producing teacher-leaders in the fields of math and science," said Long. "We are concerned, however, about how many stay in teaching, because of the salary gap. We will track how long they stay in teaching. But we are doing what we can to produce extraordinary teachers."

Indeed the challenge is how to keep the teachers in the profession. UTeach officials said some 40 percent of new teachers hired in the state of Texas in 1995 had left by 1999. Moreover, the starting salary for the average teacher in Texas with a bachelor's degree is $32,000.

But UTeach officials argue that good preparation helps keep teachers. In one study, only 43 percent of teachers prepared in a one-year program or less were still teaching three years after they started. By comparison, 75 percent who graduated from a four-year program were still teaching in their third year.
Massachusetts Institute of Technology

Exceptional Faculty, Outstanding Opportunities

by Roger A. Deitz

MIT is committed to generating, disseminating, and preserving knowledge, and to working with others to bring this knowledge to bear on the world's great challenges. Think MIT, and the highest academic standards come to mind. MIT is dedicated to providing its students with an education that combines rigorous academic study and the excitement of discovery with the support and intellectual stimulation of a diverse campus community. But there is much more to the MIT story than academics.

The MIT mission statement reads, "We seek to develop in each member of the MIT community the ability and passion to work wisely, creatively, and effectively for the betterment of humankind."

MIT President Charles M. Vest says, "MIT has always been deeply engaged with the issues and the institutions of the broader society—as reflected in our academic programs, in our research, and in those who come here to learn and to teach. This has been a distinguishing characteristic of this place and at times a source of tension, particularly during periods of rapid change in our society. In some ways, MIT is a microcosm that contains and reflects all the strains of the larger culture. But it is more than that, because we not only mirror the present, we have a hand in shaping the future."

The president observes, "The quality of that future will have as much to do with human relations as it does with scientific and technological innovations, if not more. We are very good at incorporating new ideas and new knowledge into our professional and scholarly lives. We must become equally adept at incorporating cultural and demographic change into our life as an academic community."

President Vest says there are many things MIT is doing on campus to try to make the Institute a true learning community, "including a variety of programs to attract and engage more minority faculty and students in the life of MIT. Beyond these recruiting and mentoring programs, the Committee on Campus Race Relations, formed in 1994, has done a great deal to help build..."
coalitions among individuals and groups interested in creating a more harmonious campus environment.

Essentially, reports the president, the Committee supports MIT community members in their efforts to enhance race relations on campus. Its Grants Program funds lectures, cultural events, residence-based activities, workshops, conferences, and seminars.

The Committee itself has organized a series of public programs, under the title RACE2000!, designed to explore racial identities and experiences on campus. Committee members, Vest adds, also help develop and deliver educational programs intended to help students, faculty, and staff "build the skills and capabilities they need to live and work successfully in a multicultural environment.

"Another major activity of the Committee has been the regular publication of a Guide to Resources in Racial, Ethnic, and Intercultural Relations at MIT. The Guide reflects the commitment, interest, and initiative in these areas on the part of members of the MIT community. The remarkable diversity of the students, faculty, and staff at MIT is a source of educational and personal opportunity for all of us," Vest concludes, "today, everyone can expect to live and work in a world filled with people of different cultures, races, and nationalities. Indeed, we already live in such a world right here on campus, but we have much more to do if we are to take true advantage of the rich variety of cultures and experiences we bring to this place. Too often we spend time with people who are more like us than not, and are hesitant to learn from our differences. Too often, this ignorance leads to isolation and insult. None of us should be satisfied with this

state of affairs. I believe we each have an obligation to help make MIT a living and learning community marked by mutual respect and collegiality."

Founded in 1861, the Institute admitted its first students in 1865, four years after the approval of its founding charter. The event marked the culmination of an extended effort by William Barton Rogers, a distinguished natural scientist, to establish "a new kind of independent educational institution relevant to an increasingly industrialized America." Rogers stressed the pragmatic and practicable. It was his belief that professional competence was best fostered by coupling teaching and
research and by focusing attention on real-world problems. Toward this end, he pioneered the development of the "teaching laboratory."

Today, MIT is one of the world's outstanding universities. Education and research—with relevance to the practical world as a guiding principle—continue to be its primary purpose. MIT is independent, coeducational, and privately endowed. It is organized into five schools that contain 21 academic departments, as well as many interdepartmental programs, laboratories, and centers whose work extends beyond traditional departmental boundaries.

MIT is located on 253.8 acres that extend more than a mile along the Cambridge side of the Charles River Basin. The central group of interconnecting buildings, dedicated in 1916, was designed by architect W. Welles Bosworth (Class of 1889) to permit easy communication among departments and schools. Many other buildings by some of the world's leading architects—among them Alvar Aalto, Eduardo Catalano, I.M. Pei (Class of 1940), and Eero Saarinen—have been built since then. Sculptures, murals, and paintings, including works by Alexander Calder, Henry Moore, Louise Nevelson, and Frank Stella, are found throughout the campus. Around the halls are exhibits explaining the accomplishments of many of the pioneering people who have studied and taught at MIT.

A single faculty instructs both graduate and undergraduate students and engages in research. There are 931 faculty members (professors of all ranks), including 444 women, 15 of them members of minority groups—five Asian Americans, six African Americans, three Hispanics, and one Native American. A total of 106 men on the faculty are members of US minority groups, including 72 Asian Americans, 19 African Americans, and 15 Hispanics. The Institute's total teaching staff for 1999-2000 was more than 1,500. MIT employs about 8,400 persons on campus. One hundred and six faculty and staff, both active and emeriti, belong to the National Academy of Engineering, 102 to the National Academy of Science, 22 to the Institute of Medicine, and 205 to the American Academy of Arts and Sciences. Forty-six present and former members of the MIT community have won the Nobel Prize. Ten members of the current faculty are Nobel Laureates. Five members of the MIT faculty have been awarded the Kyoto Prize. Eleven members of the current MIT faculty or research staff have been awarded a MacArthur fellowship. Twenty-three past or present members of the MIT faculty have received the National Medal of Science.

The undergraduate enrollment for 1999-2000 was 4,300, and graduate enrollment was 5,767. Women have attended MIT since 1871. In 1999-2000, there were 1,768 women enrolled as undergraduates (41 percent) and 1,589 as graduate students (12 percent). U.S. minority groups were represented by 1,996 undergraduates (46 percent) and 675 graduate students (12 percent). Among the undergraduates, there were 87 Native Americans, 1,188 Asian Americans, 270 African Americans, and 451 Hispanics. The number of Hispanics in the most recent graduating class was 97, and currently, the undergraduate class is 105 percent Hispanic. For the graduate ranks, there were six Native Americans, 464 Asian Americans, 100 African Americans, and 103 Hispanics. For 1999-2000, MIT students came from all 50 states, the District of Columbia, and three territories. One hundred and two foreign countries were represented, with an international population of 355 undergraduates (8 percent) and 2,031 graduate students (36 percent). Annual tuition is $26,500, with an average room and board of $7,715. The most popular majors include electrical engineering and computer science, biology, and mechanical engineering.

Among the MIT outreach efforts are CMSE, Science and Engineering Day Camp. The Center for Materials Science and Engineering operates an outreach program for pre-college students from underrepresented minority groups. The primary objective of the program is to enrich the science education of these students by using the Center's special expertise in the field of materials science. Other goals are to expose participants to some of the exciting resources at MIT, demonstrate to them that science is fun and interesting, and give them the opportunity to experience a college atmosphere firsthand. The Day Camp targets seventh and eighth graders drawn from a local middle school. The curriculum incorporates hands-on activities performed in laboratories and classrooms on campus and consists of two components: a weeklong day camp operated during the summer, and a series of after-school programs during the academic year. Established in 1979, Minority Introduction To Engineering, Entrepreneurship, and Science (MITEES) is a six-week residential summer program designed to introduce promising underrepresented minority high school juniors to careers in engineering science, and entrepreneurship. The program stresses the value and reward of pursuing advanced technical degrees and allows gifted young U.S. men and women to experience a demanding academic atmosphere and build the self-confidence necessary for success. MITEES can have as many as 45 participants, all of whom receive full funding. The program relies on the support of MIT faculty, with units such as the Center for Innovation and Product Development playing an active role.

The MIT Summer Research Program is an institutional effort to "address the underrepresentation of African Americans, Mexican Americans, Native Americans, and Puerto Ricans in engineering and science in the United States." There is also a summer internship program at Lincoln Laboratory, available since 1975. The program has successfully placed minority undergraduates from across the country with national labs and industry, improving their scientific and engineering skills through hands-on experience in the high-tech research and development environment.
High-Stakes Testing and Latino Students

Beware the Unintended Negative Consequences

BY RUBÉN MARTÍNEZ

Latino parents, like all parents, have a major vested interest in ensuring that their children receive the best possible education in our public schools. In a “credential society” such as ours, education is one of a small number of pathways to good careers and improved socioeconomic status.

Today’s school reform movement uses a mix of standards, student assessments, and high-stakes testing as means for improving educational outcomes. Assessment results are showing that Latino students continue to be poorly educated and start falling behind their peers early in their school years.

Over the past three decades, policymakers have responded to public concerns about educational quality by mandating the implementation of educational standards and assessment of student learning outcomes as means of ensuring that schools are held accountable for effective and efficient educational processes.

Although there is no consensus on the design of an effective and fair accountability system, 48 states use tests to assess student learning. The impact of these designs on Latino students should be of concern to Latino scholars, policymakers, businesspersons, and community leaders alike.

In some states, such as Florida, Texas, and, more recently, Colorado, policymakers have taken student assessment a step further by mandating the implementation of high-stakes testing. Depending on state requirements, social outcomes such as tracking, grade promotion, and graduation (i.e., the awarding of an academic diploma) depend on student performance on standardized tests used to assess academic skills and knowledge. Those students who do not successfully meet the minimum “cut score” may be retained “in grade” or may be denied a high school diploma. By implementing a “punish and reward system,” policymakers expect that school administrators, teachers, and students will be motivated to achieve higher levels of academic performance.

Rubén Martínez

High-Stakes Testing under Fire

High-stakes testing has recently become the center of public controversy. Teachers, parents, civil rights groups, labor unions, and professional organizations are increasingly raising complaints, some of which are being played out in the form of boycotts, political lobbying, and lawsuits. Critics from both the Left and the Right take multiple positions against high-stakes testing. Among the critics are those who believe that the unintended negative consequences of high-stakes testing exceed its positive gains.

Unintended negative consequences include a narrowing of the curriculum (teaching to the test and using “drill and kill” techniques), increased prevalence of cheating (among both school officials and students), less emphasis on character formation (or the social and emotional development of students), increased dropout rates, re-segregation of students along race/ethnic lines, and so on.

Some critics question whether tests are used appropriately, what the tests measure, if they are fair and unbiased, and the institutional conditions that must prevail for the effective use of high-stakes testing to occur. Others argue that the use of standardized tests as the sole basis for making decisions about the life chances of students is inappropriate, especially in the context of structured social inequalities.

Report Questions “Texas Miracle”

A recent RAND report on the “Texas Miracle” created a stir in the campaigns for the presiden-
Among the critics are those who believe that the unintended negative consequences of high-stakes testing exceed its positive gains.

Research Association has issued a position statement concerning high-stakes testing in Pre-K-12 education. Based on the 1999 Standards for Educational and Psychological Testing, the position statement sets forth a set of twelve conditions essential for the effective implementation of high-stakes testing programs. Two of these conditions are that decisions about a students life chances should not be made on the basis of test scores alone, and that there be ongoing evaluation of the intended and unintended effects of high-stakes testing. We have yet to see state-developed reports on the latter effects.

The National Board on Educational Testing and Proficiency has developed a set of four guidelines for the conduct of policy research on educational testing. One of the guidelines emphasizes the need for research to determine the extent to which actual outcomes match intended outcomes, and whether unintended outcomes are positive or negative. Latinos should ask that the research go one step further and address the question, "For whom are the unintended outcomes negative?"

The National Center for Fair and Open Testing (FairTest), an advocacy organization working to “end the abuses, misuses, and flaws of standardized testing,” makes available numerous reports, articles, alerts, and electronic links to individuals and organizations that oppose high-stakes testing. It calls for schools to meet the learning needs of all students on the basis of high standards and knowledge about how students learn. It also calls for schools to provide equitable and adequate learning opportunities for students.

The Department of Education Office of Civil Rights has developed a resource guide for educators and policymakers in the use of tests for making high-stakes decisions about students’ lives. The guide includes information on test measurement and legal principles, and provides glossaries of legal and test measurement terms. The guide emphasizes the constructive use of valid, reliable tests in helping indicate inequalities in the educational opportunities provided to students. Education decisions based on test scores should be non-discriminatory and educationally sound.
No Simple Solutions

As more people and organizations take advantage of the resources available to them and become informed of the issues surrounding high-stakes testing, the more the focus turns to negative unintended outcomes. Few would oppose the effort to ensure that all students receive a high-quality education in our public schools. Standards and student assessments are important for and central to accountability. Already, assessment results are identifying pockets of problem schools, where Latino and other students are demonstrating less-than-expected academic proficiency. The main issue of contention, however, is how to create a valid and reliable assessment system that improves the educational process and student learning outcomes.

Accountability systems based on standards and student assessments currently need substantially more refinement and improvement. The lack of adequate alignment between the conditions for improving the learning outcomes of students and the consequences of high-stakes testing must be addressed in direct and substantive ways. Parents, for instance, raise concerns about school safety, teacher quality, and class size, respectively. Improvements in these areas will likely improve the learning environment for students.

In a context of “experimentation,” Latino students (and other ethnic minority groups) are likely to become the major casualties of high-stakes testing, with the effects having lifelong consequences. A continued rush to implement measures to motivate (force) teachers and school administrators to promote and implement school reform initiatives might in the end hinder the life chances of millions of Latinos in this country, and ultimately result in the reproduction of the racial division of labor that seemed to be breaking down in the last third of the 20th century.

The schooling process is highly complex because it involves historical legacies of structured inequalities, contemporary forms of institutional racism, variability among teacher education programs and teacher quality, test biases, bilingual issues, and different school systems that make the development of effective accountability systems a difficult task. As Latinos mobilize to shape the school reform movement to improve the educational process, particular attention must be paid to the conditions under which high-stakes testing takes place.

Social engineering approaches that are based on simple cause-and-effect models often backfire and/or produce a slew of unanticipated consequences, many of them negative. High-stakes testing might indeed, at this time, have many more negative than positive outcomes. In the end, unless policymakers are more informed and more careful about their approaches to improving education, high-stakes testing may become the dominant form of institutionalized discrimination that perpetuates the subordinate status of Latinos in American society.

Rubén Martínez is a HACU-ETS 2000 Fellow conducting research on high-stakes testing and its impact on Latino Students. He is with the University of Southern Colorado.

---

Pace University
Associate Provosts

Founded in 1906, Pace University is a private comprehensive university, offering more than 300 majors and 3,000 courses within six undergraduate and graduate colleges, to a diverse population of 9,000 undergraduates and 5,000 graduate students. Located in New York City and Westchester County, Pace draws its strength from being a unified institution that offers students a choice of several campus locations, each with its own distinctive atmosphere, ranging from the quintessential urban New York City, to the medium-sized city of White Plains, to the suburban campus of Pleasantville/Briarcliff.

Pace University is seeking two candidates for two newly created positions of Associate Provost. Reporting directly to the Provost and Executive Vice President for Academic Affairs, both will work closely with the faculty and the deans. They will advise on matters of educational policy and academic personnel and carry out special projects for the provost. The broad scope of their responsibilities will encompass university-wide academic programs, faculty development, academic support services, sponsored research and grants, and state compliance, among others.

The successful candidates will possess a doctoral degree and have several years of relevant academic administrative and teaching experience. They must possess excellent interpersonal and oral/written communication skills.

We offer a competitive salary package including free tuition for staff, spouse and dependent children. To ensure full consideration, applications should be received by May 27th, 2001. Nominations of individuals for these positions may be sent to the address below. A resume, with an accompanying cover letter, including three references, and salary requirements, should be e-mailed to: Sandra Alan, Director Human Resources Services, Pace University, One Pace Plaza, New York, NY 10016.

Visit the Pace University web site at: www.pace.edu

Pace University is an Equal Employment and Affirmative Action Employer, M/F/H/V, committed to ensuring a diverse learning and working environment. Women and minorities are encouraged to apply.
Officials look to close minority graduation gap,” read the headline of a recent article in The Sunday Record (Bergen County, N.J.). I was struck by the story of Pedro Hernández, a young man featured in the article. Pedro lives in my own hometown of West New York, and graduated from Memorial High School, a public school that sits across the street from my alma mater, St. Joseph’s High School. Twenty-year-old Pedro is currently a history and education major at Ramapo College of New Jersey, and wants to become a lawyer. He explains in the article, however, that he did not always have such ambitions. As a first-year student at Memorial, Pedro didn’t really consider going to college; he said that he didn’t study, and his grades suffered. In his sophomore year at Memorial, his godfather took him on a tour of Rutgers University. Pedro decided to try to go to college to move out of the poverty that surrounded him. He worked to improve his grades and earned a scholarship to attend college.

When I think about Pedro’s godfather taking him to tour the Rutgers campus, I am reminded of all the literature showing the importance of mentors, particularly for high-risk students. Who knows if Pedro would have pursued the goal of college without that support?

Recent research explores the phenomenon of “resiliency” in children who thrive despite living in conditions that are devastating for other children. One of the most important factors contributing to the hardiness that some children show is that they had in their lives some person, often outside their family, who took them under his or her wing.

Several New Jersey colleges have implemented programs in which minority students are assigned to a special faculty person on campus. The role of that faculty member is to be a support and mentor through the student’s early college experience.

In a draft report, “Status of Minorities in New Jersey Higher Education,” The State Commission on Higher Education states its belief that N.J.’s diverse student body is “a strength of the state’s higher education system and should be actively cultivated…[T]he success of New Jersey’s colleges and universities in enrolling minority students and producing a diverse cohort of well-prepared graduates is critical for individuals and for the state.”

“All New Jerseyans,” the report continues, “must have opportunities to contribute to and participate in economic prosperity, and advanced education has become a requisite for success in today’s global economy.”

The changes in New Jersey’s demographics, mirrored throughout the nation, make it imperative to ensure that the growing minority population succeeds in higher education. If the growing minority population is undereducated, the nation will suffer economically and politically. Supporting education for all citizens is not only the right thing to do—we cannot afford to do otherwise.

Higher education faces two major problems related to minorities: enrolling
minorities in proportion to their numbers in the general population, and retaining minority enrollees so that they can earn their bachelor’s degrees. “Crossing the Great Divide,” a recent report of ETS, the Educational Testing Service, projects that by the year 2015, national undergraduate enrollment will expand by 2.6 million students. About 80 percent of this expanded national college base will be minorities—Blacks, Hispanics, and Asian/Pacific Islanders.

New Jersey’s undergraduate enrollment is already diverse, and ETS projects that N.J.’s minority student enrollment will be greater than 40 percent by the year 2015. Despite this good news, Black and Hispanic students are expected to continue to lag behind Whites in college attendance nationally and in New Jersey. Between 1994 and 1999 in N.J., total minority enrollment among undergraduates increased, with Asian American and Hispanic students accounting for the largest gains in enrollment. Black undergraduate enrollment increased the least during that same time period, but Black students continue to represent the largest share of all minority student enrollments in the state.

The increase in minority enrollment in New Jersey seems to be linked to school reform and pre-college programs in the Abbott Districts, which include 30 disadvantaged urban school districts that sued the state over unequal educational funding. The Commission says that about 32 percent of Hispanic college students in N.J. graduated from an Abbott District school. The Commission contends too that many minorities attended schools that did not have the same educational opportunities and facilities as those of White students. Three New Jersey programs—EOF, College Bound, and GEAR UP—target Abbott District students. These programs provide early intervention to enhance students’ academic preparation, extend their opportunities, and support students once they are enrolled in college.

Of all the sectors of higher education—public research universities, state colleges and universities, independent colleges and universities, and community colleges—the largest overall percentages of Black and Hispanic students are enrolled in community colleges. The largest numerical increase in total Hispanic undergraduate enrollment also occurred in the community college sector.

Ensuring that minority students are ready for college should begin at the preschool level, with a quality preschool education available to all children. Knowing what we now know about early childhood brain development, quality daycare and preschool programs should be available to all of America’s children. Without such a proactive initiative, many children will start kindergarten already at a disadvantage. In addition, New Jersey, and the nation at large, must assure all of its children a quality public education from kindergarten through 12th grade. The playing field will never be level for minorities and for children from lower-socioeconomic neighborhoods as long as the discrepancy exists between the educational opportunities in our affluent neighborhoods and those of our schools in poorer districts.

The College Bound program in N.J. and the GEAR UP State Project provide enrichment activities and support programs that help at-risk children in grades 6-12 to complete high school and prepare for college.

The second major issue facing minorities in higher education is retention. While the absolute numbers of minorities in our colleges continue to grow, the graduation rates of most minority groups typically lag behind those of White students. Asian students in N.J., who had slightly higher graduation rates than did Whites, are the exception. State officials are exploring ways to close the graduation gap, which has grown for Hispanics and shrunk slightly for African Americans.

Factors contributing to poor retention of minorities are complex and interwoven. Financial troubles might cause minority students to leave college. Often, their lack of quality preparation in public schools makes college-level work tough to tackle. And, many minority students feel a sense of isolation on campuses where they feel less than welcome. Pedro Hernández says that he sought connections with fellow minority students and that they helped one another get through the year.

Many campus-based Educational Opportunity Fund (EOF) programs encourage college students to get their parents involved and to allow administrators to contact their parents when they are doing well or when they need more help. Many college campuses provide summer programs for minority students who might need extra help. Recognizing the importance of early intervention for high-risk students, many campuses also have some version of a first-year seminar designed to introduce students to the college culture and to provide them with the skills they will need to be successful.

The state of New Jersey supports diversity in higher education with a number of programs, some focused on students and some focused on faculty. EOF is perhaps the most comprehensive, providing financial aid and intensive personal and academic support and guidance to help disadvantaged students both gain access to college and succeed once admitted. EOF provides assistance for more than 12,000 N.J. students, of whom three-quarters or more are minorities. Additionally, New Jersey has the ELMS program, Education of Language Minority Students, in place and a Special Needs grant program. Both help individual campuses address the learning
Minorities at New Jersey colleges

A look at enrollment growth, 1994 vs. 1999

Total minority enrollment among undergraduates increased between 1994 and 1999, with Asian-American and Hispanic students accounting for the largest gains. While black undergraduate enrollment had the smallest level of increase (from 34,022 to 35,065), black students continue to represent the largest share of all minority student enrollments in the state.

Fall 1994

- Black: 8%
- Hispanic: 9%
- Asian: 6%
- Other: 12%
- White: 65%

Fall 1999

- Black: 13%
- Hispanic: 10%
- Asian: 7%
- Other: 10%
- White: 60%

Source: New Jersey Commission on Higher Education

needs of specialized student populations. Another program was implemented in 1997—an incentive grant program to improve graduation and transfer rates for minorities or low-income students.

Improving retention rates and graduation rates for minorities also involves faculty. Recognizing that 80 percent of New Jersey’s professors are White, the Commission recommends that N.J. colleges and universities bring greater diversity to their faculties so that the numbers reflect the gender/ethnicity/racial make-up of the student body. The rationale for increasing faculty diversity is that minority students do better academically with the help of minority role models and mentors among their professors. The state has several programs to encourage faculty diversity. And the Commission recently revamped MAC, its Minority Academic Career program, to foster the training of minority doctoral candidates, and to improve the recruitment of minority faculty.

We must also sensitize our current faculty to diversity issues. An inclusive, welcoming classroom atmosphere is so critical for minority retention and for student success in general that it is imperative that institutions help develop faculty understanding of cultural similarities and differences. The classroom becomes a richer academic environment when faculty members are aware of, and sensitive to, the role that gender/race/class/ethnicity play in their students’ experience of the course material and of the classroom environment.

There really are two diversity issues that faculty professional development should address: 1) How can our institutions get faculty to understand diversity well enough to transform what and how they teach? and 2) How can our colleges and universities sensitize our faculty so that they are able to create a classroom atmosphere in which all students feel welcome and encouraged to succeed?

Here again, New Jersey takes a proactive stance. To its credit, the state has a program, The New Jersey Project on Inclusive Scholarship, Curriculum, and Teaching, that provides a variety of mechanisms for the professional development of college and university professors. Many campus-based initiatives have received support and inspiration from The New Jersey Project.

Much work still needs to be done in preparing minority students for college, recruiting them, making their attendance feasible, and helping them succeed once they arrive. But at least New Jersey is on track.

Texas A&M Launches Hispanic Studies Minor at College Station
First to Center on an Ethnic Minority

BY INES PINTO ALIJA
Texas A&M University has launched its first academic program that centers on an ethnic minority group. Students seeking to add both multicultural and international perspectives to their majors now can do so through a new academic minor in Hispanic studies.

The interdisciplinary liberal arts academic program is housed in and administered by the University’s Department of Modern and Classical Languages, based in College Station, Texas.

“The Hispanic Studies minor represents a milestone for Texas A&M University,” said Dr. Victor Arizpe, professor of Spanish and coordinator of the new program.

“The University is taking a very decisive step in addressing its commitment to the demographics and educational need of all students—the need to have a concentrated course of study that highlights the role Hispanics are playing internationally and particularly in the state of Texas.”

Those who helped launch the program said Texas’ geographical locations, its historical ties with the Hispanic world, and its large Hispanic population make the University an ideal location for a minor in Hispanic Studies. Texas A&M, the land-grant university of the state, has some 43,000 students. There are about 3,302 Latino undergraduates, 385 Latino graduate students, and 24 professional Latino students on the campus.

The program’s creators said the minor is a way to start meeting the “Texas challenge”—to provide educational access for the large population of Hispanics in Texas to their cultural roots, to foster a sense of identity and value among Hispanic students, to promote mutual understanding and ethnic diversity, and to address the many critical issues derived from the new population and socioeconomic realities facing the state in the 21st century.

“This allows students to add another dimension to their major,” said Arizpe. “We think this minor will add value to their current majors.”

Arizpe said the program’s interdisciplinary design will foster a broad-based understanding of the social, economic, and political issues facing the Hispanic world in addition to providing students an overview of the contributions of Hispanics. Central to the Hispanic Studies minor is the expectation that students develop competency in the Spanish language, he adds.

Arizpe said the program, which was launched in September, has enrolled 16 students and is likely to experience increased enrollment for the spring semester.

“Interesting enough, some of the students are coming from the biomedical sciences,” said Arizpe. “These students plan to go into the medical profession and feel that knowing the Spanish language and culture will help them better serve their communities. The students opting for the HS minor currently are both Hispanic and non-Hispanic.”

Rosalinda Castillo, 24, expects to graduate from the University in August 2001 with a major in international studies and two minors, one in Hispanic Studies and one in public relations. Castillo said the Hispanic Studies program not only learn about the contributions of Mexican Americans as well, and she is able to share the topics she has learned about in history, culture, and the arts with her two young daughters. Many of her family members have attended the University and share her excitement about the program.

“All of the Hispanics on campus want this type of program,” said Castillo. “We were hungry for these classes. Even though I am familiar with the culture, the program has deepened what I already know.”

The program is valuable on a practical level as well, said Arizpe. “U.S. Hispanics unquestionably constitute a viable market. It’s a market with a great need for services. A knowledge of the language and culture is going to be a definite asset to our student body as we prepare them to compete for jobs that require an understanding of the Hispanic marketplace.”

Not only are Hispanics the fastest-growing ethnic group in the United States, but studies have estimated Hispanic buying power in 2001 will have increased 118 percent since 1990.

“With a program like this, Texas A&M is sending its students into the workplace equipped with the essential tools to succeed,” said Arizpe.

Arizpe, a former director of the interdisciplinary Bachelor of Arts in international studies, said he believes the strength of the minor lies in its interdisciplinary approach to learning about the Hispanic experience.

“Texas A&M, through this program, has demonstrated its commitment to Hispanic issues and presence on campus while promoting a better understanding of the role Hispanics play in the future of the state of Texas,” said Arizpe.

He said participants in the program will have the chance to take courses on Hispanic topics and issues from some of Texas A&M’s best scholars in anthropology, architecture, communications, geology, history, political science, sociology, and Spanish.
The minor, which was launched in Fall 2000, will require 18 hours of course credits from a broad spectrum of liberal arts studies. The courses were already in place. The minor simply unitizes them into one package. Among the courses that students can take to complete the minor are the following: archaeology of Mesoamerica, Indians of Mexico and Central America, life and literature of the Southwest, Hispanic literature in the United States, geography of Latin America, Latin American cultural and intellectual history, Latin American philosophy, political systems of Latin America, minority groups, Hispanic film, Hispanic writers in the U.S., Spanish-language poetry, and Cervantes.

The program, open to students in any major, requires six hours in A&M upper-division Spanish-language courses taken at the University or abroad, nine hours in Hispanic topics and issues (from various departments), and one capstone or exit course selected in consultation with the coordinator for the minor.

In addition to classroom learning, Arizpe said he will work to further enhance the students’ education by seeking out opportunities for them to engage in serving-learning activities both on campus and in the local Hispanic community.

“While not a requirement for this minor, I plan to encourage students to further enrich their global perspectives by interning, volunteering, or studying abroad in Spanish-speaking countries,” said Arizpe, who has published several books and articles on Spanish Golden Age literature and drama. “This is an invaluable aspect of any education because it gives students the chance to apply what they are learning in the classroom to real-life situations.”

The new minor was added by the department’s Hispanic Task Force, which consists of faculty in the Spanish, English, sociology, and history departments charged with designing programs relevant to Hispanic studies. In addition to the new minor, the Department of Modern and Classical Languages will be adding degree and doctoral programs, pending approval by the State Higher Education Coordinating Board.

“By pooling faculty and using long-distance education, we can reach large numbers of students,” he said. “We hope we’ll have a Hispanic Studies major to have students to feed into our master’s and Ph.D. programs.”

Oberhelman said that the master’s program will require students to complete 36 credits, 18 of which will be Hispanic Studies courses in Spanish. The nature of the program is interdisciplinary, so students will take the remaining 18 credits from other departments at the University.

But Hispanic Studies programs have faced some challenges in Texas, according to some of the officials involved in developing the program.

Dr. Marco Portales wrote a book, Crowding out Latinos in which he argues that since 1848, when the Treaty of Guadalupe Hidalgo ended the war with Mexico, Latinos have been left behind in receiving “amenities, benefits, and preferences that American society has offered.” He said the culture in the U.S. has been to push aside issues that concern the Spanish-speaking population in this country and that the state of Texas has been no exception, despite a population of more than 5.8 million Spanish speakers.

“People might understand if we lived in Maine or Idaho,” Portales said. “But Texas? The lack of legislative and higher education super-

Dr. Steven Oberhelman, head of the Department of Modern and Classical Languages at Texas A&M Board, said Dr. Steven Oberhelman, head of the Department of Modern and Classical Languages.

Oberhelman said the Department will begin working on creating a Hispanic Studies major. The Department will begin offering a Hispanic Studies master’s this fall and hopes to launch a doctorate in the same discipline by Fall 2002, in conjunction with other A&M campuses in South Texas—in Corpus Christi, Laredo, and Kingsville.

Curricular Diversity Requirements: Presence Substantial; Impact Debated

BY ISIS ARTZE

Diversity requirements are no longer a rarity at colleges and universities across the country, reports the Association of American Colleges and Universities (AAC&U). It found that 62 percent of the 543 institutions polled either have a diversity requirement in place or are in the process of developing one.

Essentially, diversity requirement is the blanket term for an undergraduate graduation requisite that students must complete in a field that includes ethnicity, religion, gender, and/or sexual orientation.

At the University of Maryland (UMD), the Human Cultural Diversity courses are designed to give students "the chance to examine ideas and values in the light of an unfamiliar intellectual social context," explains the University's website.

The courses, it says, will heighten "appreciation of difference, itself" and increase students' ability "to learn from people, cultures, ideas, and art forms" different from those that the student "knows best."

A 1998 article about UMD in the Washington Post quotes one White student, who had taken several diversity courses, as saying, "I see life differently, particularly in my job outside of the campus, where migrants are treated unfairly."

The AAC&U study, the first national survey to examine this trend in undergraduate education, found that of the diversity requirements in place in the schools polled, 45 percent had been instituted for 5 to 10 years, 30 percent for less than five years, and 25 percent for more than 10 years.

The "Cultural Diversity Requirement" at the University of Illinois at Chicago falls into the first, most prevalent, life-span category. It was approved by the UIC senate in 1992 and became effective for all students enrolled as of the fall of 1994. Lawrence Poston, Ph.D., dean of liberal arts and sciences, says that the knowledge provided by this requisite will help to provide students with an understanding of the cultural diversity that is part of our American heritage, and the ethnic and national cultures that shape our past, affect our present, and influence our future.

The AAC&U reports that the UIC model, which requires students to take one course from among a list of approved courses, is the most common diversity requirement, that employed by 68 percent of schools. Most schools also allow students to fulfill the requirement by studying abroad.

Students attending a community college in Seattle, Washington, are required to take an ethnic-diversity requirement that is more extensive than the norm. Titled Individuals, Cultures and Societies, it requires that students complete 15 credits, divided between Individuals and Societies and either Global Studies or U.S. Cultures.

"There've been substantive changes occurring in our society as

"Reduced levels of racial prejudice are associated with enhancing students' ability to adapt successfully to change and with developing students' values and ethical standards through thoughtful reflection of relevant facts."

MITCHELL CHANG, ASSISTANT PROFESSOR OF HIGHER EDUCATION AND ORGANIZATIONAL CHANGE, UCLA
whole and in what we expect of an educated person," Jerry Brockey, executive vice chancellor of the Seattle, Washington district, told the *Seattle Times* when the requirement was established in 1997.
