"The technology and advertising industries are two areas where there are many opportunities for underrepresented minorities," wrote Buford, adding, for example, that minorities comprise just 12 percent of the workforce in the advertising industry. "Without a doubt, these areas lack diversity."

The Consortium itself is trying to become more technologically up to date. It recently adopted Embark's Web-based systems to streamline the fellowship application process. Embark developed an online fellowship application for the Consortium's 12 graduate business schools.

"We are proud to help the Consortium facilitate the entry of ethnic minorities into graduate business school and ultimately into positions of leadership in business," said Phillip Dunkelberger, president and CEO of Embark.

In most cases, the electronic fellowship application also serves as the application for admission. Students need only submit the Consortium's application at the CGSM website [www.cgsm.org](http://www.cgsm.org) or at [www.embark.com](http://www.embark.com), designate the schools they would like to attend, and forward supplementary materials directly to the Consortium. Once all the supplemental materials are received, the individual schools can enter the Embark system and access the applications online.

"This Web-based application process will be more convenient for our applicants and will, we hope, yield a higher number of completed applications," said Buford. "Embark's systems were the logical choice, since 11 of our 12 member schools already use the company's Web admissions systems and highly recommended them. Embark has also dedicated technology and resources to assist the Consortium in recruiting talented minority students interested in management."

The Consortium recruits by visiting numerous colleges and attending minority career programs, graduate and professional school days, and MBA forums across the country to generate nearly 10,000 applications each year. From this applicant pool, about 85 percent of admitted applicants are offered financial assistance. The program covers the full tuition and fees for business study; a strong corporate sponsor network, pre-matriculation and post-graduation career counseling, and a network of Consortium graduates across the country.

"Businesses are seeking minority candidates to join their management teams," said García. "The demand is there. We never have enough applicants or students that graduate to meet the demand."

Now that the organization has gotten its applications online, it can turn to other efforts to help the organization reach more minorities. Buford said she is working on ways to create awareness programs to reach youngsters as early as elementary school so they start learning about business careers. She wants to also have the organization help students interested in pursuing business degrees if they are struggling with the GMAT test.

"The tests are not going away," said Buford. "If those tests are part of the game, then we need to teach young people how to play the game."

To find out more about the program, visit the Consortium website, e-mail the Consortium at frontdesk@cgsm.org, or call (301) 294-4565. The early deadline for admission is Dec. 1, and the final deadline is Jan. 15.
Finding a Dream Job

SALUDOS.COM

BY MARILYN GILROY

Websites Serve Hispanic Employment Market

Some would call it "a match made in heaven," but they would not be talking about a bride and groom—they would be referring to the growing use of the Internet for recruiting purposes, bringing employers and job seekers together to meet each other's needs. There are now dozens of career websites available, but the emergence of online sites geared toward Hispanics offers exciting possibilities for today's diverse workplace. At the very least, these sites are changing the way Hispanic professionals search for jobs and the way companies look for employees.

"The Web has proved to be a very effective medium for providing up-to-the-minute job information, especially for bilingual job seekers," said Maureen Heuring-Appel of Saludos.com. It is the first site to offer free résumé posting and access to job openings for college-educated bilingual Hispanic job seekers. Launched in 1995 and revamped in 1998, it now includes new features such as online job fairs and Career Agent, which notifies registered job seekers of career opportunities by mail.

Saludos.com entered the market with an already established identity linked to Saludos Hispanos, a national magazine that has focused on education and career advancement in the Hispanic community for more than 30 years. As an extension of the magazine, Saludos.com offered employers a chance to combine their print recruitment efforts with the Web via online job advertisements, corporate profiles, and ad banners. At the same time, Saludos Hispanos magazine participated in job fairs across the country and encouraged students and alumni at more than 300 educational organizations to register with Saludos online. Today, the site receives at least a half a million hits a month.

"We're bringing together talented Hispanic job seekers with companies seeking workplace diversity and bilingual ability," said Heuring-Appel.

To do this, Saludos.com offers a wide range of services to both employers and job seekers. It targets college-educated Hispanics in the United States who are seeking professional positions and links them with hundreds of employers, such as Lockheed Martin, Oracle, Xerox, MTV, Intel, Kimberly Clark, and Intel Corp. One of its most popular services is the online job fair, held several times per year, when companies post hundreds of job openings on the site and
hold live chats with prospective employees. Last year’s job fair received more than one million hits.

“Job fair participants can register for any event or for a ‘meet and greet’ session where the company will respond to registered attendees via chat technology,” explains Heuring-Appel. “Interviews that are one-to-one can also be arranged at a designated appointment time.”

Individuals who register with Saludos.com and post their résumés also receive copies of Saludos Hispanic magazine and the Saludos.com newsletter. Both publications contain relevant articles on career advice, interviewing tips, and profiles of Hispanic role models.

While Saludos used its presence in print media to carve out a niche in the Web employment market, other sites have developed as an outgrowth of the more traditional recruitment business. One of the most successful ventures has been JobCentro.com, the official site of the U.S. Hispanic Chamber of Commerce. The site is the brainchild of Heriberto (Eddie) Batiz, who launched the company in 1999 without using any traditional marketing campaigns. Batiz has more than 20 years of experience in the recruitment business. Initially, he was involved in ASPIRA, the New York City-based Latino organization, where he was director of youth employment programs. But his career in the business sector began as a young man when he walked into an employment agency looking for a job.

“I was desperate. I had two kids, and I needed work,” said Batiz. The employment agency found him a job as a recruiter, but it was decided that his name was “too ethnic” for corporate America, and it was changed to Ed Bates.

But as Batiz said, “That experience made me what I am today. I decided to work hard, learn as much as I could about the recruitment industry, and become a leader.”

Working hard meant moving around the country as his career advanced. Batiz has operated employment agencies in Chicago, Miami, New York City, and Philadelphia. He was national sales manager of Advanced Personnel Systems, a résumé-management software development company in California. In 1998, he started companies and organizations create websites for recruitment. For example, they created NavyJobs.com to help the U.S. Navy fill positions.

Batiz.com has been honored several times, including a recent award from Entrepreneur magazine, which dubbed it the “fastest growing company” in America. The site and has a range of 700 to 1,800 jobs posted, depending on the time of year.

“The number of companies seeking Latinos in management and technical talent is growing,” said Batiz. “In the government sector, there is a mandate to recruit Hispanics for civil service jobs in anticipation of a loss of 30 percent of the workforce due to retirements in the next 10 years.”

Like many of the employment sites, JobCentro.com offers some unique features, such as online career webcasts and interviews. The Salary Wizard link contains information on thousands of job titles and will calculate salaries based on job type and geographic location.

While Saludos.com and JobCentro.com are representative of high-powered Internet addresses, other sites, such as Texas-based JobLatino.com, are more of a family affair. JobLatino.com was put together by Homero Pérez, his wife Agustina Ercías, and mother, Lillian. Pérez had previously worked in the Peace Corps and as a director in Jobs for Progress, a LULAC-supported program. His mother had experience as a bilingual teacher who had worked with immigrants, helping them find jobs and build new lives in the United States. It seemed a natural extension of the family’s background to start a business aimed at helping minorities find job opportunities.

Pérez approached a good friend, Theo Ralile, to provide technical expertise needed to put together a website. After the site went online in 1999, the response was so great that the family needed help to handle growing numbers of e-mails and phone calls. The company brought in Rosa Porras, who had eight years of experience in human resources, to assist with site administration and job development. Although the company has grown considerably, it still retains a more personal tone than some of the other sites.

“We love getting correspondence from people who have received sup-

Eddie Batiz, founder of Batiz.com
stored in folders and résumés can be subsearched according to job-posting characteristics.

Résumé search and search engine –
Direct access to job seekers through the site’s résumé database. Results can be narrowed by work experience, level of education, language-specific skills, salary expectations, and other keywords.

Company profile –
Employers can post a description of the company and logo, followed by available positions. Banner ads are often available.

Employer accounts are usually password-protected. The account includes reports on response statistics and general-result tracking. Posting rates and banner ad rates are cheaper than those in print media, and the websites tout their ability to help employers recruit new employees while reducing the cost and time involved in the hiring process.

FOR JOB SEEKERS (free services):
Résumé submission –
Submitted in the website’s database by using a résumé template or copying and pasting the existing résumé.

Personal account –
Job seekers can create a password-protected account free of charge and set up a customized employment search profile based on their specifications, such as job type or geographic preference.

Applications –
Job seekers can apply online and also use search features that show results by week or month.

Online job fair participation –
These virtual career events run from one to three days and offer online interviews.

Other features of the sites include tips on how to write résumés, cover letters, and thank-you notes, plus advice for interviewing.

Some sites protect applicants by providing a privacy setting that eliminates unwanted solicitations and enables them to avoid detection by their current employers.

Most sites are aimed at Hispanic professionals who are bilingual. However, some recruiters say fluency in a foreign language is not necessarily required. As one recruiter explained, "While there are those companies that absolutely want someone who speaks Spanish or understands the market, others just want to diversify their workforce."

Diversifying the workplace, especially at the management level, is such a pressing need that many companies use online executive recruiters such as Spanus. Manuel Borada, founder of the site, says that companies cannot ignore the need for managers who can bridge the gap between Hispanic workers and corporate leaders. "If companies want to be successful," said Borada in a recent interview, "they have to put forth an effort to have the demographics of the company match the demographics of the country." He says that many U.S. corporations are vying for Hispanic talent.

But what if job seekers want to do an international search for employment? No problem, Cyberspace has recruiting sites geared toward Latin America and other parts of the globe. SpanishJobs.com and NetEmpleo.com offer the chance to search for positions in Central and South America ranging from administrative assistant to telecommunications expert.

One of the most innovative sites, Sinparar.com, organizes e-mixers through which Latinos can network and explore opportunities that combine technology jobs and the Latin American market.

Experts estimate that there might be as many as 40,000 career-related websites on the Internet. Although not all of them can survive in today’s competitive market, it is clear that dot.com land has changed the recruiting game. The result is that job hunting might never be the same.

port through JobLatino, “said Porras, outreach specialist for the site. “We also know that we are helping companies diversify their workplace through the hiring of Hispanic/ Latino professionals.”

Porras says that the company has upgraded its servers and equipment to ensure that there is no down-time on the site. Last year, JobLatino began charging companies to post their jobs, although job seekers can still use the site for free. JobLatino has also subcontracted with larger organizations that specialize in diversity recruitment and marketing.

Most Hispanic employment sites, whether large or small, offer similar basic services to employers and employees. A partial list of common site features includes the following:

FOR EMPLOYERS (fee-based):
Job postings –
Posting is done in real-time. Applications are received and
Leadership Alliance Helps Hispanics Earn Ph.D.s
Members Include UPenn, Hopkins, and Harvard

BY MICHELLE ADAM

The Leadership Alliance, a consortium of 28 institutions of higher education, is dedicated to improving the participation of underrepresented populations in graduate education.

Included are its Summer Research Early Identification Program (SR-EIP), Alliance International Research for Minority Scholars program (AIRMS), Minority International Research Training (MIRT), and Graduate Fellowships.

SR-EIP recruits undergraduate students to work for eight to 10 weeks under the guidance of a faculty or private-sector research mentor. Students do so by receiving grants to participate in summer programs at doctoral-degree-granting campuses affiliated with the Alliance. Upon completion of the program, they also get an opportunity to showcase their research at the Alliance's Annual National Symposium. SR-EIP provides an excellent opportunity for minority students to be exposed to research and become better prepared for graduate work that might lie ahead.

One such student, Brenda Mariola Rivera-Reyes, was part of SR-EIP at Johns Hopkins University during the summer of 1999. She had attended the University of Puerto Rico but was eager for research experience. Through the Alliance's summer program, followed by an internship at Hopkins, she received hands-on lab experience that prepared her for graduate school. While other students came to graduate school with more exposure to research from their undergraduate work, she had achieved parity through SR-EIP.

"When I got to the summer program, I felt that I was behind, but when I worked there that summer, and then that semester, it gave me an opportunity to catch up," she said. "It was a great experience." Rivera-Reyes is now pursuing a Ph.D. in immunology at Case Western.

In the AIRMS program, students travel to the University of London's School for Oriental and African
Studies for an orientation in African Language and Culture, followed by research conducted in African countries. During MIRT, students get the opportunity to play an active role in important biomedical research projects in Africa, Asia, Europe, and Latin America.

In most of the Alliance programs, an estimated 65 percent of the students are African American, and 30 percent are Hispanic.

A program that has especially helped minority Ph.D. students with financial support is the Irene Diamond Fund. Since 1996, awards of $12,000 have been given (for one academic year) to first-year pre-doctoral students, and $12,000 (for one calendar year) to dissertation students.

"The Irene Diamond Fellowships have been so important to us because they support our graduate students at three of the most critical junctures of their academic careers," said Jim Wyche, Alliance executive director.

Forty Irene Diamond Fund awards have been given through the Leadership Alliance. That includes 22 first-year pre-doctoral candidates and 18 dissertation students, 10 of whom have been Hispanic students. Of the total students, 17 have graduated or will soon graduate from Ph.D. programs. Five years have passed since the first awards, and the Alliance is seeing the proof of the Fund’s merit. The Irene Diamond Fund is no longer providing the money for future students, but the Leadership Alliance hopes to find new donors and to continue to offer minority students the benefits of support in obtaining a Ph.D.

Despite increases in college and graduate school enrollment, underrepresented minorities still make up a small proportion of the scientific and scholarly research workforce in academia and in other work realms. Programs such as the Irene Diamond Fund are especially important to improving the situation.

Thanks to the Alliance, two of the 17 students who have graduated or will soon graduate are Hispanic. HO interviewed both of them to see how they benefited from the program and to get a glimpse of their journeys toward a Ph.D.

Carlos Carrillo

Carlos Carrillo received an Irene Diamond Fellowship for his dissertation research in composition from the Eastman School of Music and a master’s in Music in composition from the Yale University School of Music. He entered into a Ph.D. program at the University of Pennsylvania’s Department of Music in 1996. With financial support from the Fellowship, he was able to work on his opera dissertation during his final school year.

"The financial pressure is undeniable at this level, even when you do a lot of work," said Carrillo. "That was the biggest help." He, like so many students, underrepresented and otherwise, recognizes the obvious challenges of obtaining a Ph.D. and receiving the highest degrees. In adding up the total cost of all his education, Carrillo guesses it amounted to more than $500,000.

Carrillo is from Puerto Rico. In 1998, during his third year at the University of Puerto Rico, he took part in an exchange program at Hunter and Brooklyn Colleges, in New York. He enjoyed it so much, he was eager to return.

Carrillo comes from a middle-class Puerto Rican family, which typically doesn’t expect its children to attend school on the mainland. However, the mainland U.S. offered more rigorous music programs than those available back home, he said, and he was determined to study at the Eastman School of Music. Thus he enrolled at Eastman, despite its expense, and sought out financial support. He obtained fellowships and scholarships from Puerto Rican sources, and special assistance from La Asociación de Industriales de Puerto Rico, a group that supported him for 10 years of his education. Still, there were financial hardships to reckon with.

"During my last semester at Eastman," he said, "I had to pay the bill with a credit card!"

Doing dishes was another way that Carrillo paid his way through Eastman. "Some felt all I was doing were dishes and taking a few classes," he said. "But I worked hard for what I have. I have had to compete with people that have more resources."

It was learning how to write music that interested Carrillo, and at Eastman, he got an opportunity to study with the best. Part of the challenge for Carrillo throughout much of his education was being Hispanic and being among a very small minority. "Sometimes I was the only Hispanic in the department at Eastman," he said. "The Hispanic population at Yale was minimal. University of Pennsylvania was the same. The only Hispanics were mainly cleaning the building." But he persisted.

Today, Carrillo is working on an opera, written in Spanish. This is his dissertation, which he will complete by the end of this summer, after taking off a year to teach at...
Since 1996, awards of $12,000 have been given for one academic year to first-year pre-doctoral students, and $12,000, for one calendar year to dissertation students.

his current university. One of the challenges of being one of the few Hispanics in his music department is that others have a limited sense of the kind of music a Puerto Rican plays. Cheerful and colorful, like salsa music, is what some expect, while others are surprised to hear that Puerto Rico actually has classical composers—that which Carrillo is aspiring to become.

"People have asked me why I am studying classical music since I am from Puerto Rico. "Do you have that kind of music? they ask," said Carrillo. "I want to bring my own voice. I want to be considered a world-class composer at the same level as other composers."

Completing a Ph.D. for Carrillo means an opportunity to teach and to make a mark as a composer. "I love teaching. It’s a tool to teach more about our culture. I fear that what people know about Latin culture is through Taco Bell," he said.

"Through my music, they can say that this is an Hispanic man playing classical music. I do see myself through my music, through my teaching, as showing a part of Latin music that is there but not recognized."

Carrillo is especially grateful to have had the Alliance Fellowship to help him during the last leg of his academic journey. "I was proud to receive the Fellowship. That has been very meaningful."

"That is a big part of being in academia—being recognized by your peers. Having recognition like this is prestigious," he said.

Asked what advice he would give other Hispanic students who are aiming for a Ph.D., Carrillo concluded, "No matter what people tell me, I don’t get discouraged. A lot of people told me that this could not be done, but I kept going."

Michael J. McGuinness

Michael McGuinness received his Ph.D. in anthropology from Harvard University in 1997, having completed the final year of his degree with an Irene Diamond Fellowship. He had pursued his Ph.D. with a particular interest in Mexico and Latin America, and applied for funding from the Leadership Alliance so that he would be able to write his dissertation. "I don’t think I had any funding at that time. I was real worried," said McGuinness. "The Fellowship gave me time to sit down and put down the research I had done over the years, to push through the final years, which is crucial."

Although McGuinness is clearly an Irish surname, Michael McGuinness is Mexican-American. At the time of his adoption into an Irish-American family (at five days old), he was Michael Joseph Gonzales. "I was always asked why I was much darker than my sisters," he said. "I have always considered myself Mexican-American."

McGuinness graduated at the top of his class at Berkeley, where he studied anthropology. Beyond that, however, being Mexican-American afforded him fellowships that just being at the top of the class might not have provided. In 1990, he was awarded the Harvard University Prize Fellowship, which is designated for minorities and pays more than $100,000 over a six year period. "There have been enormous opportunities given to me, and I feel lucky," said McGuinness.

Being lucky for McGuinness has meant setting his sights on Mexico and Latin America, and studying the language and intricacies of their cultures. In many ways, he has had the opportunity to return to the land of his ancestors and include his passion for this second home in his studies. As part of his graduate work, McGuinness conducted fieldwork and studied Spanish in Mexico in 1992, and then worked as a visiting researcher on issues of NAFTA. "I had really gotten entrenched with international diplomacy and trade between the two countries," he said.

While undertaking his Ph.D., McGuinness also received a law degree from Stanford University. He returned to Mexico several times during the course of both his studies to learn about the effects of trade agreements between Mexico and the U.S. on labor in Mexico. He also looked at labor law enforcement issues and worked for the Ministry of Labor in 1996.

McGuinness dedicated his final year to writing his dissertation on labor inspection and enforcement in the workplace in Mexico and, with other funding running dry, was able to do so with support from the Irene Diamond Fund. Then, upon completing his Ph.D., he began working his "dream job" at Shearman & Sterling law firm, which, as McGuinness put it, "has the most dynamic Latin practice."

He is currently specializing in mergers and acquisitions with Latin American companies, banks, and shareholders. "I dedicated my research to Mexico and a large part of my practice to Mexico," said McGuinness.

"I would really like to be a small part of making the relationship between the United States and Mexico much better. I get to participate on the front line of development in Mexico. There is nothing I could do that is more productive," said McGuinness. "I hope that what I’ve done out there has corrected a lot of stereotypes about Mexico."

While McGuinness was offered the opportunity to work at Shearman & Sterling before completing his dissertation, receiving the Irene Diamond Fellowship helped him go all the way. "There were many reasons not to go on that final year, but I wanted to complete the work on Mexico." The Leadership Alliance, he said, "really did it for me. They pushed me through to the end."

Contemplating what he would have been like to complete a Ph.D. without all the financial assistance, McGuinness admits, "I don’t know how people do it. The fact that I had money all the way through was a huge help to me." He does, however, have one bit of advice that, along with the financial support, helped him through the rigors. "You have to choose something you are passionate about," he said. "It’s a bone-grinding process, but the fact that I was devoted kept me going. Believe me, there were many times I wanted to quit."

CEF Compares Stateside Controversy to Vieques

WASHINGTON, D.C.

The Citizens’ Educational Foundation (CEF)-US, which promotes self-determination for Puerto Rico, recently compared a naval controversy in the Maryland-Virginia area with the Vieques controversy. The Navy, it says, is trying to defend its use of 25 miles of the Potomac River, south of Dahlgren, Va., as a testing range for its long-range ammunition. Local residents in Cobb Island, Swan Point, and Woodland Point, Md., complain about high noise levels and allege structural damage to their homes as a result of the training.

CEF, with the Puerto Rican island of Vieques in mind, wonders: Will the residents of these communities be considered unpatriotic? Will members of Congress threaten them with budget cuts?

One of the solutions proposed in Puerto Rico was stripping Vieques from Puerto Rican jurisdiction and making it a separate territory. How would the residents of Charles County, Md., react if members of Congress proposed the same solution for their situation?

CEF calls the Vieques controversy a public relations nightmare, and expressed concern that it has created the perception that the nearly four million U.S. citizens of Puerto Rico are an unpatriotic bunch, overlooking Puerto Rican participation in this nation’s wars, which often was in higher numbers than those of certain states of the Union.

What differences are there, if any, asks CEF, in the way the Navy deals with the U.S. citizens of Cobb Island and the U.S. citizens of Vieques? CEF suspects the differences will be major. Unlike Puerto Rico, Maryland has long resolved its political status with the United States. Puerto Rico, as a territory of the U.S., does not have much of a voice in the national government. In Maryland, says CEF, the Navy has to answer to two senators and eight members of Congress. In Puerto Rico, who is the Navy accountable to?

The Foundation finds Puerto Rican citizens to be disenfranchised and says the island lacks the necessary sovereignty to resolve the problem.

Until Puerto Rico either becomes a state or an independent and sovereign republic, the U.S. will continue to struggle with situations such as Vieques, says CEF.

Western Cooperative Receives $1.5 Million Hewlett Grant

BOULDER, Colo.

The William and Flora Hewlett Foundation awarded a $1.5 million grant to the Western Cooperative for Educational Telecommunications (WCET) for the project “Developing the Tools, Policies, and Models Critical to the Electronic Delivery of Higher Education.” The goal of the three-year project is to develop specific tools that will help higher education institutions integrate online learning and the World Wide Web, aiding both teachers and learners. WCET is an international membership organization based at WICHE, the Western Interstate Commission for Higher Education.

Over the seven years since the Web emerged, it has become an integral part of college and university campus activities. More than 40 percent of all courses taught at public and private universities boast their own Web pages, according to the 2000 Campus Computing Survey, and the popularity of all-virtual courses is at an all-time high.

When the National Association for College Admission Counseling sponsored the first U.S. Virtual University Fair last fall, more than 5,000 students signed on—in the first 15 minutes. Virtual learning is not only popular but also necessary. The number of new and returning students is on the rise, while the rate at which public higher education is funded is not increasing to meet the demand in many states. To meet the needs of the greatest number of students, especially those who might be left out of the loop otherwise, online education is essential.

WCET is an international leader in helping states and institutions use new technologies to improve education. WCET is a part of WICHE, whose 15 member states work collaboratively to expand educational access and excellence for all citizens of the West.
Outstanding Women Complete Research and Degrees with AAUW Funding

WASHINGTON, D.C.

As the academic year ends, exceptional women scholars, teachers, and community activists are completing groundbreaking research, innovative projects, and advanced degrees with support from the American Association of University Women Educational Foundation. Of 270 women who received Foundation fellowships and grants in 2000-01, approximately 25 percent, not including international recipients, are women of color.

Among the highlights:

- **Researching a cure for sickle cell anemia:** Completing a medical degree at the University of California-San Francisco, Courtney Fitzhugh is researching a bone marrow transplant regimen to develop a safer treatment for patients with sickle cell anemia. Among many distinctions, Fitzhugh was one of the first two African American women to participate in a clinical research program for medical students at the National Institutes of Health in Bethesda, Md.
- **Discovering uncommon aspects of everyday speech:** Ordinary expressions such as “um,” “uh,” “you know,” and “I mean” take on new meaning in the original research of Jean Fox Tree, assistant professor of psychology at the University of California-Santa Cruz. Rather than consider them faulty interruptions in speech, Fox finds that these words serve several important functions: they can help listeners make sense of otherwise confusing speech; they can indicate that what is said is not exactly what is meant; or they can prompt the listener to help the speaker complete a thought.
- **Pursuing law to benefit women and children:** Completing joint degrees in law and social work at Washington University in Missouri, Lisa Villarreal-Rios has worked extensively for the rights of women and children. Villarreal was a research assistant with the Missouri Coalition Against Domestic Violence, and she is a citizen deputy juvenile officer at the St. Louis County Family Court. She has helped lawyers and parents construct parenting plans and mediate agreements, and she is dedicated to helping families on the service and policy levels.
- **Unearthing fresh insights into the African American slave experience:** Archaeologist Maria Franklin has used her postdoctoral fellowship year to complete a social and cultural history of the African American experience in Tidewater, Va., during the third quarter of the 18th century. Franklin, assistant professor of anthropology and African American studies at the University of Texas-Austin, examined the influences of race, culture, and gender on the development of African American identity. Her work also looks at the instrumental roles of women as leaders in both the public and domestic spheres.

ACE Reports Salary Increase for Bachelor's Degree Recipients

WASHINGTON, D.C.

A study from the Department of Education’s National Center for Education Statistics shows that the average salary of 1992-93 bachelor's degree recipients increased by nearly 25 percent between 1994 and 1997, according to the American Council on Education. These results are from a nationally representative sample of degree recipients who had not yet entered graduate school.

- Overall, the average full-time salary in 1994 was $26,464 (in 1997 dollars), and 
- $34,310 in 1997.
- Computer science graduates received the highest full-time salary increase between 1994 and 1997 with an increase of 31.2 percent. Next on the list was communications/journalism with 28.7 percent, engineering/architecture with 25.2 percent, business with 25.1 percent, and social work/protective services with 21.7 percent. The smallest increase was in the field of health/nursing with only 10.9 percent.
- In 1994, graduates in health fields other than nursing had the highest full-time salary at $35,515 (in 1997 dollars) per year. In 1997, however, computer science graduates took home the highest pay, with an average of $44,624 per year.
- Of the academic fields, mathematics/physical sciences had the highest 1994 full-time pay with $25,958 per year (in 1997 dollars). The lowest pay went to the graduates in the humanities/arts fields with $22,359 per year (in 1997 dollars). Graduates of the social sciences had the highest 1997 pay at $33,463 per year and biological/interdisciplinary sciences graduates received the lowest pay in 1997 at $28,760 per year.
- The biggest salary increase in the academic fields between 1994 and 1997 went to social science graduates, who saw their pay increase by 26.8 percent. The smallest increase went to graduates in biological/interdisciplinary sciences at 22.4 percent.
Spanish or English has isolated this group from other Latino groups in New York City. The conference provided information and tools necessary for a positive integration of Mexican immigrant families into the school system.

Panelists included Salvador Beltrán del Río, Consul General of Mexico in New York; UN Mexican Ambassador Jorge Eduardo Navarrete; Assemblyman Peter Rivera; Carmen Pérez-Hogan, New York DOE; Nilda Soto-Ruiz, NYC Board of Education; María de Gloria Marroni and María Leticia Rivermar, Benemérita Universidad Autónoma de Puebla, México; Angelo I. Amador, Mexican American Legal Defense and Educational Fund; and Thelma Estévez, New Rochelle Public Schools.

**Pacific Research Institute Examines Los Angeles School Spending**

The Pacific Research Institute for Public Policy, based in San Francisco, Calif., conducted a study surveying the spending of Los Angeles public and Catholic schools. The report revealed that Los Angeles public schools spend nearly double that of the city’s Catholic high schools and nearly triple that of its Catholic elementary schools, with Catholic schools having fewer dropouts and more graduates attending college than public schools, especially among low-income, Hispanic students.

**NYU Conference Addresses Education of Mexican Students**

New York University’s (NYU’s) Steinhardt School of Education held a conference featuring distinguished scholars, diplomats, legislative representatives, and policy analysts from New York and Mexico, addressing complex cultural and social issues affecting immigrant Mexican children. Conference coordinator and NYU Professor Regina Corina presented research she conducted on education issues affecting Latin American children.

“Social issues resulting from limited education, poverty, and lack of community organization are putting these children at risk,” said Corina, adding that many families speak and maintain indigenous non-Spanish languages of their native communities. The lack of formal education and inability to speak either minority students to pursue careers in nutrition science and dietetics.

“Increasing the diversity of the dietetics profession, paralleling the developments in our country that we see in the new Census figures, is a way in which ADA can tangibly improve the nutrition and health of our fellow citizens,” said ADA President Jane White.

To increase minority representation, the ADA program has established two goals: to help directors and faculty of accredited college dietetics education programs develop and implement mentoring in pre-professional programs; and to help ADA members create community outreach programs designed to interest elementary through high school students in careers in dietetics.

**Cal Poly Honors Classical Guitarist**

The California Polytechnic State University Guitar Ensemble, under the direction of Jesús Saiz-Huedo and visiting guitarist Claudio Tupiñambú of Spain (pictured), honored the 100th anniversary of the birth of guitarist and composer Joaquín Rodrigo. The event included lectures on Rodrigo and his guitar music, demonstrations of Rodrigo master-class pieces, guitar workshops, and recitals.

Rodrigo’s compositions for guitar have been a major force in stimulating popularity of the guitar and have inspired a new generation of guitarists, said Saiz-Huedo.

“His ‘Concierto de Aranjuez’ and his ‘Fantasia para un gentilhombre,’ both for guitar and orchestra, have become standards for all major orchestras and musts in the repertoire of every guitarist.”

Saiz-Huedo is a Cal Poly music department guitar instructor. Tupiñambú was born in Río de Janeiro, Brazil.

**CCNY Hosts Conference on Minority Doctoral Students**

The Center for Analysis of Structures and Interfaces at City College of New York hosted the conference “Underrepresented Minority Ph.D.s in
Engineering and Science: Recruitment and Retention" as part of the Alfred P. Sloan Foundation Symposium series. The conference provided Sloan Minority Program grant recipients with deeper insight into the current issues, challenges, and problems that affect minority graduate education; an opportunity to share ideas and solutions; and a chance to develop a national network for minorities interested in pursuing a doctorate in science or engineering.

At the conference, nationally recognized scientists, mathematicians, engineers, professionals, and leaders represented a diverse cross-section of people involved in technology. They discussed educational environments, recruitment and retention, leadership, preparation, and mentoring of minority students seeking doctorates in science and engineering.

**CU-Boulder Hosts Annual Latino Youth Conference**

More than 300 Latino, Chicano, and Black high school students from the Boulder Valley School District attended the fourth annual Latino Youth Conference at the University of Colorado-Boulder. The theme was "Juntos con Orgullo" (Together with Pride).

Keynote speakers Ramón del Castillo (pictured) and Warren Brown highlighted the life experiences of Chicano and Latino youth, through music, history, poetry, drama, and interactive exercises. Because their appeal crosses ethnic and racial lines, a special invitation was extended to local-area Black students.

The event, initiated by students from the Boulder Valley School District, serves as a meeting ground for Chicano and Latino youth seeking the opportunity to form friendships, develop leadership abilities, and encourage the pursuit of higher education.

**Latinas Collaborate for AAHE Report on Campus Incivility**

In an article in the *AAHE Bulletin*, published by the American Association of Higher Education, professors Virginia González (pictured l.) and Estela López (pictured r.) presented their findings on campus violence and incivility. González, professor of counseling and coordinator of special programs at Northampton Community College (Pa.), and López, provost and vice president for academic affairs at Northeastern Illinois University, collaborated on "The Age of Incivility: Countering Disruptive Behavior in the Classroom." They featured issues and strategies relevant to professors and administrators as well as student testimonies regarding disruptive behavior experienced in the classroom.

González and López discussed systematic campus policy on incivility and the importance of establishing behavioral standards.

**News from Alamo District**

In Texas, San Antonio College (SAC) held its first-ever technology exposition, with resounding success. More than 2,000 attended the event, held as part of SAC's 75th anniversary celebration. The exposition offered technology demonstrations, vendors, training workshops, campus seminars, tours, and speakers. It showcased the latest technology and featured speakers from major companies such as Dell Computers, Gateway, and Microsoft.

The Alamo Community College District (ACCD) board of trustees approved the selection of Carlos Ramírez, CPA, as the new vice chancellor for fiscal affairs, overseeing the districts $350 million budget, investments, and audits. Ramírez has served the District for the past 18 years as interim vice chancellor for fiscal affairs, interim investment officer, and District treasurer. Before coming to ACCD, Ramírez was a senior auditor with a local accounting firm. He also directed the San Antonio Business Resource Center and was controller for the Economic Opportunity Development Corporation. He earned a bachelor's degree from St. Mary's University.

**St. Edward's Announces Community-Based Initiative for Hispanics**

At St. Edward's University, leaders of the Austin, Texas, education community announced the launching of an innovative community-based initiative aimed at Hispanic students. Included were Dr. George E. Martin (pictured), St. Edward's president; Dr. Pat Forgione, Austin Independent School District superintendent; Dr. Richard Forte, Austin Community College president; Karin Dicks and Kevin Lyman; and representatives of the Austin Latino Alliance.

The initiative, called ENLACE, is designed to increase the success of Hispanic/Latino students in elementary, middle, and high schools, as well as college and beyond. It is the first time the area is placing Latino education at the center of a community-wide attempt to work across social, economic, and educational boundaries.

The Austin project has been granted $15 million of the $28 million earmarked for ENLACE projects in seven states by the W.K. Kellogg Foundation and the Houston Endowment.

**Citrus Holds 12th Annual Latino Youth Conference**

Citrus College (Calif.) welcomed more than 300 students to its 12th Annual Latino Youth Conference—focusing on the value of a college education and personal empowerment. Citrus offers the conference as a way for prospective Latino students to overcome barriers to higher education. This year's event featured workshops, a Latino art display, and live entertainment by an Inca band.

A conference highlight was the keynote address by Salvador Galván, a former California prison inmate who attended community college after his release. He transferred to the University of California-Los Angeles (UCLA), earning a bachelor's degree in sociology and a master's from the urban planning program at its School of Public Policy & Social Research.

Galván described how college raised his self-esteem and made him conscious of what to do with his life. He currently manages the YouthBuild program of the Venice Community Housing Corporation, offering construction job training, mobilizing at-risk youth to construct affordable housing, and helping them reconstruct their own lives.

**George Fox's “May Serve” Returns to Cuba and Jamaica**

A group of 20 George Fox University ( Ore.) students and leaders spent the month of May sharing their Christian faith with the people of Cuba and Jamaica during this year's "May
Serve" program. During the annual event, the team works with churches affiliated with the Friends United Meeting (FUM), an evangelical group doing work projects and church ministry, giving students the opportunity to experience life as a missionary.

The group, led by campus pastor Gregg Lamb and George Fox graduate Andrea Crenshaw, visited the Cuban town of Banes, in the northeastern province of Holguin. While staying with host families, group members helped paint and remodel a church building and led praise and church services.

The group traveled, too, to Highgate, a town in north central Jamaica, to work at FUM orphanages, helping the directors plan spiritual life programming and educational tutoring for the children. They also ministered in local schools and churches, using music and drama, and participated in work projects.

Washington Students Build Garden Center in Havana

Thirty-six University of Washington (UW) College of Architecture and Urban Planning students, along with a dozen Seattle artists and activists, traveled to Havana, Cuba, and constructed a 150-foot-long organic gardening center and community hall. Havana neighborhood volunteers helped the UW students (believed to be the first officially sanctioned American builders to work in post-revolutionary Cuba) build the red and blue hall called The Chief Seattle Social Club.

Cuba was the latest destination for UW's design-build program, considered a global leader in sending students to impoverished areas to turn their architectural visions into schools, clinics, libraries, and houses. The University has brought the design-build program to such deprived areas as central Mexico, the Pine Ridge Reservation in South Dakota, and farmworker encampments of Eastern Washington.

In Havana, students and local volunteers joined forces and converted a huge, old chicken coop into the new assembly hall and garden center. The group explored building techniques and materials suited to local climate and culture, which can be replicated in the future by local artisans.

Fordham Holds Annual Hispanic Ministry Conference

Fordham University (N.Y.) held its 10th Annual Metropolitan Hispanic Ministry Conference. Edward Cardinal Egan (picture), Archbishop of New York, delivered the invocation.

"The Hispanic Catholic Presence in the Culture of the United States" touched on topics such as the challenges of Latina Catholic women in the media industry, the influence of Spanish liturgical music on U.S. culture, and the Hispanic Catholic newspaper in church and society. The late Rev. Joseph Fitzpatrick, a former Fordham sociology professor, was honored during the conference.

Fordham's Graduate School of Religion and Religious Education, the Directors of Hispanic Ministry of New York, and the Northeast Dioceses hosted the event.

Cal State-Bakersfield Professor Speaks on Indigenous Mexicans

California State University-Bakersfield (CSUB) presented a forum led by CSUB sociology Professor Gonzalo Santos. During "Winning the War against Oblivion: An Eyewitness Account of the Historic Zapatista March to Mexico City," Santos related the Zapatistas' arrival in Mexico City and their subsequent appearance before the Mexican Congress. Discussing the possibility of a peaceful resolution to the seven-year Mayan insurrection in Chiapas, he said, "The rights of Mexico's 10 to 15 million indigenous people will eventually be protected under Mexico's constitution."

Santos, who chairs CSUB's Latin American Studies Committee, shared his experience as part of the CSUB history department's history forum.

North Texas Program Improves Child Literacy

The University of North Texas is helping preschoolers to read and getting parents more involved in their children's learning through HIPPY, the Home Improvement Program for Preschool Youngsters. HIPPY, which teaches parents to school and read to their children, has been found to improve children's literacy and willingness to learn. The program targets needy families based on income, education, and limited English proficiency.

In HIPPY, parents are trained through home visits, conducted by trained peers, to spend 30 to 30 minutes a day reading and completing learning activities with their children. Educational organizations and researchers have found a direct link between telling stories to young children and their success in reading and success on standardized tests.

"This program has made a big difference at our school," said Principal Kay Reynolds at Dobie Elementary in Richardson, Texas. "Teachers tell me they know a child has been in HIPPY because they are eager to learn and their parents are so involved."

Orfalea Family Donates $8.5 Million to City College of San Francisco

In California, Paul Orfalea, founder of Kinko's copy stores, and his wife, Natalie, are investing $8.5 million over the next 10 years in the child development programs at the City College of San Francisco (CCSF). This largest single gift in the college's history was announced at its 65th anniversary celebration. The money comes from the Orfalea Family Foundation, supporting and promoting early childhood education and training centers on university and college campuses.

"This is the most incredible gift we can have for the future of families in San Francisco," said Stephen Santos Rico, chair of the child development and family studies department. "This gift will allow us to provide parent education and will include a major annual community event with nationally recognized child development specialists, who will address the concerns of parents living in San Francisco."

The gift will be used exclusively for operating and program expenses for the 11 child development centers in San Francisco, for children of CCSF students and low-income families, and for parent education and training of caregivers.

CU-Boulder Law School Alumni Honored

The University of Colorado (CU)-Boulder School of Law honored Richard V. López at its 20th Annual Alumni Awards Banquet.

López, a 1989 graduate, is a member of the Colorado Hispanic Bar Association and was the 1995 CBBA Outstanding Young Lawyer of the Year. He
Currently is on the CU Fine Arts Gallery Advisory Board, the board of directors of the Dairy Center for the Performing Arts, and the Boulder Urban Renewal Authority.

Also honored at the event: Donald Bross ('75), Richard W. Dana ('66), Claudia J. Jordan ('80), Victor Quinn ('55), and David D. Wymore ('76).

Puerto Rico's Governor Keynotes NAHJ Scholarship Banquet

The National Association of Hispanic Journalists (NAHJ) welcomed Puerto Rico Gov. Sila María Calderón as keynote speaker of NAHJ's 12th Annual Scholarship Banquet. It was Calderón's first speech on the U.S. mainland since being elected Puerto Rico's first female governor last November.

The banquet served as a fundraiser for the NAHJ Rubén Salazar Scholarship Fund. Since the program's inception, NAHJ has awarded nearly a half-million dollars to nearly 400 students. This year's event grossed more than $200,000.

In addition to the keynote address by Calderón, who called on the U.S. Navy to stop its bombing on the island of Vieques, the audience was treated to a performance by the students of the Ballet Hispanico School of Dance and Latin singing star Luis Fonsi.

Madonna University Sponsors El Salvador Benefit Concert

Madonna University's (Mich.) office of multicultural affairs and El Comite Centro Americano sponsored a benefit concert for victims of the February earthquakes in El Salvador. Responsible for the event were Osvaldo Rivera (pictured), director of Madonna's office of multicultural affairs, and Ana María Ulloa, a Salvadoran-American from El Comite Centro Americano.

The concert featured entertainment by the renowned jazz band Straight Ahead, a one-man percussion/vocal show by Leonord King, César Peña's World Beat, Benny Cruz's La Buena Vida, and Orq. la Inspiración.

Iona Signs Partnership with Peruvian Management School

Iona College's (N.Y.) Hagan School of Business and the Universidad Peruana de Ciencias Aplicadas, the Peruvian University of Applied Science (UPC), Lima, Peru, announced an agreement enabling UPC students to finish their MBA studies at Iona and Hagan School professors to teach at UPC. Drs. Nicholas Beutell and Judson Shaver of Iona and David Fischman and Mariana Rodrigues of UPC signed the agreement.

"We are extremely excited about this new international partnership with UPC," said Beutell. "The Hagan School of Business and the globalization of the curriculum will be further enhanced by educating these visiting scholars from Peru."

In the agreement, UPC students complete the second year or final eight courses of their MBA program at Iona. Students must meet admission criteria outlined by the Hagan School of Business. Iona professors traveling to Peru will teach in the UPC program. They will receive an honorarium, air travel, and reimbursement for living expenses.

Capital One and HSF Initiate Scholarship Program

The Hispanic Scholarship Fund (HSF) announced a $100,000 contribution by Capitol One financial services, creating the Capitol One/HSF Program, which will award more than 30 new scholarships to students in Los Angeles, New York, Chicago, Houston, Dallas, Miami, Tampa, and Virginia.

"Capitol One and the Hispanic Scholarship Fund share a vision of empowerment through education," said José Niea, Capitol One's vice president of Hispanic market. "We both want these bright young people to have access to the best an education can provide."

HSF is one of the nation's largest and most prestigious Hispanic scholarship-granting organizations. A recent independent study found that 97 percent of all HSF scholars attain their college degrees.

News from UT-Austin

In an effort to establish a bi-national network of groups addressing the common needs of the United States and Mexican jurisdictions, The University of Texas (UT)-Austin hosted a symposium, initiating a dialogue between the two. Associate Justice of the Supreme Court Stephen G. Breyer and Mexican Supreme Court Minister Sergio Salvador Aguirre Angulo opened the conference, deepening the understanding of the two justice systems. More than 100 leading judges, scholars, legal practitioners, and media professionals from the U.S. and Mexico engaged in a series of panels, devising ways to strengthen the rule of law between the two countries and along their shared border.

Ambassadors Rubens Antonio Barbosa of Brazil and Guillermo Enrique González of Argentina were keynote speakers at a conference held during the University's Latin American Week. The conference topic "MERCOSUR/ECLAC. The Market & Beyond," dealt with several aspects of a trade zone in Latin America. Distinguished academics, political leaders, and journalists from the MERCOSOL countries (Argentina, Brazil, Paraguay, and Uruguay), the U.S., and Europe participated in the conference, examining the progress made thus far in the economic sphere as well as the social, political, and historical context of the trade zone agreement. The Teresa Lozano Long Institute of Latin American Studies sponsored the event.

Mexican Native Graduates Magna Cum Laude at Hunter

Gracelya Ramírez, a native of Mexico who came to the U.S. without any family and with no knowledge of English, lost everything in 1992—her job, apartment, and what seemed like her future—upon being wounded in a shooting and becoming a paraplegic at the age of 22.

Yet, that very year, she entered and won first prize in a Special Olympics weightlifting competition and, at the urging of her physical therapist, went on to compete in the 1993 New York City Marathon, which she has completed every year since.

Ramírez is purely a product of the City University of New York (CUNY). She first studied at Kingsborough Community College, later attended LaGuardia, and, after graduating in 1998, transferred to Hunter, where she recently graduated magna cum laude with a 3.8 GPA. She plans to apply to CUNY-Bernard M. Baruch College for a Master of Business Administration degree.
"I want to be productive, have my own job and my own place," said this remarkable woman. "I know I can do it."

University of New Mexico Hosts Acequia Roundtable

The University of New Mexico (UNM) Maxwell Museum of Anthropology hosted a roundtable discussion focusing on the acequia systems (irrigation ditch systems) of northern and central New Mexico. The roundtable featured community scholars, ditch rights owners (parcianos), acequia activists, and academic researchers who share a mutual interest in the history, workings, problems, and the future of New Mexico’s acequia systems.

Participating in the discussion were Josie Júján, archivist, historian, journalist, farmer, and acequia activist from Chimayo; Manuel Trujillo, mayordomo of the Acequia Porevenir in Chama, rancher, acequia activist, and former state legislator; José Rivera, UNM professor, member of the Corrales ditch system, and author of Acequia Culture; and Sylvia Rodríguez, UNM professor, parcianante on the San Antonio acequia in Valdez, and researcher of acequia traditions.

Miami University NEH Fellow Researches Cuban Writers in U.S.

Rodrigo Lazo, assistant professor of English at Miami University in Ohio, received a $35,000 National Endowment for the Humanities fellowship to study Cuban writers in the U.S. who, in the 19th century, tried to use the power of the pen to influence Cuba’s quest to break from Spain.

While publishing news articles, poetry, and fiction from the U.S., Cuban writers hoped to influence readers in Cuba to support revolutionary efforts, says Lazo. Some writers even allied with U.S. expansionists, advocating with other Cubans for annexing Cuba to the Union.

Lazo, who has presented papers on this topic and is working on a book, will analyze the efforts of many Cuban writers who saw themselves as freedom fighters actively engaged in Cuba’s fight for independence.

Cal State L.A.’s Pat Brown Institute Presents 20th Annual Awards

The Cal State-Los Angeles Pat Brown Institute of Public Affairs held its 20th Annual Awards Dinner. Among those honored: Miguel Contreras, executive secretary/treasurer, Los Angeles County Federation of Labor, Distinguished Community Partnership Award; Jackie Goldberg, member, California State Assembly, Distinguished Public Service Award; Frank J. Quevedo, vice president, Equal Opportunity, Southern California Edison, Exemplary Community Service Award; and John Burton, president pro tem, California Senate, Pat Brown Legacy Award.

Cal State L.A. President James M. Rosser described the honorees as "uniquely important and courageous individuals.'

Guatemalan Indigenous Leader Speaks at Texas-Austin

Rigoberto Quemé Chay, mayor of Quetzaltenango, Guatemala's second-largest city, and a prominent spokesperson for indigenous political engagement, gave a keynote address at the conference "Cultural Rights and Decentralization in Latin America" at The University of Texas-Austin.

The conference examined the convergence of two major developments across the Americas—cultural rights movements and decentralization. Although both of these processes have been subjects of extensive research and analysis, scholars rarely have examined the intersection of the two.

The first indigenous mayor to take office in the Guatemalan electoral system, Quemé Chay symbolizes the end of an era of exclusion and the beginning of an era of participation for indigenous people from Quetzaltenango and throughout Guatemala. Now in his second term as mayor, his skills as a negotiator and broad base of support have made him one of Guatemala's most important indigenous leaders.

SAMHSA Launches ¡Soyn Unica! ¡Soyn Latina! Campaign

SAMHSA

Local, state, and federal officials joined more than 2,000 Latinas at Mission High School in Mission, Texas, to unveil ¡Soyn Unica! ¡Soyn Latina! (I'm Unique! I'm Latin!), a new, bilingual public education campaign of the federal Substance Abuse and Mental Health Services Administration's (SAMHSA's) Center for Substance Abuse Prevention.

The campaign provides bilingual materials designed to help Latinas ages nine to 14, their mothers, and other caregivers build and enhance self-esteem, mental health, decision-making skills, and assertiveness, and to prevent the abuse of alcohol, tobacco, and illicit drugs. Campaign materials, designed with advice from Hispanic/Latino community leaders, promote positive self-image, self-esteem, and resiliency skills.

There are approximately seven million Hispanic/Latina girls under the age of 18 in the U.S. and Puerto Rico today. Current data show that Hispanic/Latina girls rank higher in rates of school dropout, pregnancy, depression, and suicide than any other racial or ethnic group in the U.S.

UNM Reading Event Gives Chicanas Voice

The University of New Mexico's (UNM's) Southwest Hispanic Research Institute sponsored an event around topics approached in two publications, Speaking Chicana: Voice, Power and Identity, D. Letícia Galindo and Maria Dolores Gonzales, eds., and Women's Tales from the New Mexico WHN: Las diabla a pie, Te Diana Rebollo and María Teresa Márquez, eds.

Gonzales spoke about language study and how women's language frequently has been noted as inferior to that of males. UNM law Professor Margaret Montoya spoke of her experiences as a Chicana in law school, relating them to topics in Speaking Chicana.

Rebollo, a UNM Spanish and Portuguese professor, and Márquez, a Center for Southwest Research librarian, described their efforts to compile and help preserve the texts of the women's original stories—from Las Placias, Santa Fe, and other New Mexico sites—that were included in Women's Tales.

Pictured (l. to r.): Márquez, Rebollo, Gonzales, and Montoya.

Curbside Writer Receives Honors

Luis J. Rodriguez received the Premio Fronterizo, honoring lifetime achievement in li-
erature, at the Border Book Festival; the Illinois Teachers of English Association gave Rodríguez the 2000 Illinois Author of the Year Award for contributing to Illinois literature; and he was one of 50 people from around the world designated as "Unsung Heroes of Compassion"—awarded by the Dalai Lama in San José, Calif.

Rodríguez's two books of poetry published by Curbside Press (Conn.), The Concrete River and Trochemoche, have become very popular in high school and university classes. Curbside's most recent publication by Rodríguez is his children's book América Is My Name (also published in Spanish, La llaman América).

**Publications**

**Poetry and Violence: The Ballad Tradition of Mexico's Costa Chica**  
By John H. McDowell

Does art that depicts violence generate more violence? Taking up a question that touches on contemporary developments such as gangsta rap and schoolyard shootings, John H. McDowell provides an in-depth study of a body of poetry that takes violence as its subject: the Mexican ballad form known as the corrido. Includes a 70-minute CD of corrido music taken from live performances in Costa Chica.

**Sandinista: Carlos Fonseca and the Nicaraguan Revolution**  
By Matilde Zimmermann

Sandinista is the first English-language biography of Carlos Fonseca Amador, the legendary leader of the Sandinista National Liberation Front of Nicaragua (FSLN) and perhaps the most important and influential figure of the post-1959 revolutionary generation in Latin America. It sheds new light on central themes in his ideology as well as on internal disputes, ideological shifts, and personalities of the FSLN.

**The Alphabet in My Hands: A Writing Life**  
By Marjorie Agosín

Imagine growing up Jewish in Chile, a predominately Catholic country. Now imagine what it is like to be driven from your country to live in America due to the overthrow of Salvador Allende by Augusto Pinochet. What would it be like to be a teenage Jewish Latina who barely spoke English in Athens, Ga.? In this memoir, Marjorie Agosín takes us on a personal journey of discovery that is as much internal reflection as it is an exodus across continents and time.

**Latent Destinies: Cultural Paranoia and Contemporary U.S. Narrative**  
By Patrick O'Donnell

This book examines the formation of postmodern sensibilities and their relationship to varieties of paranoia that have been seen as widespread in this century. Despite the fact that the Cold War has ended and the threat of nuclear annihilation has been dramatically lessened by most estimates, the paranoia that has characterized the period has not gone away. The author argues that paranoia on the broadly cultural level is essentially a narrative process in which history and postmodern identity are negotiated simultaneously.

**Noche Buena: Hispanic American Christmas Stories**  
Nicolás Kanellos, ed.

Christmas is a universal story, and many of the images here are recognizable across cultures. This book connects us with the rich traditions and legends specific to Hispanic culture, such as the celebration of the posadas for nine nights leading up to Christmas, with candy raining down from colorful swinging piñatas, eggshells filled with confetti, and beautiful paper lanterns crafted to illuminate the town on Christmas Eve.

**R&D, Education, and Productivity: A Retrospective**  
By Zvi Griliches

Zvi Griliches was a modern master of empirical economics. In this short book, he recounts what he and others have learned about the sources of economic growth, conveying how he viewed research problems. For Griliches, economic theorizing without measurement is merely the fashioning of parables, but measurement without theory is blind. Judgment enables one to strike the right balance.

**Colonial Lives: Documents on Latin American History, 1550-1850**  
Richard Boyer and Geoffrey Spurling, eds.

This book places in students' hands a collection of fascinating archival materials never before published in English. It offers a rich variety of documents that bring to life the social, political, and colonial experiences of Latin America.
economic workings of colonial Latin America during three centuries of European rule.

**The Ethnic Myth: Race, Ethnicity, and Class in America**

By Stephen Steinberg

Sociologist Stephen Steinberg rejects the prevailing view that cultural values and ethnic traits are the primary determinants of the economic destiny of racial and ethnic groups in America. He argues that locality, class conflict, selective migration, and historical and economic factors play a far larger role not only in producing inequalities but in maintaining them as well, thus providing an insightful explanation into why some groups are successful in their pursuit of the American dream and others are not. Introduction by Eric William Lott.

**The Bakke Case: Race, Education, and Affirmative Action**

By Howard Ball

Twice denied admission to a California medical school, despite better grades and test scores than successful minority applicants, Allan Bakke took his grievance all the way to the Supreme Court and set off a major controversy over affirmative action. Howard Ball examines the law and politics surrounding Bakke in an even-handed manner, presenting both sides of the debate and discussing key arguments presented by pressure groups.

**Gendered Compromises: Political Cultures & the State in Chile, 1920-1950**

By Karin Alejandra Rosenblatt

Karin Rosenblatt presents a gendered history of the politics and political compromise that emerged in Chile during the 1930s and 1940s, when reformist popular-front coalitions held power. While other scholars have focused on the economic realignments and novel political pacts that characterized Chilean politics during this era, Rosenblatt explores how gender helped shape Chile's evolving national identity.

**Chapters of Brazil's Colonial History, 1500-1800**

By João Capistrano de Abreu

In 1907, João Capistrano de Abreu offered a startlingly modern analysis of Brazil's past, based on the role of the economy, settlement, and the occupation of the interior. In these pages, he combines sharp portraits of dramatic events—close fought battles against Dutch occupation in the 1650s, Indian resistance to often brutal internal expansion—with insightful social history. Translated from Portuguese by Arthur Brakel. Preface by Fernando A Novaes. Introduction by Stuart Schwartz.

**Poor People's Politics: Peronist Survival Networks & the Legacy of Evita**

By Javier Auyero

"Political clientelism" is a term used to characterize the contemporary relationships between political elites and the poor in Latin America in which goods and services are traded for political favors. This book deploys the notion of clientelism to analyze the political practices of the Peronist Party among shantytown dwellers in contemporary Argentina.

**Women and Minority Faculty in the Academic Workplace: Recruitment, Retention, and Academic Culture**

By Adalberto Aguirre, Jr.

Despite their increased numbers, women and minority faculty remain underrepresented in higher education. This report compares and contrasts the workplace experiences of women, Latino, Black, Asian, and Native American faculty. Adalberto Aguirre examines the organizational features of the academic workplace and explores the challenges of professional socialization. ASHE-ERIC Higher Education Report Vol. 27, No. 6, Adriana J. Kezar, series editor.

**Handbook of Multicultural Assessment: Clinical, Psychological, and Educational Applications, 2nd ed.**

This newly revised edition of the best-selling handbook offers the most current information on multicultural assessment issues and applications of the most popular measures and assessment practices. Its focus is expanded to include updated articles from the original contributors and new chapters from other experts. Refer to this essential resource for innovative ideas for conducting assessments with minority populations.
Diversity Advisory Council Colloquium
September 14

The Kent State University Diversity Advisory Council presents a one-day colloquium, “A Country of Strangers: Blacks and Whites in America.” At KSU in Ashbula, Ohio.

Contact: Kelly Sanford, (440) 964-4217; e-mail, sanford@ashbula.kent.edu.

TeleLearning 2001
October 6-9

The International Telecommunications Council and The TeleLEARNING People will sponsor “TeleLearning 2001,” “the premier event in distance education and educational telecommunications.” At Hilton Hotel Costa Mesa, Costa Mesa, Calif.

Academic Advising Association National Conference
October 11-14

The 25th annual meeting for administrators, academic advisors, and faculty advisors has as its theme “Academic Advising: Discover the Many Voices.” Concurrent sessions will address all aspects of advising. At the Ottawa Congress Center, Ottawa, Canada.

Contact: NACADA Executive Office, (785) 532-5717; e-mail, nacada@ksu.edu; website, www.nacada.ksu.edu.

ACES 2001 Conference
October 13-20

“The nation’s most important national conference on diversity and improving minority participation in postsecondary education.” Sponsored by the American Council on Education's Division of Programs and Analysis, and the Office of Minorities in Higher Education. In Cincinnati, Ohio.

College Board National Forum 2001
October 26-30

This year’s College Board National Forum has as its theme “Measuring Success,” looking at the measures of “success for yourself, your school, your students.” At The Adam’s Mark Hotel in Denver, Colo.

HACU 15th Annual Conference, in Puerto Rico
October 27-30

The Hispanic Association of Colleges and Universities presents its 15th annual conference, this year on the theme “Excellence Through Diversity: Celebrating Our Past and Reshaping Our Future.” In San Juan, Puerto Rico.

Contact: (210) 576-3218; website, www.hacu.org.

WCET 13th Annual e-Learning Conference
October 31-November 3

FII Conference on Spanish and Latin American Literature
November 8-10

The Department of Modern Languages at Florida International University will hold the conference “Spanish and Latin American Literature: New Trends for a New Millennium.” At FIU in Miami, Fla.

Contact: Ricardo Castells, (305) 348-2130; e-mail, castells@fiu.edu.

TACHE 2001 Conference
December 2-4

The Texas Association of Chicano/Chicana Studies in Higher Education advocates for an increase in the number of Chicano/Latina faculty, staff, and administrators in Texas’ colleges and universities. This conference will serve as a venue for discussing the issue of underrepresentation and exploring ways of rectifying the disparity. At the Omni Hotel Downtown Austin, Texas.

**Book Reviews**

**By Mark Saad Saka**

In a passionate study of Chicano literature, Latino education, and media representation of Latinos in the United States, Marco Portales provides a provocative challenge for greater inclusion of Latinos into the American mainstream. He skillfully weaves his critique of the place of Latinos in American society with a review of such important Chicano authors as Américo Paredes, Sandra Cisneros, and Ana Castillo, as well as such noted media stars as Anthony Quinn.

Portales impresses upon the reader the almost total absence of positive images of Latinos in popular media. When Latinos do appear on the television or theater screen, it is often within the context of drive-by shootings, illegal immigration, or low educational attainments, or as a demographic brown wave of foreigners who are destined to upset the “precious cultural homogeneity” of lily white America. This “hit-and-run” media event fails to portray positive role models for Latino youth and works to destroy a positive self-image needed by our young people. For Latino youth, this is a devastating statement—you do not matter to America for you truly are not a part of the American mainstream. To discourage a major portion of our youth from excelling in education, sports, and business is to seriously undermine the viability of a democratic social order.

Portales further notes that if persons received all of their information from the popular media, they would never realize that the Society of Hispanic Professional Engineers consists of over 8,000 members or that the Hispanic National Bar Association boasts a membership of 22,000. Yet, he astutely points out that these figures represent a minuscule number when compared to the nearly 32 million Latinos in the United States. In this context, affirmative action should not be interpreted solely as a means by which to redress past injustices and structural underdevelopment but as a roadmap for our common future and shared destiny. The construction of positive role models in business and the professions is a matter of concern for all Americans.

But how can one expect the popular media to incorporate positive images of Latinos when the federal government itself fails to present Latinos as part of the American mainstream? Portales addresses the scandalous treatment of Latinos in America by the Smithsonian Institution, which had never collected Hispanic historical material and artifacts until 1994! This is a profound statement by the federal government that Latinos were never part of American history. The Smithsonian Institution represents a symbolic manifestation of our collective memory, yet to simply write off Latinos who had explored and settled the American southwest decades before the founding of Jamestown or Plymouth Rock is not only a national scandal, it is criminal. Is it any wonder that few Chicano youth embrace the study of American history as a lifelong passion?

An intriguing section of the book compares the historical evolution of Irish and Chicano literature and the reception given to them by mainstream academia. Both Irish and Chicano nationalist movements have in part defined themselves in opposition to the hegemonic cultures of the United States and Great Britain. He asks important questions, such as why legendary South Texas folk heroes like Juan Cortina haven’t been considered mainstream American heroes or part of the American literary tradition. Portales presents a series of ideas to enhance the visibility of Chicano literature, including a call for authors to expand Chicano literature to make it more reflective of broader American realities. As Chicano literature continues to evolve, it is imperative that Chicano authors assert their rightful position in mainstream American literature and history and not simply as an ethnic subculture, alienated and marginalized from the dominant Anglo tradition.

Portales is highly critical of our failed public school system, its administration, and those politicians who, decades after the Chicano movement’s call for greater inclusion in the educational mainstream, continue to view schools as a “holding tank” for Latino youth. This practice leaves young Latinos unprepared to fare well in a rapidly changing political economy and creates a structural impediment for social and economic advancement. He presents Chicano literature as a useful tool in the construction of a Chicano identity and as a means by which to address and prevent the scandalous rate of high school dropouts among Latino youth.

*Crowding Out Latinos* is a provocative clarion call for a national re-examination of Latino education, Chicano literature, and biased media representation of all Latinos. Marshaling a tremendous body of data and evidence to defend his thesis, this book will provide critical fuel and ammunition for those educators and social activists who seek to redress and remedy past injustices as well as chart a new course for our future.

---

Dr. Saka, an American of Arab ancestry and Fulbright scholar, has taught in the Department of History at Sul Ross State University, Alpine, Texas, since 1995.
By Jorge Iber

One significant result of the Chicano Movement was the increased number of Mexican American men and women entering graduate school for historical study during the 1970s. Throughout the West and Southwest, individuals such as Mario García, Richard García, Arnoldo De Leon, Albert Camarillo, and Richard Griswold del Castillo honed their skills and, by the early 1980s, generated monographs that told Mexican American history from a different perspective.

Their work enumerated the complexity, struggles, and joys of barrio life in Texas and California and inspired others to seek out stories of barrios elsewhere. By the late 1980s, a new generation of writers—such as David Montejano, David Gutiérrez, George J. Sánchez, Juan García, Vicki L. Ruiz, and Camille Guerin-Gonzalez—expanded on earlier studies, probing neglected locales and issues.

Such path-breaking research might not have been possible if not for the courage, tenacity, dedication, and production of a University of Texas librarian and historian almost forgotten outside his home state—Carlos Eduardo Castañeda. In an impressive new biography, Felix D. Almaraz, Jr., recounts the life and impact of a scholar who broke down barriers for Spanish-surnamed academicians and detailed the Spanish/Mexican contribution to the history of Texas through his masterful seven-volume work, *Our Catholic Heritage in Texas*, 1899-1936.

The first six chapters focus on the familial, religious, social, and academic forces that shaped Castañeda into a scholar, social activist, and devoted Catholic. The young Carlos Eduardo, whose father was a teacher, learned responsibility and diligence at an early age. By 1911, both parents had died, and the young man became responsible for supporting the family, working as a clerk for a local grocer, earning about three dollars per week. Desperate economic circumstances were compounded by the bigotry he faced at Brownsville High School. He persevered, graduating as valedictorian of his class, and then, in 1917, entered the University of Texas, one of a handful of Mexican Americans on the Austin campus.

Taking his B.A. in 1921, Castañeda taught high school in San Antonio for a year, then began graduate study. During the '20s, he traveled throughout Mexico, uncovered a multitude of documents, and helped procure many for the University, forming the basis for its famous Benson Collection. After earning his Ph.D. in 1932, his efforts led to a post as a librarian with the University. His success raised the ire of some in the library who resented having a "Mexican" in charge of a collection that housed valuable documents of Texan history. After having his salary cut, he took a job as superintendent of the Del Rio public schools, a position kept until 1935.

The work's final seven chapters examine Castañeda's struggle to complete his masterpiece while juggling an ambitious schedule of writing, teaching, family life, and social activism. During his last 20 years, he worked at many activities to help improve life for Spanish-speaking people in the U.S. He worked with the School Improvement League for better schools on the West Side of San Antonio and was regional director of the Tex Employment Practices Committee during the mid-'40s. Many graduate students he encouraged at UT became important historians of the border regions (Joe B. Frantz, for one). Finally, Castañeda encouraged Mexican American students who faced daunting obstacles: racism and bigotry from classmates at the University. All of these tasks were concurrent with work on the final volumes of *Our Catholic Heritage*.

Almaraz's tome does much justice to a forgotten giant of the field, but it has a few flaws. In the preface, he should have spent more time tying this biography to the broader scope of Mexican American historical literature, in particular, discussing the significance of biography to Mexican American history, given the paucity of such works in the past (although this is now being rectified with fine works by Mario García, J. Gilbert Quezada, and others). In addition, the discussion in Chapter One of the foundation of Castañeda's Catholic faith is quickly glossed over. Given that Castañeda's religious beliefs played such a consequential part in his personal and professional life, the author leaves the genesis of those convictions relatively unexplored.

Even with these minor faults, this is a worthwhile and significant work. While the heroic men and women of the Chicano Movement helped open up opportunities for educational advancement for Mexican Americans throughout the U.S., they were not the first Spanish-speaking people to fight for their right to participate in university life and in the production of history. Individuals such as Castañeda pioneered the struggle five decades before the cries of "Brown Power." It is just to give such individuals the credit they deserve. Felix Almaraz's fine biography of Castañeda is a step in the right direction.

Dr. Jorge Iber is a Mexican American specialist whose areas of interest include minority participation in sport and entrepreneurship in Texas and elsewhere. An American of Cuban descent, he has taught at Texas Tech University since his graduation from the University of Utah in 1997.

Endowed Professorship in Anti-Violence
Mandel School of Applied Social Sciences

The Mandel School of Applied Social Sciences (MSASS), Case Western Reserve University, is soliciting applications for the Dr. Sem J. and Ruth W. Begun Professor in anti-violence. The position involves primary responsibility for leading the newly established Begun Center for Violence Prevention, Research and Education, with secondary responsibility for teaching and service in the Master’s and Doctoral programs. The goals of the Begun Center include: (1) forming interdisciplinary academic partnerships to research and analyze the causes and effects of violent behavior; (2) combining advanced research methods and state-of-the-art technology to create a system of identifying “at-risk” populations; (3) establishing active networks among parents, educators and key community constituencies so as to effectively intervene in the cycle of violence; and (4) building on existing interventions and curricula that address the persistent and emerging social stressors associated with youth violence. The Professorship will be co-terminus with the Directorship of the Begun Center.

Requirements will include a M.D. or Ph.D. in Social Work, Public Policy, Psychology, Criminology, Anthropology, or a related science. The Director will lead and manage all Center activities, including research, training, advocacy, and technical assistance. The Director must be considered an expert in the field of violence prevention and have made significant contributions to scholarly literature. As such, candidates should possess a record of scholarship, teaching, and service for a tenure track or tenured appointment at the School. The Director will be responsible for securing ongoing funding for the center’s programs and initiatives. The ideal candidate must also have a firm understanding of the funding community and be able to identify new opportunities.

The Mandel School of Applied Social Sciences currently offers Master’s and Doctoral degrees to over 300 students. We offer joint degrees in Social Work and Law, Social Work and Nonprofit Management and Social Work and Business. MSASS faculty is multidisciplinary representing professions such as social work, psychology, sociology, public health and economics. A number of MSASS faculty hold secondary appointments with other departments and faculty have collaborative projects with other departments. The School has a long history community based/agency based research with the centers and institutes having major roles in these initiatives, such as the Center on Urban Poverty and Social Change, and the Cuyahoga County Community Mental Health Institute.

Applicants must submit a curriculum vita and five references. Please send applications or nominations to:

AA/EOE

PROGRAM COORDINATOR

The University of Medicine and Dentistry of New Jersey - University Behavioral HealthCare seeks a Program Coordinator. Under the direction of the Director of the Medical Education Program, the Coordinator will coordinate program logistics and provide support to the Program Director. The Coordinator will work closely with the administrative staff of the UBD College of Medicine to ensure smooth operation of the program.

Excellent communication skills, organized, strong attention to detail, and the ability to work independently and as part of a team are essential.

To learn more about us, visit our website: http://www.umdnj.edu/hrweb/

To apply, visit our website: www.umdjobs.com. To learn more about UMDNJ, visit our website: http://www.umdnj.edu/hrweb/

COMPENSATION: Commensurate with experience. The University provides an excellent benefits package including, retirement, medical and life insurance, vacation, sick leave, holidays, reduced summer hours, and individual and dependent tuition benefits.

APPLICATION DEADLINE: Review of applications will begin August 5, 2001, and will continue until the position is filled. Applications are invited from individuals who can be hired as soon as possible.

University of Southern California invites nominations and applications for the position of Provost for Enrollment Management and Dean of Admission and Financial Aid. This is an exciting opportunity for a professional with experience in institutional administration to join one of the country's premier research universities. The Provost serves as the University’s chief officer for enrollment management, financial aid, marketing and publications for all undergraduate and graduate programs as well as the Vice Provost for Financial Aid and is a significant member of the Provost's executive team.

The University of Southern California (USC), founded in 1880, is the oldest private research university in the Western United States, and one of the largest private universities in the country. USC has grown into an international center of learning, enrolling more than 28,000 undergraduate and graduate students on two campuses and offering degrees through its College of Letters, Arts, and Sciences, Graduate School of Fine Arts, and 16 professional schools.

Nominated for the Five-Year Award by Time Magazine/Princeton Review, USC is well positioned within American higher education - continuing its heritage of geographic and disciplinary diversity, Division I athletics, and special commitments to community service. The distinguished educational experience at USC arises from its central mission of cultivating the mind and spirit. The urban community surrounding USC has become an integral part of the college experience through one of the most ambitious social outreach programs of any university in the nation.

Qualifications: The University seeks a committed individual to build on the successful tenure of the late Joe Allan. The successful candidate must demonstrate effective strategic and analytical thinking and planning skills; experience providing leadership and management across diverse functional areas; expertise in facilitating negotiation and change, ability to serve as an articulate spokesperson for the mission and values of USC; knowledge of academic programs and marketing; and substantial admission and financial aid experience in higher education. USC has one of the few "paperless" admission offices using state of the art technology for all aspects of admission and financial aid. It will be critical to maintain this system at the current "best practices" level it has attained. B.A./B.S required; advanced degree preferred; substantial senior administrative experience working in a complex environment essential.

Application Procedure: Please send nominations and applications (cover letter, curriculum vitae, and references) to: Auerbach Associates/USC, 65 Franklin Street, Suite 400, Boston, MA 02110, Fax: (617) 451-5199, Email: liz@auerbach-assoc.com. Review of applications and nominations will begin immediately and will continue until the position is filled. UMDNJ is an EEO/AA institution and is committed to providing equal opportunity for outstanding men and women. USC actively seeks nominations and applications from qualified individuals from the broadest possible community (AA/EOE). Please see wwww.usc.edu for additional information about the University of Southern California.

Primary Responsibilities
- Provides leadership in the development and implementation of effective strategies to attract, enroll and retain new students
- The director serves as the advisor of the office of Admissions, ensuring that resources and support are made available to deliver quality services to students, faculty, staff, and external constituencies and that the unit functions in a manner consistent with the missions of the University
- Supervises staff, manages budgets, serves as a resource for prospective and returning students, faculty, staff, alumni, and administrators in the areas of new student recruitment/marketing programs and strategies, college preparation and pre-collegiate counseling/advising, the University admissions requirements and application processing
- The director also serves on the University Board of Governors, the Enrollment Management Team
- The Director reports directly to the Vice President for Administration and Enrollment Management

Required Qualifications
- Master’s degree
- The ability to work in a collaborative environment with both internal and external University constituents
- Excellent communication skills, problem-solving abilities, and organizational skills
- Progressive responsible leadership positions in a higher education environment
- A sustained record of achievement in new student recruitment
- Strong leadership, team-building, management, supervisory and fiscal management skills
- A comprehensive vision for the office of admissions
- Ability to articulate experience with emerging technologies to support recruitment
- Experience with data collection and analysis
- Demonstrated understanding of and strong commitment to customer service orientation
- Demonstrated awareness of issues affecting women and minorities and history of working with multicultural populations

Preferred Qualification
- Demonstrated professional activity (e.g., publications, presentations, involvement or membership in professional organizations, etc.) in higher education, enrollment management, admissions, or student recruitment
- Demonstrated understanding of a seamless admissions process
- Demonstrated understanding of characteristics and challenges of regional comprehensive institutions

Compensation: Commensurate with experience. The University provides an excellent benefits package including, retirement, medical and life insurance, vacation, sick leave, holidays, reduced summer hours, and individual and dependent tuition benefits.

Application Deadline: Review of applications will begin August 5, 2001, and will continue until the position is filled. To apply, send a letter of interest addressing all position requirements, a current resume, and the names and telephone numbers of three professional references to Debbi Cecile Robinson, Assistant Director, Human Resources, Southeast Missouri State University, One University Plaza, Cape Girardeau, MO 63901.

To learn more about us, visit our website: http://www.umdnj.edu/hrweb/
The newly established Department of Communication invites applications for a tenure track position, at the Assistant Professor level, to begin January or August of 2002. All specializations are welcome, as we seek an individual as committed to building a leading communication program as she or he is to teaching and research in his or her specific area of interest. Responsibilities include planning and implementing an exciting, integrated human and mass communication curriculum, developing and teaching courses in the candidate's area of specialization; and, teaching communication theory and the introductory communication course.

Qualifications: PhD in Communication, teaching experience, and strong evidence of program building and research potential.

Candidates who wish to be considered for a preliminary interview at NCA should have completed applications in by October 25, 2001. Review of applications will continue until the position is filled. To apply, submit a letter of application that describes your ideas on or approaches to building a new communication department and how your teaching and research interests might further that process, a curriculum vitae, and the names and phones numbers of three references to Human Resources Office, Job # 174, Bryant College, 1130 Douglas Pike, Smithfield, RI 02917. Inquiries should be made to Stanley Baran at sbaran@bryant.edu.

Bryant College enrolls approximately 3,500 undergraduate and graduate students. Bryant is located 15 minutes from Providence and one hour from Boston. Bryant College is an Equal Opportunity/Affirmative Action Employer. The department and the college are dedicated to diversifying its faculty. Individuals from underrepresented groups are strongly encouraged to apply. Bryant College offers a competitive salary and benefits package.

**Team Leader Of Continuous Improvement**

Northcentral Technical College (NTC) is a long-established innovator and leader in quality career preparation programs. A notable position exists for a professional whose proven abilities in applying continuous improvement methodologies, research and planning methodology, and strategic planning, together with knowledge of alternative funding sources and keen perception of issues relevant to diversity and globalization. Reflect the capacity to undertake responsibility for the College's continuous improvement and attainment of its mission and goals.

We'll rely on you to ensure the quality of data on district wide matters and appropriateness of statistical analysis, and propose and research institutional indicators of health, benchmarks and best practices. AZARONA STATE UNIVERSITY WEST

An Equal Opportunity/Affirmative Action employer in policy and practice.

The George L. Grazadio School of Business and Management of Pepperdine University is seeking faculty for several positions, effective September 1, 2002. Degree programs of the School are offered at Pepperdine University’s main campus in Malibu overlooking the Pacific Ocean, five education centers in Southern California, and Santa Clara in Northern California. The School offers seven master’s degree programs and one bachelor’s degree program. Faculty may teach in more than one program and interact with diverse students, including fully employed, executive, and full-time residential students.

We are accepting applications for tenure-track positions in the following disciplines:
- Accounting Information Systems
- Business Law
- Decision Sciences/Information Systems
- Finance
- Organization Behavior
- Strategy
- Technology Management

Successful candidates will have a terminal degree in the discipline in which they will teach, demonstrated scholarly capabilities, and strong teaching ability. Positions are ranked from assistant professor to professor, rank, salary, and benefits are commensurate with experience.

We will be represented at the following conferences:
- a) Academy of Management (Washington, DC; August 3-8)
- b) American Accounting Association (Atlanta, GA; August 2-15)
- c) Financial Management Association (Toronto, Canada, October 17-20)

Pepperdine University is an Equal Opportunity Employer and does not unlawfully discriminate on the basis of any status or condition protected by applicable federal or state law. Pepperdine is religiously affiliated with the Churches of Christ. It is the purpose of Pepperdine to pursue the very highest employment and academic standards within a context, which celebrates and extends the spiritual and ethical ideals of the Christian faith. While students, faculty, staff, and members of the Board of Regents represent many religious backgrounds, Pepperdine reserves the right to seek, hire, and promote persons who support the goals and mission of the institution, including the right to prefer co-religionists.

To apply, please send a curriculum vitae, and the names, addresses, and telephone numbers of three references postmarked by October 26, 2001, to:

Dr. Peggy Crawford, Associate Dean
Academic Affairs
Pepperdine University
The George L. Grazadio School of Business and Management
400 Corporate Pointe
Culver City, CA 90230

ARIZONA STATE UNIVERSITY WEST

COLLEGE OF HUMAN SERVICES

DEPARTMENT OF SOCIAL WORK

FULL PROFESSOR

Arizona State University West, a vital component of ASU's multi-campus structure, serves more than 5,000 undergraduate and graduate students at its modern, growing campus in Phoenix, one of the country's most dynamic multi-cultural and economic environments. ASU West is an urban, commuter campus with a focus on learner-centered education. The University is committed to a balance of research and teaching, faculty-student research collaboration, interdisciplinary perspectives, and the development of University-community partnerships. ASU West is dedicated to increasing the diversity of its campus community, and encouraging an environment that offers students knowledge about local, national and global communities.

ESSENTIAL FUNCTIONS:

WCSU is an AA/EOC Educator/Employer.
Registrar
Search Extended

The position's primary functions are to administer campus student registration and records processes and participate in student information system design and implementation. The Registrar reports to the Director of Admissions and Records in the Division of Student Affairs.

Duties and responsibilities include: planning, developing, and implementing registration and records processes; developing and implementing policies and procedures; providing leadership for design and implementation of the student information system; serving on new registration and records system related policies; coordinating activities with campus and university academic and administrative units; serving on campus and university committees; and supervising registration and records staff.

Minimum qualifications: Master's degree, doctoral degree preferred; five years experience in registration and records area; student information system management skills; experience with SCT Banner system preferred; and supervisory and budget experience. Experience in research and data analysis is preferred.

Located in the state capital, the University of Illinois at Springfield is one of three campuses of the University of Illinois. The UIS campus serves approximately 4,000 students in 19 graduate and 20 undergraduate programs. The academic curriculum of the campus emphasizes a strong liberal arts core, an array of professional programs, extensive opportunities in experiential education, and a broad engagement in public affairs issues of the day. The campus offers many small classes, substantial student-faculty interaction, and a technology enhanced learning environment. Its diverse student body includes traditional, non-traditional, and international students. Its faculty are committed teachers, active scholars, and professionals in service to society.

Applications and nominations should be sent to:
Chair, Registrar Search Committee
Office of the Vice Chancellor for Student Affairs
SAB 23
University of Illinois at Springfield
P.O. Box 19243
Springfield, IL 62794-9243

Applications should include a resume, a discussion of the candidate's academic and administrative accomplishments and interests in the position, and the names, addresses, and telephone numbers of five references. Applications will be screened ongoing until an appointment is made. The anticipated start date for the appointment is as soon as possible. Salary commensurate with experience and qualifications. For more information about the University of Illinois at Springfield, visit our web site at www.uis.edu.

The University of Illinois is an affirmative action/equal opportunity employer. Persons with disabilities, women and minorities are encouraged to apply.
Position Announcement

Western Illinois University
MACOMB, ILLINOIS

DIRECTOR OF PHYSICAL PLANT

Western Illinois University seeks nominations and applications for the position of Director of Physical Plant. A public residential university with over 13,000 undergraduate and graduate students, Western's campus consists of 78 buildings located on 1587 acres with 4.4 million of gross square feet maintained. The University is located in Macomb, a community of 20,000 in west central Illinois.

This position reports to the Vice President for Administrative Services and serves as the chief facilities and operations officer of the University. The director provides leadership to 305 personnel and directs all work associated in the areas of facilities planning and design, facilities operations and maintenance, grounds, heating plant, utilities, campus master planning, and project program development. This position is also responsible for the University's renovation and capital construction program, annual capital budget planning, long-term capital projects, energy management initiatives, and administration of a $19.5 million budget. Leadership is being sought that focuses on continual development of campus landscape beautification and architectural building completeness to provide a physical environment conducive to teaching, learning, conducting research, and work.

Vice President for Administrative Services
Western Illinois University
Sherman Hall 200
Macomb, IL 61455

Anticipated start date is December, 2001, or as negotiated. Salary is competitive based on experience and qualifications. Western Illinois University is an AA/EO employer and has a strong institutional commitment to diversity. In that spirit, we are particularly interested in receiving applications from a broad spectrum of people, including women, minorities, and persons with disabilities.

California State Polytechnic University, Pomona

ASSOCIATE VICE PRESIDENT FOR INSTRUCTIONAL TECHNOLOGY AND ACADEMIC COMPUTING

The Associate Vice President for Instructional Technology and Academic Computing reports to the Vice President for Instructional and Information Technology. The AVP is responsible for the leadership and administration of the Department of Instructional Technology and Academic Computing (ITAC). ITAC has approximately 30 full-time employees and about 100 student workers. The AVP is responsible for developing a vision for effective and efficient use of ITAC's resources to support teaching and learning, and to work together with ITAC staff to carry out this vision. The AVP will work closely with faculty and other learning leadership on campus to assure that ITAC's direction is consistent with the academic mission of the university.

The AVP must be an excellent manager of the financial and human resources of the department, and will also be expected to develop external resources in support of ITAC's mission. Candidates with appropriate background and experience may be considered for return teaching rights as a faculty member in one of the university's academic departments. The University seeks to fill this position by January 1, 2002, or at a mutually agreeable date. Salary is commensurate with qualifications and experience. The position includes a very attractive benefits package. First consideration will be given to completed applications received no later than September 10, 2001, and continue until the position is filled. Early response is encouraged. To request additional information, please contact the following: Search Committee, Associate Vice President for Instructional Technology and Academic Computing, c/o A. Michael Berman, Vice President for Instructional and Information Technology, California State Polytechnic University, Pomona, 3801 W. Temple Avenue, Pomona, CA 91768. Requests and questions can also be addressed to the Search Coordinator JoAnn Kans via the following: e-mail jmkars@csupomona.edu; or phone (909) 869-3411; or fax (909) 869-4666. The complete job description is available at http://www.csupomona.edu/it/itsearch/

California State Polytechnic University, Pomona is an AA/EOE.
Walden University

VICE PRESIDENT FOR ACADEMIC AFFAIRS

Walden University invites applications and nominations for the position of Vice President for Academic Affairs.

Founded in 1970 and accredited by the North Central Association of Schools and Colleges since 1990, Walden is a private, for-profit business unit of Walden eLearning, Inc. and the pioneer in the field of innovating alternative pathways to graduate degrees. It enjoys the reputation of being the leading graduate, distributed learning institution in the country.

The University offers the Doctor of Philosophy degree in five fields: Management, Education, Health Services, Human Services, and Psychology. The M.S. degree is offered in Education, Public Health and Psychology. Pending approval from the accrediting agency, the MBA, NPA, and PhD in Public Policy will be added in the 2001-2002 academic year. Current enrollment exceeds 1700 students, of which 37% are from minority populations and over 50% are women. The faculty numbers more than 220, 19% of whom are from populations traditionally underrepresented in their disciplines and fields. Students and faculty represent all 50 states and more than 20 foreign countries.

The University offers the majority of its programs in a "high tech-high touch" virtual environment, capitalizing on recent advances in information technology. Doctoral programs use both course-based and competency-based curricula, and instruction, assessment, mentoring, and the delivery of student services rely extensively on the Internet. While Walden M.S. programs are Web-based and for the most part entirely online, its doctoral programs do require students to fulfill academic residency requirements that are designed to meet students' needs.

The Vice President for Academic Affairs is a chief officer of the University and reports directly to the President. The position is located in the University's Office of Academic Affairs in Minneapolis, Minnesota; the individual filling this position will be expected to work closely with the University's financial services and student enrollment units that are located in Walden's Bonita Springs, Florida offices.

The ideal candidate will be committed to the values and norms that characterize high quality graduate education, be conversant in current best practices in adult learning, have had experience in distance learning programs, have demonstrated a capability and high level of comfort in computer-mediated communications, and be comfortable and productive in an entrepreneurial environment characterized by an aggressive growth plan.

This is a unique opportunity for a creative and accomplished graduate-level administrator to lead the further improvement, development, and growth in the country’s most innovative, accessible, and entrepreneurial graduate institution. The University's commitment to quality, integrity, and student-centeredness, its highly-focused niche in graduate and professional education, its innovative organizational structure, and its dual strategies of forging effective strategic partnerships and competing successfully in the post-Bicentennial marketplace will provide the successful candidate with an unprecedented opportunity to make a positive and significant contribution to the changing nature of American higher education.

The compensation for this position is highly competitive and includes a generous fringe and benefits package. The position is currently available and the effective date of appointment is immediate upon employment. The screening committee will begin reviewing completed applications immediately, and will continue until an appointment is made. Applications must include a letter of interest detailing qualifications for the position, a formal Curriculum Vitae, and the names and contact points for at least three professional references; references will not be contacted without the prior permission of the candidate. Interested applicants are invited to view the detailed position description on the Walden website at www.waldenu.edu

Applications in their entirety will be accepted only by e-mail at: cmillspr@waldenu.edu

The University especially welcomes applications and inquiries from women and minorities.

Del Mar College

Presidential Search

Del Mar College is a two-year comprehensive community college with two campuses in Corpus Christi, Texas. The College has approximately 10,000 credit students per semester and a total of 25,000 students each year enrolled in academic, occupational, and continuing education programs. Corpus Christi is located on the Gulf of Mexico approximately 135 miles southeast of San Antonio. Its diverse population, which includes a large Hispanic component, exceeds 292,000.

Assistant Director of Colorado Institute for Technology Transfer and Implementation (CITTI) Position Announcement

CITTI was established in 1991 through a grant from the El Pomar Foundation, which was matched by the University of Colorado at Colorado Springs. The grant endowed three prestigious chairs in the College of Business and Engineering, and established the CITTI office. CITTI’s mission is to support economic development by providing technology-centered enterprises with access to capital and business information, with an emphasis on sectors recognized as critical to the regional economy. CITTI serves as a bridge between the intellectual resources of the University, the three El Pomar Chairs, and the high-tech community.

The Associate Director reports to the Director of CITTI and supports the activities of the three El Pomar Chairs. The Associate Director works closely with other campus entities most importantly with specialized Centers in the Colleges of Business and Engineering. The Associate Director will also manage the outreach and conference activities of CITTI.

Job Responsibilities:

1. Assist the Director with management of CITTI, supervising staff and connecting day-to-day activities and projects of the three El Pomar Chairs and the Advisory Board.
2. Develop an understanding of CITTI clients and their needs. Assist in identifying the most critical issues which have the greatest impact on constituents and suggest the appropriate solutions to these issues.
3. Assist with community outreach: programs, collaborating with faculty staff, and students to provide services to the high-tech community.
4. Strengthen partnerships with other Colorado Springs business organizations to achieve economic development goals for the community.
5. Provide linkages through personal networks to develop conferences and research projects with national and international visibility.
6. Creatively manage the budget through programming, relationships, grants, and services.

Required Qualifications:

- Earned bachelors degree from an accredited institution, preferably in business, public policy, communications or a related field.
- Two to four years experience operating successfully in complex organizations with high visibility in the community.
- Demonstrated capability to organize and manage academic conferences.
- Proven ability to edit academic papers for publication.
- Excellent communication and organization skills.
- Ability to represent CITTI at conferences and workshops.

Preferred Qualifications:

- Graduate Degree preferably in business, communications, public policy, or a related field.
- Demonstrated experience with business/engineering/International issues involved in technology transfers.
- Significant success in writing and securing grants.
- Experience in working in a university environment.

Starting salary: $50,000 - $60,000 plus University benefits for a continuing 12-month appointment. Applications will be received beginning August 20, 2001 and will continue until the position is filled. Anticipated starting date is September 15, 2001. Send resume and cover letter to:

Attn: Sue Carrillo, Office of the Dean, College of Business and Administration, University of Colorado at Colorado Springs, 1620 Austin Bluffs Parkway, Box 715, Colorado Springs, CO 80935-7150.

The University of Colorado is an affirmative action/equal opportunity employer and encourages a diversity of applicants.
DIRECTOR OF CAREER AND ALUMNI SERVICES

The Maxwell School of Syracuse University invites applications and nominations for a Director of Career and Alumni Services. The Director provides leadership for the School’s Career and Alumni Services Office, manages a three-person staff, and serves as a member of the leadership team that is responsible for the School’s total external relations effort. In addition, the Director is a member of the University’s Career Coordinating Committee, collaborates with the Career Services Network, and travels regularly to represent the School to employers and professional associations.

The Career and Alumni Services Office is responsible for individual graduate career counseling and group professional development activities, leading to appropriate job placements in the public, non-profit and related private sectors. The Office serves students in professional master’s programs in public administration and international relations as well as graduate students in other social science programs throughout the School. The Office also organizes and supports numerous alumni programs and activities across the country. Maxwell has two formal alumni associations, in the District of Columbia and New York City, and a growing number of informal networking groups in other major metropolitan areas including Central New York.

Founded in 1924, Maxwell is a comprehensive school dedicated to professional training in public and international affairs and to teaching and scholarship across the full range of social sciences at both the graduate and undergraduate levels. The School is home to the nation’s top-ranked and oldest graduate program in public administration. It is a member of the Association of Professional Schools of International Affairs (APSAIA), the National Association of Schools of Public Affairs and Administration (NASPAA), and the Association of Public Policy and Management (APPAM).

Applicants should have at least a master’s or professional degree, preferably in a professional program in public administration or international affairs or one of the social sciences, and substantial experience (3-10 years) with progressive responsibility. A strong understanding of and commitment to Maxwell’s public and international affairs mission is necessary, as are strong communication, interpersonal and team-building skills.

Salary will be competitive and commensurate with the successful candidate’s level of experience. The search committee will begin reviewing applications after Labor Day. Applications and nominations will be accepted until the position is filled. The anticipated start date is January 15, 2002.

Send a letter of nomination or application, resume, a writing sample describing your view of the role of career services in a graduate professional school of public and international affairs; and a list of at least three references to Professor William D. Coplin, Chair, Search Committee, Maxwell School Director of Career and Alumni Services, Office of Human Resources, Syracuse University, Skytop Office Building, Syracuse, NY 13444.

“Syracuse University is an Equal Opportunity/Affirmative Action Employer.”

UNIVERSITY OF RHODE ISLAND

Director of Enrollment Services

Applications and nominations are invited for the position of Director of Enrollment Services at the University of Rhode Island.

Position Description

The Director provides overall vision and leadership for the Office of Enrollment Services. The Director also assures that appropriate coordination of processes occurs within the Office, establishes short- and long-range plans for the integration and delivery of enrollment services; manages, and is responsible for, the collection and deposit of all University receipts including student fees, research grant and contract revenues, student aid revenues and miscellaneous income. The Director also manages all aspects of registration, student academic records and faculty services functions; administers federal, state, institutional and private programs of student financial assistance in the areas of loans, grants and scholarships; and optimizes the use of available resources, establishes budgetary priorities, and advocates for the office in the budget process. The Director of Enrollment Services reports to the Vice Provost for Academic Affairs.

Qualifications

Candidates shall possess an earned Master’s degree. Successful candidates are required to have 1) at least ten years of significant, and increasingly responsible, supervisory experience in enrollment services; 2) a record of developing and implementing innovative and effective enrollment services initiatives; 3) a record of providing student- and faculty-centered enrollment services in a university environment; 4) a record of maintaining the accuracy and integrity of student academic records; 5) a record of communicating effectively with others (including the ability to prepare and present written and oral materials at all levels); 6) a record of managing, coordinating and supervising professional and support staff; 7) experience in planning and implementing student information systems; and 8) a sensitivity and commitment to issues of diversity.

Institution and Setting

The University of Rhode Island is a land-, sea- and urban-grant institution enrolling approximately 14,300 undergraduate and graduate students and has a full-time faculty of 670. The University offers bachelor's degrees in 100 fields, master's and advanced professional degrees in 53 fields, and doctor's degrees in 33 fields. The main campus is located in the charming country town of Kingston, near the ocean, and in close proximity to Boston and New York. The University is the principal public research institution in the State of Rhode Island. Candidates are invited to view additional information at the University's website: www.uri.edu

Application Process

Nominations and applications must be submitted by September 21, 2001. Applicants should include a letter, resume, and contact information for four professional references. Send all materials and requests for additional information to: Dr. Kendace Salomone, Chair, Director, Enrollment Services, (Log #0011292), University of Rhode Island, PO Box G, Kingston, RI 02881 or E-Mail: salomone@uri.edu (Information requests only). The University of Rhode Island is an Equal Opportunity/Affirmative Action Employer committed to excellence through diversity.

Yale University

School of Management

Admissions Office

Associate Director of Minority Affairs

Reporting to the Dean of Student Affairs and Director of Admissions, the Associate Director will manage all aspects of minority recruiting and retention. Responsibilities include managing the campus visit program, managing statistical data collection and analysis for current and past students and providing high-level reports and analysis to the Dean and Director.

Requirements: Bachelor's degree and 4-6 years experience in admissions, registration, placement, student counseling or financial aid or equivalent. Ability to initiate programmatic and individual activities in a team setting. Exceptional communication and computer and analytical skills and ability to develop appropriate reporting tools. MBA preferred. Please reference Source Code: EAH07053.

Assistant Director

Reporting to the Deputy Director of Admissions, oversee database management functions within the admissions office. Responsibilities will include: system design, development, and implementation of on-line, web-based initiatives and maintenance of database system as well as participation in admissions and recruiting activities.

Requirements: Bachelors degree and 4 years experience in education, computer services, or field consistent with paths of MBA students or equivalent. Knowledge of Windows/MS Office and database management. Masters degree preferred. Please reference Source Code: EAH07020.

Please send your scannable resume and letter of interest to D.M. Cable, Yale University, Department of Human Resources, P.O. Box 208256, New Haven, CT 06520-8256.

Yale University is an Affirmative Action, Equal Opportunity Employer.
San Francisco State University
J. Paul Leonard Library

The library seeks qualified candidates for three positions:

INFORMATION TECHNOLOGY & FACILITIES HEAD
Management position, one of three division heads reporting directly to the University Librarian. Coordinates librarywide technology-based services, including their development, operation and maintenance. Oversees systems support services (network, hardware and software support for all library operations, including integrated library system) and analog and digital media services and computer lab located in the Media Access Center. Oversees physical facilities and plays lead role in planning renovations or new library construction. Serves on Library Management Team and participates in librarywide planning and policymaking; 12-month Management Personnel Plan position; salary commensurate with qualifications and experience.

Qualifications include: Advanced degree in library information or computer science or other appropriate field with minimum 5 years of progressively responsible administrative experience; knowledge and/or experience with library automation systems; technical support for computing systems in a networked environment; and trends in digital technology and electronic access for academic libraries.

COLLECTION ACCESS & MANAGEMENT SERVICES HEAD
Tenure-track faculty position, one of three division heads reporting directly to the University Librarian. Provides leadership for division encompassing Collection Acquisition Management, Cataloging, Document Delivery, Periodicals/Serials, Circulation, Reserve Books, Stacks, Bibliographic Materials, and Special Collections/Archives. Oversees a collections budget of over $28 million. Serves on Library Management Team, participates in librarywide planning and policymaking, and serves as Department chair in matters relating to library faculty appointment at Associate or full Librarian level; rank and salary commensurate with qualifications and experience.

Qualifications include: MLS fromALA accredited program with minimum 5 years of progressively responsible administrative experience, including management of at least one of above named areas; budget planning, knowledge of and experience with collection management and access, including technical services.

BIOLOGICAL AND HEALTH SCIENCES LIBRARIAN
Tenure-track faculty position with primary subject responsibilities in the biological and health sciences. Responsibilities include instruction reference, collection development, and liaison work with discipline-based faculty. Appointment at Senior Assistant Librarian level; minimum salary: $46,988.

Qualifications include: MLS fromALA accredited program, academic background and/or professional experience in the biological sciences and/or health sciences, ability to provide service at general reference desk, including government sources.

San Francisco State University a member of the California State University system, serves a diverse student body of 23,000 undergraduate and graduate students. The mission of the university is to provide scholarships, freedom, and human diversity excellence in instruction, and intellectual accomplishments. SFSU faculty are expected to be effective teachers and demonstrate professional achievement and growth through continued research, publications and/or creative activity in faculty positions. Libraries are expected to meet general faculty requirements for tenure, promotion, and tenure. For full position description, visit http://www.library.sfsu.edu/jobs

Review of application will begin November 17 and continue until positions are filled. Candidates should submit a letter of application, resume and the names of three references with contact information for Pam Kullberg, Personnel Coordinator J. Paul Leonard Library San Francisco State University 1630 Holloway Avenue San Francisco, CA 94132-4030

San Francisco State University is an affirmative action/equal opportunity employer. Minorities, women and persons with disabilities are encouraged to apply.

HigherEdJobs.com 48
According to John Roueche, every year more than one million of this country's young people...either drop out of school or graduate without competitive knowledge and skills. Approximately 91 percent are members of minority groups.

For the majority of the Latino students, the community college, with its open-door policy, does not serve as a bridge to the four-year college but is the only higher education received. This, in part, reflects the fact that most Latino students are not academically prepared to begin taking the academic curriculum (Roueche). Although remedial courses are offered by the community college, the long-range goal of a college education seems to get longer, and as frustration sets in, they drop out or opt for a vocational career.

Thirty-two percent of full-time community college students are minorities (California Post Secondary Education Commission, 1984) for whom the community college is playing the most significant role in their education. Of those, 12.5 percent are Latino.

College education for the masses is a relatively new concept. Before the turn of the century, less than 10 percent of the population attended high school. Today that figure is nearly 80 percent.

However, there are glaring differences among racial, ethnic, and social classes. According to the U.S. Census Bureau, in 1985, 80 percent of Anglos in California had completed 12 grades of schooling, but only 46 percent of Latinos aged 25 and up. By 1993, just over half of Latinos, 53.1 percent, had done so, and 39 percent of non-Hispanics in the same age group. A high school education is the norm for middle- and upper-class children.

The 1990 Census demonstrated that the average middle-class community like Huntington Beach, Calif., graduated 81.9 percent of high school students, and Irvine, Calif., a typical upper-middle-class community, 93 percent. Santa Ana, Calif., a typical urban community with a majority of Chicano minority students, graduated only 68 percent. This gap is a major concern, and education is only one of many obstacles that Chicano students have to overcome if the poverty cycle is to be broken.

Chicano students usually drop out by the eighth grade. According to the state of California, more than 32,000 Chicano students dropped out of high school in the '94-'95 school year. When a student drops out or fails to complete high school, both the individual and society suffer, the individual, through limited occupational and economic opportunities.

Many Americans accept that poverty is a part of a free economy, an idea sometimes justified as social Darwinism, survival of the fittest. The poor, until recently, have a useful place in society. There has always been a pool available to do the unskilled menial work. For those who could afford it, education in this free economy was considered a road to mobility. Low-income individuals and others were taught that hard work and a good education were a way out of poverty and into a successful, fruitful life. But the value of unskilled hard work for such mobility was surely overrated even in the past, and is now even less useful as a vehicle for socioeconomic mobility.

New industrialism and training for jobs needed in the post WWII era largely diminished the role of unskilled labor. Farmers each year needed fewer farm workers. The newer knowledge industries, among the most rapidly growing job areas in several decades, have little need for the unskilled. The computer is the pen of the new millennium. Thus, the poor have become a heavy burden to society, and those who have survived in the free economy are beginning to recognize that poverty is not only a curse for the poor but for those who support them and for society as a whole.

For the middle and upper classes, a college education is an attainable educational expectation. Yet, for the average Chicano, often from a lower income level, a college education is something undecided at birth. The educational inequities that exist between Chicanos and middle and upper classes must be addressed and redressed to provide all of us with an opportunity to succeed.

LATINOS DESIGN THEIR FUTURE
Congratulations to the Su Casa Hispanic Center for a successful awards dinner and silent auction.

Dr. Tito Guerrero III, keynote speaker and president of the University of Southern Colorado; Dr. James Votruba, president of Northern Kentucky University; and Leo Calderon, event co-chairperson.

Jorge Marceno, NKU student, and friends.

Father Bill Jansen, Minister of St. Charles of Barromeo; Ines Arias, Community Award recipient; Father Joe Nelson, Su Casa retiring director; Linda Robbins, Cesar Chavez Award recipient; Simon Garcia Talamantes, Community Award recipient.

NKU is also pleased to introduce Leo Calderon, Coordinator for Latino Student Affairs. Leo has partnered with faculty and staff to position NKU to be a regional leader in Latino affairs. The Latino Outreach Advisory Council, which is composed of community leaders and NKU faculty and staff, is co-chaired by Leo and J. Webb Horton. NKU was pleased to host the 2nd Annual Su Casa Banquet in May 2001, with over 400 guests in attendance. Leo co-chaired the Banquet with Geri Hernandez Geller.

Leo has served in numerous leadership roles where he has contributed to enhance the local Latino community. Leo is a member of the planning committee for the NKU Center for Latin American Studies and Service. In collaboration with the Office of International Programs, he led the delegation for the 2001 Alternative Spring Break Program in Mexico. Leo has conducted Spanish Language and Culture Education and Training programs for businesses, government agencies, and social service agencies.

Federal Support for the Arts

By Gustavo A. Mellander

It has long been argued in academia that the introduction of the arts into college core curricula is what makes the difference between mere training and securing an education. Clearly, most people go to college to improve their chances to secure a good job after graduation. But to live a full and superior life, many believe students must be introduced to the arts.

But an introduction in college is not enough. A relationship should continue throughout one's life and it cannot be left to happenstance. Many European and Latin American governments have long been important supporters of the arts. The United States government was late in arriving.

The National Endowment for the Arts, established in 1965, is an independent agency of the federal government. Since its inception, it has awarded more than 115,000 grants to arts organizations and artists in all 50 states and six U.S. jurisdictions, which include Puerto Rico and Washington, D. C. “The arts reflect the past, enrich the present, and imagine the future.”

With that succinct quotation, the National Endowment for the Arts defines its underlying guiding philosophy. Every year, it strives to make an investment in America's living cultural heritage, to serve the public good by nurturing the expression of human creativity. It has a particular interest in cultivating community spirit throughout the nation. Colleges, universities, local artistic groups, and even individuals are eligible to seek funding.

Throughout its history, the Endowment has fostered the recognition and appreciation of excellence and diversity in the nation’s artistic accomplishments. Its vision is a broad one and encompasses the visual, literary, design, and performing arts in America. This small federal agency—the only one devoted exclusively to nurturing creativity and preserving cultural heritage—has helped bring a sense of permanence, continuity, and commitment to the nation's arts scene.

Every year, millions of Americans have been able to enjoy the performances, exhibitions, and educational and community activities funded by the Endowment. This public investment in the nation's cultural life has resulted in both new and classic works of art reaching every corner of America.

The National Endowment for the Arts is the largest single funding source for the nonprofit arts sector in the U.S. Among its many accomplishments, the Endowment has funded the PBS series *Great Performances*, winner of 51 Emmys and 121 Emmy nominations, for most of its 26 years on television; made possible the design of the Vietnam Veterans Memorial, the most visited tourist attraction in the nation's capital; fostered the careers of 35 of the 46 recipients of the National Book Awards, National Book Critics Circle Awards, and Pulitzer Prizes in fiction and poetry since 1990; provided for original productions such as *A Chorus Line*, first developed in regional theater.

The Endowment carries out its mission through grant-making, leadership initiatives, and partnerships with state arts agencies. Regional arts organizations, other federal agencies, and the private sector also are served.

These activities reflect the agency's commitment to making the arts available to all Americans. By fostering artistic creativity and achievement and providing lifelong educational opportunities in the arts, the Endowment is helping preserve the nation's cultural heritage.

Since America's arts reflect its cultural diversity and express its rich complexity, the program is well respected nationwide. Its goals include: access to the arts for all Americans, creation and presentation of artistically excellent work, lifelong education in the arts for all, preservation of our cultural heritage, strong and stable arts organizations, community building through the arts, and enhanced partnerships with the public and private sectors.

Grants are awarded annually in categories that include dance, design, folk and traditional arts, literature, media arts (film, television, video, radio, audio art), music, musical theater, opera, theater, visual arts, and multidisciplinary works.

The agency considers applications in the following categories: Grants to Organizations, Partnership Agreements, and Leadership Initiatives. Individual writers may apply for Literature Fellowships. Awards in jazz and the folk and traditional arts are awarded by nomination.

Nonprofit, tax-exempt organizations such as colleges and universities may apply. Applicants may also be arts organizations, arts service organizations, units of state or local government, and other organizations that help advance the mission of the Arts Endowment. Grant guidelines are available from the Endowment (202-682-5400).

Since 1965, the Arts Endowment has built an enviable record of support and enlightenment. The research it has sponsored, the meetings convened, and its publications and congressional testimony have helped convey the evolving story of the arts in America to all. The Endowment’s storehouse of knowledge and expertise also have been mobilized to support some 115,000 grants to organizations and artists. It is, therefore, not surprising that in the years since the Endowment's creation, the number of cultural nonprofit organizations, state and local arts agencies, and performing arts centers has grown dramatically throughout the country.

Dr. Mellander is a professor at George Mason University.
Our skin color precedes us. There are distressed communities and schools, and polarization of residential neighborhoods. It's so sad to hear, demoralizing, even. You may find yourself questioning your values and hoping that you are the exception to the invective cacophony broadcast in the media. It almost makes you want to apologize for being different.

Several stories in this issue feature projects throughout the country whose goals are to elevate and educate Latinos as well as share our successes and contributions to society at large. Nevertheless, despite ongoing endeavors such as those presented herein and elsewhere, Latinos and other communities of color still can't shake the stigma often related to being non-White.

Sadly, just a few of us in a neighborhood, school district, or academic institution are more than can be tolerated by the collective in charge before we are blamed for lowering standards and property values. What causes White flight and when does barrioization transform a cul de sac? Oddly enough, there are always a handful of non-minorities who accept, admire, or even desire and seek to surround themselves (for whatever reason—previous exposure to cultures different than their own via exchange programs, professional or empirical experience, or genuine interest) with diversity.

Other questions: Is there a connection between the elite status of a university and the percentage of students of color it serves? How about a faculty's racial makeup? Are HSI's or HBCU's considered venerable institutions; the likes of Harvard, Stanford, Yale...? Or will it be possible for elite universities to maintain their stature without compromising their longstanding standards if one day Hispanics, for instance, become a third of the student population or faculty? Is there a connection there, or is it just a coincidence?

It seems to be a lifelong mission of Latinos and other people of color to help others like themselves catch up with White American traditions (i.e., mastering English, customs, and standards) without abandoning our heritage. However, more often than not, our work, our efforts, our leadership, and our excellence are undermined and fall on deaf ears. Even immigrants, (perhaps a truth forgotten—this country was founded and nurtured by immigrant folk) have something to offer.

M. Garcia

Celebrating 20 Years of Diversity (1981-2001)
"Censorship rampant," says renowned muralist

want the mural lady over here," the kids from Los Angeles used to say.

That was back in the early 1970s, in the midst of the civil rights movement, where it was *naza* against *naza* in the streets of L.A. Kids from competing gangs would call up the Los Angeles Department of Recreation and Parks to find Judy Baca, the woman they’d heard worked with gang members to paint such murals as “Mi Abuelita,” one of her first, now gracing the bands shell in Costello Park.

Judith Franciscas Baca was about 24 years old back then. At that time, she was working for the city teaching macramé to blind older ladies and art to elementary school children in the parks of East L.A. What drew her attention mostly, however, were the gang members that she would walk by on her way to her classes. “Hey, are you the art lady?” they used to ask. “Hey, art lady, you want to see Juan’s drawings?”

Baca and her art became a kind of mediating force between the gangs. During her free time, she and the gang members worked the summer creating some of L.A’s first murals. It was after the *Los Angeles Times* picked up on the scene and graced its front page with the news of gang members putting down knives for brushes that Baca was named director of the Citywide Mural Project. She traveled from neighborhood to neighborhood, “one territory to another,” to build murals with gangs that would tell the stories of the forgotten cultures of L.A.

Today, more than three decades later, not only has Baca become one of the foremost muralists in the country, she has brought together the voices and art of underrepresented cultures to make Los Angeles a proud leader in mural-making among the cities of our nation. Today, 400 murals run the course of Los Angeles from that initial project with the gangs, and Baca has gone on to produce works and projects that have drawn international attention.

Baca is especially known for what many would consider her most ambitious project to date: The Great Wall of Los Angeles. Under the structure of the Social and Public Art Resource Center (S.P.A.R.C.), which she co-founded with Christina Schlesinger and Donna Deitch in 1976, Baca and her planning and painting teams of 700 participants produced 2,435 running feet of murals in segments from 1977 to 1984. More than 400 young people of diverse cultural back-grounds, as well as scholars, oral historians, local artists, and hundreds of community members also took part in what is considered one of the most acclaimed monumental cultural projects dealing with interracial relations in the United States. The Great Wall of Los Angeles, the largest single mural in the world, gives voice and shape to the stories of ethnic groups that have shaped California’s history—Baca’s family among them.

Baca tells cultural stories of the kinds of neighborhoods she grew up in. She was born into the Watts section of Los Angeles and later lived in Becoa, an L.A. suburb, both largely Latino and African American. Baca grew up under the strong influence of her mother, who traveled to California from Colorado for a better life, and her grandmother, who immigrated to Colorado from Mexico during the Mexican Revolution.

At age six, knowing very little English, Baca was given time to paint while her classmates kept up with English lessons. Later, attending a Catholic high school, she entertained the other students with her blackboard drawings of naked, screaming nuns and, on the students’ notebook covers, drawings of the perfect dream man. “I was a bit of a rebellious kid. I came from a lawless middle
school where kids threw things at teachers," said Baca. Though her classmates enjoyed her artistry, for Baca it was hard to imagine a later life as an artist, and she had no role models.

Still, she had an inspiration for learning that the nuns had strongly supported, and Baca attended college. All of her friends, though, were getting married and finding jobs right out of high school, so she quit and got a job as a production illustrator for a factory. It was a chance to put her talents to use, but Baca soon realized the importance of going to college.

"Every day I would walk through the factory, and I would see women whose hair was tied up in 1940s style, running the same machine, doing the same job, standing in the same position, making the same movements, and doing it for 20 or 30 years. And I got really scared. After a year, I got it. It drove me back to school," said Baca.

Once in college, she "could see the entire path. I could see it all laid out—where I would go, what it would be, what I could aspire to. And I was really enchanted more by the mystery of what I could invent."

Baca graduated from California State University at Northridge in 1969, a time of extreme social unrest and a civil rights movement that in many ways still is so much a part of Baca's work today. She was married at the time and upon graduating taught art at her old Catholic high school for a brief period. It was soon after, however, that Baca was painting murals with the gangs in the parks of L.A. "These kids were called hard core," she said. "But, added Baca, "I found them to be charming, very interesting, bright young men who really needed something to do, who needed to feel that they could somehow affect their community in a powerful way, and who were really grateful for the experience. They took to the idea that we were in the midst of a civil rights revolution, and that raza killing raza was a really crazy thing to be doing. And that somehow all this history of violence and the terrible things that were occurring in their neighborhoods had to be changed."

Working with the kids proved to be a means of combining her creative talent with effecting social change. "It seemed like a very logical choice. I wanted to be an artist, but I wanted it to have meaning to the people I cared about, to the communities I cared about. I didn't want it simply to be art for its own sake and be irrelevant to what was happening at the time," said Baca. "What was happening at the time was a great upheaval, upheaval in terms of civil rights. I did the painting because it was the skill I had to bring to the struggle."

So much of Baca's work has been about crossing lines of divide within a fractured city and bringing rival gangs and groups together to collaborate on a single cause. And for Baca, painting murals on walls that were already being used as communication centers for kids with graffiti and writing seemed a natural progression. "It was just a simple step forward to use the walls to speak more articulately," she said.

The Great Wall

With the Great Wall, the notion of bringing together fractured groups especially played out in large scale. "The work that I was inventing was a process-oriented work. The point was to bring people together from all these different sides where the Citywide Mural Project had been painted. What was happening was that the project was creating a lot of individual works that were defining various ethnic groups in the city, but there was no place in which they were meeting and talking together," she stated.

Baca embarked on the Great Wall of Los Angeles project in 1997 in response to the Army Corps of Engineers' initial desire to produce a bike trail and try to recover this piece of land that had been destroyed by its concreting of the rivers.

"The Great Wall metaphorically was a tattoo on the scar where the river once ran," said Baca. "It seemed appropriate that what we could do was take the scar and the hardening of the arteries of the land, which was creating all kinds of environmental issues and divisions between neighborhoods, and bring the young people from all these different parts of the city that were racially separated into one place. We could make
our alliances with each other and begin to tattoo the scar with the stories that had also disappeared in another great wound—the wound of the disappearance of our families and our people.”

Unfortunately, today’s wall is in need of repair and S.P.A.R.C. is working hard to raise the funds to keep the images alive. “We are trying to raise the money today, and it is really amazing to see how difficult it is now,” said Baca. “Back then, people would provide support through donated services. People seem to have less flexibility to do that now. There seems to be less propensity for individual businesses to give—just a kind of real retraction from civic life in general.” S.P.A.R.C. is also seeking to complete the unfinished part of the timeline of the wall that specifically chronicles the struggles of ethnic groups of Los Angeles.

While the Great Wall itself may be in disrepair, time has told some amazing stories of the kids who once worked on the mural project. One became a film designer, others ambassadors on interracial harmony. Many more have made a life for themselves despite incredible hardships. “I am in touch with many of these kids. Many of them will speak about it being a pivotal experience in their life. We are talking about people who became decent and good human beings out of really adverse situations,” said Baca.

S.P.A.R.C. has produced more than 90 murals since 1988 under its Great Walls Unlimited: Neighborhood Pride Program. Its other projects include the World Wall, a traveling mural exhibit based on the theme “A Vision of the Future Without Fear.” Its seven interior and exterior canvas panels, each 10 feet by 30 feet, will address issues such as war, peace, cooperation, interdependence, and spiritual growth. The seven inner panels are being created in Los Angeles and the outer panels by artists and community in the countries that the Wall will travel to and be displayed in—Finland, Russia, Israel, and Canada among them.

Working on the World Wall and being the artistic director of S.P.A.R.C. aren’t the only things that keep Baca close to overwhelmed. She has taught studio art as a professor of fine arts for the University of California since 1980. Since 1996, she has been professor of art for world arts and cultures of UCLA and vice chair, later becoming senior professor, of UCLAs Cesar Chavez Center.

The Center was born of a hunger strike in the early 1990s, when nine students went without food in order to convince UCLA of the need for a Chicano studies program. Baca was brought on board after its creation. During the past four years, S.P.A.R.C. has partnered with the Center to develop the first-of-its-kind mural lab, which offers digital imaging for large-scale mural productions in a service-based learning environment for students of the Center and of the world arts and cultures department.

“Most of our important Chicano icons are falling into disrepair and need to be repainted. What I was more relevant for me to tell it,” said Baca.

Inspired by the Denver mural, kids from Durango, Colo., have also shown an interest in building a digital mural “in their backyard.” The Digital Mural Lab has been working with them, providing workshops to set up the process and then communicating via the Internet, putting their ideas onto computers at the lab in order to ship final panels back to them in Colorado. Many of these murals can be accessed on the Internet and can serve as educational tools in history.

The lab has produced 15 digital tile murals on the Venice Boardwalk, and Baca’s students have lined three walls of the permanent gallery at Olvera Street, dedicated to the life and times of Mexican mural maestro David Alfaro Siqueiros. Also under way is the Luna Digital Project, which involves the transformation of slide images into a digital archive for easier access to research.

Baca’s own work has appeared in museum collections such as the National Museum of American Art at the Smithsonian and at the Wadsworth Atheneum in Hartford, Conn., and has been shown worldwide. Her original vision and work in the streets of Los Angeles have been brought to the world stage. And her work is far from over.

Baca is working within S.P.A.R.C.’s mission to help preserve the murals of the past. “Censorship is so rampant now,” she said. Murals that have been deemed controversial are being censored and written off as street signs in order to remove them from the city where Baca helped give life to the mural movement.

It is this movement that has given voice to Chicanos and Latinos and to the marginalized voices that have, especially in California, become “the major flowing tributary, perhaps the mainstream.” But there is not equivalent voice or power, says Baca.

“Our stories are still not heard and not entirely understood. The story is more important to tell now than it was even before as we have become the majority voice.” It is with this urgency and understanding that Baca continues to make her mark, the mark on the walls of a marginalized people reclaiming their history.
Spanish Royalty and Art at SMU's New Meadows Museum

World-Class Museum for World-Class Collection

By Marilyn Gilroy

Spanish Masterpieces in a New Light

Velázquez, El Greco, Goya, Picasso, Murillo, Gris, Miro are just a few of the artists in the all-star lineup at the Meadows Museum at Southern Methodist University in Dallas, Texas.

The collection is one of the largest and most comprehensive of Spanish art outside of Spain. The museum's new facility opened this year, attracting international attention and a visit from King Juan Carlos, who attended the inaugural festival of events.

The 66,000-square-foot building is six times larger than the museum's previous location and features expanded space for exhibits and research on the 670 works owned by the Meadows Museum.

The new facility was designed by the Chicago-based firm of Hammond Beeby Rubet Ainge, which also designed renovations for the Toledo Museum of Art and an addition to the Art Institute of Chicago. The architecture features the same red brick Georgian style of most SMU buildings. Inside, the main foyer was created to look like a Spanish courtyard, with yellow walls and a grand staircase leading to the galleries.

The second floor of the museum is devoted to exhibitions, with separate areas for the per-
manent collection and special exhibits. The main exhibition space allows for display of considerably more of the permanent collection than was previously possible. There are also separate galleries for works on paper, such as the extensive collection of Goya etchings. The new education area on the north side of the first floor includes an orientation room, studio, seminar room, distance-learning studio, and auditorium.

The University celebrated the opening with a 12-day festival, which was capped by a visit from Spain's King Juan Carlos and Queen Sofía. The King served as honorary president of the museum's International Inaugural Committee of Honor. As part of the opening ceremonies, he received an honorary doctorate of arts. The citation for the degree recognized him "as the gifted designer of one of the most remarkable political transitions in the history of Europe and as the architect of a vibrant democracy and civil society." The King attended private and public events and, during his remarks at the celebration, stressed the region's historical ties to Spain.

"The King and Queen were impressed by the facility," said John Lunsford, director of the Meadows Museum. "They toured the galleries and the King expressed how pleased he was that this important Spanish collection was here."

Oilman and philanthropist Algur H. Meadows, whose interest in Spanish art was prompted by his annual visits to Spain between 1952 and 1966, when his General American Oil Company of Texas had drilling rights in that country, founded the museum. He spent a great deal of time at the Prado Museum and subsequently began acquiring works by Spanish painters. Meadows gave his collection of Spanish paintings to Southern Methodist University, and, after his first wife died, he decided to honor her memory by donating money for a museum to house the collection. The Meadows Museum opened to the public in 1965, displaying art that spans more than 1,000 years of Spanish history and culture.

The collection is noted for important 20th-century works, but it also contains an impressive number of 19th-century Spanish painters such as Mariano Fortuny, Vicente López, Antonio María Esquivel, and others who are rarely seen outside Spain. Two years ago, the museum acquired a painting by El Greco to add to its holdings by Spanish old masters.

Highlights of the comprehensive collection also include Renaissance altarpieces, Baroque canvases, exquisite Rococo oil sketches, and the graphic works by Goya. The Elizabeth Meadows Sculpture Garden contains works by August Rodin, Jacques Lipchitz, Henry Moore, and Claes Oldenburg.

Lunsford said that the museum has completed the move into the new building and is now functioning under "normal operations." He is amazed at the way in which the new surroundings have transformed the art and says "it looks like a new collection hanging in this space."

Initial funding for the project was provided in May 1997 when the Meadows Foundation gave $1.5 million for the architectural design of a new museum building. In 1998, an additional gift of $185 million from the Foundation was awarded for construction of the building. The gift also provides separate endowments for ongoing maintenance and expanded educational programming for the public, focused on the museum collection.

Lunsford indicated that the new museum has already begun to fulfill one of its main goals of contributing to the cultural life of the community. He spoke enthusiastically about the public's attendance and response to the opening events.

"The opening ceremonies were terrific. We covered a broad spectrum of audiences and every group was enthusiastic about the new structure," said Lunsford. "We had a lot of people from all segments of the community attend, and we are quite pleased that the number of out-of-town visitors has started to increase."

The crowds were treated to an inaugural exhibit honoring Spain's renowned architect-engineer-sculptor Santiago Calatrava. Calatrava is best known for his bridges and airport designs, which integrate technology and aesthetics, producing structural forms that challenge traditional practice in both architecture and engineering. Some of his most notable works include Alamillo Bridge and La Cartuja Vadiuct in Seville, the Lyon Airport Railway Station, the Sondica Airport in Bilbao, and the Montjuïc Broadcasting Tower in Barcelona. An important Calatrava-designed extension to the Milwaukee Art Museum is almost complete. Calatrava is also the designer of a series of proposed new bridges over the Trinity River in Dallas.

"The reaction to the Calatrava exhibit has been splendid. It has been

The University celebrated the opening with a 12-day festival, which was capped by a visit from Spain's King Juan Carlos and Queen Sofía.
It is particularly instructive for Protestant students unfamiliar with Hispanic Catholicism. Sylvester incorporates paintings by El Greco and Murillo while discussing the concept of the Virgin Mary and saints in Spain.

"I use the collection as a way of opening up students to the spirituality found in the art, what the theological message is," he said in an interview. "I conduct devotional exercises with students in the galleries, encouraging them to use the paintings as an occasion for meditation."

Lunsford says that the permanent collection will remain the heart of all research and programming in the Meadows Museum. The museum will continue to present four to five special exhibitions a year, but their quality and scope will increase substantially.

"We are using the collection to try and be two kinds of museums," he said, "that which supports the University and is an integral part of its instructional programs and one which is known for being more international and public in its purpose."

The museum is also increasing its outreach to the large Hispanic population in North Texas. When the museum installed the collection, it mounted information panels on each work of art in Spanish and English. Bilingual docents are available for tours and programs that have been developed around established holidays.

"We had a very successful Cinco de Mayo celebration that attracted 600 people," said Lunsford. "This helps us get the word out that the museum is here and the cost is free."

The museum offers free lectures, gallery talks, and concerts throughout the year, as well as workshops and a summer art program. "We also have an ongoing program that attracts schoolchildren," said Lunsford. "We find that later on, they bring their families back with them."

Although Lunsford is "thrilled" about participating in the development of the new museum, he has decided to retire at the end of the year. A committee has been formed to find a successor. Lunsford is mounting a farewell exhibit, which will curate, entitled "Splendor of Soul, Beauty of Form: Royal and Ritual Art of Africa."

"Even though the museum focuses on Spanish art, we want to make it clear that we have exhibits from all different places," he said.

As for the future of the Meadows, Lunsford indicated that he hopes the museum will be able to build an endowment for acquisitions. The Meadows Foundation, with assets in excess of $650 million, has been very generous, but it has been difficult to find the kind of funding needed to purchase high-quality works of art.

Nevertheless, Lunsford is obviously proud of presiding over the museum at a time when this often-described world-class collection is displayed in a world-class home.

---

John Lunsford, director of the Meadows Museum

1804
"The Instrument Picks You," says Gavilán

BY JEFF SIMMONS

You might think that a gift that inspired a lifetime pursuit would be kept closely guarded, perhaps under lock and key, but Ilmar Gavilán doesn’t see it that way. In fact, the gift that aroused his musical passions rarely stays in place. It was a toy violin, designed for a child’s hands, a present his father handed to him when he was barely 5 years old and growing up in his native Cuba. He played with his wooden toy the way friends would play with tiny toy cars.

“He would teach me how to conduct,” Gavilán recollects. “And it was really fun to imitate my dad conducting.”

More than two decades later, those moments of experimentation with a toy remain fresh in his mind. Though far from the dusty streets where he first put bow to string, Gavilán often reflects on that period as he encourages others to follow in his footsteps.

“I lend the violin to young musicians that need it in Cuba,” Gavilán says. “That violin doesn’t stay in my house; it’s always rotating.”

Gavilán’s life seems to be much like that toy violin as it moves from place to place, stirring artistic passions. Gavilán seems to be on the brink of artistic celebrity, a musical wunderkind who has captured notice abroad, and now in America.

A student at the Manhattan School of Music in New York City, Gavilán recently took top honors in the four-year-old Texaco-Sphinx competition. The contest is solely open to Latino and African American string players and thrusts open the door to a musical career.

The third time he entered the competition proved a charm for the 27-year-old, who lives near the school. Two years ago, he took second place among the 18 contestants. Last year, he garnered the Best Tonal Award. And this year, he anxiously listened as the winners’ names were read in a Michigan auditorium.

“The sweetest name I ever heard was the name of the second prize winner,” he says, laughing infectiously. “It felt terrific; it felt so good.”

The competition awarded Gavilán $10,000, but the money wasn’t the only satisfying reward. Capturing top honors also means a whirlwind tour. Over the next year, Gavilán is performing with 15 major orchestras. His schedule takes him to symphony halls in Atlanta, Puerto Rico, Chicago, St. Louis, and Detroit, among others. It all, he admits, seems a bit overwhelming, but not in the least like work because he will be playing the instrument he

“...to see a Spanish person playing beautiful Spanish classical music could be very inspiring to young people."
came to love at an early age.

You might say music was in Gavilán’s genes. Gavilán’s father, Guido López Gavilán, is a composer and long-time conductor of the Havana Symphony Orchestra. His mother is a concert pianist, and his younger brother, Aldo, is also an accomplished pianist. At age 6, already equipped with his toy violin, Gavilán began his formal training. Pressure from his father put him in violin studies after school, when the incessant street banter of friends playing outdoors was an intoxicating draw.

“I enjoyed the period before I started taking lessons, but when I was 6, I didn’t enjoy it,” he admits. “To me, the violin sounded like a cat. It was really annoying, and I didn’t want to practice.” But his father’s lessons eventually caught hold, and he was impressed by his father’s ability to lead others in song. “He taught me a regular, small violin, and I brought it to school, and he actually made me to it,” Gavilán says.

It took about five years, he admits, to warm up to the instrument. He slowly inched toward that position because of all the attention it was bringing him. Two years earlier, he had begun performing in front of cameras and on the radio. Gavilán says his parents and educators sold him like a prodigy, and the marketing drew him acclaim in Cuba. He garnered a number of national competitions and performed with prominent orchestras in the region.

At age 12, he performed the Mendelssohn Violin Concerto with the Orquesta Sinfónica Nacional de Cuba, an ensemble he continues to perform with today.

“Playing with an orchestra as a soloist was a turning point,” he says. “I started to recognize my own voice, and that voice wanted to be shared with others for the first time.”

Asked to describe that revelation, Gavilán pauses. Though he speaks English fluently, he struggles as he chooses his words carefully. “It’s the closest instrument to the human voice,” he says. “You can be so intimate and expressive. You can basically express the nuances of human feelings.

“Even when I wasn’t playing, the music kept ringing in my head. And I started to imagine things in a specific way. I started to imagine my own classical musical repertoire and my own way of expression. That’s when you know you have no choice.”

“I am saying” he adds quietly, “that the instrument chooses you.”

That emotional moment when he discovered his voice proved inspirational and life altering. There was, he says, no turning back. The violin would be his life.

At 14, he traveled to Poland to perform in the Lipinsky-Wieniawski International Violin competition. The performance drew him a special award for Best Interpretation of George Frederick Handel, and it also decided his next move, to Moscow.

A prestigious teacher was so impressed by the young violinist that he was invited to study at Moscow’s Tchaikovsky Conservatory with Maia Glazunova. He headed to the former Soviet Union, where he studied for the next five years.

“I gave up the most precious thing in my life, my family,” he says. “I left when I was 14, and I really did leave. My mom was with me during my first year in Russia. Then she returned home, and I was a teenager growing up on my own.” Being alone, he said, furthered his personal and spiritual development. It gave him the opportunity to “grow up, mature, and become a much more sensitive person.”

Gavilán became much more comfortable as the center of attention, performing quite a few recitals across the former Soviet Union. A graduation diploma in 1993 didn’t herald his return to Cuba. It sent him to Spain, where Queen Sofia recommended that he enroll at L2 Escuela Superior de Música “Reina Sofia” to study with Professor Zacharias Bron. “She [the queen] listens to people personally,” explains Gavilán. “She is the honorary director of the private school after her name, and it’s for people with special talent.”

Gavilán appeared on Spanish National Radio and toured the country and Portugal, performing recitals over the course of two years.

In 1995, Gavilán arrived in the United States. Maestro Joseph Eggert of the United Nations Symphony Orchestra invited him to perform, and he soon began studying at the University of Southern California with Rudicli Shapiro. His musical mentors included Abraham Stern, Claude Hodgkins, and Sherry Kloss. Three years later, he packed his two violins and moved to the East Coast.

Gavilán enrolled in the Manhattan School of Music’s orchestral performance degree program, studying with Glenn Dicterow and Sheryl Staples, concertmaster and assistant concertmaster, respectively, of the New York Philharmonic. Dicterow recalls hearing about Gavilán even before he arrived.

“He’s an amazing talented young man,” Dicterow says. “He has a very charming smile that melts snow.”

His résumé began to stretch beyond one page. In 1999, Gavilán released his first solo CD, Aires Y Leyendas, which was recorded in Cuba. The CD included compo-
tions by his father, Gavilán was also featured on two other CDs, and on one performed the Latin standard "Manisero" (Peanut Vendor) with the Cuban All-Stars, including Luis Conte and Orastes Vilato. He continued to tour, as well. During the summer of 2000, Gavilán toured as a member of the Gustav Mahler European Youth Orchestra, conducted by Pierre Boulez.

This spring, all his hard work paid off. On May 13, Gavilán received his master's degree in music. During the graduation ceremony, he was among 315 students graduating from various programs at the school, he heard his name called out. He received the school's Pablo Casals Award for "musical accomplishment and humanitarian endeavor."

"I'm really proud of that," he says, recalling the applause from the 1,000 students, parents, and guests who filled the John C. Bordens Auditorium.

The director of the orchestral performance program, Robert H. Smith, Jr., says Gavilán was a popular classmate.

"He is full of life; he is full of energy," Smith says. "He is a big talent. He has tremendous gifts, had great training early on, and a very firm grasp of the instrument. He has a natural gift towards being a soloist." That is something Gavilán is working to perfect. He returns to the school this fall to continue his studies with Dicterow as a professional studies student. He hopes the experience will lead him toward solo performances. "I want to be a soloist to inspire people, and particularly young minority people who need to see their future represented," he says.

As he performs across the country as part of the Texaco-Sphinx award, he is meeting with groups of young minority students and giving lectures. They ask why he studied music, did he enjoy it, and was he the only Latino player in his school. "In Cuba, I obviously was not," he says. But he laments that in other programs, he was often the sole minority. He sees this as a challenge—to let students know they can be successful, even if the obstacles seem daunting. "To see a Spanish person playing beautiful Spanish classical music could be very inspiring to young people."

Dicterow agrees, saying that Gavilán serves as a role model for budding musicians. "He is certainly one of the only minority students I've been able to work with in this program, so it has been remarkable that he's been able to get to this level. He is extremely charming, bright, and enthusiastic about music."

Earlier this year, visiting the children's ward at Mount Sinai Hospital in Manhattan, a number of children could not speak and used sign language. That visit made an impression on him and reaffirmed his reasons for playing the violin.

"I am not doing this for fame or money. It is about touching somebody's life," he says. "It was very profound. It could have been very sad, but I chose to see the beauty within them and tried to reflect that in my music."

Students often ask Gavilán for advice. "I tell them it is simple: When you feel you have no choice but to play, that's it! Then you definitely have to pursue it, no matter what."
Rutgers, The State University of New Jersey

Distinguished Faculty, Renowned Alums

BY ROGER A. DEITZ

Rutgers University has a long and proud past, a dynamic present, and a promising future as one of this nation’s leading educational institutions. Called “the man on a mission,” Francis “Fran” L. Lawrence is Rutgers’ 18th president and has been in the post for 10 years. Rutgers, the State University of New Jersey, is “one of the nation’s oldest, largest, and most distinguished public research universities.” Lawrence characterizes Rutgers as “rich in history dating from the colonial era and with more than 300,000 alumni all over the world.” He calls Rutgers “a key player in such diverse national and international academic arenas as information science and technology, engineering, pharmacy, environmental science, business, law, and many others.”

Before he came to Rutgers, Lawrence had been the provost and a professor of French classical literature at Tulane University. With the University just being invited to join the prestigious Association of American Universities (AAU), Rutgers was at a crossroads. With the state of New Jersey deep into a serious recession, there were ramifications for the stability of Rutgers. Now, a decade later, although state funding has increased only slightly, federal support for grants and contracts, and private donations have increased sharply. Undergraduate applications are up 28 percent, and Rutgers has boosted enrollment of students who scored above 1350 on their SATs by 37 percent.

Lawrence reflects, “We have succeeded in launching a highly successful planning process to make Rutgers stronger and raise its stature to even higher levels, and we are well on our way to accomplishing that. We have strengthened the core academic programs through wise investments in our faculty, and we have launched dozens of academic initiatives to reinforce our work as a university whose research adds knowledge to the world and uses it productively in the undergraduate classroom. We have begun a major information technology infrastructure project second to none in higher education, and we can see both its results and its potential. And we’ve done all of this with an inclusive process that brings the best ideas people have to offer to the process and adds to our sense of community. In short, I guess you’d say that we’ve established a powerful momentum that capitalizes on the good position we were in 10 years ago.”

Lawrence is very proud of strengthening teaching and undergraduate education. “Ten years ago” he recalls, “there was great concern that universities were devoting too many resources to research at the expense of educating students. Rutgers is doing a good job at balancing these two priorities, but we needed to do more, and make sure that everyone knew what we were doing. For example, we have greatly increased the number of undergraduate students who do research pro-

Rutgers became “The State University of New Jersey,” making it the nation’s youngest comprehensive public university.

The Rutgers New Brunswick campus consists of five smaller campuses: Busch, College Avenue, Cook, Douglass, and Livingston College. Within the last 40 years, the University has emerged as one of the premier public research institutions in the country. Rutgers offers more than 100 majors and 4,000 courses. There are more than 400 clubs, nearly 50 NCAA Division I (Big East) and III teams, extensive recreational facilities, and a wide range of cultural events on cam-

jects with faculty supervision. In 1992, student participation in research was around 43 percent, which was excellent. But in 1997, the numbers had grown to an amazing 60 percent. That is a clear indication that the majority of our students take advantage of the extraordinary opportunities to work one-on-one with Rutgers’ world-class faculty.” Lawrence also says he is proud of the “tremendous impact” the Rutgers University Strategic Plan has made on the university community, particularly “to fortify our core academic programs and build in our other areas of strength in Camden, Newark, and New Brunswick.” His other points of pride include RUnet 2000, a new network for voice, video, and data transmission. He notes, “The fact that it will stretch from one area of the state to the other means that it will be essential for both Rutgers and for support of K-12 education well into the future.”

Founded in 1766, Rutgers is the nation’s eighth oldest institution of higher learning, ranking in the top 10 oldest alongside other venerable institutions such as Harvard, Yale, Columbia, and Dartmouth. In 1864, Rutgers was designated the land-grant college of New Jersey, narrowly beating out Princeton and launching a distinguished history in agriculture and engineering research and outreach. In 1869, Princeton and Rutgers competed again, this time in the first-ever, intercollegiate football game, with Rutgers winning 6-4. During the first half of the 20th century, several distinguished New Jersey schools, including law and business schools, merged with Rutgers to establish a strong Rutgers presence in Camden and Newark, as well as in New Brunswick. Through legislative acts in 1945 and 1956,
pus. Academic resources include state-of-the-art laboratories, the nation's 25th-ranked university research library, and high-tech computing facilities that are accessible to undergraduates.

Despite Rutgers' impressive size, students don't get lost in the crowd. Undergraduates enroll in 18 small- to medium-sized colleges that offer friendly campus communities. The student-to-faculty ratio is 15-to-1, comparable to many small liberal arts schools. Sixty percent of classes have 30 or fewer students. Rutgers' student body is diverse, coming from nearly every state in the union and more than 120 foreign countries. Full-time equivalent enrollment for the overall student population for all campuses totaled 40,584 for Fall 1999. Hispanics numbered 3,315 (8 percent); African Americans, 3,862 (10 percent); and Asian Americans, 6,372 (16 percent); with 83 Native Americans and 2,387 foreign students. There are 33,352 undergraduate students (3,611 Hispanics or 9 percent) and 304 Hispanic graduate students. Total full-time faculty on the New Brunswick campus runs to 1,848, with 40 of them Hispanic, based on 1999/2000 figures.

There are 72 African Americans, 150 Asian Americans, and 122 foreign students among the total University-wide; there are 2,487 full-time faculty, with 56, or 2.3 percent Hispanics. Ninety-eight percent of the Rutgers faculty holds a Ph.D. or an equivalent degree.

Among the group are 41 members of the prestigious National Academy of Science and its affiliates. Rutgers attracts high-achieving students and offers challenging honors programs. One third of entering students rank in the top 10 percent of their high school class.

Rutgers students are civic-minded, donating more than 100,000 hours of community service each year. Alumni include Nobel laureate economist Milton Friedman; actor, singer, and social activist Paul Robeson; former U.S. poet laureate Robert Pinsky; astronaut Terry Hart; NBA commissioner David Stern; FBI director Louis Freeh; U.S. Sen. Robert Torricelli; actress Calista Flockhart; and journalist Sandra Guzmán, who was editor-in-chief of Latina, the first national bilingual lifestyle magazine for the U.S. Hispanic market. She is an award-winning journalist, and she received an Emmy for her Telefundo special on the U.S. Cuban embargo. Guzmán currently is writing a self-help book for the modern Hispanic woman, The Latina Bible.

Rutgers' Professor David Levering Lewis, the Martin Luther King Jr. University Professor of History on the New Brunswick campus, received a second Pulitzer Prize for his biography, W.E.B. Du Bois: The Fight for Equality and the American Century, 1919-1963, the second in a two-volume series. The first volume, W.E.B. Du Bois: Biography of a Race, 1868-1919, was awarded the Pulitzer in 1994.

After successful lobbying by a small group of Latino students on the New Brunswick campus 30 years ago, the department of Puerto Rican Studies was created. This year, more than 1,000 students enrolled in courses in the program, now entitled Puerto Rican and Hispanic Caribbean Studies. The department offers interdisciplinary programs that examine the diverse political, social, and cultural histories of the Spanish-speaking societies of the Caribbean, as well as those of Hispanic communities in the United States. The courses examine "the historical background and the migration experience as well as the formulation of identities in their racial, class, cultural, and gender dimension." Students are exposed to a wide range of perspectives drawn from the social sciences and the humanities. The department works closely with other departments to foster a more comprehensive learning experience for its students.

Rutgers also offers Latin American Studies. The mission of the Center for Latin American and Culture (CLAC), is to research, document, interpret, and promote Latino/a, Hispanic, Caribbean, and Latin American arts and culture. Through its programming and publications, CLAC seeks to advance appreciation and understanding of Hispanic artistic production, scholarship, and cultural traditions. CLAC presents arts and humanities programs university-wide for faculty, students, staff, and the broader community beyond the University. These programs are designed to advance academic excellence, support Latino/a artists, further the documentation of Hispanic scholarship, and foster cross-cultural affiliations. CLAC accomplishes this through research, publications, and presentation of artists' productions and humanities scholarship.

A committee of Rutgers' Hispanic faculty, staff, and students established the Center in 1992. Funding for CLAC's operation and academic programs comes through the Office of the Vice President for Academic Affairs at Rutgers. Additional funding for artists and community programs is derived through grants from the Geraldine R. Dodge Foundation, Mid-Atlantic Arts Foundation, N.J. State Council on the Humanities, N.J. State Council on the Arts, the Rockefeller Foundation, Johnson & Johnson, and Hitachi America, Ltd.
My friendship with writer-journalist Richard Rodríguez of San Francisco began in 1983. I read reviews of his autobiography, *Hunger of Memory* (David R. Godine Publishers, Inc.), in *Newsweek* and *Time* that praised the book and the new author. But it was a feature in *People Weekly* (Aug. 16, 1982) that affected me the most and prompted me to establish communication with him. The title bothered me.

According to writer Tony Chiu’s piece, “*Habla Español?* Author Richard Rodríguez Does, But He Wishes the Schools Would Stop,” Rodríguez describes his heritage as “...a little suitcase I carry with me, with tortillas and a little Mexican cowboy suit inside, and that one day I lost [it] at a Greyhound depot.”

Rodriguez made pointed comments about affirmative action and its effects by confessing, “...I gained academically as a result of the far more disadvantaged Mexican-Americans who remained totally outside the university system. Their large numbers made my presence within the system something to be celebrated. That’s the source of the guilt that began to weigh on me.”

After reading the article, I composed a letter to Rodríguez and mailed it to the editors of *People Weekly*, who, in turn, forwarded it to San Francisco. I doubted seriously that he would take time out to answer, being busy promoting his book. But I was wrong. On Oct. 28, 1982, I received a typed letter from him! He regarded my remarks to him as “thoughtful and kind,” a fact that I would argue with anyone because my sentiments had been angry and defensive. I described my childhood in Alpine, Texas, and my education in a segregated barrio school called Centennial, a crowded facility two blocks from my parents’ house with a 100 percent Mexican-American student body and a 98 percent Anglo faculty. My classmates and I had no formal introduction to English; we were literally thrown into the proverbial pool of phonics and numbers, and told to swim or sink.

His comments brought back dark memories of times when we were punished physically for speaking Spanish, the only language we knew and loved. As descendants of Mexican immigrants, who found themselves on the north side of the Río Grande after the historic signing of the Treaty of Guadalupe-Hidalgo (Feb. 2, 1848), we spoke Spanish from infancy. Our madrecitas and abuelitas sang arrullos (lullabies) and related cuentos of La Llorona in Spanish. We conversed in Spanish at home and listened to priests and nuns reciting the rosary in Spanish. All the aves and salves were in Spanish, as were our confessions every Saturday afternoon in a small confessional that Sandra Cisneros best describes in her short story, “‘Merican,” as smelling like “…the inside of a person’s ear...” (La Llorona and Other Stories). We mastered the use of the subjunctive in Spanish by age 5 and learned the folklore of our ancestors through juegos, supersticiones, adinmanzas, y tradiciones. Along came the teachers with their “different” sounds and ideas, using pointers and paddles, asking us to stash away all that we had learned en nuestra casa for the first five years of our lives. I recall watching a little boy...
being spanked for speaking Spanish in the classroom. An entire class of sixth graders was assigned to write "I will not speak Spanish in this class again" a thousand times. The physical punishment of children for trying hard to communicate in the only language they knew angered and scared my classmates and me deeply.

And now, here was this hotshot Hispanic writer from San Francisco condemning these actions and stating that Spanish was "...a language spoken against the gringo in order not to be overheard...the language of the barrio...one way of evading majority society." I disagreed because in Alpine, Mexican-American children and teenagers did not attend school with Anglos until ninth grade. If anything, we were trying to improve our command of English and be able to compete with the gangster from Central Ward Elementary School, our crosstown rivals who beat us in Interscholastic League writing readiness and number sense, but lost to us in football and basketball.

As I read the second paragraph of his letter, I began to understand what he had attempted to say, but that the reporter was unable to explain satisfactorily. Rodriguez was actually differentiating between private and public language, not Spanish versus English. I read the note several times before responding and asking him to visit our campus at his convenience.

He was professional enough to respond, asking for a rain check because he was moving to Mexico City to begin researching materials for his second book. I would have to wait five years before we could actually meet. And we did on my home turf!

In 1987, Sul Ross State University hosted a conference on Hispanics and Higher Education, with support from the Fund for the Improvement of Post Secondary Education (FIPSE). Richard Rodriguez was invited to deliver the keynote lecture. He flew from San Francisco to El Paso and rented a car for the trip to Alpine.

On Oct. 14, 1987, Rodriguez and I met, and had dinner and cocktails. We discussed topics from education and writing to jogging and weight lifting. He answered my questions about his life at Berkeley and his decision to leave academia to begin his career as a writer. We talked interminably about his life and mine, and found many common threads. By the end of the evening, I knew I had found a role model.

His presentation in the Marshall Auditorium on the Sul Ross campus the following night was delivered to a capacity crowd. After the lecture, Rodriguez answered many questions from the audience and sat on the edge of the stage to autograph copies of his book. A standing ovation at the end of the program indicated that he had succeeded in reaching the crowd—and they had accepted him. I was proud of myself for suggesting his name to the planning committee.

From that point on, Richard Rodriguez and I continued to write and telephone each other. I mail copies of my short stories, plays, and books to him because I value his opinions and ideas. I include Hunger of Memory in my Chicano Literature syllabus and have sent copies of the critical essays written by my students. He pens notes to them, encouraging them to continue their study of Chicano literature and culture. When I asked him if he would agree to a teleconference with a Mexican-American studies class taught by a colleague of mine, he was very cooperative and enthusiastic. The teleconference was a highlight of the class. Hunger of Memory was published nearly two decades ago and was followed by a deeply moving book, Days of Obligation: An Argument With My Mexican Father (Viking Press). Written in luminous prose, the book examines Rodriguez's relationship with his parents and the Mexican ancestry he has learned to understand and embrace. Published in 1992, the second book of the trilogy received critical acclaim in California and New York. earning Rodriguez a nomination for the Pulitzer Prize. The scholarship boy was now a recognized man of letters in America.

He encouraged me to send my work to different journals and publishing houses. "You are a private writer, Abe," he once told me, "one who can create great pieces of fiction in the privacy of your home or office, but you remain unseen by people in the publishing world!" Ever willing to help, he gave my name to Gibbs M. Smith, publisher of Peregrine Smith Books, Inc., of Layton, Utah. He mentioned my writing to Chicano playwright Luis Valdez, founder of El Teatro Campesino de Aztlán and director of the hit film La Bamba. A couple of years ago, I followed Rodriguez's advice and wrote to Valdez about my plans to teach a course based on his life and works. He responded and agreed to a tele-
conference with my students. Furthermore, he read and evaluated copies of their original one-
act plays. Rodríguez's advice about talking to writers and editors has taken root in my life.

In a telephone conversation, I told him about my plans to write Keep Blessing Us, Ultima: A Teaching Guide to Bless Me, Ultima. I was going to work with my literary hero, Rudolfo Anaya of Albuquerque, NM, on this project. Rodríguez was elated when I told him that Eakin Press (Austin, Texas) was my publisher. That project was followed by six articles written on a variety of topics—barrio schools in West Texas, Chicconics, Children's Literature, Chicano Literature, and a 2,500-word biography of Anaya published in the Dictionary of Literary Biography.

When I was presented the opportunity to write Anaya's biography, I called Rodríguez and received his congratulations and good wishes. I would no longer remain unseen by editors and publishers. I had learned to take risks at last!

I decided to write this piece after discussing it with my mentor, Dr. Felipe de Ortega y Gasca, retired professor of English and Education at Sul Ross State University, who now resides in Kingsville, Texas, with his wife, Gilda Baeza Ortega. After re-reading the letters Rodríguez has sent to me over the years and recalling his conversations with me, I wanted to share my thoughts about my friendship with this talented man who gave the word "hungry" a different dimension for all people who read his works.

ON ETHNICITY

Richard Rodríguez describes himself as a Mexican, a mestizo with roots that include Spanish and Mexican Indian bloodlines. In 1964, he spent six months in Mexico City, the mecca of culture and history, researching materials for this second book. He rejects stereotyping of Mexican-Americans and the declaration by some that they are "puros Mexicanos" despite evidence that disclaims the existence of any type of thoroughly, pedigreed Mexican. "La Raza" refers to a cosmic race of people who are brothers of the same blood, in this case mestizo blood, a mixture of Spanish and Mexican Indian. This bonding was formed during the eras of the conquistadores who came from Spain in vessels called canoas, and raped the culture of the Aztecas, Mayas, Toltecs, Chichimecas, and hundreds of other tribes that existed in Mexico in the 16th century. El Español Castellano mixed with the Nahua of the náhuatl, creating the mosaic type of Spanish spoken in Mexico and throughout the Southwestern areas of the United States.

Having visited the Archeological and Anthropological Museum in Mexico City, Rodríguez learned the history of Mexico and formed his own ideas and views about the development of the culture. He believes that we are not living in a bilingual/bicultural society, but rather in a multicultural/multilingual one. America is a country founded by immigrants from different countries who brought their languages and cultures with them. The descendants of those founders and pioneers have continued to uphold their traditions and values. The key, however, is for people not to become "frozen" in their own backgrounds or entangled within their own roots. People have to progress and respect others as they are, not as they would like for them to be.

ON EDUCATION

Richard Rodríguez knew fewer than 50 words of English when he started school. In Hunger of Memory, he recalls a visit by nuns from the barrio parochial school to his parents' house to insist that little Richard be encouraged to speak more English. Consequently, his parents moved from their home in the Spanish-speaking vecindad to a neighborhood inhabited by English-speaking people.

Richard grew up in an environment quite different from mine, for instance, where Spanish resounded throughout Pueblo Nuevo and Pueblo Viejo, the two main barrios in Alpine, Texas. Conversations and business conducted in grocery stores such as those owned and operated by the Valadez, Sotelo, and Uranga families were entirely in Spanish. The Spanish hour was hosted nightly over local radio station KVFL, with my cousin, Vidal Torres, spinning polkas, boleros, cumbias, and corridos over the airwaves.

The only times we saw gileros in the barrio was during election time as they paraded through the streets, loudspeakers in hand, blaring out campaign promises and handing out pictures, cards, and candy to the children. Many Mexican-American women worked as maids in Anglo households and were driven home by their bosses late in the afternoon in shiny automobiles and trucks. On Sundays, I would see a small group of Anglo Saxon Catholics attending mass among a predominately Mexican-American congregation.

Rodriguez and I shared these thoughts when he spoke to my Spanish class at the university. He addressed my class in English, confessing a lack of fluency in Spanish. His tone and pitch were excellent, his voice strong and resonant.

There was little trace of a Spanish accent, and my students commented about his voice after his visit. They were curious about his background. I told them the truth.

Richard was a smart child—one destined to become a scholarship boy. From that boy would evolve the scholar. He read extensively—everything—philosophy, fiction, journalism, classical literature, and history. In Hunger, he describes a list he found in an article about an English professor nearing retirement—a bibliography of works recommended as a "must" for any scholar. Among the works listed was Plato's Republic, which Richard read with the "...patience and superstition of a scholarship boy..." He describes that boy as a great mimic, a collector of thoughts. But most of all, Rodríguez is firm in his belief that an education does change an individual's life and will separate him from his family. The innocence that exists before entering the world of books and learning the magic of the letters disappears.

ON LIFE

From his conversations and letters, I know that Richard Rodríguez loves the good life—exotic food, fine wine, designer clothes, and travel. A picture in the People Weekly feature presents him as I remember him—seated with family and friends in a posh restaurant in San Francisco, toasting the success of his work.

I have received cards and photographs from his many trips to foreign countries. A favorite snapshot shows him in the Middle East, dressed in a safari jacket, mosquitos towering in the background. This is the multi-faceted Richard Rodríguez—cosmopolitan, world traveler, explorer, scholar of languages and cultures.

His interview on PBS by Bill Moyers shows another side of Rodríguez, dressed in designer suit and necktie, ready to talk to the well-known commentator on World of Ideas. The two-part segment offers valuable insights. The one-on-one approach is effective. I use the video in my multicultural literature class as part of an introduction to Hunger of Memory.

One scene from the book that stays on my mind from the period after he returned home following a year at Oxford on a Fulbright fellowship. He describes his life at home, observing his parents, eating and laughing with them, and discovering that he does have his mother’s laugh! He has never allowed his fame to separate him from the warmth and respect of his family and friends. When he speaks to me of his parents, I hear a touch of melancholy as he realizes that they are.
getting older and will leave this world one day. Having lost both of my parents, I can empathize with those feelings of fear and sadness. The scholarship boy is a man who can write great pieces of literature and can also grieve over the illnesses and losses of those he loves.

ON GOALS

Richard Rodriguez's life is nomadic; he flies to England to research a piece on life along the Texas-Mexican border for the BBC. His excursions take him to Europe, Asia, and South America. He has traveled extensively in the United States as well, delivering lectures on university campuses and making appearances at professional conferences.

He enjoys talking about his life before *Hunger of Memory* and the eclectic list of jobs which he had while working his way through school—janitor, construction worker, and freelance writer. His goal in life is simple—to do the best he can. He has reached the pinnacle of success. In a telephone conversation on Christmas Eve, 2000, he said, "the publication of my third book, *Brown*, will complete the trilogy...my goal has been accomplished...I have everything I need."

Rodriguez works diligently in his small studio apartment in San Francisco, taking time to answer notes and calls. When I called Richard and conveyed my anger over unkink remarks about his personal life, I read in the *El Paso Times* in 1991, he simply laughed and said that writers will always have critics who will undermine their work. He remained calm and collected. I felt like breaking a few windows, myself.

ON FITNESS

He jokes with me about my bodybuilding and says that most men who work out are narcissistic. There is a strong self-love within those *hombres* who devote their time to pumping weights and follow strict diets. He is interested in building his body and has requested that I train him. I will do that for him if he will give me more advice about writing and publishing. I want to step into Rodriguez's literary and journalistic circles, mingle with the literati, and develop my craft as a professional writer.

Before actually meeting him, I saw pictures of him in several magazines. One featured him jogging near the Golden Gate Bridge. I thought it was merely a publicity shot, but as I began to communicate with him, I realized that he is serious about maintaining proper body weight and strengthening his muscles.

Rodriguez admits that he is not a powerlifter and prefers to jog and wrestle, but he has respect for men who put themselves through arduous workouts to achieve symmetry and grace. His support of physical fitness is evidenced in his documentary about life along the border. One segment was done at the famous Muscle Beach in Venice, where some of the best bodybuilders in California gather to work out.

ON WRITING

I have sent copies of my short stories, essays, original Spanish-language plays, and books to his San Francisco address. He reads everything I send and provides constructive criticism and insights. On various occasions, he has referred to me as being shy about my writing talents. "Don't be afraid to send your work to journals and publishing houses," he has advised on many occasions. "Remember that writers are human...accessible...we all have to face rejection and failure...that makes us stronger."

He offers solid advice about composition, organization, characterization, and plot development. Furthermore, he encourages reading everything humanly possible—daily newspapers, magazines, book reviews, interviews, and popular fiction.

The key to good writing, he asserts, is hunger. If writers are interested in pursuing a topic worth researching and writing about, they will develop a desire to research, write, edit, and submit a project. He constructs a writing schedule that he will like and respect. Publishers and editors are human, he advises, and have to be confronted.

When I mentioned to Rodriguez that I am in touch with Mark Medoff, author of the noted *Children of a Lesser God* and many, he responded that most famous people care about their reading audiences and are willing to give presentations. Because of modern technology, professors can arrange teleconferences and videoconferences with stalwarts such as children's and adolescent writer Judy Blume and Chicano writer Sergio Troncoso. "Understand," he added, "that writing is a tiresome and lonely endeavor." When he mentioned that he has spent some of his birthdays and New Year's Eves in lonely hotel rooms, train depots, bus terminals, and airports, on the way to meetings with publishers in New York or to deliver a talk in Florida, I was shocked by the reality of a writer's work. When he confided that he wanted my life—with the security of my family and my career to guide me, I knew Richard Rodriguez at last.

ON MANANA

This year, Rodriguez will present his book, *Brown*, the third of the famous trilogy, to the American public. It has been almost 20 years since I received an autographed copy of *Hunger of Memory*, a staple in my Chicano literary studies classes. Literary anthologies carry excerpts from it, especially the moving chapter, "The Achievement of Desire," with its penetrating message and simple, yet paradoxical, definition of success.

As a high school commencement speaker a few years ago, I referred to this chapter in my address to a group of impressionable seniors dressed in purple caps and gowns, young lions developing a hunger for a slice of the American pie.

These days, Rodriguez is seen on the * Lehrer News Hour* on PBS, participating in panel discussions, and narrating powerful documentaries. His work as contributing editor at the *Los Angeles Times* and associate editor of the Pacific News Service is an important outlet for self-expression and an integral part of his quest to spread the message of multiculturalism and autonomy throughout the world.

Rodriguez hopes to continue his work as writer/journalist with strong themes and messages to contemporary American society. He strongly believes that Hispanic writers have much to offer and are now being discovered and recognized. He is a good example. Among his many accolades, he has received one of the five Charles Frankel Prizes presented annually by the National Endowment for the Humanities.

Richard Rodriguez is carving a name for himself among American men of letters. I am eager to read *Brown* and will be proud to add it to my syllabus. To me, he is a talented man who has accepted me as a brother and as a writer who can step into any literary circle—if I want it badly enough.

"You have to take risks," he told me. "Don't be afraid to fail." Those words will open my novel, *Night Face*, a story about a complicated man who struggles against great odds to become what others tell him not to be. The title comes from a conversation I had with Richard a few years ago about his night face. A short time later, I received a handsome, dramatic 8-by-10 glossy picture of him, dressed in black, half his face hidden by a shadow.

Richard Rodriguez and Rudolfo Anaya will be the first writers to read my manuscript when it is ready. And that is all I am going to say about it. I am hungry now.
The Pop Paths of Joy Enríquez & Carlos Ponce

Two Performers Tapped by Disney

BY DIANA SAENGER

Latin heartthrob en Spanish soap operas, award-winning contender in the pop music field, and host of the Latin entertainment show Control, Carlos Ponce, and Latina pop and R&B “singing sensation” Joy Enríquez can be heard, if not seen, on Disney’s Lady and the Tramp II: Scamp’s Adventure. Ponce and Enríquez were asked by Disney to record the song “Bella Notte” for the feature film, portraying two pups in love, eating spaghetti.

Ponce offered his answer immediately. “I didn’t have to discuss my decision with anyone,” said Ponce. “Disney calls and you say, “What is it you want me to do?”

Enríquez had a similar reaction: “I have a lot of energy, and when they told me I was chosen, I jumped up and screamed. It was fun to picture the dogs being in love and sharing the spaghetti and letting the child in myself come through. Carlos was great to work with, and we did the song in English and Spanish.”

Ponce said he and Enríquez had a lot of responsibility on their shoulders, performing a new version of such a popular hit. “We looked forward to finding something that was good for both of us,” Ponce said. “We each had our own style of music but we knew we had to compromise to deliver a classic modern version.”
Joy Enríquez

Enríquez, 21, recently toured Singapore, Australia, New Zealand, Japan, Korea, Puerto Rico, and other locations to promote her new album Joy Enríquez.

"It was fun," remarked Enríquez, who told her fans, "I had from Star Search there who asked me to be on the show." Enríquez appeared on Star Search and won the female vocalist category 11 times.

"It was a dream come true," Enríquez said. "I had wanted to do it since I was a little girl. To be on that stage with Ed McMahon and background vocals to "When You Believe," the Whitney Houston/ Mariah Carey duet for The Prince of Egypt soundtrack.

Another dream came true when she signed with LaFace and then with the Arista label in 1999. A host of producers/writers ensured that Enríquez's the pup she portrayed in that song.

She is proud that her talent is enjoyed by a cross-cultural audience—and especially the Hispanic audience. "I'm getting a lot of fan mail from young Hispanic kids, and I'm happy they see hope that, like me, they can achieve their dreams

an album to promote, a voice to protect, and a goal to achieve."

Focus has been a part of Enríquez's life since she was a little girl, and she knew she wanted to be a music superstar. She grew up in Whittier, Calif, singing along to her sister Tiffany's piano playing. "My family was very supportive of my talent. I started singing at church and for our parents' friends when I was 5," said Enríquez, who tried out for the TV talent show Star Search when she was 14 but didn't make the show.

"A few weeks later, I was singing at a place, and there was a scout the whole audience cheering you on was a thrill I'll never forget."

Enríquez attended Orange County Performing Arts High School and had regular singing gigs at the Mondrian Hotel in Beverly Hills. In 1997, she was asked to audition for a spot in a girl group that Kenneth "Babyface" Edmonds was putting together. "I always wanted to sing with Babyface."

Her demo, "Enríquez," half-English and half-Spanish, written by her sister, amazed Babyface. Two hours after her audition, she was singing for Babyface and lending hip R&B essence on the album measured up to that of icons twice her age. She recorded "How Could I Not Love You" for the Anna and the King motion picture soundtrack. Her debut album featured her single "Tell Me How You Feel," which she co-wrote with producers Soulshock and Karlin.

"It shows my personality," Enríquez explained. "I'm a happy person, and I want everybody to see that."

Perhaps it was that happiness that spurred Disney to invite her to join Carlos Ponce in recording "Bella Notte." In her press interview, Enríquez is as feisty and friendly as if they don't give up."

Some say Enríquez is lucky. She says luck had nothing to do with it. She focused and planned her own career. At the age of 9, she'd call to make appointments with agents, pretending to be her mother. She's been determined to make it ever since. "I would try something, and if it didn't work, I'd say then it wasn't meant to be and try the next door."

Enríquez has strong family ties. Randy and Elena, her parents, owned an interior design company where Joy, "learned the ups and downs about business." Her father
and mother serve as her managers, and her sister is her road manager. Her brother, Joshua, is in college studying to be a lawyer. "Possibly he’ll look after the contract portion of my business," Enríquez said.

And why have family members managing her career? "Who else could you trust more? And they deserve this. My father bought me my first microphone. My mother drove me to tons of rehearsals and auditions. It’s because of their sacrifices that I’m where I am today."

Her family, she said, is also responsible for her spirit of never getting discouraged and holding onto the motto, “Life goes on…. I’ve seen my parents survive a lot of things, and esteem, Enríquez always reaches out to encourage others. "She’s a great role model," said Elena. "Her fans write her and ask for her advice, and she answers their letters and tells them if they have a dream, to pursue it.”

Carlos Ponce
Born in Santurce, Puerto Rico, Ponce, 28, made his first TV commercial in Puerto Rico at the age of 6. In the ’80s, Carlos Sr. and Esther Ponce moved their family to Miami, where Ponce’s uncle, who owned an advertising agency, cast the young boy in more TV commercials. "We were family, and I was cheap labor," said Ponce.

He heard the video he wasn’t sure where his father’s voice was coming from although he did recognize it. His wife recognizes Ponce’s voice is now his ticket to his future. And how does she react to the millions of fans and young girls screaming praise at his concerts? "It’s all part of the business and something she takes in stride," he said. "We’ve been together for 10 years. It’s not my career; it’s our career, and she’s happy if I’m happy.”

Ponce, a devoted family man, sang to his son in his wife’s belly while she was pregnant. "I wrote him a song called “Canción De Cuna” (The Cradle Song), which was on my first album, Carlos stars in, Sin Pecado Concebido. "Loosely translated, that means conceived without sin.”

Ponce’s green eyes and blondish hair do not immediately announce his Hispanic ancestry. "I adapt anyway where I’m working. And I can do accents so well, whether doing a Mexican or Argentine accent, the locals think I’m a native," said Ponce, who graced the cover of People En Español’s ‘95 Most Beautiful People 1998 edition. Good looks aside, his business plan and strong family ties keep him grounded. He has two older sisters, and his brother is his road manager. Emilio Estefan, who is husband and manager of pop superstar Gloria Estefan, is his manager.

---

Ponce’s first album was named Album of the Year, New Artist, by Billboard Magazine, and both Best Album Launch and Best New Artist by Eres Magazine. At the age of 9, Enríquez would call to make appointments with agents, pretending to be her mother.

---

they always said if it’s meant to be and it’s God’s will, it will happen.”

Enríquez is proud of her rise to fame from the small town of Whittier. “I’ve been all over the world and signed with a major artist,” she said. "What more can a girl ask for?"

Reared in a church-going family, Enríquez said her love of church and its people came from her family. "I love singing at church, and I love giving back to the church members. The church has been there for me all my life. To go there and perform, and to sing and touch people in an unconditional way is the best feeling in the world.”

"Joy loves people and loves what she does,” said her mother and manager Elena. "And it shows in everything she does. She works with many community organizations, such as DARE and Parents Against Cancer. Joy has a tender spot for kids."

One who learned early on what positive feedback can do for self-

He finished school, married his high school sweetheart, Veronica, and landed a job as a host on Control. "It had a great audience and was the first Univision show created to target young Latino Americanos in the United States...they were losing us to the MTV-type shows.” By 18, Ponce had landed a role in the Latin soap opera Guadalupe. He began writing music, and when he was allowed to sing one of his songs on the show, he was catapulted into a singing career.

Now that Ponce has had time to adjust to being a pop star, how does he feel about being immortalized in a Disney film? "I’m excited. This opportunity is something you want to do for yourself, your ego, and your family, so they can be proud of you,” Ponce said, "and for my son, who is 17 months old and running up and down the hall as we speak.”

Ponce said the first time his son
Florida Education Reform Draws Plaudits and Potshots

Task Force to Develop Seamless K-16 System

BY JEFF SIMMONS

"The legislation will have one of the most profound effects on the enhancement of opportunities for minorities and other disadvantaged populations in the state."

Sen. George G. Kirkpatrick, Jr. has served as the executive director of the Independent Colleges and Universities of Florida since 1996.

The way George G. Kirkpatrick Jr. sees it – Florida’s education system is overdue for change.

The current structure is riddled with problems, universities need more hands-on control over their charges, and Hispanic and Black students often don’t have the same opportunities as White students, he says. But now, the former Democrat-turned-Republican ex-senator says, there is hope on the horizon.

"I believe the changes that will take place as a result of new legislation are probably the most significant changes I’ve seen anywhere in the country in the last 10 to 15 years," says Kirkpatrick.

"We are moving from a system that focused almost entirely on the process, on agencies, on funding formulas, and institutional priorities to a system that will be seamless from kindergarten through graduate school, that will be focused virtually 100 percent on the student and will be as close as we can get to 100 percent outcome-based."

Kirkpatrick, currently executive director of the Independent Colleges and Universities of Florida, is speaking about the voter-approved shake-up destined to recast Florida’s education system. It’s the most radical overhaul in decades, a movement that has drawn a widespread mix of plaudits and potshots.

The reforms were triggered by the 1998 Constitutional Revision (known as Amendment 8), which abolished the structure of the state Board of Education. The traditional framework included the governor, a cabinet, and an elected commissioner of education. Now, the new seven-member state Board of Education is appointed by the governor, and his board appoints a secretary of education. Once in place, the new board will impose board policy for public schools, community colleges, and universities that enroll an estimated 2.6 million students statewide.

The revision prompted a thorough review of the strengths and weaknesses of the state’s education system, and last year, the state legislature inked a series of recommendations to revamp the structure and get the ball rolling.

The governor, the speaker of the House of Representatives, and the
Senate president assembled the Education Governance Reorganization Transition Task Force, which is overseeing the transition until it takes effect in early 2003.

The 11-member Task Force, officials say, must create a “unified, efficient and seamless kindergarten through graduate-level education system.”

“Florida has taken a monumental step forward by making the commitment to dramatically change the governance of education to ensure that all Floridians have access to a quality education,” said Gov. Jeb Bush, when he announced the Task Force.

“This is no small task—to move our state from a system that has been process-focused to one that is child-focused and based on performance standards.”

The work, which will take place over the next two years, includes addressing equity in access and academics, efficiency in funding and collaboration, and improved coordination between various educational agencies. And it affects all grades, from kindergarten through the end of graduate school.

The steamroller “flattening the traditional structure” already is forging ahead. Earlier this year, the state legislature gave the thumbs-up to a plan to abolish the state Board of Regents, which has historically overseen public universities.

The Board of Regents was dissolved July 1, and its authority is currently split between the state board and new state-appointed Boards of Trustees. They will preside over Florida’s 10 state institutions, a modification that will grant each one more muscle over its programs and livelihood.

Each university board consists of 13 members responsible for handling day-to-day operations at their institution. They will be able to hire and fire or college president and hold the president accountable for student performance.

Community colleges in the state currently have boards of trustees.

“This is dramatic,” says Laurie Cain, the transition task force deputy director. She exceeds Kirkpatrick’s assessment of the extent of change. “This is the most comprehensive reconstruction of education governance at least since the Board of Regents was created about 30 years ago.”

John Van Gieson, spokesperson for the Independent Colleges and Universities, adds, “This will have more of an impact on state universities. It’s a whole new ball game for them. Now a board of trustees can decide to add a degree program rather than wait for approval from the Regents.”

Education experts maintain that the new system will give an unprecedented power base to a single state board because it will encompass all facets of education in the state. It also grants significant power to the governor. There are close to 170,000 students in state colleges, and 421,000 in community colleges. Officials say another 80,000 are enrolled in private four-year colleges, and 14,000 in private, two-year institutions. The Task Force is charged with making a sweeping series of recommendations.

By next March, members must develop standards and guidelines to ensure coordination of all levels of education and prepare a plan to define each postsecondary institution’s role in the community.

Members also must coordinate college and university budget requests and develop rules governing the selection and evaluation of university presidents.

By the following year, the Task Force must prepare recommendations regarding the waivers from rules and statutory changes that should be implemented to make the system operate fluidly. And soon after, members must create an end-of-term paper on all that has been accomplished, what is working, and what still needs to be done.

The new Florida Board of Education formally assumes its powers on Jan. 7, 2003. The reforms are occurring on the heels of concerns that many students weren’t faring as well as they could in Florida schools.

In recent years, small changes began to lay the foundation for the new structure to be erected. For instance, says Cain, charter schools were okayed, and students in low-performing schools were given “opportunity scholarships.”

“The reform effort has been building and building until this reorganization. It’s a manifestation of a whole different philosophy of education in Florida,” she adds.

Nevertheless, not everyone is embracing that new philosophy. Critics, who are largely Democrats, are adamant in their resistance to the change on the premise that it is...

purely partisan. It appears as though non-educators and primarily Republicans are being handed the reigns of the school system.

They say that in early June their fears were borne out. On June 6, the governor named his seven picks for the new state Board of Education. Bush appointed Jim Horne, a Republican legislator with no formal experience in education administration, as the state’s new secretary of education. For the next 18 months, he will preside over the transition to the new system.

Gov. Bush selected Phil Handy, a businessman and Republican fundraiser who spearheaded the Task Force’s blueprint for reform, to chair the new board. Handy has not returned repeated calls by The Hispanic Outlook to discuss the reforms and his role.

Still, the governor followed through on a promise to appoint a diverse board. Of his seven appointees, two are Black and one is Hispanic. However, critics countered that most were Republican loyalists.

Critics, led by U.S. Sen. Bob Graham (D-Fla.), contend that the new educational model infuses politics too deeply into the education system.

Graham is heading a committee, the Education Excellence Initiative, to lobby for an initiative to be placed on the November 2002 ballot to discard the reforms, and replace them with yet another system. Graham twice vetoed measures to abolish the Regents when he served as Florida’s governor.

“The major weakness of this system, and the largest danger, is that it will be controlled by politicians,” says Robin Gibson, a spokesman for the highly Democratic opposition group “This has to be taken out of the political arena.”

Graham’s committee wants a constitutionally mandated Board of Governors to control education, a board that would in fact be similar to the Regents. The governor would appoint its members, but to terms longer than four years.

State Republican leaders assess the situation differently and see their changes spelling out a better future for Hispanic and Black students. Earlier this year, the governor focused on the distorted playing field, admitting that the state’s schools have shortchanged minority school children.

In a statement, Bush said: “The cycle of failure of the public schools system to respond to the need of each student must be broken.” His comments addressed findings that exposed how poor, minority kids in the state’s worst schools performed well below those in wealthier and White areas.

The findings, the meat of a report by the state’s Equity in Educational Opportunity Task Force, revealed that Hispanic and Black students have not received the same opportunities to enroll in advanced placement courses as students in wealthier neighborhoods, they have less access to guidance counselors, and their schools are inadequately equipped with computers and library resources.

“Many schools serving predominantly poor and minority students require dramatic change to significantly improve student achievement,” stated the governor.

One solution offered in Florida by Bush was the touted “A-plus” plan, in which students in failing schools can receive tuition vouchers to attend private ones. Nevertheless, it comes amid a tempestuous battle over affirmative action. Hispanic and Black constituencies have rallied against the governor’s efforts to end affirmative action programs.

His supporters maintain that the looming tidal wave of revisions will improve education for all students in all grades. “The goal is to improve the lives of all students,” says Cain.

“If there are minority students whose needs are not being met academically, if they have problems in their ability to access services and program, and if they’re being under-
served because they aren’t in an area that is meeting their academic needs, then the new governance structure will bring that to the forefront in a much more consistent way so those needs can be addressed.

"We know that while Gov. Bush believes to the core that every student can learn, there are pockets within the student population that are not being served, and in some cases, minority students make up a higher percentage of those populations."

Kirkpatrick agrees. "The legislation will have one of the most profound effects on the enhancement of opportunities for minorities and other disadvantaged populations in the state," he says.

His association, Independent Colleges and Universities of Florida, represents 27 nonprofit institutions enrolling 94,000 students. He pointed out that the changes would allow students more choices when selecting a college in their home state.

"This is the first time in 20 years that we have provided state need-based financial aid to part-time students," he says. "It has been very, very discriminatory against people who are struggling to find a way to complete their degrees."

He said one effect would be the ability of students to enroll in online courses outside of a designated geographic area.

Kirkpatrick faulted a Regents' policy mandating that state schools could only provide distance-learning courses to students within their surrounding neighborhoods, which narrowed opportunities. He sees this changing in the near future.

"Our main problem has been access," he says. "And this new legislation will significantly increase access for minority populations. This new structure is going to give us a much better infrastructure to reach out to those people who need an education."

Kirkpatrick argues that the system will provide more stability and opportunities at a time when breakneck-speed technological advances are forcing many older students to seek an education. "A huge portion of our population is going to come back to school to get additional training in order to achieve some sort of stability in the workplace," he says. "This is really important for an immigrant population because they gave up everything to come here, and if they’re not 100-percent welcome at the door, they can fall behind very quickly."

Of the 1.4 million students in kindergarten through 12th grade in Florida, 19.1 percent are Hispanic.

At the heart of much of the reforms is accountability, or promises of more of it. Task Force members have complained that the State University System has not had any tangible accountability, and that the current system hasn’t centered its attention on students.

Under the new approach, members say, one system will need to address needs better, rather than three or four separate ones. This approach to "silverness" is designed to improve how students receive aid and improve communication between different educational levels.

Critics, though, have countered that the reforms already have been disruptive and predict the transition will be anything but seamless.

Dozens of top administrators at state schools have resigned over the last year, and some experts wonder whether lesser-qualified successors will be installed.

Kirkpatrick, nevertheless, maintains that the new system will echo success already experienced at his nonprofit institution. Independent colleges, he points out, already are controlled by Boards of Trustees.

"Governance by boards of trustees works well for Florida's independent colleges and universities," he says, "and we are confident the same structure will enhance rapid quality improvements at our state universities."
When keynote speaker Carlos Seise, a world-renowned tenor, talked about his struggles growing up, abandonment by his father, going hungry so his sister could eat, and his mother raising three children alone, his audience could relate. When he asked, “How many of you have struggled this way?” dozens of young hands went up. Some 500 of those in the audience were Hispanic junior and senior high school students, attending a conference at Muskegon Community College (MCC).

In the unlikely spot of West Michigan, not a region recognized for a large Latino population, an event that targets those students—the Hispanic Youth Career Conference (HYCC)—as been thriving for years. According to Dennis Wilson, dean of community services at the College, “there is a real effort in Michigan to be hospitable to minorities.”

Wilson, “plus a few members from the local Hispanic community—Catholic Social Services, El Centro Latino,” formed the resolve to reach out to Hispanic youth 16 years ago. The highly successful conference grew out of that resolve. The Gerber Baby Food Company is headquartered not far from the College, in Fremont, and the Gerber Foundation is a major funder of the event. Some funds come, too, from MCC, the IBM Corporation, Grand Valley State University (GVSU) and Western Michigan University (WMU), which have been invited to co-sponsor since 1999. In addition, each student and adult from the participating high schools is asked to pay $5, “with a guarantee,” says Wilson, “that we will cover costs for any who can not pay.” In most cases, he says, the schools pay for their students.

Both Grand Valley State University and Western Michigan University have quite active Hispanic clubs on their campuses, says Wilson, noting that MCC did too, but doesn’t have one at present.

There was an MCC Hispanic club for about four years, he said, and he was a sponsor. “We took trips to Chicago and Lansing to conferences and took in concerts and plays and conducted fundraisers. I was younger then and had more energy.”
now a West Michigan Hispanic Chamber of Commerce, which he chairs. Garza says he arranged to have many of the forms used in his real estate business printed in Spanish, and Hispanics now are 70 percent of his business.

The HYCC Planning Committee, shown on this year’s programme as 34 strong, 28 with clearly Hispanic names, three of them being Garza, meets in November and December to work on the conference, held this year in March, and to secure names of adult role models who may be new to the area. The role models are contacted and asked to set aside the day of the conference and plan to talk with students about their careers.

Role models for 2001 show an impressive range of occupations in 38 categories ranging from accountant to veterinarian, and including broadcast journalism, law, college teaching, engineering, and more. There are 60 role models—all Hispanic.

The role models are there to answer students’ questions about how they made it in their professions. Wilson says they bring instruments, displays, products, and literature with them and set up almost a display table, in some cases, to show students about their work. “Over the years,” he says, “we have several who have attended the HYCC, as high school youth or as college students at MCC, who are now invited back to serve as role models.”

The Planning Committee, in its written welcome to the students, said the program was designed to accomplish three things: “to encourage you to finish high school and select a career that appeals to you, to invite you to consider various options for your future education, and to focus on the Hispanic heritage that is so significant.”

“This year for the first time,” says Wilson, “we got a number of kids at the conference who had just arrived in the area from Mexico and did not yet speak English. People at hand served as translators for them.”

“Eight or nine years ago,” says Garza, “I got invited as a role model, and so I went for that, and they’ve kept me coming ever since.” Garza says he’s not so much a role model at the conference now, but more into directing the students to its activities. He notes that some of the adult mentors came up from South Bend, Ind. “Each year it keeps getting bigger and bigger. We have the junior high and the high school now.”

Specific conference events are arranged for each of the groups. Workshops for middle school this year were on graphics, personality, self-esteem, TV careers, and the transition from high school to college. The keynoter for the younger students was Dr. René Pérez Rosenbaum, associate professor in the department of resource development at Michigan State University, and an assistant to the director of the Julian Samora Research Institute.

“They always like the keynoter since we have had some exceptionally fine speakers,” says Wilson, who draws this conclusion from a survey of evaluations “by all the youth and the adults who accompany them.”
Wilson confirms that the numbers of students and adult participants is increasing. Three years ago, 180 students attended, “This year we had 500-plus students, 60 adult role models, and about 40 high school counselors.”

All the numbers are impressive, especially given that the pool of Hispanics in the region is not large, even with the 65-percent increase since 1990 noted in Census 2000 and that many of the migrant families aren’t around in March. Some of Muskegon’s public schools, says Wilson, “have a bulging enrollment of several hundred Mexican children in September, but in October, they are gone and do not return until the next April or May.”

Asked how he and the HYCC committee manage to pull in so many high schools and middle schools, Wilson says he sends a letter to the area school superintendents in January, asking them to designate a person to receive a follow-up letter about the upcoming conference. “This is important since each school may have a different person or office handle the minority affairs. Sometimes it is the counselor and sometimes it is the principal who is the contact person.” Getting the right communication path early in the game is critical.

“Our office does the work of communicating with the schools and contacting all the adult role models and keynote speakers. We depend heavily on recommendations and decisions by the HYCC committee, but we require unity of command when it comes to keeping track of speakers. The committee decides on who will be the keynote, and then I contact the person.”

This year’s keynote for the high school students, Puerto Rican tenor Carlos Seise, recently moved to nearby Grand Haven, Mich. Seise’s topic, and the theme of this year’s conference, was “Livin’ la Vida Educada: Hope for the Future.”

“He provided a wonderful message of hope and encouragement for the youth, and, of course, sang for the students,” says Wilson. “It was a mountaintop experience for all of us to hear such a voice.”

Wilson adds that although Seise has an international schedule of performances, “it would be great to have him as a singer/speaker at some national Hispanic youth conference or convention where Hispanic academic leaders gather.”

Seise, who told the students, “Listen with your soul and follow your heart,” was not the only singer or musician at the conference. For the past two years, high school students have provided music and song during the lunch hour, a performance before peers that Wilson says “takes a lot of courage.” It is not without its rewards. “We have paid a small stipend to the singers, much to their surprise, following the event,” he adds.

“We judge the impact by the popularity of the conference and the increased numbers attending each year.” He mentions that there’s a big interest in the Spanish language at MCC these days, and that the college now has three full-time Spanish instructors where it had only one just a few years back.

As for the impact of the students on the adults, Wilson has exuberant praise. He calls the youth attending the HYCC conference “model citizens,” and “a joy to have on campus,” adding, “This must come from some value orientation from the family.” He also said that the Hispanic students at Muskegon are “the most courteous, never in trouble, very respectful, appreciative of any student group.” He is not the first educator to make this claim to NO. Others have similar praise for immigrant parents they encounter.

**Recruitment**

Though the broad goals of the conference are to encourage and inspire, the event is also an opportunity to demystify such subjects as financial aid, and to recruit. And not just to college. Joe Garza says he recruited someone to come and work for him in his real estate business. It’s likely that many other kinds of connections are forged through the day’s interactions. “And when the College held a Parents’ Day last year,” Garza tells NO “two of the parents enrolled in the college, too.”

Wilson says that after the conference, he sends a follow-up letter to each high school senior who attended, an invitation to attend Muskegon Community College. “Our admission office does the same.”

Wilson sweetens the pot to spur prompt action. The first five Hispanics to apply to MCC get a $100 book scholarship.

The number of Hispanic students at MCC, he says, “has grown very slowly and steadily from around 100 to about 250 today. It is hard to determine exact numbers since some Hispanic women take their husband’s name and then don’t claim their heritage as an Hispanic. Also, the melting of races makes it difficult to accurately record who is who.”

But many of the MCC youth, and conference attendees, are second-generation migrants, he says.

“When the keynote speakers at the conference have called out the names of different cities and areas of Texas, the students will give a
roar if their home of origin is named. This leads me to think that the families still have some linkage or kinfolks back in Texas, and they associate with that part of the country. Thus the migrant tradition is still in their souls.

Wilson has his own migrant memories. He worked in Michigan's cherry orchards, side by side with migrant families, "in the hot summer days of July and August in the mid-1950s."

Garza, who says his folks were migrants, remembers, too, and his memories spur his activism.

"A lot of people talk and have suggestions," he says, "but you also have to get involved."

"We know what we didn't have when we were growing up, and we know it all starts with the kids. They are the future, and we have to do our small part."

**CAREER PATH:**

**CARLOS SEISE**

Carlos Seise was born to sing. But he still worked hard to become the tenor whose voice and ebullient personality have thrilled audiences nationwide. To understand the forces that shaped this artist, you have to start with the Caribbean island of Puerto Rico, where Carlos came from.

Before deciding to pursue the risky career of a professional opera singer, he earned a medical certificate from the U.S. Army in San Antonio, Texas. But his obvious gift could not be denied. He studied voice seriously while working as a teacher in an elementary school. In 1987, he won the Tenor Prize in a competition of the Metropolitan Opera Company, then made his professional debut in 1989, singing Rodolfo in Puccini's opera *La Bohème*. His "pure, clear, warm tenor voice" was soon in demand all over the world.

At 21, he began studying at the Conservatory of Music of Puerto Rico. Next, he attended The Juilliard School in New York City, after receiving a Fulbright scholarship. Seise studied under Payton Hlibit and Carmelo Savoca, also the teacher of the great Spanish tenor Plácido Domingo.

His operatic career has seen many triumphs. He has performed throughout the world, from Beijing, to Boston, to Budapest, to Buenos Aires. And this year, as noted, in Maskegon, Mich.

Seise has shared the stage with Plácido Domingo, Luciano Pavarotti, Eva Marton, Verónica Villaró, and many other distinguished singers. His generous spirit is amply demonstrated by his efforts to help raise money for charities around the world.
The College as Community Healer

Muhlenberg Faculty and Students
Bridging a Divide

BY INÉS PINTO ALICEA
relationship between Latinos and Whites in Pennsylvania's Lehigh Valley has had its share of tensions. But some of the faculty and students at Muhlenberg College in Allentown are working to build bridges between the two communities. Latinos are about 25 percent of Allentown's 106,000 residents.

Michael Bruckner, the College's vice president for public relations, called the Latino population "vital to the Allentown community and important to the future of the region" and noted that Muhlenberg has conducted community outreach activities for a number of years. The College even has a service department that links volunteers from the campus with community projects.

Julio Guridy, a Latino activist who has run for city council, and an executive with Fleet Bank in Allentown, said the relationship between the Latino community and Muhlenberg has been a "win-win situation" for both and has helped the Latino community secure more partnerships, and possibly even some scholarships for underprivileged Latinos, with other higher education entities in the Lehigh Valley.

Anna Adams, of Puerto Rican descent and author of the book Hidden from History: the Latino Community of Allentown, Pa., has taught at Muhlenberg for 18 years in its history and language departments. Adams is active in several projects affecting the Latino community. She is on the board of Casa Guadalupe (which receives all profits from her book), a social services agency offering health education programs, senior programs, after-school programs, a women's clinic, and tutoring. She is on the Board of the Hispanic American League of Artists for Latino Children, which offers classes in painting, acting, and classical dances of Latin America to Latino youth. She is a founding member and Muhlenberg representative to Alianza Latina, a group that addresses Latino concerns in the community and is comprised of representatives from many organizations. She is active with Communities in Schools, a program that works with at-risk students to keep them from dropping out of school.

"My efforts have been supported by the College, not thwarted," said Adams.

Sam Lapostola, dean of Muhlenberg's Evening College, praised President Arthur Taylor for encouraging strong ties with the Latino community, noting, "When it comes from the top of the organization, it's more powerful."

Taylor was one of 50 college and university presidents cited in 1999 for outstanding leadership in the field of student character development by The Templeton Guide: Colleges that Encourage Character Development.

"Leaders in education must actively endorse student volunteerism within the community," said Taylor. "It promotes character development and supports learning objectives in the classroom."

Danielle Lehmans, an elementary education student who graduates in 2002, said the students that she has tutored and befriended "have ignited a flame within me." Lehman provides support to the community Homework Program at Casa Guadalupe, a program that supplements the education of students who are struggling in school, many of whom speak little English. Lehman was named Casa's first education assistant.

Guridy, a co-founder of Alianza Latina, said that while the College has provided a friendly environment, Latinos have not felt as welcomed by some of the city hall politicians, several of whom have very vocally opposed Latino immigration to the area. Guridy said he hopes through his work and the work of others that the atmosphere will be more hospitable to the Latino community and that all will understand that "if the Latino community prospers, their businesses also will prosper."

Adams' book details how orchard owners in the Lehigh Valley went to Puerto Rico to recruit workers after World War II. Later, the textile industry, which boomed in the area, hired many of those recruits. In some of Allentown's schools, Latinos are as much as 80 percent of the student population. Many Latinos are employed in the health care industry, a major factor in the region's employment picture.

According to Adams, "One could live very comfortably and only speak Spanish in Allentown." There has been a great deal of "White flight" from downtown Allentown, she says, because of the growing Latino presence, which has strained the relationship between Latinos and Anglos. Allentown public schools are considered "distressed," which she said has made the situation "more polarized."

Erika Sutherland, an assistant professor of Spanish, is one Muhlenberg faculty member with very strong ties in the Latino community. Though not Latina herself, she fell in love with the language and the culture after studying Spanish in college, and her involvement with the community reflects her life philosophy that "professors should stand for more than scholarship work."

"The Latino community is not what attracted me initially to Muhlenberg, but the Latino community is a big part of what makes me stay here," she said.

Sutherland has launched a number of projects in the community. She formed the Grupo de Apoyo e Integración Hispanoamericano, a support group for Hispanic immigrant professionals and others interested in doing more than merely earning a living in the United States. The group helps acclimate new immigrants, creating educational and social opportunities for professional development, with guest speakers at near-
Comunidad Latina, a Latino student group, which works to raise awareness of Spanish-speaking cultures, visiting local restaurants and participating in many activities, including the annual Alianza Latina festival, held for many years at the campus until it outgrew the site. The group raised $1,400 for earthquake relief in El Salvador by selling empanadas throughout the college.

Other community outreach activities launched by college faculty and students tap into several age and interest groups.

Men's soccer coach Jeff Tipping, women's soccer coach Leslie Benintent, and former player Sean Topping presented an inner city youth soccer clinic at the Boy's and Girl's Club of Allentown that attracted more than 40 children.

Muhlenberg's Institute for Jewish-Christian Understanding sponsors Youth and Prejudice workshops that involve many Latino middle school and high school youth. The traveling education drama, "The Library," also plays to many Hispanic middle school students. Both programs deal with issues of interracial/intercultural diversity and understanding.

Every semester, through the foreign language department, there is a Cooperative Community Potluck Dinner involving local Latinos and the Muhlenberg community. The groups share a meal and enjoy good food, music, and dance. About 100 people typically attend the event.

Spanish students at Muhlenberg participate in activities at Iglesia Evangélica Luterana San Martín de Porres. Some attend Sunday services in Spanish, while others serve as day care helpers at the annual Academy of Latino Faith and Leadership. Latino church regulars, in turn, are invited to Latino-themed events at the College, including the Latino film festival and the Many Languages, Many Cultures Holiday Party.

Laposata said that since 1996, the evening college has offered five full scholarships to Latino students from the Lehigh Valley, and two recipients have already graduated. The College is encouraging five other institutions in the Lehigh Valley Association of Independent Colleges—Allentown College of St. Francis DeSales, Lafayette, Lehigh University, Moravian, and Cedar Crest—to begin offering scholarships to Latinos from the area.

"The Latino community is aware that education is the pathway to take," said Laposata. "The college has a very good relationship with the Latino community. It has been rewarding to be able to offer the scholarships." Tuition and room and board in 2000 ran more than $25,000.

Laposata said the scholarships are designed to provide people who have been working for a while to go to college for a degree and ultimately become leaders in the Latino community. Two members of the Latino community join Laposata and another college official in selecting the recipients.

Muhlenberg is a private undergraduate college founded in 1848 and affiliated with the Lutheran Church. Of its 131 full-time faculty, two are Latino. Of the 2,000 day students, 39 are Hispanic.

"The Latino student body is growing and that's positive," said Adams. "Once you get a critical mass, you get more people coming." But, she added, Latinos are still very much a minority on the campus.
Technology, Diversity, and Globalism
Focus of NACE National Conference

BETHLEHEM, Pa.

Technology, diversity, and globalism—and their implications for the college employment market—were the focus of the National Association of Colleges and Employers' (NACE) 2001 National Meeting & Exposition in Las Vegas, Nev.

Keynote speakers for the conference included Ann Curry, NBC News anchor; Herman Cain, chair and president of Godfather's Pizza; Curt W. Coffman, global practice leader for The Gallup Organization; and Ken Dychtwald, founder and CEO of Age Wave Communications.

The conference—featuring 40 presentations, professional development seminars, and workshops—was tailored to career services practitioners who counsel college students on careers, and staffing professionals who recruit and hire new graduates.

National Meeting program topics included the steps to developing Web-based internships; increasing diversity of the applicant pool; changes, opportunities, and challenges presented by the new global economy; establishing a campus identity to improve recruiting outcomes; regulations and procedures that affect the eligibility of foreign students for U.S. employment; benefits of partnerships for career services and staffing professionals and the students they counsel and recruit; and creating a career development program for students of color.

The NACE National Meeting & Exposition also included a showcase of more than 90 exhibitors displaying and demonstrating the newest products and services in the career services and college relations field.

NACE is one of the leading sources of information about the college market for career services practitioners who advise students and alumni in career-planning and the job-searching process, and for human resources professionals who recruit and hire college graduates.

ACE Reshapes “College Is Possible” Campaign

WASHINGTON, D.C.

The American Council on Education’s (ACE) “College Is Possible” affordability campaign is entering a new phase.

The campaign will focus more specifically on youth in first-generation, minority and underserved communities. ACE will effectively bring to a close the nationwide grassroots phase of the campaign, which began in 1998 and involved more than 1,300 institutions and 30 higher education associations in a variety of outreach activities. Beginning this fall, “College Is Possible” will partner with early- awareness programs such as TRIO and GEAR UP in a pilot program involving some two-dozen institutions.

“While hard to believe, it has now been nearly three years since this grassroots effort began,” said ACE President Stanley O. Ikenberry in a letter sent to all college and university presidents participating in “College Is Possible.” “We should take pride in the accomplishments. In just over 30 months, we estimate the campaign reached some two million Americans through our website, www.CollegeIsPossible.org; toll-free number, (800) 433-3243; and the many partnerships established locally and nationally. Hundreds of news stories were generated on affordability, and thousands of events were sponsored locally by member campuses and organizations.”

Ikenberry said ACE intends to maintain the “College Is Possible” website for general use by the public and institutions, and also hopes to continue the partnership with the U.S. Department of Education on the use of the toll-free number. In its new phase, ACE Vice President William Harvey and staff in the Office of Minorities in Higher Education will lead the program.

“We should not be surprised by the strong public interest in “College Is Possible,” Ikenberry said. “Americans are hungry for solid, reliable information on college access. The campaign responded to that, bringing together for the first time public and private institutions—two-year and four-year—all speaking with one voice on the issues of cost and affordability.”

More information on the new phase of “College Is Possible” can be obtained by contacting the ACE Office of Minorities in Higher Education, (202) 939-9395.
HACU-DOL/ETA Partnership
Building America's Workforce

SAN ANTONIO, Texas

Financial aid for minority college students was the topic of a special session at the Hispanic Association of Colleges and Universities' (HACU) 2001 National Capitol Forum on Hispanic Higher Education.

Thanks to an innovative partnership with the U.S. Department of Labor, HACU has been at the forefront of efforts to expand the role of Hispanic Serving Institutions (HSIs) in providing workforce development opportunities for the nation's youngest and largest minority population.

“Our member and associate member colleges and universities are playing an important role in providing Hispanic communities in every major state the academic and career development opportunities they need to excel, especially in today’s high technology workplace,” said HACU president and CEO Antonio Flores.

In 1999, HACU joined the U.S. Department of Labor Employment and Training Administration (DOL/ETA) in an innovative partnership that would target HSIs as participants in new workforce development initiatives stemming from the Workforce Investment Act of 1998.

HSIs, with an inherent advantage in the multicultural makeup of their student bodies, are being urged to capitalize on their expertise and their reach to the fastest-growing Hispanic communities they serve in every major state. The emphasis is on promoting diversity and success.

The HACU-DOL/ETA partnership led to three technical assistance workshops for HSIs: in Santa Monica, Calif., in 1999; Miami, Fla., in 2000; and San Antonio, Texas, in February 2001. Educators, corporate and public policy leaders, analysts, and DOL experts attended the three national conferences.

“It's absolutely critical that we work together,” said DOL/ETA regional administrator Joseph Juárez. “That's what we labor to do, to make sure that everyone not just reach the first rung, but have the opportunity to make a decent living.”

Each of the three conferences won high marks in participant surveys. HACU in 1999 was awarded a $55 million DOL grant to create the Career Power program, which is in place at II HACU-member HSIs in Texas, California, and Arizona. The welfare-to-work initiative is providing post-employment assistance to participants who receive free training at their job sites to meet their long-range academic and career development goals. Career Power seeks to enhance employee retention and productivity, while also providing participants with skills and confidence.

Politico: Hispanic Leaders Conduct Major Scholarship Drive

PHOENIX, Ariz.

According to Politico, "The Magazine for Latino Politics and Culture"—Leslie Sánchez, newly appointed executive director of President Bush's White House Initiative on Hispanic Education; the Association of Hispanic Advertising Agencies; and the Hispanic Scholarship Fund Institute are launching a $50 million advertising and scholarship effort to combat some of what they say are the biggest challenges facing young Latino students.

One of the biggest goals, reports Politico, is luring more Hispanics into the teaching profession. According to the groups' statistics, only one in 25 teachers is Hispanic, a factor believed to hinder learning by alienating young Hispanics early in the education process.

The bilingual ad campaign "FuturoMente" aims to recruit Hispanic high school students into the teaching profession. Another series is aimed directly at the parents of Hispanic toddlers, and asks them to emphasize teaching letters, colors, and objects, so as to inspire a curiosity for learning that could help the youngsters later on in school.

"We all know the achievement gap has not changed," said Sánchez. "Hispanics consistently perform below average on national assessment tests, and the disparities begin as early as kindergarten."

Bush praised the nonprofit Hispanic Scholarship Fund Institute's scholarship drive and discussed his own education reform proposals, which include raising school standards, accountability testing, more local control, an increased budget for reading programs, and more money available to traditionally Hispanic-serving universities and increasing Pell grants for Hispanics.

"Access is incredibly important. We must work as a society to extend the American dream to todos, to everybody," said Bush.
Berkeley College Names New President

Dr. Mildred García, vice provost for academic personnel at Arizona State University West, will become president of Berkeley College on Sept. 1. Berkeley College comprises five campuses located in New York and New Jersey.

"Significant to Berkeley College is Dr. García's pioneering efforts as a leader in securing opportunities in higher education for students and faculty of color. Berkeley College has one of the most ethnically diverse student populations in the [N.Y/N.J] metropolitan area, and Dr. García is committed to serving as a conduit to ensure that students of all ethnicities are challenged to realize their highest academic and career goals," said Kevin L. Luing, board of trustees chair-elect.

García has a bachelor's degree from Bernard M. Baruch College, a master's from NYU, and a master's and doctorate from Columbia University.

UT-Austin Professor Enjoys Honors

The Texas Association of Chicano in Higher Education announced that Dr. Angela Valenzuela, associate professor in the department of curriculum and instruction and the Center for Mexican American Studies at the University of Texas-Austin, received a 2000 Distinguished Faculty Award.

Valenzuela's research and teaching interests are in the sociology of education, minority youth in schools, educational policy, and urban education reform. She is the author of Subtractive Schooling: U.S. Mexican Youth and the Politics of Caring (SUNY Press, 1999), winner of this year's American Educational Research Association Outstanding Book Award.

Higher Education Leader Joins ACE Office of Women

ACE Claire Van Ummersen, former president of Cleveland State University, was named vice president and director of the American Council on Education's (ACE) Office of Women in Higher Education (OWHE). Earlier, she was chancellor of the University System of New Hampshire and a member of ACE's Commission on Women.

"Claire comes to ACE with a wealth of experience as a higher education leader," said Mills College President Janet Holmgren. "She has a great commitment to advancing women's leadership in higher education, and we are truly excited about the future of the OWHE under her direction." Holmgren chaired the search committee and is chair of ACE's board of directors.

LIU-Brooklyn Graduate Aims to Strengthen Urban Education

Hector Calderón said it is his "life's mission" to strengthen urban education.

The 35-year-old Long Island University-Brooklyn (N.Y) graduate figures education is a way of avoiding the exploitation suffered by his parents, who, back in the Dominican Republic, had only a rudimentary education and had no knowledge of English.

"You have to come to teaching with your heart," said Calderón. "You need to open your heart to the unique possibilities of each of the human beings you are going to engage."

Calderón transferred to the Brooklyn campus in his senior year and became a fellow of and received a scholarship for the Center for Urban Educators, a new program dedicated to re-imagining the education of teachers for urban public schools.

An educator/activist, Calderón has helped develop innovative programs for youth of color, has been a humanities facilitator at the community organization El Puente, and has risked expulsion for expressing his views about education.

Smithsonian Photographic Exhibition on Second Tour

Due to its overwhelming popularity, the Smithsonian Institution's traveling exhibition "Americans: Latino Life in the United States" embarked on a second national tour to 12 more cities. The exhibition presents an intimate portrait of the Latino community through the work of 30 prize-winning photographers. The 114 photographs display themes of family, community, work, sports, culture, and the arts, reflecting the breadth and variety of the Latino experience.

"Americans," a collaboration with actor/activist Edward James Olmos and photographer Manny Monrey, is the centerpiece of a multimedia program, consisting of a large-format book published by Little, Brown & Company, an HBO documentary, and a music CD released by Atlantic Records in conjunction with all units of MPT/Time Warner.

Collaborators include Carlos Fuentes, Julia Alvarez, Sandy Alomar Jr., and Celia Cruz. Photographers include Alexis Rodriguez Durante, Genaro Molina, Rita Rivera, Liliana Nieto Del Rio, José Gámez, and more.

Evergreen Names Riveros-Schäfer New Provost

The Evergreen State College (Wash.) announced the selection of Dr. Enrique Riveros-Schäfer as academic vice president and provost.

"I want to get to know the faculty, work with them, and learn the way they build their programs," said Riveros-Schäfer. "I want to become immersed in their work and to be part of their community."

Riveros-Schäfer, a native of Chile, was dean of the division of language arts at De Anza College, Calif., running the honors program and managing the English, reading, and speech departments. He was also vice chair of the Center for Latin American Studies at UC-Berkeley, assistant professor of Spanish

1831 08/13/2001 0 HISPANIC OUTLOOK 39
and Latin American literature at Occidental College, Calif., and has been on the faculty at the California Institute of the Arts.

Riveros-Schüfer has a doctorate from the University of California-San Diego.

**St. Thomas Executive a “Woman to Watch”**

In Florida, María R. Domínguez, executive director of the St. Thomas University Human Rights Institute, was named among the “101 Women to Watch” in a listing of Miami-Dade’s Most Influential Females of 2001, *Miami Metro* magazine described Domínguez as “a recognized authority on human rights law.”

Dominguez is active in both the legal area and the community. She founded the Human Rights Institute in 1991 to promote human dignity through research and education on human rights issues, social advocacy, and direct service to those whose human rights have been threatened or violated. In 1998, she was named a public member of the U.S. Delegation to the 54th Session of the United Nations Human Rights Commission, in Geneva. She is also a trustee of the Public Health Trust of Miami-Dade County and a member of the State of Florida Refugee Task Force and the American Immigration Lawyers Association.

**Loyola Chicago Graduate Promotes Greater Understanding**

Hispanic student leader Hugo Dubovoy, Jr., who emigrated from Mexico to the United States at age 13, graduated from Loyola University Chicago (Ill.) summa cum laude, with a double major in English and economics. He attended the university on a Presidential Scholarship and is preparing to study law, hoping to influence socio-economic policy to better the lives of the underserved across the globe.

One of only a few Hispanics in his high school, Dubovoy was “unable to endure the injustice of inaccurate stereotypes.” Through communicating with and teaching his peers, Dubovoy, at that time, went on to make friends and succeed, becoming a varsity swimmer and water polo player.

Driven to success early in life by attending a rigorous bilingual school in Mexico City, Dubovoy was part of two honors programs at Loyola, graduating with a 3.97 GPA. He worked for more than three years as a tutor at Loyola and joined the Sigma Pi Fraternity, helping implement programs designed to help others excel. He was also activities chairman of the inter-fraternity council at Loyola, a member of the Delta Pre-Law Fraternity, and was inducted into several national honor societies.

**Incarnate Word Administrator a Fulbright Fellow**

Dr. Pat LeMay Burr, new dean of international programs and initiatives at the University of the Incarnate Word (Texas), recently won a Fulbright Fellowship, allowing her to use her multilingual skills to lecture at Monterey Tech-ITESM in Monterrey, Mexico. She will commute to Mexico to teach issues related to international trade and e-commerce.

Burr holds a doctorate in business from the University of North Texas. As part of her post-doctoral work, she attended the Institute for Social Research at the University of Michigan, Harvard Business School, the Yale Center for International and Area Studies at Yale University; and several institutions for Spanish-language study.

Incarnate Word Provost Dr. Eduardo Paderón and business Professor Dr. Michael McGuire also have received the very competitive Fulbright Fellowships, which are selected by the Council for International Exchange of Scholars.

**Rice Professor in New NCAA Post**

Rice University (Texas) Spanish Professor James Cañasheca was selected to head the National Collegiate Athletic Association (NCAA) Academics Eligibility Compliance Cabinet. In his new position, Cañasheca will oversee six sub-committees: agents and amateurism, continuing eligibility, initial eligibility, legislative review/interpretations, recruiting, and student-athlete reinstatement. His two-year appointment was recommended by the NCAA Management Council and approved by the board of directors.

For the past four years, Cañasheca has chaired the NCAA Initial Eligibility Issues Committee. He is on the Regional NCAA Postgraduate Scholarship Committee and the Western Athletic Conference (WAC) Executive Council; he is Rice's faculty representative to the NCAA, WAC, and Southwest Conference; and he is faculty liaison to the WAC Student-Athlete Advisory Committee.

Cañasheca, a former assistant baseball and head golf coach at Rice, received his bachelor's degree from Drew University and his master's and doctorate from Yale University (Conn.).

**Lamar Hails Maldonado as a Top Male Graduate**

Lamar University (Texas) honored José Maldonado as one of its top graduates. He received a bacheelor's degree in chemical engineering and was the top 2001 male graduate, with a GPA of 3.93.

Maldonado, the son of José and Lucia Maldonado, graduated from Lamar Consolidated High School in Rosenberg, Texas. At Lamar, he was president and secretary-treasurer of the Chi Epsilon national civil engineering honors society, president of Tau Beta Pi engineering honor society, treasurer of the student chapter of the American Society of Civil Engineers, and senator representing the College of Engineering in Lamar's student government association. He received the Charles and Susan Jordan Memorial Scholarship and has been a member of the Cap and Gown Chapter of the Blue Key honor organization. Maldonado accepted a position with Claunch & Miller, a civil engineering consulting firm in Houston.

Brenda Bedair and Eleonora Market shared top female honors with 4.0 GPAs.

**Grossmont Announces Man and Woman of Distinction Awards**

Sara Whipple and Rita Pecoraro received Grossmont College's (Calif.) Woman of Distinction Awards and Fred Demarest received the Man of Distinction Award. The awards recognize outstanding leadership and academic quality as well as involvement in activities on and off campus.
Whipple maintained a 3.69 GPA in a demanding computer science engineering curriculum and developed websites for the counseling and transfer centers. She tutors students in math and helps develop articulation agreements with local four-year institutions. Pecoraro, a student and mother, is president of the Child Development Student Association. A tireless volunteer, Pecoraro is effective in recruiting others for charitable efforts such as food drives and fundraisers for homeless shelters.

Demaestri (pictured), born in Montevideo, Uruguay, is vice president of the Associated Students of Grossmont College and president of the Inter-Club Council. He lived most of his life in Brazil, moving to San Diego County (Calif) last year. He is a member of the Phi Theta Kappa honor society.

New School Hosts Teacher Conference

New School University's (N.Y.) Teacher Education Program hosted a conference for secondary school teachers on "The Teaching of Difficult Knowledge: Creating Inclusive Schools Across Difference." Educators and students discussed their experiences and insights about problems such as racism, sexism, the class system, homophobia, and cultural differences, sharing their successes in creating communities across differences within their own schools.

The conference keynote address "Why is Knowledge about Diversity Difficult? and for Whom?" was delivered by Sonia Nieto, from the University of Massachusetts School of Education. Speakers, panel discussions, interactive workshops, and cultural events offered inspiration, courage, and useful strategies. The conference proposed varied approaches to conflict resolution and diversity and offered face-to-face and on-line discussion opportunities, enabling participants to form collaborative networks. Participants left with a range of resources to use in their own teaching/learning communities.

California Lutheran Honors Hicks

California Lutheran University (CLU) awarded the Exemplar Medallion to Joseph E. "Joe" Hicks, executive director of the Los Angeles City Human Relations Commission, during the University's commencement ceremony. The award recognizes citizens whose lives reflect CLU's mission to educate leaders for a global society who are strong in character and judgment, confident in their identity and vocation, and committed to service and justice.

Hicks has been a political activist for more than 30 years, starting as an organizer for the Los Angeles Black Congress following the 1965 Watts riots. He was active in many causes, including police reform, Central American human rights, anti-racist organization, and the abolition of apartheid in South Africa. As executive director of the Southern Christian Leadership Conference of Greater Los Angeles, as co-founder of the Los Angeles Multicultural Collaborative, and in his position with the L.A. Human Relations Commission, Hicks works to improve race relations. He is the author of What's Race Got to Do With It: Building Bridges Across America's Racial Quicksand.

Central Connecticut Names New Program Director

Central Connecticut State University appointed Awilda Saavedra-Reasco, director of Pre-Collegiate and Access Services. She will head three programs at the University, Connecticut Collegiate Awareness and Preparation, Upward Bound, and Educational Opportunity.

Saavedra-Reasco has worked in related areas. She received a bachelor's degree from Central Connecticut and a master's in social work from the University of Connecticut.

Saavedra-Reasco was appointed special counsel to the president for Latino Affairs and has worked with faculty and administrators to boost Latino enrollment and with Latino students to provide a channel of communication to the administration. She was faculty advisor for the Latin American Student Organization and served on the Committee on the Concerns of Women.

News from NAHJ

The National Association of Hispanic Journalists (NAHJ) announced the following "Members on the Move":

• Ramón Chávez was named professor and chair at the University of South Dakota's Department of Contemporary Media and Journalism.

• Evelyn Hernández, former NAHJ president, was named editorial page editor of the newspaper La Prensa.

• Chris Echeagaray, reporter with the Telegram & Gazette in Worcester, Mass., participated in the Columbia New Media Workshop.

• Michele Salcedo, NAHJ secretary and assistant news editor for the Sun-Sentinel in Fort Lauderdale, Fla., was named to the advisory board of Florida International University's School of Journalism and Mass Communications.

St. Mary's Visiting Professor Wins ABA Award

Miguel Negron, visiting clinical professor at St. Mary's University (Texas) School of Law and partner in the New York City law firm Marcos and Negron, was one of five recipients of the 2001 American Bar Association (ABA) Pro Bono Publico Awards. The national award recognizes Negron for his service at St. Mary's and in South Texas.

Negron, an immigration law specialist from the Bronx, NY, is supervising attorney for the Immigration and Human Rights Clinical Program at St. Mary's, where students practice law by representing indigent clients in the trial or appeal of actual cases.

His law firm provides access to justice for underserved communities, primarily immigrants, whose legal needs would otherwise go unmet. The firm supports the HIV Law Project, a nonprofit agency that provides free civil services for low-income people with AIDS, and conducts workshops on immigration and residency issues in Laredo, Texas, on the U.S.-Mexico border.

Maricopa District Signs Partnership with Phoenix

The Maricopa County Community College District (Ariz.) and the University of Phoenix announced the signing of a partnership that allows graduates from any of the Maricopa Community Colleges to transfer into the Bachelor of Science in Management (BSM) degree program at any of the University of Phoenix campuses. The agreement is specifically designed to permit the maximum transfer of credits and provide a smooth transition for Maricopa Community College graduates, regardless of the year of graduation.

According to the articulation agreement, the completion of an associate's degree guar-
antees admission. The degree will transfer automatically, with a maximum of 72 credits applying to the BSM degree. Students can complete the BSM degree without having to retake classes in their major.

News from Palo Alto

- Alejandro F. Valdez III, a computer science major at Palo Alto College in Texas while still attending high school, recently received an Associate of Science degree. Valdez is set to transfer to St. Mary's University in the fall.
- Dr. Henry Cisneros, chair and CEO of American City Vista, delivered the commencement address during Palo Alto's 15th annual ceremony. In 1988, Cisneros became the first Hispanic mayor of a major U.S. city (San Antonio) and was secretary of the U.S. Department of Housing and Urban Development during the Clinton administration. He was also president and CEO of Univision Communications in Los Angeles.
- The Alamo Community College District board of trustees approved the return of Dr. Cecilia Gonzales as dean of arts & sciences at Palo Alto. Gonzales held the position from 1985-1988 and was vice president of student affairs from 1988-1992. She earned a bachelor's degree and a master's, both in biology and chemistry, from the University of the Incarnate Word, and received her doctorate in educational administration from Baylor University.

Vietnam POW Addresses North Texas Graduates

Everett Alvarez, Jr. the first American aviator shot down over North Vietnam, delivered the keynote address at commencement ceremonies for the University of North Texas Health and Science Center, and was awarded an honorary doctorate.

Alvarez was held as a prisoner of war in North Vietnam for eight-and-a-half years, until the general release of prisoners in 1973, and remained in the U.S. Navy until 1980. He was the deputy director of the Peace Corps and deputy administrator of the Veterans Administration. Today, he owns a consulting firm in Virginia.

Alvarez is on the board of regents for the Uniformed Services University of the Health Sciences and on the board of directors of the National Graduate University. He has written two autobiographies, Chained Eagle and Code of Conduct.

Texas A&M Program to Increase Bilingual Teachers

Texas A&M University's College of Education has initiated a program addressing the state's need for bilingual teachers. The project, Nontraditional Field-Based Bilingual Teacher Education, is to use distance-learning technology to produce 110 certified bilingual teachers over the next three to five years.

Rafael Lara-Aleco, associate professor and director of bilingual education programs in the department of educational psychology at Texas A&M, called the project "critically important," adding, "There is not a school district in Texas that does not need more certified teachers, especially bilingual teachers."

The U.S. Department of Education has provided funding for the program, which will use technology such as interactive television, Internet-based coursework, forum/chat rooms, and e-mail and fax to deliver the courses to in-service teachers.

Lara-Aleco noted that the Hispanic population in Texas is steadily rising, as is the need for bilingual teachers "Bilingual education provides our young children with appropriate English acquisition while preserving some of the child's native language and culture."

News from St. Mary's

- The St. Mary's University (Texas) Beta Beta Beta Biological Honor Society took top honors at the Tri-Beta Regional Science Convention at the University of Oklahoma. St. Mary's won the Outstanding Chapter Award for Texas and the South Central region of the United States. Seven students received the John C. Brooks Award, the highest individual award presented by Tri-Beta. They are Leah Elizondo, Ann Garcia, Charlene Hensler, Shandel Molinar, Jennifer Perez, Sonia Perez, and Monica Piquet.
- PBS reporter Ray Sanchez delivered the keynote address for St. Mary's University's 149th Commencement Exercises. More than 700 undergraduate, graduate, and doctoral candidates listened to the Washington-based senior correspondent for the PBS NewsHour with Jim Lehrer. A highlight of the exercises was the awarding of honorary doctorates to Henry A. Guerra, Jr., Robert S. Rosow, and the late Frederick A. Thomas.
- Justice Alma Lopez was the keynote speaker at the St. Mary's School of Law Commencement Exercises. Lopez, a 1968 graduate, is on the Texas Fourth Court of Appeals. She is the first Hispanic woman elected to this court and the second Hispanic woman to serve on a state appellate court.

Rio Hondo President Leaving for Portland

Rio Hondo Community College (Calif.) Superintendent/President Dr. Jesús "Jess" Carreón took the presidency position at Portland Community College (PCC), ending a six-year tenure at Rio Hondo.

"Jess was selected because he is a leader first and foremost," explained Karen McKinney, chair of PCC's board of directors. "He is highly visible and accessible, locally and nationally. He is an excellent speaker and communicator who brings a wealth of information."

The Portland Community College District is organized on three main campuses, one open campus, and four workforce development centers. It is the largest postsecondary institution in Oregon, covering five counties and serving nearly 100,000 students.

L.A. Opera Returns to Local Middle and High Schools

The very popular Los Angeles-based operas Homies and POPz returned to 10 local high schools as part of the Los Angeles Opera's In-School Opera Program. Each season the program introduces two specially commissioned operas, performed by students alongside professional opera singers.

Homies and POPz tells the true story of a group of teenage Latino boys from Compton and homeless men who form a cricket team under the guidance of well known homeless activist Ted Hayes and his partner Katy Haber. Composed by Michael Abeis, with libretto by Bernardo Solano, the show included about 50 students who worked on the production with L.A. Opera artists and staff.
Under the guidance of Dr. Stacy Brightman, L.A. Opera's Director of Community Programs, the In-School Opera Program has become an international model for arts education, enriching students with an intensive opera experience. More than 25,000 students and teachers attend the performances each year.

Tilghman Becomes Princeton's 19th President

Dr. Shirley M. Caldwell Tilghman, a member of the Princeton University faculty since 1986, was elected Princeton’s 19th president. An exceptional teacher, world-renowned scholar, and leader in the field of molecular biology, Tilghman was elected unanimously by a search committee composed of trustees, faculty members, students, and staff.

Tilghman joined Princeton as the Howard A. Prior Professor of Life Sciences. She has been active in teaching and in other programs for alumni. Renowned for her pioneering research, she has made groundbreaking discoveries in the field of mammalian genetics. She is also recognized for her national leadership on behalf of women in science and for promoting efforts to make careers of young scientists as meaningful and productive as possible. In 1996 she received Princeton’s Presidential Award for Distinguished Teaching and has chaired several councils on scientific research and investigation.

Grossmont’s KGFN Wins National Award

Grossmont College’s (Calif.) radio station KGFN received a fourth-place Best Multimedia Site award from the Broadcast Educational Association (BEA) for its newly redesigned Web page. Grossmont was the only two-year college to win an award at the BEA convention.

“I’m really pleased about the award because we were up against the four-year colleges and universities—the big boys,” said Evan Wirig, chair of the Media Communications Department and the radio station’s manager.

The website www.grossmont.net/kgfn was recognized for its graphics, layout, and content, serving as a laboratory for students to learn more about radio and audio production. Working at KGFN is offered as a class in the media communications department and has become increasingly popular at Grossmont.

Long Island-Brooklyn Graduate Is Stage-struck

Nick Lugo was always told, “Theater is not a real major!” The Long Island University (LIU)-Brooklyn honor student knows this is not true, graduating LIU-Brooklyn with a degree in theater and becoming the first student director of a Brooklyn campus production.

“It’s one of the things I am most proud of now,” said Lugo, who, as director of Never the Sinner, was in charge of auditions, casting, rehearsals, staging, costumes, and lighting. “We had a good public response. It really boosted my confidence.”

Lugo, of Puerto Rican heritage, has gained a head start in show business. He interned at Walt Disney Theatricals, working with the producers of the top Broadway shows Lion King, Beauty and the Beast, and Aida. In 1999, he launched his own theater company, Starting Point, coaching students at his old high school, Xavierian High School, where he was in the top 10 percent of his class.

After graduation, Lugo starts work in the producing office of the Tony and Pulitzer-award winning show Rent as an assistant to the general manager, John Corker. Lugo, named to “Who’s Who in American Colleges and Universities,” hopes to continue work in theater rather than in TV or film.

Collegeboard.com Expands Guidance Services

Collegeboard.com (N.Y.) acquired MyRoad.com, an Emeryville, Calif.-based company that provides education and career planning services to high school and college students. The move further solidifies collegeboard.com’s position in the education industry as a trusted provider of college planning, test preparation, and other academic services to students, parents, high schools, and colleges.

The strength of MyRoad.com lies in its depth of original content, which helps students plan for college, select majors, and learn about careers. Sixty-one profiles of academic fields reflect the research of doctoral and master’s degree candidates for hundreds of college majors and include in-depth coverage of associate’s, bachelor’s, and graduate degree opportunities. Career articles cover more than 300 career tracks, from hot new fields like medical technology to more traditional pursuits like law and marketing.

Southwestern President Honored by Industry-Education Council

The Greater San Diego Industry-Education Council, in California, selected Southwestern College President Serafin A. Zasuetta for the Educator Award, presented during the 42nd Annual Salute to Industry-Education Program.

Zasuetta was honored for his leadership in improving industry-education relations and exploring innovative concepts and projects that get the community involved. He is known for his creative approach and collaborative efforts to provide greater access to higher education for South County residents.

One example is the Higher Education Center at National City, a partnership with San Diego State University and National City enabling county residents to complete bachelor’s degrees without commuting to San Diego. Another example is Southwestern’s partnership with the U.S. Navy Dental Command, through which its dental hygiene students can complete their clinical training.

Spanish Power Company Funds $1.5 Million Endowment to UNM

The University of New Mexico (UNM) is conducting a search for the Prince of Asurias Endowed Chair in Information Science and Technology. The position is expected to be filled as early as this fall.

The chair is being funded by a $1.5 million endowment to the UNM Foundation, Inc., from Iberdrola, one of Spain’s largest power companies, with the support of the Ministry of Science and Technology of Spain.

John K. Mciver, interim vice provost for research at UNM and chair of the search committee, said that Iberdrola has a key presence in Spanish research and development, and believes that closer relationships among
Spain, the United States, and Iberoamerica in the area of science and technology will contribute to improving Spain's and the Hispanic world's role in the information society.

**Nissan Launches Scholarship Program with HSF**

Nissan North America, Inc., in partnership with the Hispanic Scholarship Fund (HSF), is launching the Nissan/HSF Community College Program, designed to encourage community college students to continue their pursuit of a bachelor's degree at four-year institutions. Nissan's gift of $700,000 will fund the program.

Fifteen outstanding Latino community college students pursing studies in business, engineering, or journalism/communications will receive individual awards of $2,000 a year for two years. The program will recruit students in California and Texas who are beginning their second year of college.

Sara Martinez Tucker, HSF president and CEO, praised Nissan for its support.

**Ugalde to Assist University of Miami President**

The University of Miami (U.M.) announced that Aileen Ugalde will become assistant to new President Dr. Donna E. Shalala. Ugalde has been an associate general counsel for the University. Shalala succeeded President Edward T. Foote II, who stepped down in June. As a senior advisor to Shalala, Ugalde will direct and coordinate activities in the office of the president, working closely with faculty staff, and students on the University's campuses in Coral Gables, at the School of Medicine, and at the Rosenstiel School of Marine and Atmospheric Science.

Ugalde is a magna cum laude graduate of Harvard University who earned an undergraduate degree in Latin American studies and international relations. She attended the University of Miami School of Law as a Harvey T. Reid scholar, graduating in 1991.

**Language Lab Director Spreads Cultural Awareness at CU-Boulder**

Kuan-Yi Rose Chang is on a mission to expand the cultural awareness and foreign language skills of University of Colorado (CU)-Boulder students.

Chang, an adjunct professor of Spanish and Chinese and director of CU-Boulder's Anderson Language Technology Center, believes that globalization and the rapid growth of minority populations in the U.S. increasingly demand that Americans broaden their understanding of other cultures.

"Colorado is still a very homogenous place, in spite of the fact the new census shows we have rapidly growing Latino and Asian populations," said Chang. "Some of the outreach programs we are developing at CU-Boulder are beginning to address the need for more cross-cultural awareness in Colorado."

**North Carolina and Duke Select First Robertson Scholars Class**

Samantha C. Fernández, Ana L. Hurtado, and Che J. Ramos are three of the first 30 high school seniors selected for the Robertson Scholars Program. The new and innovative joint merit scholarship program at Duke University and the University of North Carolina-Chapel Hill provides full college tuition, summer community-building and enrichment opportunities in the U.S. and abroad, support for research and related travel, and top-of-the-line laptop computers for each scholar.

Fernández volunteered at a nonprofit that supports world artisans and interned at the National Institute of Environmental Health Science. Hurtado has worked with the Literacy Volunteers of America. Both belong to the National Honor Society. Ramos participated in the Princeton Model Congress delegation, studied French language and culture at the American University of Paris, and led diversity awareness groups at The Packer Collegiate Institute in New York.

**Colleges Accept All 34 Rhode Island College Upward Bound Grads**

Rhode Island College President John Nazarian congratulated the 34 graduates of the College's Upward Bound program and noted that all were accepted to at least one of 39 colleges and universities. Their successful completion of Upward Bound indicated they had "accepted a big challenge, persevered, and succeeded," said Nazarian.

Elkin Estrada, an Upward Bound graduate who went on to Brandeis University and the Howard University College of Medicine for a medical degree, gave a keynote address during graduation ceremonies.

Estrada, an intern at Rhode Island Hospital, spoke of his personal journey that began in his native Colombia. Coming to the United States at age 13 and speaking only Spanish, the road was fraught with difficulties and frustration. He persisted, thanks in part to Upward Bound, a federal-funded, college-based program that prepares selected students for completion of high school and acceptance to college.

**News from Arte Público**

in Texas, the University of Houston's Arte Público Press, the nation's largest and most established publisher of contemporary and recovered literature by U.S. Hispanic authors, announced the following achievements by books and authors it has published.

• Trino's Choice, by Diane Gonzales Bertrand, was named to the 2001-2002 Texas Lone Star Reading List for grades 6-8. This dramatic tale about difficult problems children face was also named "Best Book of the Year" in the young adult category by ForeWord Magazine and "Best Children's Book" by the Austin Writers' League.

• Magda's Tortillas/Las Tortillas de Magda, by Becky Chavarría-Chávez, illustrated by Anne Vega, received praise from ForeWord Magazine as a finalist in the Children's Picture Book Category at the third annual ForeWord Book of the Year Contest. The story takes young readers on a culinary adventure in the fine art of making tortillas, while offering a glimpse into Hispanic culture.

• Author Virgil Sudrez received the prestigious National Endowment for the Arts Creative Writing Fellowship. Sudrez is a highly praised author of many works concerning the Cuban-American experience. He is professor of creative writing at Florida State University.

• Pat Mora's critically acclaimed collection, My Own True Name: New and Selected Poems for Young Adults, 1984-1999 was named to the Tayshas 2001-2002 reading list by the Young Adult Round Table of the Texas Library Association. This collection addresses universal experiences shared by teens.
**Chicano Timespace: The Poetry and Politics of Ricardo Sánchez**
By Miguel R. López

In a body of work that spans spatial, temporal, and cultural boundaries, Ricardo Sánchez dealt with issues of power and dispossession, of linguistic and cultural barriers between Anglo, Native American, and Mexican-American peoples in the United States. This book paints a portrait of a poet whose work was linguistically and thematically complex and who was "more passionate, controversial, and forthright in his expression than any other contemporary Chicano writer." Foreword by Francisco Loneli.

**The Making of NAFTA: How the Deal Was Done**
By Maxwell A. Cameron and Brian W. Tomlin

This book is the first full, three-country account of the negotiations surrounding the controversial North American Free Trade Agreement. Through extensive interviews, the authors develop a detailed picture of the process by which the U.S., Mexico, and Canada pursued closer economic relations and of the political realities that influenced the politicians and policymakers in each country.

**The Other Mirror: Grand Theory through the Lens of Latin America**
Miguel Angel Centeno and Fernando López-Abes, eds.

A distinguished group of scholars reevaluates widely accepted theories of state, property, race, and economics against Latin American experiences, with a twofold purpose. They seek to deepen our understanding of Latin America and the problems it faces, and, by testing social science paradigms against a broader variety of cases, they pursue a better map of the social world.

**Motivation and Learning Strategies for College Success: A Self-Management Approach**
By Myron H. Dembo

This book contains relevant information and carefully designed features to help students: identify the components of academic learning that contribute to high achievement, master and practice effective learning and study strategies and complete self-management studies whereby they are taught a process for improving their academic behavior. It does not offer "recipes" for success, lists of "quick tips," or fancy design elements.

**The Case for Character Education: The Role of the School in Teaching Values and Virtue**
By Dr. B. David Brooks and Frank G. Goble

Today's children find themselves dealing with the breakdown of the family, loss of community, negative peer pressure, increasing violence, shameless materialism, social injustice, glorification of sex, and an overall decline of social values. This book tells why our schools must once again teach values, and it gives examples of schools that have already implemented successful programs.

1997. 161 pgs. ISBN 1-882349-01-6. $11.95 paper. 54f. (888) PUBLISH.

**Conquering Nature: The Environmental Legacy of Socialism in Cuba**
By Sergio Díaz-Briquets and Jorge Pérez-López

This book, an analysis of the environmental situation in Cuba after four decades of socialist rule, is based on extensive examination of secondary sources and informed by the study of development and environmental trends in former socialist countries as well as in the developing world.

**Peace Without Justice: Obstacles to Building the Rule of Law in El Salvador**
By Margaret Popkin

*Peace Without Justice* addresses the judicial system, a critical weakness in the Salvadoran institutional structure, and the related decision by Salvadoran political actors to forego any domestic effort to establish accountability for the thousands of human rights abuses committed during the civil war. Although the international community and many Salvadorans now recognize the importance of an independent judiciary, transforming this branch of government has been difficult.

**Le Grand Tango: The Life and Music of Astor Piazzolla**
By María Susana Azzi and Simon Collier

Astor Piazzolla was a musical genius, a man who used the national dance of Argentina as raw material for a whole new musical
genre. This book vividly captures the life of this
extraordinary musician—a visionary who won
worldwide acclaim but sparked bitter contro-
versy in his native land. Foreword by Yo-Yo Ma.

cloth. Oxford University Press. (800) 451-7556.

Doña María's Story: Life History, Memory,
and Political Identity
By Daniel James

Historian Daniel James presents the gripping,
poignant life story of Doña María Roldán, a woman
who lived and worked for six decades in the meat-
packing community of Berisso, Argentina. A union activist and fer-
vent supporter of Juan and Eva Perón, Doña
María's evocative testimony prompts James to
analyze the promise and problematic nature
of using oral sources for historical research.

Entre Dos Américas: Narrativas de
Latinas en los '90s
(Spanish)
By Guillermina Walas

The author explores the central place of mem-
ory for Latina authors. These authors are dis-
placed from their familiar roots in Latin America and the
Hispanic Caribbean, and find themselves immersed in their actual
individual lives in the United States. These women construct or rebuild a new Latina
identity based on memory and the past, but also
project to a future located in the Anglo-
American context. The resulting identity is
complex, riddled with cultural conflict that
often involves class and gender.

2000. 166 pgs. ISBN 0-7688-1033-2. $32.00

Comida Sabrosa: Home-Style
Southwestern Cooking
By Irene Barraza Sánchez and Gloria
Sánchez Yndid

This is a cookbook for
everyone who wants to prepare the kind of food
for which New Mexico is
famous, from chile con
queso through burritos
and sopapillas to bisco-
chitos. The authors, both natives of the
state, have gathered their mothers' mouthwatering
recipes and presented them in a form that
will be equally useful to the veteran
Southwestern chef and the novice.

"Saddling La Gringa": Gatekeeping
in Literature by Contemporary
Latina Writers
By Phillipa Kafka

Because of their ethnic
identity, Latinas sometimes
face discrimination in the
United States. Latinas are
additionally oppressed
because of their gender—
because they are women,
they hold a subordinate position in patriar-
chial Latino culture. The oppression of Latinas
is maintained through various cultural mechan-
asms that sustain power relations based on
gender. This book gives special attention to
the role of female cultural "gatekeepers" in
novels by contemporary Latina writers.

cloth. Greenwood Press. (800) 225-5800.

(Out)Classed Women:
Contemporary Chicana Writers on
Inequitable Gendered Power
Relations
By Phillipa Kafka

Like so many other ethnic groups,
Chicanos and Chicanas have suffered from
political, social, and economic oppression in
the United States. In addi-
tion to the problems they
endure as a consequence
of their ethnicity, Chicanas
are further subordinated
because of their gender. As
women, they are treated
inequitably by a culture in
which authority is invested primarily in men,
to the point that they are relegated to a sepa-
rate social class.

2000. 147 pgs. ISBN 0-313-31123-4. $49.95
cloth. Greenwood Press. (800) 225-5800.

Africa and the West: A
Documentary History from the
Slave Trade to Independence
By William H. Worger, Nancy L. Clark, and
Edward A. Alpers

This book presents a
compilation of primary
documents on Africa that
covers materials from the
early part of the 15th cen-
tury through independence
and the problems of the
post-colonial period. Students, librarians, and
researchers can delve into important issues of
each period, background information, and
personal accounts that help piece together a
vivid picture of the history of Africa.

**CONFERENCES**

**Diversity Advisory Council Colloquium**  
**September 14**

The Kent State University Diversity Advisory Council presents a one-day colloquium, “A Country of Strangers: Blacks and Whites in America.” At KSU in Ashtabula, Ohio.  
Contact: Kelly Sanford, (440) 964-4217; e-mail, sanford@ashtabula.kent.edu.

**TeleLearning 2001**  
**October 6-9**

The International Telecommunications Council and The TeleLEARNING People will sponsor “TeleLearning 2001,” “the premier event in distance education and educational telecommunications.” At Hilton Hotel Costa Mesa, Costa Mesa, Calif.  

**Academic Advising Association National Conference**  
**October 11-14**

The 25th annual meeting for administrators, academic advisors, and faculty advisors has as its theme “Academic Advising: Discover the Many Voices.” Concurrent sessions will address all aspects of advising. At the Ottawa Congress Center, Ottawa, Canada.  
Contact: NACADA Executive Office, (785) 532-5717; e-mail, nacada@ksu.edu; website, www.nacada.ksu.edu.

**ACE 2001 Conference**  
**October 13-20**

“The nation’s most important national conference on diversity and improving minority participation in postsecondary education.” Sponsored by the American Council on Education’s Division of Programs and Analysis, and the Office of Minorities in Higher Education. In Cincinnati, Ohio.  

**NACME Forum 21, Engineering Policy and Practice**  
**October 25-27**

The National Action Council for Minorities in Engineering holds its 21st annual conference for those committed to increasing diversity in the workforce. A dynamic group of speakers will challenge attendees to examine the impacts of their organizational policies and what, if anything, can or needs to be done to change them. In Baltimore, Md.  
Contact: Dundee Holt, (212) 279-2626, ext. 214; e-mail, dholt@nacme.org; website, www.nacme.org.

**College Board National Forum 2001**  
**October 26-30**

This year’s College Board National Forum has as its theme “Measuring Success,” looking at the measures of “success for yourself, your school, your students.” At The Adam’s Mark Hotel in Denver, Colo.  
Contact: (212) 713-8050; website, www.collegeboard.com.

**HACU 15th Annual Conference, in Puerto Rico**  
**October 27-30**

The Hispanic Association of Colleges and Universities presents its 15th annual conference, this year on the theme “Excellence Through Diversity: Celebrating Our Past and Reshaping Our Future.” In San Juan, Puerto Rico.  
Contact: (210) 576-3218; website, www.hacu.org.

**WCET 13th Annual e-Learning Conference**  
**October 31-November 3**

**FIU Conference on Spanish and Latin American Literature**  
**November 8-10**

The Department of Modern Languages at Florida International University will hold the conference “Spanish and Latin American Literature: New Trends for a New Millennium.” At FIU in Miami, Fla.  
Contact: Ricardo Castells, (305) 348-2130; e-mail, castells@fiu.edu.

**TACHE 2001 Conference**  
**December 2-4**

The Texas Association of Chicanos in Higher Education advocates for an increase in the number of Chicano/Latino faculty, staff, and administrators in Texas’ colleges and universities. This conference will serve as a venue for discussing the issue of underrepresentation and exploring ways of rectifying the disparity. At the Omni Hotel in Downtown Austin, Texas.  

**Kaleidoscope Leadership Institute 2001**  
**December 5-9**

Kaleidoscope is a highly successful leadership/training institute for women of color. The institute seeks to provide interaction strategies to enable participants to feel safe, to personally share their own feelings and uncertainties, and through their interactions, to develop real connections with other cultural groups. At Hilton Hotel Costa Mesa, Costa Mesa, Calif.  
Contact: Dr. Felita T. Williams, (404) 244-2399; e-mail, kaleidoscope@gpc.peachnet.edu; website, www.gpc.peachnet.edu/kaleidoscope.

**ACE 84th Annual Meeting**  
**February 9-12**

The American Council on Education will explore higher education’s relationship with Capitol Hill, new ways to deliver education and new ways to fund it, the impact of emerging technologies, preparing students for a borderless world, presidential leadership, and more. At the San Francisco Marriott Hotel, San Francisco, Calif.  
Contact: (202) 939-9410; e-mail, annualmeeting@ace.nche.edu; website, www.acenet.edu.

Our Lady of Guadalupe, arising out of the ashes of Aztec civilization and a defeated and downtrodden people, gave birth and hope to the Mexican masses. Resurrected as a phoenix of life, she repudiated the rapacious armies and barbaric greed of the Conquistadores. She has remained a symbol of hope and life, serving as the banner of national independence from Hidalgo's army in 1810 to the liberation of Chicano migrant workers of the American Southwest. In the barrios of East Los Angeles, she gives hope to the alienated Chicano youth who proudly adorn their murals and even their bodies with her sacred image. No other symbol in the history of modern Mexico and the Americas has evoked such powerful devotion as the Virgin of Guadalupe.

The image of Guadalupe as a religious and cultural symbol lies deeply rooted in Mesoamerican's ancient and autonomous civilization, and she was known under many names. In the catastrophic aftermath of the Spanish Conquest, many Aztec sought spiritual solace in their traditional beliefs, and she appeared to the most humble of Aztecs, Juan Diego. After five appearances, this brown-skinned Virgin, speaking Nahua, the language of the Mexica, was finally accepted by Church officials as a Christian apparition. In the late 19th century, the Pope declared her the patron saint of the Americas.

In Goddess of the Americas: La Diosa de las Americas, Ana Castillo has compiled an impressive collection of writings on the Virgin of Guadalupe. Included in this impressive pantheon of essays are such esteemed Chicano/o writers as Sandra Cisneros, Gloria Anzaldúa, Richard Rodríguez, and Denise Chávez.

In a particularly stirring essay, Jeanette Rodríguez dwells on Guadalupe as the feminine face of God, a recurring theme among Chicano feminist writers. Many of the women in my class, Chicana and Anglo alike, found her essay moving and supplemental to their own personal faith; they found that the Marian image of God enhanced and magnified the personality of God, radically diverging from the stern male patriarch of the Old Testament or a compassionate but still male Jesus. For Rodriguez, Guadalupe magnifies the Godhead by manifesting God as mother, enhancing God's compassion, expressing God's divine power and might, and forming a source of God's recreating energy. For one young Chicana in my class, she expressed her devotion to Guadalupe in her essay in both spiritual and nationalist terms: "Guadalupe is our Mexican mother to her orphaned Chicano/Chicana children who are wandering as strangers in their own occupied land."

Martha Randall interprets Guadalupe's spiritual energy as a source of empowerment to the downtrodden masses, rejecting her more traditional role as an all-passive sacrificial source that allows women to endure their suffering in silence and acceptance. On the contrary, "Guadalupe represents a profound spiritual shift, within the most patriarchal of structures, from centuries of male control to a feminist vision of power." This Nahua-speaking mestiza virgin is a source for a proactive consciousness rejection of oppressive hegemonies, a proletarian symbol of liberation for Chicanas and oppressed women everywhere. Randall provides a secular interpretation of Our Lady as a subversive force for social emancipation.

Two of my students strongly identified with Luis Rodríguez's essay, "Forgive Me, Mother, For My Crazy Life," his personal spiritual journey working with gang-ridden youth and the role of Guadalupe in a life of drugs, violence, alienation, and despair. Rodríguez's journey ends with his re-synthesis of the duality of God in the image of the Virgin and his recovery from years of alcoholism and hopelessness.

Last fall, I assigned this book in my course, Introduction to Mexican American Studies. Students received it well. Some of my Chicano students were amazed that the Anglo students, many of them raised as Protestants, all found the book inspiring and spiritually enlightening. Many of them had been raised in Texas and the Southwest and were familiar with the image of the Virgin but had never seriously contemplated her meaning, the depth of her visionary enchantment, and devotion of her children. Most gained a much deeper appreciation of Mexican culture and the depth of Mexican spirituality, rooted in centuries and even thousands of years of Mesoamerican Indian identity, pain, and triumph. My Chicano students found this book a wellspring of cultural and spiritual nourishment, not unexpected when one considers that the word Guadalupe originates from a corruption of the Arabic word for río de amor. It is to this river and the Mestiza Goddess of the Americans that this book does tribute.

Dr. Saka, a Fulbright scholar, completed his Ph.D. at the University of Houston in 1995. A Mexican specialist, his interests include peasant social movements and agrarian unrest. An American of Arab ancestry, he has taught in the Department of History at Sul Ross State University, Alpine, Texas, since 1995.
Growing up is a dynamic, lengthy, and complicated process regardless of one's physical and social environment. Entertaining and poignant, Cisneros tells stories that reflect her Latin heritage while touching the common human spirit. The House on Mango Street is full of warm, inviting stories about real lives. The book, dedicated "A las Mujeres," reveals, through 44 vignettes, deeply sensitive and descriptive snapshots of a girl moving through her life toward dreams and goals she is creating for herself.

Cisneros' characters represent and speak of common developmental tasks. The situations reflect unique experiences filled with cultural nuances and innuendos. How many of us have grown through phases of wanting another name, another house, different hair, more intelligence, and special friends? Growing up—developing into an adult person—involve living somewhere, being involved with parents, or guardians, siblings, cousins, grandparents, friends, and often pets or at least neighborhood animals. Esperanza's family and friends accompany her in trysts with old, traditional expectations and new desires, new ideas, and hope for a future that takes her to a different place.

Some salient points from a few of the stories bring us important insights from her dynamic cultural perspective.

The first story, "The House on Mango Street," sets up the reality many children describe and school administrators describe: some residential addresses do not remain stable over the school year. This reveals the pleasure of achieving improved housing but sometimes simultaneously the despair of not quite arriving at that goal. Esperanza appreciates that her family has moved to get better accommodations. But she still hasn't gotten to where she really wants to move. Her growth is chronicled through stories of observing and responding to her environment. She takes us around the neighborhood and introduces us to her Catholic school, the local junk store, to neighbors' houses.

Cisneros describes older and younger sibling roles that many readers can relate to.

"Papa Who Wakes up Tired in the Dark" describes the emotion her father expresses when his father passes away. She has been informed first and, as the oldest, has the responsibility to tell her siblings.

In "Marin," we learn about the teenager who knows lots of things and who might be sent back to her mother because she is too much trouble. But Marin is just waiting for "someone to change her life." Esperanza also wants a way out.

"Chancas" describes the flurry that surrounds preparing for a cousin's baptism. And the anxiety of being asked to dance with an uncle in front of everybody.

To attend Catholic school, which she must, requires money. Getting "The First Job" brings the needed money, but it also brings exposure to strangers and new situations.

The notion of fate in establishing who gets a disease is addressed in "Born Bad."

Have you ever wondered about the magic and power of card readers? Can they help you attain your dreams? Or tell you when you will reach them? "Elekita, Cards, Palm, Water" illustrates this desire to know fate. Esperanza wants to know, but her five dollars don't buy the answers she is looking for.

Like most little girls, Esperanza and some buddies are ecstatic over a gift of high-heeled shoes. They parade around the neighborhood with them on. They feel like Cinderella. Mr. Benny, the man at the corner grocery, knows they shouldn't be wearing them. "Does your mother know?" he asks. They meet Bum man, whose offers entice yet frighten them. They run away and discard the shoes.

A mother's fear of change is tapped when the baby begins to speak English, despite her limited vocabulary and reliance on the old language.

"No Speak English" is a state of reality and a form of protection.

As though others could see her dreams and goals, "The Three Sisters" associate the death of a baby with Esperanza's quest for freedom from her surroundings, her place in time, and space.

This book is one of a variety of cultural selections recommended to my classes, Human Behavior in the Social Environment: The Dialectic of Oppression and Liberation and Human Behavior in the Social Environment: Individuals and Families. Students may select novels to read and analyze values, beliefs, and conditions that indicate perceptions of choices and the impact of social structural influences on individual and family development. Student analyses are used to establish strategies to assist in empowerment.

Cisneros' stories are extremely useful because they offer excellent descriptors of lives unknown to many students. The illustrations provide a basis for comparison and discussion. These vignettes provide a foundation for questions and reflection in relation to values of home, family, and community. This exercise urges critical thinking that contributes to modifying perspectives and increasing multicultural understanding.

Dr. O'Neal is an associate professor at the West Chester University Graduate Department of Social Work, in West Chester, Pa. Her areas of interest include accountability and community practice that respond to cultural and economic influences on behavior.

National University's School of Education is seeking applicants for full-time and part-time faculty positions at several campuses across California.

National University is a WASC-accredited, private, nonprofit institution. Since its founding in 1971, National University has been dedicated to providing higher education opportunities for adult learners, with academic programs structured to allow working adults to attend classes on a full-time basis while remaining employed. The University offers courses in a unique, one-course-per-month format, both on-site and online. National University's academic and administrative headquarters are located in La Jolla, California, with learning centers in San Diego, Redding, San Jose, Sacramento, Stockton, Fresno, Bakersfield, Sherman Oaks, Los Angeles, Costa Mesa, San Bernardino, Orange, and Twentynine Palms.

Within the School of Education, the Department of Teacher Education offers a Master of Arts in Teaching, a Master of Education in Cross-cultural Teaching, and credential programs, including the Preliminary and Professional Multiple Subject and Single Subject CLAD/BCLAD emphases, and the Fifth Year Professional Clear Credential. Within the School of Education's Department of Specialized Programs, a Master of Science in Educational Administration, a Master of Science in Educational Technology, a Master of Science in School Psychology, and a Master of Science in Special Education are offered. Credential programs include Preliminary and Professional Administrative Services Credentials, Pupil Personnel Services, School Psychology Specialization, and School Counseling Specialization Credentials, and Preliminary Level I Educational Specialist Credentials: Mild/Moderate and Moderate/Severe Disabilities.

**FULL-TIME FACULTY**

At this time, we are recruiting full-time faculty members for the following departments and locations:

**Teacher Education**: Costa Mesa, Fresno, Sacramento, San Diego, San Bernardino, San Jose, Stockton

**Specialized Programs**: Costa Mesa (Special Education); Fresno (Special Education/Pupil Personnel Services); Los Angeles (Special Education, PPS-Counseling, Educational Administration); San Bernardino (Special Education); San Diego (Educational Technology)

Full-time faculty members assume primary responsibilities for teaching, scholarship, service, including providing leadership for the part-time faculty, professional development, student advising, and participation in the University's governance. Faculty members are also active in curriculum development, the faculty selection process, and peer review of faculty colleagues in their schools and regions. The successful full-time faculty candidate will possess a terminal degree in the appropriate discipline and have demonstrated excellence in teaching. Faculty rank will be commensurate with experience and qualifications.

**PART-TIME FACULTY**

At this time, we are recruiting part-time faculty members for the following departments and locations:

**Teacher Education**: Costa Mesa, Redding, Sacramento, San Diego, San Jose, and Stockton

**Specialized Programs**: Fresno (Educational Technology); Los Angeles (PPS-Counseling); Redding (Educational Administration); Sacramento (Educational Technology); San Diego (Educational Technology, Educational Administration); Stockton (Special Education, Educational Administration, Educational Technology)

Part-time faculty members are skilled teachers, qualified and able to make a part-time commitment to the University faculty. A terminal degree in the appropriate discipline is preferred, and a master's degree is required.

Candidates should forward a letter of interest, indicating the position they are seeking along with a curriculum vitae and list of references, to:

**Dr. Marle Schrup**
Dean, School of Education
National University
11255 N. Torrey Pines Road
La Jolla, CA 92037-1011

The review of candidates will begin immediately and continue until positions have been filled.

National University is an Affirmative Action Equal Opportunity Employer. Women and minorities are encouraged to apply.
Child Family Services

The Child Family Services Program at Plattsburgh State University of New York invites applications for a tenure-track position at the Assistant or Associate Professor level, dependent upon qualifications. This position is expected to begin in late August 2002.

Qualifications: An earned doctorate in child and family studies, early childhood development or a related area of family and consumer sciences; teaching experience and competence, and commitment to scholarship are required. Expertise in, or the desire to develop expertise in, at least four of the following areas: family in contemporary society, adolescence in society, perspectives on parenting, the role of the child in the family and the community, gerontology, child development, and/or theoretical foundations of child care will be highly regarded.

Applications from women and minority candidates are especially welcomed. Plattsburgh State University of New York is an affirmative action, equal opportunity employer.

Salary and Rank: Will be commensurate with qualifications, with excellent benefits. Review of applications will begin immediately and continue until the position is filled. Please submit letter of application, curriculum vitae, official transcript and three letters of reference to: Chair, Search Committee (PJ# 2558-808), c/o Human Resources, Plattsburgh State University of New York, 101 Broadway, Plattsburgh, NY 12901-2681. Fax: (518) 564-5060.

WICHITA STATE UNIVERSITY

Collection Manager

The Ulrich Museum of Art, Wichita State University, seeks an experienced professional for the full-time position of Collection Manager. The Collection Manager is responsible for all aspects of organization, care, and management of the museum’s collection of approximately 7,500 works of modern and contemporary art, which includes 60+ outdoor sculptures. Job responsibilities include ensuring the ongoing physical care of the collection; basic conservation, mounting, and preparation of objects for exhibition (including supervising the installation of outdoor sculptures); maintaining storage and gallery installations and monitoring environmental conditions; and processing acquisitions and outgoing loans. The collection manager oversees all collection records, files, photography, and collection management software; develops and enforces collections policies and procedures; and works closely with curatorial department in long-range planning for storage and conservation of the collection. Reports to the director of the museum and supervises one part-time graduate assistant internship. The successful candidate will have the option of teaching undergraduate or graduate courses in their area of expertise. Wichita State University, with an enrollment of over 15,000, serves the 350,000+ residents of the state’s largest metropolitan area and contributes substantially to its lively cultural life, as do two other art museums, numerous private galleries, and a supportive and engaged artistic community.

Qualifications: degree in art history, fine arts, museum studies, or related field, at least two years of collections experience in a museum or art gallery, with experience accessing, deaccessioning, cataloguing, basic conservation, and art preparation; strong computer skills with a familiarity with Windows platforms, word processing, databases, and ACCESS II or other collections management software; successful experience with diverse populations; and a demonstrated commitment to diversity. The successful candidate will also possess excellent organizational and oral and written communication skills. Salary low-mid 30s, depending on qualifications and experience, plus a generous benefits package. Minorities, women and under represented populations are encouraged to apply. Submit letter of application, CV, names, addresses, phone numbers of three references, and any relevant supporting material to: David Butler, Director, Ulrich: Museum of Art, Wichita State University, 1845 Fairmount, Wichita, KS 67260-0846, 316/978-3017. Complete application must be received by August 31, 2001. Find more information about the Ulrich and its programs at www.ulrich.wichita.edu.

1845 08/13/2001 0 HISPANIC OUTLOOK 53
Dean, College of Arts & Sciences

Arizona State University West, located in Phoenix, Arizona seeks a dean to lead its College of Arts and Sciences. The College consists of six interdisciplinary departments offering 12 traditional disciplinary degrees and 6 interdisciplinary degrees. One hundred faculty and staff work with a current enrollment of 1,020 undergraduate majors.

The dean reports directly to the Provost and works with other campus deans to develop interdisciplinary approaches to teaching, research, and service. He/she represents the College both within and outside the university. The dean must be committed to working with faculty -- both through the administrative structure and faculty governance system -- to achieve university academic goals in research and learning and to further the campus goals of diversity, equal opportunity, and affirmative action. Responsibilities include budget, planning, development, personnel decisions, student academic affairs, faculty development, promotion of research, and planning and implementation of degree and non-degree programs.

QUALIFICATIONS

REQUIRED
A successful candidate must exhibit leadership and strategic vision, and have:

- Relevant administrative experience.
- A demonstrated commitment to cultural diversity that includes supporting the diversity of the faculty, students, and staff.
- A terminal degree in a discipline and a strong record in research, teaching, and service that merits appointment as a Professor with tenure in a department of the College.
- A demonstrated commitment to promoting excellence in research and creative activities.
- Demonstrated effective interpersonal and communication skills.
- A demonstrated commitment to excellence in teaching.
- A demonstrated understanding of the integration of teaching, research, and service.
- A demonstrated commitment to working with multiple constituencies on and off campus.

APPLICANT DEADLINE
August 1, 2001, or the 1st Monday of each week thereafter until the position is filled.

STARTING DATE:
January 1, 2002, or as negotiated.

APPLICATION PROCEDURE

Applicants must address how they meet the qualifications listed above in their letters of application. Please send letter of application, curriculum vitae and the names, addresses, and telephone numbers of three referees to:

Dean Michael A. Awender, Chair, Search Committee
C/o Laraine Grandt
Arizona State University West
P. O. Box 37100
Phoenix, Arizona 85069-7100

For more information: 602/543-3254 Fax: 602/543-7731

Confidentiality of all applications will be maintained. Referees will be contacted only after permission from the candidate has been obtained.

Arizona State University West is an Equal Opportunity/Affirmative Action Employer that actively seeks diversity among applicants and promotes a diverse work force.

KENYON COLLEGE
POLITICAL SCIENCE-IPHS
TENURE-TRACK

Kenyon College announces a joint tenure-track appointment in the departments of Political Science and the Interdisciplinary Program in the Humane Studies (IPHS). This joint position involves teaching a year-long course in IPHS, a broad-based tutorial oriented program from Classical Greece to the early Twentieth Century. The Political Science component of this position is in political philosophy, including teaching courses on specific authors (e.g., Locke, Nietzsche, Rawls); selected topics (e.g., community, post-modern political thought, libertarianism); or politics and literature (e.g., Shakespeare's politics or liberty and community in American literature). A Ph.D. and teaching experience required. The College teaching load is 3.2. The successful candidate should have a strong interest and proven excellence in teaching first-year students. Send a letter of application, CV, three letters of reference and a sample of published or other professional work to:

Professor Kirk Emmert
Political Science Department
Kenyon College, Gambier, Ohio 43022

An equal opportunity employer, Kenyon is committed to building a culturally diverse community and encourages the applications of women and minority candidates.
George Mason University

OFFICE OF UNIVERSITY DEVELOPMENT
Director Leadership Gifts

George Mason University is one of the nation’s fastest growing universities with a student enrollment of nearly 25,000. As GMU heads into its first comprehensive fundraising campaign, the development team seeks applicants for the position of Director of Leadership Gifts.

The successful candidate will provide leadership and coordination for the University’s efforts to secure individual major gifts, cultivate, solicit, and steward key prospects and donors; serve as primary staff support for the President of the University and the Vice President for leadership gifts solicitation; identify, recruit, train and manage high-level volunteers on the Campaign’s Leadership Gifts Solicitation Team.

A minimum of five years of successful fundraising or equivalent professional experience is required. Experience should include direct cultivation, solicitation, and stewardship of individual prospects and donors. Preference will be given to candidates with higher education experience. Strong interpersonal, communication and organizational skills are required. Bachelor’s degree required, advanced degree preferred. Salary will be commensurate with experience.

Review of applications will begin on July 30, 2001 and continue until filled. Applicants should submit a cover letter and resume to:

Chair, Search Committee, Director of Leadership Gifts
George Mason University
4400 University Drive, MS IA3
Fairfax, VA 22030-4444

Dean of the University Library
(Administrator IV)

California State University Dominguez Hills invites applications for the full-time administrative position of Dean of the University Library.

POSITION DUTIES AND RESPONSIBILITIES

The University seeks an innovative and dynamic leader who will be the chief academic and administrative officer of the Library and who will report to the Vice President for Academic Affairs.

QUALIFICATIONS

A. Required: A master’s degree in Library Science from an ALA accredited program; at least ten (10) years of increasingly responsible experience in and working knowledge of academic library operations.

B. Preferred: Familiarity with an integrated library system; experience in developing inter- and interlibrary cooperation through participation in collaborative arrangements; understanding of collective bargaining and shared governance; and commitment to the importance of diversity in the academic environment.

RANK AND SALARY

The position is an Administrator IV within the CSU Management Personnel Plan. Salary is dependent upon qualifications and professional experience.

EFFECTIVE DATE

Appointment to this 12-month management position will be effective January 1, 2002.

APPLICATION PROCEDURE

A letter of interest/application; a current resume or curriculum vitae; and the names, addresses and telephone numbers of at least three (3) professional references should be sent to:

Cecile Lindsay, Chair
Search Committee for University Library Dean
California State University, Dominguez Hills
c/o Office of Faculty Affairs
1000 East Victoria Street, EKC A 513
Carson, California 90747

To ensure full consideration, applications should be received no later than September 16, 2001. The Search Committee will then begin reviewing applications and will continue to review until the position is filled.

THE LIBRARY

Additional information is available on the Library’s web site at http://library.csudh.edu or http://www.csudh.edu/a&i/jobs.html

CSUDH is an Equal Opportunity, Affirmative Action, Section 504, Title IX Employer.

COLBY COLLEGE

ATHLETICS

HEAD MEN’S AND WOMEN’S SQUASH COACH

The Colby College Department of Athletics seeks a full-time, benefited head men’s and women’s squash coach starting August 15, 2001. General responsibilities include the overall administration of the men’s and women’s programs including budget, scheduling, and the recruitment of student-athletes. In addition, the coach is responsible for the direction, instruction, supervision, and coaching of the men’s and women’s varsity squash teams, the oversight and development of an assistant coach and the administration of the squash facilities. Duties also include another seasonal assignment.

Colby is a highly selective private liberal arts college of 1750 students located in central Maine. The college is a NCAA Division III Institution and is a member of the New England Small College Athletic Conference (NESCAC). It is the responsibility of the head coach to conduct the program according to all NCAA III, NESCAC Conference, and Colby College rules and regulations.

Bachelor’s degree required; master’s degree preferred. The candidate should have successful experience as a head coach or intercollegiate coach. Previous coaching and recruiting experience at the NCAA III level is desirable.

To apply, submit a cover letter, resume and three letters of professional reference to: Marcella Zalot, Associate Director, Athletic Department, Colby College, 4900 Mayflower Hill Drive, Waterville, ME 04901. Application review will begin immediately and continue until the position is filled.

Colby is an Equal Opportunity/Affirmative Action employer. Applications and nominations of individuals who would enrich the diversity of the campus community are strongly encouraged.

For more information about the College, please see the Colby web page at http://www.colby.edu

The University of Georgia

THE CARL VIVSON INSTITUTE OF GOVERNMENT

The Vivson Institute invites nominations and applications for the position of Associate Director of the Institute, responsible for the Governmental Training Division. As a member of the executive management team, the position reports to the Vivson Institute’s Director. The Governmental Training Division is responsible for the continuing education program of the Vivson Institute, which annually offers some 700 instructional programs involving more than 10,000 instructional hours and 25,000 local and state government elected and appointed officials. The governmental continuing education program has a permanent staff of twenty-two and a large group of part-time consultants. A master’s degree in public administration or a related field is required; a similar terminal degree is preferred. Preference will be given to candidates with a distinguished record in governmental continuing education and at the executive level in local and state government agencies. The position is available October 1, 2001, and carries rank in the public service faculty career ladder at The University of Georgia. The salary is competitive for a senior administrative or teaching position and will be based upon the qualifications and experience of the successful candidate. To assure that nominations and applications will be considered, they should be sent no later than Sept. 30, 2001, to Dr. James Ledbetter, Director, Carl Vivson Institute of Government, The University of Georgia, 201 N. Milledge Avenue, Athens, GA 30602-5482.

The University of Georgia is an Equal Opportunity Employer.
Endowed Professorship in Anti-Violence
Mandel School of Applied Social Sciences

The Mandel School of Applied Social Sciences (MSASS), Case Western Reserve University, is soliciting applications for the Dr. Semi J. and Ruth W. Begun Professor in anti-violence. The position involves primary responsibility for leading the newly established Begun Center for Violence Prevention, Research and Education, with secondary responsibility for teaching and service in the Master’s and Doctoral programs. The goals of the Begun Center include: (1) forming interdisciplinary academic partnerships to research and analyze the causes and effects of violent behavior; (2) combining advanced research methods and state-of-the-art technology to create a system of identifying “at-risk” populations; (3) establishing active networks among parents, educators and key community constituencies so as to effectively intervene in the cycle of violence; and (4) building on existing interventions and curricula that address the persistent and emerging social stressors associated with youth violence. The Professorship will be co-terminus with the Directorship of the Begun Center.

Requirements will include a M.D. or Ph.D. in Social Work, Public Policy, Psychology, Criminology, Anthropology, or a related science. The Director will lead and manage all Center activities, including research, training, advocacy, and technical assistance. The Director must be considered an expert in the field of violence prevention and have made significant contributions to scholarly literature. As such, candidates should possess a record of scholarship, teaching, and service for a tenure track or tenured appointment at the School. The Director will be responsible for securing ongoing funding for the center’s programs and initiatives. The ideal candidate must also have a firm understanding of the funding community and be able to identify new opportunities.

The Mandel School of Applied Social Sciences currently offers Master’s and Doctoral degrees to over 300 students. We offer joint degrees in Social Work and Law, Social Work and Nonprofit Management and Social Work and Business. MSASS faculty is multidisciplinary representing professions such as social work, psychology, sociology, public health and economics. A number of MSASS Faculty hold secondary appointments with other departments and faculty have collaborative projects with other departments. The School has a long history of community based/agency based research with the centers and institutes having major roles in these initiatives, such as the Center on Urban Poverty and Social Change, and the Cuyahoga County Community Mental Health Institute.

Applicants must submit a curriculum vita and five references. Please send applications or nominations to:
Darlyne Bailey, Ph.D., Professor and Dean
Dr. Semi J. and Ruth W. Begun Professorship Search Committee
Mandel School of Applied Social Sciences
Case Western Reserve University
10900 Euclid Avenue
Cleveland, Ohio 44106-7164
E-mail: msassdean@po.cwru.edu

Applications will be accepted until the position is filled.

THE NEW YORK STATE EDUCATION DEPARTMENT

The New York State Education Department seeks Associates for its Office of Special Education Quality Assurance. Responsibilities include ensuring the delivery of services to preschool and school-age students with disabilities through the conduct of on-site reviews of special education programs in school districts, other State agencies and private schools; and providing technical assistance, complaint resolution and information to parents, school officials and other interested parties.

Minimum Qualifications - Masters degree in special education, elementary or secondary education, school psychology, school counseling, guidance and counseling, rehabilitation counseling, social work, audiology, speech pathology, rehabilitation of the blind or deafness rehabilitation;

And NYS certification as a teacher of special education, or as a teacher of the deaf and hearing impaired, blind or partially sighted, or speech and hearing impaired, or as a school psychologist; or license as a speech language pathologist.

And five years of professional experience in special education service delivery, administration, student evaluation, teaching children with disabilities, or designing or developing special education programs.

Locations - Brooklyn, Yorktown Heights, Malone, Albany, Syracuse and Buffalo.

Condition of employment - Provisional appointment pending civil service examination.

For more information, visit our web site at www.nysed.gov.

The University of Wisconsin-Parkside is an AA/EEO Employer D/M/V/W.
An ideal setting for your career.
One University, Many Possibilities
Located on 140 waterfront acres in the historic port town of Bristol, Rhode Island, Roger Williams University merges the traditional with the innovative to create an academic setting that draws exceptional faculty from the United States and around the world. As a private University, we offer a wide range of liberal arts and sciences majors and programs in architecture, business, education, engineering, history, preservation, justice studies and law. Roger Williams University is one of the fastest growing liberal arts institutions in the country, as well as one of the most ideal places to share knowledge and information, whether you’re a President, professor, or technician. We sincerely hope the following exciting opportunity for the right candidate:

Dean - Gabeli School of Business

Roger Williams University invites applications and nominations for the position of Dean of the Gabeli School of Business. Approximately 620 full-time and 280 part-time students are enrolled in undergraduate programs leading to the Bachelor of Science degree in accounting, business management, computer information systems, international business, financial services, and marketing. In recent years, the School has focused on entrepreneurship and small business management. A post-baccalaureate Accounting Certificate program and MBA program have been added. The School is seeking a Dean to lead a dynamic School in its second year of candidacy for AACSB accreditation.

Responsibilities: The Dean should expect to lead faculty toward specific goals designed to further distinguish the University’s business programs, through full AACSB accreditation; guide faculty and students through the curriculum revision and reform, through relationships with the University and the broader business and academic community; and participate in institutional fundraising initiatives.

Qualifications: Candidates are expected to hold an earned Doctorate in a business discipline. They must possess a significant background in business, teaching and academic experience at the undergraduate and graduate levels; as well as management and administrative experience. Of paramount importance are strong academic School accreditation experience and proven track record of building bridges to the business community.

Applications: Applications must include a current curriculum vitae, personal statement of interest in the position, the names of at least three references, and letter of recommendation.

Send to: Dean, FH006, Office of Human Resources, Roger Williams University, One Old Ferry Road, Bristol, RI 02809.
Applications will be accepted until the position is filled.

Amerciaian with Disability Act as allow.

Swarthmore College, a small, highly selective liberal arts college, seeks an experienced professional for the position of:

ASSOCIATE DEAN OF MULTICULTURAL AFFAIRS

Swarthmore College invites applications and nominations for the position of Associate Dean of Multicultural Affairs. This position provides leadership for the College’s comprehensive effort to achieve a culturally pluralistic campus that allows all students to take full advantage of the Swarthmore experience. The Associate Dean works with faculty, staff, and students to develop and implement the College’s strategic plan for achieving pluralism; to consult with and assist the director of the Office of Multicultural Affairs; to coordinate activities of the College’s committee on multicultural education; and to work with faculty, staff, and students to develop and implement programs and policies to promote multicultural education and diversity. The Associate Dean will also be responsible for campus events and programs, including the annual Multicultural Retreat, Multicultural Week, and other events and programs designed to promote multicultural education and diversity.

Responsibilities: The Associate Dean will develop and implement the College’s strategic plan for achieving pluralism; to consult with and assist the director of the Office of Multicultural Affairs; to coordinate activities of the College’s committee on multicultural education; and to work with faculty, staff, and students to develop and implement programs and policies to promote multicultural education and diversity.

Qualifications: Candidates should have a strong commitment to multicultural education and diversity, and a proven record of successful leadership and management. The ideal candidate will have a Ph.D. in education, psychology, or a related field, and a minimum of five years of experience in multicultural education and diversity. The candidate should also have excellent communication skills and be able to work effectively with faculty, staff, and students.

Applications: Applications should include a cover letter, current resume, and three references. Applications should be submitted to:

Human Resources
Swarthmore College
500 College Avenue
Swarthmore, PA 19081

Swarthmore College is an equal opportunity employer committed to excellence in diversity.

College of Lake County

The Computer Information Systems program offers four Associate degrees and certificate programs. Executive Assistant to the President

Towson University is accepting applications for the position of Executive Assistant to the President. The President of Towson University is the chief executive officer of the institution responsible for all aspects of campus administration. The Executive Assistant to the President will act as Chief of Staff and have responsibility for coordination of executive activities on behalf of the President.

Responsibilities include facilitating operational matters on behalf of the President; representing the President with diverse groups of internal/external constituencies; designing and managing special projects; coordinating activities of Towson University’s Board of Visitors; coordinating presidential meetings with state legislation, economic development agencies, CBC, Chambers of Commerce, etc.; conducting research; report presentations and senior level communication.

The successful candidate will have extraordinary organizational skills with experience in a similar position in an institution of higher education being highly desirable. This position requires strong written and oral communication skills and the demonstrated ability to collaborate with and relate effectively to diverse groups of internal and external constituencies. A master’s degree is required but a doctoral degree is preferred. Salary will be commensurate with experience.

Founded in 1866, Towson University, situated on 328 acres, is located in the suburban community of Towson, Maryland, just north of Baltimore and 45 miles from Washington, D.C. As the Baltimore area’s largest university and Maryland’s largest comprehensive university, Towson plays a vital role in the educational, economic, and cultural life of Baltimore and the State of Maryland. Towson University is recognized regionally and nationally for high-quality programs in the liberal arts and sciences, fine arts and performing arts. Over 500 distinguished full-time faculty members hold the highest degree of academic preparation in their fields. Towson University continues to expand its degree programs in the undergraduate, graduate, and doctoral levels that are available at 60, 53, and 3 respectively. For additional information, visit: [http://www.towson.edu](http://www.towson.edu).

To apply send a letter of interest indicating Vacancy #6-800-01, resume, and three letters of recommendation to:

Office of the President
Towson University
8000 York Road
Towson, Maryland 21252-0001
Fax: 410-704-3488

Review of applications will begin immediately and continue until the position is filled.

Towson University is an equal opportunity/affirmative action employer and has a strong institutional commitment to diversity. Women, minorities, persons with disabilities, and veterans are encouraged to apply.

**Electrical Engineering Department Head**

The Erik Jonsson School of Engineering and Computer Science at The University of Texas at Dallas invites applications for the Department Head of Electrical Engineering. Candidates must have a Ph.D. in Electrical Engineering, or equivalent, and must have demonstrated their ability in research, in teaching, and in leadership in an academic setting. Applicants with previous industrial and administrative experience, in addition to academic experience, are preferred.

The Electrical Engineering Department is currently seeking to strengthen its teaching and research in the areas of Telecommunications and Microelectronics, as a further enhancement of its successful program. In recognition of the success of the program and in anticipation of the continued growth, The University of Texas Board of Regents has approved $20 million for the construction of a second building for the Jonsson School. In addition, local industry is contributing $10 million for equipment and program development in the new facility. The new department head will have a significant role in applying these resources to the continued development of the school. The university is located in the most attractive suburb of the Dallas metropolitan area. There are over 600 high-tech companies within fifteen miles of the campus, including Texas Instruments, Nortel, Alcatel, EDS, Ericsson, and Perot Systems. Opportunities for joint industry-university research projects and consulting are excellent. The program expects to continue its growth into a major center for Electrical Engineering, with a strong emphasis in research, teaching, and industrial outreach.

Currently, the Electrical Engineering Department has 27 tenured/tenure-track faculty, three senior lecturers, and several open positions. The potential for growth is excellent. The new Department Head will have a great opportunity to influence the direction of growth in the program. For more information, contact Dr. William Osborne, Chairman of the Search Committee, at 972-883-2974 or via email at wosborne@utdallas.edu.

Applicants should mail their curriculum vitae with a list of at least five academic or professional references to: Academic Search #743, The University of Texas at Dallas, P. O. Box 830688, M/S AD 23, Richardson, TX 75083-0688.

Indication of sex and ethnicity for Affirmative Action statistical purposes is requested but not required. Applications will be accepted until the position is filled; screening will begin immediately.

*The University of Texas at Dallas is an Equal Opportunity/Affirmative Action employer and strongly encourages applications from candidates who would enhance the diversity of the University's faculty and administration.*
Presidential Search
North Florida Community College
Madison, Florida

The District Board of Trustees invites applications from innovative and visionary leaders for President of NCCC. The College is in its 45th year of serving six rural counties in North Florida and located 35 miles east of Tallahassee. Enrollment is 3,200 students. See our website at www.nfcc.edu.

The President is CEO and responsible to the NCCC Board of Trustees and charged with the overall responsibility for the operation of the College. In addition to duties imposed by the State Board of Education, the President is charged with NCCC Board of Trustees Rules.

QUALIFICATIONS:
- Earned doctorate from accredited institution of higher education or equivalent (see NCCC website for definition of equivalency).
- A minimum of 10 years administrative experience in instructional programs, preferably as a Florida community college administrator.
- Demonstrated commitment to excellence in teaching and learning, student success, and institutional effectiveness.
- Ability to sustain and expand the College’s enrollment.
- Demonstrated record of accomplishment in advancing diversity and inclusion.
- Ability to lead and inspire a diverse and inclusive community of learners.

APPLICATION REQUIREMENTS:
- Cover letter indicating how experience and background relate to qualifications.
- Resume and application (application at www.nfcc.edu).
- Names, addresses, telephone numbers, e-mail addresses, and current titles of five references.
- Transcripts: Unofficial transcripts required for review. Official transcripts required before offer of employment.

APPLICATION DEADLINE: Presidents Search Committee, Director HR, North Florida Community College, P.O. Box 43464, Madison, FL 32340. Applications will not be considered unless complete.

Other Positions
If you have other skills and credentials which might strengthen our curriculum and faculty and wish to inquire about other appointment opportunities or to leave your resume and letter of interest on file, please contact Neal B. Abraham, Vice President for Academic Affairs and Dean of the Faculty, DePauw University, Greencastle, IN 46135, nabraham@depauw.edu

DePauw University is an Affirmative Action, Equal Opportunity Employer and encourages applications from women and members of underrepresented groups.

An ideal setting for your career.
One University, Many Possibilities

Located on 140 waterfront acres in the historic seaport town of Bristol, Rhode Island, Roger Williams University merges the traditional with the innovative to create an academic setting that draws exceptional faculty from the United States and around the world. As a private university we offer a wide range of liberal arts and sciences majors and programs in architecture, business, education, engineering, historic preservation, justice studies and law. Roger Williams University is one of the fastest growing liberal arts institutions in the country, as well as one of the most ideal places to share knowledge and information. Whether you’re a professor, professional or technician, we currently have the following exciting opportunities for the right candidates.

Division of Student Affairs is conducting a search for a full-time Director of Athletic and Assistant Director of Campus Programs.

Director of Athletics, Intramural and Recreation Ref# HQ56

This position reports to the Dean of Students and Chief Student Affairs Officer. Serves as a team member of the Dean’s senior staff, which also includes: Counseling and Student Development, Campus Programs, Multicultural Affairs, International Studies, Housing, Residence Life, Career Services, Student Affairs, Athletics, Judicial Affairs and Health Services. The Director will oversee a Division III athletic program offering 17 men’s and women’s sports and a highly successful intramural and recreational program geared primarily to approximately 3,100 undergraduate students, most of whom are residential students. The Director will manage a budget of nearly one million dollars; supervise 16 full-time staff and various part-time coaches; oversee the athletic and intramural facility and fields; and, will oversee the upcoming renovation and expansion of the University’s recreation center. Qualifications include: Master’s degree required. A minimum of 6-8 years experience at the intercollegiate level in athletic administration, knowledge of the NCAA and its rules, regulations and philosophies. The ability to work with various constituent groups to design quality Division III Athletic and Intramural/Recreational programs including high-quality competitive liberal arts University. Interested applicants should send resume to Michael J. S. Smith, Assistant Dean of Students/Assistant Director of Campus Programs, Roger Williams University, One Old Ferry Road, Bristol, RI 02809.

Assistant Director of Campus Programs Ref# HQ57

This position reports to the Assistant Dean of Students/Assistant Director of Campus Programs. The Assistant Director will be working with departmental initiatives in the areas of program development, advising of the student body and the University newspaper, maintaining and generating a database of students, providing a comprehensive career counseling program, and assisting with the development of a comprehensive campus-wide career education and counseling program. Qualifications include: Bachelor’s degree preferred. A minimum of two years experience working with students or organizations and programs. Experience with publishing and design and the programs related to each area. Website design experience would be helpful, although not necessary. Salary commensurate with qualifications and experience with a superior benefit package. To apply send a letter (indicating the position and job reference number), resume and list of three professional references to: Office of Human Resources, Roger Williams University, One Old Ferry Road, Bristol, RI 02809.

Union College
Director, Career Development Center

Founded in 1795 in Schenectady, New York, Union College was one of the first colleges chartered by the Regents of the State of New York and is one of the oldest non-denominational colleges in the country. Enrolling approximately 2,000 undergraduates, this highly selective liberal arts institution offers joint degree programs with Albany Law School and Albany Medical College, as well as two-degree programs in engineering and business.

The Position
Reporting to the Dean of Students, the Director is responsible for the overall leadership, vision, direction, coordination, and delivery of career services for students. The incumbent is responsible for the oversight and coordination of career counseling, career-related workshops and panel discussions, overseeing the employer recruiting program, career fairs, and the experiential education program, and for ensuring the vitality of career resources and services to students. The Director will focus on increasing internship, co-op, and recruiting opportunities for students, creating an integrated advising program that encompasses career information, graduate programs, and fellowships, and coordinating the delivery of services with the appropriate technology and resources to support the unit.

Qualifications
A master's degree is required with progressive experience in career services in higher education. The successful candidate will possess knowledge of career services and career development, preferably within a liberal arts setting, and have an enthusiasm for working with students and alumni on a broad range of career goals. The position requires demonstrated oral and written communication skills, a proven track record in staff supervision, presentation and interpersonal skills, and experience with information systems technology as it serves the career services area.

Application and Nomination
Review of applications will begin on August 24, 2001 and will continue until the position is filled. Nominations of individuals for this position may be made by mail to:
The Spelman & Johnson Group
Union College-Career
38 Mulberry Street, Box 304, Leeds, MA 01053
Phone: 413-584-7089/Email: mail@spelmanandjohnson.com
Visit Union's website at www.union.edu
The College is committed to a program of affirmative action and equal employment opportunity. Women and minorities are strongly encouraged to apply.

MULTICULTURAL SPECIALIST

Mid-State Technical College, located in Central Wisconsin, offers Associate Degrees and Technical Diplomas in 50 careers, as well as personal enrichment classes and contracted business services. Mid-State is seeking qualified candidates for the position of Multicultural Specialist. The Multicultural Specialist will promote minority student participation and retention by implementing and monitoring the Minority Student Grant and Plan activities and support services, including Grant and Plan reporting and renewals. The Specialist will also promote and coordinate international education initiatives, such as exchange programs, international partnerships, and internationalizing the curriculum.

Bachelor's Degree required in Communications, International Business, Sociology, Psychology, or a related field; Master's Degree preferred. Work experience with minority populations required; international education experience preferred. Excellent English language skills required; bilingual skills desirable.

Mid-State offers a comprehensive benefits package and a salary commensurate with education and experience. To apply, please submit a letter of application and resume to:

EEO/IO Institution

ASSOCIATE DEAN
GRADUATE COLLEGE
SCHOOL OF INTERDISCIPLINARY ARTS AND SCIENCES
The Union Institute seeks an experienced, self-starting academician to serve as Assistant Dean of the Graduate College, School of Interdisciplinary Arts and Sciences. The Assistant Dean works as a team with the Vice President of Academic Affairs to provide administrative facilitation of the academic programs of the Graduate College including the following functions: reviews admissions applications and represents the Dean on the Admissions Committee; reviews learner documents, including the Learner Agreement, the Program Summary and the Project Demonstrating Excellence (dissertation); makes recommendations concerning certification and graduation; reviews draft transcripts and edits final transcripts in cooperation with the Office of the Registrar; reviews requests for emergency leaves and special accommodations under the Americans with Disabilities Act (ADA); and develops annual conference schedule and produces annual seminar catalog. Assistant Deans are awarded faculty privileges and may work with a limited number of doctoral learners in addition to their administrative duties.

The Assistant Dean should be a person of integrity and imagination, with a discerning critical mind, empathetic character, and a good sense of humor. Expectations include an earned doctorate with a three to five year record of successful teaching, scholarship, and administration. We also seek individuals with a commitment to person-centered graduate education and experience working with adult learners.

The Union Institute is an accredited, independent university offering adult learners the opportunity to design and carry out individualized programs of study across a wide range of academic fields. The Graduate School of Arts and Sciences offers only the Ph.D. It has 16 core faculty, over 1,000 adjunct faculty and 840 learners enrolled in an interdisciplinary doctoral program. Our offices are located in Cincinnati, Ohio, where the Assistant Dean will be expected to reside.

Salary is commensurate with experience and qualifications. Please send nominations and applications postmarked no later than August 31, 2001 to:
Assistant Dean Search Committee
School of Interdisciplinary Arts & Sciences

Equal Opportunity Employer

WESTERN CONNECTICUT
STATE UNIVERSITY
DIRECTOR OF UNIVERSITY POLICE

WCSCU is located in Danbury, a city in Fairfield County, 60 miles north of New York City. The University is located on two campuses and serves 5,800 undergraduate and graduate students. Western is one of the four comprehensive universities that comprise the Connecticut State University System.

Duties: This position reports to the Associate Vice President for Public Safety and is responsible for directing a campus wide program of police and public safety personnel to provide for the safety and quality of campus life for students, faculty, staff and visitors to the University. The department is staffed by 14 sworn police officers, 8 non-sworn positions, and 1 support staff position.

Requirements: Bachelor’s degree required with minimum of 10 years of progressively more responsible experience in law enforcement (preferably campus law enforcement) with at least 6 years experience as a supervisor of law enforcement officers. The individual must have the following qualifications: 1) demonstrated familiarity with laws affecting public safety on a university campus and their application to protecting life and property, while preserving individual constitutional rights; 2) demonstrated ability to direct the work of police and security personnel and to take “on scene” command of emergency situations; and 3) considerable knowledge of police investigative procedures including laws of arrest, search, seizure and preservation of evidence.

Application Process: Submit cover letter, resume, and the names and phone numbers of three professional references to Mr. Ronald Shaw, Associate VP for Public Safety, WCSU, 181 White St, Danbury, CT 06810. Deadline for applications is August 31, 2001.

WCSCU is an AA/EOE Educator/Employer.

READERSHIP

HO’s readership is primarily composed of progressive decision-makers in academia and in public and private sectors. As educators and administrators, they represent higher education’s most dynamic thinkers. As executives in public or private enterprise, they signify a broadening interest and desire to diversify the workplace. As counselors and professionals in community-based organizations, they are influential advisors to students on career development and other areas of service. HO’s readers value multiculturalism and its significance in a global economy. The publication’s circulation is 28,000.

In addition to the primary circulation, HO is distributed at major educational meetings and conferences and government agencies and is mailed to community-based groups.

LATINO LEADERSHIP: GETTING READY TODAY FOR MAÑANA

In the past few years, the word "leadership" has surfaced as both a goal and a concept. Those of us who are members of the racial and ethnic community have struggled with the notion of leadership. Too often, persons of color have found themselves on the periphery of the goal and excluded from the concept.

Like many others, I have had my share of "leadership training" as a means to eventually ascend to a position of influence and greater responsibility in keeping with my professional credentials. Lately, the public has been inundated with publications, films, audiotapes, websites, internships, fellowships, classes, and other strategies intended to prepare us to be leaders. Although this is commendable, I am concerned that such opportunities might be addressing the symptoms of the problem and not the problem itself. As Latinos, we are faced with a particular set of roadblocks on our journey to taking our rightful place in the leadership hierarchy. For example, there are what I have come to refer to as the Fatal Three Rs of Latino Leadership Training:

1. Repair—This first step in the training process is often based on the belief that most Latinos have an English-language problem (accent and/or limited fluency) that needs to be repaired. Failure to show mastery of the language or to overcome the accent is often all that is needed to deny the individual the opportunity to be considered a viable candidate for a leadership position.

2. Retrain—Candidates who reach this level are then expected to adapt to and show mastery of certain behaviors that are frequently not part of their repertoire or base of experience. Being able to demonstrate such behaviors is yet another indicator of leadership potential.

3. Recast—Finally, once the "language problem" has been overcome and the behaviors have been mastered, the Latino candidate is expected to talk like and look like a different person molded in the image of those in leadership positions.

The notion that "one size fits all" is greatly flawed and has been a deterrent for Latinos to making gains in positions of leadership. The idea that something is wrong with Latinos who do not fit the mold has been a major stumbling block to truly opening the doors to leadership opportunities. This is not to say that some Latinos have not been successful in surviving and adapting to the leadership equation; it is to say that many otherwise qualified individuals have been unfairly excluded. Those who have "made it" often have been the most adept at being bilingual, bicultural, and/or willing to abandon their first language and certain cultural nuances.

But the problem does not end here.

Even when Latinos are allowed to enter the ranks of leadership, many challenges surface. Some encounter personal frustration with a system that is wrought with tradition and does not value differences in perspective. Others experience a sense of apathy and resignation to a lower status as they register their inability to move up the ladder at the same speed as their non-minority peers. This often reaches a crisis level characterized by intern turmoil and eventual departure. These are symptoms of a broken-down system of leadership and training that is in need of a major overhaul. The ongoing failure of the majority of Latinos to become members of an elite group of leaders is characteristic of a system that neither values nor makes room for diversity. Talking about diversity is commendable, but it is quite different to support it when it means a shift in power, an uncompromised consensus, and an inseparable part of the infrastructure.

If Latinos are ever going to be bona fide members of the leadership structure, then it is incumbent upon those business, governmental, and educational entities to confront and eliminate those institutional and attitudinal barriers. Our society is in need of "transformational leaders" capable of moving us to a new level of understanding, "renewers" who will confront the challenges before us, and "servant leadership" in which our commitment to stewardship is redefined. Diversity in leadership should not just be tolerated; it must be embraced today in order to be ready mañana.

The Internet and our Schools

BY GUSTAVO A. MELLANDER

Many college professors have been embarrassed to discover that students are more computer literate than we are. So most of us have turned to training sessions both on and off campus. And on the weekends when we get stuck, we call over the 12-year-old kid who lives next door. We put up with her contemptuous, snide glances because she helps us.

Well, it's not going to get any better. Computers and the Internet are here to stay, and students in grade schools are being afforded wonderful opportunities to learn more. Students are going to arrive in our classes more proficient and comfortable with computers than many of us.

As we all know, the nation's Hispanic population is younger than the rest of the nation. Many are still in our public schools: 35 percent of Hispanics are 18 or younger, compared to 25.7 percent of the total U.S. population. The question is: are they receiving good computer training as well?

Early Training

The National Center for Education Statistics (NCES) surveys public schools annually to measure what proportion is connected to the Internet. It also monitors progress made in providing access for all students to information technology. (For more details see "NCES 2001-07" by Anne Cattagni and Anne Farris-Westat.)

In 1994, 35 percent of all public schools had access to the Internet. In Fall 2000, it jumped to 98 percent. The increase is credited to the Education rate (E-rate) program. Established in 1996, it provides services including Internet access, and internal connections to schools and libraries at discounted rates based upon the income level of the students.

Another key measure of Internet access in schools is the proportion of instructional rooms connected to the Internet. Schools have made consistent progress since 1994, when only 3 percent of instructional rooms had computers with Internet access.

In Fall 2000, 77 percent of instructional rooms were connected to the Internet, up from 63 percent in 1999. However, in 2000, as in previous years, there were differences in Internet access in instructional rooms by student characteristics. For example, in schools with the highest concentration of students in poverty (75 percent or more students eligible for free or reduced-price school lunch), a smaller percentage of instructional rooms were connected to the Internet (60 percent) than in schools with lower concentrations of poverty (77 to 82 percent of instructional rooms).

Minority Enrollment

A similar pattern occurred by minority enrollment. In schools with the highest minority enrollment (50 percent or more), a smaller percentage of instructional rooms had Internet access (64 percent) than in schools with lower minority enrollment (79 to 85 percent of instructional rooms).

Despite these continuing differences, however, the percentage of instructional rooms with Internet access increased between 1999 and 2000 in these schools: from 38 to 60 percent in schools with the highest concentration of poverty, and from 43 to 64 percent in schools with the highest minority enrollment.

Ratio of Students to Instructional Computers

The ratio of students to instructional computers decreased to 5-to-1, a ratio that many experts consider a reasonable level for the effective use of computers. The ratio improved from the national average of 6-to-1 in 1999.

Similarly, the ratio of students to instructional computers with Internet access improved from 9-to-1 in 1999 to 7-to-1 in 2000. However, differences by school characteristics persisted. The ratio of students to instructional computers with Internet access was still greater in schools with the highest concentration of students in poverty than in schools with the lowest concentration of poverty (9-to-1 compared with 6-to-1). Nonetheless, in schools with the highest concentration of poverty, the ratio of students to computers with Internet access improved from 17-to-1 in 1999 to 9-to-1 in 2000.

Availability After Hours

Internet accessibility outside of regular school hours allows students who would not otherwise have access to the Internet to use this resource for homework, etc. In 2000, 54 percent of schools with access to the Internet reported that computers were available to students outside of regular school hours.

Secondary schools were more likely to make the Internet available to students outside of regular school hours than elementary schools (80 percent compared to 46 percent). Similarly, large schools (1,000 or more students) were more likely to make the Internet accessible to students outside of regular school hours than medium-sized and small schools (79 percent compared with 53 and 49 percent, respectively).

Schools with the highest minority enrollment reported Internet availability outside of regular school hours more frequently than schools with the lowest minority enrollment (61 percent compared with 46 percent). Of the 54 percent of schools making the Internet available to students outside of regular school hours, 98 percent made it available after school, 84 percent before school, and 16 percent on weekends.

Not all Hispanic children attend low-income schools, but many do. It is clear from this report that they are not being as well served. Nevertheless, the service trajectory is improving.

On a larger scale, what this all boils down to is that in just a few years students will come to our campuses very, very computer sophisticated. Better be nice to that 12-year-old kid next door!

Dr. Mellander is a professor at George Mason University.
Latinos/as have much to be proud of as they continue to make their mark in many fields—education, business, and science, for instance. Members of nuestra comunidad hispanoparlante from many walks of life are excelling—those who are fortunate enough to have access to role models, guidance, and opportunities as well as others who have struggled in the face of adversity or have suffered the consequences of poor choices.

The stories are inspiring and demonstrate how anything is possible with the right combination of perseverance, determination, and a willingness to learn and succeed. No handouts here.

One article in this issue features high school junior Mario Cruz, a model student whose mature, self-imposed work and study ethic have earned him a perfect GPA and the possibility of a better future. There are many others like him who, despite hard knocks, battle misfortune, dare to dream, and work assiduously to make their dreams a reality rather than wallow in self-pity.

Another features Jimmy Santiago Baca, a renowned poet who first began to write while in prison. His hard-core insights reach into the soul and gouge the most provocative and poignant thoughts and feelings. I leave you with a few words from one of Baca's poems: "I am for peace, for giving a man a chance to prove himself, giving a woman her fair due...I am dangerous. I am a fool to you all. Yes, but I stand as I am, I am food for the future, my thought will blossom tomorrow, Today, I plant roots..."

Read on. Seguimos adelante.

M. Serracín
Reports Hispanics Do Well at Independents

More $$ Aid and Faster Road to Graduation

by Jeff Simmons

Luz Hinojosa dreams of California. Not because she's never been there, but because this summer she didn't return.

"It's so weird because I can't do it this year," the soft-spoken Hinojosa says from her home in Mission, Texas. "I dream about California every night."

The 20-year-old from Mission, Texas, just began her junior year at St. Edward's University—a huge step, and a first for any member of her family. Her family travels to California each summer to work in the vineyards. But this summer, her father toiled away in a warehouse; her mother tended to the home. That, she says, allowed her not to miss any time at school, which is important to her because she has endured some educational growing pains.

Hinojosa attends St. Edward's University in Austin, about six hours away from family and friends. At first, her father was reluctant to allow her to enroll.

"My father was very hesitant; he wasn't thrilled with the idea," she recalls. "My mother was very supportive and said, 'She's 18 years old; we've got to support her in whatever she wants to do.' They trusted me, and I know it took a lot."

Besides trust, it also took money. And that was where St. Edward's—a selective Roman Catholic college that participates in the federal College Assistance Migrant Program—stepped in to give her that lift up the educational ladder. The program provides financial aid to the children of migrant workers.

"At first, I wasn't even considering St. Edward's," she says. "It was far away from home, and I was considering staying in the valley. I talked to other St. Edward's students about the first year, and what happens after the scholarship is over, and how could I afford it."

She was sold once she stepped onto the campus grounds. St. Edward's
is a relatively small school. It enrolls 1,920 full-time students and 860 part-timers. Close to one-third of the student body is Hispanic.

She observed smaller classes than expected, a diverse curriculum geared toward career orientation, students who were friendly, and professors who challenged their charges.

"It's a small school that really respects who you are," she says, "and it has a community feel. You almost know everybody, and everybody is friendly. You are not just a number, and you get to really know people."

Hinojosa may extol the virtues of the school because of its impact on her life, but she also believes that there are many other students struggling out there who are held back because of family obligations and financial straightjackets.

She has become one of the "faces" of success at independent schools across the nation. Her photograph and a brief portrait of her life are contained in the National Association of Independent Colleges and Universities' (NAICU) 2001 National Profile.

The profile, published every few years since the late 1980s, is a statistical portrait of the nation's 1,600 nonprofit, independent colleges and universities. Those institutions enroll 29 million students.

NAICU periodically provides--in a national context--figures on student demographics, academic offerings, and tuition levels.

Members include traditional liberal arts colleges, major research institutions, church- and faith-related institutions, historically Black colleges, single-sex colleges, art schools, two-year colleges, and schools of law, engineering, business, and medicine.

One of its key premises: to ensure students who are contemplating entering higher education that private schools can be affordable. NAICU leaders say admission into private schools is attainable for students from all economic brackets in the nation.

"The mission has been, for 25 years now, since our founding, to increase financial aid for institutions and individual students. That's been No. 1," says David L. Warren, the association's president since August 1993.

"We also want to reduce federal regulations and preserve our nonprofit status and use the tax code to help families save for college and pay for colleges, and to help repay loans.

"The biggest challenge has been balancing the demands to continue to provide access to high quality education and to do so by maintaining the most modest tuition increases annually possible."

NAICU was founded 25 years ago and serves as a unified voice of independent higher education. The organization's 1,000 members now enroll about 85 percent of all students attending private institutions. It has lobbied the federal government on policy issues affecting taxation, government regulations, and student aid. It also spearheaded the Student Aid Alliance, an effort to increase funding for existing aid programs.

The National Profile indicates that 80 percent of dependent full-time undergraduate students at private schools received some form of financial aid in 1995-96, amounting to an average of $10,794. Those were the latest figures supplied for the report.

Independent institutions often garner much of their funds from corporate contributions and supply aid from their own resources. In 1999-2000, they provided close to $8 billion in financial assistance, compared with $1.4 billion in 1984-1985. Most of that assistance came in the form of grants.

"Institutions are definitely responding to the financial needs of students," Warren says. He says the federal government needs to do more to supply more aid and opportunities to students, though he has "happily" witnessed an escalation in the federal Pell grant program allotments.

NAICU has been lobbying for an increase of $600 dollars in each Pell grant allotment and substantial increases in three campus-based aid programs.

Over the last few decades, tuition and fees have swelled at most colleges across the nation. NAICU reports that its members' average tuition climbed to $13,688 in 2000-2001, ranging from zero at some schools to $26,700.

Families with the greatest need pay an average of 26 percent of the school's published tuition.

NAICU leaders say that the higher actual costs of providing education are equivalent to those at comparable public and private colleges and universities, but that the prices charged are different because states subsidize tuition of all students at public schools. That amounted to an average of
$6,300 per student in 1997-1998.

Loans have overtaken grants as the main avenue for many students. “Twenty years ago, 60 percent of all federal money was grants and 40 percent were loans. Those percentages have now been reversed,” Warren says.

The median family income of Hispanic students attending member institutions is $16,000. At the public colleges and universities, Warren says, the number is double that, at $32,500.

NAICU reports that during the 1995-1996 academic year, more than 28 percent of students enrolled at its member campuses were from families earning $75,000 or more, which is higher than the near 24 percent of those at state four-year colleges.

But at NAICU schools, 11.8 percent were from families with income levels less than $15,000, and that was a slightly greater percentage than those at state four-year schools.

NAICU leaders tout their institutions’ diversity, saying the campuses reflect the composition of neighborhoods and other campuses around the nation. Campuses enroll as few as 100 students, and as many as 30,000.

NAICU reports that the percentage of minority students enrolled in its colleges and universities has grown consistently each year, and that the overall percentage is about the same in the private and public sectors.

In the 1989 Profile, 18 percent of the students enrolled in the private and public sectors came from minority backgrounds, compared to 24 and 25 percent in the 2001 Profile.

The latest profile indicates that in 1998 79 percent of students in independent four-year schools were Hispanic, while 77 percent were Hispanic at state four-year schools. Yet, higher percentages of Black, Asian, and Native American students were enrolled in state schools.

Higher percentages of first-generation students enrolled at private institutions earn a bachelor’s degree in five years or less, at 55 percent compared with 34 percent enrolled at comparable public institutions.

“Hispanic families come to discover that we will take them in and put the students in a smaller environment with a small faculty-student ratio, faculty mentors, a supportive atmosphere inside and outside the classroom, and one that will provide them with federal and institutional financial aid.”

“The public tends to think that private institutions historically are the domain of well-to-do White suburban students, and what you see is that’s not so,” says Warren. “The very large message here is that we are indeed exceptionally diverse in terms of race and ethnicity and in terms of family income. These are very large surprises to people.”

Esther Yacono says many students are surprised when they realize they have a shot at college. It was an endeavor many previously discounted because they felt they just could not afford it, or leave their families.

Yacono is the director of the College Assistance Migrant Program (CAMP) at St. Edwards. The federal program was established in 1982, and St. Edwards was one of the first universities to receive some of its funds. The program selects 40 first-year students and offers them academic and financial assistance. They are only responsible for about $2,000 of the $17,000 tuition tab.

“The university is very generous with these students because of its mission and the fact that they really do qualify for quite a bit of financial assistance,” says Yacono. “We work in any way possible to help them succeed in their freshman year,” she says. “These students, by and large, have had a lot of interruptions in their education.”

After their first year, the program still provides outreach and academic counseling to assist the students. The university also works with the students to help them receive a hefty financial aid package—from 75 to 80 percent of its academic costs—because of its original investment.

“It’s very important because these students are really dependent on whatever help they could get. Otherwise, they would not be able to stay here without funding because their families would not be able to help them.”

For the last decade, St. Edward’s has been considered an Hispanic-serving institution because about a third of its students are Hispanic. Fifty-eight percent are female, which, says Yacono, has been a key enticement to first-year students in the region, as well as the 18-to-1 faculty-student ratio.

“This is a wonderful university. I wish I could have come here myself. The faculty really takes an interest in the students to make sure they pass, and that they are available to the students,” she says.

The biggest challenge facing independent colleges, she says, is that many don’t offer Ph.D. programs, and some aren’t able to offer a broad range of studies.

“The university is constantly writing grant proposals and seeking donors,” says Yacono, a former principal who has been at St. Edward’s for seven years. “This is really a good program and it’s true to its mission.”

She says Hinojosa was a perfect choice for the National Profile report because she exemplifies hard work and dedication.

“She is a fabulous kid,” says Yacono. “She’s a very intelligent young lady who does a lot of reading. That is one of the things that helped her out. And her parents are very supportive. They really want her to get a degree and not continue in the same migrant cycle they are in.”

Hinojosa, who also received the Coca-Cola First-Generation Scholarship from the Texas Independent College Fund, believes St. Edward’s has instilled in her a sense that you can change your destiny and affect others along the way.

She has two younger sisters, one of whom is now considering college. “I tell her what a wonderful experience it is,” she says. “She might go to St. Edward’s as well.”

Hinojosa is active on campus as copy editor of the student newspaper, the Hilltop View, as a member of the Hispanic Student Association, the University Programming Board, and Campus Ministry.

That involvement reflects what NAICU leaders tout in the profile, that students in independent colleges and universities are active on campus. More than half the students attending private institutions take part in community service activities or volunteer.

NAICU reports that 53.6 percent participated in community service activities during the 1995-96 school year, 71.6 percent engaged in fine arts activities, 66.8 percent in school clubs, and 52.3 percent in sports activities.

Students who complete their undergraduate degrees at private colleges were more likely to do so on time and not remain on campus for a fifth year NAICU’s report indicates.

An estimated 41.6 percent of Hispanic students at the private schools received an undergraduate degree in four years, and 23.8 percent at state four-year schools. Nevertheless, those numbers are dramatically less than the percentage of White students who graduate on time at private schools, 68.2 percent, and 36.7 percent at public schools.

The percentage of those who continue with their education and pursue an advanced degree also reflects what NAICU views as success. Thirty-two percent of its graduates pursue an advanced degree, and 27 percent of those finishing state four-year schools do so.

Hinojosa does not expect her senior year to be her last in a classroom.

“Right now, I am thinking about law school after college,” she says, pausing and laughing as she contemplates all of the possibilities. “But I don’t know yet.”
VIVA PUERTO RICO

CUNY Center Examines Puerto Rican Influence and Issues

BY MARILYN GILROY

The center is the only university-based research institute in the United States devoted to the interdisciplinary study of the Puerto Rican experience.

If you walk down the streets of New York City, you will see that Puerto Ricans have never been more visible in entertainment, music, sports, and politics," said Félix Matos-Rodríguez, director for the Center for Puerto Rican Studies at CUNY's Hunter College.

It certainly seems that way, just from a quick glance at current events and news images. Marc Anthony, the salsa sensation, led the city's 44th annual Puerto Rican Day parade of marchers and floats earlier this summer. At one point, the parade passed a movie marquee that featured Jennifer López, the Puerto Rican film and music star. As for political power, the parade featured two Puerto Rican mayoral candidates, Fernando Ferrer, who is running as a Democrat, and Herman Badillo, a Republican. It was New York's Puerto Rican assemblymen and council member who made headlines by demonstrating in Puerto Rico against Navy bombing exercises on the island of Vieques. And in sports, the roster of New York's two major league baseball teams includes several Puerto Rican players in the starting lineup.

But Census 2000 statistics painted a different picture. The census showed that the city's Puerto Rican population had declined by 100,000 in the 1990s, prompting The New York Times to run a front-page article with headlines touting the "waning" Puerto Rican presence in New York. It cited the declining Puerto Rican population, the group's low educational attainment, and the sizeable return migration to Puerto Rico as negative factors. The article pointed out that the Hispanic population was being fueled by tremendous growth among Mexican and Dominican immigrants who would soon eclipse the Puerto Ricans in numbers and influence.

Which picture of the Puerto Rican community in New York City is correct? "The census figures are much ado about nothing," said Matos-Rodríguez. "We have known for years that the Latino community is diversifying, so the numbers are not a surprise."
Matos-Rodríguez thinks the media reports on the census, especially those headlines that have pitted groups against one another, constitute bad journalism. He is referring to the barrage of headlines noting that Hispanics made significant population gains over African Americans as well as the stories implying that Puerto Ricans are facing intense competition from other ethnic groups.

"It is not well-intentioned," he said. "If you read the newspapers, it almost seems like there are no Puerto Ricans left in the city, and yet, we continue to be the largest group here." The newspapers, he says, "seem to be asking 'What are you going to do now that these other groups are breathing down your neck?' or 'Who's going to be the largest minority?'"

For Matos-Rodríguez and others who have a deep commitment to and involvement with Puerto Rican issues, it is frustrating to see such an inaccurate and incomplete picture of Puerto Rican life. They point out that because Puerto Ricans receive less news coverage, they have been rendered nearly invisible in the public mind and are seen as a much smaller community than they actually are.

But as Rodriguez says, "When you count the numbers of Puerto Ricans living outside the city, in Long Island and New Jersey, who still come to work in the city, you are talking about large numbers of Puerto Ricans as part of the New York political and cultural life.

"Puerto Ricans have been an integral part of New York since the 1950s," he explains. "They have always been collaborating and intermingling with other groups. But we tend to focus on the tensions, even when there are plenty of positive stories out there. There might be some high profile political turf battles, but when it comes to day-to-day life, it's more a matter of collaboration that is missed by the headlines."

Rodríguez's historical and sociological perspective on Puerto Rican life in New York has evolved in part from his work at the Centro de Estudios Puertorriqueños (the Center for Puerto Rican Studies). The center is the only university-based research institute in the United States devoted to the interdisciplinary study of the Puerto Rican experience. Founded in 1973 by a coalition of faculty, students, and community activists, Centro seeks to link scholarly inquiry to social action and policy debates.

"We've been working on national and regional issues such as Latino education in the K-12 sector," said Matos-Rodríguez, "but we also focus on migration studies and the history and culture of Puerto Ricans."

The Center has grown into a major research and educational center distinguished for the quality of its research, its exchange programs in Puerto Rico and the Caribbean, and its ties to academic, advocacy, and community-based constituencies. The work of Centro is a balance between research, teaching, and service that allows for the dissemination of its findings to as wide an audience as possible. The Centro staff is frequently active in community outreach projects.

"We want to connect our research to the needs of the Puerto Rican community, particularly here in New York City," said Matos-Rodríguez.

He cites, as one example, the work of Centro researcher Pedro Pedraza, who has been collaborating for the last three years with El Puerto, developing research projects at the Academy for Peace and Justice, an alternative high school in the Williamsburg section of Brooklyn. Another researcher at the center became involved in a program to teach literacy in El Barrio.

"This helps us make connections between our research and the work done in the Puerto Rican community," said Matos-Rodríguez.

The lessons learned from this involvement with the community enrich the Centro's contributions to the development of theoretical and intellectual paradigms. By addressing major inequities in social conditions affecting Puerto Ricans, Centro research bears important implications for the study of Latinos in the United States.

For this reason, the Center publishes its own journal as a voice for its scholarship on Puerto Rican issues. The Centro Journal, in its 13th year, is a multidisciplinary bilingual, refereed publication for academic articles in the humanities and social and natural sciences. It also publishes interpretive essays, interviews, fiction, reviews, and art. The journal encourages dialogue that compares Puerto Ricans with other racialized ethnic groups, particularly other Latinos and African Americans.

"There are a number of very key issues affecting the Puerto Rican population that do not get enough scholarly attention," said Matos-Rodríguez. "We thought we could play a very positive role in doing research that will help in the long term."

Taking the long view and making permanent contributions are very much the approach at Centro. Matos-Rodríguez talks with pride about the library and archival collections maintained by the Center. It contains thousands of books, journals, and 60,000 photographic images.

"It is the largest repository of Puerto Rican-
Latino materials in the Northeast," he said.

What makes it special are unique features such as the Migration Division collection, containing materials from Boston, Cleveland, Hartford, Miami, Camden, New York City, and Rochester. The library is currently processing the records from the government of Puerto Rico's Migration Division, the largest collection of migration-related documents in the U.S.

"We think it is a national treasure and will have a significant impact on immigration studies," said Matos-Rodriguez.

Genealogists and other individuals who are sometimes searching for "lost" relatives can use the collection. As Matos-Rodriguez explains, the government of Puerto Rico used to issue a small "passport" in English saying that the people who were immigrating were U.S. citizens. This gave the Puerto Ricans a document in English to use when they came to this country. We happen to have the records of the applications for this passport/card. Our database helps you search these records by last name and then links to the birth certificate or driver's license of the person you are looking for."This collection has become a very active database.

"More than 5,000 researchers used the library for archival research last year, and 12,000 people used the collection in general," said Matos-Rodriguez.

When the media is spotlighting the Puerto Rican parade or Hispanic Heritage month, the Center often provides images or footage for the news or newspapers.

Library archivists are also working on a project to document the history of Latino labor in New York City. Research is being conducted in cooperation with the Hispanic Labor Committee of the Central Labor Council, the Santiago Iglesias Educational Society of Local 3 (IBEW), and other organizations, which are helping locate and plan for the permanent preservation of records pertaining to Hispanic labor. Historical records include letters, diaries, scrapbooks, meeting minutes, membership records, photographs, and other visual and written materials. Staff members have conducted oral history interviews with archivists Ismael Garcia and in a survey and obtaining the personal papers of Latino labor leaders.

Another interesting project, says Matos-Rodriguez, revolves around the work of researcher Ramon Basque-Perez, who deals in the area of human rights. His current subject is police persecution of people who are in favor of Puerto Rican independence.

"The senate in Puerto Rico is investigating the role of the FBI in persecuting people because of their political tendencies in Puerto Rico and even Puerto Ricans in this country," said Matos-Rodriguez. "U.S. Congressman Serrano, who serves on the committee that oversees the FBI budget, asked the FBI to cooperate with the investigation. There is a set of documents being generated by this inquiry, and we are processing those materials on behalf of Congressman Serrano with the hopes of making it part of our permanent collection."

In addition to research and preservation activities, the Center hosts a variety of events and conferences on issues such as Viquez, the economy and Latin workers, and Puerto Rican migration patterns. Last spring, it organized local, regional, and national meetings in collaboration with the National Council of La Raza and the Puerto Rican Legal Defense and Education Fund.

"We are trying to raise our visibility through public events. The attendance and discussions have been excellent, and we have such a pool of talented people, so we can present an interesting mix at our events," said Matos-Rodriguez.

Matos-Rodriguez also is responsible for writing and overseeing grants and running programs such as the CUNY/UPR INTERCAMBIO, which fosters academic cooperation and interchange between the CUNY system and the University of Puerto Rico. INTERCAMBIO's principal goal is to strengthen the ability of both universities to understand and address the economic, social, and cultural problems of Puerto Rican communities in New York and Puerto Rico.

There is also a CUNY/Caribbean Exchange for faculty and students from CUNY and universities in the Caribbean.

For Matos-Rodriguez and his staff, the Center's mission and its ancillary programs are a whirlwind of activity that is reflected in its newsletter and on Centro's homepage on the Internet, www.centrop.org. Rodriguez says that in the future, the Center may have to run fewer but more focused events. They also are getting ready to celebrate an anniversary.

"We are turning 30 in 2003, and we are already starting to plan," said Matos-Rodriguez.

It is apparent that he is invigorated and optimistic about the work of the Center. "I enjoy working with people in the tri-state area who are working on Puerto Rican and Latino issues and helping make projects and work viable," he said. "It is a dream job."
Robert Marquez: True to His Vision and Priorities

by Michelle Adam

Cuban poet Antonio Machado once wrote, "Caminante no hay camino, se hace camino al andar." (Traveler, there is no path. You make the path while walking.) Upon interviewing Robert Marquez, a graduate student at New Mexico State University, it became clear that these words were intended for him and for those like him who, despite all the obstacles, have marked their own unique paths so that others may follow.

Robert Marquez grew up in the small ranch town of Deming, N.M., where the odds of graduating from high school were extremely slim, let alone attending college. The challenges for Marquez appeared all the greater in that by the time he was 12, his parents divorced, and he was left to raise his younger siblings on his own. But it seems an unusual spark of optimism and resilience has carried him to the present day.

Beyond achieving a doctoral degree in analytical chemistry this summer, Marquez is receiving worldwide recognition for his invention of a tandem clay kiln that has helped families and the environment in Juarez, Mexico. His invention has offered brick makers a natural and inexpensive way to make bricks without polluting the air. And it has the potential of helping clean up the air in places across the globe where thousands of poor people's lives rely on brick-making, and where the current methods used have contributed to extensive pollution and health hazards.

When Marquez entered graduate school for a master's and Ph.D. in chemistry, he did so with an undergraduate degree in civil engineering and one course in chemistry taken decades earlier. His reason: "He wanted to improve the environment in this region," said Glen Kuehn, biochemistry professor and director of the National Institutes of Health programs at NMSU. For Kuehn and others, "improving the environment" seemed like a big task and pipe dream. But for Marquez, it was far from that. "I look at things as a challenge," he said. "Other people said there's no way I can do that. And I said 'watch me.' To me, it seemed like something that was very possible."

The inspiration to invent a kiln that would be environment-friendly came to Marquez during a Navajo ceremony, which he attended by invitation from his father-in-law, a Navajo medicine man. "In the morning, when they opened the door to the hogan and I looked outside and saw the dawn and the sky, I realized that that was what I was going to work on to keep the sky clean, to keep the sky blue. In that ceremony, it became obvious how I was going to do that. Mother earth cleans herself with rain and water and dust in the desert southwest. I realized that I was going to use the earth, the soil, to clean the air. A lot of that soil is clay," he said.

The local paper, the Sun-News, quoted Marquez describing his invention: "The way it works is that I fire one of the kilns and take all the smoke from it and filter it into the second kiln, which is filled with raw clay bricks. The smoke and soot are absorbed by clay, decreasing the amount of pollution and smoke that escapes. When the bricks in the first kiln are finished burning, I take them out and reload that side with raw bricks. That side then becomes the filter as I fire the bricks in the second kiln."

Across the world, in Mexico, India, Ghana, Vietnam, and Egypt—all places that have inquired into Marquez's invention—local workers and fami-

\[1873\] 08/27/2001 O HISPANIC OUTLOOK 13
"The typical brick-maker kiln produces anywhere from 750 grams of black soot while it burns per minute," he said. "With my process, that number drops to about 2 grams per minute."

Helping clean up the environment seemed a natural course for Marquez, given his earlier years on the land. "I grew up in the open mountains and plains—a lot of freedom," he said. "You could see a long, long way. You learn to be very observant with what's going on in nature. You have a sense for science and the way that things just don't happen by accident. You can see how things come about."

As early as age 5, along with his other siblings, Marquez was on horseback helping his father herd cattle for the farmers his father worked for in Deming. Marquez's father had come to the U.S. from Mexico as a farmworker with his wife, who was Apache but had lived in Mexico as well. They raised nine children until their divorce.

While working hard and living close to the land, "you learn to respect things and you want things not to be abused," said Marquez. "You can see as time goes on, as areas develop, how careless people become and start to trash and disrespect things. That is something that has stuck with me since I was young. You can't keep going that way because eventually you are going to destroy yourself."

Marquez set his eyes on working in academia from fairly early on. As he recounted, in addition to being a ranch hand, he also helped his family in the fields. "We moved around to work on farms, and we used to come to Las Cruces. On Saturday afternoons, they'd leave us kids playing on the grass at the university, and I always wondered what was behind those windows and those doors. That just kind of stuck with me. As I grew older, I always heard about this university, and what I remembered about it was the nice shaded trees and the nice lawn. So, I wanted to be there. What amazed me was that there would be such a nice place, and people were learning."

Years later, Marquez would come back to that campus of New Mexico State University as an undergraduate and then graduate student. Until then, what he had going for him was his love for learning—a love that often got him into trouble in Deming.

"In order for me to make good grades, it was a big sacrifice because nobody in that school liked to get good grades," said Marquez. "If you liked to make good grades," he said, the other kids "tried to beat you up every day. But I always tended to look at things on the bright side. So they tried to beat me up, and I learned how to run real fast and be an athlete. They couldn't catch me."

While in his earlier years, Marquez was attacked for his good grades. In junior high school and high school, he became more of the hero. Those who used to beat him up learned to respect him, and it was this group that stuck together and wouldn't let one another fail. "In the end, we needed each other," said Marquez.

During his final years in high school, his friends teased him about his good grades, saying that they didn't count for much in the world out there, with him coming from a "tiny podunk town." Being the kind to take challenges seriously, Marquez went to the library, looked up the top high schools in the country, and put his finger on the one that read No. 1: Phillips Exeter Academy in New Hampshire.

"I made a bet that I could make it some place else," he said. Sure enough, Marquez was accepted at Phillips Exeter Academy. For six months or so, he attended school there while working to pay for expenses at home. His parents had by then been divorced several years, and he was still raising his younger siblings. "I didn't get much sleep, but I came back with my grades (mainly As) to win the bet. I do crazy things like that," he said.

College and Beyond

With multiple scholarships, he attended college with his small group of friends and "no matter what the situation, we forced each other to get to class," he said. Upon graduating, Marquez worked for about 11 years as an engineer with Hewlett Packard, traveling around the world. The company also gave him the opportunity to try to bring business to reservations. Financially well off, with a wife and four sons, Marquez eventually decided to move back to New Mexico. "Every time we would come home to New Mexico and see our relatives and our families, they were stuck in the same place. The situation didn't change a lot. I realized if people like me don't come back home and help out, the situation would stay like this for a long time."

Marquez accepted a post as a teacher at the Navajo Community College (now called Diné College) in Shiprock, N.M., and Hewlett Packard generously sent him a truckload of computers. He launched several initiatives there. His Science Scholars Program became known as the best in the country for Native Americans.

"I had a lot of ideas and energy," said Marquez, "but I wasn't in control, and I couldn't choose how things got done." And the reason was simply that "I didn't have a Ph.D. and they did." This motivated him to get one himself. He returned briefly to Hewlett Packard to save up money and then reentered Mexico State University for his graduate work.

"My story has a lot of twists and turns," admitted Marquez, who is now riding the tide of inquiries flooding in since his kiln invention. "I am get-
ting a lot of calls from people from other countries,” he said.

The fact that Marquez is a Lindbergh grant recipient has provided international visibility and credibility to his invention. An EPA employee from India who won a financial award for helping clean up a polluted river wanted to fund Marquez and others to come to India to clean up its brick kilns. Companies near the border are interested in possibly investing in the kiln project in Juárez in order to receive emissions credit.

Local governments and agencies of Mexico are considering providing funding for the brick makers so they can build these new easy-to-make kilns.

Last summer, Marquez fired up a kiln at the Folk Life Festival at the Smithsonian. Groups involved in Marquez’s project have included the Texas Natural Resource Conservation Commission, Southwest Center for Environmental Research and Policy, New Mexico Environmental Department, and the Department of Energy.

The Department of Energy is specifically interested in Marquez because he also has developed a device for burning used motor oil in areas where people dump the oil onto the land because there are no recycling services available. The EPA also has taken interest in “this renegade guy”—a term Marquez used to reflect how he is seen.

next venture

While calls may continue to come in, Marquez is preparing for his next venture, which is an outgrowth of his current work. A professor at the University of Virginia (UVA), Dr. Janine Jagger, was driving when she heard NPR’s interview with Marquez two years ago. She immediately pulled over to the side of the road and tried to call him. Having worked extensively with worker health and safety issues in Africa, Brazil, and other countries, Jagger wanted Marquez to help her find cleaner and safer methods of disposing of hazardous medical waste, such as syringes, in Third World countries. She offered him a post-doctorate at UVA, which he accepted.

“There were a lot of things that can be done around the world for problems that are not being solved,” he said of this latest opportunity. “It’s a matter of focusing our efforts on it to do it. We have that responsibility in being the leaders for the rest of the world.”

Marquez sees many scientists and engineers “moving on to where the next pocket of money is,” but it’s his concern to mostly give back to society. “One of the things that I have seen in this country with universities is that they have become big business. We, as scientists, engineers, doctors, and people, have basically taken an oath to help society. Our education isn’t just to help us. At some point, it also has to be about our society, of improving the quality of life for people,” he said. “We need to realize that there are enough real problems out there that need to be looked at, and science should be more applicable.”

Many people urge Marquez to get a patent on his invention, and big business has been knocking on his door for a piece of the pie. He has turned down offers, he said, since his intention is to make his invention public knowledge and to empower brick makers and their families with this knowledge. “You can’t patent public knowledge,” he said. “I’m not used to dealing with all the political things of who’s going to stand to gain and why. I did this so that poor people would continue making their way of life without killing themselves. These people are already strapped as it is, and you’re not going to get them to change their lives AND pay you.”

Throughout the years, Marquez has remained true to his own vision and priorities. He has shown others that it is possible to dream big and effect change, no matter what the circumstances. “I know that I can make a difference and that I have made a difference by being a role model,” he said. Dr. Antonio Lara, assistant professor of chemistry, agrees. “He’s been God’s gift to my lab. He’s been a transformation. He has taught me more than I have taught him,” said Lara.

Marquez has watched one of his own students from the Navajo reservation come to college, earn a master’s, and start work on a Ph.D. Others have followed suit.

“A lot of young people didn’t even know what I was doing. But now, as more visibility has been gained, they realize it is important to hang on to who you are and not compromise that. They realize, if you want it badly enough, you can do it.”

Marquez expects to ultimately teach at the university level and make his life in that place of learning in the shade that he first came across as a young farmhand. And maybe other young farmhands will be inspired by his example.

“It’s not these things that I develop; it’s the people themselves that matter,” he said. “My main emphasis is to help these young people in learning. I see these little kids, and you never know if one will one day be the person solving problems. There is no reason to disrespect or mistreat them. They are eager to learn.”

1875
Albuquerque Technical Vocational Institute

New Mexico's Largest Community College

BY ROGER A. DEITZ

Albuquerque Technical Vocational Institute (TVI) makes students a very important promise, and this promise, says its president, is kept. TVI President Michael J. Glennon reports, “TVI’s mission has always been to make people employable, and our 96 percent graduate placement rate shows we are doing that.

“Our student demographics mirror those of the metropolitan area. So serving the 39 percent Hispanic student population is a very important part of what we do both on campus and in the community.”

TVI is New Mexico’s largest and most dynamic community college. It offers a variety of job training, college credit, preparatory, and adult education courses as well as customized workforce training to more than 23,000 students on four campuses in the metro area.

“On campus and in the community” there is a new rallying cry of late. “It’s about students! It’s what we do. It’s why we’re here,” was the revealing statement put forth by the TVI’s president and seconded by his executive team during faculty and staff meetings last September.

“It’s about students!” became a key internal initiative this past year.

The president confessed he had worked long and hard to articulate the TVI focus into “what I hoped would be a few meaningful and memorable words.” Employees were then encouraged to wear the statement publicly via embroidered polo shirts donated by the TVI Foundation. President Glennon says that the event was meant to “celebrate our leadership focus. It’s a way to celebrate why we are at TVI, why we love our jobs. Everything every one of us does here is about students.”

Authorized by the New Mexico Legislature in 1963, the Albuquerque Technical Vocational Institute was approved by district voters in 1964 to provide adults with skills necessary for success in the world of work. The first nine classes for 255 students were held in the summer of 1965 in surplus barracks and a vacated elementary school. From day one, the institution’s focus has been job training, more broadly defined to include preparatory work, skill improvement for adults, vocational courses for high school students, and, in recent years, liberal arts and college transfer. Today’s job training programs are offered in business, health, and technologies and trades subjects, with emphasis on up-to-date, hands-on skills needed by local employers. Internships,
co-op programs, and apprenticeships are available.

The North Central Association of Colleges and Schools accredited TVI in 1978. The first college-prep course, MATH 100, was offered in 1985. Degree-granting power was approved for TVI by the legislature in 1986, beginning the transition to community college. By the late 1980s, liberal arts was not only TVI’s fastest-growing component but also an increasingly important part of occupational instruction, and the University of New Mexico had arranged to offer its remedial courses through TVI.

Until 1979, TVI was a part of the Albuquerque Public Schools, with APS Board of Education serving as the TVI Governing Board. The first election for an independent TVI Board was held in September 1979, following the approval of the Legislature. In 1994, the Legislature approved districting the Governing Board.

Today, TVI is the second largest postsecondary institution in New Mexico. The Main Campus occupies 60 acres near downtown Albuquerque. The 42-acre Joseph Montoya Campus is located in the Northeast Heights. Classes also are offered at the Río Rancho Campus, the South Valley Campus, and at the University of New Mexico, as well as other off-campus sites. Plans are being made for a permanent West Side presence.

TVI’s classrooms, libraries, and laboratories are modern and comfortable. Each student has access to state-of-the-art equipment; especially computers and programs. Facilities and services are accessible to the disabled.

Now in its third decade, Albuquerque Technical Vocational Institute has come a long way. In the 2000-2001 school year, TVI’s programs included certificates in 44 business, health, technologies and trades occupations, as well as short-term occupational courses. There were associate degrees in 38 occupational fields and the liberal arts. Offerings include college transfer courses in pre-management, pre-engineering, other occupational subjects, and 27 liberal arts disciplines transferable for first-year and sophomore credit for four-year institutions. Adult development education encompasses basic skills such as ESL and GED exam preparation, plus remedial, preparatory, and development classes for students readying to meet admission requirements at TVI and other institutions. Other TVI pro-
grams include customized training and assistance to small business through the Workforce Training Center, and workshops and support for learners over 50 through the Emeritus Academy, and concurrent enrollment for high school students through the Recruitment Office.

TVI's Workforce Training Center was founded in March 1996 to "foster and enhance economic growth and development in New Mexico." Organized under the Division of Instructional Services, the Workforce Training Center serves the greater Albuquerque metropolitan area as well as other regions throughout the state. An increasing number of TVI courses are offered in innovative distance-learning formats "designed to overcome the barriers of time or space." Some courses are available through correspondence, some are taught over the Internet, some are shown on television, and others use audio and video links to two or more classrooms.

The most recent figures available show 23,000 total credit and non-credit students enrolled at TVI as of Fall 2000. Among the for-credit students there are 7,506 first-year students, 4,952 sophomore, 4,662 non-degree students, and 145 concurrent (high school learners), for a total for-credit enrollment of 17,265. Of that total, 6,816 or 39 percent of the students are Hispanic. Another 5% or 3 percent are African American, 430 or 2 percent are Asian or Pacific Islander, and 1,469 or 7 percent are American Indian or Alaskan Natives. Degrees awarded in 1999-2000 totaled 1,917, with 916 or 36 percent going to Hispanics. Faculty for Fall 2000 numbered 795, with 308 full-time and 485 part-time. Of the total, 112 (14 percent) were Hispanic.

The cost for annual tuition and fees is approximately $836 for in-district or resident students. TVI's Title V office, funded with a five-year, $2 million grant from the U.S. Department of Education, aims to directly assist Hispanic students while also helping to establish systems that will retain all students. Title V provides a range of services, including peer, faculty, and workforce mentoring, to aid students in learning and to make them feel more connected to TVI. A student resource center, known as La Comunidad, has been established. "This is a place where students will feel comfortable and can say 'someone will have an answer for me or will be able to find an answer for me,'" says Title V activities Director Danny Bustos. Title V also plans to offer a leadership-training program for Hispanic students who are serving as peer mentors and as supplemental instructors in selected classes. One of the most important aspects and challenges of the Title V effort, notes Bustos, is the development of a student tracking system that will track completion and retention rates for all students. Bustos points out that results from this tracking system could be vital for the future funding viability of TVI.

The institution's new Workforce Training Center is an important part of TVI's relationship with the business community. The WTC has classrooms, five computer laboratories, a video-conferencing and distance-learning lab, and a 5,000-square-foot conference room that can be used for instruction and rented to the business community. An 8,000-square-foot high bay area on the first floor will allow companies to bring in equipment for job training, such as forklift operations. The second floor will have offices and space for start-up businesses to lease. The WTC provides services throughout the year on a rapid response basis. Services may be provided (usually within 72 hours from the time of a request) at the employer's place of business or at the center's new training facility in the heart of Albuquerque's growing 1-25 industrial corridor. The history of this effort goes back to 1994, when it was apparent that although local industries and businesses supported the quality of TVI's instructional programs and graduates, they were increasingly requiring customized training. To help them keep pace with technological changes, TVI administrators initiated discussions and visits with colleagues across the country at other community colleges that had developed "advanced technology centers" (ATCs) to respond to similar demands. Albuquerque business leaders and city officials were also discussing the concept of an ATC at the time.

In 1995, several existing programs at TVI merged to form the initial concept of what was then called the Center for Advanced Technology Training (CATT). In 1996, the WTC was established. Organized under TVI's Instructional Division, it serves the Middle Rio Grande region as well as other regions throughout the state. TVI broke ground for the WTC in November 1999.

"This new facility is the culmination of a lot of hard work by a lot of people," says President Glennon. "We have had tremendous support for this project-from the TVI Governing Board, the TVI Foundation, the Legislature, the governor and the district taxpayers. I am grateful for that support and confident the center will have an important and lasting impact on economic development in our state." Funding for the project came from a number of sources, including TVI, the New Mexico Legislature, the TVI Foundation, and general obligation bonds. According to Harold Washington, former WTC interim executive director, the WTC tailored training programs to the specific needs of about 85 small and large businesses last fiscal year.
Showing Where Your Heart Is

Jimmy Santiago Baca, Prisoner to Poet

BY PAT HANSON

Jimmy Santiago Baca is undoubtedly the most prolific and celebrated Chicano poet and writer in the country with seven books of poetry and one prose memoir, *Working in the Dark: Reflections of a Poet of the Barrio*, under his belt, as well as a Pushcart prize for fiction and a National Endowment for the Humanities award. He’s doing an independent film and a documentary on Hispanic poetry in America. His second prose memoir of his early childhood was slated to come out this summer. Most of this was written from memories first stimulated by meditative and altered states in solitary confinement.

At age 18, in prison, Baca read his first words—27 years ago. While tearing out the pages of a book he stole to make a fire to heat water for coffee, he noticed some words he understood and asked his sister to bring him a dictionary. How fortunate that the book contained the work of the romantic poets: Byron, Shelley, and Wordsworth. With that as a start, he taught himself to read and write. His self-taught love of language helped him survive the horrors of prison and several trips to solitary confinement.

It was also in prison that he began to learn about Mexican history and culture and how his life fit into that spectrum. Today, Baca spends much of his time sharing his hard-earned insights with people like him who grew up oppressed by poverty and race.

The following pants were synthesized from his response to interviews and audience questions during events in Northern California which reached close to 1,800 people. Many of them were at-risk youth and members of the Hispanic community who were lucky enough to hear him read from his upcoming memoir, *A Place to Stand*, and from his new book of love poems, *Healing Earthquakes* (Grove Press, 2001) during a grueling 11-day, 22-event tour in April.

*Many of the kids involved with gang violence, guns, drugs, and school shootings have backgrounds similar to yours. Is there anything that could be done to prevent kids from making bad choices?*

**JSBaca:** Give them equality. That’s all. Put money where the problem is and solve it. Everywhere I go, they say money won’t solve the problem, but money’s never been there. Put it where the problem is in communities, and you’ll solve it. It’s as simple as that.

They don’t care. That’s all. It’s a society where people don’t care. They’re too busy. They don’t have time to care, and they have their own lives. We’re all guilty of that. We love ideas, ideas that excuse our indifference. We love movies and books that help us empathize with the impoverished, but we never do anything. It’s as simple as that; it’s where you put the money.

*What do you think about education, especially for Hispanics?*

**JSBaca:** Education is not run by Black people and at the highest levels...
is not run by brown people. And if I was White, I'd make sure that White kids got the best education. Unfortunately, you can't take personal interests out of policymaking at that level. You can be the best liberal in the world; you can have a million Jerry Browns, but even if we did manage to become very equal-minded and judicially spirited, we'd still have the kids who get their learning around the kitchen table.

And there's not a human being in the world who doesn't love power and money, so if I'm making a lot of money, I'm not going to jeopardize my position by letting a lot of Black and Chicano kids into college. I'm gonna keep White kids in power because it's their mothers and fathers who are supporting the school. I'm not gonna turn down the hand that feeds me.

**So are there any other beacons of hope in colleges around the country?**

**JSBaca:** Oh sure, there are many beacons of hope scattered in schools around the country, but ultimately, you're not going to force the school boards to do what's right. Because the school boards are connected to the publishers, the publishers are connected to distribution, distribution is connected to money, money's connected to advertising, and the mainstream is connected to anything but school. Dot.commers don't care about schools; they send their kids to private schools. It's all connected to money. Follow the money. If you follow the money, you'll find the problems. Look at where the money's being spent in schools today: Who has the old textbooks? Who gets the new? Who has access to the newest computers and who doesn't? Who's got the nice schools? Who doesn't? Who has the best teachers? Who doesn't? It's as simple as that.

**You don't think that's going to change, not with the growing numbers of people of color getting into higher education and into politics?**

**JSBaca:** I could name a whole curriculum of books most college administrators probably never heard of that are essential to the identity of a Latino kid, but go to any English department in the country and none of the chairs would know any of the books.

It's not a matter of ethnicity. You can have Clarence Thomases all over the school systems, be black as a tree, and they can still vote a racist scenario. It's just that simple. It's not color. It's attitude and frame of mind. Once you get past a certain point up there, it's all about money. We look for examples, and we find them in Clinton, who [engages in inappropriate behavior with an intern]. Then there's Bush, who immediately rescinds all the environmental laws once he gets in. So instead of examples instead of mentors, we try to throw down rules and say 'you can't do this,' but at the same time show 'I'm not a good example of that.'

So why do we get angry with kids and put them in prison, when we're teaching them that crime pays? It's just that they don't make the right choices. If they're going to do a crime, let them do computer crimes or something, high Wall Street extortion, and they'll be like Milken, do three months [sic] at a country club and walk away and go home. It's just real simple stuff. People like us who are just normal people...it's not like we don't have problems of our own. So, basically it's each man for himself, and we're all behind enemy lines.

**Tell us about spirituality, about when you found 'God.'**

**JSBaca:** Spirituality is about as essential to me as breathing air. It's essential, and I'm very much a part of the spiritual solution. And, for the most part, that's very private. You know if anything is going to get us past the tragedies and the pitfalls, it's going to be humor. We ought to hire a lot more comedians.

**What is your advice to young Hispanics coming up through the system?**

**JSBaca:** Their problem is they believe we're people of integrity. Their problem is they believe that we really do respect the sanctuaries of justice and the sanctuaries of equality. Their problem is they truly, truly trust that we believe in those institutions. And when they come up before those systems, they realize we'll sell it to the highest bidder. We've taken our most precious institutions and taken them to the meat market to be slaughtered.

Yet you believe in the power of language and of writing. And you travel nationally doing workshops for young people on writing. How should we approach writing in education?

**JSBaca:** Writing is a process, a journey of becoming known. We need to approach it in that manner. It is not so much what we know as writers, but how. We need to approach language as being sacred, as it being an extension of ourselves. The magical part of writing is sharing the known part of both our sanity and our insanity. Shaping my heart with your heart can help us navigate a course in life, especially when under adversity.

**How many drafts do you do of your poetry and your prose work?**

**JSBaca:** I re-write everything, sometimes 10, 11 times, often more. Keep working and working your poetry, your language, until a word drops on the page, almost like a pebble in a pond. You're standing on the shore, and the ripples keep coming closer and closer 'til they touch your toes. Communicating makes you happy. It shows where your heart is, where your mind is.

Seek the latent energy in language. Because I'm going to tell you something, as an exercise, that is indispensable for you to become a better writer. Don't think when you're writing (this poem) that 'I got to finish it...no, no, no.

What's happening here is that you work this poem, and you work this poem, and what's really happening is that you're chiseling down your own soul to the essence of what it wants to say. You're just working on the poem,
but in reality, the poem is taking you and getting rid of all your distractions and other stuff. So after about two months of working on this poem, you then approach the page with incredible enlightenment, and it slams like wham, like a wind tunnel. Did you ever see that? When you’re driving along at night where I live in the desert and lightening strikes in the distance at the horizon, the ground turns red. Just like a pulse beat of the human heart, communicating with mother earth, it turns red. That’s what a poem does when it hits a nerve.

Tell us about what most call writer’s ‘voice.’

JSBaca: Voice is measured by the pleasure you find in what you say. If there’s not a lot of pleasure, it’s not because you’re lacking academic tools or literary devices; it’s because you don’t have a voice. You left your voice somewhere. Maybe you left it when your father screamed at you, or maybe you left it with that man that left you. But somebody took half your voice away, and it’s the poet’s job to give you your voice back and put it all into the poem.

So when you begin to write stuff, you must get to the place where you find total pleasure in what you write. Total pleasure in what you write comes with deep conviction about what you write, so the writing is going to reflect that. If it’s halfway, it’s not going to be any good no matter what you do.

But once you begin to formulate a voice in the poem, even if it’s about a stone or a seagull or a shell or something, once you’ve given it everything you’ve got, even at the risk of being ashamed . . . even at the risk of changing your own perspective on how things are, at the risk of talking to God, then the poem or the piece will work. Oftentimes when you give everything you have to something, you meet God on the way.

Your use of language is very powerful. How do you put so much energy in words?

JSBaca: When you write in a structured form, you have to work the poem so the energy of it can be released. Stasis is when an object is frozen, stuck. You can release that in your own work by working a poem by focusing on the arrangement of the words so the energy behind the words is released, so the poem itself will see light. You have to get to a point in your poetry that is like what it feels like the first time a baby kicks in its mother’s stomach. You have to push the margin so fast you can’t control it.

In your writing workshops, you encourage the use of journals, diaries, and suggest all of us construct autobiographies. How does that work?

JSBaca: Autobiographical diaries must have a grounding narrative, a beginning, middle, and end; that is the leverage a book on someone’s life can take off from. If you have poems, journals from parts of your life, date them and note the triggers for the poems. Then later look through them for the connective energy; show them as a result of emotional growth. Show how emotions grow with time. If you can, look for distinctive time patterns in your own writing as evidence of growth.

What advice would you give to young writers?

JSBaca: You’re not going to like it. You have to figure out how to love your own loneliness like you’d love your own bleeding heart. But when you do that, you’ll learn to listen to your soul and start to learn how to fly.

From Jimmy Santiago Baca’s Immigrants in Our Own Land & Selected Early Poems (A New Directions Book, 1977)

I Am With Those

Whose blood has spilled on the streets too often
Surprising by passers in hushed fear
And withdrawal, and later over supper
Tell of the bad one and good cops,
The bad one in a dark cell, the cop
Goggle eyed on laughter.

I don’t want weak people, I don’t want
People to believe I am bad,
Without knowing me first,
Without giving me a chance to show my hand,
These people, scattered over the world,
In fluffly silks and puffy wallets and pockets,
I’ll say nothing to, because it is they
Who must learn now from me, who must hear me out.

I’ve seen too much, felt such strong love
And hurt in me, for the downcast, the criminal, the worker.
I’m not in love with money, with people I am,
I’m not hanging onto lie to save my skin,
I’m not for the one down when he or she is wrong,
I am for peace, for giving a man a chance
To prove himself, giving a woman her fair due.

I am dangerous. I am a fool to you all.
Yes, but I stand as I am,
I am food for the future,
My thought will blossom tomorrow,
Today, I plant roots, and god help me,
I will not sell out, in the face of death
And that is saying something so large, so very large, it scares me.

But more than fear, is my love of justice
More than pride is to step aside
When someone is right. But today, no one speaks
The truth, yesterday, no one spoke the truth
None stood up to say I was right, because
I stood alone, without money, without connections,
So today I stand up, I speak up, and stand with others
Who do the same.

This suffering, pain, anguish, and loneliness,
But also strength, hope, faith, love, it gives a man
Those secret properties of the Spirit, that make a man a man,
It gives to us, what is most lacking
Most powerful and full of extreme beauty and body.
Reports Describe Aid-Based Access Crisis

Call for Federal, State, and Institutional Change

BY ISIS ARTZE

It is unconscionable to favor merit over need in handing out financial aid. To use the money to lure high performers rather than to enable the disadvantaged?

Public and private funds for post-secondary education are being allocated unfairly, declared 20 higher education leaders in a full-page ad in The New York Times on March 7. Entitled "Just and Efficient College Finance," it argues that, "in recent years, the country has diverted attention, incentives, and revenues away from students and families with the greatest financial need."

In addition to its appearance in the Times, the statement was sent to every governor, senator, and college president, urging all to "recommit themselves to helping those with the fewest resources."

Patrick M. Callan, president of the National Center for Public Policy and Higher Education, was a key player in the drafting and publication of this concern. The traditional purpose of the U.S. financial aid system, he said, "has been to provide resources for people whose ability to go to college depends on this assistance. The big problem is that the focus has moved away from lower-income families to middle-income ones."

"There has been a big shift, partly in state and federal loans giving money to students who would be going to college anyway," says Gary Orfield, Harvard University professor of education and social policy, and another of the statement signatories.

Two weeks before the publication of "Just and Efficient," the Advisory Committee on Student Financial Assistance released its report, "Access Denied: Restoring the Nation's Commitment to Equal Educational Opportunity." The committee, an independent source of advice and counsel to Congress and the Secretary of Education on student financial aid policy, makes many of the same contentions. The report maintains that access to higher education is being denied to students from low-income families, describing the situation as an "access crisis."

"The college entry and completion rates of low-income students continue to lag well behind their middle- and upper-income peers," states the report. More specifically, "the college participation rate of
students from families earning below $25,000 per year continues to lag 32 percentage points behind those from families earning above $75,000, as it did three decades ago."

As noted in “Just and Efficient,” it is students from low- and moderate-income families for whom the needs of middle-class families as one of the most significant threats to low-income families and students.

One vivid example of this trend, which Callan considers the “biggest deviation” on the road to an equitable financial aid policy, is the Clinton administration’s tax breaks for middle management at New Mexico State University, who also signed "Just and Efficient."

"The middle class does need help too," Callan admits, "but, at the end of the day, if there’s a choice to be made, the aid should be given to families with the most financial need."

This is not simply because the middle class has more money, says Martinez. In middle- and upper-class families, he says, there’s an expectation of going to college. "Even if parents don’t have the complete tuition amount handy," he says, "nothing’s going to stop them."

"It’s not going to discourage them if you don’t give them a tax credit," Martinez says, "but it might discourage lower-income families."

Awarding Academic Merit

A complementary tendency is an increase in the distribution of funds based on academic merit. "Merit-based aid isn’t yet greater proportionately than need-based aid, but there’s a shift in that direction," says Martinez.

As with their position on the ‘middle-class’ question, higher education leaders concede that academically meritorious students should be rewarded. Their concern, once again, is that merit-based aid is being granted at the expense of need-based aid. "Merit-based aid isn’t bad in and of itself," Martinez says, "but it’s a tradeoff."

"If you have enough money to do both, it’s fine," Orfield asserts, "but if you don’t, it’s unconscionable to choose merit-based aid."

Many policymakers contend that merit-based aid is equitable, arguing that those who work the hardest should be rewarded with the financial means to attend college. But this claim proves faulty on several levels. For one, students from low-income families are more likely to be poor and have inferior educational opportunities.

Secondly, and more disturbing, is the finding that even when their qualifications are akin to those of their higher-income peers, low-income students are still less likely to attend and complete college. "Low-income students who are at least minimally qualified or better attend four-year institutions at half the rate of their comparably qualified high-income peers," it reports.

Nevertheless, an increase in merit-based financial aid has occurred at all levels. Most new state aid programs, such as Florida’s, are aimed at students with high grades. Orfield describes Florida’s new program as “senseless.” “Anyone can get money,” he says, “even people who can afford to go anyway.”

Orfield adds that he has experienced this firsthand. When his daughter attended college in Illinois, he says, the state sent them a check for $1,000 because of her high grades, regardless of their financial necessity.

At the institutional level, “universities are spending increasing amounts of their money enticing students who don’t have as much need because of their test scores and GPAs,” says Callan. “It’s not who can educate the most people,” he explains, “it’s who can get the best freshman class.”

Instead of relying on set formulas for deciding who gets the money, colleges are more likely to use financial aid as a means of competing for the most desired students. To do this, colleges accept students and offer them financial aid, but far less aid than what the federal formula suggests the families need. Known as “gapping,” this practice is used by colleges to influence the composition of its student body. “Gapping” allows a school to differentiate between students it really wants and those to whom it’s less committed, for whatever reason.

A complementary practice of colleges is the use of merit scholarships to attract the most desirable students. Some say this can help a school raise the overall quality of its student body and climb in national rankings.
These trends in financial aid policies, combined with the shortage of available funds, have caused a steep rise in the unmet need of low-income students. Unmet need is the residual educational cost after all aid, including loans, is awarded. On average, the very lowest income students face $3,300 of unmet need at two-year public institutions and $3,800 at four-year public institutions.

"In response to these excessive levels of unmet need," states the committee's report, "low-income students frequently must abandon plans of full-time attendance and attend part-time, work long hours, and borrow heavily...decisions which significantly decrease the likelihood of their degree completion."

While today's figures are alarming, the advisory committee warns that the future will be much bleaker unless substantial changes are made. Demographic projections indicate that the college enrollment of 18- to 24-year-olds will increase by 1.6 million by 2015. "The majority of these students will be from low-income families and be far better prepared academically to enroll and persist through completion of a college degree," it states. Nearly half of them will be Hispanic. Given the current strain on funds for higher education, and without a correction in policy trends, "these students will be denied access to higher education in far greater numbers."

**Required Reaction**

The bottom line is that all parties involved must make changes to grant America's neediest students access to the college education they deserve.

One of the main impediments is that the federal government hasn't kept up with the rising cost of attending college. The advisory committee reports that Pell Grants cover only 39 percent of the cost of attending a four-year public college, down from 84 percent in the mid-1970s.

An encouraging sign, Callan says, is that President Bush campaigned on spending $2 billion more a year on higher education. While Bush's initial budget has only set aside a small increase in Pell Grant funding, he says, "there's now an effort on Congress to get the full amount."

While the federal government plays a huge role in this matter, higher education is essentially a state function, and states have contributed substantially to trends in financial aid. In addition, states have failed to keep up with rising tuition costs in their distribution of funds. A key reason, some say, is that they have been financing other priorities, such as health insurance. This, in turn, has led to increases in college tuition.

"If states don't make changes in their practices," Callan warns, "they'll be freeing people out of higher education.

Some states show signs of progress. "California is moving toward a better financial aid picture," says Orfield. Legislation passed last year guarantees that financially needy students who earn at least Bs and Cs would receive a state-funded grant to continue their education. California also increased its Cal Grant fund by 25 percent to $650 million for this year.

"California's commitment to need-based aid through the expansion of Cal-Grant is the most hopeful sign," says Callan. "It may even help reverse current trends," he says.

While individual colleges and universities do not exert as much influence as the federal and state governments, admissions practices such as "gapping" perpetuate the problem. Their challenge is to reach balance between tuition-paying students and those receiving financial assistance.

And while the authors of "Just and Efficient" frame the access issue in terms of income, it is also a minority concern. "With the elimination of affirmative action in California and Florida, it's now harder for minorities to get in," says Orfield, "and harder to get even if they do get in."

"Minority families are more likely to be poor and have inferior educational opportunities," he adds, so the current trend "hits them intensely. If you look at surveys, Latino families are very aware that they want a college education for their families, but they don't know how. They just can't understand the financial aid process, which is a very complicated and serious barrier. The whole system is set up for people who are college graduates."

Martinez's opinion: "We can make a lot of progress by framing it as an issue of helping those who need the help."

"Another strategy is to focus on minorities or Hispanics," he says, but semantics should not be a major concern, "as long as, as a group, we are getting the end result we desire."

Ideally, the publication and distribution of "Just and Efficient" and the release of the congressional advisory committee's report will serve as catalysts for the many necessary policy changes.

"My colleagues and I are not naïve enough to think any one thing alone will solve the problem," says Callan, "but we felt we might have better impact than any of us have had individually."

Already, their statement has fulfilled one of its objectives. "It raises awareness and gives people who want to make this case another weapon in their arsenal," he says.

The crisis has also garnered the support of the American people. According to public opinion research, most people want the system to be fair. "It can't just be about who has the money," says Callan; "people don't like that."

---

**POLICY IMPLICATIONS**

"Just and Efficient College Finance" includes three calls to action, or "policy implications," one for each party responsible for the allocation of financial aid.

- "Colleges and universities perform most effectively in the public interest when they concentrate their own financial aid on academically qualified but financially needy students, rather than using aid to subsidize financially able students to enroll at their campuses."

- "States bear the primary responsibility of assuring a supply of places and financial arrangements that permit all eligible students to enroll in college. States facing large enrollment increases in this decade bear a particularly heavy responsibility for supplying sufficient places for future students and meeting the increasing need for financial assistance."

- "The federal government has the principal responsibility of providing a solid foundation of need-based grants and loans. Priority should be placed on the restoration of grants rather than further expansion of loans for undergraduates, or tuition tax benefits for families."
Organizers of leadership development programs say the best way for faculty members and administrators to hone their skills and move up through the ranks is to step back sometimes, focus on leadership development, and undergo training in professional management and education administration.

"I don't believe leaders are born," said Bill Pickens, director of the Executive and Management Institute at Stanford University. "They are mentored or they work at it. It's extremely important to get involved in leadership development programs for two reasons. The challenge of leading these institutions is considerable, and the higher you go, the more leadership you need to show. Once you get into these positions and start facing these challenges, it's too late."

Leadership development programs for higher education faculty and administrators abound across the country. Some focus on leadership development in a specific area, such as the technology programs offered by EDUCAUSE. Others, such as the programs at Harvard, cover a broad array of issues.

Organizations such as the Washington-based American Council on Education (ACE) and the San Antonio-based Hispanic Association of Colleges and Universities (HACU) are considering offering their own leadership development programs specifically geared to minority higher education faculty and administrators.

Programs listed in this article are a sampling of what is available. Many are designed for senior faculty looking to move ahead and for people in administrative posts who want to strengthen their skills or take the next step in their careers. Most of these are held in the summer, but applications are accepted in each case much earlier. The programs range in costs, some up to $6,000, which covers room and board and classes.

"There has always been a need for leadership development, and there will always be a need for leadership development," said Joseph P. Zolner, director of the Harvard Institutes for Higher Education. "Some people will say that with these types of programs, they were able to pick up a few ideas to take home, and others will say this was a transformative experience."

Zolner said participants of leadership developments have different motivations for being there, depending on what stage they are at in their career and the position they currently hold professionally. There are four major motivations he hears about from participants. Relatively new administrators say that they are seeking formal training, skills, guidance, and insight into management. Those with more experience "want to cross-check their experience with others, and they want to cross-check their knowledge and thinking with the faculty at Harvard," said Zolner. The third motivation he encounters comes from professionals seeking to "recharge their batteries" by "getting out of the trenches of their institution" and picking up new ideas during the break from their daily schedule. The fourth motivation, and one shared by many participants, is the need to form a network of professionals "they can count on" outside of their home environment. Zolner said Harvard has annual reunions for the alumni of all of its programs to maintain those networks.

Organizers of these programs said participants often leave them with new information, practical skills, and restored energy to meet the many challenges back on their campuses.

**Harvard Institutes**

Zolner shared some of the specifics about the program he runs—the Harvard Institutes for Higher Education at the Harvard Graduate School of Education, which offer a variety of leadership development programs on the
Harvard campus in Cambridge, Mass. Because some institutions may find the costs a barrier to sending someone, the institutes have launched an outreach effort to get more minorities to participate in their leadership development programs and offer them scholarships. Zolner said minority participation ranges from a quarter to one-third of the attendees.

The Harvard Programs

The Management Development Program is designed for deans, directors, and other administrators in their first seven years of a leadership post who want to improve their skills. Topics include budgeting, human resource management, planning, and effective leadership. This two-week program, in its 16th year, is held in June.

Gilberto Arias, director of budgeting and personnel at the University of Miami (Fla.), wrote about his participation in the Management Development Program: “My expectations were exceeded many times over. I have attended many seminars that related to similar topics and expected more of the same. However, the experience and knowledge I gained from the analysis of case studies and through the interaction with administrators from all areas of higher education was invaluable.”

The Institute for Management and Leadership in Education is designed for skilled, experienced administrators—deans and directors, provosts, and vice presidents—who will help their institutions adapt to a changing future. Participants learn how other schools are adapting to new technologies, new student populations, new competition, and new strategic alliances. In its 23rd year, this two-week program is also held in June.

The Institute for Educational Management is designed for senior-level administrators—presidents and vice presidents—who shape broad institutional policy on their campuses. Topics include balancing internal and external leadership roles; working effectively on a senior management team, supporting organizational change, articulating a powerful institutional vision, and enlisting others in the pursuit of that vision. This program is held in July and, like the others, has a November application deadline.

Harvard also offers a seminar for new college presidents and a leadership institute for leaders of academic libraries.

For more information about the Harvard Institutes for Higher Education programs, contact www.gse.harvard.edu/~ppe; e-mail, hilhe@gse.harvard.edu; write to the institutes at HIHE, 339 Gutman Library, Harvard Graduate School of Education, Cambridge, MA 02138; or call them at (617) 495-2655.

ACE Fellows

For over 36 years, the ACE Fellowship Program has strengthened colleges and universities by providing comprehensive leadership development to more than 1,300 fellows—senior faculty and administrators.

ACE Fellows participate in a yearlong experience designed to provide them with the knowledge, skills, and perspectives they need to take on significant leadership roles in higher education. Candidates must have a demonstrated record of leadership and achievement in institution-wide contexts. Evidence might include success in an administrative post such as vice president or dean, department chair or director of admissions or student affairs, or skillful chairing as a senior faculty member of a major committee or faculty senate. Fellows are expected to return to their sponsor institutions for at least one year after the fellowships. The institution's president or a senior officer, who agrees to pay the candidate's salary and benefits during the fellowship year, must nominate candidates.

Any ACE-member institution can nominate up to two candidates per year. The applications are due in the early fall. ACE is the Washington-based umbrella association for the nation's colleges and universities. For more information, contact: ACE Fellows Program, American Council on Education, One Dupont Circle NW, Washington, D.C. 20036-1193; (202) 939-9412; fellow@ace.nche.edu; http://www.ACENET.edu.

For Community College Leaders

The League for Innovation in the Community College is an international association, launched in 1968 and dedicated to catalyzing the potential of the community college movement. The league hosts conferences and institutes, develops Web resources, conducts research, produces publications, provides services, and leads projects and initiatives with its member colleges, corporate partners, and other agencies.

In conjunction with the University of Texas at Austin and Cornell University, the League offers the Executive Leadership Institute (ELI) to prepare senior-level administrators for the community college presidency and features more than 20 community college CEOs and senior educators as faculty. Initiated in 1988, the ELI has "graduated" 420 participants, more than 160 of whom have since become presidents. Seventy percent of those in the first class, in 1988, have become presidents.

The institute is designed to build a network among participants, leading community college presidents, and presidential search consultants. Its purpose is to provide an opportunity for potential top leaders, or those in transition, to review their abilities and interests, refine their skills and participate in discussions on leadership with outstanding community college leaders in North America.

Participants are selected from among appli-
cants who have held senior positions of leadership in community colleges and are qualified for the presidency by their education and experien-
tial backgrounds. A typical applicant will hold an advanced degree and will have three or more years experience as a senior-level administrator in a community college, usually reporting to the CEO at the campus or college level.

Each institute is limited to 35 participants. Applications are encouraged from women and minorities. The deadline is generally in April. Participants do not need to be employed at League Alliance member institutions. The format of the weeklong program, held in August, varies by topic and purpose. Past activities include simulated interviews for presidential posts, guided by national presidential search consultants and senior community college CEOs, résumé reviews, and discussions of vital issues with distinguished community college leaders.

For more information, contact the league at www.league.org.

For Women Only

Also for community college leaders, but more specifically for women leaders, is the National Institute for Leadership Development (NILD), a program that has prepared more than 4,000 women for leadership posts since 1980. Its Leaders Program is designed for administrative and faculty women. Held throughout the year in different parts of the country, its programs center on crystallizing identity, fine-tuning skills, identifying leadership and community college issues, and developing personal confidence.

For more information, write to the institute at 640 North 1st Ave., Phoenix, AZ 85003; call (602) 223-4030; or email, NILD@pcmail.maricopa.edu.

Targeting especially middle and executive levels, at which women traditionally have been underrepresented, is Higher Education Resources Services (HERS), Mid-America, located at the University of Denver. It offers three programs to U.S. faculty and administrators.

Now in its 26th year is the HERS summer institute for Women in Higher Education Administration, co-sponsored with Bryn Mawr College (Pa.). Each year about 75 women administrators and faculty from around the world attend the four-week residential program on the Bryn Mawr campus. Topics include strategic planning, faculty development, higher education law, budgeting processes, accounting, fundraising, demographic trends, technology and online education, leadership skills, and self-presentation. The institute is designed to form a professional network of skilled women administrators ready to be mutually supportive and to work cooperatively to enlarge professional opportunities for women in higher education. Applications are accepted in early spring for the program, held in June. Twenty-six of the participants in the 2000 program were minority. A foundation has provided funding for HERS to offer scholarships to participants from Historically Black Colleges and Universities, but similar funding for particip-

HERS M I D - A M E R I C A

Cynthia Sear, HERS director

ants from Hispanic Serving Institutions has not been offered to HERS by any organization.

“Our programs are for people who have already made a decision to be an administrator,” said Cynthia Sear, HERS director, adding that demand for her program is strong, as evidenced by a waiting list.

A HERS program that is similar, yet shorter and less broad in its coverage, is the New England Management Institute for Women in Higher Education, now in its 23rd year. It offers women administrators and faculty professional development training in an integrated series of five-weekend seminars conducted October through April at Wellesley College. Topics include federal, state and community relations, accounting, legal issues for higher education, ethics, career planning, advancement strategies, and organizational behavior. Additional information on this program can be obtained through the HERS address listed below or at HERS, New England, Wellesley College, Wellesley, MA 02461; or at (781) 283-2529.

HERS and the National Association for Collegiate Women Athletic Administrators (NACWAA) offer the Institute for Administrative Advancement, a weeklong residential program in June, on the Bryn Mawr College campus. Now in its seventh year, the program offers women coaches and athletic administrators intensive training in athletic administration. Additional information can be obtained through HERS or through the NACWAA National Office at (910) 793-8244; e-mail, nacwaa- hers@nacwaa.org.

For more information on all of these HERS programs contact: HERS, Mid-America, University of Denver, MRB 402, 2199 South University Blvd, Denver, CO 80208; call (303) 871-6866; or email, bmetzger@du.edu.

WACUBO

The Western Association of College and University Business Officers (WACUBO) offers a variety of programs, including its Executive Leadership and Management Institute at Stanford University, which runs for a week in July. In its 33rd year, WACUBO's institute is intensive and comprehensive and includes: staff motivation and evaluation, improving quality and reducing costs, taking effective control of your career, and distinguishing yourself and your ideas "from the crowd.”

The institute is a graduate level, “total immersion” experience designed to increase skills and understanding. Participants have included administrative affairs vice presidents, fiscal staff in state higher education commissions, directors of personnel services, university police chiefs, academic deans, student service personnel, presidents of small colleges, and research university system office staff.

Pickens said the focus of his institute is to develop two major skills important to successful leadership—increased self awareness, so that leaders see themselves as others see them, and improved skills in strategic thinking, so that leaders can anticipate problems and try to solve them more effectively.

For information, contact Institute Director William Pickens by telephone (858) 278-1764; or e-mail, wphpickens@aol.com, or visit, www.wacubo.org.
Diversity training becomes an incredible challenge when the cultural and education gaps are so far-reaching.

The new census data on the shifting demographics in America has far-reaching implications for every aspect of American society. USA Today (Armour, 4/12/01) reported that the number of Hispanics in America has mushroomed nearly 60 percent in the last decade to 35.3 million. The Hispanic population is now tied with African Americans as the largest minority group in America and far earlier than predicted.

Looking further into the census data, we see that about one-third of Hispanics are under 18 years old. This demographic fact has serious implications for American education and for the workforce. Furthermore, the 2000 census shows that while Hispanics still have large concentrations in southwest California and New York, more recent immigrants from Central America and Mexico are settling in states like North Carolina, Georgia, and Iowa where there was virtually no Hispanic population just a decade ago. The New York Times (Chen, 4/16/01) reported an explosion in the Hispanic population throughout the suburbs of this country. And noted that despite the increasingly influential numbers, Hispanics are nearly invisible in many areas of public and political life, particularly in the Northeast.

Segments of the corporate world, however, have started to pay attention to the increases because they recognize that their own interests are at stake. Companies are becoming aware that they will need the Hispanic population to lead their economic futures forward as "a matter of business survival," according to Armour. Since NAFTA, there is now a reciprocal trade of goods with Mexico worth about 250 billion dollars annually. American-based companies are motivated, therefore, to hire Spanish-speaking workers. The need for more Spanish-speakers could increase if a free-trade zone were to expand throughout the Americas.

Some segments of corporate America are paying attention to how the demographic shifts will impact their businesses and are becoming more welcoming to Hispanics.

PricewaterhouseCoopers, PepsiCo, Chevron, and Coors Brewing, have stepped up their recruitment and retention efforts. They're hiring interpreters translating employee handbooks into Spanish, and creating mentoring programs.

USA Today reports some other initiatives taken by companies in response to changing demographics:

• Kmart, as a result of heavy recruiting at colleges and universities, employs large numbers of Hispanic students; advertises in Hispanic publications and online Hispanic job boards; and has translated employment and benefit information into Spanish.

• PricewaterhouseCoopers also recruits on college campuses, particularly in Texas and other areas with a dense Hispanic student population. It has set up employee support groups and socialization groups where Hispanic managers serve as leaders and mentors for Hispanic employees. It also offers scholarships for Hispanic accounting students.

• Chevron sponsors an Hispanic employee network referred to as Somos, which means "we are" in Spanish.

• The Gap, based in San Francisco, Calif., recruits on campuses with large Hispanic student populations and works with both the National Council of La Raza and the National Society of Hispanic MBAs.

La Raza estimates that Hispanic purchasing power is more than 350 billion dollars annually. Small busi-
nesses owned by Hispanics have been driving much of the business growth of this sector.

Hispanics, although lagging behind other minority groups, are increasingly moving into the middle class. They are buying homes, entering college, and earning advanced degrees. It is not surprising to see companies such as Pepsi, that sell to the Hispanic market, reach out to potential Hispanic employees as a way of expanding their customer base.

Pepsi not only works with national Hispanic organizations for purposes of recruiting, it is planning a leadership forum for some Hispanic executives. The forum will give these Hispanic executives access to the company's CEO and other top leaders. Maurice Cox, vice president for corporate development and diversity at Pepsi, said, "It would be a large mistake for us to not appeal to this broad segment of talent. The pool of White males is continuing to shrink, and the pool of Latinos is growing. There is a massive shift taking place demographically, and if we don't begin thinking about it now, we'll find ourselves at a significant disadvantage." (USA Today, 4/12/01, p.2B).

Many companies are attempting to cultivate their own talent among Hispanics. Hispanic professionals at PricewaterhouseCoopers, for example, are sent into high schools to talk about careers in accounting and finance. Additionally, several companies are working with professional Hispanic organizations to get Hispanics into careers in which they are underrepresented. These corporations are pouring money into sponsorship of professional organizations such as the American Association of Hispanic Certified Public Accountants. Manuel Espinoza, president of that association, says that the 2000 census raised the corporate world's awareness of the importance of the Hispanic population in terms of economics.

Although this new corporate awareness has prompted some advances for Hispanics in the business world, there is certainly a long way to go and many obstacles to overcome. The National Council of La Raza, a nonprofit agency that provides social services and support for Latinos, reports that in promotions, raises, and jobs. There are professions and industries that seem out of reach to Hispanics and to other minority groups. The Coalition for Fair Employment in Silicon Valley reported survey results of 250 Silicon Valley firms that in total employ 142,000 people. The report states that just 8 percent of the workers were Hispanic, and this is in an area of dense Hispanic Hispanic workers primarily from rural areas in Mexico. Chances are good that these employees have little formal education. LaCalle says that Nicaraguans carry with them their histories as a war-torn people. She says that people from Chile are almost European in flavor. Education levels can also vary dramatically. LaCalle tells of a class she taught in which one of the participants had a doctorate and another was unable to write his name.

Diversity training becomes an incredible challenge when the cultural and education gaps are so far-reaching. But harmonious relationships among diverse groups of people will be a necessity for economic progress and productivity.

REFERENCES

National Council of La Raza estimates that Hispanic purchasing power is more than 350 billion dollars annually.

1999 Hispanic women had a median income of $11,384 while that of non-Hispanic White women was $30,594. There is a significant salary gap for Hispanic and White males as well, though not quite as dramatic as that for females.

Not There Yet

The Equal Employment Opportunity Commission (EEOC) reported that the allegations of national-origin discrimination based on companies' implementation of English-only rules jumped from 77 cases filed in 1996 to 400 in the year 2000. These cases often involved employers who prohibited Hispanic workers from speaking Spanish on the job.

A significant number of Hispanic employees still lack health benefits, retirement pensions, and are being shut out of population. If business leaders succeed in bringing more Hispanics into various companies, we will undoubtedly see more challenges ahead. We have already witnessed increases in litigation as Hispanics face discrimination on the job. As work forces become increasingly diversified, we will need more diversity trainers and consultants to help bridge cultural divides.

Bridging cultural gaps is especially challenging when it comes to the Hispanic population. With so much diversity within the group we call "Hispanic," there is no one-size-fits-all diversity training. Trula LaCalle, a consultant who is based in Sebastopol, Calif., specializes in cross-cultural issues. She says that she must tailor classes to the particular backgrounds of Hispanic workers. Some companies may have
The Inspiring Triumph of Mario Cruz

Exemplary Youth Hoping for Scholarship

BY
NICK ANIS

In remarks entered into the Congressional Record last summer, Congressman Gary Miller said, “Mario’s overwhelming triumph over difficult and challenging circumstances is both moving and inspiring.”

There are kids who have had to make their own way without the benefit of parents or the guidance and encouragement they all so very much deserve. But regardless of the support, success in life is often directly related to personal effort.

A case in point is Mario Cruz, a high school honors student. Since losing his parents at an early age, his focus in life has been studying hard so he can attend a good college and obtain a degree and make something of himself. And it hasn’t been easy for him because he has had to do for himself many things not normally required of kids in primary, middle, and high school.

Unlike most high school students, Mario, having no parents, must do his own laundry, cook his own meals, and do shopping and housework. While doing all these things for himself, Mario has to attend school, do his homework, and study—and as an honors student, he has lots of schoolwork. Mario lives with his brother and cousin, who are seniors in high school. He works after school and on weekends to pay his share of the rent, utilities, and food.

Despite being parentless, and of limited financial means, Mario has stayed on the right track, worked hard, and excelled in school. He is junior class officer, Key Club officer, and a La Raza Unida member.

Mario also has done a good share of community service work. With fellow students, he’s collected donations for women abused by their husbands and for sick children who need money for their health expenses. Working on his own, he has been helping to build computers for underprivileged kids and families and teaching them computer use.

Mario Cruz came to the United States with his brothers and sisters at an early age. His parents enrolled him in school late. About II years ago, Mario’s father took off, and a year later, Mario’s mother died of cancer. Mario’s father was declared by the court to be an abusive and unfit parent, and his family was split apart. Mario’s sister went to live with relatives in Mexico, and his younger brother went to a family in Southern California. An uncle, who was of limited means, with several children of his own, reluctantly became the guardian for Mario and his two older brothers.

Before long, the three boys were mostly on their own. Rigo, now 21, did so well in high school he managed to secure a full scholarship at Occidental College in Glendale, Calif. Juan, who just turned 19, is about to graduate from high school. He’s going to go to a nearby community college. Mario, now 18, has been dreaming about going to college since middle school. When his older brother got the full academic scholarship to Occidental, Mario really became hooked. He got the idea that if he worked hard like his older brother, he too could obtain a scholarship and go to college.

But how much does a high school kid really know or understand about scholarships and college entrance requirements?

As the years progressed, Mario began to realize that getting that coveted scholarship might be much harder than he thought. He had no one to talk to about it or to reassure him, so Mario had to turn to his memory. He remembered his mother, whom he loved very much. She had told him many times when he was a little niño that he was a good son, and that she knew he was going to do well in school, and
that he would go on to college because graduating college was the gateway to a successful life.

And Mario has done well in school. He's in the top 2 percent of his class, he has a 4.0 plus GPA, and he's never missed a day. He's working hard to keep his grades up and preparing extra hard for the SATs. He wants to be accepted to some good colleges and obtain a scholarship. Although he is considering the University of Southern California, California State University-Los Angeles, and California Polytechnic University-Pomona, Occidental College is his first choice.

One of the longest-standing colleges west of the Mississippi, founded in 1887, Occidental is consistently rated in the top tier of nationally recognized liberal arts colleges. It offers 22 majors in 20 departments and 10 interdisciplinary majors. It has combined-plan programs in liberal arts and engineering with Columbia University, Art Center and Design, and Caltech. Oxi also has the distinction of being ranked first in the nation in diversity by U.S. News and World Reports. Its enrollment of 1,600 students is about 16 percent Latino, 21 percent Asian American, 5 percent African American, 1 percent Native American, and 52 percent White. There are 54 full professors, 41 associate professors, and 28 assistant professors, all of whom hold a doctorate or similar degree, and 15 instructors. About 46 percent of the faculty are women. It has received accolades for its excellent performing arts and sports programs, and the school has a world-class library with more than a half-million volumes, 300,000 documents, a massive rare book collection, and robust online access for students.

Mario is impressed with the school too because "Oxi is just the right size, class sizes are small, and students don't get lost in the shuffle."

Annual tuition is about $31,000, including room and board and expenses. According to Oxi's financial aid office, about 85 percent of Occidental's students receive some form of assistance, including grants-in-aid, loans, and student employment. The average amount awarded from all sources, including the College, is $19,023 per year.

Mario does have a decent shot at a scholarship with Occidental. Realizing the competition is stiff, he's "cautiously optimistic" about his chances.

Community leaders have begun to notice Mario. He has been recognized by a number of government officials, including U.S. Congress member Gary G. Miller, California Gov. Gray Davis, city of Pomona Mayor Eddie Correa, California Assembly member Bob Pacheco, U.S. Congress member Jerry Lewis, California Sen. Pete Knight, California Assembly member Keith Oldberg, city of Victorville Mayor Terry E. Caldwell, Los Angeles City Council member Jackie Goldberg, city of Chino Mayor Bunice Ulloa, city of Industry Mayor David Winn, city of Los Angeles Council member Joel Wachs, Los Angeles County Supervisor Don Knabe, California state Sen. Jack Scott, Victor Valley Union High School District, and others for his outstanding character, academic achievements, and community service.

An incident last summer provides insight into his character. While he was doing volunteer work at summer school, a gust of wind blew a sign into his face, injuring his eye and cutting his face. Mario wanted to remain to take a scheduled test instead of leaving school to get treatment he couldn't afford, having no medical insurance. But the school insisted that he leave school and go to the hospital. Luckily, a co-worker noticed Mario going on foot to the hospital and gave him a lift. The hospital generously agreed to treat Mario and write off his bill. The emergency room doctor stitched him up, gave him a prescription, told him to go home, take some pain medication, and go to bed. Instead, Mario walked the two or three miles back to school, finished the day's classes, and took his test, which he aced. The hospital bill was eventually written off as promised, but the doctor's bill wasn't. Rather than complain or walk away from his responsibilities, Mario worked extra hours at his job and did some odd jobs so he could pay off the doctor bills, which were several hundred dollars.

In remarks entered into the Congressional Record last summer, Congressman Gary Miller said, "Mario's overwhelming triumph over difficult and challenging circumstances is both moving and inspiring."

Mario has been attending and applying himself in school, keeping on top of his homework assignments, studying hard, taking an SAT preparatory course, and also preparing for the SATs by using home study guides and CDs from the Kaplan Company. This summer, he signed up to paint houses for the poor as a volunteer, and to volunteer for One to One Mentors, in addition to a brief internship at a congressional office. He also planned to attend summer school again for extra credit.

Are there ratings for motivation and effort? If so, Mario Cruz will be off the charts.

New Florida Independent College Bonding Authority Increases Student Access

TALLAHASSEE, Fla.

A new law creating a statewide bonding authority serving Florida’s private colleges and universities will enable them to pool resources to cut costs and increase access for students, said Dr. Paul R. Corts, chair of the Independent Colleges and Universities of Florida (ICUF) and president of Palm Beach Atlantic College.

“This will ensure students and parents of increased access to a college that meets their needs,” said Corts.

Gov. Jeb Bush, who said the bonding authority “will allow these institutions to provide our citizens better access to education at lower cost,” signed the bill creating the Higher Education Facilities Financing Authority into law.

Corts said the new law will significantly expand the ability of the 27 ICUF members to pool their resources to issue low-cost, tax-exempt bonds for construction of new buildings and other working capital costs.

“Our members expect to reduce interest rates on bonds issued by the Higher Education Facilities Financing Authority by as much as two percentage points,” he said. “This will generate substantial savings, which can help reduce the pressure on tuition to cover increasing costs.”

The new law creates a single statewide bonding authority that will augment a dozen county authorities that previously issued bonds for Florida’s independent colleges and universities. The authority will issue revenue bonds to be repaid by participating colleges and universities from their revenue sources. The bonds are not backed by the state of Florida and in no way obligate the state or local governments.

The program will help the independent colleges and universities expand by providing a low-cost source of funds to pay for construction of dormitories, classrooms, and other needed facilities.

The new initiative is based on similar programs in Kansas and Iowa, where independent colleges and universities have used their bonding authority to increase admissions and course offerings.

The College Board Introduces Score Report Plus

NEW YORK, N.Y.

High school students nationwide who take the PSAT/NMSQT test this fall to hone their pre-SAT skills and to qualify for the National Merit Scholarship Program will be the first to receive detailed personalized advice from The College Board on how to improve their verbal, math, and writing skills.

The advice is part of a new service called Score Report Plus that is being introduced by The College Board, which sponsors the Preliminary SAT/National Merit Scholarship Qualifying Test, a 130-minute test offered to high school students each October. Students register for the test at their high schools. Skill improvement advice will be given, which will come from educators and will reflect the student’s performance on the test. The report will address up to three skills that need improvement in each of the test’s three parts and will offer examples of action steps a student can take to improve performance.

Score Report Plus will include feedback on each test question, projected SAT scores, and advice on how to prepare for an intended major and career.

This year’s test dates for the PSAT/NMSQT are Oct. 16 and 20.

“Students want specific information on how they can get ready for college,” said Beth Robinson, who heads the PSAT/NMSQT program for The College Board. “It’s not enough to tell them to ‘improve your reading skills’ or ‘solve problems better’ or ‘plan your course work.’

“The earlier this information can get to students, the more time they have to improve their skills and prepare for college.”

Robinson also said that because the reports provide early feedback, many states and districts have begun to fund the test for sophomores. Today, about two-thirds of students who take the PSAT/NMSQT are juniors and the rest are sophomores.

Sophomores will benefit this year from the addition of sophomore percentiles on their reports, which will enable them to compare their test results to those of their peers—a comparison previously available only to juniors.

To prepare for the PSAT/NMSQT, The College Board urges students to take demanding academic courses and to read challenging literature. It recommends, too, that students look at the practice questions and other relevant information posted on www.collegeboard.com.
ACE Reports, Percentage of Women and Minority Faculty Grew Between '87 and '99

WASHINGTON, D.C.

A new study from the Department of Education's National Center for Education Statistics shows the percentage of women and racial/ethnic minorities as a portion of all postsecondary faculty has increased between 1987 and 1999, according to the American Council on Education (ACE). The report is based on comprehensive survey instruments involving faculty and instructional staff at 480 institutions (2-year and 4-year) in 1987, and 960 institutions in 1999. ACE recently published the following findings:

- Among all faculty, the number of women went from 32 to 39 percent. The number of minorities among all faculty went from 10 to 15 percent.
- As a percentage of all faculty in 1999, women were most represented at the rank of instructor/lecturer (53 percent), followed by assistant professor (45 percent), associate professor (34 percent), and professor (21 percent). Minorities were reported most frequently among the rank of assistant professor (21 percent), followed by associate professor (15 percent), instructor/lecturer (15 percent), and professor (11 percent).
- Among all faculty by type of institution, the number of women faculty increased the most at private doctoral institutions, 24 percent in 1987 to 36 percent in 1999. The most significant increase in minority faculty members occurred at public doctoral institutions—increasing from 8 to 16 percent over the same time period.
- The percentage of minority faculty declined only at private liberal arts colleges, dropping from 15 percent in 1987 to 14 percent in 1999.
- As a percentage of all faculty in 1999, women were most represented at public community colleges (51 percent), followed by private liberal arts colleges and public comprehensive institutions (41 percent each). Minorities were reported most frequently among faculty at private doctoral institutions (22 percent), followed by public comprehensive, public doctoral, and private research institutions (16 percent each).

Six Seconds' Curriculum Off to Promising Start

SAN Mateo, Calif.

Preliminary data released from a pilot study of Six Seconds' Self-Science Emotional Intelligence Curriculum indicates that teachers find the program to be an effective tool for improving their classroom environments.

All teachers surveyed agreed that Self-Science increased cooperation and made classroom relationships more positive. Seventy-five percent said both violence and "put-downs" decreased, and also that learning has improved and that students have become more focused.

The Self-Science curriculum teaches specific skills related to self-awareness, self-management, and self-direction. In Emotional Intelligence, a best-selling book on the importance of social and emotional skills, Dr. Daniel Goleman describes the program: "Self-Science is a pioneer, an early harbinger of an idea that is spreading to schools coast to coast. A list of the contents of Self-Science is an almost point-for-point match with the ingredients of emotional intelligence—and with the core skills recommended as primary prevention."

The initial data is by no means conclusive. Study author Dr. Artabel Jensen explains, "These initial findings are exciting and validating—and hopefully enough to generate interest and funding to do more comprehensive research." Jensen's pilot included 20 classrooms, primarily in the San Francisco Bay area. The initial data is based on surveys from eight diverse classrooms, grades 3-10, public, private, and Catholic schools, with 38 percent minority students and 11 percent identified as special needs.

The curriculum, which is just one element of Six Seconds' school improvement program, provides specific mechanisms for teaching skills and a structure for practicing skills. Self-Science does not replace therapy or parents, nor does it teach a specific set of values. It is simply a mechanism for teaching specific tools, such as naming feelings, listening, setting goals, and increasing motivation. The program encourages students to develop values and principles but does not prescribe the "right" answers.

Six Seconds' curriculum is based on the work of Karen Stone McCown, an educator who began developing the Self-Science program in 1987. McCown is concerned that students recognize that all choices have costs and benefits. "Over time, Self-Science teaches that we have choice about all of our thoughts, feelings, and actions. Once we start to see how our choices shape our lives, we immediately become more accountable."
PEOPLE & PLACES

News from UT-Austin

The University of Texas (UT)-Austin signed an affiliation agreement with the bipartisan Center for Democracy in Washington, DC, to cooperate on programs designed to support the development and maintenance of democratic and free-market societies around the world. The pact will create international internships and research opportunities for UT-Austin students and faculty while providing much-needed technical assistance to emerging democracies worldwide.

The Materials Research Society awarded a 2001 Undergraduate Research Initiative grant to Jesse "J.R." García and Dustin Shaw, senior mechanical engineering students at UT-Austin. The Society is an organization of scientists, engineers, and research managers looking for new materials of technological importance. García and Shaw, working in the lab of Dr. Lew Rabenberg, associate professor of mechanical engineering, are researching The Effects of Cold Work on the Thermal Expansion of Metals.

New School Bestows Degree upon Calderón

Silia María Calderón, governor of Puerto Rico, was the commencement speaker at New School University in New York and was awarded an honorary Doctor of Law degree.

Calderón, the candidate of the New Progress Party in the November 2000 elections, became the islands first woman governor. Born in San Juan, she studied political science at Manhattanville College in New York and obtained her master's degree in public administration at the University of Puerto Rico. She has worked in both the public and private sectors since 1975, as chief of staff of the government of Puerto Rico, secretary of state, and president of Commonwealth Investment Company, Inc.

Cal State L.A. Places in Student Manufacturing Challenge

The California State University-Los Angeles College of Engineering and Technology H.E.R.E.

Cal State L.A. team's Beach Cruiser Wheelchair finished in third place at the WESTEC 2001 Student Manufacturing Challenge Competition—where collegiate-level engineering and technology students discover the important connection between classroom lectures and real-world applications. The team beat out last year's first- and second-place winners, San José State and Arizona State universities.

Members of the Cal State L.A. team included Daniel Ochoa, Steve Menchaca, Alicia Martínez, Paul Beas, Abraham García, Javier García, Francisco García, Ignacio Sánchez, Sinar Cevallos, and José Louis Pérez. The student-built, front-wheel drive, beach wheelchair was created as part of a H.E.R.E. (Hands-on Experiences in Rehabilitation Engineering) project aiming to develop life-enhancing technology for physically disabled people.

Frederico Named to Westchester Community Board

"I am proud to announce the appointment of Aleida Frederico to the Westchester Community College board of trustees," said New York Gov. George Pataki.

Frederico is chair of Union State Bank's Community Reinvestment Act Committee and director of the bank's Spring Valley Business Resource Center.

The first woman president of the Westchester Hispanic Chamber of Commerce, Frederico was responsible for the initiation and coordination of the Chamber's annual Hispanic Heritage Gala honoring successful Hispanic businessmen and women. She chairs the board of services, education, resources of Westchester, Inc., an organization that prepares children, youth, and adults for the workplace. Priority is given to promoting English literacy skills, academic enhancement, and job training.

NOCORE Presentation on Post-Hopwood Diversity Efforts at Texas A&M

Three Texas A&M University officials made a presentation on "Post-Hopwood Progress on Diversity: A Case Study" at an NOCORE (National Conference on Race and Ethnicity in Higher Education) meeting in Seattle.

Pictured (l. to r.): Dr. Christine Stanley, assistant professor of educational administration and associate director of the Center for Teaching Excellence; Joseph A. Estrada, assistant provost for enrollment; and Dr. Janis P. Stout, dean of faculties and associate provost, provided an overview and examples of new initiatives in the three areas they represent—improvement of teaching and learning, diversity of the student body, and faculty.

While conceding that Hopwood and related decisions by the Fifth Circuit Court had an adverse impact on the University's progress in diversity, they said that by finding ways to approach the challenge, Texas A&M has "regained momentum."

Guzmán Named President of Palo Alto

The Alamo Community College District (ACCD) selected Dr. Ana Cha Guzmán as president of Palo Alto College (Texas). The former executive vice president for institutional advancement, administration, and community relations at Austin Community...
Cuyamaca Appoints Agosto Interim President

David Agosto, vice president of student development and services at Cuyamaca College (Calif.), was named interim president and will co-chair the Cuyamaca President Search Committee.

"With his breadth of experience in college administration and his understanding of the needs of Cuyamaca College, David Agosto is well-qualified to step in as the interim president and assist an extensive search for a permanent replacement," said Gary Kendrick, Grossmont-Cuyamaca Community College District's governing board president.

This is the second interim presidency for Agosto, who held the post at San Diego City College. Agosto is a member of the board of trustees of Southwestern College in Chula Vista, Calif.

Sullivan Names Kim-Rivera Director of International Programs

Sullivan County Community College (N.Y.) announced the appointment of E.G. Kim-Rivera as director of international programs. Kim-Rivera will be responsible for assisting international students with immigration matters and for the management of the College’s Sullivan Kyeongmoon (SKY) program, which provides opportunities for South Korean students to study at Sullivan during the summer intercession. She will also work with the ESL coordinator.

Prior to joining Sullivan, Kim-Rivera taught TESOL (Teaching English to Speakers of Other Languages) at Miami-Dade Community College and English at the Dong-A Language Institute and Korea Baptist Theological College/Seminary, both in Taegon, South Korea.

Kim-Rivera holds a doctorate in Foreign Language Education from the University of Texas-Austin, a master’s in TESOL from Florida International University, and a bachelor’s in English language and literature from Ewha Woman’s University in Seoul, South Korea.

Nebraska Hosts Promising Scholars at Summer Institute

The University of Nebraska-Lincoln welcomed 40 incoming first-year students to the campus to participate in the Summer Institute for Promising Scholars. The six-week residential program for graduating high school seniors is designed to increase college retention and graduation rates of students from underrepresented populations. A summer educational grant covers tuition, fees, room and board, and books for the students.

Students took a three-credit, three-hour English composition course and a mathematics course of three-to-five hours, the level depending on each student’s math background and performance on a math placement test. The Institute also included programming and group sessions designed to help students explore issues of diversity and racial climate, and strategies for academic and social success. Participating students represented diverse ethnic and racial backgrounds.

Miami-Dade and Texas-Pan American Sign Pact

In Florida, Miami-Dade Community College (M-DCC) and the University of Texas-Pan American (UTPA) entered into a transfer agreement enabling engineering students at M-DCC to enroll in UTPA’s engineering program. Students receiving an associate's degree in arts with a 3.0 GPA are guaranteed admission to UTPA to complete a bachelor's degree. UTPA will also provide a full-tuition scholarship to the top two students transferring from M-DCC.

"This articulation with the University of Texas-Pan American will offer our students unparalleled opportunities to study at one of the country’s finest universities," said M-DCC President Dr. Eduardo J. Padrón (picted r.). Dr. Miguel A. Nevárez (l.), president of UTPA, called the agreement "an historic one, creating a link between two of the largest Hispanic Serving Institutions in the nation."
In addition, students who apply to UTPA and are not accepted will be advised to attend M-DCC and maintain the criteria set forth in the articulation agreement, for consideration for admission to UTPA as a junior.

**Caldwell Hosts Multicultural Summer Camp**

Caldwell College (N.J.) hosted the Seventh Annual “Camp Imelda: Leaders for Peace,” aimed at teaching inner-city and suburban elementary students the value of diversity and leadership skills. Thirty-six fifth graders from 10 New Jersey Catholic schools participated in the multicultural summer camp, encouraging healthy interaction among students from varying backgrounds.

The camp, sponsored by the Sisters of St. Dominic, engaged the students in training designed to increase understanding of multicultural issues. Workshops included conflict resolution, creative problem solving, and communication improvement through writing and public speaking. Students were involved in artistic enrichment activities, recreational activities, and afternoon trips to Genesis Farms, an ecological learning center, and Project USE (Urban-Suburban Experience), a community building activity.

**Nazareth Hosts Family Services Conference**

In New York, the Nazareth College social work department, in conjunction with the Monroe County Preventive Services Coalition, hosted a family services conference, “Families Thriving: Alike and Diverse,” an all-day event. Dr. Kenneth Hardy, professor of marriage and family therapy at Syracuse University, delivered the keynote address.

The conference provided workshops on child discipline, adoption, family care systems, grandparents as caretakers, the Hispanic/Latino family unit, deafness, parents with developmental disabilities, foster families, teen pregnancy, gay families, and the importance of fathers. Hardy presented a workshop, “Disciplining Without Devaluation.”

With programs such as “Families Thriving,” Nazareth’s social work department helps people of all ages enhance their capacities for social functioning. It recently received a federal grant enabling students to pursue careers in public child welfare.

**News From Texas-Pan American**

- The University of Texas-Pan American’s (UTPA) division of external affairs and the University of Texas-Pan American Foundation hosted a U.S./Mexico Border Summit, “Two Countries, One Common Destiny” The conference brought together economic development practitioners, major national and international foundations, banks, business and industry groups, environmental health experts, non-governmental organizations, and state and federal government agencies. It focused on development of the border region, addressing trade, labor, tourism, manufacturing, and the environment.

- UTPA and Texas A&M University-Kingsville (TAMUK) signed a memorandum to collaborate on education, service, and research efforts. UTPA President Dr. Miguel A. Nevárez and TAMUK President Marc Cisneros signed it at the start of the Hispanic Serving Institution Grant and Funding Opportunities Summit, a collaborative effort of the U.S. Department of Agriculture/Hispanic Association of Colleges and Universities Leadership Group. The UTPA/TAMUK joint effort aims to bring more research and development funds to the South Texas region.

- The U.S. Department of Education awarded UTPA $28 million to help students in the Rio Grande Valley pursue a postsecondary education. The award was given through the Gaining Early Awareness and Readiness for Undergraduate Programs (GEAR UP) effort, which partners high poverty middle schools with at least two communities and business organizations and local colleges and universities to provide students and their families with comprehensive relevant support services. It offers academic preparation and higher-level coursework to each class of students from middle school through high school.

**Riverside Selects Interim VP**

In California, Riverside Community College announced the selection of Dr. Ray Maghroori as interim vice president of academic affairs, responsible for the administration of instructional programs and services including curriculum, planning, and new program development. He will also help lead the transition of the Riverside Community College District from a single college operating three campuses, to three separately accredited colleges in one system.

Maghroori was dean of the College of Business at San Francisco State University and held administrative posts at the University of California (UC)-Riverside. At San Francisco State, he developed an Executive MBA program for mid-level managers, an MBA program in e-commerce, and the Center for Executive Development. He also founded the Inland Empire Economic Data Bank and Forecasting Center at UC-Riverside.

**Coast District Chancellor Heads Community College Federation**

Coast Community College District (Calif.) Chancellor Dr. William Vega was elected president of Renewal & Change in the 21st Century, or RC-2000, a federation of community college presidents and chancellors of major urban community colleges in the U.S., Canada, and the United Kingdom. RC-2000’s mission is renewal and change through the open exchange of views and practices. The group addresses global and community college issues, such as community partnerships, teacher preparation and education, urban leadership training, diversity, and joint programs with international partners. Members include 26 CEO-level community college leaders.

An educator for more than 30 years, Vega has been district chancellor since 1993. As president of RC-2000, Vega will convene two annual forums and take a leadership role in promoting and exploring issues that arise therein. His term is two years.

**Texas Names Díaz Vice Chancellor**

The University of Texas (UT) board of regents approved the appointment of Armando Díaz as vice chancellor of community relations in the UT system. He will coordinate the system’s new community affairs initiative, which maintains communication and explores collaborative projects with a number of state and national civic, community-based, and professional organizations.

Díaz joined the UT system as a special assistant to governmental relations, and was
later appointed assistant and associate vice chancellor. Earlier, he was chief of staff to state Sens. Judith Zaffrinini and Hector Uribe. He has held several technical and management positions in the executive branch of state and local government, including community-based organizations. A 1971 graduate of UT-Pan American, Díaz earned a master's in education from Antioch College.

Citrus Names Valdez Man of the Year

Citrus College (Calif.) recognized Aaron Valdez as Man of the Year at its 38th Annual Achievement Awards Ceremony. One of four finalists, he was chosen by a six-member committee for his dedication, hard work, and service to the students during his time at the college. He served Citrus as student body president.

"I think what differentiates Aaron from other student leaders is his understanding and appreciation for organizational leadership," said Dr. Arnold Rollin, Citrus' director of student affairs. "He has also showed a willingness to stretch himself to enhance the effectiveness of the group."

Valdez, a 27-year-old husband and father of two, graduated Citrus in May. He will attend California State University-Fullerton in the fall as a business major and also plans to run for student government.

Texas A&M-Kingsville Honors Massa

Dr. Enrique Massa, Texas A&M University-Kingsville (TAMUK) assistant biology professor and Minority Biomedical Research Support (MBRS) program director, received the Olan Kruse Science Faculty Award, established to reward excellence in teaching and/or research in biology, chemistry, geosciences, or physics.

Massa has taught at TAMUK since 1997, supervising and mentoring 10 undergraduates and six graduates who actively participate in his laboratory. He has a grant funded by the National Institutes of Health (NIH)-Research Infrastructure at Minority Institutions and a NIH MBRS Program-SCORE grant. He had recent seminars and presentations at the 42nd Annual Drosophila Research Conference and at Rice University's department of biochemistry and cellular biology. He has also written several publications and has developed two courses at TAMUK. He received a bachelor's degree in biology from UTPA and a doctorate in neuroscience from the University of Michigan.

Colorado-Boulder Appoints Cultural Center Counselor

The University of Colorado (CU)-Boulder appointed Jamal Ward as university counselor at CU-Boulder's Cultural Unity Center. He was previously assistant director and counselor for the admissions office.

"While there are a number of excellent programs and services already in place, I look forward to making a contribution in the area of new and innovative programs for students of color," said Ward.

The Cultural Unity Center provides support for the University's mission of enhanced student recruitment, retention, and graduation, with a focus on minority students. Its programs and services help strengthen understanding of the cultural, social, and political diversity of the University community.

Marquette Helps Minority Students Sharpen Journalism Skills

Marquette University's (Wis.) department of journalism invited minority students interested in journalism to its Urban Journalism Workshop. Marquette, in conjunction with the Milwaukee Journal Sentinel and Dow Jones Newspaper Fund, held the free two-week workshop, preparing minority students for careers in the newspaper industry.

During the workshop, students lived on campus, sharpening their writing, photography, and production skills. They also learned the Internet skills required to post a newspaper on the Web. Editors, reporters, and photographers from the Milwaukee Journal Sentinel joined Marquette faculty and students to make the workshop fun and professional. Students interviewed news makers in Milwaukee, attended summer festivals and events, and produced a first-rate newspaper. Marquette has hosted the workshop since 1986.

Guerrero Becomes Stephen F. Austin State President

In Texas, the Stephen F. Austin State University (SFU) board of regents named Dr. Tito Guerrero III the seventh president of the University.

"This is a wonderful development," Guerrero said. "I look forward to working with everyone to take this University to an even higher level."

Guerrero was president of the University of Southern Colorado-Pueblo, where he turned six consecutive years of enrollment decline into two consecutive fall enrollment increases. He raised $33 million over the past four years and established an instructional technology center to provide development opportunities and curriculum support to faculty members. Guerrero also initiated pre-kindergarten through master's degree partnerships and distance education collaborations involving 17 school districts, five community and junior colleges, and three four-year institutions.

Guerrero holds a bachelor's degree in health education and biology from Texas A&M, a master's in education from the University of North Texas, and a doctorate in education, with emphasis on administration, planning, and social policy, from Harvard University.

Calvin Hosts Annual Entrada Scholars Program

Calvin College (Mich.) hosted the annual Entrada Scholars Program, with more than 40 high school juniors and seniors participating—the highest reported enrollment to date in the month-long summer program aimed at ethnic minority students.

This year there were 15 males and 29 females—African American, American Indian, Asian, Hispanic, and multiracial.

At the heart of the program is the three-week summer school course taken with Calvin students. In addition, participants worshiped with Calvin students, lived in the residence halls, ate in the dining hall, studied in the library, shot hoops in the gym, carried out a service project, and ordered late-night pizzas.

Rhae-Anne Booker, director of the pre-college program at Calvin, said, "We want students to get a true sense of what college—particularly
Calvin—its all about. The Entrada experience gives them a good look at what college life entails and what it takes to succeed in college.”

**St. Thomas Sponsors Hispanic Film Festival**

St. Thomas University (Fla.) was a major sponsor of this year’s Hispanic Film Festival in Miami, Fla. The festival, which promotes Spanish-language films, has screened more than 200 films since its inception in 1996, increasing awareness of Hispanic cultures among Hispanics and others in the community.

Each year, film lovers experience other cultures, engaging in discussions with film directors, cast, and producers during film presentations. This year, the event sponsored discussions with professional filmmakers and hosted more than 100 foreign journalists. St. Thomas also organized an academic conference on “The Use, Abuse, and Control of Latino Stereotypes in Latin American Films.” Dr. Susan Angulo, assistant vice president of academic affairs at St. Thomas and co-director of the film festival, arranged a panel that included Juan Carlos Espinosa, director of the Felix Varela Center for Cuban Studies at St. Thomas.

St. Thomas faculty and staff pictured (l. to r.): Dr. Angulo; Dr. Adrienne Vyne, chair and assistant professor in the department of physical sciences and mathematics; Monsignor Franklyn Casale, president of St. Thomas; Jessica Antelo, university advancement coordinator; and Maureen Davis, director of human resources.

**Texas Wesleyan Presents Summer Chemistry Camp**

Texas Wesleyan University’s chemistry department, the Fort Worth Independent School District, and Dr. Ricardo Rodriguez, McCain professor of chemistry and chemistry department chair, presented the eighth annual Summer Chemistry Camp for Kids, focusing on 40 third- and fourth-grade ESL bilingual students.

The camp is designed to motivate, enrich, and challenge students, pre-selected by faculty and administrators, who might otherwise be considered at-risk of losing interest in school. It has a strong focus on Spanish-speaking students, including those who might face a language barrier. It provides educational experience, usually not available, to children of minority communities. It offers students information and guidance on chemistry-career possibilities and heightens awareness of the minority presence in science by introducing them to minority chemistry professionals. Participating students have no financial obligation. The program is funded by a variety of sponsors.

**Cuyahoga Welcomes First Hispanic to Board of Trustees**

In Ohio, Cuyahoga Community College (CCC) in Cleveland welcomed Sister Alicia Alvarado to a five-year term on its board of trustees. She is the first Hispanic to serve on the board.

“Her experience and knowledge will serve the College well,” said Dr. Jerry Sue Thornton, CCC president.

Alvarado grew up in the Ohio City neighborhood of Cleveland where her family has lived since 1960, attended grade school and high school in Cleveland, and was a student at CCC. She earned bachelor’s degrees from Cleveland State and Kent State universities, and a master’s from Case Western Reserve. She was director of the Hispanic Catholic Center and a coordinator at the office of Hispanic pastoral ministry, both in St. Louis, Mo. In 1998, she returned to Cleveland as director of the office of Hispanic ministry.

**Getty Provides Post-Earthquake Assistance to El Salvador**

The Getty Conservation Institute, in conjunction with El Salvador’s National Council for Culture and Art (CONCULTURA), sent a team to El Salvador to provide emergency assistance in assessing and stabilizing historic buildings damaged by major earthquakes in January and February. An ongoing partnership was launched three years ago for the preservation of the archeological site of Joya de Ceren and Mayan cultural heritage.

The team of Getty and CONCULTURA representatives, led by Julio Vargas and Daniel Torrebeva from the Catholic University of Peru, visited Joya de Ceren and other historic sites in several Salvadoran cities hit by the earthquakes. Getty deemed the visited sites, which included churches and colonial buildings, repairable.

The partnership’s main priority is to help train a network of professionals within El Salvador to stabilize significant structures before future earthquakes strike. The buildings selected for intervention are all Salvadoran national monuments and include the Nuestra Señora del Pilar, constructed in 1762 in San Vicente; Casa de la Cultural, a colonial-era, one-story courtyard house in Izalco; and San Tecla, a church built to withstand earthquakes. The team’s focus, Joya de Ceren, was only slightly damaged and was assessed for future repairs.

**Miami-Dade Hosts Future Educators**

Miami-Dade Community College (Fla.) held the 11th annual Future Educators of America conference to inspire new teachers and help alleviate the predicted teacher shortage of more than 16,000 annual vacancies in Florida during the new decade. Keynote speaker Georgina Koch-Hidalgo (pictured), a Miami-Dade alumna and a middle school teacher, is a National Board Certified Teacher—the highest professional designation possible and historically awarded to very few.

“Recruitment to our profession is more of a challenge than ever before because teaching is perceived to be a career with non-competitive salaries, poor working conditions, and few career-ladder options,” said Leslie Roberts, chair of Miami-Dade’s School of Education—the nation’s only school of education at a community college. “We hope to inspire young people, especially females and minorities, and expose them to the many benefits and rewards of teaching.”

More than 400 high school students attended the event, which featured workshops and lectures from Miami-Dade’s six campuses.

**NAHJ Members Share in Pulitzer**

Members of the National Association of Hispanic Journalists (NAHJ) and Latino staffers were among the reporting teams at
four newspapers awarded the Pulitzer Prize. Alan Diaz of the Associated Press also won a Pulitzer for his photograph of armed federal agents storming the house of Eldín González's Miami relatives and seizing the boy.

More than 20 NAHJ members and Latino staffers from the Miami Herald were on the reporting team that won the Pulitzer for Breaking News for coverage of the federal raid in Miami that removed Eldín González from his relatives and reunited the Cuban boy with his father.

Five Latino staffers from The New York Times won the Pulitzer for National Reporting with a series examining racial experiences and attitudes.

Chicago Tribune staff writer Alex Rodríguez and photographer José Moré won for Explanatory Reporting for their profile of problems with the U.S. air traffic system.

Graphic artist Dan Agravay was a member of the Portland Oregonian team that won for Public Service for its examination of the systemic problems within the U.S. Immigration and Naturalization Service.

Cuyamaca Graduate Turns to Teaching

As a teenager, Realynn Córdova always volunteered to be a recess aide for younger kids. Her love for children sparked her dream to become a teacher. Cuyamaca Community College's (Calif.) Afternoon and Weekend College made this dream a reality.

Nearly two decades after graduating high school, Córdova heard about the program. The welcoming staff at Cuyamaca convinced her to give it a try. Five years later, she is the program's senior ambassador, encouraging other working adults to try out the program.

Córdova is now a semester away from receiving her degree in Liberal Studies, with an emphasis in Special Education, at San Diego State University. She will be the first person in her family to graduate from college and plans to receive a teaching credential in Special Education.

"I will encourage my own boys to go to community college right out of high school," she said. "The classes are smaller. The teachers know you by name, and they take interest in you. Every single weekend teacher was enthusiastic and knew their subject matter inside and out."

DePaul Selects Chicana Author as Writer-in-Residence

DePaul University (Ill.) appointed Ana Castillo, award-winning Chicana author, as a writer-in-residence. A feminist, scholar, painter, single mother, and cultural healer, Castillo will serve a five-year term beginning this fall.

"This is an important hire for the college, our Latino students and faculty, and for the Latino community in Chicago," said Michael L. Mezy, dean of DePaul's College of Liberal Arts and Sciences. "Ana is one of the most significant American writers of our time. Her presence at DePaul will strengthen our curricula in writing and in Latin American/Latino studies."

Castillo was one of the strongest voices to emerge from the Latino nationalist movement in the late seventies. Her involvement in the political empowerment of Latinos helped shape her feminist values, prompting her to express her feelings through writing. She attended Northeast Illinois University, receiving a bachelor's degree in liberal arts, and went on to earn a master's in Latin and Caribbean studies from the University of Chicago. She is now an accomplished writer and speaker in great demand, traveling four months a year on book tours and on the academic lecturer's circuit, bringing positive affirmation to young people.

Southern Methodist Student Named Undergraduate of the Year

In Texas, the National Association of Latino Fraternal Organizations (NALFO) named Southern Methodist University (SMU) senior Nancy Lira Outstanding Undergraduate of the Year. NALFO is a national organization of 26 registered Latino Greek organizations. Lira was honored for her contributions to Latino Greeks as a whole.

As a member of Sigma Lambda Gamma, the largest, fastest-growing Latina sorority in the nation, with 56 chapters nationwide, she was named Outstanding Undergraduate Leader by the sorority's national board, and given the Pi Chapter Gamma Rose Award by her local chapter. She was also named Most Outstanding Senior by SMU's department of intercultural education and minority student affairs and was one of two graduating seniors awarded the Alfred B. Carrizales Outstanding Role Model Award for her contributions to the SMU and Dallas Hispanic communities.

Lira is the first in her family to attend college and has been very active on and off campus. On campus, she was on the Daily Campus newspaper staff, SMU Program Council, College Hispanic American Students and Hispanic Issues Forum. Off campus, she has worked with the League of United Latin American Citizens, the Hispanic Women's Network of Texas, and the Hispanic Chamber of Commerce.

Blanton Receives Texas Medal of Arts

Jack S. Blanton (pictured with wife Cindy Blanton) was one of 13 Texans presented with the premier Texas Medal of Arts Award from the Texas Cultural Trust. The award, modeled after the National Endowment of the Arts' Medal of Arts Awards, honors those displaying distinguished support of the arts in Texas, raising the awareness and funding for arts programs throughout the state.

Blanton was honored for his many contributions, specifically to the University of Texas-Austin Jack S. Blanton Museum of Art. The award ceremony included a concurrent proclamation by the Texas Senate and House of Representatives at the State Capitol, a luncheon at the governor's mansion, and the medal presentation and a gala dinner.

St. Thomas Professor Addresses American Colonialism

St. Thomas University (Fla.) Professor Ediberto Román is an established authority on issues concerning Latinos, Latin America, and the law. His articles and reviews have been published in numerous law reviews, and he is an expert on the remnants of American colonialism as seen from the perspective of "alien citizens," such as Puerto Ricans, as well as the emerging field of Latino/a critical theory.

Recently, Román wrote, "Who Exactly is Living La Vida Loca?" and "The Legal and Political Consequences of Ethnic and Racial Stereotyping of Latinos and Latinas in Film and
Other Media,” published in the Iowa Journal of Gender Race and Justice. Scholars have heavily relied on his “Empire World: The United States’ Colonization of Puerto Rico,” considered one of the leading collections of scholarship exploring the intersection of race and law.

MacCormac Student Earning Unusual Credentials

MacCormac College (III) student Armando Rodríguez is on his way to earning a degree in court reporting, a demanding and lucrative career pursued by few men, especially Hispanics.

Rodríguez is an honor student and member of Phi Theta Kappa, the national honor society for two-year colleges. He has won multiple scholarships, including a Coca-Cola scholarship and a scholarship from the Mexican American Chamber of Commerce. He also works as a library assistant at MacCormac.

Upon graduating, Rodríguez will be required to pass a state-licensing exam to become a court reporter, a skilled profession in which demand is greater than the supply.

Masso Addresses Northern Essex Graduates

José Masso, host of the WBUR Boston radio show ¡Con Salsa! and senior director and CEO of the Northeastern University (Mass.) Center for the Study of Sport in Society, presented the commencement address at Northern Essex Community College (Mass.). Masso is the first Latino to be its featured speaker.

A native of Puerto Rico, Masso was raised speaking Spanish and English. He transferred to Antioch College from the University of Puerto Rico in 1970 and began his career three years later as a teacher in the bilingual education program in the Boston Public Schools, becoming involved with cultural activism and neighboring groups. He was Latino liaison for former Massachusetts Gov. Michael Dukakis and is a current member of Boston’s Office of Cultural Affairs Planning and Assessment Advisory Taskforce. He has hosted ¡Con Salsa! a bilingual program with Masso taking calls in both Spanish and English, since 1972.

In addition to his work at the Center, Masso serves on a number of Boston-area boards, among them the Cambridge Multicultural Arts Center, the Cambridge Center for Adult Education, and the Latino After School Initiative Advisory Board for the United Way of Massachusetts.

New York City Technical Recognizes Top Graduates

New York City Technical College recognized two recent graduates who overcame huge obstacles before making their way to City Tech.

Pedro Rojas came to the United States illegally from Ecuador in 1993. He planned to work in New York for a few years, make some money, and move back to Ecuador. Eight years later, Rojas graduated from City Tech with an associate’s degree in telecommunications, a 4.0 GPA, and as class valedictorian.

“T here will always be borders to cross, challenges to face,” said 31-year-old Rojas. “I crossed a physical border to come here, but I also crossed the border of language, of education, and of getting ahead.”

Employed as a waiter/bartender 25 to 30 hours a week the entire time he attended college, Rojas saved enough money to put his seven brothers and sisters through high school in Ecuador, set up a deli for two sisters to run, and sent another sister to college. He plans to go on for his bachelor’s degree at City Tech and pursue a career in research and development in fiber optics or satellite technology.

Sondra A. Miles-Rivera, also a recent graduate, drew strength from adversity, beginning her college career with multiple disadvantages and great hopes.

A junior high school dropout because of frequent hospitalizations due to asthma, she managed to earn a GED while surviving on a series of low-paying, dead-end jobs. She married at 19, had her first child at 20, and her second at 22. She and her husband faced a difficult and protracted struggle—his battle to conquer a substance-abuse problem, which they succeeded in doing, through a combination of faith, hope, and determination. In 1992, she became a nurse technician, and, after seeing a friend battle the AIDS virus, she knew that she wanted to become a registered nurse.

At age 35, Miles-Rivera received her associate’s degree in nursing from City Tech, planning to attend school in New York for her bachelor’s and master’s in nursing. She is president of her nursing senior class and a leader in NUTRIRX (the student nursing club). Her advice to students: never give up.

Central Michigan Offers Entrepreneurial Program for Minorities

Central Michigan University (CMU) invited interested minority students to the Summer Entrepreneurial Institute for Minorities, funded by the Michigan Department of Education. Its purpose is to help university students gain practical information on how to start a business, develop skills for navigating in the business world, and manage personal finance.

“We adopted the program because our research indicates that students involved in such programs achieve at higher levels and tend to persist to graduation at higher rates,” said Ayari Eneli, CMU’s director of minority student services. “The entrepreneurial institute is a pilot program that targets students of color at the undergraduate level.”

The four-week, half-day program gave students a better understanding of how to obtain funding for their business. The program provided participants with information and skills to help them meet the economical needs of their communities. They prepare business plans, which are then critiqued by successful entrepreneurs. The Institute is part of a larger effort by the Minority Students Services office to encourage academic excellence among minority populations.

Bergen Recognizes International and Phi Theta Kappa Graduates

For the first time, the commencement ceremony at Bergen Community College (N.J.) was webcast to 200 viewers around the world. Viewers in Nigeria, Brazil, and Greece were able to celebrate the graduation of friends and family live via the Internet. Bergen graduated students from
several other countries, including Cyprus, Romania, and Vietnam.

During his keynote speech, Randy Subryan, Jr., 1991 Bergen graduate, praised Bergen's Alpha Epsilon Phi chapter of Phi Theta Kappa. The chapter was recently named one of the best in the Middle States region and one of the top 100 chapters in the nation. Its graduates are planning to further their education at schools such as Rutgers University, Yale University, and the Georgia Institute of Technology.

Alpha Epsilon Phi chapter member Ian O'Blensis (pictured) graduated Bergen with an Associate of Arts degree, with a concentration in communications. A member of the political science and history club, he was chosen to attend the Annual Symposium for the Center for the Study of the Presidency in Washington, D.C., and was a commentator at Bergen's First Student History Conference, receiving an Outstanding Leader Award from the club. He is currently interning with The Hispanic Outlook in Higher Education and will pursue a bachelor's in journalism at Rutgers.

**Contemporary Spanish Cinema**

By Barry Jordan and Rikki Morgan-Tamosunas

This book offers an essential analysis of the main trends and issues in Spanish film since the death of Franco in 1975. While taking account of cinema during the Franco dictatorship, it centers principally on developments of the last two decades. The authors concern themselves with the representation of individual, social, and cultural identities, and the ways in which Spanish films reflect and re-imagine these identities.

**Culture and Customs of Cuba**

By William Luis

Cuba continues to loom large in U.S. consciousness and politics. William Luis, of Cuban descent, provides detailed, clear insight into religion, customs, economy, media, performing arts and creative arts, and cinema. Presented in the context of three interrelated periods in Cuban history—the Colonial, the Republic, and Castro's Revolution—this book explores Cuba's dynamic culture.

**Lost Shores, Forgotten Peoples: Spanish Explorations of the Southeast Maya Lowlands**

Lawrence H. Feldman, ed.

Long after the Aztecs and the Incas had become a fading memory, a Maya civilization still thrived in the interior of Central America. This book is the first collection and translation of important 17th-century narratives about Europeans traveling across the great "Ocean Sea" and encountering a people who had maintained an independent existence in the lowlands of Guatemala and Belize.

**The Color of Teaching**

By June A. Gordon

One of the major concerns in education at present is how to recruit and attract more teachers of color to the profession. In an attempt to move beyond the superficial and simplistic responses as to why students of color are not entering teaching, this book presents in-depth interviews with more than 200 persons of color from four ethnic groups: African Americans, Native Americans, Asian Americans, and Latinos in the United States.

**Guaman Poma: Writing and Resistance in Colonial Peru, 2nd ed.**

By Rolena Adorno

Native Andean Felipe Guaman Poma de Ayala, born after the fall of the Incas to Spanish conquest, wrote his Nueva corónica y buen gobierno to inform Philip III of Spain
about the evils of colonialism and the need for governmental and societal reform. Examining Guaman Poma’s verbal and visual engagement with the institutions of Western art and culture, this book argues that Guaman Poma’s work chronicles the emergence of a uniquely Latin American voice, characterized by the articulation of literary art and politics.

The Uses of the University, 5th ed.
By Clark Kerr

This summation on higher education brings the research university into the new century. Leaders of institutions of higher learning can be either hedgehogs or foxes in the new age. Clark Kerr gives five general points of advice on what kinds of attitudes universities should adopt. He then gives a blueprint for action for foxes, suggesting that a few hedgehogs need to be around to protect university autonomy and the public weal.

The Cuban Counterrevolution
By Jesús Arboleya

Cuban historian and former diplomat Jesús Arboleya traces the evolution of the counterrevolutionary movement from its beginnings before 1959 to its transformation into the Cuban-American groups that today dominate U.S. policy toward Cuba. He analyzes the role played by Cuban immigrants to the United States and the perspectives for improvement in relations between the two nations as a result of the generational and social changes that have been occurring in the Cuban-American community. Translated by Rafael Betancourt.

Who Speaks for the President?: The White House Press Secretary from Cleveland to Clinton
By W. Dale Nelson

Former Associated Press journalist and White House reporter W. Dale Nelson provides an insightful look at what has gone on behind the scenes of the White House press podium. He draws on interviews with former press secretaries, press office records, and his own experience as a White House reporter to trace the history of the position, from its early, informal days to its seminal role in the Clinton administration.

Orozco in Gringoland: The Years in New York
By Alejandro Anreus

José Clemente Orozco (1883-1949) was one of the three great Mexican muralists, along with Diego Rivera and David Alfaro Siqueiros, all of whom worked in the United States and had great influence on artists here. Orozco’s New York years (1927-34) represented a crossroads for him as his revolutionary hope gave way to a pessimistic critique of modern society, while at the same time he vastly expanded his artistic vision.

Delirium and Destiny: A Spaniard in Her Twenties
By María Zambrano

The work of the major Spanish philosopher, María Zambrano (1904-1991), is available in English for the first time. An excellent introduction to her life and work, it traces the intellectual formation of a young woman who became one of José Ortega y Gasset’s most distinguished pupils, and it chronicles her redefinition of his philosophical positions. Translated by Carol Maier.

Playwrights of Color
By Meg Swanson and Robin Murray

This book presents a broad spectrum of the ethnic experience in America as represented in theater. Meg Swanson has brought together plays by 15 playwrights of color from among the principal ethnic minority cultures of the United States—plays that dramatize the quest of ethnic minorities for self-identity and respect.

Learning from Cyber-Savvy Students: How Internet-Age Kids Impact Classroom Teaching
By Anne Hird

As the Internet shifts from novelty to common household utility, more and more students are coming to school with Internet experience. How will students’ and teachers’ roles, and schools as institutions, change as these Internet-age kids enter classrooms that are fully equipped with networked computers? This book offers a unique preview of the issues and challenges teachers will face as their classrooms become fully connected to the Internet.

Through the Kaleidoscope: The Experience of Modernity in Latin America
Vivian Schelling, ed.

Modernity in Latin America is defined above all by its multi-layered, kaleidoscopic quality. It is a modernity that has accommodated a piling-
on of new traditions to old, a blending of external cultures with local, and of high cultures with more popular ones. In this volume of original essays, many of the best writers on the region examine the nature and manifestations of a specifically Latin American modernity. Translations by Lorraine Leu.

Many publications featured in this section are available through amazon.com.

SPECIAL EVENTS

September 15–October 15
Weekdays, 4:30 a.m.
CNN

CNN NEWSROOM presents a monthlong series examining the growing Hispanic presence in the US, and the impact on the Hispanic community and the United States at large.

A free classroom guide for teachers is available at http://www.CNNfiy.com/newsroom. For additional information, teachers may also call 1-800-344-6219.

CONFERENCES

Diversity Advisory Council Colloquium
September 14

The Kent State University Diversity Advisory Council presents a one-day colloquium, "A Country of Strangers: Blacks and Whites in America." At KSU in Ashtabula, Ohio.

Contact: Kelly Sanford, (440) 964-4217; e-mail, sanford@ashtabula.kent.edu.

TeleLearning 2001
October 6-9

The International Telecommunications Council and The TeleLEARNING People will sponsor "TeleLearning 2001," "the premier event in distance education and educational telecommunications." At Hilton Hotel Costa Mesa, Costa Mesa, Calif.

Academic Advising Association National Conference
October 11-14

The 25th annual meeting for administrators, academic advisors, and faculty advisors has as its theme "Academic Advising: Discover the Many Voices." Concurrent sessions will address all aspects of advising. At the Ottawa Congress Center, Ottawa, Canada.

Contact: NACADA Executive Office, (785) 532-5717; e-mail, nacada@ksu.edu; website, www.nacada.ksu.edu.

ACE 2001 Conference
October 13-20

"The nation's most important national conference on diversity and improving minority participation in postsecondary education." Sponsored by the American Council on Education's Division of Programs and Analysis, and the Office of Minorities in Higher Education. In Cincinnati, Ohio.

NACME Forum 21, Engineering Policy and Practice
October 25-27

The National Action Council for Minorities in Engineering holds its 21st annual conference for those committed to increasing diversity in the workforce. A dynamic group of speakers will challenge attendees to examine the impacts of their organizational policies and what, if anything, can or needs to be done to change them. In Baltimore, Md.

Contact: Dundee Holt, (212) 279-2626, ext. 214; e-mail, dholt@nacme.org; website, www.nacme.org.

College Board National Forum 2001
October 26-30

This year's College Board National Forum has as its theme "Measuring Success," looking at the measures of "success for yourself, your school, your students." At The Adam's Mark Hotel in Denver, Colo.

Contact: (212) 713-8050; website, www.collegeboard.com.

HACU—15th Annual Conference, in Puerto Rico
October 27-30

The Hispanic Association of Colleges and Universities presents its 15th annual conference, this year on the theme "Excellence Through Diversity: Celebrating Our Past and Reshaping Our Future." In San Juan, Puerto Rico.

Contact: (210) 576-3218; website, www.hacu.org.

WCET 13th Annual e-Learning Conference
October 31–November 3

The Western Cooperative for Educational Telecommunications holds its 13th annual conference, "eRevolution@edu: New Policies, Practices, and Services." This event draws leaders from higher education institutions, government agencies, corporations, and nonprofit organizations involved in distance learning. In Coeur d'Alene, Idaho.

FIU Conference on Spanish and Latin American Literature
November 8-10

The Department of Modern Languages at Florida International University will hold the conference "Spanish and Latin American Literature: New Trends for a New Millennium." At FIU in Miami, Fla.

Contact: Ricardo Castells, (305) 348-2130; e-mail, castells@fiu.edu.

TACHE 2001 Conference
December 2-4

The Texas Association of Chicanos in Higher Education advocates for an increase in the number of Chicano/Latino faculty, staff, and administrators in Texas colleges and universities. This conference will serve as a venue for discussing the issue of underrepresentation and exploring ways of rectifying the disparity. At the OMNI Hotel Downtown Austin, Texas.

Book Reviews

By Isabel Schon

Controversy and Alienation: Recent Books about the United States and Latinos

From the rationalizations of the Monroe Doctrine, to the Mexican experience in the U.S., to the insights of a poet and a novelist, to controversial issues between the U.S. and Mexico, these recently published books provide at times serious, at others tragic perspectives of Latinos in the U.S.

Well-organized and most readable, this guide provides a synthesis of the major themes in the history of U.S. involvement in Latin America and the Caribbean since the independence of the Latin American nations. Through timelines, editorial cartoons, and 26 country-chapters, the author, a professor of political science, describes the role of the U.S. in Latin America and critically analyzes its faulty assumptions and destructive rationalizations. Readers interested in understanding U.S. intervention, military occupation, policy blunders, and other important effects of the Monroe Doctrine will find this an invaluable reference work. Selected readings at the end of each chapter, a glossary, and an index will further assist serious researchers.

In a lively and somewhat provocative narrative, González, a professor of history at Diablo Valley College, provides a synthesis of the Mexican experience in the U.S. His purpose is to offer "a concise and balanced account" by describing "our triumphs as well as our trials and tribulations." The author should be commended for trying to achieve objectivity in such highly politicized areas as "indígenismo" vs. "la leyenda negra," the role of women in colonial New Mexico, Mexicans during the Texas revolt, life in Mexico vs. racial prejudice and discrimination in the U.S., Mexican poverty and the Catholic Church, and effects of the "endless influx" of Mexican immigrants. This is a thoughtful survey of important and controversial events.

With flair and insight, Harrigan recreates the story of the Alamo through tragic characters, real and fictional, and provides a sense of the powerful drama and loss that resulted in the Mexican-American War. From well-known historical figures such as James Bowie, Stephen Austin, Santa Anna, and Sam Houston to five captivating fictional characters, this engaging novel provides a sensitive view of the people and conflict in 19th-century Texas. Some readers will be discouraged by a 581-page narrative, but the strong emotions that Santa Anna still elicits on both sides of the Rio Grande make this an historical tour de force. Especially when, due to Santa Anna's "overconfidence and inattention, the army was overrun, he had abandoned it; and, out of his own trembling fear for his life, he had sold Texas—the land that so many Mexican soldados had shed their blood to rescue—to the norteamericano pirates."

Incorporating the angst and vernacular of California migrant workers, poet Juan Felipe Herrera depicts the alienation of 16-year-old César García as he struggles through painful experiences at home and at school. From the ridicule and abuse of his classmates ("They are laughing at you chavala, can you hear them? They are saying you are a mojado, a sissy mojado."); to his experiences with gang members and drugs, this series of free-verse poems describes the difficulties of young people who have been abandoned by their fathers and misunderstood by the educational system. This is not a quixotic novel in verse about growing up Latino in the U.S.; rather, it is a passionate exposure of the realities of Latino youth that explodes with rage and culminates with hope.

More than 200 scholars from the U.S., the US, and other countries contributed 600 articles to produce this one-volume encyclopedia highlighting the important events—from 1821 to 1894—that resulted in the Mexican War, the Treaty of Guadalupe Hidalgo, and U.S. expansionism. Designed as a concise, first source for generations of future scholars, the editors aimed for an inclusive and balanced perspective on issues sensitive on both sides of the U.S.-Mexico border, such as Claims and Damages, Camp Followers, Legacy of the War, James K. Polk, and Antonio López de Santa Anna. Especially noteworthy are the more than 50 black-and-white line-drawn maps and the many illustrations taken from daguerreotypes of the 1840s. Also useful are the informative appendices and exhaustive index.

Dr. Isabel Schon directs the Barabona Center for the Study of Books in Spanish for Children and Adolescents at California State University-San Marcos.
By Mark Saad Saka

In a powerful and passionate collection of more than 60 short stories, poems, speeches, and articles, George Mariscal has compiled the first anthology of Mexican-American writings about the U.S. war in Vietnam. Chicano/a experiences are largely omitted from Vietnam narratives, and yet Mexican-Americans fought in the war in disproportionate numbers. Chicanos represented less than 10 percent of the American population and more than 20 percent of its casualties. Puerto Rico ranked 26th in population among the U.S. states, 14th in casualties, and 4th in combat deaths. Chicanos also played a major role in the anti-war effort, again, a role largely neglected by the historical literature, which over-emphasizes middle-class Anglo efforts and upheavals on college campuses. The L.A. Police Department's brutal repression of the Moratorium riots and the assassination of Chicano journalist and activist Rubén Salazar barely made headlines in East Coast newspapers. Mariscal's work fills an important historiographical void by noting the role that Chicanos played and its impact on the radicalization of political and social consciousness among Chicano youth.

This summer, I used Mariscal's anthology in my Chicano history course and found it touched many students, most of whom were born after the 1980 election of Ronald Reagan. For many students today, the Gulf War of 1991 provides the only memory of war: short lived, few casualties, seen through television as if a video game. Yet, the Vietnam War formed the intersection of social movements in the 1960s and is an important component of the radicalization of Mexican-American and African American liberation movements.

Mariscal's anthology provides an essential introduction and background to the Chicano experience during the Vietnam War, including information on the little known Project 100,000, which the Johnson administration enacted in 1966 to increase minority recruitment. It eliminated language and education requirements for the draft, allowing the Pentagon to target Mexican American and Puerto Rican youth for meeting wartime manpower needs. Mariscal reveals the hypocrisy of Johnson's War on Poverty, pointing out that he bought off the White middle class with college deferments and then placed the burden of the war on the backs and blood of poor Whites, African Americans, and Latinos.

The anthology's first section covers the war in Southeast Asia; the second, the war at home. Many of the articles, essays, poems, and speeches question profound assumptions of American society, including White supremacy, Cold War mythology, and traditional forms of masculinity. Several essays reveal what Mariscal calls "warrior patriotism," a trait deeply rooted in Mexican culture that, when fused with U.S. imperialism, forms a deadly mixture. Many of the Chicano males in my class identified with these cultural and family pressures asserting that not to serve would be "unmanly" and bring dishonor to your family.

A major strength of the book is Mariscal's presentation and interpretation of the various individual narratives as a collective experience, a "structure of experience." This allows the reader to conceptualize what could have simply been a series of individual experiences into a macro-narrative of the Chicano experience. What came through in a number of essays was how the war transformed many Chicano soldiers, who came to recognize their own class and ethnic identities and oppression by realizing common ground with the Vietnamese peasants, both as a colonized people and as a force for liberation and change. The anthology demonstrates the soldiers' transformation through their collective awakening to the lunacy of the Cold War and anti-Communist rhetoric, which they quickly understood to be nothing more than a smokescreen for U.S. imperial ambitions. This collective consciousness ran parallel both in Southeast Asia and in the U.S.

Mariscal provides historical narratives of the role the war played among Chicano activists and intellectuals at home and a solid interpretation of the Chicano anti-war movement in the American Southwest. He demonstrates how a radicalized younger generation clashed with those older Mexican-Americans, many of whom had fought with distinction and bravery in World War II and had formed such noble organizations as the G.I. Forum.

Another recurring theme was the deep-rooted sense of racism many Chicano G.I.s experienced in their Anglo superiors and subordinates, a collective jolt to their evolving ethnic consciousness. A Chicano ex-Marine in my class commented that that was a recurring theme in his own military experience. Given that African Americans and Latinos are vastly overrepresented in the armed forces and in our prison population today, we must seriously examine the racial structural order that has produced such injustices.

A quote that all of my students enjoyed came from the anthology's essay by Barbara Renaud González: "But from Oliver Stone you would think that all of our boys looked like Tom Cruise. No, they were my brothers, uncles, cousins, my heroes."

Dr. Saka, a Fulbright scholar, completed his Ph.D. at the University of Houston in 1995. A Mexican specialist, his interests include peasant social movement and agrarian unrest. An American of Arab ancestry, he has taught in the Department of History at Sul Ross State University, Alpine, Texas, since 1995.

The University of Georgia
The University of Georgia invites applications and nominations for the position of Associate Dean for Extension. The individual should have the ability to administer, manage, and promote statewide extension programs, organizational development, possess programmatic vision, leadership skills and the ability to motivate employees, have a demonstrated ability to work with external organizations, and have a sensitivity to agriculture, forest resources, families, youth and environmental issues in an increasingly urbanized society.

Minimum requirements include: an earned doctorate degree; must qualify for the rank of professor in a department appropriate for the purview of extension programs; and should have either extension experience and a working knowledge of the county delivery system or demonstrate a thorough understanding of development and implementation of successful extension programming.

Nominations are encouraged. Applications received by October 15, 2001 are assured of consideration. Applications must include a resume; two concise statements, one on administrative philosophy and the other on extension philosophy; and names, addresses, e-mail addresses, and phone numbers of five references. Applicants should request letters of reference from the four individuals listed in the application packet; references should send letters directly to the address below. Nominations and applications should also be sent to:

Dr. Doug Bailey, Department Head Department of Horticulture University of Georgia 1111 Plant Science Building Athens, GA 30602-7273 dbailey@uga.edu

For a complete list of duties and qualifications, go to http://www.archer.uga.edu/~dbailey/posreclev.html or call 706.542.0789

Northern Virginia Community College
DIVISION CHAIR, BUSINESS TECHNOLOGIES #FA215-HO
Alexandria Campus, $54,983-$57,601 + benefits. Effective January 2, 2002. Twelve-month administrative faculty position. Manages the division, instructional disciplines and programs in accounting, acquisitions and procurements, administrative support technologies, business administration, business management, marketing and information systems technologies. Supervises and evaluates 25 full-time and approximately 80 adjunct faculty and seven support staff in a vibrant, complex and student-centered environment within a diverse student body. Responsible for planning and executing the course schedules for 3-semesters per year for approximately 2750 FTES annually. Required: Specialist degree or equivalent (24 GSH beyond the master’s degree). Two years of teaching or closely related occupational experience. Download application at jobs.state.va.us/aeo-lta.htm, or obtain one in person in the HR office or any campus business office.

EEO/AA
Kenyon College announces three joint tenure-track positions in Classics and IPHS; History and IPHS; and Political Science and IPHS. The Integrated Program in The Humane Studies (IPHS) also seeks to fill a tenure-track position.

Classics-IPHS: This tenure-track position carries an initial appointment of three years, beginning July 1, 2002. The primary research interest should be Ancient Greek and/or Roman History, and the successful applicant will be competent to teach Greek and Latin languages at all levels. Through 2006, the position will entail teaching half-time in Classics and half-time in IPHS' Odyssey of the West course. This is a wide-ranging, textually oriented course involving works and authors ranging from classical antiquity (e.g., Plato, Aristotle) through the modern period (e.g., Hobbes, Nietzsche, Mary Shelley). After 2006, the position will be full-time in Classics. Interest in such related fields as mythology, archaeology, religion, philosophy, gender studies, or another specialty would be welcome. Applicants should hold the Ph.D. by June 2003 and be able to document effectiveness as a teacher. The teaching load is 3/2.

Send to: Professor Robert Bennett, Chair of Search Committee, Department of Classics, Kenyon College, Gambier, Ohio 43022 (E-mail: BENNETR@kenyon.edu; department homepage: http://www2.kenyon.edu/depts/classics/classphg.htm) the following: (1) letter of application, including teaching approaches and interests and research interests; (2) a list of graduate courses completed; (3) CV; and (4) three letters of reference. Review of applications will begin October 15 and continue until the position is filled. Interviews will be conducted at the APA annual meeting in Philadelphia, January 3-6, 2002.

History-IPHS: For this tenure-track position, we are looking for an historian of ideas. It will involve teaching in IPHS' year-long Odyssey of the West course with works and authors ranging from classical Greece and Rome (e.g., The Iliad, Symposium and Virgil) through the Middle Ages and up to the early 20th century (e.g., Lenin, Nietzsche, Keynes, and William James). It will also involve teaching two courses (one each semester) in the History Department. The minimum academic qualification is a Ph.D. with at least some teaching experience. Interviews with selected candidates will be conducted at the AHA Annual Meeting.

To apply, send a letter of application, dossier, three letters of reference to: Michael Evans, Director, IPHS, Kenyon College, Gambier, Ohio 43022. Review of applications will begin November 1, 2001 and continue until the position is filled.

IPHS (The Integrated Program in The Humane Studies): IPHS is an interdisciplinary program that seeks candidates who are well-grounded in Western thought and culture from its origins in the ancient Near East and Greece. The position involves teaching in IPHS' year-long Odyssey of the West, a wide-ranging, textually oriented course with works and authors ranging from antiquity through the Middle Ages and up to the early 20th century (see description for the History-IPHS position). It will also involve teaching two upper-level seminars (one each semester). To enhance the already interdisciplinary character of the program, we seek candidates with a strong background in art history, the history of philosophy, or comparative literature. The minimum academic qualification is a Ph.D. with teaching experience.

To apply, send a letter of application, dossier, and three letters of reference to: Michael Evans, Director, IPHS, Kenyon College, Gambier, Ohio 43022. Review of applications will begin October 15 and continue until the position is filled.

Political Science-IPHS: This joint position involves teaching a year-long course in IPHS, a broad-based textually oriented program from Classical Greece to the early 20th century. The Political Science component of this position is in political philosophy, including teaching courses on specific authors (e.g., Locke, Nietzsche; Auden); selected topics (e.g., community, post-modern political thought, liberalism); or politics and literature (e.g., Shakespeare's politics or liberty and community in American literature). A Ph.D. and teaching experience required. The College teaching load is 3/2. The successful candidate should have a strong background in research interest in and proven excellence in teaching first-year students.

To apply, send a letter of application, CV, three letters of reference, and a sample of published or other professional work to: Professor Kirk Emmert, Political Science Department, Kenyon College, Gambier, Ohio 43022. Applications must be received by October 15, 2001.

An equal opportunity employer, Kenyon is committed to building a culturally diverse community and encourages the applications of women and minority candidates.

Must be postmarked no later than September 17, 2001

EOE/AAM/F
TENPEL UNIVERSITY

Vice President for Student Affairs

Temple University invites applications and nominations for the position of Vice President for Student Affairs. As one of the nation’s most prominent centers for higher education, Temple University has a world-class reputation and an international presence. Founded in 1882 by Dr. Russell H. Conwell, the University was established on the premise that those who have the imagination to dream and the desire to work should also have the opportunity to make their dreams come true. Under the leadership of its eighth President, Dr. David Adamany, Temple is moving confidently to become one of America’s premier senior, comprehensive research universities. With the construction of new residence halls, classroom space and a state-of-the-art student activities center, the campus is in the midst of the most significant expansion project in its history. Located in the culturally rich community of Philadelphia, PA, Temple has more than 30,000 full-time and part-time students from all 50 states and more than 100 countries. A member of the Commonwealth System of Higher Education since 1985, the University has more than 1,700 full-time faculty and more than 210,000 living alumni. It offers bachelor’s degrees in 121 areas, master’s degrees in 115 fields, and doctoral degrees in over 50 areas.

The Vice President for Student Affairs provides vision, leadership, and strong strategic direction to the Division of Student Affairs, which includes a wide array of departments including University Housing; Student Activities; the Student Assistance Center; Student Health Services; Career Development Services; Counseling Services; the Office of International Services; Disability Resources and Services; Recreation Services and the Russell Conwell Educational Services Center, which provides academic counseling, supplemental tutoring, workshops, Summer Programs, and special academic enrichment programs to help students enter college and/or graduate school and continue on for their degrees.

The Division of Student Affairs fosters a vibrant and stimulating community for students through support of the organizations, activities, and events that contribute to the cultural, intellectual, and recreational life of the campus and through the provision of services that promote and enable student well-being and success. In addition to overseeing services that support students, the Vice President is responsible for exercising a visible presence in the resolution of conflict, managing the business affairs of the Division, developing a strong student affairs team, and weaving a fabric of connections within the Division, with the rest of the campus, and with the University’s many constituencies. The Vice President reports to the President of the University and serves as a member of the University’s group of Executive Officers.

Requirements for the position include: demonstrated leadership skills with a record of outstanding achievement as a senior member of a leadership team at a university with a highly regarded student affairs program; commitment to the education, development, and empowerment of all students; excellent personal and financial management skills; and appreciation for working within and contributing to a highly collaborative community that values consensus. An advanced degree in a relevant discipline is required (doctorate preferred). Candidates must demonstrate a current understanding of student issues, of the broader network of familial and social contexts in which students develop, and of the legal issues affecting students and the management of student affairs programs. In addition, strong candidates will be well versed in the strengths and weaknesses of the various organizational and business models current among premier research universities for delivering student programs and services.

Nominations, or a letter of application accompanied by a curriculum vitae and a list of references, should be sent to:

Gerard F. Cattia, Jr., Managing Director
The Diversified Search Companies
One Commerce Square, 2005 Market Street, Suite 3300

DEAN
Columbian College of Arts and Sciences

Applications and nominations are invited for the position of Dean of the Columbian College of Arts and Sciences. The Dean is the educational leader and chief administrator for undergraduate and graduate programs in the arts, humanities, social sciences, and biomedical, physical, and mathematical sciences.

Founded in 1821, The George Washington University is located in the heart of the nation’s capital just blocks from the White House, Kennedy Center, prominent national monuments and museums, and government agencies. In addition to the Foggy Bottom campus, there are GW campuses in northwest DC and northern Virginia. There are approximately 20,500 full- and part-time students, roughly equally divided between undergraduate and graduate programs. These students represent all 50 states and more than 100 foreign countries. The full-time faculty numbers 1,400. The George Washington University is a member of the Association of Research Libraries and is classified by the Carnegie Foundation for the Advancement of Teaching as a doctoral/research university - extensive.

With a full-time faculty of 397 and nearly 6,683 students, the Columbian College of Arts and Sciences is the largest academic unit in a comprehensive, dynamic research university.

The University seeks applicants with the vision, energy, and skills to build on our tradition of academic excellence. The person selected must be able to enhance the unique advantages afforded by GW for the continuing development of education and research programs responsible to the needs of the area, the nation and the world.

Applicants must have a distinguished record of scholarship and teaching that warrants senior appointment in a department or program within arts and sciences. Competitive applicants will have a record of substantial leadership and administrative experience in an institution with undergraduate and graduate programs, although they might currently hold positions in research, educational, cultural, or artistic institutions. Fund-raising experience is highly desirable.

Review of applications and nominations will commence October 15, 2001, and will continue until the position is filled. The preferred start date is July 1, 2002. Salary will be commensurate with experience and qualifications.

Nominations or applications with resume and a brief statement of interest should be sent to:

Columbian College Dean Search Committee
Attention: Sara Booths
Rice Hall, Room 613
The George Washington University
Washington, DC 20052

The George Washington University is an equal opportunity affirmative action employer. The University especially encourages applications from minority and women candidates.
The Division of Student Affairs at Virginia Commonwealth University invites applications and nominations for the position of Dean of Student Affairs.

The Dean of Student Affairs reports directly to the Vice Provost for Student Affairs and serves as the officer in charge of the Division of Student Affairs in the absence of the Vice Provost. The Dean serves as a resource for students, parents, and members of the faculty and staff who have issues with their interactions with each other or with the university.

Responsibilities

Supervision. The Dean of Student Affairs is responsible for oversight of the following programs and services: Housing and Residence Education, Recreational Sports (both of which maintain two-campus operations), and the University Student Commons & Activities. Also supervised by the Dean are the Communications Coordinator for the Division, the Director of First Year Student Services, and the Student Media Director.

Administration. The Dean is responsible, in consultation with the staff, for the development of annual goals for each department; development and administration of the departmental budgets; selection of staff; provision and maintenance of facilities and technology consistent with departmental missions; preparation of an annual report of the activities and accomplishments of the departments in the Division; and, in consultation on university-wide and divisional committees. The Dean serves as the administrator for the Academic Campus Honor Council, participates in orientation and training activities, and facilitates communication and collaboration between departments.

Leadership. The Dean must prescribe and practice ethical behavior; communicate effectively with all constituencies and continuously monitor and improve program offerings in response to changing needs of the students and the institution. The Dean assists with advising the student government and its committees, interprets university policies and procedures, and assists with the planning or renovation of facilities in the Division.

Campus and Community Relations. The Dean is responsible for being knowledgeable about campus referral sources and serving as an ombudsman to students and members of the faculty and staff who seek consultations. The Dean will have contact with community retailers and residents who may express concerns regarding student behavior. In this regard, the Dean is responsible for handling inquiries and complaints on a daily basis.

Qualifications

The successful applicant will possess the following required qualifications:

- An earned doctorate in higher education or related field; a minimum of ten years of broad and progressively responsible student affairs administrative experience and demonstrated ability to lead and organize diverse units within the division which includes supervision of professional staff and oversight of at least three departments or programs; evidence of professional involvement; evidence of ability to work collaboratively with administrators, faculty, and students; evidence of excellent verbal and written communication and interpersonal skills; provision of consultation/leadership in policy formation and program development; demonstrated knowledge of legal and current issues and responsibilities in student affairs and higher education; evidence of appreciating diversity that encourages inclusion and participation by all; and evidence of an understanding of and adherence to the highest principles of ethical behavior.

Salary

The salary for the Dean of Student Affairs is competitive and will reflect the experience of the successful candidate.

Application Process

Application review will begin on October 1, 2001 and the position will remain open until filled. Applications must include a letter of intent, resume, and statement summarizing current issues in student affairs; and, names, addresses, and telephone numbers of at least three references. Submit to:

Ms. Carmen H. Bell
Division of Student Affairs
Virginia Commonwealth University
PO Box 843017
Richmond, VA 23284-3017
cbell@vcu.edu

For additional information about Virginia Commonwealth University, visit our Web site at www.vcu.edu.

Virginia Commonwealth University is an equal employment/affirmative action employer. Women, minorities, and persons with disabilities are encouraged to apply.
PRESIDENT

The Trustees of Trinity College invite nominations and expressions of interest for the position of President of Trinity College with an anticipated appointment date of July 1, 2002. Trinity College, founded in 1823, is located on an architecturally distinctive campus in the heart of the capital city of Hartford, Connecticut. It is a prestigious, co-educational, residential, non-denominational institution of higher learning. The College has distinguished itself increasingly by uniquely combining a strong classical, liberal arts tradition with an urban mission and experience for its 1900 undergraduate students. It recently has gained national recognition for its efforts in a variety of collaborative neighborhood improvement initiatives.

The following characteristics and credentials are required of the new President who must be innovative and able to build upon a strong record of accomplishment:

- Evidence of successful leadership roles in educational and civic enterprises.
- Willingness to serve as a key player within the Hartford community, and to be effective in protecting the interests of Trinity College in relevant local, state and government legislative affairs.
- Familiarity with and concern about urban issues and those pertaining to diversity.
- Ability to form strategic community partnerships.
- Strong commitment to academic excellence and the liberal arts.
- Demonstrated administrative and fiscal management skills and in the areas of faculty, staff and student recruitment and development.
- Experience in institutional planning and fund raising.

Inquiries, along with applications and recommendations, (which will be accepted by the Search Committee of the Board of Trustees until an appointment is made), may be directed to:

Barbara R. Stevens, Isaacson, Miller
1275 K Street NW, Suite 1025, Washington, DC 20005
Phone: (202) 682-0164, Fax: (202) 682-9335
E-mail: bstevens@imssearch.com

Trinity College is an equal opportunity, affirmative action employer, which actively seeks and encourages nominations, applications and expressions of interest from women and members of under-represented populations.

Bridgewater State College
The Board of Trustees of Bridgewater State College seeks nominations and applications for the position of President. The next president will succeed Dr. Adrian Tinsley, the 10th president of the college, who has provided 13 years of exemplary leadership.

Founded in 1840, Bridgewater State College is among America’s oldest public colleges and part of the nine state college system. It has grown into a regional, comprehensive, multi-purpose institution with programs in the liberal arts and sciences and professional studies. It enrolls more than 8,000 full-time and part-time students pursuing bachelor’s and advanced degrees in more than 190 academic areas.

Located midway between Boston and Cape Cod, Bridgewater’s 235-acre campus offers a traditional New England appearance and easy access to the major intellectual, cultural, and recreational resources of both Boston and Providence and the popular resort areas of Cape Cod, New Hampshire, and Maine.

Candidates and nominators are encouraged to respond promptly as screening will begin immediately, with the expectation of finishing the process before January. The eleventh president of Bridgewater State College will assume responsibilities on July 1, 2002. Nominations, inquiries, and expressions of interest should be forwarded, in confidence, to: Chair, Presidential Search Committee, P.O. Box 426, Bridgewater, MA 02325.

Bridgewater State College is being assisted in this search by Dr. Jamie Ferrera of Academic Search Consulting Service, 202-363-7472 or jff@academic-search.org. Applicants are encouraged to visit the Bridgewater State College website at: www.bridgew.edu

Bridgewater State College is an equal opportunity employer.

  Specialization: Marketing Strategy and/or Marketing Information
  Michael McCarty, 210 Upham Hall, Miami University, Oxford, Ohio 45056

Applicants must hold a Ph.D. or equivalent, or J.D. for Business Legal Studies, or be an A.B.D. with expectation of completion by December 31, 2002. Candidates must demonstrate promise of excellence in teaching, and the potential for a high level of scholarly productivity. Applicants should send a letter of application, vita, and a list of at least three references to the departmental contact listed above. Review of applications is in progress and will continue until the positions are filled.

Miami University does not discriminate on the basis of gender, race, color, religion, national origin, handicap, or age in its programs, activities, admissions, or employment policies. We especially encourage applications from minorities, women and persons with disabilities.

ASSISTANT VICE CHANCELLOR
FOR PUBLIC RELATIONS

The State University of New York Office of Public Relations, located in Albany, New York, seeks an Assistant Vice Chancellor. This person will be a key figure in the production and coordination of materials from the office, and will help run a multi-faceted operation that involves media relations, marketing, public relations, internal communications, and electronic communications.

Responsibilities: Individual will play a central role in the operation of the Office of Public Relations; will take an active, hands-on role in the researching, writing and editing of press releases, news and feature articles, and other materials within the responsibility of the office; will manage media inquiries and help coordinate accurate and timely informational responses that position the university appropriately; will coordinate the efforts of various units and staff within the office and throughout system administration; will provide leadership and guidance to staff; will oversee the office in the absence of the associate vice chancellor; will provide leadership in helping to achieve the public relations goals of the State University; will ensure the implementation and continuity of strategic initiatives, will interact with all officials within the State University Plaza and throughout the SUNY system; will be a key contact point between the university and associated state agencies and offices.

Qualifications: Extensive experience writing and editing and a demonstrated ability to produce high-quality results under deadline pressures; extensive experience in issues management and staff coordination; extensive experience dealing with top echelons of a complex organization and in dealing with the media; a high level of comfort working within a complex organization and 7-10 years of related professional experience; excellent writing and editing skills; bachelor's degree and experience in academic environment preferred.

Salary: Commensurate with experience and qualifications.

Excellent fringe benefits.

Send letter of interest and resume to Search Chair, Office of Public Relations,
Room T9, State University Plaza, Albany, NY 12246. Review of resumes will begin immediately and continue until position is filled.

The State University of New York is an EEO/AA employer; applications from women, minority persons, disabled workers and/or Vietnam Era Veterans are especially welcome.
FULL-TIME COUNSELOR/PSYCHOLOGIST

The Counseling & Psychological Services Center is seeking a dynamic individual who is committed to a time-limited model of therapeutic intervention and a developmental philosophy of counseling which includes programmatic outreach activities. The successful candidate is expected to interface with residence life, student health services, international affairs and programs, and multicultural programs.

Plattsburgh State University of New York is a comprehensive, coeducational, public institution of nearly 6,000 undergraduate and graduate students. Located on the shore of Lake Champlain, the College is the intellectual and educational center for the Lake Champlain/Adirondack region of New York State. The small city character of Plattsburgh and neighboring Burlington, VT provides a quality of life unsurpassed for the whole family. Outdoor activities abound along Lake Champlain, in the Adirondack High Peaks and nearby Olympic resort village of Lake Placid while the urban, multicultural lifestyle is rich in neighboring Montreal, Canada, one hour's drive from campus. Plattsburgh is easily accessible to New York City and Boston via air, bus, train and Interstate 87.

Responsibilities include individual and group counseling. Experience working in a college counseling center with outreach activities and individual and group counseling is preferred. Preferred Qualifications: Ph.D. in Counseling Psychology or Clinical Psychology. Minimum Qualifications: Master's Degree in Counseling Psychology, Clinical Psychology, or M.S.W. with at least two (2) years of clinical experience.

This is a renewable ten month appointment (August through June) with an expected start date on or about October 1, 2001. Salary: $33,390-4000 commensurate with experience, excellent benefits.

Review of applications begins immediately and continues until position is filled. Please send letter detailing interest and pertinent experience, resume or curriculum vita and three current letters of reference with telephone numbers to: Chair, Search Committee (P) # 2664-800, 300; Human Resources, Plattsburgh State University of New York, 101 Broad Street, Plattsburgh, NY 12901-2681.

DIRECTOR OF PURCHASING

New Jersey City University is a culturally diverse, public, urban institution with an Undergraduate and Graduate enrollment of 10,000 students. The University invites applications for the position of Director of Purchasing.

The Director is responsible for all purchasing services for the University, and is an important part of the University Finance Department. The Director will also be responsible for leading the E-procurement strategy. Candidates must possess a Bachelor's Degree and at least five (5) years experience in purchasing with a minimum of three (3) years in supervision. Experience in higher education or state government is preferred. Must be able to plan, organize and problem solve for a "hands on" department and develop strategies/procedures to reduce costs and improve operations. Prior experience in writing and administering RFPs is desired.

For consideration, please forward a resume, with salary requirements, to:

Robert Plaskowsky, Search Committee Chair
NEW JERSEY CITY UNIVERSITY
Hopburn Hall, Room 105, 2039 Kennedy Blvd.
Jersey City, New Jersey 07305

Equal Opportunity Employer.

Ithaca College invites applications for the position of Director of the newly created Center for the Study of Culture, Race, and Ethnicity. The Center, formed in the spring of 1999, is interdisciplinary in nature and has a steering committee with faculty representation from the five schools of the College. The Center reports to the Office of the Provost and has a campuses-wide charge that enhances curriculum development, faculty development, and co-curricular and public events.

The vision of the Center includes the creation of programs (including courses, workshops and events) which challenge the role of race and ethnicity at Ithaca College. We seek to encourage students to think about identity formation as a process that occurs in the context of cultural and historical encounters between groups of people. The initial focus of the Center includes the development of African American, Latino, Asian American and Native American Studies.

Required qualifications: earned doctorate, demonstrated commitment to teaching and a strong record of scholarly publication. In addition, the individual should possess excellent interpersonal, writing and organizational skills and have a commitment to multicultural and interdisciplinary studies. Academic administrative experience in a college or university setting as well as successful grant writing experience is expected. Candidates should demonstrate the ability to promote the goals of the Center through the organization and implementation of outreach activities and public events. The Director is expected to teach at least 2 courses each year, preferably in the area of Latin American and African American Studies. The position is tenure-eligible; rank is dependent upon qualifications and experience.

Please submit a letter of interest, resume and three letters of reference to Dr. Asma Bari, Chair, Steering Committee, Center for the Study of Culture, Race, and Ethnicity, 307 Job Hall, Ithaca, New York 14850-7012. Review of applications will begin immediately and will continue until the position is filled.

Ithaca College is an Equal Opportunity/Affirmative Action Employer. Members of historically underrepresented groups are encouraged to apply.
YORK COLLEGE
City University of New York

VICE PRESIDENT FOR ADMINISTRATIVE AFFAIRS

York College invites applications and nominations for the position of Vice President for Administrative Affairs. Reporting to the President and as the College’s chief financial officer, the successful candidate will provide leadership and vision in the areas of financial development and management, including budgeting, accounts payable and receivable, human resources, and purchasing. The candidate will serve as the College’s tax-exempt, college accounting, and Auxiliary Enterprise accounts; fiscal strategic planning; information technology; faculty and staff relations; and administrative operations of the College, including security and building and grounds. In addition, the Vice President is responsible for the maintenance, operations, and upkeep of the College’s eight buildings situated on its 50-acre campus. The Vice President will be expected to represent the President and the College, as appropriate, within the College’s internal and external communities.

Founded in 1966, York College is one of the senior colleges of the City University of New York, the nation’s largest publicly-supported urban university. The College occupies facilities on a $170 million 50-acre campus in southeast Queens and is accessible by public transportation. Today, York College has a full-time faculty of 160, enroll over 5,800 students, and is supported by an annual budget of $28.7 million. Conforming baccalaureate degrees in over 30 majors, the College was reaccredited, without conditions, by the Middle States Association of Colleges and Schools in 1998.

QUALIFICATIONS: The successful candidate will have a master’s degree in a related field (an advanced degree is strongly preferred) and over five years of senior executive level financial and facilities management experience in an academic or comparable institution. Additional qualifications include proven ability to supervise, direct, and lead personnel; familiarity with working within a multi-campus system; demonstrated excellent human relations, communications, and creative problem-solving skills; familiarity with university governance; and evidence of commitment to affirmative action and cultural diversity.

SALARY: Competitive. Experience and salary history.

TO APPLY: Applications should include a cover letter highlighting experience and accomplishments; a current vita; and the names, addresses, and telephone numbers of five references. References will be contacted only in the advanced stages of review.

Applications received before April 15, 2002 will be considered. Applications received after that date will not be considered. Applications should be submitted to:

Department of Foreign Languages
Assistant Professor of Spanish
Fall 2002

HISPANIC OUTLOOK
ASSOCIATE PROVOST FOR CAMPUS LIAISON
(DOCTORAL-GRANTING INSTITUTIONS)

The State University of New York, the nation's largest system of public higher education, invites nominations and applications for the position of Associate Provost for Campus Liaison (Doctoral-Granting Institutions). This position is based in Albany, New York at the University’s System Administration office.

The Associate Provost will have primary responsibility for enhancing communication and programmatic coordination between System Administration and the University's 10 doctoral-granting institutions (University Centers at Albany, Binghamton, Buffalo and Stony Brook; Health Science Centers at Brooklyn and Syracuse; The College of Environmental Sciences and Forestry; the School of Optometry; and statutory colleges operated in partnership with Cornell and Alfred Universities).

He or she will work closely with these institutions’ leadership to enhance the quality, viability, and strength of their units. This will require a thorough understanding of the academic, financial, and political environment in which these doctoral-granting institutions operate.

The Associate Provost will be actively involved in System-wide academic strategic planning and other programs and initiatives intended to enhance academic quality across the University. Current efforts include helping campuses meet the goals they established for themselves in a System-wide academic strategic planning process; developing thoughtful means of assessing student learning outcomes; highlighting the importance of faculty research and doctoral-level education; seeking to provide increased support for faculty scholarship and Ph.D. stipends; and the development of more sophisticated institutional performance measures. The Associate Provost will also assist other staff in conducting program reviews.

This position will involve frequent travel to campuses. In addition to regular liaison responsibilities, the Associate Provost will also represent the Office of the Provost in a variety of contexts (e.g., acting as the System Administration representative on University-wide committees). He/she will be particularly involved in efforts to raise the university’s research profile.

The Associate Provost will be part of the Campus Liaison Group within the Office of Academic Affairs. He/she will report to the Vice Provost for Academic Affairs.

Qualifications and Background

The successful candidate must have:
- A terminal degree in his/her discipline.
- A strong record of accomplishment in teaching, scholarship, and academic administration.
- Deep familiarity with the culture of a research university and the challenges of performing (and funding) research, ideally acquired in part through conducting his/her own scholarship.

The successful candidate should also have:
- Broad familiarity with:
  - National issues in higher education
  - Public higher education in New York State
  - The role of a system administration in a multi-campus system.
- Extremely strong written and oral communications skills.
- Quantitative and analytical skills.
- Ability to work effectively and comfortably with senior campus and System administrators and diverse campus constituencies.
- Ability to get things done. The successful candidate will have strong leadership skills, lots of energy, and the ability to motivate by example.

Please send applications and nominations to:

Associate Provost Search Committee
6 Geography
State University of New York
State University Plaza, Room T-503
Albany, NY 12246

Review of applications will begin immediately and continue until the position is filled.

The State University of New York is an EEO/AA employer. Applications from women, minority persons, disabled workers and/or Vietnam Era Veterans are especially welcome.

MESSIAH COLLEGE

invites applications for

ACADEMIC DEAN

to provide leadership for

SCHOOL OF THE HUMANITIES

Messiah College is a Christian college of the liberal and applied arts and sciences rooted in the Baptist, Pietist and Wesleyan traditions and committed to an embracing evangelical spirit, to academic excellence, and to social engagement.

The growth of enrollment (nearly 2800 students), program (50 majors and minors) and full-time faculty (144) has necessitated a new academic structure that will promote and foster the excellence, innovation and creativity of this dynamic college. Twenty academic departments are now divided into five Schools, each of which will be led by a new Dean. The School of Humanities is comprised of 44 full-time faculty, 18 majors and 20 minors. Successful applicants will:

- Share the unique Christian mission and embracing identity of the College.
- Exhibit a creative and innovative orientation towards education.
- Evidence experience in academic administration, including networking and cultivating funding sources.
- Exemplify excellence in teaching, scholarship, and service.
- Be qualified for faculty appointment in an academic discipline represented by the particular School.
- Possess an earned doctorate or terminal degree from an accredited university.

Compensation will be commensurate with qualifications and experience. Excellent benefits include TIAA-CREF, life, health, and dental insurance, and college tuition assistance for dependents.

Nominations and applications should be submitted as soon as possible. Review of candidates will begin September 30, 2001, however applications will be received until the position is filled. Starting date for this position is July 1, 2002.

Applicants should provide a letter summarizing their interest in the College and their qualifications for the Academic Dean position, a comprehensive curriculum vita, brief statements of philosophy of Christian higher education and approach to administration/leadership, and at least three letters of reference. Please address all inquiries, applications, and nominations to:

Dr. Kim S. Phlipps, Provost

EOE
COLBY COLLEGE

DEPARTMENT OF THEATER AND DANCE

TENURE TRACK ASSISTANT PROFESSOR POSITION IN THEATER

The Department of Theater and Dance at Colby College invites applications for a tenure track position at the rank of Assistant Professor in Theater, beginning September 2002. The successful candidate will be responsible for teaching courses in Theater History, Directing, Drama and Dance in Performance (directing a main stage production during the department's scheduled season), and an elective course in a related interest area of the candidate's choice. Additional responsibilities include advising majors and minors, serving on departmental committees as appropriate, collaborating with colleagues in all departmental productions and activities, and mentoring for the student-run theater club, Powder and Wig. Preferred qualifications are an M.F.A. or Ph.D. in Theater and/or Performance with a focus in history; demonstrated evidence of collegiate teaching in related areas, and professional experience. Salary and benefits are competitive.

Please send letter of application, curriculum vitae, statements of teaching and research interests, copies of graduate transcripts, a sample of written work, and three letters of reference to: C.M. Wentzel, Chair, Department of Theater and Dance, Colby College, 5252 Mayflower Hill, Waterville, Maine 04901-8845. Review of applications will begin on September 15, 2001 and continue until the position is filled. Colby is an Equal Opportunity/Affirmative Action Employer. Applications and nominations of women and minorities who would enrich the diversity of the campus community are strongly encouraged. For more information about the College, please visit the Colby web site at www.colby.edu
DEAN
College of Engineering & Technology

The University of Nebraska-Lincoln invites applications and nominations for the position of Dean of the College of Engineering and Technology. The Dean is the chief academic and administrative officer of a multi-campus college with a statewide responsibility for engineering education.

The successful candidate will be a strong, visionary leader and spokesperson for the College. He/she will have experience in building and maintaining relationships both with private industry and with public research grants and contracts. It is expected that the next dean will continue to strengthen the national reputation of the College, promoting excellence in research, teaching and outreach.

The Search Committee will begin screening applications on October 15, 2001 and will continue until an appointment is made. A description of the position and application process is available on-line at http://www.unl.edu/engsys/priorities/dean/ or from Ms. Jelena Gude (Tel: 402/472-5264; Fax: 402/472-4929; E-mail: jgude1@unl.edu)

POSITION ANNOUNCEMENT
Arizona State University West, a vital component of ASU's multi-campus structure, serves more than 5,000 undergraduate and graduate students at its modern, growing campus in Phoenix, one of the country's most dynamic multicultural and economic environments. ASU West is an urban, commuter campus with a focus on learner-centered education. The University is committed to a balance of research and teaching, faculty-student research collaboration, interdisciplinary perspectives, and the development of University-community partnerships. ASU West is dedicated to increasing the diversity of its campus community, and encouraging an environment that offers students knowledge about local, national, and global communities.

The School of Management is recruiting for a tenure-track position in Strategic Management for Fall 2002. As a metropolitan university, the mission of the SOM at ASU West is to educate students who primarily live and work in the Phoenix area, to advance knowledge in the various fields of management, to advance the practice of management in the context of a global economy, and to foster the economic vitality of the Phoenix area. "The School's dynamic faculty are nationally recognized for their teaching, research and business credentials. Normal teaching load is four courses per academic year for untenured faculty. The SOM offers a B.S. in Global Business with specializations in marketing, financial management, human resource management, information systems management, and international studies. The SOM also offers a Bachelor's in Accountancy and Postbaccalaureate Certificate in Accountancy and a Master's in Business Administration (MBA). Baccalaureate and MBA programs are accredited by the AACSB and the Accountancy Program has separate AACSB accounting accreditation. The average GMAT score of MBA students is 590. The SOM provides an on-campus evening MBA program, as well as off-campus MBA programs and an on-line MBA program.

Assistant/Associate Professor of Management: We are seeking a faculty member to teach strategic management at the MBA and undergraduate levels. Required Qualifications: Ph.D. in strategic management or related field by August 15, 2002; evidence of teaching effectiveness in strategic management with at least 1 year of teaching at the graduate level; and evidence of teaching effectiveness in strategic management with at least 1 year of teaching at the undergraduate level. Desired Qualifications: Evidence of teaching experience in teaching in international management, human resource management, and legal issues and ethics; consulting experience; evidence of MBA teaching experience; experience with strategy computer simulations; and evidence of outstanding foundation in research methods. Send all materials directly to:

Send: Two complete copies of a letter of interest, vita, names of three references, and evidence of teaching and research performance to: Dr. Leanne Awater, Management Department Chair, ASU West School of Management, P.O. Box 37100, MC 2451, Phoenix, AZ 85069-7100.

CASE WESTERN RESERVE UNIVERSITY

PRESIDENT

The Trustees of Case Western Reserve University invite nominations and expressions of interest for the position of President with an anticipated appointment date of July 1, 2002.

CWRU is the largest private research university in Ohio, with undergraduate and graduate programs that encompass the arts and sciences, technology, and the professions, including medicine, nursing, dentistry, law, management, and social work. The University has distinguished itself by combining its internationally known programs of teaching and research with an active role in collaborative efforts to strengthen the economic base and quality of life in the region.

The Trustees seek a President with demonstrated leadership ability and a strong commitment to academic excellence and scholarship, an orientation to the interests of students and faculty, and a deep appreciation for the critical opportunities CWRU and its community afford each other.

Nominations and applications, which will be accepted and reviewed until the position is filled, may be sent to:

Susan J. Zull
Secretary of the Corporation
Case Western Reserve University
317 Adelbert Hall
10900 Euclid Avenue
Cleveland, Ohio 44106-7010

John Isaacs and Barbara Stevens of Isaacs Miller are assisting CWRU in this search (phone 617-262-6500; fax 617-262-6509; e-mail: bsstevens@imsearch.com)

In employment as in education, CWRU is committed to Equal Opportunity and Affirmative Action.
Coordinator, Career Information and Placement Services

Community College of Philadelphia invites applications for an energetic and experienced Coordinator of Career Information and Placement Services responsible for coordinating student job development and placement activities on the Spring Garden campus and Regional Centers.

The successful candidate will be able to deliver career services through state of the art technology and must assume responsibility for developing and maintaining the office website. He/she should have strong interpersonal skills, exhibit great attention to detail, have the ability to manage multiple tasks and a heavy workload. Qualifications include: Bachelor's degree required, Master's degree preferred, demonstrated experience in job placement and development required, a minimum of 2 years of professional experience working in the area of Career Services.

Benefits are highly competitive. For maximum consideration, send cover letter, resume, and at least 3 references by September 9, 2001 (although applications will be considered until the position is filled) to Human Resources (HR), Community College of Philadelphia, 1700 Spring Garden Street, Philadelphia, PA 19130. Community College of Philadelphia is an affirmative action, equal opportunity and equal access employer. The College encourages applications from individuals from traditionally under-represented groups. AA/EOE

PROVOST

The University of Michigan invites applications and nominations for the position of Provost and Executive Vice President for Academic Affairs ("Provost"). The University of Michigan is one of the nation's preeminent research universities, comprising 20 schools, colleges and academic units, and serving more than 3,800 faculty and 37,000 full-time students. Faculty and students come from Michigan, the other states, and from all parts of the world.

As it enters the twenty-first century, the University of Michigan will continue to serve the people of Michigan, the nation, and the world by creating, preserving, communicating and applying knowledge, fostering engagement, innovation and achievement, and by educating citizens and leaders who will shape the present and enrich the future. It will strive to be a university that honors human diversity and creativity, and to foster an environment in which ideas are contested with grace and civility.

The Provost is the chief academic, budget, and operating officer for the University, and reports directly to the President. Reporting directly to the Provost are the Deans and Directors of all academic units, the Director of the University Library, and the Associate Vice Presidents and Vice Provosts. The Provost provides leadership in support of the scholarly enterprise, and the planning and implementation of academic programs at the University. The Provost must be able to represent the University eloquently to internal and external constituencies and to seek, secure, and manage funds from a variety of sources.

Candidates must be distinguished scholars and experienced administrators, with the ability and experience to provide academic leadership and vision of the highest order. They must be able to demonstrate the capacity to provide leadership in a highly collaborative and collegial manner that will focus the energies of a diverse and immensely talented faculty and student body.

Nominations and applications will be reviewed continuously beginning immediately, and will be accepted until the position is filled. The University's dedication to excellence is complemented by its profound commitment to building and sustaining a culturally diverse academic community. Individuals from historically under-represented groups are encouraged to apply.

Correspondence may be addressed to:

Lee C. Bollinger
President
University of Michigan
2074 Fleming Administration Building
503 Thompson Street
Ann Arbor, MI 48109-1340

Email may be addressed to gdkrenz@umich.edu. Information about the University can be found at http://www.umich.edu. The University has retained the services of Judith Auerbach of Auerbach Associates to assist in the search process. Correspondence: 65 Franklin Street, Suite 400, Boston, Massachusetts, 02110; Telephone: (617) 451-0095. Email should be addressed to judith@auerbach-assoc.com The University of Michigan is a Non-Discriminatory, Affirmative Action Employer.

ASSOCIATE VICE PRESIDENT
FOR ACADEMIC AFFAIRS
SEARCH REOPENED

Montclair State University invites applications and nominations for the position of associate vice president for Academic Affairs (AVPAA). Montclair State University is a comprehensive public university offering a rich array of programs to approximately 13,500 undergraduate and post-baccalaureate students. Founded in 1908, the University is organized into three colleges and three schools: College of Education and Human Services, College of Humanities and Social Sciences, College of Science and Mathematics, School of the Arts, School of Business and the Graduate School. Characterized by a faculty of 450 teacher-scholars, Montclair State offers 10 undergraduate degrees in more than 70 major areas of study and seven degrees at the master's and doctoral level in 36 areas of study. The University is located 14 miles west of New York City on a beautiful 200-acre suburban New Jersey campus.

The AVPAA reports to the provost and vice president for Academic Affairs, and provides leadership in the areas of academic planning, program implementation, the curriculum and the application of new technologies to the teaching/learning process. The AVPAA coordinates all accreditation and academic program review activities, and provides administrative oversight for the Center for Community Based Learning, the Honors Program, and the Office of Summer Sessions and Special Programs. The AVPAA will represent the Office of the Provost on key University planning, technology and curriculum committees as well as the campus Teaching, Learning and Technology initiative; will participate in the resolution of student academic appeals and complaints; and will work closely with the academic deans, the associate vice president for Information Technology and the director of Institutional Research.

Qualifications: Applicants should possess an earned doctorate or equivalent degree, experience as a tenured faculty member, and teaching and scholarly qualifications consistent with a tenured appointment in one of the University's five schools. Candidates must also demonstrate a record of successful administration in higher education, a broad understanding of current issues and future directions in higher education, especially at the interface of technology and the learning process, and the ability to raise external resources. The successful candidate will have excellent written and oral communication skills, a collaborative, facilitative leadership style and a commitment to diversity.

Salary: Salary dependent upon qualifications
Apply by: Review of applications will begin immediately and continue until position is filled.

Send letter and resume (include V#) to: Dr. Judith L. Hunt, Dean, Library Services, Montclair State University, Box C316-V#31/HOHE, Upper Montclair, NJ 07043.

COLUMBIA BUSINESS SCHOOL

The Management Division of Columbia Business School seeks to hire outstanding persons at both the junior and senior levels. The Management Division is composed of people doing research in strategy, organizational theory and organizational behavior. We are looking for people whose scholarly and research interests contribute to one or more of these areas. Candidates should begin their application by visiting our job-search web site at http://www.gsb.columbia.edu/divisions/management/search, where they will be asked to complete an online application form and electronically upload their curriculum vitae. In addition, a letter of interest, three letters of recommendation and samples of current research (including a dissertation proposal summary for doctoral candidates) should be mailed to:

Barbara Valentine, Search Coordinator
Columbia Business School, 3022 Broadway Room 7N, Uris Hall, New York, NY 10027
Email: bev1@columbia.edu

The deadline for completed applications is November 1, 2001.

Columbia University is an Equal Opportunity/Affirmative Action employer.

Director of Affirmative Action, Pluralism and Diversity

The College of Staten Island of the City University of New York invites applications for the position of Director of Affirmative Action and Pluralism and Diversity, to start September 1, 2001 or as soon as possible. Reporting to the President and working closely with the Vice President for Student Affairs, the Director of Affirmative Action and Pluralism and Diversity has responsibility for programs and activities designed to foster a climate that encourages respect for pluralism and diversity and for implementation of the College’s affirmative action policy. The Director will be expected to promote diversity in College programming and in faculty and staff hiring. Additional duties include overseeing procedures for compliance with Federal and State regulations; on-going data collection and analysis for College and University reports; training programs; and disseminating information. The Director serves as Chair of the College Affirmative Action Committee and the Pluralism and Diversity Committee and as liaison with University offices and programs. CSI has a population of 19,500 students and 1,500 faculty and staff. Qualifications: Bachelor's degree and a minimum of eight years related experience required; advanced degree, demonstrated success in this area, excellent computer and communication skills strongly preferred. Salary Range: $52,858 - $73,995. Review of applications will continue until the position is filled. Send a letter of application, resume, and the names, addresses and telephone numbers of three references to: Michael R. Daniels, Assistant to the Vice President for Student Affairs, Affirmative Action/Pluralism and Diversity Search, College of Staten Island/CUNY, 1A room 301, 2800 Victory Blvd., Staten Island, NY 10314

Kutztown University of Pennsylvania enrolls approximately 8,200 students in graduate and undergraduate programs. The University is located in the borough of Kutztown in a charming rural setting, but is within 20 minutes driving time of the diverse metropolitan areas Allentown/Bethlehem and Reading, and within 60 minutes of the Philadelphia metropolitan area. The University is very interested in hiring employees who have had extensive experience with diverse populations, especially African American and Latino populations represented in these adjoining metropolitan areas.

**Director of Admissions:** Seeking an experienced, team-oriented admissions professional to direct a comprehensive admissions recruitment program. Candidates should have a strong background in public higher education and a minimum of six years experience in the field. Excellent supervision and planning skills are essential. The admissions program has registered single and double digit growth in applications for the last several years and operates in a strong and competitive market. Knowledge of issues in higher education and an understanding of the marketplace for public higher education is essential. Duties for which the director is responsible include developing effective student contact (recruitment visits, direct mail, computer programs, interviews, open house programs, etc.); the admission and re-admission of all undergraduate students; managing admissions data; preparation of reports, research, and evaluation necessary to fulfill the duties of the office. The director is an active member of the University Enrollment Management Team and provides leadership for the recruitment and admissions for all undergraduate students. A successful interview and demonstration of ability are also required. Master’s degree required. Reports to the Vice President for University Advancement. Review of applications will begin on August 20, 2001 and will continue until filled. Please mail resume including three references and a letter of application to: Chair of Admissions Director Search Team, Kutztown University, P.O. Box 730, Kutztown, PA 19530.

Kutztown University is an Affirmative Action/Equal Opportunity employer and member of the State System of Higher Education. It actively solicits applications from women and minority candidates.

---

Northeastern University, nationally recognized for its cooperative education program, is a private, non-sectarian university located in the heart of historic Boston. It is an integral part of the city’s thriving educational and cultural life, dedicated to excellence in research and scholarship, and highly committed to individual and community needs. Northeastern is dedicated to fostering gender equity, cultural and ethnic diversity among its faculty, staff and is proud of its diverse student/resident population.

**Complex Coordinator**

Direct responsibility for student development functions and the effective administration of a diverse residential community of 800 students with 24 staff members (professional, paraprofessional, and graduate). The primary purpose of this position is to develop and maintain an environment conducive to students’ academic success through social and intellectual growth including the ongoing development and leadership with academic initiatives within the complex. Responsibilities include behavior management, judicial administration, building and security management, and staff supervision. This live-in position assumes full responsibility for the safety and well-being of the students and the complex. Must be capable of excellent autonomous judgment. Required: Master’s Degree in College Student Development, Higher Education Administration or a related field; two to five years of experience as a full-time, live-in residence hall professional; excellent written and oral communications skills; effective administrative, supervisory, and organizational skills; experience in conflict mediation and resolution; evidence of excellent decision-making skills.

Candidates for this position must have demonstrated understanding of diverse academic, socioeconomic, cultural, and ethnic backgrounds. This is a live-in position that includes a full meal plan, tuition benefits and university health plan. This position will not exceed three years in duration. A fourth year is possible with the permission of the Director of Residential Life. For best consideration, please submit resume by September 3, 2001.

Please send cover letter, resume, and 3 references to: Richard Stevens, Associate Director of Residential Life, 6 Speare Hall, Northeastern University, 560 Huntington Avenue, Boston MA 02115

Montgomery College

Instructional Dean Positions - Takoma Park Campus

Health Sciences

Natural and Applied Sciences, Business, Management and Information Sciences

Montgomery College, a multi-campus community committed to excellence in teaching and to student success, is seeking applications and nominations for two Instructional Dean positions listed below. The College, located in Maryland, just north of Washington, D.C., resides in the most populous, racially diverse and fastest growing county in the state of Maryland. The College is engaged in meeting the challenge of providing institutional programs to meet the diverse and changing educational, social, economic, and cultural needs of its community.

The Instructional Dean reports to the Campus Vice President & Provost and is part of the campus leadership team. This team is responsible for creating, maintaining and being accountable for the best possible learning environment at The Takoma Park Campus by:

- Ensuring a student-centered focus.
- Balancing college, campus and community perspectives.
- Developing and managing resources.
- Ensuring and advocating for quality instruction and services.
- Developing, supervising and evaluating faculty and staff.
- Inspiring and encouraging innovation in teaching and learning.
- Developing partnerships with local schools, businesses, and community agencies.
- Responding to community needs.
- Developing new programs.

Instructional Dean- Health Sciences/Vacancy # 1084

This position provides leadership for faculty and staff in the following areas:

- Health Information Technology, Nursing, Health and Physical Education, Physical Therapist Assistant, Radiological Technology, Diagnostic Medical Sonography and Surgical Technology.

QUALIFICATIONS: Candidates must have a Masters Degree, preferably in one of the disciplines supervised, along with direct experience in the Health Sciences. A doctorate in one of the areas supervised is preferred. Progressively responsible managerial experience is required. Effective written and oral communication skills are required. Experience in working with students from diverse backgrounds and with varying learning styles is a plus. The successful candidate will be charged with facilitating a new Health Sciences Institute that will include credit and non-credit offerings.

Instructional Dean - Natural and Applied Sciences, Business, Management and Information Sciences/Vacancy # 1028

This position provides leadership for faculty and staff in the following areas:

QUALIFICATIONS: Candidates must have a Masters Degree in one of the disciplines supervised. A doctorate in one of the areas supervised is preferred. Effective written and oral communication skills are required. Progressively responsible managerial experience at the department level and above is required; experience in working with students from diverse backgrounds and with varying learning styles is a plus.

Candidates must be able to demonstrate the challenges below:

- Providing leadership in curriculum and program development, program reviews, academic planning and budgeting.
- Facilitating outcomes assessments.
- Infusing of technology into the classroom.
- Developing and promoting faculty and staff development.
- Working with a culturally diverse community and student body.
- Working collaboratively with other administrators, faculty and staff to advance the goals of the academic program.
- Generating external funds.
- Developing partnerships and fostering community outreach.
- Developing alternative programs - credit and non-credit.

Please submit a cover letter, not to exceed five pages, along with your application to indicate how your abilities address the challenges.

The salary range is $66,082 - $102,690 per year. Montgomery College offers excellent benefits. Applications for the above vacancies can be obtained by accessing our web site www.mcc-md.edu/employment, or calling our 24-hour job line at (301) 279-5374, or by coming to the Office of Human Resources, Montgomery College, 900 Hungerford Drive, Suite 130, Rockville, Maryland 20850. Applications must be received by 5:00 p.m. on September 28, 2001.

Montgomery College is an equal opportunity employer, committed to fostering a diverse academic community among its students, faculty, and staff.

THE NECESSARY ROLE OF AFFIRMATIVE ACTION

In the July 28, 2000, issue of this magazine, I wrote a piece, "Step off the Sidewalk," which pointed out a disturbing hiring trend in California's two-year colleges but offered no answers. I now offer a "unique-new-old" idea championed by three University of Michigan professors.

In these days of political correctness, "affirmative action" is a mute term among human resource managers (lest they be accused of preferences). Whenever college or university admissions persons ever consider race or gender to make a decision, the powers that be roll their eyes and make a comment about preferential treatment or reverse discrimination against White males. I believe these "powers" have a general feeling that goes something like this: "Affirmative action policies give preferences to less-qualified people just because they are members of some minority group." There is a strong feeling among these "powers," and some uninformed politicians, that America's White-male-dominated establishment is ready to judge and/or treat America's minorities fairly; therefore, they think, affirmative action-type programs aren't needed in the workforce or in admissions programs because they serve only to deplete the quality of the workforce.

Recent findings offer proof that such anti-affirmative action attack postures are baseless. Studies are showing that these unique programs are needed because without them, current hiring trends, such as those at America's universities (average 3 percent minority faculty) and California's two-year colleges (1 to 5 percent minority faculty) will continue.

The three University of Michigan professors—Richard Lempert, David Chambers, and Terry Adams—offer a positive view of the value of and need for affirmative action in their study published in "Law & Social Inquiry," Journal of the American Bar Foundation, Spring 2000. In their study, the professors followed minority students typical of those whom critics use to show affirmative action programs are unfair (students admitted despite lower test scores and grades) and concluded that after graduation, very little difference was found between Michigan's minority alumni and its White alumni. Similarities stood out more than differences.

The professors concluded that affirmative action graduates turned out to be just as qualified and satisfied with their careers as their White counterparts; that it is important to attract more minority students into school and, in this case, as law partners because "increasing diversity, particularly ethnic diversity, has important educational benefits not just for minority and women students but for White male students as well"; and that affirmative action, derided in the past by right-wing politicians and being eliminated by state propositions (like 209 in California), should be protected.

The study found that Blacks, Latinos, and Native Americans who graduated from the University of Michigan Law School between 1970 and 1996 (who are still working at law firms) have made partner at about the same rate as White graduates, and that the biggest difference between jobs of minority alumni and White alumni is that minority alumni are more likely to work in government, "which might explain why, among minority and White graduates who went into government, the percentage of judges is higher for minority than White graduates."

If income is a mark of success, then Michigan's minority alumni did quite well. The study found the median income of Michigan's minority alumni who graduated between 1970 and 1979 to the top 8 percent, graduates of the 1980s in the top 13 percent, and graduates of the 1990s at the start of their careers, in the top 22 percent of U.S. households.

Finally, the study showed that minority graduates do more pro bono work, help younger attorneys, and serve on nonprofit boards more often than White graduates. And, if unremunerated contributions to the well-being of others can be used as a measure of career quality, then Michigan's minority graduates, "particularly those who graduated in the 1970s, tend to make more contributions than Whites."

I believe the results show that having diversity—not only in university admissions programs but in the workplace as well—strengthens the social fabric of America's society. Affirmative action, the study concludes, "allows Whites to learn to work with and negotiate with and respond to views of someone of a different ethnicity..." As this study says, "Affirmative action programs in elite higher education work..." and test scores and college grades are irrelevant when it comes to future success in the workforce. These conclusions should give university and community college hiring committees, and critics of affirmative action, something to think about.

Teachers: A New Breed?

BY GUSTAVO A. MELLANDER

AFTER the second World War, there began an ever-growing demand for teachers. Returning servicemen and women took advantage of the GI Bill of Rights, which covered not only tuition but also fees and books, and even provided assistance with normal living costs. That war-weary generation also began to put its life together. They formed families and thus began the flood of baby boomers. The need for more teachers followed logically enough. It continued throughout the 1950s.

Federal Assistance to Education

In 1957, the Russians launched Sputnik and shocked America. To overcome the nation’s historic reluctance to aid education, for that had long been the domain of individual states, a new rationale had to be created. It was argued that national defense could not be achieved unless we improved education. And that could not be accomplished without massive federal funding. America had to catch up, and teachers were an integral part of the equation. Federal funding flowed to college students and to college campuses. The demand for teachers continued to grow.

But around 1965, the job market for full-time faculty began to shrink. It virtually evaporated for history, English, and other liberal arts teachers. The drought would last more than 30 years. For decades, full-time faculty positions seemed to exist only in very specialized disciplines, i.e., computer science, mathematics, etc.

Under fiscal pressure, many colleges hired adjuncts to save money. State authorities and the accreditation agencies simply looked the other way.

For many reasons, including retirements and growing enrollments, there has been an increase in faculty vacancies over the past three years. That is good news, but many colleges, having tasted blood, continue to cannibalize full-time positions when they appear. Instead, they hire adjuncts; few criticize that continuing trend.

K-12

Although changes and needs can be seen among colleges, the most urgent need for teachers is in the K-12 sector, where it is so intense that some districts have offered teachers a signing bonus, up to $20,000. Recently, a Florida school district signed contracts with 67 of its graduating high school seniors guaranteeing them a teaching position when they graduate from college four years hence.

A growing number of professionals from other fields are willing to take pay cuts to become teachers. Looking for more flexible and rewarding careers, they are leaving jobs as engineers, lawyers, and salesmen for the classroom. Some were forced out by budget cuts while others noted they have had enough corporate stress.

College Involvement

Nobody knows exactly how many second-career teachers have joined the ranks in the last few years, but the Department of Education feels that new incentives, rising salaries, and aggressive recruitment are luring them to the classroom. They are helping fill the nation’s severe teacher shortage and reduce uncredentialed teachers in the classroom.

To meet the needs of these new fledgling teachers, many colleges and universities are offering alternative credential programs. Rather than taking time off to go to school full-time, participants can receive provisional appointments and begin teaching immediately. They then pursue the classes they need to be certified at night or on weekends.

One State’s Attempt to Cope

A look at trend-setting California may provide insights into what may happen nationwide. The number of state-funded alternative teacher certification programs in California has increased from 29 to 65 in the last six years. The number of people being certified as teachers through those programs has more than tripled, according to the National Center for Education Information. Last year, California certified 7,923 program graduates as teachers, compared with 2,138 in 1994-95.

There is a need, and it is being met. Critics say that these new teachers aren’t as prepared as recent college graduates because they do not receive the same training. Secondly, many have unrealistic perceptions of teaching. Some are merely fleeing the pressures of their professions and wish to enter what they think is an easier life. Further, critics contend that to be a good teacher, one has to go through a formative period; the years spent as an undergraduate cannot be replaced by taking a few courses in “night school.”

But school administrators say that late-entry teachers are held to the same standards as everyone else and are just as qualified. Further, they bring relevance and experience to the subjects they teach. They are also more mature and exhibit a tremendous desire to succeed.

Last year, California embarked on a $1 million advertising campaign aimed at luring professionals to teaching. School districts expanded their efforts too, by specifically reaching out to mid-career professionals. Rising teacher salaries made recruitment efforts a little easier. But lifestyle is still the stronger motivation. They are in a situation in which money doesn’t drive their decision.

Bottom Line

For the first time in a generation, there is a huge demand for teachers. It is most pronounced in K-12, but more and more colleges are going to face the same situation. There is a need to train teachers in kindergarten studies through postdoctoral studies. Given the tidal wave of vacancies, schools and colleges are going to have to be more flexible in who they hire and how they train them. But these second-career new teachers may be in for a surprise. Teaching is not as easy as those who have never taught may think. It’s still work— and hard work at that.

Dr. Mellander is a professor at George Mason University.
Most recent news about affirmative action seems to focus on alternatives to the controversial policy.

Perhaps it's the title that has worn out its welcome, becoming self-stigmatizing. Perhaps it could be renamed, repackaged, or remarked, like old but worthwhile commercial products. The hope of many open-minded, forward thinkers of our time is that people will begin to understand the value of affirmative action before it's too late. Regardless of color, which of us can say that no one has ever given us a hand? At some point, nearly all of us have benefited from assistance in the form of mentorship, the belief that we could succeed in a particular position, and, yes, even admission to college. The list goes on.

Let's call a spade a spade. Opportunity for Whites is opportunity. However, not all Caucasians are born with a silver spoon, and having money doesn't necessarily increase one's GPA, though it can open doors. No one talks about White children who may or may not be at the top of their class, and who could have financial and/or family difficulties, but who nevertheless have goals and aspirations--they want an education, a career, and are willing to work for it given the opportunity. And they have. But when people of color seize an opportunity, it's affirmative action. It's all in the name, and it's not all Black or White. Affirmative action should be colorless and accessible to all underprivileged yet deserving candidates. Easier said than done.

Admissions departments are under incredible pressure as they are in great part responsible for creating a campus environment that mirrors society's diversity. Education contributes to the founding of who our children become as adults, and schools would be remiss if students would only get to experience the real world, its grandeur and imperfection, after graduation. Taking the whole picture into account is only complete if race is included. What's your view?  

M. Sasseret

Internationalization
of U.S.
Higher
Education

Do We Prepare Graduates to
Be Effective Global Citizens?

by Jeff Simmons

The snapshot is hazy at best, but it does provide a clear enough picture of international education.

The authors of the report "Internationalization of U.S. Higher Education" concede that research has been sparse and spotty. But they culled enough studies and statistics to conclude that international studies abroad and at home are not functioning well.

"There is serious cause for concern," they write in the recently released study. "Foreign language enrollments are low; international courses constitute only a small part of college and university curricula; study abroad...remains an undervalued and underutilized means of instruction...and most graduates are ill-prepared to face the global marketplace of employment and ideas."

Funded by the Ford Foundation, the report portrays the strengths and weaknesses of international education at colleges and universities in the country. The authors found that internationalization in the U.S. has not advanced much over the last decade. The study is considered the first substantial examination of international education since the American Council on Education (ACE) reviewed it in 1987. "It had been more than 10 years since we had reviewed this data, and we had the sense there had not been as much improvement as we had hoped there would be. That's especially important in the context of the expansion of globalization," says Fred M. Hayward, senior associate at the Washington, D.C.-based ACE.

"We've been complacent on the whole as a country because our economy has been doing so well," he adds. "We assume because we are exporting so many things we can go ahead as we've done in the past, but we cannot."

Additionally, this summer ACE began surveying students and faculty about their experiences in international education and foreign language studies. And yet another review will reveal that American students know far less about their foreign counterparts than foreign students know about America.

ACE researchers are hoping to get to the root causes of the dwindling or stagnating numbers and knowledge. Hayward said early
results showed that Hispanic and Black students thought more favorably about foreign language studies than did White students.

"That's a very encouraging sign," he says. "This is a recognition that the cultural diversity of this country creates real opportunities for those who will take advantage of it and that people want to become wellversed in other cultures.

"In many ways, Americans have accepted the myth that the rest of the world speaks English. In fact, that's not true. But even if it were true, what we do in a way is allow other people access to our culture but deny our access to theirs."

The ACE findings were reinforced by subsequent data by StudentPoll, a higher education market research publication. StudentPoll found that many students hunger for foreign language study and international education, but those dreams "die in the face of realities on America's college campuses."

The StudentPoll study found that nearly 50 percent of students entering four-year schools want to study abroad, but only 3 percent of currently enrolled students do. The StudentPoll project examined views, students' interests, and experiences.

ACE report took nine months to complete and produced what Hayward called "disturbing" results.

"We basically knew there had not been as much improvement as we had hoped, but we didn't expect to learn that some things were worse. For example, the percentage of students taking foreign languages had gone down. We thought that it would be fairly self-evident that if one was to work outside the United States, it would be important to speak another language." Yet, those numbers plummeted over the last four decades.

That has meant that the majority of U.S. college students are not taking any courses in foreign languages and even fewer are enrolling in languages beyond the elementary levels. The number of students in such courses represented 16 percent in the 1960s and has plummeted to below 8 percent since the mid-1970s.

The authors note that data from the Modern Language Association indicate a slight increase in the number of students enrolled in foreign language courses since 1995. But they also show a major drop since the '60s as a percentage of total enrollments.

percent took German courses.

Referring to the Spanish course enrollments, Hayward says: "People recognize it is the language spoken by many Americans, including native-born Americans. I think that's a very positive shift."

"The unfortunate thing," he adds, "is that we would hope the expansion of Spanish would not skyrocketed from 1990 to 1999.

That increase—11 percent—was most sizeable when it came to the Spanish AP exam.

Enrollments are most often in Spanish courses. When compared with all other languages, Spanish has reigned as the top choice in 1996 and 1998. In 1998, 665,000 students were enrolled in such courses, whereas 494,000 took all other languages.

That's a stunning eclipse. In 1960, only 178,000 students took Spanish courses at colleges and universities, and 490,000 took all other languages. And in 1968, when 708,000 were taking all other languages, 364,000 were taking Spanish. The experts reason that the shift was influenced by the sizeable boom in the Spanish-speaking population in America, and the country's proximity to Latin America.

Over the last 30 years, the number of four-year colleges requiring a foreign language for admission fell from 34 to 21 percent. The numbers have increased somewhat from 1982 to 1995, but are nowhere near their levels in 1965. The figures were substantially lower at two-year, community colleges, where only 34 percent required previous foreign language studies in 1987.

The number of four-year schools with language requirements for a degree dropped from 89 percent in 1965 to 68 percent in 1995. At the same time, the number of two-year colleges with language requirements for degrees rose from 18 percent in 1995 to 23 percent in 1997.

Seventeen percent of institutions require that students complete foreign language studies to graduate, and not in every major. For instance, only 20 percent of those four-year schools with language graduation requirements mandated that students in business and education programs complete those studies.

These figures are in sharp contrast to those of institutions abroad. Britain, for instance, has watched a greater percentage of students take

Fred M. Hayward, senior associate, ACE

The experts indicate that more than 48 percent of college students enroll in foreign language courses during their degree programs, and most do not reach a basic level of competence. The scope of attractive programs also is limited: most (55 percent) enrolled in Spanish, while 17 percent sought French and 8 come at the expense of people taking other languages."

There are some bright spots. Foreign language studies at secondary schools has climbed from 28 percent of enrollments in 1970 to 42 percent in 1994, and the number of Advanced Placement tests in Spanish, German, and French has
foreign languages to earn a degree and added courses such as "Spanish for Chemists."

"American students are far behind their German and other European counterparts in foreign language proficiency," the authors write.

The number of students who study abroad has increased modestly, but nevertheless, it is substantially low. Despite a presidential commission's recommendation of 10 percent by the year 2000, in 1997-98, it was at about 3 percent of total annual enrollment at colleges and at 3 percent of all undergraduate students.

However, the authors note a jump in the variety of countries to which students have traveled to attend school. But many are pursuing the same studies, either social science or humanities majors, and are more often than not White and upper class.

Most students who travel abroad—about 4 percent head to Europe, but that's a drop from 80 percent in 1965. Latin America is the second major region chosen by students; 16 percent head there. Women comprise 65 percent of participants, and minorities, 16 percent.

Students also are taking less time to study abroad. Between 1985 and 1997, the number of students who studied overseas more than a semester dropped from 18 to 10 percent. Roughly 34 percent spend a summer term abroad, and 54 percent spend one semester or less in international study programs.

The authors found weaknesses in broad curricular internationalization. They point out that postsecondary graduates are not told about other countries and events. Course offerings are uneven, and many students don't reach cultural competency.

So how smart are students? The authors were discouraged.

College students, they write, perform more poorly on global competency and geography surveys than do students from other developed countries. They point out that one survey found that only a small fraction of American students understand global situations.

But the authors maintain there have been more opportunities for senior administrators and faculty members to become involved in international activities at four-year colleges. But the research on this, they note, has been "sparse."

However, when it comes to strengths, colleges and universities in the United States have been magnets to students from other countries. In 1998-99, U.S. institutions enrolled 490,933 international students, more than any other country.

"We always have," says Gail Szenes, director of New York University's Office for International Students and Scholars. "We have more schools. America is where people want to go, especially for graduate professional training. There's no other country in the world that can offer what we can."

"Other countries are now competing much more effectively, once they picked up this is a great source of revenue. The United Kingdom, Australia, even Canada, have been giving us a lot more competition in recent years."

America has been a destination more often for graduate than undergraduate students from abroad. In 1998-99, international students represented 3 percent of four-year college undergraduates and 11 percent of graduate students. Experts estimate the difference is usually a ratio of three graduate students to every one undergraduate foreign student.

The New York City-based Institute for International Education ranked New York University (NYU) the top destination point for international students—four countries—over the last few years.

In Fall 1999, NYU enrolled 927 such undergraduates, and 3,555 graduates, 162 non-degree students, and 149 other students studying intensive English language. The school also reported 591 students who graduated from NYU but are pursuing a year of employment allowed by their student visas. NYU enrolled 78 students from Spain during that period.

Though widely dispersed throughout the states, the international students are concentrated in 10 urban areas. "We did a survey and asked students why they chose NYU, and every single answer was either location or program, or a combination of both," she says. Urban areas "are where the schools are, and many are concentrated in the Northeast. More than two-fifths are studying at the graduate level, with the majority attending research and master's institutions. And the number of international scholars visiting the country's institutions has risen.

During the 1998-99 academic year, U.S. colleges and universities hosted 70,500 international scholars—a jump of 21 percent over five years. Most—80 percent—were performing research, while 20 percent were teaching. More often than not, they were affiliated with science disciplines, and the majority hailed from Asia.

Students and faculty from other countries, the authors stress, are a "pool of potentially rich resources for campuses" and "an important source or enrollment and revenue." Most international students are funded from outside the states, with 70 percent of their expenses covered.

The authors note that international students bring more than $13 billion into the country's economy. "I would say most large universities

Source: Data adapted from MLA Data compiled from the Digest of Education Statistics, published by the National Center for Education Statistics, U.S. Department of Education. Prepared by Laura M. Siaya, American Council on Education.

and probably the majority of small liberal arts colleges see the benefits of having students from other parts of the world on their campuses,” says Szentes. “This is a value that higher education institutions have shared for years, so there has always been an interest.”

But Szentes notes that there has not always been an infrastructure to support the students.

When they come from other countries, they bring a lot of needs with them. The institution bears certain responsibilities. Students need to be oriented and enculturated [sic]. You cannot dump them in the middle of a school and treat them like everybody else.

An institution has to handle it responsibly and have the proper support services to make sure it’s a beneficial experience on both sides.”

The authors bear out those concerns. They lament that American scholars are less likely to regard international study as important than their foreign counterparts. They add that another head obstacle is funding.

Federal dollars for nearly all post-secondary international studies have been clipped over the last 10 years, and this has translated into fewer cultural exchange, language study, and faculty research opportunities.

Similarly, state funding has dipped, though a few states recently have stepped up their involvement with international higher education.

Funding from foundations represents 0.15 percent of total national expenditures on higher education, the authors note.

As a result, according to the StudentPoll study, many students don’t even consider overseas academics. An estimated 12 percent who seek international studies.

“There probably aren’t any easy solutions,” admits Hayward. “We need as a country to make a concerted effort to make sure all graduates know a second language and make sure they know more about the rest of the world.”

The authors conclude that a paradox exists: there are many “exciting” programs demonstrating an interest in international education, but student and institutional performance has been slipping.

“The challenge to higher education is clear,” they write. “We need to increase participation of students in international programs, reshape and internationalize the curriculum and co-curriculum of our higher education institutions, and develop a comprehensive international agenda for undergraduates across the curriculum.”

The authors add: “We run the risk of being out of touch with major social, political, and economic revolutions already underway in many parts of the world. If, we fail to become effective global citizens, we may cease to be major players at all.”

College students, they write, perform more poorly on global competency and geography surveys than do students from other developed countries.
STOP Latino Dropouts

Chicago Schools First Target of Project Impact

BY Inés Pinto Alicea

The high dropout rate is not a new problem in the Latino community. Nor is there a lack of research or action in communities across the country to address the issue. But in Illinois, an effort has been launched to adopt and link some of the nation’s best practices to reduce the state’s 11.2 percent Hispanic dropout rate. What’s more, the effort, called Project Impact, has the backing of some of the highest-ranking lawmakers in Illinois, and the White House hailed it as a “project to watch in 2001.”

“For too long, this issue was owned just by the Latino community,” said Jim Palos, executive director of Project Impact, which opened for operations on Jan. 22. “Now this represents a new level of commitment from outside of the community. The governor and the mayor are saying ‘we want to do something in a targeted way to help Latino children succeed in school.’ We haven’t seen that commitment at these levels before.”

Gov. George Ryan and Chicago Mayor Richard M. Daley have representatives on Project Impact’s board of directors to work closely in the development, launch, and operations of a multi-pronged initiative designed to reverse the academic underachievement of Latino youth in elementary and secondary schools. Several senior school officers from the Illinois State Board of Education and from the Chicago Public Schools and three state legislators are also on the board.

Latinos comprise about 15 percent of Illinois’ more than two million school children. In Chicago, Latinos are 34 percent of the students. About 85 percent of Chicago students come from low-income homes.

“If they are dropping out, they can’t be productive citizens,” said Hazel Loucks, Illinois’ deputy governor for education and Project Impact board member. State leaders, she said, felt that the number of Latinos dropping out of school was an “embarrassment” and that an early intervention effort was needed statewide. “The governor wants to send a message that he cares about all citizens of Illinois.” He credits Latino leaders with having identified low Latino educational attainment as a problem and “the
achievement in education was such an important issue, he said, that it would do the research and development free of charge.

The State Board of Education has provided $250,000 for Project Impact, and the federal government has added $750,000. The governor asked the state Legislature to renew the they have to help tackle this issue, not just the Latino community.

Through its research, McKinsey identified four major causes of Latino underachievement, causes that could be addressed by Project Impact. Palos said it was important to identify areas that the program could change rather than problems

“Their contributions were fabulous,” said Palos of McKinsey’s team.

McKinsey identified four actions Project Impact needed to take to make a difference. First, it needed to create a mentor program for students in kindergarten through 12th grade. The mentoring program developed calls on parents to serve as mentors to young children, high school students to mentor middle school children, and business and community leaders to mentor high school students, Palos said.

“Too many times when we think of mentors, we look past the parents,” said Palos. “Here, a part of the solution is to have the younger grades mentored by parents. It will involve a lot of education. Parents will hear advice about how to advance the education of their children.”

Semaca recalls how, in a focus group of sixth- to eighth-grade students, all the Latino children said they intended to go to college, but when asked if they knew of anyone in college, none did. Semaca said that finding emphasized how important it is to provide the children with role models who had a college education, so they could be guided as to what classes to take in school, how to apply to college, and how to succeed in the educational process.

“These were intelligent kids, and we knew they were all on a good track, but it is too easy to get off the track,” said Semaca.

The second initiative McKinsey named was an inventory of all the community and family programs already in place in the schools and the community and the development of ties with those programs to help Latinos make effective use of them. Palos said he looks forward to strong partnerships with other Latino-oriented groups such as LULAC and ASPIRA that have long worked toward improving Latino achievement in education.

The third initiative would require Project Impact to build partnerships within higher educa-
tion. Palos said colleges and universities understand the potential market and can help the project in many ways. One important role colleges could undertake would be to increase the numbers of Latinos who pursue teaching degrees.

The final initiative calls on Project Impact to help schools bridge the digital divide between Latino and White students. Project Impact, said Palos, has hired a staff person with a strong technical background to help schools it serves in their efforts to use technology in the classroom. Semaca highlighted one effort already underway in Chicago that uses technology to boost Latino achievement in the schools, providing mentors to students, and connecting the two primarily through e-mail as well as through face-to-face contact.

Palos knows the challenges he faces in making Project Impact a success. He faced many of the same challenges as executive director (1992-2000) of the Midtown Education Foundation in Chicago, which enables minority youth from disadvantaged backgrounds to achieve long-term success in school and work.

At Project Impact, funding is a constant challenge, as it is for many nonprofits. Another challenge is making sure everyone—lawmakers, students, staff, teachers, school officials, and community and business leaders—stays committed. “It’s one thing to say we’re going to have a program with parents, and it’s another thing to get them in the door,” said Palos. “We just try to be creative.”

Carlos Azcoitia, deputy chief of education for Chicago Public Schools, served on the initial committee that explored Latino underachievement in Illinois and identified the needs and the strategies required to better serve Latino youth. He considers it vital to get Latino parents involved as early as preschool and to keep them engaged through high school, which is often when all parents diminish their involvement in a child’s education. Ninth grade in particular, he said, is a key time for parents to be highly involved.

“In the transition from elementary to high school, something happens,” said Azcoitia.

“Communication becomes less frequent, the personalization decreases on the part of the school, and students begin to lose interest at the ninth-grade level.”

CARLOS AZCOITIA, DEPUTY CHIEF OF EDUCATION FOR CHICAGO PUBLIC SCHOOLS

out because they are working full-time. Two years ago, 37 of the city’s high schools started letting students attend at night or in the late afternoon to accommodate a variety of work schedules and to bring back students who left with only a few classes to finish. He said it is important that the students get through the high school curriculum and not drop out because many colleges do not accept the GED courses.

“We’re seeing some positive signs,” said Azcoitia, who says he hopes schools will adopt other practices and offer a more personalized approach at the high school level so the dropout rate decreases significantly. Azcoitia argues that schools themselves have low expectations of Latino students and are so depersonalized that changes must be made to stop Latino underachievement. High schools should be smaller, he says, so they can offer more personalized instruction and perhaps offer first-year students academies to address the difficult transition year of the ninth grade.

Palos said he is grateful to the many people who have made Project Impact a reality. Though it was started largely from a grass-roots community effort, the fact that the governor was receptive to the idea helped significantly.

“We want to see this collaboration continue,” said Palos, adding that he welcomes help or advice from readers of this article.

For more information about Project Impact, contact Juan Carlos Ocón, Project Impact, 703 S. Morgan, M/C 041, Chicago, IL 60607-7025, telephone: (312) 413-4016, e-mail: jcocon19@hotmail.com.
California State University, Sacramento

Fourth in the U.S. in Transfer Students

BY ROGER A. DEITZ

Last January, at its 106th Annual Dinner and Business Awards, the Sacramento Metro Chamber of Commerce named California State University, Sacramento President Donald R. Gerth "Sacramentan of the Year." The Chamber recognized Gerth for his leadership at CSUS. Since he assumed the presidency in 1984, his achievements have had a regional as well as international impact.

During Gerth's tenure, the CSUS campus added 1.5 million square feet in new facilities, a joint doctorate in public history, and a new School of the Arts. Gerth was instrumental in establishing the Northern California World Trade Center in Sacramento and chairs the Center's board. He is a member of the United Nations University Council governing board, and a past president of the International Association of University Presidents.

"Don Gerth has displayed a commitment to the progress of the Sacramento Region through his stewardship at CSUS," noted Rusty Hammer, CEO and president of the Sacramento Metro Chamber. "His involvement in countless business, educational, professional, and charitable endeavors makes him a most worthy recipient of this honor."

President Gerth tells students they must endeavor to learn so as to fit into the local community as well as the larger world community. "The students of today and tomorrow," he says, "are citizens and students of a time rather than a place. That is true even for individuals who do not move geographically and for those who may not fully appreciate the obliteration of the distinctions between time and place. What does this mean to us in the California State University? It means access, diversity and pluralism, and the uses of technologies to expand vastly our work and our impact. It means that our graduates must bear the marks of educated persons, that our graduates deserve the best education available through our programs at both undergraduate and graduate levels, and our graduates must be world citizens with global competence.

"Technology is helping to change our world, to bring it closer, and provide greater opportunities for business and intellectual exchanges and partnerships," he says. "Students today need a practical understanding of a world that includes many and often divergent cultures, economic, and political systems. For individuals in our society to be truly educated and function well, they must have an understanding of the world."

This year, he says, "the number of students participating in a 'Sac State' education is the highest ever—more than 25,700."
Honor Roll Facts in Brief

INSTITUTION
California State University, Sacramento

LOCATION
Admissions
6000 J Street
Sacramento, CA 95819

degree programs. CSUS offers California's only combined undergraduate degree in government/journalism. The engineering program was ranked 26th in the nation, among degrees focused on undergraduate education, by U.S. News and World Report. The magazine also placed CSUS eighth overall among public Western regional universities and fourth nationally in number of transfer students. The master's degree in business administration with a management information option was rated 25th in the nation among "Techno-MBA Top Dogs" by
Computerworld magazine. CSUS recently became the first public university in the state to offer a master's in software engineering. The University's doctoral program in public history, operated jointly with UC-Santa Barbara, is the only one in the state and one of only 10 nationwide. The University has the largest criminal justice program west of the Mississippi. The innovative BCLAD (Bilingual Crosscultural Language Academic Development) in Mexico program is the only one in the country that allows students to earn a California teaching credential and bilingual certification while teaching in Mexico. Nearly 700 first-time teachers come out of the University's teacher education program every year. The program is one of the largest in the state, and enrollment grew by 15 percent last year.

According to figures for the last school year, the University has a diverse population of more than 4,195 students, the seventh largest in the 23-campus CSU system. Of these students, 1,990 were Hispanic, 1,955 African American, 3,226 Asian, 161 Pacific Islander, 995 Filipino, 703 foreign national, and 291 Native American. Hispanics are a fast-growing population on campus: In 1973, there were only 338 Hispanics, now nearly 10 times as many. Of the 4,631 students in the 1999-2000 graduating class, 517 were Hispanic, 231 African American, 501 Asian, 129 Filipino, 150 foreign nationals, and 67 Native American. There are 825 full-time and 667 part-time faculty. More than half the University's students join one or more of the 245 student organizations. One of the largest clubs is the Ski Club, which has 500 members and chalets in North and South Lake Tahoe. There are 20 fraternities and 18 sororities.

The CAMP (College Assistance Migrant Program) provides counseling and other special services for migrant workers and their children. The Educational Opportunity Program works to improve access and retention of low-income and educationally disadvantaged students. The Office of Global Programs provides services to international students. The Graduate Diversity Program helps students who plan to enter master's, doctoral, or professional programs, with an emphasis on those from economically and educationally disadvantaged backgrounds. The Science Educational Equity Program helps students who face social, economic, or educational barriers that limit access to careers in the sciences and health professions. A Multi-Cultural Center supports recruitment and retention of underrepresented groups and helps link the University to the community.

The school is an important community resource, with thousands attending cultural events on campus each year. President Gerth notes that community partnerships are increasing, including the building of a Center for the Performing Arts. He says the school is working closely on economic development in the region and has recently partnered with the Sacramento Area Trade Organization and the Chamber on many projects. Gerth points out that students are more involved in the community than ever, with nearly 40 percent performing volunteer service.

California State University, Sacramento professor emeritus Jose Montoya was recently honored for his contributions to arts education at the Getty Museum. The California Arts Council named him one of the "Outstanding Arts Educators of the Year" as part of its "The Year of the Arts--2001" celebration. Montoya, an art professor at CSUS for 27 years, is a painter, poet, and musician. He was recently nominated as poet laureate of Sacramento. He founded the nationally recognized CSUS Barrio Art program and is a co-founder of the Rebel Chicano Art Front, also known as the Royal Chicano Air Force.

Montoya created the CSUS barrio art program in the 1970s to get the University involved in the community and to help future educators gain practical teaching experience. He also wanted to help introduce college students to people of diverse cultural backgrounds. For 31 years, Barrio Art has been taking art education downtown to the Washington Neighborhood Center and local elementary schools. In the program, CSUS students who plan to become teachers help coordinate art workshops for school children as well as senior citizens. Last March, the program unveiled its latest mural project, "Enchanted Stories/Cuentos Encantados," designed and painted by a combination of CSUS students and children from the Washington Neighborhood Center. The mural depicts the importance of literacy and diversity in Sacramento schools. Jose Lott, artist in residence at the Washington Neighborhood Center, directed the latest mural project.
Developing a Culture of Opportunity for Latinos

BY MARILYN GILROY

13 Finalists Launch ENLACE Programs with Kellogg Funds

What will it take to improve the higher education picture for Hispanics? Colleges and universities participating in the ENLACE project, funded by the W.K. Kellogg Foundation, are trying creative strategies to tackle the discouraging statistics on the numbers of Hispanics entering or completing higher education.

“We have got to demystify the college experience for these first-generation-in-college families,” said Donna Parrino, executive director for ENLACE (Engaging Latino Communities for Education) in Hillsborough County, Florida. “We have to work with families that have cultural and language barriers to higher education and help them become engaged in the educational communities.”

Translating this rhetoric into action is the goal of the ENLACE project based at the University of South Florida, Tampa, which works in cooperation with Hillsborough Community College, the School District of Hillsborough County, and The Hispanic Services Council.

Parrino and the ENLACE partners are using their resources to reach Latino families wherever and whenever they can. There’s the college information resource bus, dubbed the ENLACE Education Express. It isn’t just any old school bus—this is a streamlined vehicle equipped with computer stations, conference room, and other amenities that travel to gatherings frequented by the Latino community. The bus recently appeared at “Proyecto Zapatos,” an event organized by the Hillsborough County sheriff’s department to distribute shoes to children from the farm labor community. ENLACE made sure the bus was at the site and staffed with counselors and teachers who could speak to students and their families in Spanish or English and distribute free materials about educational opportunities throughout Hillsborough. The Education Express is just one of many community and family outreach efforts planned by ENLACE over the next few years.

“If there’s a spaghetti dinner, we’re there. If there’s a neighborhood sports event, we’re there,” says Parrino. “We try to help families understand and complete college applications and financial aid forms. We’ll provide support in whatever way we can.”

The ENLACE Education Express and other activities are funded by a grant from the Kellogg Foundation, which is distributing $28 million over a six-year period to 13 partnerships nationwide to help increase the number of Latino and Hispanic students earning high school and college degrees.

For many, this effort represents the first time that Latino education has been placed at the center of community-wide efforts to work across social, economic, and educational boundaries.

ENLACE is a Spanish word meaning “link” or “weave.” The initiative’s guiding principle is that community-based partnerships are the foundation upon which lifelong learning and achievement are built.

The 13 ENLACE partnerships are located in seven states with significant Hispanic populations—Arizona, California, Florida, Illinois, New Mexico, New York, and Texas. Many of the ENLACE projects serve communities in which Latinos are becoming the majority. By 2020, fully 20 percent of the nation’s workforce will be Latino. Nationally, only half of Latino adults have high school diplomas.

“It is critical for higher education institutions to engage with businesses, communities,
and schools to fulfill our obligation to meet the educational needs and expectations of all students," said William C. Richardson, president and CEO of the W.K. Kellogg Foundation. "Since the birth of our nation, education has been the key that opens doors to a rich and fulfilling future. Together, we can accomplish so much more than we can individually."

Two years ago, Kellogg provided grants of $100,000 to 18 coalitions for the purpose of conducting community dialogues required to develop comprehensive plans. Thirteen finalists were selected for grants ranging from $13,000 to $1.8 million each. The lead institutions are Arizona State University, Florida International University, University of South Florida, Santa Ana College, University of California, Northeastern Illinois University, New Mexico State University, Santa Fe Community College, University of New Mexico, Lehman College of the City University of New York, St. Edward’s University, Southwest Texas State University, and University of Texas-Brownsville.

Across the board, ENLACE partnerships focus on young people at all points along the K-16 education pathway from kindergarten through college. The following are broad outlines of the goals for each age group:

- The focus for Latino college students is on programs that will help ensure graduation through increased academic support and special attention to specific retention issues they face.
- High school students will benefit from greater academic and test preparation; parental involvement; mentoring; and new and innovative internship opportunities.
- Efforts for middle-grade students will promote greater literacy and early awareness of college and careers.
- ENLACE projects for preschool and primary-grade students will focus on increasing literacy and establishing lifelong learning habits.

ENLACE Strategies

Specific strategies vary at each site. In the Rio Grande Valley of Texas, the ENLACE alliance targets improved science education because teachers say students who take more challenging science courses are much more likely to go on to college. In New Mexico, a partnership of the state’s three largest communities will sponsor "ENLACE Day" at the state capital. In Oxnard, Calif., a college TV station will produce a college awareness campaign targeted at Latino families.

Northeastern Illinois University (NEIU), the only four-year Hispanic Serving Institution in the Midwest to receive this grant, incorporates 31 organizations in the Chicago ENLACE partnership. This includes several community colleges from surrounding counties that have experienced substantial Latino growth during the past 10 years. Chicago ENLACE hopes to reach at least 26,000 Latino students and their families.

Dr. Santos Rivera, director of the Chicago ENLACE Partnership, explains that the project targets two transition points along the K-16 pathway—high school to college and from a two-year college to a four-year college. Since more than half of Latino high school graduates first enroll in a community college, NEIU has signed dual admissions agreements with the two-year institutions. The policy affords students simultaneous admission and full access to NEIU facilities and the benefit of an academic advisor who will help students develop an "intended plan of study."

"The dual admission agreements give students an anchor," said Rivera. "We want them to see beyond the two years. We want them to feel that they have an institution that they can call home, that they can call part of their overall development."

The Chicago alliance also seeks to strengthen student leadership skills and increase connections between high school students/families and colleges/universities. Some 220 Latino students will take part in an annual leadership institute at NEIU, which includes family empowerment and culturally-based activities. Parents will be recruited for involvement in leadership activities. Themes selected as program components include Student Leadership, La Familia Empowerment, Cultural and Heritage Tribute, Cross Group Collaboration, and Mentoring and Role-Modeling.

Among the barriers to educational success have been the facts that Latino youth leave school in order to help support their families and that language barriers often prevent the parents from communicating with schools. To address these problems, Chicago ENLACE designed Charlas to be held in the community as a means of solidifying a shared vision.

"We are saying let's have a Charlas; let's have a dialogue," said Rivera, who hopes the community conversations will put everyone on the same page.

"When we did our focus groups in the planning process, we kept hearing conflicting mes-
sages from the parents," explains Rivera. "They say to their children 'We want you to go to college, but we also need for you to help us out.'

"In other words, they want the students to move forward, but they are afraid of letting go. In order for the parents not to feel threatened, we are trying to make this process of higher education a family connection, not just an individual one."

Rivera says that Latinas find it especially difficult to manage college and meet the family expectations. "We work with the whole family so that everyone maintains a connection," said Rivera.

That family connection is at the heart of many ENLACE initiatives, especially in central California, where the program serves the children of seasonally employed agricultural workers. The challenges among these California rural schools are made even more severe by the presence of factors such as seasonal migration for employment purposes, limited education of parents, and lack of peer-mentors who have attended college themselves.

Role of Culture

One of the key components in the Central California ENLACE program recognizes the importance of culture in family decisions. This means that family values may limit choices. For example, traditional gender roles and values may define how a high school girl perceives her life after high school. Similarly, high school boys' thoughts about attending college are often influenced by perceived obligation to family, peers, and community. Therefore, family involvement in postsecondary planning and preparation is a critical factor.

On the positive side, ENLACE program coordinators acknowledge that culture may also have a significant influence and effect on learning, motivation, achievement, and goal-setting behaviors. The strategy, in this case, is to work in consultation with family and other members of the community to develop specific student support strategies that have their origins in the unique characteristics of rural Hispanic culture. All ENLACE program components build upon strong cultural traditions and values in hopes of fostering change while maintaining the integrity of central California's rich Hispanic culture.

Hispanic Faculty

Most of the ENLACE partnerships also have begun initiatives that address the critical shortage of Latinos/as among higher education faculty. Typical of these is the ENLACE Fellows Initiative at Northeastern Illinois University, where 20 individuals will earn master's degrees in Educational Leadership at NEIU's graduate school and have opportunities to teach, conduct research, and network with each other.

"We want to prepare them to become part of a new generation of Latino leadership in higher education," said Rivera.

Fellows will have the opportunity to pursue careers as faculty, administrators in alternative high schools, counselors, human resource specialists, or leaders of community-based organizations. The goal is to have more role models for Hispanic students.

The need for visible role models is also on the agenda at the University of South Florida where Donna Parrino explains that ENLACE is working with Tampa's Museum of Science and Industry, nicknamed MOSI, to focus on Latinos in science. MOSI will honor Dr. Alejandro Acevedo, a world-renowned expert on dolphins, as the recipient of its "Latino Scientist of the Year" award. Acevedo will attend the award ceremony and be on hand when MOSI hosts 1,500 area school students at the museum in connection with the event. In addition, Acevedo will conduct seminars at USF with graduate and undergraduate students.

Parrino is also enthused about a project to help high school students successfully prepare for college admissions tests as a means of enhancing eligibility.

"The Princeton Review (test preparation service) has agreed to provide sessions for improving verbal skills to 150 students from three area high schools," said Parrino. "The sessions will be given in September so that the students are ready for the PSATs in October."

While the strategies of the ENLACE projects are multifaceted and creative, the question of outcomes still remains critical. ENLACE partnerships began in Spring 2001 and will run through 2004, followed by a 18-month period to assess results. This last phase of the effort will examine the work of the ENLACE partnerships and focus on which efforts can be institutionalized and sustained.

For Donna Parrino, long-range results are what it's all about. "Our underlying goal must be institutional change," she said. "We need to transform our educational processes to develop a culture of opportunity for Latinos."
Latino Perspective on Census 2000

Chapa, Flores, and Yzaguirre Press for Equity

BY INÉS PINTO ALICEA

The rapid growth during the past decade of the Hispanic population—now 12.6 percent of the U.S. mainland population—will have broad implications for politics, education, and culture. But the repeated undercount of Latinos will hurt the community over the next 10 years, say Latino leaders.

Census 2000 figures show that the number of Americans who describe themselves as Hispanic grew by nearly 60 percent and now total 35.3 million of the U.S. mainland population, about three million more than the Census Bureau had predicted. The unexpected increase is probably due mainly to high levels of immigration and poor counting in the past, said Census officials. The population on the island of Puerto Rico grew to 39 million from 35 million, bringing the total number of U.S. Latinos to 39.2 million.

The once-a-decade figures are critical because they affect federal funds, policy, and marketing decisions, and the numbers are used to redraw political boundaries for congressional and legislative seats across the country.

Angered by a severe undercount of minorities in 1990, civil rights groups and officials from large cities that lost funds due to the undercount pushed for a more aggressive count this time. Many lawsuits, including some from cities with large minority populations, were filed over the 1990 Census to force the government to use figures adjusted to compensate for people who were missed, rather than use the raw numbers from the Census.

For the 2000 Census, the government staged an extensive outreach campaign to encourage minority residents to be counted. The Census Bureau also took extensive steps to clarify questions and improve the overall process. It also moved a question about ethnicity, so it occurred before one about race, which probably helped reduce the Latino undercount, said professor Jorge Chapa, director of Latino Studies at the University of Indiana at Bloomington and a member of the Census Advisory Committee on the Hispanic Population.

Chapa said that previous censuses asked respondents first whether they were White or Black, and many respondents simply skipped the following question, which addressed whether they were Hispanic. He argues that by putting the question addressing whether the respondent was Hispanic first, more people responded to it, resulting in improved data on more people.

"This Census was better than it was in 1990," said Chapa. "It generally is a very good Census."

Still, the Census reported a gap between two key estimates of the nation's total population. The first, based on birth, death, employment, and immigration, pegged the population at 279.8 million. The second estimate, from statistical sampling, put it at 284.1 million. The gap again sets the stage for a legal showdown, particularly since Census figures are used to allocate more than $185 billion in federal funds and because control of the U.S. House of Representatives hinges on only a few seats.

While Census officials boasted that this count was its most accurate yet, a Census report concluded that the 2000 Census missed 1.1 percent of the population or 3.3 million. Some groups were missed at higher rates than others: Hispanics, 2.8 percent; Blacks, 2.7 percent; non-Hispanic Whites, 0.67 percent; and children under 18, 1.54 percent. Civil rights groups, Democrats, and big cities pushed for adjusted 2000 population counts through statistical sampling to make up for the disproportionate number of minorities, children, and poor, who were missed in the count. But the Census Bureau nixed the idea, saying it could not be sure that the adjusted counts are more accurate than the traditional count. The bureau was under pressure to make a decision. It faced an April 1 deadline to release the population counts so that states could realign their congressional and legislative districts.

"I'm frustrated and disappointed because they did not provide completely compelling reasons not to adjust the count," said Chapa, adding that the Census Bureau was simply caught out of position by the large numbers of immigrants who entered the country in the last two years of the 1990s during a booming U.S. economy. That explains in part why more Latinos were missed.

The Supreme Court has ruled that adjusted Census numbers may not be used to apportion congressional seats among states but left the door open to using them for redistricting. Some states have passed laws requiring that

Source: U.S. Census Bureau, 2000, Summary File 1.

[1949]
they use raw, or unadjusted, numbers to draw new political boundaries.

Dr. Antonio R. Flores, president and CEO of the Hispanic Association of Colleges and Universities, San Antonio, Texas, said the new Census numbers on the Latino community have broad implications “for people committed to improving higher education opportunities for everybody.” According to Flores, the current college enrollment of 15 million is expected to climb by 3.3 million by 2015. Latino students are expected to comprise 40 percent or about 15 million of that enrollment growth. Both that and the rapid growth of the Latino population, said Flores, means that states will have to hasten efforts to expand campuses nationwide to accommodate the new students. More faculty members and administrators will be needed as well.

Concerned about the undercount, Flores said federal funding is already unfairly distributed to Hispanic Serving Institutions (HSIs). For example, as recently as the 1995-1996 school year, HSIs received on average $35 per student, compared to $155 per student for all other degree-granting institutions, or approximately one of every five dollars received by other colleges and universities per student, according to the Integrated Postsecondary Education Data Systems (IPEDS) of the U.S. Department of Education.

“By being undercounted, you don’t receive the fair amount of federal resources to serve the needs of the community,” said Flores. “It takes away money from needy communities and gives funding to those communities that were better counted”

Chapa agrees, saying that the Latino undercount means the Latino community will “still not get its due” in representation in legislatures and in Congress, in building schools, and in other programs that use Census counts to determine allocations of money.

In 2000, 57 percent of Hispanics 25 and over had graduated from high school, compared to 88 percent of non-Hispanic Whites in the same age category. More than one-fourth (27.3 percent) had less than a ninth grade education; for non-Hispanic Whites, only 4.2 percent. Only one in 10 Hispanics (10.6 percent) had a college degree. Among non-Hispanic Whites, more than one in four (28.1 percent).

“As a nation, we have the resources to close these gaps,” said Raúl Yzaguirre, president of the National Council of La Raza (NCLR), Washington, D.C., adding that it is estimated that in 20 years, one in four children in the U.S. will be Hispanic. “A large share of our nation’s future economic growth will depend on the millions of Hispanic children in our school system, on the opportunities we give them, and on the priorities we set for ourselves today.”

Yzaguirre explained that Latinos comprise one-third of all children under the age of 18 and are the second largest group of students in the nation’s schools, and yet Latino children are underrepresented in Head Start, early childhood development programs, after-school programs, and rigorous academic courses. He argues that these programs must serve Latino children because 29 percent are poor, and research has shown that high poverty levels and low educational attainment are strongly correlated. He called on President Bush to boost funding for education, urging him to expand what he called the nation’s most effective anti-poverty program, the Earned Income Tax Credit, and to make his proposed tax cut work for the working poor.

“If we equip Latinos and all children with high-quality education and ensure their well-being, we will have a tremendous pool of talent ready to lead the nation forward and every American will benefit,” Yzaguirre said.

Harry Pachón, director of the Tomás Rivera Policy Institute, a Latino think tank in suburban Los Angeles, wrote in a March 8 Washington Post column that for policy makers and business leaders to make constructive policies, they must recognize that there is a great deal of heterogeneity in the Latino community. He cited a recent study by his organization that found distinctions between native and foreign-born Latinos. The study showed that foreign-born Latinos’ real income has declined over the past two decades, and that they complete three grade levels fewer than native-born Hispanics. These findings indicate a need to address U.S. policies on integrating immigrants by offering English-language or job improvement skills programs, he said.

“There is an absolute need to separate immigrants and their children from the native born because the immigrants have a different set of resources, perspectives, and problems than the native born,” said Rodolfo de la Garza, professor of community affairs at the University of Texas at Austin and vice president at the Tomás Rivera Policy Institute.

On a more positive note, the study found that by the third generation, the grandchildren of the immigrants, there is virtually no difference in income between Hispanic and White non-Hispanic workers with the same level of education.

“For children of immigrants, who make such dramatic gains over their parents, public education is paying off,” wrote Pachón. “It is, therefore, puzzling that federal money targeted at these children through the Emergency Immigrant Education Act—a program designed to assist school districts with large immigrant populations—amounts to only about $50 per child.”

De la Garza said the Census figures that have been released so far present some other interesting findings about the Latino community in the U.S. For instance, groups that have traditionally dominated certain areas, such as the Puerto Ricans in New York, must now contend with other growing Latino populations, like Dominicans, who also want political power because of their growing presence. Likewise, he argues that while there is a Latinization of the United States because of the growing Hispanic population, that increase has not meant a decrease in the proportion of the Mexican-American population. Mexican-Americans still comprise two-thirds of the Latino population, which could mean possibly “the Mexicantization of others.” These and other questions will have to be addressed as the Census releases more figures in the future.

Among other key findings on Latinos from the early Census figures:

• Hispanic men are more likely than non-Hispanic White men to be working or looking for work. In 2000, the labor force participation rate of Hispanic men was 80.9 percent compared to 74.3 percent for non-Hispanic White men.

• Hispanic women have steadily increased their presence in the workforce over the past several years, and their labor force participation rate now approaches that of non-Hispanic White women, 56.6 percent and 60.8 percent, respectively.

• Despite their strong levels of work force activity, Hispanics are more likely than non-Hispanics to work in low-paying jobs. In 2000, nearly one in five (19.4 percent) Latino workers, compared to about one in nine non-Hispanic White workers (11.8 percent), was employed in a “service” occupation, which includes food preparation, personal service, and maintenance jobs.

• Conversely, Hispanics are less likely than non-Hispanic Whites to work in high paying managerial and professional specialty occupations. In 2000, 14 percent of Hispanics were in managerial or professional occupations compared to 33 percent of non-Hispanic Whites. 18 percent of Hispanic women were in managerial or professional occupations, compared to 11 percent of Hispanic men.

• Non-Hispanic Whites were three times more likely than Hispanics (27.4 percent versus 9.6 percent) to report earnings of $50,000 or more in 1999, of those who worked year-round, full-time. Overall, two in three Hispanics (687 percent) compared to two in five non-Hispanic Whites (403 percent) reported earnings of less than $30,000 in 1999.

• Families of Latino married couples are more than four times as likely as non-Hispanic White families to be living in poverty (14.2 percent versus 3.3 percent).
Preparing for a Multiracial Society

No Leadership,
says Harvard Professor

BY MICHELLE ADAM

Nobody has any plans for what to do with three- or four-race communities. How they will work out, how their schools will work out. We are going through a huge dramatic transition, and there is no real leadership, no real defining of issues or holding people accountable," said Gary Orfield, education and social policy professor at Harvard University.

As active civil rights advocates, Orfield and law professor Christopher Edley, Jr., also at Harvard, were especially alarmed at Hopwood v. State of Texas, the historic case in which the court ruled five years ago that an applicant's race and ethnicity could no longer be considered in the college admission process. The verdict struck a serious blow to affirmative action measures that had positively impacted Latinos and minorities in Texas, and it established a precedent for other states to potentially follow.

Hopwood sent a wake-up call across the country to those who had come to rely on affirmative action as an effective tool for establishing greater diversity in academia. Who would be next? What were the alternatives to affirmative action? And what would happen with diversity numbers at Texas universities in the wake of the Hopwood decision?

"My reaction to the news was that this was nonsensical," said Orfield. "When I read that decision, I thought, 'What planet are these judges living on?' I knew that it made a lot of difference to have a diverse body."

Shortly after the news hit, Orfield and Edley summoned an emergency meeting of college presidents, education officials, lawyers, federal officials, researchers, and other interested parties across the country.

"Many college presidents dropped everything and showed up, as did all the ranking federal officials and the lawyers and the researchers. They needed to talk to each other. We found out at that meeting that there wasn't any body of research developing and any idea of what to be
done in the aftermath of affirmative action. And that people were very eager to engage in these kinds of conversations," said Orfield.

It was in this climate that Orfield and Edley came up with the idea of establishing a think tank on civil rights that would connect the legal issues and policy questions to the scholarly world in a powerful manner.

"The researchers didn’t know what the legal battles were about, and the lawyers didn’t know the research, and the administrators didn’t know either," he said. Regarding the benefits of diversity to Whites and to the whole campus, Orfield said, "We had to look at some things that most of us thought were pretty obvious but were not believed and had not been empirically supported in a serious way."

With a small grant, the two professors established The Civil Rights Project, which has become a research center at Harvard University to address equal rights issues.

Their privately funded organization was launched in the fall of 1996 with a couple of conferences and various research studies. The first conferences dealt with the issue of affirmative action and specifically lead to the Project’s book, *Chilling Admissions: The Affirmative Action Crisis and the Search for Alternatives*, edited by Orfield and his colleague Edward Miller. Another conference addressed issues of resegregation in the south.

"We called around the country to find out what research was under way and who had data that could potentially address these issues. We found the potential researchers and told them what we thought was needed and could they do it for us in a relatively short period of time, and almost everyone said ‘yes.’ And we told them that the advantage to them was that their research could actually have a potential effect in the real world, and that they would get to meet and interact with people who actually made policy and decided about lawsuits. That was very appealing," said Orfield.

"Many scholars really do care about their country and about justice, and really do believe their work needs to be heard and have something to say. We found there was a tremendous latent interest in the subjects of racial justice and a desire to participate. People were willing to give it an urgent priority."

During the conferences, where researchers and lawyers were both present (as well as policymakers and other groups), researchers presented their work to lawyers. "A lawyer would stand up and say, ‘This doesn’t really cut it because you didn’t address such and such, and no judge is going to be persuaded by that,’ and that was very informative to people," said Orfield. "By the time we had done the first conference, people were beginning to understand the value of all this, and we were besieged with requests. People were eager to engage. We found there was a tremendous hunger for this kind of information.”

While some academic organizations focus entirely on research and others on policy and legal advocacy, the Project has linked both groups together—within its staff and during conferences. Each group assists the other in making sure that research gathered and produced by the organization also can be used and easily understood by policymakers. In effect, a library of information is being developed that actually impacts the world at hand.

At first, the project hired others to do its research, especially on issues relating to diversity in education, but now, with a larger staff, research also is conducted in house. As part of its work as well, the organization has attempted to cultivate an exchange between all racial groups, even differentiating the groups within groups.

Since 1996, the project has addressed testing and selective admissions, school choice, tracking, diversity in legal education and bilingual education, and more at conferences and through research. While education has been its primary focus, today the Project is also preparing to research and address civil rights’ concerns in housing, census, and criminal justice.

The Civil Rights Project has had an effect across the country. When the University of Washington had to defend its affirmative action policies in court, *Chilling Admissions* was used as evidence to support its case. Congressional staffers picked up ideas from the Project’s research, and amendments were written and incorporated into education bills from its work on education reform. In addition, the organization conducted a survey on the benefits of law school diversity, and survey results were entered as evidence in the University of Michigan Law School case.

The Civil Rights Project has become active in training as well. Most recently, in November, members convened the first meeting of its National Training Institute on Achieving Diversity in Higher Education, launched to help those in the trenches. Co-sponsored by the Association of American Colleges and Universities, the Law School Admissions Council, and The College Board, the Institute hosted approximately 80 lawyers and educators from across the country.

Another new training ground for the project is its Community Training Institute, hosted in May. Community leaders gathered there to talk about education reform and receive the necessary tools to help address these issues in community. After that, the Project’s first Civil Rights Summer Program convened, with 20 sophomores and junior college students gathering in Boston for training in civil rights. They then interned with civil rights groups in Washington, D.C. “We have tried to get students to play active roles and to publish and present at our conferences. We want to create a new generation of intellectuals in this field,” said Orfield.
Orfield noted that it is especially a crucial time for a new generation of intellectuals given the tremendous changes in demographics. "The 2000 Census helps us understand what some of us have been thinking about for a long time. We are in the last period of European American domination of our country, and it's going to be multicultural to an extent that is rare any place in the world. Most multiracial societies have not worked out very well, and we need to think very hard about what we are going to do," he said.

"Education needs to make sure it is involved in civil rights issues. The academic world needs to be holding up a mirror to society and saying, 'Now there is a huge change going on, and it is not working out so well, folks. It's going to be dangerous if it doesn't work out well, and there are things we can do about it.' We need to help the country prepare for this whole transition that it is going through."

When looking at Latinos, Orfield is especially concerned, primarily because this group is growing so rapidly while issues of importance to them are not being addressed. "Latinos are getting more isolated. Half of them are in big cities with weak school systems. Our dropout data shows that only about 50 percent of Latinos are graduating and getting regular high school diplomas at the end of the 20th century," said Orfield. "We are underestimating the problem. Latinos are much more segregated than Blacks in many parts of the country, and they are in inferior schools. We have Latinos locked into dead-end entry-level jobs because of poor education and language problems. We have the justice department projecting that one-sixth of young Latino men are going to end up in jail. We have a lot of big problems that people aren't confronting. Even in civil rights agencies, a lot of them aren't addressing issues of discrimination against Latinos with the same urgency as discrimination against African Americans."

The Civil Rights Project has worked specifically with Latino groups. It co-sponsored The Crisis in Latino Civil Rights conference with the Tomás Rivera Policy Institute in 1997 and, after that, Latinos and Educational Equity: A Public Forum with the Universities of Texas and California. Last winter, the project held a consultation on bilingual education policy in response to a request to do so by leading Latino organizations. Groups gathered to develop strategies for framing bilingual issues in an era of attack on the value of such programs. The organization has worked with the National Council of La Raza, MALDEF, and other Latino groups.

Assessing Percentage Plans

A project of central importance to the organization has been its assessment and research of the percentage plans that have replaced affirmative action in Texas, California, and Florida. A report on the results of this work was expected this summer.

Patricia Martín, who has worked as a researcher with the project since November, has been gathering research already available in Texas and California, and conducting interviews and new research on the Florida case. While Texas and California have been feeling the affects of anti-affirmative action laws, regarding Florida's new situation, Martín said, "You need to track things as they unfold." Of the percent plan, she said, "We definitely have some strong concerns on how it is being disseminated."

What Martín has learned from her research is that each state, each school within the states, and each section of the Latino community may be affected differently by the various attempts to replace affirmative action with laws that require certain percentages of students from each school be admitted to universities. She also recognizes the importance of examining the effects of the laws on minority students within the various states as evidence for future litigation in states not yet impacted by anti-affirmative action efforts.

After reviewing alternatives to affirmative action, Orfield doesn't feel hopeful. "I don't think anyone has any general solution that is better than affirmative action so far," he said. But, he added, "We have a lot more evidence" that can be used to defend such cases as affirmative action in the future.

"There's a body of knowledge developing that is substantial," said Orfield. "If we were to go to the Supreme Court now on the educational value of diversity, we have a lot better information than we had in 1996."

Orfield is as surprised as anyone that the Civil Rights Project has mushroomed into a full-staff operation with ongoing national requests for the organization to continue its work. "We are involved in discussions all over the place. It's exhausting," said Orfield. But, he added, "It's very exciting. There are just a whole lot more people out there who are concerned about these issues than anyone knows. Many young people really do understand that we are going through a transformation, and they want to be involved. They want to understand and don't see anybody in the political system addressing what they perceive to be the realities."

Orfield concluded by commenting that it is impossible to know which road we as a nation will take in this time of transition. "Either we are going to screw this up and really miss an opportunity," he said, or face the possibility of having "a creative diversity that very few countries have ever seen."
NEH Conference at St. Mary’s an Important First

Women on the Border—At Long Last

BY ISIS ARTZE

This past July, more than 200 scholars and students attended “Gender on the Borderlands,” a two-day seminar and conference at St. Mary’s University in San Antonio, Texas, funded by a $25,000 institutional grant from the National Endowment for the Humanities (NEH).

The event was conceived and chaired by Antonia I. Castañeda, Ph.D., O’Connor professor of Spanish borderlands history at St. Mary’s, and a Chicana feminist historian. The initiative, she says, came directly from her research, which centers on gender and sexuality as a “category of historical analysis.”

She noticed that although a variety of annual professional conferences were held in the field of history, there was a void in her discipline. “There have been very few venues, academic or in the community,” Castañeda says, in which “scholars can come together to explore this geopolitical border.” Castañeda also realized that gender issues had not been central to academic or public dialogue in institutions of higher education in the San Antonio area.

With this in mind, she turned to the National Endowment for the Humanities, which offers certain individual and institutional grants strictly to Hispanic Serving Institutions (HSIs), historically Black colleges, and tribal colleges. Their intent, Castañeda explains, is to increase and enhance the engagement with the humanities in colleges, universities, and society in general.

St. Mary’s, an HSI in which 66 percent of undergraduates are of Hispanic descent and 58 percent female, was an ideal location for this conference. Castañeda submitted her proposal to the NEH, and “Gender on the Borderlands” was born.

The fundamental conference goal was to examine the newest historiography on women and gender in the Spanish-Mexican and U.S. borderlands from the pre-colonial period to the contemporary postmodern era of transnationalism and globalization.

“Studying diversity means we look at society comprehensively,” says participating scholar Evelyn Hu-DeHart, chair of the department of ethnic studies at the University of Colorado, Boulder, and that’s why the subject of gender on the borderlands belongs in a university curriculum and in popular discourse. “It’s a way to understand our society and who we are as Americans today.”

The event was structured in two tiers—the conference itself, which was free and open to the public, and seminars for 17 members of St. Mary’s faculty and professional staff.

Antonia Castañeda, Ph.D.
In the opening plenary, four nationally known historians of women and gender on the borderlands presented the latest scholarship on the topic. They were: Inés Hernández-Avila, University of California, Davis; Denna J. González, Pomona College, Pomona, Calif.; Emma Pérez, University of Texas, El Paso; and Evelyn Hu-DeHart.

While the conference was centered on gender along the physical U.S.-Mexican border, it was not limited to this concrete conception of 'border.' "It also addressed such issues as the Muslim-Christian border and crossed geopolitical spaces as well as historical and cultural eras," says Castañeda.

Hernández-Avila presented "Where the Boys Are: Thoughts on the Significance of Chicana History to Chicano Studies and Beyond." González presented "Borderlands Queers: The Challenge of Excavating the Invisible and Unheard." Pérez, chair of UTEP's department of history, spoke of "Women, Globalization, and Border." She proudly notes that her institution is the only university to offer a doctorate in borderland studies. "Borderlands," says Pérez, "is an old term for historians. We're trying to impose new meanings, to extend borderland history beyond Southwest conquest and colonization."

She explains that borderland history is integral to Chicana history. "And she concurs with Castañeda that "very little has been done" with respect to gender and sexuality in the borderlands. Pérez describes the conference as a "networking opportunity," a chance "to get together in a network with other historians, to share progress and problems."

Evelyn Hu-DeHart, who presented "Women, Globalization, and Border," says, "It's not a conference in the traditional sense; it's really a teaching conference with hard work and extensive, in-depth workshops."

"We tend to think of globalization as NAFTA, as wonderful, inevitable, and that everybody benefits," says Hu-DeHart. Globalization discussion "tends to focus on lowering barriers for trade, so that capital can cross borders," she adds.

"The underside of globalization, the darker side," she explains, "is the side that those who glorify it like to minimize—that is, the flow of labor across borders and the nature of this labor."

Slavery, mining, and contract labor, she says, are examples of labor created by globalization. Under current globalization, more than 50 percent of the laborers are women, she says, "sweatshop labor, service industries, domestic servants, and sex workers."

The next two days of the conference consisted of 30 sessions. Among the topics: "Gender, Race, Color, and Class in the Classroom, and the Spaces In-Between," "Women's Advocacy, Reform, and the Politics of Immigration on the U.S./Mexico Border," and "Women of Color in the Contemporary Theater Scene."

"There was a strong and broad array of areas of exploration of analysis from multiple positions and perspectives," says Castañeda, adding that she especially enjoyed a talk about Tejanas and music.

Passing the Torch
Castañeda was surprised and pleased to see that many of the conference attendees were young, including graduate and undergraduate students. "The foundational scholars were the plenary speakers. They wrote the first articles on the subject and raised the issue of gender on the border." But the presentation and panels consisted of the next generation. "They are young and are looking at new questions, expanding the categories," she says.

Of the younger attendees, nine were undergraduates from the University of Texas at El Paso, participants in the MacNair program, which allows undergraduates to become familiar with research and conferences before their graduate and professional work. To them, the conference "provided a venue for participating and interacting," says Castañeda.

"Attendees were also pleased to have had the opportunity to engage across disciplines," she says, explaining that the conference was first intended to be a history conference, but quickly became interdisciplinary, with the topics approached from different perspectives.

"It was a unique and important historic conference in this region," concludes Castañeda.

For Hu-DeHart, an event such as the conference "gives substance to the rhetoric of diversity."
ACE and NAB Examine Challenges Facing Research Collaborations

WASHINGTON, D.C.

The explosion of scientific and technological advances in recent years has opened up an exciting era of exploration that promises to address age-old human problems and growing national, international, and global concerns as well as foster economic growth and development. A critical component of the nation's innovation explosion has been collaborative partnerships between universities and industry.

However, the increased attention on these partnerships—brought about by rising need, growth, and importance of these collaborations in recent times—has revealed a number of issues that threaten to hamper their effectiveness and limit the promises of research.

These issues are analyzed in a new publication released by the Business-Higher Education Forum, Working Together, Creating Knowledge: The University-Industry Research Collaboration Initiative. The forum is a partnership of the American Council on Education and the National Alliance of Business, a membership organization of chief executives from U.S. businesses, colleges and universities, and museums. Its goals are to increase communication among the sectors, to analyze issues of mutual concern, and to deliberate on courses of action that will bring about positive change.

The publication is based on a two-year study of university-industry research collaborations conducted by the forum’s special task force. [It was mailed to CEOs of Fortune 100 companies, college and university presidents, governors and state legislators, and selected representatives of the research community.] The report examines such issues as intellectual property, indirect costs, and conflicts of interest. It also contains recommendations and best practices for developing and maintaining successful partnerships.

Some research collaborations have experienced serious, high-profile difficulties, with participants voicing frustration over complex issues that get in the way of achieving successful outcomes,” said Hank McKinney, board chair and CEO of Pfizer Inc., and co-chair of the forum’s task force that reviewed research collaborations. “The report is intended to help clarify the issues involved with such collaborations and to provide thoughtful, balanced, and useful guidance that will increase the number and quality of research collaborations.”

Nils Hasselmo, president of the Association of American Universities and co-chair of the Forum’s task force, expressed hope that the report will provide a foundation and framework for sustaining an ongoing dialogue among academia, industry, and government.

College Board Computer-Based Exams Provide Instant Test Scores

NEW YORK, N.Y.

The College Board announced that all College-Level Examination Program (CLEP) exams will be administered via computer, providing students with instant score results after exam completion and enabling them to immediately plan their subsequent coursework.

Since 1967, The College Board has offered CLEP examinations via paper and pencil, which enabled students to demonstrate knowledge and receive college credit or exemption from a requirement in numerous subject areas. The new technology will allow testing centers to offer exams more frequently, allowing students greater flexibility in fitting CLEP exams into their busy schedules.

"For students who have acquired college-level knowledge through on-the-job experience, independent study, or advanced high school classes, CLEP exams are an ideal way to save time and money," said Ariel Foster, associate director of CLEP at The College Board. "And now, instant access to scores can save students even more valuable time by eliminating a wait period for exam results."

CLEP, the nation's most widely accepted credit-by-examination program, helps high school, current college, and non-traditional students shorten the path to a college degree. With qualifying CLEP scores, students can fulfill proficiency requirements and bypass introductory courses—cutting a direct path to the coursework most relevant to their major or career. CLEP is particularly convenient for students who have full-time jobs or for those who simply prefer to study on their own.

CLEP exams also offer a low-cost method for earning college credit. At $46, each exam is a fraction of the tuition required for a similar college course. Students can also demonstrate their knowledge in a wide array of subjects generally taught in the first two years of college. The 90-minute exams are offered in more than 34 topics, from Spanish language to marketing.

Students have the opportunity to prepare for CLEP exams using the CLEP Official Study Guide, which helps students learn more about CLEP exams, decide which CLEP exams to take, and interpret CLEP scores. It includes sample test questions for all 34 CLEP exams and it provides test-taking tips and a list of study resources to help students prepare for the exams. For more information about CLEP, visit www.collegeboard.com/clep.
NCLR Reports Lack of Latino Savings Limits Economic Security

WASHINGTON, D.C.

The National Council of La Raza (NCLR), citing recent data showing the gap between White and Hispanic household wealth at 10-to-1, says that the major cause of this wealth disparity is a lack of savings among Latino households. Personal savings are one of the most important ingredients in asset accumulation, which is what constitutes wealth and net worth. When Latinos save less than other groups, their net worth and economic security typically decrease.

According to NCLR, the 1998 Survey of Consumer Finances revealed that fewer than half (44.9 percent) of Hispanic families reported spending less than the total of their previous year’s income, meaning more than half of Latino families effectively saved nothing. Furthermore, the Employee Benefits Research institute’s 2001 Retirement Confidence Survey revealed that only one-fourth (26 percent) of Latinos surveyed, compared to 42 percent of Whites surveyed, had any other savings or investments besides what they had saved for retirement. This lack of savings limits Latinos’ upward economic mobility because savings are needed to purchase assets such as a home, stocks and bonds, or a retirement account. For example, getting approved for a loan to buy a house or investing in the stock market is nearly impossible without first having some extra money saved.

There are specific barriers that keep many Latinos from saving, says NCLR.

Limited income is one obvious barrier, especially for Hispanics, who are more likely than other American families to be low-income. While studies and anecdotal evidence have shown that low-income households can save, the ability to do so is challenged when income must be used for basic needs such as rent, food, transportation, and clothing.

Another barrier to saving involves the structure of financial markets, which is often indifferent to the needs of low-income households and to the cultural traits of the Latino community. Most banks offer few products that are affordable or practical for low-income people, and many banks do not have Spanish-speaking employees.

NCLR calls for the expansion of the Earned Income Tax Credit program and the Individual Development Accounts program to significantly help provide incentives for low-income households to save and achieve upward economic mobility. It is critical, says NCLR, for community-based organizations to take steps to implement such programs while funds remain.

NACE Finds College Grads Continue to Command Top Dollar

BETHLEHEM, Pa.

Despite the economic downturn, a recent salary report from the National Association of Colleges and Employers (NACE) shows that many new college graduates were able to command top dollar for their skills.

NACE’s summer Salary Survey shows that starting salary offers to many new college graduates increased from last year. The average salary offer to economics/finance grads, for example, was $40,577, up 8.2 percent from July 2000.

Business administration grads attracted attention from a variety of employers. They saw their average offer rise 6.8 percent to $38,449.

Management information systems grads saw their average offer increase 4.4 percent to $45,585—many of those offers coming in high-paying fields.

Despite slowing in the tech sector, computer science graduates continued to command hefty starting salaries as a variety of employers vied for their talents. Their average offer rose 8.2 percent to $52,723.

Although demand for information sciences and systems grads appeared sluggish earlier in the year, their current average offer stands at $45,182, a 4.1 percent increase over July 2000 figures.

Many graduates in the engineering disciplines also continue to command high starting salaries and saw substantial increases in their starting salary offers. For example, the average offer to computer engineering grads jumped 8.9 percent over July 2000 to $53,924, and the average offer to electrical engineering graduates rose 7 percent over July 2000 to $51,910. Petroleum engineering grads saw their average salary offer spike up 8 percent to $53,878.

Among liberal arts disciplines, offers to English grads rose 5.5 percent, bringing their average up to $31,501, while sociology grads enjoyed a 6.8 percent increase to push their average to $28,812. Psychology grads, posting a 5.8 percent increase, enjoyed an average offer of $30,338. History grads, however, saw their average offer slip to $30,575, down 3.1 percent since July 2000.

While offers to political science grads increased by only 0.1 percent, they did command one of the top salaries among the liberal arts disciplines, with an average offer of $32,774.
Smithsonian "Americanos" Exhibition Travels Country

Two nationwide tours are presenting works from the Smithsonian Institution’s traveling exhibition "Americanos: Latino Life in the United States," a project of Olmos Productions, Inc., organized by SITES and the Smithsonian Center for Latino Initiatives.

Both tours offer an extraordinary and intimate portrait of Latino communities in America through the work of 50 prize-winning photographers, focused on themes of family, community, education, and culture. The 120 photographs displayed reflect the breadth and variety of the Latino experience, encompassing differences in national origin, economic status, education, religion, and language.

M-DCC Business Chair Attends Harvard Summer Institute

Rolando Montoya (pictured), Wasis Shomar, and Carol Miller, administrators from Miami-Dade Community College (M-DCC) in Florida, attended the prestigious Harvard University Institutes for Management and Leadership in Education 2001. The forum seeks to develop new insights and new techniques for higher education leadership. Rarely do three from the same school attend the same year.

Montoya, an expert in international finance and professor of accounting, finance, economics, and business statistics, recently became dean of academic affairs at M-DCC’s Kendall Campus. As an administrator there, he has created and directed many new scholarships, developed new courses, improved curriculum in finance, business, and accounting, and worked with several universities to facilitate the transfer of M-DCC graduates. A native of Cuba, Montoya is a certified financial manager and certified management accountant; and he has been included in "Who’s Who in the Florida Latin Community."

New Mexico Highlands Collaborates with Oldest University in Spain

New Mexico Highlands University (NMHU) entered into an agreement with Universidad de Salamanca, the oldest university in Spain, offering students a unique degree. The agreement, signed with 11 other U.S. universities, offers students eight credits toward a master’s in southwest studies with a concentration in "Spanish Language and Hispanic Culture of the Southwest."

NMHU President Selimo Rael (pictured) signed the Hispano-North American Inter-University Consortium Agreement for the University. Sara Harris, chair of the department of languages and literature, attending at the request of NMHU’s International Education Advisory Committee, explained that courses taken in Salamanca will cover Spanish grammar, reading, writing, and colloquial Spanish; social and geographic varieties of Spanish; Spanish literature; and the art, society, politics, and economy of modern Spain.

The agreement has great potential, said Harris. "We want this to truly become a bilateral association in that students and eventually professors would come from Spain and the other partner universities to take part in our master’s project."

Delaware Professor Receives National Science Award

University of Delaware (UD) assistant professor of electrical and computer engineering Javier Garcia-Frias received a National Science Foundation Career Award for his research into improving the quality of wireless communications. The award carries a five-year stipend of $300,000, allowing Garcia-Frias to continue researching methods for reducing errors in the transmission of digital information through wireless communication.

Garcia-Frias performed his undergraduate and graduate work in Spain, receiving combined bachelor’s and master’s degrees in electrical engineering from Universidad Politécnica de Madrid and combined degrees in mathematics from Universidad Nacional de Educación a Distancia, Madrid. In 1993, he was awarded the Premio Nacional de Terminación de Estudios Universitarios by the Spanish government, awarded to only three electrical engineering students in the nation. He joined the UD faculty in 1999 after receiving a doctorate in electrical engineering from the University of California-Los Angeles.

He is affiliated with the Delaware Biotechnological Institute, a partnership of state government, Delaware institutions of higher education, and area industry to promote cutting-edge scientific research, provide biotechnology-based education, and support economic development.

South Florida Hires Dean of Engineering

The University of South Florida hired Louis A. Martín-Vega as dean of the College of Engineering. He was director of the National Science Foundation’s (NSF) division of design, manufacture, and industrial innovation and acting director of NSF’s engineering directorate.

An internationally recognized educator with vast experience in academia and private industry, Martín-Vega has been on leave from Lehigh University, where he chaired the department of industrial and manu-
manufacturing systems engineering from 1994-98. U.S. News & World Report ranked Lehigh among the top 20 industrial and manufacturing programs in the country, and the National Research Council ranked it 5th among Ph.D-granting programs in industrial engineering. His research has been supported by federal agencies and conducted with many high-technology companies.

Marín-Vega holds a bachelor's degree in industrial engineering from the University of Puerto Rico-Mayaguez, a master's in operations research from New York University, and a master's and doctorate in industrial systems engineering from the University of Florida.

**Mt. Hood Students Receive Scholarships to Study in Mexico**

Two students from Mt. Hood Community College (Ore.) each received a $500 scholarship toward their study in Mexico through the College's study abroad program. Forestry major Cara Hughes and integrated natural resource major Rob Smith were granted the award to help pay for intensive Spanish instruction they received in San Miguel de Allende, Mexico, in the spring.

Through Mt. Hood's study abroad program, the students earned credit and enjoyed a stay with a Mexican family as they received Spanish instruction. They volunteered for a conservation project in which they worked hands-on at a botanical garden, nursery, and forest reserve. They utilized their knowledge of restoration of natural areas; reviewed soil, water, and wildlife; worked on propagation; and optimized management plans.

Mt. Hood offers study abroad programs in Canada, England, Italy, and Greece, in addition to Mexico.

**Fresno City Hosts Lecture on the Amazon**

In California, Fresno City College (FCC) hosted a lecture series and exhibition on the Amazon and Cerrado rainforests, their indigenous tribes, biodiversity, and ecosystems. World-renowned Brazilian expert Dr. Nelson DeSilva gave two free lectures during the series and spoke at the official opening of the FCC Museum of Anthropology exhibition "Vanishing Places, Endangered People: Greater Amazonia," housing 50 Brazilian artifacts from indigenous tribes.

The DeSilva lecture series centered on his work with several Amazonian tribes that have had little contact with the outside world. He also spoke about the ecosystems of Brazil's rainforests and about helping inventory and rescue animals from their endangered environments.

The museum exhibition displayed such artifacts as baskets and bows and arrows. The artifacts have different uses and meanings—both everyday and ceremonial. The lecture and exhibit together provided new insight into the unique but depleted rainforests.

**Argentine Dinosaur Exhibit at Los Angeles Natural History Museum**

The Natural History Museum of Los Angeles County (Calif.) and Museo Carmen Funes in Argentina are presenting the world premier exhibition "Thirsty Giants: Discovering Dinosaur Eggs," displaying the eggs and embryos of the giant creatures that continue to capture our curiosity.

The 6,000 square-foot exhibition features recent discoveries in Patagonia, Argentina, the area dinosaurs selected 80 million years ago as a nesting site for hatching their young. The Argentine site is the largest ever discovered and contains the first embryonic dinosaur skin, the first dinosaur embryos found in the Southern Hemisphere, and the first embryos identified as sauropods, a family of giant, plant-eating, four-footed, dinosaurs.

Visitors have the opportunity to touch dinosaur eggs, see technicians prepare fossils, and "excavate" dinosaur nests at a dig pit, containing bone replicas. They may also walk beneath a full-scale model of a 100-foot "itanosaurus" (Argetinosaurus), the largest dinosaur ever discovered. The entire exhibition is presented in both English and Spanish.

**Colorado State 5K Run Honors Memory of Gutiérrez**

Colorado State University held its eighth annual Cinco-Cinco 5K Run/Walk to benefit the Gilbert Gutiérrez Memorial Scholarship Fund. Gilbert J. Gutiérrez, Jr., Colorado State's embusman from 1990-93, was an accomplished runner who was struck and killed by a drunk driver while running. A proponent of the "win-win" concept, he was dedicated to improving access and support for students interested in higher education and spent much of his life trying to open doors for other Hispanics.

"This event honors the loss of a dear friend," said Barb Mussleywhite, assistant director of the office of undergraduate student retention. "We would much rather be scheduling coffee with Gil than scheduling this event to honor his memory."

The Friends of Gil Gutiérrez organizing committee and the Colorado State University Recreational Sports Department sponsored the run. All proceeds from the event go toward the Gilbert Gutiérrez Memorial Scholarship Fund, which awards scholarships to Colorado State students and encourages sober driving.

**Rutgers Study Shows Internet Can Disrupt Student Performance**

Research conducted at Rutgers, the State University of New Jersey, found that some college students are performing poorly because of excessive amounts of time on the Internet. The findings were reported in "Internet Use and Collegiate Academic Performance: Early Findings," by Robert Kubey, Michael Levin, and John Barrows, in the June issue of the Journal of Communication.

Students reporting Internet-related schoolwork problems were found to spend five times more hours online than those who did not report problems. They were also more likely to report that Internet use caused them to stay up late, get less sleep, and miss class. The authors found that the new real-time social opportunities—chat rooms and instant messaging—made possible by the Internet are what really hold the Internet user to the screen, especially late at night.

Institutions such as the University of Maryland, University of Washington, the University of Texas-Austin, and Marquette University reported similar findings concerning the overuse of the Internet. They have begun to focus parts of their counseling or student health services on possible Internet-related problems.

**Alba-Buffill Professor Admitted to Spanish Language Academy**

Dr. Elio Alba-Buffill was admitted as a new member of the North American Academy of the Spanish Language. The ceremony was held at St. John's University (N.Y.).

Alba-Buffill is professor emeritus of the City University of New York-Kingsborough Community College. He is also the national...
executive secretary of the Pan American Cultural Circle of USA. In his admittance speech, he spoke about Enrique Labrador Ruiz and his renovation of the Spanish-American novel.

Santa Monica Internship Program Celebrates 10th Anniversary

At a reception on Capitol Hill, Santa Monica College (Calif.) celebrated the 10th anniversary of its Dale Ride Internship Program, which helps launch careers by providing internships around the country.

Students serve eight- to 10-week summer internships at the White House, congressional offices, government agencies, and private policy organizations. Hosts have included congressional representatives and committees, the President’s Initiative on Race, Hispanic News Media Association, Hispanic Association of Colleges and Universities, Congressional Black Caucus, and the Feminist Majority. Some interns are the first in their family to go to college, some are single parents, and some are from war-torn countries such as El Salvador and Vietnam. About half are minorities.

"The internship changed my life," said Rosa Ramirez. "It opened doors to a world of opportunities for me." Ramirez, a 1999 Dale Ride intern, graduated as a journalism major from Santa Monica. Rearmed by a single mother, she is the youngest of eight children and the first in her family to go to college.

Fresno State Physical Therapy Graduate Wins National Award

California State University-Fresno graduate student Michael Alaniz (pictured) won the 2001 Minority Scholarship Award for Academic Excellence for Physical Therapist Students from the American Physical Therapy Association. The award acknowledges and rewards demonstrated participation in minority affairs activities and services, the potential for superior achievement in physical therapy, and academic excellence.

Alaniz participated in a curriculum development and community-based rehabilitation project with the Functional Therapy Program at the National University of Honduras. He translated curriculum materials into Spanish and worked for three weeks at a small community clinic in Honduras. As a Graduate Equity Fellow at Fresno State, he researched hundreds of private, governmental, and professional organizations, addressing inter-professional practice, service delivery, and educational, social, and health-related needs of children and families. He is a board member of Artes Americas and has been an instructor and assistant director of Los Danzantes de Aztlán, a folkloric dance group.

Fresno State graduate student James Moore received the American Physical Therapy Association Student Assembly’s 2001 Outstanding Student Liaison Award.

News from City University of New York

- The City University of New York (CUNY) sponsored the annual Big Apple Job Fair at the Jacob K. Javits Convention Center in Manhattan. The event gives CUNY students a head start on their careers through access to a large, diverse group of major employers. It drew nearly 130 major employers recruiting applicants for high-paying jobs and challenging career opportunities. Posts included financial analyst, teachers, book editors, engineers, cancer researchers, computer specialists, and registered nurses, among others.
- CUNY’s new financial aid guide “You Can Afford College Now!” offers potential students helpful advice on a variety of city, state, and federal financial aid packages, including scholarships and programs available only to those students attending the University. Copies are available by calling (212) 794-5317.

Cal State-Fullerton Elects López Student Body President

Alex López, a 20-year-old sophomore from Santa Ana, was elected president of the Associated Students (A.S.) at California State University-Fullerton. Edgar Zazueta, 21, ran with López to become vice president.

A business major with a concentration in finance, López developed his work ethic and interpersonal skills working at his parents’ neighborhood market. His father came to Southern California from Mexico and worked long hours to raise money, get married, and purchase the market.

“My parents have always worked hard to give me what I need to be successful,” said López. “They even came on campus to help me campaign.”

In high school, López played football and baseball and starred on the wrestling team. As a Cal State-Fullerton first-year student, he joined the A.S. finance committee, leading to a position on the A.S. board of directors, representing the College of Business and Economics. He has been president of the Latino Business Student Association and a member of the Pi Kappa Phi fraternity.

Murillo Attends Summer Policy Data Institute

Dr. Alice Murillo, current vice president of instruction at Columbia College (Calif.), was one of 24 research fellows selected nationally by the Association of Institutional Research to attend a recent Summer Policy Data Institute in Washington, D.C. The National Science Foundation (NSF) and the National Center for Educational Statistics funded the fellowships.

“It is a great privilege to be able to explore such a wealth of information,” said Murillo, citing the “incredible databases compiled by professionals across the nation.”

Murillo had been dean of science, mathematics, and engineering at Sacramento City College, where she was involved in many student-oriented programs and processes. She spearheaded an NSF grant to help the Los Ríos Community College District Scholars Program make awards to transfer-bound students majoring in computer science, mathematics, engineering, or engineering technology. Murillo was the first community college dean to receive the statewide Karl Pister Award as the Outstanding MESA (Mathematics, Engineering, Sciences Achievement) Administrator in California.

North Florida Director Named Top Dietitian

Judith C. Rodríguez, University of North Florida (UNF) nutrition program director, was named the 2001-02 Distinguished
Dietitian by the Florida Dietetic Association.

"It is both humbling and an honor to be recognized by my peers," said Rodríguez. "Nutrition and dietetics is an exciting and versatile profession with many highly competent practitioners and it's great to be a part of that."

Rodríguez, who started at UNF in 1988 as an academic advisor in the College of Health, was director of the university’s nutrition internship program, was president of the Jacksonville Dietetic Association, and is active in the American Dietetic Association, a national professional organization of about 68,000 members.

She is the second recipient of the award, presented annually since 1965, from UNF—the first being Dr. Judith Perkin, associate dean at the College of Health.

Minority Health Advisory Council Meets in D.C.

The National Minority Advisory Council (NMAC) to the Department of Health and Human Services DHHS met with Secretary Tommy Thompson in Washington, D.C. The committee advised the secretary on ways to improve the health of racial and ethnic minority populations, eliminate racial and ethnic disparities in health, and develop goals and program activities within the department.

The committee has 12 members, three each from the Hispanic/Latino, Black/African American, American Indian/Alaskan Native, and Asian American/Pacific Islander communities.

Hispanic representatives include Dr. Esteban Flores of the University of Colorado-Denver; Dr. Antonio Villaruel of the University of Michigan-Ann Arbor, and Salvador Balcoota, a social worker and CEO of Centro de Salud Familiar La Fe, Inc., of El Paso, Texas.

The DHHS has been addressing minority health issues through a U.S. presidential plan to eliminate racial and ethnic disparities by the year 2010. The effort targets infant mortality, diabetes, cardiovascular disease, cancer screening and management, HIV/AIDS, and child/adult immunizations.

Pictured (l. to r.): Flores; Louis Stokes, chair of the NMAC committee; and Villaruel.

Getty Museum to Exhibit Work of Mexican Photographer

The Getty Center announced that works of Mexican photographer Manuel Alvarez Bravo will be exhibited at the J. Paul Getty Museum, Nov. 13 to Feb. 17, 2002. Long hailed as one of the great masters of twentieth-century photography, Alvarez Bravo blends an acute social consciousness with a poetic and often enigmatic modern sensibility.

Alvarez Bravo's work came into its own during the 1930s, following the social and political turmoil of Mexico's 10-year revolution. It contains both surrealistic undertones and a magical documentary reality. Since then, he has continued to make photographs that lend artistic and social insights into the complexities of Mexican culture. The exhibition traces his evolution as an artist from his early pictorial-inspired beginnings, to his refined formalist style, and to his later emotion-driven imagery. The exhibition coincides with his 100th birthday, Feb. 2, 2002.

To learn more about this and other events, go to getty online at www.getty.edu.

Southwestern Adopts New Mascot

Southwestern College (Calif.) has officially adopted the jaguar as its new mascot. Its former mascot was Apaches, which relates to a North American Indian tribe of the Southwest U.S.

School officials said the change was based on two factors. The school wanted a mascot to coincide with its Maya-inspired campus architecture, and also wished to defer to cultural sensitivity to Native American issues. In recent years, the school had ceased using a graphic image of the Apaches mascot and changed the name of the student newspaper from Athabascans, the language spoken by the Apache, to the Southwestern Sun.

The jaguar is a "new world" animal important in the culture of the Maya, depicted with reverence in their art and associated with royalty and strength.

Antelope Valley Selects New President

In California, Antelope Valley College (AVC) named Dr. Daniel Larios its new superintendent and its seventh president.

"We are very thrilled and happy that Dr. Larios has accepted the president's position," said Michael R. Adams, president of the college district's board of trustees, which searched nationwide for a successor to Dr. Linda M. Spirk, former AVC president.

Larios was president of Fresno City College since 1997 and earlier, president of Irvine Valley College. He comes to AVC just as the single-college district is planning to establish a second campus to accommodate the growth within the northern Los Angeles County and eastern Kern County area. The district encompasses nearly half of Los Angeles County's landmass.

Larios has a bachelor's degree from California State University-Fresno, a master's from CSU-Bakersfield, and a doctorate from Nova Southeastern University.

Kansas Names Murguia to New Post

The University of Kansas (KU) selected Janet Murguia as its first-ever executive vice chancellor for university relations. She will oversee all aspects of the University's external relations with the public, including governmental and public affairs.

Murguia most recently campaigned with former Vice President Al Gore on his run for the presidency. As deputy campaign manager and director of constituency outreach, she was a spokesperson for the campaign, handling interviews with media outlets. She also worked in the White House during the Clinton administration as deputy assistant to the president, deputy director of legislative affairs, and senior White House liaison to Congress.

Murguia grew up in a Mexican-American neighborhood in Kansas. Her brother Ramón is chair of the National Council of La Raza; her brother Carlos, a federal judge in Kansas; and her sister Mary, a federal judge in
Arizona. Carlos and Mary are the nation's first brother and sister to become federal judges.

Murguía has two bachelor's degrees and a doctorate, all from KU.

**Penn State Researcher Reports on Suburban School Segregation**

A Pennsylvania State University researcher, Dr. Sean F. Reardon, says that as nationwide enrollment of Black, Hispanic, and Asian students in suburban schools has increased, there has been a concurrent rise in the levels of school segregation between White and minority students. Reardon, assistant professor of education and sociology at Penn State, and John T. Yun, Harvard University doctoral student, documented their research in the report "Suburban Racial Change and Suburban School Segregation, 1987-1995," published in the journal *Sociology of Education*.

Reardon and Yun analyzed data on the racial enrollments of all public schools in U.S. suburban areas. They measured segregation by determining the degree of unevenness in the racial compositions of suburban schools. They found areas with increased minority populations to have rapid increases in segregation with a declining enrollment of White students. Suburban segregation from Whites is highest for Blacks and lowest for Asians, due for the most part to the residential differences of White and minority students.

According to Reardon, a research associate with Penn State's Population Research Institute, integration could best be achieved through consolidation of suburban school districts and through federal housing policies aimed at increasing racial and socioeconomic residential integration.

**Texas-San Antonio Staff Member Named to Philanthropy Commission**

Richard Ortega, associate development director at the University of Texas-San Antonio (UTSA), was named to the Council for the Advancement and Support of Education (CASE) Commission on Philanthropy. Ortega is closely involved with the UTSA Biotechnology Initiative capital expansion effort. He was one of 24 members selected from a pool of more than 200 candidates to serve on one of three CASE national commissions on philanthropy, alumni relations, and communications.

CASE is the largest international association of educational institutions, with a membership of nearly 29,000 colleges, universities, independent elementary and secondary schools in 42 countries. More than 21,000 advancement professionals working in alumni relations, communications, and fundraising are CASE members.

**Wisconsin-Milwaukee Students Guaranteed a 4.0 GPA**

The University of Wisconsin-Milwaukee (UWM) School of Business Administration offers multicultural business and engineering students free seminars outlining a unique method of studying that, according to school advisors, is guaranteed to deliver a 4.0 grade point average. The Guaranteed 4.0 GPA Program utilizes a three-step study method based on the principle that repetition ensures long-term retention and learning. If students follow the plan exactly and fail to earn all As, they receive $100 from seminar presenters. The program incorporates practical stress management, time management, and a personal time analysis. Students leave the seminars with a personalized weekly schedule and results-oriented steps that prepare them for academic success.

UWM accounting senior Michael Peeples was on academic probation when he heard about the program. "I had always told myself that I was going to try harder every semester, but it just always seemed to fade in the wind," said Peeples, who went on to try the program. By the close of the next semester, Peeples joined the schools top students on the Dean's Honor List. The program gave him a new attitude, which translated to better study techniques and a renewed commitment to academic success.

**Chabot-Las Positas Selects New Chancellor**

In California, the Chabot-Las Positas Community College District named Dr. Susan A. Cota chancellor of the board of trustees. Cota, president of Las Positas College for eight years, is the first Hispanic female chancellor in the District's 40-year history and the only female Hispanic chancellor in the California community college system.

Cota had been dean of students at Las Positas and at the College of Alameda and had worked in the state chancellor's office as the director of the disability services program for California's 107 community colleges.

She has a bachelor's degree from Immaculate Heart College in Los Angeles, a master's from San Francisco State University, a doctorate from the University of San Francisco, and is a graduate of the Harvard Seminar for New Presidents. She is a member of the Pleasanton Rotary Club and the Tri-Valley Education Council.

**Nazareth Hosts Renowned Educator**

Nazareth College (N.Y.) held a conference, "Think About Teaching," featuring a lecture by nationally renowned educator Marva Collins, who encouraged college-bound minority students to consider careers in education, social work, and psychology.

Collins rose to prominence in 1975 with the founding of the Westside Preparatory School in Chicago. Her success with African American students deemed "unteachable" led to profiles and appearances in magazines and on television shows as well as a made-for-TV movie highlighting her life.

Using a special methodology incorporating acceptance, self-reliance, and self-determination, Collins has trained more than 100,000 teachers, principals, and administrators, and staff at many Fortune 500 companies. She has helped school systems increase standardized test scores and founded the Marva Collins Preparatory School in Milwaukee, Wis.

**Cal Poly Recognizes Social Advocate**

California Polytechnic State University student Ryan Trammell was one of seven students to receive a Land Family Quest for the Best award for his ability to balance academics and community service. The award honors students who exemplify the core values of excellence, stewardship, collaboration, integrity, and community. It is given to leaders in each of the University's six colleges and to one in student government.

Trammell, a senior social sciences major, won the College of Liberal Arts award. An activist in social justice and political causes,
Trammel was an officer of MEChA (Movimiento Estudiantil Chicano de Aztlán), an organization dedicated to promoting cultural, political, and social awareness within and without the Chicano community, and was part of The Cultural Crisis Coalition, which helped organize students in support of a university outreach and retention program.

**Lamar and Saltillo Tech Focus on Environment**

Lamar University (Texas) and the Instituto Tecnológico de Saltillo (Mexico) signed an agreement, pairing the two institutions—faculty, students, and equipment—in the search for knowledge and technologies that protect the environment.

“We have a lot of complementary scientific expertise and equipment,” said chemistry professor Davis Cocke, holder of the Gill Chair in Chemistry and Chemical Engineering at Lamar.

Industrial growth along the Texas-Mexico border brings a great potential for an increase in environmental pollution. Hoping to deter this, Cocke envisions “a very active and funded collaboration” between the two institutions, with frequent faculty and student exchanges and joint research projects in many areas. He has already started work with visiting professors José Parga and Efrain Almanza from Saltillo.

Lamar plans to present a similar proposal to three other Mexican institutions in the border region—Universidad de Coahuila, Universidad de Chihuahua, and Universidad de Sonora—for cooperative work in environmental chemistry and engineering.

**CCNY Hosts Symposium on Dominican Diversity**

The City University of New York Dominican Studies Institute at The City College of New York hosted a multidisciplinary, international symposium on the role of homogeneity in standard definitions of “Dominicaness” and the place of diversity in the social agendas proclaimed by the global society. “Up from the Margins: Diversity As Challenge to the Democratic Nation” brought together Dominican and non-Dominican voices from the Dominican Republic, the United States, and other “diasporic” sites.

More than 60 scholars, artists, and cultural workers spoke about the recognition of diversity—ethnic, cultural, social, political, sexual, etc.—as a fundamental value in today’s society. The idea is that distinct communities or constituencies have a right to assert their difference without losing or weakening their claim to full citizenship. The symposium is believed to be the first major attempt by any academic institution to create a forum for intellectual voices from the Dominican diaspora and its homeland to discuss ways of further democratizing Dominican society.

**News from Miami-Dade**

- Miami-Dade Community College's (M-DCC) School of Design Technology received a $550,000 grant from the Florida Department of Education to begin an Associate in Science degree in telecommunications engineering, a postsecondary adult vocational (PSAV) program, and five intermediate college credit and PSV certificates. The program's potential is enhanced by the fact that Miami-Dade County will soon become the site of the nation's newest Network Access Points, making South Florida a new Internet gateway to Latin America, the Caribbean, Africa, and Europe.
- Luis Penelas, Jr., representing the Penelas family, presented M-DCC with a gift of $15,000 for the Mirta Penelas Foundation Scholarship Program. The M-DCC Foundation, Inc., matched the gift to total $30,000, increasing the endowment to $160,000. Luis Penelas, Sr., and sons Alex Penelas and Luis Penelas, Jr., established the Foundation in honor of the late Mirta Penelas. The funds go toward need-based scholarships for M-DCC students with cancer and students with family members who have the disease.
- Ten students in M-DCC's aviation program were awarded $4,500 Eig-Watson Aviation Scholarships. Founded in 1987, they are the largest aviation scholarship awards in the country. Lois Eig-Watson and Harvey Watson created them in memory of Lois' late husband, aviator Saul Eig. This year's M-DCC recipients are Alberto Noel Bencosme, Jesús Alberto González-Rio, Timothy Lewis Jackson, Eric Jesús Lorie, Santiago Clemente Malagon, Victor Moreno, Jr., Kristopher Joseph Murphy, Ray O'Neill, Hannah Packouz, and Joseph Sampson III.

**In the Shadow of the Liberator: Hugo Chávez and the Transformation of Venezuela**

By Richard Gott

Venezuelan President Hugo Chávez draws his political inspiration from radical figures in 19th-century Venezuela, including Simón Bolívar, known as the Liberator. This book, based on interviews, historical research, and reportage, reveals the international ambition of Chávez to recreate the Bolivarian dream, presenting a far-reaching alternative future for Latin America.

**Capital Flows, Capital Controls, and Currency Crises: Latin America in the 1990s**

Felipe Larrain B., ed.

This volume analyzes the return of private capital to Latin America, examines the effects of the crises on capital flows, and studies the main policy options available to economic authorities under these diverse circumstances.

**Building the New World: Studies in the Modern Architecture of Latin America 1930-1960**

By Valerie Fraser

The period between 1930 and 1960, when Latin American economies expanded rapidly, was an era of incomparable inventiveness and creative production, as various governments...
strove to shake off their colonial pasts and make public their modernizing intentions. This book revisits that time, when politicians and architects saw architecture as literally, a way of building themselves out of underdevelopment and into the new world of a culturally rich and socially inclusive future.

From Puerto Rico to Philadelphia: Puerto Rican Workers and Postwar Economies

By Carmen Teresa Whalen

After World War II, Puerto Ricans flocked to the mainland in droves—many, to Philadelphia. They came for many reasons: the island's colonial relationship to the United States, the already globalizing economy, changes in regional and local economies, and immigrants' social networks. This book recounts the experiences of this group of hardworking labor migrants and how they transformed themselves into a respectable “underclass.”

An Argentine Passion: María Luisa Bemberg and her Films

John King, Sheila Whitaker, and Rosa Bosch, eds.

María Luisa Bemberg, who died in 1995, was one of Latin America's best-known and most popular filmmakers. The only woman director in the region to have achieved consistent success nationally and internationally, she is all the more remarkable for having made her first feature at the age of 58. This is the first major study of her work. It contains, uniquely, the views of those who worked with her alongside her own comments about the film industry and her work in it.

Art and Faith in Mexico: The Nineteenth-Century Retablo Tradition

Elizabeth Netto Calil Zarur and Charles Muir Lovell, eds.

Nineteenth-century Mexico was a period of unprecedented political turmoil. One result of this instability was that many religious practices moved from the church to the home, and the retablo art form—sacred paintings on tin—flourished. With more than 1,700 objects, New Mexico State University holds the largest collection of retablos of any museum in the United States. This book studies the collection and places it in a broad cultural context.

A Reference Guide to Latin American History

By James D. Henderson, Helen Delpar, and Maurice P. Brunnardt

This book presents significant events of Latin American history through the year 1999. It was inspired by a one-volume reference to U.S. history, the Encyclopedia of American History (1953), by Richard B. Morris.

El Niño: Children of the Streets, Mexico City

By Kent Klich and Elena Poniatowska

This publication—photographs by Kent Klich; text by Elena Poniatowska—was named Best Photography Book in Sweden, 1999.

Texas and New Mexico on the Eve of the Civil War: The Mansfield and Johnston Inspections, 1859-1861

Jerry Thompson, ed.

From 1859 to 1861, senior Army officers Lt. Col. Joseph E. Johnston and Col. Joseph K. F. Mansfield were charged with investigating and evaluating the welfare, efficiency, and combat readiness of troops in the Texas and New Mexico Departments of the Army. Their reports to the U.S. inspector general's office are transcribed and presented here for the first time by noted Civil War historian Jerry Thompson.

Combating Corruption in Latin America

Joseph S. Tulchin and Ralph H. Espach, eds.

Corruption persists as a challenge to the consolidation of Latin American democracies and to their economic development. Contrary to many expectations, policies to reduce the size of government, such as the privatization of state firms, have not proved a cure against corruption. In some cases, economic liberalization seems only to have worsened the problem. This book examines the relationship between democratic and market reforms and corruption, including national strategies for its reduction.

By Third World Institute
This latest edition of The World Guide, published biennially since 1979, offers a unique blend of detailed information on more than 200 countries and nations, plus analysis of topical issues. It incorporates contributions from a worldwide network of journalists and researchers and is the only global almanac with a perspective from the South.

Micro and Small Enterprises in Latin America: Experience of Business Development Services

Jacob Levitsky, Lene Mikkelsen, and Keisuke Nakamura, eds.

This book sets out approaches to the provision of business development services and the re-thinking of the role of the private sector, based on initiatives and experience in the Latin American region. The approaches are based on the realization of objectives of effective support services that are sustainable, have wide outreach, and can have an optimum impact on the beneficiary enterprises and the local business environment.

Colonial Latin America, 4th ed.

By Mark A. Burkholder and Lyman L. Johnson

This highly acclaimed text provides a concise study of the history of the Iberian colonies in the New World from their pre-conquest background to the wars of independence in the early 19th century. The new edition has been updated and revised to reflect recent scholarship.

Forgotten Conquests: Rereading New World History from the Margins

By Gustavo Verdesio

One of the privileges gained in colonizing the New World was the power to tell the definitive stories of the struggle. In this book, Gustavo Verdesio argues that these master narratives represent only one of many possible histories and suggests a way of reading them to find the colonial subjects who did not produce documents. Verdesio pays particular attention to the history of present-day Uruguay.

Shamanism

By Piers Viebbsky

The shaman occupies a key role as a healer, mediating between the world of the living and the world of spirits, and is a potent figure in alternative medicine. This book, a richly illustrated guide, looks at both historic and present-day manifestations, from the snowscapes of Siberia to the jungles of the Amazon.

Many publications featured in this section are available through amazon.com.

CONFERENCES

Diversity Advisory Council Colloquium

September 14

The Kent State University Diversity Advisory Council presents a one-day colloquium, "A Country of Strangers: Blacks and Whites in America." At KSU in Ashland, Ohio.

Contact: Kelly Sanford, (440) 964-4217; e-mail, sanford@ashtabula.kent.edu.

GEAR UP 2001 National Conference

October 5-9

The second annual Gaining Early Awareness and Readiness for Undergraduate Programs conference, "Sustaining the GEAR UP Movement for Education Reform: The Role of Higher Education in Supporting K-16/Community Partnerships," will be hosted by the National Council for Community and Education Partnerships. At the Washington Hilton and Towers Hotel, Washington, D.C.

Contact: Anna Ortega Chavolla, (202) 530-1135; fax, (202) 530-0809; e-mail, anna_chavolla@edpartnerships.org; website, www.edpartnerships.org.

TeleLearning 2001

October 6-9

The International Telecommunications Council and The TeleLearning People will sponsor "TeleLearning 2001," "the premier event in distance education and educational telecommunications." At Hilton Hotel Costa Mesa, Costa Mesa, Calif.

PERALTA COMMUNITY COLLEGE DISTRICT

SEEKING CANDIDATES FOR

MANAGEMENT EMPLOYMENT OPPORTUNITIES

The Peralta Community College District is located in the beautiful Oakland/San Francisco Bay Area, an area which leads the world in technology and innovation. The District is seeking a group of highly qualified and diverse individuals who will become part of the Chancellor's team responsible for implementing an ambitious agenda in advanced training and higher education to service all segments of a culturally diverse urban community. The Peralta Community College District serves six cities in the East Bay Area. The District is renowned for its support of education and has a national reputation for developing effective approaches to serving the varied interests and needs of the community. The Peralta Community College District, founded in 1964, serves 27,000 students, and is one of the top community college districts in the State of California in transferring students into the University of California system.

Individuals are invited to apply who are interested in joining a team of educational leaders, who understand the principles and distinction of excellence in teaching and instruction and commitment to visionary leadership, and who are committed to community service and academic excellence.

Mission Statement: "The mission of the Peralta Community College District is to provide accessible, high quality adult learning opportunities to meet the educational needs of the multicultural East Bay community."

College of Alameda
College of Alameda, California's only island-based community college, offers both park-like tranquility and easy access to urban hustle. Having served almost a quarter of a million day, evening and weekend students since its 1970 founding, College of Alameda enjoys a well-deserved reputation for excellence in its academic, vocational, and student-support programs. The College is proud of its strong ties to the City of Alameda and is recognized for its strong partnerships with the local business community.

Laney College
The largest of the Peralta Colleges, Laney College is in the heart of downtown Oakland adjacent to the Oakland Museum of California and beautiful Lake Merritt. The campus, designed to reflect its unique setting, is served by public transportation hubs and is in walking distance to the famous Jack London Square. Laney College offers associate degrees and certificate programs in more than thirty vocational, liberal arts and science fields.

Merritt College
Nestled in the hills above San Francisco Bay, Merritt College offers students the opportunity to study in one of the most dramatic natural settings in Northern California. With a panorama that includes the Golden Gate Bridge and the Pacific Ocean, Merritt's striking vistas provide a breathtaking backdrop for its packed roster of first-rate academic and vocational programs.

Vista Community College
Just two blocks from the University of California at Berkeley, the energetic urban campus of Vista Community College stands on the cutting edge of community college education. University preparation and occupational training classes form the core of Vista's curriculum.

Application materials should be submitted to: Office of Human Resources
Peralta Community College District
333 East 8th Street
Oakland, CA 94606-2844

The Peralta Community College District is an Equal Opportunity/Affirmative Action Employer.
Book Review

By Eduardo Mendieta

Question: Mano—what does it mean? That “we are a problem, a malady, a challenge to the political system”?

Question: Chava—why is it that we are a cultural problem, that we are our culture, while the “White” man is cultureless, or more insidiously, that his culture goes without saying?

Question: Hermano—is the future of democracy dependent on the rejection of ethnocultural diversity, that is, must we face the impossible choice of either cultural assimilation for the sake of political enfranchisement or cultural affirmation at the expense of political empowerment?

Question: Querido ciudadano(a) of our new “América”—must we turn away from our inescapable cultural heterogeneity for the sake of political univocity, or can we find in our cultural diversity a resource for a rich and promising multicultural democracy and citizenship?

More questions along the same lines, and even more responses, are formulated and developed in this timely work of political theory by Chicano philosopher Jorge M. Valázquez, who presently teaches at Our Lady of the Lake University, in San Antonio, Texas. This is a work that one can not ignore, and to be oblivious to it would require great deliberation and stubbornness. It ought to be required reading not just in graduate seminars, upper-division classes, and undergraduate lecture classes in political theory, contemporary political philosophy, or social philosophy in general, but required reading for the general citizenry.

I think Deliberative Democracy will be much excerpted, anthologized, and cited. Valázquez combines a high level of philosophical intensity and concentration in his analyses of conceptual and empirical issues with an engaging, clear, persuasive, and jargon-free prose. Most contemporary social and political philosophy is constrained, if not impaired, by highly technical and specialized languages, which are forbidding and daunting to the general reader, perhaps the most interested in this type of discussion. But not in this indispensable work.

Deliberative Democracy is a long work. I read every word, including the lengthy endnotes closing each chapter, and I found it extremely difficult to think what could or should have been cut. Every page was marked by a profound sense of urgency but also a high level of reflection. Nothing seemed superfluous, redundant, repetitive, or tangential.

The book begins where the issues plaguing contemporary multicultural societies are most difficult. He has taken the challenge of justifying deliberative democracy and democracy in general, precisely where it is most difficult and least obvious. I think that this strategy of thinking from the “margins to the center,” to use that felicitous expression by bell hooks, is not just rhetorical but essential to Valázquez’s goals. A political system and its corresponding philosophical reflection that are unable to deal with questions of ethnocultural differences within pluralistic and democratic societies is at best anachronistic and at worst a liability. In contrast to most other works on contemporary political theory, Valázquez does not place ethnocultural difference, political justice, and multicultural claims on the polity as an afterthought, or as an appendix. On the contrary, this is where Valázquez begins his reflections, and I think that is one of the book’s most important virtues.

This work is particularly important because of its insightful, balanced, but devastating critiques of certain sacred cows of liberal political theory. Valázquez proceeds expertly, and with great ease, by way of explicating a series of standard positions. He illustrates their virtues, their strengths, and then demonstrates their insufficiency or inappropriateness, slowly building his case for the justification of “universal property rights,” collective property rights for indigenous groups, the right to self-legislation, and, in certain special cases, the right to self-determination via secession. He introduces important discussions of the appropriateness of contemporary legal standards on intellectual property rights, which he rightly finds biased against non-Western and non-industrialized cultures and societies.

Deliberative Democracy can act as a compendium of theories and positions on issues confronting multicultural societies in the age of globalization, but also as a syllabus of the conceptual issues that stand behind these positions. From Locke, Rawls, Habermas, Bowman, and Iris Young, to property, collective, intellectual, cultural, and languages rights, self-determination, fulfillment, political judgments, autonomy, and self-determination—they are all skillfully explained, analyzed, criticized, and related to the larger project of explicating and disclosing the normative justification for a multicultural grounded model of deliberative democracy.

Answer: “Contemporary multicultural democracies can flourish only in a civic milieu in which individuals exhibit such qualities as willingness for mutual compromise, trust in democratic institutions, the capacity to understand the perspectives and needs of others, and a sense of social solidarity.” That is, civic solidarity, political justice, economic equity, and cultural self-respect are grounded in our ability to see ourselves not as a problem but as part of the solution and as part of the future of a vibrant multicultural democracy.

Eduardo Mendieta is assistant professor of philosophy at the University of San Francisco.

If interested in submitting a book review please e-mail us at outlook@aol.com for Book Reviewers’ Guidelines.
The Department of History and the American Studies Program at Carleton College are seeking to fill an entry-level tenure-track position in United States history, with a specialization in Chicano and/or Latino history and culture beginning in September 2002. Appointment at a higher rank might be considered in extraordinary circumstances. The position carries teaching responsibilities in the History department and in the American Studies program. In History, the job will entail participation in the U.S. survey course, with opportunity for more specialized instruction in American ethnic history, American immigration history, and/or regional history (e.g., Borderlands, American West) at both introductory and advanced levels. In American Studies the job will provide opportunity for teaching in the core courses (Introduction, Methods, Senior Seminar) as well as more specialized culture studies. The successful candidate must have demonstrated research and teaching interest or experience in both History and American Studies, a strong commitment to undergraduate teaching in a liberal arts environment, and must have Ph.D. completed or substantially completed by June 2002. To apply, please send a letter of application, a graduate dossier that includes c.v., three recent letters of reference, graduate transcripts, and one or two sample syllabi by November 1st, 2001, to:

Professor Harry McKinley Williams, Chair
Department of History, Carleton College
One North College Street, Northfield, MN 55057

Carleton College is an AA/EOE; we particularly encourage applications from women and members of minority groups.

E-mail questions regarding the application process to nambert@carleton.edu.

SMITH COLLEGE
DEPARTMENT OF PSYCHOLOGY

Developmental Psychology

Assistant Professor of Psychology in developmental psychology; full-time, tenure-track appointment beginning September 2002. Commitment to teaching undergraduates is essential. Area of specific research specialization in developmental psychology is open, but candidates should incorporate a cultural perspective on human development. Teaching responsibilities include child development, a laboratory or seminar in the candidate’s area of specialization, and either introductory psychology, research methods or statistics. Smith College is a member of the Five College Consortium with Amherst, Mount Holyoke, and Hampshire Colleges and the University of Massachusetts. Send vitae, sample publications, a statement of teaching and research interests, and three letters of recommendation to Kathy Richardson, Department of Psychology, Smith College, Northampton, MA 01063. Preference will be given to completed applications received before December 16, 2001.

SMITH COLLEGE IS AN EQUAL OPPORTUNITY EMPLOYER ENCOURAGING EXCELLENCE THROUGH DIVERSITY.

---

Bates College

Cognitive Psychology
Assistant Professor, Tenure-Track

The Department of Psychology at Bates College invites applications for a tenure-track position at the rank of Assistant Professor, to begin September 2002. The successful candidate will teach four or five courses per year, supervise student research, and develop an active research program. Bates College is an excellent undergraduate liberal arts college of approximately 1,600 students and 200 faculty members located in central Maine (see http://www.bates.edu). The Department of Psychology has eight full-time faculty members and is housed in a beautiful new building with extensive laboratory space and equipment. Review of applications begins October 22, 2001, and will continue until the position is filled. Send letter of application, vitae, three letters of recommendation, undergraduate and graduate transcripts, research and teaching statements, evidence of teaching effectiveness, and reprints to:

Cognitive Psychology Search Committee Chair (FR1445)
c/o Bates College Academic Services
2 Andrews Road, 7 Lane Hall
 Lewiston, ME 04240

www.bates.edu

Bates College values a diverse college community and seeks to assure equal opportunity through a continuing and effective Affirmative Action Program.

FACULTY OPENING
DEPARTMENT OF FRESHMAN ENGINEERING
PURDUE UNIVERSITY

The Department of Freshman Engineering at Purdue University is seeking to fill a tenure track faculty position at the Assistant Professor level. A PhD in engineering is required. Faculty members in Freshman Engineering at Purdue are committed to excellence in teaching, engineering students, scholarly activities (educational or technical research), and advising first year engineering students as the students prepare towards effective transfer into their chosen engineering majors. Many opportunities exist for interaction with faculty members and graduate students of other departments with similar disciplinary interests.

Application, including curriculum vitae and names and addresses of three references, should be sent to:

Professor Jennifer Sinclair, Head
Department of Freshman Engineering
Purdue University
1256 Engineering Administration Building
West Lafayette, IN 47907-1256

To receive full consideration, applications must be received by December 1, 2001, although search will continue until the position is filled.

PURDUE UNIVERSITY IS AN EQUAL OPPORTUNITY AFFIRMATIVE ACTION EMPLOYER
Dean, College of Business Administration

CLARION UNIVERSITY

Clarion University of PA, one of 14 comprehensive public universities in the State System of Higher Education, invites nominations and applications for the position of Dean, College of Business Administration.

Responsibilities: The Dean of the College of Business Administration is responsible for all aspects of college leadership, planning, and operation including program development, enrollment management, recruitment and development of faculty and staff, academic standards, technology facilities, and maintenance of AACSB accreditation. The dean has specific responsibility for maintaining the strong teaching orientation of the college through support of faculty professional development and scholarship appropriate to its mission within a collective bargaining environment. The dean is expected to play an active role in enhancing the external relations of the college through development of strong corporate relationships, collaborative programming, participation in regional economic development, fund raising, and community service.

Qualifications: The successful candidate will hold an earned doctorate in an appropriate business field and a demonstrated record of effective teaching and significant scholarship. Applicants should be able to demonstrate administrative ability to address the needs of faculty and students, an understanding of the evolving nature of business curricula, clear knowledge of AACSB standards and their application, and the ability to provide leadership in a technologically advanced environment. Candidates must be able to demonstrate professional leadership and communications skills, creativity, enthusiasm, an ability to accomplish goals, and a willingness to work effectively with all constituencies. The successful candidate must have a commitment to establishing and maintaining diverse communities and must have a minimum of three years of experience as a department chairperson or assistant/associate dean in or other administrative experience appropriate for the position.

The University and the College: Founded in 1852 and located in scenic Western Pennsylvania, Clarion University enrolls 6,300 students at its two campuses, one in Clarion and the other in nearby Oil City. The college offers a substantial general education core and a variety of business programs that emphasize technology and networking. The College of Business Administration offers undergraduate and graduate programs in accounting, finance, management, marketing, and real estate.

Applications and Appointment: Candidates for Dean, College of Business Administration must submit the following materials: letter of application addressing qualifications for the position; resume; and three current letters of reference (including phone numbers and email addresses). Candidates must complete a successful interview and upon recommendation the position should be advertised to Ms. Rose Logue, Search Committee Coordinator, Office of the Provost, Clarion University, Clarion, PA 16214, rlogue@clarion.edu. Review of applications will begin October 1 and will continue until the position is filled. Salary and benefits are competitive; appointment date is to be determined. Additional information is available at www.clarion.edu/deansearch/.

Clariion University is building a diverse academic community and encourages people of color, women, veterans, and persons with disabilities to apply. MUST.
CALL FOR PAPERS
NATIONAL ASSOCIATION OF HISPANIC & LATINO STUDIES

National Conference
February 11-16, 2002
Houston, Texas

Abstracts, not to exceed two pages, should be submitted which relate to any aspect of the Hispanic and Latino American experience. Subjects may include but are not limited to literature, demographics, history, politics, economics, education, health care, fine arts, religion, social sciences, business and many other subjects. Please indicate the time required for presentation of your paper (25 minutes/45 minutes).

ABSTRACTS WITH HOME AND SCHOOL/AGENCY ADDRESS MUST BE POSTMARKED BY:
November 17, 2001

SEND ABSTRACTS TO:
Dr. Lemuel Berry, Jr.
Executive Director, NAHLS
P.O. Box 865
Morehead, KY 40351
Telephone: (606) 784-1037
Fax: (606) 734-1037

ROCHESTER INSTITUTE OF TECHNOLOGY

Associate & Assistant Professors

The Department of Communication, Rochester Institute of Technology invites applications for two assistant and one associate professor positions to begin September, 2002. The Department of Communication offers two degrees: a BS in Professional & Technical Communication and an MS in Communication & Media Technologies.

The successful candidate at the Associate level will teach primarily graduate courses and a few undergraduate level courses. The successful candidates at the Assistant level will teach primarily undergraduate courses with the possibility of teaching one or two graduate courses. Subject areas at the graduate level include communication law and ethics, computer-mediated communication, communication training, on-line publishing, and visual communication. Subject areas at the undergraduate level include: human communication, small group communication, mass communication, public speaking, persuasion, newswriting and reporting, and advertising. Additional assignments for courses in area of specialty at both undergraduate and graduate levels are possible.

These are tenure track positions and require a Ph.D. in communication, successful teaching experience, demonstrated ability to direct MS theses, a record or promise of published scholarly research and the potential for an active research agenda. RIT is located near Lake Ontario, in the heart of the Finger Lakes Region of Western NY, surrounded by beautiful countryside and hi-tech industries and with a climate that accommodates four-season outdoor activities.

Send by 20 October 2001 a letter of application, resume and names and contact information for three references to: Bruce Austin, RIT, College of Liberal Arts, 92 Lomb Memorial Drive, Rochester, NY 14623. Interview opportunities at NCA in Atlanta, 1-4 November. RIT is an equal opportunity/affirmative action employer, looking for individuals with an ability to contribute in meaningful ways to the Institute's commitment to cultural diversity and pluralism.

NDU is an equal opportunity employer.
Columbia University seeks an experienced and innovative manager to direct disability services. The Director will be responsible for facilitating the fullest possible participation of people with disabilities in the life and work of the University. The Director will work with faculty and administrators to coordinate services provided for persons with disabilities and to ensure compliance with University policy and applicable laws. The ideal candidate will have 5-7 years' related work experience; strong leadership and collaborative skills; experience with disability services; experience working with university students; and a proven track record of successful program development. Please fax or mail resumes to Disability Services Search, Columbia Health and Related Services, 519 West 114th Street, New York, NY 10027; fax (212) 854-4021.

Columbia University is an affirmative action/equal opportunity employer.

Executive Dean
Clairon University
Venango Campus

Clairon University of PA, one of four comprehensive public universities in the State System of Higher Education, invites nominations and applications for the position of Executive Dean, Clairon University - Venango Campus.

Responsibilities: The Executive Dean of Clairon University - Venango Campus is responsible for the academic and fiscal administration of the campus and is a member of the President’s Executive Council. The Dean provides leadership, vision, and energy to the campus and its programs; works collaboratively with the Provost and Deans at the Clairon Campus to adapt and realign academic programs and services; develops general education offerings; and works with the Director of Facilities Management and Planning to maintain the facilities at the Venango Campus. The Executive Dean prepares the budget for the Venango Campus and monitors expenditures in accordance with University policies, procedures, and guidelines.

Qualifications: The Executive Dean must demonstrate leadership, creativity, enthusiasm, an ability to accomplish goals, and a willingness to work effectively with other deans and the student, faculty, and staff of the Venango Campus. The successful candidate must have a commitment to establishing a diverse community and have a minimum of five years of academic or administrative experience with increasing responsibility appropriate for the position. A master's degree is required with a doctorate preferred.

The University: Situated in Venango County, beautiful and surrounded by thirty-five acres of forest and farmland, the Venango Campus is the only campus of the University in northwest Pennsylvania. The campus is located near the Allegheny River and is home to the Zembo Center, a performing arts venue.

Applications and Appointment: Candidates for the Executive Dean - Venango Campus must submit the following materials: a letter of application addressing qualifications for the position, a resume, and three current letters of reference (including phone numbers and email addresses). Candidates must commit to a successful interview. Application materials and requests for additional information concerning the position should be addressed to Ms. Ann Janson, Search Committee Coordinator, Office of the President, Clairon University, Venango Campus, 624 Main Street, Franklin, PA 16324, ajanson@clairon.edu. The review of applications will begin October 15 and will continue until the position is filled. Salary and benefits are competitive; the appointment date is to be determined. Additional information is available at www.clairon.edu.

Clerion University is building a diverse academic community and encourages people of color, women, veterans, and persons with disabilities to apply.

SMARY/UNIVERSITY

The Board of Trustees and the Vice Presidential Search Committee of St. Mary’s University invite applications and nominations for the position of Vice President for Academic Affairs. The Vice President is appointed by the Board of Trustees for a term of three years renewable on the recommendation of the President that such a position be filled.

St. Mary’s University is an urban university located in San Antonio, Texas. Founded in 1852 by Marilian Brothers and Priests, it is the oldest Catholic university in the southwest. Rooted in the Catholic intellectual tradition, the University strives to contribute to the urgent task of extending justice, freedom and dignity to all people. While there is no requirement that the successful applicant must be Catholic he or she should share values consistent with the mission of the University. St. Mary’s is one of three institutions of higher education in the United States owned by the Society of Mary.

With a total enrollment of more than 4,000 students, with a 54% Hispanic student body, St. Mary’s prides itself on its near 150 years of service to the nation, Texas, and South Texas in particular.

As a Catholic university in the Marilian tradition, St. Mary’s is committed to educating our students in a setting that provides both liberal arts and professional preparation, and most importantly links these two educational perspectives. A strong core curriculum ensures that all of our graduates will possess the values, knowledge, and technical skills that will enable them to contribute to society in meaningful and helpful ways. St. Mary’s is also committed to service to our society, as evidenced by the employment of many of our students, faculty members, administration, and staff in service learning projects and activities both inside and outside the classroom.

Due to the importance of providing appropriate leadership regarding our academic mission, it is highly preferred that the Vice President possesses an earned doctorate. As an institution that prides itself on its diversity, we welcome applications from men, women, minority and majority group members who feel that they can strongly support our mission.

To apply, please send a letter of application, curriculum vitae, and the names, addresses, and telephone numbers of three individuals who can provide recommendations, postmarked by October 26, 2001.

WESTERN CONNECTICUT STATE UNIVERSITY
DIRECTOR OF ALUMNI AFFAIRS

Search Reopened

WCSU is seeking an individual to direct our Alumni Affairs area. Under the supervision of the VP for Institutional Advancement, this individual will be responsible for the planning, execution, and management of a comprehensive alumni relations program. The primary duty shall be to further the University’s objectives of building stronger, more diverse relationships with its alumni, with the ultimate goal of significantly increasing and maintaining the number of alumni donors and the amount of alumni contributions. Some of the duties include the following:

- Working with the Alumni Association to strengthen and diversify the Alumni Board, develop representative Alumni Councils, and sustain Alumni Chapters
- Further develop the Alumni Benefits Program
- Enhance the number, scope and participation levels at alumni events
- Assistance with fund raising programs
- Oversight of the Alumni Scholarship Program
- Supervisor staff including clerical and university assistants

Qualifications: The successful candidate will possess a Bachelor’s degree and at least three years experience in higher education alumni affairs and fundraising, significant experience in communications, including the ability to speak and write effectively and prepare publications. Prior experience maintaining an integrated computer database is preferred. Familiarity with Connecticut and the Northeast is desirable. Candidate must be flexible and available to work evenings and weekends.

Application process: Send letter of application, resume, and three professional references by September 28, 2001 to Richard Garber, VP of Institutional Advancement, WCSU, 181 White Street, Danbury, CT 06810. Prior candidates need not re-apply.

WCSU is an AA/EO Educator/Employer.

CAL STATE FULLERTON
DIRECTOR OF ATHLETICS

California State University, Fullerton (CSUF) is a member of NCAA Division I and competes in the Big West Conference. The University is located in the Orange County region of Southern California, part of the metropolitan Los Angeles area. Intercollegiate Athletics consists of 17 sports and has gained both regional and national recognition. California State University, Fullerton invites applications and nominations for the position of Director of Athletics. The Athletics Director will be responsible for providing effective leadership to coaches and staff, ensuring the academic and athletic achievement of student-athletes, and for representing the University at both on and off campus functions. Competitive candidates will have an established record of success as a senior-level college Athletics administrator. A bachelor’s degree is required, advanced degree is preferred. Seven years of progressively responsible experience in intercollegiate athletics administration is expected. To ensure full consideration, materials must be received by September 17, 2001, when the screening process will begin. Position remains open until filled. Applications must include a letter of intent summarizing qualifications and relevant experience, a current resume, two letters of reference and three additional references. Application materials should be sent to:

Karen Wall
Search Committee for Director of Athletics
California State University, Fullerton
Vice President for Student Affairs Office
LH-206
P.O. Box 6830
Fullerton, CA 92834-6810
Telephone (714) 278-2591
Fax (714) 278-5150

California State University, Fullerton is an Affirmative Action/Equal Opportunity, Title IX, ADA Employer. Minorities and women are encouraged to apply. The University is committed to providing equal opportunities to men and women students in all campus programs, including intercollegiate athletics.

CLARION UNIVERSITY
COLLEGE OF BUSINESS ADMINISTRATION

Clarion University’s College of Business Administration is seeking qualified candidates to fill, at least, four full time tenure-track positions beginning August 2002 in the following areas:

Accounting: Two tenure-track, assistant/associate/full positions. Primary teaching responsibilities will be in managerial, advanced and/or international accounting. A doctorate in accounting is required, but consideration may be given to ABD candidates. Submit letter of application, comprehensive resume, transcripts, and three letters of recommendation to Dr. Thomas W. Oliver, Chair, Department of Accountancy, College of Business Administration, Clarion University, Clarion, PA 16214. Electronic submissions accepted at: tomliver@clarion.edu. Review of applications will begin November 1, 2001, and continue until the positions are filled.

Management: One tenure-track, assistant/associate/full position. Primary teaching responsibilities will be in two of the following areas: production/operations management, international management, strategic management, and information systems. A doctorate in business administration with a major in management or related area is required, but consideration will be given to ABD candidates. Submit letter of application, comprehensive resume, transcripts, and three letters of recommendation to Dr. Kevin Rodi, Chair, Recruiting Committee, Department of Administrative Science, College of Business Administration, Clarion University of Pennsylvania, Clarion, PA 16214. Electronic submissions accepted at: Review of applications will begin October 1, 2001, and continue until the positions are filled.

Marketing: One tenure-track and one anticipated tenure-track, assistant/associate positions. Applicants should be able to teach classes in more than one of the following areas: marketing, decision making, channels of distribution, industrial marketing, e-marketing, services marketing, marketing research, marketing strategies. Marketing management, nonprofit management, store retailing, principles of marketing, and retailing. A doctorate in business administration with a major in marketing is required, but consideration will be given to ABD candidates. Submit letter of application, comprehensive resume, transcripts, and three letters of recommendation to Dr. Barbara C. Garland, Chair, Recruiting Committee, Department of Marketing, College of Business Administration, Clarion University of Pennsylvania, Clarion, PA 16214. Review of applications will begin October 8, 2001, and continue until the positions are filled.

To be considered for appointment at the associate and/or full rank, the applicant should have an established publication record and proof of successful university teaching experience. Completion of a successful interview is required for all positions.

Clarion University is building a diverse academic community and encourages people of color, women, veterans, and persons with disabilities to apply.

09/10/2001 0 HISPANIC OUTLOOK 45
OLD DOMINION UNIVERSITY
PROVOST AND VICE PRESIDENT FOR ACADEMIC AFFAIRS

General Position Description

The Provost and Vice President for Academic Affairs is the chief academic officer and second-ranking administrative officer of Old Dominion University. He/she reports directly to the President of the University and is one of four vice presidents. The Provost and Vice President for Academic Affairs is responsible for all of the institution's academic research, and public service programs and their associated faculty, staff, and resources, and serves as the chief executive officer in the President's absence.

Institutional Context

Old Dominion University is a mature and growing institution that enrolls approximately 19,000 undergraduate and graduate students. The Carnegie Foundation has designated Old Dominion as a Doctoral/Research—Extensive University. The main campus is located in Norfolk, Virginia, which is part of the historic and internationally-oriented Hampton Roads metropolitan area, which has a population of more than 1.4 million. Old Dominion also operates higher education centers in the nearby cities of Virginia Beach, Hampton, and Portsmouth as well as in Northern Virginia. Programs are also delivered to several off-campus sites including military bases in the region.

In addition, the University operates more than 40 sites, which are part of its TELETECHNET distance learning network, located in Virginia, the District of Columbia, North Carolina, Arizona, the state of Washington, and the Bahamas. Programs are also broadcast to Navy ships operating in the Atlantic, Mediterranean, and Pacific. During the last decade, Old Dominion has become an acknowledged leader in the application of technology to deliver programs.

Old Dominion University is one of six publicly-assisted doctoral research universities in Virginia, and has an annual operating budget in excess of $240 million, an endowment of $75 million, and annual research volume of $26 million. Currently, 22 doctoral, two certificates of advanced study, 66 master’s and 64 bachelor’s degrees are offered in the liberal arts and sciences, business, education, engineering and technology, and health sciences.

The University’s academic division is organized into six colleges: Arts and Letters, Business and Public Administration, the Darden College of Education, Engineering and Technology, Health Sciences, and Sciences. Included also are the Perry University Library, the Honors College, Distance Learning, Academic Technology Services, Learning Technologies, Institutional Research and University Planning, Higher Education Centers, the Weekend College, Career Management Center, Research and Graduate Studies, International Programs, Assessment, and Continuing Education. Old Dominion is also the largest research contractor in Virginia with NASA.

Old Dominion is a selective admission institution. Twenty-six percent of its student body comes from outside Virginia and over 1230 international students from more than 103 countries are enrolled. About 53 percent of the University’s students are 25 years of age or older.

The University is located in a region that is the major mid-Atlantic coast port, a commercial and banking center, hosts significant military commands, is a popular tourist destination, and is home to important research facilities that focus on aerospace, modeling and simulation, nuclear physics, and oceanography.

Responsibilities

The Provost and Vice President for Academic Affairs is expected to provide dynamic leadership in the areas of teaching, research, and public service. The candidate selected should be able to stimulate a collegial and intellectually invigorating environment, build productive relationships with important constituencies in the region, increase funding through sponsored programs and development activities, and work productively with faculty, staff, and students.

Qualifications

The successful candidate must have an earned doctorate or equivalent, a record meriting appointment as a full professor in an academic department, and administrative experience in an academic setting or at a level above the dean or equivalent. Candidates must have a strong commitment to academic excellence and an ability to work with diverse constituencies. Preference will be given to candidates with management experience in higher education, a history of collaborative decision making, ability to communicate effectively within a university setting and with external constituencies, and experience in a metropolitan doctoral-research university.

Applications and Nominations

Applications and nominations should be sent to the search committee coordinator at the address listed below. Applications must include a letter that addresses the position qualifications, a résumé, and the names, addresses, and phone numbers of five professional references.

Mr. Glenda L. Humphreys, Coordinator
Provost and Vice President for Academic Affairs Search Committee
Department of Human Resources
Old Dominion University
1510 W. 44th Street
Norfolk, Virginia 23529
Phone: 757-683-3059
E-mail: ghumphre@odu.edu

Screening of applicants will begin on October 8, 2001. Applications will be accepted until the position is filled.

For more information about Old Dominion University, see its web site at web.odu.edu

Old Dominion University is an Affirmative Action Equal Opportunity Employer and complies with the Immigration Reform and Control Act of 1986.

Director, Kansas University
Affiliated Program/Professor

Full-time tenure track position beginning Mid August, 2002. An earlier starting date may be negotiated. Direct, sustain, and enhance training, research, and development within the Kansas University Affiliated Program, the largest interdisciplinary training center at KU.

Required Qualifications: Ability to facilitate creative funded interdisciplinary training, research, and service by other people, as well as conduct one's own research program. Ability to work and communicate efficiently with a wide interdisciplinary constituency including faculty and staff, the public, and government officials. Achievement of wide, national recognition in a chosen field of research as demonstrated by refereed publications and professional service record. Demonstrated ability to attract and obtain financial support from federal and state sources, in a competitive process and to deal effectively with politically sensitive issues. Terminal degree, and eligibility for tenure in a discipline related to human development (e.g., human development, biology, education, medicine, psychology, neuroscience, language and communications) and a minimum of two years of significant administrative experience. Such administrative experience must be demonstrated to include budgeting, personnel evaluation, and program development. First consideration will be given to applications received by December 4, 2001. Application materials include a letter of application, resume, or curriculum vita, and three letters of reference.

Contact: Chair, KUAP Director Search Committee, Life Span Institute, 3017 Dole Center, University of Kansas, 1000 Sunnyside Ave., Lawrence, KS 66045. (785) 864-4467.

EOAA Employer

Illinois State University
Normal/Bloomington

The Department of Geography-Geology invites applications for one and possibly two tenure track positions at the assistant professor level in Human Geography pending final approval. August 2002 is the preferred starting date. A Ph.D. is preferred, and ABD required at the time of appointment. The successful candidate will teach an introductory course in world or human geography and intermediate or advanced courses in their areas of interest. Flexibility with our undergraduate major allows us to consider a wide range of specialties within human geography. Candidates with specialties in cultural, economic, environmental, medical, political, or social geography are preferred. Illinois State and the Department of Geography-Geology place a strong emphasis on undergraduate education, and the successful candidate must reflect that emphasis. The University has an active research faculty, however, and a coherent research program leading to refereed publications is essential. Illinois State is a comprehensive university enrolling approximately 20,000 students located in the Bloomington-Normal metropolitan area, which has a population of about 150,000.

A cover letter, a curriculum vita, the names of three references, and an unofficial graduate transcript must be received by November 30, 2001, to ensure full consideration. Apply: Professor Daniel Hammel, Campus Box 4400, Department of Geography-Geology. Telephone: (309) 438-8112, Fax: (309) 438-5310, Email: dhammel@ilstu.edu.

Illinois State is an equal opportunity/affirmative action University encouraging diversity.
The Arizona Board of Regents, the governing board for Arizona’s three public universities, invites nominations, inquiries, and applications for the position of President of Arizona State University.

Arizona State University, the only public university located in metropolitan Phoenix, is a major, internationally recognized research institution featuring high quality academics and a renowned faculty. In partnership with the private sector, ASU is a leading center for groundbreaking research and technological advancement to support the economic competitiveness of Arizona and improve quality of life. ASU is known for its outstanding cultural and performing arts programs and venues and is a strong competitor in Division I athletics in the Pac-10 Conference.

ASU serves the entire metropolitan Phoenix area, which continues to experience tremendous growth and is home to a number of high technology manufacturing companies. In addition to the main campus located in Tempe, the university features two campuses with more specialized missions: ASU West (in Northwest Phoenix adjacent to Glendale) and ASU East (in Southeast Mesa). The university also operates an extended education program, which is administered out of its center located in downtown Phoenix and serves the community from a variety of locations as well as through flexible programs, schedules and technologies. More than 50,000 students from all states and more than 120 countries enroll at ASU each year. More information about ASU can be found at www.asu.edu. Information about the Arizona Board of Regents and the ASU presidential search can be found at www.aobasu.edu.

Creative, dynamic candidates willing to work closely with faculty, staff, and students in fulfilling the mission of the university and able to communicate the needs, achievements, and contributions of the university to regents, legislators, and the citizens of the state are sought. All communications should be directed to:

Don Ulrich, Chair
ASU Presidential Search Committee
Arizona Board of Regents
2020 N. Central Avenue, Suite 230
Phoenix, AZ 85004-4593

The firm of Heidrick & Struggles, Inc., has been retained to assist in conducting this search. Interested individuals may prefer to contact: Mr. William J. Bowen at Heidrick & Struggles, Inc., Sears Tower, 233 S. Wacker Drive, Suite 7000, Chicago, IL 60606-6402.

Arizona State University is an equal opportunity, affirmative action employer, which actively seeks and encourages nominations and expressions of interest from underrepresented populations.

The Department of Psychology, University of California, Santa Barbara, seeks to fill a faculty position in Social Psychology, effective July 1, 2002. Applicants at any professorial rank are invited to apply. Candidates must have a strong research program in social psychology and provide evidence of research productivity and excellence in teaching commensurate with their rank.

Responsibilities include teaching at both the undergraduate and graduate levels and supervision of students in research. Ph.D. required at time of appointment. Salary and level of appointment depend on qualifications. Submit vita, reprints, statement of teaching and research interests, and three letters of recommendation to: Social Psychology Search Committee, Department of Psychology, University of California, Santa Barbara, CA 93106-9600. Applications will be reviewed beginning October 15th, 2001 until position is filled. UCSB is an Equal Opportunity/Affirmative Action Employer.

The University of Toledo seeks an outstanding academic leader to serve as Provost of one of the nation’s foremost metropolitan universities. The search committee invites nominations of and applications from potential candidates with strong academic backgrounds and records of accomplishment as university administrators.

The UNIVERSITY, founded in 1872, is one of thirteen state universities in Ohio. It enrolls over 19,000 students and offers more than two hundred programs of study in eight colleges: Arts and Sciences, Business, Education, Engineering, Health and Human Services, Law, Pharmacy and University College. The University provides an inclusive range of degrees from associate to doctoral, and service to its metropolitan community.

Students are served on six campus locations: the 230-acre main Bancroft campus, the Frank Gehry-designed Center for the Visual Arts at the Toledo Museum of Art, the downtown SeaGate Center, University College at Scott Park, the R. A. Stranahan Auditorium, and the Lake Erie Research Center. The University is outstanding, and the Bancroft campus, with its Gothic stone buildings and extensive landscaping, is particularly attractive.

The PROVOST will join the recently appointed, forward-looking President in building and empowering a team committed to expanding public engagement, strengthening teaching and learning at the undergraduate and graduate levels for traditional and non-traditional students, and advancing research and scholarship. Salary and a generous benefits package are highly competitive.

APPLICATIONS received by Sept. 21, 2001 will receive full consideration, but the position will remain open until filled. Candidates should provide a curriculum vitae, names and phone numbers of five references, and a cover letter describing their interest in the position and how their experience relates to the list of desired qualities and characteristics that may be found in the search prospectus at the Provost search site. Visit the University's website at www.utoledo.edu, then click on the Faculty/Staff page and use the link to the Provost Search. Applications and nominations should be directed to: Ms. Joyce M. Gregory, Executive Secretary, to the Board of Trustees, Mail Slot 912, University Hall Room 3520, The University of Toledo, 2810 W. Bancroft St., Toledo, OH 43606.

Although every effort will be made to treat applications confidentially, Ohio is an open records state, so full confidentiality cannot be guaranteed.

The Academic Search Consultation Service is assisting the search. Informal inquiries may be directed to Allan W. Oster, 202/332-3049, awo@academic-search.org, or Elaine H. Hairston, 740/964-0905, ehairston@attglobal.net.

The University of Toledo is an Equal Access, Equal Opportunity, Affirmative Action Employer and Educator.

Dean—College of Engineering
University of California, Davis

The University of California, Davis, invites applications and nominations for the position of Dean—College of Engineering. The Dean reports to the Chancellor and is the chief academic and administrative officer of the College.

The Dean is responsible for leadership of the College in the areas of teaching, research, and public service; academic planning; development and management of resources; articulation of the goals and programs of the College with alumni, the profession, industry, and government; and campus-wide policy development through membership on the Council of Deans and Vice Chancellors.

We seek candidates with a deep commitment to academic excellence who have the vision to lead the College in its continuing development. Qualifications include a distinguished record of teaching, research, and professional service appropriate for an appointment as Full Professor in one of the departments in the College; an understanding of the challenges facing engineering education at both the undergraduate and graduate levels, an appreciation of the importance of fostering and strengthening interactions with industry, and creative leadership ability. The University of California, Davis has a strong institutional commitment to the achievement of diversity among its faculty, staff, and students and seeks an individual who shares that commitment.

Established in 1962, the College is composed of over 150 faculty in seven departments: Applied Science, Biological and Agricultural Engineering; Chemical Engineering and Materials Science; Civil and Environmental Engineering; Computer Science, Electrical and Computer Engineering; and Mechanical and Aeronautical Engineering; and a Division of Biomedical Engineering. It has approximately 3000 undergraduate majors and 800 graduate students in masters and doctoral programs. Extramural funding for research totaled about $38 million for academic year 2000-01.

Salary will be commensurate with experience and qualifications. The starting date is July 1, 2002, or as negotiated.

Nominations and applications are being accepted immediately and will be reviewed until the position is filled. Materials should be submitted to:

Larry N. Vanderhoef, Chancellor
Office of the Chancellor
University of California, Davis
One Shields Avenue
Davis, CA 95616

UCDAVIS

The University of California, Davis, is an equal opportunity/affirmative action employer committed to excellence through diversity.
Office of the President

Position: Associate Ombudsperson for Staff
Category: Exempt, twelve months, full-time, permanent #109211

Responsibilities:
The Associate Ombudsperson for Staff will provide confidential and informal assistance to staff employees in resolving work related issues. The ombudsperson may serve as a counselor, mediator, and facilitator, and in considering any given instance of concern, the right of all parties that might be involved must be taken into account. The Ombuds Office does not replace the University's existing resources for conflict resolution. The individual must have expertise resolving conflict in the workplace involving varying levels of authority. The Associate Ombudsperson will report to the Staff Ombudsperson. The Associate will be expected to direct the Staff Ombuds Office and serve in the capacity of the Staff Ombudsperson when necessary, as well as attend and/or participate on university committees whenever appropriate.

The candidate will be responsible for on-going education and communication about the office's role to all potential inquiries, and will design and conduct bilingual training programs for the campus community in dispute resolution, civility, effective communication with other University offices and refer clients to appropriate offices on campus. The candidate must be willing to actively participate in relevant professional associations and relationships in order to stay on the leading edge of critical ombuds issues.

Qualifications:
A Bachelor's degree is required. An advanced degree and relevant experience are desired. The candidate must demonstrate proficiency in written and speaking Spanish, an understanding of diverse cultures and backgrounds with an emphasis on the Latin American community, and must have knowledge of the language, religion, traditions, customs, and sociology of Latin American communities as they affect performance in the workplace. The candidate must also demonstrate excellent communication skills and ability to interact effectively at all levels of the organization, as well as a reputation for integrity and for dealing fairly, effectively and in a timely fashion with all constituents.

Salary: Commensurate with experience and qualifications.

Start Date: October 2001

To Apply: For best consideration, materials should be received by September 15, 2001. Submit letter of interest, resume, and the names, addresses and telephone numbers of three professional references to:

Chair, Search Committee for Associate Ombudsperson
Office of the President
University of Maryland
1101 Main Administration Building
College Park, MD 20742

EO/EAA

Syracuse University
DEAN, SCHOOL OF EDUCATION

Syracuse University invites nominations and applications for the position of Dean of the School of Education. The School, enrolling 700 undergraduate students and 775 graduate students, consists of 60 full-time faculty and 8 academic units. Syracuse University is a private institution with a commitment to being the nation's leading student-centered research university. Syracuse is a Carnegie Doctoral/Research University* Extensive institution and a member of the Association of American Universities. Its 10 schools and colleges enroll 17,581 students in a broad array of baccalaureate, masters, and doctoral programs. For further information about the University, see http://www.syr.edu; for further information about the School of Education, see http://www.soeweb.syr.edu.

The Dean is the chief administrative and academic officer for the School. Responsibilities of the Dean include: supporting an environment that will encourage excellence in teaching and research, program development, and active collaboration within the School and across the University and the community at large. The Dean oversees faculty appointments; administrative supervision of academic departments and programs; academic policy, curriculum, instruction, and advising within the School; and is responsible as well for the School's budget and expanding external resources for the School.

Major qualifications for the position include a distinguished record in teaching, research, scholarship or creative activity that would warrant appointment to the rank of Professor; considerable experience and prior record of leadership in higher education or related field, including experience with faculty appointment, tenure and promotion, program development, and budget planning and management; requisite skills for fundraising and/or grant procurement; leadership skills and the ability to work with diverse groups and to build a sense of community within an organization; excellent interpersonal skills, a proven record of cultural sensitivity, and a deep commitment to diversity and inclusion.

Letters of nomination and applications should be submitted in confidence to: School of Education Dean Search Committee, Attn: Ms. Marjorie Donzello, Executive Assistant, The Graduate School, 303 Bowse Hall, Syracuse University, Syracuse, NY 13244. Information may be sought at any time from Search Committee Co-Chairs: Dr. Janine M. Bernard (315-443-2266; bernard@syr.edu) or Dean Howard Johnson (315-443-2373; hjohnson@syr.edu). Applicants should submit a letter of application, a curriculum vitae, and complete contact information for four references.

Salary is competitive and commensurate with experience and qualifications. Review of applications will begin on November 1, 2001 and will continue until the position is filled. The position is available July 1, 2002.

Syracuse University is an equal opportunity/affirmative action employer committed to excellence through diversity.

University of Kansas

ADVERTISMENT

Director, Research Design, and Analysis Unit, Life Span Institute and Professor, Quantitative Program, Department of Psychology, University of Kansas. EO/AA Employer
**BRIDGEWATER STATE COLLEGE**

**Associate Dean**
**School of Arts and Sciences**

The Associate Dean reports to the Dean in the overall planning, budgeting and management of the school. The primary duties are to respond to students' academic requests, work with academic department chairs to coordinate effective course scheduling (including general education courses), monitor faculty workload obligations, develop and implement diversity initiatives (including but not limited to, faculty recruitment and student retention), strengthen the learning communities program, assist in the management of school budgets (including professional development funds) and oversee annual catalog revisions for the School of Arts and Sciences. The Assistant Dean may be assigned additional duties as appropriate.

The School of Arts and Sciences offers baccalaureate degree programs in the fine arts, humanities, natural sciences, social and behavioral sciences, mathematics and computer science. Master's degrees are offered in English, Public Administration, Criminal Justice, Psychology and Computer Science. Sixteen academic departments, the college's general education program and several interdisciplinary and area studies programs are located within the School. The School has approximately 180 full-time faculty and an FTE enrollment of approximately 5800 students.

Required qualifications for this position include a terminal degree in one of the disciplines of the School, a minimum of three years' experience in academic administration, such as department chairperson or program director; college teaching at the rank of associate professor or higher. Credentials and experience substantially similar to the above may be considered. Applicants should be able to communicate clearly, collaborate effectively and maintain good humor.

Review of applications will begin immediately and continue until position is filled. To apply, please submit a letter of interest, resume and the name, addresses and telephone numbers of five professional references to: Office of Human Resources, Bridgewater State College, Bridgewater, MA 02325. Bridgewater State College is an affirmative action/equal opportunity employer with a longstanding commitment to increasing the diversity of its employee community.

**UNIVERSITY OF MINNESOTA**

**TWIN CITIES**

**Department of Biochemistry, Molecular Biology and Biophysics**

Tenure-Track Assistant Professor Positions

In conjunction with the completion of the new Molecular and Cellular Biology Building, and as part of campus-wide initiatives in genomics and proteomics, the Department of Biochemistry, Molecular Biology and Biophysics invites applications for full-time, tenure-track Assistant Professor positions to begin on or around July 1, 2002.

The Molecular Biology division seeks candidates with interests that complement those of the current members of the department, particularly in the molecular biology of mammalian organisms and cells. The Regulatory Biochemistry division seeks candidates for one or more positions in the area of biological regulation and signal transduction. Applicants should specify the position for which they wish to be considered. For more details about the Department please consult: [http://cbio.umn.edu/MDBP/](http://cbio.umn.edu/MDBP/)

Successful candidates will be expected to develop strong, externally funded research programs and contribute to the undergraduate, graduate and professional teaching programs of the department. The ability to interact collaboratively among a variety of disciplines will be strongly encouraged. All candidates must have a Ph.D. and/or MD degree. Desired experience includes at least two years of postdoctoral experience and a strong publication record.

Successful candidates will receive a substantial startup package to establish their laboratories and a salary commensurate with education and experience. We will begin reviewing applications on October 1 and applications will be accepted until the positions are filled. Please send curriculum vitae, a brief statement of current and future research, and three letters of recommendation that consider both research and teaching potential. Address these materials to either the Molecular Biology Search Committee or the Regulatory Biochemistry Search Committee, c/o Mr. Jeff Schaub, University of Minnesota, Department of Biochemistry, Molecular Biology and Biophysics, 6-155 Jackson Hall, 321 Church Street S.E., Minneapolis, MN 55455 or as an attachment to [schub@biochem.umn.edu](mailto:schub@biochem.umn.edu).

The University of Minnesota is an Equal Opportunity Educator and Employer.

**COLBY COLLEGE**

**HEAD MEN'S LACROSSE COACH**

The Colby College Department of Athletics seeks a full-time, benefits-eligible head men's lacrosse coach for the 2001-02 academic year. General responsibilities include the overall administration of the men's lacrosse program including budget, scheduling, and the recruitment of student athletes. In addition, the head coach is responsible for the direction, instruction, supervision, and coaching of the men's lacrosse team and the oversight and development of an assistant coach. Duties will include another seasonal assignment.

Colby is a highly selective private liberal arts college of 1750 students located in central Maine. The college is an NCAA Division III institution and is a member of the New England Small College Athletic Conference (NESCAC). It is the responsibility of the head coach to conduct the program according to all NCAA III, NESCAC Conference, and Colby College rules and regulations.

Bachelor's degree required; master's degree preferred. The candidate should have successful experience as a head coach or substantial experience as an assistant coach. Previous coaching and recruiting experience at the NCAA III level is desirable.

To apply, submit a cover letter, resume and three letters of professional reference to: Marcella Zalot, Associate Director, Athletic Department, Colby College, 4900 Mayflower Hill Drive, Waterville, ME 04901.

Application review will begin immediately and will continue until the position is filled.

Colby is an Equal Opportunity/Affirmative Action employer. Applications and nominations of individuals who would enrich the diversity of the campus community are strongly encouraged.

For more information about the College, please see the Colby web page at: [http://www.colby.edu](http://www.colby.edu)
PROVOST AND VICE PRESIDENT FOR ACADEMIC AFFAIRS

Plattsburgh State University of New York invites nominations and applications for the position of Provost and Vice President for Academic Affairs. The Provost is the University’s chief academic officer and has broad responsibilities for the planning, development, and administration of the full range of the University’s educational programs and services.

Plattsburgh State University is a comprehensive regional university located in the beautiful Champlain Valley in upstate New York. Founded in 1889 as Plattsburgh Normal School, today Plattsburgh offers a wide range of undergraduate and graduate programs and courses in the liberal arts and professional studies to its 6,100 students. PSU has a well-deserved reputation as a caring institution, where the more than 700 faculty and staff focus on the development and needs of individual students. Through its 30 academic departments, the University offers undergraduate degree programs in more than 55 fields of study and 18 graduate degree programs spanning a wide range of arts sciences and professional fields.

The Provost and Vice President for Academic Affairs is the chief academic officer of the University and reports directly to the President. He or she is the central member of the senior administrative team, serves as Acting President in the President’s absence, and exercises leadership as appropriate with other senior administrators. He or she has primary responsibility for: plan, develop, and administer all aspects of the University’s programs, activities, personnel, and budget in the instructional and academic support areas; provide leadership in maintaining academic standards; and represent the University with appropriate external agencies and organizations regarding academic programs and standards.

Qualifications: The new Provost must be both academically and administratively experienced and talented, and a person of the highest integrity and compassion. The Provost needs to be an educational leader, setting high yet attainable standards for pedagogy and scholarship, curricular development, and assessment. Preferred candidates will have a record of distinguished scholarship and administrative accomplishments; experience in fiscal and personnel management; strong organizational and interpersonal skills, including communication with diverse constituencies; commitment to affirmative action, equal opportunity, and diversity; and be a forceful advocate for the institution, its faculty and academic programs.

Salary and benefits are competitive. Applications: Review of applications and nominations will begin on October 1 and continue until the position is filled. The preferred starting date for the position is January 2002, but may be adjusted by mutual agreement. Nominations: Individuals wishing to nominate candidates for the position should submit a letter of nomination, including the name, position, address and telephone number of the nominee.

Interested candidates should submit a letter describing the candidate’s interest in and qualifications for the position, a curriculum vita, and the names and telephone numbers of at least five references that may include trustees, senior administrators, faculty, staff, students, and community leaders. Candidates are encouraged to submit their materials by email; Word attachments. Nominations and applications should be sent to: Ms. Thelma Lyon, Secretary to the President, SUNY Plattsburgh, 159 Hawkins Hall, 101 Broad Street, Plattsburgh, NY 12901-2681 FAX: 518-564-3932 E-mail: LYONTA@PLATTSBURGHLEU

The Provost search is being assisted by Charles Bunting, Vice President, and Steve Leo, Consultant, both with the A.T. Kearney Education Practice. Questions also may be directed to them at: charles.bunting@atkearney.com, and 703-739-4630; and stephen.leo@atkearney.com, and 703-739-4631; 333 John Carlyle Street, Alexandria, Virginia 22314.

For more information on Plattsburgh State University, please refer to the University site: www.plattsburgh.edu.

Applications from women and minority candidates are especially welcome. Plattsburgh State University is an affirmative action, equal opportunity employer.
Vice Provost for Diversity

Kent State University invites nominations and applications for the position of Vice Provost for Diversity. KSU seeks an energetic individual who will provide leadership and vision to its university-wide diversity initiative.

Kent State University is an integrated eight-campus system serving Northeast Ohio's urban, suburban, and rural communities, and is strategically situated within 45 minutes of Cleveland and two hours of Columbus, Ohio, and Pittsburgh, PA. Kent State University, Ohio’s third-largest university with more than 33,000 students on eight campuses, reflects the cultural and commercial vitality of Northeastern Ohio. The university is designated by the Carnegie Foundation as a Doctoral/Research University—Extensive, a ranking that puts Kent in the top tier of the nation’s public research universities.

The Vice Provost for Diversity is a new position reporting to the Provost. For this senior administrative officer and member of the president’s cabinet, Kent State seeks a candidate with a proven record of working effectively with diverse constituencies of a university community and its urban, educational, professional, and consortorial partners.

The successful candidate will provide vision, leadership, and integrity as well as academic and administrative vitality. The candidate will be responsible for working closely with the academic community in the development of diversity initiatives, especially in recruitment, retention, development, and quality of life concerns of KSU faculty, students, and staff. The candidate will also work with Human Resources, Enrollment Management and Student Affairs, and other university-wide units in the development of strategies for improving and strengthening the university’s diversity initiatives throughout the eight-campus system.

The Vice Provost for Diversity must demonstrate the ability to work effectively with undergraduate, graduate, and professional programs to increase diversity among students, faculty and staff; address effectively the educational and professional needs and goals of faculty, students and staff of color; represent the University on issues regarding diversity to external constituencies and agencies; and engage in collaborative initiatives affecting KSU’s diverse community in Northeast Ohio and throughout the state.

Qualifications: Applicants must hold an earned doctorate or terminal degree in a relevant field and possess outstanding academic credentials, including faculty experience, which qualify for senior faculty appointment. The successful candidate will possess appropriate administrative and academic experience, strong leadership and interpersonal skills, and commitment to teamwork and the furtherance of the university’s strategic initiatives, especially those related to issues of diversity in higher education. The candidate will also possess excellent oral and written communication, mediation, and conflict-resolution skills. Successful extramural fund-raising, donor cultivation, and grant-writing abilities and experience are also highly desirable.

Salary is competitive and commensurate with qualifications and experience. The appointment date is January 1, 2002, or as soon thereafter as possible, and no later than July 1, 2002. Review of applications will begin November 1, 2001. Applicants should send a letter highlighting qualifications for this position, resume, and the names, phone numbers, and e-mail addresses of three references to: Chair, Search Committee for Vice Provost for Diversity, Office of the Provost, Kent State University, P.O. Box 5190, Kent, OH 44242-0001

Equal Opportunity/Affirmative Action Employer.

Dean of the College of Liberal Arts and Sciences
The University of Kansas

The College of Liberal Arts and Sciences, with more than 33 departments, 600 full-time faculty, 14,000 undergraduate and more than 1,600 graduate students, is the University's largest academic unit, with an annual budget of approximately $60 million. The Dean reports directly to the Provost.

Required Qualifications:
1. Eligibility for faculty appointment as a full professor with tenure in a liberal arts and sciences discipline; earned doctorate, teaching experience and demonstrated scholarship.
2. Substantial administrative and budgetary experience as demonstrated by significant service in an administrative position, such as dean, associate dean or department chair.
3. Demonstrated commitment to the value of diversity in the faculty, staff and student body.

Preferred Qualifications:
1. Experience in fund-raising from private sources and obtaining external grants.
2. Experience and evidence of innovative curriculum development.
3. Evidence of commitment to fostering research activity by faculty and students.
4. Evidence of sensitivity to student concerns and interests.
5. Experience in recruitment, development, utilization and retention of staff.

A complete position announcement is available at www.ku.edu/provost/

Effective Date - Salary - Applications:
The position is available beginning July 1, 2002. Salary will be commensurate with qualifications.

Nominations are due November 1, 2001, but applications will be accepted until the position is filled. Review of applications will begin on November 1, 2001, and will continue until a selection is made. Letters of application and curriculum vitae should be sent to:

Professor Richard Givens

EO/AA Employer

Franklin & Marshall College is a highly selective, coeducational college deeply dedicated to the liberal arts. It is characterized by small, student-centered programs, and a strong, personal faculty. Founded in 1787, Franklin College was named for benefactor Benjamin Franklin. In 1853, Franklin College merged with Marshall College, which was named to honor Supreme Court Justice John Marshall.

Sitting on 175 beautiful acres, the College is located in the residential neighborhood of Lancaster, PA, a vital, well-preserved historic city of 56,000 in a county of 470,000, with easy access to Philadelphia, Baltimore, New York City and Washington, DC. The College has approximately 1,800 outstanding students who are taught by 165 full-time faculty. Devoted to excellence in undergraduate liberal education, the College fosters its students’ intellect, creativity, leadership, and character.

The College has benefited from the extraordinary leadership of its outgoing President, Richard Knecht, who has served since 1984. The next President of Franklin & Marshall will inherit a college with a long tradition of student/faculty research, a strong commitment to collaborative learning, a refreshed curriculum, strong financial resources, a recently completed capital campaign, a distinguished student body and faculty, and physical facilities in quality condition.

The ideal candidate will possess dynamic leadership and effective communication skills, and have an outstanding, demonstrated record of building national presence and support for an organization, strong intellectual skills, a commitment to the liberal arts, and experience in working with diverse constituencies. The search committee plans to begin reviewing materials by mid-October 2001. Nominations, inquiries and expressions of interest may be sent, in confidence and preferably electronically, to the Presidential Search Committee c/o:

Director

Center for Integrated Electronics and Electronics Manufacturing

Rensselaer Polytechnic Institute seeks outstanding candidates for the position of Director of the Center for Integrated Electronics and Electronics Manufacturing (CIEEM). Candidates should bring an outstanding record of research accomplishment in one or more areas of microelectronics and related areas of design, devices, and processing.

The Center for Integrated Electronics and Electronics Manufacturing at Rensselaer is a major research center with over $8 million of funded research in areas of gigascale and 3-dimensional interconnect structures, wide-bandgap semiconductors and devices, terahertz devices and imaging systems, and power electronic devices and systems. Facilities of the CIEEM include a 10,000 square foot class-100 clean room that is currently being upgraded to support eight-inch silicon wafer technology.

Candidates must have earned a PhD in an appropriate field, and should have extensive experience in developing and managing research programs. The successful candidate will be offered an appropriate faculty rank commensurate with the candidate’s experience and accomplishments. Applicants should submit a cover letter, resume, description of their interests and experience, and a statement summarizing their vision of future research opportunities. Applications and nominations will be accepted until the position is filled. Materials (and inquiries) should be directed to:

South Dakota State University

Physics Organic Chemistry

Department of Chemistry & Biochemistry

Applications are invited for a tenure-track Assistant Professor position available in August 2002. All areas of physical organic chemistry will receive consideration, but applicants with interests in environmental organic photochemistry are particularly encouraged. This position builds on the department's developing program in environmental chemistry, and on the state's EPSCoR "Photodynamics" focus. The successful candidate will be expected to establish a strong and highly visible program of research and instruction. Start-up package is commensurate with expectations. Earn Ph.D. in physical organic chemistry or closely related discipline required, postdoctoral experience preferred. A full description and listing of qualifications is available:

http://www3.sdstate.edu/Academics/CollegeOfArtsAndScience/ChemistryandBiochemistry.

Complete applications consist of a letter of application, CV, graduate transcripts, description of proposed research activities (3 pages max.), statement of teaching philosophy, and three letters of recommendation sent directly to: Organic Chemistry Search, South Dakota State University, Chemistry & Biochemistry, Box 2202, Brookings, SD 57007-0896 (605) 688-5151. Application deadline: November 2, 2001 or until position is filled.

The University of Illinois is an Affirmative Action, Equal Opportunity Employer.
Public Policy Institute of California

The Public Policy Institute of California (PPIC) is a private, nonprofit research organization dedicated to independent, nonpartisan research on economic, social, and political issues that affect the lives of Californians. PPIC conducts policy-related, empirical research, with an active program of outreach and dissemination.

PPIC seeks to add to its multidisciplinary group of researchers, as follows:

1) A full-time Research Fellow to begin on July 1, 2002, to pursue rigorous empirical research on policy issues related to governance in California. Although the area of specialization is open, candidates should be interested in interacting with public officials, and drawing lessons from their research for effective public policymaking or administration, while also maintaining high standards of scholarly objectivity and productivity. Topics of particular interest include public management and administration, taxation and budgeting, and political behavior, including ethnic or racial dimensions.

2) Full-time Research Fellows pursuing rigorous empirical research and analysis on population and social policy issues in California. We are especially interested in candidates with expertise in (a) social policy specializing in areas such as welfare reform, child welfare programs, income support policies, and strategies to promote employment and wages for low-wage earners; and/or (b) immigration, specializing in areas such as the economic progress of immigrants and subsequent generations and the impact of immigrants on receiving areas.

Research Fellow candidates must have a Ph.D. in a relevant academic discipline or be very close to completing their degree, with solid training in theory and research methodology. Senior Fellow candidates should have a distinguished record of scholarship with strong policy orientation.

Please submit a letter that describes your research interests, together with your vita, three letters of reference, and samples of written work to: Christina Martinic, Research Administrator, Public Policy Institute of California, 500 Washington Street, #800, San Francisco, CA 94111. Please indicate: ‘Governance Search Committee’ or ‘Population Search Committee.’ Electronic submissions may be sent to martinic@ppic.org.

PPIC offers a competitive compensation and benefits package. It is an important goal of the Institute to reflect the diversity of the state’s population at every level of the organization. As an equal opportunity employer, the Institute particularly encourages women and members of minority groups to apply.

Screening of applications will begin on October 15, 2001, and will continue until the position is filled. For more information about PPIC, please visit our website at www.ppic.org.

BARNARD COLLEGE
DIRECTOR, EDUCATION PROGRAM

Barnard College seeks an energetic, imaginative leader for the Program in Education which offers certificates and minors to undergraduates. Requires a doctorate, demonstrated excellence in scholarship and research, college-level teaching, and experience with pre-college education in diverse, urban settings. A focus on secondary education is preferred. The Director will oversee all administrative aspects of the program and will teach in the areas of specialization and maintain an active research program. The title, rank and field are open. Appointment as tenurable, associate or full is preferred. For more details see http://www.barnard.edu/prøyod/fullpositions.htm Candidates should send a statement of teaching and research interests, cv, reprints, and three letters of reference to Education Director Search, c/o Psychology Department, Barnard College, 3009 Broadway, NY, NY 10027-6598. Applications are due on November 1. Position begins July 2002.

Barnard College is an equal opportunity employer and encourages applications from women and members of under-represented groups.

HOMILETICS, TENURE-TRACK

Drew University, The Theological School, together with the Caspian School of Graduate Studies, invites nominations and applications for a tenure-track position in Homiletics, rank open. Drew seeks a professor who will be responsible for teaching basic and advanced preaching courses to seminary students as well as Homiletics courses for PhD students in the Liturgical Studies program at the Graduate School. At Drew Theological Seminary basic preaching is currently taught in the context of a year long, team-taught course that integrates preaching, music, and liturgy.

Applicants for the position should have a PhD in Homiletics or in a related field of theological studies, significant preaching experience in a church setting, interest in the performance of preaching, including communicating the Gospel in a digital culture, teaching experience along with evidence of scholarship in the field of Homiletics. The successful candidate will possess a manifest commitment to foster a culturally diverse preaching style, to encourage an interest in the interaction of preaching, music, and worship, and to mentor graduate students in Homiletics.

The Theological School is affiliated with the United Methodist Church and together with the Caspian School of Graduate Studies continues its development of a diverse, engaged, and interdisciplinary faculty equipped to teach an international and multi-denominational student body.

Applications including a cover letter, c.v., three letters of reference, writing sample, and a video of a sermon or homily should be sent by October 15, 2001, to Prof. A. M. Brant-Doe, Theological School, Drew University, 36 Madison Avenue, Madison, NJ 07940. AABEDE

54 HISPANIC OUTLOOK 09/10/2001 1982
ASSOCIATE VICE PRESIDENT FOR HUMAN RESOURCES

Southern Connecticut State University invites applications and nominations for the position of Associate Vice President for Human Resources. Founded in 1893 and part of the Connecticut State University System, Southern Connecticut State University is a public, comprehensive, coeducational institution. Located in New Haven, CT, the University has 12,127 students and 1,532 full-time and part-time faculty and staff.

The Associate Vice President for Human Resources is responsible for supervising the Office of Human Resources and all aspects of the University’s human resource management including: the interpretation and implementation of contractual agreements, regulations and laws affecting personnel and labor relations; directing the University’s employment functions; directing the administration of benefits and workers’ compensations programs; directing the University’s employee training and development services; and, managing the broad human resources programs and services mandated by legislation or needed by the University for effective utilization of its staff. These include, but are not limited to, such areas as: job analysis and classification; personnel records management and reporting (HRIS); providing policy analyses and human resources studies as required; and, carrying out special projects as assigned by the President.

Qualifications: Demonstrated ability to interpret and apply laws and regulations applying to employment, benefits administration and labor relations in large and complex organizations. Demonstrated ability to conduct or participate in collective bargaining, to develop sound collective bargaining strategies and to administer resulting contracts, including the management of discipline and grievance cases. Demonstrated ability to direct and perform all the functions-based fields of human resource administration including employment, fair employment practices, training and development, compensation and benefits administration, and accommodation of workers with disabilities. Demonstrated ability to manage effectively a ten-member professional and support staff in providing such services. Not less than seven years of relevant human resource management experience, including previous experience in a unionized setting, in an organization with complex personnel systems are required. Candidates must also have experience in HRIS systems and multiple contract administration. Master’s degree is required. These qualifications may be waived for individuals with appropriate alternative experience.

Salary is competitive with qualifications and experience; with excellent fringe benefits.

Review of applications begins September 15, 2001 and continues until the position is filled. Applicants should submit their resume and a letter of application, along with the names, addresses and telephone numbers of at least three references to:

Vice President of Academic Affairs and Enrollment Services

Cumberland County College is seeking an individual with the ability, energy and motivation to assist the President in realizing the Vision, Mission and Strategic Directions of Cumberland County College. Core competencies required to achieve success in this position are the ability to lead, advance program development, champion student success and promote institutional outreach and community relations. Responsibilities of the Vice President of Academic Affairs & Enrollment Services are to support Cumberland County College’s mission, learning-centered mission statement and strategic directions. In addition, this individual has accountability and responsibility for the leadership, administration, supervision, and coordination of the programs, policies and practices of both the Academic Affairs Divisions and Enrollment Services Departments. This will be accomplished through the use of communication, technology and continuous quality improvement methods while utilizing a team building approach in order to nurture learning, curriculum development, improvement of program offerings, support of student success and fostering of institutional outreach. The Vice President will represent the President in his absence. Requirements include a Ph.D or Ed.D in higher education or academic subject discipline, as well as senior management level experience in the four to ten years or above range. Candidates must possess demonstrated expertise in community college teaching, academic administration, student academic support services, budget development and management, program development and administration, management of personnel and students, professional development, and community relations. Essential to this position is full time college or institutional management experience and skills including developing and writing business/institutional/divisional plans, knowledge of relevant legislation, and staff development and management. Excellent written and oral communication skills are critical, as well as the ability to motivate and inspire staff and community members, and a good understanding of economic conditions of community colleges and business. Interested parties must send a cover letter, current vita or resume, three professional references and e-mail address to Vice President for Academic Affairs and Enrollment Services Search, C/O Human Resources, Cumberland County College, PO Box 1500, Vineland, NJ 08362-1500. Review of candidates’ credentials will begin on September 15, 2001, and continue until the search is completed. The anticipated start date for the position is January 3, 2002. Attractive benefits package and potential NJ College and University Homebuyers Program eligibility.

Cumberland County College is an Equal Opportunity Employer. Women and minorities are encouraged to apply.

DEPARTMENT OF SOCIOLOGY

The Department of Sociology seeks a full-time, tenure-track faculty member to be appointed at the rank of Assistant Professor, beginning 21 August 2002. A Ph.D. is required, with research interests in one of the following areas: social stratification and social inequality, political sociology and social movements, economic sociology or demography. Preference will be given to candidates with ability and interests in teaching social statistics and research methods in addition to substantive courses. Successful candidates should demonstrate potential for excellence in research and university teaching, as well as willingness to serve on masters and doctoral committees, and to provide departmental/program service. Salary will be competitive, based on qualifications and experience. Please send a cover letter, cv, a writing sample, and three letters of reference to: Chair, Search Committee (SOC), Dept of Sociology, University of Illinois, 326 Lincoln Hall, 702 S. Wright Street, Urbana, IL 61801. For full consideration, applications should be received by 15 October 2001.

The University of Illinois is an Affirmative Action, Equal Opportunity, Employer.
Iona College
School of Arts & Science
Full-Time Faculty Openings
HISTORY/POLITICAL SCIENCE

Iona College, dedicated to personal teaching in the tradition of the Christian Brothers and American Catholic higher education, and an equal opportunity employer, is seeking applicants for one position of Assistant Professor in History and one position of Assistant Professor in Political Science beginning September 2002.

• POLITICAL SCIENCE (American Politics)
  Candidates must have an emphasis in American politics with the ability to teach courses in constitutional law, the Congress and Presidency, parties and elections, and public policy. Ability to teach world history is preferred. The position will also carry the responsibility for directing Iona's active Pre-Law Program.

• HISTORY (East Asian)
  Candidates must have an emphasis in East Asian history with the ability to teach undergraduate and graduate level courses in Chinese and Japanese history, as well as courses in world history.

Both positions are tenure track and require a PhD in hand at time of hiring.

Interested applicants should send a CV, a letter of application, including a personal statement of one's teaching philosophy, and three letters of reference to:

Joseph Morgan, CFC
Chair - History/Political Science Department

715 North Avenue
New Rochelle, New York 10801

Applications will be accepted until October 31, 2001.

Saint Joseph's University
Philadelphia, Pennsylvania
Vice President for Finance

Located on the western boundary of Philadelphia, Saint Joseph's University is a nationally recognized, private, comprehensive university founded by the Jesuits in 1851. Distinguished by its strong liberal arts core curriculum, respected teaching faculty, individualized attention to students, and its highly successful students and alumni, Saint Joseph's emphasizes the development of the whole person. Additional information about the University is available on the web site at www.sju.edu

The Vice President for Finance is the chief financial officer, reporting to the President and the Executive Vice President of the University. S/he is a member of the President's Cabinet and provides support to the Finance Committee and the Investment Committee of the Board of Trustees. The Vice President is responsible for providing leadership and direction to the Finance area and to the direct reports including the director of budgets, the director of human resources, the student service center, and the controller (who oversees areas such as travel and purchasing).

The ideal candidate will have extensive management and finance experience, preferably in higher education, and the ability to work effectively with a strong management team and an active board of trustees. Superior communication and interpersonal skills, as well as a demonstrated commitment to team-based management and the values of Jesuit, Catholic higher education are essential. The successful candidate will also have in-depth knowledge of the use of technology (preferably SCT Banner) to implement financial processes and to support planning and decision-making. A bachelor's degree is required, an advanced degree is preferred.

The University is being assisted in this search by Jean Dowdall, vice president, A.T. Kearney, Executive Search, and her associate, Rob Carney. Nominations, applications and requests for additional information should be sent to them at rob.carney@atkearney.com, or to A.T. Kearney Executive Search, 333 John Carlyle Street, Alexandria VA 22314; submission of materials by email using MSWord attachments is very strongly encouraged. Candidates should provide a resume and a cover letter describing their interest in and qualifications for the position, and the names and telephone numbers of at least five references; references will not be contacted until candidates have been notified. Review of candidate materials will begin on October 8th; for full consideration, materials should be submitted by that date.

Saint Joseph's University is an Equal Opportunity Employer.

Washington, D.C. 20052

www.gwu.edu/~hrs
The Presidential Search Advisory Committee invites applications and nominations for the position of President of Texas A&M University. Texas A&M University is a public institution, a comprehensive doctoral research university dedicated to the development and dissemination of knowledge in diverse academic and professional fields. While continuing to fulfill its traditional mission as a Land-Grant/Sea-Grant/Space-Grant institution, the University is expanding its role to meet the changing needs of state, national and international communities. The University is committed to preeminence in teaching, research and service.

The University has approximately 44,000 students, 2,600 faculty and 10,000 staff members. The current annual sponsored research expenditure is about $398M, and the total annual budget is approximately $830M. Endowments total about $3.8B. The size of the university, the total volume of the research programs, and the size of the total endowment are among the top few universities nationally.

The President is the CEO of the University and reports directly to the Chancellor of The Texas A&M University System. The President must provide visionary academic leadership, be a proven fund-raiser, be committed to diversity and a global outlook, and must work effectively with the Chancellor and Board of Regents. The President must be an articulate advocate who will represent the University effectively to diverse constituencies, including the legislature. Qualifications include a distinguished record of leadership and scholarly achievement, an earned doctorate or equivalent, demonstrated excellent administrative skills, and the ability to work effectively with faculty, staff, students, former students and other constituencies.

The planned appointment date is June, 2002. The search will continue until the position is filled, but for full consideration, nominations and applications should be received by November 30, 2001. Under Texas law, the names of finalists only must be disclosed. Such disclosure must be made 21 days prior to the Board of Regents action to appoint our next President. The committee will make every effort to maintain confidentiality. Applications should include a curriculum vitae and names, addresses and phone numbers of five references, and should be received by November 30, 2001. Nominations and applications should be sent to: Dr. John L. Junkins, Chair, Presidential Search Advisory Committee, Texas A&M University, TAMU 3141, 701 H.R. Bright Building, College Station, TX 77843-3141.

The Texas A&M University System is an Equal Opportunity and Affirmative Action Employer.
Welcome to the Forefront of Education.

DePaul University is the largest, private Catholic institution in the country, as well as an urban university whose history reflects over a century of academic excellence, social justice, and community empowerment. 1987

MIAMI UNIVERSITY

DEAN

RICHARD T. FARMER SCHOOL OF BUSINESS ADMINISTRATION

Miami University invites nominations and applications for the position of Dean of the Richard T. Farmer School of Business Administration. The School enrolls 4,500 students and is the largest professional school within this public university with an enrollment of 16,000. Located on its beautiful campus in Oxford, Ohio, Miami is widely recognized for its excellence in undergraduate education and selected graduate programs. The School has a distinguished alumni body, and counts among its graduates current or former Chairmen and/or CEOs of such corporations as AT&T, Cintas, Daimler-Chrysler, General Motors, Manpower, Procter & Gamble, and U.S. Precision Lens.

The Dean
Reporting to the Provost and Executive Vice President for Academic Affairs, the Dean is responsible for all aspects of the academic leadership of the School. As a member of the Council of Academic Deans, the Dean is responsible for meeting shared University goals, including development activity and alumni relations.

Qualifications and Personal Characteristics
The successful candidate will have a strong commitment to the highest quality undergraduate and graduate education in a predominantly undergraduate institution. Candidates from academia will have an exemplary and balanced record of teaching and scholarship. He/She will have previous successful administrative or executive experience, and will possess excellent communication skills that will allow him/her to work with the wide variety of constituents of the Richard T. Farmer School of Business Administration. The future Dean will facilitate excellence in teaching and research and within and, importantly, among the disciplines of the School. He/She will have demonstrated success or significant promise in fundraising among external constituents.

In addition to these requirements, we seek a candidate who genuinely enjoys interacting with talented young men and women, and who will thrive in our University setting by fostering an atmosphere of inclusion and defining a commonality of goals. We look forward to hiring the next Dean of the Richard T. Farmer School of Business Administration to lead our students, faculty, and staff into Miami University's third century of education.

Applications should include a letter of application, resume, and the names, mail and e-mail addresses of five references. Applicants are asked to provide a preferred mailing address, e-mail address, and fax number(s). All are strongly encouraged to submit correspondence and materials by e-mail and Word attachment. Please address all inquiries, nominations, and applications to:

Karen K. Shaffer
Secretary of the University
Miami University, Oxford, OH 45056
secretary@muohio.edu

To ensure full consideration, applications should be received by October 1, 2001. The search will remain open until an appointee is identified. The starting date is negotiable, with the expectation the new dean will take office by July 1, 2002.

The search committee is being assisted by Chuck Bunting, Vice President, A.T. Kearney Executive Search. Questions may be directed to him at: (703) 739-4631(phone); (703) 518-0391(fax); charles.bunting@atkearney.com.

For more information, visit Miami University's Home Page at http://www.muohio.edu.

Miami University is an affirmative action, equal opportunity employer.
TREASURER

Amherst College is seeking candidates for the position of Treasurer. As the Chief Financial Officer of the College, the Treasurer is responsible for working with the College’s senior administration and Trustees to develop and implement a financial strategic vision for the College, for financial planning and budgeting, and for overseeing the College’s operations. Additionally, the Treasurer oversees financial operations for the Folger Shakespeare Library in Washington, D.C. The Treasurer actively manages the billion dollar Endowment Funds of the College and Folger Library as well as other funds in conjunction with the Trustees and a diverse array of investment advisors. Departments reporting directly to the Treasurer are Comptroller, Dining Services, Facilities Planning and Management, Human Resources, Office of Administrative Services and Rental Housing.

The Treasurer reports to the President and, as a senior member of his staff, works with other senior administrators. He/she also provides staff support to several committees of the Board of Trustees and works closely with the Trustees and all other constituencies of the College, professional associations and agencies, and individuals in the local community.

The successful candidate will have an understanding of and a commitment to the central intellectual mission of a selective undergraduate college; a record of successful managerial and financial leadership; experience in a broad range of complex financial and investment matters; and a proven ability to communicate with and be a leader among a broad array of constituencies inside and outside of a multifaceted institution, including the Five-College, Inc. consortium of which Amherst College is a member.

Nominations and applications, including a current curriculum vitae and the names and addresses of three references, should be sent to: Treasurer’s Search Committee, Office of the President, Amherst College, PO Box 5000, Amherst, MA 01002-5000. A review of applications will begin October 25, 2001 and continue until the position is filled.

Amherst College is an Equal Opportunity/Affirmative Action employer and encourages women, minority, and persons with disabilities to apply.

ASSOCIATE EXECUTIVE DIRECTOR
FOUNDATION/DIRECTOR OF DEVELOPMENT

WILLIAM RAINNEY HARPER COLLEGE

William Rainey Harper College is a comprehensive community college located in Chicago’s northwest suburbs, which enrolls over 25,000 students of all ages. The Educational Foundation is seeking the above administrator position.

The Associate Executive Director of Development will create and implement externally focused fund raising programs that aggressively pursue strategies designed to generate immediate, major and planned gifts from individuals and institutions in support of the annual and capital objectives of the Harper College Educational Foundation.

Requirements:

- A Bachelor degree with preferred specialization in psychology, sociology, communications, journalism or business is required. Masters degree preferred. Five or more years of progressively successful fund raising and management experience in the educational or health care setting that emphasizes a comprehensive approach to development that includes outright individual giving. Knowledge of corporate, foundation and social philanthropic community is preferred. Candidate should be a self-starter with ability to work productively without day-to-day supervision.
- Positive, outgoing personality and exemplary communication skills are a necessity.

Application review will begin immediately and will continue until the position is filled. To be considered for this position, submit a resume and statement outlining the contributions you can make to the College. Send to:

William Rainey Harper College
Attn: Employment Specialists - AFD
1200 West Algonquin Road, Palatine, IL 60067

Harper College is an Equal Opportunity, Affirmative Action Employer that encourages applications from women, minority group members, and persons with disabilities.

EOE

BENTLEY COLLEGE
Waltham, Massachusetts

Provost and Vice President for Academic Affairs

Bentley College, one of the nation's most innovative business schools, invites nominations and expressions of interest in the position of Provost and Vice President for Academic Affairs.

Founded in 1917 and located in Boston's high tech corridor, Bentley College prides itself on providing a business education for the information age. As a Carnegie II Research Institution, Bentley has nearly 4,000 undergraduate, 1,800 graduate, and 3,300 executive and professional education students learning in an environment that integrates information technology with a broad business and liberal arts curriculum, gaining knowledge, skill and experience for careers in a global economy. In its "Best Colleges 2001" survey, U.S. News & World Report ranked four of Bentley's undergraduate offerings among the best business programs in the nation. Out of 1,600 U.S. colleges and universities with business programs, Bentley ranked 13th in e-commerce, 21st in management information systems, 23rd in accounting, and 44th in general management. Bentley's McCallum Graduate School of Business was ranked 20th in entrepreneurship and 25th in management information systems in the same survey. Computerworld ranks Bentley's Information Age MBA 16th among the nation's top techno-MBA programs. Moreover, Bentley is the only small college in the country nationally ranked in e-commerce, information systems and accounting.

As the largest business school in New England, Bentley has dedicated over $80 million to technology including an investment of $22 million in recently opened academic technology facilities. Additionally, Bentley has the nation's oldest student laptop requirement. The college was a pioneer in service learning for non-profits and has a nationally known business ethics center. Bentley offers a tight-knit community with accessible professors, small classes, and an excellent ratio of students to faculty.

As the chief academic officer, the Provost will lead a committed, enthusiastic, unified faculty in building the college's academic excellence. The Provost, with the President, Trustees and senior officers, shares in institutional strategic planning and college-wide leadership for policy formulation and administration.

The successful candidate will have the intellect, integrity and administrative acumen to lead evolutionary change in partnership with the faculty and other members of the Bentley community. The Provost will have a distinguished academic record with evidence of excellence in teaching, capacity to connect with faculty in a variety of fields, enthusiasm for information technology, an understanding of faculty governance and experience with fiscal policy.

Nominations, expressions of interest, and inquiries should be directed, in confidence, to the college's consultants:

62 HISPANIC OUTLOOK O 09/10/2001

1930
VICE PRESIDENT OF ACADEMIC AFFAIRS

WILLIAM RAINNEY HARPER COLLEGE

William Rainey Harper College, located in Chicago's beautiful northwest suburbs, invites nominations and applications for the position of Vice President of Academic Affairs. William Rainey Harper College is a comprehensive community college. Its average enrollment of 25,000 includes students of all ages. Founded in 1965, the Harper College district encompasses 23 communities with a campus area of 200 acres. Harper is fully accredited by the Higher Learning Commission of the North Central Association of Colleges Schools. Harper also received a bond rating of Aaa from Moody's Investor Service. The College supports and encourages excellence in teaching, the celebration of diversity and active support of the Institutional Core Values - Integrity, Respect, Excellence, and Collaboration.

CANDIDATES SHOULD POSSESS:
- Earned doctorate from an accredited institution.
- Ten years of professional experience. Minimum of five years of senior level administrative experience, at the Dean's level or above desired.
- Creative, visionary leadership - with the ability to support the timely development/implementation of new programming.
- Energy and enthusiasm with a sense of humor.
- Strong and decisive leadership and experience in curriculum and instruction, strategic planning and implementation, human resource development, shared governance, collective bargaining, fiscal management, facilities planning and community relations.
- A demonstrated commitment to promote advanced technology and innovative approaches to the delivery of instruction and services.
- Established commitment to strengthening diversity as it relates to students, curriculum and employees.

ADDITIONAL CHARACTERISTICS DESIRED:
- Masters in an academic discipline.
- Community College background.
- Teaching experience.

CHALLENGES TO BE ADDRESSED BY NEW VPAA:
- A positive working relationship with faculty.
- Provide dynamic leadership for the on-going development of a curriculum which is both "trend setting" and responsive.
- Effective communication to bring about positive change.

APPLICATION PROCEDURE:
Applications for the position of Vice President of Academic Affairs are invited. The cover letter (not to exceed 5 pages) should include statements addressing the identified challenges and leadership potential of this position as identified above and in the position profile posted at www.harpercollege.com/vpaa. In addition, please submit a detailed resume and the names and contact information for three professional references. Note: References will NOT be contacted without the candidate's permission. Applications will be accepted until the position is filled. However, the search committee will begin its review of applications on October 12, 2001. Submit applications to:

Cheryl Kisunzu, VPAA Search Committee Chair
William Rainey Harper College
1200 West Algonquin Road, Palatine, IL 60067
E-mail: ckisunzu@harper.cc.il.us

BRYN MAWWR COLLEGE

PROVOST

Bryn Mawr College invites nominations and applications for the position of Provost.

Founded in 1885, Bryn Mawr College has, since its inception, been dedicated to the education of women. It attracts talented and ambitious students from all over the world to its beautiful 135-acre campus in the suburbs of Philadelphia.

Bryn Mawr is renowned for its distinguished faculty of 142 and for the rigor of its academic programs, which serve approximately 1,200 students in the undergraduate college and 500 students in coeducational graduate programs in arts and sciences and in social work. The College offers a four-year liberal arts curriculum leading to the B.A. degree; it also offers the M.A., M.S.S., M.L.S.P., and Ph.D. degrees. Its cooperative relationships with Haverford College, Swarthmore College, and the University of Pennsylvania further enrich the educational opportunities available to its students.

The Provost reports directly to the President, is the chief academic officer of the College, and is responsible for the vision and implementation of the academic program. Working with the President, the faculty Committee on Appointments and Academic Priorities, and the Deans, the Provost plays a critical role in the support, development and evaluation of faculty, oversees academic support services including the libraries, academic computing, and the grants office; is responsible for the academic budget; and manages the ongoing academic collaboration with Haverford and Swarthmore Colleges.

The ideal candidate will have a deep appreciation for and the ability to articulate the benefits of a small residential liberal arts college dedicated to the education of women. The successful candidate will possess a distinguished record of accomplishment in higher education, including teaching and scholarship; evidence of intellectual leadership and commitment to interdisciplinary pursuits; the ability to give direction to curricular and faculty development; the ability to work effectively with internal and external constituencies; and an interest in exploring new uses of technology in academic settings.

Review of applications will commence immediately with the expectation of an appointment effective June 1, 2002. For fullest consideration, please submit materials by October 15, 2001, in confidence to:

ASSOCIATE DIRECTOR
Princeton Education Research Section

Princeton University seeks an associate director to implement the planned growth of the Princeton Education Research Section (ERS) and its programs. Duties include development of research programs; development of seminars, conferences and workshops; the creation of a working paper series; and fundraising and grant writing. The position is open on September 1, 2001. Must have a Ph.D. in Education or a Ph.D. in a related field and at least three years of experience in research administration. Starting date is December 1, 2001.

Princeton University.

ASSISTANT VICE PRESIDENT FOR ATHLETICS/ATHLETICS DIRECTOR

Providence College, a NCAA Division I institution, invites applications for the position of Athletic Director. This full-time administrative position is responsible for the leadership and vision of the intercollegiate athletic program.

Providence College is a Roman Catholic four-year liberal arts college conducted under the auspices of the Dominican Friars, serving approximately 3,700 full-time undergraduate and 850 graduate students.

The Athletic Director is responsible for the overall direction and comprehensive management of the Division I NCAA intercollegiate athletics and recreational programs and facilities for over 300 student athletes. Responsibilities include, integrating extra-curricular experiences in athletics with the overall educational programs at the College; directing the hiring, supervision and evaluation of diverse coaches and staff; directing the overall fiscal, business, public relations and marketing operations; and enhancing the utilization and management of athletic facilities.

The Athletic Director will maintain compliance with all NCAA and Big East standards and regulations, supervise the intramural program, and manage and implement the Gender Equity Plan. The Athletic Director will partner with the Development/Alumni office to facilitate fundraising for the athletic program.

The position requires a Bachelor's degree in an appropriate field (Master's preferred) with a minimum of 7 years athletic management. The successful candidate will possess proven leadership and judgment, communication, interpersonal, and organizational skills with a commitment to academic achievement and personal growth of college athletes, and the mission of the College.

The College offers a competitive salary and benefits package. Applications must be received by September 20, 2001. To apply, submit resume and cover letter to: Mr. Maurice Paradis, Spherion Corporation, c/o Human Resources, Providence College, 2500 High St., Providence, Rhode Island 02918. Application packages may also be submitted via e-mail to hr@providence.edu.

PROVIDENCE COLLEGE

An EEO/Affirmative Action employer. Providence College especially encourages the application of women and persons of color.

1992
Colorado State University continues the search for the position of Dean, College of Natural Sciences, and invites applications and nominations. The College consists of eight departments including Biochemistry and Molecular Biology, Biology, Chemistry, Computer Science, Mathematics, Physics, Psychology, and Statistics. The Center for Science, Mathematics, and Technology Education (CSMATE) is partially supported by the College. The College offers 10 B.S. and 9 M.S. and Ph.D. degree programs and participates in two interdisciplinary graduate degree programs, Ecology and Cell and Molecular Biology.

Information about this position and the College can be found at [http://www.colostate.edu/Deppts/NatSci/](http://www.colostate.edu/Deppts/NatSci/).

**Qualifications:**

- Evidence of effective administrative experience and leadership
- Evidence of ability to create and implement a strategic vision for the College
- Evidence of ability to develop and sustain strong College programs while addressing central University priorities
- Strength in communication skills
- Ability to work with people of diverse backgrounds
- Success in developing and implementing interdisciplinary undergraduate and graduate curricular and research initiatives
- Commitment to diversity of students and faculty and to programs enhancing cultural pluralism
- Success in working with the private sector to achieve development goals
- Commitment to K-12 collaboration

Preferred starting date is on or before July 1, 2002.

Applicants should send a letter stating their interest and qualifications for the position, including a summary of their personal innovations and accomplishments related to the above attributes. Include a curriculum vitae and three or more letters of reference. Applicants are encouraged to submit materials electronically. Applications and nominations should be sent to:

James L. Fry
Dean of the Graduate School
204 Student Services Building
Colorado State University
Fort Collins, CO 80523-2015
Telephone: 970-491-6817
FAX: 970-491-2194
E-mail: CNSDean@Grad.ColoradoState.edu

Deadline for receipt of materials is October 29, 2001 and will continue until a qualified candidate is selected and the position is filled.

Colorado State University is an EO/AA employer.

---

**FACULTY POSITIONS**

Amherst College announces searches for ten full-time tenure track positions for the 2002-2003 academic year.

Amherst College is a private undergraduate liberal arts college for men and women, with 1600 students and 165 faculty. Located in the Connecticut River Valley of western Massachusetts, Amherst participates with Hampshire, Mount Holyoke, and Smith Colleges and the University of Massachusetts in the Five-College Consortium. For all faculty positions, completion of the Ph.D. or appropriate equivalent is expected. Candidates should have a strong commitment to undergraduate and interdisciplinary teaching in a liberal arts context and a well-articulated plan for sustained research. Additional information on faculty openings at the College can be found on the following web-site: [http://www.amherst.edu/deanfac/facultypositions.htm](http://www.amherst.edu/deanfac/facultypositions.htm). The College mailing address is: Amherst College, P.O. Box 5000, Amherst, MA 01002-5000.

Amherst College is an equal opportunity, affirmative action employer, and encourages women, minorities, and persons with disabilities to apply.

**BIOLOGY.** Assistant Professor. Organismic biology in the field of evolutionary biology. Development of a funded research program with student participation and with a strong field and/or laboratory component is expected. Teaching duties include an upper level evolution course, participation in a team-taught, introductory organismal course with lab, and a course in the candidate's specialty. Postdoctoral experience preferred. Send CV and a statement of research and teaching interests to: Evolution Biology Education Committee, Department of Biology. Have three letters of recommendation and a separate Review of applications will begin on October 15, 2001, and continue until the position has been filled. Further information can be found at: [http://www.amherst.edu/biology](http://www.amherst.edu/biology).

**CHEMISTRY.** Assistant Professor. Two positions, one each in Physical Chemistry and Organic Chemistry. Both positions call for teaching at the introductory and advanced undergraduate level. Participation in interdisciplinary courses and programs is also encouraged. Successful candidates will be expected to establish vigorous research programs in which undergraduates can substantively participate. The research program in organic chemistry can be drawn from any area of experimental organic chemistry, including fields that span the boundaries between organic and other chemical disciplines. Similarly, the research program in physical chemistry can be drawn from any area of experimental physical chemistry, including fields that span the boundaries of physical chemistry and other sciences. Submit a detailed CV and a description of teaching and research plans, and arrange for three letters of reference to be sent to: Professor Patricia B. O'Hara, Chair, Department of Chemistry. Review of material will begin on October 19, 2001.

**ECONOMICS.** Assistant Professor. Applied Econometrics. In addition to teaching courses related to his or her research, the successful candidate is expected to participate in the introductory and intermediate economics courses offered by the economics department. Additional duties include related electives on a regular basis. Amherst offers a 2-2 teaching load (usually three preparations annually) and research support. Candidates' qualifications should include an outstanding record and the promise of high quality teaching and research. Submit CV and copy of graduate transcript, and arrange for three letters of reference to be sent to: Professor Geoffrey Woglom, Chair, Department of Economics, by November 25, 2001. The department will schedule interviews at the AEA meetings in Atlanta.

**FINE ARTS.** Assistant Professor. Artist/printmaker. B.F.A. and M.F.A. or equivalent, and a firm, broad grounding in fundamental principles of form required. Strong exhibition record and teaching experience expected. Responsible for directing the printmaking program and faculty and teaching all levels of printmaking and drawing and in a department combining studio and art history. Candidate must demonstrate a strong commitment to rigorous undergraduate teaching, contribute to studio foundation courses, offer classes in own specialty, advise honors students and supervise other independent study. The artist in this position should be able to integrate the teaching of printmaking and drawing into a multi-disciplinary curriculum. Teaching load is two courses per term. Individual study and studio housing is available. Submit a complete application to: Professor Robert H. Dumas, Chair, Department of Fine Arts, by January 10, 2002. Interviews will be held at the annual AAG meeting in February.

**FRENCH.** Assistant Professor. 19th Century French Literature. Full-time position. Ability to teach modern (post-revolutionary) civilization desirable. Native or near-native fluency required. Send application letter, CV, and three letters of recommendation to: Professor Paul Rockwell, Chair, Department of French. The application deadline is December 1, 2001.

**GEOLOGY.** Assistant Professor. Sedimentology with additional expertise in Stratigraphy, Paleontology, Palaeoecology, Marine Geology, and/or Oceanography. The successful candidate will teach Sedimentology and an additional upper level course or courses that will strengthen the undergraduate major and complement the present departmental offerings. Preference given to candidates with a demonstrated interest in continued development and teaching of the introductory course in Surficial Earth Systems and the Environment. Geology faculty also supervise undergraduate research projects annually. Candidates must have an ongoing research program. Start-up funds are available. Submit CV, brief statement of research interests and accomplishments and three letters of recommendation to Professor J. A. Hohmann, Chair, of the Geology Search Committee. Review of applications will begin on November 20, 2001 but applications will be accepted until a pool of qualified candidates is identified.

**HISTORY.** Assistant Professor. Latin American History. Teach two courses per year, including both general and specialized courses in Latin American history, and direct senior theses in Latin American fields. Strong commitment to undergraduate teaching is expected and completion of the requirements for the Ph.D. in Latin American History is expected. Send application letter, CV, a short writing sample, and three letters of recommendation to: Ms. Rhea Cabin, Department of History. Review of applications will begin on November 16, 2001.

**MUSIC.** Composition, music theory, computer/electric music. For details, go to: [http://www.amherst.edu/deanfac/facultypositions.htm](http://www.amherst.edu/deanfac/facultypositions.htm).

**PSYCHOLOGY/NEUROSCIENCE.** Assistant Professor. Physiological psychology/behavioral neuroscience. Teach two courses per semester, direct senior research projects, develop an active research program and participate in the College's Neuroscience Program. The successful applicant will be expected to teach physiological psychology with laboratory, a biologically based introductory course (courses in psychology as a natural science) and intermediate courses, as well as advanced seminars. Areas of particular interest include psychopharmacology, hormones and behavior, and plasticity. Teaching experience desirable. The Psychology department has excellent classroom, office and laboratory facilities, and start-up funds are available. Submit CV, a sample reprint and a statement of teaching and research interests to: Chair of the Psychology Search Committee, Department of Psychology, by December 15, 2001.

---

**1993 09/10/01 O HISPANIC OUTLOOK 65**
Executive Director

The Board of Regents, State of Iowa seeks highly qualified candidates for the position of Executive Director. The Executive Director is responsible directly to the Board and acts under its general direction. This Board of Regents is the statutory governing body for the University of Iowa (which includes the University of Iowa Hospitals and Clinics), Iowa State University and the University of Northern Iowa, in addition to the Iowa School for the Deaf and the Iowa Braille and Sight Saving School. The Iowa Regent Universities have a combined enrollment of approximately 69,000, a total faculty and staff of more than 39,000 and a $2.7 billion fiscal year 2002 budget. The Board's Executive Director and staff offices are located in Des Moines, Iowa.

The Executive Director acts under the general direction of the nine-member Board of Regents and is responsible for the review and recommendation of strategic plans, legislative activities and academic programs and financial considerations including budgets; areas of responsibility would also include the direction of collective bargaining activities.

In addition, the Executive Director is responsible for administering a wide range of business, human resources and program activities and is responsible for representing the Board as appropriate with state and federal legislative bodies, other organizations and the general public.

It is important that the successful candidate be a visionary who can develop and nurture close working relationships with the legislative and executive branches of the state government, in addition to the Board of Regents. Applicants must have an appropriate graduate degree and a minimum of five (5) years senior level experience in a leadership position with a similar agency or institution of higher education. The successful candidate must be a hands-on manager with outstanding leadership, decision making, budgetary and communications skills, both oral and written. Obviously, a demonstrated track record of success in managing a large, complex organization is important. A competitive salary commensurate with qualifications and experience is offered.

Nominations or applications including current resume should be sent to:

Lauer, Sbarbaro Associates • EMA Partners International
30 North LaSalle Street, Suite 4030, Chicago, IL 60602-2588
Ph: 312-372-7050 • Fax: 312-704-4393 • Email: SBARBS@aol.com

Review of nominations and applications will begin immediately and continue until position is filled. It is anticipated that the new Executive Director will assume the position on or about January 1, 2002.

THE BOARD IS AN EQUAL OPPORTUNITY AFFIRMATIVE ACTION EMPLOYER. QUALIFIED WOMEN, MINORITIES AND MEMBERS OF OTHER PROTECTED GROUPS ARE ENCOURAGED TO APPLY.

COLUMBIA UNIVERSITY
IN THE CITY OF NEW YORK

English as a Second Language
American Language Program

Faculty openings for full-time Associate or Lecturer positions starting July 2002. Opportunity for future renewable career-track appointments for candidates with demonstrated excellence in teaching, scholarship and service. Requirements: MA in TESOL, applied linguistics, or closely related field; minimum three years teaching in a university-based EAP program; demonstrated superior teaching. Creativity in materials development, an ability to teach advanced writing and ESP, an ability to work in teams, and an ability to take leadership positions also required. Send cover letter, vita, and three references to David H. Quinn, Chairman, American Language Program, 504 Lewishon Hall, 2970 Broadway, MC 4113, Columbia University, New York, NY 10027 by December 31, 2001. Candidates must supply an e-mail address. Screening of candidates will begin in October, 2001 and will continue until suitable candidates have been selected.

Columbia University is an Equal Opportunity/ Affirmative Action employer. Minorities and women are encouraged to apply.

MONOCULTURALISM: WHEN YOU DON'T KNOW THAT YOU DON'T KNOW

What does it mean for Latino students to live and study in a monocultural, monolingual world?

If you have been raised to know only one culture, it will take some intervention to help you understand that what you see is not the whole story. But if you have experienced more than one culture in your personal life, you know that there is always more to the story than what you are seeing. Imagine waking up one morning and finding that everything is the same color—your room, your view from the window, yourself. Consider two ways of being aware of this scene: one is knowing consciously that this is not the way things looked last night when you went to bed, the other is having no memory of last night and thinking that this is the way the world has always looked to everyone. We each see the world through our own lens, our own experience. However, maintaining the metaphor, some of us know that it looked different the night before, and some of us don’t.

It is natural for monocultural people to assume that their world looks the same to everyone. At first glance, this might seem an unfair observation. Anyone can look around and see that people have different ways. Nevertheless, to a monocultural person, there appears to be a norm by which all differences are measured, a starting place to which all experience relates. Where does that underlying awareness come from? To monocultural persons, it appears to simply exist. In actuality, it comes from their own experience. Their underlying perception, grounded in their experience, is assumed to be a norm.

How does this assumption play out in a country where most people grow up knowing only one culture? Well, for one thing, monocultural people have to make a concerted effort to find out who they are, to know their own culture as a culture. It is only when we experience another culture, sometimes through travel, that we finally see ourselves. The catch is that until monocultural people are immersed in another culture, they are not aware that the way they think and live is an expression of one culture. It feels very much like a norm.

What are the repercussions for bilingual/bicultural people in such an environment? There are two main consequences. First, monocultural people of the dominant culture are expecting bilingual/bicultural people to eventually come home to the so-called norm. Second, it is a challenge in a monocultural academic system to understand and appreciate the benefits of being bicultural and bilingual, and the enrichment that it brings to the classroom. In a previous issue of HO, Dolores Fernández, Hostos Community College president, said in an interview, “Since my head is from an enrichment perspective and not a remediation perspective, I could never understand how in the United States we could label ‘people who have two languages remedial.’”

Bicultural students pay a high price for living in a monocultural world in terms of awareness of their own self-worth. It is difficult to perceive the special contribution that stems from your knowledge of more than one culture when a system is set up to ignore this valuable asset.

What can be done to help Latino students make lemonade out of lemons in a monocultural world? We must convey to our Latino students and other bicultural students the significance of seeing the world in more than one way. As the world gets smaller and globalization grows, the future of the U.S. should rest in the hands of those who know themselves through the eyes of others—an accomplishment that comes with being bicultural.

In Change Magazine (“Multi-Culturalism: The Crucial Philosophical and Organizational Issues,” July/August 1991), Patrick J. Till proposes “a new world order that empowers hitherto excluded peoples of our and other nations to contribute their experience on an equal footing to our collective understanding of ourselves, society, and the world.” All students will benefit if academic institutions embrace the importance of being bilingual and bicultural in a multicultural future.

If interested in submitting a ¡Punto Final! “think piece,” please e-mail us at sloutlook@aol.com for guidelines.
Welcome to the Forefront of Education.

DEAN OF THE SCHOOL OF EDUCATION
DEPAUL UNIVERSITY • Chicago, Illinois

DePaul University seeks nominations and applications for the position of Dean of the School of Education. Reporting to the Executive Vice President for Academic Affairs, the Dean is responsible for the overall academic, administrative, and fiscal leadership of the School. The new Dean will be a seasoned educator and skillful administrator with experience in a leadership role at a comparable institution. The School of Education seeks a dynamic leader who will be an effective advocate for new resources and who will identify new avenues for the School to broaden its reach and reaffirm its commitment to improving primary and secondary education in the metropolitan area.

With more than 20,500 undergraduate and graduate students enrolled in nine colleges and schools located on eight campuses in the greater metropolitan area, DePaul University is the nation’s largest Catholic university and the largest private university in Chicago. Founded in 1898 by the Congregation of the Mission, a Vincentian order of Catholic priests and brothers, DePaul’s mission is one of building capacity through accessibility to high quality education. DePaul respects the religiously pluralistic composition of its community and endorses the interplay of diverse value systems beneficial to intellectual inquiry.

Guided by a conceptual framework of the Urban Professional Multicultural Educator, the School of Education provides a richly rewarding experience for 1,100 graduate and 700 undergraduate students. Approximately 80 full and part-time faculty teach in 10 program areas. The School of Education awards bachelor’s degrees in Early Childhood Education, Elementary Education, Secondary Education, and Physical Education, and offers master’s degree programs in Teaching and Learning (Certification program), Curriculum Studies; Educational Leadership; Human Services and Counseling; Language, Literacy, and Specialized Instruction; and Social and Cultural Foundations in Education. A doctorate in education is also offered. In addition, seven research and outreach programs enhance the School’s vital connection to Chicago and suburban schools and community organizations. Over the next several years, the School of Education expects to grow at both the undergraduate and graduate level.

The Dean

Working with an Associate Dean, two Assistant Deans, and a total administrative staff of 23, the Dean will be responsible for overall leadership of the School, including but not limited to: academic planning and new program development; fostering diversity; program review and accreditation; faculty and staff recruitment, professional development, and evaluation; oversight of governance; personnel, promotion and tenure systems, student recruitment, advising, initial licensure and placement; advocacy for and allocation of financial resources. The Dean will further ongoing education efforts in Chicago and participate actively at the local, state, and national level. Working with other University offices, the Dean will also be responsible for meeting University-wide goals, including development activity and enrollment growth.

DePaul University offers competitive salaries, best-in-class benefits, including life, medical, dental, retirement plan, generous vacation plan, and tuition assistance for the employee and dependents.

All inquiries, nominations, and applications should be directed to:
Sage Search Partners/DePaul - HO, 22 Oakland Road, Brookline, MA 02445,
fax: (617) 232-6655; Email: sara-f@mediaone.net or herzog-sage@juno.com

DePaul University is committed to diversity and equality in education and employment.

A CAPITOL VIEW

BY GUSTAVO A. MELLANDER

Three-quarters of American middle school and high school students use the Internet, and most have enthusiastically embraced instant messaging tools. They feel it enriches their friendships and expands their social worlds. At the same time, teenagers readily admit that their eagerness to use the Internet has taken time away from their families.

In fact, teenagers’ use of the Internet has been a source of tension in many households. Some 40 percent of parents report they have argued with their children about their use of the Internet, and most say they have tried to establish rules about their children’s use of the Net.

Parents generally believe mastery of the Internet is important for their children’s success, and 55 percent say it has been a good thing for their children, especially when it comes to schoolwork. A scant 6 percent say it is a bad thing. Given the data unearthed in a recent report, one would have expected higher percentages in both categories. These and other revelations are found in Teenage Life Online: The rise of the instant-message generation and the Internet’s impact on friendships and family relationships, a new report funded by the Pew Charitable Trusts.

The Pew Internet & American Life Project was charged to examine the social impact of the Internet. It’s a revealing and a bit disconcerting report that is based on a phone survey by Princeton Survey Research Associates of 754 teenagers and 754 of their parents and a weeklong online discussion group conducted in association with the research firm Greenfield Online.

“The Internet is the telephone, television, game console, and radio wrapped up in one for most teenagers, and that means it has become a major ‘player’ in many American families,” says Lee Rainie, director of the Project. “Teens use online tools to chat with their friends, kill boredom, see the wider world, and follow the latest trends. Many enjoy doing all those things at the same time during their online sessions. Multitasking is their way of life.”

Major Findings
- Seventeen million youths between the ages of 12 and 17 use the Internet, 75 percent of that age bracket.
- Eighty-seven percent of parents believe the Internet helps their children in school; 78 percent of online teens agree.
- Forty-eight percent of these teens say their use of the Internet improves their relationships with their friends; 32 percent say it helps them make new friends.
- Sixty-four percent of online teens say they think use of the Internet takes away from the time young people spend with their families.
- One of the new symbols of friendship in the teen world is sharing online passwords. Some 22 percent of teens who use e-mail, instant messaging, or chat rooms have done that as a sign of trust.
- The report shows that parents and their children often do not agree about how their families address issues related to the Internet. “Parents are often worried about what their children are doing online, but the teenagers themselves aren’t that concerned,” says Amanda Lenhart, principal author of the report. “They have mastered the technology, are very clever in the way they manage their online interactions, and are confident they can handle what the Net throws at them.”

Cautionary Notes

Thirteen million of these teenagers, 74 percent of those with Internet access, have used instant messaging. While most instant messages are innocuous chit-chat, many are socially potent. More than a third use IM to say things they don’t want to say in face-to-face conversations with their peers. Seventeen percent has used IM to try to get some- one out, and 13 percent has used IM to break up with someone. In addition, 26 percent says the Internet helps them get information about things that are hard to talk to other people about.

Lack of honesty is evident and widespread. Many online teens use different screen names and e-mail accounts to manage information that comes in to them and their identity with others in the online world. They also pretend to be different people and have had experiences with others giving them false information.

Some 57 percent of parents worry that strangers will contact their children online. These worries are well founded. Close to 60 percent of teens have received an instant message or an e-mail from a stranger, and 50 percent reports e-mailing or instant messaging with someone they have never met before.

Despite this, teens themselves are not particularly worried about strangers online, with 52 percent saying they do not worry at all about being contacted.

Up to 25 percent of older boys online have lied about their age to access a Web site. This is one indication of how many teens might have accessed online pornography.

The ramifications of these readily learned habits and the teens’ obvious comfort level, as well as their mastery of the Net, are bound to impact higher education. On the positive side, these students will be dramatically proficient in accessing the Net. This skill will enhance their academic growth and development. However, their ingrained acquired habit of not being honest could have negative results. The high number of plagiarized papers presently seen on our college campuses may be but a harbinger of the future.

Moving Forward

Buppies (young urban professionals), Buppies (Black urban professionals), and YUGH! YUGH refers to young urban Hispanics who are, according to a new research report from The Media Audit, earning more money and graduating college in greater numbers. The national study, which was based on more than 122,000 phone interviews in 85 metropolitan areas around the country, finds that 14.3 percent of urban Hispanic adults (ages 18 to 34) have annual household incomes of $50,000 or more, compared to 12.7 percent of Whites, 12.3 percent of Blacks, and 13.6 percent of the general population in the same age group.

The study noted that the relationship between education, income, and occupation seems stronger. More than 41 percent of Hispanics with a college degree are in the 18 to 34 age group, which is the fastest growing segment covered in the survey. And it is expected that as this group gets older, it will continue to reach higher levels of education and affluence.

Along the same line, another report, Emerging Philanthropy in Communities of Color: A Report on Current Trends, points to growth of Hispanic middle class, entrepreneurs, corporate executives, and philanthropists. A recently identified trend is that among this growing middle class are some affluent Latinos who are setting up funds and foundations. For ejemplo, in this issue, we feature professors who are setting up alliances to help low-income communities in the Southwest. Professor Jaime Chahin of Southwest Texas State University is trying to raise $25 million to create a mortgage company that will serve residents of las colonias. He is forming a partnership with David Arizmendi, executive director of Proyecto Azteca, a nonprofit self-help housing program that helps families from las colonias, so that once he secures the funds, the organization can build 1,000 homes along the border.

¡Adelante!

Las Colonias:
The Forgotten Americans

BY INÉS PINTO ALICEA

There are no parks or playgrounds here. There are no paved roads, and many of the homes have no running water, electricity, gas, or sewage systems. Flooding is a threat to 90 percent of the homes.

This is the reality of everyday life for more than 500,000 people, 85 percent of them U.S. citizens, living in so-called colonias in Texas along the U.S.-Mexican border.

"When politicians say they don't want anyone to live under these standards, it assumes that [these people] had a choice that was better," said David Arizmendi, executive director of Proyecto Azteca, a nonprofit self-help housing program that helps families from las colonias build 50 homes per year in the Rio Grande Valley in San Juan, Texas.

Today's living conditions in las colonias are worse than the living conditions in the labor camps of Washington state in the 1960s, said Dr. Teófilo Jaime Chahín, associate vice president for human resources at Southwest Texas State University in San Marcos, Texas.

"Isn't it a human tragedy to be born, to live, and to die in the United States without knowing what it is to be an American," said Chahín of life in Las Colonias.

Chahín knows about both sets of living conditions. He lived in the labor camps in the 1960s as he traveled throughout the West with his parents, who were migrant farmworkers. He also spent nearly two years in Las Colonias producing a movie, "Las Colonias: The Forgotten Americans," that has reached 62 million viewers in 40 states on PBS. The film delves into the lives of these Americans, who live on wages averaging $6,000 per year in clapboard homes in some 1,700 colonias along the Texas border from El Paso to Brownsville.

"What he was able to do through the film was to bring attention on a national basis to the situation on the border and to our needs," said Arizmendi. "We don't have to explain as much as we used to. The movie depicted the spirit of the people, not the hopelessness of the situation but rather their struggles to improve their lives and to do better in their lives."

The documentary, which first aired last Dec. 14, tells the story by following the
lives of several residents. The film depicts the grim realities and the challenges encountered in overcoming the barriers faced by those living in grinding poverty.

The movie tells how las colonias first sprang up primarily along the Texas border in the 1940s when unscrupulous land developers and land owners sold undesirable tracts of land without any basic services to poor families at exorbitant interest rates. Many of the families were immigrant farmworkers, becerros. Initially, the housing was built as temporary shelter for the migrant workers, but as living standards across the country improved in the 1950s, the situation stayed the same in las colonias.

Still, the families living in las colonias saw it as an opportunity to build their own homes and often did so, one room at a time, when they had enough cash to carry out the construction. There were many reasons for the proliferation of las colonias. At the time, Mexican-Americans were segregated to living in certain areas, and many were living on very low incomes. Also, lax building, housing, and zoning codes, and a critical shortage of affordable housing along the border led to the growth of colonias filled with makeshift structures, said Jorge Chapa, a professor and the director of Latinos studies at Indiana University at Bloomington.

But no one stepped in to provide the basic infrastructure, such as water, sewerage, or electrical and gas hookups that were needed, so the families had to improvise since they could not free themselves of the high loans for their properties. Many built open pit toilets to make homemade cesspools, a practice that was eventually halted because contaminants were leaching into a neighboring water table.

“One of the project’s objectives is to inform policymakers and the public about the lack of legislation and enforcement of policies related to colonias,” said Chahin. “The health and safety danger resulting from lack of standard public services—like paved roads, running water, sewage systems, utilities, and home construction codes—requires appropriate government agencies to enact and enforce policies to stop the spread of colonias and continued endangerment of American families.”

Daniel Solis is executive director of Alianza Para el Desarollo Comunitario, in El Paso, Texas, a nonprofit organization which develops leadership in colonias so they can get social services, infrastructure, and affordable housing. Solis lives in a colonia and said he, like many others in las colonias, has managed to survive without water hookups by having a truck regularly deliver to his home a 2,500-gallon container of water, which his family uses for washing, cleaning, and drinking. The water is only drinkable for two days before it becomes unsafe to drink. Residents who continue to drink it because they cannot afford to also buy bottled water are subject to a number of intestinal problems.

The lack of basic public services also has led to other health problems in las colonias, including higher than average rates of hepatitis and tuberculosis.

“I am using the documentary as an organizing tool to inform people to get involved;” said Solis.

Texas officials have taken several steps to improve the situation, but so much remains to be done. They launched a program to refinance many of the high-interest property loans at 5 percent, but the properties must have potable water. Solis said that of the 204 colonias with 80,000 people with whom he works, 89 colonias with 35,000 people do not have potable water.

“I commend Dr. Chahin for the work he did;” said Solis. “It is the first time that the views of the people of las colonias were put forth. We did it as raw as it gets. It shows the real conditions these people are living in, the desperate conditions.”

Also, Solis said the Texas Legislature made it more difficult for unscrupulous land developers to sell properties to colonia residents. In 1999, a law was passed that required land developers to sell only land that has basic services. Still, for people who are earning minimal wages and are primarily

These Americans live on wages averaging $6,000 per year in clapboard homes in some 1,700 colonias along the Texas border, from El Paso to Brownsville.
migrant workers depending on whatever seasonal work they can get, the
going cost of $27,000 plus interest for a one-acre lot in El Paso seems high.
Then to purchase a doublewide mobile home, which costs about $70,000 to
put on the lot, can be overwhelming, said Solis. In El Paso alone, there is a
deficit of at least 30,000 affordable homes for families, he said.

"All we’re asking for are the basic necessities that every human being has
a right to have, that being water, electricity, and natural gas,” said Solis. “We’re
not asking for a handout. If these people get water and sewage connected,
they pay for it.”

Solis said the movie helped dispel many myths about the people living in
las colonias. People believe that the residents are in the country illegally, sur-
vive on welfare, and do not work. Instead, the families are hardworking, rarely
accept welfare, and are two-parent families working hard to make ends meet.
Moreover, said Cháñ, about 85 percent of the residents are U.S. citizens.

“Problem is solvable because the people in the colonias want to
solve it,” said Solis.

Arizmendi said many people believe that the residents of colonias
could find a way out if they really wanted to. Many people believe that
because they are poor they should qualify for some help, but he explained
the people he works with in the colonias are so poor they don’t qualify
for loans or even government low-income housing programs. Many gov-
ernment programs require that in order to qualify for a low-income hous-
ing program, people earn 60 to 80 percent of the median income. The
people Arizmendi works with only make 15 percent of that. Moreover, he
noted that most residents of colonias are viewed as too high risk and too
poor to qualify for a conventional loan. Because they have seasonal jobs,
they don’t have regular check stubs that banks rely on to approve loans.
Moreover, their income is seen as too low, and they often lack a credit
record because they pay cash for all purchases, said Arizmendi.

Proyecto Azteca has a waiting list of more than 5,000 families who want
to build their own homes. “Because these people have been ignored for so
long, to solve the problems will cost billions of dollars,” said Arizmendi.

The problems the families in “Las Colonias” encounter are compounded
by the problems facing the U.S.-Mexican border. The border, says Cháñ, is
in transition economically. Many jobs have left border towns, and many new
ones have arrived. The communities are moving as quickly as possible to fill
the labor needs, but retraining workers is costly and takes time. Therefore, in
some border towns, the unemployment rate is in the double digits.

Moreover, the population along the border is booming, according to the
U.S. Census. The growth can be attributed to a variety of factors, including
economic development, the North American Free Trade Agreement—which
has boosted trade between the United States and Mexico and attracted
many companies to the border, natural growth, a lovely year-round climate,
and immigration.

There is a cost for that population boom and the increased trade across
the border. Schools are overcrowded. There are not enough roads, and the
existing ones are taking a beating from increased truck traffic across the
border. The infrastructure does not exist to accommodate the growing
population, particularly in the area of affordable housing.

In 1998, the Ford Foundation found in a study that there is a need for
225,000 affordable homes along the border. The lack of infrastructure has
long been an issue, as have the water shortages of the West and the envi-
rornmental challenges facing U.S. border towns due to their proximity to
Mexico and its lax environmental laws.

Cháñ said more collaboration is needed among government and pri-
ivate entities to meet all of the challenges. Still, he is optimistic that the liv-
ing conditions along the border will improve.

"The communities are very resourceful, despite a lack of resources," said Cháñ. “They have hope, ganas. They too are in search of the
American dream.”

**Making The Film**

Cháñ and Jorge Chapa joined forces to develop the project. They
decided they had to use the media to develop policy on behalf of las colonias. So the two decided to produce a film and turned to filmmaker
Hector Galán. Cháñ wrote a grant proposal to the Kellogg Foundation and
received $994,000, and got additional funding from Sea World, Southwestern Bell, and the Anheuser Busch Company to produce the film.
Chapa, who had conducted extensive research on las colonias while at
the University of Texas at Austin’s Lyndon B. Johnson School of Public Policy,
provided much of the background research and developed the Web site for

David Arizmendi, executive director of Proyecto Azteca
Chahín is trying to raise $25 million to create a mortgage company that will serve residents of las colonias. He is forming a partnership with Arizmendi, so that once he secures the funds, Arizmendi's organization can build 1,000 homes along the border.

"It takes enormous effort and time to secure a loan for colonias residents," said Arizmendi.

The three-bedroom, two-bath homes Arizmendi's organization helps families build are sold to families at zero percent interest rates, so they pay no more than $120 per month for 20 years on the homes. His organization requires that six families come together to build six homes at a time with technical assistance from construction professionals. The families build the homes on Proyecto Azteca's lot and then move them to the permanent site. They have makeshift homes on the permanent lots, as they cannot be left homeless while building their new homes. The homes cost about $25,000 to build, including closing costs and other fees related to building the homes.

Funding for his organization has come from a variety of sources, but Arizmendi admits that life would be easier if there were a steady source of revenue and a boost in it so he could help more families build their own homes.

Chahín said the film has launched a number of legislative initiatives that are being considered in Congress and the Texas Legislature to improve living conditions for residents of Las Colonias, improve the infrastructure along the border, and create affordable housing.

"We didn't realize the impact we were going to have," said Chahín.

The documentary has led to other efforts. Several children from las colonias testified before Congress in March 2000. Photos that were taken by 100 eighth-graders in Monte Alto, Texas, of the living conditions in las colonias are now part of an 88-photo traveling exhibit. Chahín has developed a Web page for more information about Las Colonias, the exhibit, and other projects related to the documentary. It can be found at: www.lascolonias.org.

He developed a Kellogg Foundation-sponsored leadership camp for children along the border. Held in June, it attracted 125 eighth-graders from las colonias who underwent classes in leadership training, writing, physics, and algebra at Southwest Texas State University. The students in the two-week camp made site visits to different computer companies. Several teachers from their public schools also attended. The camp and other educational efforts under way are vital to las colonias since more than half of the children fail to graduate, and less than 1 percent of the residents in las colonias attend college, said the film.

The Department of History and the American Studies program at Carleton College are seeking to fill an entry-level tenure-track position in United States history, with a specialization in Chicano and/or Latino history and culture beginning in September 2002. Appointment at a higher rank might be considered in extraordinary circumstances. The position carries teaching responsibilities in the History department and in the American Studies program. In History, the job will entail participation in the U.S. survey course, with opportunity for more specialized instruction in American ethnic history, American immigration history, and/or regional history (e.g., Borderlands, American West) at both introductory and advanced levels. In American Studies the job will provide opportunity for teaching in the core courses (Introduction, Methods, Senior Seminar) as well as more specialized culture studies. The successful candidate must have demonstrated research and teaching interest or experience in both History and American Studies, a strong commitment to undergraduate teaching in a liberal arts environment, and must have Ph.D. completed or substantially completed by June 2002. To apply, please send a letter of application, a graduate dossier that includes current, three recent letters of reference, graduate transcripts, and one or two sample syllabi by November 1st, 2001, to:

Professor Harry McKinley Williams, Chair
Department of History, Carleton College
One North College Street, Northfield, MN 55057

Carleton College is an AA/EOE; we particularly encourage applications from women and members of minority groups.

E-mail questions regarding the application process to nplambers@carleton.edu.
St. John’s University

Merger Gives New Power to Business Program

By Roger A. Deitz

When St. John’s University President Donald J. Harrington, C.M., considers how far his institution has grown, he is heartened. “Twenty-five years ago, we had two campuses, Queens and Staten Island. A few thousand students commuted to the University and were primarily from the New York area. Professors taught with dittos, textbooks, and chalk. Today, since our merger with The College of Insurance, we have five campuses, including Rome, Eastern Long Island, and, most recently, Manhattan. Of our University population of more than 18,000 students, 1,400 live in five new residence halls on the Queens campus. Students come to us from 37 states and just as many countries. “Today, if you were to walk into any of our classrooms, you would likely find a professor giving lessons with the help of a computer wired to the Internet. In addition, our grants-sponsored research totals more than $7 million, an increase of 112 percent from just five years ago. Last year, we gave out more than $53 million of our own funds in financial aid to the neediest students. And in April of this year, St. John’s was ranked 40th in the nation by the Chronicle of Higher Education in full-time faculty salaries. All these remarkable changes,” says the president, “are testament to the talent and the vision that we as a University possess.”

President Harrington, who became St. John’s 15th president in 1989, adds, “Through innovative teaching, research, and service, we will foster rational, spirited inquiry, and intelligent reflection. Our student-centered approach will be shaped by a caring, energized, nimble culture. As a Catholic and Vincentian university, we will be known worldwide for addressing issues of poverty and social justice.”

Founded in 1870 by the Vincentian community, St. John’s University is one of the largest Catholic universities in the United States. More than 18,500 undergraduate and graduate students are enrolled in six colleges and divisions. The list includes the St. John’s College of Liberal Arts and Sciences, the College of Pharmacy and Allied Health Professions, the School of Education and Human Services, the Peter J. Tobin College of Business, and the College of Professional Studies—the career-oriented unit for undergraduate studies—and,

In 1870, a small group of Vincentian priests, at the invitation of the first Bishop of Brooklyn, John Loughlin, opened a day college in Brooklyn (at the same time construction was beginning on the Brooklyn Bridge). The school was located on the corner of Lewis and Willoughby avenues and had an enrollment of 47 “young scholars.” The school’s mission was to “provide a solid education to the children of the immigrants” and “maintain the credit of Catholicity.” Today, the university is home to extensive computer facilities, including four microcomputer classrooms and six multi-media classrooms. The University libraries house more than 15 million volumes and feature an Online Public Access Catalog linked to 18 other member libraries. Periodical subscriptions now number more than 5,000. A state-of-the-art television, radio, and computer graphics facility offers communication students access to professional broadcast equipment.

The recent merger of St. John’s University with The College of Insurance (TCI) created a more powerful business program for students of both institutions and gives St. John’s a Manhattan Campus for the first time in its history. That campus officially opened on June 14. The unprecedented agreement makes TCI a school of St. John’s Peter J. Tobin College of Business (TCB), and renames TCI The School of Risk Management, Insurance, and Actuarial Science (SRM). Dr. Ellen Thrower, president of TCI, continues to lead SRM, and the students of the merged institution are part of the St. John’s student body. “This is a historic occasion for St. John’s University,” said Rev Harrington. “As we..."
Peter J. Tobin, dean of the Peter J. Tobin College of Business, remarked, "We have long expressed an interest in offering our business programs in Manhattan. This agreement not only makes this possible but also enables us to expand our business curriculum into the critical area of risk management and to build executive and professional education for the future. This partnership strengthens the business school and moves us even further on the path of being a leader in business education." The 10-story building at 10 Murray Street that was home to TCI became the fifth St. John's campus worldwide. His Eminence Edward Cardinal Egan welcomed St. John's to Manhattan by blessing the building.

More than 100 degree programs are offered at St. John's, from the two-year associate level to full doctorates. The 10 most popular programs account for 46 percent of total undergraduate enrollment. These are Pharmacy; Computer Science; Criminal Justice; Finance; Elementary Education (Pre K-6); Accounting; Communication Arts; Psychology; Biology; and Liberal Arts. The 10 most popular graduate programs account for 60 percent of graduate and professional enrollment: Law; Finance; Reading Specialist; Elementary Education; Educational Administration and Supervision; Speech Pathology and Audiology; School Counselor; Marketing; and Pharmaceutical Sciences.

Fall 2000 enrollment was 18,621, 08 percent above the 1999 total, due primarily to a 16 percent increase in undergraduate enrollment at the Queens campus. The full-time equivalency of 15,958 was 1.8 percent higher than the 1999 full-time equivalency of 14,740. The enrollment of 18,621 is the highest since 1996. The percentage of female students was 58 percent.

Hispanic, African American, Asian/Pacific Islander, and Native American students account for 35 percent of the student population, a rise from 33 percent in 1999. The ethnic distribution includes 12.8 percent Hispanics, 10.7 percent African Americans, 11.0 percent Asian, and 0.2 percent Native American. The majority of students (66 percent) still come from the New York City area, with an additional 15 percent from Long Island's Nassau County. Non-resident students increased by 15 percent, accounting for 3 percent of the undergraduates and 10 percent of the graduate population. This is the largest number of non-resident students in 10 years. They come from 106 countries, with five countries accounting for 48 percent of the students—the Republic of China (Taiwan), India, Egypt, Mainland China, and the Republic of Korea (South Korea).

There are 589 full-time and 499 part-time faculty, for a student-to-faculty ratio of 18-to-1. Hispanics make up 2.0 percent of the full-time and 3.0 percent of the part-time faculty as of Fall 2000. Ninety percent of St. John's full-time faculty hold a doctorate degree, and five are internationally recognized Fulbright scholars. Undergraduate tuition and fees for the 2000-01 year ran to $15,990, a figure that places the school at about the mid-point for comparable local colleges and universities.

Last March, St. John's University announced a new scholarship geared especially for top students at regional community colleges planning to transfer to St. John's after earning their associate's degree. The Presidential Scholarship for Transfer Students offers full-tuition for three years of undergraduate study. "St. John's has always been attractive to transfers because we understand their needs are different from those of first-time students," says Glenn N. Sklarin, vice president for enrollment management. "In keeping with that tradition, we created this new scholarship to offer special recognition for transfers with truly outstanding academic records." Transfer students may apply if they expect to have earned their associate's degree by the end of the academic year, or have earned the degree as well as a cumulative GPA of at least 3.8. The scholarship will be awarded to one student from each of the 14 participating regional community colleges: Bronx, Kingsborough, LaGuardia, Manhattan, Nassau, Queensborough, Suffolk, and Westchester, in New York state, and Bergen, Brookdale, Essex, Middlesex, Ocean, and Union, in New Jersey.

At last January's commencement exercises, St. John's marked its 131st academic year with Winter Commencement Exercises on the Queen's campus, presenting an Honorary Doctor of Law degree to His Eminence Jamie Lucas Cardinal Ortega y Alamillo, Archbishop of San Cristobal de Habana, Cuba. His Eminence is the spiritual leader of that nation's 4.5 million Catholics. As a parish priest in the 1960s, he was imprisoned in a labor camp before being freed to return to the church of his birth. In 1978, Pope John Paul II elevated him to Bishop of Pinar del Rio, then Archbishop of Havana, then finally to the College of Cardinals as the first Cuban to be appointed to that level since the Cuban communist revolution in 1959. Cardinal Ortega was the main influence in bringing the Pope to Cuba more than three years ago.
Retention Initiative Launched by

HISPANIC SCHOLARSHIP FUND

Larry K. Faulkner, president of the University of Texas at Austin

Sarah Martinez Tucker, HSF president and CEO

Texas Gov. Rick Perry

First Sites at UT-Austin, Harvard, Columbia, Stanford, and UC-Berkeley

BY ROBERT D. MECKEL
The University of Texas at Austin this spring became the first university in the state to have a Hispanic Scholarship Fund (HSF) Student Scholar Chapter, part of a $1 million national initiative by the Goldman Sachs Foundation and HSF to improve college retention rates among Hispanic Americans.

The HSF Scholar student chapters at UT-Austin and four other institutions will strive to develop leadership skills among HSF scholars and promote outstanding academic performance through mentoring. By connecting students with mentors such as HSF alumni, the student chapters also aim to strengthen the retention rates of Hispanic students. Another goal of the program is to have the mentors reach out to recent high school graduates and encourage them to seek their college diplomas.

The initiative was announced in April at the Texas State Capitol by Texas Gov. Rick Perry; Stephanie Bell-Rose, president and CEO of The Goldman Sachs Foundation; Sara Martínez Tucker, HSF president and CEO; and UT-Austin President Larry R. Faulkner.

The Goldman Sachs Foundation gift will create HSF Scholar student chapters at Harvard, Columbia, Stanford, UC-Berkeley, and UT-Austin. Ten more institutions will be selected next spring.

“It's a major investment in the state, but one that I happen to think will return huge dividends. That's because an investment in an educated mind is an investment in an unlimited future. It's an investment in the future of Texas, and I happen to think it's an investment in America,” said Perry. He applauded HSF for its 25-year history of nurturing the hopes and investing in the future of thousands of Hispanic students.

“With this gift to HSF, the Goldman Sachs Foundation enables us to fill a void and build a much-needed community among HSF scholars,” said Martínez Tucker. “In addition to providing scholarships, we recognize the importance of providing mentoring, guidance, and a support system that allows these bright young students to complete their degrees.”

Bell-Rose said the Goldman Sachs Foundation gift to HSF is an investment in the country's future. “This grant reflects our goal to develop exceptional young leaders by equipping promising students to enter and thrive in top colleges and challenging careers,” she said.

Faulkner said, “We applaud the Goldman Sachs Foundation for its exceptional support of the Hispanic Scholarship Fund. The fund is helping outstanding young scholars to realize their potential, on the UT-Austin campus and at universities across the nation. The University of Texas at Austin is committed to the success of the new HSF Scholar chapters and Alumni Network and the goal of strengthening the Latino educational pipeline.”

HSF provides scholarships based on merit, with consideration of financial need, to Hispanic Americans of all races and ethnicities. According to the HSF, many HSF scholars have overcome significant social and economic barriers. In 2000, 70 percent of HSF scholars came from low-income families, and 57 percent represented the first generation to attend college.

Perry said current studies by the Texas Higher Education Coordinating Board reveal that Texas enrolls a lower percentage of its young people in college than the national average, and a lower percentage than the 10 most populous states.

“Currently, only about 48 percent of Texans who enroll in undergraduate studies in our universities actually graduate. Among Hispanics, the graduation rate is even lower; it's about half that of non-Hispanic Anglos. That is simply unacceptable. Given the demographic shift in our state and our nation, we must find ways to get more minority children not only enrolled in our institutions of higher learning, but also graduated,” said Perry.

The governor noted that in the past 10 years alone, Hispanics have accounted for 60 percent of the population growth in Texas and that Hispanics are expected to become the majority of the state's population in a few years. “That's why it's most important that we close the educational gap. To have a growing population lagging in education achievement is not just a Hispanic problem, it's a Texas problem.” He said the HSF program is a step in closing the educational gap.

Faulkner said the University is proud that Martínez Tucker, an alumna of UT-Austin, has become so successful in her leadership role as president and CEO of the Hispanic Scholarship Fund.

He said UT-Austin is committed to serving Hispanic students in Texas and beyond, and is honored to participate in the program by having one of the first HSF Scholar chapters on the UT-Austin campus and by lending its support to the HSF alumni network.

“This is truly terrific work,” Faulkner said of the initiative. “It's work that will be very important to our state and our nation as we move into the 21st century, where the challenges will be quite different than those of the 20th.”

UT-Austin Scholarships

During their visit to Austin to announce the initiative, HSF officials participated in a reception where more than $325,700 in HSF scholarship funds was awarded to 135 UT-Austin students. The UT-Austin students reflect the highest number of HSF scholarship recipients at any university in the nation this year.

Scholarships awarded to the 135 UT-Austin students that evening ranged from $1,000 to $10,000, with the average being about $2,500. The
University's scholarship recipients have a cumulative GPA of 3.56.

During the reception, Faulkner said, "According to an annual report in The Hispanic Outlook, UT-Austin is No. 1 in the nation in doctoral degrees awarded to Hispanics. We are ranked fourth in the nation in bachelor degrees awarded to Hispanics and fifth in the number of master's degrees. We can and we will do even better. But without question, the University of Texas at Austin is one of the most important forces in the United States in Hispanic higher education, and we are proud, proud of that."

Later in the program, Faulkner pointed to an inscription near the ceiling of the Academic Room in which the reception was being held and asked the scholarship students to read the quote by O.H. Cooper. It said, "The University of Texas is not the lengthened shadow of any one man or of any one group of men. It is the noblest concrete embodiment of the best spirit of Texas."

"Texas is a place of tremendous change right now," continued Faulkner. "We know that the face of Texas is changing. It is changing very rapidly. It's changing in ways that require that we put a tremendous emphasis on the educational opportunities that are made available to students, and that we put a tremendous emphasis on your responsibility to succeed. We are going into a future that we don't know a lot about, but we do know that Texas will see the challenges of the 21st century sooner than the rest of the United States will."

Hispanic Scholarship Fund

Martínez Tucker said that in 1975, some concerned people met about the alarming state of Latino higher education. She said the Hispanic Scholarship Fund came together with a very simple yet compelling vision—to strengthen America by enabling Latino higher education. Because there was no national effort at the time, the group picked a very simple mission—to become this country's premiere scholarship fund for Latinos.

"In our first 26 years, we've raised $58 million for 48,000 scholarships for students in all 50 states and Puerto Rico. I'm proud to say that $13 million of that $58 million has come to the state of Texas. So we're very proud of our accomplishments, but, in spite of all our good work, Latinos still continue to be underrepresented in our nation's high schools and colleges. We are alarmed at the Latino high school graduation rate, we are very concerned about the transition rate to college, and ultimately the number of Latinos who get their college degrees."

She said HSF has adopted a new mission of doubling the number of Latinos earning their college degrees to 18 percent by the year 2006.

"We are a little intimidated by our new mission because that means we have to affect not only the college retention rate, but the transition rate, as well as the high school graduation rate. But we have confidence because, let me tell you scholars, you have joined 22,000 alumnus before you..." And the HSF has made a difference in their lives.

"To our scholars tonight, let me tell you, you've joined a terrific group of people across the United States—97 percent earned their baccalaureate, 43 percent went on to graduate school, 88 percent earn over the national per capita median income, 60 percent earns at least double the Latino median income, and 62 percent does volunteer work in their communities."

"Our work shows that we can break that cycle of under education for Latinos, inadequate employment, lower median income, less able to support our children's higher education dreams. So we honor you tonight, but we challenge you. You are the standard bearers for the next generation."

She urged the students to take time, when they visit their families back home, to go to their high schools and "just tell your story. Tell what it's like to be here today, and create in others the hope of what you have been able to accomplish with your lives."

"We really do hope you will become the role models for your commu..."
Four Colleges/Four Distinct Diversity Grants

Caltech, Whittier, Mt. St. Mary’s, and Mills

BY ISIS ARTZE

The impressive sum of $5 million was recently allocated to a much-deserving area in higher education: campus diversity. Did it fall from the sky? Well, yes and no. It's part of the James Irvine Foundation's mission to help California's independent colleges and universities address issues of ethnic diversity on their campuses.

The Foundation was established in 1937 by James Irvine, the California pioneer whose 110,000-acre ranch in Southern California was among the largest privately owned land holdings in the state. The $5 million grants are the most recent allotment to the Foundation's “Campus Diversity Initiative,” a program that has donated nearly $30 million in 45 grants to 24 institutions since its inception in 1987.

“We want to ensure that the work of diversity is central to the mission of the institution,” says Hilda Hermández-Gravelle, program officer in higher education at The James Irvine Foundation. She explains that in the past diversity was considered the concern of a single office or center. The Campus Diversity Initiative aspires to create a “more focused approach to help institutions institutionalize diversity,” says Hermández-Gravelle. “We want to impact the university as a whole.”

“We also encourage a link between the campuses we fund, so that they can learn and borrow from one another,” she says.

Of the newly distributed $5 million, $2 million was invested in Occidental College in Los Angeles—the largest grant Irvine has ever made to a liberal arts college. Occidental will use the funds to enable more of its diverse student body to study abroad, support a new Intercultural Community Center, reshape the college's core program around the theme of community, and provide minority Ph.Ds with faculty fellowships.

Other awards include $1.5 million to Claremont Graduate University to identify and recruit diverse faculty members, $750,000 to Dominican University of California in San Rafael to pay for a new director of diversity and support the reshaping of the school's science curriculum, and $1 million to Harvey Mudd College to fund programs in the hard sciences.

For colleges and universities to apply for Irvine funding, they must answer the question: What steps conducive to success,” she says.

Other current goals are improved curriculum and campus climate, better distribution of majors chosen by students of color, and higher achievement by low-income and minority students.

One of program’s best features is that it allows each college to use the funds for its particular needs. “Each campus is different,” says Hermández-Gravelle, “we respond to each institution’s own needs and ethos.”

4 Colleges, 4 Distinct Plans

California Institute of Technology

“At Caltech, it's very important for diversity to be given a higher priority, and the best way to do that is by bringing [the concern] to the president’s office,” says Miriam Feldblum, special assistant to Caltech’s president, responsible for diversity issues.

“The James Irvine Foundation has taken an excellent new tactic with the university, insofar as they ask questions such as, ‘What would progress look like? Instead of just giving funds,” she says. She also commends the Foundation for being concerned with the evaluation of plans. “They ask, ‘Did the program do what it was intended for?’” she says.

Caltech received its first campus diversity grant in 1989 for specific programs. In 1999, it changed its focus, as the Foundation did, to a more holistic approach, says Feldblum.

“We're changing the process and climate so we can move forward on multiple levels, with all divisions,” she says. Caltech's general goals are to increase the number of underrepresented students, support minority students in sciences, math, and engineering, and increase the awareness of diversity issues within the university.

It will receive $2.2 million over the next three
years, to be distributed among 11 areas, including graduate fellowships, a postdoctoral fellows program, the Higher Achievement for Undergraduates Program, the Minority Undergraduate Research Fellows Program, curricular development, and multicultural activities on campus such as lectures and community outreach.

However, the Campus Diversity Initiative does much more than fund specific programs, asserts Feldblum. For example, the money allowed Caltech to restart an initiative from the '90s, the postdoctoral fellowships, she says. This, in turn, encouraged the institution to allocate additional funds for these fellowships.

"The Foundation gave us the impetus to look back and think about increasing diversity," says Feldblum. "It's an opportunity to have a mandate to see what's working."

**Whitman College**

This is the third year of Whitman College's grant, and according to Tracy Poon Tambascia, associate dean of students and director of the Cultural Center, "what we've done is raising the awareness of students, staff, and faculty. People don't think diversity is the job of one office anymore, but something we all do together."

At Whitman, where 25 percent to 30 percent of the student body is Latino, Irvine's grant was used for faculty and staff development and the addition of courses such as immigrant and Chicano history. It allowed the college to hire visiting scholars of color, two of whom stayed on as faculty.

The funds also have been allocated for alumni relations, says Tambascia. "We have contacted alumni of color to find out what would bring them back to campus."

Perhaps the main outcome of Irvine's grant was the creation of Whitman's Cultural Center, which serves two main purposes, explains Tambascia. "First, the Center works with students of color on campus in retention and helps them access resources. The Center houses a leadership development and peer-mentoring program that works with minority student groups."

"It provides counseling, support, serves as an advocate for them, and encourages them to continue to graduate school," Tambascia adds. "We even meet with individual students and help them apply to graduate school."

Secondly, Whitman's Cultural Center "works with the whole campus to promote tolerance," she notes.

As for future campus diversity goals, Whitman plans to focus more on family and community involvement. Tambascia adds, "Since many of our students are the first in their family to attend college, we want to involve their families and siblings so that they feel ownership [of the college]."

**Mount St. Mary's College**

At Mount St. Mary's, a Catholic liberal arts college in Los Angeles dedicated primarily to the education of women, with nearly half of the student body of Hispanic descent, Irvine's $1.1 million funding has "raised the bar academically," says Kim Rathman, director of corporate foundation relations. It has allowed the college to provide tutoring and mentoring for minority students, she says.

The college's specific goals are to improve the academic success, grade point average, and graduation rates of underrepresented students by improving faculty, administration, and staff understanding of strategies that are effective.

To this end, Mount St. Mary's has created an introductory course on study skills, and has "hired more minority faculty so that we have more role models," says Rathman. In the area of faculty development, the institution wants faculty to become "attuned to teaching in a multicultural society," she says.

Another facet of the Irvine grant is the enhancement of quantitative skills across the curriculum. Rathman explains that "many women exhibit a math anxiety," which the college hopes to alleviate.

**Mills College**

With Irvine's three-year grant, allotted in 1997, Mills College in Oakland developed "a model undergraduate curriculum for the liberal arts education of women in contemporary society," says Dr. Ramon S. Torrecilla, director of Mills' Multicultural Curriculum Enhancement Program (MCEP).

MCEP supported faculty development, helped the college develop new courses in race, ethnicity, gender, women's leadership, service learning, and undergraduate research, allowed the invitation of experts to present lectures and performances to the community, and organized discussions with academic and community leaders on issues affecting liberal arts education.

Individual projects made possible by the Irvine grants include National Literatures of Latin America (a conference), a multicultural speaker series, and new courses such as Hector Mario Cavallari's "Borderland Culture."

Finally, the Campus Diversity Initiative made possible the creation of a new general education task force, whose goal is to infuse multiculturalism throughout general education courses.

Eugene García, University of California at Berkeley

**Schools Working Together**

While the Campus Diversity Initiative works primarily with California's private colleges, the foundation also understands the value of working with public institutions. It has recently helped fund a project headed by Eugenio García, from the University of California, Berkeley.

"The intent of the activity is to try to bring public and private universities together to look at the success minority students are having within their campuses," says García. "We're trying to see how, together, with the help of these foundations, we could better advance the educational success of minorities in these institutions."

The concept behind the project came from a national task force organized by The College Board, García explains, which examined minority academic success across the U.S. "This is an attempt to take that and apply it directly to California."

The participating group consists of approximately 12 public and private institutions, including UC-Berkeley, UCLA, UC-San Diego, UC-Santa Cruz, Caltech, Occidental College, and Pomona.

The national study found that while minority graduation and participation rates have risen, minorities continue to attend community colleges and public institutions in greater proportions, recounts García.

Also, "high achievement rates tend to be much less than participation rate," he says, indicating a substantial "achievement gap."

Research on what it takes for minorities to succeed academically is scarce, García concedes, but through initiatives such as this, "we're beginning to develop a knowledge base."
Gettysburg College is nestled in South Central Pennsylvania in a rural area known as “the fruit belt.” Aside from tourism and education, the local economy relies heavily upon the cherry, peach, plum, and apple orchards that surround Gettysburg. It is here that Latino farmworkers, who originate primarily from Mexico, come to work. They, among other Latinos working in local factories, are said to make up 36 percent of the population of a region that is more than 95 percent Anglos, but many argue that the figures are much higher and growing.

Gettysburg College consists primarily of Anglo students, too, but these students have formed strong ties with the Latino community, thus expanding their own education while providing much needed services to Latinos. Most students, directly or indirectly, provide outreach to the Latino community through the school’s Center for Public Service (CPS), which was established in 1992 as a center for coordinating activities, classes, and the like for the local community.

What are now called Latino/Farmworker Programs at the Center for Public Service were once an unofficial program through the school’s Lutheran chapel. The chaplain held events for Latinos in the church, including a Spanish service. Since then, programs such as tutoring, swimming, annual fiestas, and Spanish radio programs have been organized through the Center.

“Service has always been a part of the institution in some manner.” There was that commitment, but it wasn’t institutionalized in any way,” said Gretchen Carlson Natter, associate director of CPS. Today’s students interact with the Latino community through the Center in a growing number of ways. “The Latino has come to see that the campus is a place to feel comfortable,” said Natter.

More than 325 student volunteers help plan and carry out large parties for Latino children in the region, and others also work on an annual fiesta that serves more than 1,200 guests each September. The only Spanish-language newspaper in Adams County, Puentes, is also published through CPS, with students writing and translating many...
of the articles. Students work on local health vans that serve about 40 percent Latinos, they teach swim clinics to Latino children and women, and help "at risk" children with after-school tutoring. At times, coordinating with other agencies in the region, students provide translating services, computer clinics, Spanish radio programming, and help organize a Mexican soccer league, which is held on campus. Together with a local agency called the Center for Human Resources, Gettysburg students and local Latino youth are also coming together, the students acquainting the youth with academic culture.

The Center for Public Service also supports faculty if they are interested in creating a service-learning component to their classes. Many of these projects involve the local Latino community. Chemistry studies interviewed Mexican natural medicine practitioners in Adams County, conducted chemical analysis of plants used, and produced a much-acclaimed book, Medicinal Plants of the Migrant Workers, through the process.

For another class, students were sent into camps and Latino communities to work with children who, in turn, wrote and produced plays important to the Mexican community. These plays were produced on campus for families and students. For a senior political science class, students learning about the changing role of women in Latin American countries connected with local Latinas to hear their stories.

One course that has become extremely popular, originally implemented on a volunteer basis before the Center was established, is Margarita Elloriga's Spanish class called The Service Learning Project in the Hispanic Community of Adams County. The class began as a project Elloriga was asked to undertake in the early 1990s by her former Spanish department chair who had been teaching English to several Spanish families that came on campus. She couldn't teach all of them and asked for Elloriga's assistance in helping these families, and in teaching and finding student helpers. "It kept growing and growing. It was very well accepted, said Elloriga, who is of Mexican descent.

At first, students volunteered their time as part of an independent study, and Elloriga met with each student. She taught them some elements of Mexican culture and the migrants' population and assigned readings. The students then worked directly with families, teaching them English and learning about their lives. The Center For Public Service has since requested that Elloriga's class become credit-based, which has been the case for the past year. As part of the class, students spend a minimum of two hours per week teaching English to migrant families, as well as helping families with any other needs they may have. "I think they see it as a real opportunity to practice Spanish, and they really want to do something good," said Elloriga.

Students also learn about cultural issues. "The discussions are very meaningful. We talk about discrimination, of how people discriminate against migrant workers. We get very personal sometimes. Students really open up a lot in these classes," said Elloriga. "Also, when they see firsthand what the culture is about, the similarities and the differences, they truly become Spanish majors."

At Gettysburg and elsewhere, there has been a growing trend in service-learning, and Elloriga's class is just one example of the benefits of this kind of classroom. "It's been 10 years, and I've seen a positive thing," she said. "People are starting to see the benefits of students going out into the community." Upon describing her own students, she spoke of "the big eyes, the 'I didn't know it was like this, people so poor with so much joy.' Some of the students discover that they want to be teachers, and others want to join the Peace Corps. Often when they make their visits they are tired, but once there, they leave with their spirits up. They feel good."

Elloriga's class' service-learning program also helps students improve their Spanish skills. "As a teacher, when we teach the kids, we emphasize that Spanish is something real. They need to see it as real, as a way of living, as a culture. When they go to the families and use it, they realize it is real," she said. When Elloriga visits with families and asks them how they have most benefited from students' visits, their responses have often been about companionship. "The most important thing to them is the company. They see the students as friends, as bridges between the American world and their world," she said. Students help in a variety of ways, from assisting them with tax bills to calling the telephone company. One student helped a Latina woman learn English, and she is now working as a nurse. Another taught a family to read in Spanish, and within two semesters, they could read. "It was the best gift the student gave them," said Elloriga. "It is extremely important for the migrant families to feel comfortable, to feel welcome in the community."

Jorge Perez-Rico, who currently works with the Center for Public Service, as well as a program called Migrant Education Programs, himself a success story. He came to the United States from Mexico as a migrant farmworker and is one of many who've benefited from Elloriga's class. Perez-Rico lived in
the camps in Gettysburg and back then took the van that was available to visit the college and receive English lessons. With a bachelor's degree in sociology from Mexico and with some English skills, he then decided to take the GED. Eventually, he was offered the opportunity to teach math to Spanish-speaking people through the Center for Human Services, an outside agency. He followed this up by studying at the local community college with financial assistance. He was soon offered work at the Migrant Education Programs where Elloríaga works.

Today, Pérez-Rico is editor of Puentes, which is run out of CPS, and he also has been coordinating the Latino soccer league, which began through the center this past year. "Sometimes we have 500 people for the soccer games every Sunday," said Pérez-Rico. Every Saturday, he also hosts a Spanish radio show, which many of the farmworkers tune into while working out in the fields. "We can really say that Gettysburg is helping develop things that the area does not have, with the help of the students in the community," he said.

Pérez-Rico is responsible for contacting families for swim classes as well. These classes were started originally because there are many ponds in the camps, and Latino children didn't know how to swim, thus endangering their lives.

He also helps organize the fiestas that are attended by local Latinos and students. "The objective is to educate the college community about the realities of the Latino community. I think both communities are learning together," said Pérez-Rico. "I have been in Florida and in New Jersey and different places. I think Gettysburg is special. The program that CPS has is strong. The community is very comfortable coming to the college."

Throughout his years in the United States and at Gettysburg, from 1988 to the present, Pérez-Rico has witnessed a change in the situation of farmworkers and the needs that colleges like Gettysburg can address. "In the 1980s, Central Americans came because of war conflicts. Now we see the effects of globalization on the majority of the population. We have people from urban areas of Mexico coming to the States. They have a medium or good level of education, but lack of English is one of the barriers for them," he said.

Lisa Martilotta is one of many students who have helped migrant workers of the area learn and overcome this barrier of English. She worked for the past year on outreach programs at CPS and was also a student of Elloríaga's before graduating from Gettysburg this past school year. Martilotta began her studies at Gettysburg as a pre-med student but switched to Spanish and studied in Mexico. "These experiences opened my eyes up to how much I had," she said. "Now that I had this awareness, 'what was I going to do about it?' I asked myself."

As a student, Martilotta sees how easy it is to remain in a college bubble and not even see outside, within a 10-mile radius, the lives of others in the community. "Their [migrant workers] struggle is unbelievable, and it's not their fault. There's really no employment for much of the population in Mexico," she said. "But many people worsen their tension by ostracizing them."

As part of her studies and her own interest in reaching out to the community, Martilotta visited migrant homes and taught families English. She also helped tutor and bring together other tutors for high school students, as well as coordinated events such as Farmworker Awareness Week. She operated a table with information on human rights issues in Mexico and in the United States, and created a panel that included professors from various departments as well as farm workers who originate from different areas of South America. "There is a tremendous amount of work to be done yet. We are getting the ball rolling. If you impact 20 people, you are doing something to create awareness," she said. "I think we definitely have made an impact."

While Martilotta and others are quick to admit that there is much more work to be done in helping migrant families and in bringing such diverse communities together, the first steps have been taken. As service-learning builds popularity and students and teachers look for alternative hands-on ways to expand their education, the changing and ever-growing population of migrant Latinos is apt to become more and more integrated into the academic community. As Martilotta said, "We are building bridges."
Milken Family Foundation

Targets Teacher Quality and Retention

Good Teachers—The Indispensable Element

BY MARILYN GILROY

They have been dubbed “the Oscars of Teaching” by one national magazine. The designation refers to the Milken Family Foundation National Educator Awards honoring outstanding individuals for their commitment to quality teaching. This year, 155 teachers and administrators each received $25,000 from the foundation in recognition of its efforts. The awards were presented in true Hollywood style at a black-tie ceremony in Los Angeles, where recipients were praised as “heroes” for their achievements in the nation’s schools.

The awards program was conceived in the early 1980s as part of the Milken Family Foundation’s effort to “attract, retain, and motivate talented people to the challenge and adventure of teaching.” Since presenting its first awards in 1987, the program has honored 1,650 educators in 44 participating states. According to Foundation officials, the Milken Educators are as diverse as the students they teach. Some grew up in poverty or came to this country as immigrants; others pursued a lifelong desire to teach or entered the profession as a second chance for career fulfillment.

Ten Latinos and an African American teacher, who is heavily involved in bilingual education, were among the 2001 award recipients. Their stories, summarized at the end of this article, are examples of how good teachers can make a difference.

“Collectively, they are a testament to achievement in the face of adversity and the power of education to dramatically alter the human condition,” said Stephanie Germeraad, manager of media relations for the Milken Family Foundation. “Individually, each has made significant contributions to our nation’s schools and the Hispanic community at-large.”

The teacher awards are just one example of the Foundation’s commitment to educational advance-
ment and reform. It has labeled the national teacher shortage (2.2 million needed in the next 10 years) a "crisis" and has embarked upon measures to attract and keep educators in the K-12 sector. It is an effort that requires "bold and immediate action," according to Lowell Milken, chairman of the Foundation, who says that education needs a new strategy to change the American teaching system. The Milken Foundation is concerned about the current attrition rate but also points to discouraging statistics that show fewer young people are considering teaching as a career due to low pay levels and lack of advancement. Those who do enter teaching as education majors often compare unfavorably, at least in terms of test scores and academic achievement, to students entering other professions. As Milken says, this does not bode well for the American system of public education.

"Every young person in America has the right to the kind of education provided by quality teachers," said Milken at the National Education Conference. "And they have a right to it continuously, year after year, class after class, so that they receive the enduring educational experience they need and deserve. That this is not the norm in American classrooms today should be cause for alarm for everyone."

The Foundation has developed an initiative called the Teacher Advancement Program (TAP) and has identified five key elements that are necessary to reinvigorate the teaching profession: multiple career paths—allowing teachers to serve at various levels, including adjunct, associate teacher, mentor, and master teacher; broad, market-driven compensation—offering flexibility to reward performance and negotiate salaries in different categories; performance-based accountability—advancement determined by academic achievement, peer reviews, and consideration of student progress; ongoing, applied professional growth—professional development as a daily or weekly practice in both self-directed and team-directed modes; expanding the pool of high-quality educators—allowing degrees and teaching certification to be attained in four years or through rigorous assessment, thus creating multiple entry paths. The plan calls for a national recruitment program with scholarship offers and incentives for mid-career professionals. Tenure Phase-Out

The most controversial part of the program recommends that tenure be phased out gradually and replaced with renewable multiple-year contracts. Current teachers would be grandfathered, but new hires would not be eligible to earn tenure. That may see like a huge stumbling block when dealing with entrenched teacher unions, but Germeraad says that surprisingly, the unions have not closed master teachers are released from daily classroom assignments for a portion of the day so that they can provide direct classroom support and coaching for their colleagues.

The five pilot schools in Arizona have begun the second year of TAP for 2001-2002 academic year. Germeraad indicated that selected Florida schools have adopted the program this year, and discussions are under way for implementation in Arkansas and South Carolina.

The Milken Family Foundation has been advancing its educational reform model by sponsoring an annual National Education Conference in June. The conference hosts governors, state education chiefs, legislators, business leaders, teachers, and administrators for the purpose of exploring ways of improving teacher quality. In addition to presentations by Lowell Milken, this year's conference featured keynote addresses by Florida Gov. Jeb Bush and Betty Castor, president of the National Board for Teaching Standards. Conference participants have an opportunity to raise issues and refine strategies based on TAP principles that may help reshape the teaching profession in their districts or states.

The Milken Family Foundation, founded in 1992 by brothers Lowell and Michael Milken, has enlisted the support of government leaders and other private foundations to provide funds to help schools, like those in Arizona, make the transition to TAP. In addition, Lowell Milken has called on Washington to declare no less than a "national emergency in order to mobilize action on the shortage of high-quality teachers." He believes that government must make a commitment as bold as the GI Bill and provide resources necessary to help the states deal with a variety of educational reforms but especially those that focus on the reconstruction of the teaching profession.

Lowell Milken has called on Washington to declare no less than a "national emergency in order to mobilize action on the shortage of high-quality teachers." He believes that government must make a commitment as bold as the GI Bill and provide resources necessary to help the states deal with a variety of educational reforms but especially those that focus on the reconstruction of the teaching profession.
EDUCATOR Awardees

These educators were each presented with $25,000.

Enedelia Schofield

Enedelia Schofield was on the fast track to a successful career in law while clerking for a circuit court judge. Committed to empowering migrant workers in Oregon, like her family, she spent her nights and weekends teaching ESL classes at Portland Community College. Schofield was inspired by her son's birth to create opportunity for children and returned to the community where she grew up, moving from the courtroom to the classroom. With few Hispanic role models in either profession, she says she overcame the challenge of following her dreams to become the first Hispanic woman to be named an Oregon public school principal.

Salvador Tamayo

Salvador Tamayo and his elementary school students have created several award-winning Web sites about the history of West Chicago, Ill., and the local Hispanic community, including the "I Want to Be an American Citizen" campaign to help immigrants prepare for the U.S. citizenship test. A former producer at Mexico's TV Azteca before immigrating to the U.S. to pursue a career in education, Tamayo also co-instructs a bilingual teacher education program at Wheaton College.

María Petrea

Principal María Petrea has created a nationally recognized dual-language magnet program at Collinswood Elementary School in Charlotte, N.C., in which Spanish-speaking students are blended into the English-speaking classroom. As a result, all of her students have increased achievement on year-end tests. Through her efforts on behalf of the Spanish-speaking children that comprise 40 percent of her student population, Petrea has forged strong relationships with the city's Latino community.

Susana Navarro Baum

Rather than believing that being an ESL student was a hardship, Susana Navarro Baum's Mexican immigrant parents understood the value of education and reaffirmed that bilingualism was a lifelong skill and gift. Now a learning disabilities specialist at Solana Vista School, she uses her bilingual skills in a reading intervention program to turn struggling Spanish-speaking learners into confident, competent English readers. Realizing that parents are their children's first teachers and families of ESL learners need the tools to work with their children at home, Baum created and implemented a series of Parent Education Nights throughout the school district to help them link home support with school success. She makes home visits and enlists local businesses--such as a local grocer who provides families with nutritional education and donates healthy food--in support of her parent activities.

Graciela de Anda

Although neither of her immigrant parents graduated from high school, Graciela de Anda was encouraged to achieve academically and is now the chair of her former high school's English department in Edinburg, Texas, a school where 85 percent of the students are economically disadvantaged. Using a variety of teaching strategies aimed at stimulating higher-order thinking skills, such as writing for and editing a literary magazine, authoring scripts for plays, and practicing public speaking, de Anda is able to reach each of her students by developing their leadership skills while promoting their mastery of English.
Ronald Vigil

After almost walking away from his passion for teaching when he couldn't find a classroom job for five years, fourth-grade teacher Ronald Vigil has made a huge impact on his students at Goin's Elementary School in Cheyenne. Discovering each student's strengths and needs, then building upon them with high standards and humor, Vigil helps students develop positive social skills needed to respond to challenging life situations while encouraging high academic performance. He encourages his students to work toward becoming "Teacher for a Day," where students research and teach units in the classroom.

Becky Méndez

Math and science teacher Becky Méndez has created a dynamic hands-on learning environment in her fourth-grade classroom at Jimmy Elrod Elementary in San Antonio, Texas. As campus science facilitator, Méndez promotes science learning by planning and coordinating activities such as math/science family nights. She established the Young Astronauts Program at Elrod, through which she arranges weekend trips to NASA and helps coordinate the district's annual overnight party. When she saw a need for her school's at-risk students, she developed the Elrod Environmental Eagles, an after-school program that engages those at-risk children in projects designed to improve their community's environment.

Jacqueline Haines-Bobbitt

At Stratton Elementary in Colorado Springs, Colo., a school with a high-poverty and minority population, second-grade teacher Jacqueline Haines-Bobbitt has made literacy, high standards, and achievement watchwords for success. Research-based models, such as the Four Block Model, and sound practices like journal writing, manipulatives, and literature are central to her classroom. Combined with a standards-based curriculum, interconnected lessons, and detailed tracking of each student's progress, the result has been a dramatic increase in schoolwide scores.

Danielle Calvillo

The child of a teacher, Danielle Calvillo resisted the profession, choosing to study journalism at the University of New Mexico. But, when she did a television story about local teachers during her junior year of college, she was inspired to change her major and pursue education as a career. Calvillo is now a mentor teacher at Valencia Elementary School in Los Lunas, N.M., where she infuses art and technology into her cross-disciplinary curriculum.

Patricia Castillo

In Patricia Castillo's fourth-grade class at Rio Grande Elementary in Belen, N.M., students engage in stimulating activity-based learning with clearly defined outcomes and assessments. She developed a classroom stock market that earned national recognition and helps her students conduct research using a variety of resources. Castillo's spirit of volunteerism has led to student projects such as cleaning up a local river and sending relief packages to Bosnia.

Jamilia Banks

A bilingual elementary teacher, Jamilia Banks of Los Angeles was disturbed by the racial stereotyping she experienced growing up. Influenced by a high school Spanish teacher to pursue the subject in college (even studying at the Center for Bilingual/Multicultural Studies in Cuernavaca, Mexico), Banks, an African American, has dedicated her career to multicultural education and anti-bias curriculum. She was recognized by former President Clinton's Initiative on Race for her dedicated work at Loreto Elementary, an at-risk school with a 90 percent Hispanic student population.

National Educator Awards profiles courtesy of the Milken Family Foundation.
The words “affirmative action” often raise a mixture of emotions throughout the higher education community. Court actions and legislative referenda against affirmative action programs have increased the debate and made colleges and institutions more firmly committed to them or reticent for fear of a lawsuit.

“Is affirmative action still needed?” asked William B. Harvey, vice president and director of the American Council on Education’s (ACE) Office of Minorities in Higher Education. “It is ludicrous to me that people would argue that this is a policy whose time has passed.”

Harvey said it is important to remember that the law of the land on affirmative action programs is still the 1978 landmark U.S. Supreme Court decision, known as the Regents of the University of California v. Bakke case, which allowed the use of race as one of many factors in deciding college admissions.

Even in California, where voters in 1997 struck down affirmative action programs in higher education, the University of California Board of Regents, which in the past had supported the voters’ action, is backing away from the measure, if even symbolically, because of the detrimental impact those measures have had on enrollment.

The Outlook explores how some states have tried to boost diversity in higher education and analyzes how successful they have been. For this story, the Outlook also turned to a book by ACE, Making the Case for Affirmative Action in Higher Education, to share measures ACE says will help safeguard diversity.

In recent years, public universities in Washington, California, and Texas have experienced drops in minority enrollments since anti-affirmative measures went into effect in all three states.

For example, the number of Black, Hispanic, and American Indian first-year students enrolling at all universities and colleges in Washington dropped in 1999 following the passage of Initiative 200, which eliminated many affirmative action programs in the state. Most of the declines in minority enrollment came at the University of Washington (UW), the state’s largest educational institution, according to a study by UW sociologists. The study indicates the problem is more complex than the popular perception that UW is admitting fewer minorities. Fewer underrepresented minority students are applying.

The drop among Hispanic students was the most pronounced, falling from just under 5 percent of the 1998 first-year student class to less than 3 percent in 2000, said Charles Hirschman, co-author of the study.

One of the strategies to preserve racial diversity in California is to guarantee a seat for the top 4 percent of students from each high school class. In Texas, it’s the top 10 percent and in Florida, the top 20 percent. The approaches are different. In California, legislators said the top percentage of students will get a place somewhere in the system. In Texas, students in the top 10 percent of their graduating class can go to the University of Texas at Austin.

Harvey said the problem with so-called “percentage plans” is that they operate under the presumption that students attend racially segregated schools so, for example, the top 10 percent of a minority-majority school are likely

---

**Sample Letter to the Editor**

Dear

I am writing to express my support for affirmative action, particularly in institutions of higher education. We all want a color- and gender-blind society, but we know that serious discrimination still persists. As long as discrimination based on race and gender continues to exist, we must fashion remedies that take it race and gender into account. Affirmative action needs to be strengthened.

A SAMPLE LETTER TO CONGRESS TO SAVE AFFIRMATIVE ACTION (If national legislation is introduced to curtail or eliminate affirmative action)

Dear

As a member of the academic community, I urge you to support affirmative action and vote against . . .

I urge you to . . .

In my view, discrir would be a color- and gender-blind society, but we know that serious discrimination persists today. As long as discrimination based on race and gender continues to exist, we must fashion remedies that take race and gender into account.

It is essential that affirmative action be preserved for the following reasons:

- Diversity serves as an important educational function.
- Diversity in higher education helps prepare students for the world of work and for participation in a democratic society.
- Affirmative action helps guarantee equal employment opportunity in colleges and universities and enhances quality in higher education.

Literally millions of men and women have secured equal opportunities in employment, education, housing, and voting because of affirmative action.

In my own case, affirmative action is important to me because:

Affirmative action has never been about “quotas,” but about providing opportunities and access. Please continue to support affirmative action.

Sincerely,

Name: [Your Name]
Address: [Your Address]
to be minority thus ensuring minorities will attend a university. But, Harvey said of integrated schools, minorities tend to come from families with lower incomes, and research has shown that students from families of lower incomes tend to score lower overall. Therefore, in that scenario, few minorities would be in the top 10 percent of their class, and thus few would be guaranteed a higher education slot.

Jorge Chapa, a professor and the director of Latinos Studies at Indiana University at Bloomington, is co-authoring a book about affirmative action to be published by the Julian Zamora Research Institute at Michigan State University. The book's working title is *Diversity in Texas Higher Education at the Time of Hopwood—Problems and Prospects*. It explores the impact of the Hopwood case, the landmark 1996 federal appeals court ruling against the University of Texas Law School, which resulted in barring colleges in Texas, Mississippi, and Louisiana from using race as an admission factor.

"I would say that the University of Texas at Austin has been able to use the Top Ten Percent Plan, combined with a rigorous recruitment effort and a restructured financial aid program, to have a more diverse and more successful entering class than it did under affirmative action," said Chapa.

"However, the Top Ten Percent Plan will not necessarily result in a more diverse student body. The other two Texas universities with selective undergraduate admissions at the time of Hopwood, Texas Tech and Texas A&M, still have entering classes with far fewer minority students.

Chapa said his research shows that students who attend public schools in high-income areas get preferential access to the best public universities. For example, he found that about half of the entering class at the University of Texas at Austin came from less than 5 percent of Texas' public schools.

"Texas has an extremely pressing and growing need for successful programs to make higher education accessible to Latinos and to make sure Latinos from all high schools have the opportunity to be fully prepared for higher education," said Chapa.

More than four years after the passage of Proposition 209, some California universities are struggling with the restraints placed on admissions and hiring practices that came with the affirmative action ban. Proposition 209, approved by voters as a constitutional amendment in 1996, bans preferences in state and local government hiring, contracting, and education.

Transferred into UC from a community college were African American or Latino, said Dang.

UC has continued efforts allowed under the law by boosting outreach programs in neighborhoods and school districts in underrepresented areas, as well as initiating a program that guarantees admission to the top 4 percent of graduates at each high school, adds Dang.

Hoping to send a conciliatory message to Black and Hispanic students, the University of California regents took the largely symbolic step this spring of repealing its own ban on race-based admissions.

The unanimous vote by 22 regents will not restore affirmative action to UC, which has 174,000 students at nine campuses. That is ruled out by Proposition 209, but the regents hoped the move would help bring in more minorities, whose numbers also have dropped at the UC flagship campuses of Berkeley and UCLA since the ban on race and gender preferences was adopted.

Douglas X. Patiño, vice chancellor for university advancement for the California State University (CSU) 23-college system, said that California's is considered to be the sixth largest economy in the world and that it depends on an educated and trained workforce of Latinos since Latinos comprise a significant proportion of California's population.

"Without a highly educated Latino community, that economy cannot maintain itself," said Patiño.

"If Californians are not careful, their decisions will hurt the pocketbooks of all Californians."

But Patiño, a civil rights activist, said, "laws will not keep Latinos out of higher education."

Within CSU, there were no minority admission declines from 1995 to 1999. Admissions for Asian/Pacific Islander students increased by 10 percent; White students, by 25.7 percent; African American students, by 26.2 percent; and Latino students, by 19.4 percent.

Higher education officials who want to make sure public policymakers at their institutions recognize that diversity among students, faculty, and staff is an essential component of high-quality higher education can take several steps to

First, it is important to analyze an institution's attitude about affirmative action. To gauge this attitude, one would read the campus newspaper, faculty newsletters, board of trustees minutes, and alumni magazines. Try to determine if there are differences of opinion among students, administrators, faculty, and staff. Harvey said that institutions committed to diversity show that support from all levels, including the campus leaders, the boards of trustees, the tenured faculty, and the students. According to the ACE book, "Forming coalitions with other people and groups that support affirmative action and actively sharing information about the campus climate are also effective."

The next step to safeguarding diversity on campus is to tell the story of how affirmative action has helped the campus improve its diversity. To best tell the story, one should include facts, such as the increased number of students, faculty, and staff who are women and/or minority ties and how certain lives have been enhanced by affirmative action programs at that institution.

Based on the information gathered, the next identifying a media effort that celebrates the achievements of affirmative action would be a good next step. If key policymakers were unclear about their support for affirmative action, it would be vital to arrange meetings between these key policymakers and members of the campus community and alumni.

Another important element to safeguarding diversity on campuses nationwide is to express opposition to any national or state legislation designed to curtail or end affirmative action. Good ways to assure your opposition is heard include writing, calling, or making a personal visit to legislators. Maintaining a steady dialogue with them—even when there are no pending votes—will help in the long term.

"Contact your senators and representatives, and encourage them to vote against such measures," reveals the ACE book, which also describes how to request, conduct, and follow-up any meeting with legislators or their education aides.

"The critics of affirmative action are using your silence as further evidence that the nation no longer needs or wants affirmative action."
Hometown Boy Looks at Latino Underachievement

Low-Income Parents Need Convincing

BY CARLOS D. CONDE

On a warm, breezy summer evening, as the sun faded over the stadium walls, the band struck up the traditional song of high school graduation rites, “Pomp and Circumstance.”

A surge of pride and joy flowed over the capacity audience as 460 graduating seniors of San Benito High School, giddily adjusting their cap tassels, began the solemn march that symbolizes, scholastically, the shedding of youth and entry into adulthood.

School dignitaries and the top graduates made the obligatory remarks of dreams achieved and challenges ahead. Valedictorian María Arminda (Amy) Rodríguez said she and her fellow graduates were prepared to face the world and “make our own decisions and reap our own rewards or consequences.”

They were prophetic words indeed, as is the challenge for the San Benito senior class of 2001, which is not the garden variety of young scholars in transition. You could say it represents, in part, a microcosm of today’s young Latinos in the U.S. at a crossroads in their formal education.

Unfortunately, statistical evidence shows that for many of these graduates, it was the end of the road in scholastic pursuits.

The mood for the moment, nevertheless, was of pride in the achievement and in the expectation of roads yet traveled. For this predominately Latino senior class, most of them the product of modest upbringing, the journey will take many paths that hopefully reward their endeavors well.

For Amy, the valedictorian and the daughter of parents who never made it to high school, the educational shortcomings in her family were the motivation that earned her scholastic honors and scholarships to several universities. She chose a nearby institution, where she plans to study biology, because she prefers to be close to home.

“In my parents, I saw how difficult it is to get a good job and make a good living without a good education,” she said.

Linda Monica Lagram has traveled all over the United States since infancy—the daughter of migrant workers. Another odyssey begins now, but oddly, her migrant parents want her close to home, and so she will study design in a neighboring technical college.

“Life has a meaning, and it can be good or it can be bad,” she said philosophically about her migratory life and her future plans. “We have to appreciate what it gives us and make the best of it.”

Abraham Rodríguez, a jock with gentleman grades, received a Pell Grant award and plans to study computer science or kinesiology at the University of Texas-San Antonio.

“I thought about joining the service until my parents put it to me real simple about life without an education; it was a choice of putting my foot to a shovel or holding a pen in my hand,” said Rodríguez.

Santos Gómez, the son of a border customs officer, is enlisting in the Marines. One of his teachers tried to talk him into attending college, but he says he’s better suited to be a marine. “College is not for everyone, and it’s not for me,” he said.

Unfortunately, Gómez’s rejection of a postsecondary education also reflects the decision of the majority of his classmates and is a symptom affecting many of today’s Latino youth, according to national statistics. Hispanics currently represent about 15 percent, or 36 million, of the total traditional college-age population, 18 to 24 years, according to a U.S. Census report. Of the 15 million total in U.S. colleges, nearly 10 percent is Hispanic. About 11 percent of Hispanics age 25 years and older have a bachelor’s degree.

Fifty-seven percent of Hispanics graduate from high school, compared to 88 percent of non-Hispanic Whites and 81 percent of Blacks. In 1998, 30 percent of Latinos, ages 16 through 24 years, were high school dropouts, compared to 14 percent of Blacks and 8 percent of Whites.
The statistics also show the three major Latino subgroups are not homogeneous in educational attainment. Only 51 percent of Mexican-Americans have a high school diploma compared to 72 percent of Puerto Ricans and others, and 73 percent of Cubans.

Of the 460 graduating seniors in San Benito's 2000 class, all but 12 are Mexican-American. School administrators don't know precisely how many of them plan to pursue a higher education. They claim it costs too much to track them. They can come up with numbers through a new program, Public Education from the Home to the Doctorate (PHD).

A New Program

PHD is a recently launched schoolwide program that encourages students at all grade levels, and their parents, to begin thinking and preparing for a postsecondary education. The first and only available figures are for the class of 2000, and PHD Director Edwin Barrera claims that more than 60 percent of that class continued on to a higher education.

The interpretation depends on the semantics. Of the 407 graduating seniors of last year's class, 249 said they expected to enroll in a postsecondary school. Of that number, only 40 indicated plans to attend a traditional college or university. The rest listed institutions such as the armed services or a technical college. Barrera expects 297 of the 2001 class to show a similar pattern.

The PHD data shows vocational training was the field of choice for 43 percent of the 2000 graduating class members who enrolled in a higher education institution. Barrera defends vocational training as legitimate higher education because of its increased standards and increasingly sophisticated training in such fields as health and computer science.

The irony of it, Barrera says, is that most of the graduates performed well in their studies and scored well on the academic skills test and are college material if they want to pursue it. He blames the low aspirations of the Latino scholar on, among other things, low self-esteem.

However they spin the data, at least the efforts by the school administrators are admirable. What it really tells is the little appeal a college education still has for a Latino minority group of largely Mexican-American students who live in a predominantly economically deprived community where academically...
trained careers are not the norm.

Like many other young Latino students across the nation, they fail to appreciate that someone with a bachelor's degree commands an average $40,478 salary, according to the U.S. Census, compared to $22,895 for those with only a high school diploma.

Those who don't finish high school can expect $16,124 average annual earnings and expect jobs in service occupations as machine operators and laborers. Only 14 percent of Hispanics worked in managerial or professional occupations.

San Benito and its educational system reflect the national statistics for Hispanics, particularly the Mexican-American sub-category. There are many factors to explain why most of the San Benito High School graduates shun advanced studies.

It's certainly not for a lack of effort or dedication from the faculty or the facilities, which are state-of-the-art, thanks to the largesse of the state and federal governments and the ability of the school administrators to procure a plethora of grant money from various sources.

The high school, with an enrollment of 2,182 students, is an $11.1 million modern air-conditioned complex wired with computers for instruction and for use as teaching aids in all classrooms along with all the other necessary accoutrements of instruction. It provides free breakfasts and lunches to the entire student body from an air-conditioned food court with four stations that offer a choice of American, Mexican, Italian, or fast-food cuisine.

Single mothers with children? No problem. The high school provides a daycare center with a 30-child capacity, and it also includes special transportation.

The average statewide starting salary for teachers is $28,588. The San Benito school district is competitive at $28,065. The average salary for teachers is $36,713, about five times better than the local per capita income.

The school district has a total student enrollment of close to 9,000 students, of whom 97 percent are Latino. It has an annual budget of approximately $58 million. The state and federal governments provide nearly 90 percent of the school budget.

The dependence on outside government funds is revealing but not surprising considering that the community, as far as its own resources are concerned, is practically on life-support.

Therein lie some of the reasons for the apathy of many of the parents toward the educational betterment of their children and the academic lethargy of the students when it comes to wanting to improve their lot with a postsecondary education.

I know something about this. I was born and raised in San Benito and went through the school system during the 1950s when the school enrollment was about evenly split between Anglos and Mexican-Americans and when the pursuit of a higher education for the Latino minority was even more remote. I was one of the few Latinos from that era, and among the first in my hometown, to graduate from a large state school, the University of Texas.

There are other, more noble exceptions. The current San Benito mayor, Richardo Morado, once a migrant worker, is a graduate of UT-Austin and Harvard Law School. He has an easy explanation as to what compelled him to defy the statistics and seek a first-class college education. "It beats working in the fields," he said.

Exceptions aside, for one to understand the low aspirations for higher education in areas largely Latino, one must also consider the characteristics of the community and its people and the socio-economic factors that influence it. The national statistics on educational achievement by Latino minority groups in other areas with comparable circumstances indicate a similar cause and effect.

San Benito is a city of 23,317 people, located by the Mexican border on the Río Grande River in the southern tip of Texas. Once surviving on agricultural activity, it now lives off the minimum wage in the blue-collar service industry. Paradoxically, the main industry is education, and the largest employer is the school system.

The average poverty threshold in the U.S. according to the Census is $17,029.

In San Benito, where at least 85 percent of the population is Mexican-American, the U.S. Commerce Department recently reported a per capita personal income of $14,112 in a tri-city area that included San Benito. Another survey showed almost 42 percent of families in the community living at below poverty levels.

A 1999 application for grant assistance prepared by school officials presented an even more dismal situation in the community, though it could be faulted for self-serving exaggerations and for being based on 1999 Census data. PhD Program Director Edwin Barrera, who prepared the report, says that, nevertheless, most of the figures and conclusions still hold today.

"Although the population growth is twice the state growth, no plan or current education system has the capacity to overcome generations of cycles of poverty and low educational attainment," noted the report.

The report claims a median income of $6,335 for the community and a 13 to 15 percent unemployment rate, compared to the state's 4.4 percent rate. It points to border drug traffic as an industry competing with the education system and corrupting the youth.

Some of the role models, it says, are young peers with questionable occupations who live an opulent lifestyle with new cars, fashionable threads, and plenty of walking-around money. Barrera says the message it sends is like,
"who cares about school or even stretching it into a college career when you can make a quick $3,200 on the street for a pound of cocaine."

"Hispanic parents have commonly discouraged their children from pursuing a higher education due in part to family survival strategies, cultural barriers, language barriers, and the fear for a child's educational opportunities due to the families' lack of resources," adds the report. "Hispanic parents do not clearly understand the American educational system or the process to attain a higher education."

School administrators say the ingrained poverty and the perceived indignities of a minority group, which in this area has always considered itself deprived and economically ostracized, have imposed a mindset that rejects the wider horizons of a postsecondary education.

"It's particularly frustrating to School Superintendent Joe D. González, who says he's a product of, and would also have been a victim of, the system had it not been for his athletic talents. González is one of 14 children of parents with little or no schooling. Most of his siblings dropped out of school to go to work and support the family. He said there was parental love but little encouragement to even go to school, much less seek a higher education. Baseball kept him in school and got him a scholarship to Sul Ross State University.

"The mentality still exists among many in our community that an education ends with a high school diploma," he said. "Kids graduate and want to go out and find jobs and make money as quick as they can without considering the benefits of four more years of schooling," said González. "Their parents will tell you: 'I can't hardly wait for my child to graduate so he can help us out.'"

González added that family values, a strong Latino characteristic, can also be a hindrance in higher education pursuits. "That natural family closeness inherent in our Hispanic culture sometimes inhibits our children from exploring other areas in order to better themselves," he said. "Sometimes it's hard for parents to let go of a child, and the child sometimes is reluctant to leave his family because tradition tells him his first priority is helping to take care of the family.

"We live in one of the lowest socio-economic areas in the state, and the family needs money to survive. There's a lot of pressure for the children to go out and get a job right away to help out the family, and for many, enrolling in a university is not even in their thinking."

High school counselors work with the seniors to encourage postsecondary education by testing, helping them fill out assistance applications, and holding college fairs. This year's college fair, in which parents also are invited to participate, attracted 60 recruiters. Twenty college representatives visited the campus during the year. The Marine Corps periodically maintains a booth in the school corridors.

Senior counselor Zulema Rodríguez considers it an uphill battle. "They'll fill out a college application but don't follow it up, saying they need to go out and get a job or that their parents can't afford it financially," said Rodríguez. "They live for the now, not for the future."

San Benito has a supportive school board, but one also wonders how members can relate to the advocacy of a college experience when only four out of seven have a college education.

School board member Gilberto Montalvo, who took 24 years to get his college degree because of family interruptions, says it has no effect because he was also a product of the system and is still not a viable option for many of the graduates.

"It's still too early to tell if our current incentive programs are having any success," said Montalvo. "The military still seems like the popular alternative because there at least don't have to worry about food or lodging."

For now, the PhD initiative is the workhorse in lobbying for college education with parents and students, organizing field trips to college campus and cultural events, walking them through the application process, and mainly trying to influence the participants with the fact that, yes, there is life after San Benito High, academically speaking.

"There are no excuses anymore," said Barrera. "I ask the kids if they're going to be happy being poor because poverty stinks."

Class salutatorian Mauro Ramírez, son of a services company worker and a teacher's aide, who plans to attend the University of Texas to study mechanical engineering, probably best fits the model Barrera and his associates seek in an upward Latino student.

Serious and studious with a well-balanced, squeaky-clean lifestyle, Ramírez seems to have all his priorities straight. He said that whatever the economic deprivations, there has never been any question in his mind that he would attend college. "My role model is the educated person because I have noticed that all the people who have done well have had a good education," said Ramírez.

It has earned him the tag from some of his classmates as the senior class nerd. In an interview with his hometown paper, Ramírez said this didn't bother him at all.

"Today, they call me 'the nerd,'" he said. "Tomorrow, they'll call me 'the boss.'"

NCTE Concerned Supreme Court Case Could Affect Writing Instruction

URBANA, ILL.

The U.S. Supreme Court is to hear a case that could prevent English-language arts teachers from using one of the most effective strategies for teaching writing, said Anne Ruggles Gere, president of the National Council of Teachers of English (NCTE), a nonprofit association dedicated to improving the teaching and learning of the English-language arts.

What's at stake for teachers of all subjects is the common practice of student "paper swapping"—trading papers and evaluating one another's work. For English teachers, a negative decision could mean giving up peer response to drafts, a practice that has proved very effective for improving student writing.

According to NCTE, students who read and respond to one another's drafts in English classes become better writers for many reasons: they are motivated to write well for their peers; they get immediate feedback that identifies the weak spots in their writing; they develop an understanding of what an audience needs to be told; they become active participants in improving their own writing; and they learn about voice and style from hearing and/or reading their peers' papers.

Peer response is not a substitute for teacher response to writing, said Gere. It simply enhances students' opportunities to become better writers.

The case that will come before the U.S. Supreme Court originated in Owasso, Okla., where Kristia J. Falvo, a parent of three children in the local public schools, sued the district. Falvo argued that her children were embarrassed by practices such as having students grade their classmates' papers and verbally report the scores to the teacher. In April 1999, the U.S. Chief District Judge Terry Kern sided with the Owasso school district. Kern claimed because homework assignments are not maintained by an educational agency at the point of grading, Falvo's contention was not valid.

In July 2000, the Denver-based 10th District Court overruled the Kern decision, citing the Family Educational Rights and Privacy Act (FERPA), which prohibits educational institutions from releasing students' "education records" without parental consent. Although the original suit involved student "evaluation" and public reporting of grades, attorneys close to the case warn that if the Supreme Court rules in Falvo's favor, a wide variety of classroom practices—including peer response in writing classes—will be affected.

"Assessment which isolates students and forbids feedback," notes a recent NCTE policy statement, "conflicts with current research about the benefits of interaction during the writing process; it also is out of step with much classroom practice."

ACE/EDUCAUSE Publication Highlights Challenges of Distributed Education

WASHINGTON, D.C.

Challenges the nation's colleges and universities may face when providing distance education, e-learning, and other technology-based teaching/learning methods are examined in Distributed Education and Its Challenges: An Overview, a new publication from the American Council on Education (ACE) and EDUCAUSE, an international, nonprofit association that represents university information technology professionals.

EDUCAUSE President Brian L. Hawkins and Vice President Carole A. Barone joined Diana G. Oblinger, a senior fellow at EDUCAUSE and a professor at the Kenan-Flagler Business School at the University of North Carolina-Chapel Hill, in writing the report. The authors explain that the term "distributed" is preferable to "distance" education because it more accurately describes the array of technology-based teaching options now available.

Issues discussed in the report include strategic goals and intended audiences, market dynamics, organization and governance, quality issues, barriers to success, and leadership challenges.

"This paper describes the 'big picture,'" said Michael A. Baer, ACE senior vice president for programs and analysis. "It is aimed at helping institutional leaders ask the right questions and make appropriate choices..."

The paper is the first in a series of publications that ACE and EDUCAUSE will release on distributed education.
NCRW Report Shows Women Lag in Technology and Engineering

WASHINGTON, D.C.

Women and girls made significant progress in the sciences over the last two decades, particularly in medicine and the biological sciences. But women's gains have stalled—and in some cases eroded—in engineering and computer sciences, despite effective new programs to increase their participation. These are among the findings of a major new report, Balancing the Equation: Where Are Women and Girls in Science, Engineering, and Technology?, released by the National Council for Research on Women (NCRW).

It notes myriad reasons to advance women in the sciences, including the economic imperative to increase the technological and scientific literacy of America's workforce. At a time when U.S. industry cannot fill the openings for technically advanced jobs, women are grossly underutilized. Equally important, the report says, are the perspectives women bring to the sciences, often leading them to different decisions on allocating research dollars, targeting drug testing protocols, and developing technology to benefit communities.

The report analyzes strategies to attract women and girls to science and retain them in technological fields. It finds that efforts to open up scientific study and work have created new opportunities for women and minorities—but those efforts have been sporadic and disjointed. The report calls for a national commitment to remove the persistent barriers and glass ceilings facing women and girls in the sciences.

"In the last few decades, we have learned how to increase women's and girls' participation in science and technology," said NCRW Executive Director Linda Basch. "Now we need to use that knowledge. This report offers cause for cautious optimism. Change is possible, if complex—and certainly worth the effort. What is good for women and girls is also good for men and boys, and good for the country. We simply cannot continue to overlook the contributions of half our population. If we do, our society, our nation, and our world will suffer."

Balancing the Equation reviews hundreds of programs that successfully increase classroom, laboratory, and workplace participation of girls, women, and minorities in the sciences. It finds that women and girls excel in environments that encourage hands-on research, include mentoring and role models, and link science, technology, and engineering to other disciplines and real-world applications. It provides a blueprint to help leaders make the culture of scientific enterprise inclusive and to advance institutional change, and an extensive resource guide to help educators, business leaders, and policymakers.

Department of Education Report Outlines State of Education

WASHINGTON, D.C.

Enrollments continue to grow at all levels of education, and course-taking in advanced science and mathematics is increasing, yet gaps persist in education performance and participation, according to The Condition of Education 2001, a recent report by the U.S. Department of Education's National Center for Education Statistics (NCES).

While U.S. Secretary of Education Rod Paige noted some positive trends documented in the report, he cautioned, "The Condition of Education tells us concretely that we are far from where we need to be in terms of student performance. We are failing to close the persistent achievement and attainment gaps—and we lag behind other developed nations in mathematics and science achievement."

Produced annually, The Condition of Education 2001 presents the latest figures on the health of American education—indicators that survey enrollment, outcomes, factors affecting the quality of education, and parental and financial support.

It includes a message for students, parents, and schools that rigorous academic course work in high school makes it much more likely that students whose parents never attended college will attend postsecondary institutions.

For the full NCES study, visit http://nces.ed.gov/pubsearch and key in publication No. 2001072. A hard copy may be ordered at no charge by calling (877) 4ED-PUBS with the identification No. ERN3244P, while supplies last.
Sacramento City Student Receives Prestigious Award

Aaron Benavidez of Sacramento City College (Calif.) received the prestigious George O. Bierkoe Distinguished Member Award from Phi Theta Kappa (PTK), the international honor society for two-year colleges. The award is based on scholarship, leadership, service, and fellowship. Benavidez is the 2001-02 chapter president.

Benavidez, a double major in English and biology with a 3.84 GPA, played a vital role in setting and reaching chapter goals and fostering growth of its members. He wrote essays, worked, played in an orchestra, and took 21 credits this past spring.

Benavidez also received a journalism scholarship from the Sacramento Bee and the Joel García Memorial Scholarship from the California Chicano News Media Association. He plans to pursue a career in science journalism.

Blanton Museum Intermingles American and Latin American Art

The Jack S. Blanton Museum of Art announced the opening of a fall exhibition, Past Present Future: Notions of Time in Twentieth-Century Art. The exhibit is organized with works from 1915 to the early 1980s, from the museum's collections of 20th-century American and Latin American art, exploring the diverse ways in which artists, among them Max Weber, Philip Evergood, Helen Frankenthaler, Antonio Berni, Fernando de Szyszlo, and José Antonio Fernández-Muro, have questioned, interpreted, and reflected temporality in their art.

The Jack S. Blanton Museum of Art, affiliated with the College of Fine Arts at the University of Texas-Austin, regularly presents special exhibitions and educational programming for the university and its surrounding region. The museum's fall exhibitions explore the rich holdings of more than 16,000 works of art.

CSUN Honors Antunez

California State University-Northridge (CSUN) named Joseph Antunez the University's Employee of the Year at its 35th annual Staff Service Recognition Ceremony. Antunez, executive secretary to Provost Louanne Kennedy, was selected via a campus-wide nomination process. The award includes a $1,000 gift.

CSUN President Jolene Koester praised Antunez for being thoughtful and responsive and for helping build a staff team in academic affairs with "a leadership style that is not always evident because it is so quiet and without demand for recognition."

In 1990 Antunez began working at CSUN as a clerical assistant to the academic affairs vice president. He became acting executive secretary to the provost in 1994 and assumed the regular position in 1995. As executive secretary, he is responsible for managing the provost's office. He previously worked at Learning Tree University and Sinai Akiba Academy, a private Jewish day school in West Los Angeles.

He earned a bachelor's degree from CSUN in 1998.

Cal State L.A. Graduate Recognized For Service

The California State University System honored California State University-Los Angeles graduate Jesús Pérez for his outstanding service with the blind. Pérez, a sight-impaired rehabilitation services major, received an inaugural STARS (Students That Are Recognized for Service) award for combining community service with his education.

Pérez, 42, legally blind since his late teens in Mexico, moved with his family to the U.S. in the late 1970s, finding work as a street vendor. He learned about the Los Angeles Braille Institute and was determined to learn Braille—at that time taught only in English, a language he did not speak.

He took ESL classes at Los Angeles City College, received an associate's degree, and transferred to Cal State LA, where he participated in the service learning program through EPIC (Educational Participation in Communities), aided by the office of students with disabilities. The program allowed Pérez to incorporate hours of volunteering at the Braile Institute into his rehabilitation services courses. Using his bilingual skills as a tutor, Pérez began to teach new Braille students how to read and write Braille and facilitated an independent living skills class at the Braille Institute.

New Mexico Highlands Students Study in Guatemala

Eight New Mexico Highlands University graduate students took a summer course in Antigua, Guatemala, for cross-cultural studies and volunteer social service. The course "Counseling 355—Directed Field Experience: Cross-Cultural Service Learning" provided students with a different type of cultural setting: a beautiful yet poverty-stricken country healing after decades of civil war. The class enriched students' knowledge and understanding of human relationships through volunteer service. Students also studied Spanish at one of Antigua's language schools.

Antigua, in southwestern Guatemala, is noted for its phenomenal Holy Week processions, colorful indigenous weavings, and many ruins of colonial edifices, making the entire city a museum of Spanish colonial history. Rarely mentioned about the former capital is the city's strategic position during the country's 36 years of civil war, in which nearly 200,000 civilians were killed and/or "disappeared."

Although the trauma of the war still looms over the area, the students weren't discouraged from making the trip. They volunteered service and cultural learning and brought school suppl...
plies, teaching aids, and medical supplies to the host social service organizations.

**Saint Rose Appoints de la Cámara Dean**

The College of Saint Rose (N.Y.) named Dr. María de la Cámara dean of the School of Arts and Humanities. She had been associate dean of arts and sciences and international studies and a professor of Spanish at Lake Erie College (Ohio).

At Lake Erie, de la Cámara implemented plans for the expansion of international studies, established cooperative agreements with institutions abroad, and collaborated in the design of the college’s interdisciplinary science curriculum reform. As a professor there, she taught Spanish language and courses on Hispanic literature, writing, and Spanish history. She has received many grants from the National Science Foundation, the Cleveland Foundation, and the Dorney Fund of the Cleveland Foundation for her leadership in various educational fields.

De la Cámara has a bachelor’s degree in English from Lake Erie College and a master’s and doctorate in Spanish literature from Case Western Reserve. She is a member of the Modern Language Association, NAFLSA, Association of International Educators, and the American Association of University Professors.

**Gamble Named President of Eastern New Mexico**

The Eastern New Mexico University board of regents named Dr. Steven Gamble university president. Gamble had been president of the Southern Arkansas University (SAU) System since 1992.

At SAU, Gamble chaired the Arkansas Higher Education Council, Strategic Planning Committee, and Productivity Committee and was a member of the Technology Task Force and Executive Council. From 1987 to 1992, he was vice president of academic affairs and an associate professor of history at West Texas A&M University. From 1979 to 1986, he was director of admissions and assistant professor of history at Angelo State University (Texas). Earlier, he was an admissions officer, a part-time history instructor, and an oral historian at Texas Tech University. Gamble was a captain in the U.S. Air Force from 1968-1972 and a lieutenant colonel in the Air Force Reserves from 1972-1995.

Gamble received his bachelor’s and master’s degrees in history and his doctorate in American history with a minor in American literature from Texas Tech.

**Smithsonian Celebrates “Young Americanos”**

The Smithsonian Center for Latino Initiatives, Washington, D.C., will host a special Hispanic Heritage Month reception for the exhibition “Young Americanos: Photographic Visions of Our Community” on Sept. 24.

The exhibition offers unique and intimate scenes from the communities of Indianapolis, San Antonio, Los Angeles, Chicago, and Washington, D.C., through the eyes of their youth. These photographs provide an essay of the life and realities of the community—offering a colorful mosaic of neighborhoods, playgrounds, homes, families, and friends. The exhibition runs through Nov. 15 at the Smithsonian’s Arts and Industries Building.

**AAF Center on Multiculturalism Presents Mosaic Awards**

The American Advertising Federation (AAF) Center on Multiculturalism presents the Mosaic Awards Luncheon, celebrating extraordinary achievements in diversity and multicultural marketing, at the Ronald Reagan Building and International Trade Center, Washington, D.C., on Sept. 28.

Honorary co-chairs will be U.S. Reps. Robert Menéndez (pictured) and Carolyn Cheeks Kilpatrick. Special tributes go to David Bell, vice chairman, The Interpublic Group of Companies; and Robert L. Wehling, global marketing officer, Procter & Gamble Company.

AAF prides itself on being “the unifying voice for advertising.”

**Texas Wesleyan Receives Sculptures**

Texas Wesleyan University announced the installation of five new outdoor sculptures created for the east-side campus by Angel Fernández, a 2001 Bachelor of Fine Arts graduate.

“Enclosed Calder” was conceived two years ago as a small sketch and evolved into a large red mass representing Fernández’s growth as an artist. He taught himself how to build the closed structure, naming it after a color reminiscent of artist Calder’s patinas.

The four sculptures that comprise “A Lot of Things Come in Fours” are in the minimalist style. They are cubes that have been stretched, smashed, or pushed together. The geometry is magnified by their large size. The four are unpainted and will change color with exposure to the elements.

**Cal Poly Hosts Director of Buena Vista Social Club**

California State Polytechnic University presented Juan de Marcos González, musical director of the Buena Vista Social Club, and the Afro-Cuban All Stars as part of the Cal Poly Arts Center Stage series. De Marcos González formed the Afro-Cuban All Stars as a multigenerational 13-piece band that includes “old-time legends and rising stars.”

The group, hailed as a celebration of Cuba’s musical golden age, showcases Afro-Cuban jazz and pure tribal rhythms. The Boston Herald said, “De Marcos González has convened a powerhouse band of Cuban players.”

De Marcos González has relaunched the careers of such Cuban greats as vocalist Ibrahim Ferrer and pianist Rubén González.

**San Antonio Students Mentor at Travis Elementary**

In Texas, San Antonio College students in Norma Cruz-Gonzales’ children’s literature
class English 2375 were honored for mentoring students at neighboring Travis Elementary School. Raúl C. Zamora, San Antonio Independent School District (SAISD) program manager for business and school partnerships, and David Chavarria, campus instructional coordinator at Travis Elementary School, thanked the students for their time.

Gonzales’ classes visited with Travis students on Fridays for one-on-one and group activities, lesson planning, reading, and creating art projects relating to their reading material. The mentoring aspect of the course is a requirement.

Said Gonzales, “The majority feel the experience is positive. It gives them an insight into the realities of teaching. They understand the workings of an actual school setting and they can see, hear, and talk to professionals in that setting.”

Pictured (l. to r.) are Zamora, Gonzales, and Chavarria, seated in front of Gonzales’ class.

Texas-Chancellor Honored by Hispanic Contractors

The Hispanic Contractors Association of Texas selected University of Texas (UT) System Chancellor R.D. Burck to receive its Azteca Award in recognition of a new program for small businesses. Burck initiated the Bonding and Technical Assistance Program, which works with small subcontractors to help them qualify for bonding so they can compete for work on UT System construction projects. Outreach is provided to potential subcontractors, including businesses that are owned by minorities and women and are certified by the state as Historically Underutilized Businesses.

Other groups working with UT in developing the program include the Texas Asian Chamber of Commerce, the Texas Association of African American Chambers of Commerce, and the Texas Association of Mexican Chambers of Commerce.

NSF Funds 40 Miami-Dade Scholarships

The National Science Foundation (NSF) Computer Science, Engineering, and Mathematics Scholarships Program awarded $270,000 to Miami-Dade Community College’s (Fla.) Wolfson Campus to fund 40 scholarships for minority and low-income students seeking to obtain degrees in computer science, mathematics, and engineering.

The NSF cited several strengths of Miami-Dade that influenced their decision: it has strong academic programs and a strong connection to business and industry; a strong faculty mentoring component; many students with financial need; a high number of underrepresented students in these fields, and faculty who have distinguished themselves with local, state, and national honors.

Each scholarship will be about $3,125 per year for a two-year period, covering students’ full-time tuition, fees, books, supplies, equipment, and living expenses. Students must be enrolled full-time in computer science, computer technology, engineering, and/or mathematics degree programs.

Palo Alto Review Receives Pushcart Award

The Palo Alto Review, the only academic journal published by a community college, was given the coveted Pushcart Prize Award, which recognizes the contributions of small presses in a published volume, Pushcart Prize XXVI: Best of the Small Presses. The Pushcart Prize has recognized more than 400 presses and honored new and celebrated authors for a quarter of a century.

The Palo Alto Review is produced at Palo Alto College (Texas) and spearheaded by the English department. Faculty members Ellen Shull and Bob Richmond co-edit the journal, which is published twice a year and features humor, prose, poetry, short fiction, essays, articles, photographs, and art. Earlier this year, Shull submitted the prize-winning entry “Beethoven, Monet, Technology, and Us,” by Burton Raffel of Lafayette, La. Shull noted that the Pushcart honor puts the Palo Alto Review on the map.

Ureño Manages Enrollment at Texas A&M-Kingsville

Texas A&M University-Kingsville named Frank Ureño, former dean of students, to the post of assistant vice president for enrollment management.

“Recruitment and retention are our top focus right now,” said Ureño, who had held the post on an interim basis.

Ureño was an assistant campus director and student development officer for Dona Ana Branch Community College at New Mexico State University for 22 years. He also was a social worker and taught business education.

Ureño is president of the board of directors of the Boys and Girls Club of Kingsville and a member of the Kleberg County Hispanic Chamber of Commerce, Sembradores de Amistad de Kingsville, National Association of Student Personnel Administrators, Texas Association of College and University Student Personnel Administrators, the American Association for Higher Education, and other groups. Ureño has published two handbooks on two-year postsecondary institutions.
New Diversity Director at Colorado-Boulder

The University of Colorado (CU)-Boulder College of Business named Aswad Allen director of diversity and minority programs. Allen will develop and implement programs for the recruitment and retention of underrepresented and first-generation students, and direct the administrative management of diversity programs, program development in recruitment and retention, public relations and marketing, budget oversight, and fundraising.

Earlier, Allen was director of African American Student Services at the University of New Mexico, director of the Inter-Cultural Affairs Center at Sonoma State University, and assistant director of Black Student Services at Colorado State University (CSU). He earned his master's degree in education administration from CSU, specializing in student affairs in higher education.

Stetson School of Law to Establish Program in Tampa

The American Bar Association Accreditation Committee granted the Stetson University (Fla.) College of Law acquiescence to establish a part-time Juris Doctor degree program in Tampa. The physical location of the new school has not been decided.

"This is a momentous time for Stetson University College of Law and for the Tampa Bay community," said Gary Vause, law school dean. "More than 2,700 of our graduates currently live and work in the Tampa Bay community, with thousands more located throughout the state, the nation, and the world. Now, working women and men representing many cultures, ages, and ethnic groups will be able to follow their dream of attaining a Juris Doctor degree here in Tampa at Stetson."

One of Stetson's longstanding policies and goals has been to promote diversity within the college and the legal profession. Vause believes Stetson will move closer to this because of the high concentration of minority professionals working in the Tampa area. Stetson already has begun fundraising efforts to establish scholarships for minority applicants.

Barnes & Noble and Anti-Defamation League Fight Hatred

Barnes & Noble, Inc., the nation's largest bookseller, and the Anti-Defamation League (ADL), the world's leading organization fighting anti-Semitism, are co-sponsoring the second annual "Close the Book on Hate" campaign. The nationwide effort aims to encourage adults to begin dialogue with young children on combating prejudice.

According to the most recent FBI statistics, there were nearly 8,000 hate crimes committed in 1999, most by young men under 20. Barnes & Noble and the ADL hope to educate adults on how to reduce or prevent prejudiced attitudes in young children through free educational events for children, teens, educators, and community leaders. Barnes & Noble, from Oct. 15 to Nov. 15, is distributing a free brochure, Close the Book on Hate: 101 Ways to Combat Prejudice, containing a recommended reading list of books included in the campaign. The ADL's innovative book, Hate Hurts: How Children Learn and Unlearn Prejudice, by Caryl Stern-LaRosa and Ellen Hohfheimer Bettmann, is also recommended for the campaign. It explores difficult questions about hate asked by young people and offers assistance to the victims of intolerance.

UT-Austin Transfers Paredes Web site

The Web site created in honor of the late Professor Emeritus Américo Paredes, a founder of the Center for Mexican American Studies and the Center for Intercultural Studies of Folklore and Ethnomusicology at the University of Texas (UT)-Austin, was transferred to a new Internet address of the Nettie Lee Benson Collection. The new Web site address is www.lib.utexas.edu/benson/paredes/.

Paredes, who died in 1999, is credited with helping shape a positive cultural identity among Mexican-Americans and influencing a new generation of Texas scholars. He challenged the writings of historians and their versions of life along the Texas-Mexico border and set in motion a revolutionary approach to writing about early Texas. Before his death, he authorized a Web site in his name to be created for researchers and others interested in information about his scholarly works. The UT-Austin office of public affairs completed the site after his death.

Grammy Nominee Earns Master's at Cal State L.A.

Latin Jazz musician Bobby Rodriguez received his master's degree in music from California State University-Los Angeles. In 2000, Rodriguez received a Grammy Award nomination for his CD Latin Jazz Explosion.

Rodriguez has directed Latin jazz ensembles at California high schools, colleges, and universities. In 1998, the Los Angeles Jazz Society named him Jazz Educator of the Year, and in 1999, KJON named him Best New Jazz Artist. He has one gold record and three platinum records to his credit.

Rodriguez plans to continue teaching at the Los Angeles County High School for the Arts on the Cal State L.A. campus and at colleges and universities in the Los Angeles area.

Padrón Appointed to Carnegie Foundation Board

Dr. Eduardo J. Padrón, president of Miami-Dade Community College (Fla.), was appointed to the board of trustees of the prestigious Carnegie Foundation for the Advancement of Teaching. He joins the 25-member board responsible for advising the Foundation and making recommendations for future initiatives.

Padrón heads the largest single-district, multi-campus, two-year college in the nation and is recognized locally, nationally, and internationally for his impact on higher education. Under his leadership, M-DCC enrolls and graduates more minorities than any community college in the nation. He is a civic leader, working with the United Way, NAACP, Bayside Foundation, and the Spanish-American League Against Discrimination.

An alumnus of M-DCC, Padrón received a bachelor's degree in economics from Florida Atlantic University and master's and a doctorate in economics from the University of Florida.

California State Names Caldera Vice Chancellor

The California State University (CSU) board of trustees appointed former Secretary
of the U.S. Army Louis Caldera vice chancellor for university advancement. The CSU advancement division includes fundraising, alumni affairs, public affairs, communications, publications, and community relations.

As secretary of the U.S. Army during the Clinton administration, he improved educational opportunities for soldiers, creating the Army University Access Online distance education program, enabling soldiers to earn college and graduate degrees while serving. He expanded high school outreach programs to better serve those planning to enlist in the Army.

Caldera, a graduate of the U.S. Military Academy, left the Army to pursue his graduate studies, receiving a law degree and a master's from Harvard University. He was a California State Assemblyman from 1992-1997.

News From Texas A&M-Corpus Christi

Texas A&M University-Corpus Christi College of Business professor Dr. Adolfo Benavides participated in the 575-mile Palletto Team Works Montana AIDS Vaccine Bicycle Ride to raise both awareness and funds for AIDS research. He began intense physical training for the event in January, and rode the race in memory of his brother, Tomás Alberto, who died from AIDS in 1995.

The Commission on Collegiate Nursing Education (CCNE) board of commissioners granted accreditation of the baccalaureate degree program in nursing at Texas A&M-Corpus Christi for 10 years. CCNE commissioners also granted accreditation to the master's degree program in nursing for five years. This past year, the School of Nursing and Health Sciences conferred 52 bachelor's degrees and 19 master's.

Texas A&M Corpus Christi hosted the Upward Bound Summer Academic Institute. Upward Bound offers courses designed to enhance and enrich student lives, while providing support, motivation, skills, and a preview of college life. The institute offered courses in English, Spanish, algebra, sociology, pre-calculus, biology, speech, psychology, statistics, and journalism. Upward Bound Director Herminio Ibáñez said student participants are potential first-generation college students. This year, approximately 72 students participated in the six-week program.

Texas A&M-Kingsville Hires Physician Assistant

Texas A&M University-Kingsville's Life Services and Wellness hired Dr. Salvador Torres-Torres as the university's physician assistant. He will be responsible for the overall leadership of the healthcare team and operation of healthcare services, which provide primary medical care to registered students. He plans to enlarge the services offered by the clinic.

"We're an institution that says we help. Let's not just say it; let's show it," Torres-Torres said.

Torres-Torres was a physician assistant with the U.S. Navy and an enlisted hospital corpsman. He currently is a first lieutenant with the U.S. Air Force Reserve. In 1998, he received the Navy Achievement Medal for superior performance of duties while a physician assistant in the Naval Medical Clinic.

Torres-Torres is a member of Physician Assistants of Latino Heritage, the National Council of La Raza, and other organizations.

Duke Hosts Conference for Top Minority Students

Duke University (N.C.) welcomed more than 160 of the top minority doctoral and postdoctoral students in the country to the 10th annual Mellon Minority Fellowship Summer Conference. The program is designed to increase the number of Hispanic, African American, and American Indian graduate students in the humanities, social sciences, physics, earth sciences, and ecology. It provides students with a forum for intensive discussion on topics such as the transition to graduate school and the importance of developing professional networks.

This year's conference, "Jarring the Floor: [En] Countering Traditions and Innovations," examined the academic and intellectual traditions underlying minority presence in higher education. Fellows exchanged research information intended to help them in their graduate studies. Faculty mentors from their home institutions and from research universities such as Duke assisted the students.

Queensborough Inaugurates Martí as Fourth President

Queensborough Community College (N.Y.) inaugurated Dr. Eduardo J. Martí as its fourth president during the institution's 40th annual commencement ceremonies. The installation was conducted by Herman Badillo, chair of the board of trustees of the City University of New York (CUNY). He was assisted by CUNY Chancellor Matthew Goldstein.

After the ceremony, Martí conferred associate's degrees on some 1,200 Queensborough graduates. College awards for academic achievement and service were also presented at the ceremony, which was attended by city dignitaries, including City Council Speaker Peter Vallone and Queens Borough President Claire Shulman, both of whom extended greetings.

New Mexico State Selects Flores as Provost

William V. Flores, dean of the College of Social and Behavioral Sciences at California State University-Northridge, was appointed provost at New Mexico State University. The provost is the university's chief academic officer and serves as acting president when necessary.
"This is a tremendous opportunity to participate in a campus that is both a major research university and Hispanic-serving institution," Flores said. "I’ve had a chance to meet with faculty, staff, and student representatives and was impressed by the warmth, hospitality, and professionalism."

Earlier, Flores taught at CSU-Fresno, where he was associate dean of the School of Social Sciences and chair of the department of Chicano-Latin American studies. He was a visiting scholar at Hunter College (N.Y.), at its Center for Puerto Rican Studies. He is co-editor of Latino Cultural Citizenship: Claiming Identity, Space, and Rights, published by Beacon Press in 1997, and was on the board of the Pacific Chapter of the U.S.-Mexico Chamber of Commerce.

Moraine Valley Student Places in National Forensics Competition

Moraine Valley Community College (Ill.) student Pedro Castro finished the 2001 Phi Rho Pi National Forensics Tournament with a bronze medal—winning for his speech on the edible camera, a new diagnostic tool in the medical community that detects maladies in the digestive tract and stomach.

The tournament’s informative speaking event required contestants to select a topic of social merit, research it, develop and write a speech, and deliver the finished product from memory several times throughout the five-day competition. Of the 157 students from across the nation to compete, Castro was among the top 20 speakers. He was judged for his knowledge of the subject and for his commanding presence before the panel of judges.

Castro was part of Moraine Valley’s six-member speech team, which competes in forensics events throughout the academic year.

Northeastern Illinois Selects Leaders for Latino Programs

Northeastern Illinois University (NEIU) appointed two faculty members to leadership positions in Latino-serving programs.

Teresa J. Díaz was named coordinator of NEIU’s Proyecto Pa’Lante Program. Díaz has been a program associate, program advisor, and faculty assistant at NEIU, and an admissions counselor, project coordinator, and assistant to the dean at the University of Illinois-Chicago. Proyecto Pa’Lante is a program designed to recruit and serve primarily Latino students from the inner city who demonstrate academic potential but might not meet requirements for general admission. It provides them with counseling, academic advisement, tutoring, career development, and cultural reinforcement.

Dr. Caleb Rosado became director of NEIU’s El Centro Educational Resource Center. Rosado has held faculty positions at colleges around the country and was director of human resource development for the Lake Region Conference of Seventh-Day Adventists and coordinator of organization development for the Latino Institute in Chicago. El Centro is NEIU’s Hispanic outreach center, making opportunities in higher education accessible to the Hispanic American community.

NAHJ Receives Scholarship Grant

The National Association of Hispanic Journalists (NAHJ) was awarded a $50,000 grant from the Philip L. Graham Fund to support NAHJ’s scholarship endowment fund. The endowment was created last year with the goal of raising $1 million to support the Rubén Salazar Scholarship Fund. NAHJ already had raised close to $200,000 for the endowment.

NAHJ President Cecilia Alvear thanked the Philip Graham Fund “for having the vision to invest in the education of future Latino journalists.”

The Rubén Salazar Scholarship Fund provides financial assistance to Hispanic students pursuing careers in journalism. NAHJ has awarded $470,000 in scholarships since the inception of the program in 1986.

UNM Encouraged to Collaborate with Latin American Scientists

The Consortium of the Americas for Interdisciplinary Science, a Center of the College of Arts and Sciences, housed in the physics department at the University of New Mexico (UNM), received a grant of $150,000 from the Los Alamos National Laboratory (LANL) to encourage UNM/LANL collaborations with Latin American scientists. Scientists and administrators from more than 20 Latin American institutions of research and higher learning and the national laboratories in New Mexico participate in the consortium.

“This grant will have an initial emphasis on Argentina, Brazil, Chile, and Mexico,” said Vasudev M. Kenkre, UNM professor and director of the consortium. “It will be used to bring Latin American scientists to New Mexico to spend periods ranging from weeks to almost a year.

Research investigations are focused in three areas crucial to advances in science and technology: nanoscience, computationally complex systems, and novel materials. UNM and Latin American institutions have already conducted workshops, with about two dozen Latin American scientists spending periods at UNM collaborating with UNM scientists. Dr. Guillermo Abramson from Bariloche, Argentina, and Dr. Gustavo Cruz Pacheco from Mexico City, Mexico, already have been working with UNM and LANL scientists.

Pablo Casals Museum Opens in Spain

Manhattan School of Music (N.Y.) President Maria Casals-Istomin and The Pablo Casals Foundation of Barcelona inaugurated the Pablo Casals Museum in El Vendrell, Catalonia, Spain. The museum is housed in the recently renovated "Villa Casals," former home of Pablo Casals, a legendary musician and humanitarian. Istomin (pictured), co-founder and vice president of the museum and widow of Pablo Casals, said that the museum "will inspire the ideals of the highest musical and human qualities that guided Casals during his lifetime."

Pablo Casals (1876-1973), cellist, is considered one of the greatest musicians of the 20th century. As a child, he was the protégé of Queen Maria Christina of Spain, and later performed for leaders such as Queen Victoria, Theodore Roosevelt, and John F.
Kennedy. As a conductor and teacher, he raised musical interpretation to new levels. As a humanitarian, he strongly opposed the forces of communism and fascism.

The King and Queen of Spain presided over the inaugural ceremony concert. Performing artists included The Abbey of Montserrat Children's Chorus, Montserrat Caballé, Casals Quartet, Eugene Istomin, Mstislav Rostropovich, and an International Cello Ensemble.

**Texas-Austin Pharmacy Student Receives Award**

The American Association of Colleges of Pharmacy (AACP) presented an award to University of Texas (UT)-Austin pharmacy student René Garza for a community research project he will conduct. Garza was one of three students selected nationally for the $5,000 Novo Nordisk Pharmacy Practice Diabetes Award.

Garza is past president of the Mexican American Association of Pharmacy Students and a member of the UT-Austin Pharmacy Council. He and Dr. Debra Canales López, clinical assistant professor in the College of Pharmacy, are set to begin the Austin project "DiaBEATt—Pharmacist Impact On Diabetes Outcomes," which involves working with a local pharmacist and a local physician to provide outpatient care to a group of patients at high risk for diabetes. The group will be compared with a similar group of patients who do not have a pharmacist involved in their care.

AACP encourages pharmacy students to become active in the treatment of persons with diabetes in the ambulatory and retail pharmacy environment.

**Northeastern Illinois Spanish Dance Theater Celebrates 25th Year**

The Ensemble Español Spanish Dance Theater, in residence at Northeastern Illinois University, celebrated 25 years of dance at its annual American Spanish Dance Festival. Ensemble members, along with artists from Spain and the Americas, performed in several gala concerts to critical praise.

Dame Libby Komaiko, founder and artistic director of the ensemble, presented a retrospective of the group's extensive repertoire, 25 years of classical, folkloric, flamenco, and dance-drama styles. Komaiko brought back "Bolero," with music by Ravel and transparency drawings and paintings by Picasso, and "Ecos De España," inspired by paintings from the Black Period of Francisco de Goya. Also presented were the world premières of the neo-classical duet "Asturias," by dancers/choreographers Juan Mata and Ana Gonzales; the flamenco drama "Amor Eterno," with first dancers Irma Suárez Ruiz and Jorge Pérez; and dancer/choreographer Celia Fontas' "Salinas De San Fernando."

The celebration included two weeks of workshops and master classes in Spanish dance and music for adults and children.

**San Antonio Receives $1.4 Million**

San Antonio College (Texas) received a four-year Title VI grant of about $1.4 million from the Department of Education. The grant is to help 400 low-income, first-generation-in-college, and disabled students succeed in college and move toward graduation. It will fund academic and career counseling, tutoring, leadership development opportunities, and financial aid assistance.

A team of counselors from the San Antonio College department of counseling, special populations, and student development co-wrote the proposal.

**Santa Barbara Scholar Honors Chicana Artist**

University of California-Santa Barbara (UCSB) Professor María Herrerra-Sobek (pictured) recently wrote and edited the book *Santa Barraza: Artist of the Borderlands* (Texas A&M University Press), honoring the Chicana artist.

The book reflects Barraza's passion for the borderlands and her love of its people. The colorful and emotional art, with symbols of the region and its culture and history, is filled with the images and emotions of her quest for self-discovery.

Herrerra-Sobek, a Luis Leal Professor of Chicano studies, is astounded by the "shabby treatment" Chicana artists receive from critics, art departments, universities, and publishing firms.
home due to two out-of-wedlock pregnancies, and her solitary struggle to support her children. The story shows how she emerged as a leader in her community, painstakingly building by hand a small maternity center for her patients while gaining the respect of the Anglo medical community.

By D. Ray Collins and Patrick B. Hodges

A complete reference listing on sports skills tests and measurement, contains nearly 100 skills tests for 28 sports from the junior high-through-college levels. A thorough bibliography completes each chapter, including all sports skills tests constructed-authenticated or unauthenticated.

Fire and Flux—An Undaunted Vision: The Art of Charles Strong
By Jo Farb Hernández and Paul J. Karlstrom

San Francisco Bay Area artist Charles Strong began as an Abstract Expressionist painter, but has explored other media, including figuration and monumental sculpture. He has played an active role in the Bay Area as a teacher and mentor and director of the Wiegand Gallery at the College of Notre Dame (Calif.). This book is a comprehensive look at his impressive career.

Childhood and the Nation in Latin American Literature: Allende, Reinaldo Arenas, Bosch, Bryce Echenique, Cortázar, Manuel Galván, Federico Gamboa, S. Ocampo, Peri Rossi, Salarrué
By Richard L. Browning

This interdisciplinary work utilizes literature as a primary resource in examining the concept of childhood and how it is exploited and explored in 19th- and 20th-century Latin America.

The Life and Times of Pancho Villa
By Friedrich Katz

Pancho Villa is one of the best-known figures in Mexican history. There are legends of Villa the Robin Hood, Villa the womanizer, and Villa as the only foreigner who has attacked the U.S. mainland since the War of 1812 and gotten away with it. These legends have resulted in Villa the leader obscuring his revolutionary movement, and the myth in turn obscuring the leader. This study separates myth from history.

Gender and Power in Prehispanic Mesoamerica
By Rosemary A. Joyce

Gender was a fluid potential, not a fixed category, before the Spaniards came to Mesoamerica. At the height of the Classic Period, Maya rulers presented themselves as embodying the entire range of gender possibilities, from male through female, by wearing blended costumes and playing male and female roles in state ceremonies. Rosemary Joyce explores how Mesoamericans created human images to represent idealized notions of what it meant to be male and female and to depict proper gender roles.

No Angel in the Classroom: Teaching through Feminist Discourse
By Berenice Malka Fisher

This book presents a theoretically complex yet down-to-earth and personal account of feminist teaching in higher education. Starting with a nuanced interpretation of consciousness-raising, Berenice Malka Fisher develops her philosophy of feminist teaching as a form of political discourse. She analyzes knotty problems faced by academics and activists.

A Beauty That Hurts: Life and Death in Guatemala
By W. George Lovell

When A Beauty That Hurts was published in 1995, Guatemala was still one of the world's most flagrant violators of human rights. Now that a measure of "peace" has come to the country, George Lovell revisits "the land that I fell in love with" to reassess and revise his classic account of the evil that was perpetrated by Guatemala's military-dominated state on its Maya peoples.

Organized Crime and Democratic Governability: Mexico and the U.S.-Mexican Borderlands
John Bailey and Roy Godson, eds.

Until recently crime at the U.S.-Mexico border zone was viewed as a local law enforcement problem, with drug trafficking being a
In the early 1890s, an armed rebellion fueled by religious fervor erupted over a wide area of northwestern Mexico. The government and its supporters had one vision of what they wanted Mexico to be; many villagers had a different view of what was right for them. The bloody confrontation that took place around the village of Tomochic is still remembered in song, literature, films, and civic celebrations.

One in Thirteen: The Silent Epidemic of Teen Suicide
By Jessica Portner

Why are more children killing themselves now than at any time in recorded American history? Journalist Jessica Portner interviewed more than a hundred teenagers, parents, educators, and experts, and reviewed volumes of research on the subject. This book is based on the celebrated series of Education Week articles that resulted from her investigation.

Many publications featured in this section are available through amazon.com.

CONFERENCES

GEAR UP 2001 National Conference
October 5-9

The second annual Gaining Early Awareness and Readiness for Undergraduate Programs conference, "Sustaining the GEAR UP Movement for Education Reform: The Role of Higher Education in Supporting K-16/Community Partnerships," will be hosted by the National Council for Community and Education Partnerships. At the Washington Hilton and Towers Hotel, Washington, D.C.

Contact: Anna Ortega Chavolla, (202) 530-1135; fax, (202) 530-0809; e-mail, anna_chavolla@edpartnerships.org; Web site, www.edpartnerships.org.

TeleLearning 2001
October 6-9

The International Telecommunications Council and The TeleLEARNING People will sponsor "TeleLearning 2001," "the premier event in distance education and educational telecommunications." At Hilton Hotel Costa Mesa, Costa Mesa, Calif.

Academic Advising Association National Conference
October 11-14

The 25th annual meeting for administrators, academic advisors, and faculty advisors has as its theme "Academic Advising: Discover the Many Voices." Concurrent sessions will address all aspects of advising. At the Ottawa Congress Center, Ottawa, Canada.

Contact: NACADA Executive Office, (785) 532-5777; e-mail, nacada@ksu.edu; Web site, www.nacada.ksu.edu.

ACE 2001 Conference
October 13-20

"The nation's most important national conference on diversity and improving minority participation in postsecondary education." Sponsored by the American Council on Education’s Division of Programs and Analysis, and the Office of Minorities in Higher Education. In Cincinnati, Ohio.

NACME Forum 21, Engineering Policy and Practice
October 25-27

The National Action Council for Minorities in Engineering holds its 21st annual conference for those committed to increasing diversity in the workforce. A dynamic group of speakers will challenge attendees to examine the impacts of their organizational policies.
and what, if anything, can or needs to be done to change them. In Baltimore, Md.

Contact: Dundee Holt, (212) 279-2626, ext. 214; e-mail, dholt@nacme.org; Web site, www.nacme.org.

College Board National Forum 2001
October 26-30

This year's College Board National Forum has as its theme "Measuring Success," looking at the measures of "success for yourself, your school, your students." At The Adam's Mark Hotel in Denver, Colo.

HACU 15th Annual Conference, in Puerto Rico
October 27-30

The Hispanic Association of Colleges and Universities presents its 15th annual conference, this year on the theme "Excellence Through Diversity: Celebrating Our Past and Reshaping Our Future." In San Juan, Puerto Rico.

WCET 13th Annual e-Learning Conference
October 31-November 3

The Western Cooperative for Educational Telecommunications holds its 13th annual conference, eRevolutions@edu: New Policies, Practices, and Services." This event draws leaders from higher education institutions, government agencies, corporations, and nonprofit organizations involved in distance learning. In Coeur d'Alene, Idaho.

FIU Conference on Spanish and Latin American Literature
November 8-10

The Department of Modern Languages at Florida International University will hold the conference "Spanish and Latin American Literature: New Trends for a New Millennium." At FIU in Miami, Fla.

Contact: Ricardo Castells, (305) 348-2150; e-mail, castells@fiu.edu.

NCTE 91st Annual Convention
November 15-20

The theme of this year's National Council of Teachers of English convention is "Recreating the Classroom." Topics of emphasis will be diversity, crossing levels, professional development/new teachers, making knowledge, and assessment and high-stakes testing. In Baltimore, Md.

Contact: NCTE, (800) 369-0283; fax, (217) 278-3761; e-mail, public_info@ncte.org; Web site, www.ncte.org.

TACHE 2001 Conference
December 2-4

The Texas Association of Chicanos in Higher Education advocates for an increase in the number of Chico/latino faculty, staff, and administrators in Texas' colleges and universities. This conference will serve as a venue for discussing the issue of underrepresentation and exploring ways of rectifying the disparity. At the Omni Hotel Downtown Austin, Texas.

Kaleidoscope Leadership Institute 2001
December 5-9

Kaleidoscope is a highly successful leadership/training institute for women of color. The institute seeks to provide interaction strategies to enable participants to feel safe, to personally share their own feelings and uncertainties, and through their interactions, to develop real connections with other cultural groups. At Hilton Hotel Costa Mesa, Costa Mesa, Calif.

Contact: Dr. Felita T. Williams, (404) 244-2399; e-mail, Kaleidoscope@gpc.peachnet.edu; Web site, www.gpc.peachnet.edu/kaleidoscope.
By Marvin E. Lozano, M.S.

Among the increasing numbers of books on culture and globalization on the market, Kiss, Bow, or Shake Hands: How to Do Business in Sixty Countries is a must for today’s business student, entrepreneur, manager, or traveler. Despite its size, it is a concise, easy-to-read, well-organized, useful book that provides specific information and guidelines for doing business with people worldwide. You can become an expert in a particular business or technology, but in doing business internationally or in a multicultural setting domestically, that expertise is typically not enough. Without information about cognitive styles, social customs, values, business traditions, and communication techniques, you will encounter difficulty sooner or later. This book can help prevent some of that misunderstanding.

Unlike other books, Kiss, Bow, or Shake Hands doesn’t limit itself to one country or region of the world. Instead, it spans the major countries of the globe in alphabetical order, providing essential information.

The book’s format is one of its strengths. It begins with a separate section describing cultural orientation. Within this section, cognitive styles and how people organize and process information is discussed. It also briefly discusses basic assumptions and key considerations in negotiating. Finally, it looks at value systems as the basis for any behavior worldwide. In the remainder of the book, each country discussed comprises a chapter, and each chapter is broken into four areas. The “Country Background” section includes basic information about the country’s location, its national history, (in brief), the language, religion, and other demographics.

The section on “Business Practices” informs the reader about what to expect when doing business in that country. Concepts of time, punctuality, making appointments, negotiating, and business entertaining are some of the topics. Each chapter’s “Protocol” section outlines information that is useful in doing business with someone from that country. Greetings, forms of address, gestures, and gift giving are some of the issues covered. The “Cultural Orientation” portion takes a scholarly approach to intercultural communications. It refers to the cognitive styles, negotiating factors, and value systems referred to in the first section of the book to examine each country’s culture in detail.

In discussing Mexico, for example, the authors noted that Mexicans process information subjectively and place it in context. They become personally involved in each situation and consider the particulars rather than simply using a rule or law to solve problems. With regard to negotiating factors, subjective feelings form the basis of truth, and this leads to the truth changing depending on what one is perceived to want. Regarding value systems, the proximity of Mexico to the United States and a history of “bad deals” make Mexicans suspicious of U.S. intent.

The Japanese, by comparison, process information subjectively and experientially. Because of strong loyalty to their groups, most Japanese look to the particular and specific rather than the universal and abstract. They tend to be more subjective than objective and to rely more on their feelings than on facts in negotiating or making decisions. Traditional value systems are only recently being eroded in the younger generation.

In contrast, the authors describe Canadians as quite analytical, preferring objective information over subjective. Canadians act on problems more from the perspective of universal rules than from the perspectives of those involved. Facts are accepted as the primary evidence in negotiating, so little credence is typically given to feelings. In discussing value systems, it was noted that the French province of Quebec has quite a different value system from the rest of Canada.

Kiss, Bow, or Shake Hands is also a supplement to traditional general or international business texts widely used in academia and “distance learning” today. It’s also an excellent general reference for consultants and seasoned entrepreneurs venturing into a global marketplace or working in a multicultural domestic setting.

Price is not an issue for any reader wanting to make this part of his or her collection. At $19.95, this paperback reference fits anyone’s budget and is worth the investment.

The book’s strength—its format—is also its weakness. Because it’s concise and covers 60 major countries, readers might find that it does not give enough information. In that case, readers would have to use other sources for more detailed information. In addition, this book (and others in this emerging area) should also emphasize to its readers that similarities, not just differences, between countries are important. This would help the reader focus on a key ingredient—forming relationships—across borders and cultures. Finally, a revision of this book is needed since issues of globalization change rapidly and this edition was published in 1994.

Marvin E. Lozano, M.S., received his master’s degree in management from the University of Arizona. He has extensive experience in international banking. Marvin is the chair of the International Business Program at Albuquerque TVI, a community college in New Mexico.

If interested in submitting a book review, please e-mail us at outlook@sol.com for Book Reviewer’s Guidelines.
SCIENCE FACULTY!
Opportunities for Outstanding Students

NATIONAL INSTITUTES OF HEALTH
Undergraduate Scholarship Program

The UGPS is sponsored by the National Institutes of Health (NIH), the Federal Government’s premier biomedical research and research training agency. NIH offers scholarships to qualified students who are committed to a career in biomedical research. Scholarships of up to $20,000 per year support tuition, educational, and qualified living expenses (room, board, transportation) while students pursue an undergraduate degree. For each award year, scholars work 10 weeks with salary benefits in our research laboratories in Bethesda, Maryland. They are assigned mentors, participate in developmental and science enrichment seminars, and are provided with housing and transportation. After graduation, they work 1 year of full-time employment at NIH for each year of scholarship award.

THIS IS A SPECIAL OPPORTUNITY FOR SPECIAL STUDENTS!
Advise students to apply if they:
- Are committed to a career in biomedical research;
- Are from a disadvantaged background;
- Have a GPA of at least 3.5 or are in the top 5% of their class;
- Are a U.S. citizen, national, or permanent resident;
- Are enrolled or accepted for enrollment as a full-time student at a qualified accredited institution.

For more information, contact the UGPS at:
http://ugsp.info.nih.gov • E-mail: ugsp@nih.gov
Phone: 1-800-528-7689 • TTY: 1-888-352-3001

President

The Board of Trustees of St. Clair County Community College invites applications and nominations for the position of President of the College. This position is the Chief Executive Officer of the College and reports to a seven-member Board of Trustees. St. Clair County Community College is a public, comprehensive two-year college serving 133,000 residents within its district, along with out-of-district residents in the Thumb area of Michigan. The main campus is located in Port Huron, MI, with off-campus sites in Yale and Algonac (in-district), and Huron, Lapeer and Sanilac counties. Port Huron is the home of the Port Huron-Sc-Mackinac Boat Race and is located at the confluence of the Black and St. Clair Rivers, the main waterway between Lakes Huron and St. Clair.

Offering day, evening and weekend classes, the College services more than 12,000 students annually, either through its class offerings or through specialized training with business and industry.

With an annual operating budget in excess of $22 million, the College has over 200 full-time employees with another 296 part-time.

Selected Qualifications:
- Earned doctorate from an accredited institution preferred.
- Personal understanding and commitment to the comprehensive community college philosophy.

Candidates Should Possess:
- Commitment and dedication to student-centered learning in an environment of academic excellence.
- Evidence of successful teaching and other significant experiences that demonstrate knowledge and support of the teaching/learning process in a community college.
- A style that is characterized by integrity, honesty, accessibility, and willingness to actively participate in community affairs, individually and as a representative of the College.
- Experience in and commitment to shared governance including mutual gains bargaining.
- An understanding of the value of diversity in the community, faculty, staff and students.
- Demonstrated visionary leadership including the ability to manage change in structure, technology and global issues.
- Demonstrated leadership in enrollment strategies and retention.
- Ability to maintain positive relationships with community leaders, business, labor, industry, local and state officials, other institutions of higher education and local school districts.
- Documented senior-level leadership/management skills.
- Ability to work effectively with an elected board of trustees.

Compensation:
Salary, benefits, length of contract, and other conditions of employment are negotiable and competitive.

Application Process:
The successful candidate will describe in writing how she/he meets each of the above profile items. Applicants should also submit a current resume and the names and telephone numbers of six current references.

Dr. David H. Ponitz serves as consultant to the St. Clair County Community College Board of Trustees. He may be contacted at:

Dr. David H. Ponitz, President Emeritus
Sinclair Community College
444 West Third Street, Suite 12-380
Dayton, OH 45402-1460
(937) 512-2865 FAX (937) 512-5130
Email: david ponitz@sinclair.edu

Address nominations and complete applications to:

Julie Harrington
Contact Coordinator
St. Clair County Community College
323 Erie Street
P.O. Box 5015
Port Huron, MI 48061-5015
(810) 989-5503 (800) 533-2477 FAX (810) 989-5542
Email: jharrington@stclair.cc.mi.us

Review of applications will commence on October 15, 2001, and will continue until a successful candidate is selected.

For additional information on St. Clair County Community College, see its website at www.scc.cc.

St. Clair County Community College is an equal opportunity employer seeking and supporting a diverse workforce.
Applications are now being accepted for six (6) 10-month tenure track faculty positions at the University of Maryland School of Social Work. This School is located in downtown Baltimore on a Health and Human Services Professions campus with a threefold mission: education, research and community service. The largest MSW-granting institution in Maryland, we are a nationally ranked School, rich in accomplishments and opportunity, with a research focused Ph.D.

Candidates for these six openings should have an M.S.W. and a Ph.D., or DSW, (or ABD), in social work or a closely related field, and have a minimum of two years post-MSW practice experience, scholarly promise or achievement, eligibility for an advanced Maryland social work license, and an ability to teach courses in the foundation, and advanced curriculum.

**FACULTY OPENINGS**

- **Clinical Practice (3 Positions)** - Applicants must have experience and ability to teach social work practice methods in the Foundation and Clinical Practice in Advanced curriculum with individuals, families and groups.

- **Racism and Diversity (2 Positions)** - Applicants must have an experience in and ability to teach about diverse populations, theories of oppression, and provide strong intellectual leadership to the curriculum for its relevance to practice with individuals, families and communities.

- **Human Behavior and Social Environment (1 Position)** - Applicants need a vision and ability to teach human behavior and social environment from both micro and macro perspectives.

These positions are designed for junior faculty. Salary is competitive and commensurate with qualifications and experience. Search will begin immediately and continue until positions are filled. To apply, submit letter indicating position of interest, curriculum vitae, and names with address and telephone numbers of three references to:

**Dr. Thomas Vassil**
Chair, Search Committee
University of Maryland, Baltimore
Louis Kaplan Hall
525 West Redwood Street
Baltimore, MD 21201-1777

Women and minorities are encouraged to apply. The University of Maryland, Baltimore is an AA/EEO/ADA employer.
Wichita State University invites nominations and applications for the position of Dean of the Graduate School. The Dean is the chief academic and administrative officer for the Graduate School and reports to the Vice President for Academic Affairs and Research. The Dean provides leadership for and oversees the management, quality, and effectiveness of all graduate programs; administers all academic, financial, and personnel matters for the Graduate School; and promotes and supports excellence in teaching, research, and creative activities.

Candidates for the position must have an earned doctorate or appropriate terminal degree, eligibility for rank of professor, tenure, and full graduate faculty status in an academic unit of WSU; successful experience in graduate-level teaching and conducting research or creative activities in an academic institution; demonstrated evidence of excellent leadership abilities; successful administrative and budgetary experience, excellent interpersonal and communication skills; successful experience with diverse populations; and a demonstrated commitment to diversity.

Wichita State University is located in a metropolitan area with a population of more than 400,000. It currently enrolls 14,500 students, of which about one in five is a graduate student, and employs more than 500 full-time faculty. WSU is a Carnegie Doctoral/Research - Intensive institution that offers nine Ph.D. programs and 45 master's and specialist programs. In calendar year 2000, more than 800 graduate degrees were awarded. The many businesses and industries located in Wichita provide opportunities to graduate students for experience in practical problem-solving and research.

Applicants must submit a letter indicating how the qualifications listed above are met, CV, and the names, mail and e-mail addresses, and telephone numbers of at least five people who can provide professional references. Nominations are welcome. The starting date for the position is July 1, 2002. For full consideration, application materials must be received no later than November 15, 2001. Send to:

Dr. Gerald Loper
Associate Vice President for Research
Wichita State University
1845 Fairmount
Wichita, KS 67260-0007

Inquiries may be directed to Dr. Loper by e-mail at gerald.loper@wichita.edu or by phone at 316-978-3285. Wichita State University is an affirmative Action/Equal Opportunity Employer.

Woodrow Wilson School of Public and International Affairs

Master’s Degree in Public Policy: A One-Year Program for Midcareer Professionals

For further information, call us at (609) 258-4836 or e-mail us at mpp9@princeton.edu or visit our website at www.wwp.princeton.edu/degree/mpp.html

Woodrow Wilson School
Master’s Degree in Public Policy
Princeton University
Princeton, NJ 08544-1013

Applications must be received by January 2, 2002.

The Woodrow Wilson School also offers a two-year Master’s degree in Public Affairs (M.P.A.) and a Ph.D. degree program.

Our M.P.P. program provides rising leaders in the international and domestic policy arenas an opportunity to expand their organizational skills and intellectual breadth to compete in an increasingly complex global environment.

The Princeton Difference. The resources of the Woodrow Wilson School and Princeton University provide the ideal setting for this rigorous one-year residential program. The School’s faculty, curriculum, and research facilities are recognized throughout the world for excellence.

Financial Assistance. Our generous policy meets the full demonstrated needs of all admitted students. More than three-quarters of graduate students at the School receive financial aid, which for most includes full tuition and a stipend for living expenses. Thanks to a grant from the Christian A. Johnson Endeavor Foundation, special funding is available to candidates from the nonprofit and nongovernmental sectors.

Qualifications. Applicants must possess a minimum of 7 years of professional experience in domestic or international government agencies, and/or experience in the nonprofit sector. Successful candidates demonstrate creativity, leadership, a commitment to public service, and the intellectual capacity to thrive in a demanding academic setting.
THE AMERICAN UNIVERSITY IN CAIRO

FACULTY POSITIONS

Applications are invited for the following openings at The American University in Cairo (AUC). Founded in 1919, AUC’s campus is located in Cairo, Egypt, and its degrees programs are accredited by the Commission on Higher Education of the Middle States Association of Colleges and Schools. For more information see our website at www.aucegypt.edu. The Ph.D. is required for every position except where otherwise specified. University teaching experience is strongly preferred. One- two- or three-year appointments subject to mutual agreement to begin September 2002. Renewal of an appointment depends upon institutional needs and/or the appointee’s performance. The normal teaching load is three courses per semester and English is the language of instruction. Salary and rank are according to scale based on qualifications and professional experience. For expatriates, housing, annual round-trip air travel for appointee and accompanying family, plus schooling for up to two children are included. In view of AUC’s protocol agreement with the Egyptian Government, which requires specific proportions of Egyptian, U.S., and third-country citizen faculty at this time preference will be given to qualified applicants who are U.S. citizens.

SCHOOL OF BUSINESS, ECONOMICS AND COMMUNICATION

Economics. Three openings. Recent Ph.D. with teaching experience or senior faculty anticipating sabbatical or leave preferred. Candidates for the three positions should be willing to teach introductory courses in macro and microeconomics, and to supervise M.A. theses in applied economics. Intermediate and advanced microeconomics (including the economics of information and the application of game theory), labor economics and history of economic thought. Position # ECON-1.

Intermediate and advanced macroeconomics (including dynamic macro theory), money and banking, and international economics (including exchange-rate policy). Position # ECON-2.

Econometrics and time series, mathematical economics, and the econometrics of finance. Should be well-versed in the use of software packages like Eviews and RATS, and should be prepared to conduct workshops in applied economics for graduate students. Position # ECON-3.

Journalism and Mass Communication. Two Openings. The successful candidates will have a strong professional background and/or substantial experience in university teaching. Ph.D. preferred. To teach undergraduate and graduate courses in two or more of the following areas: new media technologies, media history, writing and reporting; editing and production; graphic design; digital photography; mass media and international communication; advertising and public relations as integrated marketing communications. Position # JMC-1/2.

Management. Two openings.

Marketing. Successful candidate will be expected to teach both graduate and undergraduate courses in marketing and international business. Position # MGMT-1.

Management. Successful candidate will be expected to teach both graduate and undergraduate courses in one or more of the following areas: management, human resources, strategy and international business. Position # MGMT-2.

SCHOOL OF HUMANITIES AND SOCIAL SCIENCES

Arabic Studies. Three positions.

Arabic Studies/Middle East History. Candidate will teach undergraduate and graduate level courses on the history of Arab-Islamic civilization and the history of Islamic thought and institutions, 7th-18th centuries. Courses include introductory surveys, political, social and economic history of the Middle East, history of non-Muslim communities, Ibn Khaldun, Arabic historical literature, Islamic thought and institutions. Participation in teaching the university's Core Curriculum interdisciplinary great works seminar will also be required. Excellent command of classical and medieval Arabic is necessary, as well as extensive knowledge of the use of Arabic primary sources. Position # DAS-1.

Modern Arabic Literature. Candidate will teach undergraduate and graduate courses in modern Arabic literature, such as survey courses, selected themes and topics, the genres of modern Arabic literature, colloquial Arabic literature, modern Arabic literary criticism. Courses taught in English and in Arabic. Participation in teaching the university's Core Curriculum interdisciplinary great works seminar will also be required. Applicant may be native speaker of English or Arabic but should have bilingual fluency in the second language. Position # DAS-2.

Islamic Studies. Candidate will teach undergraduate and graduate courses in Islamic Studies including general introduction to Islam, Qur’anic studies, figh, hadith, Islamic thought and institutions, and classical Arabic literature. Some courses taught in Arabic and others in English. Applicant may be native speaker of English or Arabic, or should have bilingual fluency in the second language. Position # DAS-3.

English and Comparative Literature. American Literature. Successful candidate will teach American literature in a liberal arts setting. Position # ECL-1.

Philosophy. Recent Ph.D. or senior faculty on leave preferred. Successful candidate will teach two sections of Philosophical Thinking in the University's Core Curriculum, plus one other course each semester. OSS: open. AOC: open. Preference will be given to someone with in-depth knowledge of the history of philosophy and specialization in Anglo-American traditions of philosophy (pragmatism, philosophy of language, analytical philosophy). Candidates should have proven teaching ability. Position # PHL-1.

Writing Program. One or more openings for experienced writing and rhetoric teachers to teach writing, rhetoric and research in the Writing Program. Experience in writing using computers and/or Business/Tech Writing would be a plus. M.A. in related fields in literature or the humanities is required. Position # WP-1/2.

History. One-year replacement position in Twentieth Century European and/or American History. Position # HIST-1.

Performing and Visual Arts. Arts/Art History. Responsibilities include teaching four courses per year plus serving as Gallery Director. Course subjects include two-dimensional design, painting, drawing and art history. Terminal degree and college level teaching experience required. Position # PVA-1.

Sociology. Successful candidate will teach Introduction to Sociology. Social Society, Criminology, Sociology of Law, Environment and Society, Comparative Health and Healing, Quantitative Methods with Computer Applications. Significant Post-Ph.D. teaching experience is desirable. Background in Refugee Studies a plus. Position # SOC-1.

English Language Institute. English as a Foreign Language. Possible openings for experienced English Language Teachers to teach English as a foreign language in the English Language Institute. A Master’s degree in TESOL/ESL required. Several years of teaching experience, including at least two years of international experience, are normally required, along with EAP experience and a commitment to instructional improvement. Experience in curriculum and materials development, CALL/Instructional technology, and/or testing is highly desirable. Appointment will be made at instructor level. Position # ELI-1.

Second Language Acquisition. Successful candidate will teach SLA in the M.A. in TEFIL program. Strong preference will be given to candidates with additional expertise in structure of English/ pedagogical grammar. Additional teaching experience is desirable in curriculum and materials development, ESL program administration, ESP, teaching reading, or teaching writing. Experience in CALL/Instructional technology would be a strong asset. Familiarity with Arabic and the Middle East useful, though the language of instruction is English. The position primarily involves teaching in the M.A. program and supervising M.A. theses. Position # ELI-2.

SCHOOL OF SCIENCES AND ENGINEERING

Biology. Teach and conduct research in marine biology. Special attention will be given to candidates with experience in the Red Sea. Should have the ability to teach general biology and two of the following areas: invertebrate zoology, animal behavior, systematics and quantitative biology. Ability to teach Scientific Thinking is an asset. Position # BIOI-1.

Electronics Engineering. Newly established Department of Electronics Engineering has an opening for a faculty member to teach undergraduate courses in the areas of VLSI circuit design and digital electronics. Experience in integrated circuits or telecommunication systems with an emphasis on wireless communication systems. Recent Ph.D. with teaching experience and international exposure preferred. Participation in research is expected. Position # EE-1.

Mathematics. Teach all levels of undergraduate mathematics students, as well as to participate in research. Position # MATH-1.

Mechanical Engineering. Several openings to teach undergraduate and graduate level courses and conduct research in the following areas: (1) Industrial engineering; (2) Design of Mechanical Systems and Components. Position # ME-1/3.

Computer Science. One possible opening to teach undergraduate and graduate courses and conduct research in the area of Performance Evaluation or Computer Architecture. Position # CS-1.

Physics. One or more openings to teach and conduct research in a strong physics program in a liberal arts and science context. Successful candidates should be able to teach at all levels of undergraduate and graduate physics and should be able to conduct graduate research involving students at the M.Sc. level. Particular attention will be given to candidates with a proven ability to participate actively in upgrading laboratories in the area of sensors and instrumentation. Position # PHYS-1/2.

LIBRARIES AND LEARNING TECHNOLOGIES

Director, Center for Learning and Teaching. The American University in Cairo offers a unique opportunity for a visionary individual to develop, launch and direct a new Center for Learning and Teaching. As a unit of Libraries and Learning Technologies, the new center will help develop and disseminate instructional designs and curricula in targeted areas and programs aimed at reaching all faculty, as well as creating opportunities for exploration of new uses of technology. The successful candidate will be an important part of the leadership team for university-wide planning for the application of appropriate uses of instructional and information technologies.

Duba and Responsibility include formulating the Center’s vision and mission within the context of the AUC’s future goals; developing policies and procedures for programs of the new Center; providing leadership in the application of educational technology; assisting in preparing grant proposals and research projects concerning learning and teaching; developing staffing plan and budget; providing instructional design consultation to faculty; consulting with academic departments on unit teaching enhancement programs; developing assessment systems to monitor teaching effectiveness; manage and coordinate multiple projects and project teams; personally leading activities as needed; and staying abreast of current developments in teaching practices, educational technology and learning theory.

Qualifications: Experience as Director or Associate Director with administrative experience in a campus-wide instructional enhancement or development service. Ph.D in academic disciplines required. A minimum of ten years of teaching experience in higher education. Record of outstanding teaching, research and scholarship. Knowledge of implementation strategies for current best teaching practices and learning systems. Demonstrated ability to succeed within a collaborative management environment. Excellent interpersonal and communication skills. Fluent English and Arabic. Knowledge of Arabic a plus. Experience developing and administering budgets. Portfolio of completed projects is desirable.

APPLICATION INSTRUCTIONS FOR ALL POSITIONS: E-mail a letter of application specifying Position # with C.V. and names and addresses of three references to facultyaffairs@aucegypt.edu or mail to: Dr. Earl (Tim) Sullivan, Provost, The American University in Cairo, 420 Fifth Avenue, Fl 3-HQ, New York, N.Y. 10018-2728. Applications accepted until position is filled.

AA / EEO Employer
DEAN of UNIVERSITY LIBRARIES
The University of Toledo

The University of Toledo, a metropolitan research institution, seeks an experienced librarian and administrator to provide dynamic leadership as Dean of University Libraries. Initial screening of applications will begin October 1, 2001, and continue until the position is filled.

RESPONSIBILITIES: Reporting to the Provost and Vice-President for Undergraduate and Graduate Education, the dean is the chief administrative officer for University Libraries and is responsible for the successful planning, organization, policy development, implementation, and direction of all aspects of library services. The library dean is a member of the Provost’s Cabinet.

SPECIFIC RESPONSIBILITIES: Strategic planning; program evaluation and development; recruiting, mentoring, and evaluation of faculty and staff; designing and communicating the University Libraries’ educational and service mission to the university community; budget management; building consensus and fostering cooperative relationships; private and public fundraising. Provide energetic leadership in integrating new and emerging technologies with traditional library resources and services. Seek ways to promote the library as a center for student learning. Lead the executive board of the Friends of the Library, an organization that exists to provide resources for enhancing the Libraries’ collections and to encourage gifts, endowments and bequests.

REQUIRED QUALIFICATIONS: MLS from an ALA-accredited program. Credentials to qualify for tenue as a full professor in the University Library. Significant experience in the administration of an academic library. Demonstrated ability to create, articulate, and sustain a vision for the future of library services in an urban research university; ability to work effectively and collaboratively with faculty, staff, students, and administrators; ability to build consensus and foster cooperation; record of commitment to and support for cultural diversity; record of successful leadership; demonstrated knowledge of personnel and budgetary issues; excellent problem-solving, organizational, interpersonal, and time management skills; evidence of commitment to promoting professional growth and development of faculty and staff; ability to serve as an advocate for the libraries internally and externally; ability to represent the university in matters related to libraries on a state-wide and/or national level. The successful candidate should have a clear vision of issues affecting academic libraries and especially appreciate and understand both traditional and evolving technologies in research, teaching, and service.

PREFERRED QUALIFICATIONS: Earned doctorate. Experience in a collective bargaining environment, an understanding of and development of projects or activities responsive to the changing needs of the disciplines in the university. Experience with different types of library and archival items and the specific requirements that each media needs for care, conservation, storage, and access.

THE UNIVERSITY OF TOLEDO ENVIRONMENT: The University of Toledo is one of thirteen state-assisted universities in Ohio. More than 19,000 students are enrolled in associate, baccalaureate, master’s, and doctoral degree programs granted in eight colleges: Arts and Sciences, Business Administration, Education, Engineering, Health & Human Services, Law, Pharmacy, and University College. Under the Carnegie system, the University is classified as a "Doctoral/Research University – Extensive." The University’s homepage (http://www.utoledo.edu) provides campus information and links to community resources.

The University of Toledo Libraries consist of the William S. Carlson Library on the main Bancroft Campus and the Learning Resource Center at the Scott Park Campus, home of University College. University Libraries are cooperatively linked with the Lavelle Law Library in the College of Law. The dean is responsible for all libraries, and the staff of 16 library faculty, 29 staff members, and 80 student workers. Librarians hold tenure-track faculty status in the university. The University of Toledo Libraries are a charter member of OhioLINK, a consortium of Ohio's college and university libraries and the State Library of Ohio. Bibliographic access is available on-line through UTMOST, using the In- vative Interfaces, Inc. (III) system. University Libraries house a collection of 1.7 million volumes of books, and have 4100 print periodical subscriptions, plus access to 4600 electronic journals, in addition to extensive collections of media resources. Information about the University Libraries may be found on the Libraries' home page at www.cl.utoledo.edu.

APPOINTMENT: This is a tenured position. The competitive compensation package includes medical/dental and vision insurance, a pension plan, and a tuition plan that includes dependents, sick leave, and 24 days vacation. Applicants should submit a current curriculum vita, an extended statement addressing the required and preferred qualifications, and the names, mail and email addresses, telephone and fax numbers of at least 5 references who can speak to professional qualifications. Email submission of these materials is welcome. Send applications to: Karen Bell, Office of the Provost, The University of Toledo, 2801 W. Bancroft St., Toledo, Ohio 43606-3390, fax 419/530-4496, email kbell@utoledo.edu. Please use only one method of application. Informal preliminary inquiries are invited by contacting Dr. Marcia Suter, Chair of the Search Committee, at 419/530-2424 or email msuter@utoledo.edu. As Ohio is an open records state, confidentiality cannot be guaranteed. The University of Toledo is an Equal Access, Equal Opportunity, Affirmative Action Employer and Educator. Members of protected classes are encouraged to apply.
The University of
Arizona
Tucson Arizona

Arizona International College is an interdisciplinary liberal arts undergraduate college of The University of Arizona and a student-centered teaching institution. All programs are based on a distinctive, holistic, and practical interdisciplinary liberal arts core curriculum and involve internship programs and other activities that emphasize an integrated approach to knowledge and learning. There is a strong global/international perspective across the curriculum.

All candidates must have a Ph.D. or equivalent in the teaching area or closely related field. The College invites applicants for the following three continuing positions:

**Professor, Mathematics:** Required qualifications include a demonstrated record of teaching applied mathematics, including statistics, to undergraduate students. Expertise in cultural studies or ethno-mathematics is preferred.

**Professor, Writing:** Required qualifications include experience teaching first-year writing at the undergraduate level, and experience using computers for the teaching of writing.

**Professor, Chinese Language and Culture:** Required qualifications include demonstrated expertise in teaching Chinese language. Expertise in sustainable development or another academic area is preferred.

For full position details and qualifications, see postings at http://www.hr.arizona.edu
For more information about the College, please visit http://www.azintl.edu

AIC employs faculty in a contractual system rather than a tenure system. Salary range is $39,000-$55,000 annually, plus outstanding UA benefits. Successful candidates are expected to start August 2002. Application materials must be received by midnight, October 31, 2001.

To apply, please submit (for each position) a letter of application, specifying the teaching areas you are qualified to teach and detailing your qualifications for each teaching area; a curriculum vitae, one letter of recommendation specifically addressing how you fit the job qualifications; and names and contact information of three additional people who can be contacted at a later date. The letter of application must carefully explain your qualifications, educational philosophy and how your background and experience fit the mission of Arizona International College. Send materials to:

Interdisciplinary Faculty Advisory Team
C/O Ted Pope, Director of Academic Programs
Arizona International College of The University of Arizona
1609 East Helen Street
P.O. Box 214010
Tucson, AZ 85721

Arizona International College is committed to a diverse workforce. The University of Arizona is an AEO/AA Employer-M/F/D/V.

Kenyon College
TENURE-TRACK
ECOLOGIST

The Department of Biology at Kenyon College is seeking applications for a tenure-track assistant professor in ecology. We seek candidates who are broadly trained and are able to bridge fields within the department. The successful candidate will teach at both the introductory and upper levels; participate in an interdisciplinary program in Environmental Studies; and maintain a vital, independent research program that incorporates undergraduates. In support of research, we offer a competitive start-up package. Applicants should hold a Ph.D. and demonstrate teaching excellence, the potential to maintain research involvement by undergraduates, and show promise of establishing a productive research program.

Review of applications will begin October 22 and continue until the position is filled. Statements of teaching and research interest, CV, undergraduate and graduate transcripts and three letters of reference should be sent directly to:

Ecology Search Committee
Biology Department
Kenyon College, Gambier, Ohio 43022

An equal opportunity employer, Kenyon College is committed to building a diverse faculty and community and encourages the applications of women and minority candidates.

Calinority Community Colleges
VICE CHANCELLOR
FOR HUMAN RESOURCES

The Chancellor's Office of the California Community Colleges seek an individual who has had experience in human resource policy and management with strong organizational skills, a working understanding of faculty, staff and student diversity, an appreciation of the mission of the community colleges, and a superior reputation among college or state officials in directing human resource development.

Qualifications: baccalaureate from a regionally accredited institution is the minimum educational requirement; however, a graduate or terminal degree is preferred; along with five years of experience in one or a combination of human resource management and development, agency or college experience in affirmative action, diversity or equity programs, or administration of human resources in an educational institution, preferably a community college.

The Chancellor's Office is an Equal Opportunity, Affirmative Action and ADA Employer.

DIRECTOR
HUMAN RESOURCES

College of DuPage invites qualified candidates with a broad knowledge base to manage our Human Resources Department in the nation's largest, single campus community college.

In its 34th year, College of DuPage has become a premier institution among community colleges by offering a challenging educational environment that puts students first. The College has distinguished itself as a recognized employer throughout Northern Illinois—one that is highly emulated! Strongly committed to its core of vibrant staff who are fully engaged in disciplinary activities that develop student learning, the College fosters staff development initiatives that promote a distinctive learning community.

Situated on a 273-acre campus in Glen Ellyn, Illinois, and located 35 miles west of Chicago in a fast-growing, high-tech area with an increasingly diverse population, College of DuPage enrolls more than 34,000 students in 95 areas of study, including 50 pre-baccalaureate and 45 occupational and technical programs, and employs nearly 3,000 individuals to help us achieve our goals.

The College District 502 encompasses a dynamic metropolitan area with a strong economic base. The DuPage area offers an array of enriching cultural, recreational and educational opportunities.

Currently, the College has a full-time, administrative position reporting to the Vice President for Administrative Affairs to manage the operations of a complex human resources program. Responsibilities include planning, organizing, controlling and providing leadership for all human resources functions including recruitment, developing and administering policy in the areas of wage and salary policies, fringe benefits, recruitment and placement and employee evaluation. Additionally, this position includes responsibility for labor relations, negotiation of collective bargaining agreements and grievance processing. The Director of Human Resources also serves as Affirmative Action Officer and ADA Employment Officer.

Minorities are encouraged to apply. Equal Opportunity Employer.
Vice Chancellor—Student Affairs
University of California, Davis

The University of California, Davis, invites applications and nominations for the position of Vice Chancellor—Student Affairs. The person holding this position is responsible for initiating, developing, and maintaining programs and services that support students in their academic pursuits, provide stewardship of the campus climate, and promote leadership, teamwork, and social responsibility. The Vice Chancellor has direct responsibility for enrollment services (admissions, outreach, financial aid, registrar); academic support services (orientation, pre-professional advising, learning skills, support for disabled students); student housing; student health; counseling center; intercollegiate athletics as well as intramural and club sports programs; student life and campus community (student programs and activities, cross-cultural center, women's center, services for international students and scholars, student judicial affairs); campus unions, campus recreation, and campus bookstores.

The Vice Chancellor reports directly to the Chancellor and participates in the development of campuswide policy through membership on the Council of Deans and Vice Chancellors. The Vice Chancellor works collaboratively with the Vice Provost—Undergraduate Studies, the deans, and associate deans to ensure coordination and integration of both academic programs and priorities and traditional student affairs services.

The University seeks candidates with a record of demonstrated accomplishment in academic leadership and management in student-related positions in a large research university or its equivalent, a demonstrated ability to work well with faculty, administrators, and student affairs staff, excellent communications and human relations skills, demonstrated commitment to affirmative action, diversity and community, and a high level of creative energy and capacity for hard work in an intense and challenging environment. A minimum of five years of academic administrative experience and a terminal degree are required. Faculty experience is preferred. Candidates who have appropriate academic credentials may qualify for a tenure faculty position.

The University of California, Davis is an expanding, highly diverse research university with 10,525 faculty and more than 21,500 undergraduate students and 5,800 graduate and professional students in nine colleges, divisions, and schools. Davis is an environmentally sensitive city of 60,000 persons.

Review of applications will begin in October 2001 and will continue until the position is filled. Applications, nominations, and requests for additional information should be submitted to:

Larry N. Vanderhoef, Chancellor
Office of the Chancellor
University of California, Davis
One Shields Avenue
Davis, CA 95616

The University of California, Davis, is an equal opportunity/affirmative action employer committed to excellence through diversity.

POSITION VACANCY ANNOUNCEMENT

Professor and Head
Department of Human and Community Development
College of Agricultural, Consumer and Environmental Sciences
University of Illinois at Urbana-Champaign

The Head will provide leadership for long-term policies, organizational structure, teaching programs, and research and outreach initiatives, and be responsible for administration of all departmental academic activities.

The mission of the Department of Human and Community Development (www.hcd.illinois.edu) is to improve the lives of children, youth, and adults in the context of families, communities, and societies. Faculty are engaged in basic and applied research in child and adult development, family relations, community and rural development, agricultural and environmental communications and education, and extension/outreach.

The 22 faculty in the department have diverse disciplinary backgrounds including human development, family studies, psychology, sociology, education, communications and anthropology.

A Ph.D. in at least one area of emphasis of the Department or a closely related field is required. The candidate must be tenurable as Professor, or with a commitment to interdisciplinary programs and initiatives. The candidate should have a strong background in research and in teaching or outreach education, as well as a demonstrated record of administrative and resource development accomplishments. The candidate should have excellent communication skills and the ability to work effectively with faculty, students, staff, administration, and external constituencies. Experience in a land-grant institution is desirable.

Proposed starting date is July, 2002. Salary is competitive with experience and qualifications. To ensure full consideration, applications should be received by November 1, 2001. Applications should include a letter of application indicating the basis for their interest in the position, a full curriculum vitae and the names, addresses and phone numbers of 5 persons familiar with the candidate's qualifications and experience to:

Dr. Sharon Donovan, Search Committee Chair, College of ACES, University of Illinois, 122 N. University, Urbana, IL 61801-3605; Telephone 217-244-2286; FAX 217-244-2911; e-mail: adonovan@uiuc.edu

The University of Illinois is an Affirmative Action/EQUAL OPPORTUNITY EMPLOYER.

COUNCIL FOR ADVANCEMENT AND SUPPORT OF EDUCATION

Director of Public Relations

Council for Advancement and Support of Education (CASE) is seeking a Director of Public Relations. CASE is the premier international association for alumni relations, communications, and development professionals at educational institutions.

Responsibilities:
- Provides strategic leadership and manages CASE's public relations, media relations, online communications, and government affairs programs.
- Positions CASE as a leader in its field.
- Serves as a principal contact for external organizations and associations.
- Serves as the national representative on behalf of CASE on a wide range of issues.

Qualifications:
- Bachelor's degree plus seven or more years experience in the communications field, including direct experience with the media, public relations, and online communications.
- Previous supervisory experience required. Excellent communications skills, both written and oral; ability to work well as a team member and effective management skills. Familiarity with education and ability to use Internet tools.
- Detailed knowledge of CASE and its programs.

Application Procedure:

CASE is an AFFIRMATIVE ACTION/EQUAL OPPORTUNITY EMPLOYER.
CALIFORNIA STATE UNIVERSITY, STANISLAUS
PROVOST AND VICE PRESIDENT
FOR ACADEMIC AFFAIRS

CALIFORNIA STATE UNIVERSITY, STANISLAUS is seeking a creative, experienced and visionary leader to serve as Provost and Vice President for Academic Affairs. As the chief academic officer of the Provost reports to the President and serves as a member of the President's Executive Cabinet and as senior officer in the President’s absence. The Provost provides the academic and administrative leadership required to achieve the highest standards of excellence in teaching, research, scholarship, creative activity and service. The Provost is involved with all aspects of the University in the coordination and implementation of academic goals, educational policy, curricular planning and development, academic program review, faculty personnel actions (including faculty selection, retention, promotion, and tenure), faculty development, resource development and allocation (including grant development and fund raising), library services, information and instructional technology, extended education, institutional research and assessment, enrollment management, and strategic and master academic planning.

Personnel actions pertaining to academic deans, assistant and associate vice presidents, academic support staff, and all managers within Academic Affairs are the purview of the Provost. The Provost works with faculty representatives within the context of a statewide collective bargaining agreement. The Provost represents the University administration in the affairs of the Academic Senate and is responsible for promoting a collegial atmosphere and encouraging shared governance in developing academic policy. The Provost performs cross-functional and university-wide duties to accomplish the strategic goals and mission of the University. Examples of cross-functional duties include active promotion of student retention and assessment of institutional effectiveness.

THE UNIVERSITY: Founded in 1960, CSU Stanislaus is one of the twenty-three public universities in the California State University system. Located in Turlock, California in a beautiful park-like setting with state-of-the-art residential facilities, the University is widely recognized for its quality academic programs in the three degree-granting colleges: Education; Arts, Letters and Sciences; and Business Administration. The University offers four undergraduate degree programs and fourteen graduate degree programs. Upper division and graduate courses are offered at the CSU Stanislaus site in Stockton. Programs also are available through a unique intersegmental partnership, the Merced Tri College Center. These programs and courses, on and off-campus, enable the University to be responsive to the needs of the region. CSU Stanislaus is fully accredited by the Western Association of Schools and Colleges (WASC) and has earned accreditation and licensure in several academic disciplines.

The University is a learning-centered and student-friendly community that attracts, retains, and graduates a student population that is currently growing at a rate of 8%. The 7,200 enrolled students constitute a highly diverse student profile.

QUALIFICATIONS: Candidates must possess an earned doctorate from an accredited institution, preferably in a field represented at CSU Stanislaus. This position requires a proven record of distinguished teaching, research, scholarship, creative activity and service commensurate with a faculty appointment at the rank of a tenured professor and at least five years of administrative experience in higher education, including progressively more responsible positions at or above the level of Dean. The candidate is expected to demonstrate extensive experience in fiscal matters, academic planning, personnel and budget management, and program development and evaluation; show evidence of strong leadership and problem-solving skills; have knowledge of issues and concerns affecting higher education; possess effective communication skills and the ability to balance the needs of multiple disciplines; articulate commitment to shared governance and collegial decision-making; and demonstrate achievement and commitment to equal opportunity and success in working within multicultural contexts. The candidate must also demonstrate a style of leadership that cultivates strategic planning and teambuilding skills while realizing the University’s learning-centered mission; have the vision and energy to lead the University in its commitment to academic excellence and student achievement; and possess the ability to communicate high academic and leadership values within the University and the external community. Experience with and commitment to international education are highly desirable. Administrative experience in a multi-campus, state university system will receive favorable consideration.

APPLICATION PROCEDURES: Applications must include a cover letter, curriculum vitae, five professional references, and a 2-page personal statement on the applicant’s approach to academic administration in today’s educational environment. For full consideration, applications should be received by October 29, 2001. Compensation will be commensurate with background and experience and includes a very attractive benefits package. Forward applications or nominations to:

Chair, Provost/VPAA Search Committee
c/o Office of the President
California State University, Stanislaus
801 W. Monte Vista Ave.
Turlock, CA 95382
(209) 667-3201; Fax (209) 667-3206; www.csustan.edu

CSU Stanislaus is an Equal Opportunity/Affirmative Action/Title IX/Section 503/504 employer.
Qualified women, minorities, and persons with disabilities are encouraged to apply.

ASSOCIATE DIRECTOR
EDUCATIONAL OPPORTUNITY PROGRAM

Rider University is seeking a thoroughly self-motivated individual to serve as an advocate to EOP students, coordinate and execute the EOP pre-freshman summer program and Program Advisory Board, and provide related support to the Director. THE COLLEGE OF NEW JERSEY

Dean Searches - Fall 2001

Founded in 1855 as the New Jersey State Normal School, The College of New Jersey (website: www.tcnj.edu) is one of the country's leading public liberal arts colleges. It has achieved national distinction for its academic and co-curricular programs, and its highly selective admissions standards. Primarily residential and undergraduate with targeted graduate programs, TCNJ has 5,900 FTE students and 365 full-time faculty. The beautiful 289-acre campus is located between Trenton and Princeton and is convenient to Philadelphia and New York, as well as the Jersey Shore and Pocono Mountains.

As the result of a recent restructuration, The College currently consists of seven schools: Art, Media and Music; Business; Culture and Society; Education; Engineering; Nursing; and Science. The College of New Jersey invites applications and nominations for the following positions:

DEAN, SCHOOL OF ART, MEDIA AND MUSIC

The newly created School of Art, Media and Music currently includes the Departments of Art and Music, with planning underway for the addition of programs and a department in film and digital media. The College seeks an individual who will establish the identity and enhance the visibility of the fine and performing arts, and who has a vision for the development of a program in new media. The school currently has a strong program and well-equipped studios in the area of computer graphics and design. The school has more than 30 full-time faculty and over 400 undergraduates in bachelor degree programs. The Dean will have a leadership role in designing a new visual arts facility that will complement the impressive music and performance center facilities on campus.

DEAN, SCHOOL OF CULTURE AND SOCIETY

The newly formed School of Culture and Society, the largest school in The College, is composed of the Departments of African American Studies, Communication Studies, English, History, Law and Justice, Modern Languages, Philosophy, Political Sciences, Psychology, and Sociology and Anthropology as well as Classical Studies, International Studies and Women's and Gender Studies programs. The College seeks an individual who understands the promise of this coalition and will facilitate connections among these programs. As of Fall 2001, a number of these departments will be housed together for the first time in the Social Sciences Building, a new flagship facility. The new school has 120 full-time faculty and more than 1600 students in bachelor degree programs.

DEAN, SCHOOL OF EDUCATION (Search Reopened)

The nationally recognized School of Education has 60 full-time faculty, 1,000 undergraduate majors, several hundred students seeking secondary certification, 275 graduate students, and an international graduate education program. It offers bachelor's, master's and educational specialist degrees, and certificates in counseling, teacher education, educational leadership, educational technology, special education, and administration. The school has a Professional Development School Network partnership with fourteen public school districts, and has been the recipient of the Best Practice Award of the American Association for Colleges for Teacher Education for Global and International Teacher Education (1998), Comprehensive Services in Education (1999), and Woman's Leadership Development and Gender Equity (2001).

Deans report directly to the Provost of The College. Specific responsibilities include program and faculty development; advancing the quality of instruction, providing faculty scholarship and undergraduate research opportunities; fostering interdisciplinary initiatives in both teaching and research; managing the school's budget; and personnel recruitment.

Preference will be given to applicants who meet the following criteria: 
- An earned doctorate in a discipline representing a department within the school 
- Distinguished record of teaching and scholarship that would merit appointment as a full professor
- Relevant leadership and administrative experience in terminals and professional settings
- Record of promoting diversity and fostering a collaborative, multicultural, and global perspective
- Proven ability in fund-raising and external grants
- Commitment to participatory management and the development of collaborative programs within the school, across the schools of the College, and with entities outside of the College

Applications and nominations will be accepted until the positions are filled. The review process will begin on October 10, 2001. Applications will be held in confidence and should include a letter of interest along with a detailed vita and the names, addresses and telephone numbers of three professional references. Please indicate the position you are applying for and send to: Search Committee, Office of Academic Affairs, The College of New Jersey, P.O. Box 7718, Ewing, NJ 08628-0718. Materials may also be submitted electronically to: academic@tcnj.edu. To enrich education through diversity, The College of New Jersey is an Affirmative Action/Equal Opportunity Employer.

Tyrone College

SOCIIOLOGY AND EDUCATIONAL STUDIES

Trinity College seeks an outstanding new assistant professor to bridge the Sociology Department and the interdisciplinary Educational Studies Program for a four-year appointment (with the future possibility that the position may be converted to tenure-track status).

The successful candidate will hold an earned doctorate in either Sociology or Education. S/he will teach the required course in the Sociology Department as well as one or two elective with a micro-level focus. The candidate will also teach sociology of education and two core courses in the Educational Studies Program. Research or work experience related to schools required, preferably in urban areas. See application information at website http://www.trincoll.edu/depts/educ

Trinity College is an Affirmative Action/Equal Opportunity Employer in policy and practice.
Provost and Vice President for Academic Affairs

Loyola’s Provost and Vice President for Academic Affairs serves as both the second ranking officer and chief academic officer of the university with specific responsibility for all educational planning and administration and for the development of sound academic programs, faculty scholarship, and educational policies. The Provost is responsible directly to the President and oversees the overall operations of the educational objectives of the University including short- and long-term planning and continuous evaluation of policies, standards, academic programs, admissions and enrollment management, academic computing, budget, academic personnel, and physical plant requirements pertaining to the academic environment.

The Provost must meet the qualifications for tenure as a faculty member. Professional recognition as a scholar among peers is essential. The successful candidate must exhibit strong leadership skills and have significant experience in higher education administration and strategic planning.

Based on the heritage of Catholic Jesuit higher education in Louisiana since 1849, Loyola University New Orleans was chartered in 1912 and serves approximately 5,500 undergraduate and graduate students in the Colleges of Arts and Sciences, Business Administration, and Music, City College, and the School of Law. Characterized by award-winning faculty and strong academic programs, the University seeks to provide a liberal arts education focused on the individual student, attending to the intellectual, moral, and spiritual development of all its students. The University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools.

Loyola is flourishing after five years of steady growth and campus enhancements. The current undergraduate classes are the largest and most talented in the history of the University. A new library serves as the central hub in a campus-wide, state-of-the-art electronic infrastructure system. Campus initiatives in recent years have dramatically improved student-centeredness, success, and retention. The student, advertising, public relations, and law Moot Court teams annually compete successfully in national competitions. Individual students have received awards such as Rhodes and British Marshall scholarships. The University’s law school is ranked in the top 20 public interest law schools in the country.

For more information on the University, please refer to the University’s web site at www.loyno.edu.

Send applications and nominations to:
Chair, Provost and AVP Search Committee
Loyola University New Orleans
Box 209
6363 St. Charles Ave.
New Orleans, LA 70118

The Search Committee will begin to review applications on October 26, 2001, and continue until the position is filled.

Loyola is an equal educational opportunity university and an affirmative action employer.
The Chancellor and Regents of the University System of Maryland (USM) invite nominations and applications for the position of President of the University of Baltimore (UB). The new president will succeed H. Mcbain Turner, who is retiring on June 30, 2002, after 32 years of leadership, during which time the growth of the University’s academic reputation and campus earned UB recognition as a major institution in the region.

INSTITUTIONAL SETTING

One of eleven universities and colleges in the University System of Maryland, the University of Baltimore is now in its seventy-sixth year. Consisting of a School of Law, a School of Business, and a College of Liberal Arts, UB is quite distinctive. It is one of a very few upper division universities in the country – its undergraduate programs in business and liberal arts admit only advanced sophomores and juniors. UB students are on the average older than traditional students and have proven themselves in their previous academic work. Many have established careers and are eager to embrace an education that combines business and the applied liberal arts. UB’s graduate and professional programs, including the JD and new applied doctorates, are equally attractive to motivated, mature students who have well focused career goals. In addition to its on-campus programs, the University offers programs off-campus and online.

The University’s faculty has a fundamental commitment to teaching. It also has a significant commitment to research, evidenced by the University’s ranking as fourth among all universities and colleges in the USM in monies earned through research and grants. The UB faculty is equally committed to the community that surrounds it and routinely is ranked as first among all USM schools in the number of days of public service it provides to the community, government, and public agencies.

The University is ideally placed to meet its commitment to the city and the region. Located in the middle of Baltimore’s urban renaissance, at the center of its arts and culture district, and adjacent to all major forms of transportation, including the high speed lines to Washington, the BWI airport, Philadelphia, and New York. The University is accredited by the Middle States Association and a number of professional accrediting groups.

POSITION DESCRIPTION & QUALIFICATIONS

The President of the University of Baltimore is the chief executive officer of the University. He is responsible for all aspects of campus administration and reports to the Regents and Chancellor of the University System of Maryland. The new president must be able to provide vision, academic direction, and leadership; support the University’s strong undergraduate programs; encourage intellectual vigor in the context of a professional, career and urban university; appreciate the potential of new information technology; demonstrate sensitivity to collaborative governance; and promote the University’s identity among all of its constituencies; reflect an understanding and appreciation of the urban community; develop the University’s resources and endowment through creative and energetic interaction with its alumni, state and local leaders, foundations, corporations, and the University System of Maryland leadership.

The ideal candidate must have an appreciation for an academic community; academic credentials that can earn the respect of the University community; a commitment to undergraduate, graduate and professional education; and experience as a manager of a complex organization with multiple agendas and diverse constituencies; be associated with a visionary and the human skills required of a leader, as well as having a record of excellence and demonstrable accomplishment.

PROCEDURE

The appointment of the University’s next president begins on July 1, 2002. Inquiries, applications, and letters of nomination should be sent to:

Jan Greenwood
A.T.Kearney
333 John Carlyle St., Alexandria, VA, 22314
tel: 703-739-4619; fax: 703-519-0391
e-mail: Greenwoodteam@atkearney.com.

Candidates must provide a curriculum vitae, the names and phone numbers of five references, and a cover letter describing their interests in the position and how their experience matches the needs of the University. All applications and nominations will be held in confidence until the search has been narrowed to a short list of finalists who will be invited to campus. Candidates will be notified before the short list is made public to the University community and references are called. Review of candidates begins immediately. For fullest consideration, materials should be received by October 15, 2001. For more information about the University of Baltimore, please visit the University’s web site: www.ubalt.edu.

The University of Baltimore is an equal opportunity/ affirmative action employer. Women, minorities, persons with disabilities are encouraged to apply.
The University of Illinois at Urbana-Champaign is seeking nominations and applications for the position of Dean of the School of Social Work. The School has an accredited MSW program, as well as a Ph.D. program. It also has joint degree programs with the College of Medicine and with the Department of Human and Community Development. There are more than 350 students enrolled in these various programs. The School’s Children and Family Research Center is an interdisciplinary collaboration between the School and the Illinois Department of Children and Family Services (DCFS). The Center’s goals are to develop with the DCFS the capacity to report on the results of its efforts, initiate and carry out a major research agenda, and attract research funding.

The mission of the School, like that of the University, involves three major areas of activity: (1) advancement of knowledge through research in social work theory, policy and practice; (2) maintenance of high academic standards in all programs; and (3) public service to governmental, voluntary, and professional organizations. The faculty has a well-established reputation for research productivity, contribution to governmental and voluntary organizations through applied research and technical assistance, and leadership contribution to professional organizations. As a part of a major research university with national impact and visibility, as well as with significant ties to rural and urban regions within the State of Illinois, the School has a significant role in the development of social policy at the state and national level.

The Dean, the chief academic and executive officer of the School, reports to the Provost and Vice Chancellor for Academic Affairs. The Dean’s primary responsibility is to provide leadership that enhances the quality of the School’s academic, teaching, and service activities. The Dean facilitates and expands the School’s leadership position in the development of social policy at a state and national level. As chief administrative officer, the Dean has overall responsibilities for developing an effective collegial environment, facilitating the teaching and research activities of the faculty, monitoring student admission and services, evaluating the faculty and staff, developing and allocating the budget, overseeing the School’s working relationships both within the University and with Alumni and external groups, and representing the School’s interests in the national arena of social work, and social education.

Qualifications include an MSW (preferred) and an earned doctorate in social work or related discipline; a strong record of scholarly achievement; demonstrated leadership in social work education and research, curriculum development, and resource acquisition (including external funding and grant support); and a demonstrated commitment to affirmative action.

For full consideration, materials should be submitted prior to October 12, 2001. Review of applications will begin immediately and will continue until an appointment is made. Salary and rank are commensurate with qualifications and experience. Application materials should include a letter of application addressing how the candidate’s experiences match the position requirements, a curriculum vita, and the name, title, e-mail, business address, and business and home telephone numbers of at least five references that include faculty, administrators, and community leaders. Submission of materials as a MS Word attachment is strongly encouraged.

Individuals wishing to nominate candidates for the position should submit a letter of nomination, including the name, position, address, and telephone number of the nominee.

Confidential requests for information, written nominations, and application materials should be directed to:

Dr. Jan Greenwood, Vice President
A.T. Kearney, Inc.
333 John Carlyle Street
Alexandria, VA 22314

Phone: (703) 739-4619 FAX: (703) 519-0391

University of Illinois at Urbana-Champaign
Affirmative Action/Equal Opportunity Employer

AA/EEO.
Wayne State University (WSU), Department of Anthropology, announces a full-time, tenure-track position at the rank of Asst. or Assoc. Professor in cultural/medical anthropology beginning fall semester, 2002. Rank and salary commensurate with experience and qualifications (Ph.D. required). WSU, a leading urban research university in the United States, is located in downtown Detroit, and serves a diverse student body. The Department has 14 full-time faculty with important linkages to WSU Schools of Medicine, Law, Business, and the College of Engineering. Duties include teaching, active research and publication, mentoring, and advising of graduate and undergrad students, and participation in administration of the medical anthropology program. The successful candidate is expected to have both a publication and extramural funding record and demonstrated excellence in teaching at the undergraduate and graduate level. Cultural area and topic of specialization are open. WSU offers an excellent benefits package. Minority candidates are strongly encouraged to apply. Please submit curriculum vitae, letters of application, and names/address & phone numbers of four references by October 15, 2001 to Thomas W. Kilian, Chair, Department of Anthropology, Wayne State University, 137 Manoogian Hall, Detroit, MI 48202, (313) 577-2395.

Colby College announces a tenure-track position in the Department of Religious Studies beginning in the academic year 2002-2003. Primary specialization in Biblical Studies with competency to teach some courses in Jewish Studies. Teaching responsibilities include surveys of Hebrew Bible and Christian Scriptures, and advanced courses in these areas. Applicants must have a Ph.D. in Biblical Studies, and appropriate teaching experience and scholarly activity. Knowledge of Greek and Hebrew is expected. All candidates should submit a letter of application addressing teaching philosophy and research interests, a CV, graduate and undergraduate transcripts, and samples of published work. Applications should arrange for three letters of recommendation. All materials, including the letters of recommendation, should be addressed to Professor Nikky Singh, Chair, Department of Religious Studies, Colby College, 4644 Mayflower Hill, Waterville, ME 04901. Review of applications will begin on November 15, 2001 and will continue until the position is filled. Finalists will be interviewed at the AAR/SBL meetings in Denver. Colby College is an AA/EEO and encourages applications from women and minorities.
HOLYOKE COMMUNITY COLLEGE

TENURE TRACK FULL-TIME FACULTY

Holyoke Community College, founded in 1946, is one of 29 institutions, including 15 community colleges, that make up the Massachusetts public higher educational system. The College is situated in the Pioneer Valley of Western Massachusetts within comfortable driving distance to Boston, the Berkshires, New York City, and the Northampton/Amherst area, where the University of Massachusetts, Amherst College, Smith College, Hampshire College, and Mt. Holyoke College are located. Western Massachusetts with its elements of both rural charm and urban finesse, offers a wealth of rich culture and diversity to its residents.

We invite applications for full-time, tenure-track faculty positions beginning Spring or Fall semester 2002, in the following areas:

**Criminal Justice:** Teach a variety of Criminal Justice and related courses from among those offered Master’s Degree in Criminal Justice or in Criminology or related field (the JD is not an appropriate degree for this position) required.

**Economics:** Teach a variety of Economic and related courses. Master’s Degree in Economics required.

Please visit our web site, www.hcc.mass.edu, to view a complete position posting.

We also anticipate that we will be recruiting for full-time faculty for the Fall semester 2002 in the following areas:

- Chemistry
- Hospitality Management
- Math
- Veterinary Science
- Nursing

Faculty members advise students, serve on college governance committees and participate in college programs & activities. Master’s Degree in discipline; college teaching including varied pedagogical styles; understanding of and commitment to the mission of community colleges and its students; and excellent communication skills required of all positions. Ability to integrate computer technology into instruction. Ability to work effectively with a diverse population is required. Experience teaching in a community college and expertise in delivering courses via distance learning technology. A teaching sample will be a required part of the interview process.

Salary according to MCCCMTA Collective Bargaining Agreement, commensurate with qualifications and experience, plus State benefits. Please mail a resume and letter of interest, with the names, addresses and telephone numbers of 3 professional references to:

Dean of Human Resources
Holyoke Community College
303 Homestead Avenue
Holyoke, MA 01040
(www.hcc.mass.edu)

Holyoke Community College is an Equal Opportunity Affirmative Action Employer. We are committed to diversifying our workforce and encourage applications from women, persons of color, persons with disabilities, and individuals from other under-represented groups.

Associate Director of Career Services
Tuck School of Business

The Associate Director of Career Services works in collaboration with the Director and other CS staff members to support the job search success of Tuck students and alumni. The Associate Director is primarily responsible for assisting second year students in making the transition from their education to their career; aiding first year students in developing career goals and in finding summer employment; and advising alumni in transition. These responsibilities involve direct and personal dealings with students at the school and with alumni who need assistance, and the development of programmatic offerings and corporate relationships that support career management success. Master’s degree in business administration, counseling, or relevant area strongly preferred. Has worked in an MBA-level role or has had MBA alumni as clients. Significant (five to ten years) experience in at least one of the following areas: technology, gen. management, biotech/pharmaceuticals, media/entertainment, marketing, corporate counseling/recruiting, custom job search coaching. Has worked in an international business environment. Exceptional interpersonal communication skills. Strong presentation ability. Solid understanding of the MBA marketplace. Strong project management and execution skills. Able to work effectively in fast-paced, high-performing team. Takes initiative. Knowledge of data management systems. Strong administrative and mentoring ability.

Please send resume and cover letter to: Elizabeth E. Roberto, Human Resource Manager, Tuck School Of Business, Dartmouth College, Hanover, NH 03755

Dartmouth College is an Equal Opportunity/Affirmative Action Employer. Women and minorities are encouraged to apply.

Senior Associate Director for Admissions and Operations, Undergraduate Admissions

The Senior Associate Director for Admissions and Operations directs the admission and recruitment process for freshmen, international and transfer students. Reporting to the Dean of Undergraduate Admissions, the Senior Associate serves as a member of the senior leadership team to establish and analyze admission goals, policies and procedures. In addition, the Senior Associate oversees the daily operations of the application review process and assists in the coordination of recruitment strategies to effectively meet institutional enrollment goals. The position manages a staff of 10 professional staff and 8 support staff. Five to seven years of progressively responsible experience in undergraduate admissions; strong supervisory experience; communication skills; analytical skills; and counseling experience required. Successful applicants must have experience with admission computer systems and operations as well as knowledge of the college-selection and admission processes for freshmen, transfer and international students. Experience working with diverse student populations and knowledge of Spanish preferred. Minimum of Bachelor's degree required; Master's degree preferred. Position open until filled. Send resume, letter of interest and three references to Director of Search Committee, 300 Huntington Avenue, 130 Richards Hall, Boston, MA 02115. Northeastern University is an Equal Opportunity/Affirmative Action, Title IX Employer.

HEAD OF HORTICULTURAL SCIENCES
TENNESSEE A&M UNIVERSITY

Tennessee A&M University seeks nominations and applications for Head, Department of Horticultural Sciences. The Head is responsible for administration and leadership of the teaching, research and extension programs of the department, and is expected to foster linkages between faculty and the horticulture industry. He or she will provide leadership in recruitment of faculty and students, development of new programs, and securing new resources and facilities. The Head is responsible for the horticulture program, and the Texas horticulture industry. The Head must maintain an independent research, teaching and/or extension program in an area relevant to the interests of the department. Candidates must have a Ph.D. or equivalent degree, a national reputation for excellence in horticulture or a related area of study, management and leadership skills essential to teaching, research and/or state-wide extension activities, and a broad view of the activities of the land grant university system. Applicants should be experienced in research, and in teaching or extension programming. One of the 94 departments in the College of Agriculture and Life Sciences, Horticultural Sciences has 37 faculty, one third of whom are research or extension positions located at 7 off-campus centers across the state. Degree programs in all areas of horticulture and floriculture are offered at the BS, M.S., Ag.M. and Ph.D. levels. Current student enrollment is 100 undergraduates and 50 graduates. The department is rated number two by the Gomez Report among horticulture departments in the US on the basis of its undergraduate program. Faculty participate in interdepartmental programs in Molecular and Environmental Plant Science, Genetics, Plant Breeding and Food Science and Technology Faculty are affiliated with the Institute for Plant Genomics and Biotechnology and the Vegetable and Fruit Improvement Center. The departmental building at College Station has nearly 90,000 square feet of floor space, with controlled environment rooms, extensive greenhouse facilities and more than 300 acres of field plots. Application and nominations will be received until October 15, 2001, or until a suitable candidate is found. Applicants should submit a letter of interest, a resume, and the names and addresses of at least five references to Dr. Dennis Gross, Chair, Horticultural Sciences Head Search Committee, Department of Plant Pathology and Microbiology, Texas A&M University, 2132 TAMU, College Station, TX 77843-2132. Telephone: (979) 845-7313; FAX: (979) 845-6483.

AGNES SCOTT COLLEGE
THE WORLD FOR WOMEN
Registrar

Agnes Scott College seeks candidates for a full-time, 12-month Registrar position. In this multifaceted position, the chosen candidate will be responsible for the integrity, maintenance and security of all student academic records while providing management of the Office of the Registrar. Visit the College’s Web site at www.agnesscott.edu to view the complete job description.

Agnes Scott College is a highly selective, independent liberal arts college for women located in metropolitan Atlanta. The College offers a vibrant and intellectually challenging environment with a rich and active cultural life. Founded in 1889 by Presbyterians, Agnes Scott College is a diverse and growing residential community of scholars with one of the largest endowments per student of any college or university in the United States. In offering the world for women, Agnes Scott's curriculum encourages students to become fluent across disciplines, across continents and across centuries.

Minimum qualifications include a bachelor's degree in higher education administration or related field, three or more years progressive experience in higher education as a supervisor or manager, open and collegial approach to management, evidence of success in related areas of expertise. Experience working collaboratively with campus constituents in a multicultural and liberal arts college environment is highly desirable. Ability to provide leadership on college-wide issues relating to student records, academic electronic processing and Web presence. Demonstrated record of excellence with knowledge of IT relating to the Registrar functions is essential (preferably Colleague by DATATEL). This position requires occasional evening and weekend availability. Review of applications begins immediately.

Interested candidates should submit a letter of interest, resume, and salary requirements to the Office of Human Resources, Agnes Scott College, 141 E. College Avenue, Atlanta/Decatur, GA 30030.

Agnes Scott College does not discriminate on the basis of sex, race, color, religion, national origin, age, sexual orientation or disability in its employment. Agnes Scott College has a strong commitment to diversity and urges members of underrepresented groups to apply.

An Equal Opportunity Employer.
Emerson College seeks candidates for tenure-track faculty positions in the Department of Visual and Media Arts starting September 2002. There are two positions available at this time.

**ASSISTANT PROFESSOR, FILM PRODUCTION/DIRECTING**

The Department of Visual and Media Arts is seeking to fill a tenure-track position in Film Production/Directing. Successful candidates must be able to teach 16mm synchronous sound film production from the beginning to advanced levels and have expertise in one or more of the following: cinematography and lighting, film sound, animation, video production, digital post production, directing, multi-media production or new technologies.

Candidates must demonstrate an ability to articulate creative work in the context of media studies and contribute to the overall interdisciplinary focus of the department. The ability to teach cross-media introductory production course is required. Applicants must also have college-level teaching experience and an established record of creative work. A Master of Fine Arts or Ph.D. or equivalent professional experience required.

**ASSISTANT PROFESSOR, SCREENWRITING**

The Department of Visual and Media Arts is seeking to fill a tenure-track position in screenwriting. Successful candidates should be able to teach courses in either:

- Feature-length narrative screenplay writing on the basic or advanced level (three act structure, five act structure, and alternative structure)
- Writing for the short film (narrative, documentary, experimental)
- Concept Development
- Television writing (TV, Movie, Comedy/Drama Series, Daytime TV)

Instructor will also be expected to supervise directed study projects in screenwriting.

Qualifications include a Master of Fine Arts or equivalent professional experience, a record of professional accomplishment in writing for the screen, and a demonstrated ability to teach at a college level.

Send resume, teaching philosophy and contact information for references to: Chair, Search Committee, Department of Visual and Media Arts, Emerson College, 120 Boylston Street, Boston, MA 02116. Review of applications begins September 15, 2001 and will continue until the positions are filled. Emerson College is an equal opportunity, affirmative action employer and is strongly committed to increasing the diversity of its faculty. Women and minorities are encouraged to apply.

---

**MIT EXECUTIVE DIRECTOR**

MIT OPENCOURSEWARE
Cambridge, MA

The Massachusetts Institute of Technology seeks a founding Executive Director of its unprecedented educational innovation - the OpenCourseWare Program. OpenCourseWare is a large-scale, web-based initiative to provide free, worldwide access to the educational materials for virtually all MIT courses. Working with a Faculty Advisory Board and reporting to the Office of the Provost, the Executive Director will direct the implementation of MIT OCW, leading it from concept to reality. Candidates should bring a track record of successful management of multi-dimensional projects of similar scale and complexity, producing deliverables on time and within budget. Candidates must also demonstrate the capacity to lead a project successfully from start-up to steady state over a 3-4 year period and beyond, eventually integrating it into the regular sustained operation of MIT. A background in publishing, distance education, or related experience is preferred. Experience with electronic publishing and/or Internet based dissemination of information is desired. Comfort and successful experience working with faculty and within an academic setting is necessary to succeed, as is the ability to work effectively across academic and administrative lines. Familiarity with relevant technology systems is necessary, although the position is not primarily technical. An interest in educational technology and a desire to shape future development in the field is essential.

MIT OCW is a bold initiative with the potential to fulfill the educational promise of the World Wide Web. Extensive planning for the 90-100 million per year endeavor has been completed, and an Interim Management Group is guiding development of MIT OCW until an Executive Director is hired. Pilot phase support has been secured from the Andrew W. Mellon Foundation and the William and Flora Hewlett Foundation. MIT is committed to the long-term success of the project and will eventually incorporate OCW into its institutional budgeting. The MIT OCW concept is expected to help transform the way colleges and universities deliver their courses in disseminating knowledge, their outreach to new audiences around the world, and their intellectual and faculty engagement with the Internet as a vehicle for service, not just for profit. The Executive Director will have the opportunity and challenge to make these ambitions a reality.

For further information or to apply, please contact in confidence: Alan Michel, Vice President & Director, Nancy Sobel, Senior Associate, Isacson, Miller, Internal Box 2345, 334 Boylston Street, Boston, MA 02215; Phone: 617-512-6500; E-mail: moco23@mit.edu. Electronic submission of letters and resumes is strongly encouraged.

**WAYNE STATE UNIVERSITY**

**DEPARTMENT OF ANTHROPOLOGY**

Wayne State University (WSU), Department of Anthropology, announces a full-time tenure-track position in biological anthropology at the rank of Assist. or Assoc. Professor, beginning fall semester 2002. Rank and salary will be commensurate with experience and qualifications. Ph.D. required. WSU offers a leading urban-research university in the United States, located in downtown Detroit, and serves a diverse student body. The Department has a full-time faculty with important linkages to WSU Schools of Medicine, Law, Business, and the College of Engineering. Duties include teaching, active research, publication and service in the Biological Anthropology Program, offering BA, MA, and PhD degrees. Candidates should have a research focus on skeletal biology, biocultural or biomedical epidemiological settings, or forensic. Preference given to those with a biocultural background who can work with current faculty to strengthen the medical and archaeology programs. The successful candidate is expected to have both a publication and extramural funding record and demonstrated excellence in teaching at the undergraduate and graduate levels. Candidates will take responsibility for upper-level courses in biological anthropology, teach an introductory-level course, and teach classes in the Medical Anthropology Program, and occasionally offer a graduate seminar assistant with student research. WSU offers an excellent benefits package. Minority candidates are strongly encouraged to apply. Please submit curriculum vitae, letters of application, and names/address/phone information of four references by October 15, 2001 to Thomas W. Killion, Chair, Department of Anthropology, Wayne State University, 137 McConaugh Hall, Detroit, MI 48202, (313) 577-2935.

---

**University of Missouri-Rolla**

The Department of Psychology at the University of Missouri-Rolla seeks applicants for a tenure track position in applied psychology or experimental psychology at the level of assistant professor beginning August 2002. Teaching duties include general psychology, industrial/organizational psychology (preferred), and other courses in the candidate’s area of expertise. The teaching load is typically three courses with two preparatory seminars. Requirements include a Ph.D. in psychology and the ability to develop a nationally recognized research program. Candidates should submit vita and copies of publications and proposals, and have three letters of recommendation. Review of applications will begin December 15, 2001 and will continue until the position is filled. Please submit application and vitae to: Human Resource Services, Reference No. R5058, University of Missouri-Rolla, 1202 North Bishop, 1870 Miner Circle, Rolla, MO 65409-1056. UMR is an EEO/AA employer Female, Minorities, and persons with disabilities are encouraged to apply.
ITHACA COLLEGE

PROVOST/VPA

The college invites applications and nominations for the position of provost and vice president for academic affairs. The college expects to fill the position on or before July 1, 2002. Founded in 1892 as the Ithaca Conservatory of Music, Ithaca College is today a nationally recognized, residential comprehensive college. Designated last year as one of the top eight regional institutions in the north by U.S. News and World Report, this coeducational college combines a foundation in the liberal arts with extensive coursework in professional studies. With 534 faculty members and its student body now at 6,300-97 percent of whom are undergraduates-the college is composed of five schools (Business, Communications, Health Sciences and Human Performance, Humanities and Sciences, and Music) and the Division of Graduate Studies. A number of its programs-among them music, theater, physical therapy, and communications-have achieved national stature.

Ithaca College is located in the beautiful Finger Lakes region of central New York, and its very attractive campus is located on 750 acres overlooking the City of Ithaca, Cornell University, and Cayuga Lake.

The preferred candidate should possess the following qualifications or attributes:

- The credibility to be the intellectual leader of the College's distinguished faculty
- Impressive administrative and budgetary skills and the vision to help lead the College to become one of the top comprehensive institutions in the country
- Demonstrated openness and accessibility to faculty, staff, and students and the ability to nurture an atmosphere of trust and collegiality within the College community
- A firm commitment both to increasing diversity in the faculty, staff, and student body and to enhancing the College's many multicultural initiatives
- An understanding of and commitment to the residential college experience

Candidates should send a curriculum vitae, a letter of application, and names of five references. The provost search committee will begin to review candidates in early fall and will continue until an appointment is made.

Nominations, applications and expressions of interest should be emailed to provostsarch@ithaca.edu or sent to

Professor Kim Dunnick, Chair Provost Search Committee
Ithaca College
300 Job Hall
Ithaca, NY 14850

Dr. Ted Lewis of the Academic Search Consultation Service is assisting the search committee; he can be reached at (202) 338-7745.

Ithaca College is an Affirmative Action/Equal Opportunity Employer. Members of underrepresented groups (including people of color, persons with disabilities, Vietnam veterans and women) are encouraged to apply.

Sarah Lawrence College announces a tenure-track position in Japanese Studies. Candidates should be prepared to teach a variety of courses in English on the literature and culture of Japan, and to coordinate and teach courses in a fledging Japanese language program. We seek candidates with multidisciplinary and comparative approaches in their research and teaching. Native or near-native fluency in both Japanese and English is required. Interested applicants should have Ph.D. in hand by August, 2002, and should send a dossier including three letters of recommendation, two undergraduate course descriptions and a sample of their scholarly work to: Japanese Studies search (HOHE) c/o Nadia Forbes, Faculty Secretary, Japanese Studies Search, Sarah Lawrence College, Bronxville, NY 10708. Application deadline is November 1, 2001. For information or Sarah Lawrence College, our curriculum, teaching methods and philosophy of education, please see our website at http://www.slc.edu. SLC is an EO employer.

CHAIR, WRITING, LITERATURE AND PUBLISHING

Emerson College seeks a teacher, writer, administrator to serve as Chair of the Department of Writing, Literature and Publishing. The Department consists of a nationally ranked MFA Program in creative writing, an MA Program in publishing and book editing, and BA and BFA undergraduate programs that also provide language, literature and writing courses for Emerson College's general education curriculum. Appointment will be made at the senior level depending on teaching experience and publication record. College-level teaching is required; teaching experience on the undergraduate and graduate levels is preferred. Demonstrable administrative experience, established publications record and demonstrable affiliations with a wide range of creative writers are required. A terminal degree (MFA or Ph.D.) is required. Deadline for receipt of applications is December 1.

Send letter of application, vita, and three letters of recommendation to: Chair, Search committee, Dept. of Writing, Literature, and Publishing, Emerson College, 120 Boylston Street, Boston, MA 02116. Emerson is an affirmative action/equal opportunity institution.

EMERSON COLLEGE

UNIVERSITY OF ILLINOIS AT SPRINGFIELD

Located in the state capital, the University of Illinois at Springfield (UIS) is one of three campuses of the University of Illinois. The UIS campus serves approximately 4,000 students in 19 graduate and 20 undergraduate programs. The academic curriculum of the campus emphasizes a strong liberal arts core, an array of professional programs, extensive opportunities in experiential education, and a broad engagement in public affairs issues of the day. The campus offers many small classes, substantial student-faculty interaction, and a technology enhanced learning environment. Its diverse student body includes traditional, non-traditional, and international students. Its faculty are committed teachers, active scholars, and professionals in service to society.

UIS is seeking assistant professors (except for the D.P.A.) in the following disciplines, beginning August 16, 2002. All candidates must have an earned doctorate prior to beginning employment.

UIS is an affirmative action/equal opportunity employer. Persons with disabilities, women, and minorities are encouraged to apply.
Southeastern Oklahoma State University

School of Business

The Southeastern Oklahoma State University School of Business invites applications for faculty positions in Finance, Management Science, Marketing/Management, and Management Information Systems. The School of Business is accredited by the Association of Collegiate Business Schools and Programs (ACBSP) and is seeking AACSB International accreditation for the MBA programs. The School of Business includes Departments of Accounting and Finance, Management, Marketing and Information Systems, and the Aviation Sciences Institute. Founded in 1909, Southeastern Oklahoma State University enrolls approximately 4,000 students in 49 undergraduate and 7 graduate degree programs. The campus is located in Durant, Oklahoma, 80 miles north of Dallas, Texas and 150 miles southeast of Oklahoma City. Southeastern Oklahoma State University serves as the state headquarters for the Oklahoma Small Business Development Center. Candidates are expected to hold doctorates in the field in which they are applying. ABD's with a reasonable expectation of completion by August 15, 2002 will be considered. Preference will be given to candidates with a record of published intellectual contributions as defined by the AACSB accreditation standards, demonstrated teaching skills, and relevant professional experience. Teaching will be at the graduate and undergraduate level.

Finance: General finance. Preference will be given to candidates who can teach in several areas of financial management, such as working capital management, capital investment, and risk management.

Business Law: Applicants should have superior academic credentials, a demonstrated commitment to legal scholarship, and the ability to teach Business Law courses at the undergraduate level. Requirements include a Juris Doctor (J.D.) from an AALS-accredited law school.

Decision Science: Teaching and research in quality management, qualitative analysis, and production and operations, with the ability to teach principles of management.

Marketing/Management: Teaching and research in competitive advantage and strategy, research methods, and marketing management. Preference will be given to candidates with the ability to teach both marketing and management courses.

Management Information Systems: Teaching and research in one or more of the management information systems sub-areas.

Rank and salary will be commensurate with qualifications and experience. Positions will be open until filled, but are available in January or August, 2002. To apply, send a letter of application, including a statement of teaching and research philosophy, and the names, addresses, phone numbers, and e-mail addresses (if available) of at least three references to:

Office of Human Resources
Southeastern Oklahoma State University
P. O. Box 4016
Durant, OK 74701-0609

Review of applications will begin on October 15, 2001, and will continue until the position is filled.

SOSU is an AA/EEO employer committed to multicultural diversity. www.sosu.edu

**Dean, College of Natural and Social Sciences**

*California State University, Los Angeles*

CSULA is seeking an accomplished visionary leader with a comprehensive understanding of the basic issues confronting colleges of Natural and Social Sciences in the next decade. We seek an individual who can encourage and inspire a diverse faculty and staff, both as individuals and as members of an academic community with a demonstrated commitment to educational excellence.

The College is comprised of the Departments of Anthropology, Biology and Microbiology, Chemistry and Biochemistry, Chicano Studies, Geography and Urban Analysis, Geological Sciences, History, Mathematics, Pan African Studies, Physics and Astronomy, Political Science, Psychology, and Sociology. The Dean administers the affairs of the College of Natural and Social Sciences, working closely with faculty in developing its educational policies and curriculum. The Dean is responsible for developing the College's academic and academic support resources, actively seeking public and private funds to support further growth and development of the College for promoting professional development and College image and stature.

The Dean should have a significant record of accomplishment as a faculty member and as an administrator and must qualify for appointment as a tenured professor in a department within the College. The Dean reports to the Provost/Associate President for Academic Affairs.

Submit a letter of interest, a complete resume and request that three letters of reference be sent by November 16, 2001 to:

C/o CSULA/Dean, College of Natural and Social Sciences
1800 Century Park East, Suite 900
Los Angeles, CA 90067

Reasonable accommodation may be requested. Equal Opportunity/Title VI Employer

---

**There are funds available for health programs for your university and community.**

The Health Resources and Services Administration Technical Assistance Center can help you secure them.

The Center assists Historically Black Colleges and Universities, Hispanic Serving Institutions, and Tribal Colleges and Universities who are developing applications for HRSA funding.

This free service is accomplished through the following:

- Use of a systematic process, designed for the development of technical and cost proposals
- Mentorship from HRSA staff
- Availability of a resource library with information to enhance the background and rationale of an application

Contact Helen Hunter at (301) 585-7588 for more information.

This service is sponsored through a cooperative agreement between HRSA and the Institute for College Research Development and Support.

**COUNCIL FOR OPPORTUNITY IN EDUCATION**

The Council for Opportunity in Education, a nonprofit organization whose mission is to access to higher education for low-income students, announces the following employment vacancy:

**Program Manager** - Manages the Council's Reporting and Tracking Computer Laboratories and provides administrative assistance to the Director of Educational Services. Responsibilities include providing instructional and technical support to participants during Computer Laboratory workshops; facilitating instructional and technical support; assisting in planning, coordinating, and implementing Council conferences and professional development seminars and serving as liaison to the TROJO community and other external constituencies. Involves some travel. Minimum requirement is a Bachelor's degree, excellent oral and written communication ability, and computer skills. Salary range of $25,000-30,000 annually, commensurate with qualifications and experience.

The Council considers applicants for all positions without regard to race, color, religion, creed, gender, national origin, disability, marital, political or veteran status, sexual orientation or any other legally protected status.

Send cover letter and resume with e-mail address (if available) to Council for Opportunity in Education, 1025 Vermont Avenue, N.W., Suite 900, Washington, D.C., 20005, Attn Human Resources, or fax to 202-347-0786. Send e-mail inquiries to mailbox@coe.org. Subject line: Resume for HR. Absolutely no phone calls. For more information, go to http://tseprograms.org.
President
Western Illinois University

The Board of Trustees, faculty, staff, and students of Western Illinois University invite written nominations and applications for the position of President.

Western Illinois University-Macomb enrolls more than 10,000 students in a traditional, residential, small-city campus setting. Western Illinois University-Quad Cities enrolls about 2,000 nonresidential, predominantly nontraditional students at its new campus in Moline. With a student-to-faculty ratio of approximately 16:1 and 94 percent of all courses taught by full-time faculty members, WIU has established an enviable reputation within Illinois for its commitment to undergraduate and masters-level education, and its co-curricular programs have won numerous regional and national awards. (More information about the University is available at its web site at www.wiu.edu.) Both the Macomb and Quad Cities campuses are expected to continue their recent enrollment growth, and the next President will provide leadership in designing an administrative and academic structure—and expressing a vision—to realize the full potential of both campuses.

For full consideration, applications should be submitted by November 2, 2001. It is anticipated that the appointee will assume office on or about July 1, 2002. Letters of nomination, application, or interest should be submitted in writing to the consultants supporting Western Illinois University in this search:

Western Illinois University
President
c/o EDUCATIONAL MANAGEMENT NETWORK/WIT/KEIFFER
Attention: Gary J. Posner/Dennis M. Barden
2015 Spring Road, Suite 510
Oak Brook, IL 60523

Confidential inquiries and requests for a copy of the comprehensive position specification may be directed to Gary J. Posner at 615-665-3388 or Dennis M. Barden at 630-990-1370, or via e-mail to: wiu@emnenm.com

Western is an Affirmative Action, Equal Opportunity employer and has a strong institutional commitment to diversity. In that spirit we are particularly interested in receiving applications from a broad spectrum of people, including women, minorities, and persons with disabilities.

Taubman College of
Architecture and Urban Planning
University of Michigan

ARCHITECTURE PROGRAM
The Architecture Program and the Doctoral Program in Architecture are seeking to make several faculty appointments starting the 2002-03 academic year.

TENURED OR TENURE-TRACK FACULTY
- Computer Applications, with the ability to teach design studio and/or conduct research and contribute to doctoral studies is highly desirable, as is a Ph.D.
- Design, with experience and expertise in contemporary critical theory

FELLOWSHIPS
The Architecture Program also offers three one-year teaching fellowships: the William Mushenheim Fellowship for individuals wishing to begin an academic career, the Walter B. Sanders Fellowship for experienced practitioners, and the Willard A. Oberdick Fellowship for individuals interested in building science and design. Fellows are expected to spend one academic year in residence. The Doctoral Program now offers the Colin Chipman Fellowship for research in design, with a residency of one to four terms.

URBAN AND REGIONAL PLANNING PROGRAM

PROGRAM CHAIR
The Urban and Regional Planning Program is seeking a scholar/chair to head the program beginning in summer 2002. The appointment would be a tenured position at the rank of professor or associate professor. Applicants for the chair position should have a doctorate degree, an established record of scholarship in planning or a closely related field, administrative experience, and an interest in maintaining research and scholarly pursuits. Chairs in the College are typically appointed for a 3-year renewable term.

ASSISTANT PROFESSOR
The program seeks applicants with expertise in housing, transportation, geographic information systems, and/or technological planning for a faculty appointment beginning in September 2002. A Ph.D. in planning or related field is highly desirable.

Senior faculty appointments at the University of Michigan are expected to be widely recognized for their scholarly and creative work. Applicants should have interest in educating both professionally-oriented students and future scholars.

Applicants should send a letter explaining their interest in the position, a curriculum vitae, and names of three references. Fellowship applicants should include a portfolio and research proposal. Applicants for the Chipman Fellowship should include a research and teaching proposal. Review of applications will begin December 1, 2001, with interviews planned for January through March 2002.

Send materials, indicating position applied for on the envelope, to either:

Chair, URP Search Committee
(for GIS or Chair positions) or
Architecture Programs Search Committee
(for Architecture Positions)
Taubman College of Architecture + Urban Planning
2000 Bonsteel Blvd
Ann Arbor, MI 48109-2069

NAHE National Summit on Hispanic Education
December 6-7, 2001 - Tucson, Arizona

Be a part of the historic inauguration of the National Association for Hispanic Education (NAHE), a new advocate for Hispanic Americans in the 21st Century. Join our noble efforts to forge a bold new vision and strategy for better meeting the education needs and challenges of all Hispanic Americans. You can help us make a real difference by becoming both a founding member of NAHE and a participant in its inaugural National Summit on Hispanic Education this December in beautiful Tucson, Arizona. The Summit will feature some of our nation's leading thinkers—from the White House and Congress, the business and government sectors, the philanthropic world, and the multiple arenas of education.

To register for NAHE's inaugural National Summit on Hispanic Education, and/or to become a Founding Member of NAHE, please contact us on the web at http://www.nahe-usa.org, or write to us at: NAHE National Headquarters, Inaugural National Summit, Office of Registrations & Memberships, P.O. Box 87149, Tucson, Arizona 85754-7149. You can also e-mail us at nahe@nahe-usa.org.
SARAH LAWRENCE COLLEGE

SOCIO-CULTURAL ANTHROPOLOGY

Sarah Lawrence College, a small Liberal Arts College close to New York City, invites applications for a tenure-track position in socio-cultural anthropology, beginning in August 2002. We seek an innovative teacher-scholar whose work pertains to indigenous North, South or Central America. Subfields could include one or more of the following: cultural history; human rights; ethnicity; globalization/transnationalism; political and economic formations; environmental/ecological anthropology; ritual, art, and symbolism; language and society. Field-based research is essential, as is a Ph.D. in hand by August 2002. Teaching experience is highly desirable.

Applicants should submit a letter addressing their approach to teaching and their scholarly interests, two undergraduate course syllabi, curriculum vitae, three letters of reference, and graduate school transcripts by November 15th, 2001, to Anthropology Search (HOHE), c/o Naudia Forbes, Faculty Secretary, Sarah Lawrence College, 1 Mead Way, Bronxville, NY, 10708-9999. Some interviews will be conducted at the Annual Meetings of the American Anthropological Association in Washington, D.C., November 28th-December 2nd, 2001.

An Equal Opportunity Employer, Sarah Lawrence College encourages applications from minorities and women. For more information about Sarah Lawrence College's distinctive approach to teaching, which stresses small seminars and individual tutorials, please see our website at http://www.slc.edu.

THE UNIVERSITY OF
SCRANTON
A JESUIT UNIVERSITY

Located in Pennsylvania's Pocono Northeast, Scranton is a student-centered, Jesuit university that offers "large school" numbers like 80 undergraduate and graduate programs in a "small school" setting - average class size of 23, student-to-faculty ratio of just 13:1.

UNIVERSITY DEVELOPMENT AND ALUMNI RELATIONS

has several exciting employment opportunities in the area of development.
All available positions are listed below and require a bachelor’s degree as well as excellent written and verbal communication skills.

Director of Development—Schools, Centers and Institutes: Determines overall strategy and services for all giving programs for schools, centers, and institutes; directs, cultivates, and plans fund-raising strategies in conjunction with the vice president of University Development and Alumni Relations. The successful candidate will have the required eight to ten years’ demonstrated management and fund-raising experience.

Development Officer—Schools, Centers and Institutes: There are three positions available. Each reports to the Director for Schools, Centers and Institutes. Each Development Officer assumes responsibility on an assigned basis for select major gift prospects and volunteers, and assists in identifying and coordinating research on major gift prospects for designated schools, centers and institutes. The successful candidate(s) will have the required five years’ fund-raising experience, development planning, marketing or comparable-level responsibilities.

Director of Foundation Relations: Reports to the Executive Director. The Director of Foundation Relations is responsible for coordinating solicitation of a select group of major foundation prospects; implements strategies; achieves income goals; prepares proposals and manages their submission, represents the University in dealings with foundation officers; advises deans, school development officers, and chairmen on foundation sources for their programs. The successful candidate will have the required seven years’ fund-raising or related foundation, research university, or government agency experience. Advanced degree preferred.

Director of Corporate Relations: Reports to the Executive Director. The Director of Corporate Relations is responsible for cultivating and soliciting corporations, and for identifying and managing solicitation of corporate prospects. Establishes corporate gift income targets and manages resources to achieve the targets. The successful candidate will have the required seven years’ corporate relations fund-raising experience; experience at a major research university, familiarity with the New York area. Advanced degree strongly preferred.

Associate Director, Foundation Relations and Associate Director, Corporate Relations: Both positions report to the Executive Director of Corporate and Foundation Relations. Each Associate Director is responsible for assisting with identifying funding sources through research, writing and editing grant proposals; implementing plans and developing strategies for achieving income and grant objectives for foundation and corporate goals. The successful candidate will have the required five years’ fund-raising or related experience; advanced degree(s) preferred, as well as experience with a major research university or medical center.

Please send resumes to: Tina L. Rice, Manager, Human Resources, University Development and Alumni Relations, Intercampus Center, Suite 964, Mail Code 7720, 475 Riverside Drive, New York, NY 10115; fax: (212) 870-2335; tlr1@colubrida.edu.

A Terminal degree is required for each of these positions. For more information, or to submit an application, contact the Search Committee Chair (relevant department), University of Maryland, College Park, Maryland, 20742.

The University of Maryland, College Park is strongly committed to the principle of diversity. We are especially interested in receiving applications from a broad spectrum of people, including women, members of ethnic minorities, and disabled individuals.

Texas A&M University has numerous faculty searches in progress for fall 2002, including

Agriculture & Life Sciences
Animal Science—assistant professor or associate professor, beef cow-calf management. Contact: bh_johnson@tamu.edu
Biochemistry & Biophysics—2 positions, probably junior but possibly senior + senior position in molecular biology, cell biology, or molecular genetics. Contact: cvyland@tamu.edu
Poultry Science (Joint with Veterinary Pathobiology)—assistant professor in avian molecular genetics. Contact: aspom@goyley.tamu.edu
Recreation, Parks & Tourism—Bassett professor in natural resource-based recreation & tourism. Contact: jolsey@eps.tamu.edu

Architecture—(979) 864-1221
Architecture—2 assistant professor positions: 1 structures, 1 environmental controls. Contact: cspall@archone.tamu.edu
Construction Science—2 senior positions: 1 engg. disciplines, 1 construction management; also 1 senior lecturer in estimating, scheduling, & cost controls. Contact: jmihoe@archone.tamu.edu
Landscape Arch. & Urban Planning—up to 3 assistant professor positions. 1 possibly senior (in sustainability & environment). Contact: rogers@archone.tamu.edu

Bush School of Government & Public Service
2 or more positions; domestic specialties. Contact: wisbe@bushschool.tamu.edu international specialties. Contact: chermann@bushschool.tamu.edu

Business
Accounting—assistant or associate professor. Contact: jbenjamin@tamu.edu
Finance—assistant or associate professor. Contact: dfresler@cgs.tamu.edu
Information & Operations Management—2 positions, rank open. Contact: h_betty@tamu.edu
Marketing—assistant professor. Contact: kreadham@cgs.tamu.edu

Engineering
Chemical—positions at all ranks. Contact: rg-anthony@tamu.edu
Civil—assistant professor in coastal engineering. Contact: jniedzwiecki@tamu.edu
Computer Science—2 positions, open rank (computer systems & bioinformatics); endowed chair in computer engineering. Contact: fritsen@ca.tamu.edu
Engineering Technology & Industrial Distribution—1 assistant or associate professor in electronics & telecommunications; 1 assistant or associate in industrial distribution. Contact: alexander@eetc.tamu.edu

Geosciences
Geography—assistant professor, urban/socio geography. Contact: sherman@geog.tamu.edu
Geology & Geophysics—assistant professor, paleoanthropology/paleobiology. Contact: bjamin@geo.tamu.edu
Oceangraphy—3 positions: sediment geochemistry, margins geology, & microbial. Contact: geology@oceang@ocs.tamu.edu

Liberal Arts
Economics—associate or full professor (international or Macroeconomics. Contact: dpapen@tamu.edu
Economics—assistant professor-special econometrics or I/O, or Game Theory. Contact: dpapen@tamu.edu
Journalism—assistant professor in broadcasting or news-editorial or related area. Contact: kfed@unity.tamu.edu
Journalism—associate or full professor—telecommunications. Contact: kfed@unity.tamu.edu
Modern and Classical Languages—assistant professor of German—20th Century Culture & Literature. Contact: linker@tamu.edu
Performance Studies—assistant professor of music-theory. Contact: pfernest@geo.tamu.edu or jkidd@geo.tamu.edu
Psychology—Lecturer of dance-ballet/modern. Contact: jnix@zoology.tamu.edu
Political Science—associate or full professor—International Relations. Contact: pherce@polisci.tamu.edu
Political Science—assistant professor—International Relations. Contact: pherce@polisci.tamu.edu
Psychology—assistant professor—Behavioral Neuroscience. Contact: plv@psych.tamu.edu
Psychology—senior position in minority health psychology. Contact: lmitchell@tamu.edu
Sociology—assistant professor—crime/deviance. Contact: tkuhlman@tamu.edu

Science
Dean Search College of Science being chaired by David Prior, Dean of Geosciences—dprior@ocs.tamu.edu
Biology—3 assistant professor positions, various areas. Contact: dphil_j@bgs.tamu.edu
Chemistry—junior positions in organic, analytical, and physical (this one possibly senior); senior position in organic; also visiting position, senior, in chemical education. Contact: chemhead@chem.tamu.edu
Sociology—2 positions in bioinformatics, 1-2 in methodology, ranks open, also 2 postdoc. positions. Contact: tamusat@stat.tamu.edu

Texas A&M is a research and teaching university aggressively pursuing goals of institutional enhancement and diversity under the impetus of all of us. The 2020 Long Range Plan includes efforts directed to Dean of Faculties, Texas A&M University, 1126 TAMU, College Station, TX 77843-1126 will be forwarded to the correct department.
COMMUNICATION DEPARTMENT CHAIR

Kennesaw State University is now accepting applications for the twelve-month, tenure-track position of Communication Department Chair beginning Summer 2002. The University seeks an individual to facilitate program expansion and development that eventually may include a master’s degree. The Chair will be expected to strengthen the department’s ties with the professional communication community and to seek external funding to support departmental activities. In addition to departmental administration, the Chair will carry some teaching responsibilities. The successful candidate must have an earned doctorate in Mass Communication, Speech Communication or related discipline. He or she must have significant and effective academic administrative experience; a demonstrated commitment to professional education; sensitivity and responsiveness to issues of diversity and inclusion; an energetic, collaborative and productive leadership style; effective communication skills; and a notable record of teaching, professional service, and applied scholarship commensurate with the rank of full professor. Related full-time experience in business and industry is a plus. KSU has established a notable record for the inclusion of minorities and women in its educational mission and strongly encourages applications from both groups. Applications will be accepted until the position is filled. To ensure consideration, application materials must be postmarked by October 19, 2001. Candidates should send a letter of application addressing the applicant’s position qualifications, teaching philosophy, administrative philosophy, and scholarship activity; current curriculum vitae; names, addresses, and telephone numbers of at least three references, and official graduate transcripts to Dr. Valerie Whittlesby, Search Committee Chair, Kennesaw State University, Department of Psychology, Campus Mailbox 92402, 1000 Chastain Road, Kennesaw, Georgia 30144-5591, vwhittles@kennesaw.edu. For a detailed description of the university, college, and department, please visit Kennesaw State University’s home page at www.kennesaw.edu.

Affirmative action/Equal Opportunity Employer

Position Announcement:
Director
School of Foreign Languages and Literatures

The University of Maryland is searching for an academic leader of its School of Foreign Languages and Literatures. The newly formed school brings together four previously independent language departments and offers formal courses in the following areas: Arabic, Chinese (Mandarin), French, German, Hebrew, Italian, Japanese, Korean, Portuguese, Quechua, Russian, Spanish, Swedish, and Yiddish. The director of the school is a 12-month, tenure faculty position. The individual who fills the position will also serve as chief administrative officer of the school. The successful candidate must share the institutional vision of the new school as a unique enterprise in higher education, where research and teaching are focused on the myriad aspects of languages, literatures, and cultures. The candidate should be a senior scholar with expertise and a Ph.D. in languages and literatures or a related field and must see himself as a builder, committed to turning the school into an innovative and nationally recognized educational model for languages, literatures, and cultures. We seek a leader with strong academic orientation, demonstrated leadership skills with a record of outstanding achievement as a senior member of a leadership team, an appreciation for working within and contributing to a highly collaborative and diverse community that values excellence, an entrepreneurial spirit, and an ability to work productively with the public, including donors and alumni.

For further details and application information, please visit: www.personnel.umd.edu.

The advertisement will be listed under “employment opportunities” in the “exempt positions” category.

EEO/AA

TEXAS A&M UNIVERSITY

Dean of the College of Science

Texas A&M University invites nominations and applications for the position of Dean of the College of Science. This position will provide administrative and academic leadership to develop the research, teaching and service missions of one of the premier colleges of science in the United States. The Dean's leadership roles include the coordination of College priorities and goals with Department Heads and faculty, supporting faculty development, and fostering quality research and educational programs.

The College of Science is composed of the Departments of Biology, Chemistry, Mathematics, Physics and Statistics. The College also includes the Cyclotron Institute, the Institute for Scientific Computation, the NSF Center for Application of Information Technology in the Teaching and Learning of Science, the Center for Mathematics and Science Education, and the Center for Chemical Characterization and Analysis. The College has over 200 tenured and tenure track faculty, 1,800 undergraduate majors, over 600 graduate students and a total research and teaching budget of $60 million. Ph.D. programs are offered in all departments in basic and interdisciplinary research programs.

Texas A&M University is the fourth largest university in the nation, with over 43,000 students in 10 academic Colleges. It was ranked eleventh nationally in enrollment of new National Merit Scholars for Fall 2000, and is also ranked eleventh in endowments, with a total of more than $4 billion. In addition, the university is consistently ranked in the top tier of research institutions by the NSF with annual research expenditures in the area of $400 million. The Dean of Science, as a member of the Council of Deans, will also have opportunities to contribute to the future development of the university and its purposes identified in its Vision 2020 report.

The successful candidate will have an outstanding record of achievement in research and teaching and have demonstrable administrative skills and experience. Effective communication with multiple constituencies, a talent for management of complex organizations, and capacity for visionary leadership will be especially important. The Dean will also provide leadership in fundraising and obtaining extramural support.

More information about this position is posted on the web at: www.science.tamu.edu/deansearch.

The Search Advisory Committee will begin to review applications in October 2001, and review will continue until the position is filled.

Applicants should submit a letter of interest, one to two page narrative summary of experience, curriculum vitae, and the names and telephone numbers of at least three references. (References will be contacted only after permission is obtained from the candidate). Nominations and applications should be sent in writing to:

Dr. David R. Prior
Chair, Dean of Science Search Advisory Committee
Texas A&M University
College of Geosciences
Room 204, O&M Building
College Station, Texas 77843-3148

Phone: (979) 845-3651
Fax: (979) 845-0056
E-mail: dprinor@ocean.tamu.edu

Texas A&M University strongly encourages applications from women and members of minority groups and is committed to a diverse campus community through Affirmative Action and Equal Opportunity. Please be advised that under Texas law, names and other information concerning applicants or nominees may be subject to disclosure upon request.
John Jay College of Criminal Justice
The City University of New York
announces (16) faculty positions for Fall 2002
(subject to financial ability)

John Jay College of Criminal Justice seeks faculty with a demonstrated record of prior teaching and scholarly/creative achievement, who may participate in both graduate and undergraduate education. Doctorate required for permanent rank. For appointment as Instructor, master’s degree required. ASD and teaching experience preferred. Instructors are limited to a one-year appointments. Salary commensurate with experience.

DEPARTMENT OF ART, MUSIC AND PHILOSOPHY
Assistant Professor (Art History)

Art Historian specializing in Modern (19th and 20th Century) Art to teach undergraduate Art History courses to majors. Candidates with experience expected. Full participation in departmental and college governance is expected.

Assistant Professor (two positions available)

1) Conduct research on emotional and psychological assessment and teach courses in clinical and forensic psychological assessment. Background in forensic settings is essential; 2) Developmental psychologist with specialization in forensic psychology, research in the development of aggressive or criminal behavior and teaching in related areas.

DEPARTMENT OF PUERTO RICAN/LATIN AMERICAN STUDIES
Assistant Professor/Instructor

Candidate in the discipline of sociology with expertise in the Caribbean and Latin American regions and the Latin American and Caribbean communities in the United States. Specialization in criminal justice and social science research preferred.

DEPARTMENT OF SCIENCE
Assistant Professor, Instructor (two positions available)

1) Chemistry/Forensic Science. To teach courses from among general sciences, general analytical, and forensic chemistry. Strong research agenda and thesis mentoring required; 2) Clinical Laboratory Science. To teach orientation in forensic science program and conduct at least one graduate program 3) College Laboratory Technician. To assist in the preparation of experiments for laboratory courses. Skills in the maintenance and repair of scientific and computer equipment desirable.

Please send letter of application, curriculum vitae, publications and/or writing samples, and three references, to: John Jay College of Criminal Justice, 333 East 34th St., New York, NY 10016. Deadline: October 22, 2001.

John Jay College has a strong institutional commitment to the principles of diversity. In that, we are particularly interested in receiving applications from a broad spectrum of individuals, including women and underrepresented groups. Reasonable accommodations will be provided to persons with disabilities upon request.

LATIN AMERICAN HISTORY

Wellesley College seeks applicants for a full-time, tenure-track assistant professorship in Latin American history; area period of specialization open. Position starts in September 2002. Applications are welcome from individuals with background in Latin American History, History Department, Wellesley College, Wellesley, MA 02481. Wellesley College is an AA/EOE; successful candidates must be able to work in a culturally diverse environment. Applications from women, minorities, veterans, and candidates with disabilities encouraged.

University of Wisconsin–Parkside

PROVOST/VICE CHANCELLOR

The University of Wisconsin–Parkside provides a high-quality, highly relevant educational experience to a diverse student population. Located in southeast Wisconsin midway between Milwaukee and Chicago, the university offers graduate degrees in three disciplines, 25 undergraduate majors and more than 70 academic programs. UW–Parkside is a dynamic institution, expanding its range of certificate programs and anticipating new master’s programs. The university is a founding member in the effort to establish a Wisconsin State Campus Compact. UW–Parkside is accredited by the North Central Association of Colleges and Schools and the business program holds AACSB International Accreditation for Management Education accreditation. Wooded areas, nature walks, and modern buildings designed in harmony with the environment highlight the beautiful 900-acre campus.

Responsibilities: The Provost/Vice Chancellor reports to the Chancellor and serves as the ranking executive officer in the Chancellor’s absence. The Provost/Vice Chancellor works with senior officers of other divisions, with faculty and academic staff governance groups, and with representatives of other University of Wisconsin institutions on system-wide issues. The director of General Education, Assessment, Honors, and the Teaching Center report to the Provost/Vice Chancellor. The provost is responsible for:

- Providing intellectual and administrative leadership in Academic Affairs, including the University’s two schools and their departments, various centers, information services, including the library and computer services, Center for Community Partnerships, Grants office, and other academic units. This includes but is not limited to academic planning and assessment, budgeting and resource allocation, faculty recruitment, evaluation and retention, programmatic and institutional quality assurance, promotion of the teaching, research, and service mission of the University, and fostering participation by academic units in appropriate areas related to the campus’s strategic plan.

Qualifications:

- Earned doctorate or appropriate terminal degree from an accredited institution
- Excellence in teaching, research, creative activity, and service, which would qualify for tenure at the rank of professor in an academic unit of the University
- Proven record of responsible administrative experience, including experience in program planning, assessment, and budgetary management
- Successful experience with integrating teaching and learning with high-quality scholarship, creative activity and community engagement
- A record of commitment to a successful advancement of diversity among faculty, staff, and students
- Experience in expanding diversity in University programs and curriculum
- Strong oral, written, analytical, and interpersonal skills
- Demonstrated problem-solving ability
- Demonstrated ability to build consensus among faculty, staff, and administrators
- Demonstrated awareness of the needs of nontraditional students and experience with nontraditional programs and curriculum

The review of nominations will begin on September 19 with an anticipated appointment date no later than July 1, 2002. Applications will be reviewed as they are received. This position description is also available on our website: http://www.uwp.edu/employment/ftp.html. General information about the University and its programs can be accessed at: http://www.uwp.edu. Inquiries may be directed to Allison W. Osten, Academic Search Consultant Services, (203) 352-4048; e-mail awo@academic-search.org.

Please send a letter, a current Curriculum Vitae, resume, names, and contact information for at least three references, to:

ATTN: Sandra Poczerewski
University of Wisconsin-Parkside

Montezuma’s Revenge

Legend has it that Montezuma, last Aztec emperor of Mexico, defeated by Hernán Cortés in 1520, cast a spell over all intruders to avenge his people’s humiliating defeat.

Mexico lost half its political hegemony to “los estados unidos” in the Mexican-American War. Mexicans on both sides of the new border claimed these territories, including California, had been stolen—“robas.” They wanted someone someday to rise up and restore them. But history’s clock is rarely turned back. The only hope was that the large influx of immigrants breaking down border fences would one day balance the bases of democratic power in the U.S.

Vigilante Americans in Texas, Arizona, and California have made sport of shooting at “illegals.” The U.S. government knows, as does the border patrol, that these men and women risking their lives want only to work and will take jobs most Americans will not consider. But fear of too many Mexicans crossing the border, legal or illegal, threatens those who do not want to lose political control or share power.

Californiz passed Proposition 21, an anti-gang initiative that makes it a crime for any similarly dressed under-aged persons to gather on the street. Mi abuelita always told me that Hispanics in general socialized in the streets—viven en la calle. And now their apparel can get them searched and arrested. (The law is being contested as violating a constitutional right of assembly and targeting people of color.)

So just when Americans of Mexican descent thought they were settling the score, they are being shot out and shut down. But Montezuma has returned and resurfaced on the screen.

Forbidden to wear bandanas and colors publicly in the barrio, “Homies” have retreated to cyberspace in the form of pint-sized figures created by David González. Viz Homies, Montezuma’s bright plumage is making a war dance, and shaking up law enforcement agencies across America. In Los Angeles, “Elat,” where law enforcement’s blue code of silence is under siege due to corruption charges, its anti-gang task force sees “Droopy,” “Eightball,” “Sapo,” “Mr. Raza,” “Smiley,” and “Big Loco” as encouraging and promoting gang violence. Hispanic picardía has piqued the police. González has been accused by Imagen Foundation, a California nonprofit that encourages positive images of Hispanics in the media, of perpetuating negative stereotyping in the barrio.

Whether or not online Homies threaten the public order, the publicity has boosted sales to more than four million Homies figurines in 1999. And the Homies are not easy to find.

I searched the Aztlan shops of the Mission district for the six metamorphosed survivors of Montezuma’s Aztlan. Some shopkeepers said they were sold out; others feared they could be arrested for selling them. Some said they gave the wrong image and refused to sell them. Still others whispered that there was a shop on an off-street where I could find them. I searched in vain.

I finally found a set of the six Homies in a small shop with a sign over the door reading “Avalon.” The irony was not lost. I had gone through all the Aztlan shops to get to Avalon, the mythical realm where Anglo-Saxon culture was born. Before I could even say a word, an old Irish-looking man with a ruddy face anticipated my request: “I know just what you want.” I asked myself, has Montezuma gone Irish? From the cluttered shop, he pulled out a bag, and one by one the six Homies emerged. He gave me his card and said, “Give me a call soon. I am getting a new shipment in a couple of weeks.” Here there was no fear, social commentary, image damage control, or morality. He had what I wanted.

The Homies are just cute, well-detailed figurines of character types I occasionally met in the barrio when I was younger. I laugh at Montezuma’s clever revenge. He has survived conquest, battles, xenophobia over borders, the Hispanic demographic explosion, and unjust laws that forbid him and his descendants the right to walk the streets of California freely. Montezuma has gone cyberspace to perpetuate his cultural presence, where he can roam like the buffalo and where no man or woman can arrest him or his colorful Homies of Aztlan.

If interested in submitting a ¡Punto Final! “think piece,” please e-mail us at doutlook@aol.com for guidelines.
