Sam Houston’s Hispanic rate has consistently grown in the past 20 years.
Come and get on the right track to success.
CLAMORING FOR COLLEGE—
THE RACIAL DIVIDE

A recent national survey finds that Americans now see the college degree—not the high school diploma—as the key route out of poverty and into the middle class. And finds that Hispanic parents of high school students not only value higher education, but value it even more than do African American parents, non-Hispanic white parents, and the population as a whole.

Great Expectations: How the Public and Parents—White, African American and Hispanic—View Higher Education, shows that Hispanic parents value higher education about twice as highly as do white, non-Hispanic parents. Sixty-five percent of Hispanic and 47 percent of African American parents—but only 33 percent of non-Hispanic white parents—selected "a college education" as the one thing that most helps a young person succeed in the workplace. College was selected over "a good work ethic," "knowing how to get along with people," and "work skills learned on the job."" Asked whether it is possible to succeed in the workplace without a college education, two out of three non-Hispanic white parents said there are many ways to succeed without it. Hispanic parents took the opposite view. Sixty-five percent said that a college education is necessary to succeed today.

The findings should shatter a persistent stereotype in America: that Hispanic enrollment lags because Hispanic families do not value higher education. Hispanics have the lowest college enrollment rates in spite of parental values. Only 22 percent of our youth 18 to 24 enroll. African American enrollment is 30 percent. Non-Hispanic white enrollment is 41 percent. And while enrollment rates have improved for all three groups over the past 20 years, so have the gaps between the rates for whites and minorities. Degree attainment rates are likewise skewed. Of those 25 and older, only 11 percent of Hispanics and 15 percent of African Americans hold bachelor's degrees, compared to one in four non-Hispanic whites.

The implications of this mismatch—between aspirations for college and the one hand and actual enrollment and completion on the other—are dramatic. First, Hispanic voters have never been courted as aggressively by electoral candidates as they are today, for we are now the fastest growing ethnic population in absolute numbers...and the fastest growing block of voters.

Hispanic growth is fastest in nine states, led by California, New York, and Texas, that make up 75 percent of the electoral votes needed to win the White House.

If it is true, as the American public no firmly believes, that access to the American dream lies through the doors of higher education, then the political stakes are extremely high if such a large segment of the voting public finds that its opportunities for college are not in line with its aspirations.

Secondly, colleges and universities in many states will face a large influx of high school graduates over the next 15 years—an increase in the expected demand for higher education that has not been seen since the baby boomers in the 1960s. And that influx is expected to be most pronounced in the very states where Hispanic enrollment projections are the highest.

A recent report by Educational Testing Service, Crossing the Great Divide: Can We Achieve Equity When Generation Y Goes to College?, indicates that Hispanics will increase to 25 million by 2015, compared to 14 million in 1995, thus becoming the country's largest minority in college—one of six undergraduates.

The huge projected increases in demand for college assume that the college-going rates of racial/ethnic groups will remain constant. But Great Expectations suggests that more Hispanics are aspiring to college. And current efforts at school reform—offering more AP classes and the like—might help more Hispanics to be better prepared for college.

The question important to the Hispanic communities is: Where will they enroll? Public opinion surveys from the past decade show one unwavering constant: Americans of all backgrounds overwhelmingly believe that college opportunity should not be denied anyone who is motivated and prepared.

In the current economic boom, the United States faces an enormous opportunity, and the Hispanic community, an immense challenge. Will we fight to ensure educational opportunity for more Americans, as we did with the GI Bill after World War II and the creation of community colleges and campus building of the 1960s? Or will we allow this nation to turn a cold shoulder to those youth who are now preparing for college?

Excellence in Leadership
### BILINGUAL EDUCATION

The Literacy, Language, and Cultural Studies Specialization in the Department of Developmental Studies and Counseling is searching for a faculty member in Bilingual Education. This tenure-track position will be filled at the rank of assistant or associate professor, effective September 2002.

Candidates must have an earned doctoral degree with an emphasis on the education of bilingual learners, in particular literacy and language development, assessment and instruction, and curriculum development. Candidates must have a record of successful teaching at the elementary and/or secondary level. Responsibilities include teaching courses, advising and supervising students, conducting research, and supervising the research of graduate students.

### SCIENCE EDUCATION

The Department of Curriculum and Teaching is seeking a tenure-track assistant or associate professor for its Science Education program. Candidates with strong backgrounds in elementary science, cognition and science learning by children, or the integration of technology into elementary classrooms are especially encouraged to apply. Responsibilities include methods courses in elementary science, graduate courses in science education methods and research instruction for EdM and EdD students; and a commitment to seek external funding. Minimum qualifications are a doctorate in science education or the physical or natural sciences, and elementary/college teaching experience.

### COUNSELING

The Department of Developmental Studies and Counseling is searching for a faculty member in school counseling. Candidates must have an earned doctoral degree in counseling or a related area, hold current certification in school guidance counseling, school psychology, and/or school adjustment counseling, and have recent experience as a counseling professional, preferably in a school setting. It is expected that candidates will be prepared to advise students, supervise student field work, and teach graduate-level courses in school and career counseling in at least two of the following areas: group counseling, family counseling, cross-cultural counseling, assessment, and research methods. The candidate should also be prepared to assist with, and assume increasing responsibility for recruitment and for arranging clinical placements. A record of research and publication is desirable. This tenure-track position will be filled at the rank of assistant or associate professor.

### ELEMENTARY READING AND LANGUAGE ARTS EDUCATION

The Department of Curriculum and Teaching is seeking an assistant or associate, tenure-track faculty member to join the Reading and Language Arts component of the Elementary Education program. The position involves graduate and undergraduate teaching, advising, and conducting research in elementary education, particularly in the teaching of reading and writing. An earned doctorate is required. Experience as an elementary classroom teacher is required. A record of scholarship/research beyond the dissertation is expected for appointment at the associate level.

### ENGLISH EDUCATION

The Department of Curriculum and Teaching is seeking an assistant or associate, tenure-track faculty member for its English Education program. The position involves teaching, supervising field work, and conducting research in English Education for middle and senior high school students. Teaching experience as a middle or senior high school English teacher is preferred. An earned doctorate in either English or English Education is required. A record of scholarship/research beyond the dissertation is expected for appointment at the associate level.

¡Hola!

Hispanic-Serving Institutions (HSIs) number more than 200 in the U.S. and are categorized as such because they enroll at least 25 percent Hispanic students. In order to continue strengthening their institutional capacity, additional financial resources are necessary, particularly with the swelling Hispanic population, which has become the "majority minority" in some states.

While there is legislation in place that appropriates monies for these institutions, and funding has increased from $12 million a few years ago to $685 million for FY 2001 under Title V of the Higher Education Act, HACU has made an important observation that needs to be addressed. In the organization's policy paper to this year's presidential candidates, HACU notes that "more than 50 other federal legislative acts provide support for higher education institutions but fail to target HSIs." Why? Because HSIs are not explicitly mentioned. Implied or assumed inclusion of one group under an umbrella category might not necessarily gain the desired results of one particular group or the whole. What did this omission cost HSIs? Opportunity for specific authorized levels of funding for higher education program development, research, technology, faculty initiatives, workshops, and the like. Congress recognizes HSIs, but now the new Office of the President should ensure that the language in all future legislative action recognizes it too.

In the next several pages, we bring you the results of a national survey on diversity in higher education; a showcase of the Hispanic Heritage Award 2000; a report card that takes a look at the widening race gap, a unique multilingual journalism program; and an online MBA program.

Our next issue is devoted to sports—what Latinos are playing, how they fared in the Olympics, sports careers, gender equity in sports y mucho mas.

Nos vemos...basta el próximo número.

M. Sarracent
Every four years, the U.S. Department of Education issues a "Report Card." The latest version was presented to the public at a recent press conference.

The Report Card portrays a mixed picture. There are improvements—but also failing test scores. Learning gaps are both narrowing and widening. U.S. students might be performing better overall than a decade ago, but a large gap still exists between the majority Anglo population and Blacks and Hispanics.

The Report Card stirred up a controversy immediately. The Clinton administration was quick to point out that there has been "consistent and steady gains." Bush for his part said the Report documents that student achievement stagnated during President Clinton's term in office. "I will be committed to making sure that we do not repeat the mediocrity of the 1990s," Bush said. "The achievement gap between minority and White students is still too wide."

Patterns

In 1999, scores on math, science, and reading tests were still higher for White students than for Blacks and Hispanics in three groups examined—nine-year-olds, 13-year-olds, and 17-year-olds.

Hispanics at age 17 scored about the same in math and reading as White 13-year-olds. "While these differences are not as large as they were three decades ago, the pattern is disturbing and demands careful attention," Michael Netles, vice chair of the Education Department's National Assessment Governing Board, told The Hispanic Outlook.

Netles, a professor of education and public policy at the University of Michigan, said that virtually all of the narrowing of gaps between Whites and minorities was before 1986 or 1988. Since then, the gaps had either widened somewhat or stayed the same. Average scores of Black students remained well below those of Whites, according to the Report. A Black 17-year-old, for example, scored 264 on a reading test versus 295 for a White student the same age, and less than the 267 points achieved by a White 13-year-old.

In math, 17-year-old minority students scored 283 points, exactly the same score as for White 13-year-olds. "This is a depressing reversal of the gains made in the previous two decades," Netles concluded.

The 1999 test score gap between Whites and Blacks in reading among 13-year-olds, for example, was 29 points against a 20-point gap reported in 1990. In math, the test score gap had widened to 32 points from 21 points among 17-year-olds over the past decade.

Netles said gains made in the 1970s and 1980s probably reflected the successes of the civil rights movement and efforts to improve education of low-income children that started with the Head Start and Title I programs of the 1960s. "The stagnation and even reversal in some areas since then indicate that we have not built adequately upon these gains," Netles concluded.

Commenting on the Report Card, Education Secretary Richard Riley said that the race gap was a concern but that students were doing better overall. He noted that the Report covered a larger group of students and a higher percentage of test-takers with disabilities or whose native language was not English.

"But I want to caution against complacency. We must constantly work to do better," he said. "A simple factor that would "revolutionize" education would be if parents read to their children for just 30 minutes every day," Riley said.

"The Report Card finds that reading in the home is down and that there is a correlation between reading in the home and achievement on these tests." he said.

Riley said gaps could be closed with better-quality teaching. He urged Congress to live up to its commitment to hire 100,000 well-trained teachers to reduce the number of students in individual classes in the early grades.

By age 17, nearly all students could add, subtract, multiply, divide, and solve one-step problems. About 99 percent of Whites reached this level—250 on the Report Card's math scale—compared to 89 percent of minorities.

In 1978, when these anchor points were first used, about 96 percent of Whites reached the 250 level compared to 71 percent of Blacks. This meant that the gap of 25 percentage points had shrunk to 10 percentage points.

At level 300, however, which required students to solve moderately complex problems, the Black-White gap was 43 percentage points, Netles noted.

Summary

The 1999 survey studied the results of about 16,000 students in math and science tests and about 17,000 students for reading. The disparities reflect differences in income, family and social factors, as well as schooling. However, the gaps were just as wide or even slightly wider among Black and White students with college-educated parents as for those whose parents had less education.

Outlining gender differences, girls had higher reading scores than boys in each of the three age groups, while in science boys outperformed girls at ages 13 and 17, with little difference for nine-year-olds.

Math scores rose overall for all the age groups from 1990, while in reading, scores dipped marginally for 17-year-olds and rose slightly for the other two groups.

In science, there was a slight improvement in age 17 and age 13 groups while nine-year-olds scored the same as in 1990.

Both those pleased with what has been accomplished and those not satisfied can find data here to support their position.

Dr. Mellander is a professor at George Mason University.
When Miguel Nevárez walks through communities and cities of the Rio Grande Valley in South Texas, he passes many familiar faces—those of Latinos who make up a growing middle class composed of lawyers, doctors, politicians, and local professionals. It's his old neighborhood of McAllen, located in the Valley, that especially drew the interest of The Wall Street Journal in 1997. The newspaper cited the growing trend of decreasing numbers of Anglo lawyers in contrast to a growing population of Latino lawyers. Also mentioned was the election of the first Hispanic mayor, and the fact that the biggest banks in the region are headed by Mexican Americans, and that 15 out of 18 court judges are actually Latino. This paints quite a different picture from the neighborhood Nevárez grew up in, where few Latinos went to college, many of them remaining in the fields.

The Wall Street Journal credits much of this growth in Latino professionals in the Valley to what some call

In 1981, Nevárez became the first Hispanic to be elected president of the University.
“Taco Tech,” properly known as The University of Texas-Pan American in Edinburg, Nevárez agrees.

Nevárez says that Pan American has helped establish a Latino middle class that has gained political and economic clout. He recalls a different picture growing up than the one he has helped create as president of Pan American for the past two decades.

Although he went to school with many other Latinos, few of his peers went on to college. Nevárez was an exception. His father, Miguel Sr., a Mexican immigrant, was a local doctor, and expected nothing less than for his son to go on to college.

“I had my dad as a role model, but that wasn’t the case for many others,” he says. With a father determined to make a doctor out of his son, Nevárez attended college as a pre-med student at Texas A&M University-Kingsville. But, of his earlier years in college, he says, “After opening up a few frogs, I discovered that I couldn’t see blood and give pain.”

He changed majors and ran a family farm after graduating, but eventually fell into the profession that best suited him. A friend asked him to fill in as an emergency teacher for sixth grade at Navarro Elementary School in McAllen. Nevárez’s love of teaching brought him to Pan American for his teaching certificate, followed by a master’s degree in elementary education at Michigan State University and a Ph.D. in science education from New York University.

By the time he obtained his Ph.D., in 1972, he had already worked as assistant principal of Navarro Elementary and had been hired by Pan American as an assistant professor and an associate dean of men. His job was to help train teachers, and although he missed the direct contact with students, he says, “In the classroom you can help 20 to 30 people, but as a teacher trainer you can help more.”

By 1973, Nevárez had become vice president for student affairs and, in 1981, became the first Hispanic to be elected president of the University.

“I had started expressing a vision of what I wanted to do if elected president.” That vision was, in part, to have as many of the Valley residents as possible attend a four-year university.

8,393 in 1980 to 12,248 students in 1990. Since 1989, the institution has grown to include 19 new master’s programs, two doctoral programs, and eight new bachelor’s programs, as well as new health programs. Its student population is 85 percent Latino, predominantly students from South Texas neighborhoods.

In the early 1980s, Nevárez and to serve, it was lacking certain resources and had been denied approval of some of the programs it had proposed. The majority of the state’s resources were being concentrated in the area that includes Dallas, San Antonio, and Laredo.

MALDEF, the Mexican American Legal Defense Fund, filed a lawsuit against the schools (a strange twist of fate that made Nevárez both a defender of his school and a supporter of change) on behalf of LULAC, the League of Latin American Citizens. As a result, the Texas Legislature awarded $350 million in new funds for South Texas schools and later incorporated many of them either into the University of Texas or Texas A&M systems.

Helped by the new funds, Pan American drastically increased its programs and, in 1989, merged with the University of Texas system in order to bring even more programs and options to the students.

During the merger negotiations, it was Nevárez’s role to convince the existing board to give up its appointments, and it fell to him to explain the benefits of a merger to teachers, students, and the community. A potential merger with UT had been on the plate back in the 1970s but had failed because the decision-makers were not convinced of its merit.

As Pan American drew in more students and graduate and professional programs, it became increasingly difficult for the school to play the role of community college as well. In the early 1990s, Nevárez pushed for the establishment of a local community college, which would service those workforce needs that his university could no longer shoulder.

In 1994, South Texas Community College was opened, six miles from campus, and, to everyone’s astonishment, it grew from zero students to 11,000 in four years. “The figures showed the tremendous need for a community

In 1994, only one school district worked with Texas Scholars, but with help from Nevárez, 26 out of 28 have become involved in the program.

Two decades later, as the longest-running Latino president of any four-year university in the mainland United States, Nevárez has expanded both the quantity and quality of education at Pan American. As planned, the University’s student body grew from many others from South Texas universities went to the state legislature and argued the case that schools such as Pan American (then called Pan American University) were not able to properly serve the people of South Texas. Although Pan American was eager
college," says Nevárez. Although Pan American's population dropped from 13,800 in the early 1990s to 12,200 in the next five years due to the opening of the two-year college, more students were being served by both establishments, and eventually Pan Am would receive students from the community college.

The 1990s were also the years in which Nevárez focused attention on helping better prepare students in his community for college. Pan American began working closely with the Texas Scholar's Program, which helps motivate students to take college preparatory courses. In 1994, only one school district worked with Texas Scholars, but with help from Nevárez, 26 out of 28 have become involved in the program. "We went out and talked to those business community leaders who talk to the students, and we also provided training for them," says Nevárez. And he proudly adds, "We have tripled the number of students who are college prepared, from 21 percent to 75 percent today."

From 1995 to 1999, graduation rates increased 35 percent despite decreases in enrollment at the community college, and an increasing number of these students are what make up the growing Latino middle class in the Texas Valley. Says Nevárez, "What motivates me most is that many of these students are becoming professionals in the community. I see them becoming role models, and I see them pushing other Mexican Americans. The people we have educated in the Valley will be leaders in other parts of the state as well. The fact that our students will triple the income and double the years of formal education of their parents, simply by graduating, is something that this institution can be extremely proud of."

Over the past four years, Pan American has also been pushing for increased Advanced Placement (AP) training for teachers in the school districts. Last summer alone, 600 new teachers were trained to teach AP—up from 23 AP teachers four years ago. This past year, Nevárez also made a commitment to grant four-year tuition and fee scholarships to all high school students who earn 12 hours of col-
Journey to the Mayan World

Part One: Antigua to Copán

By Elizabeth Coonrod Martínez, Ph.D.

HO is privileged to present, in two parts, excerpts from Dr. Martínez' first-hand account of a unique scholarly tour: Part Two will repeat in our next issue, and the full text is to be published by the Modern Library Association.

Back when nations were called Palenquín, Tikal, Copán, and Caracol, rather than Mexico, Guatemala, Honduras, and Belize, the Mayan ruled for hundreds of years. By the first millennium, in our counting scheme, they'd abandoned some of their greatest cities in the Mayan heartland and spread out to several locations, with an especially strong concentration on the Yucatán peninsula. In later years, those Mayan fought against Spanish encroachment for two decades before losing the battle. Other Mayan, like the stubborn Itzáes, held out for nearly 200 years, retreating further and further into the Petén jungle until they too were subdued.

But the Mayan did not vanish. They are still here. And during the 20th century, in Guatemala and Mexico, Mayan populations grew faster than the general population. The Spaniards succeeded in invading only Mayan land—Mayan have not been "conquered," as more than one Mayan said to me on a recent trip I took with others eager to learn about contemporary and ancient Mayan.

In 1989, National Geographic put out its first issue highlighting Mayan culture, and called it "La ruta Mayan"—the Mayan route. Little did anyone foresee the impact on commerce and tourism that would follow in the last decade of the century.

National Geographic issues in the 1990s featured new discoveries and new information about the Mayan. Advertising of this region swelled, inviting tourists to the historic land of Mayan culture and people.

Highways on the Yucatan peninsula now include one dedicated to the Mayan route. Large tour buses are a common sight in Campeche and Yucatán, and in Quintana Roo, in neighboring Tabasco state, which is where the original Olmec colossal heads were found, and in Chiapas, in the area of now well-known Palenque and other Mayan ruins.

Guatemala has become a safer place and a renewed lure for tourists since the signing of the 1996 peace accord. In both countries, "Mayan" has evolved into a buzzword certain to attract tourists. Even the indigenous of various Mayan derivatives now self-identify with this word, probably for the first time since the days of Spanish conquest when it was erroneously applied.

"Mayan" basically means "people"; therefore, a clearer designation is Yucatec-Mayan (or Yucatec people), Quiché-Mayan, Lacandón Mayan (in Chiapas), Lacandón Maya (Guatemalan highlands near the Mexican border), etc.

Knowledge about the Mayan has improved in the last two decades, which encourages students and college professors to become better informed. On that premise, one of the National Endowment for the Humanities (NEH) summer institutes this year was titled "The Mayan World" and invited community and four-year-college professors to improve their understanding of contemporary as well as ancient Mayan during a six-week travel and study tour through this region. It would include seminars by experts on the Mayan.

I was one of the 25 participants nationwide selected for this unique opportunity, and here I provide some of my observations during my experience.
The Journey Begins

This NEH grant project was scheduled from mid-June to the end of July, a good time period. The torrential season is mid-Spring through June. Part or all of this route could easily be followed by independent travelers.

We began our journey in Guatemala, in the city of Antigua—a city favored by American expatriates and booming in Spanish-language study programs. Antigua is a fairly inexpensive one-hour taxi ride from Guatemala City. It does not offer the architectural splendor of Puebla or Mexico City; as the region suffers earthquakes every 30 to 50 years and many colonial-era buildings and churches have been left in their decayed state, often with huge chunks of their tops resting in cordoned-off courtyards. But Antigua has cobblestone streets, an inviting downtown, and friendly people—each of which adds an element of beauty. A plaque in a main plaza offers thanks from the state of California for the region’s excellent avocados.

Bookstores display numerous texts on the Mayan, mostly by U.S. scholars. Mayan crafts and textiles are readily available in shops and markets, and from street peddlers. The municipal museum, originally a university founded by the Spaniards when Antigua was the capital, is currently having its 17th- and 18th-century colonial paintings restored and cleaned. But contemporary crafts and textiles are among the best ways to learn Mayan history. These, as well as their legends, calendars, and various dialects, have endured the Spanish invasion and efforts by successive Guatemalan governments to eradicate them. Many travel agencies in Antigua advertise short trips to most areas we visited.

Our study group’s first week consisted of seminars with Canadian George Lovell, whose books are excellent preparation for a trip, on the history and geography of Guatemala; Stanford Professor Mary Louise Pratt on Rigoberta Menchú; and presentations by Guatemala Mayann authors Gaspar Pedro González and Víctor Montijo (currently a professor at UC-Davis), whose works have been translated to English.

González is credited with publishing, in 1993, the first Mayan novel, titled A Mayann Life, with an English translation in 1995. His second book, Return of the Mayan (1998), is a moving account of his escape from his village at age seven and several weeks’ journey, with other villagers, to Mexico. He has also published his poetry and a history of Mayan literature.

A soft-spoken, eloquent presenter, González is a Mayan from the north-western region of Huehuetenango, currently living and teaching in Guatemala City, at his alma mater, the Universidad Mariano Gálvez. In 1998, he organized the first international symposium on indigenous literature and culture. The third was held last July. González strives to create links between the more than 20 known dialects of Mayan, and a sense of the Mayan as human beings. He said that between 1980 and 1985, the period in which Rigoberta Menchú fled the country, 200,000 people were killed, 80 percent of them indigenous or Maya Indians, and that more than 200 villages on record have completely disappeared or were burned to the ground. The United Nations Truth Commission Report of 1999, he said, showed that 93 percent of deaths were at the hands of the army, four percent by guerrillas, and three percent unaccounted for. As George Lovell noted, Mayan Indian existence is truly “a miracle of survival.”

Montijo is a U.S.-trained anthropologist who fled in the 1980s for Mexican refugee camps after the village where he was the only public schoolteacher was targeted by the army for protecting guerrillas, a false charge. Many innocent villagers were killed. This account is told in his book, Testimony: Death of a Guatemalan Village (1987). Before the 1980s, Montijo said, his people were only called “indios.” At the refugee camps, by his account, they discovered there were other types of Mayan, both Guatemalan and Mexican, who spoke somewhat related languages, had some of the same legends, and used the same calendar. To unite and protect one another, they adopted this term.

“We now say ‘Mayan priests.’ This has helped validate a history, a culture, and moved us into a different position. We are naming ourselves, rather than being named.

“Sometimes in a village they ask me, what does this ‘Mayan’ mean? As educated and/or traveled Mayans like himself explain, those who do not leave the village “now see it too. This is the idea of the Pan-Mayan movement.”

“We may practice ceremonies differently, and have a different dress, but other things unify us within our diversity. We are contemporary Mayans using the ideas our ancestors have left us. It is difficult because we have many languages, but we have the same ideas, and a lingua franca, Spanish.” Our people, he says, “are not just sellers of blankets, but also producers of knowledge.” Mayan tradition is “not myth and folklore; it is education and science. You plant crops when the moon is a certain way, and cut the wood when it is a full moon. The elders know it is going to rain at 3 p.m. when it is still morning, because of
fish actions. It would not harm Western society to learn this science of ours."

Montejo noted that after Western society first photographed native ceremonies in his village in the region of Jacaltenango in the 1920s, the governmental authorities then came and arrested the people who had performed and told them not to do that because it would show [the world] that the natives are still primitive. People were jailed, and eventually the traditional ceremonies were lost. Now they are being recovered. Montejo has created a children's book recounting the story of "El Kanil," a Jacalteco hero who gave his life for his community. Kanil buried himself in the mountain, but he is still alive, just as Mayan history is still alive. The book is published in Jacalteco-Mayan and Spanish, as well as English and Mayan.

To understand Mayan culture, Western society needs to understand its relation to nature, Montejo says. He told an anecdote of instruction by his mother. When he was a boy, she ordered him not to "pee" in the river, because if he did so, when he left this life, he would be required to return and clean up the river for contaminating it. It scared him because he knew the Blue River coursed all the way through Mexico to the gulf and the ocean. He knew it would be an arduous task. He also noted that this river had remained pristine until recent decades.

**Great Predecessors**

Next, we headed toward the Atlantic Coast, accompanied by legendary Mayan anthropologist Michael Coe, to study the great predecessors, beginning with the ruins of Quiriguá and, by crossing the border into Honduras, massive Copán (a five-hour drive). Coe lectured on these sites:

Quiriguá, in the lowlands, near the Montagu River, and accessed by boat from the Atlantic, is along an important ancient trade route for jade. Copán is high in the mountains above the river, and was for two centuries the headquarters of Mayan civilization in the region, allied with Tikal to the north and Palenque to the northwest. The Copán ruins have been a favorite site of anthropologists for many years. They even have their own bar in the small town of Copán. A small museum in the downtown area has several exquisite pieces taken from the site. This remote mountain village is a lively and tranquil site for several days' stay. The main hotel is comfortable, its pool enchanting.

Coe, a Yale emeritus professor, has published many books on the Mayan, spent some 50 years researching Mayan and Olmec civilizations, and is responsible for the principal decoding of Mayan glyphs. He came to the region in 1948, visiting the island of Cozumel and then the Yucatan peninsula. His favorite sites were the numerous well-preserved, tall stelae at Quiriguá and Copán, at which he recounted stories of conquests and dynasties during the first millennium of Christian or Gregorian calendar time. He also connected this Mayan history with that of Tikal, Palenque, and other sites in Belize and Mexico.

Coe noted that some pottery found in this region and believed to be pre-classic Mayan, dating from 300 years B.C., is, in his view, actually much older, even dating back to 1,500 B.C., and similar to Olmec pieces that he has studied extensively. His idea, shared by a few other anthropologists, is that there is not one "mother civilization," as the Olmec has been called, but various, and most likely some before the Olmec.
Copán had a small settlement for hundreds of years earlier, but foreigners arrived in the fifth century (of the Christian era), from Teotihuacán (100-750 A.D.) in the Mexican valley. The original people in the Copán area spoke Cholan or Chortí (Mayan), but some Náhuatl, the language of the Mexican central valley, then became mixed with their language.

A Teotihuacán figure (chemical analysis of his bones indicates he is not Mayan) who becomes king marries a Mayan woman and begins his rule in 426 A.D. This founding rulership lasts several dynasties. Sixteen of those rulers are reflected on an outstanding altar in front of a later temple. There are many temples built by the successive rulers, of whom the last documented (in hieroglyphs on temples and stelae) was in the late 800s. At Copán there are more than 100 stelae, and most are 25 feet tall.

Some temples built in later centuries are built over earlier temples, which are well preserved and in a way served as foundation strength for the new, probably favoring their ability to withstand earthquakes, in my opinion. It is interesting that we can still visit ancient Mayan structures, while many Spanish colonial buildings have not survived the earthquakes.

Sometimes an earlier temple was a burial site of a ruler, and the temple was closed to other use. An early temple where one ruler was buried has been recreated in the center of the Copán museum, with the two-story museum built around it. The four façades are decorated with huge masks and imagery of god and war. This reconstruction is painted cinnabar red, with blue, green, and yellow touches, as the original is thought to have looked. The museum also houses several large and beautiful pieces from the Copán site.

Copán is not on a main route or near a major city, but well worth the effort to reach, and perhaps best pursued with a tourist group, as there is a Honduran border to cross at which guards check passports and someone has to explain the purpose of the trip. The highway, a narrow mountain road with steep cliff drop-offs, is treacherous in places. As we passed through, the road was damaged in two places from the rains of May, and was being repaired. A group and bus endeavor might be safest, too, from the occasional robbery said to occur along the route. But we encountered no problems.

Copán is worth the trip because it is a treasure of ancient Mayan high civilization, much as Tikal in the upper Petén of Guatemala. The museum offers a good indication of what visitors will find on the site, and numerous guides, who seem highly educated (most had worked with important anthropologists) were available for hire.

I would recommend reading the excellent texts on Copán by William Fash, and Coe's The Mayan, before making such a trip, to become ground ed in what one will see. My favorite structures were Temple 22, dedicated to the maize god, or life sustenance, and the community council house, Popol Na, which flanks it. "I think Copán is the best Mayan site we have," Coe said, noting that only Palenque was comparable.

Did the Mayans have a predecessor? Coe thinks the answer will be discovered soon; more glyphs can be interpreted now; and new excavations are occurring. "Someday we are going to find another Codex [an ancient manuscript] in a cave, perhaps in Belize." Coe thinks the origins of the Olmecs will someday be found in the region between Chiapas and the Pacific Coast.

Coe also guided us through "Las Sepulturas," a nearby collection of residences of lords and scribes, a "suburb" of the temples for the higher class of that society. Here is the magnificent House of Bakabs, ruling-class scribes, often pictured in texts on the Maya.

While the Mayan had no true measure or population census, agricultural documentation suggests that more than 20,000 people lived in the Copán valley in its heyday.

It was a huge civilization, and we explored much more of it in the weeks ahead.

Elizabeth Coonrod Martínez is chair of the Department of Modern Languages & Literatures at Sonoma State University in northern California, and associate professor of Latin American literature and Spanish. She completed her doctorate at the University of New Mexico, Albuquerque.
Welcome to the Land of Opportunity

CAL STATE
FULLERTON

MIRT Called
Awesome,
Energizing,
Unforgettable

BY
BRUCE H. WEBER

There are now 28 MIRT programs across the country that are helping to generate more minority research scientists.

The year was 1993. I was having lunch at the Hard Rock Café in Atlanta, Ga., with colleagues attending the National Institute for General Medical Sciences Minority Research Conference. We, as directors of various programs to promote minority involvement in research on our campuses in the Los Angeles basin, were discussing ways to increase the number of students, particularly minorities, to pursue biomedical research.

We already had funded programs for this purpose, but we wanted to do something special that would involve a research experience to stretch a student's horizon both as a person and as a potential scientist and develop in a student the international perspective of contemporary science. Professor Roger Bauer of California State University-Long Beach mentioned that there was possible funding through the Fogarty International Center of the National Institutes of Health.

I applied for a grant, which led to the creation of the Minority Research Training (MIRT) program for a consortium of CSU campuses in the LA Basin.

That lunchtime conversation led to a program for students that turned out to be the most satisfying experience of my 30 years of teaching at Cal State Fullerton. The program involves minority students, including many Hispanics, conducting biomedical research during the summer for 10 weeks at leading international university laboratories in England, Mexico, and Thailand.

Starting with four students from Cal State Fullerton in 1995, our MIRT Program has grown to 19 students this past summer. Of those 19, seven are of Hispanic heritage. Since 1995, 53 students have been in the program.

Students have called it "awesome," "an experience I'll never forget," "one that has re-energized me," and "enriching." I like to think of MIRT as a win-win-win program.

First, it gives the professors involved the chance to reach out and offer an exceptional research and life experience to outstanding minority students who might not otherwise have this opportunity. MIRT's key purpose is to increase the number of underrepresented minorities in biomedical research and to provide them with an international perspective and opportunity to form professional networks with foreign scientists.

Second, student participants

Jennifer Padilla, 1998 MIRT participant

441
benefit by being able to conduct research at some of the world’s outstanding university laboratories, staffed by world-class scientists, including a Nobel Laureate. Plus, students benefit through the travel and cultural experiences inherent in the program. They gain a lot of confidence in themselves, and they spend time with others who share a passion for their research interests. And finally, we all benefit because society will eventually gain additional biomedical researchers who will join other researchers in unraveling the mysteries of human diseases.

The MIRT program has been particularly successful in this regard, as 80 percent of our MIRT participants are in Ph.D. programs. Former Cal State Fullerton MIRT students are studying in Ph.D., Ph.D./M.D., and M.D. programs at places such as the Albert Einstein School of Medicine, Yale University School of Medicine, University of California-san Diego, and other top medical and research institutions. Another benefit is that our colleagues overseas have told us how much they enjoy the talented students selected to study in these labs.

Program Components

The program has several components. Students receive a grant that covers room and board, university fees, and travel expenses, and a stipend of $2,500. Current funding for Cal State Fullerton’s program extends through 2004. The grant covers approximately $16,000 per student.

To ensure that students get the maximum benefit from their MIRT research experience, faculty mentors visit the laboratory to check on the arrangements and deal with any problems that might arise. In consultation with the foreign research director and the MIRT student, the CSU faculty mentor identifies and provides any extra instruction that might be needed with regard to safety, experimental design, interpretation of data, and use of various computer packages for the analysis of data.

As program director, I run a web-based virtual workshop for the students during the summer on the responsible and ethical conduct of research as well as on minority and third-world health issues. Reports on these topics are included in the students’ final reports, in addition to their formal report on their scientific activities. The students also write a report on the cultural aspect of their summer experience.

Research destinations this past summer included Chiang Mai University in Thailand, Instituto de Biotecnología in Cuernavaca, Mexico, and several locations in England at the Universities of Cambridge and Oxford, as well as King’s College London.

Students selected for the program are honor students, maintaining a minimum G.P.A. of 3.0 in science. They can build on the experience and training they have in our labs supported by our minority research support programs (Brigado, Minority Biomedical Research Support, Minority Access to Research Careers, Initiative for Minority Student Development) funded by the NIH.

They learn new techniques while abroad, and they learn how research is done in a different place and institutional setting.

An advisory board helps select students and advises them on choosing a research project and destination. Members of the Los Angeles Basin MIRT advisory board are Dr. Jeff Cohlberg; Cal State Long Beach; Dr. Carlos Gutiérrez; Cal State Los Angeles; Dr. Laura Robles, Cal State Dominguez Hills; Dr. María Zavala, Cal State Northridge; and Dr. Donald Hoyt, Cal Poly Pomona.

This past summer’s CSU participants and destinations included Reginald McNulty (Thailand), Huong Pham (Oxford), Shelly D. Sanetti (Cambridge), Leona Flores (King’s College London), Bellanira Herrera (Mexico), Ron Marchelletta (King’s College, England), Lisa Louise Alexander (Thailand), Clarence Gillen (Cambridge), José Peña (Cambridge), Claribel Cendaña, (Cambridge), Tanya Porras, (Cambridge), Leana S. Wen (Oxford), and Justina Gonzales (King’s College London).

Herrera, a Cal State Fullerton graduate student majoring in biology, conducted research on the symbiotic interaction between nitrogen-fixing bacteria, with Dr. Frederico Sánchez in a laboratory at the Instituto de Biotecnología, located in Cuernavaca, Mexico, the country’s leading research facility.

Being from Mexico, Bellanira had a unique perspective on her travel experience. She came to the United States when she was 11. Her return to Mexico prompted her to reminisce about such things as the little toys made of aluminum cans and rattles of several kinds. She appreciated the cultural experience, but she also felt the division.

“I saw a big difference in the social classes, especially among the middle, lower-middle, and upper-middle classes. The middle-class family usually has a maid and a chance for education, but the lower class has to focus on work.” She said she tried to speak Spanish all the time, but didn’t correctly translate all the words. She thought her first language would be easy, but she felt everyone was correcting her.

Bellanira told us that the MIRT experience was enriching overall and expanded her cultural knowledge and views on biomedical research. She enjoyed her stay in Cuernavaca, which, she learned, was once the home of the Spanish conqueror Cortes. Her goal is to become a medical researcher.

Another Fullerton participant was Leona Flores, a student with an unusual background. Leona originally graduated a few years back with a degree in architectural engineering from Cal Poly San Luis Obispo, a Cal State campus noted for its engineering programs.

After working for a firm and as a consultant for eight years, she decided to return to the field of science, in which she always had a strong interest. A biological science major,
Flores, now 37, chose to study at King’s College London, one of the oldest and largest colleges of the University of London. Her goal is to earn a Ph.D. in biochemical research.

She conducted research in the School of Life, Basic Medical and Health Sciences, in the laboratory of Dr. Robert G. Price, whose specialty is kidney biochemistry. The school is located at a new campus in Central London near the Thames River.

Along with the research opportunity, the London location proved to be an ideal choice for Flores, who visited museums, galleries, and theaters during her stay. She even met actor Ralph Fiennes, who was appearing in a production of Shakespeare’s Coriolanus.

Flores called MI^RT an “awesome program with a lot of great mentors.” She made these comments about her MI^RT experience: “My experience in the laboratory of Professor Robert Price at King’s College London was quite enjoyable both socially and educationally. The laboratory students at the campus were interested in my experience and knowledge as both a research student and a California native. And, of course, they were willing to share their information, techniques, and equipment.

“My mentor was very interested in my acquiring laboratory skills under his supervision, so the technician who trained me in protein analysis basically took me under his wing and made available whatever technique I was interested in learning. So I took advantage of that and learned FPLC, electrophoresis, ELISA, dialysis, immunoblotting as well as immunochemistry. I came home with a very positive experience from King’s College London with many useful and pertinent techniques under my belt.”

“The MI^RT program gave me an opportunity of a lifetime, and what impressed me was the efficiency of the program. Through the constant communications with Dr. Weber, I always felt I had a foot in California while being in another country. There’s also a nice rapport between the MI^RT faculty and King’s College London that assured any concerns or questions I might have had. It was very reassuring to have support on both sides of the globe. I would do this again in a heartbeat.”

Flores’ goal is to become a medical researcher.

José Peña, a student at Cal State Long Beach, conducted research in virology. I will cherish this experience and will look back upon it whenever I lack the personal motivation to continue on. For I learned that no matter how prestigious the institution is, it is the people within that make it prestigious through hard work, dedication, and the love for science. Please note my bias towards science!”

Clarence Gillet, a student at Cal State Northridge, conducted research in the Cambridge laboratory of Dr. Sheila Bingham, whose focus is on diet, cancer, and public health research.

Gillet gave us these comments: “During my summer research enrichment experience at the University of Cambridge, it was striking to see a similar disparity with their ‘minorities’ involved in primary research. The world is becoming more of a global community, aided by rapid advancement in communication and transportation. Fortunately, the problems of these less-developed nations have now rather than later impressed their vital roles as we seek answers to many of our ailments.

“Therefore, it is imperative that not just the political aspects of communities should be represented by its constituents but also their scientific interests. Scientists coming from a particular socioeconomic background can perhaps contribute additional new insights into the intricate understanding of nutritional, infectious, and other issues affecting their unique communities.”

Clarielle Cendaña, a student at Cal State Long Beach, studied in the biochemistry laboratory of Dr. R. W. Farndale at Cambridge. His work centers on the investigation of signaling pathways activated in human platelets by collagens.

Cendaña commented: “Having done research overseas is an experience I’ll never forget. It has helped me grow scientifically, personally, and culturally. My mentor is very supportive, and he challenged my intellect. This MI^RT program is definitely two thumbs up!”

As you can see from these comments, MI^RT has made a major impact on the lives of our student participants. Cal State Fullerton is also fortunate to be among the MI^RT programs funded in the nation. There are now 28 MI^RT programs across the country that are helping to generate more minority research scientists.

For more information about the program, please contact me at bhweber@fullerton.edu.

Dr. Weber is professor of chemistry and biochemistry, California State University-Fullerton, and director, Los Angeles Basin MI^RT Program.
Lehman College, City University of New York
Deeply Involved with the Surrounding Community
BY ROGER DEITZ

Lehman College of the City University of New York earned its place in world history when, in 1946, the Bronx campus was made available for the United Nations at the urging of City officials. From March to August of that year, the campus was the UN's interim headquarters. The first meetings on American soil of the U.N. Security Council were held in the Old Gymnasium building.

In 1996, to recall that historic period, the College participated in the United Nations' 50th anniversary commemoration with campus activities and events, including a CUNY Student Forum with U.N. Secretary General Boutros Boutros Ghali. This international distinction led to a genuine diverse-world awareness that was imprinted on the College long before other institutions warmed to a "global philosophy." The spirit and impact of the United Nations period has remained a hallmark of the institution, and a progressive "world view" has been imparted to Lehman students. There has been a positive impact on the College too from the diverse enrollment of students from all backgrounds and neighborhoods around New York City and beyond.

President Ricardo K. Fernández, the second president of Lehman, is also a professor in the department of languages and literatures. He observes, "At Lehman and at many other colleges and universities around the country, we are collaborating with school districts in building a pipeline that will help more and more Latino and African American students obtain the skills they will need to compete in the new economy of the twenty-first century."

As early as his formal inauguration on October 25, 1991, Fernández affirmed Lehman's commitment to access and excellence. That commitment is apparent in the makeup of the College community and in its academic programs. There are many illustrations of Lehman's reaching out to the community and helping prepare students for the changing nature of the population and workplace. The Multilingual Journalism Program, for example, is the only program of its kind in the nation. The program is designed to prepare students to work in print and electronic media such as newspapers, magazines, radio and television broadcast, and the Internet...in English and in other languages. The uniqueness of this 42-credit interdisciplinary B.A. degree program is its focus on heritage speakers of languages other

campus—Gillet and Davis Halls, the Music Building, and the Gymnasium—were completed in 1931 by the New York State WPA. The original campus plan called for nine buildings, but the Great Depression delayed construction. The ambitious building plan later was abandoned and cancelled by Mayor Fiorello H. LaGuardia. For a decade before the entry of the United States in World War II, only women students attended, taking the first two years of study at the Bronx campus and then transferring to Hunter’s Manhattan campus to complete their undergraduate work. Shortly after U.S. entry into
the war, the students and faculty vacated the campus and turned the facilities over to more than 86,000 women in the newly organized WAVES (Women Accepted for Volunteer Emergency Service). To commemorate this period, the Navy later installed a ship's bell from the U.S.S. Columbia on the campus. A large group of former WAVES returned to campus in 1996 for the installation of a commemorative stained-glass window in the College's Music Building.

Normal peacetime collegiate activity resumed at the campus in 1947, but in addition to women, the Bronx school now accepted former servicemen, who studied in separate classes. In 1951, the campus became fully coeducational, and a four-year curriculum was introduced.

The process of separating the Bronx campus from Hunter College began in 1967. Dr. Leonard Lief, chair of the English department, was named provost and oversaw the transition. On July 1, 1968, Lehman College began its independent existence with Dr. Lief as president.

At present, Lehman College offers 90 undergraduate majors in the liberal arts and sciences, as well as graduate programs in education, nursing, accounting, and many other areas of the arts and sciences. The College also houses the plant sciences specialization of CUNY's doctoral program in biology, offered in collaboration with the New York Botanical Garden. As pointed out by President Fernández, professional programs in teacher education, health services, and social work are strengthened by Lehman's close collaboration with Bronx schools, hospitals, and community agencies. Innovative programs and specializations in art and technology, as well as multilingual journalism, provide students with internship opportunities in the growing fields of corporate imaging and global media.

The 37-acre tree-lined campus is noted for its distinctive blend of Collegiate Gothic and modern architecture. The campus's fifteen buildings include a Center for the Performing Arts, Art Gallery, a 552,000-volume library, and APEX, a new facility for sports and recreation. The APEX sports center was designed by internationally acclaimed architect Rafael Vinoly. Opened in 1994, it features sophisticated facilities for swimming, basketball, track and field, and dance. The Information Technology Center, a $135 million facility opened in 1999, features eight microcomputer classrooms, each with 20 state-of-the-art microcomputer workstations, and an open lab area housing more than 100 additional microcomputers, along with facilities for printing.

There are 9,074 full-time and part-time students attending. That includes 7,228 undergraduate students and 1,846 graduate students. Approximately 77 percent overall are female, 43.9 percent are Hispanic, 35.5 percent are African American, and four percent are Asian. Students come from 91 countries. The average class size at Lehman is 23, and the student-faculty ratio is 18.1. The overwhelming number of undergraduates—5,049—hail from the Bronx, with the astonishing number of 1,581 undergraduates reporting foreign citizenship. There are 308 full-time faculty members, of whom 85 percent hold Ph.D. degrees. Included are four Distinguished Professors. Part-time faculty number 399. There are 38 full-time and 37 part-time faculty reported as Hispanic. This past year, John Corigliano, Lehman's Distinguished Professor of Music, won an Academy Award for Best Original Score for The Red Violin, a Canadian film. Corigliano, who has taught at Lehman since 1972 and is a leading composer of his generation, has received multiple Grammy Awards, and the music world's major prizes for his compositions. "The world knows John Corigliano through his brilliant work as a composer," notes President Fernández. "Our students know him as Professor Corigliano, a gifted teacher who inspires and encourages their creative efforts."

Lehman is deeply involved with the surrounding community. The opening of the Lehman Center for the Performing Arts in 1980, the Lehman College Art Gallery in 1984, and the 500-seat Loebler Theater has made the College a cultural center for the region. Lehman is active in more than 90 school/community/collaborations, which serve more than 178,000 students, teachers, administrators, workers, and community members. These include outreach programs that give Bronx schoolchildren a free introduction to the world of music, dance, drama, and the fine arts, as well as dozens of concerts, plays, dance performances, and exhibitions that are free or nominally priced and open to the public. The Bronx Information Network (BIN) project electronically links many of the borough's K-12 schools, colleges, economic development, arts, and other institutions to provide distance-learning opportunities and a variety of other computerized teaching resources.

Lehman College is home to several CUNY research institutes and community resources that support the quality of life, work, and learning in the Borough. These include the Bronx Data Center, the Bronx Educational Alliance, the Bronx Institute, the Bronx Small Business Development Center, the Center for School/College Collaboratives, the CUNY Institute for Irish-American Studies, and the Institute for Literacy Studies. The Bronx Educational Alliance is a consortium of 21 educational, health, human service, business, and governmental organizations located in the Bronx.

It is currently administering a $7.8 million federal GEAR-UP grant to develop six new "corridors of success," extending from middle school into college, in each of the six Bronx community school districts—part of Dr. Fernández' pipeline.

Highlighting Talent and Commitment at the Kennedy Center

BY NELLY MELLANDER

Once a year, an evening is set aside at the Kennedy Center to reflect on a small but shining sample of the myriad successes and talents that characterize the Hispanic contribution to the United States.

Sponsored by the Hispanic Heritage Awards Foundation, the evening is festive, upbeat, and inspiring. Every year, a handful of Hispanics are honored for their lifelong contributions. Younger Hispanics, such as high school and college students, are honored as well. They are selected after an extensive national multi-meeting search, a process that encourages and inspires thousands throughout the country.

The Hispanic Heritage Awards Foundation is a nonprofit organization established in 1987 to promote Hispanic excellence, provide a greater understanding of the contributions of Hispanic Americans to the U.S., and recognize role models to inspire our youth.

Credited with spearheading a growing recognition of Hispanic achievement in the U.S., the Foundation is best known for its Hispanic Heritage Awards, a televised event considered the most prestigious honor in the Hispanic community and a highlight of Hispanic Heritage Month. The awards were a prime-time special broadcast throughout the NBC network September 9, offering the general public a chance to learn about Hispanic leaders in a variety of fields.

Thirty-three national Hispanic co-host organizations serve as the Nominating Committee for the Awards, working closely with the Foundation to identify Hispanic leaders and achievers in their communities and bring them to the attention of the National Selection Committee.

Youth Awards

The Hispanic Heritage Youth Awards program began in 1998 and honored Hispanic youth in five U.S. cities. This year, 60 students were honored across the U.S. in 10 cities: Chicago, Dallas, Denver, Los Angeles, Miami, New York City, Philadelphia, Phoenix, San Antonio, and San Diego. The Foundation awarded the students nearly $400,000 in prizes.

The five National Winners of the Hispanic Heritage Youth Awards 2000 traveled to the 2000 Gala in Washington and were honored on the network television special.

The 2000 Gala

Raquel Welch, of Bolivian ancestry, and Bobby Canavale, of Cuban ancestry, emceed the gala.

Miss Welch is an actress of considerable renown, having appeared in 35 films, including Fantastic Voyage, Myra Breckinridge, One Million Years, and The Three Musketeers, for which she won the...
Golden Globe for Best Actress.

Bobby Cannavale is a successful television and stage actor from Union City, N.J., who got his start as a child, performing in a church theater company within his “bad neighborhood.”

Guests at the event saw far more of their energy and creativity than did those watching the TV special, which aired an abbreviated version of the Gala. Other luminaries present that evening included Antonio Banderas, Giselle Fernández, and Elvis Crespo.

The five honorees for the year 2000 are Cruz Reynoso for Education, Oscar Hijuelos for Literature, Dolores Huerta for Leadership, Anthony Quinn for the Arts, and Sammy Sosa for Sports.

Cruz Reynoso: Education

“The strength of our country will be measured by our ability not only to get along, but to appreciate our fellow citizens who are of different ethnic, racial, and religious groups.”

As a lawyer, teacher, scholar, mentor, and activist, Cruz Reynoso has been a zealous advocate for the poor and disenfranchised, working to improve the lives of the less privileged. After receiving his law degree from UC-Berkeley, Reynoso co-founded the Hispanic National Bar Association, which advocates for the rights of Hispanic communities, and was director of California Rural Legal Assistance.

Much of his work resulted in groundbreaking rulings that provided basic rights to a great number of rural poor.

Reynoso has held many public service positions that enabled him to work on issues that directly impact the lives of Latinos in the U.S. In areas such as education, law, civil rights, and immigration. In 1993, he was appointed to the U.S. Commission on Civil Rights, and since 1994 has been its vice chair.

Widely regarded as one of the leading Latino legal figures in the nation, Reynoso is the first Latino to serve on the California Supreme Court and one of six recommended by the Hispanic National Bar Association to serve as a U.S. Supreme Court Justice.

This was a long way to come for a young boy who grew up as one of 11 children born to Mexican immigrants in Brea, California, and who spent summers with his family working in the fields of the San Joaquin Valley. Many of his classmates thought his plan for a higher education was unrealistic. A common belief at the time was that Mexican Americans would not be allowed into colleges.

Reynoso is currently encouraging a new generation of social champions as a professor at the UCLA School of Law.

Oscar Hijuelos: Literature

“The story is so utterly American, it’s a wonder we haven’t heard this particular version of it before.”

The New Yorker on The Mambo Kings Play Songs of Love

In 1990, novelist Oscar Hijuelos became the first American-born Hispanic to win the Pulitzer Prize for fiction, with his second book, The Mambo Kings Play Songs of Love. There was overwhelming acclaim for the novel, which was made into a motion picture and translated into more than 20 languages.

From the start, Hijuelos has used his writing to explore the complex experience of Hispanic immigrants in America, thereby documenting their struggles and dreams. The Mambo Kings’ story about two Cuban brothers who strive for success in New York during the dance hall epoch echoes in the author’s other works, from his critically praised first novel in 1983, the autobiographical Our House in the Last World, to 1999’s Empress of the Splendid Season, the story of a Cuban American housekeeper trying to reconcile her new life of toil with her past life of privilege in Cuba.

Born in New York City to Cuban immigrants, Hijuelos grew up listening to stories of the old country in a Spanish-speaking household. After a trip to Cuba at the age of three, he contracted a kidney disease and was sent away to a hospital for terminally ill children. But he survived. Isolated for two years from his family and the culture into which he was born, English became the language of his education and the one in which he now writes.

Dolores Huerta: Leadership

“Our votes count, but only if we are willing to make them count.”

For half a century, Dolores Huerta has been a pivotal figure in the movements for Latino, farmworker, and women’s rights. Huerta was born in the coal-mining town of Dawson, New Mexico, and was raised in Stockton, California, by her mother. She was a founder of the Stockton Community Service Organization. As the political director for CSW and the United Farm Workers, which she co-founded with her brother, César E. Chávez, Huerta secured legislation giving non-citizens public assistance, driver’s licenses in the applicant’s native language, aid to needy children, the right to vote in Spanish, disability and unemployment insurance for farmworkers, and amnesty for seasonal agricultural workers, giving them immigration status in the U.S.

After directing the successful Grape Boycott, which resulted in the historic first collective bargaining agreements for farmworkers in the United States, she negotiated contracts with medical plan, pension plan, job security, and protections from pesticides and harassment. Dolores Huerta was arrested more than 20 times for her non-
violent activism, and was nearly killed by police in a peaceful demonstration in San Francisco.

As a board member of the Feminist Majority, headed by Eleanor Smeal and Peg Vorkin, her activism includes the struggle for gender balance and women's equality. Huerta was the first Latina in the National Women's Hall of Fame, and in 1999 was given the Eleanor D. Roosevelt Human Rights award. Huerta has raised eleven children who are today lawyers, artists, doctors, and other medical professionals.

Anthony Quinn: The Arts

Two-time Academy Award winner Anthony Quinn was one of the first Hispanic actors to become an international superstar. In a career spanning 60 years and more than 300 films, Quinn helped open up lead roles for ethnic actors in Hollywood.

Born in Chihuahua, Mexico, Quinn grew up in Los Angeles, where he started to speak English at age twelve. While working as a janitor in a drama school, Quinn was persuaded to try acting. In 1936, Quinn made his professional stage debut as an aging, drunken actor in the play "Green Beds." Soon after, Cecil B. De Mille cast him as a Cheyenne warrior in "The Plainsman" and offered him a contract.

In the 1940s, as a studio actor, Quinn found himself playing the ignoble savage or villain in countless action-packed melodramas. Occasionally, he got a role in one of the studio's higher profile films, such as "The Road to Singapore," but usually, he found himself pigeonholed as "ethnic." In 1947, after 46 films, Quinn secured his first starring role, in "Black Gold," a film about a Native American couple who discovered oil and made millions. But the good roles were still few and far between. Even an Academy Award for Best Supporting Actor in Elia Kazan's "Viva Zapata" in 1952 did not bring him starring roles.

Frustrated, Quinn went to Europe, where he starred in the brilliant "La Strada," Fellini's 1954 film that became an Oscar-winning smash hit. This allowed Quinn to finally receive star billing in Hollywood. In 1956, Quinn won his second Oscar for his role as Paul Gauguin in "Lust for Life." Two more Academy Award nominations followed, for Best Actor in 1957's "Wild Is the Wind" and 1964's "Zorba the Greek," the film that established him as a superstar.

In the 1980s, Quinn revealed himself to be a talented sculptor and painter. Today, he continues his select performances. His recent films have included "Last Action Hero" and Spike Lee's "Jungle Fever."

Sammy Sosa: Sports

"For me, raising money for my people at home is like a gift. The people in America have responded, and I really really appreciate that."

Sammy Sosa, star outfielder for the Chicago Cubs, first received recognition when he became the only Cubs player to record a 30-homer/30-steal season twice—in 1993 and 1995. Then, in 1998, he made baseball history when he, along with Mark McGwire, broke Roger Maris' 57-year-old record of 61 home runs in a single season. Sosa ended the 1998 season with 66 home runs, was elected to the All-Star Team, and was named the National League's Most Valuable Player.

Sosa was also named Sportsman of the Year by both "Sports Illustrated" and "The Sporting News," and chosen as the 1998 Roberto Clemente Man of the Year, an award given to the player who best balances outstanding baseball skills with civic responsibility.

Sammy Sosa is the only player ever in Major League Baseball to hit 20 home runs in one month (July 1998).

Born in the Dominican Republic, Sosa lost his father at...
seven and began helping his mother by shining shoes, washing cars, and selling oranges, eventually finding a job as a janitor in a shoe factory. He honed his skills playing baseball with his siblings, using a milk carton as a glove. At 16, Sosa was spotted by a scout, and in 1989, he made his Major League debut with the Texas Rangers.

Although a world away from his poverty-stricken childhood, Sosa has not forgotten his roots. He supports several programs and organizations in the Dominican Republic to help update medical facilities and schools and provide economic resources. He established a free medical clinic in his hometown of San Pedro de Macoris. Sammy Sosa is working in the Dominican Republic to build the Sammy Sosa Children's Home, a complimentary weekend home for people in need. It will offer education, food, and medicine. He also plans to inaugurate the Sammy Sosa Little League in Santo Domingo.

**Two-time Academy Award-winner Anthony Quinn was one of the first Hispanic actors to become an international superstar.**

**Looking Ahead**
Work has already begun on next year's program, September 2001. For more information, visit www.HispanicAwards.org or www.nbcvm.com.

**Faculty Position Available**

**STRUCTURAL ENGINEERING - The Department of Civil and Environmental Engineering of the University of California, Davis, invites applications and nominations for a tenure-track position in the area of structural engineering. Requirements include a Ph.D. degree in engineering, a degree in Civil Engineering, excellent potential for quality teaching, and a demonstrated record of success in or evidence of outstanding potential for building a vigorous independent research program in structural dynamics/earthquake engineering. We encourage applications and nominations of candidates that support our goal to increase faculty diversity. The position will be filled at the Assistant or Associate Professor level. The successful candidate will join the Structural Engineering/Structural Mechanics (SESM) group and share responsibilities with her/his colleagues for teaching both graduate and undergraduate courses in structural analysis and design. To be assured of consideration, applications should be submitted by January 15, 2001. Applicants should submit a complete Curriculum Vitae, a statement of teaching and research interests, a list of relevant professional experience and publications, and the names of at least three references to:**

Structural Engineering Search Committee, Attn. Bruce L. Kutter
Department of Civil and Environmental Engineering
University of California
One Shields Ave
Davis, CA 95616-5294

E-mail inquiries with subject line "Structural Engineering Search" may be addressed to: blkutter@ucdavis.edu. Information about the department and the SESM group can be found at: http://cee.ucdavis.edu/.

The University of California is an affirmative action/equal opportunity employer.

---

**UNIVERSITY OF ILLINOIS AT URBANA-CHAMPAIGN**

The College of Applied Life Studies at the University of Illinois at Urbana-Champaign invites nominations and applications for the position of Head of the Department of Community Health. The interdisciplinary faculty and programs of this Department have placed an emphasis on the community context for improving health and health services. Areas of research and study represented in the department include: epidemiology, health policy, planning, and administration, health behavior/education, and rehabilitation and disability studies. An earned doctorate is required. The candidate must be qualified for an appointment as a full professor; salary is negotiable. The starting date is August 21, 2001.

A letter of application, curriculum vitae, and the names and telephone numbers of at least three references should be sent to:

Robert F. Rich, Chair
Community Health Head Search Committee
Attention: Joyce Wolverine
College of Applied Life Studies
University of Illinois at Urbana-Champaign
1120 South Fourth Street
Champaign, IL 61820, USA
Phone: (217) 333-4410
FAX: (217)-333-0404

To assure full consideration, applications or nominations must be received by January 20, 2001.

The University of Illinois is an Affirmative Action/Affirmative Opportunity Employer and, upon request, provides reasonable accommodations to individuals with disabilities. Minorities, women, and other designated class members are encouraged to apply.
MBA Programs Go Global via the Internet

University of Dallas Graduate School of Management Has No Borders

BY MARILYN GILROY

The MBA, Master's of Business Administration, until recently one of the most traditional graduate school programs, is being transformed by the global economy and the worldwide reach of the Internet. Colleges and universities throughout the United States, including the venerable University of Chicago as well as upstarts such as Jones International University, are offering all or part of the MBA degree online to students who study around the clock thousands of miles away from campus.

Experts say that the change is inevitable as business schools search for new sources of revenue. According to a recent article in The New York Times, enrollments in MBA programs at most top schools have dropped due to the strong economy and to demographic shifts that have produced a smaller number of people in their 20s. Without new students from abroad, many programs will experience steeper declines in enrollments.

Some business schools have actually set up overseas operations in Asia and Europe. Others have chosen the Internet. One of the most innovative in offering a full degree online is the University of Dallas Graduate School of Management (GSM). It currently offers four online MBA degrees—Telecommunications Management, Information Technology, Sport Management, and E-Commerce, the last launched in the fall of 1999 and the largest of its kind in the U.S.

This year, the UD Graduate School of Management was awarded a $322,500 grant from eCollege.com to develop more courses and
to market the programs currently offered through the University’s Internet Master of Business Administration (IMBA).

eCollege.com is a leading provider of technology and services that enable colleges and universities to offer an online environment for distance and on-campus learning.

"This is what the power of the Internet has brought to higher education—the ability to offer high quality education to those who would otherwise not have access to it," said Charles Schneider, chief operating officer of eCollege.com.

"The Internet is making courses and degree programs available to anyone, from anywhere at anytime. The technology provides the interaction between the students and the teacher and between the students and their classmates, an experience very similar to the traditional classroom."

However, the students enrolled in the IMBA program are anything but traditional. The University recruits worldwide and has marketed the program to a customer base that includes the military, corporate travelers, and working mothers.

"We have students who spend half their work life flying from one country to another. We accommodate them by providing courses that can be studied on a laptop on the Internet, through video and e-mail and satellite transmission," says Dr. Paula Ann Hughes, dean of the Graduate School of Management.

Recruiting those students is the job of Roxanne Del Rio, GSM director of admissions. Her responsibilities are split between managing the admissions department and creating new markets for the University. It is a job that requires a lot of travel, especially to the Middle East, Latin America, and Mexico. "We rely on the economy of the world to direct us to different markets of the world, including Asia, Europe, Latin America, Mexico, and the Middle East. Within each country, there are pockets that we consider a viable source of potential students," she said.

During recruiting trips, Roxane del Rio says she works a 12- to 14-hour day. "You have to be motivated and have stamina to be a recruiter. You must be able to make an impact and sell your university in the time allotted. You are on 'no' 24 hours a day," she noted. "There is really no time to rest or relax on these trips."

On the road, Del Rio’s typical schedule involves meetings with various constituencies that are sources of potential students. Sometimes she meets with human resource directors of major corporations who might want to send employees to the United States for an MBA degree. She also discusses the possibility of UTD’s executive training program for employees, which are short-term certificate programs that can be delivered via the Internet or at the corporate site by one of the GSM professors.

Del Rio checks in with University officials who might be interested in starting a semester exchange program for students or faculty who want U.S. experience or have a particular field of interest.

But the bulk of her effort is aimed at organized student fairs in each country, with the public invited free of charge to access information about the MBA program.

"At these fairs, we handle 400-700 inquiries during the course of the day," she said. "It’s a good way for us to talk personally to students and distribute brochures. Most importantly, we build a database on these students so that we can follow up on them."

The Graduate School of Management has been particularly successful in recruiting minorities and women, enrollment segments that have increased dramatically during her tenure. Currently, the University of Dallas has more than 2,100 students in the MBA program. Of that total, 25 percent are minority, and 41 percent are female. International students representing 61 countries comprise 25 percent of the program.

Part of the success in attracting these populations is attributed to alliances created with minority not-for-profits and community organizations.

"We have partnered with the National Society of Hispanic MBAs, National Black MBA Association, Hispanic Women’s Network, and Hispanic Bankers Association, just to name a few," she said.

Del Rio’s background makes her especially effective in recruiting a diverse student body. Born and raised in Corpus Christi, Texas, she is a descendant of Mexican heritage. She became interested in this line of work 20 years ago when she was a student

The curriculum for each MBA program includes a set of program courses designed to provide a strong business foundation for all students, plus a set of specialized courses. These courses allow students the flexibility to choose a specific area of study. The MBA consists of 16 courses and can be completed in 1 to 1½ years of full time study.
assistant in the Health Service Department and the Counseling and Testing Department at Del Mar College.

"I found my passion for working with students grew from this experience as an undergraduate," she said.

Del Rio eventually received a Bachelor of Arts degree from Texas A&M and a master's in public administration from the University of North Texas.

She has worked as a consultant to the Economic Development Center at the University of Texas at Arlington and taught in a "special needs" program in South Texas, at an elementary school.

Del Rio maintains an active presence in professional organizations. She is a co-founder of the Dallas-Fort Worth chapter of the National Society of Hispanic MBAs (NHSMB) and has been a chapter vice president of education and director-at-large. She is currently an educational consultant for the NHSMB National Scholarship.

A contributor to Tortilla Soup for the Soul, a collection of inspirational stories for Latinas, Del Rio is also a teacher for the Literacy Volunteers of America.

Her "plate is full," as the saying goes, and there are times when she feels that she is stretched too thin. "It's a challenge for me to find enough time to complete projects, talk with students, recruit, volunteer for organizations, and network with colleagues," she said.

But she adds that she loves having a job that allows her to use her talents creatively to help the University grow and to help students reach their educational goals.

The Application Process

Students who express interest in obtaining a degree through the IMBA program must complete the application process. Admissions requirements for the IMBA are consistent with those of the graduate school's traditional programs. Prospective students must have a bachelor's degree from an accredited institution and meet two of the following requirements: an overall undergraduate GPA of at least 3.0 on a scale of 4.0, a satisfactory score on the GMAT, five years or more of effective managerial or professional work experience.

International students and permanent residents must provide proof of proficiency in English by submitting TOEFL scores and must take the Focal Skills Test to determine English proficiency.

Although the coursework delivery method has changed, Internet classes are based on the same trimester calendar as other University programs. Courses follow a weekly schedule, with assignments due about seven days after being posted. All coursework, including projects and exams, takes place online, and all communication (student-to-student/student-to-professor) occurs via e-mail.

Enrollment is limited to 20-25. Prospective online students are cautioned that "Internet classes are generally more difficult than on-campus classes because of the level of weekly participation and regularity of assignments, which are the basis of grades." They advise students to be prepared to spend at least six to ten hours per week on coursework.

Colleges and universities that have adopted programs like UD's iMBA discover that the dot-EDU University can offer many benefits. It can reach more students by creating educational opportunities that cut across geographical boundaries. A virtual campus can free faculty from certain administrative details and allow them to focus more directly on teaching, providing insight and inspiring students. They might also have more time to spend on their personal research agendas and on consulting that expands their knowledge base and ultimately serves and benefits students.

In addition, student enrollment grows as the dot-EDU University attracts the nontraditional student, one with limited access to higher education due to personal and family commitments, but one who is savvy about Internet technology and its possibilities. When these students are surveyed about their online experiences, they often report that they learn more, like it better, and even feel greater ties to one another than they did in a traditional setting.

But most of all, the online MBA serves as a very practical way of integrating business education into today's global market.

As Dean Paula Hughes says, "The world is the laboratory where our students are making daily business decisions that impact the future of firms. We must give them on-the-job tools, and we must make them accessible outside the traditional classroom."

---

About UD: The University of Dallas was founded in 1956 as an independent Catholic university. The Graduate School of Management was founded in 1966 to create a professionally sound MBA program accessible to individuals already employed in business. More than 75 percent of GSM students work full time. The UD main campus is located in Irving, Texas, with satellite campuses in Plano, Richardson, and Fort Worth.
National Survey Finds 88% Favor Diversity in Higher Ed

65% of Hispanics Intensely Endorse Diversity

BY JEFF SIMMONS

James Wyche has traveled across the world to colleges and universities, and often remarked about a lack of diversity among their workers.

Decades after affirmative action became the spark that ignited a movement to change the face of the American workforce, he believes the strides made were not all that extensive.

“I would say that if you were to look at the rank and file and individual groups across America, you would say that most were not enthusiastic about affirmative action,” says Wyche, executive director of the Leadership Alliance, based in Rhode Island. “There were very few people in the rank and file who had proposed it, and very few people supported it.”

But in recent years, Wyche has noticed a continental shift in public perception, a clamor for change to yield widespread economic returns. His view is borne out in a recent report that stresses the need for a multicultural workforce and a diverse higher education system.

The survey was conducted by the Business Higher Education Forum’s Diversity Initiative, a collaborative effort by the American Council on Education and the National Alliance of Business. The group comprises leaders of the nation’s businesses, museums, colleges, and universities.

The poll determined that the American public seeks diversity for a simple reason: it will help the future of the nation’s economy.

The survey found that a majority of the American public—88 percent of those surveyed—endorses diversity in higher education and that three quarters believe colleges and universities should be able to act to ensure a multicultural student body. Eighty-one percent of survey respondents felt that a “culturally and racially diverse” workforce is important.

“This gives universities more ammunition to say that this is what the American public wants, that most of them want some kind of practice in place,” says Wyche, a professor of medical science at Brown University in Providence, Rhode Island. “When you looked around, there weren’t any studies to support it one way or another. This study gauges how the American public feels.”

The results strongly supported putting muscle behind the rhetoric. A majority of those surveyed felt that there should be some sort of action to ensure that student populations and the economic workforces are diverse.
“The success of America depends on a well-educated, well-trained, diverse workforce,” says ACE President Stanley O. Ikenberry. “The survey findings show that the American people have come to the same conclusion as business and higher education leaders, and view diversity as vitally important to America’s future.”

The Washington, D.C.-based public opinion firm Lake Snell Perry & Associates conducted the random telephone survey of nearly 1,000 adults, ages 18 and older, in May. But earlier, it tested the waters and conducted a similar survey of 1,000 others, and released comparable results.

According to Stephen Butler, co-chair of the Forum’s Diversity Initiative, the findings “reinforce that diversity is our greatest strength as a nation.”

The most recent poll, released in August, has a margin of error of plus or minus 3.5 percent. It found that:

- Three-quarters of those polled “strongly” or “somewhat agreed” that universities and colleges and business should be allowed to take some action to ensure a diverse study body or workforce. A third strongly disagreed. (See Chart No.1)
- Seventy-five percent of those polled agreed that actions should be taken by colleges or universities. That included 35 percent who strongly agreed, and 40 percent who somewhat agreed. Meanwhile, 21 percent disagreed or strongly disagreed, and four percent didn’t offer an opinion.

When it came to the workforce, 77 percent of those polled strongly agreed or somewhat agreed to actions taking place; that included 36 percent who strongly agreed, and 41 percent who somewhat agreed. Another 18 percent disagreed or somewhat disagreed, and five percent didn’t know.

- When affirmative action was mentioned, support for such actions significantly dropped. Fifty-four percent of those polled somewhat or strongly favored it, 31 percent somewhat or strongly opposed it, and 16 percent didn’t offer an opinion.

Support waned when it came to the workplace. Fewer than half—48 percent of those polled—strongly or somewhat endorsed actions in the workplace, whereas a third, 33 percent, somewhat or strongly opposed them, and 19 percent didn’t know.

- Poll respondents were almost equally supportive of diversity in elementary and secondary schools and in the higher education system. (See Chart No. 2.)

Eighty-eight percent felt it was important: 29 percent felt it was somewhat important, and 59 percent maintained it was very important. Eleven percent contended it was not at all important or not very important.

When it came to the lower grades, 87 percent of those polled stressed

Respondents are slightly more likely to believe diversity is important in education than business. They are also more intense in their belief in the importance of diversity in education.

At least three-fourths of every demographic, geographical and political subgroup believes diversity in education is important.

The importance of diversity; 29 percent felt it was somewhat important, and 58 percent, that it was very important. A similar 11 percent noted it wasn't all that or very important, and two percent said it made no difference.

- A slightly smaller number endorsed diversity in the workplace and business. (See Chart No. 3.)

Eighty-one percent of those surveyed felt it was important, a majority of whom—51 percent—felt strongly about this. Seventeen percent felt it wasn't very or all that important, and two percent didn't know.

Women were the most likely to back diversity in the workplace. Surveyors noted that working, retired women without a college education, mothers, respondents in the service industry, Democrats, African Americans, and Hispanic respondents felt it was very important.

- A majority—53 percent—of those polled noted that diversity has had a positive effect on the country. A plurality claims that diversity has had a positive effect on them—44 percent—and their families, and four out of 10—40 percent—said it hasn’t made a difference in their lives.

- Most of those asked which factors would help increase diversity in higher education cited financial aid and workshops to help younger students maneuver the postsecondary school application process.

Ninety-four percent endorsed financial aid programs, and a similar percentage cited workshops run by colleges and universities for middle and high school students and their parents to teach them the basics about applying.

Other programs ranked high—above 90 percent—as well: programs for low-income families to expose them to computers and educational software; projects run by colleges, businesses, and community groups to aid schools with low test scores; and measures to allow college students to mentor minority children.

The poll closely reflected the one taken earlier this year, though that one highlighted a disparity between White and minority parents, and along gender lines. That poll was administered in January and had a margin of error of plus or minus 3.1 percent.

It found that Hispanics, African Americans and women—mainly college-educated, younger women, homemakers, and young mothers—and people in lower-income households were the most likely to believe in diversity in the workplace. Men, on the other hand, were the least likely to cite diversity as important.

Ninety percent of minorities and 78 percent of Whites surveyed said such diversity in business was important, and 100 percent of minorities and 82 percent of Whites said it was vital to the country’s future economy.

Additionally, a majority of both women—88 percent—and men—73 percent—saw diversity as important in the workplace. Similar results were found when it came to the economy: 86 percent of women and 84 percent of men saw diversity as important.

The most likely to intensely embrace diversity in the workplace were African Americans: 80 percent did so. Then came college women, at 68 percent; younger women, at 67 percent; homemakers, at 66 percent; and mothers under 35 and Hispanics, at 65 percent.

The surveyors note that men and those living in the West, North, Central, and Mountain regions were the least likely to believe such diversity wasn't important. Those regions comprise Minnesota, Iowa, Missouri, North Dakota, South Dakota, Nebraska, Kansas, Montana, Idaho, Colorado, New Mexico, Arizona, Utah, and Nevada.
How important do you personally believe it is to have employees of different races, cultures and backgrounds in the workplace or business—very important, somewhat important, not very important, or not at all important?

While at least two-thirds of every subgroup believe it is important, women—especially working, retired and women without a college education, mothers, respondents in the service industry, Democrats, African Americans and Hispanic respondents are most likely to say it is very important to have diversity in the workplace or business.

- The influence of diversity on higher education yielded the same results. Ninety-five percent of minorities and 85 percent of Whites believed it was important. But again, the percent of women who endorsed diversity drew steeper percentages: 93 percent of women felt so, whereas 81 percent of men backed diversity.

Ninety percent of women and 89 percent of men felt diversity was important to higher education, and 96 percent of minorities and 88 percent of Whites did so.

The disparity between men and women didn’t alarm Wyche, whose alliance of 28 colleges and universities lobbies, on behalf of both the public and private sectors, for underrepresented groups of students to advance to graduate schools and into academe. “If you look at the groups that have traditionally tried to integrate, be it into the classroom or business, it’s been a man’s world, and minorities and women have tried to integrate into those traditional strongholds of male supremacy,” Wyche says. “So I’m not surprised that males have been slow to come around. I see tremendous progress with men in their interest in and their support for diversity.”

The survey also highlighted the effort to bring business into the backyard of higher education. Nearly two-thirds—65 percent—of the public supports a partnership between business and higher education to promote diversity. Forty-three percent agreed, while 22 percent strongly agreed, 18 percent remained neutral, 12 percent had some opposition, and four percent didn’t have an opinion.

“Our country needs a variety of different backgrounds and skills to compete in today’s global market,” says Robert Jones, president of the National Alliance of Business. “Developing the full potential of our labor force requires that everyone be given fair access to the best possible education.”

Wyche says that business has been more supportive of diversity for pragmatic reasons: its leaders want a more educated public to be able to better sell their products. “It’s certainly tied to their corporate bottom line—and that is productivity,” Wyche says. “As we have a more diverse United States, it only makes sense that this become an educated public to which they can market their products appropriately.”

Yet, he lamented the paucity of Hispanics and African Americans in higher education, noting that most college enrollees are White and under 10 percent are Hispanic. Those numbers fall dramatically in the upper echelons of higher education, where under five percent of those receiving doctoral degrees are Hispanic.

The Alliance, in a recent newsletter, points to that disturbing trend, noting: “This loss of potential talent poses a real threat to achieving diversity in higher education and the professional workforce.”

Most recently, Wyche has come to the belief that diversity is “now a generalized concept that is more accepted in the United States, irrespective of where you go by region.”

“It’s something we’ve accepted much more. We live in, and our children are growing up in, a much more diverse environment,” Wyche says, pausing to ponder: “The question is now how do we make it work for us, and not work against us?”
TENSIONS EXIST BETWEEN Hispanic AND BLACK STUDENTS

But Collaborative Effort Improves Relations

BY INÉS PINTO ALICEA
A group of Latino college students believes an African American student and his Latina date with rocks. Another group of Hispanic students wreaks havoc at an African American party on a predominantly Latino campus. A Latina woman dating an African American is branded a "whore and slut."

These incidents were reported by students in a study that looked at how Hispanic and African American college students in a minority-rule situation get along. Dr. Lois Mendez-Catlin, assistant dean of the undergraduate dean's office at Bryn Mawr College in Bryn Mawr, Pa., did the study as part of the requirements for her doctorate from Columbia University. She presented her findings in June 2000 at the National Conference on Race and Ethnicity in Higher Education.

Tension between Hispanics and African Americans is often discussed in whispers or behind closed doors, as if talking openly about the friction that sometimes arises between the two groups would set back any progress that minorities as a group have made in their fight for equal and civil rights. Mendez-Catlin chose to bring the dialogue about the relationship between the two cultures to the forefront.

"I think it is time for both groups to talk to each other, dispel any untruths, compromise on other issues, and work together as people of color for a common cause: equality in the greater society," she said.

She conducted the study in the 1994-95 school year at New Mexico Highlands University (NMHU) in Las Vegas, New Mexico, a town with a population at the time of about 15,000, primarily Latino. The University was ranked 53rd in universities that award bachelor's degrees to Hispanics. The student population during her study was 65 percent Hispanic, and most of the students were from northern New Mexico. African American students comprised just one percent of the student population, and the majority were not from northern New Mexico but had been recruited from other institutions by the Educational Testing Service that Hispanic students will become the largest minority group on college campuses in 2015, increasing by 7 percent.

"We need to have a unifying voice as a group of color," she said. "Otherwise we will suffer from the divide-and-conquer mentality. We will always be fighting amongst ourselves. We won't reach our goal of getting equality as a group of people."

The purpose of the study was to identify and describe the student cultures at an Hispanic-Serving Institution. HSIs are colleges or universities that have student populations more than 25 percent Latino. A secondary purpose was to provide a greater understanding of the characteristics of college student peer group formation and its effect on academic, personal, and social development.

The relationship dynamics between the African American and Hispanic students and the Hispanic town were examined as an important component of the study. Through a series of student focus groups, faculty interviews, observations, and questionnaires, a picture of the campus climate was generated.

"The statistics were devastating: 49 percent of the Hispanic students had witnessed overt racist acts on campus, and approximately 12 percent had knowingly engaged in racist acts," said Mendez-Catlin.

"Ninety-two percent of these acts were hostilities against African Americans."

She said 28 percent of the more than 300 respondents in her study said they experienced racism, and 79 percent felt uncomfortable attending functions of other ethnic groups. The respondents were all Hispanic students. She also conducted focus groups.

"The Hispanic students were insulated, and the high numbers of Hispanics made it difficult for them not to have close Hispanic friends and surround themselves with all
things Hispanic and exude strong cultural pride," Mendez-Catlin said. 

"In many instances, NMHU was their first exposure to other cultures, races, religions, and ethnicities. The African American students went there thinking they would be 100 percent accepted. They thought, We're all minorities. We're all going to get along."

Mendez-Catlin said faculty, administrators, and students mentioned that race relations between Latinos and African Americans were a problem or "cause for concern." "All involved parties viewed the problem from very different vantage points," she said. "Several administrators saw the situation as isolated incidents that were no longer a focus. This promotes isolation and not the wanted prevention of a crisis. Students from all groups saw it as a current and recurring issue."

Diane Brimmer, vice president and dean of students at NMHU since 1997, said she was surprised to hear the results of the study because she felt the campus has been tranquil since the years of the study.

"Overall, everyone gets along pretty well," she said. "I see more mixing than I thought I would see. That's the way it has been. The incidents I've dealt with are more conflicts between people rather than something racial or ethnic. It makes me wonder about the report."

But, Mendez-Catlin said the tension at the time arose largely because of the history of the town itself. She said the townspeople were highly suspicious of outsiders because Anglos had come in and bought a lot of the town property and then later migrant workers who were African American arrived in the town and tension arose with them, particularly when the Latina women would date the African American men. One such incident years earlier continued to sour the relationship between the town's

Latinos and African American migrants.

Mendez-Catlin said that people talked about that incident as though it were far more recent and that "over the years, there were so many incidents between the groups that it pulled them farther apart."

"The hostilities of the racists were driven by perceived racial injustices of the past and years of conditioning and insulation," Mendez-Catlin said. Some of the women dating the African Americans, she said, "experienced overt discrimination on campus. It took a lot of courage to go against their peers."

Students told Mendez-Catlin they were frustrated that the beatings were treated as isolated incidents rather than as a recurring pattern that should be investigated. "The students wanted someone to listen to them," she said. "The students also needed diversity training." Many Hispanic students were upset by the treatment of Blacks on the campus but didn't feel they could communicate with the other group. The students needed a "safe zone," she said, a place "where they could gather and ask questions and discuss issues with one another."

According to Brimmer, the situation has changed since Mendez-Catlin visited. She said she feels very tuned in to what the students are experiencing on campus. Brimmer receives all reports from residence halls and campus police of incidents and feels she has a strong working relationship with the student senate. "I don't make any major decisions without consulting the student senate," said Brimmer. "If the student senate comes to me, I make sure their problems are handled. We make sure the students are listened to."

Brimmer said that when she joined the University, she found through her own research and through talks with the student senate that there was a need to strengthen the school's academic support programs for students and to strengthen the judicial program on campus. New students undergo different orientations, including computer, study, and library skills. All students get mid-term grade reports and are contacted after midterm grades to discuss any concerns, she said. Students also have

28 percent of the more than 300 respondents said they experienced racism, and 79 percent felt uncomfortable attending functions of other ethnic groups.
access to tutoring, personal counseling, and academic advising, she added. Brimmer said she felt the code of conduct needed strengthening and improvement.

“I was concerned that the procedures were not written as well as they should be,” Brimmer said. “I feel you need to be clear about what you expect and follow up on that so there is no confusion.” Brimmer said that the strengthening of the student academic support offerings and student judicial process “really made the difference” in improving the campus environment.

NMHU President Selimo Rael said that University officials realized at the time that they had to take steps to improve the environment on the campus. “We knew we had to do a better job,” said Rael, who became president after the study was conducted.

“We knew we had to work together to relate to each other better” In Rafael's view, the environment has improved significantly at the campus since those turbulent years, which he said felt were due more to tension between athletes and non-athletes than to racial and ethnic hostilities. The University was in a period of transition to a new president, which he said contributed to some of the unrest on campus.

Brimmer said that her own position as dean of students had experienced a great deal of turnover prior to her joining the campus. “That is not the case now,” said Rael. “I don't see any evidence of difficulty of communication or understanding along any lines.” The Black student population on the campus has grown to about five percent, and Native Americans represent about 10 percent, which University officials say points to the welcoming environment of the campus.

Retention of all student groups on campus also is on the rise, said Rael. “We have a much more tranquil environment today,” Rael said. “Through the work of the students, faculty, and staff, the environment has changed.”

Rael noted that the University now has Brimmer, who is experienced in handling diversity issues and who has been instrumental in bringing the different groups on campus together for activities, student functions, and studying. Rael said too that both students and faculty undergo diversity training.

“We also have reinforced the student code of conduct so behavior is more closely monitored,” he said. And university officials have also tried to tone down some of the “visibility” given to student athletes, which he said at the time of the study was too much and was not “healthy.”

All of the University’s efforts have paid off, said Rael, adding that reports to campus security have decreased significantly since the 1994-95 school year. Karen Moreno, a law student at Rutgers University (N.J.) who graduated with a bachelor’s degree from Bryn Mawr, said groups. Before that, we plan our events on the same day so there was this pitting of the minorities.”

Geographics and demographics played big roles in the climate at NMHU for the African Americans, said Mendez-Catlin. The town’s history of strained relations between the two groups and the small numbers of Blacks in the area exacerbated the situation at the University.

Mendez-Catlin said that the tensions she discovered at NMHU between Latinos and African Americans were not a true dynamic of all HSIs. She cited another HSI, Hostos Community College in New York, as a good example of how the diversity of the population in the surrounding community can make a difference. Hostos is in a mixed neighborhood where there is not nearly as much tension as in NMHU because there is a larger African American population and the community has a history of living side by side.

“In, for example, New York, it would be unlikely to have such a high level of hostility and antagonism. The HSIs in New York are in very mixed neighborhoods. That is not to say that there are not little hostilities because there have always been hostilities between the two cultures.”

Rael said, however, that he has lived in other larger, more diverse cities, like San Francisco. He finds the racial tensions in Las Vegas are no higher there than in other cities he has experienced. Problems on campus could be combated through a variety of steps, including open communication, exposure to other cultures, development of leaders who can resist peer pressure, and helping students move from following group norms to forming independent views.

“...”

I think it is time for both groups to talk to each other, dispel any untruths, compromise on other issues, and work together as people of color for a common cause: equity in the greater society.”

LOIS MENDEZ-CATLIN,
ASSISTANT DEAN, BRYN MAWR

..."
In 1986, a small group of education leaders in San Antonio, Texas, began an historic endeavor. Primed to formally address the needs of a burgeoning Latino community, which had been experiencing prohibitive high school graduation rates and low college attendance, the Hispanic Association of Colleges and Universities (HACU) was established.

Today, this nonprofit organization, with offices in our nation’s capital, represents 257 HSIs that account for substantial Hispanic enrollment rates. Since the 1992 Reauthorization of the Higher Education Act, HACU-member schools were recognized as Hispanic-Serving Institutions (HSIs), which are defined as institutions having 25 percent or more Hispanic enrollment. HACU also has Associate Member Institutions (AIMs), which enroll at least 1,000 Hispanic students or have a student body that is at least 10 percent Hispanic.

Why are these so important? These institutions comprise two-year and four-year public and private colleges and universities that offer a more affordable and accessible college education.

According to HACU, “given the projected demographic changes, Hispanic enrollment at these schools will continue to grow. For many Hispanics, HSIs are the only realistic postsecondary opportunity because of their proximity to home and reasonable costs.”

The HIS breakdown is as follows: Arizona 3, California 37, Colorado 5, Florida 12, Illinois 6, New Jersey 3, New Mexico 13, New York 9, Puerto Rico 16, Texas 27, and Washington 1. HACU-member institutions in the United States collectively enroll two-thirds of all Hispanics in higher education.

From its inception, its mission has been “to promote the development of member colleges and universities, improve access to and the quality of postsecondary educational opportunities for Hispanic students, and meet the needs of business, industry, and government through the development and sharing of resources, information, and expertise.”

Since 1999, there are 21 HACU international member institutions located in eight countries—one in each of the following: Argentina, Brazil, Costa Rica, El Salvador, Nicaragua, Spain, and Venezuela; and 14 in Mexico. HACU’s growing international membership will be pleased to attend the organization’s first international conference to be held outside the U.S.—HACU’s Fourth International Conference, San José, Costa Rica. It will take place March 4-6, 2001.

About Latinos
Dr. Antonio Flores, president of HACU, notes that the focus on educating Hispanic Americans is urgent and that the organization has analyzed a variety of quantitative and qualitative data regarding the Hispanic population to determine how best to serve this group. The following are some alarming figures. According to the U.S. Bureau of the Census, between 1990 and 2000 the Hispanic population in the U.S. grew 44 percent, while the total population in the U.S. increased by only 10 percent. Age is also a relevant factor. The median age of Hispanics is 26.6 years compared to a median age of 35.8 years for the total population. With respect to high school completion rates, the rate for Hispanics was lower in 1998 (62.8 percent) than in 1986 (63.5 percent). And lastly, according to the National Center for Educational Statistics (NCES), in 1992, 10 percent of the nation’s grade-8 graders were Hispanic, of which more than one-third reported two or more at-risk characteristics—single-parent family, low levels of parental education, limited English proficiency, low family income, sibling dropout, and spending more than three hours a day home alone.” However, despite these obstacles, Latino students still seem to muster the determination and wherewithal to succeed. And organizations like HACU have developed strategies and partnerships and have garnered much
support necessary to help HSIs continue to move these students in the right direction.

Securing increased congressional funding as well as support from other resources is one of HACU’s major undertakings on behalf of HSIs. Flores says, “Under Title V, we recommend that $75 million be appropriated to HSIs in fiscal 2001. So far we have a $68.5 million commitment, which is an improvement from $42.3 million the previous year. Prior to fiscal 2000, it was $28 million. And $12 million was allocated for many years for 200 HSI institutions [at that time], and we couldn’t do much of anything until 1999, when they pumped it up.”

Designating HSIs as land-grant institutions is another potential avenue for funding. Currently, three HSIs are considered Land Grant Institutions. HACU believes that 68 HSIs might qualify for this status because of agriculture-based programs they provide.

More HACU Efforts

Some of HACU’s activities center around increasing HSIs’ participation in the formulation of national education policies, and keeping federal legislators, government agencies, foundations, and the press abreast of HSIs’ accomplishments and their critical role in higher education. HACU also facilitates access to grants and support for HSIs, as well as actively pursuing support from governmental, philanthropic, and corporate sectors.

In addition to being an advocate for Hispanic issues, HACU also notes the power of joining under one banner with other groups of color to voice common concerns and pursuits. This recognition led to the founding of the Alliance for Equity in Higher Education, which is a partnership of HACU, the National Association for Equal Opportunity in Higher Education, and the American Indian Higher Education Consortium to advocate for minority higher education needs.

Piedad F. Robertson, superintendent/president, Santa Monica College in California, and chair of HACU’s governing board, highlighted some of HACU’s achievements and the importance of its presence in the education arena. In Robertson’s recent letter from the chair, she noted: “Congress recognized HSIs as serving a national purpose and a national interest….Our bottom line is simple: to improve the access and success of Hispanic students in higher education.”

Dr. Flores also is proud of the organization’s accomplishments and particularly of the relationships that HACU has established in the process, such as with members of Congress. Senators Jeff Bingaman, N-D New Mexico, and Kay Bailey Hutchison, R-Texas, are co-founders of the Senate Hispanic-Serving Institution Coalition. According to Guemesindo Salas, vice president of governmental relations, in HACU’s October issue of The Voice, “the bipartisan coalition has grown to 28 members, and our staff is promoting formation of a House Hispanic-Serving Institution Coalition.”

Dr. Antonio Flores

Adds Flores, “We have been working very hard with members of Congress to ensure that they get the right information and incorporate it into the decision-making, and the results are beginning to show. Advocacy with the support of friends, members of Senate coalition, and different members of Congress have made it possible. The White House has been supportive as well. We will continue to do this work.”

HACU is also working to secure funding for graduate education programs, implement a National Security Fellows program at HSIs through the Department of Defense, and establish faculty development initiatives and research grants in the areas of health care and in human services fields through appropriations from the National Institutes of Health of the Department of Health and Human Services.

In many of Dr. Flores’ messages to HACU members and the public at large, the words “changing the landscape of education” appear. HACU’s mission is to change the landscape of access and opportunity. Also noteworthy is HACU’s National Internship Program, which provides paid internships during the spring, summer, and fall at federal agencies and private corporations in Washington, D.C., and throughout the country. Upon completion of this 10- to 15-week internship, many students have secured jobs.

MOUs or Memorandum of Understanding agreements with federal agencies are part of HACU’s building-relationships effort, which has translated into millions of dollars of program support and funding. One such MOU was signed with the U.S. Department of Education and is designed to increase student internships, faculty research, campus technology, and other forms of assistance for HSIs. HACU’s partnership with the Department of the Army facilitated a $200,000 grant for HSIs for faculty and student research. Another example is an agreement with the Commerce Department through which HSIs received 33 fully-equipped computer laboratories. Additionally, HACU has requested $28 million in new funds from the Department of Commerce for FY 2001 for science and technology research and curriculum advancement initiatives specifically earmarked for HSIs.

As a result of nurturing relationships and lobbying efforts, Flores says, he believes other minority groups have benefited. “Funding has been increasing too for other minority-serving institutions, maybe as a result of our pressure and efforts. It has really helped them too. After the last four years of experience in looking at the numbers, these other groups will conclude that it benefits them too.

“As Latinos, we are not making a case that we want more or deserve more—our institutions need more because they are educating more people… We need more highly educated people. And to do that, we need to strengthen our education. We are becoming the backbone of the economy. It’s in everyone’s best interest to have a better-educated workforce, which in turn will pay more taxes and depend less on any kind of public assistance. Increasing congressional appropriations to HSIs is not an expenditure. It’s an investment in the prosperity of the nation.”

For more information on HACU, call (202) 833-8361 in Washington, D.C., or (210) 692-3805, or check out the website www.hacu.net.
Presidential Award Goes to Diversity Compact

The Western Interstate Commission for Higher Education (WICHE) has announced that the Compact for Faculty Diversity received the 2000 Presidential Award for Excellence in Science, Mathematics, and Engineering Mentoring from the National Science Foundation. A national partnership composed of the doctoral scholars programs of three regional organizations—WICHE, the New England Board of Higher Education, and the Southern Regional Education Board—the group works to promote minority participation in doctoral programs and academic careers.

To date, the compact, founded in 1994, has supported no fewer than 450 scholars studying in areas ranging from biomedical engineering to comparative literature. WICHE and its 15-member states work collaboratively to expand educational access and excellence for all citizens of the West.

Princeton Holds Latin American Studies Seminars

José Antonio Lucero, a graduate student at Princeton University, will speak Dec. 12 on “Political Representation and Indigenous Movements in the Andes” as part of Princeton’s Program in Latin American Studies (PLAS) Tuesday Seminar Series.

UCSB Professors Contribute to Film

University of California-Santa Barbara Chicano studies professors Dr. María Herrerra-Sobek and Dr. Luis Leal (Ed. note: See related item on p. 44.) contributed to a new film, Indigenous Always: The Legend of La Malinche and the Conquest of Mexico, by Dan Banda. The story has been known to evoke controversy and strong emotions.

Born an Aztec, Malinche was sold to a Maya tribe. When Hernán Cortés arrived in Mexico from Spain in 1519, Malinche’s captors gave the teenager to him as a gift. Malinche learned Spanish and became a translator for Cortés in his dealings with the Aztecs, near what is now Mexico City. Their relationship resulted in a son, but at the conclusion of the conquest, Cortés gave her to one of his soldiers, while he reunited with his wife in Mexico.

To many Mexicans, Malinche is seen as Mexico’s greatest traitor, having helped to put her people under Spanish rule, or they judge her harshly for converting from her indigenous religion to Catholicism. But some applaud her strength in taking her life into her own hands. And still others see her as the mother figure of the mixed-blood mestizo people, who are dominant in the Mexican population.

New Mexico Highlands Hosts Forum on Education of Hispanics

New Mexico Highlands University hosted a national symposium on the “Education of Hispanic Students in the United States.” Speakers included Patricia Gándara, Eugene García, and Francisco García. A roundtable discussion on “The Hispanic Student: A National Perspective” included teachers and students.

Gándara is director of the Linguistic Minority Research Institute at the University of California (UC)-Santa Barbara and a professor at UC-Davis. Eugene García is dean of the Graduate School of Education at UC-Berkeley and former director of the U.S. Department of Education’s Office of Bilingual Education and Minority Language Affairs. Francisco García is director of the U.S. DOE’s Migrant Education Division.

Notable Performances at New World Theater

The 2000-2001 season of the New World Theater, in residence at the University of Massachusetts-Amherst, is under way. Begun as a modest experiment in 1979, the Theater is now a regional arts leader with a national reputation as a visionary cultural institution. Its central focus is theater work traditionally at the periphery; its primary mission, the production and presentation of works by playwrights of color.

Some notable performances recently took place. Antigona, an adaptation of Sophocles’ Antigone, was an artistic collaboration between three members of the Peruvian-based group Yuyachkani. In Federico García’s Verma, the title character tries to understand why her lifelong dream of motherhood has not been fulfilled. Writer Jorge Cortíñas participated in “Project 2050 Open Studio/Open Dialogue,” a program examining the year that demographers have predicted people of color will become a majority in the U.S.

Coming in April is Neporican Stories, written and performed by Latino satirists Culture Clash.

Tampa Hispanic Heritage Honors Parrino

Tampa Hispanic Heritage, Inc., has named Donna Parrino the Hispanic Woman of the Year. Parrino, the University of South Florida's (USF's) director of Latin community advancement, was chosen for her excellent commitment to improving the quality...
of life in the Hispanic community, said María Steijlen, Heritage president.

Since 1992, Parrino has helped USF award more than $640,000 in scholarship money to more than 70 talented, low-income Hispanic students. In 1998, she founded USF’s Latin community advisory committee, to help with efforts that impact the University and the Hispanic community.

Also honored were Barbara Cruz, USF professor of special education; Lisa Costas, psychologist in the USF counseling center; and USF alumnus Mario Eugenia Herrera and Diane Almeida.

**NJPAC Hosts Bocca and Ballet Argentino**

**NJPAC** Julio Bocca and Ballet Argentino were part of the Aetna-US Healthcare Dance Series performed at the New Jersey Performing Arts Center. The program featured works by some of South America’s most acclaimed choreographers, including a new tango set to the music of Astor Piazzolla and the Gran Pas de Deux from *Don Quixote*, Bocca’s most famous role.

Argentina owes much of its current reputation as a leading center of dance to the extraordinary talent of national hero and international superstar Bocca, who leapt onto the dance scene in 1986 as a principal dancer of American Ballet Theatre. He also is the artistic director of Ballet Argentino, which he founded in 1990.

**González Fernández Speaks at NYU**

New York University’s Robert F. Wagner Graduate School of Public Service hosted Mexican Secretary of Health José Antonio González Fernández, who spoke about health care reform in Mexico.

A civil servant since 1978, González Fernández was appointed the Mexican secretary of health in December 1999. Former posts include secretary of labor and social prevision (secretaría del trabajo y prevision social), vice president of the Interamerican Commission for Drug Control at the OAS, general director for North America at the Secretariat of Foreign Affairs, and director for special affairs at the Secretariat of Foreign Affairs. He also has held offices in the Secretariat of Health and the Secretariat of Public Education.

**Latinos Still Need to Catch Up, Says NCLR**

“Now that income is on the rise and poverty is down, we should turn our attention to closing the gaps between Latinos and other Americans,” said Raul Yzaguirre, president of the National Council of La Raza.

The U.S. Census Bureau released data that shows that for the fourth consecutive year, median income of Hispanic households rose while poverty for Latino families dropped. Between 1998 and 1999, real median income for Latino households increased by 6.1 percent; the poverty rate for Hispanic families declined; and poverty declined for Hispanic families with children under 18. Data also show that in 1999, the poverty rate for Hispanic children dropped to its lowest level since 1979; and between 1989 and 1999, real median income for Hispanic households rose by five percent.

However, the poverty rate for Hispanic married-couple families remained almost four times that of similar White non-Hispanic families, and the real median income for Hispanic female-headed households remains significantly lower than that of their White counterparts.

“There is still a fair share of catching up that needs to occur,” said Yzaguirre.

**Saint Mary’s Lauds Contributions of Mexican Americans**

The colorful hospitality rites based on the gospel story of Mary and Joseph seeking hospitality at the inn were the focus of a talk at Saint Mary’s College in Indiana. Jesús Rodríguez, a first-generation Mexican American and a resident of South Bend, was the featured speaker for “Las Posadas—A Pilgrimage to the Inn.” Rodríguez is on the board of directors for Madison Center and La Casa de Amistad.

The Moreau Galleries recently hosted “Mi alma, mi tierra, mi gente: Contemporary Chicana Art,” an exhibit of work by five Chicana artists whose creations offer personal, political, and spiritual perspectives on Chicana identity and the richness and range of Chicana traditions.

**Máquez Promotes Chicana/o Literature**

Teresa Márquez, curator of Chicana/ Chicano and southwest studies collections in the Zimmerman Library’s Center for Southwest Research at the University of New Mexico (UNM), successfully promotes the scholarship of Chicana/Chicano literature and culture.

A faculty member in the UNM General Library for 20 years, Márquez is an organizer, director, and fundraiser for Crítica Nueva, which awards scholarships for their work in literary criticism in the Chicana/o genre. She also directs the Premio Aztlán, which annually awards an emerging writer in Chicano literature. Márquez recently received a $10,000 grant from the McCune Foundation to create “100 Years of Literature in New Mexico,” a long-term project to video record authors and scholars.

Chicana literature scholars from Mexico, Spain, France, Germany, India, and Siberia have fostered relationships with Márquez, due largely to her expertise in the works of Rudolfo Anaya, widely recognized as the godfather of Chicano literature.

**Martínez Celaya Granted Tenure at Pomona**

Enrique Martínez Celaya, a Pomona College (Calif.) faculty member since 1994, was promoted to associate professor of art and granted tenure.

Martínez Celaya teaches Introductory Painting, Advanced Painting, Topics in Twentieth-Century Painting, and Life Drawing. His art has been exhibited in solo and group shows around the world and is part of the collections of the Los Angeles County Museum of Art, the Neues Stadtmuseum der Stadt Landsberg (Germany), Sammlung und Privatmuseum Martin Sächscher (Germany), the Museum of Fine Arts (Texas), and the Contemporary Museum (Hawaii). He has a bachelor’s degree from Cornell, a master’s
from UC-Berkeley, and another master’s from UC-Santa Barbara. He also studied at the Skowhegan School of Painting and Sculpture and at the Liga de Arte de San Juan.

Martínez-Padilla Simmons Joins Florida International

Florida International University (FIU) leaders named a new director of marketing and media relations with nearly two decades of experience as a communications professional.

Todd Martínez-Padilla Simmons, former director of media relations at the University of South Florida, now manages FIU’s external communications efforts and plays a leading role in developing its marketing strategy.

“As we create an innovative new law school and launch a football program over the next two years, the public profile of this institution will grow as never before,” said Martínez-Padilla Simmons. “I look forward not only to the spotlight that those programs will shine on FIU, but in helping to draw attention to the ever-growing number of notable scholarly efforts under way.”

His work has been recognized with awards from the Tampa Bay chapter of the Society for Professional Journalists, the Florida Society of Newspaper Editors, and others. He has a bachelor’s degree from the University of Florida.

Vargas Delivers Chávez Guestship Lecture at Elmhurst

José A. “Pepe” Vargas highlighted the fifth annual César E. Chávez Guestship at Elmhurst College (Ill.) with a lecture on “Latino Empowerment Through Art and Culture.” The Colombian-born Vargas is executive director of the International Latino Cultural Center of Chicago (formerly Chicago Latino Cinema), which he founded in 1987. The not-for-profit Center offers a wide spectrum of cultural and arts events, highlighted by its annual International Latino Film Festival.

Vargas is also spearheading the establishment of the nation’s first pan-Latino, multi-arts facility, which will feature year-round arts and literature exhibits from more than 20 countries. Its goal is to explore and present the lives of the world’s 600 million Latino people. Vargas has a degree in law and social science from the National University of Buenos Aires, Argentina, and a bachelor’s from Columbia College in Illinois.

Alamo District Sets Fall Enrollment Record

The Alamo Community College District (ACCD) in Texas recorded its highest fall enrollment ever for fall 2000, when 39,878 students enrolled, up six percent from the 37,625 of fall 1999.

Northwest Vista College, Palo Alto College, St. Philip’s College, and San Antonio College enrolled more than 41,000 students for spring 2000, more than half of the college population in San Antonio. The district’s enrollment growth is well ahead of projected increases for Texas colleges and universities. The ACCD’s increase is particularly noteworthy in relation to the health of the economy, which might encourage people to pursue jobs instead of a college education.

Ramapo Exhibit Explores People’s Conformity with Groups

Ramapo College of New Jersey hosted “Distinctions,” an exhibition of works exploring perspectives that artists use to capture the ways groups of people identify with or struggle to conform to a group.

Sofía Hernández Chong Cuy, winner of the 2000 Ramapo Curatorial Prize, awarded annually to a second-year graduate student at the Center for Curatorial Studies at Bard College, curated the exhibition. Jennifer Allora and Guillermo Calzadilla, who works with photographs and drawings, put together a charcoal drawing on birchwood installation (Untitled, 2000) depicting a group of people in a queue, the site and motive left undetermined. The drawing will be placed on the gallery floor and composed of un-fixed charcoal, permitting the composition to be gradually erased by viewers. (See photo)

Miguel Calderón, who uses concepts and images from history or the entertainment field, twisting and altering them to create a satirical commentary, produced for the exhibit a video in which he staged and taped a fistfight between two schoolgirls.

Allora and Calzadilla are based in Puerto Rico. Calderón works in his native Mexico City.

Princeton Review’s New Website

The Princeton Review relaunched its college and graduate school admission’s website Review.com, with new features and expanded content.

A leading provider of test preparation and college admissions services, The Princeton Review wants to attract more students, parents, and admissions counselors to its online assistance.

Describing the admissions process as confusing and costly, Evan R. Schnittman, executive vp, said, “The improved capabilities of our re-launched site strengthen our ability to provide, free of cost, a centralized online source for college and graduate school admissions, information, and tools.”

Notre Dame Grant to Serve Latino Communities

The University of Notre Dame’s (Ind.) Institute for Latino Studies (ILS) received a $5 million grant from the MacNeal Health Foundation for a unique initiative both to study and serve the Latino communities of the Chicago area.

“The Berwyn-Cicero Hispanic Community Initiative in Education, Health, and Family” will include demographic research on Latino families and neighborhoods of Chicago, the development of a data base of statistical information on Latino communities, and a variety of programs to train and support Chicago-area community leaders working to improve neighborhoods where the poorest Latino families live.

Notre Dame’s ILS advances teaching and research on the Latino population, using interdisciplinary and comparative approach to its primary aim is to further the understanding of the history, culture, literature, and sociopolitical position of Latinos in the U.S.

Sena New Registrar at New Mexico

Kathleen Sena is the new University of New Mexico (UNM) registrar.

University College Dean Peter White said that Sena has evaluated and helped to implement different technological systems at UNM and carefully safeguarded the acad-
emic records of UNM's students and the integrity of athletic admissions and eligibility. She has contributed to campus-wide discussions and policy development in curriculum development and enrollment management, grading, the quality and availability of instructional space, learning communities, and student retention.

Sena has a bachelor's degree from UNM.

**Cortines Discusses Kaiser Foundation Sex Education Report**

Ramón Cortines helped present a report by The Henry J. Kaiser Family Foundation, "Sex Education in America: A View from Inside the Nation's Classrooms," a series of national surveys with students, parents, teachers, and principals.

Cortines, former schools chief in New York City, Los Angeles, and San Francisco, discussed the report's findings, which examined: What is and what is not covered in sex education today? Who determines the curriculum? Are schools teaching what parents want taught? What do students say they need to know, and are they learning it in school?

ABC Nightline correspondent Michel McQueen Martin moderated a panel discussion of real-life experiences with sex education.

**St. Francis Holds Hispanic Festival 2000**

Fleet Bank and St. Francis College (N.Y.) sponsored a month-long series of events during Hispanic Festival 2000. Events included a lecture, writing contests for Hispanic high school students and senior citizens, a Hispanic food festival, a film festival, a salsa concert, and a photography exhibit.

Dr. Enildo Garcia, professor of Spanish, foreign languages, fine arts, and international cultural studies at St. Francis, gave a lecture, "Cultures in Contact: Irish, Italian, and American Visitors in Cuba." Musicians from some of America's renowned Latin bands traced the history of salsa music from its Afro-Cuban origins to its tremendous impact on contemporary American pop. "My Puerto Rican Roots" featured photography by Felipe Arroyo and the music of Puerto Rico.

**"Mexico: From Empire to Revolution" at the Getty**

The Getty Research Institute at the Getty Center in Los Angeles, California, is staging a two-part exhibition featuring rare photographs of Mexican history.

"Mexico: From Empire to Revolution" includes more than 250 photographs and albums produced between the 1850s and the 1920s depicting Mexican history and culture. With images ranging from ancient Mayan ruins and the remote countryside to scenes of Maximilian's execution and the violent 1910 revolution, the exhibition explores how early photographers captured not only momentous political struggles but also the intimate details of everyday life. It explores Mexico's legacy of empires, intervention, and revolution. It also looks at the importance of photographs as both historical documents and instruments used to shape public perception of the events of the day and encourage tourism and economic investment.

**Guillermoprieto to Lecture at New Jersey City**

On April 9, Mexican-born journalist and MacArthur Fellow Alma Guillermoprieto will take part in the New Jersey City University (NJCU) 2000-2001 University Lecture Series, an annual program sponsored by the NJCU division of university advancement. A resident of the U.S., Brazil, and Colombia, Guillermoprieto is known for her coverage of Latin America. Her recent work includes the book *The Heart That Bleeds* and a four-part series on the Colombian drug wars in *The New York Review of Books*. Dr. Julio Guillian, professor of mathematics and chair of the university senate at NJCU, will be Guillermoprieto's presenter.

John Updike, one of America's most prolific and celebrated writers, will give a lecture Feb. 12. Author Steven Pinker and cultural historian Tom L. Feudenberg were featured earlier.

**Colorado-Boulder Explores Chicano History**

UMAS, the United Mexican American Students organization at the University of Colorado (CU)-Boulder, hosted a series of panel presentations in recognition of Chicano History Week. The annual event addresses issues important to the Chicano community while revisiting the history of the Chicano activist movement. The panels promote cultural education, appreciation, and respect.

The program "Sweet Victory: The Defeat of Tom Tancredo/Linda Chavez Movida to Eradicate Bilingual Support Efforts" focused on the defeat of a statewide initiative to eliminate bilingual education in schools. Ramón del Castillo gave a poetry reading, "Yato Loco Presents: King Crack," examining the use of crack, its effects, and the devastation it causes within the Latino community. The personal experiences of seven Chicano alumni from the turbulent 1970s were related during the program "1970s Chicano Students Speak Out!" The panel discussion "Raza Logia: Empowerment Model for Immigrant Families in a New Society" featured a bilingual dialogue delving into the issue of "bilingualism" and its importance in society.

Teresa Estrada (pictured) is the UMAS council chair at CU-Boulder.

**CCNY Students Intern in Nation's Capital**

Each summer, City College of New York's Marvin Rosenberg/Hubert H. Humphrey program in public affairs sends its top students to Washington, D.C., for practical experience in prestigious government offices, political and professional organizations, and public interest groups. Students test and hone their skills in the applied world, under supervision.

This past summer, Gabriel Hernández and Adriana Espinosa (pictured) were two of 10 interns who began to explore the public policy world. Hernández interned at the Mexican American Legal Defense and Educational Fund. Espinosa, an economics major, interned for the chief economist at the General Accounting
Office (GAO). A report of a presentation she made to the staff economics team on the challenges of e-government and refining the GAO's web presence was sent to the GAO comptroller-general, who thought highly of it.

**Nassau Community Celebrates Hispanic Culture**

Nassau Community College (NCC) in New York celebrated Hispanic Heritage Month with enlightening programs sponsored by the NCC Faculty Student Association and the Student Organization of Latinos.

NCC Professor Miguel Alonso (pictured l), history instructor, moderated a discussion exploring the complex and contrasting emotions that Columbus Day generates in the Latino, Native American, and Italian American communities. Dr. Lorena Terando (pictured r), coordinator of the Translation Project at New York University, spoke about human rights in Colombia. She is the founder of Paz Para Colombia, an organization that educates people on human rights violations in that country.

Other guests included Monica Saenz, assistant editor of *Latina Style* magazine; Virgilio Bravo, editor of *Stress*, a hip-hop magazine; Jordan Rivera, dancer and dance studio owner who has performed with Celia Cruz, Johnny Pacheco, Victor Manuel, Tito Nieves, and the Fania All-Stars; and Aurelia Hoes, an educator and Internet discussant.

**Ortega Joins Texas-San Antonio**

Richard P. Ortega joined the University of Texas-San Antonio (UTSA) as associate director of development for the College of Sciences and the College of Engineering, two of six colleges created in a recent academic restructuring effort. He came to UTSA from the New Mexico Institute of Mining and Technology, where he worked in advancement, development, marketing, and alumni affairs for more than 12 years. Before that, he spent five years at CSU-Sacramento, where he developed and directed the minority engineering program.

At UTSA, he oversees fundraising for science and engineering, and will help formulate UTSA's campaign for funds to construct and equip a bioengineering/biotechnology building.

Ortega has a master's degree and doctorate from the University of New Mexico.

**California-Santa Barbara Faculty Named to Editorial Board**

Three University of California-Santa Barbara (UCSB) department chairs were named to the editorial board of the University of California Press.

Joining the board are Jacqueline Bobo, women's studies department; Francisco Lozefi (pictured), Chicano studies; and Wade Clark Roof, religious studies. The three were appointed to five-year terms on the board and join department of history chair Jack Talbott, giving UCSB four positions on the 20-member board.

**New Jersey City Staffer Exhibits Paintings**

"Silent Screams: Paintings," an exhibit of works in progress by Hugo Morales, assistant director of publications at New Jersey City University (NJCU), was shown at the Consulate of Ecuador in Jersey City.

Born in Ecuador, Morales has exhibited his paintings and graphics in galleries throughout the New York/New Jersey metropolitan area. His work has appeared in many education journals and commercial publications.

Since 1990, Morales has chaired NJCU's council on Hispanic affairs, coordinated many cultural events, and curated art exhibits ranging from pre-Columbian to contemporary, for the NJCU council.

Morales holds a bachelor's degree in fine arts and master's in art education, both from NJCU, and is now pursuing a master's in fine arts.

**Nazareth Hosts Spanish American Poet**

Spanish American poet Don Emilio Martín gave a bilingual reading of his original poetry at Nazareth College's (N.Y.) Casa Hispana.

Born and raised in Madrid, Martín was a professional soccer player and a corporal in Francisco Franco's army before relocating to the U.S. and beginning his career as a poet. He founded the Northeast Philadelphia Poetry Forum, and was its director until 1991. Currently, he is president of the Latin American Guild for the Arts and a member of the Manayunk Art Center in Philadelphia, where he resides.

Martín has written 12 books of verse in Spanish and English. His poems have appeared in many local and international journals, magazines, and newspapers.

**News from the White House**

President Clinton commended the U.S. Department of Education for awarding $42.3 million in grants to help school districts create Smaller Learning Communities in large high schools. Nearly three-quarters of American high schools have more than 1,000 students enrolled. Clinton said the grants will help states and local communities create environments to enhance student safety and academic achievement.

"We know that smaller schools provide more personal attention and greater academic support than large schools, and outperform large schools on most measures of school success, including grades, test scores, attendance, and graduation rates," said Clinton, "and this impact is even greater for minority and low-income students."

**Temple Holds Latino Cultural Events and Lectures**

Temple University (Pa.) hosted its 10th annual Latino Heritage Month celebration, starting with a concert of many forms of traditional Spanish- and Latino-influenced classical music.
and ending with the symposium, “Latinos in Public Policy in Philadelphia.”

Maria del Pico Taylor of the Boyer College of Music led an interactive lecture and recital, “What Creates the Spanish Sound: Arab, Gypsy, Native American, and African Influences,” examining the roots of Latino music. The Asociación de Estudiantes Latinos and the Council of Latin American Students sponsored the student forum “Racism Within and Beyond the Latino Community.” University of Texas-Austin Professor America Rodríguez gave a lecture, “Making Latino News: Race, Language, Class.” Dr. Julio Morales, professor of Puerto Rican studies at the University of Connecticut, spoke on “Los Niños de los Barrios II.” Noted author and Amherst College Professor Ilan Stavans discussed his new book The Sounds of Spanglish: An Illustrated Lexicon.

Clark Gives Award to del Prete

Clark University in Massachusetts presented Thomas del Prete, director of its Jacob Hiatl Center for Urban Education, with the John W. Ludlum Community Service Award.

The award, which includes a $5,000 cash prize, recognizes the contributions made to the Worcester, Mass., community by Clark faculty, students, and staff.

Del Prete has been with Clark University since 1994. He became director of the Jacob Hiatl Center after serving as associate director from 1994-1997. In June, he was instrumental in earning a $250,000 grant in the Carnegie Corporation’s Schools for a New Society Competition.

Menchu Tum Lectures at San Francisco

Rigoberta Menchu Tum, Nobel Peace Prize-winner and fierce advocate for the rights of the indigenous people of Guatemala, visited and lectured at the University of San Francisco (Calif.). The fourth of five living female Peace Prize-winners to visit the campus, she lectured on “Human Rights and Social Justice.”

In January 1980, government soldiers killed her father and 38 others, burning them to death as they sought refuge at the Spanish embassy. Guatemalan security forces had already kidnapped, tortured, and killed her mother and younger brother. Her experiences are recounted in the 1985 book I Rigoberta Menchu: An Indian Woman in Guatemala.

Today, she continues her work for human rights and international justice through the Rigoberta Menchu Tum Foundation, based in Guatemala City.

Ballet Folklorico Performs at Northern Virginia

Ballet Folklorico de la Tierra del Encanto performed at Northern Virginia Community College’s Annandale Campus. The dance troupe, from Las Cruces, N.M., specializes in performing once-traditional dances of the Colorado, New Mexico, and Chihuahua regions.

Ballet Folklorico performed dances from Nayarit and Jalisco, as well as Nuevo Mexico. The troupe invited student participation for El Cutillo, the musical-chair-style dance, and thrilled the audience with a mache dance.

Led by José Tena, ballet Folklorico has performed for more than 20 years. It uses authentic dance steps with traditional music, and also tells the history of the region from which the dances come.

Cal State Northridge Honors Phenomenal Women

Health reporter and columnist Dr. Aliza A. Lifshitz (pictured) and singer-songwriter Rosa Martha Zarate-Macias were two of five women recognized at the biennial Phenomenal Women Awards reception and silent auction, sponsored by CSU-Northridge’s women’s studies department.

Born in Mexico City, Lifshitz was four-time president of the California Hispanic American Medical Association and is a champion of Latino and woman doctors. She has been the health reporter for the Univisión Television Network since 1988 and is medical editor of Primer Impacto, a Spanish-language news magazine.

Zarate-Macias’ work as a songwriter and community organizer is inspired by her experiences as a Mexican-born immigrant to the U.S. and her knowledge of her culture’s history.

Jean Bruce Poole, Wakako Yamauchi, and Bettina Aptheker also won the award, which gets its name from Maya Angelou’s poem “Phenomenal Woman,” recognizing the strengths, abilities, and integrity of women.

Viva Quetzall! Performs at Sullivan County

International folk-fusion group Viva Quetzall! performed at Sullivan County Community College in New York, providing an evening of jazz and rock with a South American flair.

Viva Quetzall! is composed of three traditional and folkloric musicians from Chile and Peru and four New England rock and jazz musicians. Together, they play original folk, pop, jazz, and rock amalgams based on Inca, Andean, Quechua, and Afro-South American themes.

Viva Quetzall! accents the contributions of four major cultural influences that have shaped modern Latin American music—the indigenous South American, the West African, the Euro-Iberian, and the contemporary North American. The group’s musical purpose is to make its audiences aware that America is larger than just the United States. Its members feel that the diverse cultures of America—tied by history and geography, but separated by politics and language—can be effectively reconciled by the sharing of their many musical expressions.

Escalante Addresses St. Edward’s

Acclaimed educator Jaime Escalante, whose life and motivational teaching tactics were depicted in the 1988 film Stand and Deliver, spoke at St. Edward’s University in Texas.

Stand and Deliver documents how Escalante, a high school teacher, motivated his
classes of underprivileged, Hispanic students to set standards in mathematics all but unequaled in American education. An immigrant from Bolivia, Escalante has become a folk hero. In the book *Escalante: The Best Teacher in America*, he is described as vital, genuine, and challenging. He says, “I do not believe in the gifted. If they have the *ganas*, I can make them do it.” In 1999, he was inducted into the Teachers Hall of Fame.

KKAN-TV anchorwoman Erica Olivares exceeded Escalante's visit.

**North Texas Holds Hispanic Dance and Art Exhibition**

The University of North Texas System Center at Dallas hosted a dancing and art exhibition in celebration of Hispanic Heritage Month.

Local, self-taught artists—including Cynthia V. Anzaldúa, Sal Barron, Juan Hernández, J. Salvador López, Jess Rodríguez, Sarhady, and Albert Shaw—exhibited abstract, realistic, and traditional paintings at the event. The Anita N. Martínez Ballet Folklorico junior ensemble performed.

**Mujer 2000 Honors Hernández and Mason**

The National Hispana Leadership Institute recently held its annual awards gala and leadership training in Orlando, Fla. Named “The 2000 Mujer National Awardee” was Antonia Hernández, president and general counsel of MALDEF, the Mexican American Legal Defense and Educational Fund. Marylou Olivarez Mason, executive director of the Michigan Commission of Spanish Speaking Affairs, in Lansing, Mich., was named “The 2000 Mujer Regional Awardee.”

The Mujer awards recognize the sustained lifetime achievement of Hispanic women who have served the Hispanic community and exemplify the philosophy and values of justice, integrity, inner peace, commitment, vision, and deep pride in their culture and community.

At the reception and dinner, artwork by Sina Sutter (shown here is her “Regreso a la Esperanza”), Angie Maloney, and Aurora Rincón was exhibited.

**Publications**

**Disposable Domestics: Immigrant Women Workers in the Global Economy**

By Grace Chang

Illegal. Un-American. Disposable. In a nation with an unprecedented history of immigration, the prevailing image of those who cross our borders in search of equal opportunity—in particular women of color of childbearing age—is that of a drain on society. This vital account of immigrant women's experiences proves just the opposite: that the women who perform our least desirable jobs are the most crucial to our economy and society.

**The Brazilian People: The Formation and Meaning of Brazil**

By Darcy Ribeiro

This is the first English-language translation—translation by Gregory Rabassa—of the book that is the culmination of the life work of Darcy Ribeiro, one of Brazil's leading 20th-century intellectuals, known internationally for his work in Indian affairs and his political activism. First published as *O Povo Brasileiro* in 1995, two years before Ribeiro's death, it quickly became a controversial best-seller, in part because of its portrayal of the complex and volatile reality of Brazil's national identity as a product of its ethnic roots.

**Shot in America: Television, the State, and the Rise of Chicano Cinema**

By Chon A. Noriega

Chon Noriega, an associate professor of critical studies in the department of film and television at the University of California-Los Angeles, takes direct aim at the representation of Chicano filmmaking in U.S. media history. This comprehensive study has broad implications for our understanding of cultural politics and the entertainment industries.

**He Walked in and Sat Down and Other Stories**

By Rosaura Sánchez

The stories in this bilingual collection portray a cross-section of Chicano men and women in contemporary United States. Here are workers living in the chaparral around the San Diego border with Mexico, battered wives, farmworkers, divorced women rebuilding their lives, a traveling salesman, and conflicted academics. Translated by Beatrice Pita.

**El Puente/The Bridge**

By Ito Romo

Thirteen women of all ages and backgrounds react in unexpected, funny, and mysterious ways when one day the Río Grande river suddenly turns a crimson red. The bridge,
which the women cross and re-cross in the course of this cycle of stories, becomes a site where they acquire knowledge about their lives and their landscape, as the mystery of the color of the river unrolls.

Multicultural Cookbook of Life-Cycle Celebrations

By Lois Sinaiko Webb

Restaurant consultant and caterer Lois Sinaiko Webb combines information about life-cycle events, or rites of passage, with recipes for the foods that are used to celebrate these events. Covering regions and cultures from all over the world, each country profiled contains a short description of its ethnic and religious makeup, and how its rites of passage are celebrated.

Encyclopedia of the Mexican American Civil Rights Movement

By Matt S. Meier and Margo Gutiérrez

Bringing together a wealth of data on the Mexican American struggle for civil rights, this authoritative publication provides factual, up-to-date information on the concepts, issues, plans, legislation, court decisions, events, organizations, and people involved in that long fight.

Luis Leal: An Auto/Biography

An outstanding scholar of Mexican and Latin American literature, Luis Leal was one of the first to recognize the viability and importance of Chicano literature, and, through his perceptive literary criticism, helped to legitimize it as a worthy field of study. In this testimonio, or oral history, Leal reflects upon his early life in Mexico, his intellectual formation, and his work and publications as a scholar.

Fragmented Ties: Salvadoran Immigrant Networks in America

By Cecilia Menjívar

In a comprehensive treatment of Salvadoran immigration, Cecilia Menjívar gives a vivid and detailed account of the inner workings of the networks by which immigrants leave their homes in Central America to start new lives in the Mission District of San Francisco.

Honorable Lives: Lawyers, Family, and Politics in Colombia, 1780-1850

By Victor M. Uribe-Uran

This book examines the social origins, education, and careers of those qualified to practice law before the highest colonial courts—Audencias—and the republican courts after the 1820s in Colombia.

The U.S. Invasion of Panama: The Truth Behind Operation "Just Cause"

Prepared by the Independent Commission of Inquiry on the U.S. Invasion of Panama

The Independent Commission of Inquiry on the U.S. Invasion of Panama, was established by a politically diverse group of Panamanians, others from the Caribbean, and U.S. human rights activists, including attorneys, journalists, and clergy.

This book counters the media blitz that portrayed the invasion of Panama as a restoration of democracy and a war against drugs. It includes the Commission's report on the widespread civilian deaths, political repression, and property destruction caused by the U.S. invasion and occupation of Panama.

Mask of Democracy: Labor Suppression in Mexico Today

By Dan La Botz

Incorporating scores of interviews with Mexican rank-and-file workers, labor union officials, women's organizations, lawyers, and human rights activists, Dan La Botz illustrates the history of Mexican workers and offers insights into their post-NATPA prospects.

Central America and the Law: The Constitution, Civil Liberties, and the Courts

By Mark Tushnet

This is an important and useful legal primer for Central America activists. It shatters the myths about the neutrality of U.S. law and situates legal questions where they really are—in the arena of political struggle.

Emilio
By Julia Mercedes Castilla

With her engaging and timely novel for young adults, Julia Mercedes Castilla spins a compelling tale of the obstacles facing not only young immigrants, but also all teens facing life’s choices in the new millennium.

Anything But Love
By Gustavo Pérez Firmat

This is the first novel from Gustavo Pérez Firmat, author of the acclaimed Next Year in Cuba. Pérez Firmat has imbued this story about Frank Guerra, a perfectionist who upturns his whole life on a quest for love, with a Cuban American flavor uniquely his own.

Trino’s Choice
By Diane Gonzales Bertrand

Seventh-grader Trino Olivas, a jaded 13-year-old who doesn’t have much use for most “school types,” is confronted with the many challenges of everyday life—such as trying to decide what kind of choices he needs to make, those that will impress his friends or those that are best for him. Named “Best Book of the Year” in the young adult literature category by ForeWord Magazine.

Many publications featured in this section are available through amazon.com.

CONFERENCES

National Association of Student Personnel Administrators Institute
January 10-12

Contact: (202) 265-7500; e-mail, office@naspa.org.

NALAC Conference
January 17-21

Texas A&M University-Corpus Christi will help host a conference of the National Association of Latino Arts and Culture (NALAC), dedicated to defining the role of Hispanic art in the community. At the Ramada Inn Bayfront in Corpus Christi.

Workshops are scheduled on leadership and youth, the impact of immigration, assimilation and hybridization; and digital technology. There will be performances, readings, and exhibits throughout the conference, along with workshops in dance, music, theater, visual arts, literature, performance art, and media arts.

Contact: Lilly Flores Janacek, (361) 825-2427.

AAHE Conference on Faculty Roles & Rewards
February 1-4

This 9th annual conference will focus on the changing professoriate and the two developments most salient in driving that change—new technologies and the generational shift now taking place in the faculty. At the Tampa Marriott Waterside in Tampa, Fla.

USC Continuing Education 2001 National Conference
February 11-14

University of South Carolina’s department of continuing education presents “Stop Surfing, Start Teaching: Teaching and Learning through the Internet.” In Myrtle Beach, S.C.

Contact: (803)-777-9444; e-mail, confs@gwm.sc.edu; website, www.rcce.sc.edu/ssst.

ACE 83rd Annual Meeting
February 17-20

The American Council on Education will meet on “Shaping Public Policy with New Leaders.” At Marriott Wardman Park Hotel, Washington, D.C.

Contact: (202) 939-9410; website, www.acenet.edu.

AACE 12th International Conference
March 5-10

The Association for the Advancement of Computing in Education presents the Society for Information Technology and Teacher Education 2001 12th international conference. In Orlando, Florida.

Contact: e-mail, info@aace.org; website, www.aace.org/conf.

2001 ASCD Annual Conference and Exhibit Show
March 17-19

Among the Distinguished Lecturers at this year’s conference of The Association for Supervision and Curriculum Development will be Jaime Escalante. The conference theme is “Reaching for Balance: Resolving Educational Dilemmas.” In Boston.

AAHE 2001 National Conference on Higher Education
March 24-27

The American Association for Higher Education presents “Balancing Private Gain and Public Good.” The conference will “anticipate issues, debate ideas, highlight innovation and best practice, foster leadership and professional development, and provide networking opportunities. At the Marriott Wardman Park Hotel in Washington, D.C.

National Association for Ethnic Studies Annual Conference
March 29-31

This year’s conference theme: “Race, Ethnicity, and Pedagogy in the 21st Century.” In New Orleans.
International Mentoring Association Annual Conference
March 29-31

This year’s conference theme: “Diversity in Mentoring.” In Washington, D.C.
Contact: at Western Michigan University; (616) 387-4174.

Center for the Study of Diversity in Teaching and Learning in Higher Education National Conference
April 18-21

“The Global Perspective: Teaching, Learning, and Student Equity” includes, among other conference highlights, concurrent sessions on critical thinking skills, curriculum, pedagogy, collaborative and interdisciplinary learning, and learning communities. At Hotel Inter-Continental, Miami.

NISOD 2001
May 27-30

The National Institute for Staff and Organizational Development, along with the Community College Leadership Program, present their 23rd annual international conference, “Making a World of Difference...” “A unique mix of professional development activities for a unique audience of outstanding community college administrators and faculty.” In Austin, Texas.
Contact: John Rouche and/or Suanne Rouche, (512) 471-7545.

---

We Stand Corrected...

Two thoughtful readers from Van Nuns, California and Newark, New Jersey wrote to HO to express their “dismay,” “agitation,” and “nervousness” over our erroneous inclusion of MIT, Stanford and the University of Chicago among the Ivy League Schools in our October 9 issue. Our reactions were much the same.

There are only eight institutions that comprise the Ivy League, which in fact, started out as a football consortium with only four schools—Harvard, Yale, Princeton, and Cornell. Columbia, Brown, Princeton, and the University of Pennsylvania are the other four.

In doing research for this article (and the backup material gathered is substantial and from reliable sources), all of the schools mentioned in the article were listed, and none of the sources refuted their Ivy League designation. Some of the characteristics of Ivy League schools are relatively small undergraduate populations, large endowments, prestigious academic reputations, and consistent ranking among the top 15 universities. There are many schools that can be considered in the same “class” as Ivy League schools—Stanford and the University of North Carolina, for example, among them. In fact, The Square, a network of Ivy League members, includes alumni from an array of “peer institutions.” We concur with what one of our readers noted regarding the danger of “assuming something is true” — it is that there is no such thing as enough fact-checking even with the certainty that one’s sources are indeed reliable.

Our apologies to our readers and the three institutions, whose sterling reputations need no enhancement.

In the Book Review section of the October 23, 2000 issue, the city of publication provided was incorrect. The University of Arizona is in Tucson, not Albuquerque. We regret the error.

FAX: (201) 368-0433
Book Review

By Mark Saad Saka, Ph.D.

This is an up-to-date and important collection of essays on the intersection of racism in the United States and Latina/o people and politics. Elizabeth Martínez illuminates key issues concerning race, class, ethnic identity, gender representation, and the hopes for a multicultural democracy, providing a “living history” of the achievements and continuing struggles of “el movimiento.”

The author of six books, Martínez synthesizes past and present and provides a vision of a humane future based upon universal human family values. Martínez moves beyond the black-white ethnic paradigm familiar to most Americans and broadens the notions of inclusivity to incorporate Latina/o women and issues of color into our historical and current perspectives. This is imperative when one considers that Latinos will soon represent America’s largest minority and that Latino poverty rates continue to rank higher than those of any other ethnic group as America’s ethnic and demographic structure has evolved, so too has its racism. Martínez eloquently articulates the need for our conceptual models of race, class, and gender to likewise evolve in order that progressive forces successfully confront a resurgent white supremacy and continuing structural discrimination. But rather than attempting to displace African Americans by aggressive Latino posturing, the book calls for greater cooperation and unity between the two, based on a common historical oppression of and resistance to white supremacy.

The numerous essays specifically address critical topics. Modern advertising culture, which objectifies Latinos, particularly Mexicanos, to a comical and nonsensical role is one such issue. The famous Taco Bell advertisement that tells its viewers to “make a run for the border,” so reminiscent of the Frito Bandito of yesteryear, reinforces negative stereotypes of Mexicanos as foreign and alien. Another important essay places the current immigrant backlash within a global context by examining such racist sentiment in France, which has witnessed tremendous xenophobia against Algerian immigrants, and Germany, which has experienced violence and racism against its Turkish population. By placing American nativist reaction against Mexican immigrants within a worldwide perspective, Martínez transcends boundaries in an essay titled “No hay fronteras.” A third area of current topics examined is the reactionary assault on multiculturalism, which she considers a tactic used by reactionary forces to sustain economic, political, and cultural hegemony.

Much of the book concerns the prevalence of campus racism and examples of violence and bigotry directed against Latino and other students of color. Martínez specifies a series of proposals to reduce campus racism, including a strong administrative commitment to equality and diversity, the availability of physical space, with adequate staff, for those whose job it is to increase diversification, greater efforts at hiring and recruiting minority faculty (even more urgent in recent years as the first generation of Latino scholars, hired in the early 1970s, reaches retirement age), more aggressive recruitment of students of color, and a greater diversification of course offerings.

Martínez provides a personal Latina perspective on the Chicano movement and recounts Chicana debates and struggles to demand greater political and cultural inclusion from a largely male-dominated social movement. She addresses the phenomenon of Chicanas being charged with “selling out” their people because of their focus on women’s issues. She counters the idea that the largely upper-middle-class white women’s movements of the 1960s bypassed Chicana issues. She emphasizes that all women of color benefited from the women’s movement because it encouraged dialogue, helped launch women’s studies programs, and created the space necessary for Latina advancements in the 1980s and 1990s.

A favorite essay of mine and of an education major in my survey course dealt with the Euro-centric bias prevalent in grade school textbooks. This essay illuminates the structural imbalances in childhood education that instill a form of self-hatred among Latino youth. Martínez pulls no punches as she names the Houghton-Mifflin text as particular offensive for its portrayal of Chicano resistance hero Joaquín Murrieta as a “bandit.” The text’s complete omission of the gross violations that followed the Treaty of Guadalupe Hidalgo and the reference to Manifest Destiny as having brought “freedom” and “enlightenment” to the “less fortunate Mexican and Indians” further illustrates institutional racism deeply entrenched in our educational culture. With books like these, is it any wonder that so many Latino youth drop out of high school and never reach institutions of higher education?

This book is well suited to undergraduate courses in American history and women’s studies, and is a must read for any multicultural course. I assigned it to my Introductory U.S. history course, and it had a great impact on the Anglo students, who had never been exposed to such crucial issues as environmental racism and non-Euro-centric interpretations of American history. De Colores presents a good assessment of the triumphs and setbacks of more than three decades of social struggle and establishes a blueprint for a more inclusive future for all of America’s children.

Dr. Saka, a Fulbright scholar, completed his Ph.D. at the University of Houston in 1995. He is a Mexican specialist whose areas of interest include peasant social movements and agrarian unrest in the Mexican countryside. An American of Arab ancestry, Professor Saka has taught in the Department of History at Sul Ross State University, Alpine, Texas, since 1995.

If interested in submitting a book review, please e-mail us at outlook@aoi.com for Book Reviewers’ Guidelines.
The Center for the Study of Religion (CSR), Princeton University, announces availability of six one-year (01/01/01-07/30/02) postdoctoral fellowships for pre-tenured scholars. Each is granted to a specific theme. To apply, submit CV, 3 letters of recommendation, a 5-page proposal, and unpublished paper demonstrating scholarly command of topic of one of the 4 themes. Applicant's doctorate may be in any relevant field. Princeton University PhDs not eligible. Applications due postmarked 1/15/01. Contact CSR, 5 Ivy Lane, Princeton University, Princeton, NJ 08540-1013. 692-258-5645; asklee@princeton.edu; www.princeton.edu/crelig.

Princeton University is an equal opportunity and affirmative action employer.

- Death and Dying in Buddhist Cultures: special emphasis on death-related topics—preparation for dying, funeral and mortuary ritual, propitiation of spirits, etc. From a multidisciplinary perspective in order to gain insight into Buddhist as a lived religion and especially in premodern societies. Fellow will conduct own research on a related topic around a weekly interdisciplinary workshop and assist Professor Jacqueline Stone in an ongoing course and conference on Buddhist death-related practices in the context of specific cultures.
- Poverty/Charity and Jewish Studies/Middle East Studies/Religion/History: special emphasis on the history of poverty and charity especially religious and social aspects in Jewish communities. Fellows will conduct own research on a related topic, around a weekly interdisciplinary workshop, and attend with Professor Mark R. Cohen in a graduate seminar and conference on the comparative study of poverty and charity in Judaism, Christianity, and Islam.
- Christian Thought and Practice: special emphasis on the religious life of American Christians, congregations, or clergy. Fellows will be engaged in projects of value to the courses in which American Christians live, preach, and teach, and to congregations and pastoral leadership. Fellows will conduct own research on an historical or contemporary aspects of Christian thought and practice, attend a weekly interdisciplinary workshop, and participate in an annual symposium for scholars, clergy, and community leaders.
- Public Theology: special emphasis on historical and contemporary manifestations of public theology in Christian faith communities. Fellows will be engaged in projects concerning the implications of theology for the religious life of American Christians, faith traditions, congregations, and clergy. Fellows will conduct own research, attend a weekly interdisciplinary workshop, hold regular meetings with a member of the Princeton faculty who serves as a host and mentor for the year, and participate in an annual symposium for scholars, clergy, and community leaders. Eligibility requires an M.A., M.Div., or equivalent degree from an accredited seminary.

MINORITY POSTDOCTORAL FELLOWSHIP PROGRAM

Teachers College, Columbia University is the largest and most comprehensive graduate and professional school of education in the United States. The College has a diverse culture, with minority students comprising 29 percent of the student body, international students comprising 11 percent.

The Minority Postdoctoral Fellowship Program aims to increase the number of minority faculty members at graduate schools of education. It provides recent doctorate recipients the opportunity to develop a program of research, teach one course, and participate in the life at a graduate research university.

Qualifications: Earned doctorate in any area related to education within the past three years. Commitment to research and teaching in an education related field.

Responsibilities: Conduct research as outlined in the application proposal; provide written report of research program; participate in an academic department; and teach a course.

Duration: One year.

Stipend: $30,000, plus $3,000 for research. Free campus housing, if desired, and limited relocation costs.

Information about the application process will be available at wwww.tc.columbia.edu or contact Susie Klein in the Dean's Office, by phone (212) 678-4155 or by email klein@exchange.tc.columbia.edu. Application deadline: February 1, 2001.

RANDOLPH-MACON WOMAN'S COLLEGE

Jessie Ball duPont Visiting Scholar of American Culture: Randolph-Macon Woman's College, a selective liberal arts college for women, invites applications for the position of visiting minority scholar of American Culture funded by the Jessie Ball duPont Foundation.

The scholar will contribute to the diversification of perspectives within the curriculum and within the College’s innovative semester-long American Culture Program. This interdisciplinary program is led by faculty who collaborate to offer four spring-semester courses that explore in depth what it means to be an American. Students and faculty probe broad themes in American culture, including liberty, democracy, capitalism, race and religion. The program includes visits to historic sites, workplaces, government agencies, churches, and museums both in Virginia and in other parts of the United States.

We seek a visiting scholar who will contribute to the American Culture Program. The appointment is for two years at the assistant professor level. Qualifications: Ph.D. or equivalent, a record of scholarly achievement, and graduate teaching experience. Duties include teaching two courses in the fall and, in the spring semester, joining the interdisciplinary faculty team to teach the American Culture Seminar, and travel with students in the program (including some weekend excursions and one 11-day trip). Salary commensurate with experience. Review of applications will begin on January 1, but applications will be accepted until the position is filled. Send letter of interest, curriculum vitae, and three letters of reference to:

Dr. Daniel M. Raessler
Professor of Music
Randolph-Macon Woman's College
Lynchburg, VA 24503

In addition, Randolph-Macon Woman's College, a selective 4-year liberal arts college for women in the foothills of the Blue Ridge Mountains of Virginia, invites applications for the following full-time tenure-track faculty positions beginning Fall 2001.

- **Art**
  - Asst. Professor, Studio Art/Painting: Anita Solow (aslow@rmwc.edu)

- **Biology**
  - Asst. Professor, Plant Biologist: Ron Gettinger (rgettinger@rmwc.edu)

- **Classics**
  - Asst. Professor: Susan Stevens (sstevens@rmwc.edu)

- **Economics**
  - Asst. Professor, International Economics: John Abell (jabel@rmwc.edu)

- **Education**
  - Asst. Professor, Reading Specialist: Peggy Schimmoeller (pschimmoeller@rmwc.edu)

- **English**
  - Asst. Professor, Renaissance literature/Women's writing or Post-Colonial literature: William Coulter (wcoulter@rmwc.edu)

- **Theatre**
  - Asst. Professor, Design: Tom Stephens (tstephens@rmwc.edu)

For more information about the positions, please contact the chair of each search committee. Randolph-Macon Woman's College is the first southern women's college to receive a Phi Beta Kappa chapter. With a student population of 750 undergraduates from 45 states and 37 countries, R-MWC boasts a low student/faculty ratio and membership in the International 50, a group of selective liberal arts colleges noted for internationally-oriented programs.

Visit our web site www.rmwc.edu for more information about the College.

EOE Women and minorities are strongly encouraged to apply.
FACULTY POSITIONS AVAILABLE

Bridgewater State College is a comprehensive public college serving approximately 9000 students. Its 270 full-time faculty offer over one hundred Baccalaureate and Master's level programs. The J. Joseph Moakley Center for Technological Applications provides advanced computing and telecommunications technologies to support academic programs. The campus is located in southeastern Massachusetts, in an attractive New England town, easily accessible to Boston, Cape Cod and Providence.

For additional information, visit our web site: http://www.bridgew.edu.

Bridgewater State College seeks applicants for the following full-time, tenure-track faculty positions, which include opportunities for teaching and advising undergraduate/graduate students during the nine-month academic year. Opportunity exists for additional teaching in the summer.

All positions require an earned doctorate, unless otherwise noted. Applicants should be strongly committed to excellence in teaching and advising and to working in a multicultural environment that fosters diversity. Applicants should also have an ability to use technology effectively in teaching and learning, the ability to work collaboratively, evidence of scholarly activity, and a commitment to public higher education.

SCHOOL OF ARTS AND SCIENCES

Assistant Professor, Non-Western Art History, Department of Art. Teach courses in at least one area of non-Western art and architecture, as well as art appreciation and survey courses. Additional responsibilities include advising students, contributing to curriculum and program development, and assisting in enhancing and maintaining the visual resources needed in teaching art history and appreciation. Requires Ph.D. in Art History earned by June 2001, with specialization in at least one of the following areas: Far Eastern, Islamic, African, Pre-Columbian or Native American. Experience in applications of computer technology to the teaching of art history is preferred.

Assistant Professor, Department of Biological Sciences. Specialty in Microbiology. Duties include teaching upper level microbiology, introductory biology, and upper level courses appropriate for the department's biomedical/molecular concentration, as well as participating in procurement equipment. The successful candidate must have excellent communication skills, and a strong commitment to teaching and research in an undergraduate setting, as well as to advising undergraduate students and supervising original undergraduate research. Knowledge of molecular biology is required. Teaching experience is preferred.

Assistant Professor, Department of Communication Studies & Theatre Arts. Specialty in Mass Communication. Duties will include teaching introductory and advanced television production, general mass communication and media studies courses, and supervising student production crews. Responsibilities may also include acting as liaison with campus telecommunications center, participating in departmental program review and advising students. Requires earned Ph.D. in Mass Communication.

Assistant Professor, Applied Geophysics, Department of Earth Sciences and Geography. Duties include teaching applied geophysics, physical oceanography, introductory physical geology (with lab), introductory environmental geology; directing undergraduate research projects in applied geophysics; advising undergraduate students; and mentoring prospective elementary and secondary school science teachers within our earth science education programs. Requires earned Ph.D. in geology/geophysics. A background in marine science is desirable.

Assistant Professor, Mineralogy/Petrology, Department of Earth Sciences and Geography. Duties include teaching mineralogy, petrology, introductory physical geology (with lab), and introductory environmental geology; participating in departmental research projects in mineralogy/petrology; advising undergraduate students; and mentoring prospective elementary and secondary school science teachers within our earth science education programs. Requires earned Ph.D. in geology with a strong background in mineralogy/petrology.

Assistant Professor, Department of English. Position in World Anglophone Literatures. Desired specialization in emergent American literatures including but not limited to Asian-American literature, Latino/a literature, Native American literature and Caribbean literature. Preparation in composition will be an advantage. Since all faculty in the department teach freshman writing, preparation in composition will be an advantage. Responsibilities also include advising undergraduate and graduate students, participating in departmental and college decision-making processes and activities. Requires earned Ph.D.

Chairperson, Department of English. Chair 23 full-time and 28 part-time faculty; facilitate curricular development and change; administer the department's budget; supervise student advising; establish teaching schedules; conduct faculty evaluations; oversee work of departmental committees; encourage high standards in undergraduate and graduate programs; and serve as liaison between the department and the administrative branch of the college. Requires Ph.D. in English, specialization open; and proven experience in academic administration sufficient for running a large department with complex responsibilities in literature, writing, English education and general education. Review of applications will begin 11/1/00 and continue until position is filled.

Assistant Professor, Department of Foreign Languages. Specialty in Spanish Linguistics preferred. Duties include teaching all levels of language, including but not limited to composition, conversation, advanced grammar and phonetics. May also include teaching a second language and/or pedagogy, advising Spanish majors and serving on department committees. Requires earned Ph.D. in Spanish and evidence of scholarly promise and/or achievement. Ability to teach pedagogy and/or an ability to teach a second language a plus.

Chairperson, Department of Foreign Languages. Chair 9 full-time and approximately 10 part-time faculty; facilitate curricular development and change; administer the department's budget; supervise student advising; establish teaching schedules; conduct faculty evaluations; and serve as liaison between the department and the college's administration. Requires Ph.D. in Spanish, Peninsular: Generalist, with a specialty in Spanish Medieval and/or Golden Age Literature a plus; proven experience in academic administration; proven leadership in curricular development and technological innovation in teaching and record of successful teaching and scholarly accomplishment commensurate with appointment as Associate or Full Professor. Review of applications will begin 11/1/00 and continue until position is filled.

Assistant Professor, Middle East/Islamic World, Department of History. Duties include teaching upper-division and graduate courses in the area of specialty, upper-division survey courses in the Middle East and/or Islamic World, lower-division courses in World history and/or Western Civilization; advising undergraduate and graduate students; and participating in departmental and college decision-making processes and activities. Requires earned Ph.D. in history or related field. Teaching experience desired, preferably at the college level. The ideal candidate will have a strong, broad background in the Middle East and Islamic World since the seventh century. Candidates with expertise in South Asia, Southwest Asia or North Africa, or candidates whose approach includes economic and social history or cross-cultural or comparative studies preferred.

Rank negotiable (tenure track) in Computer Science, Department of Mathematics and Computer Science. Responsibilities include teaching undergraduate and Master's level courses, advising undergraduates and supervising graduate students; participating in departmental curriculum development, as well as engaging in ongoing scholarship and professional activity. A Ph.D. is preferred, but applicants holding a Master's degree in computer science (or closely related field) and enrolled in an accredited doctoral program in computer science (or closely related field) will be considered. A specialty in Operating Systems and/or Architecture is preferred.

www.bridgew.edu
Assistant Professor, Department of Music. Specialties in piano pedagogy, accompanying, and piano performance. Duties include teaching class piano and studio piano at all levels, collaborating with performance faculty in recitals, acting as mentor to student accompanists, and teaching service courses for non-majors. Requires earned doctorate in music, with emphasis on piano performance and/or pedagogy; experience in teaching class piano and studio piano; experience in accompanying soloists and ensembles. Prefer experience in teaching a variety of courses for majors and non-majors, experience in community outreach and other expertise that complements current faculty strengths.

Assistant Professor, Department of Philosophy. Competence in critical thinking, history of philosophy, and applied ethics (such as environmental ethics, values and technology). The successful candidate will be a participant in a philosophically pluralistic and collegial s-mentoring department. Duties include teaching one upper-level course per semester and three introductory level courses that combine a critical thinking component with a focus on a major area of philosophy, such as political philosophy, ethics, philosophy of science or philosophy of religion. Additional responsibilities include participating in departmental and college decision-making processes and activities, curriculum development and advising of majors. Requires earned Ph.D. in Philosophy, evidence of sustained scholarly research and writing, and college-level teaching experience.

Assistant Professor, Judicial Law/Political Law, Department of Political Science. Duties include teaching courses in constitutional law, judicial politics, and introduction to American government. May also include teaching courses such as administrative law and regulation and legal aspects of public administration in the department's MPA program. Pre-law advising and participating in departmental decision-making are also included. Requires an earned Ph.D., a commitment to teaching excellence, and evidence of scholarly activity. Candidates with strong methodological skills preferred.

Assistant Professor, Public Administration, Department of Political Science. Primary responsibility will be to teach and work closely with students in the department's growing MPA program. In addition, undergraduate teaching in related areas is expected. Requires an earned Ph.D. with teaching and research specialization in one or more of the following areas: nonprofit organizations and management, social service delivery systems or healthcare policy and management. Candidates with some practitioner experience and strong methodological skills preferred. Review of applications will begin 12/1/00 and continue until position is filled.

Assistant Professor, Department of Psychology. Specialty in clinical psychology with an emphasis in child development. Duties include teaching undergraduate and graduate courses in clinical psychology, child psychology and related fields; supervision of internships; and possible coordination of the graduate program. Requires earned doctorate in clinical psychology, Massachusetts state licensure or license eligibility as a health care provider, and evidence of quality teaching.

Assistant Professor, Public Relations, Department of Communication Studies & Theatre Arts. Duties include teaching introductory and advanced courses in public relations, helping to expand a growing program in public relations in departmental administration and advising students. Must have theoretical and practical expertise and experience in new technologies in the field. Requires earned Ph.D. in Public Relations or relevant degree with appropriate professional service by June 2001.

Assistant Professor, Department of Social Work (CSWE-accredited bachelor level program). Teaching areas include social welfare policy and two or more of the following: macro practice, policy, research, child welfare, and diversity; advising and participating in the functions of the department and of the college. Other opportunities include assisting with the design and implementation of a proposed MSW program, and upon program approval, teaching graduate level courses. Requires Master's degree in social work, a minimum of three years' post-Master's practice and a doctorate in social work or a closely related field. Prior teaching experience is valued. Candidate must demonstrate commitment to social justice issues and ethics, interest in scholarly activities, and the ability to work effectively with diverse groups, clients, communities, students and colleagues.

Assistant Professor, Department of Sociology and Anthropology. Duties include teaching undergraduate courses in sociology, teaching undergraduate and graduate courses in social data analysis to sociology students, and participating in departmental activities such as program review and curriculum development. Requires earned Ph.D. in Sociology, with a specialty in quantitative data analysis, and at least one of the following: Technology and Society Comparative Development, Sociology of Education, Mass Communications, Political Sociology, or Sociology of Work. Prefer a candidate able to teach Social Theory or Research Methods.

SCHOOL OF EDUCATION AND ALLIED STUDIES

Assistant Professor, Early Childhood Education, Department of Elementary & Early Childhood Education. Teach undergraduate and graduate professional courses in early childhood education; assist in program development; supervise student teachers; write and support the development of grants; and advise students. Requires earned doctorate in Education or related field, with strong background in early childhood education, and demonstrated teaching competence at pre-K level. Prefer college-level teaching in early childhood education and/or child development and experience with NALEYC guidelines, special needs students and current models of early childhood curriculum.

Assistant Professor, Counseling, Department of Secondary Education & Professional Programs. Teach and advise graduate students in Mental Health Counseling (MHC), School Guidance Counseling (SGC) and Higher Education Counseling (HE). Teach courses in career counseling, student development theory and other core counseling courses. Requires doctorate in counseling or counseling-related field, independent license to practice as a clinician and supervise interns in Massachusetts (or license eligible), graduate teaching experience and active scholarship. Applicant with higher education counseling and instructional technology experience preferred.

Instructor/Assistant/Associate Professor, Audiovisual, Department of Special Education and Communication Disorders. Teach undergraduate courses in audiology and other courses as needed and expertise allow, supervise undergraduate students in audiology clinical practicum, participate in student advising, program development and service to the college and community. Requires earned doctorate in audiology from an institution accredited in the discipline, CCCA, Massachusetts licenture (or eligibility for licensure), and minimum of three years of clinical expertise. For position of instructor, Master's degree with ABD would be acceptable.

SCHOOL OF MANAGEMENT AND AVIATION SCIENCE

Assistant/Associate Professor, Department of Aviation Science. Develop and teach courses in aviation science and management, including FAA Part 141 ground schools, and advise undergraduate students. Requires an appropriate Master's degree. Prefer Airline Transportation Pilot certificate with certified light or ground school instructor rating. Prefer doctorate with aviation applications in a management, systems or human factors area, and experience in aviation and college-level teaching.

Assistant/Associate Professor, with an emphasis in Systems and Technology Management, Department of Management. Teach courses in business data processing, management information systems, and general management, and graduate courses in systems, technology management and global electronic commerce, advise students; participate in developing graduate curriculum, including software application/exercises for class instruction, presentations and course design. The Associate Professor position requires college-level teaching and an earned doctorate in systems or technology management, or related field. The Assistant Professor position requires college-level teaching and either an earned doctorate or enrollment in an accredited doctoral program in an information systems related field, or in a management related field with a Master's degree in computer information systems or related field. Prefer candidates with experience in database and information resources management, and in one or more of the following: project management, management of technological innovation, electronic commerce, systems analysis/design. Also prefer professional experience in developing management systems.

To apply, submit letter of application, resume and the names, addresses and telephone numbers of three professional references to: Office of Human Resources, Boyden Hall, Bridgewater State College, Bridgewater, MA 02325. Review of files will begin 12/1/00 and continue until position is filled, unless otherwise noted in the position description. Please identify for which position you are applying in your letter of application. Bridgewater State College is an equal opportunity employer with a longstanding commitment to increasing the diversity of its employee community.
Provost and Vice Chancellor for Academic Affairs

The University of Missouri - Kansas City invites applications for the position of Provost and Vice Chancellor for Academic Affairs. This position is expected to begin on January 1, 2021. The University seeks individuals who have distinguished academic, leadership, and administrative experience and are committed to advancing the University's mission of excellence in teaching, research, and service.

The University of Missouri - Kansas City is a comprehensive research university located in Kansas City, Missouri. It is committed to excellence in teaching, research, and service and is home to a diverse and dynamic community of faculty, staff, and students. The University is seeking a leader who can help advance the University's strategic plan and promote excellence in all areas.

Responsibilities:
The Provost and Vice Chancellor for Academic Affairs will be responsible for overseeing the academic programs and operations of the University, including the development and implementation of strategic plans, the enhancement of academic programs, and the promotion of faculty and student success.

Qualifications:

- A doctorate in a relevant field
- Demonstrated record of exceptional leadership and administrative experience in higher education
- Evidence of successful partnerships with academic departments, schools, and colleges
- Evidence of successful partnerships with the community
- Evidence of successful partnerships with industry and other external partners
- Strong interpersonal and communication skills
- Ability to work effectively with a diverse group of stakeholders
- Ability to develop and implement strategic plans
- Ability to lead and manage large organizations

The University of Missouri - Kansas City is committed to excellence in research and teaching and is an affirmative action/equal opportunity employer. Women, minority candidates, and individuals with disabilities are strongly encouraged to apply.

Applications will be accepted until the position is filled. For more information, please visit the University of Missouri - Kansas City website at http://www.umkc.edu or contact the Search Committee at Provost@umkc.edu.
The Ohio State University

VICE PRESIDENT, STUDENT AFFAIRS

The Ohio State University is accepting applications and nominations for the position of Vice President for Student Affairs who will provide vision, leadership, and strategic direction to the Office of Student Affairs, which includes a wide array of units responsible for services that promote the well-being and development of students. A large and complex land-grant institution, Ohio State enrolls approximately 35,000 undergraduates and an additional 10,000 graduate and professional students and is located in Columbus, with a metropolitan population of 1.5 million.

The Office of Student Affairs is a comprehensive unit dedicated to complementing and supporting the educational mission of the university, promoting the best possible overall experience for the diverse student body. The Office’s particular goal is to provide for all students the highest quality services, programs, and opportunities that transform the university from being exclusively a place of learning to a laboratory for life.

PRIMARY RESPONSIBILITIES:

- Management of a number of student support units, including counseling and career advising, student health services, disability services, ethnic student services, gender and sexuality services, student advocacy office, parent association, and office of international education.
- Administration of all housing and food services, operation of a full-service hotel and multi-purpose entertainment and athletic venues, and a portion of student union facilities and programming.
- Coordination of residence life, student activities, and recreational sports.
- Management of student affairs assessment.
- Promotion of rules governing student conduct both on and off campus, including oversight of non-academic student discipline.
- The Vice President for Student Affairs shall report to the President and shall broadly collaborate with the Executive Vice President and Provost and will consult regularly on matters affecting the academic experience of students.

QUALIFICATIONS:

- Ph.D. or equivalent terminal degree in higher education, student personnel administration, or a related field and an extensive record of progressively responsible administrative achievement in student affairs desired.
- Excellent experience may be given consideration in lieu of an earned doctorate.
- Leadership ability and professional achievements, coupled with the personal qualities necessary to effectively meet the unique challenges and opportunities presented by the Office of Student Affairs.
- Ability to be a persuasive and articulate advocate for students and for the Office of Student Affairs, functioning as an effective member of the senior leadership team of a large research university.
- Demonstrated commitment to the education, development, and empowerment of all students toward fostering a campus climate that is welcoming and supportive of multiculturalism and globalization, with respect and student support for diversity and inclusion.
- Strong evidence of personal and professional integrity.
- Record of fostering academic excellence and student intellectual growth, and the ability to work collaboratively and effectively with the Office of Academic Affairs.
- Excellent verbal and written communications skills with a demonstrated ability to effectively manage both human and material resources.
- Knowledge of student development theory and applications and an understanding of current student concerns, including family and social frameworks and legal issues; membership in, and contributions to, appropriate professional associations in the field of student affairs desired.

SALARY:

Salary will be commensurate with qualifications and experience.

For further information about this position and The Ohio State University please visit our website at www.osu.edu/research.

APPLICATION PROCESS:

Application and nomination process will begin on January 2, 2001 and will continue until the position is filled.

Send a letter of interest (indicating VHA) and detailed resume to:

Dr. D. Robert Moser, Chair
Office of the President
205 Bricklayers Hall
100 North Oval Mall
Columbus, OH 43210-1337

The Ohio State University is an Equal Opportunity/Affirmative Action Employer. Women, minorities, veterans, and individuals with disabilities are encouraged to apply.

USF University of South Florida

Founded in 1956 as the first U.S. university to be created wholly in the 20th century, the University of South Florida is now the largest metropolitan university in the Southeastern United States, with a student body of nearly 35,500 spread across four campuses. The rich, multicultural atmosphere of the university is evident not only on the main Tampa campus, but at its branches in St. Petersburg, Sarasota/M萦ette, New College, and Lakeland. USF promotes delivery systems, curricula, programs and activities that reflect the diversity of South Florida.

ASSOCIATE ADMINISTRATOR, CSREES

The Department of Agriculture (USDA) is seeking to fill the position of the agency Associate Administrator for the Cooperative State Research, Education, and Extension Service. As Associate Administrator, the incumbent participates fully with the Administrator in all aspects of CSREES programs and policies. Shares responsibilities in working with customers and stakeholders to advance research, extension, and higher education in the food and agricultural sciences and related environmental and human sciences to benefit people, communities, and the Nation. Program under the direction of the Administrator and Associate Administrator are financed by approximately $1 billion in Federal funds and accomplished through the efforts of approximately 400 CSREES employees. The incumbent has frequent contacts with top officials of USDA, other government agencies, cooperative extension services, state agricultural experiment stations, colleges and universities, private organizations and corporations, national and international institutions, Departments of Ministries of Agriculture in other nations, and members of Congress and their staff. For more information about CSREES, go to the CSREES homepage at www.csrees.usda.gov.

This is a Senior Executive Service position. Salary ranges from $116K to $170K (including locality pay), commensurate with experience. A Ph.D. in a discipline related to the position is highly desirable. For information on the position, call Betty Lou Gilliland at 202-720-7441; for vacancy announcement/application procedures, call Stacy Aldrich at 301-504-1448. A copy of the vacancy announcement may be located at the Office of Personnel Management web page at http://www.usajobs.opm.gov/. Applications must be received by January 12, 2001.
Assistant/Associate Professor of Composition and Rhetoric

Tenure-track position, beginning September 2001, Assistant or Associate Professor to teach expository writing at all levels, and to take a leading role in the college's expository writing and communication-across-the-curriculum programs. The person hired will be expected to serve on and bring innovative thinking to the expository writing committee, to help with testing and placement, and to contribute to faculty development.

Candidates must have Ph.D. in hand by June 2001, publications or evidence of scholarly potential, a record of excellent college teaching, experience in writing program administration, and a background in communication across the curriculum. Facility in information technology and a commitment to using it in teaching and research are essential. Secondary interest in such related areas as composition theory, business and technical communication, literature, film, or cultural studies is very desirable.

Bentley College offers a collegial environment on an attractive campus six miles from Boston. Bentley is an equal opportunity employer committed to strength through diversity and welcomes applications from members of under-represented groups. Send letters and vitas (please, no dossiers at this time) to Evelyn Shah, Chair, Personnel Committee, English Department, Bentley College, 175 Forest Street, Waltham, MA 02452-4705. Application deadline: 30 November 2000.

BENTLEY COLLEGE

Department of Building Science/Auburn University

Position Advertisement Notice

The Department of Building Science at Auburn University seeks applications for a full-time, tenure track position in an ACCE accredited Construction Program. The construction program is housed within the College of Architecture, Design and Construction.

Required Qualifications: Evidence of strong communication skills; Masters degree in Construction Management or a related field; minimum of three years appropriate construction experience.

The Department of Building Science is comprised of 14 full-time faculty, 495 undergraduate students, and 20 graduate students.

Minorities and women are encouraged to apply. To apply, send a letter of application, resume, and three professional references to:

Steve Williams, Chair of Search Committee
Department of Building Science
119 Dudley Hall
Auburn University, AL 36849

or call Ms. C. Carolyn Smith at (334) 844-8676 to request a hard copy.

Auburn University is an equal opportunity/affirmative action employer.

Associate Director
Program in Latin American Studies

Princeton University's Program in Latin American Studies seeks an Associate Director to assist with the development and the management of the Program. Primary responsibilities include organizing and coordinating scholarly conferences and lectures; preparing reports; editing newsletter and other publications; assisting with fundraising activities including writing research grants; designing and maintaining Internet-based communication technologies; developing summer internship program; and promoting LAS programs in the U.S. and Latin American universities. Position requires a Master's degree in related field or comparable professional experience; proficiency in Spanish; an understanding of the operations of U.S. and Latin American universities; good working relations with Latin American cultural and educational institutions; excellent interpersonal, writing, and editing skills; and computer literacy. Must be able to organize and integrate complex tasks with little or no supervision. Proficiency in Portuguese is preferred. Active consideration is underway.

Princeton University provides an exceptional benefits package. Interested candidates should apply online at: http://www.princeton.edu/hr/emp or send resume and salary requirements to: Human Resources, Clio Hall/HIS-1220, Princeton University, Princeton, NJ 08544-5264. NO FAXES, PLEASE. An equal opportunity employer.

Princeton University
Dean
School of Social Work

The University of Illinois at Urbana-Champaign invites nominations and applications for Dean of the School of Social Work. Position requires an MSW (preferred) and an earned doctorate in social work or related discipline. Preferred qualifications include a strong record of scholarly achievement; demonstrated leadership in social work education and research, curriculum development, and resource acquisition (including external funding and grant support); and a demonstrated commitment to affirmative action. As executive officer, the Dean has overall responsibility for developing an effective collegial environment, facilitating the teaching and research activities of the faculty, monitoring student admission and services, evaluating faculty and staff, developing and allocating the budget, overseeing the School’s working relationships both within the University and with alumni and external groups, and representing the School’s interests in the national arena. Full-time, 12-month appointment; salary and starting date are negotiable.

To insure full consideration, nominations and applications (including vita and names and addresses of three references) should be postmarked by December 31, 2000, and sent to:

Dean Thomas M. Mengler, Search Committee Chair
Dean of the School of Social Work
University of Illinois at Urbana-Champaign
302 East John Street, Suite 202
Champaign, IL 61820
Attention: David Schebja
(Phone: 217 / 333-1462; Fax: 217 / 333-9561)

The University of Illinois at Urbana-Champaign
Affirmative Action/Equal Opportunity Employer

Assistant Professor Position in Nautical Archaeology

The Nautical Archaeology Program of the Department of Anthropology, Texas A&M University, seeks an archaeologist for a tenure-track position at the level of Assistant Professor to begin in September 2001. The principal area of specialization sought is in Medieval and post-Medieval seafaring and nautical archaeology. A secondary area of specialization is the development of shipbuilding and seafaring technology. Candidates should be able to conduct undergraduate lecture courses and graduate seminars, supervise graduate research projects, and should be prepared to conduct field work involving Texas A&M University graduate students. Candidates with developed research programs are especially encouraged to apply. Ph.D. is required. Please send an introductory letter, curriculum vitae, and the names and addresses of at least three and no more than five references to:

Prof. Kevin J. Crisman
Chairman, Faculty Search Committee
Nautical Archaeology Program
Texas A&M University
College Station, Texas 77843-4352
FAX: (409) 845-6399
telephone: (409) 845-6696
e-mail: kerismam@tamu.edu

Applications will not be considered until all materials are received. Closing date for applications is February 1, 2001.

Texas A&M University is an equal opportunity employer. Women and minorities are encouraged to apply.

Cornell University is an Affirmative Action/Equal Opportunity Employer.
PHILLIPS ACADEMY
(MS)² SUMMER TEACHING POSITIONS
JUNE 23 - AUGUST 3

The Math and Science for Minority Students - (MS)² - program brings to
Phillips Academy for three consecutive summers following their ninth-grade
year US African-American, Hispanic/Latino, and Native-American students
who have shown strong interest in and aptitude for mathematics and
science. A full-scholarship program for public high school students, (MS)²
enriches students' background by exposing them to challenging material that,
for a variety of reasons, they may not have encountered in their home schools.
The 2001 session will be our 25th summer.

We seek teachers for the summer of 2001 for possible openings in Mathematics
(Algebra II, Precalculus, Probability and Statistics, and Calculus), Biology,
Chemistry, Physics, English, and College Counseling. Teachers are expected to
take an active role in out-of-classroom activities in a boarding school
environment and to provide strong role models for student. On-campus
housing and meals are provided.

We encourage applications from African-American, Hispanic/Latino,
and Native-American teachers, ECE.

For further information, see our web site: www.andover.edu/ms2/home.htm

To apply, please submit a letter of interest, resume, and names and contact
information for three references by February 1, 2001 to:

Temba Maquela, Director
(MS)², Phillips Academy
180 Main Street
Andover, MA 01810-4161

FITCHBURG STATE COLLEGE

Fitchburg State College seeks applicants for the following administrative positions. Candidates must have
an earned doctorate (or appropriate terminal degree), a record of teaching and scholarship appropriate for
appointment at the senior level, and familiarity with collective bargaining. Preference is given to candidates
who at least three years of academic administrative experience at or above the department chair level.

Established in 1894, Fitchburg State College is a four-year public college offering 50 liberal arts and professional under-
graduate programs of study within 23 majors and 20 graduate degrees. Five Certificates of Advanced Study, and seven
Graduate Certificates and offers programs distributed via learning. The college serves approximately 7,000 undergradu-
ate, graduate, and continuing education students. Fitchburg, Massachusetts, a city of 41,000 is located in the north-
central part of the state, about one hour's drive from Boston. For additional information about the college, visit our web-
site at: www.fcsu.edu

Dean of Undergraduate Studies

The Undergraduate Dean works collaboratively with department chairs and other administrators to facilitate
the development, implementation, and evaluation of undergraduate academic programs, accreditation, and
outcomes assessment, coordinates class scheduling, hires part-time undergraduate faculty, and implements
college academic policies for undergraduate (dismissals, appeals, readmission, etc.). Additional
qualifications include experience in curriculum development and accreditation, knowledge of outcomes
assessment, and experience promoting and administering programs for residential and commuting students.

Dean of Graduate Studies

The Graduate Dean is responsible for planning, directing, supervising and administrating the various gradu-
ate programs offered by the College. The Dean also works with department chairs, faculty and other adminis-
trators to recruit, admit and advise students; hire and evaluate graduate faculty; manage, develop, promote
and evaluate graduate programs and provide services that will aid the students and faculty in their academic
work. Additional qualifications include experience with graduate education (particularly in a part-time com-
muter setting) and knowledge of national education and distance learning.

The Undergraduate Dean and Graduate Dean report to the Vice President of Academic Affairs and are essential members
of the Academic Affairs team. The team includes the VA, the Associate Vice President for Academic Affairs, the
Undergraduate Dean, the Graduate Dean, the Dean of Enrollment Services, and the Associate Dean of Education. The
team is responsible for consulting and collaborating to facilitate the development, promotion and evaluation of Fitchburg
State College's academic programs and policies.

The priority application review date is December 22, 2000. For more information, contact: Mr. Daryl Brovnik,
Director of Administration, Fitchburg State College, 135 North Street, Fitchburg, MA 01420.

SOUTHERN CONNECTICUT
STATE UNIVERSITY

DEPARTMENT OF PUBLIC HEALTH
TWO TENURE TRACK
FACULTY POSITIONS

The Department of Public Health at Southern Connecticut State University invites applications for two tenure-track faculty positions at the level of Assistant Professor. One position is for a Public Health Educator. The other anticipates a vacancy. Send letter of application and professional vita to:

Dr. William Stabler, Chair
Department of Public Health
Southern Connecticut State University
New Haven, CT 06515-1355

Closing date for applications is January 31, 2000
for Fall 2001 appointment.

Responsibilities: Assume broad range of teaching assignments in CEPH-accredited MPH program and BS public-health program; secure external funds for research and service projects; assume other duties as required.

Qualifications: Doctorate or ABD in public health or related discipline required; versatility to teach wide range of public health courses, possibly including health policy, health administration and health in society; evidence of successful teaching, publications and contract/grant procurement highly desirable.

SCSU is a comprehensive metropolitan university of some 12,000 students, located in historic New Haven. The University is an equal opportunity, affirmative action employer, seeking to enhance the diversity of its instructional staff. SCSU encourages women and minorities to apply.

WHEATON COLLEGE
Norton, Massachusetts

Assistant Professor

The Department of Political Science invites applications for a full-time, tenure track assistant professor in comparative politics. We are looking for candidates who have broad expertise in comparative policies with some combination of the following special interests: the political economy of development; comparative social movements/ethnic politics; comparative policy making; and regime change and state formation. A regional specialty in Latin America is preferred, with the ability to teach an introductory course in either Middle East or African politics. Ph.D. or imminent completion is required. Wheaton College, located between Boston, MA and Providence, RI, is a selective liberal arts college of 1500 students with an emphasis on excellence in teaching and scholarship. Normal teaching load is five courses per year. Send cover letter describing teaching and research interests and experience, curriculum vita, writing sample and reference letters to: Darlene Boroviak, Chair, Department of Political Science, Wheaton College, Norton, MA 02766, by December 15. Wheaton College seeks educational excellence through diversity and we strongly encourage applications from men and women from minority groups.
**PROVOST AND VICE PRESIDENT FOR ACADEMIC AFFAIRS**

Bucknell University invites nominations and applications for the position of Provost and Vice President for Academic Affairs. The Provost/Vice President for Academic Affairs is the chief academic officer of the University, reporting directly to the President and serving in his absence as the chief administrative officer.

Candidates should possess the following qualifications:

- an earned doctorate, earned tenure, and an exceptional record of accomplishment in teaching and scholarship;
- demonstrated academic leadership and significant administrative experience;
- a strong commitment to excellence in undergraduate education;
- appreciation for the curricular opportunities afforded by the University's distinctive commitment to excellence in the liberal arts and in professional programs in engineering, management, education, and music;
- the capacity and desire to play a leading role in curricular innovation and other strategic initiatives of the University;
- the ability to build consensus and engage in collegial and constructive problem-solving with multiple constituencies of the University.

Bucknell University is a highly selective, primarily undergraduate (3350 undergraduates, 160 master's students) institution, combining a strong liberal arts tradition with characteristics of a comprehensive university. Bucknell awards bachelor of arts and bachelor of science degrees in nearly 50 fields, including six interdisciplinary programs. The University provides comprehensive residential and student activities programs to support the educational mission and to promote personal growth and responsibility. The campus is bordered by the Susquehanna River in scenic central Pennsylvania and is located in historic Lewisburg, which is ranked among the nation's “most livable” small towns. Most of the mid-Atlantic region's major cities are within a three to four hour drive, including New York, Philadelphia, Baltimore, Washington, and Pittsburgh.

Nominations and applications, including a letter of interest, current curriculum vitae, and the names of three references, should be submitted to:

**Dr. M. Lola Hassines**
Provost/VPAA Search Committee
Bucknell University
Lewisburg, PA 17837

Review of applications will begin January 5, 2001. Bucknell University encourages applications from women and members of minority groups (EO/EAA).

Additional information is available at www.bucknell.edu. Bucknell University is being assisted in this search by R. William (Bill) Funk, the National Managing Director of Korn/Ferry International's Education Practice.

**Interior Design Instructor**

Brookdale Community College is a growing institution recognized for its vision, excellence in educational practices, effectiveness in meeting diverse and eclectic student needs, utilization of state-of-the-art technology and resources, and its capability to anticipate the current and future needs of the students, citizens and community it serves. Located on 220-acres in central coastal New Jersey, the sprawling campus provides a pastoral setting and is approximately 50 miles south of New York City and 70 miles north of Philadelphia.

The College invites applications for an INSTRUCTOR, INTERIOR DESIGN, to begin January 2001. Brookdale is an innovative and comprehensive open admissions two-year college with an enrollment of 11,500 credit students (approximately 7,500 FTE). We seek colleagues who share our unequivocal commitment to quality instruction, collaborative relationships and who value service, diversity, innovation and technology literacy. This is a full time, tenure track position to be staffed at the entry-level.

Bachelor's degree in subject area required; Master's degree in Interior Design or Architecture, or NCIDQ certification preferred. Professional experience in Interior Design and ability to teach studio & lecture courses in Interior Design required; knowledge of AutoCAD desirable. Candidates invited for an in-person interview may be required to present a teaching demonstration.

Salary range for Instructor level is $33,906-$38,060. Position is entry-level and salary is commensurate with qualifications/experience within the identified range. Faculty members teaching extra courses during the academic year and in the summer receive additional compensation. Applicants should submit letter of application, curriculum vitae, unofficial copy of graduate transcripts and three letters of recommendation via email at hrdept@brookdale.cc.nj.us, or via fax: (732) 224-2970, or mail to the address listed below, attn: Human Resources Office.

Visit our website or call our Opportunity Line at (732) 224-2281. Materials must be received postmarked no later than December 8, 2000.

**Brookdale Community College**

Where Tradition and Technology Meet
Kean University is an EEO/AA Institution.

491 12/04/2000 0 HISPANIC OUTLOOK 63
Public Policy Institute of California

The Public Policy Institute of California is a private, nonprofit organization dedicated to independent, nonpartisan research on economic, social, and political issues that affect the lives of Californians. PPIC is an equal opportunity employer.

The Institute is seeking regular full-time Research Fellows to join its multi-disciplinary team on July 1, 2001.

RESEARCH FELLOW — GOVERNANCE/PUBLIC FINANCE

For this position, we seek a scholar pursuing rigorous and policy-relevant empirical research in such areas as public management and administration, taxation, budgeting, intergovernmental relations, or public service delivery. Candidates should be interested in interacting closely with public officials and drawing lessons from their research for effective public policymaking or administration, while also maintaining high standards of scholarly objectivity and productivity. Candidates must have a Ph.D. in a relevant academic discipline or be very close to completing their degree and must have solid training in theory and research methodology in their discipline.

RESEARCH FELLOWS — ECONOMY

Regional Economics: Applications are invited from Ph.D.s specializing in regional economics to work on a range of policy issues related to the regional economies of California. A Ph.D. in agricultural economics, economics, regional planning, or public policy is desirable; other related fields may be appropriate if there is clear evidence of strength in economics and empirical research skills.

Regulation: Applications are invited from Ph.D.s specializing in regulation to work on issues related to California policy and its economy. Ph.D.s in economics, agricultural economics, political science, and public policy are encouraged to apply.

To Apply

Candidates must have very strong academic records. Experience in research related to state and/or local policy issues is desirable. Please submit vita, letter describing research interests, three letters of reference, and samples of written work by December 1, 2000 to:

Research Fellow Search Committee
c/o T. Chamberlain, Research Administrator
Public Policy Institute of California
500 Washington Street, #800
San Francisco, CA 94111

Please note on the envelope which position you are applying for. Electronic submissions can be sent to chamberlain@ppic.org. If you are interested in interviewing at the AEA/ASSA conference in New Orleans, January 5-7, 2001, please indicate that in your cover letter.

Assistant Professor of Speech and Communication

Tenure-track position, beginning September 2001. Assistant Professor to teach public speaking and other communication courses. Primary responsibility will be for public speaking courses both at the undergraduate level and at the graduate level in the M.A. program. Other teaching will include undergraduate courses in one or more of the following areas: mass communication, intercultural communication, persuasion, rhetorical theory, and cultural studies. An interest in working with the debate team or other student media groups would be very welcome.

Candidates must have Ph.D. in hand by June 2001. Publications or evidence of scholarly potential, a record of excellent college teaching, and experience in cross-disciplinary communication. Facility in information technology, and a commitment to using it in teaching and research are essential.

Bentley College offers a collegial environment on an attractive campus six miles from Boston. Bentley is an equal opportunity employer committed to strength through diversity and welcomes applications from members of under-represented groups. Send letters and vita (please, no dossiers at this time) to

Evelyn Shahn, Chair
Personnel Committee
English Department
Bentley College
175 Forest Street
Waltham, MA 02152-4705.
NSF's Directorate for Geosciences seeks candidates for the position of Director, Division of Ocean Sciences. The incumbent provides leadership and direction for NSF's funding of research and education in the ocean sciences, including biological, chemical and physical oceanography; marine geology and geophysics; scientific ocean drilling; and oceanographic research facilities and vessels.

Appointment to this Senior Executive Service position may be on a career basis, or on a 2 - to 3- year limited term basis, with a current salary range of $115,811 to $130,200. Alternatively, the incumbent may be assigned under Intergovernmental Personnel Act provisions. Announcement S20010018 is posted on the NSF Home Page at:

http://www.nsf.gov/home/chart/work.htm#herm

The announcement includes position requirements and application procedures. Applicants may also obtain the announcements by contacting the:

Executive Personnel and Development Branch on 703-292-9755 (Hearing Impaired Individuals may call TDD 703-292-8044). Applications must be received by January 16, 2001.

NSF is an equal opportunity employer committed to employing a highly qualified staff reflecting the diversity of our nation.

KEAN UNIVERSITY

Founded in 1855

DEAN
School of Business, Government and Technology

Kean University, a publicly-supported comprehensive, metropolitan institution, seeks applications and nominations for the position of Dean of the School of Business, Government and Technology (to be restructured soon to a College with focus on Business and Public Administration). The School is composed of six departments offering 12 degree programs at the graduate level. The departments includes: Accounting, Economics and Finance, Management Science, Political Science, Public Administration, and Technology. The School has a combined total of approximately 57 faculty members. An abiding value of the School is a commitment to an educational environment of cultural and linguistic diversity and gender equity.

Responsibilities: The Dean is expected to provide leadership for the School of Business, Government and Technology in the areas of teaching, research and university and community service. The Dean is also expected to work closely with faculty in curricular matters, including the development of strong and innovative academic programs. The Dean, who reports to the Provost/VPAA, will lead the effort to attain AACSB professional accreditation of the Business programs.

Qualifications: The successful candidate will possess an earned Doctorate and a record of distinguished academic achievement appropriate for appointment at the rank of Professor in a department in the School. Other qualifications include: demonstrated ability to lead through collaborative and shared decision making; the ability to sustain a strong and collegial relationship with faculty, staff, students and administrators; successful record in budget development and strategic planning; ability to balance advocacy for the School with the needs of the wider university community; an understanding of the role of information technology in business and education; demonstrated ability to interact with the business community and experience and knowledge of the accreditation process preferred.

Salary & Benefits: Salary is competitive and commensurate with qualifications and experience. A comprehensive benefits package is included.

Application: Review of applications will begin on January 22, 2001. Completed applications must include the following: Letter of interest; up-to-date resume; names, addresses, telephone numbers of three references. Official transcripts and three current letters of recommendation required before appointment. Apply to: Chair, Dean of Business, Government and Technology Search Committee, Office of the Provost/VPAA, Kean University, 1000 Morris Avenue, Union, NJ 07083.

Where Tradition and Technology Meet
Kean University is an EEO/AA Institution.

ALABAMA, AUBURN 36849. The Department of Geology and Geography at Auburn University invites applications for a tenure-track Assistant Professor position with initial appointment Fall Semester 2001. A Ph.D. in Geology is required at the time of appointment. The successful candidate is expected to engage in research and publication in their field(s) of expertise, should have strong undergraduate teaching skills, and should anticipate teaching large undergraduate classes.

Women and minorities are encouraged to apply. Candidates with broad interests and training are encouraged to apply, but a specialty in Geographic Information Systems/Sciences is required with secondary expertise in remote sensing, physical geography/geomorphology, water resources, environmental science and/or global change. Candidates should submit a short letter of application describing their teaching and research interests, a curriculum vitae, and names and addresses of three references. Applicants must be currently authorized for permanent employment in the U.S.

Review of applications will begin in January 2001 and continue until a candidate is recommended for appointment. Apply to Tom L. Martinson, Geography Search Committee Chair, Department of Geology and Geography, 108 Tichenor Hall, Auburn University, AL 36849 (Telephone number 334-444-3414). Applications may also be e-mailed to martin@auburn.edu, or faxed to 334-444-3409.

Information about the university and the department may be found at Auburn's website http://www.auburn.edu.

Auburn University is an AAMC employer.

SOCIAL POLICY POSITION

The Columbia University School of Social Work invites nominations and applications for a tenure or tenure-track position in Social Policy. This appointment can be at the rank of Assistant Professor, Associate Professor or Professor.

A master's degree in social work is preferred but not required for this appointment. A doctorate or ABD in social work, social welfare, or a related field is required for all ranks. An established record of scholarship and practice experience, which is appropriate to the rank of appointment, is required.

Nominations and applications should be forwarded to:

Ronald A. Feldman, Dean
COLUMBIA UNIVERSITY SCHOOL OF SOCIAL WORK
622 West 113th Street
New York, NY 10025

Although nominations and applications will be accepted until the position is filled, those submitted early are best assured of receiving full consideration.

Columbia University is an affirmative action/equal opportunity employer.
Minority and women candidates are especially urged to apply.
Anthony J. DeVaney
President

The Colorado School of Mines is seeking a new President.

Colorado School of Mines is a public university recognized globally for its unique mission in engineering, applied science and related disciplines, with a special emphasis on the energy and minerals industries.

Small and selective by design, CSM enrolls 2,500 undergraduate and 800 graduate students. Our admissions standards are among the highest in the country for a public university.

Our alumni hold positions of leadership in their fields worldwide, and enjoy an exceptionally high placement rate, as well as starting salaries well above the national average.

CSM has a high per-student endowment for a public institution, and the School is nearing completion of a $100-million program of renovation and new construction on campus.

Our next President shall have extraordinary vision, building on our strong foundation in the extractive and energy fields, while leading us through an era of change in engineering and applied science education.

With demonstrated expertise in management - and exceptional skills in interpersonal relations and communications - the President will interact effectively with all constituencies and develop a plan to enhance an academically and fiscally sound teaching and research institution.

Nominations and applications will be accepted until a new president is selected. However, interested parties are encouraged to respond by January 1, 2001 to:

Presidential Advisory Search Committee
Colorado School of Mines
c/o Korn/Ferry International
2100 McKinney Avenue, Suite 1800
Dallas, Texas 75201
ashley.garvin@kornferry.com

For more information, please refer to our Web site at: http://www.mines.edu/president.

Please note that Colorado Public Records Act allows confidentiality of application materials only when a written request is made by the candidate.

The Colorado School of Mines is an Affirmative Action/Equal Employment Opportunity employer.

Women and minorities are encouraged to apply.
UNIVERSITY OF MARYLAND
School of Social Work

Applications are now being accepted for four (4) 10-month tenure-track faculty positions at the University of Maryland School of Social Work for the 2001-2002 academic year. We are a large, nationally ranked School with an enrollment of nearly 900 MSW students and a mid-sized research and teaching focused Ph.D. program. Our BSW program is on a nearby campus. Candidates for these positions should have a MSW, and Ph.D. or DSW in social work or a closely related field (ABD will be considered), practice experience, scholarly achievement, eligibility for a Maryland license, an ability to teach foundation and advanced courses, and an ability to teach about diverse cultures and populations.

Faculty Openings

- Macro Theory and Diversity - Two positions in the foundation area with knowledge of macro theory, applied macro theory, and diversity.

- Social Policy - One position in the area of social policy with an expertise in mental health policy (EAP policy would also be considered).

- Clinical Practice - One position in the clinical area with ability to teach practice with individuals on both the foundation and advanced levels and ability to teach human behavior.

Rank is open and junior faculty are especially encouraged to apply. Salary is competitive and commensurate with qualifications and experience. For best consideration, submit application by January 22, 2001; search will continue until positions are filled. To apply, submit letters of interest, curriculum vitae, and names and contact information of three references to:

Dr. David Hardcastle, Chair
Search Committee
University of Maryland, Baltimore
School of Social Work
525 W. Redwood Street
Baltimore, MD 21201-1777

Minorities are encouraged to apply. The University of Maryland, Baltimore is an AA/EO/ADA employer.

GANNON UNIVERSITY
President
Erie, Pennsylvania

The Presidential Search Committee of Gannon University invites nominations and applications for the position of President. Gannon University is a Catholic, diocesan, student-centered institution, whose Board is chaired by the Diocesan Bishop, with a downtown campus in close proximity to Lake Erie and to a multiplicity of urban amenities and cultural opportunities. An extensive campus building program has been largely completed which provides an optimum campus environment. Gannon is a comprehensive University of approximately 3,500 students, which offers a broad range of bachelor's and master's degree programs as well as a doctorate in counseling psychology. Gannon's student faculty ratio is 14:1 and has an operating budget of $41.5 million and an endowment of $35 million. Additional information about the University can be found on our website at www.gannon.edu.

The Presidential Search Committee seeks a practicing Catholic in good standing who is fully committed to the Catholic moral and intellectual tradition as it comes to us through the magisterium and who can effectively articulate that teaching with pride and enthusiasm in order to enhance the University's Catholic mission.

The successful candidate will possess a doctoral degree; have a demonstrated record of strong leadership capability with excellent communication and interpersonal skills; have significant experience in higher education; have the ability to establish successful relationships also with Gannon's external community constituencies; be able to articulate a vision of academic excellence and growth for the University distinguished by a plan for implementation; possess proven experience in successful fundraising with a sophisticated sense of integrated planning, budgeting, and financial management; have an open and collaborative management style which respects the principle of subsidiarity and is open to innovation.

A complete application, held in confidence, will include a letter of response to an institutional Needs Statement, approved by the Board of Trustees, and sent to the applicants by the Search Committee. For best consideration, completed applications should be sent to the Chair of the Search Committee at the address below and received no later than January 31, 2001.

The Rev. Msgr. Lawrence E. Brandt, JCD, Ph.D.
Chairperson
Presidential Search Committee
Gannon University
109 University Square
Erie, PA 16541-0001

SMITH COLLEGE DEAN OF RELIGIOUS LIFE SEARCH RE-OPENED

Smith College seeks an experienced professional for the new position of Dean of Religious Life. Smith College, located in Northampton, Massachusetts, is a highly selective women's college serving 2,500 students. Founded in 1871, this private, liberal arts institution offers outstanding programs in the arts and sciences.

The Position. The dean will lead the college in a multi-faith vision of religious life, which reflects the increasing diversity of practice among students, faculty and staff. The dean will also ensure that discussions of moral, ethical and spiritual issues are central to campus life. Supporting the dean in this effort are three chaplains to the college, the director of volunteer services, and adjunct religious advisers. With this new position, Smith College reaffirms the conviction that religious development is an integral part of a liberal arts education. The mandate of the new dean will include integrating religious and spiritual leadership with the whole of student services, creating close links between the chaplaincy and student affairs, the counseling service and residential life at Smith.

Qualifications: Grounding in a recognized religious tradition, relevant academic training at an advanced level, exceptional speaking and writing skills and a demonstrated record of leadership are required. Administrative experience and familiarity with a liberal arts college are preferred. The salary for this position will be at a nationally competitive level and includes a comprehensive benefits package.

Application and Nomination. Review of applications will begin January 15, 2001 and continue until the position is filled, with an anticipated start date of July 1, 2001. Forward nominations and letters of application, curriculum vitae, and a list of at least three references to: Dean of Religious Life Search Committee, Box 955, 21 College Hall, Smith College, Northampton MA 01063.

Smith College is an equal opportunity employer encouraging excellence through diversity.

For more information about Smith, visit us on the web at www.smith.edu.

EDUCATION

PRESIDENT
State University of New York College of Technology at Farmingdale
(SUNY Farmingdale)
The Board of Trustees of the State University of New York and the College Council of SUNY Farmingdale invite nominations and applications for the position of President.

SUNY Farmingdale seeks a leader who will bring freshness of thought, innovation and solid academic leadership experience to the realization of its mission as a first-rate college of applied sciences and technologies within the State University of New York system. A doctoral degree is preferred, though those with a proven and successful record of leadership and high achievement of within an academic environment will be considered.

More specifically, the campus seeks an articulate advocate who can work effectively and successfully within complex political, social and educational environments. SUNY Farmingdale wishes its president to relate well to students, staff and faculty and empower their engagement in the fulfillment of the campus mission. It will expect the successful candidate to possess essential presidential skills, including enrollment management, academic program expertise and financial and administrative abilities. It seeks a president who can work vigorously and effectively with business and industry leaders in economic development.

Founded in 1912, SUNY Farmingdale is one of 64 campuses of the State University of New York and is located on 380 acres in the heart of the Long Island business and technology corridor. With the equivalent of 3,600 full-time students, Farmingdale’s mission is to serve at the highest levels the regional economy of Long Island and particularly its technological development. It is SUNY Farmingdale’s goal to become the preeminent college of applied sciences and technologies in the New York metropolitan area, graduating well-educated problem solvers in the application and integration of new knowledge.

Additional information about the campus is available at www.farmingdale.edu

Inquiries may be directed to Dr. Elaine H. Hairston of Academic Search Consultation Service: Phone: 740-964-0905; Fax: 740-964-0936; E-mail: eeh@academic-search.org

Applications and credentials should be sent to:

Mrs. Mary Fallon, Chair
SUNY Farmingdale Search Committee
Attn: Marianna O’Dwyer, Assistant Vice Chancellor
Office of the Secretary of the University
State University Plaza, T11
Albany, New York 12246
Odwyerma@sysadm.suny.edu

Candidates should provide a cover letter describing their qualifications, their curriculum vitae and the names and phone numbers of five references. For most complete consideration, materials should be received by December 20, 2000, although the position will remain open until it is filled. Every effort will be made to treat candidates confidentially.

SUNY Farmingdale is an Equal Opportunity Employer

THREE FACULTY POSITIONS
BIOLOGICAL SCIENCES
ROCHESTER INSTITUTE OF TECHNOLOGY

The RIT Department of Biological Sciences anticipates TWO TENURE-TRACK faculty positions and ONE VISITING faculty position to begin on September 1, 2001. Equal Opportunity Employer.

AMERICAN ASSOCIATION
FOR HIGHER EDUCATION

Executive Editor,
Change Magazine

The American Association for Higher Education seeks a dynamic, visionary leader to serve as Executive Editor of Change, higher education's most widely read magazine, and as a senior staff person at AAHE, one of higher education's most important professional organizations. The successful candidate will be an excellent writer/editor with extensive experience in higher education as a faculty member, administrator, journalist, or policy maker. AAHE welcomes a candidate who is a loyal critic of the academy, someone able to raise difficult questions and search for viable answers. The candidate will have the skills that ensure insightful, provocative, and authoritative perspectives on issues shaping higher education.

The Change editor will scan the higher education landscape for cutting-edge issues; anticipate challenges and opportunities; celebrate innovation, creativity, and fresh perspectives; identify and disseminate best practices; and seek to influence thought and practice. Specific editorial responsibilities include setting editorial direction and tone; soliciting and screening manuscripts; developmental/substantive editing; collaborating with authors, consulting editors, an editorial board, and production staff; and writing editorials.

Leadership opportunities within the organization include shaping themes for AAHE conferences, representing AAHE at conferences and on campuses, engaging with the AAHE Board, and collaborating with other senior staff on setting organizational agendas for the future. The candidate's experience and interests will influence assignments.

The Change editorial is a full-time, senior staff position at AAHE's Washington, DC office. AAHE will consider alternative work arrangements that ensure full participation in the life of the organization.

Deadline for applications: Preference will be given to applications and nominations received by January 15, 2001. Applications will be accepted until the position is filled.

Start date: March 1, 2001, subject to negotiation.

Please send letter, resume, writing sample, and a list of five references to:
Chair, Search Committee for Change Editor
American Association for Higher Education
One Dupont Circle, Suite 360
Washington, DC 20036-1110

First year Medical/Surgical position. Master's degree in nursing required, doctorate preferred. Teaching experience in nursing and clinical experience within the last five years preferred. Clinical assignments vary. Salary and rank commensurate with experience and qualifications. Deadline March 5, 2001 or until filled. http://nursing.boisestate.edu. Send letter of interest and curriculum vitae to:
Dr. Anne Payne, Chair
Department of Nursing
Boise State University
1910 University Drive
Boise, Idaho 83725-1840
or call (208) 426-3900 or e-mail apayne@boisestate.edu.
EO/AA institution.
The Board of Regents of the Galveston Community College District invites applications and nominations for the position of President. The President is the chief executive officer of the College reporting to a nine-member, publicly elected Board of Regents.

Galveston College provides the citizens of Galveston Island and surrounding region with academic, technical, continuing education and workforce development programs. With a full-time staff and faculty of over 150 and 90 reserve faculty members, Galveston College is a progressive, dynamic institution known for its partnerships with businesses and organizations and its commitment to providing a quality, student focused learning environment. Its programs have consistently gained local, state and national acclaim in areas such as health occupations, addiction counseling training, hospitality/culinary arts, workforce development initiatives, intercollegiate athletics, innovative fund-raising, and special student services. The College is entering its 34th year fiscally sound and strongly supported by local citizens who have come to recognize Galveston College as an integral part of the growth and prosperity of the community.

Galveston is a city of 60,000 people with a growing tourism industry, world-class healthcare, historical homes, a revitalized downtown, a strong financial services industry and a thriving port complete with cruise lines. Galveston is home not only to Galveston College, but also to the University of Texas Medical Branch and Texas A&M University at Galveston. Galveston Island is a community of rich traditions and strong cultural and community resources in a tropical setting 50 miles south of Houston, Texas.

REQUIREMENTS:

- An earned doctorate from a regionally accredited institution
- Five years of upper level college administrative experience, with community college experience preferred
- Experience working directly with students through teaching and/or support services

DESIRED CHARACTERISTICS:

1. Successful candidates will possess these demonstrated skills:

- A vision of and dedication to the philosophy and mission of the comprehensive community college Commitment to developing and maintaining the highest academic and student service standards
- An understanding of and commitment to the pursuit of greater faculty, staff, and student diversity
- Integrity, the highest ethical standards, and respect for the dignity and worth of individuals and groups
- A participatory style of management with experience in organizational assessment, strategic planning and evaluation, and documentation of institutional effectiveness
- Significant and successful responsibility with all financial matters
- Ability to develop and expand partnerships with businesses, school districts, governmental entities, community organizations, and the general public to meet the educational and workforce needs of the community and in establishing a positive institutional presence within the College’s service area
- Knowledge and skills required to provide state-of-the-art technological support systems for students, faculty, and staff
- Personal attributes which help to create and maintain an environment of teamwork in planning and decision making and the ability to work effectively with diverse populations from all segments of the College and outside community
- Encouragement of accountability in others and, in turn, acceptance of accountability to the governing board, students, faculty, staff, and community
- Demonstrated abilities in resource development and private fund-raising
- Knowledge of the legislative appropriation process and familiarity with higher education governance and oversight

2. Applications should include a letter addressing how the applicant’s ability and experience meet the requirements and desired characteristics, together with a resume and the names, addresses and telephone numbers of at least three references. Applications should be postmarked no later than February 12, 2001.

Review of applications begins immediately. Please submit application package to:

Galveston College is an equal opportunity/affirmative action college in education and employment. It is the policy of Galveston College to provide equal opportunities without regard to age, race, color, religion, national origin, sex, disability or veteran status.
The Psychology faculty of Southern Connecticut State University seek two additional full-time members to join a lively, growing department. (1) A developmental psychologist who is able to teach undergraduate and graduate courses and assist in the creation of an undergraduate major specialization in developmental psychology. (2) For the second position, in addition to courses within his or her own area of expertise, a successful applicant would have the training to teach undergraduate and graduate research methods and advanced statistics.

Preferred candidates will have a Ph.D. or will complete the degree by Fall, 2001, have an active research program and potential for effective teaching. General responsibilities: 12 hour teaching load per semester, student advising, supervision of undergraduate and graduate research projects. Southern offers excellent health and retirement benefits, released time for research, sabbatical leave, and support for grant applications.

Applications: send statement of teaching and research qualifications and interests, curriculum vitae, three letters of recommendation with phone numbers, and representative reprints to Development Search Committee or Research Methods Search Committee, Psychology Department, Southern Connecticut State University, 501 Crescent Street, New Haven, CT 06515. Review of applications will begin immediately; applications will be accepted until the positions are filled. For more information concerning the department see https://SCSU.ctstateu.edu/~psychology.

The University seeks to enhance the diversity of its instructional staff. SCSU is an affirmative action, equal opportunity employer and we strongly encourage minorities and women to apply.

The University of Chicago
SCHOOL OF SOCIAL SERVICE ADMINISTRATION

FACULTY POSITIONS

The School of Social Service Administration is a graduate school of social work and social welfare that offers degrees at the Master's and Ph.D. levels. The school invites nominations and applications for tenure-track faculty positions at all ranks across the full range of the curriculum, but especially in the areas of clinical practice, human development, and community work. Within these practice areas we particularly seek scholars whose substantive focus is in health, mental health, or aging. Applicants must possess a doctorate, preferably in social work or in a related social science. Candidates for senior-level positions must additionally have distinguished scholarly records and a desire to assume a position of leadership in our scholarly community. Rank and salary will be commensurate with expertise and experience. Minority candidates are encouraged to apply.

To apply, send letter of application outlining research and teaching interests, curriculum vitae, sample of current writings, and the names of three references to: William Pollok, Ph.D., Deputy Dean for Faculty, The School of Social Service Administration, The University of Chicago, 969 East 60th Street, Chicago, Illinois 60637.

Assistant, Associate or Full Professor of Marketing

Responsible for teaching basic and advanced courses in marketing at the graduate level; research in analytical/quantitative or behavioral area(s) of expertise and interests; supervision of doctoral students. Minimum qualification is a doctoral degree at near completion in marketing or related field. Send applications with a curriculum vitae, a dissertation proposal or abstract (if thesis stage), copies of research papers, and available evidence of teaching quality to: Professor Vithala R. Rao, S.C. Johnson Graduate School of Management, 351 Sage Hall, Cornell University, Ithaca, NY 14853-6201.

Cornell is an affirmative action/equal opportunity employer.

THE METROPOLITAN COMMUNITY COLLEGES
Kansas City, Missouri

The Metropolitan Community Colleges consists of BLUE RIVER, LONGVIEW, MAPLE WOODS, and PENN VALLEY COMMUNITY COLLEGES and Ther BUSINESS and TECHNOLOGY CENTER. The colleges enroll in excess of 41,000 students annually. In addition to these students, MCC also has an aggressive program of service to business and industry, making it a major force in the dynamic and growing Kansas City, Missouri community.

ANTICIPATED FALL FACULTY POSITIONS

Employment in the following faculty positions to commence in August 2001.

- Biology
- Computer Science Information Systems
- Criminal Justice
- English
- Foreign Language (Spanish)
- History
- Mathematics
- Psychology
- Reference Librarian

The Metropolitan Community Colleges are seeking faculty highly competent in their field and committed to facilitating the learning of our students. The faculty would welcome colleagues who appreciate the diversity of our student body, and bring new strengths to one or more of the initiatives related to MCC's strategic priorities. These strengths might include:

- coursework or experience with multicultural perspectives or global issues,
- experience in a variety of delivery systems, such as instructional technology, web sites for classes, distance learning, and learning communities,
- experience with the diversity of learning styles, or
- experience and ability in identifying and assessing student learning outcomes.

The Metropolitan Community Colleges (MCC) is an equal opportunity, affirmative action employer offering a wide range of benefits including paid medical, dental, vision, and life insurance; a retirement program; an employee assistance program; and tuition-free education at any MCC location for full time employees and their dependents.

Please visit us at http://personnel.kcmetro.cc.mo.us/ for additional information.

For consideration in the initial screening process, all materials must be postmarked no later than December 29, 2000. Interviews are arranged by committees after all initial applications have been screened by the human resources office.

For full consideration, send letter of application, three letters of recommendation, a statement of teaching and research philosophy, vita, and unofficial transcripts to: Douglas M. Smith, Ph.D., Department of Biology, Clarion University of Pennsylvania, Clarion, PA 16214. Email: dsmith@clarion.edu.

Communication: Assistant Professor, tenure-track, to begin fall 2001. PhD in Mass Communication or related area preferred (JD or ABD considered), with expertise in content areas such as mass media law, broadcast management/journalism, and new and emerging communication technologies. Preference will be given to candidates with strength in one or more additional content areas of the Bachelor's and Master's degree programs (cf. Website: www.dept.clarion.edu). Completion of successful interviews and resumes to be made at Assistant Professor level. To receive full consideration, send letter of application; curriculum vitae; transcripts; names, addresses, and telephone numbers of three references. Send letter of application, three letters of recommendation, and three current letters of recommendation, and three current letters of recommendation, and three current letters of reference to: Prof. Maria Marin, Chair, Search Committee, Dept. of Communication, Clarion University, Clarion, PA 16214 (email marlin@clarion.edu). Official transcripts and three current and original letters of recommendation will be required of all finalists. Position will remain open until filled, with priority given to applications received by January 12, 2001.

Computer Information Science: Tenure-track faculty position at the assistant or associate professor level starting in August 2001. Level and salary will be commensurate with the qualifications of the individual hired. The department offers majors and minors in Computer Science and in Information Systems and offers service courses. It is seeking an individual who is willing to support all of these missions. To be considered, an applicant must be qualified to teach multiple programming languages, such as COBOL, Visual Basic, Java, C and C++. In addition, the applicant must be qualified to teach upper division major courses. More information on the department and courses we offer may be found at **http://www.wartcl.clarion.edu/cis. To be selected for the position, a candidate must demonstrate good communication and interpersonal skills in a campus interview with the faculty of the department. He/she will also be asked to teach a class and must demonstrate good teaching skills. The position requires a doctorate (or ABD) in a computer-related field or a master's degree in a computer-related field with significant experience in computing, with a doctorate required for tenure. Send a letter of application and resume to Ms. Susan Traynor, Chair, Search Committee, CIS Department, Clarion University, Clarion, PA 16214. The Search Committee will begin reviewing applications on January 5, 2001 and continues until the position is filled. Candidates who demonstrate potential for excellence will be invited for on-campus interviews. Applicants must be prepared to provide references and letters of application and resume. Applicants must be prepared to provide references and letters of application and resume. Applicants must be prepared to provide references and letters of application and resume. Applicants must be prepared to provide references and letters of application and resume. Applicants must be prepared to provide references and letters of application and resume. Applications must be submitted by January 5, 2001 for full consideration. Completion of a successful interview required.

French: Tenure-track Assistant Professor, beginning August 2001, with Ph.D. preferred/ABD considered. Ph.D. required for continued appointment and tenure. Specialization in 19th- and 20th-century French literature and culture. Additional ability to teach courses in French Phonetics and Business French preferred. Experience with interactive language learning technology and the ability to supervise student teachers are also desirable. Completion of a successful on-campus interview, which includes the teaching of a demonstration class, is required. Applications postmarked by January 5, 2001 will receive priority consideration. Send letter, cv, graduate transcripts and three letters of recommendation to: Dr. Eleanor S. ter Horst, Chair, Search Committee, Department of Modern Languages and Culture, Clarion University of Pennsylvania, Clarion, PA 16214. E-mail: eterhorst@clarion.edu.

Geographic Information Systems: Assistant Professor position beginning August 2001. The Department of Anthropology, Geography and Earth Science at Clarion University seeks an individual with teaching and research specialization in the field of Geographic Information Systems. Expertise in the use of ARC/INFO software running on Windows NT system is essential; experience with UNIX operating systems is highly desirable. Responsibilities include administering the department's GIS/Remote Sensing laboratory, securing additional funding through grant proposals, and developing a cooperative relationship with various government agencies and local industry. The selected candidate is expected to teach introductory and advanced courses in GIS, and may teach additional courses in Anthropology, Geography or Geoscience, depending on background. PhD is expected at time of appointment, and ABD candidates are encouraged to apply. Successful completion of an on-campus interview is required. Salary and benefits are competitive. Send letter of application, vita, transcripts (copies acceptable), and three letters of recommendation to: Prof. Steven L. Plotz, Chair, Department of Geography, Clarion University, Clarion, PA 16214. To receive full consideration, send letter of application, vita, transcripts (copies acceptable), and three letters of recommendation to: Prof. Steven L. Plotz, Chair, Department of Geography, Clarion University, Clarion, PA 16214. By January 21, 2001. Representatives from the History Department will be at the ASHA meeting in Boston.

History: British Empire in Asia or French Empire in Asia. Assistant Professor, tenure-track, beginning August 2001. Must be qualified to teach survey courses in Western/World Civilization and upper division courses in areas of specialization including courses in Asian History. Teaching load is twelve hours. Minimum qualifications: Ph.D. by time of appointment, evidence of teaching excellence and scholarly promise, and completion of a successful interview. Send letter of application, vita, three current letters of recommendation, and graduate transcripts (copies acceptable) to Professor Steven L. Plotz, Chair, Department of History, Clarion University, Clarion, PA 16214 by January 21, 2001. Representatives from the History Department will be at the ASHA meeting in Boston.

Mathematics: Two full-time, tenure-track positions in the Mathematics Department beginning Fall 2001 at the rank of assistant professor. Faculty teach as average of twelve semester hours of undergraduate courses per semester, advise students, and participate in departmental and university initiatives. Requirements: The positions require a doctorate in mathematics or a related field, evidence of exemplary teaching experience in mathematics, and completion of a successful interview. Preference will be given to candidates who can fill one area of special need: Geometry, Discrete Structures, or our undergraduate industrial mathematics program. Qualified applicants in other areas will be considered. The successful applicant must be capable of teaching a broad range of mathematics courses. Experience working with undergraduates in research, use of technology, internships, or similar activities is a plus. Teaching duties will include mathematics courses for majors in mathematics and the sciences, as well as general education courses in mathematics and statistics. Department: The Mathematics Department consists of 15 members with diverse specializations and interests. Department members currently support the students' Mathematics Club, involve students in mathematical research, advance the use of
technology, solidify a quantitative reasoning approach to statistics education and make connections between mathematics and other disciplines. The department is developing an undergraduate industrial mathematics program and a master’s degree in mathematics education. Faculty members have taken leadership roles in professional organizations that link the university to secondary school mathematics teachers and mathematics faculty in all of the 14 state systems universities. The university offers the B.A. and B.S. in Mathematics, the B.S. Ed. in Secondary Education with certification in mathematics and minors in Mathematics and Mathematics with concentration in Statistics. The B.S. is also offered through the Cooperative Engineering Programs with the School of Engineering at the University of Pittsburgh and with the Case Institute of Technology. The department currently has 100 mathematics education majors. Further information about the department is available at our web site, www.arts.clarion.edu/math/math.htm. A complete application will consist of a letter of application, vita, copies of undergraduate and graduate transcripts, and three current letters of recommendation from people who can be contacted by telephone. The letter of application should outline your professional goals, summarize your teaching experience and describe the unique background, skills and experiences you can bring to us. At least one letter of recommendation should address teaching effectiveness and the probability of your success in teaching a broad range of mathematics courses. Send application documents to: Search Committees, Mathematics Department, Peirce Science Center, Clarion University of Pennsylvania, Clarion, Pennsylvania 16214. Applications completed by January 16, 2001 will be given full consideration, although further applications may be considered until the position is filled. Members of the department will attend the Joint Meetings in New Orleans in January and participate in the Employment Center. Applications completed by December 8, 2000 will be considered for interviews at the Joint Meetings.

Music (Applicants must be music majors): Clarion University of Pennsylvania invites applications for a full-time, tenure-track position in applied clarinet/saxophone to begin in August 2001. Term degree or B.M. (Master’s degree with significant experience considered at instructor level). Evidence of successful applied studio and classroom teaching at the university level desirable. Teach/receive undergraduate applied clarinet/saxophone studio. Additional assignments may include woodwind methods, woodwind literature, writing, and general music theory. Applicants should possess a strong performance background and ability to work with others in a group setting. Submit a letter of application including a resume, three letters of recommendation, and a performance video. Application deadline is December 8, 2000. Reply to: Dr. Richard L. Driscoll, Chair, Applied Clarinet/Saxophone Search, Department of Music, Clarion University of Pennsylvania, Clarion, Pennsylvania 16214-1232. Phone 814-393-2263. Fax 814-393-2723. http://www.clarion.edu/music/clarinet.html

Clarion University invites applications for a tenure-track position (Assistant/Associate rank) in the Education Department beginning Fall 2001. Minimum requirements include a Ph.D. or Ed.D., at least three years of successful full-time early childhood education, elementary, or secondary teaching experience; and prior or current teaching certification. Responsibilities will include teaching undergraduate and graduate courses, engaging in research/scholarly activity, advising students, and providing service to the department, university, and community. A faculty member may be assigned to perform work at off-campus sites and provide instruction through distance learning. Review of the applications will begin on January 16, 2001, and will continue until the position is filled. Successful candidates must have an interview which may include a classroom demonstration. Nominations or letters of application, curriculum vita, copies of undergraduate and graduate transcripts, and three current letters of reference should be addressed to:

Dr. Vickie Harry
Chair, Search Committee
112 Stevens Hall
Clarion University
Clarion, PA 16214

The Chair, Search Committee
The College of Education and Human Services at Clarion University is accredited by the National Council for Accreditation of Teacher Education (NCATE), 2010 Massachusetts Avenue NW, Suite 500, Washington, DC 20036; phone 202-466-7496. This accreditation covers the institution’s initial teacher preparation and advanced educator preparation programs.

Positions are available in each of the following specialization areas:

Curriculum and Instruction: The successful candidate will have an emphasis in curriculum and instruction or a related field, a background in teaching strategies and methodologies, and a working knowledge of national and state academic standards, the clinical supervision model, and performance-based assessment of student teachers. Demonstrated knowledge of current theories, interdisciplinary practices, classroom management, and instruction of technology in the classroom is required.

Early Childhood: The successful candidate must have a doctorate in early childhood education and education with three years basic education experience in any of the following combinations: licensed child care teacher or director, teacher or director in basic education (K - 3), child development program, Head Start. Letter of application should include statement of personal early care and education philosophy as well as the items listed in the general description.

Educational Foundations and Supervision of Student Teachers: The successful candidate will have expertise in educational foundations and performance assessment and must be able to function as a supervisor of student teachers. A working knowledge of the clinical supervision model and performance-based assessment of student teachers is required.

Educational Technology: The successful candidate must document teaching excellence and scholarly activities as an Educational Technology Teacher, Technology Coordinator, or Technology Specialist in a N-12 educational setting. The candidate should have a working knowledge of and/or experience with the following: basic computer applications, Internet applications, hardware networking, multimedia tools, distance education, integration of technology into the curriculum, and technology standards for students and/or teachers.

Language Arts: The successful candidate will have an emphasis in Language Arts and Literacy and a working knowledge of the writing process. The candidate must demonstrate effective elements of instruction, integrated curriculum design, and integration of technology in the classroom.

Reading in the Content Areas: The successful candidate should be prepared to teach graduate and undergraduate courses in middle school/secondary/content reading. The successful candidate will have a strong background in psychology, literature, and psychology; and the ability to work with students in the areas of vocabulary, comprehension, and reading strategies.

Reading Pedagogy: The successful candidate will teach graduate and undergraduate courses in reading methods. Supporting areas of specialization, certification, or experience may include emergent literacy, elementary reading instruction, writing process, language and literacy, literacy assessment, and integration of technology and instruction.

Science Education: Clarion University seeks to fill two tenure-track positions in Science Education beginning August 2001. Combined with current staff, these appointments seek to cover areas of undergraduate and graduate courses in Science Education for elementary and secondary teacher preparation programs. Science Education is multidisciplinary and brings together faculty from Biology, Chemistry, Earth Science, Education, Mathematics and Physics. The successful candidate must be a Ph.D. or Ed.D. required. Applications should be submitted to: Dr. Casey L. Cutlar, Chair, Applied Clarinet/Saxophone Search, Department of Music, Clarion University of Pennsylvania, Clarion, Pennsylvania 16214-1232. Phone 814-393-2263. Fax 814-393-2723. http://www.clarion.edu/music/clarinet.html

Clarion University is an equal opportunity/AA/EEO institution and an affirmative action employer.
CCBC
The Community College of Baltimore County

ASSISTANT VICE CHANCELLOR FOR STRATEGIC ENROLLMENT MANAGEMENT

THE COMMUNITY COLLEGE OF BALTIMORE COUNTY (CCBC) is a premiere, learning-centered, single college, multi-campus institution consisting of three comprehensive campuses and five extension centers in metropolitan Baltimore County, MD. As the largest community college in the State of Maryland, CCBC is the number one provider of undergraduate education and workforce training in the region. CCBC serves approximately 30,000 credit and 32,000 non-credit students annually. An award-winning institution, CCBC received the 2000 Bellwether Award in the category of Planning, Finance and Governance: the college was named one of 12 Vanguard Colleges in the US and Canada by the League for innovation in the Community College; and the Community College, and the Government Finance Officers Association of the US and Canada recognized CCBC with the Certificate of Achievement for Excellence in Financial Reporting for 1999 and 2000.

RESPONSIBILITIES: Reporting to the Vice Chancellor for Learning and Student Development, the Assistant Vice Chancellor for Strategic Enrollment Management provides College-wide leadership for enrollment planning and management. The Assistant Vice Chancellor has primary responsibility for developing and implementing, in collaboration with Campus and System Office academic and administrative units, a comprehensive strategic enrollment management (SEM) model, developing and implementing recruitment, admissions, and retention initiatives to ensure student access to and success at the College; working closely with Institutional Research to develop enrollment models and related summary reports and management decision-making tools; providing management support for the Enrollment Management areas; monitoring procedures that link enrollment processing with finance and budget areas; providing leadership in the review, analysis, interpretation of policy and its operational impact at the instructional, state and federal levels; and performing other duties as needed.

QUALIFICATIONS: Requirement for the position include at least seven years of senior-level administrative experience in the area of strategic enrollment management, with demonstrated success in developing and implementing strategies for the recruitment and retention of a diverse student body; thorough knowledge of strategic enrollment management theory and practice; demonstrated record of providing leadership for achieving College enrollment goals; excellent technical and computer skills, including thorough knowledge of technology advancements in student information systems; excellent verbal and written communication skills; leadership and supervisory skills that foster collaboration and effective teamwork; a strong work ethic; a positive attitude; tenacity; and the ability to handle ambiguity. An advance degree is required; doctorate preferred.

APPOINTMENT INFORMATION: This is a twelve-month administrative appointment. Salary is commensurate with experience. Position is available January 1, 2001. Letters of application that detail experience and accomplishments relevant to the position, a current curriculum vitae, and the names, titles, addresses, and telephone numbers of five references should be sent to:

Lydia M. Martinez
Esq. Executive Director of Human Resources
Institutional Equity, and Labor Relations
The Community College of Baltimore County
800 South Rolling Road
Baltimore, MD 21228-5317

Additional information about CCBC can be found at www.ccbbc.cc.md.us.

The review of applications will begin immediately upon receipt and continue until the position is filled.

CCBC is an Equal Opportunity institution committed to Embracing Diversity.

Washtenaw Community College
SPANISH INSTRUCTOR

A comprehensive two-year college dedicated to student, community and staff success, is presently seeking a qualified individual to work as a Spanish Instructor. This individual is responsible for teaching first and second year college-level courses in Spanish. The successful candidate must possess a Masters degree in Spanish and have a record of teaching excellence at the college level.

Deadline for receipt of resumes and accompanying materials is January 12, 2001.

Anticipated date of appointment for this position is for the 2001 Fall semester. The initial annual salary is $39,750-$51,850 dependent upon education and work experience; base load of 32 weeks/160 days/450 contact hours per academic year with numerous fringe benefits.

Interested persons should submit letter of interest, resume, all college transcripts (student copies acceptable), two letters of recommendation, copies of first day course hand outs, and copies of student evaluations (completed application will be required if selected for interview) to:

Washtenaw Community College

Queens College
FACULTY DIVERSITY PROGRAM

A liberal arts, co-educational college on a 78-acre campus, Queens College, one of the senior colleges of the City University of New York, offers an outstanding educational opportunity to approximately 15,000 undergraduate day, evening, and graduate students who represent a rich mosaic of ethnic/cultural, economic, and social backgrounds.

The Faculty Diversity Program has as its aim the development of a pool of candidates which will allow Queens College to progress toward greater faculty diversity. Candidates must have a doctorate (or, in the fields of music and art, a record of exceptional achievement) and potential in teaching and research which will make a significant contribution to Queens College.

Tenure-track professorial positions may be available in some of the following departments: Accounting & Information Systems; Anthropology; Art; Biology; Chemistry & Biochemistry; Classical, Middle Eastern & Asian Languages & Cultures; Comparative Literature; Computer Science; Drama; Theatre & Dance; Earth & Environmental Sciences; Economics; Educational & Community Programs; Elementary & Early Childhood Education; English; European Languages & Literatures; Family, Nutrition & Exercise Sciences; Graduate School of Library & Information Studies; Hispanic Languages & Literatures; History; Library; Linguistics & Communication Disorders; Mathematics; Media Studies; Aaron Copland School of Music; Philosophy; Physics; Political Science; Psychology; Secondary Education & Youth Services; Sociology; Urban Studies.

Appointment rank/salary depend on qualifications and experience. Current salary schedules are: Full Professor, $52,398-$81,924; Associate Professor, $42,616-$68,174; Assistant Professor, $32,703-$57,049. Excellent benefits.

Review of resumes will continue as vacancies become available. Closing date for this search is March 15, 2001.

Send vita and references directly to appropriate department chair at Queens College, CUNY, Box HO, 65-30 Kissena Blvd., Flushing, NY 11367-5977. AA/EDE/I/RC/A/D/AD
Faculty Positions

Education
Position 1 (Temporary 2-year position): Candidates should have teaching experience at the elementary level. Instructional responsibilities include teaching introduction to Education, Inclusion, Curriculum, Educational Psychology, Math, Science and other core undergraduate courses. Position entails supervision of student interns.

Position 2: Candidates should have teaching experience at the elementary level. Responsibilities include teaching undergraduate and graduate professional preparation and education methods courses and program coordination. Position entails supervision of student interns.

Psychology
Candidates for this position will be required to teach a variety of undergraduate courses including: Research Methods, Industrial Psychology, Psychophysiology and Cognitive Psychology. Additional responsibilities include curriculum and program development, advising and participation in professional activities. Other opportunities may exist to teach in one of the department's three master's programs in counseling.

International Business
Candidates must be able to coordinate an MBA program. Areas of teaching competence should include International Business and Management, Operations Management and Import/Export Logistics. Candidates should possess a doctorate in International Business or a closely related field. Prior graduate teaching and experience in an international business environment desired.

Marketing
Candidates should have taught courses in U.S. and International Marketing with a capability in E-business. A PhD or DBA in Business Administration with a concentration in marketing is required.

Management
Candidates need to have a doctoral degree in Management (or related field) with teaching experience in Organizational Behavior, Organizational Design, Applied Research and Management Ethics.

Theology/Pastoral Ministry
Candidates need to have a PhD in Theology (or related discipline), grounded in Practical Theology (religious ethics, religious education, pastoral practice, etc.). Attention to the Latinx and African American realities of our international community is desirable.

Candidates require to have doctorate in field and should provide evidence of effective College/University teaching, service and research at the undergraduate and graduate level. We offer competitive salaries commensurate with experience plus an attractive benefits program. Deadline for application is January 12, 2001. Review of applications for the respective position will begin January 16, 2001.

To apply, submit two copies of the following: letter of interest (stating specific position sought) including a description of teaching philosophy and practice, with particular attention to the integration of technology into the classroom, resume, name, address, and telephone number of three professional references, and copies of all post-secondary transcripts to: St. Thomas University, Office of Human Resources (HOHE), 16400 NW 37th Ave, Miami, Fl. 33154. Fax (305) 628-6510. E-mail: factsearch@stu.edu.

St. Thomas University is an equal opportunity employer committed to hiring a diverse work team.

Cornell University

Johnson Graduate School of Management

Sage Hall
Ithaca, NY 14853

POSITION OPENING
Assistant, Associate or Full Professor of Information Technology

Responsibilities include an active research agenda, dedication to high-quality teaching, and a leadership position that provides oversight to develop and coordinate the School’s programs related to an internet-based economy and its strategic implications, including e-commerce. The position requires a candidate who can garner support for the program within the School and the University, including Cornell’s world-class Computer Science group. A tenure or joint faculty position at the Associate or Full Professor level. Successful candidates are expected to have an established research record and leadership position in the field. No particular specialization is emphasized, but interdisciplinary credentials are encouraged. Send applications with a curriculum vitae, and copies of research papers to: Dean Robert J. Swierenga, S.C. Johnson Graduate School of Management, 207 Sage Hall, Cornell University, Ithaca, NY 14853.

Cornell is an affirmative action/equal opportunity employer.

Sarah Lawrence College announces a new full-time, tenure-track opening in Asian-American and Postcolonial Literature beginning Fall 2001. The position is located in Global Studies, an interdisciplinary group of faculty in the disciplines of history, literature, and cultural studies. Teaching is conducted primarily in small seminars and includes guiding the independent research projects of each student.

Requirements include demonstrated teaching ability and active engagement with current intellectual developments in Asian-American literature, rhetoric and related areas of postcolonial studies such as migration. A Ph.D. in literature must be in hand prior to appointment. Special fields of research interest may center on transnational literature stemming from any one of the East Asian or South Asian cultures that form part of the American literary landscape. The candidate chosen will be expected to teach a broad, inclusive curriculum within postcolonial literature and theory.

Candidates should forward a letter of interest together with a curriculum vitae, two prospective syllabi, and a writing sample based on recent research, to Naudia Forbes, Faculty Secretary, At: HOHE, Postcolonial Literature Search, Sarah Lawrence College, 1 Mead Way, Bronxville, New York 10708. Three letters of reference are required, and should be sent directly to Ms. Forbes. The deadline for applications is January 15, 2001.

For information on Sarah Lawrence College, our curriculum, teaching methods, and philosophy of education, please see our website at http://www.slc.edu.

Sarah Lawrence College is an EO Employer.
DIRECTOR OF UNIVERSITY COUNSELING SERVICES
Virginia Commonwealth University

The Division of Student Affairs at Virginia Commonwealth University invites applications and nominations for the Director of University Counseling Services.

The mission of University Counseling Service at Virginia Commonwealth University is to provide psychological services to VCU students and the University community in such a way that students can meet their academic needs while having the opportunity to develop personally, socially, and emotionally. Service delivery includes individual counseling, group counseling, time crisis intervention, couples counseling, multicultural programming and outreach, academic success workshops, and other outreach and consultation services to students, faculty, and staff. University Counseling Services is an American Psychological Association approved intern training agency while serving also as a training site for students in social work, rehabilitation counseling, pastoral counseling, psychiatry, and clinical and counseling psychology. In addition to the Director, the staff is comprised of an Assistant Director, Coordinator of Training, four staff psychologists, one staff social worker, a consulting psychiatrist, and support staff in offices on two campuses. The Director reports to the Vice Provost for Student Affairs.

Responsibilities
Leadership: The Director must articulate a vision for the department; set annual objectives; prescribe and practice ethical behavior; recruit, select, supervise, and develop other staff in the department; manage resources and budget; communicate effectively with all constituencies; collaborate with other departments; and, continuously monitor and improve program offerings in response to changing needs of the students and the institution.

Administration: The Director is responsible for the overall administration and coordination of the activities of the University Counseling Services through their offices on both campuses of Virginia Commonwealth University. The Director is responsible, in consultation with the staff, for the development of annual goals for the department; for the administration of the departmental budget; for the selection of staff and interns; for the provision and maintenance of facilities and technology consistent with its mission; for the preparation of an annual report of the activities and accomplishments of the department; and for providing service on university-wide and divisional committees.

Supervision: The Director is responsible for recruiting, selecting, training, and supervision of all staff in the department. Staffing should reflect the diversity within the student community and all staff should be fully qualified within their respective level of training. The Director should provide for professional development opportunities and provide for the education of staff regarding legal issues governing the delivery of counseling and psychological services.

Campus and Community Relations: The Director is responsible for assuring that the counseling service develops close cooperation with campus referral sources and with members of the faculty and staff who seek consultations. The counseling service should establish close cooperation with such areas as career planning and placement services, special academic support units, specialized student services (e.g., services for students with disabilities or international and minority services), student health services, VCU police, residence life program, and other academic or administrative units as appropriate. The counseling service should offer programming that focuses on diverse populations.

Qualifications
The successful applicant will possess the following required qualifications: an earned doctorate preferably from an APA accredited program, or equivalent credentials, a minimum of five years of clinical experience or leadership experience in a clinical setting, preferably in a college or university counseling center, be licensed or eligible to be licensed in the Commonwealth of Virginia, experience and competency in providing individual and group psychotherapy, and, experience in providing training and supervision. In addition, the following preferred qualifications will be considered: professional involvement; the existence of personal attributes that enable effective interaction with administrators, faculty, and students; experience in working with a multicultural student population; provision of consultation/leadership in policy formation and program development; qualifications for teaching of courses in academic departments; knowledge of legal issues and responsibilities for the profession; and evidence of an understanding of and adherence to the highest principles of ethical behavior.

Salary
The salary for the Director of University Counseling Services is competitive and will reflect the experience of the successful candidate.

Application Process
Application review will begin on February 1, 2001 and the position will remain open until filled. Applications must include a letter of intent, resume, and names, addresses, and telephone numbers of three references. Submit to:

Ms. Carmen H. Bell
Division of Student Affairs
Virginia Commonwealth University
PO Box 843017
Richmond, VA 23284-3017
chbell@vcu.edu

For additional information about Virginia Commonwealth University, visit our Web site at www.vcu.edu.

Virginia Commonwealth University is an equal employment/affirmative action employer. Women, minorities and persons with disabilities are encouraged to apply.

BEAVER COLLEGE
Glenside, PA 19038
(Suburban Philadelphia)

MODERN LANGUAGES DEPARTMENT CHAIR

Ranked among the top 20 colleges and universities in the Northern Region of the United States, Beaver College is a coeducational, comprehensive college offering undergraduate and graduate study to more than 2,700 students annually. It has recently applied to the Commonwealth of Pennsylvania for university status. Descriptive information regarding the College is available through our Web site: www.beaver.edu

The Chair of Modern Languages/Associate Professor of Spanish position will be filled no later than Fall 2001 with a Ph.D. in Spanish language/literature without preference for specialty. The Department offers an undergraduate major in Spanish; minors in Spanish, French, German, and Italian; and courses in Japanese. The current Chair is leaving the College to assume the Executive Directorship of a national modern languages professional association. The Department faculty are active participants in the international thrust of the College and work in close cooperation with the well-known Beaver College Center for Education Abroad. The Chair will be authorized to make two replacement hires within the first year. Applicants should provide evidence of successful administrative and teaching experience. Please send letter of application, vita, and names and addresses of three references to Dr. Hugh H. Grady, Modern Languages Search Committee Chair, at the address above by December 18, 2000 for initial interviews at the MLA convention in Washington, D.C.

Beaver College is an Affirmative Action/Equal Opportunity employer.

Division of Biology and Medicine
Brown University
Genomics/Proteomics/Computational Biology
Assistant Professor

The Department of Molecular Biology, Cell Biology and Biochemistry at Brown University announces the opening of a tenure track assistant professor faculty position in Genomics/Proteomics/Computational Biology to begin July 1, 2001.

Qualifications include a Ph.D., M.D. or equivalent degree and a demonstrated track record of excellence in research. The applicant will pursue an independent, externally-funded research program emphasizing genomic/proteomic approaches to the study of contemporary biological problems. The successful applicant must be qualified to be an active participant in a new strategic initiative in genetics and genomics with ties to computer science and applied mathematics; in the NIH-funded predoctoral training program in Molecular Biology, Cell Biology and Biochemistry; and in graduate and undergraduate teaching, including the degree program in computational biology.

The Search Committee will give full consideration to applications received by January 15, 2001 that include a curriculum vitae, description of research interests, and at least three letters of reference (five for a senior level appointment). Reference letters should be mailed under separate cover. Application materials should be sent to: Dr. David Rand, Genomics/Computational Biology Search Committee Chair, c/o Ms. Elaine Butler, Department of Molecular Biology, Cell Biology and Biochemistry, Brown University Box G-J364B, Providence, RI 02912.

Molecular Geneticist Faculty Position
Assistant, Associate or Full Professor
Brown University
Division of Biology and Medicine

The Department of Molecular Biology, Cell Biology and Biochemistry at Brown University announces the opening of a tenure track/tenured faculty position in Molecular Genetics to be appointed July 1, 2001. The appointment may be made at the level of Assistant, Associate or Full Professor depending on the qualifications of the candidate selected.

Qualifications include a Ph.D., M.D., or equivalent degree and a demonstrated track record of excellence in research, including significant external funding for applicants at a senior level. The applicant will be expected to pursue an independent externally funded research program emphasizing molecular genetic approaches to the study of contemporary biological problems. We especially welcome applications from individuals using transgenic mice. The successful applicant must be qualified to be an active participant in the NIH-funded predoctoral training program in Molecular Biology, Cell Biology and Biochemistry, in the teaching of departmental graduate and undergraduate courses, and in a well-funded strategic initiative in genetics and genomics.

The Search Committee will give full consideration to applications received by January 1, 2001 that include a curriculum vitae, description of research interests, and at least three letters of reference (five for a senior level appointment). Reference letters should be mailed under separate cover. Application materials should be sent to: Professor Arthur Landy, Molecular Geneticist Search Committee Chair, c/o Ms. Joan Woiles, Department of Molecular Biology, Cell Biology and Biochemistry, Brown University, Box G-J360, Providence, RI 02912.

Brown University is an EEO/AA Employer and invites applications from women and minorities.
Coordinator of Urban Studies Tenure Track

The Position: Southern Connecticut State University seeks a creative and experienced faculty member for the position of Coordinator of Urban Studies. This is a tenure track appointment to be made at the Associate or Assistant Professor level in the Department of Social Work. The Coordinator is expected to develop additional multidisciplinary programmatic components for the current Master’s degree program in Urban Studies. He or she will take leadership in creating a new multidisciplinary undergraduate degree program in Urban Studies. The Coordinator will teach in one or more of the programs. Currently, there are three concentrations: (1) urban planning and development (2) urban management and (3) urban education.

SCSU interprets urban studies in its widest scope. While continuing to concentrate on contemporary urban planning, urban management, and health related institutions, the program would also welcome new course clusters in areas that contribute to a comprehensive appreciation of cities in American life.

QUALIFICATIONS: A doctorate is required. ABD candidates will be considered if the degree is near completion. Ability to communicate effectively with a diverse faculty, students, administrative staff, community leaders, and alumni is critical. A record of successful teaching experience is preferred with same experience as a program administrator.

THE PROCESS: Closing date for applications is January 15, 2001 for an appointment beginning in August, 2001. Applications from the following or related fields are welcome: social work, political science, sociology, public administration, history, urban planning, and health-oriented specializations. Please send a letter stating qualifications and interest in the position, a curriculum vita, and three letters of reference with current phone numbers to:

Initial screen date is January 5, 2001; position open until filled.

UW-Green Bay is an Affirmative Action/Equal Opportunity employer. Names of applicants may be disclosed unless requested otherwise. Names of finalists will be released.

Sarah Lawrence College seeks applicants for a tenure-track position to teach environmental policy and environmental advocacy, beginning Fall 2001. The faculty member will serve as a catalyst to raise environmental awareness in the college community. Areas of expertise and teaching interests include environmental policy, environmental advocacy, and/or environmental ethics. The candidate’s background should include teaching in environmental studies or related fields, practical experience in environmental advocacy, and a Ph.D. or J.D. or analogous advanced degree. A science undergraduate concentration is desirable.

Applicants should send a concise statement of their experience in environmental advocacy, a curriculum vita, two relevant course syllabi or course proposals, and three confidential letters of reference before January 10, 2001 to:

Dr. Charlotte Price
Chair of Search
Sarah Lawrence College
1 Mead Way
Bronxville, NY 10708-5999

Sarah Lawrence College is an EOE: Affirmative Action/Equal Opportunity Employer. Women, minorities, and persons with disabilities are encouraged to apply.

The University of Texas-Pan American

The University of Texas-Pan American invites applications and nominations for the position of Dean of the College of Social and Behavioral Sciences. The College of Social and Behavioral Sciences consists of five departments: Criminal Justice, Military Science, Political Science, Psychology-Anthropology, and Sociology. The College offers five bachelor's and four master's degree programs. The Dean, who must have an earned doctorate in one of the disciplines represented by the College departments, is the chief academic leader for the College and is responsible for the daily operation of all College functions. Candidates should be tenurable at the professor rank in one of the disciplines represented by the College departments.

Candidates must have at least five years of academic administrative experience, excellence in teaching, leadership ability, a record of scholarly activity, and experience in budget management. Candidates must have experience in faculty development and evaluation, curriculum development, fundraising, and new degree implementation. The College is especially interested in candidates who have demonstrated competence in grantmanship, research, and graduate degree development. Experience in distance education/web-based learning, student recruitment and retention, student improvement and academic achievement, and teacher preparation desirable.

The University of Texas-Pan American is located in South Texas, 10 miles from the U.S./Mexico border. The University has an enrollment of 12,500 students of which 85 percent are of Hispanic origin. Candidates should have a demonstrated interest in multicultural issues and experience with consensus-building among various groups in an academic setting.

Applications and nominations for this position are open until filled. Review of applications will begin January 22, 2001 with an expected appointment date of July 2001. Please send applications and nominations to:

The University of Texas-Pan American
C/O Personnel Office
1201 W. University Dr.
Edinburg, Texas, 78539

Your application should include a letter of interest, current vitae, and a list of five references. Letters of reference will be requested at a later date.

University of Texas-Pan American is an EEO- AA employer; women, minorities, and persons with disabilities are encouraged to apply.

(F0001-56)
EDUCATION

WILLIAM RAINNEY HARPER COLLEGE
William Rainey Harper College is a comprehensive community college located in Chicago’s northwest suburbs, which enroll over 20,000 students of all ages. The college supports and encourages excellence in teaching, the recognition of different learning styles, the development of multicultural perspectives and the celebration of diversity.

Due to an anticipated retirement, the College seeks a visionary academic leader to join our dynamic, innovative educational environment. The College offers a very competitive salary and fringe benefit program. The effective date for this position is July 1, 2001.

DEAN, ACADEMIC ENRICHMENT AND LANGUAGE STUDIES

In this administrative position you will be responsible for providing leadership for a complex division that currently includes the Learning Achievement Program, English as Second Language and Linguistics, Adult Educational Development, Sign Language Studies and the Sign Language Interpreting Program, Success Services, International Student Office, Tutoring Center and Writing Center.

The successful candidate should be able to demonstrate that they meet the following:

- An understanding of the role of developmental instruction and academic support programs in the community college as well as transfer and career curricula.
- Strong human relations skills with an emphasis on collaboration and support of the division’s leadership team.
- Strong organizational skills and the ability to provide leadership for many diverse departments.
- Demonstrated ability to work with colleagues in the college at large as well as with external community or funding agencies.
- A working understanding of instructional technology and the many aspects of its influence on pedagogy.
- An understanding and appreciation for developmental students and appropriate curricula and services.
- Ability to work collaboratively with faculty and staff to support innovative educational programs such as learning communities and others.
- A demonstrated appreciation of and support for diversity.
- An understanding of and experience with state and federal grant processes.
- A minimum of three to five years of progressively more responsible experience in a supervisory capacity in a community college or similar educational setting.
- Master’s degree in one of the disciplines in the division with coursework and experience in administration.

Application review will begin mid-December 2000, and will continue until the position is filled. To be considered for the above position, submit a resume, copies of credentials (including graduate transcripts), a statement outlining the contributions you can make to the College, and three (3) letters of recommendation to:

William Rainey Harper College
Attn: Employment Specialist - D
1200 W. Algonquin Rd., Palatine, IL 60067

Harper college is an Equal Opportunity, affirmative Action employer that encourages applications from women, minority group members, and persons with disabilities.

DOMINICAN UNIVERSITY  
DEAN  
ROSARY COLLEGE OF ARTS & SCIENCES  

Dominican University invites nominations and applications for the position of Dean of the Rosary College of Arts & Sciences; the appointment is effective in the summer of 2001.

The Rosary College of Arts & Sciences is composed of twelve academic departments with sixty full-time and forty-seven part-time faculty offering forty-nine undergraduate majors. The college is noted for its dedication to the liberal arts, its interdisciplinary core curriculum, and its several strong study abroad programs.

Dominican University aspires to be among the most vital, intellectually engaged, value-centered communities in the Midwest. The University is located ten miles west of downtown Chicago in a beautiful residential community. The 1040 undergraduates are a part of a university of approximately 2300 students organized into the College of Arts and Sciences, the Graduate School of Library and Information Science, the School of Business, the School of Education, the Institute for Adult Learning, and a new Graduate School of Social Work.

The Dean of the Rosary College of Arts & Sciences is the chief executive officer of the College. The Dean reports to the Vice President for Academic Affairs and serves on major committees of the University.

The University seeks a candidate with the following qualifications:

- A deep commitment to the liberal arts and a record of participation in liberal arts education
- An acquaintance with the national dialogue about the liberal arts
- A vision for the liberal arts in the twenty-first century at a Dominican institution that values excellent teaching, service, and scholarship
- A vision of the role of Catholic faith in contemporary university education and scholarship
- Academic and scholarly credentials that merit the respect of the academic community and are sufficient to earn appointment to an academic department at a senior rank
- A distinguished record in higher education with significant administrative experience
- A deep commitment to support and enhance the diversity of the faculty and student body
- An appreciation of the importance of interdisciplinary study
- A commitment to implementing learning technologies in a liberal arts environment

The Dean’s salary is competitive and commensurate with qualifications and experience.

Qualified candidates should send an application, a current curriculum vitae, and the names and telephone numbers of three professional references to:

Norman Carroll  
Vice President for Academic Affairs  
Dominican University  
7900 West Division Street  
River Forest, IL 60305  
www.dom.edu

Review of applications will begin January 1, 2001, and will continue until the position is filled. Minority candidates are especially encouraged to apply.

Dominican University is an Equal Employment and Affirmative Action employer.

KEAN UNIVERSITY  
Union, New Jersey  
Founded in 1855

KEAN UNIVERSITY  
INSTRUCTIONAL DESIGN SPECIALIST  
FALL 2000

Responsibilities: The Instructional Design Specialist (IDS) will work one-on-one with faculty from across the University in the development and implementation of technology-dependent educational activities. In addition, will conduct workshops that focus these activities on pedagogically sound principles and practices, particularly in the use of multimedia and the technologies of distance education. Candidate will also work collaboratively with faculty in the identification & use of content development & delivery tools.

Requirements: Master’s degree in instructional design or a closely related field and a minimum of 4 years of experience in the development of contemporary instructional packages. A higher education setting. A working knowledge of WebCT or Blackboard and multimedia development software is a plus. Significant post secondary teaching experience is highly desirable and excellent communication skills are required.

Salary & Benefits: Salary is competitive and commensurate with experience. A comprehensive benefits program is included.

Application: Review of applications will begin immediately and continue until position is filled. Qualified applicants should forward their resumes and letters to: Dr. Eleanor V. Laudino, Associate Vice President for Academic Affairs, Kean University, 1000 Morris Avenue, Union, NJ 07083-3401. Minority and women are strongly encouraged to apply.

Nazareth College of Rochester
FACULTY POSITIONS

Nazareth College of Rochester is a comprehensive institution offering a wide range of bachelor’s and master’s degree programs. The college is a thriving, independent, co-educational institution with 1,900 undergraduate and 300 graduate students. The college is located minutes from downtown Rochester, New York, the third largest city in the state. Nazareth is noted for its internationally renowned industries and museums, and its liberal arts university. In keeping with its mission and ideals as a liberal arts institution, Nazareth College of Rochester seeks individuals with an understanding of the benefits and importance of ethnic and racial diversity on campus and a demonstrated commitment to the promotion of such diversity.

Nazareth College of Rochester anticipates the following tenure-track positions for Fall 2001:

- **Art Education**: To teach beginning methods course, supervise student-teachers, and be liaison with community schools. X-12 experience and college level art education teaching preferred. Record of professional scholarly and/or studio activity.

- **Chemistry - Inorganic**: To coordinate and teach General Chemistry (lecture and lab) and to teach in the College Core Curriculum. Interest in conducting research with undergraduates.

- **Economics**: To teach undergraduate principles courses and in two of the following fields: international economics, development economics, finance economics; and to teach in the MS Management program.

- **Education - Literacy**: To teach undergraduate and graduate courses in literacy theory and methods. Teaching experience K-12 required. Knowledge and/or experience with professional site-based models; strong background in special education, secondary education and/or teaching English language learners desired.

- **Education - Middle School/Inclusive Education**: To work collaboratively in a team teaching, site-based model in the undergraduate program leading to certifications in middle school, elementary and special education; content specialty is desirable; opportunities to teach at the graduate level.

- **Education - Special Education/Inclusive Education**: To teach graduate and undergraduate special education courses, supervise fieldwork, and apply theory to instruction. Interest in inclusion and ability to collaborate to establish professional site schools are required.

- **English/English Education**: To coordinate English Education Program; mentor student teachers; teach writing, literature, theory of grammar and composition; and coordinate English methods courses. Minimum five years teaching experience at grades 7-12; expertise in current theory/practice of teaching literature, writing, and language (including literacy); curricular/administrative experience preferred.

- **English (with Creative Writing Concentration)**: Creative Writing concentration in fiction, poetry, or creative non-fiction. Significant study in all areas of literature. Experience teaching these areas and record of publication preferred. Teaching duties: creative writing (excluding playwriting), literature, and composition courses.

- **Physical Therapy**: To teach pre-professional and/or professional physical therapy and related courses and to coordinate curriculum development. Appropriate clinical experience is required; area of specialization is open; preference will be given to those with experience in Gerontology and Neurology. Master’s degree and willingness to pursue doctoral studies required. Rank commensurate with experience.

- **Psychology**: To teach courses in areas of interest and core courses in the major program. Specialty in Developmental Psychology with emphasis in the areas of cognitive and language development. Commitment to involvement of students in research programs.

- **Social Work**: To assist in the development of an innovative, collaborative MSW program offered with SUNY Brockport. Responsibilities include involvement in curriculum development and the SWSE self-study and accreditation process. Ability to teach research, HIES, practice, and/or policy specialization related to family and community practice or interdisciplinary health practice.

- **Sociology**: To teach a range of undergraduate sociology courses, which might include introduction to sociology, social classes, racial and cultural minorities, marriage and families, as well as courses in specialty areas.

- **Speech/Language Pathology**: To teach undergraduate and graduate courses in expanding CAA program. Opportunity for research in areas of interest and clinical activity available. CCSULP required and eligibility for NYS license preferred.

Applications from candidates with research and teaching interests in micro- or meso-organizational behavior are invited. We are particularly seeking candidates with research and teaching strengths in leadership, organizational change, innovation, and the management technology. Candidates at all levels will be considered. Direct inquiries to: Professor Elizabeth A. Maninis, S. C. Johnson Graduate School of Management, 452 Sage Hall, Cornell University, Ithaca, NY 14853-6201. Applications must be received by December 20, 2000, and should include a vita, copies of recent research papers, course syllabi and teaching evaluations (if applicable), and three letters of recommendation.

An Affirmative Action/Equal Opportunity Employer.

---

Southern Connecticut State University

New Haven, CT 06515
Email: paul@southernct.edu

SCSU is an Affirmative Action/Equal Opportunity Employer and encourages minorities and women to apply.
DEAN
McGEORGE School of Law
University of the Pacific

McGeorge School of Law, University of the Pacific invites applications and nominations for the position of Dean. We seek an outstanding candidate whose vision, intellect, and energy will help advance McGeorge to a new level of national prominence.

University of the Pacific is California’s first chartered institution of higher learning, founded in 1851. McGeorge School of Law, founded in 1924, is a private law school with approximately 1,050 students and 36 full-time faculty members. The school has a highly collegial faculty committed to excellent teaching and scholarship, a large body of supportive alumni, and a growing national reputation, with special strengths in advocacy, criminal justice, governmental affairs, intellectual property and international law.

In addition to its J.D. program, McGeorge attracts law school graduates from around the world to its LLM program in international business law. The Honorable Anthony M. Kennedy, Associate Justice of the United States Supreme Court, taught at McGeorge before his appointment to the Court, and continues to teach in the summer program in Salzburg, Austria. McGeorge alumni practice law in all 50 states and in 45 foreign countries.

The law school is located on its own attractive 22-acre campus in Sacramento, California's capital city. Its modern facilities are housed in 18 buildings, which include computer-equipped classrooms, a state-of-the-art moot courtroom, on-campus dormitories, and one of the largest private law libraries in the western United States. Sacramento is within a two-hour drive of San Francisco, Lake Tahoe, and the Napa Valley. The main campus of the University of the Pacific is located in Stockton, approximately one hour drive away.

The Dean is the academic and administrative leader of the law school, and reports to the Provost of the University. The new Dean will be expected to: (1) work with the faculty in promoting excellence in teaching and scholarship and in developing a distinctive academic program; (2) administer the law school; (3) be the law school's primary ambassador to the national legal community; (4) lead the law school's fundraising campaign and resource development; and (5) represent the law school in the university community.

The Dean Search Committee began reviewing candidates in October, 2000 for an appointment beginning summer 2001. All applications and nominations will be treated in confidence. Please send nominations, inquiries, or a letter of interest, a resume, and the names of references. Contact: Paul Richardson, Chair, Julie Davies, Vice Chair, Dean Search Committee, McGeorge School of Law, 3200 Fifth Avenue, Sacramento, CA 95817. Telephone: For Paul Richardson: (916) 739-7169. For Julie Davies: (916) 739-7194 or email her at jdavies@uop.edu. E-mail: Roderick Hamilton of Isaacson, Miller search firm at: hamiltor@linkline.com

University of the Pacific is an AA/EOE. Candidates from all backgrounds are encouraged to apply.

ST. CLOUD STATE UNIVERSITY

A tradition of excellence and opportunity

SCSU seeks applications for four positions in the Department of Special Education. One Associate Professor/Department Chair and three Assistant/Associate Professors, tenure track, to begin August 2001. Salaries are competitive and commensurate with experience. Chair position requires earned doctorate and previous leadership experience. All teaching positions require an earned doctorate or ABD in special education or related field (terminal degree must be in hand at the start of contractual appointment date).

For complete job responsibilities, qualifications, information, and application information go to: http://condor.stcloudstate.EDU/~afact/NOVTDAY.HTM

SCSU is committed to excellence and actively supports cultural diversity. To promote this endeavor, we invite individuals who contribute to such diversity to apply, including minorities, women, persons with disabilities, GLBT and veterans.

TDD/TYY: (612) 297-5353 or 1-800-627-3529.
Dean,
College of Business Administration

The University of Texas at El Paso (UTEP) invites nominations and applications for the position of Dean of the College of Business Administration. The Dean will maintain a strong presence in the community and the region, enhance the image of the College in the business community and develop the College’s external resources. The Dean will strengthen the College’s relationship with the region’s manufacturing and international commerce institutions and promote the College’s role in international business, with a special emphasis on global markets, the expansion of free trade, and NAFTA’s increasing role in the border region.

The Dean, working with the Associate Deans, will provide academic and administrative leadership and support for the faculty and students of the College and will foster a positive environment for quality teaching, scholarly research, and professional service. The Dean will take a leadership role in promoting and securing resources for a developing Ph.D. in International Business and for the MBA Online offered in partnership with the UT System Telecampus and Master of Information Technology program offered in cooperation with UTEP’s College of Engineering.

UTEP, with over 15,000 students, is the largest public institution on the United States-Mexico border. The El Paso/Ciudad Juarez international and multicultural setting affords unique faculty opportunities for teaching, research, and cultural experiences. The University, the second oldest component of the University of Texas System, is dedicated to providing quality higher education to residents of the region. UTEP serves an international population of two million with a variety of baccalaureate and graduate programs in six academic colleges. For more information go to www.utep.edu.

The College of Business Administration, fully accredited by AACSB, prepares its students to be competitive at the regional, national, and international levels. The College houses four academic departments: Accounting, Economics and Finance, Information and Decision Sciences, and Marketing and Management serving 2,306 undergraduate majors and 200 graduate students with 51 full-time faculty. The College offers baccalaureate degrees in accounting, computer information systems, economics, finance, management, human resources management, marketing, and production/operations management. Graduate programs include the Master of Business Administration, the Master of Accountancy, the Master of Science in Economics, and the Master of Information Technology. The College has a variety of contract and grant activities conducted through both college-based and university-wide outreach and research centers.

The successful candidate will be a goal-oriented leader with proven management skills who possess a vision for, and an understanding of, the philosophy and mission of a college of business within the international business community. A strong track record in successfully acquiring external resources is highly desirable.

Review of applications will begin January 15, 2001 and will continue until the position is filled. The anticipated starting date for the position is August 2001. Salary is competitive with other AACSB-accredited institutions. The University of Texas at El Paso does not discriminate on the basis of race, color, national origin, sex, religion, age, disability, or sexual orientation in employment or the provision of services. Each candidate must submit a letter of interest, curriculum vitae or detailed resume, and the names, addresses, and telephone number of five references to Evelyn Posey, Chair, Dean of College of Business Administration Search Committee, Office of the Provost, The University of Texas at El Paso, El Paso, TX 79968-8511.

Director of International Student Services and Multicultural Affairs

The Director of International Student Services performs duties and responsibilities in support of international students. The Director will direct and manage the development and oversight of campus policy, plan and organize services and programs, and conduct orientation programs for international students. The Director provides supervisory responsibility for the Office of International Student Services and Multicultural Affairs. Master’s Degree required in Counseling, International Education or related field. Three years experience working with international students or international education programs. Demonstrated knowledge of the special needs of international students is required. The Director must possess three years of supervisory experience. Start as soon as possible. Salary: Competitive. Interested applicants should send a cover letter highlighting related education and experiences, a resume, transcript of college level work and the names of at least three references by December 20, 2000 to:

Mr. George Breifendorf, Chair
Search Committee
Office of Residential & Campus Life
Rowan University
Sawitz Hall
201 Mullica Hill Road
Glassboro, NJ 08028-1701

Rowan University is a comprehensive institution with an enrollment of 9,000 full and part-time undergraduate and graduate students in six colleges. It is located in Southern New Jersey, 17 miles southeast of Philadelphia.

MATHMATICS
Two Tenure Track Positions
Western Connecticut State University

GENERAL EDUCATION-Assistant Professor:
The position will support the University’s general education requirement, which includes courses through Calculus II. It will also include responsibilities in placement testing (currently done on Accuplacer). Preference will be given to candidates with general education teaching experience and experience in placement testing. Duties include teaching, departmental service, and appropriate creative activity. Doctoral degree is required for the position. Preference will be given for a doctorate in the mathematical sciences. A candidate with a master’s degree in mathematics and a doctorate in a related field with a mathematics focus will also be considered.

SECONDARY EDUCATION-Assistant/Associate Professor:
The position supports the department’s secondary education program in mathematics. It includes teaching mathematics and mathematics methods courses, as well as supervising student teachers at the high school level. Further duties include departmental service, student advisement, membership in education review committee, and appropriate creative activity. Requirements: master’s degree in mathematics; doctorate in the mathematical sciences; mathematics education or education; secondary teacher certification.

Application Process: Interested applicants (specify which position) should send a resume, three letters of reference, unofficial transcripts, statement of teaching philosophy, and evidence of teaching excellence to: Dr. J. Hamer, Search Committee Chair, Dept. of Mathematics and Computer Science, WCSU, 181 White St., Danbury, CT 06810. Hamerj@wcsu.edu

Review of applications will begin December 15, 2000 and will continue until the position has been filled. All application materials must be received by January 15, 2001 for the application to receive consideration. The first round of screening. No electronic submissions will be accepted, except for letters of reference. We will also be interviewing at the Joint Meetings in New Orleans, January 10-13, 2001.

Western is an Affirmative Action/EQUAL Opportunity Educator/Employer
DEAN OF INSTRUCTION
$77,758 - $92,338
(Starting Salary)

Paradise Valley Community College, of the Maricopa Community College District, is seeking a leadership professional for the position of Dean of Instruction.

The Dean of Instruction serves as the chief academic officer and provides senior-level leadership for academic, occupational, developmental, continuing education and instructional support programs of the college. The Dean of Instruction also:

- Initiates and leads strategic planning in the context of a learning-centered college
- Develops new initiatives, curriculum, delivery formats and programs in response to market needs
- Advocates for the integration of technology in the teaching and learning environment
- Hires, evaluates and supervises faculty, division chairpersons and staff
- Oversees all academic achievement and program assessment initiatives

Master’s degree required. Doctorate preferred. Experience initiating, developing and implementing learning-centered practices; organizational and academic planning responding to enrollment growth; curriculum development and assessment of student-learning outcomes; budget development and grant writing. An accomplished instructional leader with demonstrated ability to provide leadership in a fast-paced, rapidly-expanding environment is essential.

The closing date is January 5, 2001. Interested candidates are encouraged to apply immediately.

Application form required. Employee Services, 2411 W. 14th Street, Tempe, AZ 85281. Hot line (480) 731-8444.

CHANCELLOR
The University of Virginia's College at Wise

Nominations and expressions of interest are invited for the position of Chancellor of The University of Virginia's College at Wise. The Chancellor reports to the Board of UVA-Wise and to the President of the University of Virginia in Charlottesville.

The University of Virginia's College at Wise is one of the top liberal arts colleges in the South and is gaining national recognition for its growing academic excellence. Located on a 367-acre campus in the Appalachian Mountains of Southwest Virginia, UVA-Wise supports an enrollment of 1,450 and a full-time faculty of 72. UVA-Wise offers undergraduate programs in the arts and sciences, as well as select graduate programs in business, nursing, teacher education and other fields, all characterized by a strong liberal arts experience.

The College seeks a new Chancellor who will continue enhancing the quality of the undergraduate experience and strengthening the institution's faculty, student body and financial resources. The new Chancellor will be expected to possess the vision, educational credentials, personal characteristics and administrative skills to work effectively within the close-knit community of Wise, the University of Virginia and the Commonwealth. An understanding of the role and value of public liberal arts colleges is essential.

Correspondence should be directed, in confidence, to the consultants supporting this search:

Chancellor
The University of Virginia's College at Wise
E/O EDUCATIONAL MANAGEMENT NETWORK/WTI/KIEFFER
98 Old South Road
Nantucket, MA 02554

For additional information or the Position Specification, please contact: Lucy A. Leske or Nancy A. Martin of Educational Management Network/Win/Kieffer at uva-wise@emena.com.

UVA-Wise has an Internet Web site at http://www.uvwise.edu.

The University of Virginia is an equal opportunity/affirmative action employer.

Assistant Professor
Two Dimensional Design
Division of Foundation Studies

Full-time faculty to teach 2-D Design in Foundation Studies. Faculty also advise students, participate in curriculum development, and serve on college committees. Teaching responsibilities begin September 1, 2001. For more information see: www.risd.edu

WESTERN CONNECTICUT STATE UNIVERSITY
SCHOOL OF PROFESSIONAL STUDIES
DEAN

Western Connecticut State University invites applications and nominations for the position of Dean of the School of Professional Studies. WCSU is located in Danbury, a city in Fairfield County, 30 miles north of New York City. The University is located on two campuses and serves 5,500 undergraduate and graduate students. WCSU is one of the four comprehensive universities that comprise the Connecticut State University System. WCSU is divided into the School of Arts & Sciences, the School of Professional Studies, and the Ancestral School of Business. The School of Professional Studies’ mission is primary teaching as opposed to research. The school serves approximately 1,450 undergraduate and graduate students. The School of Professional Studies offers undergraduate degrees in Music, Social Work, Health Education, Education, and Nursing. Graduate degrees in Counselor Education, Education, Elementary Education, Secondary Education, Music Education, and Nursing are also offered.

Responsibilities: The University is seeking a Dean capable of promoting, developing, and sustaining the School’s educational, scholarly, and public service programs. The Dean provides collegial leadership and consensus building for faculty organized into six departments – Education, Health Science, Music, Nursing, Physical Education, and Social Work. The Dean of the School of Professional Studies reports to the Academic Vice President.

Qualifications:

• A record of teaching and scholarship, including an earned doctorate in a field appropriate to the School’s curricula.
• Academic administrative experience, preferably beyond the level of chairperson, and demonstrated team-building experiences.
• Experience with national accreditation processes.
• An appreciation for scholarship and research in an academic setting.
• An appreciation of information technology and its role in education.
• Demonstrated ability to communicate effectively and to maintain good working relationships with all internal and external constituencies of the University.
• Demonstrated ability to represent and promote the School of Professional Studies to external constituencies.
• An understanding of the needs of a diverse student body and non-traditional students.
• Experience obtaining grants and fundraising is preferred.

Application Process: Send letter of application that includes an estimate of what he/she brings to the position and how his/her experience corresponds with the requested qualifications, current curriculum vitae, and the names, addresses, and telephone numbers of three professional references to: Charles P. Spiridon, Dean of Human Resources Management, WCSU, 181 White St., Danbury, CT 06810. www.wcsu.edu

Salary: Negotiable. Excellent benefit package.

Western is an Affirmative Action/Equal Opportunity Educator/Employer.

West Chester University of Pennsylvania

Frederick Douglas Teaching Scholars
Summer 2000

West Chester University of Pennsylvania is offering summer teaching opportunities to graduate students entering the final year of terminal degree programs and preparing to be college teachers, for the purpose of attracting graduate students from historically underrepresented and underserved populations. Students selected will teach one course during a five-week term June 25-July 28.

This program is designed to give these graduate students teaching experience and to explore employment opportunities with this university, which is committed to cultural diversity. This is in keeping with the spirit of Douglas' life of public service and the University's mission to be a source of encouragement to the African American, Native American, Hispanic American, and Asian American communities.

Minimum requirements are: masters degree completed or equivalent and currently enrolled in a terminal degree program; academic background in one of the fields taught at West Chester University; and at least three favorable letters of recommendation from faculty or professionals in the student's field, including the student's advisor. Preferred: experience teaching as as teaching assistant. Scholars will be compensated as adjunct faculty. West Chester University is an equal opportunity, affirmative action employer encouraging diversity.

For information, contact: Office of Sponsored Research & Faculty Development, WCU. Phone: (610) 436-3100, Fax: (610) 436-3315.

KSU is an Affirmative Action/Equal Opportunity Employer.
Broward Community College (BCC) is a large, multi-campus urban institution in Broward County located in Southeast Florida. Founded in 1959 as the first public higher education institution in the county, Broward Community College functions as the principal provider of undergraduate higher education for the residents of Broward County. Through a wide variety of degree and certificate programs and continuing education courses, the college attracts a great diversity of students, including individuals planning to complete a bachelor's degree program, people seeking to acquire job-entry skills, employees desiring to upgrade skills for promotion or career change, and individuals seeking education for their personal enrichment. In addition, the college is also a source of cultural enrichment; a resource for community development, business, and industry; and an avenue for continued skill upgrading and enhancement and retraining. As a public comprehensive community college, the college serves well its role as a significant segment of America's higher education effort.

**FACULTY POSITIONS**

BCC is seeking candidates to fill tenure-track positions. These positions are for a 13-day contract, and most will begin in Fall, 2001. Minimum salaries are $33,882 (Master's degree with 18 graduate semester hours in discipline) $36,441 (Doctorate-degree with 24 graduate semester hours in discipline).

**Aviation Maintenance Faculty, #323**
Bachelor's degree and FAA Airframe and Powerplant certificate. Experience in Aviation Maintenance field and teaching required. Will be required to teach on the evening shift of 6:00PM to 11:15PM. Position begins May, 2001.

**Biology Instructor, #990**
Master's degree with eighteen graduate semester hours in field, to include microbiology.

**College Preparatory English Instructor, #462**
Bachelor's degree in English with experience teaching grammar and writing. Experience in multimedia and/or computer assisted instruction. If the candidate does not have a Master's with eighteen graduate hours in field, he or she must be willing to complete it within three years of hire.

**Computer Science Instructor, #207 & #268**
Master's degree with eighteen graduate hours in Computer Science or a closely related discipline. Certification to teach Oracle (Application Developer and/or DBA), Sun Java Developer, C/W (Site designer, Site administrator, and/or Enterprise Developer), Microsoft (MCSD and/or MCSE), Cisco (CCNP), Novell (CNE), and/or A+ courses. Applicants who hold a desired certification(s), but a lesser academic degree, will be considered.

**Education/ Psychology Instructor, #986**
Master's degree with eighteen graduate semester hours in Education and eighteen graduate semester hours in Psychology.

**Education/ Social Science Instructor, #427**
Master's degree with eighteen graduate semester hours in Education; and eighteen graduate semester hours in Geography, Psychology, or Sociology.

**English Instructor, #150 & #157**
Master's degree with eighteen graduate hours in field. Experience teaching college prep English, college composition and introductory literature courses or Professional and Technical Writing. Experience in multimedia applications and/or computer instruction.

**English Instructor, #204**
Master's degree in English, literature, or related field and teaching experience at the developmental/college - preparatory level. Demonstrated expertise in and commitment to developmental/college-preparatory writing preferred. The individual filling this position should look forward to teaching mostly college preparatory writing courses.

**ESL Instructor, #988**
Master's degree with at least eighteen graduate credit hours in TESOL and a minimum of three years community college teaching experience. Some administrative experience desirable for ESL Program Coordinator. Some Saturday hours may be required. Will be required to teach on the evening shift (8PM-11:15PM).

**Hospitality/Tourism Instructor, #366**
Master's degree, preferably in Hospitality or Tourism/Travel. Experience in industry is required.

**Mathematics Instructor, #254**
Master's degree with eighteen graduate credit hours in Mathematics. Applicant will teach college preparatory Mathematics, with option of college-level Mathematics for supplemental pay. Applicant must be willing and able to incorporate technology in the classroom, and must be open to new teaching strategies to enhance student success. Must be willing to work the evenings for part of the teaching load.

**Reading Instructor, #994**
Master's degree with eighteen graduate semester hours in Reading and/or Reading Education; three years community college teaching experience in College Preparatory Reading, College Level Reading, and/or ESL Reading Required.

**Religion Instructor, #310**
Master's degree with eighteen graduate hours and experience teaching in the discipline of religion; Doctoral degree preferred. Should possess broad competency in world religions, the various approaches to the study of religion, and the ability to take the initiative to create and teach courses in Religion under the special topics designation.

**Spanish Instructor, #059**
Master's degree in Spanish or closely related field. Proficiency in Spanish and English; previous post-secondary teaching experience required. Demonstrated excellence in community college teaching; basic proficiency in a third language (French) is preferred.

**Speech Instructor, #1008**
Master's degree in Speech or Communication with a minimum of eighteen graduate hours in Speech required. Preference given to candidates with experience in teaching diverse students and who possess multi-disciplinary experience and/or credentials in the areas of Speech and Radio/Television.

**ADMINISTRATIVE POSITIONS**

Salaries are based upon qualifications and experience.

**Vice President of Academic Affairs, #063**
The vice president is a senior administrator who reports directly to the college president overseeing the planning, operation, and evaluation of the college's academic programs. The individual will provide visionary leadership in academic programs, consider and analyze all facets of program operation, plan various interrelated internal and external activities and coordinate multiple projects and operations within Academic Affairs. The vice president is integral in developing and maintaining close relationships with the college's university, business, and secondary school partners, acts as a college liaison for institutional programs on a local, state and national basis, and recommends long and short range goals consistent with the mission and philosophy of the College.

The successful candidate will possess a doctorate degree in education, educational administration or a related field from an accredited college or university. A minimum of 7 years of progressively responsible experience in education, administration or a related field, preferably at a college level, is required.

**Aviation Institute Director, #033**
The Aviation Institute oversees A.S. programs for aircraft technicians, pilots, aviation administrators and airport operations agents; manages the Institute's budget; hires and supervises faculty and staff; and works with industry partners to ensure the growth of Institute programs.

**Dean of Business Affairs, #753**
Reporting to the Provost, this position oversees the preparation of the campus budget, directs overall operations of security/safety, physical plant, cashier's office, child care center, and contract services, and serves as main campus contact for all college wide departments (Human Resources, Finance and Information Technology). The successful candidate will coordinate construction, renovation, remodeling and maintenance with on-going campus operations and development specifications for Requests for Proposals and/or bids for Campus.

**Roads Institute Director, #039**
Master's degree with a concentration in business or a related field, along with at least five years business/managerial experience, preferably in a college setting. Reporting to the campus Provost, the successful candidate will be responsible for the development and maintenance of the campus budget, directing and coordinating physical plant operations, including campus safety, facilities, maintenance, grounds and custodial services.
Natural Sciences and Wellness Department Head, #212

Reporting to the Dean of Academic Affairs, this position is responsible for the overall operation of the instructional department in accordance with College policies, procedures, and contractual agreements. The candidate will develop faculty schedules, supervise the activities of program coordinators, prepare and manage the budget, establish and implement departmental goals, and develop and revise curricula for the department.

Master's degree with eighteen graduate semester hours in Biological, Physical or Environmental Sciences or Wellness; or a related discipline and four years of experience in education, instruction, and administration or a related area. Curriculum development and grant writing experience desired.

Science Department Head, #914

Reporting to the Dean of Academic Affairs, this position is responsible for the overall operation of the instructional department in accordance with College policies, procedures, and contractual agreements. This includes all matters relating to personnel, students, scheduling, curriculum implementation, instruction, and all financial considerations relating to the department.

Master's degree with eighteen graduate semester hours in a science discipline offered by the Department and three years full time post secondary teaching experience. Preferred qualifications include an earned doctorate with eighteen graduate semester hours in a physical science and evidence of successful administrative experience in an educational setting.

Director of Instructional Design, #911

Reporting to the Associate Vice President of Instructional Technologies, the candidate will develop and implement comprehensive faculty development program to encourage the thoughtful application of technology in the classroom and on the web. This person will also guide faculty in the design and development of courses, content and instructional strategies and activities for web enhanced and fully on-line courses.

Master's degree and three years experience, or Bachelors degree and five years experience integrating technology into teaching/learning process. Demonstrated knowledge of multimedia instructional technologies especially the web, distance education, and instructional design and assessment methodologies. Demonstrated ability to design, create and deliver instructional materials using appropriate development tools, and to train and lead faculty in these endeavors. Successful candidates must have strong project management and written/oral communication skills. Higher education teaching experience desirable.

Director of Enrollment Management Services, #498

Reporting to the Vice President for Student Affairs, this position provides college wide leadership for enrollment services, directly manage and coordinate college recruitment and retention services, the Response Center, and "Distance" student services.

Master's degree with three years of progressively responsible experience in strategic enrollment planning and management; Doctorate preferred. Sophisticated knowledge of current strategic enrollment management theory and practice; demonstrated success in undergraduate recruitment and retention; experience facilitating, analyzing and presenting enrollment research including the development, analysis, and presentation of demographic data; experience in market research, data analysis, and knowledge of technology advancements in student information systems.

Coordinator of Enrollment Management Communications, #1867

Reporting to the chief enrollment management administrator, this position is responsible for the supervision and operation of the college response center, the coordination and direct response to student e-mail inquiries, support to the chief enrollment management administrator, and provides "distance" student services as needed. Evening hours are required.

Bachelor's degree and two years academic advising or strongly related ESO experience. Knowledge of academic advising, high degree of computer literacy, and able to work in a fast paced pressure atmosphere required. Master's degree preferred. Bilingual in Spanish and English preferred.

In order to be considered interested candidates are requested to submit a cover letter, detailed resume, a list of references and photocopies of academic transcripts as well as a completed BCC employment application by 01/31/2001.

Sir Thomas More Chair In Engineering Ethics

Loyola Marymount University, a Catholic comprehensive university in the Jesuit and Marymount traditions located in coastal Southern California, invites nominations and applications for the newly endowed Sir Thomas More Chair in Engineering Ethics. With the creation of the Sir Thomas More Chair in the College of Science and Engineering, the University has achieved its goal of establishing endowed chairs of ethics in each of its four colleges. The Sir Thomas More Professor will provide the vision and leadership to develop a strong program in applied ethics, based on a sound foundation in theoretical ethics, for the undergraduate and graduate students in the engineering-related programs in the College of Science and Engineering.

Applicants must have a strong background in engineering and in theoretical and applied ethics; an earned doctorate and a national reputation in a relevant field; a record of significant scholarship in the area of applied engineering ethics; and a commitment to both undergraduate and graduate instruction. Duties of the Thomas More Professor will include:

1. a teaching load of two courses per semester;
2. ongoing research and publication in the area of engineering ethics, and
3. conception, development, and advancement of a program of learning and discourse on ethical issues pertaining to technological developments and their use, especially for undergraduate and graduate students in the engineering disciplines, but also extending to students in all disciplines.

In addition to a competitive salary, the Thomas More Professor will receive generous support for scholarly and chair-related activities.

The University's goal is to fill the position for the 2001-02 academic year. The review of applications will begin February 15, 2001, and continue until the position is filled. Applicants should send: (1) a letter of application which includes a description of the applicant's vision of the role and activities of the Thomas More Professor; (2) curriculum vitae; and (3) names, addresses, and telephone numbers of five references. To: Gerald S Jakowski; Dean, College of Science and Engineering, Loyola Marymount University; 7900 Loyola Boulevard, Los Angeles, CA 90045-6135.

Loyola Marymount University is an Equal Opportunity, Affirmative Action Employer.

Roger Williams University

Located on 140 waterfront acres in the historic seaport town of Bristol, Rhode Island, Roger Williams University merges the traditional with the innovative to create an academic setting that draws exceptional faculty from the United States and around the world. A private University, Roger Williams offers a broad array of majors in the arts and sciences as well as architecture, business, education, engineering, historic preservation, justice studies and law.

ASSISTANT DEAN
(2 POSITIONS)

The Feinstein College of Arts and Sciences is the largest teaching unit of the University with about 65 full-time faculty. It is organized into three divisions; Arts and Humanities, Social Sciences and Natural Science and Mathematics. Each is headed by an assistant dean, who also bears responsibility for some College-wide functions.

As a leader of their respective Division, the Assistant Dean:

- Works with the departments in the Division on program review, accreditation, development, budgets, course schedules, faculty course assignments, and other matters.
- Represents the Division on various College and University committees, programs and special events.
- Teaches one course per semester in the Division.

Each assistant dean also has responsibility for coordinating College-wide efforts in areas such as: the catalogue and other publications, scheduling, student inquiries, student advising, Service Learning, and faculty evaluations.

These positions require effective leadership, effective managerial and organizational skills, and administrative experience in an academic setting. Excellent communication and interpersonal skills are essential. Successful candidates will also demonstrate the ability to guide program development and assessment and to ensure program vitality.

An earned doctorate from an accredited institution, a record of distinguished teaching at the undergraduate level, and three to five years administrative experience in an institution of higher education are required.

To apply, please send letter of interest, CV and three letters of reference to: Roger Williams University, Office of Human Resources, #50HO, One Old Ferry Road, Bristol, Rhode Island 02809.

Equal Opportunity/Affirmative Action/Americans with Disabilities Act Employer with a strong commitment to diversity. Roger Williams University does not discriminate on the basis of gender, handicap, race, age, color, sexual orientation, political affiliation, marital status, national origin, or religion. We encourage all qualified men and women to apply.

Program Officer - Campus Diversity

The James Irvine Foundation seeks an experienced faculty member or other campus professional who has been involved in issues of diversity to assist with the Foundation's Campus Diversity Initiative. Managing approximately $30 million in grants, the Program Officer will play a leadership role in philanthropy and with independent colleges in California to devise strategies for improving the academic achievement of underrepresented populations, in the context of preparing all students for participation and leadership as workers and citizens.

For a complete position announcement, visit our website at: www.irvine.org or contact our receptionist at 415.772.2244.

PAPER STOCK: 70 lb. opaque

HOW TO PLACE ADVERTISEMENTS

By Mail—All materials should be sent to:
Hispanic Outlook in Higher Education; Display Advertising:
210 Route 4 East, Paramus, NJ 07652
By E-Mail-outlook@sprintmail.com
By Fax—Transmit to (201) 587-9105 seven days a week.
To Confirm—Call (201) 587-8800 (x102 or x106)
Monday - Friday, 9 a.m. to 6 p.m., EST, to confirm receipt of your advertisement.
Nominations and applications are invited for the position of Chancellor of the University of Illinois at Urbana-Champaign. The Chancellor, who reports to the President of the University, is the chief executive of the Urbana-Champaign campus. The Chancellor also serves as an officer of the University and plays an active role in shaping university-wide policy.

The Urbana-Champaign campus, one of three campuses of the University of Illinois, has long ranked among the nation's most distinguished educational and research institutions. Its diverse, world-class programs reflect the mission of a comprehensive, land-grant university. The campus community includes approximately 26,000 undergraduates, 9,000 graduate and professional students, 1,000 faculty, 2,500 academic professionals and 1,500 staff members.

For the position of Chancellor, the University seeks a person of academic distinction, significant administrative experience, and demonstrated leadership ability. This should include: prior teaching and substantial scholarly accomplishments or demonstrated accomplishments in a non-academic environment; a strong commitment to diversity and to the academic values appropriate to the University's three-fold mission of teaching, research and public service; the ability to articulate these values in a variety of forums internal and external to the campus; a demonstrated capacity for sound judgment and effectiveness in administrative affairs; and, more generally, the qualities needed to develop a shared vision, lead the campus and advance the University in the pursuit of academic excellence.

It is anticipated that the appointment of the new Chancellor will take effect on or before August 1, 2001. To ensure full consideration, nominations and applications should be received by January 15, 2001. Communications and inquiries should be directed to:

Professor Thomas S. Ulen, Chair
Chancellor Search Committee
University of Illinois
C/O Office of the President
364 Henry Administration Building, m/c 346
506 S. Wright Street
Urbana, IL 61801

The University of Illinois is an affirmative action/equal opportunity employer.

Grant Writer/Researcher, District Office
Search reopened. Will work collaboratively with CCS and its partners to seek opportunities, develop programs, write and submit proposals to address CCS District and community initiatives. Facilitate the development of collaborative private and government grant/contract proposals. Research and identify appropriate and probable grant opportunities to meet district needs. Take leadership role in the preparation of district-wide grant proposals. Bachelor’s degree and three years of experience as the lead developer/writer of successful grant proposals. Proven expertise in grant development, writing, submittal and implementation process. Master’s degree, grant writing is a higher education setting and experience reviewing grant proposals desirable. $44,000. Closes December 27, 2000. (20009)

For position details, qualification requirements, and official application, contact: Human Resources Office, Community Colleges of Spokane, 501 N. Riverpoint Blvd, MS 1004, P. O. Box 6000, Spokane, WA 99217-6000 at (509) 434-5040, TTY (509) 434-5059 or access our Website at: http://ccs.spokane.cc.wa.us. A/A/E/O

SAVE THE DATE:

**Columbia Earth Institute Postdoctoral Program**

The Columbia Earth Institute (www.earthinstitute.columbia.edu) is founded on the principle that the substantial environmental challenges facing our society are best addressed by teams of scholars from a wide array of academic backgrounds. The Earth Institute is committed to knowledge generation and institutional innovation in facing these challenges.

The Earth Institute postdoctoral program is designed to provide young innovative scholars with the opportunity to build a foundation for a career in science that addresses critical issues related to the study of environmental problems using approaches that go beyond those typically confined to traditional disciplines. Specifically, we are seeking applications from candidates interested in working on problems positioned at the intersections between physical, biological, and social/economic fields. The fellowships are also expected to catalyze new research directions at Columbia. Earth Institute postdocs will be guided by multidisciplinary teams of two or more senior scholars. Applicants are encouraged to visit the Earth Institute postdoc web site (www.earthinstitute.columbia.edu/postdoc/) to review a list of CEI units and several Columbia University and Barnard College departments. The fellowships will ordinarily be granted for a period of 24 months.

Two of the Earth Institute fellowships this year are 3-year, Mellon Foundation-sponsored position with Barnard (www.barnard.edu). They are designed especially for candidates who are interested in building a foundation in teaching as well as in research. The incumbents will spend the first fellowship year establishing a research program alongside the other Earth Institute fellows; in the second and third years, research will be continued and a teaching program will be built in the undergraduate Environmental Sciences program at Barnard College.

Candidates should submit a proposal for multidisciplinary research and an appropriate work plan following instructions found at the Earth Institute postdoc web site. The proposal should suggest a composition for a small multi-disciplinary mentoring team (candidates for the Barnard position should include a Barnard mentor). Candidates for the Barnard teaching position must propose to work in an area that complements the Barnard faculty, include a description of their teaching goals, and commit to completing the 3-year term. Proposals will be evaluated by the Earth Institute Academic Committee on the basis of the strength of the research plan and its relevance to Earth Institute's goals.

A letter of application, proposal and work plan, curriculum vitae, and three (3) letters of recommendation should be sent to: Fellow Selection Committee, Columbia Earth Institute, 535 West 116th Street (Mail Code 4335), Columbia University, New York, NY 10027.

Applications submitted by February 1, 2001, will be considered for fellowships starting in the summer of fall of 2001, and fellowship offers will be made about March 15, 2001.

**Columbia University**

Columbia University is an affirmative action/equal opportunity employer; minorities and women are encouraged to apply.

Barnard College is an equal opportunity employer and encourages applications from individuals of diverse racial, ethnic, and cultural backgrounds.
YOUTHFUL HOPES AND ADULT OBLIGATIONS

As I came back to Tampa after visiting my hometown in California, my mind was drawn to comparisons, especially between the more overt cultural and economic conditions of the lives of rural Mexican and Mexican American workers in the two areas.

At first glance, there is little difference. The daily routine is long hours of hard work for low pay. In California, rents are higher, the impact of mechanization is greater, and after years of political organizing, conditions are somewhat better. The larger farmworker population and longer experience with migration translate into more people finding jobs out of the fields and more integration into the larger society. Cinco de mayo is celebrated, and Chávez' birthday is a paid state holiday. In the redwood logging area of Mendocino county where I am from, the band invited to celebrate Paul Bunyan Days was Los Lobos. The university I attended has provided free health clinics to farmworker camps for decades.

Perhaps most telling, people will talk to you in English or Spanish. As I was squeezing avocados for ripeness, the man next to me casually observed that “están como piedra.” He had no way of knowing whether I spoke Spanish, and my Norwegian heritage is rather obvious, yet he shared this friendly observation.

The contrast with Tampa is considerable. When new to the region, I was shocked by how guarded most Spanish-speakers were about using their language. Did the South's long heritage of separation put up this linguistic wall? Or a desire to “pass” and be accepted?

Whatever the cause, the wall exists far more in Tampa than in northern California. And much of Tampa's “Hispanic” leadership has been more urban, more middle-class, and less Mexican. A dedicated core has always been concerned, but until recently, little attention was given by Hispanic spokespersons to the growing numbers from Mexico, especially those in the fields.

Compare the fanfare given to Elian or Brothers to the Rescue and that accorded the march of farmworkers here in Florida last year to understand the neglect of farmworkers by the larger society, as well as by many Hispanics.

If interested in submitting a ¡Punto Final! “think piece,” please e-mail us at sloutlook@aol.com for guidelines.
Sports Science Sociology

Bonus Circulation to High School Guidance Counselors!
The Center for Educational Studies and Services

Responsibilities: teach professional writing courses to undergraduate education majors and continuing education students. The professional writing course serves as one of the key requirements for entry into the professional education course sequence. Other courses include student advisement, curriculum development, committee work, and continuing scholarship. For more information, contact Dr. Byrne DeGrandpre, Search Chair <byrne.degrandpre@plattsburgh.edu>

Graduate Curriculum and Instruction (P11 2501-808)
ASSISTANT/ASSOCIATE PROFESSOR
Qualifications: Doctoral degree in Curriculum and Instruction, Research Methods, or other appropriate area required; professional experience in K-12 education, college level teaching experience considered a plus. Other responsibilities include student advisement, curriculum development, committee work and continuing scholarship. For more information, contact Dr. Lawrence Giandomenico, Search Chair <lawrence giandomenico@plattsburgh.edu>

Graduate Research Methods (P11 2501-808)
ASSISTANT/ASSOCIATE PROFESSOR
Qualifications: Doctoral degree in Research Methodology, Administration or other appropriate area; experience in qualitative and quantitative research methods, professional experience in K-12 education, college level teaching experience considered a plus. Candidates with experience and certification in school administration preferred. Responsibilities: teach research methods to graduate students in a variety of graduate programs; to assist the Center for Educational Studies and Services with program assessment. For more information, contact Dr. Lawrence Giandomenico, Search Chair <lawrence giandomenico@plattsburgh.edu>

Responsibilities: For all above positions include: teaching courses in area of expertise; advising students, departmental and/or college and community service, working with mentors, part-time faculty, committee work, scholarly activity, public school collaboration in rural and urban areas, availability for teaching at off-campus location and via telecommunications and other distance learning modalities, interest in and ability to contribute to program development, assessment, and/or accreditation.

Qualifications for all positions:
1. Degree is Ph.D.
2. Evidence of successful teaching experience in a public school setting (3 years preferred).
3. Commitment to and a record of teaching excellence (college teaching experience a plus).
4. Evidence of a plan of scholarship and/or professional activity.
5. Evidence of ability to work collaboratively and effectively with college faculty, staff, and students, with community members, and with school personnel.
6. Evidence of commitment to cultural diversity and a desire to prepare individuals to function in a culturally and ethnically diverse society.
7. Commitment to work collaboratively with colleagues from diverse educational philosophical traditions on program revisions and accreditation, in response to recent state-wide SED changes in certification requirements and teacher preparation standards.

Salary and rank: competitive and commensurate with experience and education.

Book Review: Cincuenta lecciones de exilio y desexilio

48

Pacho, Too

back cover
¡Que tal! ¿Cómo están?

The benefits and rewards of participating in sports are numerous. Physical conditioning is one. It is also celebrated for its positive effect on academic performance and concentration, honing leadership skills, teambuilding, and discipline. Historically, hazing, or rites of initiation, also is associated with sports, and it is an issue that university athletic departments nationwide have had to address.

A study conducted by Alfred University, New York, revealed that an estimated 79 percent of National Collegiate Athletic Association (NCAA) athletes had been subjected to hazing during the 1998-99 school year, and found that this practice prevailed nationwide across the board throughout all sports and universities and across gender lines. Hazing activities usually involve binge drinking, nudity, and compromising acts that have been described as "unacceptable and potentially illegal." In many states, hazing is outlawed. Unfortunately, heightened precarious hazing activity throughout the country has moved college athletics departments to step in to control it—providing guidelines and or alternative rituals to uproot this long-standing, unpublicized "teambuilding" tradition before more students get hurt.

In this issue, HO focuses on college athletics funding, experiences of Latino/a Olympians, and a nationwide education campaign touting the benefits of sports in the lives of women and girls, and the goal of leveling the playing field between the genders.

Next up is our first issue of the new millennium in which we look forward to covering the City University of New York's reform and progress report, health care for Hispanics, model educational programs for Latinos, education funding, and being able to officially recognize our nation's new president. ¿Quién será?

De nuestra redacción—Feliz Navidad y Próspero Año Nuevo.
Commission Appointed to Help Tobacco Farmers and Protect Public

BY GUSTAVO A. MELLANDER

Smoking and even chewing tobacco are dangerous for all of us. Many students are introduced to smoking when they are impressionable teenagers, and on our campuses. In the last decade, the number of smokers among young women has started to climb. We have an obligation to help all our students, and one way is to sponsor effective non-smoking programs on our campuses.

Tobacco, introduced to Europe after Columbus’s trips, swept the continent in the early 1500s. Smoking, aside from being considered fashionable, manly, and attractive, was touted as having medicinal properties as well and was widely recommended by physicians for a variety of ailments.

Luckily, today its deleterious effects on humans, i.e., heart attacks, strokes, lung and throat cancers, etc., are so well known that we are all forewarned. We also have learned that for some, it is one of the most difficult of all addictions to conquer.

Politics

For years, nay centuries, this country’s national government was reluctant to help fund education. Many felt it was prohibited from doing so because of the Constitution’s separation doctrine. There was assistance after both World Wars directly to veterans, not colleges, to help them receive an education. But in 1957, America was shocked into taking action after Russia launched Sputnik. Congress, President Eisenhower, and other Washington policy-makers quickly found a way to support Higher Education—by marrying it to National Defense.

Now there’s a new marriage in town. After years of efforts by many in Washington, President Clinton signed enabling documents to establish the “President’s Commission on Improving Economic Opportunity in Communities Dependent on Tobacco Production While Protecting Public Health.”

The Commission’s mission is to “bring the grower and public health communities together to explore common ground by developing recommendations to help tobacco farmers and their communities adjust to changes in the tobacco economy, while continuing to reduce youth smoking.” A mouthful and an effective compromise that addresses the wishes and vested interests of diverse groups.

If all goes well, we will help protect the health of our nation’s children, hold the tobacco industry accountable, and protect tobacco farmers and their communities.

The Commission is to recommend measures to improve economic opportunity and development in tobacco-producing communities, while protecting consumers, particularly children, from hazards associated with smoking. The Commission will review a variety of federal, state, and local initiatives, and submit a preliminary report to the president through the secretaries of agriculture and health and human services by the end of the calendar year, with a final report due six months from the Commission’s first meeting.

This Commission builds on a coalition of growers’ groups and health organizations that came together in 1998 to issue the Core Principles Statement, which outlines their shared goals and demonstrates that the objectives of reducing youth smoking and protecting American farmers can be pursued together. The president appointed the Commission co-chairs: William Martin ‘Rod’ Kuegel, Jr., of Owensboro, Kentucky, and Matthew Myers, of Washington, D.C. Mr. Kuegel is a fourth-generation tobacco farmer and president of the Burley Tobacco Growers Cooperative Association. Mr. Myers is a nationally known tobacco-control advocate and president of the Campaign for Tobacco-Free Kids.

Changing Economies in Tobacco-Growing Communities

For decades, the federal tobacco program has stabilized and supported tobacco prices, limiting supply through production quotas based on a statutory formula that reflects tobacco companies’ announced purchasing intentions, the three-year average of exports, and existing tobacco stock levels. In the past three years, America’s tobacco farmers have experienced significant quota cuts, due largely to decisions by U.S. tobacco companies to shift their manufacturing and growing operations overseas, with the decline in tobacco use in the U.S. contributing to a much lesser extent.

Even as tobacco farmers have seen revenues fall, the major U.S. cigarette companies have increased their overall revenues and profits.

Promoting Public Health

Over the lives of several administrations, there has been much more support for efforts by states and communities to reduce tobacco use. More recently, states have been jawboned to dedicate the money collected from tobacco settlements to fund anti-smoking programs. There is a movement afoot to solidify the Food and Drug Administration’s authority to issue comprehensive regulations protecting our children from the dangers of tobacco. In 1999, the Department of Justice sued tobacco manufacturers to hold them accountable for their actions and to recover the cost of tobacco-related illnesses.

Protecting Growers and Communities

In 1997, it was mandated that protection for farmers and farming communities must be included as a key principle in any comprehensive tobacco legislation. In 1998, a national roundtable discussion was held in tobacco-driven Kentucky to hear the concerns of farmers and the community regarding tobacco legislation.

Ultimately, legislation was signed to compensate tobacco farmers for reductions in their 1999 and 2000 quotas. Part of the $5 billion settlement between states and industry was designated to compensate tobacco farmers.

Politics is not always bad. With diligence, compromise, and oversight—matters can get better.

Los Olímpicos—Ancient and Modern

Maidens could attend, but married women could not, under penalty of death.

By Inés Pinto Alicea
Athletic games were an important part of many religious festivals from early on in ancient Greek culture. In *The Iliad*, the famous warrior Achilles holds games as part of the funeral services for his best friend Patroclus. The events included a chariot race, a footrace, a discus match, boxing, and wrestling.

There are many different stories about the beginning of the Olympics. One myth says that the guardians of the infant god Zeus held the first footrace, and that Zeus himself started the Games to celebrate his victory over his father, Cronus, for control of the world.

Another tradition states that after the Greek hero Pelops won a chariot race against King Oenomaus to marry Oenomaus’ daughter Hippodamia, he established the Games.

Olympia was among the oldest religious centers in the ancient Greek world. Since athletic contests were one way in which the ancient Greeks honored their gods, it was logical to hold a recurring athletic competition at the site of a major temple.

Also, Olympia is convenient geographically to reach by ship, a major concern for the Greeks. Athletes and spectators traveled from Greek colonies as far away as modern-day Spain, the Black Sea, and Egypt. A series of athletic contests was held in the stadium, the hippodrome, and other areas of the site for thousands of spectators from all cities of the known Greek world. The victors were crowned with a wreath of wild olive and enjoyed special honors from their hometown.

During the Olympic festival, athletic contests included wrestling, boxing, equestrian events, and the pentathlon (jumping, running, javelin, discus, and wrestling).

Those who participated in the contests followed common rules and conventions, established for the better organization of the Games. First, all cities had to cease hostilities during the days of the Games. Second, all Greeks were allowed to participate, except barbarians, women, and slaves. Third, a number of specific rules regulated the training procedures and the performance of the Games.

Hippias of Elis, a sophist of the fifth-century B.C., is believed to be the first to compile the initial victor list of the Olympic Games. From him, we learn that the first athletic contest, the footrace, made its debut in 776 B.C. at the sacred place of Olympia, in western Peloponnese, in honor of the Olympian Zeus. Later but still ancient sources inform us that the Olympic festival gained considerable importance, ranking among the largest and most famous Pan Hellenic festivals by the time of the early 5th century.

The footrace was the sole event for the first 13 Olympiads. Over time, the Greeks added longer footraces, and separate events. The pentathlon and wrestling events were the first new sports to be added, in the 18th Olympiad.

In early Olympic Games, a victor received a crown made from olive leaves, and was entitled to have a statue of himself set up at Olympia. Although he did not receive money at the Olympics, the victor was treated much like a modern sports celebrity by his home city. His success increased the fame and reputation of his community in the Greek world. It was common for victors to receive benefits such as having all their meals at public expense or front-row seats at the theater and other public festivals. One city even built a private gym for its Olympic wrestling champion.

Women were not allowed to compete in the Games themselves. However, they could enter equestrian events as the owner of a chariot team or an individual horse, and win victories that way. The winner of the first Olympic chariot and pair race is listed as “Belistiche, a woman from the seaboard of Macedonia.” Not only were women not permitted to compete personally, married women were barred from attending the Games, under penalty of death. (Maidens were allowed to attend.) Athletic competitions for women did exist in ancient Greece. The most famous was a maidens’ footrace in honor of the goddess Hera, held at the Olympic stadium. There were three separate races for girls, teenagers, and young women. The length of their racecourse was shorter than that of the men’s track. The winners received olive crowns, just like Olympic victors.

The First International Olympic Games took place in Athens in 1896. The choice of Athens was a symbolic act of recognition of the Hellenic contribution to western culture and civilization.

Two of Today’s Latino Olympians

Two modern-day Olympians are John Bairos, a track cyclist from Redlands, California, and Angel Pérez, a kayaker from Miami.

Bairos is completing nursing studies. Pérez studied high-performance athlete training at the Manuel Pajardo Higher Institute of Physical Education at the University of Havana.

John Bairos

John Bairos is quick to note that he will soon
By 1999, Bairos became National Track Cycling Champion in the Olympic sprint competition, one of his specialties.

Bairos said the path to the Olympics has been difficult not just because of the challenging training but because of the strain financially. His full-time job has been to train.

"A lot of us who are into this do it for the heart," he said. "It's not a sport like track and field where there is a lot of money in it. Plus, any free time we have is to rest and recover." To get ready for the race, he said he visualized the race the day before and then spent the day of the race "getting into the zone." He said that much of his training consisted of weight-lifting and cycling, though as the race neared, he eased some on his weight-lifting.

Angel Pérez

The Latino athlete who perhaps faced the most challenges during the Olympics was Angel Pérez, a 29-year-old Cuban-born kayaker who now lives in Miami with his wife and son. Pérez did not know if he would be able to compete for the United States until three days after the opening ceremony, when a court finally gave him the go-ahead.

Bairos was part of a three-man team in the Olympic sprint contest in Sydney. His team, comprised of Bairos, Marcelo Arrue of Woodland Hills, Calif., and Jonas Carney, Pacifica, Calif., placed 12th at the Olympics. These Games marked the first Olympic appearance for all U.S. competitors.

"We expected to go under 46 seconds, but we just did not do what we set out to do," said Bairos, who came back from a serious crash on June 18 at the World Track Cup in Mexico City, one that left him with a fractured jaw and other injuries. "I felt good out of the gate, but the second half of my lap was not as good as expected. After my injury, my teammates were unsure what my status would be, so they concentrated on their respective individual events. Our goal was to finish among the top eight, and we missed by six-tenths of a second. We could have and should have been in the top eight."

"My goal, and the goal of our team, was more than to compete in the Olympics," Bairos said. "We wanted to succeed."

Bairos said he encourages others who dream of becoming elite athletes to pursue their goals.

"If people have that dream, they have to give it everything and reach further down within themselves than they believe they can," said Bairos.

Bairos and sprint coach Des Dookie
Pérez had competed for Cuba in the 1992 Olympics in Barcelona but defected to the United States in 1993 and got his citizenship in 1999. He has competed for the United States internationally since 1997. According to rules of the International Olympic Committee (IOC), there is to be a three-year lag between nationality changes. The IOC said that Pérez would be eligible to compete only if Cuba granted him a release, which it refused to do. Pérez appealed to the IOC, which allowed Cuba's decision to stand. Pérez then turned to the world's highest court for amateur sport, the Court of Arbitration for Sport. It too denied his request initially, but reversed that decision on appeal.

Pérez competed on behalf of the United States in two races—the k-4 1000 meters, in which he was one of a four-man team, and the k-2 500 meters, in which he partnered with Peter Newton. His teams finished sixth in both races, the best finish a U.S. team has had, he said.

Pérez said he plans to take some time off from training to focus on his family, adding that the last four years have been rough on them. He does plan to be at the next Olympics, however, and win a medal.

Pérez said his goal at this Olympics was simply to be eligible to participate on behalf of the United States and to improve on the team's previous efforts. He said he has a good chance of getting a medal the next time because he won't have to deal with all of the distractions of trying to win eligibility.

"I won that battle," he said. "There were so many months of not knowing whether I would be eligible. I had to keep training and waiting."

The U.S. kayak team faced several challenges while in Sydney. Fog and heavy winds delayed several of their races. Pérez said his final race was delayed six hours, which made the athletes lose "their focus." A facility the team had rented for training while in Sydney was broken into and several items were taken.

The challenges in Sydney, however, seemed small compared to what he had faced in his private life. As a member of the Cuban canoe and kayak sprint national team from 1988-1993, Pérez won 21 gold medals and two silver medals at the Pan American Games. But, during a training run at the 1992 Olympic Games in Barcelona, his experience was one of several frustrating occurrences he encountered with the underfunded Cuban canoe federation that made him want to leave his country for the U.S. So during a 1993 competition in Mexico, he and two teammates took a bus to the U.S.-Mexico border and then swam across the Rio Grande to New Laredo. Heavy rain had made the river turbulent, and the swim to Texas was treacherous. "When I got to the U.S. side, I was covered in mud, leaves, everything," said Pérez, who had $60 to his name at the time. Some friends of his teammates were waiting in cars and drove them to Miami, where he requested political asylum.

One of his first jobs after arriving in the U.S. was installing burglar alarms. Now he participates in the Olympic Job Opportunities Program, which allows him to train daily. Home Depot hired him as part of the program so he could undergo rigorous training. Pérez was invited to train with the U.S. team after the 1996 Olympics in Atlanta.

Maidens and Matrons Welcome

Girls and women, married and unmarried, are very much part of today's Olympics, just as they are, largely thanks to Title IX, very much part of sports in academia.

When not at the Olympics, the San Antonio-born Jennifer Gutierrez [Ed. note: See Ed Brennen's story in this issue about Latina triathlon athlete Jennifer Gutiérrez, captain of the first-ever U.S. women's triathlon team at the Olympics in Sydney.] works as an adaptive physical education teacher in Denver, where she resides.

Her teaching of students with conditions including autism took her to seven elementary schools in the Jefferson County, Colorado, school district. She coached five of her students to top performances at the 1998 IronKIDS triathlon in Denver And also worked as an analyst for ESPN for the broadcast of the 1998 IronKIDS National Championship.

"I've always wanted to make a difference in a child's life," said the Olympian.

College Athletics—Golden Calf or Trojan Horse?

Perspectives from NYU, Kentucky, USC, and Maryland

BY JEFF SIMMONS

Jay Oliva has followed sports for much of his career. Not because he's an athlete, but because he's witnessed what has worked and what hasn't worked when mixing athletics with academics.

Oliva, the president of New York University in Manhattan, has penned quite a few editorials on the matter. As he sees it, athletics can be an integral part of a university or college system, but only if higher education officials carefully navigate a tightrope to allow both programs to thrive equally.

"The reputation and future of a university belong to the people in it," says Oliva. "College types have to know a lot more about sports than they know. Administrators ought to know a lot about athletics, about the structure, the rules of the game, what kind of controls there are."

Over the years, college sports have weathered critics' claims that some universities have invested more attention in athletic prowess than in academic success and that funding has favored men's sports over women's. They've been the target of congressional investigation and newspaper editorials, and come under fierce public scrutiny.

Oliva, for one, reasons that a university's credibility can hinge on its sports program. The controversies have forced many university officials to address pivotal questions: How valuable are athletic programs to a college? And how much emphasis should a college place on its sports programs?
"If an athletic program works well, then it achieves a number of goals for an institution," says Deborah Yow, athletic director at the University of Maryland. "It enhances the quality of life for students, faculty, and staff. It serves as a unique catalyst to develop a heightened sense of pride, and it aids in retention."

Successful athletic programs can generate sizeable alumni donations and aid campus fundraising efforts. There are differing mindsets on a program’s financial value, because few teams are profitable and it’s difficult to correlate a team’s successful season with increased student applications. Officials say that lucrative sports programs don’t help lower tuition.

Nevertheless, athletics do advance a school’s image. Flip through the sports pages of a campus newspaper, the hometown broadsheet, or national papers like The New York Times or USA Today, and it’s readily evident that college sports can dominate coverage. Seasonally, college football and basketball surpass professional sports in the headlines.

"I know some people refer to it as the front porch, as if the institution were a house," says Yow, who is the president of the National Association of Collegiate Directors of Athletics. "It’s a high-profile entity, and something you can read about every day in the paper. It does matter that way."

"You only have to go to any national newspaper to see a great deal of publicity about university sports," adds John Callaghan, associate professor at the University of Southern California in Los Angeles and an expert in sports psychology and sports in society. "Not just the local papers, but national papers. They give great credence to university sports. It’s the norm in this country. The place of sports is at universities."

The 94-year-old National Collegiate Athletic Association, or NCAA, now boasts an enrollment of more than 1,200 institutions, conferences, organizations, and individuals involved in intercollegiate athletics. It has amassed more than 600 new members in the last four decades. The Association’s goal: to maintain athletics as an integral part of an academic program and athletes as an integral part of the student body.

The NCAA currently sponsors 83 championships in 22 sports. Nearly 24,500 student athletes compete for NCAA titles each year, and about 600 colleges don’t even compete on the major-college level.

The number of participants in NCAA-sponsored sports continues to grow. During the 1990-91 academic year, 184,953 men and about 92,778 women took part in the Association’s three divisions. Seven academic years later, 1997-98, that number had grown to 203,680 men and 157,110 women.

NCAA statistics reinforce experts’ contentions that sports programs rarely yield a financial windfall. According to an NCAA report on revenues and expenses of intercollegiate athletic programs in 1997, the NCAA’s Division I-A teams brought in more revenue—$17,734,000—than expenses—$17,297,000.

Division I is the most competitive, visible, and lucrative classification within the NCAA. Yet, in the lower classifications, the expenses exceeded the revenues. It’s also very expensive to participate. Institutions must sponsor at least 14 varsity sports, 10 more than in Division II.

"Very few of them can equate to profit, and any great profit might go to a general fund and not to lower tuition," he says. "I would say very few in the country make any worthwhile profit," says Callaghan.

Adds Oliva: “There is the argument in big-time sports that money that comes into the big-time sports programs can benefit the university because they can, for instance, make chemistry labs, but I’ve never seen that at all. All I see is—if money is coming in, it goes to support the athletic program.”

Still, in recent years, at least seven institutions have pumped up the size and budget of their athletic divisions to join Division I. Those moves are orchestrated to generate more alumni donations and make the schools more attractive to new enrollees. Applications to Boston College surged in the early ‘80s, a phenomenon attributed to the Eagles’ star quarterback Doug Flutie.

"There can be a Flutie effect," Oliva says; "but it’s very temporary. It doesn’t represent any great change in the sort of long-term status of the school. You’ve got a blip of a championship, your name in the paper more often, but those blips come and they go."
At the University of Kentucky, "basketball dominates everything." That’s how higher education Professor John Thelin sees it. "When the Kentucky Wildcats play, they broadcast the game, sell out all 25,000 seats in the arena, and the whole city is completely shut down. Not only the campus, but also the entire city. University of Kentucky basketball is far more powerful than a pro-basketball franchise in terms of its relative impact on the state."

Thelin, who authored the sports scandal book, *Games Colleges Play*, says that a prominent university program can be a double-edged sword. "The favorable publicity of a winning team might give you some advantage, but there’s also been cheating and corruption scandals, so the publicity can be bad as well as good."

"Sports are obviously valuable, and they probably are irreplaceable. The more subtle question is, 'What’s the appropriate balance with the school’s real educational mission?'" says Thelin, the president of the National Association for the Study of Higher Education.

He questions whether schools actively recruit non-athletes from other states the way they court top athletes from across the nation. And he worries about universities isolating athletes from the rest of the student population.

"Why don’t they put the same attention in terms of geographic diversity that they put into sports programs?" he asks. "Would this university be as interested in a student from an inner-city high school if the student didn’t also happen to be a superb athlete? I’d like to see an athletic and academic program balance be consistent."

Thelin noted that athletes often aren’t truly integrated into real student life. "Even though there are NCAA regulations against separate dorms, that in fact does happen. So much of their identity is shaped by athletics, and it’s less likely they can be true students and members of the student body," he says.

Like Thelin, Oliva maintains that schools must make sure their athletic policies are "in harmony" with their educational philosophy. He admits it can be a difficult struggle. "It’s hard to get public support for Greek and Latin and archaeology; it’s much easier to get people to rally around a sports team, especially in parts of the country where professional sports have not been organized," Oliva says.

New York University used to be a Division I football school, but ended that post-World War II. Currently, it has 20 teams in various sports, including a celebrated women’s basketball team that recently won the Division III championship.

"Sports gets you ink, and that’s good," Oliva admits. "Especially for smaller institutions, basketball plays a role. You only need 10 or 12 guys and only six of them that can play."

In his articles, Oliva has mapped out a blueprint for top school administrators to advance a workable athletic program. He says they must accept responsibility for the conditions of athletics on a campus; establish rules for recruitment, admissions, eligibility, and academic progress; and reject any justification for shoddy practices.

Oliva additionally maintains that administrators must be fully aware of athletes’ academic situations. "Know personally what is going on," he says, adding that schools should seek accreditation of athletic programs.

He further recommends that schools remove any financial incentive from the system. He writes, "The income from TV contracts, bowl games, and NCAA championships has haled many institutions. Coaches find their careers defined by the ‘bottom line,’ and administrators find their budgets get defined the same way. The addiction to athletic income is no less serious or destructive than personal addictions."

At the University of Maryland, Yow says college athletes take part in community outreach. They’ve visited thousands of high school and junior high school students.

"They go out and speak about the value of education. Student athletes are seen as leaders by the young people in the community," Yow says.

Callaghan, the University of Southern California professor, says that college sports bring a community in touch with its local college, especially when there might not be a major league team nearby.

"Athletics play a huge part in our lives in America, and they certainly do so at a university. If you take an inner-city school, I think the area around the school probably has some sort of vested interest in what goes on in the campus and what goes on in the sport," says Callaghan, whose campus is situated in downtown Los Angeles, close to the low-income South Central neighborhood.

"I suspect that the people around here do take an interest in the University sports, and a number of our players come from the local area."

Besides a Heisman trophy-winning football team, USC also has thrivving track and field, tennis, and swimming programs.

Sports, he says, "seem to be an integral part of the whole university system, so it is worthwhile from an educational point of view. Every university has an athletic program, and the athletic program seems to be important to the whole functioning of the university. It's a focal point for alumni, it's a great publicity means for the university, and it seems to be a great recruiting tool."
Diving in Down Under

This summer's Olympic Games in Sydney were highlighted by the unique beauty of the Land Down Under. From the billowing roof of the famed Sydney Opera House to the exotic koalas and kangaroos inhabiting Australia's rugged Outback, athletes and spectators were treated to a breathtaking backdrop during the Games.

But for American Jennifer Gutiérrez and her fellow competitors in the women's triathlon, the sightseeing had to be put on hold.
While athletes in other sports could ease into the Olympic scene, Gutiérrez literally had to dive right into the women's triathlon, an event that was marking its Olympic debut and was the first on the schedule at the 2000 Summer Games.

Leading off the Games was just fine with the 33-year-old Gutiérrez, who was also the women's triathlon team captain. That meant no days pacing around the Olympic village waiting for her turn to go compete. That meant no time to get nervous about taking the world's largest stage for the very first time.

"It was really nice to open the Games up so we didn't have to sit around and wait," said Gutiérrez, who had to skip the Sept. 15th Opening Ceremonies in order to get plenty of rest for her 9 a.m. triathlon start the next morning.

Gutiérrez, who became the first-ever U.S. Olympic triathlon representative when she was the top-finishing American at the Sydney World Cup (the first of two Olympic Trials events) on April 16, came into the Games hoping for a top 10 finish. She had come in fourth at the 1999 Pan American Games in Winnipeg, Manitoba, pushing her world ranking to 14th, but she knew the competition in Sydney would be even tougher.

Leading off in the swim, her strongest of the three events, Gutiérrez got off to a good start, finishing the 15-kilometer lap around Sydney Harbour's Farm Cove in 19 minutes, 44.98 seconds. That put her in 10th place overall heading into the second stage, the bicycle.

Gutiérrez finished the 46-kilometer bicycle trek around some of Sydney's most historic streets in 1 hour, 25 minutes, 25.38 seconds, keeping her in 10th place overall heading into the third and final leg—the 10-kilometer run.

"I was in a hard situation," said Gutiérrez, "because there was a large [number] of girls on the bike, and I'm not the fastest runner, so I knew that I was already in trouble a little bit. So I tried to push the bike pace because I knew that there were quite a few girls who could outrun me."

Knowing that she might fade in the run, Gutiérrez encouraged one of her American teammates, Joanna Zeiger, to stay close and keep her pace in the bicycling event in order to be in the best position for the final leg. "She's our fastest runner, and I field I see in all my World Cup races, so that helped me feel comfortable in this event. I kind of knew what people could do and what the competition was like, so it was good."

Gutiérrez' Olympic feat is all the more remarkable when you consider that she didn't begin to compete in the triathlon until just six years ago. A native of San Antonio, Texas, her work as an elementary school adaptive physical education teacher became her main concern.

In 1993, Gutiérrez competed at the swimming World Championships in Indianapolis and finished second in the 5000 meters. Around that time, Uteberg, himself an age-group amateur triathlon competitor, persuaded Gutiérrez to try her hand at a multisport event. In 1994, at the age of 27, she agreed and placed third overall at a regional event in Colorado, finishing behind just two men. She competed in four more Colorado events that year, winning two and placing second in two others.

By 1995, after a chance meeting with Karen Smyers, the former Hawaiian Ironman Triathlon champ and two-time world champion, Gutiérrez was convinced that she could compete in the triathlon at an elite level. "She told me to do it," Gutiérrez said. "She said, 'Don't wait around for another five years. Go for it.'"

So Gutiérrez began to compete outside of Colorado, racking up three 11th-place finishes that year at the Wildflower Half-Ironman in California, the Mrs. T's Chicago Triathlon, and the U.S. Pro Championships in Michigan. By 1997, Gutiérrez was cracking the top 10 in World Cup events in far-away locales such as Bermuda, Japan, Australia and Mexico. In 1998, she won three races, including a US Triathlon Series event in Columbus, Ohio. Her international triathlon career now had a full head of steam, but the defining moment came in July of 1998, when she qualified for the Goodwill Games. That's when she knew she truly had a shot at the 2000 Olympics.

"I'd put so little time and effort at even being at that level," said Gutiérrez, who married Uteberg one week after qualifying for the Goodwill Games "As soon as I made the Goodwill Games and was one of the top three in the USA...that's when I realized I had a lot of talent...I knew I just had to commit myself fully.
because I knew the competition was going to be even tougher.”

So Gutiérrez set her sights on Sydney. She took four months off from her teaching work to fully throw herself into training, which would often take up 30 hours a week. “It was pretty intense,” said Gutiérrez, who unlike many of her fellow American competitors did not move to a warmer climate to train. “I had to train during the day when it was warmer in Colorado....I didn’t want to move to a warmer climate.”

Gutiérrez’ sacrifice and hard work paid off, as she traveled to Chile in January and placed first in her only two pre-Olympic competitions, the Licanary International Triathlon and the Puerto Varas International Triathlon. By April, she was ranked 15th in the world, and she was ready for the Olympic Trials in Sydney. “I didn’t know if I’d make the team, but I knew I’d have a good shot,” said Gutiérrez, who was competing for one of three U.S. roster spots. “There were about 10 girls who were going to be pretty close to me, so I felt I had a 50-50 shot.”

As it turns out, her odds were a little better than that. Gutiérrez ended up as the top U.S. finisher (seventh overall) at the Sydney World Cup, becoming the country’s first-ever Olympic triathlon qualifier. “I was just excited. It was beyond expectations,” said Gutiérrez, who even passed pre-Olympic Trials favorite Barb Lindquist with one kilometer left in the race.

Accompanied by her husband and family, Gutiérrez headed back to Australia for the two-week Games in September, an experience she said she’ll never forget. “The people were so nice and friendly, and the city was so clean. There was so much to see and do.”

As if the competition in the triathlon wasn’t enough to worry about, the athletes were also warned of the danger of sharks during the swimming leg. The shark threat became one of the big early stories at the Games, and Sydney officials took precautions by sending a diver beneath the swimmers with a shark-discouraging electro-magnetic device and attendants on the sides on surfboards. As it turned out, the shark threat wasn’t much of a factor at all, according to Gutiérrez. “I never really heard an athlete scared about it, I guess because we knew there were a lot of precautions with scuba divers and stuff under water,” she said. “It was pretty much just like another race. Although there were some jellyfish that stung quite a few people, but nothing severe.”

Once back on land and through with her competition, Gutiérrez was able to take advantage of all the Games had to offer. She remained in Sydney through the Closing Ceremonies and was able to watch several events, including track and field. “The closing was fun. It was nice to mingle with people from so many different countries,” said Gutiérrez, whose single most-lasting image from the Games was the sight of the Olympic rings illuminated on the Sydney Harbour Bridge.

Upon returning home to Colorado, Gutiérrez had little time to catch her breath—she was back to school teaching adaptive physical education the very next day. There she received a hero’s welcome from her students and colleagues. “I tried to do some talks at some of the schools, to try to give back a little bit,” she said.

With her first Olympic Games behind her, Gutiérrez said she now plans to “lay low” for a couple of years, competing in some smaller events in her area. But when the 2004 Games in Athens roll around, will she feel the drive to represent her country once again? “It depends on how much I want to sacrifice,” she said. “I’ll kind of leave the door open.”

So far in her triathlon career, an open door is all Gutiérrez has needed.

University of Southern California

Olympic Gold and "College of the Year 2000"

BY ROGER A. DEITZ

Last year, Time and The Princeton Review, in collaboration, named the University of Southern California College of the Year in the 2000 edition of The Best College for You in recognition of USC's outstanding neighborhood outreach programs that have set a new standard in higher education. It was just another confirmation that USC is one of the world's leading private universities.

USC was honored for "developing a remarkable bond between the school and its community in one of the most ambitious social outreach programs of any university in the nation." USC students, alumni, staff, faculty members, and friends volunteer in more than 300 USC-affiliated community outreach programs aimed at improving the health, education, and well-being of USC's neighbors. In addition, more than 3,300 faculty and staff members gave $517,000 in pledges and contributions last year to USC Neighborhood Outreach, a nonprofit organization. Since 1994, they have invested more than $1.7 million in the local neighborhoods through USC's Good Neighbors Campaign.

USC President Steven B. Sample asks, "What was the methodology that Time used to come to this decision?" And he explains, "Unlike U.S. News and World Report, which employs complex formulas with even more complex (and constantly changing) weighting factors, Time appoints an anonymous jury charged with looking at the entire spectrum of the 3,500 academic institutions in the United States. After the jury has narrowed its list of candidates to a few institutions, Time sends out one of its best investigative reporters to take a hard look at each of the finalist campuses. I remember hearing a phone call last August from a senior editor of Time. She said, 'You know, Dr. Sample, we've had one of our best investigators on your campus for the last three weeks.' I said, 'Yes, I am aware of that, and it's made us a little nervous.' And then she said, 'I'm calling to tell you that, as a result of our investigation, we've selected USC to be our College of the Year 2000!' As you might expect, I was pretty excited about this recognition when it was first announced."
Honor Roll Facts in Brief

INSTITUTION
University of Southern California

LOCATION
Office of Admissions
University Park Campus
Los Angeles, CA 90089-0911
(213) 740-1111

ESTABLISHED
1880

ENROLLMENT

USC is distinguished by other factors as well. Its renowned faculty includes Nobel Prize laureate George A. Olah and 39 members of the National Academy of Sciences, Engineering, and Institute of Medicine. More than 200 faculty members have received prestigious academic and professional awards spanning such institutions as National Institutes of Health, the National Science Foundation, the Alfred P. Sloan Foundation, the National Endowment for the Humanities, the John Simon Guggenheim Foundation, and the Academy of Motion Picture Arts and Sciences.

Of the 1,406 tenure-track positions among USC contract faculty, 78 percent have been granted tenure. There are 3,600 faculty. USC maintains highly competitive admission standards. The University continues to have one of the fastest-growing endowments in the nation. This is due in part to the unprecedented success of USC’s $1.5 billion Building on Excellence campaign.

In 1999, the W.M. Keck Foundation gave $110 million to name the Keck School of Medicine at USC, the largest gift ever given to a medical school and the largest gift ever made by the Keck Foundation. The landmark contribution gave USC the distinction of being the first American university to receive three nine-figure gifts, an indication of the University’s continuing excellence in teaching and research. In addition to the Keck School of Medicine, four other schools at the University have been named during this campaign: the Marshall School of Business, the Thornton School of Music, the Rossier School of Education, and the Leventhal School of Accounting.

Other major academic centers have been created or enhanced, including the Wrigley Institute for Environmental Studies, the Loker Hydrocarbon Institute, and the Robert Zemeckis Center for Digital Arts. The Zemeckis Center will incorporate the “most innovative technical advancements in the training and development of future filmmakers.” And then we have sports, exemplified by the success that USC has enjoyed in national championships and in the Olympic Games. In national athletics, USC continued a distinguished winning streak, adding two national championships in men’s and women’s water polo last year.
But the mark USC has made in the Olympics—that's another story indeed.

Since 1912, USC is the only university in the world with the distinction of having a gold medal-winning athlete in every summer Olympics. A total of 330 USC athletes have participated since 1904, which means that USC has sent more athletes to the Olympic Games than any other university in the world. They have collected 215 medals—104 golds, 59 silvers, and 52 bronzes. In all, 32 athletes with a USC affiliation competed in Sydney. The amazing Olympic Gold Medal streak was kept alive when Lenny Krayzelburg won an Olympic Gold Medal in the 100-meter backstroke. Krayzelburg was an All-American and NCAA champion while at USC from 1996 to 1998. He set an Olympic record in winning the 100-meter backstroke in 53.72 seconds. Lenny went on to win three of the eight Trojan gold medals from the 2000 Olympics in Sydney. The total count of USC athletes of the past, present, and future (students about to begin classes) is fifteen medals—8 golds, 3 silvers, and 4 bronzes—at the world meeting.

If USC had competed as a country, rather than as a university, it would have finished 14th in the overall medal standings in the Sydney Games. The majority of USC's gold medals were garnered in swimming, with former Trojan All-American Krayzelburg winning both the 100- and the 200-meter backstroke and participating in the USA's victorious 400-meter medley relay. A pair of ex-Trojan All-Americans—Lindsay Benko and Kim Black—won gold as part of the USA's 800-meter freestyle relay. Former USC All-American Lisa Leslie helped lead the team to a gold medal in women's basketball. In softball, two members of the team have USC ties: Dot Richardson studied at USC's Medical School, and Sheila Cornell Douty earned a master's degree from USC. Current USC sophomore Erik Vendi captured a silver in the 400 individual medley, incoming freshman Klete Keller was part of the USA's silver medal-winning 800-freestyle relay and then captured bronze in the 400-freestyle. Former Trojan All-American goalie Bernice Orwig earned a silver medal with the USA women's water polo squad, and one-time USC track standouts Mark Crear and Torri Edwards earned bronze medals—Crear in the 100-meter high hurdles and Edwards as part of the USA's 4x100-meter relay squad. Former Trojan diver Dorte Linzer of Germany captured a gold medal in the 3-meter springboard event. USC varsity teams have won more national championships—93 in total—than all but two NCAA member institutions. More than 500 students are involved in USC's 19 varsity sports.

USC is Southern California's first major comprehensive university, founded in 1880 in a celebration attended by a significant portion of the growing population of Los Angeles. USC has played an integral role in the growth of this dynamic and cultural region of the State.

The "Trojan" tradition originated from a 1912 Los Angeles Times article by sports writer Owen Bird. In his article, Bird called attention to the "fighting spirit" and "courageous ability" of USC athletes, a spirit he likened to the ancient Trojans. Inscribed on the base of the University's statue of the Trojan are the University seal and the words: "The Trojan. Faithful, Scholarly, Skillful, Courageous and Ambitious."

The institution's mission statement reads, "We are a global institution in a global center, attracting more international students over the years than any other American university." The total student enrollment is approximately 28,700, with about 15,200 of those enrolled as undergraduates and 9,800 graduate-degree students. Professional students number 2,700, and non-degree students are at about 1,000. Females account for 49 percent of the undergraduates. About 60 percent of all undergraduates receive some sort of financial aid; 95 percent of all the undergraduates participate in extracurricular activities. Asian Americans account for 24 percent of the undergraduates; Hispanics/Latinos make up 14 percent; Black/African Americans, 6 percent; and Native Americans, 1 percent. The class includes 8 percent International students. The student:faculty ratio is 18:1, and the average class size for the College of Letters, Arts and Sciences is 28 students. This is the school with the largest undergraduate enrollment. More than 400 official and unofficial extracurricular organizations are established on campus, involving students with a wide range of academic, artistic, political, religious, service, and recreational interests.

There are nearly 200,000 living USC alumni. Nearly three-quarters of them reside in California, but members of this Trojan family can be found all over the world, in positions of leadership in their professions and in their communities. Distinguished alumni include former U.S. Secretary of State Warren Christopher, astronaut Neil Armstrong, architect Frank Gehry, opera singer Marilyn Horne, film director George Lucas, and retired General Norman Schwarzkopf.

USC's University Park Campus is located just minutes south of downtown Los Angeles. It is home to a rich architectural history and a vibrant cultural arts community, in addition to its strong academic environment. The 155-acre campus has undergone a number of changes. Popovich Hall and Lewis Hall are new additions to the USC skyline. They serve the faculty and students of USC's Marshall School of Business and the USC School of Policy, Planning, and Development. The two buildings now greet visitors at the University's new main entrance at the corner of Exposition Boulevard and Figueroa Street. One of the city's cultural treasures, Exposition Park, features major museums, including the California Science Center and the Natural History Museum.
Check It Out Asks “What’s Fair?”

National Women’s Law Center’s Education Campaign

BY MARI CARMEN SARRACENT

The empowering effect of athletics on the physical, spiritual, and academic lives of males and females alike should not be underestimated. And organizations such as the National Women’s Law Center tout the opportunities that sports have opened up for women and girls since the declaration of Title IX, which proscribes discriminatory practices in the issuance of athletic scholarship dollars to female athletes.

Despite many success stories in the attempt to level the playing field, disparities continue. Consequently, the National Women’s Law Center has launched a nationwide public education campaign to reinforce this message and its ongoing support of Title IX.

Title IX of the Educational Amendments of 1972 to the 1964 Civil Rights Act reads: “No person in the United States shall on the basis of sex be excluded from participation in, be denied the benefits of, or be subject to discrimination under any educational program or activity receiving Federal financial assistance.”

NWLC is a nonprofit organization founded in 1972 to advance and protect women’s legal rights. Its major policy areas include economic security, education, employment, and health. Its campaign includes a new publication—Check It Out: Is the Playing Field Level for Women and Girls at Your School?—and a speaking tour to inform communities about the positive impact of Title IX on the lives of women and girls, and to help athletes, coaches, and parents determine whether athletic programs are treating both genders fairly. Also on the agenda is a discussion concerning sex discrimination that still exists in education.

Throughout NWLC’s speaking tour, staff will meet with students and advocates around the country to distribute its publication and educate communities about the physical, emotional, and financial benefits to women and girls who play sports. According to Neena Chaudhry, counsel for NWLC, “The benefits for girls include greater academic success. They are less likely to drop out, and athletics build social and personal skills.”

“We still have a ways to go as there are still areas where discrimination is prevalent.”

NWLC’s Check It Out poses specific questions about participation rates and availability of resources, such as “What’s fair when it comes to athletic programming for male and female students?” and “What should schools do to make sure that all students have equal opportunities to benefit from sports?”

While the publication is not designed to determine whether a particular school is in compliance with Title IX, it is a guide to help students, athletes, coaches, parents, and administrators understand the rules established by the Department of Education’s Office for Civil Rights to determine whether school athletic programs are equitable.

Check It Out defines Title IX and what it means to athletes; it defines “equal opportunities to play sports” as well as “fair shares of scholarship money.” The publication also provides a checklist for readers. Upon completion of the Check It Out questionnaire, readers will be able to identify areas in which their respective schools need improvement, and perhaps formulate an action plan.

The Score

The number of college women participating in competitive athletics is now four times the pre-Title IX rate, and high school girls playing competitive sports increased from 300,000 prior to Title IX to 2.65 million by 1999.

Before Title IX, fewer than 30,000 women competed in intercollegiate athletics, and scholarships for women were nonexistent, says Chaudhry. Figures for ’97-’98 indicate that 135,000 women are now competing in a variety of intercollegiate sports.

Marcia Greenberger, NWLC co-president, stated in an NWLC campaign announcement that “although women and girls have made tremendous strides in athletics, the finish line is still several laps away.”

NWLC reported that women in NCAA Division I colleges, for example, represent more than half of the student body yet receive only 41 percent of athletic scholarship dollars, 30 percent of recruiting dollars, and 35 percent of overall athletic budgets. “Male athletes also receive access and opportunities that athletic scholarships provide nearly twice as often as female athletes, amounting to a difference of $143 million dol-
lars more per year in athletic scholarships for male athletes than females.”

Adds Greenberger, “Despite 28 years of gains for women in all areas of education — academically and athletically — women's athletic programs do not receive the resources and commitment they deserve. Schools must give male and female students alike a fair chance to play sports and provide male and female students with equal support.”

Equal support includes such things as equal quality and quantity of equipment and supplies, financial support for travel and expenses, fairness in assigning and paying quality coaches, and fairness in scheduling games and practices.

The National Collegiate Athletic Association (NCAA) is a voluntary association of approximately 1,200 institutions, conferences, organizations, and individuals devoted to the sound administration of intercollegiate athletics. NCAA is the organization through which the nation's colleges and universities speak and act on athletics.

NCAA Division I member institutions must sponsor at least seven sports for men and women (or six for men and eight for women), with two team sports for each gender. Each playing season has to be represented by each gender as well (fall, winter, spring). There are contest and participant minimums for each team, as well as scheduling criteria. Division I schools must meet minimum financial aid awards for their athletic programs, and there are maximum financial aid awards for each sport that a Division I school cannot exceed.

Division II institutions must sponsor at least four sports for men and four for women, with two team sports for each gender, with each playing season represented by each gender. There are contest and participant minimums for each sport, as well as scheduling criteria. There are maximum financial aid awards for each sport that a Division II school cannot exceed.

Division III schools must sponsor at least four sports for men and four for women with at least two team sports for each gender, with each playing season represented by each gender. There are minimum contest and participant minimums for each sport, as well as scheduling criteria. Division III does not award financial aid on the basis of athletic ability — only need-based.

Emerging sports for women are archery, badminton, bowling, equestrian, squash, and synchronized swimming. Other sports that women are involved in are basketball, cross country, fencing, field hockey, golf, gymnastics, ice hockey, lacrosse, rifle, rowing, skiing, soccer, softball, tennis, indoor track, outdoor track, volleyball, and water polo.

The sports attracting the most school sponsorships for women athletes are basketball, volleyball, cross country, tennis, softball, and soccer.

**Title IX Settlements**

Increasing awareness of Title IX is as important as ensuring that schools and universities uphold Title IX and are held accountable.

In 1997, NWLC filed complaints with the U.S. Department of Education’s Office for Civil Rights (OCR) against 25 colleges and universities for failure to award female athletes their fair share of athletic scholarship dollars. In January 2000, NWLC was pleased to report that all 25 complaints had been settled.

As a result of efforts by organizations such as NWLC, OCR has strengthened its enforcement of Title IX “by clarifying its scholarship policy that, absent any legitimate, nondiscriminatory factors that can explain the disparity, a scholarship gap of more than one percent between the percentage of athletes of one gender and the percentage of total scholarship aid awarded that gender will be presumed unreasonable.” In addition, OCR indicated that “beginning in the 1998-99 academic year, schools will be responsible for compensating athletes for any scholarship gap over one percent that is not based on legitimate nondiscriminatory factors.”

Of the 25 complaints, 15 entered into formal agreement with OCR to increase the amount of scholarship dollars awarded to female athletes in order to comply with Title IX. OCR found one school to be in compliance based on “unique, legitimate nondiscriminatory reasons,” and two schools had prior agreements with OCR that temporarily excused a scholarship gap of more than one percent. Of the remaining institutions, some improved their scholarship practices between 1995-96 (the year on which the Center’s complaints were based) and the time of OCR’s investigation and resolution, and the others admitted that their self-reported Equity in Athletics Disclosure Act (EADA) data were misleading and convinced OCR that they had no scholarship violations.

NCLR hopes that increasing awareness of Title IX and the benefits of sports will strike a chord.

Notes Chaudhry, “It’ll be an ongoing effort. The point is to get the information out there.”

Rice Professor Explores Fitness of Hispanic Teens

Seasoned Coach Pursues Ph.D.

BY ED BRENNEN

While traveling along life's path, María Felicia Cavallini admits that she didn't always know where she was going. She occasionally thought she had caught a glimpse of her final destination, but more often than not, she was focusing more on her next step.

"Life is a stepping stone," says Cavallini, who for more than 20 years hopped from stone to stone like an adventurous child crossing a stream. From her own childhood days in San Antonio, there was the jump to Rice University in Houston, where she starred as a two-sport athlete in volleyball and basketball. After graduation, it was a quick hop over to the University of Texas at San Antonio, where she began her college coaching career while earning her master's degree in education. From there, her coaching career had her hopping all over the country from Texas to New York to Rhode Island to Indiana and ultimately back to Texas once again.

And now, after all those years and all those moves, Cavallini has reached what in many ways feels like a final destination. And, surprise, surprise— it looks a lot like the place from whence she started.

Cavallini, a professor in the department of kinesiology at Rice University and director of the school's Wellness Program, is expected to obtain her doctorate from the University of Houston this spring. Her concentration is pedagogy, or the art and science of teaching others how to teach. Like most dissertations, Cavallini's sounds like a mouthful: "Effects of Demographic Background, Acculturation, The University of Houston Non-Exercise Model and Knowledge of Basic Health and Fitness Concepts, and Physical Activity and Fitness Levels in Hispanic Youth."

When Cavallini decided to focus on pedagogy, her original study was to examine a fitness curriculum that the state of Texas had mandated all students to take in their first year of high school. "I wanted to do a pre- and post-study where I looked at students at the beginning of the semester, tested them, had them go through the curriculum, and then post-tested them—and see if there was any change," Cavallini says. "We felt like that was a good study, but that certainly it could be better.

Since her study would focus on high schools in the Pasadena Independent School District (located in the suburbs of Houston, where many of the students are Hispanic), Cavallini eventually decided to center her study on the Hispanic population in general. "It evolved from that," she says, "into really looking more at their physical activity."

So last year, Cavallini followed 214 Hispanic students in three of the four Pasadena Independent School District high schools. For her study, she looked at several variables.

The first was barriers to physical activity, says Cavallini. What was their fitness environment? Did they have any kind of physical activity?

Did they have a neighborhood with access to a pool, or a gym, or did it even have sidewalks? Did it have lights, their neighborhood? "We just looked at everything about their environment we could think of that they could tell us."

The second area studied was the students' basic knowledge of cardiovascular risk factors. "That was just a 16-question instrument that asked them basic questions on cardiovascular information," Cavallini says. "Then we related that to their current physical activity level."

The third thing she looked at was
同学们的背景信息包括性别、民族、为第一代还是第二代移民，他们是否来自古巴、墨西哥、西班牙或波多黎各裔？我们想知道他们是否参与了体育活动。但最重要的问题是，他们的经济水平、社会经济状况是怎样的。

第四章和最后一章她研究了同化。“主流化在他们社会中是谁？”Cavallini说。“我们研究了那些来自 Anglo-acculturated 更多地参与体育活动或较少参与体育活动的人。我们希望了解他们在西班牙裔文化中的真实情况，如果我们希望参与体育活动或较少参与体育活动的人。”

Cavallini，现正在撰写她的研究结果，并计划在2001年1月或2月提交她的论文。她说，这学期学校欢迎她的研究。“他们希望与我更密切地合作，因为我可以和他们一起工作，”她说。“对他们来说，‘嘿，这太棒了。我们研究了一些研究，但我们需要尝试找出如何让我们参与进来。’”

Cavallini说，她母亲Viola是西班牙裔，父亲Manlio是罗马人，她的研究集中在西班牙裔学生的生活，她的研究集中在西班牙裔学生的生活，她的研究集中在西班牙裔学生的生活。她的研究集中在西班牙裔学生的生活，她的研究集中在西班牙裔学生的生活。
Evansville. She remained there for three seasons, again keeping active with side projects at the University. In 1991, she hopped over to Hamilton, N.Y., where she became assistant coach for the Colgate women's basketball team.

But by 1992, the coaching lifestyle had begun to wear thin with Cavallini, who was then in her early 30s.

"I liked coaching in college. It was fun, especially in my 20s," she recalls. "At that point, I didn't have the mindset to consider settling down. I could see other parts of the country, do some traveling, and basically see what else was out there in an area that I loved, which is sports and coaching. But...coaching can be unpredictable, and it can be unstable in the sense that you can be here, there, and everywhere. And I was. And although I enjoyed it, after a while, it can get old. So when I turned 31-32, I remember thinking, 'All right—been there, done that'. . . . I just wanted more longevity and stability in my life... I felt after a while that my next move would be best if I left the college environment in terms of coaching and considered education."

So Cavallini returned home and put her own education to work by taking a job at Medina Valley High School in Castorville, Texas.

"I have teacher's certification to teach English and physical education in secondary education, so I said, 'Let me try this one year and see if it's something I'd like to do,'" she says.

As it turned out, it wasn't the stepping stone she'd been looking for. "Although I loved the students and they were great, the environment stifled me," she says. "I realized at the time that I had already gotten used to the college level. So I thought, 'All right, we're going back to school!'"

That's when I really knew I was going to go back to school and get a doctoral degree. I loved the college environment, but I didn't want coaching as a way of life continuously yet I love teaching and I love academia."

In her current position at Rice, Cavallini can still keep close ties with the world of athletics while working toward her doctorate. "I help out with the women's home volleyball and basketball games, but it's low key, it's no big deal," she says. "But there's still that little part of me that loves being in that sports environment. But I also love being a professor. So I think the college environment, for me, is where it's at."

With her doctorate expected this spring, there's one other course of study Cavallini would now like to pursue. "I do think now that I might consider the possibility of going to either Mexico or Spain to study Spanish, because I would love to speak Spanish," says Cavallini, who describes her current grasp of the language as "conversational."

"The Hispanic population has been something that has lately entered my life—within the last three or four years—that has become of great importance," Cavallini says. "That has been my roots, that has been my environment, and I think as I grow older, I am proud that I have come to focus on the Hispanic population and I see myself as, hopefully, having a positive impact on the Hispanic population in my area of expertise."

"I never have thought that growing up in San Antonio would be an influential factor for my future life," she adds. Back then, she says, she was in no way thinking dissertation. "I was thinking I wanted to improve my baseline shot on the basketball court. So just when you least expect it, something can come together in life for you. And it does. And I'm proud of that. I'm excited."
Part Two: Gods, Caves, and Temples

by Elizabeth Coonrod Martínez, Ph.D.

...
Maya and many homes that were also shops of weavings and garments. One such home/shop provided us with lunch (chicken in pibil sauce, served to us in brown pottery bowls with thick Guatemalan corn tortillas on the side, and cups of sweet coffee) for two dollars each, and then staged a mock family wedding involving volunteers from our group, whom they dressed in traditional attire.

Atitlán and Iximché

We took a three-day tour of Chichicastenango, high in the central mountains, visited Atitlán, one of Guatemala’s many beautiful lakes, stepping on the way to the ruins of Iximché, city of the ancient Cakchiquel Maya. They, like the Tlaxcalans in Mexico, agreed to help Spaniard Pedro de Alvarado in 1524 to conquer their neighbors, the Quichés (Menchú's people), and were later betrayed by Alvarado, their leaders beheaded and their village burned.

Iximché structures remain, however, some still quite high. We visited on a Saturday and found a ceremony under way behind a grove of trees, a site, we were told, that is a sacred place of the old Cakchiquel king. A female Mayan priest was conducting the ceremony for a couple that sought guidance in their family life. The priest had at age 20 had a vision of the old Paskal Abaj god, who instructed her to go out and do her work. People told us they had come from far away to see her.

In Chichicastenango, well known for its huge Sunday market, a shrine was built atop a hill to Paskal Abaj. Four small crosses planned in the four directions delineated the space of the shrine. Cardinal directions are crucial in Mayan cosmology.

Homage to Maximón

We reached the village of Santiago de Atitlán by ferry, crossing a crystalline lake surrounded by volcanoes. Here the god Maximón is venerated and protected by a lay priest, a local man assigned this role for one year, after which it passes to another. Our group had an appointment with this annual priest. We took offerings of beer, candles, herbs, and some cash to present before the ancient Mayan spirit.

When we arrived at the house in Santiago de Atitlán where Maximón awaited us, the god was sitting in his chair with cup holders at his hands. A small bottle of rum rested in one cuphold. A cigar was burning in his mouth, and the black Stetson rested atop his head. This Maximón had
some 15 handkerchiefs or scarves tied at his collar, hanging down over his chest. Christmas music was playing continuously from a recording, and Christmas lights flickered on and off throughout the room. There was a strong smell of pine needles that apparently came from a room freshener. A large statue of Christ on the cross hung on the wall, and the Christmas lights covered a casket-looking box, in which was said to reside Maximón’s father. The box was covered with blankets and other kitsch décor but at the top had an opening in which Maximón’s attendant put the quetzal bills we provided. Maximón is thought by contemporary Maya to be the protector of the disenfranchised, prostitutes, and those cast out by their society.

Our gift of beer was poured into the hole in his mouth (upon removing the cigar) and shared by the attendants, including one who played a small guitar and sang a verse over and over in Mayan. During sips of beer, they talked about the need for good crops this year and for a healthier economy in our lake community. We listened and watched for an hour, then thanked the attendants and left. While we are all academics, most of us felt that we had participated in local custom and ancient tradition. This syncretization of customs is a reality of many peoples, especially in the Mayan regions.

As we left the village, we visited a small cathedral, where some of us were surprised to discover that a priest here, an American from Kansas, was killed by the military in 1960. Per his family’s agreement, his heart is buried under the engraving in the church, and his body was sent home to Kansas. The statues of saints that lined both sides of the church’s interior were dressed in traditional native attire. The background wall decoration included both Christian and Mayan (bakabs that hold up the earth) imagery.

Back at the docks on “Gringo Lane,” we bought salted, roasted ears of
corn (that taste like nothing you can get in the U.S.), and reboarded our ferry.

- Los Museos of Guatemala City

We visited Guatemala City to spend time at three prominent museums: the National Museum of Archaeology, the Museo Incajul of indigenous costume or dress, and the private Museo Popol Vuh, which, although small, includes several well-known pieces, some still retaining extraordinary color. The most impressive were large incensarios, tall pots with human or anthropomorphic figures, used to burn incense for all ceremonies and sometimes to store human bones. Their figures celebrated the return to the underworld. The Museo Popol Vuh has been at its new site for only five years and has yet to prepare a book or pamphlet of its contents, which would be an excellent way to further awareness of these exquisite pieces.

After two weeks, we left the highlands villages and cities for the jungle to complete our Guatemalan experience. We flew to Tikal in the northern Petén, which abuts the Yucatán peninsula and shares that portion of the Central American strip with Mexico’s southern state, Chiapas—all of which is hot lowlands rainforest, although we found Tikal much more lush than the other areas.

- The Temples of Tikal

Tikal is a protected site, with only a museum and one hotel (first established by archaeologists in the 1960s) outside the ruins. Many more hotels are available in town, but the commute is nearly an hour. The Petén jungle, with its tropical fauna, surrounds the site. Howler monkeys abound. Their cry, which can go on for hours, has been compared to that of a jaguar or lion, with a kind of bark at the end.

From the top of Temple II, just as the sun comes up, local fauna are visible searching for their breakfast, and there is a richer view of the trees and plants as they are highlighted by the sun. The ancient Maya often planted herb gardens to the East side of temples, and when we walked in early morning past one such area, we smelled orégano, allspice, and mint.

Our guide on this jaunt was a museum research curator from the University of New Mexico, Peter Harrison, author of The Lords of Tikal (1999) and one of the original groups in the 1960s that first prepared a temporary warehouse with cats so that anthropologists could spend time in the area doing excavations.

Tikal is extensive, with sections of temples spread out in various directions. The Lost World pyramid—actually an astronomer’s temple—is a steep climb. Most of these temples were built in the seventh and eighth centuries. Smaller buildings were built hundreds of years earlier. Tikal’s population in its heyday is estimated at 40,000, but this metropolis deteriorated after 1,000 A.D.

Harrison showed us how the buildings are a perfect geometrical fit, connected to and complementing those dedicated to earlier rulers. Often a new temple was erected to celebrate the ending of a katun, or 20-year period (the Maya used a vigesimal counting system). Numerous causeways—especially designed wide paths—connect each complex or grouping of temples.

Harrison led us to that first awesome sight of Temple I: the flat back of the pyramid, 175 feet straight up into the air. It is an amazing discovery: one comes suddenly upon a clearing in the trees, then views an immense structure in the remote rainforest. Of course we enjoyed our Kodak moment before walking around the side to the Great Plaza and main complex. We again sucked in our collective breath: two immense temples faced one another across a large open space, with a huge acropolis of buildings on the other two sides.

The Maya were incredibly expert at preservation and recycling. Buildings were sometimes torn down, then rebuilt upon, sometimes preserved beneath the new construction.

In this acropolis of some 20 buildings, each had its own elaborate décor. The glyphs on stelae and temples have revealed the stories of Tikal’s great rulers, who celebrated their history in architecture and sculpture. Temple I, which has nine levels (9 and 13 are important numbers for the Maya), celebrates the great ruler of the Classic era, Hasaw Chan K’awiil, and Temple II, with three levels but nearly as tall, was built to celebrate his wife (Lady Twelve Macaw), who died nearly 30 years before him.

At the rear of the south acropolis, stairs led down into another complex of apparent living quarters. Harrison enjoyed pointing out saunas and bathrooms. Temple V could be seen in the distance. The next day, we visited Temple IV—purported to be the tallest in Mesoamerica at 212 feet. From its high point, I counted the tops of six other temples rising above the thick trees.

- Caves of the Itzá Maya

Shards of broken pottery abounded in parts of the Cobanarita caves outside of Flores, where we arrived after a 45-minute hike through a woods. Inscriptions on the wall in one section, and a divider built of stones in another, all several hundred years B.C., are all that is left since anthropologists and then cave robbers have visited this site.

Many such caves exist in Central America and the Yucatán, and they have only begun to be studied. They were not lived in but were sacred areas, perhaps used before the huge temples were built.

That afternoon, we saw the village of Flores—an island in a large lake, connected to the shore and the city of Sta. Helena by a bridge. It is on this island that the Itzá Maya held their last stand against the Spaniards in the 18th century and were finally subdued. A stark, white church now stands at the top of the hill on the island, proclaiming the end of the Itzá Maya. It was a solemn way to end our stay in Guatemala.

Using What We’ve Learned

Our last swim, our last climbing of pyramids, and we were back to the city to conclude our six-weeks study.

How would each of us use what we had learned? While our approaches would be varied, like our disciplines, as teachers we will be showing slides and sharing the latest information on the Maya.

While some misconceptions were disseminated by early explorers of Maya ruins, information being corrected by new studies, the greatest error is in not recognizing an elaborate, extensive, and knowledgeable civilization that existed prior to European arrival on the American continent. The values of contributions of this earlier people should be taught in our classrooms, as well as the fact that they still have many descendants among us.

Elizabeth Coonrod Martinez is chair of the Department of Modern Languages & Literatures at Sonoma State University in northern California, and associate professor of Latin American literature and Spanish. She completed her doctorate at the University of New Mexico, Albuquerque. She can be e-mailed at elizabeth.martinez@sonoma.edu, phoned at (707) 664-3161, and faxed at (707) 664-2505.
Much of the following information was taken from materials provided by Penn State.

A democratic government and political freedom could have authentic possibilities for a post-Castro Cuba, if pre-Castro history is any guide, a Penn State researcher says.

"Casual observers of Cuban history might see only two choices after Castro: the rule of entrenched wealth and military dictatorship à la Batista, or a continuation of Fidel Castro's Socialist revolution," says Dr. Charles D. Ameringer, professor emeritus of Latin American history at Penn State. "However, a third option could be real democracy, which had a little-remembered trial run in Cuba between 1944 and 1952."

Specialists typically divide the history of Cuba into three parts: the Plattist Republic (1902-1933), the Batista era (1933-1958), and the Cuban Revolution and Castro era (1959 to the present). Ameringer points out that this division glosses over the years when Cuba had a functioning democracy.

"The Cuban Revolutionary Party-Auténtico (PRC-A) administrations of Ramón Grau San Martín and Carlos Prio Socarras, though marred by serious flaws, together represented a unique era in Cuban history," Ameringer notes. "In two free elections (1944 and 1948), Cubans had their first chance to vote for a government committed to protecting civil liberties, promoting Cuban culture, and achieving economic independence."

Unfortunately, the early promise of the Auténtico government was tarnished by widespread corruption, nepotism, economic mismanagement, and gangland violence, with the result that a golpe, or coup, launched by onetime stenographer Sergeant Fulgencio Batista, topple Prio in 1952. At the beginning of 1959, Batista was himself overthrown by Fidel Castro.

The Auténtico era began on June 1, 1944, when former medical school dean and Auténtico candidate Grau San Martín—basing his campaign on "Cubanidad" or Cuban-ness—won the Cuban presidential election with 1,041,822 votes to 899,220 for Carlos Saladrigas, representing the Batista-sponsored Democratic Socialist Coalition. Batista, in power since 1954, kept his word and did not resort to military intervention. Thus, Cuba's first experiment in democracy was launched, says Ameringer.

"Under the Auténticos, Cubans would enjoy freedoms they had never known before and would never know again, the greatest being freedom of expression," the College of Liberal Arts researcher says. "Cuba had scores of newspapers, running the spectrum from the ultraconservative Diario de la Marina to the Communist Hoy. The weekly magazine Bobemia, with its excellent political cartoonists and caricaturists, enjoyed one of the largest circulations in Latin America, even though it was an unrelenting critic of the Auténticos."

The Prio government, while hardly a paragon of honesty itself, attempted to reduce bureaucratic embezzlement through public budgets and standardized accounting procedures monitored by the Tribunal of Accounts, the National Bank, and Agricultural and Industrial Development Bank.

"The Auténticos maintained a highly regulated economy to achieve broadly nationalist and anti-imperialistic goals," notes the Penn State historian. "Through a system of production quotas and guaranteed market share, the Auténticos sought to eliminate the corporation-owned agro-industrial sugar combine, while fostering Cuban ownership of land and industry. They intended to liberate the Cuban economy from outside control and protect workers and small farmers, but, as many economists agreed, their economic policies furthered inefficiency and stagnation. Neither did they succeed in reducing widespread illiteracy on the island."
"It is possible that a third free election—slated for June 1952—and respected presidency might have given democracy the final nudge it needed to survive in Cuba," he adds. "Social injustice and economic disparity persisted, but the legal and political channels of redress would have stayed open under conditions of increasing confidence and opportunity."

The young Cuban democracy had produced leaders better suited than Prio to attack political corruption and violence and effect lasting economic reform. Unfortunately none of them had the opportunity to prove their worth, according to Ameringer.

"In hindsight, Cubans would have fought like demons to resist Batista's golpe in 1952, had they known the complete truth about him," Ameringer notes. "Few apparently regretted the departure of Prio, but few expected that democracy might be a permanent casualty as well."

Already prominent in Cuban politics was 26-year-old Fidel Castro, who, after gaining early experience as a revolutionary, had earned a law degree and started a practice, with much of his work offered pro bono in the slums of Havana.

Castro, in denouncing the Batista takeover, himself testified to the growth of democracy under the Auténticos: "We have been accustomed to living within the Constitution; we have done so for 12 years without serious obstacles in spite of the errors and outrages. The superior state of civic peace is achieved only after long effort. You, Batista, have just cast to the ground in a few hours that noble dream of the Cuban people."

"Many Cubans who left their homeland after the Castro revolution of 1959 were either born or had their formative years in the Auténtico era," says the Penn State historian. "Their children might do well to recall Cuba's democratic experience for its successes as well as its errors."

Little has been published, says Ameringer, about that period of modern Cuba.

"Other than a few paragraphs in most standard histories of Cuba, the Auténtico era is largely ignored." The brief accounts that do exist, he says, deal mainly with the corruption and violence of the era, completely overlooking the positive features of Cuba's unique democratic experience.

"The important lesson to be gained is that during the eight Auténtico years, Cubans enjoyed a democratic order free from the restraints of the Platt Amendment and under the very progressive Constitution of 1940."

The Platt Amendment, named for its framers, expansionist Orville Hitchcock Platt, U.S. Senator from Connecticut, started as a rider to the Army Appropriations Bill of 1901, then was forced into the Cuban constitution and into a "permanent treaty" between the U.S. and Cuba. It required Cuba to enter into no foreign agreements contrary to interests of the U.S. and to grant to the U.S. the right to intervene in Cuban affairs, if necessary to keep order. The U.S. did intervene in 1906, 1912, 1917, and 1920.

Civilian Rule

"Cubans were free to be Cubans in every aspect of their being," says the professor.

"Though the military lurked in the shadows posing a threat, civilian leaders dominated the government, and, although the presidency was strong, neither Grau nor Prio were caudillos [absolute leaders], and the legislative and judicial branches were viable and even effective. During the eight years, there were four relatively honest elections: two presidential and congressional elections along with two additional congressional—off-year—elections.

"During these years also, in an atmosphere of freedom, Cubans were especially creative in literature, music, and pop culture. The media—press and radio, he says, were "absolutely free, even to the extent of going beyond the line of responsible commentary.

"In the realm of foreign affairs, though critics—especially in Cuba since 1960—accused the Auténticos of being lackeys to the Yankees, Cuban foreign policy was frequently at odds with U.S. policy, including that of the early Cold War period, he says.

"Cuba followed an aggressively anti-dictatorial policy, supporting such leaders as the exiled Venezuelan leader Romulo Betancourt and the filibustering activities of the Caribbean Legion in opposition to the dictators Rafael Trujillo of the Dominican Republic, Anastasio Somoza of Nicaragua, and Marcos Pérez Jiménez of Venezuela.

"The U.S. regarded the Auténticos/Cubans as 'troublemakers,' disturbing 'stability' in the Caribbean. Fidel Castro and his followers charged that the Auténticos' opposition to the Communists was U.S.-inspired "McCarthyism," whereas the evidence shows that the Auténticos had a legitimate grievance against the Communists that predated the cold war. During the '30s, while the Auténticos suffered martyrdom in Batista's first rule, the Communists collaborated with Batista in gaining control of the organized labor movement. The Auténtico opposition to the Communist Party had deep Cuban roots and did not stem from U.S. cold war policy."

Ameringer says that his book doesn't neglect the corruption and violence of the Auténtico years, nor the failure of the Auténticos to deal effectively with pressing economic and social issues. "But," he says, "the lessons are: Should a people give up on democratic rule because a particular political party is corrupt and ineffective? Can a society eliminate corrupt government and political chicanery without sacrificing its freedoms? Were there options other..."
than reverting to strongman rule? Having learned their lesson, will Cubans some day work to strengthen a democratic order, showing faith in institutions and giving the system time to eliminate flaws, even if their political leaders are less than perfect?

"What happened to Cuba during the Autóctono rule," says Ameringer, "is not too different from what is happening in Venezuela today, with certain leaders of the Democratic Action Party guilty of corrupt practices and contributing to the rise of strongman Hugo Chávez."

Purged Archives, Confiscated Papers

Asked by HO about his research methodology, Ameringer says the process is long—while not concentrating on this study exclusively, he had researched materials used in this book for more than 30 years. But he developed a clear concept and design to serve as a guide.

"I sought to immerse myself in every contemporary commentary and document I could identify and obtain in order to get a first-hand sense of the era and be able to relate what was happening in Cuba as accurately as possible. I particularly sought out Cuban materials, but it was extremely difficult to gain access to relevant primary sources.

"In my travel to Cuba in 1980, I discovered that there was a conscious effort to expunge the Autóctono governments from the record entirely. Even on the huge metal doors of the Capitol building, where the names of the presidents of Cuba are inscribed with their years in office, those of Grau and Prio are crudely scratched out.

"I went to the Museum of the Republic and studied artifacts and documents covering the years 1902 to 1933, and then to the Museum of the Revolution—the former former Presidental Palace—where the archive is confined to the years 1953—Castro's assault on the Moncada barracks—to January 1959. There is nothing available in between; there are no accessible archives for the years 1933 to 1953."

"I did the next best thing and interviewed exiles in Miami—beginning actually in 1967," including several now deceased, he says, "but few had been able to carry personal letters and documents with them. Herminio Portell Vila complained to me bitterly that Castro had confiscated his library. I obtained some papers from Tony Varona, including the original typescript of the Autóctono 'Programa'—November 1951—used uniquely in this study, plus documents covering a later period—1952-57—which I used in my article, 'The Autóctono Party and the Political Opposition in Cuba, 1952-57,' published in the Hispanic American Historical Review, May 1985."

"I did consult U.S. State Department documents, but except for the political turmoil in the Caribbean overall and U.S.-Cuban sugar relations, I tended to use them sparingly, as I did not wish to relate Cuban affairs as seen through the eyes of the U.S. Embassy in Havana. I did not wish to take the diplomatic history approach.

"For economic matters, I did rely heavily on the World Bank's Report on Cuba, 1951, as a solid contemporary document describing the state of the Cuban economy, coupled with numerous economic studies published by Cuban experts and scholars.

"I relied most heavily upon Cuban newspapers and journals, especially Bohemia, a major voice of Cuban affairs at the time. In my mind, Bohemia may be regarded as more than a single source, since it published commentary from the entire spectrum of Cuban economic, political, and social activists and scholars. I cite as many as 43 distinct writers, providing a wide range of opinions, although editorially Bohemia was extremely critical of the Autóctono governments and vigorously supported the Autóctonos' major critic, Eddy Chibais."

Aimed at Wide Audience

Dr. Ameringer tells HO that in writing the book, he tried to avoid stilted, academic prose, that history has many lessons, and that it is the historian's job to be objective and make them clear to as wide a readership as possible. In this he has succeeded admirably.

The author's style is straightforward and concise. The events related are intrinsically dramatic. Noble aspirations and base betrayals, duels of honor, embezzlement in high places, murders, a shocking suicide. Heroes, would-be heroes, and lapsed heroes are found herein, and several thorough scoundrels.

The publisher, University Press of Florida, writes that the book "offers serious, solid analyses of key developments that fill major gaps in the current understanding of the circles of power in prerevolutionary Cuba."

Harold Dana Sims, University of Pittsburgh, writes of Ameringer's Autóctono findings, "We can now see its legacy in the Batista and Castro eras."

As with appreciation of opera and of fine wine, a good history book can be savored at many levels. This one is not only an enjoyable and enlightening read—it also stirs a desire to learn and to understand far more about this island so close to our shores.

Of the many interesting players, actions, and outcomes described therein, it is some statistics cited by Dr. Ameringer in Chapter 8, "Sugar and Vinegar," that I found most illuminating.

"In 1946, 777 percent of Cuba's exports were destined for the United States, and its imports from the United States constituted 869 percent of all goods purchased abroad. Moreover, in that same year, sugar and sugar byproducts made up 74 percent of all exports. In 1950, the figure had soared to 89 percent."

The Cuban Democratic Experience: The Autóctono Years, 1944-1952 is 288 pages in length, 130 of them notes, bibliography, and index. ISBN is 0-8130-1755-6. 1-800-226-3822.

The University Press of Florida, scholarly publishing agency for the State University system, offers many other titles related to Latin America and to Hispanics in the U.S. Its categories include history, archaeology, literature, and general interest. Four of the 16 history titles described in its Fall 2000 catalog are about Cuba.
Reading, Writing, and Rattlers

Natural Toxins Research Center Launched at Texas A&M University, Kingsville

BY CLARA MAE MARCOTTE AND ADALYN HIXSON

The venoms of more than 300 poisonous snakes in the world are already known to have biomedical applications.

When Australian Peter Mirtschin came to the United States last year to look at pit viper collections, he also lectured on Australian snakes, as a guest of Texas A&M-Kingsville (TAMUK) and the Conner Museum.

Mirtschin, a venom supplier, said that snakes in Australia are primarily front-fanged snakes. Their venom has neurotoxins and clotting factors. "The venom clotting factors of Australian snakes can be used for diagnostic purposes, such as for lupus," he said.

Texas rattlers, on the other hand, have flick-knife fangs, and their venom is hemorrhagic.

But whether snakes have fixed fangs or flick-knife fangs, they will find the accommodations much to their liking at TAMUK's elaborate serpentarium, renovated last year to the tune of $300,000.

The serpentarium has been important to TAMUK's Natural Toxins Research Initiative, headed by Dr. John C. Pérez, professor of biology, and will be even more so now that Texas A&M's board of regents has approved Pérez' proposal for a Natural Toxins Research Center (NTRC), an action they took in late March.

Pérez holds a bachelor's degree in molecular and genetic biology from the University of Utah, a master's in zoology from Mankato State University in Minnesota, and a doctorate in bacteriology from Utah State University. He has worked for TAMUK for nearly 30 years and is well known for his toxins research. As of last year, he had brought in nearly $85 million in research funds.

Pérez described the mission of the Center as providing research, training, and resources that lead to the discovery of medically important toxins and toxin products found in snake venoms.

Marc Cisneros, TAMUK president, said he is extremely supportive of the Center. "We are already the premier research university in South Texas, and this will provide even more research opportunities and learning opportunities for our students."

Dr. Pérez and his students were among the first researchers to discover that certain animals are resistant to snake venom. Their research continues.

"The NTRC will provide facilities, staff, and natural resources for international and national collaboration with leading venom and biomedical researchers," Pérez said.

"Through its world-class snake breeding and maintenance program, the NTRC will enhance biomedical research by providing individually collected snake venoms, purified toxins from those venoms, and monoclonal antibodies and polyclonal antibodies to researchers worldwide."

Snake venoms are a complex mixture of chemicals, some of
which have important medical properties. The venoms of more than 300 poisonous snakes in the world are already known to have biomedical applications. However, the medical potential of these natural toxins has been examined in fewer than 13 percent of the venomous snakes found in North America. Maximizing the potential of venoms requires that they be made available to researchers.

To date, no other facility functions in this capacity.

At present, the 6,300-square-foot serpentarium houses more than 350 snakes, up from around 280 reported just a year ago, and is built to house 660. “Since it is very expensive to collect snakes, it is much easier to breed them in captivity,” says Pérez, “and to do that, we need the right environmental conditions.”

Visit the Center’s webpage, ntri.tamuk.edu, and you will be introduced to *C.m. molossus* and *C.s. horridus*, and a few others, through full-color mug shots. The Center’s website price list for venoms, antibodies, resistant animal sera, and other biological products is still under construction, but the serpentarium database is already at least partially in place, permitting a visitor to look up a snake by its scientific name, *Crotalus mitichelli stephenisi*, for example, or its common name, Panamint Speckled Rattlesnake. Detailed information will ultimately be available on each snake in the serpentarium.

Anti-venom products are made by facilities in Salt Lake City, Utah, and also in Taunuda, South Australia. Elda Sánchez, NTRC laboratory director, visited Taunuda last year and toured the venom facility of Peter Mirtschin. Mirtschin and Pérez have discussed the possibility of collaborative snake plasma research. Commenting on one Australian proposal, Clara Mae Marcotte, TAMUK Public Affairs, explained: “We would have needed to collect over 200 Mojave rattlesnakes, test for

paramyxovirus, quarantine the snakes, build crates, and ship them.” [The virus, transmitted through respiratory secretions, may decimate an entire collection.]

“Snake prices vary quite a bit,” according to Sánchez. “It depends on how hard the snake is to obtain. A snake from the Grand Canyon is more expensive than a diamondback because of the remote location and the special permits required. A black-tailed rattlesnake

large snake native to Venezuela.

Under the agreement, two students from the laboratory of Dr. Alexis Rodríguez-Acosta, director of the Universidad’s Tropical Medicine Institute, travel to Texas A&M–Kingsville, and two students from Pérez’s laboratory travel to the Universidad Central de Venezuela. Both groups work on improving research collaboration and also improve their second language.

Rodríguez, who received his

Ph.D. in immunology from the National Institute for Medical Research in London, has a medical degree as well. “This will be a very good agreement that will be useful to both universities,” he said. “We will interchange students, friendships, and cultures, which is very important in today’s global process.”

Pérez said the joint research project will be important in achieving the natural toxins research mission.

Each university provides travel and living expenses for its students, as well as research space, equipment, and supplies for the visiting students in their research projects.

“The student swap did take place this summer with Venezuela,” reported Sánchez. “Luis Manuel Salqueiro, DMV, from Caracas, who was working on his Ph.D., came here to Kingsville to do research. Our students, Patty Vela from Rivera and Andy Garza from Bishop, both A&M–Kingsville graduates and range and wildlife majors, went to Venezuela and worked on isolating a hemorrhagic fraction from *Crotalus vejutous*.” Their mission was successful. “They were able to isolate one. And their mentor in Venezuela, Dr. Rodríguez-Acosta, is currently working on a publication from the research.”

Another event of the summer was the first-ever Inter-American Workshop on Natural Toxins, held in Caracas, Venezuela, July 12–14. Both Dr. Pérez and NTRC Lab Director Elda Sánchez made presentations at the event.

The Natural Toxins workshop is expected to become an annual undertaking.

**Home Sweet Home**

A project begun last year will provide each snake in the serpentarium with the same temperature, lighting, and humidity as it would encounter in its native habitat—and at precisely the same time. That project was undertaken by a senior chemical engineering student, Arturo Castilleja, who worked on a climate control system for the serpentarium that uses real-time climate conditions downloaded continuously from the Internet.

Castilleja, then a Ronald E. McNair scholar, reported, “We want
to simulate the natural environment of the snakes because eventually we want to make the snakes reproduce in captivity.”

Pérez was a mentor to Castillo on the climate project, along with Dr. William Heenan, chair and professor in chemical and natural gas engineering. For the project, Castillo had to learn the computer program Visusal Basic. He then went on the Internet to the National Weather Service for climate conditions near acquisition sites. The conditions used were to be downloaded from the Web using a computer program that continuously downloads data from any webpage automatically.

This system needed to be integrated with the serpentarium’s existing computer control system. Then the climate in each snake’s cage is individually controlled according to the downloaded data, which arrives hourly.

The climate project is still under way, to be finished by yet another student.

Research and Teaching Awards

John Pérez has won much acclaim for his research, his teaching, and his mentoring. He received the alumni association’s Distinguished Researcher Award in 1997 and was nominated for the Piper Award the same year. Pérez has been given the Olan Kruse Science Faculty Award twice and was the first to receive the Undergraduate Institution Mentor Award from SACNAS, the Society for the Advancement of Chicanos and Native Americans in Science. That came in 1998. The following year, he received the Koch Industries Outstanding Educator Award. And last year, he was named a Regents Professor by the board of regents of The Texas A&M University System.

From 1973 to 1999, Pérez directed the NIH/MBRS—the National Institutes of Health/Minority Biomedical Research Support—program with the goal of encouraging biology students to pursue biomedical careers, specifically to increase the number of minorities in the field.

Since 1996, he’s been director of the NIH/RMI—the National Institutes of Health/Research Infrastructure in Minority Institutions—program, meant to enhance the research infrastructure at the University to enable faculty to obtain funded research. Toward that end, it provided $100,000 toward the renovation of the serpentarium. An additional $300,000 was provided by TAMUK.

The NIH/RIMI program also serves as a link to doctoral programs at research-intensive universities. The program at Kingsville has links to Texas A&M University, the UT Health Science Center at Houston, and the UT Health Science Center at San Antonio.

When NIH/RIMI held its first symposium in Atlanta last February, many of Kingsville’s Hispanic biology students presented research, many of them Latinas. Presenters included María Estela Martínez, María Susana Ramírez, Gloria R. Chapa, Celia García-Prieto, Rosemary Ramírez, Gennie Schuller-Chávez, Roel Valdárez, Jr., and NTR lab director Elda Sánchez. Kingsville mentors in attendance included Pérez, Dr. Maribel González-Garza, assistant chemistry professor, and Dr. Rafael Pérez-Ballesteros, chemical technical coordinator.

The Pipeline Connection

Dr. Pérez’ mentoring is not confined to TAMUK students. He’s worked too with an Independent Study and Mentorship class at Alice High School. While a senior there, Richard Fred Peña conducted a year-long study of high-performance liquid chromatography with Dr. Pérez prior to graduation, driving to the TAMUK campus twice a week.

“I’ve learned research techniques and high-performance liquid chromatography procedures and methods, and worked with fractionation and separation of snake venom,” Peña said. “I started by observing and then worked on my own. I can work at home on the Internet.”

Pérez also supervised the Kingsville-based activities of Project InterCon, a 4-week research program launched in summer 1999 and involving local high school teachers. Project InterCon is a satellite program from The University of Texas-Houston Health Science Center, funded by a grant from UT-Houston. Pérez’s project liaison is Gilbert Castro, assistant vice president in the office of education access and equity at UT-Houston Health Science Center.

The Project, which takes place within TAMUK’s biology department, offers high school students a chance to learn applied techniques, including liquid chromatography, electrophoresis, and Internet applications, in order to improve their laboratory skills and hands-on knowledge of science. It offers high school teachers opportunities to develop enduring relationships with scientists and educators and to learn about the human and technological resources of the University that they can use in their classrooms to improve science instruction. The teachers receive a stipend. “Being able to add Project InterCon to our efforts to serve the local community is important to our institution,” Pérez said. “This program has considerable potential for growth in our region.”

Sánchez said students work with machines that profile or identify venom—a spectrophotometer, a molecule separating system, and a system for separating molecules by an electrical charge. They also work with analytical balances; learn how to use Microsoft Excel, Adobe Photoshop, and Aldus Paint; input venom profiles on the Internet, and learn to keep scientific journals.

The Upward Bound program identifies and selects eligible students who meet income guidelines or who are first-generation college students. These students are offered the opportunity to enhance the academic and social skills needed to succeed in postsecondary education. In the summer 1999 project, high school teacher Thelma Quintanilla-Hernández trained three Upward Bound students—high school seniors Amanda Morgan, from San Diego, and Lorinda González and Karina Zepeda, from Banquete.

“These are really good, sharp students with A’s in math and science,” she said. “The students are already interested in the medical field. This research will give them experience to see if they really want to go into this field.”

Quintanilla-Hernández is an alum of TAMUK, from which she received her master’s degree in biology, and has been an H.M. King science teacher since 1987. This last summer, Quintanilla-Hernández worked with five students: Sanjuana Guerrero, sophomore from Ben Bolt; Joseph Salano, junior, and Christin Major, first-year student, both from Tulsosa-Midway in Corpus Christi; Gerardo Pequeño, junior from Valley View; and Mireya Ortegon, junior from Riviera. She presented her research, which characterized 26 different venoms, in Paris this year at the 13th International Congress on Animal, Plant and Microbial Toxin.

Undoubtedly there will be even more collaborative projects down the road—through public and private consortia, with public and private scientific and medical institutions within and beyond the U.S. borders. Dr. Pérez has visited not only Caracas but the Grand Canyon and the Amazon in recent months.

And one more thing is certain. Dr. Pérez will continue to find ways to bring deserving young Latinas and Latinos and other underserved minorities into his world of science, as he has throughout his long and distinguished career.

Much of this article is based on materials written by Clara Mae Marrufo, Public Affairs, Texas A&M-Kingsville.
ACE Study Questions Publicized Accounts of Postsecondary Education Crisis among Males

WASHINGTON, D.C.

The state of gender equity in higher education varies tremendously by age, race/ethnicity, and socioeconomic status, but does not suggest a general crisis in the enrollment of males in higher education, according to a new study released by the American Council on Education (ACE).

The study "Gender Equity in Higher Education: Are Male Students at a Disadvantage?" examines data on the educational achievement of men and women to determine the validity of previous reports that concluded that women are more likely than their male peers to hold high educational aspirations, to enroll in college, and to attain a college degree.

"There is not a generalized educational crisis among men," said Jacqueline King, director of ACE's Center for Policy Analysis and author of the report. "However, there are pockets of real problems. In particular, African American, Hispanic, and low-income young men lag behind their female peers in terms of educational attainment and are far outpaced by White, Asian American, and middle-class men and women. There is little evidence to suggest that White middle-class males are falling behind their female peers," she said.

Women do not predominate at all levels of higher education; men still hold the majority in doctoral and professional programs. Men also continue to hold the majority in two large master's degree fields--business and engineering, the study shows.

In addition, the gender gaps among African Americans, American Indians, and Hispanics are huge. For example, two-thirds of African American traditional-age college students are women. "These differences create the gender gap among all traditional-age students," King said.

Data also show that as income increases, the gender gap disappears or reverses itself to favor males. The exception is African Americans. For these students, there is a substantial gender gap even among upper-income students.

"The message in these data for educators, political leaders, and the media is to concentrate our time, resources, and attention on the students who are in greatest danger of being left behind and to avoid becoming distracted by 'crises' that may have little basis in fact," King concludes.

The report is available for $15 from the ACE Fulfillment Services, Department 91, Washington, D.C. 20035-091; (301) 604-9073 (telephone); (301) 604-0158 (fax).

Top Producers of Latino Peace Corps Volunteers Announce New Graduate Study Opportunities

WASHINGTON, D.C.

Three universities that have produced high numbers of Latino Peace Corps volunteers over the last decade announced new opportunities for overseas service learning. The University of California (UC)-Davis, Humboldt State University, and the University of Washington-Seattle have established partnerships with the Peace Corps to offer master's international programs. The programs allow students to earn academic credit for overseas volunteer assignments after completing a designated number of graduate credit hours on campus.

The University of Washington launched a master's international program in non-governmental organization development. Earlier, UC-Davis pioneered the only Peace Corps master's international program in preventive veterinary medicine. And Humboldt State University in Arcata, Calif., announced a master's international program in teaching English as a second language.

"These three institutions merit recognition for encouraging Hispanic-American students to reap the many professional and personal benefits of the Peace Corps volunteer experience," said Peace Corps Deputy Director Charles R. Baquet III. "They are also to be applauded for preparing students for the global economy with this unique service learning program."

UC-Davis ranks eighth on the list of colleges that have produced the most Hispanic volunteers in the past decade, tying with Colorado State University and the San Diego and Santa Cruz campuses of the University of California. Humboldt State University falls 12th, tying with California State Polytechnic University-Pomona, Stanford University, and Florida State University. The University of Washington ranks 13th, tying with California State University-Long Beach.

"The recruitment of more volunteers of color is an agency-wide priority for the Peace Corps. We want Americans of every heritage to show the world the true face of America and reap the benefits of service," said Baquet.

There are 396 students currently enrolled in 52 master's international programs at 45 universities. Today more than 7,300 Peace Corps volunteers serve in 76 countries around the world, the highest number of volunteers since 1974. Since 1961, more than 161,000 Americans have joined the Peace Corps.
Finding Funds for College

Federal Financial Aid Makes Higher Education Affordable

WASHINGTON, DC

As more Americans attend college than ever before, the cost of a higher education is becoming more affordable due in large part to an increase in federal support. Federal student aid has doubled from $22 billion to $50 billion, providing the greatest investment in higher education since the G.I. Bill.

With new and expanded loan and grant programs, tax credits, and work-study opportunities, virtually anyone who wants to attend college now can afford to do so. And millions of student borrowers can benefit from lower fees when they repay their loans on time or consolidate them into the direct loan program.

New Flexible Repayments

Beginning in the 2000-01 academic year, students will be eligible for a rebate worth 15 percent of loans made through the William D. Ford Federal Direct Student Loan Program, saving borrowers $150 for every $10,000 in loans.

“We have worked hard to make college more affordable and accessible for students and their families during the past eight years,” said Secretary of Education Richard W. Riley. The U.S. Department of Education helps fund college costs for more than 9 million students across the country.

Students who consolidate their loans through the loan program also will receive additional savings with a new low-interest rate that is 0.8 percent lower than what they are currently paying, saving students with $10,000 in loans more than $500 each. This lower rate applies to loans consolidated between Oct. 1, 2000, and Sept. 30, 2001.

These new measures add to the current discount offered by the Department that gives a 0.25 percent interest-rate reduction to direct loan borrowers who repay their loans through electronic debt accounts.

Combined with earlier improvements in lending programs, these incentives would enable a student to save more than $1,300 for every $10,000 in loans.

In addition, teachers who serve in high-need areas will benefit from a new loan-forgiveness provision that waives up to $500 in loans after five consecutive years of teaching at needy schools.

Financing at No Cost

Students can benefit further from grants and scholarships that are based on need and merit and do not have to be repaid. Pell grants now provide up to $3,300 to low-income students—$1,000 more than in 1993. In the FY 2001 budget, the president has requested an increase to $3,500 per grant.

Some of the most important innovations in financial aid, however, have been in the form of two tax credits proposed by President Clinton in 1996 and enacted in 1997.

The Hope Scholarship tax credit provides up to $1,500 in tax relief for the first two years of college. The scholarship pays nearly all of the tuition fees at an average-priced community college.

A second tax incentive that allows families to claim tuition expenses on their federal income tax is the Lifetime Learning tax credit, which provides up to $1,000 in tax relief for college juniors and seniors, graduate students, and adults seeking job training. The president’s proposed College Opportunity Tax Credit is a significant expansion of the Lifetime Learning Credit and would provide up to $2,800 in tax relief annually to help American families pay for college.

Work-study programs provide students another option to finance their education. The federal government pays up to 100 percent of the wages of college students who tutor children and, in some cases, adults in reading and math. Students can work in elementary schools, child-care centers, after-school programs, community agencies, well-child clinics, and libraries.

National “Gear Up” Initiative Expands College Horizons for 700,000 of the Nation’s Lowest-Income Young People

WASHINGTON, DC

Projects in 42 States, including 237 Local Partnerships, Help Strengthen Academic Rigor, Build College Awareness, Provide Scholarships, and Bolster Community Support

Gaining Early Awareness and Readiness for Undergraduate Programs (GEAR UP), a $200 million federal initiative funded by Congress over the past two years to improve college success for low-income students nationwide, is having a strong impact on states and local communities, said program funders, local project administrators, and national experts at a briefing at the National Press Club.

The briefing was part of a national meeting that brought 900 project leaders to Leesburg, Va., to discuss the future of the federal initiative as well as new and more effective strategies for addressing the college-going needs of low-income students throughout the country. Under GEAR UP, federal funds are used to give more low-income students the skills, encouragement, and preparation to pursue postsecondary education. GEAR UP provides two types of competitive grants—partnership grants and state grants—that support early college awareness and preparation at the state and local levels.

GEAR UP is unique among federal programs addressing barriers to college success for low-income students. GEAR UP programs begin working with students early, starting no later than the 7th grade, and stay with children through 12th grade. GEAR UP partnerships provide broad-scale approaches to helping entire grades of students, transforming their schools by introducing comprehensive strategies that include mentoring, tutoring, strengthening curricula, teacher professional development, summer and after-school academic and enrichment programs, and college visits. GEAR UP also encourages partnerships to leverage local resources and supports state early college preparation and scholarship efforts. Numerous GEAR UP programs directly support students with college scholarships.

More than 700,000 disadvantaged students nationwide, many of whom would not otherwise have the opportunity, are being prepared academically to become competitive in the college admissions process. Since its launch in 1999 as a partnership between high-poverty middle schools, universities, businesses, and community-based organizations to get more low-income students better prepared for college, GEAR UP has provided grants to 237 local partnerships and 28 states, including recently announced grants to 73 new partnerships and 7 additional states.
Romano Brown Directs Miami's Corporate Relations

Josie Romano Brown recently became executive director of corporate relations at the University of Miami (UM) in Florida. Her primary duties are to enhance existing relationships between the University and its corporate partners and develop new ones by marketing creative initiatives with UM’s schools and colleges.

President and founder of her own consulting company, Romano Brown and Associates, Inc., she currently serves on many boards and committees in her community and, in 1990, was named Woman of the Year by the Coalition of Hispanic American Women.

Romano Brown graduated from Barry University and received a master’s degree from Central Michigan University.

Martínez Recognized for Community Leadership

Dr. Ernest A. Martínez, executive vice chancellor of the Alamo Community College District (ACCD) in Texas, was recognized for outstanding community leadership in education by the West San Antonio Chamber of Commerce.

Martínez supports the ACCD chancellor and board in strategic planning, institutional effectiveness, capital improvements, developing policy, improving delivery of services and initiatives, and enhancing academic programs and quality of life. He supervises many key district areas, including human resources, information systems, procurement, student financial services, facilities, fiscal affairs, public safety, and student program development.

Martínez has a bachelor’s degree from New Mexico Highlands University, a master’s from Sonoma State University, and a doctorate from UC-Berkeley.

APSA Looking for Minority Political Scientists

The American Political Science Association (APSA) announced that the Minority Identification Project is now online. The MID Project was established in 1990 to help attract undergraduates to graduate study in political science, with the ultimate goal of increasing diversity within the profession.

Undergraduate faculty, after talking with potential candidates about the profession and careers within the discipline, enter the names of interested students into an online database. Graduate programs then have access to the database and can search from the list for possible applicants. Graduate schools that have become “core schools” in the program—having committed themselves financially—have agreed to waive application fees and to help with financial aid.

To access the site, contact www.apsanet.org/myAPSA. If you have any questions or complications with the program, contact Sue Davis, e-mail, sddavis@apsanet.org, or Alison MacDonald, e-mail, amdonald@apsanet.org.

El Salvador VP Visits Rancho Santiago

Carlos Quintanilla Schmidt, vice president of El Salvador, visited the Rancho Santiago Community College District in California as part of a trade mission to explore business opportunities between El Salvador and Orange County. The day-long exchange included a tour of the District’s Business and Industry Services Center. A briefing about the District’s capabilities included the Small Business Development Center, Center for International Trade Development, and California Mexico Trade Assistance Center. The vice president was acquainted with Orange County’s economy and provided participants with an understanding of the business climate in El Salvador.

Hijuelos Visits St. Joseph’s in New York

Oscar Hijuelos, one of the foremost Latino novelists in the U.S. today, gave a Founders Day lecture, “A Writer’s Life,” at St. Joseph’s College in New York.

Born in New York to Cuban American parents, Hijuelos vividly captures the experience of the immigrant in New York in his writing yet also reveals something of all human experience. His most recent novel is Empress of the Splendid Season. In addition to the Pulitzer Prize-winning The Mambo Kings Play Songs of Love, he wrote Our House in the Last World, The Fourteen Sisters of Emilio Montez O’Brien, and Mr. Ives’ Christmas.

González Echevarría Discusses Cuban Culture at Delaware

Roberto González Echevarría, professor of Hispanic and comparative literatures and chair of the Spanish and Portuguese department at Yale University, gave a talk on the “Origins of Cuban Baseball, Music, Dance, and Literature” at the University of Delaware.
In his latest book, *The Pride of Havana: A History of Cuban Baseball*, Echevarría writes about the game that remains so popular in his native country. Laying to rest a popular myth about one of Cuban baseball’s biggest fans, Echevarría writes, “Fidel Castro was never scouted by any major league team and is not known to have enjoyed any kind of success in baseball that could have brought a scout’s attention to him.”

While baseball is a favorite subject of his research, Echevarría has authored several books on Spanish, Latin American, French, and Italian literature, including *Myth and Archive: A Theory of Latin American Narrative*, which received awards from the Modern Language Association of America and the Latin American Studies Association.

González Echevarría is pictured here (l.) with Ivo Dominguez (r.), Department of Foreign Languages and Literatures, University of Delaware’s College of Arts and Science, and co-organizer of the event.

**Tobar Exhibited at Adrian College**

Adrian College in Michigan exhibited “Menagerie,” a display of paintings by artist Carlos Tobar.

Tobar, born in Ecuador, is owner and operator of Good Impressions Graphics in Adrian, Mich. Essentially self-taught, he studied briefly at the University of Toronto and later at the Central University of Quito, Ecuador.

“Menagerie” offers a retrospective view of Tobar’s life through a mixture of faces and scenes depicting Ecuador, his immigration to the U.S. in 1985, and a reaction to current social issues. “I’ve never painted dreams,” Tobar said. “I try to be realistic and portray the simple, the ordinary. It is there that I have found true beauty and a message that is urging me to convey.”

**New Mexico State Student Gets National Recognition**

Celina Roa Millerd was featured as one of the nation’s top 100 Hispanic college students in *SuperOnida* magazine.

**A New Mexico State University second-year graduate student majoring in marriage and family therapy, Millerd has a 4.0 GPA. She is a single mother of two children, Rebecca, 13, and Michael, 10, who, she says, are learning too. “They are very responsible,” said Millerd. “They understand that Mom has homework too, and sometimes that means late nights at the computer lab.”**

As an undergraduate, Millerd earned a 3.85 GPA and received the Debra Orozco Memorial Hispanic scholarship. She also received the Public Service Company of New Mexico Hispanic Heritage scholarship. In 1999, she graduated as a Crimson Scholar and was selected as the Outstanding Hispanic Student Graduate in the family and consumer sciences department. Millerd also participated in the McNair program, a two-year federal program for undergraduate minority students planning to enroll as graduate students.

**Millersville Holds Events with Hispanic Themes**

Millersville University in Pennsylvania celebrated Hispanic/Latino culture with a lecture and exhibitions.

Dr. Miguel Díaz Barriga, professor of cultural anthropology at Swarthmore College, gave a lecture, “(Re)Locating Our Lady of Guadalupe to Pennsylvania: Narratives of Legal and Cultural Citizenship.” Millersville’s Ganzer Library held two exhibitions, “At the Edge of Empire: The U.S.-Mexico Border” and a display of paintings by Alfred Ortega, installations by Angel Suárez-Rosado, and photographs and prints by Patricia Villalobos Echeverría.

**CCNY Salutes Latino Graduates**

During the opening of the “Saluting Latino Graduates of City College” exhibition in the Archives and Special Collections of the Morris Raphael Cohen Library, a panel of distinguished City College of New York (CCNY) alumni spoke of how their college experience helped shape their careers. Pictured (l. to r.) are: Henry Arce, ’73, educator and recently Bronx borough deputy to the chancellor of the NY City Board of Education; Eduardo Cruz-López, ’75, Jersey City attorney now in general practice and earlier a public defender in Essex County, N.J.; and Ernesto Quiñones (see also page 42), ’95, former senior co-editor of the CCNY literary journal Promethean and author of the acclaimed novel *Bodega Dreams*, to be made into a film by Fox Searchlight Studio.

**Texas A&M-Corpus Christi to Get Research Center**

Proposed plans for a major Gulf of Mexico research center at Texas A&M University-Corpus Christi will become reality thanks to a private pledge from Edward H. Harte, former publisher of the *Corpus Christi Caller-Times* newspaper.

University President Dr. Robert R. Furgason told students, faculty, staff, and community leaders of Harte's $46 million pledge, one of the five largest donations ever given by an individual to a Texas university. Joining Furgason and Harte for the announcement were U.S. Rep. Solomon Ortiz and Texas Sen. Carlos Truan, who coordinated efforts to secure state and federal support and funding for the project.

The only comprehensive university on the Gulf, known for its coastal and environmental education and research, it has a productive history of collaborations and partnerships with both private industry and state and federal agencies and with Mexican universities, research institutions, and governmental agencies.

**Rhode Island Professor Wins Fulbright**

Gale Goodwin Gómez, an associate professor of anthropology with a joint appointment in educational studies at Rhode Island College, received a Fulbright scholarship and will lecture and conduct research in Brazil at the Federal University of Goias in Goiania.

She will teach a course in anthropological linguistics and continue her research in
literacy while studying the languages of the Yanomamí, natives in the northern part of the Amazon, along the Venezuela border. Goias has a specialization in indigenous languages.

A graduate of Florida Atlantic University, Goodwin Gómez holds a master’s degree from American University and a doctorate from Columbia.

Alvaro Heads National Association of Hispanic Journalists

NBC News producer Cecilia Alvaro, a native of the Galapagos Islands of Ecuador, is the new president of the National Association of Hispanic Journalists (NAHJ), succeeding Nancy Baca, special sections editor for the Albuquerque Journal who now serves on the board ex-officio. A member of NAHJ since the early 1980s, Alvaro was elected vice president of broadcast in 1996 and has represented NAHJ on the board of the Radio and Television News Directors Association for four years.

As a producer, Alvaro has covered major news stories—the wars in El Salvador and Nicaragua, the Mexico City earthquake, protests and elections in Chile and Argentina, two interviews with Fidel Castro, the Pan American Games in Havana, the Barcelona Olympics, the pope’s visit to Mexico, the Zapatista rebellion in Chiapas, the Colosio assassination, and many events affecting Los Angeles, Calif.

MiContacto Website Serves Hispanics

MiContacto, an online career development company for Latin and bilingual professionals, has launched HYPERLINK, a website at www.MiContacto.com.

The site is geared toward Hispanic professionals in the U.S. and offers job search tools and career resources in Spanish and English. Member features include résumé submission, job searches, online applications, and career resources. Membership to MiContacto.com is free of charge, but specialized services such as résumé critique and translation have added fees.

MiContacto leverages the speed, scope, and efficiency of the Internet in order to provide a direct exchange of information between job seekers and employers.

Cooper Union Shows Photos by Barros

In New York, The Cooper Union for the Advancement of Science and Art presented “Fifteen Years: Chelsea Hotel,” Rita Barros’ photo-documentation of the noted hotbed of bohemian New York culture.

Barros is a resident of Chelsea and her images have all the marks of an insider. Chelsea Hotel residents such as Gregory Corso, Dee Dee Ramone, and Virgil Thomson were photographed in their own apartments. Images of artists who used the Chelsea Hotel as a backdrop for film or video, such as Courtney Love, Bon Jovi, Woody Allen, and Quentin Crisp, were also included.

Repertorio Español’s Schedule Available Online

Repertorio Español, The Spanish Theatre Repertory (N.Y.), is available online at www.repertorio.org. The newly designed website offers interaction, production information, and reservations by e-mail. Study guides for Federico García Lorca, Yoces Nuevas, Chronicle of a Death Foretold, Casa Propia, and Caba Teatro: Abelardo Estorino can be downloaded and printed.

Repertorio Español, through its arts-in-education program ¡Dignidad!, introduces students to Hispanic culture, Spanish-language plays, and the art and craft of theatre. The ¡Dignidad! program instills many skills needed in today’s world: being articulate, confident, well-read, and able to work in a collaborative atmosphere.

Hispanic Enrollment up 13 Percent at UTPB

The University of Texas of the Permian Basin’s (UTPB’s) enrollment of Hispanic students is up 13 percent for the fall 2000 semester from fall 1999. Hispanic student enrollment, in fact, has risen 13 percent per year for the past five years. UTPB has made an effort to recruit a diverse student body that reflects the regional population. This year’s first-year-student group of Hispanics reflects an increase from 37 percent of the class to nearly half, closely mirroring the demographics of the region’s high school graduates.

UTPB’s total enrollment also increased 2 percent this fall while semester hours increased 4.3 percent. For many years, the University’s semester credit hours have surged ahead of the head count as more and more traditional, full-time graduates enroll.

NEIU Recognized by U.S. News & World Report

For the fourth consecutive year, U.S. News & World Report ranked Northeastern Illinois University (NEIU) as the most ethnically diverse university in the Midwest. The statistic was first included in the U.S. News rankings in 1997, and NEIU has had the number one position since.

"There is a national consensus emerging on diversity that is positive and strong," noted NEIU President Saline H. Steinberg. "As the publication Work-America noted, 'Diversity is just as much of an imperative in classrooms as it is in workplaces. Research shows that campuses that are more diverse tend to produce graduates with more problem-solving and communications skills.'"

Another publication, Black Issues in Higher Education, had NEIU graduating the largest number of Hispanic education majors in Illinois and ranking 16th in the nation.

Texas-Austin Business School Ranks High

The publication Hispanic Business ranked the McCombs School of Business at The University of Texas (UT)-Austin as having the third best master’s degree in business administration program in the nation for Hispanics. The school rose two spots from last year’s ranking.

The magazine ranks the top 10 business and law schools nationally based on criteria including enrollment of Hispanics, percentage of full-time Hispanic faculty members, availability of student support, retention rate, and national reputation. McCombs rated highly in all these areas. UT-Austin’s rate of Hispanic graduate enrollment, 15 percent, was the highest among the top three business schools.

Elissa Ellis, director of alumni relations, told Hispanic Business, "Our partnerships with other universities all over Latin America help fuel our diverse culture."
U.S. News & World Report ranked the McCombs School of Business’ MBA program 18th in the country, with the undergraduate program among the top five.

**Venezuelan Ballet Troupe Performs at DuPage**

Ballet Nacional de Caracas, a widely praised Venezuelan troupe, presented "Firebird" and "Pentimento" at the Arts Center at College of DuPage in Illinois.

A prolific story-ballet set to an Igor Stravinsky work, "Firebird" was choreographed by the troupe’s director, Vicente Nebrada. The contemporary ballet "Pentimento," set to excerpts from J.S. Bach’s "Four Suites for Orchestra," had dancers supplementing their moves with flowing fabrics.

The 45-member ballet company’s artistic site is the Teatro Teresa Carreño, located in Caracas, Venezuela, the hub of the nation’s performing arts. The troupe’s repertoire ranges from favorite classics to modern to near avant-garde ballets.

Nebraska, director since 1984, has staged works for the American Ballet Theatre, the Washington Ballet, the Ballet Hispanico of New York, the English National Ballet, the Berlin Opera Ballet, and the Essen Ballet.

**UTSA Gains in First-Time, First-Year Minority Students**

Enrollment at the University of Texas-San Antonio (UTSA) for the fall 2000 semester surpassed last fall’s totals. Tallies taken Sept. 14, the 12th class day, show 18,830 students taking 196,657 semester credit hours—a gain of 222 students or 1.19 percent. The total includes 16,487 undergraduates and 2,345 graduate students. The number of first-time first-year students went up a healthy 7.2 percent. UTSA officials credit enhanced recruitment efforts, more degree program offerings, and a package of innovative scholarship programs designed to attract new first-year students.

Minority students rose overall by 3.14 percent. At 54 percent of the total student body, they now comprise the majority at UTSA.

UTSA President Ricardo Romo (pictured) praised both EG&G Management Services of San Antonio and District 8 City Councilwoman Bonnie Conner for their work in establishing privately and publicly funded programs, respectively, to enable more local students to pursue an UTSA degree.

**Barrueco Performs at Manhattan School of Music**

The Augustine Guitar Series at the Manhattan School of Music in New York opened its seventh year with returning guest guitarist Manuel Barrueco, who performed at the event in 1997.

Barrueco began to play the guitar at age eight, attended the Esteban Salas Conservatory in his native Santiago de Cuba, and emigrated with his family to the United States in 1967, later completing his advanced studies at Peabody Conservatory in Baltimore, Md., where he now teaches.

Since his dazzling debut at Carnegie Hall in 1974, Barrueco has continually been described as a superb instrumentalist and an elegant musician with a seductive sound and uncommon lyrical gifts. He is firmly established as one of the most important guitarists in the world today.

**Wellesley Symposium Features Hispanic Scholars**

To commemorate Wellesley College’s (Mass.) 125th anniversary, the Spanish department held a symposium in October, "Exiles, Builders, and Visionaries. Wellesley and Spain: 125 Years of Synergy."

Conducted almost entirely in Spanish, the event featured many prominent Hispanic scholars, including Jaime Salinas (pictured), Rosa Montero, and Claudio Guillen.

**UNM Ortiz Center Celebrates Grand Opening**

The University of New Mexico Alfonso Ortiz Center held its grand opening at the Maxwell Museum of Anthropology. Festivities included Mexican folk dances by Baila! Baila!, San Juan Pueblo dancers, the music of Hector Pimental, Steve Chavez on the marimbas, a bread-making demonstration in a bee hive oven by Mary Jane Edaakie from Isleta Pueblo, Erika Gerety’s Celtic music ensemble, and a special presentation by historian Fred Hoxie.

The Ortiz Center honors Alfonso Ortiz (1939-1997), an internationally renowned Pueblo anthropologist who throughout his career remained committed to higher education for diverse, traditional, and nontraditional students, to public scholarship and service, and to the humanities as a significant part of anthropology. The Center’s mission is to reconfigure, strengthen, and augment existing resources to support academic and community humanities programs for teaching, learning, and communicating public scholarship and collaborative stewardship in general anthropology.

**Peruvian Students Enroll in CSUF Distance-Learning**

A joint agreement between California State University-Fullerton (CSUF) and St. Ignatius of Loyola in Lima, Peru, is allowing Peruvian graduate students to study for a master’s degree in business administration at CSUF while enrolled in the bulk of the necessary classes in Peru. CSUF’s most ambitious distance-learning effort to date uses state-of-the-art, two-way audio and video equipment to help deliver course sessions to Peru. CSUF faculty members also travel there to conduct some courses.

The program began in earnest this fall as students from Peru "met" their Fullerton classmates in a macroeconomic theory and policy course taught by Dr. Mortezah Rahmatian, professor of economics. "The first class sessions went very well," noted Rahmatian. "The connection and communication were excellent, and all the students seemed to be comfortable. Feedback was positive!"
Former Mt. SAC Student Headed to the White House

Prado, who now attends the University of Southern California, interned for the Democratic Party and the Gore 2000 campaign last spring and served his past summer as a member of the Democratic Party's White House Advance Team. He also helped coordinate the college volunteer effort for Gore during the primaries.

In high school, Prado was expelled during his junior year and then spent the next 16 years in and out of drug rehabilitation centers. He also spent two years in county jail. These days, the 35-year-old student/activist/grandfather (he has an 18-year-old daughter) can boast of having met an array of politicians and political activists, including Sen John McCain, Gov. Gray Davis, Mayor Richard Riordan, former President George Bush, actor Edward James Olmos, astronaut Buzz Aldrin, Vice President Gore, and—his biggest thrill of all—President Bill Clinton.

Rosado Opens Concert Series at New Jersey City

Concert guitarist Ana María Rosado, assistant professor of music and coordinator of guitar studies at New Jersey City University (NJCU), opened NJCU’s 2000-2001 Town and Gown concert series. Rosado was joined by Kurt Briggs, Renee Cometa, Lisa McKinney, Francesca Vanasco, and Lynne Vardaman in a recital of works by contemporary composers Benjamin Britten, Jas Freidlin, Andrew Charlton, and Mario Castelnuovo-Tedesco, and 19th-century composer François de Fossa.

Having performed and taught internationally, Rosado was once selected by legendary Spanish guitarist Andrés Segovia to perform in a concert given in his honor and has had works written for her by such composers as Rafael Aponte-Leede, Roque Cordero, David Fetherolf, Tania Leon, Amy Rubin, Francis Schwartz, and Edmundo Vásquez. She has a bachelor’s degree from the University of Puerto Rico and a master’s from the University of Paris VIII.

New Faculty Emeriti Named for Texas A&M-Kingsville

Retired professors Dr. Julia A. Smith (pictured), language and literature, and Dr. Carl E. Wood, biology, were designated professor emeriti at Texas A&M University-Kingsville. A person designated with emeritus rank is an individual who has made significant contributions to the university through long and distinguished service in administration, teaching research, and/or service.

A role model for younger women who aspire to become educators, Smith chaired the language and literature department from 1977-1983 and was named distinguished teacher in 1996. She has a bachelor’s degree from Our Lady of the Lake College and a master’s and doctorate from the University of Texas.

Twenty graduate students completed their degrees and research under Wood’s direction. He chaired the biology department from 1980-1992 and was the first assistant dean of arts and sciences from 1995-1999. He was elected fellow in the Texas Academy of Science for distinguished service in 1993. He has a bachelor’s degree, a master’s and a doctorate, all from Texas A&M University.

Quiñónez Weaves Tale at LIU-Brooklyn

Of Puerto Rican and Ecuadorian descent, writer Ernesto Quiñónez read from his work at Long Island University-Brooklyn during the English department’s multicultural “Voices of the Rainbow” poetry and fiction reading series.

Quiñónez’ (see also page 39) is the author of Bodega Dreams, a novel set in El Barrio, Spanish Harlem, where he spent his childhood. Raised by a Communist father and a Jehovah’s Witness mother, the author explores how ethnicity and religion are central to and coexist in the Latino community of Spanish Harlem. Named one of the Village Voice’s “Writer’s on the Verge” last year, his work has been described as “galvanizing” and “shrewd” by critics.

Little-Known Culture Explored at Moraine Valley

The exhibition “Creativity and Resistance: Maroon Cultures in the Americas” provided students and faculty at Moraine Valley Community College in Illinois an opportunity to learn the history of a little-known culture.

“Creativity and Resistance” told the story of African slaves brought to the Caribbean who escaped to freedom and created a new culture as a result. The panel exhibition featured historical drawings and maps, a timeline, contemporary photographs, and a selection of ceremonial and daily life objects.

The exhibition was part of the college’s continuing effort to provide educational experiences that probe global issues. “We have a very diverse population,” explained Sylvia Jenkins, associate professor/department chair, Library/Learning Resources Center. “In a sense, everyone in our district is an immigrant. This exhibit examines the ideas of displacement and diversity.”

Fort Worth’s Hispanic Wellness Fair a Success

The second annual Hispanic Wellness Fair in Fort Worth, Texas, sponsored by The University of North Texas (UNT) Health Science Center, attracted more than 3,700 people, nearly four times last year’s attendance. UNT Health Science Center’s Bob Galvan, associate dean in the School of Public Health, and Adela Gonzales, vice president of strategic and institutional affairs, co-chairs the Fair’s planning committee.

There were 90 local health providers, including the Tarrant County Public Health Department, JPS Health Network, All Saints Hospital, the American Cancer Society, and the American Heart Association. Harris Methodist Hospital conducted 357 screenings for diabetes and 348 for cholesterol, and 231 blood pressure screenings, 20 mammograms, 14 prostate exams, and 88 HIV tests were reported. Prevent Blindness of Texas screened 333 adults and children for vision problems and glaucoma. Four hundred children were immunized, and many received dental screenings. Other services offered were body fat analysis, mental health information, a blood drive, and a bone marrow drive.
Monmouth Launches Public Servant in Residence Program

New Jersey Senate Majority Leader John O. Bennett, III, is the inaugural appointment to the Monmouth University (N.J.) public servant in residence program in the political science department for the year 2000-2001.

The program was created to provide a venue for public officials to share their expertise with students. One public servant will be appointed each academic year and listed as an adjunct faculty member in the political science and philosophy department. The public servant will be expected to either teach one course per semester or give several public lectures or participate in on-campus classes at the invitation of faculty.

Wright State Professor Drafts Water Regulations for Brazil

A biology professor from Wright State University (Ohio) has been helping to draft new regulations that will make Brazil the first country in the world to regulate cyanobacteria—better known as blue-green algae—in its drinking water.

It has been more than four years since Dr. Wayne Carmichael discovered that cyanobacteria was responsible for the mysterious deaths of 55 Brazilians. The first known human deaths attributable to these toxins, the victims were hemodialysis patients treated with contaminated water.

Now, Carmichael, together with representatives from the Brazilian Federal Ministry of Health, the Pan-American Health Organization, the Brazilian water industry, and other university researchers, will revise the drinking water guidelines and regulations for the more than 165 million people of Brazil. Just as our EPA monitors drinking water in the U.S., the Brazilian group sets new standards every 10 years. Carmichael will act as the international advisor for the group concerned specifically with contamination by toxic cyanobacteria.

Hispanic Engineers Honor San José State Professor

George Castro, associate dean for the College of Science at San José State University in California, was inducted into the Hispanic Engineer National Achievement Awards Conference (HENAAC) Hall of Fame at a ceremony in Texas.

Castro was recognized for his technical contributions to science and for his community service. Among his many accomplishments is national recognition from the White House when, last year, he received the Presidential Award for Excellence in Science, Mathematics, and Engineering Mentoring.

The mission of the HENAAC Hall of Fame is to recognize the outstanding achievements of Hispanics in science, engineering, and technology, and to help create a more diverse and professional technical workforce.

Texas A&M-Corpus Christi Celebrates Day of the Dead

The Texas A&M University-Corpus Christi office of multicultural programs, led by coordinator Lucy Torres, in collaboration with the Mexican Consulate, Amigos de Mexico, and the Amigos student organization, set up ceremonial altars for the Day of All Saints and the Day of all Souls, a two-day period often referred to in Mexico as El dia de los muertos. The altars consisted in part of offerings or ofrendas solicited from faculty, staff, students, and the general public in honor of close friends or relatives no longer alive.

Dr. Leonardo Carrillo (pictured), director of international programs and a featured speaker, said that the Day of the Dead celebrations, far from being the Mexican counterpart to our Halloween, are, in fact, ceremonial acts of gratitude for having survived the evil influences of the Halloween celebration, which is considered a pagan ceremony in many countries.

Cortes-Fuentes Attains Position with San Francisco Theological Seminary

The San Francisco Theological Seminary (SFTS) board of trustees appointed the Rev. Dr. David Cortes-Fuentes as the first director of academic services for the SFTS/Southern California programs. He is also assistant professor of New Testament.

Cortes-Fuentes brings richly varied teaching and administrative experience from seminaries and churches in the U.S. as well as from the Inter-American University in Puerto Rico. Most recently, he was the Hispanic ministries program director for McCormick Theological Seminary in Chicago, Ill. He has a doctorate in New Testament from Northwestern University/Garrett-Evangelical Seminary.

Cal State L.A. Names Robles Bautzer Faculty

Carlos Robles, professor of biology and microbiology at California State University-Los Angeles, was named the University's fifth Bautzer Faculty. The Bautzer Faculty University Advancement Award enables faculty to learn more about professional university development at national conferences and Cal State University workshops throughout the year.

Robles directs the newly formed Center for Environmental Analysis, the first of its kind funded by the National Science Foundation on the West Coast. "As the lead spokesperson for the Center, Dr. Robles has a keen interest in learning more about institutional advancement and fundraising so that he can participate successfully in securing private external support," said Kyle Button, vice president for institutional advancement at Cal State L.A.

Robles became Cal State L.A. professor of biology in 1988. He has a doctorate from the University of California-Berkeley.

Western Michigan Presentations Spotlight Hispanic Families

In Michigan, issues facing Hispanic families were in the spotlight throughout a series of presentations co-sponsored by Western Michigan University (WMU)—featuring a noted authority on the counseling of Hispanic and Latino families.

Dr. María Flores, executive director of the Marriage and Family Institute of San Antonio, was the featured speaker during the three-day event. A member of the clinical faculty at the University of Texas Health Science Center of San Antonio, Flores is an approved supervisor and clinical member of the American Association for Marriage and Family Therapy, and a member of the American Family Therapy Academy. Nationally, she is a frequent presenter of topics related to the particular needs of the Hispanic and Latino community. She has published several articles in major marriage and family therapy journals and is co-editor of a new book, *Family Therapy with Hispanics: Toward Appreciating Diversity*.

**Syracuse Announces Graduate-Level Fellowship and Internship Program for Minorities**

Syracuse University’s Newhouse School of Public Communications is now accepting applications for a master’s-level fellowship and internship program in newspaper journalism for members of underrepresented groups. The application deadline is February 10, 2001, and candidates should take the Graduate Record Examination (GRE) no later than February 1, 2001.

Further information is available by calling Nancy Weatherly Sharp, professor and assistant dean for graduate professional studies, at (315) 443-1124 or by e-mailing her at nwsharp@syr.edu.

The program is jointly funded by the Newhouse Foundation and Syracuse University. Fellows receive free tuition, a monthly stipend, health insurance coverage, moving expenses, and much more.

**Latin Looks: Images of Latinos and Latinos in the U.S. Media**

Clara E. Rodriguez, ed.

This book brings together interesting and analytically sophisticated writing on how Latinos have been portrayed in movies, television, and other media since the early years of the 20th century and how images have changed over time in response to social and political change. Particular emphasis is given to representations of class, gender, color, race, and, the political relationship between the U.S. and Latin America.

**Latina Realities: Essays on Healing, Migration, and Sexuality**

By Oliva M. Espin

These essays emphasize psychology’s role “as a means of human welfare,” the complexities of the psychological development of immigrant women, Latinas, and other women of color, and issues relevant to providing psychological services to them. They cover issues of method, sexuality, therapy with Latinas and other women of color, immigrant and refugee women, ethnic-minority and immigrant women of diverse sexual orientations, and theoretical perspectives on feminist psychology and diversity.

**The Future of Latino Independent Media: A NAIP Sourcebook**

Chon A. Noriega, ed.

Despite the growth of the Latino community in the U.S., Latinos have entered the 21st century with lower levels of media representation than when protests first raised the issue in the 1960s. Latinos are the most underrepresented of all minority groups in film and television. This publication addresses this dire situation by collecting information from the landmark 1999 Latino Producers Conference, the first national gathering on Latino independent media since the 1970s.

**The Cultural Labyrinth of María de Zayas**

By Marina S. Brownlee

A 17th-century writer of sensationalist short stories, María de Zayas was a best-selling author, steeped in the novella traditions of Italy and France as well as her native Spain. At the same time, she was an important player in the tabloid craze sweeping over the Europe of her day. This book recontextualizes María de Zayas and provides a reading of her work from the double perspective of narratology and feminism.

**Access Denied: Race, Ethnicity, and the Scientific Enterprise**

George Campbell Jr., Ronni Denes, and Catherine Morrison, eds.

Developed and edited at NACME (the National Action Council for Minorities in Engineering), this book by leading scholars...
focuses on the policies and practices that have excluded nearly one-third of the population—Latinos, African Americans, and American Indians—from the rapidly growing technical workforce. It is based on the 1995 ACME Research and Policy Conference on Minorities in Science, Engineering and Mathematics, which came about in response to the alarming growth of anti-affirmative action groups in the mid-1990s.

Voices from Exile: Violence and Survival in Modern Maya History
By Victor Montejo

Thousands of Mayas who have fled their homelands in Guatemala to escape severe repression and death at the hands of their government are in a condition of "exile" or "Mayaess." In this book, Victor Montejo, who is both a Maya ex-pat and an anthropologist, tells the story of those who until now have struggled in silence—but who have nevertheless found ways to reaffirm and celebrate their "Mayaess."

The Kachina and the Cross: Indians and Spaniards in the Early Southwest
By Carroll L. Riley

This book weaves elements of archaeology, history, and anthropology to tell a dramatic story of conflict in the 17th century. Carroll Riley delves into the strained relationship between Spaniards and Native Americans in the New Mexico province.

Spain: A History
Raymond Carr, ed.

From the moment when the imposition of Roman rule created the notion of Hispania as a single entity, Spain has played a significant part in the evolution of the Western world. This book highlights the personalities and notable trends of each era in the last two thousand years of its history.

Does Business Learn?: Tax Breaks, Uncertainty, and Political Strategies
By Sandra I. Suárez

Firms in the U.S. are the best-represented group in Washington D.C.; they operate more political action committees, and their lobbyists are among the most experienced political operatives. Yet firms are uncertain about their political power. This book looks at the efforts corporations make to influence government policy.

Break-ins, Death Threats and the FBI: The Covert War Against the Central American Movement
By Ross Gellspan

The core of this book, written by a Pulitzer Prize-winning investigative journalist, documents the wide-ranging FBI assault on CISPES (the Committee in Solidarity with the People of El Salvador).

Storm Signals: Structural Adjustment and Development Alternatives in the Caribbean
By Kathy McAfee

Through interviews with farmers, NGOs, and government and international agency officials, Kathy McAfee conveys the vitality of the region's popular movements, pinpointing the policies—national and international—that threaten to block promising initiatives, and proposes constructive policy alternatives.

Universities in the Business of Repression: The Academic-Military-Industrial Complex in Central America
By Jonathan Feldman

This is an essential guide for students and academics seeking to expose university complicity with militarism and repression in the Third World.

Doña Licha's Island: Modern Colonialism in Puerto Rico
By Alfredo López

Alfredo López examines the history of Puerto Rico from the extermination of the native Taíno population, the importation of African slaves, and Spanish colonial culture, to the 1980s movements for labor, student, and women's rights, and the debates over statehood or independence.

Mothers of the Disappeared
By Jo Fisher

During the years of military rule in Argentina (1976-83), thousands of people disappeared without a trace. As repression intensified, the Madres de Plaza de Mayo took to the streets in protest. With astonishing courage, they risked their lives to demonstrate, holding placards with pictures of their “lost” children, demanding their return.

College Basketball’s National Championships: The Complete Record of Every Tournament Ever Played
By Morgan G. Brenner

No college sports event draws as much attention or inspires as much insanity as the three weeks of “March Madness,” when the NCAA Division 1 Men’s Basketball tournament whittles 64 of college basketball’s best teams into one national champion. But it’s not the only tournament. This book details 493 national championship tournaments since 1937 plus 105 additional quasi-national championship tournaments.

Many publications featured in this section are available through amazon.com.

CONFERENCES
National Association of Student Personnel Administrators Institute
January 10-12

Contact: (202) 265-7500; e-mail, office@naspa.org.

NCCJ - Dr. Martin Luther King, Jr.
“All People’s Breakfast”
January 15

The 13th annual “All People’s Breakfast,” sponsored by The National Conference for Community and Justice, has as its theme this year “Creating the Beloved Community” and convenes at 7:30 a.m. in the Golden Hall, San Diego Concourse, San Diego, Calif.

Contact: (619) 491-3111

NALAC Conference
January 17-21

Texas A&M University-Corpus Christi will help host a conference of the National Association of Latino Arts and Culture (NALAC), dedicated to defining the role of Hispanic art in the community. At the Ramada Inn Bayfront in Corpus Christi.

Workshops are scheduled on leadership and youth, the impact of immigration, assimilation and hybridization, and digital technology. There will be performances, readings, and exhibits throughout the conference, along with workshops in dance, music, theater, visual arts, literature, performance art, and media arts.

Contact: Lilly Flores Janacek, (361) 883-2427.

AAHE Conference on Faculty Roles & Rewards
February 1-4

This 9th annual conference will focus on the changing professoriate and the two developments most salient in driving that change—new technologies and the generational shift now taking place in the faculty. At the Tampa Marriott Waterside in Tampa, Fla.

USC Continuing Education 2001 National Conference
February 11-14

University of South Carolina’s department of continuing education presents “Stop Surfing, Start Teaching: Teaching and Learning through the Internet.” In Myrtle Beach, S.C.

ACE 83rd Annual Meeting
February 17-20

The American Council on Education will meet on “Shaping Public Policy with New Leaders.” At Marriott Wardman, Park Hotel, Washington, D.C.

Contact: (202) 939-9410; website, www.acenet.edu.

AACE 12th International Conference
March 5-10

The Association for the Advancement of Computing in Education presents the Society for Information Technology and Teacher Education 2001 12th international conference. In Orlando, Florida.

Contact: e-mail, info@aace.org; website, www.aace.org/conf.

2001 ASCD Annual Conference and Exhibit Show
March 17-19

Among the Distinguished Lecturers at this year’s conference of the Association for Supervision and Curriculum Development will be Jaime Escalante. The conference theme is “Reaching for Balance: Resolving Educational Dilemmas.” In Boston.

AAHE 2001 National Conference on Higher Education
March 24-27

The American Association for Higher Education presents “Balancing Private Gain and Public Good.” The conference will anticipate issues, debate ideas, highlight innovation and best practice, foster leadership and professional development, and provide networking opportunities. At the Marriott Wardman Park Hotel in Washington, D.C.

National Association for Ethnic Studies Annual Conference
March 29-31
This year’s conference theme: “Race, Ethnicity, and Pedagogy in the 21st Century.”
In New Orleans.

Contact: Susan L. Rockwell, (602) 965-2897; e-mail, susan.rockwell@asu.edu.

International Mentoring Association Annual Conference
March 29-31

This year’s conference theme: “Diversity in Mentoring.” In Washington, D.C.

Contact: at Western Michigan University, (616) 387-4174.

NCA-CHE 106th Annual Meeting
March 31-April 2

The North Central Association of Colleges and Schools/Commission on Institutions of Higher Education presents “Serving the Common Good: New Designs in Higher Education.” At the Hyatt Regency Chicago Hotel in Chicago, III.

Center for the Study of Diversity in Teaching and Learning in Higher Education National Conference
April 18-21

“The Global Perspective: Teaching, Learning, and Student Equity” includes among other conference highlights concurrent sessions on critical thinking skills, curriculum, pedagogy, collaborative and interdisciplinary learning, and learning communities. At Hotel Inter-Continental, Miami.

Contact: Dr. Toni Forsyth, (408) 864-8909/8993; website, www.teachlearn.edu.

NISOD 2001
May 27-30

The National Institute for Staff and Organizational Development, along with the Community College Leadership Program, present their 23rd annual international conference, “Making a World of Difference...” “A unique mix of professional development activities for a unique audience of outstanding community college administrators and faculty.” In Austin, Texas.

Contact: John Rouche and/or Suanne Rouche, (512) 471-7545.

SUMMER 2001

Center For International Studies

MADERID - SPAIN

Scholarship Program

for Teachers, Counselors & School Administrators

Three or six weeks of intensive Spanish language study from July 5 to July 26, 2001, or July 5 to August 16, 2001, at the Center for International Studies in Madrid, Spain.

Includes: round trip airfare, instruction, three meals a day and room accommodations at Colegio Mayor Santa Maria de Europa of Universidad Complutense of Madrid. From: $1,999.

For information, Write or Fax your request to:

Center for International Studies
42-32 De Bruin Drive
P.O. Box 451
Fair Lawn, NJ 07410-0451

Tel.: (201) 845-9744
Fax: (201) 368-0433

BOSTON COLLEGE - POSITION AVAILABLE

Director, Career Center

Reporting to the Vice President of Student Affairs, the Director of the Career Center leads a staff of 15 professional and support staff members in providing career development services to the University’s undergraduate and graduate student population and alumni. Direct outreach and marketing on campus and to employers. Oversees the personnel, budgetary, and operational functions of the department. Develops a vision of the future of the Career Center and work with staff to define necessary goals and objectives. Develops a job development strategy for companies that do not typically recruit on campus or both internships and full-time employment. Manages a complex department with a budget of approximately $600,000. Direct the implementation of a comprehensive technology strategy for the Career Center. Develop and foster collaborative working relationships with faculty, Academic Deans, the Director of Graduate Career Services in the Carroll School of Management, Student Affairs Directors, and student leaders to establish services to meet constituent needs. Provide career advising assistance to undergraduates, graduate students, and alumni from all disciplines. Work with alumni leadership, Parents Council, and Wall Street Council leadership to expand networking, internship, and full-time employment opportunities.

Requirements:
- Master's degree in counseling, higher education, or business.
- 8-10 years progressively responsible experience in college or university career center.
- Demonstrated ability to provide vision, leadership, and technical expertise to create, implement, and direct programmatic efforts of a seasoned staff.
- Understanding of role and value of liberal arts education.
- Significant leadership, supervisory, and managerial experience.
- Working knowledge of application of state-of-the-art technology to career planning and placement.

Founded in 1865, Boston College is one of 28 Jesuit colleges and universities in the United States, with a full-time and part-time enrollment of over 14,000 men and women. The University consists of 11 schools, colleges, and institutes offering 13 degree programs and one certification program. Faculty and staff number in excess of 2,600.

Located only a few miles from Boston, the University has the advantage of proximity to a large metropolitan center and direct access by public transportation, while at the same time enjoying a 110-acre site in Chestnut Hill, MA. A second attractive campus in Newton, MA is just over a mile away.

Boston College is an Affirmative Action/Equal Opportunity Employer.

12/18/2000 0 HISPANIC OUTLOOK 579
Book Review

By Humberto López Cruz

The last book published by Cuban writer Gustavo Pérez Firmat, Cincuenta lecciones de exilio y desexilio, might be considered a conscientious summary of some of his previous writings. The author of Life on the Hyphen: The Cuban-American Way (1994) and Next Year in Cuba (1995) condenses his experiences in the continuous clash between two cultures. Pérez Firmat attempts to explain the exile’s quest for self-affirmation in society, but most importantly, he offers a sound perspective on that fictitious yet extremely real space—for many considered a state of cultural limbo—found in the forced intersection of the Cuban and American cultures.

Pérez Firmat’s prose might very well fit the mold of any immigrants, any exiles who must come to terms with themselves in order to understand society. Through the narrator’s constant pursuit of self-identity, the reader realizes that no one in a similar situation may belong to either world: the exile’s hybrid essence is what dictates behavior, and the exile’s nostalgia is not for a lost land but for the ability to find his space in his preconceived world.

The book offers fifty chapters or lessons. There are lessons of exile and “unease” in which Pérez Firmat confronts his reality, juxtaposing it against scenes from his past. The reader soon discovers, however, that the overlapping of thought occurs not with images of a vanished past but with vignettes of desired remembrances, memories that developed from the embryo of his candid imagination wishing for a past to help him understand his present.

The lessons vary in length and format. Some start with an isolated concept that takes root and develops into a well-structured thought, others might constitute a poem, an idea, an anecdote, or a simple expression of humor. Cuba, and its imaginary space within American soil, is the common denominator of a fifty-element equation now disguised as lessons, perhaps not so much for the reader’s benefit but for the author himself.

One important aspect is the reader’s perception that the text, even if written in Spanish, belongs to someone who masters both languages. Pérez Firmat mentions that Cubans exist in two languages, a concept that extends to all foreigners on American soil. The text must reflect a bicultural individual who eventually realizes, like so many political immigrants, that his country resides in his heart, in his thoughts, in his memories. It is a matter of writing the nation; the inscription dethrones the idea of conquering it since the past is no longer a possibility. The words will stand a much better chance of sur-

vival. If there are no words, there is oblivion (Lessons XXXI, XL).

Another subtle aspect is Pérez Firmat’s resistance to admitting to his gradual assimilation. The American way of life claims its space and its consequences. The acculturation takes place; the language and the environment mold the core of an individual. Pérez Firmat concurs that a language is a lens through which we look and see ourselves (Lesson XVII) and, most importantly, affirms that a language defines a place (Lesson V). He ratifies his bilingual enunciate since his literary production has been written in both English and Spanish. Pérez Firmat—the exiled, the emigrant—defines the world he sees in a combination of languages that allows him to belong to either side of the hyphen, yearning, though, for the green of the other pasture while residing completely in one.

After this expedition through fifty islands—an effort to locate Cuba—the author does not return defeated but satisfied, even though he has not found an island that looks like his. The objects observed in his study room as the text began—objects that had taken Spanish names in an effort to create a virtual reality—slowly regain their names in English: after a tempestuous flood, the waters return to their river bed, knowing that is where they belong. Pérez Firmat returns to his American wife, to his almost completely Americanized children—who talk about Cuba and their parents’ past in English—to his American everyday life in which Cuba is a daily remembrance reflected in the image of his mirror.

We, the readers, along with the author, have learned the best lesson: our country resides within us, and the host land is definitely part of us, as much, perhaps, as our own country of origin. We are living examples of the hybrid America; to negate it would be erroneous, and worse, it would deny our presence in today’s society. Pérez Firmat has given us this text, on his 50th birthday, to rethink ourselves within a multilingual and multiethnic society where there is a real space for each and every one of us.

Dr. López teaches Spanish at the University of Central Florida. He specializes in Caribbean and Central American literatures, as well as Hispanic literature in the U.S. López edits SELA, South Eastern Latin Americanist, and directs the Foreign Language Media Center at UCF.

If interested in submitting a book review, please e-mail us at outlook@aol.com for Book Reviewers’ Guidelines.
HARVARD FELLOWS ON RACE, CULTURE, AND EDUCATION

The Harvard Graduate School of Education (HGSE) invites applications from scholars for a two year residential postdoctoral fellowship. In particular, we encourage applications from recent Ph.D.s or Ed.D.s who are members of ethnic minority groups that are underrepresented in American universities. Special consideration will be given to applicants who show commitment to careers in university research and teaching related to the improvement of education, and whose life experiences and research will contribute to diversity and excellence at the School. We particularly encourage applications from individuals in fields such as, but not limited to: law and education; community and schools; immigration and bilingual education; early childhood education; risk and resilience; philosophy of education; curriculum, pedagogy, and learning theory; the teaching of science; the teaching of mathematics.

THE PROGRAM

Two fellows will be chosen for residence at HGSE during both academic years 2001-02 and 2002-03. The fellows will participate in a bi-weekly year-long seminar, led by a senior member of the HGSE faculty, that will provide a forum for presentation and critique of their research and writing, and discussion of issues related to their professional development and career opportunities. Fellows will teach one course during each of the two academic years, and will give an annual public lecture to the HGSE community about their research.

Applicants will select a senior member of the HGSE faculty who will serve as their mentor during their tenure in the fellowship program. Mentors will meet on a regular basis with the fellows.

Stipend and Allowances

Fellows will receive an annual stipend of $40,000 plus a housing supplement. Fellows will be eligible for a travel supplement of up to $500 each year for participation in professional conferences, and up to $3,000 per fellowship for course development activities.

APPLICATION PROCEDURES AND ELIGIBILITY REQUIREMENTS

Applicants must be within a year of receiving their Ph.D. or Ed.D.; their degree must be completed by September 2001 when their residency will begin. Applicants should send a letter of application which includes the following elements: a proposal for a two year plan of research and teaching that identifies a senior member of the HGSE faculty who might serve as a mentor and provides a rationale for the selection of mentor that links the applicant’s work to that of the faculty member. The applicant’s statement should offer a detailed account of his/her proposed research and its relationship to the field of education. Two examples of academic writing and three letters of reference from individuals who are knowledgeable about the applicant’s academic work must be included (reference letters may be mailed separately).

DEADLINE

All application materials must be received by no later than January 12, 2001, at the following address:

Professor Sara Lawrence-Lightfoot
Chair, Harvard Fellows on Race, Culture, and Education
C/O Gil Keeley
Harvard Graduate School of Education
122 Longfellow Hall
Cambridge, MA 02138

Applications from women and minority candidates are strongly encouraged; Harvard University is an affirmative action EEOC institution.

CALIFORNIA STATE UNIVERSITY, SACRAMENTO
THE CENTER FOR CALIFORNIA STUDIES

Public Policy Fellowships in California

The California Center, a 11-month public policy fellowship with the State of California, offers college graduates unique experiences in policy-making and development. Fellows work as full-time staff assistants to senior executive branch staff, judicial administration officials, members of the California Senate and Assembly, and legislative policy committees. Fellows gain firsthand experience in governing the most diverse state in the nation and a sense of personal involvement in the leadership of California society.

For more information and application materials, contact the Center for California Studies at: (916) 278-6906, via e-mail at: calstudies@csus.edu, or visit our website at: www.csus.edu/calst. Applications for the Judicial Administration program must be postmarked by February 9, 2001. Applications for the Executive, Senate, and Assembly programs must be postmarked by February 28, 2001.

DOCTORAL FELLOWSHIPS
For African American and Hispanic Students

MAGNET DOCTORAL FELLOWSHIPS
To encourage African American and Hispanic (Latino/a) students to pursue academic careers, fellowships are awarded to provide support for these students under the Minority Access/Graduate Networking (MAGNET) Program at The Graduate Center of The City University of New York.

Four-year fellowships are offered to entering students in any of the 32 doctoral programs at CUNY. Awards are contingent upon acceptance into a program and satisfactory progress. Applicants must be U.S. citizens or permanent residents. Stipends are $16,000 per year plus full tuition. Fellows meet monthly for academic discussions, mentoring, and peer support.

NATIONAL SCIENCE FOUNDATION/ALLIANCES FOR GRADUATE EDUCATION AND THE PROFESSORATE (NSF/AGEP)
A two-year NSF/AGEP fellowship is offered through the MAGNET program to African American and Hispanic (Latino/a) students entering a doctoral program in Sciences, Engineering, Mathematics, or Computer Science at The Graduate Center of The City University of New York.

NSF/AGEP fellowships will supplement existing CUNY financial support, in addition to granting full tuition remission for two years. Continued financial and academic support will be made for up to six years by CUNY. Renewal is contingent upon satisfactory academic progress. Candidates (who must be U.S. citizens or permanent residents) will be considered on the basis of demonstrated financial need and academic performance in one of the above areas.

For applications, contact: Office of Educational Opportunity & Diversity Programs, CUNY Graduate Center, 365 Fifth Avenue, New York, NY 10016; 212/671-7540; e-mail: OEDPmail@cuny.edu; http://web.gc.cuny.edu/oedp.

The Cooperative Grants Program
INCENTIVE GRANTS
Deadline: March 1, 2001

The Cooperative Grants Program (COOP) of NAFSA: Association of International Educators invites proposals for Incentive Grants-awards of $2,001 to $6,000 for non-academic U.S. campus and community-based activities that involve international and/or U.S. study abroad students. Proposals may be submitted by institutions of higher education and non-profit organizations in the United States and U.S. territories. COOP is particularly interested in receiving proposals from minority-serving institutions, community organizations, and two-year community colleges.

For further information; an application packet, including guidelines, restrictions, and forms; and grant writing resources, visit COOP online or contact COOP staff. COOP Grants are made available through funding from the U.S. Department of State's Bureau of Educational and Cultural Affairs.

Department of Psychology
University of Denver
Denver CO 80208

The University of Denver is committed to enhancing the diversity of its faculty and staff and encourages applications particularly from women, minorities, veterans, and people with disabilities.
RICHARD STOCKTON COLLEGE
OF NEW JERSEY

HOSPITALITY MANAGEMENT

The Richard Stockton College of New Jersey is located 12 miles west of Atlantic City, and is surrounded by 1600 acres of southeastern New Jersey Pinelands. It is also within 20 miles of Atlantic City and near 120 miles of resort coastline. It is a four-year undergraduate institution and has received national recognition for its distinctive academic programs and interdisciplinary approach to learning. Stockton’s diverse faculty and student body combine a spirit of innovation with a sense of tradition for academic excellence.

We are seeking a new colleague with research and scholarly interests in the impact of daily activities on promoting the hospitality management program. Academic background in a discipline related to the industry and scholarly commitment that will contribute to the study of the hospitality industry is critical. The Hospitality Management Program is a new track within the Business Studies Program. The Business Program has a strong curriculum in all the major concentrations with over twenty full-time faculty members.

Duties: This is a tenure track, 10-month appointment with responsibility for teaching content and supporting issues specifically in hotel management, housekeeping, and casino management with either physical plant management or hospitality marketing as the other content area. Responsibilities will include research, grant writing, and supervision of students’ research projects. Other academic responsibilities will include student advising, supervision of hospitality internships, participation in Division activities and teaching in a general study area.

Requirements: Qualifications include an earned doctorate in hospitality management or related field, evidence of scholarly productivity, potential to establish partnerships with industry in providing support for the program with resources necessary for program excellence. Record of scholarship and grant writing highly desirable. Qualified applicants will have an earned doctoral degree in a related field. Appointment will be as Asst./Assoc. Professor depending on qualifications and experience. Candidates for Associate Professor must hold a terminal degree and be outstanding in the field with considerable experience. Candidates for Assistant Professor must hold a terminal degree. Salary commensurate with qualifications and experience.

Screening begins January 15, 2001 and will continue until position is filled. To apply, send letter of application, resume and three letters of reference to:

Dr. Dee Henderson
Dean of Professional Studies
The Richard Stockton College of NJ
AAS1, P.O. Box 195
Pomona, NJ 08240

Visit our website - www.stockton.edu.

Stockton is an AA/EOE. Women and Minorities are encouraged to apply.

52 HISPANIC OUTLOOK  O  12/18/2000
COLLEGE OF EDUCATION

The Ohio State University has identified the reform of education as one of its highest priorities and the College of Education is at the forefront of addressing this challenge. In addition to 11 programs in three schools, The College houses five centers, has a highly productive faculty with several nationally and internationally recognized scholars, and secures approximately $14 million annually in outside funding.

The College values scholarship with impact and influence and is committed to preparing the finest educators and educational leaders for urban schools and communities. The College has numerous partnerships with schools, communities, foundations, and federal and state governments focused on improving student learning and the professional development of educators. It also provides its graduates with sustained and experienced experiences in urban schools and communities.

The College is committed to recruiting and retaining a diverse faculty, staff, and student body. Persons of diverse ethnic backgrounds make up 20 percent of the 135-member faculty, and 13 percent of the student body. The University and the College each have diversity plans dedicated to attracting and retaining a diverse population of students, faculty, and staff. We are announcing the availability of eight faculty positions across three Schools.

The School of Teaching and Learning (3 positions)

Literacy, Assistant or Associate Professor

A faculty colleague to provide leadership for early literacy, teaches early literacy and word study courses at undergraduate and graduate levels, advises graduate students, conducts research, and provides service to the University and community. The successful candidate will have a doctoral degree in literacy or related field; three years of public school teaching experience or an equivalent; and record of research and scholarly contributions in literacy. Experience in a teacher preparation program is desired, as is the expertise in word study and an ability to support children's literature and/or drama in education.

Foreign & Second Language Education, Assistant or Associate Professor

A faculty colleague to provide leadership for foreign and second language education; teaches courses in foreign and second language education; advises master's and doctoral students; contributes to scholarship in foreign and second language education; and works with colleagues on initiatives involving partnerships with schools and other educational agencies. The successful candidate will have a doctoral degree in foreign and second language education or related field; record of research preferably in second language education; experience teaching graduate students; three years language teaching experience in public schools or an equivalent; and experience in teacher preparation programs.

Literacy, Assistant Professor

A faculty colleague to teach courses in middle childhood teacher preparation program for integrated language arts. Integrates technology in teaching; advises master's and doctoral students; and provides service to the University and community. The successful candidate will have a doctoral degree in literacy or related field and three years public school teaching experience or an equivalent. Desired is a research focus in urban settings, experience in a teacher preparation program, expertise in middle childhood language arts, and an ability to support children's literature and/or drama in education.

The School of Educational Policy and Leadership (3 positions)

Educational Policy, Professor or Associate Professor

A senior faculty colleague to develop and provide leadership for education policy. Provides intellectual and programmatic leadership for policy related initiatives, develops and undertakes policy analysis and evaluation with national policy centers and agencies including the U.S. Department of Education, links with key policy making groups, leverages faculty expertise to address crucial educational policy issues, leads efforts to establish the College of Education as a focus for educational policy and school improvement research, develops high quality graduate and undergraduate courses, manages graduate student research, and supervises graduate student research. The successful candidate must have an outstanding record of scholarship and policy research and a capacity to secure large-scale grants and will have policy interests that complement ongoing scholarship informing the development and alignment of educational reform with leadership, technology, and student performance.

Educational Leadership, Assistant Professor

A faculty colleague in educational leadership to teach graduate courses and supervise research in educational leadership and management at the school level and beyond including developing teacher leadership and building effective organizations. The successful candidate will be expected to provide external research support and conduct research germane to the needs of professional educators in field settings. Interested in a scholar who is committed to leadership in urban and multicultural communities and who will work collaboratively on major research and development projects to align leadership and technology to improve student performance.

Applied Educational Statistics, Assistant Professor

A faculty colleague to teach graduate courses in applied educational statistics and research methods. Uses and promotes the use of sophisticated technologies and software in teaching and research and contributes to research efforts. The successful candidate will have an earned doctorate in educational research, a year of experience as a research team leader for projects related to educational policy, student performance, proficiency testing, and/or educational technology. Collaborates in redesigning the research and evaluation sequences in the College of Education. The successful candidate will have experience in one or more of the following areas: multi-level modeling, item response theory (Rasch model), and advanced educational measurement theory. Seeking a promising researcher with evidence of scholarly productivity, a commitment to excellent teaching and potential for developing external research support.

The School of Physical Activity and Educational Services (2 positions)

School Psychology, Assistant Professor

A faculty colleague to teach graduate courses in school psychology, advise graduate students, participate in practitioner-related activities in urban schools and community settings, conduct research in school psychology, secure extramural funding related to area of scholarship, and provide leadership at the local, state and national levels. The successful candidate will have earned a doctoral degree in school psychology; two years of experience as a school psychologist desired; and interest in school psychology as a component of an integrated service delivery model in urban K-12 education and community settings.

Special Education, Assistant Professor

A faculty colleague to teach undergraduate and graduate level courses in special education, advise undergraduate and graduate students, and participate in research in urban and community schools and leadership in special education at the local, state, and national levels, and collaborate with the Center for Special Needs Populations. The successful candidate will have a doctorate in special education with emphasis in mild/moderate disabilities; at least three years of public school teaching or an equivalent experience, and evidence of research on the education of learners with mild/moderate disabilities.

Salaries: Competitive and commensurate with experience and qualifications.

For further information contact: http://coe.osu.edu

Appointment: Nine month, tenure track positions

Applications: Submit letter of application, copy of professional resume, three letters of reference, and instructional or scholarship portfolio if available to:

Dr. Mary O'Sullivan, Associate Dean for Faculty
149 Arps Hall, 1450 North High Street
Columbus, OH 43210-1172
Fax (614) 688-3942; Phone (614) 292-7231
Email: osullivan.16@osu.edu

Closing Date: Formal review of applications will begin January 22, 2001 and continue until positions are filled.

THE OHIO STATE UNIVERSITY is an Equal Opportunity, Affirmative Action Employer. Women, minorities, veterans and individuals with disabilities are encouraged to apply.
Colby, a highly selective private liberal arts college of 1750 students located in central Maine, seeks applicants for the following position:

ASSOCIATE DEAN/DIRECTOR OF ADMISSIONS AND FINANCIAL AID DIRECTOR OF MULTICULTURAL ENROLLMENT

Colby seeks a talented, energetic, imaginative professional to direct its multicultural enrollment efforts. This is an extremely important position at the College, given its deep and longstanding institutional commitment to campus diversity.

The person hired will be involved in virtually all aspects of admissions, including travel, interviewing, evaluation of applications, and will have the special responsibility to lead an entire admissions and financial aid staff in enrolling students of diverse cultural, racial, and ethnic backgrounds. The clear articulation of an enrollment strategy for African-, Latina/o, Asian-, and Native American students, an effective implementation of this strategy, and tasteful follow-through will be essential.

Excellent interpersonal, communication, and leadership skills are a must. Candidates must also have a strong commitment to education in a small, residential, liberal arts college and at least 5-8 years of admissions experience. Possession of a Master’s degree or higher is preferred.

Interested candidates should submit two copies of a cover letter and two copies of a resume, including the names and telephone numbers of three references, to: Douglas C. Terp, Director of Personnel Services, Colby College, 5500 Mayflower Hill, Waterville, ME 04901-8855. A review of applications will begin immediately and will continue until the position is filled.

Colby is an Equal Opportunity/Affirmative Action employer. Applications and nominations of women and minorities who would enrich the diversity of the campus community are strongly encouraged.

For more information about the College, please visit the Colby web site: www.colby.edu

MICHIGAN STATE UNIVERSITY

DEPARTMENT OF RESIDENCE LIFE

Division of Student Affairs and Services

The Department of Residence Life at Michigan State University is in the second year of an exciting change process. We are deeply engaged in translating theories of organizational change and learning into our daily practice. Staff members at all levels are involved with students in the areas of multicultural competence, learning, and ethical decision-making. Professional development is encouraged and financially supported. Successful candidates will possess a commitment to learning and working with a diverse population, enthusiasm for student contact, and desire to be part of a changing organization, and interest in joining a student centered staff team.

Full-Time Hall Directors

- Responsible for the leadership of a hall or complex (400-1200 students); responsibilities include staff supervision, training, programming, advising student organizations, student contact, and administrative tasks.
- Compensation: 11-month contract with salary range of $19,300 - $21,500 (BA candidates) and $23,100 - $25,500 (MA candidates); furnished apartment and meal plan; financial support for professional development; university benefits package, including medical and dental insurance, optional retirement plan participation, quality for immediate in-state tuition; after one year, eligible for tuition waivers. *2000-2001 figures*

Graduate Assistantships

- Responsible for assisting the hall director with supervision, training, group advising, programming, student contact, and administrative tasks.
- Graduate Assistantship package includes: tuition waiver for 9 credits each semester during the academic year; stipend of $5,100 per 9 months; apartment and meal plan; single person health coverage. *2000-2001 figures*

DEAN
UNIVERSITY COLLEGE:
ARTS • SCIENCES • PROFESSIONAL STUDIES
Fairleigh Dickinson University, one of New Jersey's largest private universities with approximately 9,000 students on two New Jersey campuses and overseas campuses in Wroxton, England and Tel Aviv, Israel, invites applications for the position of Dean of University College.

Reporting to the Campus Provost, the Dean will provide visionary leadership for all academic and administrative areas of the College. Moreover, the Dean will energize and lead the faculty as they continue to revitalize the college curriculum to meet the global education initiatives outlined by the President of the University.

The salary for this position is competitive and commensurate with qualifications, and the anticipated appointment date is July 1, 2001. All interested persons should consult the full advertisement for this position before applying. This advertisement can be viewed at the following web site: www.fdu.edu/adean.

All qualified applicants, especially minorities and women, are encouraged to apply. A letter of application, a full curriculum vitae, and the names, addresses, and phone numbers of three references should be forwarded to:

Dr. Christopher A. Capuno, Chair
Dean's Search and Screen Committee
Fairleigh Dickinson University
1000 River Road, T-WH1-01
Teaneck, NJ 07666

Review of applications will begin on December 15, and continue until the position is filled.

FDU is an equal opportunity/affirmative action employer.

GUSTAVUS ADOLPHUS COLLEGE

VICE PRESIDENT FOR ACADEMIC AFFAIRS
AND DEAN OF THE FACULTY

Gustavus Adolphus College invites letters of application and nominations for the position of Vice President for Academic Affairs and Dean of the Faculty, with duties commencing on July 1, 2001. The College seeks dynamic, collaborative, and creative academic leadership from its chief academic officer.

Gustavus Adolphus is a highly selective, private, coeducational, undergraduate liberal arts college affiliated with the Evangelical Lutheran Church in America. Founded in 1861, the College sits on 340 beautiful hilltop acres about one hour south of Minneapolis, MN. Its distinguished faculty of 127 full-time and 40 part-time serve more than 2,500 undergraduate students who represent 40 states and 20 foreign countries.

The Vice President for Academic Affairs and Dean of the Faculty reports directly to the President and has a very close working relationship with faculty. Broad responsibilities for development, administration, growth, and quality of all academic programs will include leadership in academic planning and resource allocation, the administration of academic budgets, academic policy development, and all academic matters directly affecting the faculty.

A terminal degree is required.

The search committee will begin screening applications in January 2001 and will continue until an appointment is made. Nominations and applications accompanied by a letter of interest, curriculum vitae and the names of at least three professional references should be sent to:

Dr. Lawrence W. Potts, Chair, VPAA and Dean of Faculty Search Committee
Gustavus Adolphus College, 800 West College Avenue, St. Peter, MN 56082.

Dr. Tobie van der Vorm and Dr. Jamie Ferrara of Academic Search are assisting the search committee, and can be reached via e-mail at ptv@academic-search.org and jpf@academic-search.org or call 202-332-4049.

It is the policy and practice of Gustavus Adolphus College to provide equal educational and employment opportunities for all. We specifically encourage applications from women, minorities and persons with disabilities.

CHABOT-LAS POSITAS COMMUNITY COLLEGE DISTRICT
PLEASANTON, CALIFORNIA

CHANCELLOR

The Chabot-Las Positas Community College District invites applications and nominations for the position of Chancellor. The District seeks an individual who is committed to academic excellence, demonstrated leadership ability and fiscal and management expertise. An earned doctorate is preferred or equivalent experience is required.

The district's two colleges serve nine communities in Alameda County. The combined student population of more than 20,000 includes those from throughout the Bay Area, as well as other states and more than 40 countries. The annual operating budget is approximately 62 million.

A profile brochure for the position will be available after January 16, 2001. To receive the brochure please contact: Office of Human Resources • 7011 Koll Center Parkway • Suite 200 • Pleasanton, CA 94566 or voice mail (925) 485-5200 or Email: hr@clpccd.cca.us

The deadline date for the letter of application is March 5, 2001.
Plattsburgh State University of New York invites applications for Fall 2001 tenure track positions.

ART
Graphite Design (P# 2493-808)
ASSISTANT PROFESSOR—Qualifications: MFA or equivalent experience required, and the successful candidate will have knowledge of current issues and developments in the field. Professional and/or college teaching experience in Graphic Design preferred.
Responsibilities: In addition to Graphic Design teaching responsibilities may include studio foundation design and digital design, depending upon the successful candidate’s expertise. Additional application materials: work samples (slides or Mac-based digital portfolio), examples of student work (if applicable), and statement of teaching philosophy.

BIOLICAL SCIENCES
Plant Biology (P# 2494-808)
ASSISTANT PROFESSOR—Qualifications: A Ph.D. degree with a broad background in organismal plant biology is required. The candidate must be committed to excellence in undergraduate teaching and should have a strong, field-based research program suitable for undergraduate participation. Responsibilities: Teaching a non-majors course in general biology and developing plant biology courses to support departmental programs. Research collaboration opportunities exist with faculty in the Center for Earth and Environmental Science and the Lake Champlain Research Institute. Additional application materials: statement of teaching philosophy, summary of potential research.

SOCIOLOGY & CRIMINAL JUSTICE
Criminal Justice Ethics or Social Psychology (P# 2495-808)
ASSISTANT PROFESSOR—Qualifications: For those applying in the area of criminal justice ethics, a Ph.D. in Criminal Justice, Sociology, Philosophy, or Political Science and teaching experience and scholarship in this area are required. For those applying in the area of social psychology, a Ph.D. in Sociology and teaching experience and scholarship are required. Responsibilities: The successful candidate will also be required to teach additional courses in Criminal Justice and/or Sociology. Review of applications begins February 1, 2001. Additional application materials: statement indicating teaching and research interests and evidence of teaching effectiveness (e.g., sample syllabi and student evaluations).

Vanderbilt University

Department of Teaching and Learning,
Peabody College of Education and Human Development

ASSISTANT PROFESSOR, LANGUAGE AND LITERACY EDUCATION
The Department of Teaching and Learning, Peabody College of Vanderbilt University, invites applications for a tenure-track position at the Assistant Professor level in Language and Literacy Education. Candidate requirements include: an earned doctorate in language and literacy education and an interest in the literacy development of children ages 3 through 8; a well-developed program of externally-funded research or demonstrated potential for one in early literacy instruction and diversity, teaching experience in classrooms and/or community-based programs; and a commitment to undergraduate and post-baccalaureate teaching. Expertise in one or more of the following areas is highly desirable: instruction for diverse learners, multicultural education, bilingualism and second language learning, literacy development in home and/or community settings, sociocultural dimensions of literacy, and teacher education. Responsibilities will include: (1) establishing a program of research related to early literacy development and instruction; (2) teaching literacy courses in the Early Childhood and Elementary Education teacher education programs and at the doctoral level; (3) undergraduate and graduate student advising; and (4) working collaboratively with other faculty in the Language and Literacy program and faculty across the college who have interests in young children's literacy development.

The Peabody environment is one in which collaboration is highly valued and in which there are many opportunities to work with members of other departments and the centers of the University and with local schools and community programs. Vanderbilt University is an equal opportunity, affirmative action university. Vanderbilt University, Peabody College, and the Department of Teaching and Learning have a commitment to enhancing diversity throughout all aspects of the university. Members of underrepresented groups, women, and people with disabilities are strongly encouraged to consider this opportunity and apply. The review of applications begins January 15, 2001, and will continue until the position is filled.

Applicants should send a letter of interest, curriculum vitae, up to two publications (or manuscripts in progress), and three letters of recommendation to:

Victoria Risko, Chair
Language and Literacy Search Committee
GPC Box 316
Vanderbilt University
Nashville, TN 37203

ACE is an equal opportunity, affirmative action employer and actively solicits applications by and nominations of women and minority candidates.
The School of Education at the University of Delaware will hire six tenure-track faculty for Fall 2001. With over 1,000 undergraduate majors and 300 graduate students, the SOE is the largest academic unit in the College of Human Services, Education, and Public Policy. Admission to undergraduate or graduate study is selective, and all our Ph.D. students and some Masters students receive substantial fellowship and assistantship support. The number of tenure-track faculty is approaching 50, including four named professors and numerous recipients of fellowships, grants, and national awards (for detailed information on individual positions, visit our website: http://www.udel.edu/edu/edu/jobs/positions.html). We are implementing and studying progressive models of field-based and community-sensitive teacher education and professional development in cooperation with nearby urban, rural, and suburban communities. Funds available for professional travel, for technology, and for research are exceptional. The School of Education incorporates The College School, a school for children with learning difficulties of elementary school age, which also serves as a practicum and research site. Research and service centers link the School of Education with Delaware educators, build on faculty teaching and research expertise, and forge close ties with regional public charter, private, and professional development schools and community agencies. Address questions about the positions described below to the appropriate search committee chairs or to Dr. Christopher M. Clark, Director, School of Education, 115 Willard Hall Education Building, Newark, DE 19716-2922.

Literacy Education: Two positions, both Assistant Professor. We seek candidates of exceptional scholarly promise who are strongly committed to teacher education. We are particularly interested in candidates with expertise in K-8 literacy research in areas such as cognitive processes in reading, writing, emergent and beginning literacy, research related to cultural diversity and urban contexts, intervention to prevent and correct reading difficulties, and/or literacy instruction for non-native speakers of English.

Applicants must have an earned doctorate in literacy or a related field. Major responsibilities include teaching undergraduate and graduate courses in areas such as reading, writing, and content area literacy; advising masters and doctoral students with emphases in literacy; and supporting collaborations and school-community-university partnerships in teacher education research and research. At least one position will carry a paid appointment with the Delaware Center for Teacher Education to strengthen the professional development of Delaware teachers.

Interested persons should send a letter of application, curriculum vitae, teaching evaluations, two scholarly papers, and three letters of reference to: Kathleen Minke, Ph.D. and Gwynne Ellen Ash, Ph.D., Literacy Search Committee Co-Chairs, 133D Willard Hall Education Building, Newark, DE 19716-2922. Review of applications will begin on December 15, 2000; completed applications are due January 8, 2001.

Mathematics Education: Two positions, one Associate/Assistant and one Assistant Professor. Opportunities to participate in the NSF funded Mid-Atlantic Center for Mathematics Teaching and Learning and the state supported Mathematics and Science Education Resource Center. Preference will be given to candidates with a vigorous research program, a strong mathematics background, and school experience.

For both positions, a doctorate in mathematics education or a related field is required. A strong publication record is expected for appointment as Associate Professor. Responsibilities include teaching undergraduate and graduate courses, conducting and supervising research, and service to the university and profession.

Applicants should send a letter of application, vita, two scholarly papers, evidence of teaching effectiveness, and three letters of reference to: Dianna Weare, Search Committee Chair, 103E Willard Hall Education Building, Newark, DE 19716-2922. Review of applications will begin December 15, 2000; completed applications are due January 8, 2000.

Multicultural Education: One position, Assistant Professor, to conduct research and teach in the area of cultural diversity as related to education. Responsibilities include designing and teaching undergraduate and graduate courses in cultural diversity and multicultural education required in our teacher education program, and the conduct of a promising program of scholarly inquiry in multicultural studies. Preferred qualifications include research and/ or teaching experience with educators or K-12 school populations. Earned doctorate may be in fields such as educational studies, ethnic or gender studies, history, anthropology, sociology, psychology, or linguistics.

Please send a vita, three letters of recommendation, a scholarly writing sample, and evidence of teaching effectiveness to: Dr. Carol Wong, 134A Willard Hall Education Building, Newark, DE 19716-2922. Review of applications will begin December 15, 2000; completed applications are due January 8, 2000.

Educational/Developmental Psychology: One position, Assistant Professor. Applicants must have a doctoral degree in Educational Psychology or Human Development and be prepared to teach undergraduate courses in human development and school learning and graduate courses in their area of specialization. An excellent research program in an area relevant to education and schooling is crucial. The candidate must be qualified to supervise graduate and undergraduate research and collaborate with teachers and schools on common problems.

Candidates should send an application letter stating their teaching and research interests, a vita, three letters of reference, and samples of their professional writing to: Dr. Nancy C. Jordan, Educational/Developmental Psychology Search Committee Chair, 303D Willard Hall Education Building, Newark, DE, 19716-2922. Review of applications will begin December 15, 2000; completed applications are due on January 8, 2001.

The University of Delaware is an Equal Opportunity Employer that encourages applications from minority group members and women.

Dean, College of Arts and Sciences
Creighton University

Creighton University invites applications and nominations for Dean of its College of Arts and Sciences. The College seeks candidates with distinguished academic records and significant administrative experience. The successful candidate will embrace the University's Catholic and Jesuit mission and values, be committed to excellence in the pursuit of truth in all its forms, possess an interdisciplinary and integrative vision of education, and be able to strengthen the college's alumni and resource development relationships.

Candidates for the position must have an earned doctorate and a record of teaching and scholarship appropriate for appointment as a full professor in one of the College's departments. A letter of interest, complete curriculum vitae and four letters of reference should be sent to:

Dean Patrick Borchers
Chair of the Arts and Sciences' Dean Search Committee
School of Law
Creighton University
2500 California Plaza
Omaha, NE 68178-0308

Review of applications will begin immediately after the deadline of January 8, 2001 and continue until the position is filled. Position is available beginning July 1, 2001.

Illinois State University,
Normal/Bloomington

Department of Communication invites applications for a full-time position for an academic advisor, preferably to begin August 16, 2001. The successful applicant will be expected to provide academic and career advisement to undergraduate students and teach selected courses in the undergraduate curriculum. A Master's degree in communication, prior advising or counseling experience, and the ability to work one-on-one with undergraduate students, including international students, is required. Advising experience in the new general education program, interest in developing student assistance initiatives, experience in student recruitment, and knowledge of university and departmental policies are desirable. Candidates must be available to begin work August 16, 2001. Initial review of applications will begin December 20, 2000, and will continue until the position is filled. To assure full consideration, send a letter of application, vita, copies of transcripts and three letters of recommendation by December 20, 2000 to:

Dr. Mark Comadena
A/P Academic Advisor Search Committee
Illinois State University
Campus Box 4480
Normal, IL 61790-4480

Illinois State University is an equal opportunity/affirmative action university encouraging diversity.
Indiana University South Bend invites applications and nominations for the position of Dean of the School of Business and Economics. This tenure-track, 12-month position begins July 1, 2000, and no later than August 15. The School has recently achieved AACSB (Association to Advance Collegiate Schools of Business) accreditation and currently seeks an energetic individual with the drive to lead the School in its goal of becoming a premier regional School of Business and Economics. The Dean is the chief academic officer of a School that includes the disciplines of Accounting, Business Law, Economics, Finance, Information Systems and Decision Sciences, Management, and Marketing.

The School is one of USB's strongest units, comprised of 600 undergraduate and 200 graduate students. Besides undergraduate degree, the School offers the MBA and M.S. degrees in Accounting and in Management of Information Technology. The 35 full-time faculty members include those with national and international reputations.

Qualifications of the successful candidate will include:

- Earned doctorate or appropriate terminal degree.
- High-quality teaching experience and significant nationally or internationally recognized scholarship, which is in the rank of Professor with tenure in one of the disciplines within the School.
- Demonstrated excellence in oral and written communication.
- Successful leadership in graduate/undergraduate academic program development and student recruitment/retention, including international students.
- Success in building community and business partnerships, including external fund-raising.
- Sensitivity to the need for diversity on the campus, including cultural and racial diversity.

Salary is competitive and based on experience; benefits are among the most generous in higher education. To ensure full consideration, applications should be postmarked by January 6, 2001. Interested persons are asked to submit a letter of application, a curriculum vitae, and the names, addresses, and telephone numbers of at least three references. Candidates may include other items, such as a statement of their philosophy concerning teaching, research and service or a description of their administrative style. Finalists may be asked to submit additional information.

Review of applications will begin January 10 and continue until the position is filled. Applications should be submitted to the attention of:

Dean Miriam Shillingburg
Chair
Search Committee for Dean of the School of Business and Economics
Office of Academic Affairs
Indiana University South Bend
P.O. Box 7111, South Bend, IN 46654-7111

Dowling College

PRESIDENTIAL SEARCH

The Board of Trustees of Dowling College invites applications and nominations for the position of President, with duties commencing on July 1, 2001.

Dowling College is an independent, comprehensive coeducational college located in Oakdale, Long Island, NY. With a full-time and part-time faculty of 450 serving approximately 6000 undergraduate and graduate students, it is an institution with a rich liberal arts and professional school heritage.

Dowling College is accredited by the Commission on Higher Education of the Middle States Association of Colleges and Schools. All degree programs are authorized and approved by the New York State Education Department. Additionally, Dowling College's School of Business is accredited by the International Assembly for Collegiate Business Education (IACBE), and the School of Aviation and Transportation is accredited by the Council on Aviation Accreditation (CAA).

The Board of Trustees seeks a leader with the personal and professional ability to articulate the value and importance of a liberal arts and professional education, a commitment to teaching, learning and scholarship; demonstrated management and leadership experience; proven ability to set a clear, positive agenda for the institution; a collaborative style that encourages creative thinking and teambuilding; the capacity to ensure vigorous fund raising; an enthusiasm for engaging in all aspects of institutional growth; and keen judgment relating to financial management and strategic planning. A terminal degree is preferred but candidates with a record of success in the administration of higher education or multi-faceted institutions will also be considered.

The Presidential search committee will begin screening applications on December 19, 2000 and continue until an appointment is made. All nominations and applications accompanied by a letter of interest, curriculum vitae and the names of three professional references should be sent to:

Dr. Linda Ardito, Chair
Presidential Search Committee
c/o Maureen Volpe
Office of the Provost
Dowling College
Idle Hour Boulevard
Oakdale, NY 11769-1999

For additional information contact:
Dr. Jamie Ferrare or Dr. Tobie van der Vorm of the Academic Search Consultation Service at: jpf@academic-search.org and pty@academic-search.org or (292)332-4049.

Interested persons are encouraged to visit the Dowling website at:
www.dowling.edu.

Dowling College is an equal opportunity employer.

RICHARD STOCKTON COLLEGE OF NEW JERSEY

DEAN
FACULTY OF NATURAL SCIENCES AND MATHEMATICS

Stockton College is an innovative, residential, liberal arts and science college with a student body of 6000 located on a 1600-acre wooded campus in southern New Jersey, 15 miles from the Atlantic Ocean, 1 hour from Philadelphia, and 2-1/2 hours from New York City. Stockton College has a national reputation for academic excellence and innovation. It is recognized by the Carnegie Foundation, US News and World Report, and Kiplinger as a nationally ranked liberal arts institution. The College has a particularly strong record in science and mathematics education: it produces 30% of the total science and math graduates of New Jersey's eight state colleges, has implemented a quantitative reasoning across the disciplines program funded by both the National Science Foundation and The American Council of Learned Societies, and its Environmental and Marine Science programs have been recognized by Education for the Earth as among the 100 best programs of its type in the country.

The Faculty of Natural Sciences and Mathematics consists of 52 full-time faculty and offers majors in Biology, Biochemistry and Molecular Biology, Chemistry, Environmental Studies, Geology, Marine Science, Mathematics, and Physics. There is a tradition of student-faculty research. The college maintains articulation agreements or dual-degree programs with a variety of engineering, medical, and veterinary schools.

In addition to its on-campus laboratory and computing facilities, the College operates an observatory, a geothermal research facility and the Naucoc Creek Marine Science and Environmental Field Station located on an estuary of Great Bay approximately 10 miles from campus. Among its programs for students in the K-12 sector, each summer the College hosts the Governor's School on the Environment for academically talented high school seniors. Many faculty are involved in a program to provide tutoring in the sciences to area middle school students for enrichment and to enhance the likelihood of overall academic success.

The Dean manages the Division; exercises curricular leadership; develops and administers the budget; oversees lab, field, and research facilities; monitors faculty development; manages faculty recruitment; participates in overall academic planning; and facilitates contacts with industry, government, and other institutions. The Dean reports to the Vice President for Academic Affairs. The position is managerial and does not carry academic rank or tenure.

QUALIFICATIONS

• A Ph.D. or equivalent in one of the disciplines within the Division
• An academic record that would merit appointment at the rank of Full Professor
• Five years of academic administrative or equivalent experience
• Five years undergraduate classroom teaching experience and a strong commitment to excellence in teaching
• An understanding of the role of scholarship and service in undergraduate liberal arts education
• An appreciation of the human, physical and technological resources necessary to support natural sciences and mathematics.

The position is available July 1, 2001. Salary is competitive and based on qualifications and experience. Screening will begin January 15, 2001, and will continue until the position is filled. Applications must include a letter of interest and a curriculum vitae. Applicants must submit the names and telephone numbers of three (3) references to the address below.

Nominations and application letters addressing the qualifications outlined above should be sent to: Dr. David L. Carie, Vice President of Academic Affairs, Natural Sciences and Mathematics Dean Search, The Richard Stockton College of New Jersey, AAS, PO Box 195, Pomona, NJ 08240-0195.

The Richard Stockton College of New Jersey is an AA/EEO employer. Women and minorities are strongly encouraged to apply. R012092
FACULTY POSITIONS, FALL 2001

Utah's Salt Lake Community College is located at the foot of the beautiful Wasatch Mountains in the state's capital city. Some of the country's best skiing, rock climbing, fishing, and other outdoor events are only minutes away. Salt Lake City is an exciting cosmopolitan area offering an array of symphony, ballet, opera, jazz, theater and professional athletic events.

The College is a multi-site, urban comprehensive community college which enrolls over 54,000 credit and non-credit students. Beautiful facilities, small student-centered classes, and excellent location are some of the characteristics of the College.

Applications are being accepted for the following full-time tenure track faculty positions available fall semester 2001. Competitive salary and excellent benefits. Library serials include 3,402 periodicals subscriptions, 1,079 serial subscriptions, and 156 electronic journals. The Library operates an interlibrary loan system. Additional information is available at <http://library.sdsu.edu/>.

Send letter of application, resume, and at least five names of reference to:

Helen Henry
Director, Administrative Operations
Library and Information Access
San Diego State University
5500 Campanile Drive
San Diego, CA 92182-8050

A duplicate may be submitted by email. Send to: libraryEMS@e-mail.sdsu.edu. Please indicate the position for which you are applying. To ensure full consideration, applications should be received by January 26, 2001, when the Appointment Committee will begin screening.

SDSU is an equal opportunity employer and does not discriminate against persons on the basis of race, religion, national origin, sexual orientation, gender, marital status, age, or disability. Women, ethnic minorities, and persons with disabilities are encouraged to apply.

CLARION UNIVERSITY

VICE PRESIDENT FOR FINANCE AND ADMINISTRATION

Clarion University of Pennsylvania

Clarion University of PA, one of 14 comprehensive public universities in the State System of Higher Education, invites nominations and applications for the position of Vice President for Finance and Administration.

Responsibilities: The Vice President is a senior management officer reporting directly to the President, a member of the President's Executive Council, and provides executive leadership for the university's financial and administrative operations, including business operations, financial planning, education/grant and capital budgeting, facilities management and planning, human resources and labor relations, public safety, and contract management. The Vice President also works closely with the State System Office of Finance and Administration.

Qualifications: The successful candidate will possess at least five years executive experience in a position of responsibility for budget and fiscal management, preferably in higher education; a thorough working knowledge of modern fiscal management procedures; and a successful managerial track record in one or more areas of responsibility within the Finance and Administration division. The successful candidate will also have a demonstrated record of successful leadership, a high level of energy, ability to communicate effectively with diverse constituencies, and a demonstrated commitment to social equity and cultural diversity. A master's degree in an appropriate area of specialization is required.

The University: Founded in 1867 and located in scenic Western Pennsylvania, Clarion University enrolls 6,200 students at its two campuses, one in Clarion and the other in neighboring Oll City. Committed to offering a substantial general education core and making the latest in technology available to its students in their major, Clarion University offers associate, undergraduate, and graduate degrees. Academic programs are conducted through the College of Arts and Sciences, Business Administration, Education and Human Services, and the School of Nursing.

Applications and Appointment: Candidates for Vice President for Finance and Administration must submit the following materials: a letter of application addressing qualifications for the position, a resume, and three current letters of reference (including phone numbers and email addresses). Completed application materials and requests for additional information concerning the position should be addressed to: Ms. Ann Jamison, Search Committee Coordinator, Office of the President, Clarion University, Clarion, PA 16214, ajamison@clarion.edu. Applications received by January 19, 2001, will receive full consideration; review of applications will continue until the position is filled. Salary and benefits are competitive; appointment is effective July 1, 2001. Additional information is available at: www.clarion.edu.

Clarion University is building a diverse academic community and encourages people of color, women, veterans, and persons with disabilities to apply. AA/EOE.

University of Illinois at Chicago

VICE CHANCELLOR FOR RESEARCH

Nominations and applications are invited for the position of vice chancellor for research at the University of Illinois at Chicago (UIC).

UIC is the largest university in Chicago, with 25,000 students, 12,000 faculty and staff, 15 colleges and the state's major public medical center. The university, part of the three-campus University of Illinois system, has a $1 billion budget and $175 million in FY '99 research and development expenditures. The university's 100-building, 200-acre campus is located just west of downtown Chicago. UIC is in the midst of a major expansion that will add new academic buildings, research facilities and student housing, along with market-rate residential units and other improvements to the campus environment.

The vice chancellor for research reports to the chancellor of the Chicago campus and, on issues related to technology commercialization and associated economic development programs, to the University of Illinois' vice president for economic development and corporate relations.

The vice chancellor for research is responsible for the enhancement of excellence in research throughout the campus, and ensuring academic integrity in research endeavors and compliance with federal, state and local regulations pertaining to research, including protection of human participants in research trials. The Office of the Vice Chancellor for Research also plays a facilitative role in such areas as development of research programs in departments and colleges, research centers, and collaborative research efforts involving extra-campus groups; acquisition and maintenance of multi-user and multi-disciplinary research equipment and facilities; seed funding of new research initiatives and faculty technology transfer; technology commercialization and economic development; generating sponsorship for new research initiatives and facilities; pre-award sponsored research activities; negotiation of sponsored research contracts; and interdisciplinary research activities. Offices reporting to the vice chancellor include the Office of Technology Management, the Office for Protection of Research Subjects and the Office of Research Services.

The successful candidate will have academic/scientific experience in research and/or research management, background and achievements to qualify for appointment as a tenured professor, strong management capabilities and interpersonal skills and demonstrated experience in fostering research links between universities and outside entities, including industry.

UIC encourages applications from women, minorities and persons with disabilities.

Candidates are asked to supply a letter of interest and curriculum vitae. Review of applications and nominations will begin January 2, 2001, and continue until the position is filled. Send applications and nominations to:

Richard Magin, Chair
Search Committee for the Vice Chancellor for Research
Office of the Chancellor (MC 102)
601 South Morgan Street
Chicago, Illinois 60607-7128
(312) 413-3393
(email: natsuuko@uic.edu)

The University of Illinois is an affirmative action/equal opportunity employer.
College of Education Faculty Positions

The School of Teaching and Learning, in the College of Education at the University of Florida, is seeking qualified individuals to fill two tenure track positions listed below. Both positions will require work in the context of a unified model of teacher education, involving partnerships with other departments in the College, especially Special Education; other units on campus, such as the College of Liberal Arts and Sciences; and the public schools. In addition to qualifications listed below, both positions require commitment to public education and an inclusive model of teacher education; ability and willingness to work collaboratively; an interest in the educational needs of a diverse population; and active involvement in professional organizations and activities. The School of Teaching and Learning, with over 75 tenured faculty, adjuncts, and teaching assistants, offers degrees in 12 specializations to an enrollment of more than 442 undergraduates and 406 graduates, including 85 doctoral students.

Assistant Professor, English to Speakers of Other Languages (ESOL). Responsibilities: Teach undergraduate and graduate classes in ESOL and bilingual, multicultural, and foreign language education; provide content leadership in teacher education programs; contribute to the development of graduate programs; conduct and publish research, provide service to public schools, and pursue external funding for training and research.

Assistant Professor, Educational Technology Responsibilities: Teach undergraduate and graduate classes in educational technology production; advise undergraduate and graduate students; conduct and publish research; collaborate with faculty to support the integration of technology; provide service to public schools; provide leadership in the production component of the Educational Technology program; and pursue external funding for training and research.

Qualifications: Required: Doctorate in educational technology or related field; expertise in multimedia production, digital editing, web product development and other technology-enhanced production; K-12 and/or higher education teaching; evidence of scholarly potential. Preferred: Background in programming; background in systemic change and diffusion theory; ability to work collaboratively with colleagues; experience in conducting research and management of grants. Salary Negotiable. Beginning Date: August, 2001. Application Deadline: January 12, 2001.

Letters of application should be accompanied by a resume; two representative samples of scholarly writing; other supportive material as appropriate; and names, addresses, and telephone numbers of at least three references whom you have asked to provide letters of recommendation. Send application materials by the deadline indicated above to:

Dorene D. Ross
Acting Director, School of Teaching and Learning
2403 Norman Hall, Box 117048
University of Florida 32611-7048

The University of Florida is an Affirmative Action/Equal Opportunity Employer. Applications from women and minorities are welcome.

An AA/EEO Institution, Emporia State University encourages minorities and women to apply.

University of Nebraska at Kearney
College of Education Faculty Vacancies

Exercise Science (Assistant Professor)

Travel/Human (Lecturer)

Educational Administration (Ann/Assoc Prof)

Position descriptions and application information may be obtained at:
www.unk.edu/ohes/auhc/EmployOp.html

Please visit the College of Education web site at
www.unk.edu/ced

The College of Education offers bachelor’s, master’s and specialist degree in education, counseling and learning studies fields. We are a member of the National Network for Educational Renewal and are accredited by NCAE.

The University is an affirmative action/equal opportunity institution and actively seeks applications from members of traditionally underrepresented groups.
The United States Military Academy was established in 1802. It is the only college specifically charged with preparing young men and women for service as officers in the United States Army. As such, it has a singular educational philosophy of graduating enlightened military leaders of strong moral courage whose minds are creative, critical, and resourceful. Located just 50 miles north of New York City, this prestigious institution is nestled in the beautiful Hudson River Valley. For more information on the Military Academy visit our website at www.usma.edu.

ASSISTANT PROFESSOR (Instructional Technology and Foreign Languages): Candidates for this position will be evaluated according to the following qualifications: (i) advanced degree (Ph.D.) in instructional technology or equivalent. (ii) Background in foreign language pedagogy and familiarity with teaching methodologies and approaches. (iii) Record of excellent teaching on the college level in one of the following languages: Arabic, Chinese, French, German, Portuguese, Russian, or Spanish. (iv) Grant-writing experience. (v) Evidence of scholarship or scholarly potential. (vi) A firm commitment to high quality undergraduate education and the ability to work harmoniously with both civilian and military colleagues. The successful candidate will maintain and manage a state-of-the-art, multi-media language laboratory; provide support and training to foreign language faculty in the application of technology to enhance foreign language learning; keep informed of and assess the effectiveness of new applications as they pertain to our teaching needs; and work with curricular and faculty advisors to develop innovative, student-centered courses. Applicants should submit curriculum vitae, a statement of teaching philosophy, three letters of recommendation, a copy of their current, recorded CD, and a teaching statement outlining their teaching philosophy, goals, and methods. Women, minorities, and persons with disabilities are encouraged to apply. A resume of salary requirements should be included. The position is open until filled.

ASSISTANT PROFESSOR (Electrical or Computer Engineering): USMA, the oldest engineering school in the nation, offers a Tier I undergraduate program devoted to educating leaders of character committed to the values of Duty, Honor, and Country. USMA's rigorous programs, faculty, and student-to-faculty ratio of 8:1 attract a student body of 4,000 from around the nation's best. The Department of Electrical Engineering and Computer Science includes a team of 43 civilian and military faculty members dedicated foremost to teaching and student development. Faculty and students have excellent opportunities for research supported by a ubiquitous campus computing environment and outstanding electronics and photonics laboratory facilities. The department offers ABET-CSEAB accredited majors in Electrical Engineering (including a Computer Engineering track) and Computer Science, two minors, and a required freshman course.

ASSOCIATE PROFESSOR: Candidates for this position will be evaluated according to the following factors: (i) advanced degree (Ph.D.) in Electrical Engineering, Computer Engineering, or a closely related field. (ii) Must demonstrate a strong commitment to teaching at the undergraduate level; relevant industry experience is beneficial. We are looking for well-rounded professionals capable of growing in design, teaching, and oversee a variety of courses and programs. (iii) Ability to conduct research in one or more fields (which may include photonics). (iv) Ability to attract and retain junior faculty members. (v) Ability and willingness to support students in and outside the classroom, and contribute to department and academy governance. Applications will be accepted until the position is filled. Applications and questions may be directed to LTC Barry L. Shoop, United States Military Academy, Department of Electrical Engineering and Computer Science, MAD-R EEC-1, West Point, New York, 10996, 1787, (843) 938-5567, Barry-Shoop@usma.edu.

ASSISTANT PROFESSOR (Physics): Candidates for this position will be evaluated according to the following factors: (i) Advanced degree (Ph.D.) in Physics. (ii) Ability to teach introductory calculus-based physics courses and supervising advanced undergraduate laboratories. (iii) Ability to conduct research. (iv) Demonstrated high standards of scholarship and promise of growth and development in the academic profession. Candidates interested in the position should submit a curriculum vitae, official transcripts, three letters of recommendation and a DD 214 (if claiming veterans preference) to the United States Military Academy, Department of Physics, ATTN: COL Bruce O'faolain, Department of Physics at (843) 938-3548, email: bho@usma.edu. Applications must arrive before February 1, 2001.

ASSISTANT PROFESSOR (Chemistry): Candidates for this position will be evaluated according to the following factors: (i) Advanced degree (Ph.D.) in either, chemistry, life science, or chemical education. (ii) Ability to teach undergraduate courses in general chemistry and inorganic chemistry or organic chemistry. (iii) Ability to conduct research. (iv) Ability to mentor students, direct them in their individual research projects, and support student activities outside the classroom. (v) Demonstrated high standards of scholarship and promise of growth and development in the academic profession. (vi) Applicants should have some college or professional teaching experience and a personal research agenda. Undergraduate education is our top priority. To receive full consideration, applicants should submit a curriculum vitae, official transcripts, letters of recommendation and a DD 214 (if claiming veterans preference) to Mrs. Sharon Moran, Department of Chemistry, United States Military Academy, West Point, New York 10996, Telephone: (843) 938-3915. All applications must arrive before 16 January 2001.

ASSISTANT PROFESSOR (Environmental Geography): The Department of Geography and Environmental Engineering is seeking for an Environmental Geographer with a broad background in physical geography and an understanding of human-environment interactions. Preferences will be given to those with expertise in GIS, remote sensing, and cartography. Principle responsibilities will include academic leadership, teaching, and scholarship in the field of geography. Specific duties will include teaching undergraduate courses in geography, to include a capstone course in environmental geography; mentoring cadets; supervising faculty and academic programs; curriculum development; junior faculty development; service on faculty committees; and research. Dedication to excellence in teaching is an absolute requirement of this position. Individuals must have a strong commitment to the educational, military, physical, and ethical development of cadets. Applicants should have an advanced degree (Ph.D.) in geography. Individuals interested in applying for this position should contact Dr. Jon McInerney, Department of Geography, Environmental Engineering, United States Military Academy, West Point, New York 10996-1695. Telephone: (843) 938-4673, FAX: (843) 938-3339, email: bj264@usma.edu. Completed applications must be received no later than 31 January 2001.

ASSOCIATE/ASSISTANT PROFESSOR (Law and Legal Studies): 2 positions available (1 Assistant, 1 Associate). Candidates will be evaluated according to the following factors: (i) Advanced degree (J.D. minimum). (ii) Authoritative knowledge in Constitutional Law and selected elective courses in the undergraduate legal studies program and a DD 214 (if claiming veteran’s preference). (iii) Ability to attract and retain faculty in the areas of expertise. (iv) Demonstrated teaching excellence. (v) Ability to provide educational leadership, academic evaluation, and academic counseling. The Department of Law is the home of the American Legal System Major and Field of Study. All faculty members are required to teach a course in Constitutional and Military Law. The department teaches elective courses in the law of war, national security law, international law, environmental law, business law, advanced constitutional law and jurisprudence. Outside the classroom faculty members are involved in a full range of cadet activities including values education training and cadet competitive sports clubs. To apply, submit a curriculum vitae and personal statement, academic transcripts, three letters of recommendation and a DD 214 (if claiming veteran’s preference) to The United States Military Academy, Department of Law, ATTN: COL Ilia Bridges, West Point, New York 10996, telephone (843) 938-3510. Applications must be received by 16 January 2001.

ASSISTANT PROFESSOR (English): Candidates will be evaluated according to the following factors: (i) Advanced degree (Ph.D.) in a Humanities discipline. Ability to teach undergraduates in a demanding academic environment. (ii) Ability to teach the core curriculum English courses in basic and advanced composition and in literature. (iii) Ability to conduct research in a demanding academic environment. (iv) Ability to conduct research and present research in a variety of media. (v) Ability to provide educational leadership, student evaluations, and academic counseling and mentorship. To receive full consideration, applicants must submit a curriculum vitae, dissertation abstract, the names of three references who can vouch for their promise as a classroom teacher, and a DD 214 (if claiming veteran’s preference) to the United States Military Academy, Department of English. ATTN: Mrs. Barbara Kane, West Point, New York 10996, phone (843) 938-2501, or email cb7229@exmail.usma.edu. All applications must arrive by mail on January 15, 2001. 

ASSISTANT PROFESSOR (Political Science/Public Policy/Economics): Candidates will be evaluated according to the following factors: (i) Advanced degree (Ph.D.) in Political Science (to include American Politics, International Relations, or Comparative Politics, Public Policy, or Economics). (ii) Authoritative knowledge in the fields of economics or political science. (iii) Ability to develop, design, direct, and teach undergraduate coursework in a demanding academic environment. (iv) Ability to conduct research and present results in a variety of media. (v) Ability to provide educational leadership, student evaluations, and academic counseling and mentorship. To receive full consideration, applicants should submit a curriculum vitae and personal statement, academic transcripts, three letters of recommendation, copies of teaching evaluations, samples of scholarly work, evidence of claiming veteran’s preference) to the United States Military Academy, Department of Social Sciences, West Point, New York 10996, phone (843) 938-3397. Applications must arrive before 1 January 2001.

ASSISTANT PROFESSOR (Civil Engineering): Candidates will be evaluated according to the following factors: (i) Advanced degree (Ph.D.) in civil engineering. (ii) Ability to teach undergraduate courses in structural or water resources engineering in the Academy’s ABET-accredited civil engineering program. Other responsibilities include scholarship, participation in professional development activities with students outside the classroom,

EOE Committed to diversity of faculty, staff and students

Director of Campus Planning & Development

Responsible for the planning, programming and construction management of capital construction. Will also be responsible for campus architectural services to support in-house renovations, long-range campus planning and managing of compliance to building code requirements.

Applicant must be a Licensed Architect. Master’s degree preferred. Three years experience in higher education is also preferred.

Please send resumes with salary requirements to:
Robert Plaszkonsky, Search Committee Chair
Hepburn Hall, Room 105
New Jersey City University
2035 Kennedy Boulevard
Jersey City, NJ 07305

An affirmative action, equal opportunity employer, the University especially welcomes and encourages applications from women and minority candidates.

ACADEMIC ENVIRONMENT: Seattle Pacific University is an evangelical Christian university in the Wesleyan tradition. Affiliated with the Free Methodist Church, the University serves 2,600 undergraduates, 900 graduate and 18,000 continuing education students in the liberal arts and professional studies. The University employs 176 faculty members organized under a College of Arts and Sciences dean, five school deans and a dean of Learning Resources. The associate provost and dean of Student Life reports to the provost to enhance the collaboration of academic and Student Life leaders and programs. The provost reports to the president.

POSITION RESPONSIBILITIES: The provost of the University provides leadership and vision for fulfilling SPU’s commitment to educational excellence through the academic and student-life programs; bear overall responsibility for development, maintenance, evaluation and accreditation of University curricula; develop and maintain a lively intellectual environment; provides leadership and management for the University’s academic budget; implements academic policies; advocates consideration of academic programs and faculty in University decision-making; serves as a spokesperson and advocate for academic programs to University constituencies; advocates policies of the President and the Board of Trustees to the faculty; and serves on the President’s Cabinet. The provost also serves as dean of the faculty, and facilitates the work of the academic enterprise through a leadership team of six academic deans.

CANDIDATE QUALIFICATIONS: Candidates for the provost position should have a mature, yet growing Christian faith; a working philosophy and understanding of Christian higher education; in general and SPU’s comprehensive approach to the arts, sciences and professions; in particular, the ability to embrace and articulate the University’s vision and educational mission, academic credentials and intellectual stature as a scholar, teacher and faculty leader; demonstrated competence in planning and financial management; a commitment to diversity both in hiring and throughout the academic community, which takes into consideration the contributions of women and minorities, particularly in a large city, culturally diverse setting; and experience and demonstrated skills as a listener and communicator, being a team builder with a record of empowering and leading a team of capable managers.

APPLICATION DEADLINE: January 15, 2001. Seattle Pacific reserves the right to fill the position at any time. Seattle Pacific seeks faith-affirming, Christian applicants committed to the University’s educational mission and vision. Women and minorities are encouraged to apply. All inquiries, requests for applications and completed applications should be addressed to: Marjorie R. Johnson, chair, Screening Committee for Provost, Seattle Pacific University, 3307 Third Avenue W., Seattle, WA 98119. Phone: (206) 281-2650.

Faculty Positions:
DEPAUL UNIVERSITY, SCHOOL OF EDUCATION, 2000-2001

Well known for its reputation for excellence and as the largest Catholic university in the United States, DePaul University has been educating Chicago for over 100 years. At DePaul, you will work in a collaborative environment that values and supports diversity and encourages professional development. The School of Education’s mission is to cultivate urban, professional, multicultural educators, and to provide educational experiences that facilitate social change. We encourage applications from candidates who are committed to issues of social justice and knowledgeable about current educational policies and practices that affect youth and education in public and private institutions. DePaul University has a strong commitment to building and maintaining a diverse community and seeks faculty who will enhance this mission.

The School of Education seeks applications for six approved and funded positions, beginning in the 2000-2001 Academic Year: Director of Ed.D. Program • Senior-Level Position: Assistant Professor • Educational Leadership: Associate Professor • Human Development: Assistant Professor • Reading: Assistant Professor • Secondary Education. The School actively seeks to build and maintain a diverse faculty. For all positions, the School seeks faculty members who bring a critical perspective to the issues of urban education, diversity, multiculturalism, reflective practice, and social justice.

Director of Ed.D. Program • Senior-Level Position: Responsible for providing leadership and direction for the doctoral program in Educational Leadership and Curriculum Studies. The Director will monitor program quality and create possibilities for further program development, including possible emphases in higher education administration, social and cultural studies, and educational technology. The Director is expected to draw upon the program history and University Mission to elaborate and sustain a vision of the scholarship of service. Applicants should be prepared to teach graduate courses in the program, sustain a scholarly agenda, as well as collaborate with students and faculty in research and program development. Strong interpersonal skills and the ability to foster shared working relationships within and outside the University combined with excellent written/verbal communication skills are required. The selected individual should be committed to maintaining expanding student diversity in accord with the University’s Mission.

Position requires an Associate/Full Professor in education with a background in one of the program areas of the School – curriculum studies, early childhood educational leadership, elementary education, human services and counseling, physical education, language, literacy and special education, secondary English, math, science, social studies, social and cultural foundations. A strong record of scholarship, broad-based knowledge/experience in teaching/research; considerable leadership in higher education; and demonstrated leadership competencies related to program development/implementations must be emphasized. Experience in administrative/teaching experience in higher educational contexts and in collaborative research across institutions/communities would be valuable. The School actively seeks to build and maintain a diverse faculty. Thus, the School seeks a Program Director that can bring a critical perspective to the issues of urban education, diversity, multiculturalism, reflective practice, and social justice; experience and capacity to integrate technology into the University curriculum is appreciated.

Assistant Professor—Educational Leadership: The individual we seek requires expertise in one or more of the following areas: school finance, school law, and capacity to integrate technology into administrative decision making and accountability. Recent administrative experience in a large urban school system with a culturally and linguistically diverse population is preferred. Committed to urban education. Applicant should be prepared to teach graduate courses in the Master’s program and the Ed.D. program in Educational Leadership, guide residents in their internship/observations, sustain a scholarly agenda, collaborate with students and faculty in research and program development, and engage in service to the University/community.

Required qualifications for all positions: Earned doctorate required for appointment; defined research agenda; ability to work collaboratively within and across programs; two areas of expertise to contribute to the School; recent experience with culturally diverse urban populations; commitment to urban education; and excellence in teaching, service and scholarship or demonstrated potential.

Salary is commensurate with qualifications and experience. Please send letter of application clearly delineating qualification for area of expertise; complete and up-to-date vita and official transcripts; one example of recent professional publication/book or presentation; teaching and philosophy of teaching and three to five professional letters of reference sent directly. Review of applications will begin January 15 and continue until the positions are filled.

Send all applications and materials to: Nancy S. Williams, Associate Dean, School of Education, DePaul University, 2330 North Kenmore, Chicago, IL 60614. Fax: 773-262-7713. Applications received by e-mail will not be accepted. DePaul University is committed to diversity and equality in education and employment.

COE COLLEGE
Assistant Professor of Theatre Arts
Beginning August 2001

M.F.A. or equivalent terminal degree required. Experience with professional and/or undergraduate teaching preferred. EQUAL OPPORTUNITY AFFIRMATIVE ACTION EMPLOYER
Qualified women, persons with disabilities, and minority candidates are encouraged to apply.
FACULTY POSITIONS
Full-Time, Tenure Track

The College of Lake County is a progressive community college located in Northern Illinois, approximately 45 miles north of Chicago, with a student enrollment of 15,000. Dedicated to excellence in teaching, the College supports and encourages the development of multicultural perspectives, the celebration of diversity, the recognition of different learning styles and a "high tech/high touch" approach to education. The following full-time, tenure track positions are available in the following areas for Fall 2001:

**BIOLOGY** — Requires a Master’s Degree in Biology.

**COMPUTER INFORMATION SYSTEMS** — Requires a Master’s Degree in Computer/Management Information Systems or Computer Science and at least 2 years of industry experience in network technologies OR a Bachelor’s Degree in Computer/Management Information Systems or Computer Science and at least 3 years of experience in network technologies, OR a Bachelor’s degree and at least 7 years of experience in network technologies.

**DENTAL HYGIENE** — Requires a Bachelor’s Degree in Dental Hygiene or related field, eligibility for licensure in Illinois and at least 5 years of full-time current clinical work experience.

**ELECTRONICS** — Requires a Bachelor’s of Science Degree in Computer Science, Computer Engineering or Electrical Engineering and knowledge of computer networking (preferably CISCO).

**ENGLISH** — Requires a Master’s Degree in English, or a closely related field.

**GEOLGY** — Requires a Master’s Degree in Geology.

**HISTORY** — Requires a Master’s Degree in History.

**HUMAN SERVICES** — Requires a Master’s Degree in Behavioral Sciences or Human Services and work experience in social services, including addictions counseling.

**MULTIMEDIA** — Requires a Master’s Degree in Educational Technology, Multimedia Art, Communications or Computer Science.

**PHYSICS** — Requires a Master’s Degree in Physics or Physics Education.

The College seeks candidates who have had multicultural experience and who can demonstrate a commitment to diversity and multiculturalism. For full consideration, applicants must submit a completed application form, current resume, letter of interest, three letters of recommendation, and official transcripts of degrees by February 23, 2001.

For application, contact the Human Resources office, via any of the following: phone: 847-224-5227 (STD); 847-223-5615 (TDD); 847-223-0824 (fax) and personnel@clc.cc.il.us (e-mail). We are an Equal Opportunity and Affirmative Action Employer, dedicated to diversity, which encourages the application of Women, People of Color, Persons with Disabilities and Veterans.

UNIVERSITY OF MICHIGAN

POSTDOCTORAL POSITIONS IN BIOCHEMISTRY / MOLECULAR BIOLOGY / TRANSLATIONAL RESEARCH / MOLECULAR GENETICS

The Department of Dermatology, University of Michigan is seeking highly motivated, creative scientists to fill NIH Training Grant-funded and other postdoctoral positions.

Applicants should possess a PhD or MD. An emphasis in Biochemistry, Molecular Biology, Epidemiology, or Genetics is desirable.

Postdoctoral positions are available in the following areas:

1. Molecular characterization of skin responses to ultraviolet light, with emphasis on signaling pathways controlling collagen biosynthesis and degradation (Drs. Gary Fisher and John Voorhees).
2. Molecular characterization of abnormal signaling pathways in non-melanoma skin cancer, with emphasis on patched/hedgehog and ErBb signaling pathways (Dr. Andrew Dlugosz and James Elder).
3. Translational skin disease research, with emphasis on clinical/basic science correlations, immunomodulatory and ultraviolet light therapies (Dr. Seon K. Kang).
4. Epidemiology of melanoma and non-melanoma skin cancer, with emphasis on development of evidence-based treatment algorithms (Dr. Timothy Johnson).
5. Genetics of multifactorial skin disorders, with emphasis on linkage analysis and positional cloning of psoriasis susceptibility genes (Dr. James Elder).
6. Biochemistry of matrix metalloproteinases, with emphasis on their role in connective tissue damage in skin disease (Dr. James Varani).

U.S. citizens and permanent residents will be considered for NIH training grant-funded positions. Additional positions are also available for qualified individuals eligible for the training grant mechanism.

Please clearly indicate the subject(s) that interest you. Send curriculum vitae and references to: James T. Elder, MD, PhD, Director of Research Training, Department of Dermatology, University of Michigan, 3312 CCGC, Box 0932, Ann Arbor, MI 48109-0932.

---

011 12/18/2000 HISPANIC OUTLOOK 71

The University of Michigan is a non-discriminatory, Affirmative Action employer. The Department of Dermatology encourages applications from individuals who will enrich and contribute to the cultural diversity of our University.

Barbara Kreutzmann
McHenry County College
8900 U.S. Highway 14
Crystal Lake, IL 60012

Application deadline is January 19, 2001, however applications will be considered until positions are filled.

(fax and e-mail not acceptable).

McHenry County College is an EO employer and committed to diversity in its college community.
Dean of Students & Associate Vice Chancellor for Student Affairs
University of Illinois at Springfield

The position's primary functions are to provide leadership and direction, as well as operational support, for a variety of student activities and programs that significantly enhance student life, co-curricular activities, and support services; provide programmatic and budgetary direction and management for units supervised; and respond to student issues and concerns. The Dean of Students/Associate Vice Chancellor for Student Affairs leads and supervises units administratively located in the Division of Student Affairs and reports to the Vice Chancellor for Student Affairs. The units include Career Services, Counseling, Disability Services, Health Services, International Affairs, Minority Student Affairs, Student Life, Student Newspaper, and the Office of the Dean of Students.

Duties and responsibilities include: leading and directing programs that significantly enhance student life and support services for an increasingly residential campus and maintaining appropriate support services for part-time commuter students; providing programmatic and budgetary direction and management for those units supervised; providing responses to student concerns, issues, and emergency situations; developing and implementing policies and procedures related to areas of responsibility; coordinating academic and student support and program development in areas of general counseling and student development, retention, and student activities for Student Affairs units; supervising long-range planning and assessment processes for units and coordinating research efforts; working with and coordinating efforts with other university and campus academic departments and units, and outside services and consultants, as appropriate; developing and administering budgets; and supervising unit directors and staff of the Office of the Dean of Students.

Minimum qualifications: Master's degree in student personnel services, higher education, counseling, or related field required, doctoral degree preferred; professional experience in student services in higher education, preferably in a college or university setting with a comprehensive set of degree programs and with a traditional as well as non-traditional adult student population; seven years of progressively more responsible experience in student affairs administration or related areas; excellent skills and experience, as well as theoretical background, in administration, management, and program development, general counseling/development of students, and planning, assessment, and research related to student affairs/learning, and demonstrated human relations skills and collaborative, team-building leadership style.

Located in the state capital, the University of Illinois at Springfield is one of three campuses of the University of Illinois. The UIS campus serves approximately 4,000 students in 19 graduate and 20 undergraduate programs. The academic curriculum of the campus emphasizes a strong liberal arts core, an array of professional programs, extensive opportunities in experiential education, and a broad engagement in public affairs issues of the day. The campus offers many small classes, substantial student-faculty interaction, and a technology enhanced learning environment. Its diverse student body includes traditional, non-traditional, and international students. Its faculty are committed teachers, active scholars, and professionals in service to society.

Applications and nominations should be sent to:

Chair, Dean of Students/Associate VCSA Search Committee
Office of the Vice Chancellor for Student Affairs
SAB 23
University of Illinois at Springfield
P.O. Box 19243
Springfield, IL 62794-9243

Applications should include a vita; a discussion of the candidate's academic and administrative accomplishments and interest in the position; and the names, addresses, and telephone number of five references. Consideration of applications will begin on January 22, 2001 and continue until an appointment is made. The anticipated start date for the appointment is as soon as possible, but at least by July 1, 2001. For more information about the University of Illinois at Springfield, visit our web site at:

www.uis.edu

The University of Illinois is an affirmative action/equal opportunity employer. Persons with disabilities, women and minorities are encouraged to apply.

The Center for the Study of Religion at Princeton University announces a postdoctoral research opportunity for the 2001-2002 academic year, pending final authorization of funding.

The position will support a junior scholar's project focusing on religion, race, and gender in American history and among people of African descent. Doctorate in any relevant field. The position requires no teaching but includes participation in a weekly workshop involving fellows and graduate students as well as faculty members. The position may supplement leave support already secured or fund a leave directly.

To apply, submit CV, 2 letters of recommendation, a 3-5 page proposal, and a published or unpublished paper relevant to the study of religion and race. Applications due postmarked February 15, 2001.

Buffalo State
State University of New York
Mathematics Department
Faculty Positions

The Buffalo State College Mathematics Department seeks candidates for the following two full-time, tenure-track faculty positions. Salaries are competitive based on qualifications.

ASSISTANT PROFESSOR – STATISTICS/MATHEMATICS

Responsibilities: Teach a typical course load consisting of nine hours/semester of undergraduate and graduate statistics and mathematics courses; grow professionally through scholarly activities such as research, grant-writing, and publishing; participate in departmental/college program development and committee work; and advise students.

Qualifications: Ph.D. in statistics or Ph.D. in mathematics with a strong background in statistics; the ability and willingness to effectively teach a wide range of undergraduate and graduate courses in both statistics and mathematics; evidence of effective teaching ability; knowledge of standard statistical packages; potential for scholarship; and effective communication skills.

Preferred Qualifications: Experience in any of the following: industry or consulting work in statistics; grant-writing; course and program development; and innovative teaching with technology.

ASSISTANT PROFESSOR – MATHEMATICS EDUCATION

Responsibilities: Teach a typical course load consisting of nine hours/semester of undergraduate and graduate mathematics education and undergraduate mathematics courses; grow professionally through scholarly activities such as research, grant-writing, and publishing; participate in departmental/college program development and committee work; supervise student teachers; supervise masters’ projects; and advise students.

Qualifications: Ph.D. or Ed.D. specializing in mathematics education, with a strong background in mathematics; ability to teach undergraduate mathematics courses; ability to teach undergraduate and graduate mathematics education courses; ability to supervise student teachers; evidence of effective teaching ability; potential for scholarship; knowledge of current issues in mathematics education; and effective communication skills.

Preferred Qualifications: Certification and experience teaching school mathematics; experience using computer/calculator in the classroom; and knowledge of current curriculum projects.

Benefits: TIAA/CREF or New York State Retirement Plan and disability programs, as well as health, prescription, dental, and vision plans, are provided. Other benefits include sabbatical and sick leave, group life insurance, and 403(b) tax-shelter programs. Faculty members are eligible to apply for study leaves and professional travel and professional development funds.

Both pages include links with information about Western New York and the city of Buffalo.

Application Deadline: Applications will be processed beginning January 25, 2001, and will continue to be accepted until the positions are filled. Applications received by January 25, 2001 will be guaranteed.

To Apply: Send letter of application, along with a vita, transcripts, and three letters of recommendation (at least one addressing teaching experience), to: Dr. Tom Giambroone, Chair, Mathematics Department, 317 Bishop Hall, Buffalo State College, 1300 Elmwood Ave., Buffalo, NY 14222.

Buffalo State is an affirmative action/equal opportunity employer.
The college serves more than 11,000 students and offers 155 undergraduate and graduate programs.

MARKETING DIRECTOR
University of Illinois at Springfield

The primary functions of the marketing director are to provide leadership and direction, as well as operational support, for campus marketing efforts related to recruitment, enrollment, and retention including market research, strategic marketing plans, advertising, publications, web development, and other needed services and products, and to coordinate marketing efforts with appropriate campus units. The marketing director supervises and leads the marketing unit administratively located in the Division of Student Affairs and reports to the Vice Chancellor for Student Affairs.

Duties and responsibilities include: directing, developing, and producing market research, advertising and publications, web development, and other services and products to meet campus marketing needs related to student recruitment, enrollment and retention; developing, coordinating, and implementing integrated campus marketing plans consistent with campus goals, evaluating marketing efforts, and revising strategies and action plans; working with and coordinating unit efforts with university and campus units, and consultants, as appropriate; developing and administering the unit’s budget; preparing special and periodic reports as needed; and supervising unit personnel, and representing the campus in community and professional organizations.

Minimum qualifications: Bachelor’s degree in marketing or related field, master’s degree preferred; professional experience in higher education, preferably in a college or university setting with a comprehensive set of degree programs and with a traditional as well as non-traditional adult student population; five years of progressively responsible experience in marketing and related areas; demonstrated achievement in creating and implementing effective marketing plans and programs; familiarity with new technologies in print, multimedia, and web design; and demonstrated human relations skills and collaborative, team-building leadership style.

Located in the state capital, the University of Illinois at Springfield is one of three campuses of the University of Illinois. The UIS campus serves approximately 4,000 students in 19 graduate and 20 undergraduate programs. The academic curriculum of the campus emphasizes a strong liberal arts core, an array of professional programs, extensive opportunities in experiential education, and a broad engagement in public affairs issues of the day. The campus offers many small classes, substantial student-faculty interaction, and a technology enhanced learning environment. Cazenovia College

BIOLOGY

Cazenovia College invites applicants for a full-time Assistant Professor, tenure-track position. The successful candidate’s teaching responsibilities will include classroom, laboratory, and field courses in General Biology, Zoology, Cell Biology, Ecology and related disciplines. The position requires participation in student recruitment activities, academic and co-curricular advising, science curriculum development, maintenance and improvement of laboratory facilities, and governance and planning structures of the College.

Successful candidates will present evidence of interest and preparation in teaching their subject fields, including college-level teaching experience. Minimum qualifications include an earned doctorate in Biology or in Science Education (Biology emphasis with the capability to supervise undergraduate research), or in a related field by the time of appointment or shortly thereafter. The ability to teach introductory college-level mathematics is a plus.

Rank and salary will be commensurate with experience. Send a letter of application that addresses the qualifications, current curriculum vita, a statement of teaching philosophy, and the names, telephone numbers, and e-mail addresses of three references: Biology Search, Human Resources Office, 12 Liberty Street, Cazenovia College, Cazenovia, NY 13035. Application deadline is January 16, 2001. Appointment begins August 23, 2001.

Cazenovia College is located in the scenic Central New York village of Cazenovia, 20 miles southeast of Syracuse. For further information, visit our website at:

www.cazcollege.edu

AA/EOE

Interdisciplinary Environmentalist. Assistant Professor (tenure-track). School of Interdisciplinary Studies, Oxford Ohio. The School of Interdisciplinary Studies has created two new undergraduate majors in Environmental Studies and Environmental Science to complement our innovative undergraduate major in Interdisciplinary Studies. We seek a colleague who, through research and life experience, will enhance the multicultural dimension of these majors. The position involves co-designing and team-teaching undergraduate courses in the areas of natural science, social science and/or the humanities. The successful candidate will be able to team-teach in at least two of these three areas.

Desirable areas include: conservation; sustainable development; ecology; environmental education, ethics, or law; international policy; and the intersection of the environment with issues of race, class, and gender. Requirements: a Ph.D. (or other appropriate terminal degree) by August 2001; 2) a letter of application that specifically address the candidate’s teaching philosophy and potential contribution to the new majors and multicultural aspects of the program; 3) a vita; 4) three letters of recommendation; and 5) evidence of high quality scholarship—broadly defined—and innovative, high-quality teaching and advising.

Address all materials to: Search Committee Chair, School of Interdisciplinary Studies, Miami University, Oxford, Ohio 45066. Review of applications begins February 1st, and continues until the position is filled.

Miami University is an equal opportunity/affirmative action employer.
Faculty, Assistant or Associate Professor

Tenure-Track Education Positions

We seek creative colleagues who are generalists, and can and want to work collaboratively to envision and implement new programs. They need to be grounded in public school practice and research, and have a sound knowledge of social issues in education. Qualifications include an earned doctorate in education, teaching experience in higher education and K-12 schools with diverse populations, strong teaching and interpersonal skills, interest and/or experience in program development, a demonstrated research agenda, and a commitment to undergraduate teaching and student advising. Teaching responsibilities during the first several years, as we finish teaching the current programs, include: courses in traditional education courses such as foundations of education, subject-specific pedagogy in the humanities or social sciences, general methods, reading courses, or supervision of student teachers. Expertise in either elementary or secondary education is welcome. Preference will be given to candidates with experience and interest in interdisciplinary work, teacher education reform, developmental practice, and alternative assessment. The department is committed to hiring faculty of color.

Interested candidates should send a letter of application, vita, transcripts, copies of relevant publications, and three confidential letters of recommendation, one of which should be from a student, to Dr. Deborah Roos, Chair of the Education Department, Albion College, Albion, MI 49224. Review of applications will begin on January 5, 2001.

Albion College is an Equal Opportunity Employer and committed to diversity as a core institutional value.

**Vice President for Academic Affairs**

Oakton is a dynamic community college with two campuses serving the North Shore suburbs of Chicago. The College is known for its academic innovations, commitment to excellence in teaching and learning and solid financial position. With an enrollment of 20,000 headcount/7,000 FTE students, Oakton is seeking a candidate to fill the position of Vice President for Academic Affairs.

As the chief academic officer of the institution and a member of the President's Council, the Vice President for Academic Affairs is responsible for providing leadership to the academic administrators and faculty. The Vice President oversees credit-based academic programs and activities, curriculum development, instructional and institutional assessment, and participates in relevant personnel matters and the development of academic budgets. The successful candidate will have a demonstrable commitment to academic excellence and innovation, appreciate the characteristics and needs of community college students, be an effective problem solver, value collaboration, and be receptive to individual diversity and alternative ideas. Essential qualities should include effective oral and written communications skills, integrity, respect for others and a sense of humor.

Applicants should have an earned doctorate and substantial experience in college teaching, as well as three to five years of progressive administrative responsibilities, including the administration of credit curricula and programs and services consistent with those offered at the College.

To apply, submit your curriculum vita and letter of application to Oakton Community College, Human Resources, 1600 East Golf Road, Des Plaines, IL 60016-1268, (847) 635-1675, fax: (847) 635-1764, e-mail: admsearch@oakton.edu. For more information visit our Web site at www.oakton.edu.

Nominations may be submitted to President Margaret Lee at the above address or via e-mail to pleas@oakton.edu.

Confidential screening of applicants will begin on January 15, 2001 and will continue until the position is filled. Preferred starting date is July 2, 2001.

---

**MIAMI UNIVERSITY**

History Tenure Track Assistant Professor

Position begins Fall 2001. Miami University Middletown, PhD in History and teaching experience required. Any specialization in US History welcome. Teach introductory history and intermediate US History courses and fulfill service and scholarship expectations appropriate to regional campuses. Submit application, CV, letters of recommendation, evidence of teaching effectiveness and statement of teaching philosophy to:

Ms. Martha Stevens
Co-Chair
History Search Committee
Miami University Middletown
4200 East University Blvd.
Middletown, OH 45042

Screening begins December 11, 2000.

EQUAL OPPORTUNITY IN EDUCATION AND EMPLOYMENT.

Oakton Community College is a caring community of educators dedicated to excellence in teaching and learning. We encourage applications from candidates who reflect the increasing diversity present in our community and student body, and who will enhance and promote engagement with other cultures. Applicants should be current in their use of evolving technologies, have an interest in promoting critical thinking, and willing to challenge our students to be knowledgeable, ethical and capable global citizens. A strong interest or capability in non-traditional instructional delivery is also desirable. Oakton is located 17 miles from downtown Chicago and has campuses in Des Plaines and Skokie.

The following tenure track positions are available for the 2001-2002 academic year, beginning in August:

**Biology**, two positions. Master's or doctoral degree in biology or related area is required. Preferred qualifications include past teaching experience and a commitment to innovations and learning. The primary teaching responsibility will be Introductory Biology (for non-science majors) and College Biology I and II (for science and pre-professional students). Human Anatomy and Physiology may also comprise a partial assignment for one of the positions.

**Computer Technology and Information Systems**, two positions. Bachelor's degree in a computer-related discipline and a minimum of one year of work experience are required. Preferred qualifications include college-level teaching experience or appropriate industrial certifications. The candidate should be able to teach computer literacy courses, as well as teach in one or more of the following areas: computer programming; web development; Microsoft Office and desktop publishing applications.

**Electronics (Computer Hardware) and Local Area Networks**, one position. Bachelor's degree in electrical engineering, electronics engineering technology, or a related science, and a minimum of one year of work experience are required. The candidate will teach electronics technology courses leading to A+ certification and local area networking courses. Preferred qualifications are possession of current industrial certification and/or teaching experience.

**English**, one position. Master's degree in English or a related field (such as rhetoric and composition, or a master's degree in TESL, linguistics, or a related field) is required. Preferred qualifications are a secondary interest in service learning, educational technology, journalism, film, or interdisciplinary general education. We seek a specialist in either composition or ESL with the ability to teach courses in another specialty.

**History**, one position. Master's or doctoral degree in history is required, with a desire to teach a wide variety of undergraduate history offerings in a very diverse, smaller-class environment. Preferred qualifications include an ability to teach non-western history, regional history, or geography. Focus of teaching will be in U.S. History and Western Civilization.

**Humanities/Asian Studies/Asian Language**, one position. Master's degree in humanities, with a specialization in non-western humanities and philosophy, a minimum of 15 graduate semester hours in an Asian language, preferably Japanese, and native or near-native fluency are required. Preferred qualifications include language teaching experience and/or language experience resulting from residence, study or travel in a country where the target language is spoken. The candidate will teach non-western humanities, philosophy and language courses at beginning/intermediate levels.

**Humanities/Modern Language**, one position. Interdisciplinary master's degree in humanities or master's degree in a specific humanities discipline, plus a minimum of 15 graduate semester hours in German, Italian or Spanish are required. Native or near-native fluency in the language is required. Preferred qualifications include successful college teaching experience and language experience resulting from residence, study or travel in a country where the target language is spoken. The candidate chosen will teach general humanities courses, introductory courses in a specific humanities discipline, and language courses at the beginning/intermediate levels.

**Library Services**, one position. Master's degree in Library Services (ALA accredited), at least 3 years of professional library experience, supervision of library staff, and familiarity with online systems of delivering library services are required. Preferred qualifications include research, experience in an academic library, a second master's degree, teaching experience or solid workshop presentations, and a working knowledge of HTML and its derivatives.

**Modern Languages: French, German, Italian, Spanish**, one position. Master's degree in modern language or a related field and a minimum of 15 graduate semester hours in a modern language are required. Native or near-native fluency in both languages and English is required. Preferred qualifications include successful teaching experience and/or language experience resulting from residence, study or travel in a country where the target language is spoken. The candidate chosen will teach beginning and intermediate courses in two of these languages.

**Mathematics**, two positions. Master's or doctoral degree in mathematics or mathematics education with a minimum of 18 graduate semester hours in mathematics, and strong communications and presentation skills are required. Preferred qualifications include a doctorate in mathematics or mathematics education, and past college teaching experience. Faculty members will teach mathematics courses from developmental mathematics through calculus and differential equations. An interest in teaching basic courses is a plus.

**Nursing**, one position. Master's degree in Nursing and the equivalent of at least two years of full-time clinical experience are required. Preferred qualifications include teaching experience in medical-surgical nursing and in one other specialty, past success with culturally diverse and marginal students, an ability to work with other nursing faculty. The successful candidate will teach didactic and clinical sections in the Associate Degree Nursing program.

**Philosophy**, one position. Master's degree in philosophy is required. The preferred qualification is a specialization in ethics. The candidate chosen will have successful college teaching experience in the full range of introductory courses: introduction to philosophy, ethics, logic, history of philosophy I and II, and world religions.

**Student Development**, two positions. Master's degree in counseling, counseling psychology, social work or a related field including at least 15 graduate hours in counseling and/or group work, plus supervised counseling experience are required. Candidates must have the credentials to teach within an academic program offered by the college and generally will be expected to assume a six-hour teaching load each semester. These positions include significant responsibility for providing short-term counseling, developmental advising and the design, delivery and ongoing evaluation of student development programming and interventions. Preferred candidates will possess a unique integration of teaching, counseling and advising skills, and will present evidence of their experience in applying student development theory to practice with a highly diverse student population in a higher education setting.

To request an application packet, contact Human Resources, Oakton Community College, 1600 E. Golf Rd., Des Plaines, IL 60016, 847-635-1675. Fax: 847-635-1764, e-mail: facsearch@oakton.edu.

For information or an application form, go to www.oakton.edu. To apply for a position, submit a cover letter, résumé, application and two letters of recommendation to the address listed above. Review of application materials begins January 8, 2001 and will continue until the positions are filled. - EOE -
Fifty years ago, Octavio Paz wrote a severe assessment of the Pachuco in *The Labyrinth of Solitude* (1950). In the 1940s, at the height of WW II, he had seen zoot-suited young Mexican Americans in L.A. harassed by the press and by sailors. Paz, 1990 Nobelist, had described the Pachuco as a borderline personality, lacking identity, neither Mexican nor American.

In 1992, in a Beverly Hills diner, he told me, “That was then. I saw rebels without a cause. Futility. Today, I would see it differently.”

That pernicious ‘40s climate was portrayed by California author Thomas Sánchez in *Zoot-Suit Murders* (1978).

Sánchez told me he wanted to address the time frame of his late father, missing in action in 1943, when the U.S.S. Lipscomb Bay was sunk. While that father never met was defending the U.S., citizens in L.A. were attacking his brothers and sisters. Author Sánchez was shocked to learn that 20 taxis of sailors had converged on a local theater and, without provocation, singled out Mexicanos to beat, as the L.A.P.D. and the M.Ps looked the other way.

His political novel is riveting. It depicts the unwarranted obsessions of California’s Committee on Un-American Activities and the L.A. Sheriff’s Department for Subversive Activities—and the biased coverage by the * Examiner* newspapers of East L.A. barrio street gangs, who affirmed Hispanic individuality by their attire. From the threads of suspicion, betrayal, fear, xenophobia, manipulation, and scapegoating of minorities in times of war and economic crisis, Sánchez weaves an ugly tapestry of the dark world that his characters fall victim to.

In 1981, Luis Valdez, founder of El Teatro Campesino, produced the film *Zoot Suit*, starring Edward James Olmos, and based on the 1942 Sleeper Lagoon Case, in which a man was fatally run over by a car, and the L.A. District Attorney, fueled by the * Examiner’s* sensationalism, tried and convicted 22 Pachucos/Zoot-Suiters. Only after an appeal revealed many breaches by the bench were they acquitted. Orson Welles founded The Mexican-American Defense Committee that helped overturn the conviction.

Paz had recognized Beatrice Winston Griffith, *American Me* (1948), as the first to write about the Pachuco. Her book was appropriated by Olmos for a 1992 film, which opens with the gang rape of Esperanza by U.S. sailors in an L.A. tattoo parlor. She becomes pregnant and bears a son, father unknown. That son, the protagonist, heads the Mexican Mafia, and dies as violently as he was conceived.

It seems a cursed syndrome of violence had snared the Pachucos. I reminded Paz that their spiritual progenitors were as varied as their descendants. The Mexican Peñón who in 1910 raised his fist with Zapata and Villa against oppression and injustice, saying, “No más” was no different than John Steinbeck’s Paisano in *Tortilla Flat* (1935), struggling nobly to preserve the unique Hispanic heritage, threatened after WW II by cultural invasion and transition. The Pachuco’s spiritual descendants are as diverse.

In the ’80s, Chicano literature was about carefree and fatalistic Vatos locos who ride around all night in souped-up cars with hydraulic lifts. Oscar Zeta Acosta narrates his colorful exploits in *Brown Buffalo* (1972) and *Revol of the Cockroach People* (1973). These offer self-deprecating humor bordering on a Hispanic sense of blasphemy. Pandillas (gangs), drive-by shootings, and Cholos, with their baggy pants, might appear as the last manifestations of the Pachuco spirit of survival and resistance. They are not.

The Pachuco spirit of cultural affirmation prevails in music. In the ’80s, Los Lobos created original romantic ballads that gave the Barrio and Pachuco heirs new pride and challenged Hispanic commercial stereotypes. Los Lobos converted the Pachuco’s bonding sign—a tattooed cross with three dots found next to the thumb—as the spiritual symbol of abandonment to Christ’s suffering and the Trinity. Their faith gives hope to the Barrio.

Today, Quezal songs such as “Grito de Alegria” and “Todos Somos Ramon” remind them and the world of the Indigenous Mayan insurrection of Chiapas, Mexico.

Los Otros turn philosophical and theological. “Solo Quería Su Amor” asks why the children of the father who held down several jobs to make ends meet never knew him, when all he wanted was their love. It is the story and heart of the Pachuco, whose father was once a Peñón, a Paisano, and whose heirs include the Vato, the Cholo and Pandillero.

Fifty years later, the Pachuco spirit lives on!

BY GUSTAVO A. MELLANDER

Increased Opportunities in the Federal Workforce

As is well documented, Clinton selected the most diverse Cabinet in the nation’s history. He also appointed the highest number of Hispanic Americans throughout the government as well as nominating the most for judicial positions.

Hispanic Americans made up seven percent of Senate-confirmed appointments, including Bill Richardson, Henry Cisneros, Frederico Peña, and Aída Alvarez.

Nine percent: of presidential appointments, including boards and commissions, were held by Hispanic Americans, including Assistant to the President and White House Deputy Chief of Staff María Chávez; Assistant to the President and Director of Intergovernmental Affairs Mickey Ibarra; Secretary of the Army Luis Caldera; Equal Employment Opportunity Commissioner Ida Castro; Office of Personnel Management Deputy Director John U. Sepúlveda; Federal Communications Commissioner Gloria Tristani; and Selective Service Systems Director Gil Coronado.

Six percent of all President Clinton’s judicial appointments were Hispanic Americans, including the Honorable Richard Paez, judge, Ninth Circuit U.S. Court of Appeals; the Honorable Jose Cabranes, judge, Second Circuit U.S. Court of Appeals; the Honorable Julio Fuentes, judge, Third Circuit U.S. Court of Appeals; the Honorable Carlos Moreno, judge, Central District of California, U.S. District Court; and the Honorable Hilda Tagle, judge, Southern District of Texas, U.S. District Court.

President Clinton appointed as many Hispanic Americans to the federal judiciary (23 total) as Presidents Bush and Reagan combined, and has appointed more Hispanic Americans to the federal Courts of Appeals than Presidents Bush, Reagan, and Carter combined.

Nevertheless, Hispanics remain underrepresented in the Federal workforce: they comprise only 6.4 percent of the Federal civilian workforce, roughly half of their total representation in the civilian labor force.

Before leaving office, Clinton also took steps to continue his legacy. Less than a month before the election, the press and many Washington luminaries were invited to witness the signing of a new Executive Order to “improve government recruitment and career development of Hispanic Americans—a group historically underrepresented in the federal workforce.”

Studies published by the Office of Personnel Management, the General Accounting Office, and the Merit Systems Protection Board document that imbalance. Hispanic Americans are 6.4 percent of the federal workforce and only 2.7 percent of the Senior Executive Service, despite being 11.4 percent of the U.S. labor force.

The task is formidable. To improve the representation of Hispanics in federal employment without enraging other groups, due respect must be paid to merit system principles and veterans preference criteria.

To reach its lofty goals, systemic barriers must be removed to the effective recruitment and consideration of Hispanics, including but not limited to: broadening the area of consideration to include applicants from all appropriate sources; ensuring that selection factors are appropriate and achieve the broadest consideration of applicants and do not impose barriers to selection based on non-merit factors; and considering the appointment of Hispanic federal executives to rating, selection, performance review, and executive resources panels and boards.

Plans have also been launched to ensure that managers and supervisors receive periodic training in diversity recruitment and management.

The Interagency Task Force shall meet semi-annually to review best practices in strategic human resources management planning, including alignment with agency goals.

It will also issue an annual progress report with findings and recommendations directed to the President. The first annual report shall be issued no later than this year.

Legacy

Clinton is frequently criticized and even demeaned for his focused fascination on his legacy. He will most certainly be remembered for many things. Historians and the rest of us will have plenty of time to add our two cents. Bias, prejudice and party loyalty will undoubtedly be part of the mix. But as to Clinton’s legacy on helping more Hispanics secure jobs in the federal government—the record seems pretty clear.

Dr. Mellander is a professor at George Mason University.
So long 2000, Hello New Millennium

After a drawn-out, almost painful and absurd election process, our nation's new president might be in the building. Citizens don't want to hear the words "electoral college, ballots, or recounting." Not for a while anyway. However, I can't help but wonder what fate the electoral college will face. Is this the beginning of its demise? The Constitution's framers were wary of giving the masses the power to directly elect the president, as some felt the citizenry too beholden to local interests. Is it time to bring on the popular vote? Until this election, more people were finally recognizing the value of exercising their voting rights. But as the electoral college issue took center stage, red flags and individual disenchantment arose, bringing this momentum to a halt. Article after article in the print media and news commentaries suggest that maybe it's time for a change. Stay tuned.

In looking forward, one of our articles examines trends and the changing nature of work in the 21st century, and its impact on education. "Unemployment is at an all-time low...Minority employment is rising rapidly as industries look for new ways to fill vacancies." Despite an increase in telecommuting and technology to help increase efficiencies, people continue to spend more time working than with family, and findings show that Hispanics tally up even more hours than do other ethnic groups.

The need for cultural competence in health care is another area of importance to our ever-growing population. Tests, diagnoses, and prescriptions are part of the clinical component of medical care, but there must be more than that. Health care professionals, in addition to medical expertise, must have culturally appropriate bedside manner "by adjusting their attitudes and behaviors to account for the impact of emotional, cultural, social, and psychological issues..."

Up next is our Financing a College Education issue, in which we will have more on scholarships, Pell grants, and student loans.

"Can't start 2001 without mentioning resolutions. In part, resolutions are an attempt to finish unfinished business. Some familiar themes for people include losing weight, saving money, furthering one's education. For universities, these new year's declarations can translate into not making the Dirty Dozen list again or at all; perhaps adding an expanded wing on campus or new library acquisitions.

One of H0's resolutions is to continue printing features of interest that'll keep you asking for more. What are your New Year's resolutions? Fax or email us. Stay in touch.

Atentamente,

M. Saussez

Letters To HO

A Positive Pursuit

A sincere thank you for featuring our annual Latino Youth Conference in your publication ("Citrus College Latino Youth Conference—Step by Step," Oct. 23). It is an honor for Citrus College to appear in the pages of such a reputable and positive publication. A special thanks is owed to Adriana Meucci for her writing of such an excellent story.

The annual Latino Youth Conference is instrumental in removing the barriers that stand in the way of young Latinos and their pursuit of a college education. Your story reflects our commitment and supports us in that pursuit.

Sincerely,
Maxwell Sucee
College Promotion Specialist
Citrus College

Keeping the Faith

I received the issue of HO featuring the Hispanic Theological Initiative ("Creating a Generation of Public Intellectuals," Oct. 23). I want to thank you for your fine work in helping us spread the word about our program and the great need there is for Latina/o faculty in theology and religious studies. We have been taking the journal with us in our presentations hoping that this too will alert others to your work in bringing to the fore the concerns, labor, and achievements of Latinas/os (and our supporters) in the various facets of society.

I want to thank Gary Stern for doing an excellent job in capturing the essence of HTI and its contributions to the religious and academic communities (Latino and otherwise). He did a wonderful job weaving our interviews together. Again, your article on HTI will help further our work by helping to place our efforts and concerns before a wider public. ¡Les deseo mucho éxito y larga vida!

Con agradecimiento,
Zaida Maldonado Pérez
Director
Hispanic Theological Initiative
Vision Spells Change for CUNY

Enrollment up Five Percent

BY MICHELLE ADAM

Herman Badillo was 11 years old when he moved with his family from Puerto Rico to the mainland United States. His future in New York City depended on receiving a good education—both in his early teens and later—despite the economic hardships his family faced. It came to reason, then, that in 1947, Badillo attended the free City College, which is now a part of City University of New York (CUNY).

"We were all poor and came from the Bronx, Brooklyn, or Manhattan. This school has been the university of opportunity for the poor. It opened doors for me in New York City," he said.

It was only a matter of time before Badillo joined the ranks of Colin Powell and many other less affluent New Yorkers who made a name and place for themselves upon graduating from CUNY.

"There were more CEOs and heads of companies—not to mention Nobel Prize winners—that graduated from City College from my generation than from Harvard and Yale," said Badillo. He himself became the first full commissioner of Hispanic origin of New York City, the first Latino to serve as borough president of the city upon his Bronx appointment in 1965, and, in 1970, the first congressman of Puerto Rican origin in the history of the nation.

The school that Badillo is so proud of having graduated from is today anything but an "accolade" university. And he is the first to admit it.
"At the time I attended, it was a very tough school to get into. You had to have an A average," he said. But today is a very different story. He cites graduates from Medgar Evers College and York College—two of CUNY's 20 junior, senior, and graduate schools—with degrees in education who are incapable of passing teacher's exams in English. He refers to a 1994 Daily News story regarding a Puerto Rican who failed to pass a teacher's exam 12 times and yet was accepted to teach college. CUNY's law school, he says, currently has the highest rates of failure on bar exams in the country.

Badillo's comments are merely a reflection of what he describes as a university with a "bad reputation," one that has only worsened since 1969, when standards were eliminated and open enrollment was enforced.

Although quick to criticize what CUNY has become for the 350,000-plus students currently attending, it is Badillo who has taken the reigns of his alma mater as chair of its board of trustees, and Badillo who is turning the school around. "I want to ensure that the students who graduate are held in the high regard that I was. I am leading the way toward changes to restore the school to how it was," he said.

Since Badillo was appointed chair by Governor George Pataki in 1999, there has been a complete revamping of CUNY. New Yorkers are already witnessing changes since the mayor's advisory task force on CUNY produced a comprehensive report, An Institution Adrift, citing that the school had no accountability to standards and was therefore losing enrollment and producing low graduation rates.

Changes at CUNY have especially drawn the attention of The New York Times, which most recently reported that the number of first-year nation's leading urban university in terms of size, comprising 11 senior colleges, six community colleges, a graduate school, a law school, and a medical school. It is also the third largest university system in the United States, playing a crucial role in the lives of Latinos, who make up about one third of CUNY first-year students. It is no wonder, then, that Badillo, despite his busy schedule running a NYC law firm, has made it his priority to raise the standards and reputation of his alma mater. "I have always been concerned with improving the image of CUNY," he said.

As a member of Congress from 1970 to 1978, during which he was one of the most liberal members, he "came to the conclusion that we live in a very conservative country." While Badillo served his term in office, back home, New York City was undergoing a fiscal crisis, and CUNY changed its policy to open enrollment, eliminating certain standards and enacting a minimal tuition requirement. In 1978, Badillo returned home to become deputy mayor of New York City under Mayor Edward Koch, followed by his work in private practice.

If there was a lesson he learned during his time in public office, it was the following: "The one thing we all agree on is education. If we can ensure our people get a good education, then they can go out and get a good job and health care."

Shortly after Badillo's appointment as chair of the board of trustees, he secured approval
from the New York State Board of Regents to change the policy of open enrollment that had been in effect for 30 years. Under the change, students are required to pass tests that show readiness for college in order to matriculate at a four-year college. Badillo has also been working with NYC's Mayor Rudy Giuliani to eliminate social promotion, a process by which students are passed despite failing grades. For those concerned about higher standards, the University will yet have summer immersion programs and the opportunity for students to enroll in community colleges where remedial programs can help prepare them for four-year senior colleges.

But establishing higher standards is only the beginning. Recognizing that many New York City students arrive at CUNY ill-prepared by high schools and middle schools, the University has established the first joint agreement in the history of NYC between CUNY and the City's school system. As part of the partnership, CUNY will help prepare high school students for college study and recruit and train new teachers for the City. Their "College Now" program is being expanded to begin in the ninth grade, preparing all students in high school for college within the next three years.

"Instead of waiting for them to come to us, we are sending professors to go to the high schools," said Badillo.

Badillo's vision is not only to bring back to life a CUNY that once served New Yorkers of all races and classes with a high quality education, but to have this large public university intricately woven into the greater fabric of the City. New programs and initiatives are in place to help increase the number and the quality of sorely needed teachers in New York schools. In July, new teacher training was introduced, with scholarships and training being provided to highly qualified students to pursue teaching degrees. Badillo has also helped establish a business leadership council, which includes major industry leaders who will advise and assist CUNY on career and internship opportunities for students and create bridges between the business community and the university.

The new CUNY Institute for Software Design and Development, a first-time University consortium based at the Graduate Center, is also spurring the development and commercialization of advanced software technologies and software engineering methods.

CUNY is undergoing many more changes under Badillo's leadership. From building a new Honors College, hiring new college presidents and teachers, and establishing accountability at all levels to completely reorganizing the administrative structure of CUNY, the goal is nothing less than to build a top-rate university. "We are a university on the move," said Badillo.

Badillo looks forward to the opportunities that await CUNY. Today Badillo leads The Master Plan 2000-2004, which reflects, for the first time, the long-range goals of CUNY.

As the nation's leading urban university, in the heart of New York's diverse immigrant population, CUNY has the opportunity to provide a model of excellence for other universities catering to large Latino populations. Rather than merely offer an affordable and easily accessible university for all, Badillo hopes to help grow a new breed of diverse graduates who, like him, can become leaders and role models for New York City and the nation at large. And, like him, those students from abroad or from the poor enclaves of this rich immigrant city will know that there is yet a university that will not only open its doors of affordable education, but provide them with the skills to achieve their own dreams.
TACHE Determined to Boost Hispanic Faculty

Full-Court Press on Five-Point Agenda

BY JEFF SIMMONS

Jude Valdez recalls the day he became part of a movement.

He was, in his own words, a “lowly graduate student” in a room of “real heavyweights.” The group of deans, professors, and other Hispanic educators had gathered on the campus of the University of Texas in Austin to brainstorm.

The agenda: to discuss the climate on college campuses across the state and to determine what could be done to address the needs of Hispanic educators. The conclusion: something had to be done to raise both awareness and the ranks of Hispanics on campus.

Out of that meeting of 50 educators and students was born the Texas Association of Chicano Faculty in Higher Education.

That was 26 years ago.

Today, the same goals prevail. What began as a grassroots organization has grown into an influential force not to be ignored. The organization now boasts more than 600 members, including 70 individual colleges and universities.

“I don’t recall thinking whether this thing will last,” says Valdez, whose term as president expired earlier this month. “I just knew we needed an organization to serve as an advocate for Hispanics in higher education.”

He pauses, and reflects on the group’s growing influence. “We are the mouse that roared,” he says with a laugh. “We’re a small organization, but we’re very focused, and we’re making ourselves known.”

The organization marked the turn of the century with a new two-year program orchestrated to bring attention to the plight of Hispanic educators in the state. TACHE 2000 is aimed at directing a spotlight on the underrepresentation of Hispanic faculty and staff at colleges and universities.

It’s not a new or localized problem. It’s one that TACHE’s founders recognized back in 1974 and continue to lament today and consider “a silent crisis.” The number of Hispanic professionals has remained low, while the number of Hispanic students has not.

“We want to bring attention to the serious crisis that exists in higher education in Texas,” Valdez says. “The second part of the plan is to do something about it—to advocate for change for a reversal of that trend, that condition.

“The toughest obstacle has been the mindset that there is no problem, the inertia.”

JUDE VALDEZ, IMMEDIATE PAST PRESIDENT, TACHE
2030, Whites will represent 37 percent of the population of Texas, Blacks will represent 10 percent, and Hispanics, a whopping 45.9 percent. Hispanic college enrollment will increase by 71 percent over the next three decades, and will account for 48 percent of the student body by 2030.

TACHE past-President Ed Apodaca recently penned “Crisis in the Ranks: The Underrepresentation of Hispanic Faculty and Administrators in Texas Higher Education.” The article concluded that the growth of Hispanic educators on campus dramatically trails the population growth, and even the student growth.

He noted that in 1998, only 4.8 percent of the faculty at state public universities was Hispanic, and only 3.5 percent had reached the level of professor. The scene was slightly better at community and technical colleges: 6.1 percent of the faculty was Hispanic.

The administrative record was moderately better. Hispanics represented 11.8 percent of administrators at state public universities, and 15.7 percent of administrators at community and technical colleges.

His conclusion: “Campuses do not have a tradition of acceptance of Hispanic faculty, administrators, or their culture. Every step has been a battle, and the meager gains are evidence of how difficult it is to initiate change.”

“Obviously, not a lot has happened in Texas in terms of this issue,” Valdez continues. “There may be some interest in making changes on the part of individual institutions, but unless there is something to require them to do it, we’re not seeing much action. We’ve had decades to change things to bring larger participation, and it just hasn’t happened.”

TACHE has been working to initiate such change over the current academic year. TACHE leaders—all of whom are volunteers—have lobbied members of the Texas Legislature to propose legislation to attack the problem.

The campaign is the outgrowth of a summit meeting at which members, legislators, and other advocate groups convened last summer. “We locked the doors and got all of the people from throughout the state together and came up with a five-point legislative agenda,” says Valdez, who is vice president for extended services at the University of Texas at San Antonio. “These are specific legislations that would be enacted in Texas to address the crisis. Now we’ve been taking the issue throughout the state.”

The proposals include a bill requiring Texas public colleges and universities to make a strong commitment to faculty and staff diversity, one that reflects the student population.

The state’s Texas Higher Education Coordinating Board would prepare an annual report charting the progress of each school. Progress would be rewarded with funds to hire faculty or staff for every member hired from an underrepresented group in Texas.

A second bill would study the underrepresentation of minority faculty and staff at the Texas schools. The Coordinating Board would commission the study and document the degree of underrepresentation, comparing it to student enrollment and state population. It would also identify and recommend efforts needed to correct the underrepresentation.

Another measure would establish the Texas Post-baccalaureate Achievement Program for underrepresented groups. This program would mentor undergraduate minority students who want to work as faculty in higher education in the state. The program would offer summer internships and academic counseling, and help to secure admission to graduate programs and financial assistance.

A fourth bill would provide tuition and fee waivers for minority community college faculty pursuing graduate degrees in higher education in Texas.

The last measure would earmark $5 million for the Texas Minority Doctoral Incentive Program. The Texas Legislature established the program in 1993, but never funded it.

It would provide annual loans of up to $14,000 for minority students seeking a graduate degree in hopes of teaching in a Texas college or university. The loans are to be forgiven when the student returns to teach after graduation.

Congresswoman Irma Rangel, who chairs the House Committee on Higher Education, says TACHE embraces an important mission. “They are role models and wonderful mentors to our Hispanic students,” she says, “and proof that Hispanics are academically able and can reach high standards.”

Rangel, who is Mexican American, says she’s watched the organization grow in both numbers and influence, and attributes its success to “stamina, dedication, and devotion.” She says its work is pivotal to removing the foundations of discrimination.

“We have been excluded from access to some institutions of higher learning for 50 to 100 years. Here we are in the new millennium, and there are people out there who still question our academic credentials.” Rangel
says, "I think still a lot of people don't put confidence in our ability. I have tried to convince them we are capable."

Newly minted TACHE president Felix Zamora blamed "institutional racism" for not boosting the ranks of Hispanics in the college workforce. "We need to get beyond just calling out the rhetoric," says Zamora, vice president for student and institutional development at Eastfield College, within the Dallas Community College District.

"What we now are facing is what the leading demographers in the state of Texas have predicted: that unless more people of color enroll and graduate from college in Texas, we will be a poor, less-educated, more welfare-dependent, more incarcerated population than we are now, which is a very bleak picture."

"When you have faculty of color, students of color do better," he adds, "and they persist and they graduate at a better rate."

There are 120 colleges and universities in the state. Out of all the presidents and chancellors, only 15 are Hispanic. That number is a slight improvement, Valdez says, but "even if you have an increase of one or two, it seems like an astronomical increase in the percentage."

"The most common excuse/common reason given for the lack of Hispanics is that there are just not any qualified people around, and that same reason is given through the whole gamut of higher education," Valdez explains, adding, "The pipeline is leaking."

Over the last few months, TACHE leaders testified before the coordinating board and the Mexican American legislative caucus in the House and Senate, visited college and university presidents to rally for their cause, and fired off letters to legislators.

The organization is seeing the fruits of its labor.

"As a result of our letters and advocacy, the board has agreed to include new language in its higher education plan, which is called 'Closing the Gaps,’” he says. "They've agreed to include a goal essentially saying that Texas colleges should seek to diversify their faculty and staff consistent with their student enrollment."

The efforts also have swayed the state lieutenant governor's Special Commission on 21st Century Colleges and Universities to include a statement about diversifying the faculty and staff ranks.

"This is the first time we've had something like this in the state," Valdez says. "These things are beginning to happen."

While TACHE’s aim has always been to improve the lives of Hispanics within the Texas higher education system, the organization has targeted different issues: student testing concerns, recruitment of Hispanic students, funding inequities, and student retention.

TACHE Scholarship Coordinator Diana Castillo noted how TACHE’s scholarship program has evolved into a fellowship program. The program used to dole out seven $1,000 awards. That figure has now been doubled, to $2,000.

This past fall, four graduate students were honored. They were chosen because they plan to enter the teaching profession in higher education in Texas. "We decided it was more important to increase the value of the award," says Castillo, a college operations officer at Southeast College, one of five within the Houston community college system.

Local TACHE chapters oversee scholarships, supplied with money from the umbrella organization and from local donors. The umbrella group focuses on the fellowships, called the TACHE Fellowship Application. "We're going beyond student recruitment and broadening ourselves to create equitable situations to groom Hispanics to become future faculty and representatives in the administrative ranks," Castillo says.

"They have to have a commitment to work within the system and to become part of our goal to change the demographics of higher education at both the faculty and administrative level," she says.

TACHE has recognized students who have performed community service work to promote the advancement of Hispanics in higher education or in the cultural arts, and even those who’ve studied medicine.

"We did this in baby steps," she says of the fellowship’s evolution. "I have seen an increase in commitment in terms of the diversity in the ranks more at the administrative level than the faculty level, because it is harder to penetrate the faculty areas."

She adds, "My experience at my own particular institution is we need to work more with the administration and trustees to come up with creative ways in which we open the doors."

At Southeast College, Hispanic students account for about 35 percent of the 3,000 students, and 27 percent in the overall Houston community college system.

"I take a big responsibility in not just advocating the importance of this but working with local leaders to do something about it," says Castillo. Two of her four sons plan to attend graduate schools in Texas and then teach music and art.

Valdez’s experience since 1980 at UT-San Antonio has been enlightening. The campus serves more than 18,600 students in undergraduate and graduate programs, and is one of the fastest-growing public universities in the state. The surrounding community is 52 percent Hispanic, and the student body, 44 percent Hispanic (just one percent below White). Overall, more than 50 percent of the students come from historically underrepresented groups. And, for the first time, the school’s president is Hispanic—Ricardo Romo, a native San Antonian. "This sends a very positive message to students," Valdez says.

Another positive message is TACHE’s long-term existence. Whereas other grassroots groups have come and gone, TACHE has now survived for more than a quarter century.

"We began during a time of great upheaval in Texas with civil rights organizations, and TACHE’s development was logical to what was going on at the time," Zamora says. "I think it's survived because the basic purpose of the organization is such a necessary factor for development of our community that people are dedicated to it."
A new semester has begun. As I look out at my 200+ students in an Introduction to Psychology large lecture, I am reminded just how diverse our student body is. Cultural diversity is the norm on many college campuses, particularly urban and community colleges. I am fortunate to meet all these large lecture students each week in smaller seminar classes of about 20 per section, where I can really get to know them. I am convinced that without these seminars, it would be extremely difficult for me to build rapport with the students, or for the students to bond with each other.

Starting semesters with ice-breakers to get students comfortable in the classroom is becoming more widely accepted as the research showing the importance of bonding to classmates for retention and graduation piles up. One of the most significant factors in whether students will persist at an institution and graduate is whether or not they feel a sense of belonging and community.

How does a sense of community develop, particularly at commuter colleges? If it is going to happen at all, it will most likely happen in the classroom. Clubs and activities will help students bond to an institution, but many students will come to their classes and then leave campus.

There are so many possible first-day class exercises that are effective in getting students to connect with one another. In this article, I will describe four that incorporate a little diversity training as well.

What's in a Name?

Penfield (1998) describes an exercise that she calls "What's in a Name?" Penfield suggests that names are both personal and cultural. She says that our stories about our names are not only autobiographical; they are also multicultural. This first-day class exercise is a useful tool to get students to recognize their similarities and differences while learning each other's names. Here is how it works: Have your students pair up with someone they do not know. Ask students to interview their partners to find out the personal and cultural reasons for their first and middle names. Tell them that they will be responsible for introducing their partner to the whole class when you reconvene the large group. Allow a few minutes for each member of the pair to conduct the interview.

When you reconvene the whole class, ask each student to introduce his or her partner to the class, sharing any interesting information gathered about their names. Write down each person's name on the chalkboard or on newsprint along with a symbol or note of something personally or culturally interesting about the person's name.

After everyone has had a turn, ask the group if they have learned anything about cultural patterns in naming people, and process this information with the whole class.

The Family Name Exercise

This What's in a Name? exercise reminds me of an exercise I learned in a family therapy training program. It is called "The Family Name" exercise. The Family Name exercise, when used in a classroom setting, is designed to get students to know each member of the group a little better, to facilitate memory for names for both students and the instructor, and to create a sense of community in the very first class.

To begin the exercise, the instructor discusses the importance of our names to understanding our identities. When we learn how we were named, that is, who made the decision for our name and how the decision was made, we actually learn a lot about our histories. In case there are students who don't have a clue as to how they were named, I broaden the exercise to include them.

I ask students to sit back and listen to some questions that I pose: Who named you? How was the decision for your name made? Are you named after someone? Do you know or know of the person who is your namesake? Do you like your name? Have you ever gone by a different name? Do some people in your life call you by a different name? Do you have a nickname? How did you get your nickname?

After posting all these questions, I ask students to connect to whatever questions were most meaningful for them and to create a story about their name. I then ask students to introduce themselves to their neighbor in class and to share
their stories. This gets them to meet another student, and also loosens them up for the large-group sharing. Before asking each student to introduce him or herself to the class, I usually get the ball rolling by telling my entire name and sharing my own story. All the students then tell the class the story of their names. This technique is a remarkable memory strategy since participants are using the principle of association to remember names.

Finding Commonalities

Another icebreaker for the first day is what I call “Finding Commonalities.” Ask your students to raise their hands in response to questions such as: How many people eat pizza more than once a week? How many people go to the movies more than twice a month? How many people own a car? How many people were in the music program in high school? How many people have pets? How many people have been to Italy? How many people have been to the United States? How many people are planning a career in teaching? After students have raised their hands in response to about half a dozen questions, and students have observed their classmates’ responses, have students form four-person groups that you select either randomly or by some design. Some instructors move students around in what appears to be a random fashion, but they are actually creating groups that are gender and culturally diverse.

The instructor then hands out newsprint and magic markers to each group. Students are told to find four things that they share in common, and to depict these commonalities any way they choose. They can draw pictures or use symbols, or as a last resort, they can use words. Urge your students to be as creative as possible. Tell your students that each member of the group will introduce him or herself later to the class, and each student will describe one of the four things that they discovered they shared in common. Rather than have the group select a group reporter, having each student speak for himself is a way to get all students speaking in the very first day of class.

After about 10 minutes of group work, the whole class is reconvened. Within groups, students usually have fun, and some bonding occurs. Students are also interested in learning what the other groups have to say. This is a fun way to start the semester, setting a tone that is comfortable.

Introduction by Identities Exercise

One of my colleagues teaches an English class to international students. She begins her first day by asking students to tell a little about themselves. She starts the exercise by role modeling examples of what they might share. In all these activities, instructors need to make it clear to students that it is always their choice about what to share about themselves and in what depth. My colleague tells her students her name, with a related anecdote about how she was named. She then says that obviously, she is a female, that she is Italian American, that she was raised Catholic, and that she was born in the United States. Within her extremely diverse class, students start to share about themselves, and some early bonding begins to take place.

Many of us who have been teaching for a number of years believe that a safe and comfortable classroom atmosphere is best for motivating students to learn and for keeping them engaged in the course. There is now considerable research to support our beliefs.

FACULTY POSITIONS
FULL-TIME

SUNY Empire State College, a national leader in non-traditional education with locations throughout New York State, seeks full-time faculty in a number of academic areas and locations. Founded in 1971, ESC is a recognized leader in designing and delivering innovative programs that meet the needs of more than 10,000 students each year. Students, mostly working adults, enroll in associate, baccalaureate and master's programs through instructional locations across New York State and at several international sites, as well as in the College’s distance learning program. Faculty members serve as mentors to students and work with them in person in one-on-one small group and residency formats, as well as in online and print-based distance formats. Drawing on strong interdisciplinary and generalist interests, faculty members establish unique, collaborative relationships with students as they design individualized degree programs and pursue their academic studies.

Empire State College is a highly distributed organization and all faculty members are expected to be proficient in computer use. ESC’s internal network provides groupware and other electronic forms of support to faculty. The College’s professional staff members offer both technical and instructional design support. For all of the positions advertised, preference will be given to candidates who have experience in or demonstrated ability to teach in non-traditional ways and to work with diverse populations, including adult learners.

All of the openings are assistant professor, tenure-track positions, and are expected to be filled by Fall 2001. ESC faculty are expected to work with both undergraduate and graduate students. Ph.D. or other appropriate terminal degree is required for a tenure-track appointment (except as noted below). Salary and benefits are competitive.

For each position, submit a letter of application outlining subject areas of expertise and explaining capacity to work with adult learners in innovative ways to achieve their educational goals. Letter of application, current vitae, and names, addresses, and telephone numbers of four references to the appropriate dean/director listed below for each available position. Applications to more than one location are welcome. Review of resumes will begin on January 30, 2001.

For additional information about the College, visit the College’s web site (www.esc.edu).

Central New York Center
The Central New York Center (CNV), Syracuse annually serves about 1,200 students and is seeking a faculty member with an academic background in Community and Human Services and Psychology. Significant work background outside of academia is a plus. Application materials to: Dr. John Adams, Dean, SUNY ESC, CNV Center, 219 Walnut Street, Syracuse, NY 13202.

Geneseo Valley Center
The Geneseo Valley Center (GVC), Rochester annually serves about 1,100 students and is seeking two faculty members with academic backgrounds in (1) Community and Human Services: for the Center office in Rochester with expertise in human services and social work (policy, practice, and social justice), and human development. Preference given to candidates who have a MSW and significant human service practice experience, as well as a doctorate that is broadly related to the field of social work, human services, and counseling. (2) Unit Coordinator: for the GVC unit in Canandaigua, NY. Academic discipline is open. The unit serves about 100 full and part-time students. The unit coordinator reports to the dean and has both teaching (mentoring) and administrative responsibilities, including recruitment and retention of students, and supervision of staff and adjunct faculty members. For both positions, send application materials to: Dr. Robert Milton, Dean, SUNY ESC, GVC, 1475 Winston Rd, North, Rochester, NY 14609-5803.

Hudson Valley Center
The Hudson Valley Center (HVC) is located in the lower Hudson Valley area and annually serves about 1,200 students. HVC is seeking a faculty member for its Orange County location with an academic background in Community and Human Services with an emphasis in social policy, social welfare, and community organization. Significant work background outside of academia is a plus. Application materials to: Dr. Robert Trullinger, Dean, SUNY ESC, HVC, 200 North Central Avenue, Hartsdale, NY 10530-1999.

Long Island Center
The Long Island Center (LIC) serves students at three locations: Old Westbury, Hauppauge and Riverhead, and annually enrolls about 1,500 students. LIC is seeking two faculty members with academic backgrounds in (1) Community and Human Services: preference given to candidates who have a MSW with a concentration in policy and planning as well as a doctorate in a relevant field. Ability to teach in such areas as program planning and procedures, outcomes measurement in social programs, and public policy in America desired. (2) Historical Studies: broadly trained historian with an interdisciplinary perspective who can teach a variety of U.S. fields, especially social and political history, Western Civilization, and preferably at least one non-western culture. For both positions, send application materials to: Dr. Antonio Kania, Dean, LIC, SUNY ESC, 223 Store Hill Road, P.O. Box 130, Old Westbury, NY 11568.

Northeast Center
The Northeast Center (NEC) is located in the greater Albany area and annually serves about 800 students. NEC is seeking a faculty member in the area of Management Information Systems or Computer Information Systems. Significant work background outside of academia is a plus. Doctorate or other appropriate terminal degree is preferred; candidates with alternative academic credentials, including at least a Master’s degree, and relevant professional experience will be considered. Application materials to: Dr. Carolyn Broadaway, Acting Dean, SUNY ESC, Northeast Center, 845 Central Avenue, Albany, NY 12206-1504.

Center for Distance Learning
The Center for Distance Learning (CDL) is located in Saratoga Springs and annually coordinates 11,000 course enrollments using Web-based delivery and print-based course packages for adult learners studying across New York State and around the country. CDL is seeking an Academic Area Coordinator in Science, Math, and Technology. This faculty member will be responsible for curriculum development, course maintenance and delivery of courses in the broad area of Science, Math and Technology, work with other full-time and part-time faculty in CDL and across the College to supervise course development and also to integrate educational technologies into CDL’s courses; and mentors students, teaches in areas of his or her academic interest, and may teach in Graduate Studies or International Programs. Minimum of three years teaching experience preferred, practical experience in Information Systems, technology, or other areas of interdisciplinary science desirable. Preference given to candidates with the ability to think creatively about teaching and learning, particularly in the context of educational delivery options and integrating technology to promote student learning. Application materials to: Dr. Meg Benke, Director, SUNY ESC, CDL, 3 Union Avenue, Saratoga Springs, NY 12866. FAX 518-587-2660.
The Honor Roll

SUNY/Westchester Community College

Uncommon Breadth, Diversity, and Sophistication

BY ROGER A. DEITZ

How do you assess the impact of a community college? Is it just the work of great professors teaching challenging courses—or is it more than that? There are other measures of a rich and fulfilling higher education experience, one that opens a door to rewarding professional and personal intellectual growth. In the case of SUNY/Westchester Community College, it’s hard to know where to begin.

WCC offers a great intellectual environment. Visiting lecturers at WCC have included Pulitzer and Nobel Prize winners, internationally known celebrities such as Alistair Cooke, Isaac Asimov, Charlie Rose, Dick Gregory, and Doris Kearns Goodwin. Imagine students challenged by the ideas of Buckminster Fuller, Jules Feiffer, and Ben J. Wattenberg. How about listening to writers such as Margaret Atwood, John Cheever, James Dickey, Joyce Carol Oates, or Arthur Schlesinger, Jr., discuss their work? How about a Smart Arts cultural series that has presented the Alvin Alley Repertory Ensemble, author Toni Morrison, and poet Seamus Heaney.

WCC is a statement on diversity, its student body composed of 14 percent minority students, reflecting the community served. More than 3,000 mature adult learners are enrolled in Mainstream, the College’s retirement institute. At WCC, “community” means just that. A diverse group of Westchester residents uses the Community College facility each year for classes and to take in performances of the New York Philharmonic and the Martha Graham Dance Workshop, or to attend the annual Working Woman’s Summit, and more.

Concerned about the cost of higher education? Tuition at WCC remains the lowest in the county ($98 a credit), and the cost per student is among the lowest in the State of New York, despite Westchester’s being a high-cost-of-living area.

With more than 20,000 students attending annually (credit and non-credit) WCC is the largest institution of higher learning in Westchester County. Its Professional Development Center has provided employee-training programs for more than 100 local businesses, including IBM, NY Power Authority, and the former Bell Atlantic, now Verizon. Through the SUNY Learning Network, credit courses are now available on the Internet. Approximately 30,000 students have completed their studies in a degree or certificate program at WCC to become employed, mostly in Westchester County. Graduates enroll at some of the most prestigious four-year colleges in the country.

The county’s economy benefits as well.
Westchester County realizes a return of $164 for every college budget dollar spent. As recently as June 1997, 18.6 percent of Westchester County high school students applied to WCC for the fall of 1997 semester; 94 percent were enrolled. With 40 associate's degree programs and 20 certificate programs, plus hundreds of continuing education courses, there is truly something for nearly every learner at a community college, a community college worthy of the Honor Roll.

Since opening in 1946, Westchester Community College has enrolled more than 300,000 students. It is one of 30 community colleges associated with SUNY, the State University of New York. Founded as the New York State Institute of Applied Arts and Sciences, the College first opened its doors in White Plains. In 1957, the County of Westchester bought the 360-acre John Hartford estate in Valhalla, three miles to the north, and designated 218 acres as a relocation site for what would become the Community College. The estate had a number of buildings that were at first used as temporary facilities, including instructional space, but these would not serve a rapidly growing community college.

A construction master plan was drawn up in 1961, and eight major buildings were completed by 1988, including: Engineering Technologies (1962), Student Center (1963), Physical Education Building (1964), Classroom Building (1967), Learning Resource Center (1969), Science Building (1978), Academic Arts Building (1981), and Administration Building (1988). WCC's Health Science Building, originally constructed by Yale University during its brief prior use of the Hartford Estate, was renovated extensively in 1990.

Honor Roll Facts in Brief

INSTITUTION
SUNY/Westchester Community College

LOCATION
Office of Admissions
Valhalla, NY 10595-1698
(914) 785-6735

ESTABLISHED
1946

ENROLLMENT
11,000 full-time and part-time (14 percent minority)

DEGREE OFFERINGS
Associate's
Certificates

ANNUAL TUITION AND FEES
$2,350 (tuition)

FACULTY
160 full-time

SEVERAL DEGREE PROGRAMS
Business Administration
Paralegal Certificate
Medical Laboratory Technology
Travel and Tourism
Visual Arts

NOTABLE HISPANIC-SERVING ORGANIZATIONS
Cultural Diversity Committee
Hispanic Club

Harford Hall, the beautiful Tudor manor house of the John Harfords, has been on the National Register for Historic Places since 1978. The stately building now houses the offices of the president, deans of academic affairs, and Student Personnel Services, the Office of College-Community Relations, and The Foundation for Westchester Community College. Several other original estate buildings still exist. These serve maintenance, receiving, and engineering functions, and as storage. The resulting mix of modern and traditional architecture, together with the rolling terrain and mature trees and plantings,
makes for a strikingly beautiful campus.

WCC has eight extension sites throughout the County—in Mahopac, Shrub Oak, Port Chester, Yonkers, New Rochelle, and Mount Vernon, and the Westchester Art Workshop in White Plains and Peekskill. The main campus in Valhalla is centrally located and accessible by public transportation. Childcare is provided by the Virginia Marx Children’s Center for the children of students, faculty, staff, and Westchester County employees and community members. College facilities include a pool, tennis courts, athletic fields, a 400-seat theater, a 48-station auto-tutorial center, and 18 science laboratories. Six hundred fifty computers have been relocated in laboratories throughout the main campus for student use. Library and other facilities are open to the Westchester public as well as to students.

Last year, more than 30,000 people used the College facilities to attend festivals, concerts, day camp, conferences, workshops, and competitions.

Three types of associate’s degrees in 40 subject areas are offered. There is the Associate in Arts degree for students transferring to four-year institutions in the liberal arts, the Associate in Science for those transferring to four-year institutions for business, math, and science for health careers, and the Associate in Applied Science for those preparing to seek immediate employment, change careers, or transfer to another institution. In addition, certificate programs requiring approximately 30 credits are offered in 17 career fields. All programs are taught by a top-notch faculty.

WCC’s faculty and professional staff have received more SUNY Chancellors Awards for Excellence than has any other community college in the system. More than 94 percent hold master’s or doctoral degrees in their fields. The student:faculty ratio is 17:1. The full-time faculty number 160. Full-time and part-time college-credit students number about 11,000. Continuing education students bring the total number served by the College each semester to nearly 20,000. WCC programs are designed to meet community employment needs. 325 representatives of local employers sit on 31 advisory committees to keep the curricula current.

The College prides itself on its commitment to diversity. The population of minority students has grown 25 percent in the last five years, mirroring a trend of increased minority growth in Westchester County. Westchester Community College President Joseph N. Hankin tells The Hispanic Outlook, “The College is evolving along with Westchester County. There has been an increase in Hispanic citizens in the area, and we have responded by expanding the number of educational opportunities. For example, we have one of the largest ESL programs in the State, and it continues to grow.”

There were 683 handicapped students attending in 1997-1998, many lower socioeconomic students looking to enter the mainstream, and 2,500 students attending ESL classes. The College has one of the largest Divisions of Continuing Education in the SUNY system. The enormous ESL program caters primarily to the county’s Hispanic residents. The Office of Multicultural Programs provides a full schedule of events promoting diversity, ranging from special photo exhibitions and speakers to an annual Diversity Day extravaganza that offers dancing, music, and international foods.

WCC has many campus clubs that cater to the diverse international flavor and offers an extensive schedule of cultural events through the Smart Arts series. These events, attended by students, faculty, staff, and members of the Westchester community, include international films and multicultural performances. Two recently launched series, the new World Voyager and Rising Renaissance, focus on multiculturally diverse arts and artists, such as the Carlota Santana Spanish Dance Company, Boys Choir of Harlem, Chinese Parade of Acrobats and Dancers, the National Black Touring Circuit, and the improvisation troupe, Chicago City Limits.

WCC provides access to the mainstream. WCC graduates can transfer to four-year colleges and universities with a full two years of credit toward their bachelor’s degree. The college offers many services and resources to help the student select the correct courses and pathway to prepare for transfer. Guidance comes from teaching and counseling faculty, a coordinator of transfer services, the WCC Career and Transfer Center, and a library collection of directories and college catalogs. More than 100 four-year colleges and universities send representatives to visit the campus each year to meet with WCC students and to provide additional information about their institutions.

About half of all Westchester Community College graduates transfer to four-year colleges and universities immediately after graduating. Substantial numbers of students who haven’t completed a WCC degree also transfer. WCC graduates have transferred to higher education institutions throughout the country, including Boston College, Boston University, Columbia School of General Studies, Manhattan College, SUNY/School of Industrial and Labor Relations at Cornell, NYU, Stanford, and the Wharton School of the University of Pennsylvania. Many opt for such local schools as the College of New Rochelle, Iona, Mercy, Pace, and Fordham University, the CUNY institutions, and the other SUNY colleges, including the University Centers of Albany, Binghamton, Buffalo, and Stony Brook.
Black WHITE Brown Tan

CSU Dominguez Hills Celebrates the Richness

BY ADRIANA MEOCCI

In 1997, U.S. News and World Report selected California State University-Dominguez Hills as the most diverse college in the West and the second most diverse campus in the nation.

“Most institutions of higher education today are concerned with retaining a diverse student body,” says Jamie Webb, acting associate and vice president for academic planning. “The diversity of our student body is a matter of pride at CSUDH.” This diversity includes age, ethnicity, religious and cultural tradition, past academic experiences, and present work and family commitments.

Dr. James E. Lyons, Sr., CSUDH president, believes its diverse population reflects the world and a multicultural society, an asset that few other institutions provide. The diverse environment, in turn, provides students with real-world experience and a comfortable transition into the career setting of their choice.

Inside Dominguez Hills, a campus publication, quotes Lyons further on the topic: “Dominguez Hills is special, and the diversity that has become ‘us’ wears well. We have been blessed by our location and the incredible population that surrounds us…. Our skin is black, brown, white, and tan. Our hair is blond; black, brown, red, and gray. We are the youngsters, and we are the seniors. We come to the campus at 8 a.m., and we come at 8 p.m. This is what we have been given—and we celebrate the richness.”

CSUDH is one of 23 campuses in the California State University System. The 346-acre campus is located on the historic Rancho San Pedro, the oldest Spanish land grant in the Los Angeles area.

The University’s undergraduate population includes 34.2 percent Hispanic/Latino, 32.9 percent African-American, 19.9 percent White, 12.1 percent Asian/Pacific Islander, and .09 percent Native American.

The Hispanic/Latino population has experi-
enced the greatest increase since 1988, when it comprised less than 14 percent. This multicultural and multiracial vastness reflects the changing demographics of the University's surrounding communities, which include those in the South Bay/South Los Angeles area, stretching from the institution's borders.

The divergence at CSUDH is also represented by a large nontraditional student population. Many are older students—the average age of the undergraduate student is 29.

The majority of the University's full- and part-time students are also holding down jobs, and these students are from underrepresented ethnic groups.

Dr. Billie Blair, dean of the school of education, says that in the '60s, the school was a mostly "black and white" institution. But this has changed, and she has witnessed the increase in groups such as Mexican Americans, students from Central America, growing numbers from African countries, especially Western Africa, second and third generations of African Americans, as well as Asian Pacific Islanders, Japanese Americans, Filipinos and Samoans. A growing number of Buddhist and Muslim students are also present, and a large population of Cambodians who are learning to teach Cambodian students.

Blair is pleased to note that as various ethnic and religious groups have selected the school, others have not been lost. "For example," says Blair, "we didn't lose any European Americans as we gained Asian students, or anyone who was with us from the start...."

"We are a diverse community, we support our community, and we have not alienated any communities," says Blair.

More than half the student body in the Teacher Education Program is Latino. The school has taken note of growing numbers of Hispanic/Latino students who wish to become K-12 teachers or university faculty. These students have been helped through several grants, including the U.S. Department of Education's Title V.

Students who graduate from the Teacher Education Program will be working in the service areas of California where 70 percent of the children speak English as a second language. The new instructors will most likely be teaching primarily African Americans and Latino children.

"Their faces reflect the faces of the children they teach," Blair says.

Diverse Curriculum

The curriculum at CSUDH is perhaps as diversified as its student body. Currently, the University offers 41 baccalaureate degrees and 19 master's degrees and 10 teacher credential degrees. The University also helps nontraditional students gain access to education through flexible class schedules that include morning, evening, and weekend programs. CSUDH is also known for its distance learning courses; Forbes magazine nominated the school as one of the top 20 "cyber universities" in the U.S.

But serving its diverse population with a wide spectrum of programs doesn't end there. The school offers strong and unique programs in travel and tourism, orthotics and prosthetics (one of only seven in the nation), occupational therapy, and electronic music synthesis.

The University also offers programs that give minorities and underrepresented ethnic groups a chance to achieve excellent scholarship. Two of these very successful programs are U-STAR, the Undergraduate Student Training in Academic Research program, and MBRS, the Minority Biomedical Research Support program.

Begun in 1988, and funded by the National Institute of Health, U-STAR aims to increase the number of minorities seeking graduate degrees in the sciences. The MBRS program helps persons of color pursue scientific research in different areas.

In 1999, the College of Arts and Sciences received a Ford Foundation grant that examines "global diasporas" in Southern California, ethnic communities formed by immigrants who continue to speak their native language and practice their native customs. The study will help investigate life in the African, the Latin, and the Asian Pacific cultures. This study helped produce the University's conference last spring in which educators examined the impact of diversity on K-12 grade levels, as well as on higher education.

CSUDH also offers community-oriented programs such as the One-Stop Job Training and Education Center, which gives members of surrounding communities a chance to acquire skills and advance their careers.

In addition, the California Academy of Mathematics and Sciences (CAMS), a high school for underrepresented minorities and females, is located on the campus.

The University has started a "Dialogue on Diversity" to explore the meaning of diversity, a term which can take on different meanings among various segments of the campus community. An alumni panel, a cultural arts exhibit, an improvisation workshop, and diversity chats have been part of this event.

The University also recognizes that many students, among them some Hispanics and Latinos, indeed have different academic needs than do many "traditional" students. The University has organized various offices and programs to...
directly address these concerns. Thus a Multicultural Center, American Language and Culture Program, regular and online tutoring in the Center for Learning Assistance and Student Support, Older Adult Center, Women’s Center, and Minority Student Research Programs have been established.

**Teaching Strategies**

Teaching is, of course, the first priority at CSUDH. But how does such a multifaceted and multi-ethnic campus utilize teaching and learning strategies suited to the needs of a diverse student body? “You can find examples across our campus of formalized teaching methods, such as cooperative learning and teaching groups,” says Pam Hammond, director of public affairs and publications, “as well as unique and unconventional strategies.”

“One history professor, for example,” Hammond says, “uses a multicultural scavenger hunt in his history courses. A humanities professor developed a course of study comparing the Italian Renaissance to the Harlem Renaissance. A theater arts professor designed a course in which students write plays based on multicultural, multi-ethnic material for presentation at events on campus and at local school and community events.”

Hammond recalls what a keynote speaker said that weekend: “Everything is here at Dominguez Hills to make this a showcase of America.” And he challenged us: “What are you going to do...to make California State University-Dominguez Hills the working model of cultural and ethnic diversity?”

“We answer this way: we continue to explore diversity and its meanings through extracurricular programs, and we continue to embrace it as part of our curriculum.”

The University, of course, has many student organizations, which reflect diversity on various levels. Some of them are the Association of Women Students; Catholic Newman Club; Chinese Student Organization; Future Teachers Club; Gay, Lesbian, and Bisexual Student Association; Muslim Student Association; Toros Christian Fellowship; and Vietnamese Student Association.

**Faculty Diversity**

CSUDH is also committed to recruiting a diverse faculty, and during the last 12 years has experienced a 10 percent increase in minority faculty. Of its 300 full-time teachers, 98 percent are African American, 84 percent are Latino, 94 percent are Asian, and 72.5 percent are White. Minority professors are recruited by aggressive networking and personal contacts. Additional professors are sought within the teaching community, including the districts from which its diverse student body is found. The college also looks to organizations for teachers, such as the National Association of Bilingual Educators, the California Association of Bilingual Educators, the Latino Project at USC, and the California State University Forgivable Loan Program. It advertises, too, in a number of higher education publications.

CSUDH’s faculty and staff embrace diversity in many different ways. Significant numbers of professors are bilingual or have a keen knowledge of other cultures. For example, the University has an active Hispanic faculty and staff that sponsors community outreach programs. And President Lyons and the Vice President of Academic Affairs, Donald Castro, are both fluent in Spanish and active in the Latin American community. The University is also a Hispanic Serving Institution with an active Chicano/Chicana Studies program.

An administrator I spoke with sums it up well: “Diversity in and of itself means little. What counts is what we do with our diversity to enrich us and empower us to advance as a society.”

---

*President James E. Lyons, Sr.*

Cultural Competence in the Health Professions

Insuring a Uniform Standard of Care

BY FRED DONINI-LENHOFF, MA

Professions concentrating in general health care (and with significant patient contact) and...mental/emotional health issues have been more proactive....

- "Compared to Blacks and Whites, Hispanics less likely to be satisfied with the quality of their medical care"
- "Lesbian sues California physician for denying care based on her sexual orientation"
- "Over half of physicians don't receive adequate training for diagnosing and treating victims of domestic violence"
- "Patients with low levels of health literacy are 52 percent more likely to be hospitalized"
- "Traditional Asian healing process called 'coining' often mistaken for domestic abuse by health care practitioners"

There is a common thread tying together these recent news headlines: health professionals need to become more sensitized to the multiple "cultures" that affect patients' attitudes toward and responses to health care. In other words, health professionals need to achieve a higher level of cultural competence.

Defining the Terms

Any definition of cultural competence must include a definition of culture. Culture can be broadly defined as any group of people who share experiences, language, values, and perspectives that permit them to communicate in special ways.

This concept of culture, then, is not limited to race, ethnicity, or nationality. As categorized in the Cultural Competence Compendium, a resource guide for physicians and other health professionals published by the American Medical Association (AMA), a culture could include:
- underrepresented and underserved racial, ethnic, and socioeconomic groups;
- people with physical or mental illnesses or disabilities;
- children and adolescents, women, older adults, and people at the end of life; and
- people affected by issues such as domestic violence, genetic conditions, organ donation, and sexuality.

Health professionals themselves have their own culture: their career stage, their practice specialty, and their geographic location all contribute to their unique perspective on life.

Cultural competence is not about pigeonholing or stereotyping—it's about respect, understanding, and communication. Culturally competent health professionals can provide respectful, patient-centered care by adjusting their attitudes and behaviors to account for the impact
of emotional, cultural, social, and psychological issues—the patient’s as well as the practitioner’s—on the main biomedical complaint.

Need for Cultural Competence in Health Care

The spectacular improvements in medical care and technology, particularly over the last 50 years, have saved and improved countless lives, but they have also led to a clinical philosophy of treating a condition, disease, or body part rather than a complex human being. In addition, despite the growth of managed care and HMOs, startling disparities in health care access in the United States continue both in big cities and rural areas, with millions of Americans uninsured and underserved. Ignorance of cultural issues, lack of knowledge, language differences, prejudice, bigotry—whether on the part of the health professional or the patient—all serve as barriers to access to a uniform standard of health care for every American.

The Hispanic community suffers disproportionately from health care disparities in the U.S. According to the Commonwealth Fund, Hispanics are less likely to have health insurance than are Whites and African Americans. In addition:

- Hispanic women are more likely to rate their own health status as fair or poor and are least likely to receive preventive tests;
- Hispanics are most likely not to have a regular doctor and not to have seen a doctor in the past year; and
- half of Hispanics face access and medical bill problems due to cost, and are more likely to be dissatisfied with their health insurance.

Strategies for Enhancing Cultural Competence

How do we address these issues? Growing emphasis on and attention to cultural competence has already led to such strategies as expanding access to insurance and to primary and preventive care, increasing the availability of translators and bilingual printed information, increasing the number of health professionals from Hispanic and other underrepresented minorities, and educating health professionals about the importance of each patient’s individual culture when delivering care.

To help assess the status of this last strategy, in April 2000, the AMA surveyed health professions’ program directors about the existence of cultural competence-related curricula, the implementation of cultural competence standards as directed or encouraged by accrediting agencies and/or professional associations, and any procedures to measure educational outcomes in relevant areas.

This Survey of Cultural Competence Materials went to directors of nearly 5,000 educational programs in 48 of the 52 professions included in the AMA’s annual Health Professions Career and Education Directory. (Dietitian, dietetic technician, audiologist, and speech-language pathologist programs were not surveyed.) The survey was attached to the AMA’s annual Survey of Health Professions Education Programs, mailed each April to collect updates to Directory program listings as well as data on program enrollments, graduates, and attrition.

The cultural competence survey asked whether the program offers required and/or elective courses on providing care to diverse populations and on racial, ethnic, or other cultural issues related to complementary/alternative health care practices, domestic violence, genetic conditions, homelessness, organ donation, sexuality, and spirituality. The survey also queried whether the agency accrediting the program and/or institution has standards requiring curricula in cultural competence, organizational assessment, staff diversity, and/or diversity training.

As of August 15, 2000, 3,200 annual surveys had been completed and returned. Out of these, 760 programs (24 percent of respondents and about 15 percent of all programs surveyed) had completed and returned the optional Survey of Cultural Competence Materials. A total of 435 respondents filled out the survey—with 50 of these attaching additional information—and 369 respondents noted that although they had no information to provide, they were interested in the survey results.

If there is sufficient interest in the results of the cultural competence survey among allied health accrediting agencies, educators, and practitioners, the surveys will be tabulated and distributed throughout the allied health community, ideally in a monograph. Such a monograph could be a useful tool in identifying accreditation and certification standards, educational materials, and organizational policies that might guide others interested in developing similar resources.

Some Preliminary Results

As might be expected, professions concentrating in general health care (and with significant patient contact) and those dealing with mental/emotional health issues have been more proactive in developing cultural competence requirements or guidelines. For example,
educational standards of the Council for Accreditation of Counseling and Related Educational Programs—which accredits programs in such fields as community counselor, school counselor, and marriage and family therapist—indicate the importance of providing students with an “understanding of issues and trends in a multicultural and diverse society.” These issues would include “multicultural and pluralistic trends including characteristics and concerns of diverse groups”; “attitudes and behavior based on such factors as age, race, religious preference, physical disability, sexual orientation, ethnicity and culture, family patterns, gender, socioeconomic status, and intellectual ability”; “individual, family, and group strategies with diverse populations”; and “ethical considerations.”

Similarly, educational standards for programs in rehabilitation counseling, art therapy, genetic counseling, occupational therapy, and nuclear medicine—all professions with significant patient contact—include cultural competence guidelines. In addition, professional associations in the health professions are developing education and training resources—including books, videos, and articles—to help programs comply with these educational standards. The American Physical Therapy Association, for example, has produced Cultural Diversity in Physical Therapy, a video dramatizing how practitioners and students can deal with issues of race, ethnicity, and cultural background in encounters with patients, peers, and teachers. And the American Speech-Language-Hearing Association has a Multicultural Resource Center to keep abreast of such issues as dietary customs when helping patients learn how to swallow.

Many of these professions’ educational standards and training resources are reflected in the responses to the Survey of Cultural Competence Materials. Looking at the survey responses of 50 educational programs that included attachments with their completed surveys, we again see that the professions with considerable patient contact are well represented:

1. Physical therapy and occupational therapy
2. Medical assisting
3. Clinical laboratory science
4. Dental hygiene
5. Counseling-related professions

Materials sent in with the surveys to illustrate programs’ commitment to cultural competence ran the gamut from photocopies of accrediting agency standards to role delineation and competency guidelines and course descriptions. One respondent, Patrick Knot, MS, PA-C, of the physician assistant program at Finch University of Health Sciences, mailed a copy of a paper he had written on cultural competence, “The Influence of Culture on Patient Care.” Several programs also attached copies of professional codes of ethics.

Some programs also enclosed their accreditation applications, which offer detailed descriptions of ways in which they were working to meet cultural competence-related accreditation requirements.

Feedback from CSU-Sacramento

The physical therapy program at California State University-Sacramento explained how it was meeting the American Physical Therapy Association standard requiring programs to “[i]ncorporate an understanding of the implications of individual and cultural differences when engaged in physical therapy practice, research, and education” and “practice cultural competence: provide sensitive and competent physical therapy service to individuals representing diverse cultures, ages, economic, and health status.”

“Our classes have been composed historically of 25 to 30 percent of students of color, so we invite students to share their differences to highlight culturally diverse health beliefs. Significant age, economic, and health status differences usually exist in our classes as well, and identifying the diverse positions related to these facilitates a greater understanding and tolerance for differences. Students must [keep a] journal about their feelings associated with these classroom experiences. We also use the APTA videotape Cultural Diversity in Physical Therapy, which presents several clinical vignettes that are then the basis for class discussions.”

“Students are required to consider cultural implications when presented in their clinical science courses with case studies of subjects from diverse backgrounds. Students are required to consider race and ethnic origin when deciding on treatment approaches and how best to communicate with that individual. For example, in one, a subject presenting with a back injury is a graphic designer who is a non-English-speaking Hispanic; in another, a child of Chinese descent is presenting with cerebral palsy. Students must consider the socio-cultural implications/ramifications of a person with an amputation in the Therapeutic Techniques and Measurements course. Students are also exposed to patients from a variety of backgrounds in the clinics throughout our service area during their clinical affiliations, and where they have volunteer opportunities in the free clinic in Davis and the Mary Jane Rees clinic on campus. Other teaching strategies utilized within the curriculum to address this criterion include lecture, guest presentations, discussions, and role-playing.”

Moving Towards a Uniform Standard of Care

Judging from the number of programs and associations that did not provide information about cultural competence efforts, it appears that these efforts within the health professions are fragmented and sporadic. Moreover, comprehensive data on racial and ethnic diversity within health professions programs are no longer available. The AMA discontinued collection of these data in 1995, due to the difficulty and expense of collecting accurate numbers as well as an apparent lack of interest in these data on the part of the health professions’ community.

Today, as the effects of rollbacks in affirmative action are being felt across higher education, racial/ethnic data would seem to be more important than ever to researchers, policy analysts, and advocates for increasing the number of health professionals from Hispanic and other underrepresented minorities. Perhaps the AMA can work with interested organizations to resume collecting racial and ethnic data for health professions educational programs and to continue to collect information on cultural competence. In the long term, this information could be used to improve access to a uniform standard of care for all Americans.

To order either of the books mentioned in this article, call the American Medical Association at (312) 464-5533 or visit www.ama-assn.org/diversity. Health Professions Career and Education Directory (order #0417500), 540 pages, $50 for AMA members, $60 for nonmembers. Cultural Competence Compendium (order #0B209999), 460 pages, special offer of $25 plus shipping and handling. Also available is Health Professions Career and Education E-letter, a free monthly e-mail service, at www.ama-assn.org/hpe-letter.
The Funding Pie - Getting Our Fair Share

BY MARI CARMEN SARRACENT

Like many hyphenated-Americans in the U.S., Latinos still struggle for better representation in leadership and tenured positions, and for equitable education funding commensurate with their numbers. While one would think that underrepresented groups are vying against each other for a piece of the action, some leaders say it isn't so. They say it's more an issue of being heard, generating excitement, and having Latinos' potential and contributions acknowledged, so that, ultimately, the federal and state governments want to invest more in the Latino community.

What can be done? Staying visible, lobbying, and communicating with the local and state legislature are key. Piedad Robertson, president of Santa Monica College in California, says, "We do that on a regular basis, every day of our lives. Generally, I would say that with a good economy, there has been good responsiveness, but there is still misunderstanding of the complexity of community colleges, and therefore funding suffers. Our basic funding does not come from the federal government. It comes from the state."

Robertson adds that her college is "giving the legislature options and ideas so it can increase funding. The cost of education keeps on going up, yet there is more demand for education on a continuous basis. For example, now we have people who have a bachelor's and a master's in fine arts but are coming back to us to learn more about animation and technology because they want to accommodate enrollment increases, then what is a school to do? Robertson explains Santa Monica's situation: "Capital housing money is way behind. Our facility needs that to meet the demand. We are in the same position as universities where they might have to cap enrollment. Where can we put these people? It's very damaging because funding is federal government. The progress with Title V has been extraordinary. It has been used to create the margins of excellence and help institutions better serve students."

Alfredo de los Santos, Jr., vice chancellor for student and educational development, and research professor, Arizona State University, gives a little history and raises questions about states' responses: "In 1965, Congress passed the Higher Education Facilities Act, which led to the construction of buildings, including 500 community colleges. Since 1982, two million children have been born, many of them minority, the majority Latino. By 2010, Latinos will be the majority group in higher education. So why doesn't Congress respond to this generation as it did to the baby boomers in the '60s?"

"In California, for instance, in five to ten years, it will have almost 800,000 new students. Unfortunately, the state doesn't have the facilities to handle that. The same in Texas, where about 350,000 more students are projected, mainly Latinos."

By 2010, Latinos will be the majority group in higher education. So why doesn't Congress respond to this generation as it did to the baby boomers in the '60s?

ALFREDO DE LOS SANTOS
ARIZONA STATE UNIVERSITY

that's where the jobs are."

Much state funding is dependent on growth, but as an institution's enrollment climbs, the question of space arises. If capital funding is insufficient to help a school expand to accommodate enrollment increases, then what is a school to do? Robertson explains Santa Monica's situation: "Capital housing money is way behind. Our facility needs that to meet the demand. We are in the same position as universities where they might have to cap enrollment. Where can we put these people? It's very damaging because funding is federal government. The progress with Title V has been extraordinary. It has been used to create the margins of excellence and help institutions better serve students."

Alfredo de los Santos, Jr., vice chancellor for student and educational development, and research professor, Arizona State University, gives a little history and raises questions about states' responses: "In 1965, Congress passed the Higher Education Facilities Act, which led to the construction of buildings, including 500 community colleges. Since 1982, two million children have been born, many of them minority, the majority Latino. By 2010, Latinos will be the majority group in higher education. So why doesn't Congress respond to this generation as it did to the baby boomers in the '60s?"

ARIZONA STATE UNIVERSITY
Legal Defense and Educational Fund, highlighted hot-button issues, such as funding equity, in its policy paper to the presidential candidates last year. Triana R. D'Orazio, public affairs coordinator, says, "In any situation, regardless of what community, getting a fair share is important. We don't want to be divisive. MALDEF is in contact with other minority organizations to that end. Although a lot of our needs are similar, some are quite different, such as the need for bilingual education and limited English proficiency.

"Again, it's back to those phone calls and meetings behind closed doors. Making connections. Once we find a stronger voice, we might get more people to hear what our needs are. We are not ranting and raving. These are serious needs. And funding has to be commensurate with our numbers. We don't want to overtake; we just want a fair piece of the pie."

MALDEF's paper noted that "while the authorization level for Hispanic Serving Institutions is the highest it has ever been," it urges the new administration to support a substantial increase in the appropriation level for HSI funding.

"Another key area of inequity is in the federal TRIO programs (Upward Bound, Talent Search, Student Support Services, Educational Opportunity Center), designed to offer disadvantaged populations access to postsecondary education opportunities. Currently, Hispanics comprise 30 percent of the students eligible to participate in the federal TRIO programs yet make up only 15 percent of the participants. Increased support for programs such as TRIO and HSIs must be coupled with targeted efforts to increase Hispanic enrollment in colleges and universities."

MALDEF has also suggested expanding the Work Study Program and the amounts of money available under the Pell Grant Program. "Over half of full-time Hispanic students in college receive assistance through the Pell Grant Program. But this program needs are. More grant money and more affordable loans are essential to achieving a goal of increasing Latino graduation rates from higher education institutions."

Weak Funding Example

Texas' Border Region is home to a large Hispanic population, which has been reported to receive weak resources from the state. The UVAL R Richards case brought to light this number of doctoral programs.

The funding formula for Texas is intended to provide equal support per student for similar programs in two-year and four-year institutions; however, the results show different. According to this report, the Border Region spending per student is $46 per capita, while the rest of that state receives $96 per capita. "Ranking highest in state appropriations is Central Texas with $228 per capita."

Other figures also show that Central Texas has the most space available for its people and equipment with eight square feet per capita; the Border region has only 16 square feet per capita...The smaller regions of the state continue to receive more state appropriations for higher education, however, and continue to gain approval of academic programs that draw more resources and students."

Florida community colleges receive three types of state appropriations--lump sum for associate's and college preparatory programs, called the Community College Program Fund; lump sum for vocational programs, called the Workforce Development Fund; and categorical funding for specific legislatively issues. According to the Community College Policy,
Education Commission of the States, "the final authority to make changes to the state funding formula rests with the legislature."

Maria Vallejo, provost for Palm Beach Community College, says, "In every state I've worked in, community colleges always get a small slice of the pie from the state. The universities are at the top of list."

Vallejo adds that while four-year institutions garner support from alumni, community colleges don't have that luxury, and she suggests that developing a stronger advocacy can be part of the solution. "A former student's allegiance tends to be with four-year institutions. We don't have that kind of network. Perhaps we are not seen by the local legislature as a partner in the state system. We have worked hard, but when it comes time to delve out the monies, funding is never proportional."

Part of Florida's funding formula takes accountability into consideration. "We are funded based on our track record. Schools are rewarded based on accountability. How many students we graduate, for example, is considered," she adds.

Capital funding for higher education seems to be a resounding need across the country. Vallejo notes, "Our biggest issue is construction.

In 1998, African Americans and Latinos received only two percent of the undergraduate computer science degrees awarded in the country, and only six Latinos received Ph.D.s in computer science. MALDEF recommends that efforts also need to be made to involve Latinos in the core jobs of the computer workforce. Fewer than five percent of computer programmers in 1998 were Latinos, and fewer than three percent were systems analysts. Through internships and outreach, more Latinos could be brought into this growing industry.

MALDEF is seeking support for initiatives that will bring more computers and access to the Internet into the schools and homes of Latino children, and a commitment to provide additional funds for programs that would increase Latino enrollment in computer science majors and classes at all levels of education.

Federal Funds
Antonio Flores, president of the Hispanic Association of Colleges and Universities (HACU), says, "As far as the funding gaps that exist, we also provided proposals to the candidates. As HSIs, we have $7,000 per student to support students and faculty. Other institutions have an average of $4,000 per year per student. It's a combination of federal and state funds for universities, and community colleges may receive local money as well from local property taxes, for instance."

A compelling statistic is that five percent of higher education institutions are HSIs, and almost half of the Hispanic student population attends HSIs. Fortunately, the federal government has noticed, and under Title V of the reauthorized Higher Education Act of 1965, HSIs received a commitment of $68.5 million for Fiscal 2000, notes Flores, a vast improvement from past years. However, HACU's legislative agenda indicated that no monies had been appropriated to graduate education for Fiscal 2000. According to HACU data, 20 percent of HSIs offer a master's degree, fewer than 12 offer a doctoral degree, as many underfunded HSIs do not have the infrastructure to offer advanced degree programs. HACU has proposed $20 million for Fiscal 2001, under Title III: Aid for Institutional Development.

HACU recommends working with Congress on a four-prong strategy: "Appropriate categorical funding for HSIs and associate HSIs to collaborate in regional and national consortia to establish pre-collegiate and collegiate programs that target Hispanic and other minority students for mentoring, guidance, academic support and financial assistance leading to the completion of a graduate or professional degree; amend legislative acts and other program authorities that offer graduate or professional education resources to support HSIs and associate HSIs explicitly in their effort to increase the number and success of Hispanics in graduate and professional schools; provide categorical funding for HSIs and associate HSIs involved in graduate or professional education; and seek to repeal by all appropriate means any efforts to undermine universities, as well as graduate and professional schools."
Peer mentors must maintain a 3.0 grade point average and must be active on campus so they are fully aware of available resources.
because they feel they have made a difference in a person’s life.”

Project STARS is comprehensive and it is voluntary, offering academic support services, skill-based seminars on transition to college, and opportunities for cultural exploration. The program is run out of the University’s Office of Multicultural Student Affairs and is funded by the University and by Yucaipa, a California organization.

DePaul is a Catholic university with a predominantly White student population of 19,000 students. “The philosophy behind the program is very simple,” notes the STARS brochure. “New students in a new, unfamiliar situation are more likely to remain in college and pursue their highest potential when they feel supported in good and bad times. Having a friend and guide who offers genuine interest, encouragement, a nudge or guidance when needed can and does make a difference in someone’s persistence level.”

Anita Lige, a Chicago native and a sophomore majoring in human computer interactions and business marketing, said the program helped her immensely by adjusting to her new environment. “There is a big difference between high school and college,” Lige said. “Someone is always there to talk to whenever I have a problem. It has made it a lot easier for me.”

The program continues to grow at the campus. Some 232 students, including 75 Latinos, participated in the program this year, up from 150 last year. Sánchez-Giancola said that while the program targets students of color, “it’s open to anyone who thinks they can benefit,” and 24 Anglo students joined in this year.

The program covers five areas: academic development, transitional adjustment, cultural exploration, leadership development, and service learning.

“We want to make sure they go back to the community and make an impact,” said Sánchez-Giancola.

She and her office staff use a variety of methods to recruit first-year or transfer students to the program. They send direct mailings to students, visit local high schools and community colleges, offer a presentation at the student orientation, and garner participants through word-of-mouth recommendations.

Lige said she decided to give the program a try after receiving a flyer with her acceptance to the University. She liked the idea of meeting people before starting classes, getting free tutoring if the need arose, and being able to participate in workshops on stress management and financial aid offered through the program.

“It was a way for me to get to know students of color at a predominantly White institution,” said Lige. “It made me feel more comfortable, it provided me with friends I would not have met had I not been in the program.”

Lige said her mentor turned out to be one of her neighbors at the dorm and that the relationship has become a friendship. Her mentor hosts pizza parties and plans movie outings for her mentees.

Peer mentors must maintain a 3.0 grade point average and must be active on campus so they are fully aware of available resources. Tutoring or mentoring experience is a plus, but all mentors undergo three days of training in team-building, peer counseling, and diversity training before beginning the program, and then they are provided in-service training throughout the year of their commitment. Peer mentors work between 8 to 10 hours weekly, are paid for their services, and have up to 10 protégés to look after.

“They meet with their students once every other week,” said Sánchez-Giancola. “They touch base with the students to see how they are transitioning to DePaul.”

Melissa Hernández, a senior from the Chicago suburbs, has been a mentee and a mentor in the program. Hernández, who is majoring in elementary education, with a concentration in Spanish, said she decided to join the program because she wanted to be assured of having a “support system” on the campus, since she was the first in her immediate family to go to college. Her first year as a mentor, she had six protégés, and this year, she has agreed to take on 10.

“It’s very rewarding,” said Hernández. “I’ve learned a lot from my students. I’ve learned a lot about different cultures and ethnicities and different people, and a lot about myself. I see this as a type of service of helping others help themselves.”

Hernández helps run student orientations and recruitment for the program as well. “This is my family away from home,” she said.

Hernández said the most challenging part of her job as a mentor is to reach out to students who are not so receptive to receiving help from her. She said she talks to them about the difficulties she faced as a first-year student trying to adjust to campus life and how she overcame the challenges. If she knows they have an upcoming test, she volunteers to help them study or give a tutorial for them if they want one.

“Letting them know that you are always there is what’s important,” Hernández said.

“I’m doing this because I enjoy it and because I want to help others since others helped me. This is a two-way street, and this is not a hierarchy. We’re equals. We’re learning from each other.”

Hernández said the program and her work as a mentor have helped her become better prepared when she goes to teach in a school system.

“It has taught me how to teach others indirectly so they do for themselves,” Hernández said.
Students entering the program are asked if they prefer someone of the same gender or ethnicity. If they don’t state a preference, program coordinators try to match them with a peer mentor who has a similar major or shared interests.

“We want to make sure they have something in common,” she said.

Hernández said her mentor proved to be a great friend to her. He guided her through a challenging first year in which she wanted to be as active as she’d been in high school, while keeping up with her academic work.

“Re alized what I was here for,” she said. “He helped me prioritize my activities. I’m still involved in all of the organization, but my roles have changed so that I can do my school work.”

The program offers many possibilities to all of the students participating. One of last year’s biggest projects was a trip throughout the south to trace civil rights history by visiting different sites and meeting with civil rights leaders. The program also offers students a chance to attend local professional conferences or take part in cultural activities around the city, such as visiting Chinatown. Another big project last year was a multicultural women’s series on the needs of women of color in the areas of self-esteem, health, and communicating with the opposite sex.

But, Sánchez-Giancola said, the program faces its share of struggles, including getting enough funding, recruiting enough mentors, and making sure the program continues to offer a personal touch to newcomers despite its growth and popularity.

The biggest challenge the program faces, she said, is dealing with the different departments across the campus. Many are reluctant to share information with the program, seem suspicious of Sánchez-Giancola’s office, and often delay helping the office, in her view.

But, Lige said, getting the necessary information from the departments is vital. For example, the program asks the mentees’ professors to provide mid-term reports to give students an idea how they are progressing.

“It helps the students know if they have to work harder,” said Lige. “It helped me see if I was getting a B, I could work harder and get an A. I was also able to get tutoring for free, if I needed it.”

Sánchez-Giancola said the program also has to do a better job of tracking the impact of Project STARS on participating students.

“Our retention data is not as strong as it should be,” she said. “Graduating students have said, ‘I was in STARS, and it made an impact,’ but we don’t know as yet in what areas that impact has been significant.”

But Sánchez-Giancola is optimistic about the program’s future. She hopes the program will soon expand so that students can have a second year of peer mentoring and so that a component can be created to reach upperclass students. She also would like to see alumni take on a role in mentoring students.

Lige, Bj, said she does not see the program as something that is limited to her first year of college. She started working for STARS to earn some money for college. She files, “works the front desk,” and does whatever she is called upon to do for the program.

“Even though this is a first-year program, I know I can still use these people as a resource,” she said. “Whatever problem I have at the University, I know I can come to them.”
The Changing Nature of Work in the 21st Century

Implications for Hispanics, Part One

BY ROANNE ANGIELLO, ED.D.

Today, everyone is well aware of the rapid changes in technology. We cannot walk down the street without seeing someone on a cell phone or pass an office, or even a home, without seeing the glow of a PC monitor. We now exchange e-mail addresses and cell phone and fax numbers as often as phone numbers. Few stop to consider, however, that continuous changes in technology are leading to concomitant changes in work. When these phenomena are accompanied by dramatic demographic changes in our workforce, the result is nothing less than a transformation in the way we work.

There can be little question that the work world and the workforce have changed remarkably and will continue to do so for the foreseeable future. Discussing these issues is no longer the sole province of management theorists and labor economists; one can find ample evidence in the popular media. The New York Times devoted its entire magazine section to this topic last March. A quick search of the World Wide Web reveals sites such as www.newwork.com and organizations such as New Ways to Work. There is a multitude of books, including The Changing Nature of Work, and articles in a variety of magazines.

While these developments obviously have an impact on business and commerce, there are less apparent but equally profound implications for education and on those who are trying to help Hispanics take their place in the workforce of the future.

Changes Affecting Educators
Some educators might assume that the changes are of little consequence to them. After all, schools and colleges still look a lot like they did yesterday. But two underlying forces make it critically important for all educators, K through graduate school, to sit up and take notice.

First, although one can argue about the value of learning for its own sake, publicly funded education, especially, does have the responsibility of providing a skilled workforce. Schools today must prepare students for a very different future than that of a generation ago.

Second, the vision espoused over these past decades, that of lifelong learning, is now becoming a reality—for our students and for teachers. This changes the very workplace of education. Graduate students, traditional- and nontraditional-age college students, and even some high school students, have the opportunity to take courses and earn degrees entirely through the use of technology. This means that online teachers and students might never see one another face to face. If this trend of distance and online learning and work continues, it could have serious implications for Hispanics, who traditionally have lagged behind in embracing technology, and for many students who thrive in the social interaction of the classroom.

In this two-part article on work in the 21st century, I will raise many questions, none of which has simple answers. Answering these questions is up to all of us, as scholars, as educators, as workers, and as citizens.

There are many perspectives from which we can examine today's trends. We could peer through the lens of economic history, studying the progression from the agrarian economy through the industrial revolution into the "scientific" mass production era, and from there into the consumer-driven market economy of the mid-20th century to the global marketplace of the past decade. While some believe that we still keep one foot in this latter era, all acknowledge that we have now entered the "information age."

So before we can contemplate the future, perhaps we should review the past. What did each of these economic transitions mean for workers? At the most basic level, it meant that the skills that once enabled them to earn a decent living were no longer sufficient. The farm and domestic workers needed to learn how to operate machinery. The office workers needed to learn how to use telephones, typewriters, adding machines, and calculators.

Once again, today's workers need a new skill set. Virtually all jobs now involve some type of computer-based equipment. Workers must be more technologically proficient, and, because of the rapid changes in technology, they must be prepared to update, if not replace, their skill set multiple times. Obtaining a degree is not the final step in this process; it is the beginning of lifelong learning. It is critical that Hispanics, many of whom are the first in their families to go to college, recognize that they must continue their education even after they have reached their initial goal.
Minorities in the American workplace

**Discrimination lawsuits on the rise**

- The EEOC has filed an increasing number of charges against companies alleging that they fired or forced the resignation of workers by enacting "English only" policies.

Labor economists who study unemployment, the workweek, and productivity provide another view of the workplace. How many hours does the worker put in? How many “widgets” are produced in those hours? How many people are working? Looking for work? This has led to a creative and controversial means of solving unemployment problems—reducing the workweek. If there are more people than jobs, they argue, then employers should cut the workweek and eliminate overtime, and, as a consequence, continued production would mean hiring more workers. Voilà! Unemployment goes down. This approach is currently in hot debate in France as legislation to combat unemployment, legislation that establishes maximum hours per workweek and per work year, takes effect.

In the United States at the moment, however, it seems that we have the opposite problem. Unemployment is at an all-time low, yet hundreds of thousands jobs requiring technical skills go unfilled. Technology workers are offered signing bonuses, stock options, and other perks. Competition is fierce even for low-skilled workers. Those who were once considered marginally employable, for example, the disabled or the elderly, are now in demand. Minority employment is rising rapidly as industries look for new ways to fill vacancies. This means that the largest group of minority immigrants, Hispanics, represents an important labor pool.

All workers are under pressure to put in more and more hours, among other reasons, to make up for the labor shortage and to meet employer demands for increased
productivity. We have become a workforce that puts in longer hours, one constantly in a hurry, stressed out by the competing demands on our time.

A recent study by the Economic Policy Institute (EPI), "The State of Working America," points out that this is especially true for minorities, with middle-class Hispanics working five hours more per week than their White counterparts and upper-income Hispanics working 12.9 hours more per week than Whites.

**The Un- and Underemployed**

Despite this, there are still many American workers who are underemployed or marginally employed. The shift from a production to a service economy, and from skilled labor to "intelligent" machines, combined with increased globalization, all add up to a drastically reduced number of jobs for skilled production workers, that is, factory jobs. Although many of these displaced workers do eventually find other jobs, they must frequently accept lower pay. And despite retraining, many of these former production workers do not acquire the skills to take the higher-paying and readily available information technology jobs.

Those who have traditionally been marginally employed, the undereducated and unskilled, are still struggling to earn a decent living. The gap between what they offer an employer and the skills the employer needs grows ever wider. Pessimists see little hope for them or for their children. The richer suburban schools equip their classrooms with computers, TV monitors, and Internet connections. They offer parents and community members after-hours training programs.

But what of our urban schools and the populations they serve? Statistics show that Hispanic students are concentrated in urban, poor schools. Therefore, the gap between the information haves and have-nots could well set the stage for continued family cycles of un- or underemployment.

**Downsized Managers**

Another segment of the underemployed workforce is those who once held mid-management, and in some cases, upper-management positions with large corporations. The "right sizing" downsizing, re-engineering of the early '90s left many of these individuals out of a steady, well-paying job. And, although there has been movement lately to increase mid-management positions, it comes too late for many of these displaced workers. Some used the opportunity to start their own business or to change careers. Some accepted lower-status, lower-paying jobs that changed their lifestyles dramatically. Some dropped out of the workforce entirely, taking an involuntary early retirement.

Others became "consultants" or, to use today's vernacular, "free agents." They are employed on a project-by-project basis, for a flat fee, with no benefits. They might have multiple employers simultaneously or go from project to project with long dry spells. Joining these involuntary free agents are those who have chosen free agency because they enjoy the flexibility and, in many cases, the higher pay. Members of this latter, usually younger, breed of "free agent" have technical or financial skills that are in high demand today and have no difficulty lining up the next contract. They might have risk-taking personalities, perhaps fostered by generations of comfortable living. Once again, this trend might take a long time to trickle down to the Hispanic community, which is just beginning to enjoy the prosperity that is part of the American dream.

Many workers, however, long for a steady paycheck and a traditional benefits package. Others who are unable to obtain a permanent position now sign on with temporary agencies. While there are some who choose temporary work because of the flexibility, a significant percentage is marking time, hoping to make that permanent connection. Together, these temporary workers and free agents make up what is called the contingent workforce. Employers have quickly deduced that it is easier to hire people temporarily, on an as-needed basis, than it is to hire a larger permanent workforce and then be forced to let them go in an economic downturn or shift in labor needs. This makes the likelihood of contingent workers obtaining a permanent job quite slim.

Demographers view the whole upheaval in employment through a slightly different lens. They look at the composition of the workforce. Who is working today? We know that there are substantially more women, non-Whites, disabled, and, increasingly, more elderly at work. The dominance of the American workplace by able-bodied, white, Anglo-Saxon males has ended. The U.S. Census Bureau statistics show that Hispanics are projected to be the fastest-growing segment of the population and the workforce by 2050.

Management theorists and practitioners struggle with ways to form cohesive workgroups from these diverse workers. They must interpret and enforce legislation aimed at protecting the rights of workers while developing policies and procedures allowing recruitment and retention of a new type of worker.

All employees struggle with how to relate to and work well with those who might seem very different from themselves. Some who were previously underrepresented have feelings of fear, inadequacy, or anger. They might not have the proper training nor have role models to follow. On the other hand, some who were previously in the majority also cope with fear of change, fear of losing the opportunities they once enjoyed. All of this might be manifested in inappropriate workplace behavior, presenting managers and co-workers with even more challenges.

The number of lawsuits arising from clashes of language and culture in the workplace has grown significantly. Hispanics have challenged the "English only" rules that companies claim are necessary for workplace safety and rapport. The Equal Employment Opportunity Commission reports more cases of discrimination as employers have taken advantage of workers' unfamiliarity with the U.S. workplace and ignorance of their legal rights.

One final perspective of the world of work comes from sociologists and psychologists who look at how changes affect the person, the family, and/or the community. What happens in a marriage when the wife earns more than the husband, especially in traditionally male-dominated cultures? What happens to a relationship when one of the partners is transferred or offered a job in a distant location? How do we provide adequate child care when both parents work or for single-parent families? How do we care for the elderly now that few women stay at home? These are serious challenges for Hispanic families that are already adjusting to upheavals related to economic and educational issues. There are tensions as the younger generation challenges traditions relating to culture and gender expectations.

Turning to our communities, are neighborhoods being integrated now that more minorities have better-paying jobs? If so, how do we prepare people to live in an increasingly diverse society?

As these and many other questions swirl around, it is apparent that technology and demographics have created a sea change around us, raising issues that must be addressed. In part two of this article, I will continue to focus on two major points: what does all of this mean to educators, and how is it changing the nature and location of work?

Passing?
Failing?
Fumbling?

Schools of Education Facing Change

BY ADALYN HIXSON
Last week’s new Boston-based TV drama *Boston Public* had more than a few elements in common with both *The Jerry Springer Show* and *Oz*.

There’s the married veteran teacher having an affair with a student. (To the show’s credit, the teacher does pay for his sins by collapsing and dying in a school corridor, right after complaining to an administrator about the impossible task of raising the students’ test scores using the lousy textbooks he’s given.)

Then there’s the angry student of color who spills in a teacher’s face at close range. And the aging female teacher whose corporal punishment of recalcitrant students, presumably not banned in Boston, is revealed to be for erotic purposes.

And we wonder why nobody wants to go into teaching….

Meanwhile, over in the fictional TV White House of *West Wing*, staffer Sam must have been watching *Boston Public* too because all of a sudden he wants desperately to do something about public education. First he wants a speech he’s writing for President Bartlett [Martin Sheen—born Estévez—at last a Latino in the White House] to call for a “permanent revolution” in education. Nobody else in the inner oval thinks quoting Chairman Mao is such a good idea, and staffer Toby notes, “It’s a nifty phrase, but I think if we call for a permanent revolution people are, you know, going to expect one.”

Staffer Charlie suggests an initiative that would pay college tuition for thousands of students who would then agree to work x number of years as teachers in underserved areas. Toby asks, “Where’s the money coming from?”

Interrupted by a phone call, I return to the TV screen in time to hear President Bartlett say something like, “One HUNDRED new teachers? What happened to one hundred THOUSAND?” I don’t remember whether he is told that 100 is the affordable option, but it seems he plans to mention the initiative in his upcoming speech in Portland, a city that, given its putative anti-growth sentiments, might think even 100 is too many.

Still, the *West Wing* vignette spotlights the public education crisis, and I wonder how in fact the nation is doing in its quest to resolve it. And whether the thousand points of light started out as a million.

**Setting Public Policy—Fast**

I talk with Michelle Buellman, Washington-based manager of federal education programs and projects for the California State University system, about the *West Wing* incident, and ask her just how fast public policy can be changed.

She tells me, “If you have a crisis situation that really hits home with Congress you can get them to do things rather expeditiously.”

She cites a recent situation involving an equal air-time statute that applied to radio. Donors to NPR, National Public Radio, it is said, were not happy to have their contributions used to support air time for candidates they didn’t like, and were said to be holding back on their giving. Legislators, says Buellman, took action in a couple of months. But action that speedy, she says, is “highly unusual.” It typically takes a few years, she says. I’m thinking it was the deregulation aspect that sped it along, not any sympathy for NPR, but that’s another story.

Diane C. Hampton, legislative analyst in the Division of Government and Public Affairs with ACE, the American Council on Education, says she enjoys *West Wing* a lot, but the incident mentioned is not how public policy is made.

“How many years go into a public policy stuff? We worked probably for two or three years on the Higher Education Act, and have been working a little over a year for the Elementary and Secondary to get some of the same language.”

Asked what went through the fastest, she says, “The Hope Scholarship tax credits went through pretty fast,” about a year, she says. “That was the Clinton Administration. It was one of their key programs, and they got support in the Congress.”

**Teacher Preparation**

In its final report, released in September, the Glenn Commission, which examined ways to raise our students’ low performance in math and science, concluded that teacher training is not “simply a matter of preparation; it depends just as much—or even more—on sustained, high-quality professional development.”

“Most other nations have a national education system that can change direction more rapidly than our K-12 system, which is operated by nearly 16,000 independent school boards,” the report continued. “Even when the majority of board members are firmly dedicated to good education, it is still a difficult job to change direction when needed.”

One of many large and small organizations working to help schools change direction is NCEA, the National Coalition of Education Activists, founded in 1991, a multicultural network and membership organization of a thousand or so school staff, parents, teacher educators, community activists, education students, and others working for better public schools. I ask its executive director, Debi Duke, what matters most with regard to teacher recruitment and preparation.

“NCEA believes equity—in resources, teacher quality, etc.—is the most critical issue facing schools. Working conditions and salaries have to be comparable to those in other professions if we want to recruit more and better teachers. This is especially true for recruiting teachers of color, which we think is really important.”

Many would agree, including K.J. Meier, whose research, reported by The Tomás Rivera Center in 1995, specified seven positive outcomes when Hispanic students K-12 have Hispanic teachers, among them: more identified as gifted; fewer placed in classes for educable-mentally retarded; less corporal punishment; fewer suspensions and expulsions; lower dropout rates and grade retention rates; higher scores on standardized tests. Other studies by blue ribbon commissions have stressed the urgent need for
minority and non-minority students to come in direct contact with minority teachers as professionals and as authority figures.

"Teacher education programs," says Duke, "need to continue expanding and improving their efforts to train teachers who can respect and address the culture of the communities where they teach and who have the skills and desire to work with parents and community activists."

She adds, "Any time a mainstream, heavily watched TV show like The West Wing talks positively about the need to support and improve public schools, it can't hurt—though one can always quibble over details."

"Most other nations have a national education system [that can] change direction more rapidly than our K–12 system, which is operated by nearly 14,000 independent school boards."

REPORT OF THE BLUE COMMISSION, SEPT. 2000

Teaching Standards

There is much talk of raising standards. The higher education community, like the corporate community, traditionally resists any standards that might emanate from the government, fearing loss of autonomy.

NCATE, the National Council for Accreditation of Teacher Education, issued what it called more rigorous standards last spring, and also the results of a study by ETS, the Educational Testing Service, showing that graduates of NCATE-accredited colleges of education pass ETS content examinations for teacher licensing at a higher rate than do graduates of unaccredited colleges, and boost their chances of passing the examination by nearly 10 percent. And that NCATE-accredited institutions produce proportionally more qualified teachers than unaccredited institutions.

The organization's website lists the accreditation status of its member colleges and universities, including any on probation, as well as inviting those considering the teaching professions to learn at NCATE-accredited institutions.

Where's the Money Coming from?

Regarding teacher recruitment and preparation, The Higher Education Act of 1998, says Hampton, included a program of grants for partnership starts, for states, and for recruitment.

"Partnership starts were for colleges and had to include two institutes within them—the school of education or college of education—and the generic arts and sciences—maybe not called arts and sciences, but having that content. In addition to those two entities, it had to include at least one LEA-local school district. It could also include business partners, it could include other community organizations, and/or it could be a consortium of colleges.

"I know there is one partnership in California that includes something like 40 school districts."

The state grants, she says, were for whatever programs the states felt they needed—perhaps to improve the licensure procedures or reform the state licensure requirements. The recruitment grants were for recruiting more teachers, especially teachers of colors.

"In the first year, there was $75 million," she says, "$8 or $9 million for recruitment and the rest split between partnership and state grants. The second year, the funding was about $98 million, $75 of it to continue the first year's allocations, leaving $23 in new money, which funded another eight or so partnerships, which are for five years, and six more state grants, which are for three.

"This year's funding level in both bills [House and Senate], assuming that is what will come out in the conference, is also $98 million, just continues the grants made in the first two years, with no new grants this year," says Hampton.

"Then next year, in fiscal FY 2002, even if they hold at the same amount of money, there would be a new competition, because the state grants would be done.

"Those are the federal efforts to do more recruitment.

"We are advocating for more money for both the partnership grants and the recruitment grants." There were nearly 500 applications for partnership grants, she says, only about 25 of them funded. "We were trying to get it up to $150 million. But the pie is not getting any larger, and everybody wants a bigger piece."

ACE led the push, she says, but overall it was a collective effort of many organizations and entities. "It is not the top priority for the higher ed associations. Obviously getting student aid funding up is the top priority."

New Pass/Fail Regulations

The comment period for new federal reporting requirements on pass/fail rates for teachers—the grades they get, not the ones they give out—is now over. Information on the website of NASDEC, the National Association of State Directors of Education and Certification, suggests there was and is some paranoia about making state-to-state comparisons.

"As far as the pass rates go," says Hampton, "we've been working on it. There were groups trying to repeal the law, but until that happens, we are
advising our member institutions how to be in compliance.

“The vast majority of colleges and universities will be just fine. Their pass rates will be seen as accessible. The schools where there might be a problem are schools that have really small programs where one or two students could tip the balance between the acceptable pass rate and an unacceptable pass rate.

“A lot of the schools are HBCUs or HSIs or tribal colleges that are going to be seen as having low pass rates or being at risk. I know the associations that represent those institutions are working really hard with their members so that the report that they send to the state has some contextual information—their mission, the demographics, other measures of quality other than the ability to pass the test, like placement in the local schools, and retention once they’re placed as a teacher—looking at some long-term statistics on how long their graduates are retained as teachers in a school system. Those are better measures of quality than a single test.

“I know that teachers who maybe haven’t passed the test and are teaching on waivers for emergency certification, or don’t have a degree in the subject that they are teaching, are more likely placed in schools that have minority and disadvantaged populations. That’s the fault of principals and superintendents who hire them,” principals, she says, who are “desperate for teachers and just need a warm body, and don’t care if they are qualified or not.”

As for reducing the number of teachers teaching out of field and those who are using emergency certification, Hampton, a certified teacher before joining ACE, says, “I know that there are some really good programs among the California State University system.”

One of the CSU programs, says Buellman, is Cal State TEACH. “It’s designed to help teachers already in the classroom but not licensed. A Web-based program, it’s combining distance learning with teacher preparation to deal with the unbelievably exploding K-12 population.”

Hampton comments on what does and what should happen to newly minted teachers.

“The pre-service happens in colleges and universities, and once they go into the school, they should have a two- or three-year period of induction,” and perhaps are assigned, she says, to a master teacher and helped along with any problems areas there might be.

“There should be ongoing professional development for 10 or 15 years into their career.

“Research has shown that professional development that is done in conjunction with a college or university is much more successful than a one-shot two-hour workshop on something or other—that it will have longer-lasting effects.” She adds that if it is long-term, it can help put in place the requisite strategies and practices.

In many and perhaps most schools, a newly hired teacher rarely has a chance to observe another classroom, prevented by scheduling and per-

haps by custom. This lack of access was mentioned by several budding teachers in a recent TV magazine piece that looked at a New York City innovation—recruitment of people accomplished in other careers to teach in troubled school districts while earning a master’s in education at the City’s expense. One of those recruited to an elementary school was grateful to a seasoned teacher who advised him to line up his students with the tall ones in back, so he could see what the short ones were up to.

Hampton says that ACE would like the partnership language developed in the Higher Education Act to be continued in the Elementary and Secondary Act “so it is a continuum and everybody is involved.”

“It didn’t happen in the last Congress. I guess it will happen in the next.”

To Touch the Future

I ask Hampton about the ACE report, To Touch the Future. Issued about a year and a half ago, the report was very well received, she says.

The report, she says, came out of “a task force of some college presidents and deans of schools of education, some state departments of education, community colleges, etc., who got together and basically said that in order to make the program work, colleges have to put a major emphasis on their teacher preparation programs.”

“And if they don’t do it—if it is not central to the mission of the institution, it is not going to be successful.

“’I think the report recommended that they should look at closing the program down.’

“It got a lot of good press, and colleges are realizing that this is a hot-button issue—that they need to pay attention to it. And that if there are reforms necessary to make their programs more successful, they need to put that at the top of their list’”

Critics

“The Education Trust, here in D.C.—they have been very critical of the schools of education.” The people at the Trust, she says, “blame the schools of education—that they are not in touch with what is needed in local school districts, and that school of education programs need to be reformed and need to have more content—not so much an emphasis on pedagogy—and need to make sure they are preparing teachers who are knowledgeable in math or science.”

Hmm. All of them? A million? A hundred thousand? Would one hundred do as a start?

DIANE C. HAMPTON,
ACE LEGISLATIVE ANALYST
Matilda Is Going to College

Making a Warm-hearted Difference

BY EIRINI GOULETA

According to the White House Initiative on Educational Excellence for Hispanic Americans, undergraduate education is considered today an important path to a better future in the United States.

Hispanics currently represent 14.5 percent (3.6 million) of the total traditional college-age population (18-24 years). The representation of Hispanics in higher education continues to grow. Between 1976 and 1996, the number of Hispanics enrolled in undergraduate education increased 202 percent, compared to only 13 percent for Whites and 44 percent for Blacks.

Hispanic students enroll in college immediately upon graduation from high school at a rate similar to that of other groups. The majority of Hispanic undergraduates (53 percent) are enrolled in two-year institutions. A higher percentage of Hispanic students (45 percent) are enrolled part-time and are more likely to take more than six years to receive a bachelor’s degree. Hispanic students tend to borrow less to pay for their education. As first-year students, close to 50 percent of Hispanics received grants while less than 30 percent received loans to pay for their education.

Despite the promising statistical increase in college attainment of Hispanic youth in the United States, there are many factors that affect and inhibit their educational achievement. Some are: school segregation and low family socioeconomic and educational status, student retention, second-language-acquisition problems, inappropriate testing and assessment, lack of educational inclusion programs and segregation of Hispanic youngsters in ESL self-contained classrooms, misplacement of students in special education programs, educators and school professionals who lack multicultural training, lack of parental support and involvement, lack of programs for parental education and guidance, lack of Hispanic role models among educators, and lack of postsecondary financial aid.

An additional factor is the immigrant experience, which can be very stressful to the student and his/her family. Some of the com-

“I kept contact with my sixth grade teacher during my years in middle and high school. She was my mentor and ally in every successful or difficult moment.”

Some of the inhibiting factors are: school segregation and low family socioeconomic and educational status, student retention, second-language-acquisition problems, inappropriate testing and assessment, lack of educational inclusion programs and segregation of Hispanic youngsters in ESL self-contained classrooms, misplacement of students in special education programs, educators and school professionals who lack multicultural training, lack of parental support and involvement, lack of programs for parental education and guidance, lack of Hispanic role models among educators, and lack of postsecondary financial aid.

that he missed his country of birth.

Shortly after arriving in the United States, my mother, with the assistance of relatives, enrolled me into school. I was placed in second grade even though I had already completed second grade in Bolivia. At the time, I was confused and upset that I would have to study and learn the same subject matters again. However, because of my lack of English fluency, I would be in a self-contained ESL classroom, which meant that all of my peers spoke little or no English.

I was not happy in my new class. I did not have many friends and felt like my father in Bolivia, an outsider. I remember becoming more and more depressed. I never smiled. I felt like a stranger in a strange land. I was always one of the best students in my school in Bolivia, but now I struggled. I did not have the English skills to convince my teacher that I was a good student. I had many barriers to overcome.

First and foremost was the mastering of the English language so that I could earn grades similar to what I did in Bolivia. I had to take many difficult tests and did not understand many of the words. The teacher told me to do the best I could. I did not answer many of the questions on the tests. I was ashamed to bring my school papers home. In my heart, I knew that my school performance was not indicative of my ability.

The only positive experience my first year in school was developing a friendship with Lolita, who spoke Spanish and was my best friend. She was born in the United States. Lolita helped me “learn the ropes” in the new school, and her family was always kind to my mother and I. I do not how I could have made it without her support. She was probably one of the key reasons I looked forward to school.

My teacher was not a nice or kind woman. She was demanding and yelled a lot, especially when
any student could not answer her questions. One day, I was given a note to present to my mother. She was invited to come to the school for a meeting with my teacher. Since my teacher did not speak Spanish, the guidance counselor, who was bilingual, agreed to be an interpreter. Through the interpreter, my mother was able to communicate effectively with the teacher and convey her concerns. I recall my mother telling me that the teacher was concerned about my progress in school and adjustment to the new environment. The teacher was not pleased with the scores I had earned on the standardized tests. The teacher explained to my mother that because of my low scores on the standardized tests, low grades on classroom assignments, and emotional state, a meeting was going to be held involving several school professionals. The purpose of the meeting was to discuss if I should be placed into a special education class.

I recall my mother’s face of concern. Through an interpreter, my mother informed the teacher that if I had taken the same exams in Spanish, I would probably score quite well. Years later, my mother told me that the teacher was advocating for me to be placed in a special education class. My mother believed that as my English ability improved, so would my academic ability.

When the school reopened in September, the placement for me was again in an ESL self-contained classroom, only this time I was in third grade. To my great sadness, I found out that Lolita and her family had moved to another area and would not be returning to school. Three years later, my English improved significantly and so did my scores on all tests, including standardized tests.

Making a Difference

When I began sixth grade, I was placed in a general education class. I knew that this placement would result in further improvement of my English. My new teacher was a young woman with a warm smile and a beautiful heart. She was helpful and respectful to all students. She always had time to help anybody who needed extra help. She had high expectations of all the students and would be coming to my house! I was so excited, and my heart was beating uncontrollably fast. The teacher came and spoke with my mother. I was the interpreter because my mother still didn’t speak much English.

My teacher explained to my mother that I was tested and the results indicated that I was a gifted student. With parental permission, I would be placed for a part of the day with other students who were also gifted. My teacher told my mother that I had the ability and potential to go to college and study to become whatever I would like. I could not believe it. I never thought it would be possible for me to go to college. I never thought my dream to attend college would become a reality. Second, where was the money going to be found? My mother had the same concerns. My teacher explained that if I continued earning excellent grades, there were many funding opportunities and scholarships available to pay for college.

Since that day, I had many conversations with the teacher about my future and what I wanted to become. Finally, I had somebody to talk to about my dreams, fears, and concerns. I started believing in my abilities and self-efficacy for academic and professional success. I studied hard and did the best I could to maintain excellent grades during my school years.

I kept contact with my sixth grade teacher during my years in middle and high school. She was my mentor and ally in every successful or difficult moment. When I finished high school, I received a full scholarship to study journalism in a higher education institution. This is my senior year in college. Reflecting back on my childhood and school years, I know that I am who I have become because somebody believed in me and my abilities to succeed in academics. This person was my teacher. Thanks to her, I followed my dreams and will make my dream a living reality. My mother is very proud of me and very happy of my achievements. Thank you, Teacher, for believing in me, allowing me to dream, and guiding me forward.

Ms. Gouleta, doctoral candidate at the Graduate School of Education and Human Development, George Washington University, earned bachelor’s and master’s degrees in education in her native Greece and a counseling and development master’s in education from George Mason University. She has helped train college students to be effective cross-cultural counselors.
National Organizations Partner to Enhance Teacher Skills and Knowledge

WASHINGTON, D.C.

The National Staff Development Council (NSDC), the largest professional association committed to advancing student success through staff development, is joining with the 2.5 million-member National Education Association (NEA) to identify content-specific staff development that improves student achievement in the core content areas of language arts, mathematics, science, and social studies.

The purpose of the Results-Based Staff Development Initiative is to identify staff development programs at both the elementary and high school levels that are closely connected to student learning. The initiative will analyze content-specific professional development programs to determine which programs effectively improve achievement.

The initiative will use this analysis to develop a resource guide that identifies the best programs and gives guidance to schools that are looking for better ways to help its teachers learn. The two groups also will evaluate ways to strengthen the quality of staff development available to teachers in elementary and high schools.

"This initiative will assist teachers in finding the best content-specific professional development programs to help them boost their knowledge and skills," said NEA President Bob Chase. "The NEA is excited to be a part of this important program to help our students achieve."

More Adults Are Obtaining Postsecondary Education, NCES Data Show

WASHINGTON, D.C.

The proportion of U.S. adults who have earned a bachelor's degree is up nearly 10 percent over the past three decades. However, degree attainment levels vary significantly by race, according to data from the National Center for Education Statistics (NCES).

- The percentage of adults ages 25 to 29 earning at least a bachelor's degree rose from 22 percent to 31 percent between 1971 and 1998.
- Between 1971 and 1998, the percentage of Whites ages 25 to 29 who had earned at least a bachelor's degree rose from 23 percent to nearly 35 percent. In comparison, during this 27-year period, the percentage of African Americans who had earned at least a B.A. rose from nearly 12 percent to 18 percent, and for Hispanics, from nearly 11 percent to 17 percent.
- The percentage of Hispanics earning at least a bachelor's degree has fluctuated over time. Nearly 18 percent of Hispanic adults had earned at least a B.A. in 1983, but 10 years later, the proportion had dropped to 14 percent. By 1997, it had once again reached 18 percent.
- Some fluctuation also occurred among African Americans. Nearly 17 percent of all African American adults had earned a bachelor's degree in 1977, but only 14 percent had done so in 1987. The percentage reached nearly 18 percent in 1995. For Whites, there was less fluctuation—nearly 30 percent in 1977, 27 percent in 1985, and 30 percent in 1989.
- More significant increases were noted among all races for the percentage of adults who had obtained some college education but did not earn a bachelor's degree. Nearly 45 percent of Whites had some postsecondary education in 1971, compared to 69 percent in 1998. For African Americans, the percentage rose from 31 percent to 57 percent and for Hispanics, 31 percent to 52 percent.
First Alliance Programs Alumni Earn Their Ph.D.s

PROVIDENCE, R.I.

The first crop of the Leadership Alliance’s Irene Diamond fellows have earned, or are about to earn, their doctoral degrees and are advancing to professional research positions. Since 1996, the Alliance has awarded Diamond Foundation grants to first-year and dissertation-phase graduate students.

“Since its inception, the Alliance has been dedicated to the goal of helping students from underrepresented groups find their way into and through the academic pipeline and on to valuable research careers,” said Dr. Jim Wyche, the Alliance’s executive director. “Although we initially focused exclusively on students interested in the life and physical sciences, we expanded our mission to include the humanities and social sciences. Therefore, we decided to use the majority of the funds generously donated by the Irene Diamond Foundation to support aspiring Ph.D. candidates in those areas.

“We are so pleased to see the first of these students succeed. They have completed rigorous programs, achieved their goals, and are on their way to successful careers in academia, government, and industry. They are the evidence that brings the importance of our mission into focus.”

According to statistics from the National Research Council, it takes an average of six to seven years of graduate studies to get a doctorate—no matter what your discipline or ethnicity. The Alliance awarded its first Irene Diamond graduate fellowships for first-year students in 1996.

Today, approximately 39 percent of the Irene Diamond awardees have received or are about to receive their doctorates. Of these recipients, 10 have received doctorates, and 90 percent have taken assistant professorships at some of the most respected institutions in the country, including Stanford, Jackson State, and Pace universities, Occidental College, and the universities of Notre Dame, Washington, Kansas, and Delaware.

“The Alliance applauds the efforts of the first groups of our alumni who are making it through the graduate studies pipeline,” said Wyche. “We are very proud of them.”

NACE Report Finds Employers Spending Less Time and Money on College Hiring

BETHLEHEM, PENN.

The National Association of Colleges and Employers (NACE) noted that although competition remains intense for new college graduates, employers report spending less time and money to recruit them. This is among the key findings of NACE’s “Year 2000 Employer Benchmark Survey.”

Employers indicated that they had to interview 4.5 college candidates for every one they hired during the 1999-2000 recruiting season, down slightly from five candidates per hire a year earlier.

Marilyn Mackes, NACE’s executive director, offered some possible explanations for the change in the job offer/acceptance ratio.

“With increased access via technology to information about employers and job opportunities, students may be more selective about where they want to work,” she says. “Employers also may have become more effective in educating students about their organizations. In either case, employers benefit from having to interview fewer candidates to identify new hires.”

The survey also revealed that employers spent an average of $6,207 per hire (costs related to recruiting and hiring), down 17 percent from last year. The decrease in cost-per-hire may be attributed to more focused recruiting efforts. A number of survey respondents indicated that they had narrowed their geographic focus, targeted certain schools, or otherwise scaled back on the number of schools they visited.

The National Association of Colleges and Employers is the leading source of information about the college market for career services practitioners who advise students and graduates in career planning and the job-search process and for human resources professionals who recruit and hire college graduates.
Conservation Scholars Win Getty Awards

The Getty Conservation Institute (Calif.) awarded the first grants in its new residency program to nine distinguished international scholars, including scientists, authors, professors, cultural heritage consultants, and researchers from Brazil, Italy, Great Britain, Australia, Chile, the United States, and Colombia. The group will be in residence at the Getty for three to six months.

The Conservation Guest Scholars are: Raquel Carreras, researcher on wood conservation at the Centro Nacional de Conservación, Restauración y Museología in Cuba; Leonardo Barci Castriota, chair of the department of architectural history and theory at the Universidad Federal de Minas Gerais in Brazil; Blanca Niño Norton, researcher and published on vernacular architecture in Guatemala; Olga Pizano, who has been examining 20th-century architectural management and urban heritage in Colombia; Eugenio Yunis, head of the Sustainable Development Group Museum at the World Tourism Organization in Madrid; and Sharon Cather, Giacomo Chiari, Thomas J. Learner, and Sharon Sullivan.

Barnard College Symposium Features Agosín

The Barnard College (N.Y.) Center for Research on Women presented a symposium and performance on literature and human rights, "Writing Toward Hope," featuring Marjorie Agosín (pictured), an award-winning Chilean poet and international activist, recently given the UN Leadership Award for Human Rights.

The Judy Dworkin Performance Ensemble performed ¿dónde estás?, a piece using text, music, movement, and song to portray the Mothers of the Disappeared—women who protested the disappearance of their children during the military dictatorships of Chile and Argentina in the '70s and '80s.

The Center "continues to explore art as a form of resistance, a means of making sense of senseless inhumanity, and, ultimately, as a path toward redemption," said director Janet Jakobsen.

New Mexico State Trains Bilingual Education Teachers

New Mexico State University received a $275,425 grant from the U.S. DOE's Office of Bilingual Education and Minority Language Affairs to help 45 teachers earn the state's bilingual education endorsement. Many teachers of minority students lack such training.

Teachers will earn master's degrees through the four-year program, "Preparation of Bilingual Education Teachers: A Focus on Literacy," which offers teachers four-year scholarships for tuition and books. The state endorsement, requiring 24 hours of graduate coursework, enhances teachers' knowledge of the relationship between English and Spanish and trains them to build on what children already know, said Robert Gallegos (pictured), adjunct professor in the College of Education and the program's co-administrator. Gallegos himself was unable to understand English until the fifth grade and started his own education in a bilingual classroom.

Pabón Speaks at Bloomfield

Latino community leader Julio Pabón spoke at Bloomfield College in New Jersey at an event sponsored by Lambda Theta Phi fraternity.

A native of Puerto Rico, Pabón is owner and president of Latino Sports, a multifaceted sports promotion company in the South Bronx, N.Y., specializing in the marketing and promotion of Latino athletes and their own sports apparel line. He founded the Roberto Clemente/Jackie Robinson Softball League in 1978 to provide a positive experience for troubled teens.

A community and political activist for nearly 25 years, Pabón is the former NY City direc-
tor of Latino affairs. In 1992, he co-founded the National Puerto Rican Business Council, a forum for networking and discussion of community issues. He established the Lehman College Latino Alumni and founded the Young Cayques Youth Leadership Program.

Manchester Community Examines Cuban History

Manchester Community College's (Conn.) 15th annual Global Issues Conference, "Understanding Cuba," covered the social, economic, cultural, and political background of Cuba and its dynamic relationship with the United States and the Cuban American community.

PRIDEF Sponsors Law Day at Pace

The Puerto Rican Legal Defense and Education Fund (PRIDEF) hosted its 18th annual Law Day program at Pace University in New York. Law Day is a national recruitment program for prospective students and for law schools that have demonstrated a commitment to diversity.

Taking part in "The Law School Application Process" were Luis J. DeGrufle, professor, CUNY School of Law; Patricia Johnson, professor, John Jay College of Criminal Justice; David Cohen, dean, Pace University School of Law; and Juan A. Figueroa, president and general counsel of PRIDEF.

"Beyond the LSAT: Non-quantitative Factors That Make You a More Attractive Applicant" and "The Advantages of Applying Outside of the Metropolitan Area" were two new workshops. More than 60 law schools from across the U.S. took part in a recruitment session.

PRIDEF's Education Division has served the community for more than 25 years.

South Florida Awards Latino Scholarships

A Latin community advisory committee at the University of South Florida continued its tradition of awarding deserving students with scholarships at its annual Latino scholarship ceremony.

The committee and USF President Judy Genshaft welcomed 29 first-year and transfer students into the program as new recipients, along with 45 continuing students. Their academic achievements have garnered them scholarships from individuals, businesses, or organizations in the Tampa Bay community, including $17,500 from the Mayor's Hispanic Advisory Council and $15,000 from the Merchant's Association of Florida. A total of $124,000 in tuition assistance will be given to the students, ranging from $1,500 to $25,000 for 2000-01.

The scholarship program not only opens doors for students; it also helps meet workforce demands for bilingual professionals in many fields. Committee chair Maritza Rovira-Forino said that nearly 70 alumni have benefited from its mission since the program began in 1992.

Vélez and López Discuss NAFTA at St. Mary’s

Without NAFTA—implemented in 1994 to abolish tariffs between the U.S., Mexico, and Canada—Mexico would have been relegated to continued economic turmoil, says Dr. Alejandro Vélez (picture), professor of economics and director of the Latin studies program at St. Mary's University in Texas. Now, Mexico is enjoying a new era marked by strong economic growth, a stable peso, and political reforms.

"Foreign investors are willing to support a political system that isn't going to collapse," he said. Vélez comments came after Vicente Fox—the first Mexican president outside the ruling Institutional Revolutionary Party in 71 years—credited NAFTA with creating thousands of jobs and generating some $10 billion in direct foreign investment in Mexico.

St. Mary's University School of Law is among a select group of law schools to adopt the first legal textbook on NAFTA, underscoring global trends in international trade, business development, and cultural exchange. NAFTA: A Problem-Oriented Coursebook was co-authored by David López, associate dean for administration at the law school at St. Mary's and specialist in Mexican law.

Macias Harrison Discusses Future of Crafton Hills

"Part of my job is to let the public know and understand the critical role that CHC plays in meeting the needs of education and training for the area," said Macias Harrison, president since July of Crafton Hills College (CHC).

Speaking at her installation program, Harrison announced that during the spring semester, many of the College's student services would be moving into the newly constructed Student Services Annex, the first new building at CHC since its childcare center opened in 1996. She said the College plans to forge better articulation with K-12 and four-year colleges and universities, and she noted the success of CHC's computer technology program, which has purchased hundreds of new computers and state-of-the-art software.

LIU-Brooklyn Hosts Cuban American Author

Cuban-born writer Ernesto Mestre presented a vivid portrait of Cuba as he read from his work at Long Island University-Brooklyn, part of the English department's multicultural "Voices of the Rainbow" poetry and fiction reading series.

Mestre was born in Guantánamo, Cuba, in 1964. His family emigrated to Madrid, Spain, in 1972 before settling in Miami, Fla. His debut novel, The Lazarus Rumba, a family saga centering on Cuba's recent past, portrays the spiritual landscape of the Cuban people in the aftermath of Castro's revolutionary upheavals. A New York Times reviewer commented, "Mestre manages to interpret magic realist tradition in his own distinctive manner. When
evoking the numinous ways that 'the dead hide in the lives of the living,' Mestre's symphonic imagination proves mesmerizing."

Mestre has a bachelor's degree from Tulane University and now lives in New York.

**New Mexico Honors Resident Alumni**

The University of New Mexico (UNM) Alumni Association honored recipients of the Zia awards, which celebrate accomplishments of New Mexico resident alumni. José Abeyta, Jackie Baca, María Griego-Raby, Art Melendres, Thomas B. Ryan, and Louis L. Weller, all active in the community, were honored.

Abeyta is a former New Mexico state representative. Baca has helped institute several scholarships for minority and high school seniors. Griego-Raby, president of Contract Associates, Inc., is a minority-woman business owner. Melendres is general counsel to the Albuquerque Public Schools. Ryan is executive director of Learning Technologies for the Albuquerque Public Schools. Weller is founder and president of Weller Architects.

The association also gave Ann Rhoades a Zimmerman Award and Van Dorn Hooker a Ferguson Award.

**Rhode Island Hosts Venezuelan Ballet Company**

The young and vibrant company, Ballet Nacional de Caracas, performed at the University of Rhode Island.

In its early years, 1980 to 1984, the company appeared exclusively in a classical repertoire. With the arrival of Venezuela's internationally renowned choreographer, Vicente Nebrada, the group's stock of works has broadened to utilize the energy and talent of its young dancers. Now in its 20th year, the company is internationally known for its colorful mosaic of dance styles, brilliantly executed.

**Crown Prince of Spain Visits New Mexico**

A newly endowed chair in information science and technology at the University of New Mexico (UNM) will bear the name of The Crown Prince of Spain, Felipe de Borbón, Prince of Asturias, who was present for its announcement.

The chair is being funded by a $1.5 million endowment to the UNM Foundation, Inc., from Iberdrola, one of Spain's largest power companies.

Two other American universities, Tufts University and Georgetown University, have chairs in the humanities that bear the name of the Prince.

The Crown Prince, who is honorary chair of the Hispanic Culture Foundation board, came to Albuquerque to participate in the opening of the National Hispanic Cultural Center.

**Corzio Inaugurated as University of the Arts' Second President**

Miguel-Angel Corzio, former director of the Getty Conservation Institute in Los Angeles, Fulbright scholar, administrator, and author, was inaugurated as second president of The University of the Arts in Pennsylvania, the only one in the nation devoted exclusively to the arts. Corzio's mission includes expanding the University's visibility and achieving diversity. A Mexican-born U.S. citizen, he is part of the three percent of American college or university presidents who are of Latino heritage.

Despite enrolling more than 2,000 students from throughout the U.S. and 35 countries, the University remains relatively unknown to many in the international arts community. Corzio said one of his goals is to make a compelling case for the value of the arts in contemporary society.

**Nazareth Professor Receives International Studies Chair**

Dr. Tina Pereda (pictured), professor of Spanish at Nazareth College in New York, is the first recipient of the Rose Marie Beston chair for international studies, named for a former Nazareth president, an international traveler currently residing in New Mexico.

Nazareth College President Dr. Robert A. Miller announced the selection of Pereda, who directs the College's study abroad program in Valencia, Spain.

Pereda has been working on a book, *Twentieth Poets and One Reader*, which will offer college students a global literary perspective from a wide spectrum of Hispanic writers. A native of Madrid, Spain, Pereda has a master's degree and a doctorate from the University of Colorado-Boulder.

**News from Texas-Pan American**

- The Houston Endowment has awarded $750,000 to UTPA for its cooperative premedical honors college program with the Baylor College of Medicine in Houston. The three-year program began with a $280,000 award in 2000. Another $250,000 will be provided in 2001, followed by $220,000 in 2002.
- For the ninth year, 12 UTPA students have received $1,000 scholarships from the AEP-Central Power and Light (CPL) Company. All are business and engineering majors, and most work part time or full time to support themselves.
- UTPA began a master's degree program in mechanical, electrical, and manufacturing engineering following official approval from the Texas Higher Education Coordinating Board.
- UTPA received $820,000 in continuation grants from the U.S. Department of Health and Human Services for faculty research in the minority biomedical research support program.

**South Florida Libraries Rely on Pérez**

Derrié Pérez has been acting dean of the University of South Florida (USF) library system, while the University conducts a national search for the position.

Pérez represents the libraries at the Tampa, St. Petersburg, and Sarasota-Manatee campuses, the Hanks and Elaine Shimberg Health Sciences Library, and the Louis de la Parte Florida Mental Health Institute Library. She supervises centralized services such as cataloging and acquisition of library materials, including USF's electronic Virtual Library.

"Combining the campuses' research library efforts with the medical and mental health libraries should position us to support a strong research university," said Pérez, who is a past president of the Tampa Bay Library.
guished alumna Carmen Vadillo (r.) during the College’s 80th anniversary gala. Vadillo was one of 80 distinguished alumni to be honored.

As a single mom, unsure where her life would lead, Vadillo enrolled at Allan Hancock College and now uses her own success to inspire others. Two years ago, she became the first lay principal in the 62-year history of Santa María’s St. Mary of the Assumption School. “My experience at Allan Hancock College changed my life,” said Vadillo. “I learned I could dream and succeed.” She continued her academic success at Cal Poly, earning bachelor’s and master’s degrees.

Washington State Students McNair Scholars

Washington State University (WSU) students María González (pictured r.), Amber Vargas (pictured l.), and José Esparza were named Ronald E. McNair post-baccalaureate achievement program scholars.

González is part of WSU’s Future Teachers of Color program, is a member of the Student Washington Education Association, the Phi Eta Sigma honor society, and the National Society of Collegiate Scholars, and is the Gamma Alpha Omega sorority vice president. Vargas, a graduate of Toppenish High School, is majoring in English and Spanish. Esparza is a junior majoring in comparative American cultures.

The McNair scholars program encourages and prepares low-income, first-generation college students or those of African American, Chicano/Latino, or Native American heritage to go on to graduate school and earn doctoral degrees, said Nancy Schmidt, coordinator of the WSU graduate school program, which is funded by a five-year $203,000-a-year federal grant. The McNair program is named for Ronald E. McNair, an astronaut who died in the 1986 space shuttle Challenger explosion.

San Antonio Surgeon Heads Health Science Center

Francisco Joaquin González Cigarroa, associate professor of surgery at the University of Texas (UT) Health Science Center at San Antonio, recently became its new president, succeeding John P. Howe III, who retired after 16 years.

A faculty member since 1995, González Cigarroa specializes in pediatric and adult kidney, liver, and intestinal transplantation. He is director of general pediatric surgery and pediatric abdominal organ transplant at University Hospital. He serves on the medical staff of three Christus Santa Rosa Hospitals and at North Central Baptist Hospital, and is a consultant at Methodist Children’s Hospital.

González Cigarroa is a fellow of the American College of Surgery and a diplomate of the American College of General Surgery and the American College of Pediatric Surgery. He has a bachelor’s degree from Yale and a doctorate from the UT Southwestern Medical Center at Dallas.

Allan Hancock Celebrates Anniversary

Pictured: Eddie Stanfield (l.), president of the Allan Hancock College (Calif.) foundation board, presents an alumni certificate to distin-
sexual Latino in today's modern world.

Most renowned for his portrayal of homosexual teenager Rickie Vásquez in My So-Called Life, Cruz also starred as Angel in Broadway's hit musical Rent and was featured in the films Nixon, Johns, and Joyride. He recently appeared in the sci-fi thriller Supernova.

A frequent speaker at colleges and universities across the country, he draws on his own experiences in addressing issues relevant to gay and Latino communities.

### NCLR to Help Increase Hispanic Home Ownership

The National Council of La Raza (NCLR) and Freddie Mac, along with the National Association of Hispanic Real Estate Professionals (NAHREP) and RadioEspanol.com (REE), announced the Hispanic Community Technology Initiative, a major outreach effort that will use the latest mortgage technology to increase home ownership among Hispanic families.

Despite recent gains, fewer than 4 percent of the nation's Hispanic families own their homes, compared to an overall home ownership rate of 57 percent. This initiative, supported by Rep. Lucille Roybal-Allard, chair of the Congressional Hispanic Caucus, will help bridge the gap.

NCLR is the nation's largest Hispanic civil rights organization. Freddie Mac is a stockholder-owned corporation established by Congress in 1970 to support home ownership and rental housing. NAHREP, a nonprofit trade association, represents the professional interests of the more than 50,000 Hispanics employed in real estate. REE is a wholly owned subsidiary of Quepasa.com (NASDAQ: PASA).

### CDC Addresses Racial and Ethnic Health Disparities

The Centers for Disease Control and Prevention awarded $19 million to community coalitions in 15 states to help address racial and ethnic disparities in health in the U.S. In addition, the National Institutes of Health contributed $5 million, for a total of $24 million, and has pledged to sustain that level of support for four additional years.

A total of 24 community coalitions will receive funding to implement plans they've developed to reduce disparities in a geographically defined minority population, which includes Hispanics and Americans.

Among the grantees: Florida International University, Medical University of South Carolina, Trustees of Columbia University, University of Alabama-Birmingham, and University of California-San Francisco.

### Texas A&M-Corpus Christi Hosts Quintanilla

Dr. Guadalupe C. Quintanilla, associate professor of the department of Hispanic and classical languages at the University of Houston, was the keynote speaker for "El Día de la Raza" at Texas A&M University-Corpus Christi.

Quintanilla has helped law enforcement agencies promote greater understanding of marginalized ethnic/cultural groups. She has developed many successful programs used in cross-cultural communication training.

Quintanilla has received several presidential nominations and appointments and was inducted into the National Hispanic Hall of Fame and the Hispanic Woman Hall of Fame. Her life and achievements have been documented in Reader's Digest, The New York Times, Vogue, and People.

### Miami-Dade Students Named Gates Scholars

In Florida, Miami-Dade Community College (M-DCC) students Patricia Danas and José Mercado (pictured) will never have to worry again about paying their tuition. They and four others were named Gates Millennium Scholars. The scholarship, funded by a grant from the Bill and Melinda Gates Foundation, will provide financial aid for the entire cost of the students' tuition, fees, books, and living expenses—including graduate studies.

Damas was a biology major at M-DCC, part of its Bridges Program (for minority students) with the University of Miami (UM), and a member of the Phi Theta Kappa Honor Society. She will study at UM for at least the next two years.

Mercado, a physician assistant student at M-DCC, is president of the Medical Center campus student body, minority students representative for the physician assistant student organization, and a member of the Phi Theta Kappa Honor Society. He plans to finish his bachelor's degree at St. Thomas University.

M-DCC students Shama Ghulam Hussain, Vandamme Jean, Sandra Bigelow, and Tiffany Knowles were also named Gates Millennium Scholars.

### Prominent Journalist Speaks at Western Michigan

Richard González, national affairs correspondent for National Public Radio (NPR), spoke on "News Coverage of National and International Affairs" at Western Michigan University.

González has been with NPR since 1986. His reports are featured regularly on NPR's award-winning new programs All Things Considered, Morning Edition, and Weekend Edition. González was honored in 1984 by the World Affairs Council of Northern California for his documentary on the war-ravaged Miskito Indians of Nicaragua and won a World Hunger media award in 1988 for "Street Children in Maputo."

He has a bachelor's degree from Harvard College, and in 1994 was a John S. Knight fellow at Stanford University. González is co-founder of Familias Unidas, a bilingual social services program in Richmond, Calif.

### Sosa Douglass Named Board Officer at Broward

Fort Lauderdale, Fla., attorney Georgette Sosa Douglass and Paul Anderson, vice president for governmental relations at JM Family Enterprises, were named chair and vice chair, respectively, of the Broward Community College District board of trustees.

Previously, Sosa Douglass was vice chair, and Anderson was chair of the five-member board that governs the College. The other trustees, all

Sosa Douglass, a native of Panama, has a bachelor's degree from Schiller University of London. Anderson has a bachelor's from the University of Florida.

Grant to Aid Minority Students in UNM Biology Department

Exceptional undergraduate minority students in the biological sciences at the University of New Mexico (UNM) will benefit from a five-year $1.1 million grant from the National Institutes of Health.

The Minority Access to Research Careers program is designed to identify talented students interested in research and provide them with the training and experience necessary to successfully enter graduate school. The long-range goal is to have the students complete their doctorate and to successfully develop careers in biological research.

The program began in the fall with five students, Amanda Archuleta, Adrian Benjamin, Erin Gonzales, Michael Perrine, and Janice Salazar. According to Program Director Kathryn Vogel, chair of the biology department, the program, at its capacity, will support 10 students during their final two years at UNM.

Villarreal Speaks at Palo Alto

Texas state Rep. Michael Villarreal was the speaker at the fall honors convocation at Palo Alto College in Texas. The event honored students with a 3.5 or higher GPA. All received certificates designating them as president's list or dean's list honor students.

Villarreal was elected to the state legislature during a special election last February. He earned a bachelor's degree from Texas A&M University, continued his studies at MIT and Harvard, and earned a master's at the Kennedy School of Government. He has been named a Woodrow Wilson public policy fellow, received an American Economics Association research fellowship, and was a research fellow at the Federal Reserve Board of Governors.

Cal State L.A. Student Interns with Congresswoman

California State University-Los Angeles undergraduate Jeanette Contreras, a political science major in the pre-law option, is one of 21 students selected to participate in the Congressional Fellowship Program of the Leon Panetta Institute. Contreras interned in the office of Rep. Maxine Waters, who represents the 35th District of California.

Previously, Contreras completed a three-month term in the office of state assembly member Gil Cedillo through Cal State L.A's Pat Brown Institute. She then became the University's first placement in the Panetta Institute's Congressional Fellowships at CSU-Monterrey Bay.

Parents Are Going Back to School

Nearly two-thirds of the nation's parents get involved in school activities such as attending general education meetings or events, serving on a committee, or volunteering. The National Education Goals Panel released that information.

In 1999, 62 percent of parents reported that they participated in two or more activities in their child's school during the current school year. This figure reflects no significant change from the 63 percent figure reported in 1993.

Many organizations have made parental involvement in school activities their central mission, including The National Coalition for Parent Involvement in Education. Another group, the National Network of Partnership Schools at Johns Hopkins University, provides help to improve school, family, and community partnerships.

Created in 1990, the National Education Goals Panel is a bipartisan body of federal and state officials.

RECENT PUBLICATIONS

Refried Elvis: The Rise of the Mexican Counterculture

By Eric Zolov

This book traces the history of rock 'n roll in Mexico and the rise of the native counter-cultural movement La Onda (the wave). The story frames the most significant crisis of Mexico's post-revolutionary period: the student-led protests in 1968 and the government-orchestrated massacre that put an end to the movement.

The Fortunes of the Humanities: Thoughts for After the Year 2000

By Sander L. Gilman

Given the attacks on the humanities by the right ("Goethe is not taught anymore!") and the left ("Why teach dead white males?") over the past decade, how can we teach and research in the humanities in the years to come? This book presents a series of closely interconnected exercises in understanding the present state and future possibilities of the humanities, especially the teaching of "foreign" languages and cultures.

Rethinking Multiculturalism: Cultural Diversity and Political Theory

By Bhikhu Parekh

Moving beyond the usual thinking about multiculturalism, Bhikhu Parekh challenges the Western bias of much of traditional moral philosophy, including contemporary liberalism, which in his view has the tendency to assert that only one way of life or one set of values is worthwhile, dismissing the rest as either false or misguided. He grounds this discussion in the history of political theory.

Writing Violence on the Northern Frontier: The Historiography of Sixteenth-Century New Mexico and Florida and the Legacy of Conquest

By José Rabasa
This book examines the conjunction between writing and violence that defined the 16th-century Spanish conquest of the Americas (particularly North America) and in doing so reveals why this conjunction remains relevant and influential today.

My Bloody Life: The Making of a Latin King
By Reymundo Sánchez

Love. Honor. Loyalty. These are the principles that bind the young runaways, outcasts, and lost boys who find security in the embrace of a gang family. Or so the lore goes. Reymundo Sánchez was a lost boy, initiated into the Latin Kings by performing his first “hit” at the age of 14. This is the story of his odyssey through the ranks of the new mafia, where the only people more dangerous than rival gangs are the members of your own.

En aquel entonces: Readings in Mexican-American History
Manuel G. Gonzales and Cynthia M. Gonzales, eds.

The advent of Chicano studies in the 1960s spawned a tremendous interest in the history of Mexicans in the United States. Committed to a multidisciplinary approach from the very outset, Chicano and Chicana scholars have used a variety of perspectives to explain the Mexican American past, but much work has not been available to students. This book is meant to help solve that problem.

Juanita: A Romance of Real Life in Cuba Fifty Years Ago
By Mary Peabody Mann
Patricia M. Ard, ed.

Though a surprising number of middle-class women from the United States traveled to Cuba in the early 19th century, few possessed the literary gifts and intellectual connections of Mary Peabody Mann. Mann's experience of living on a Cuban slave-holder's plantation from 1833 to 1835 is the basis of this historical romance, originally published in 1887 and never before reprinted. Mann's novel raises questions about the relation of slavery in the Caribbean to that in the United States, while also probing the connection between love and race. Introductory essay by the editor.

Poetry Like Bread: Poets of the Political Imagination from Curぶstone Press
Martín Espada, ed.

Curbstone Press has published this new, expanded edition of Poetry Like Bread to help mark its 25th anniversary as a nonprofit arts organization. These engaged poems, combining quality, clarity, and relevance for an audience eager for serious literature, speak to the human condition in the tradition of William Blake, Bertolt Brecht, Pablo Neruda, Langston Hughes, and others who wanted their work to make a difference.

State Formation and Democracy in Latin America, 1810-1900
By Fernando López-Abades

Despite a shared colonial past, South American nations experienced different patterns of conflict in the 19th century. These differences led to the creation of a variety of states and regimes, from authoritarian military oligarchies to popular democracies. Using a rigorous logic of comparison, the author explores the roots of state building in five countries and explains why the political systems of these early post-independent societies were prone to militarism, corporatism, or liberal democracy.

Tuition Rising: Why College Costs So Much
By Ronald G. Ehrenberg

Tuition at America’s colleges and universities has risen faster than the rate of inflation for the past 30 years. The author discusses a wide range of topics, including endowment policies, admissions and financial aid policies, the funding of research, tenure and the end of mandatory retirement, information technology, libraries and distance learning, student housing, and intercollegiate athletics.

Rebirth: Mexican Los Angeles from the Great Migration to the Great Depression
By Douglas Monroy

This sweeping, vibrant narrative chronicles the history of the Mexican community in Los Angeles. Douglas Monroy unravels the dramatic, complex story of Mexican immigration to Los Angeles during the early decades of the 20th century and shows how Mexican immigrants re-created their lives and their communities.
Cuban Studies 30
Lisandro Pérez and Uva de Aragón, eds.

Cuban Studies annually publishes original, interdisciplinary articles on Cuba in both English and Spanish. With this, its 30th volume, the editorship has moved to the Cuban Research Institute at Florida International University. Under the direction of Lisandro Pérez and Uva de Aragón, Cuban Studies continues its long-standing tradition of publishing on a wide variety of topics for scholars and generalists interested in Cuba.

Myth, Reality, and Reform: Higher Education Policy in Latin America
By Claudio de Moura Castro and Daniel C. Levy

Analysis of higher education is often divided between those who see little need for change and others who want to arbitrarily overhaul the system and impose unfamiliar policies. Such polar assessments preclude an objective examination of Latin America's higher education system and the ways to reform it. This book provides a broad but provocative analysis that examines higher education both in terms of domestic development and the international educational reform process.

Collected Fictions: Jorge Luis Borges
By Jorge Luis Borges

Luis Borges' writing, with its many allusions to literature, philosophy, religion, culture, and history, skillfully blends the real and the imaginary, symbolism and myth. Translator Andrew Hurley, professor of English at the University of Puerto Rico, has rendered these magical fictions with close attention to Borges' terse and subtle style.

Selected Poems: Jorge Luis Borges
Alexander Coleman, ed.

Though Jorge Luis Borges is principally known today for his famous fictions, he considered himself "as a reader, then as a poet, then as a prose writer." There is one school of thought that argues that his poems are in fact his major contribution to 20th-century literature. This volume gathers together approximately 200 of his best poems.

Many publications featured in this section are available through amazon.com.

NCCJ - Dr. Martin Luther King, Jr.
"All People's Breakfast"
January 15

The 13th annual "All People's Breakfast," sponsored by The National Conference for Community and Justice, has as its theme this year "Creating the Beloved Community" and convenes at 7:30 a.m. in the Golden Hall, San Diego Convention, San Diego, Calif.

Contact: (619) 401-3111.

NALAC Conference
January 17-21

Texas A&M University-Corpus Christi will help host a conference of the National Association of Latino Arts and Culture (NALAC), dedicated to defining the role of Hispanic art in the community. At the Ramada Inn Bayfront in Corpus Christi.

Workshops are scheduled on leadership and youth, the impact of immigration, assimilation and hybridization, and digital technology. There will be performances, readings, and exhibits throughout the conference, along with workshops in dance, music, theater, visual arts, literature, performance art, and media arts.

Contact: Lilly Flores Janacek, (512) 825-2427.

AAHE Conference on Faculty Roles & Rewards
February 1-4

This 9th annual conference will focus on the changing professoriate and the two developments most salient in driving that change—new technologies and the generational shift now taking place in the faculty. At the Tampa Marriott Waterside in Tampa, Fla.

USC Continuing Education 2001 National Conference
February 11-14

University of South Carolina's department of continuing education presents "Stop Surfing, Start Teaching: Teaching and Learning through the Internet." In Myrtle Beach, S.C.

AACRAO 2001 Annual Meeting
April 22-25
The 87th annual meeting of the American Association of Collegiate Registrars and Admissions Officers. At the Washington State Convention and Trade Center in Seattle, Wash.
Book Review

By Vicki Snyder

Nava’s mother, a Mexican immigrant, worked long hours and survived a difficult marriage that ended with divorce. Yet, Consuelo Chavira Sepulveda, who had only an eighth grade education, possessed the wisdom to raise her only child—an independent, strong-willed daughter—wisely. Years later, Nava asked her mother, then near death, what made her strong. She felt disappointed when her mother told her that beans were the source of her strength. Not until several months later did Nava realize that her mother had not been talking about beans’ nutritional value. She had been talking about character.

Nava, an Emmy Award-winning television journalist, community leader, consultant, newspaper columnist, and educator, learned from her mother “that character has nothing to do with titles and wealth.” Discarding imperfect pintos while preparing frijoles de la olla, Nava remembered how her mother consistently reminded her that even one bad bean could ruin the dish. “She was saying,” Nava said, “that the virtuous life is the product of constantly weeding out flaws and weaknesses, and choosing right over wrong, just like preparing a good pot of beans.”

Teachers will find It’s All in the Frijoles beneficial for classes in English, sociology, and race and ethnic relations. Since proverbs are given in both Spanish and English, Spanish teachers could use it as well. Hispanic readers, whatever their cultural background, will also find the book enlightening.

Nava has seen firsthand how stresses of adjusting to life in the United States affect many Hispanic families. Most parents want their children to have “the same kind of moral, ethical, and religious direction that they had growing up.” Instead, Nava says, each generation is moving farther away from “the cultural and moral traditions of their own Hispanic heritage.” Nava tells parents that this book has “simple yet profound concepts” that they and their children “can explore and read together.” She suggests that parents also share their own personal stories with their children while they themselves read the book.

Contributors to It’s All in the Frijoles include recording artist and film star Pepe Aguilar, singer and author Joan Baer, attorney Fernando Chávez, artists Laura Hernández and Miguel Martínez, former U.S. Treasurer Katherine Ortega, and UCLA law professor Cruz Reynoso, who recently received the Hispanic Heritage Award for education.

Besides being “part anthology,” Nava also describes the book as “part first-person recollections from my own experiences.” She devotes a chapter to each of the book’s fourteen virtues: responsibility, respect, hard work, loyalty, faith, honesty, courage, humility, temperament, prudence, justice, fortitude, chastity, and charity. Nava introduces each chapter by talking about the virtue featured in that chapter. Myths, poetry, recollections, and sayings from Hispanics, both past and present, follow.

“Hispanic culture teaches that one’s behavior is guided by its effect or impact on others, rather than by its sole effect on the individual,” Nava writes in “Responsibility.” Family members, including aunts and uncles, teach children how to behave and what their family roles are. While Nava’s mother recognized her duty to her daughter, she also expected Nava to fulfill her own responsibilities. Nava well remembers when her mother allowed her to learn the sad consequences of neglecting responsibility. After Nava became distracted for several days while playing with friends, she found her seven parakeets, whom she failed to feed, had died. In the same chapter, Manuel T. Pacheco, Ph.D., president of the University of Missouri System, says that the way he fulfills his role at work is influenced by how he was taught as a child to be responsible.

In the chapter entitled “Hard Work,” Loretta Sánchez and Joe Kapp explain how they were taught to work hard and to do things right. Motezuma Esparza tells how his father loved work so much that he insisted that his guests work, too. “What I remember is that everybody got into it, everybody liked it,” Esparza says. “Work wasn’t a chore in the way my father presented it. It wasn’t a burden. There was satisfaction and fulfillment in achieving and completing something.” Determined to follow his dream to become an animator from the time he was eleven years old, Phil Román says, “I never thought what I wanted was impossible because if you think something can’t happen, it won’t, because you’ve already set your mind against it.”

“For Further Reading” gives a four-page list of additional books by authors including Rudolfo Anaya, Juan de Betanzos, Rosie González, and Olga Loya. The one-paragraph descriptions in “Contributors’ Biographies” offer interesting details. A detailed index helps readers easily locate references to specific topics.

“My mother was a woman of tremendous character and spiritual strength,” Nava says. In sharing the virtues her mother taught her and the virtues that contributors have learned, readers of It’s All in the Frijoles can also discover how to be people of character.

Vicki Snyder, graduate of Ohio State University, is a freelance writer and independent researcher whose work has appeared in Home Office Opportunities, Lefthander Magazine, Magazine of the Midlands, and Modern Office.

What makes Tampa Bay Super?

The University of South Florida, as a major contributor to the community, is helping to make Tampa Bay an even better place to live. At USF, we've received more than $170 million in annual research funds to focus on major goals such as tackling ways to control Alzheimer's disease and repair brain damage. Our engineers are building robots that can find trapped victims in search-and-rescue missions. And our educators are constantly enhancing efforts to teach young students.

With a top Carnegie Foundation ranking, USF scores with students and researchers nationwide as a leading research institution contributing to our society.

Sure, Tampa has a Super Bowl and great community sports teams... but USF is making differences to last a lifetime.

Discover USF: www.usf.edu.

Science Faculty!
Opportunities for Outstanding Students

NATIONAL INSTITUTES OF HEALTH
Undergraduate Scholarship Program

The UGSP is sponsored by the National Institutes of Health (NIH), the Federal Government's premier biomedical research and research training agency. NIH offers scholarships to qualified students who are committed to a career in biomedical research.

Scholarships of up to $20,000 per year support tuition, educational, and qualified living expenses (room, board, transportation) while students pursue an undergraduate degree.

For each award year, scholars work 10 weeks with salary benefits in our research laboratories in Bethesda, Maryland. They are assigned mentors, participate in developmental and science enrichment seminars, and are provided with housing and transportation. After graduation, they work 1 year of full-time employment at NIH for each year of scholarship award.

This is a special opportunity for special students!

Advise students to apply if they:
- Are committed to a career in biomedical research;
- Are from a disadvantaged background;
- Have a GPA of at least 3.5 or are in the top 5% of their class;
- Are a U.S. citizen, national, or permanent resident;
- Are enrolled or accepted for enrollment as a full-time student at a qualified accredited institution.

MICHIGAN STATE UNIVERSITY

OLD DOMINION UNIVERSITY

PRESIDENT'S GRADUATE FELLOWSHIP PROGRAM

The purpose of the President's Graduate Fellowship program is to diversify the population of faculty members who hold the terminal degree in critical academic areas by providing financial support to persons from underrepresented groups as they earn their terminal degree. Qualifications of the applicant, as well as the needs of academic departments, are considered in selecting fellows.

Fellowship Terms: The normal support period is up to three years during which the fellow receives a monthly stipend and a tuition and fees allowance. The typical stipend is $20,000 per year. The annual combined award for stipend and educational expenses cannot exceed $30,000 per year. Specific terms are negotiated for each President's Graduate Fellow. Upon completion of the degree, fellows agree to serve in a tenure-track position at Old Dominion University for at least three years.

Eligibility: Applicants must be enrolled in or accepted into a graduate program leading to a terminal degree at an accredited institution. All applicants must be U.S. Citizens. Preference will be given to applicants in areas of early childhood education, speech pathology, special education, mathematics education, engineering management, computer science, psychology, and any of our areas in business, public administration or health sciences. More information on our academic programs can be found at http://www.odu.edu. Applications can be found at http://web.odu.edu/as/research/press.htm.

Deadline: For full consideration, completed applications should be received by February 1, 2001.

Old Dominion University is one of the public-assisted universities in Virginia. It is organized into six academic colleges and enrolls more than 18,300 students, including 7,700 graduate students. The University's major campus is located in Norfolk, the center of the Hampton Roads region. It is an attractive, historic and internationally oriented metropolitan area and seaport with a population of 1.4 million. The University also operates significant higher education centers in Virginia Beach, Hampton and Northern Virginia, as well as its national distance learning network, TELETHONET.

Old Dominion University is an equal opportunity/affirmative action institution and requires compliance with the Immigration Reform and Control Act of 1986.

Executive Dean
Clarion University of Pennsylvania
Venango Campus

Clarion University of PA, one of 14 comprehensive public universities in the State System of Higher Education, invites nominations and applications for the position of Executive Dean, Clarion University - Venango Campus.

Responsibilities: The Executive Dean of Clarion University - Venango Campus is responsible for the academic and fiscal administration of the campus and is a member of the President’s Executive Council. The Dean provides leadership, vision, and energy to the campus and its programs; works collaboratively with the Provost and Deans at the Clarion Campus to address enrollment and retention of students; provides general supervision of faculty and programs; and works with the Director of Facilities Management and Planning to maintain the facilities at the Venango Campus. The Executive Dean prepares the budgets for the Venango Campus and monitors expenditures in accordance with university policies, procedures, and guidelines.

Particular expectations of the in-coming Executive Dean will be to participate in the development and implementation of programs appropriate to the region; to participate personally in the community in its economic, social, cultural, and educational development; to support recruitment of students to the campus; to build diversity; to assist with the writing of grants; to participate in fundraising activities; and to promote strong community relations.

Qualifications: The Executive Dean must demonstrate leadership, creativity, enthusiasm, an ability to accomplish goals, and a willingness to work effectively with other deans and the students, faculty, and staff of the Venango Campus. The successful candidate must have a commitment to establishing a diverse community and have a minimum of five years of academic or administrative experience with increasing responsibility appropriate for the position. A master’s degree is required with a doctorate preferred.

The University: Founded in 1867 and located in scenic Western Pennsylvania, Clarion University enrolls 6,200 students at its campuses in Clarion and Oil City, PA. The Venango Campus has four modern buildings scenically situated on 62 acres, surrounded by heavily wooded foothills overlooking the Allegheny River. It offers programs for both part-time and full-time students, of which nearly 47% are non-traditional. Students may complete the first two years of college or study for one of seven associate degrees in Allied Health, Arts and Sciences, Business, Early Childhood, Legal Business Studies, Nursing, and Rehabilitative Services. Bachelor of Science degrees in Nursing and Radiologic Sciences in cooperation with Northwest Medical Center are also offered along with a Masters in Nursing.

Applications and Appointment: Candidates for Executive Dean - Venango Campus must submit the following materials: a letter of application addressing qualifications for the position, resume, and three current letters of reference (including phone numbers and email addresses). Candidates must complete a successful interview. Application materials and requests for additional information concerning the position should be addressed to:

Ms. Bobbi Heeter
Search Committee Coordinator
Office of the Provost
Clarion University
Clarion, PA 16214
bobbi@clarion.edu

Applications received by February 15, 2001, will receive full consideration; review of applications will continue until the position is filled. Salary and benefits are competitive; appointment is effective July 1, 2001. Additional information is available at www.clarion.edu.

Clarion University is building a diverse academic community and encourages people of color, women, veterans, and persons with disabilities to apply. AA/EOE.

Texas A&M University Corpus Christi, with approximately 6,900 students and 270 faculty, is one of the fastest growing universities in the State of Texas. Located in Corpus Christi, a city of 300,000. The University is in a picturesque setting on an island surrounded by Corpus Christi Bay and Oso Bay.

Job#: 037 DIRECTOR OF CAREER SERVICES: Required: Master’s degree in Higher Education Administration, Counseling, Business, or a related field. Three (3) years of experience in a Career Development setting. Any equivalent combination of education and experience may be considered. Excellent counseling and interpersonal skills. Demonstrated effective written and oral communication skills. Demonstrated proficiency in management of staff. Knowledge of and experience using career assessment tools. Strong computer skills. Ability to demonstrate a strong commitment to student development and sensitivity to diverse populations. Preferred: Experience in Career Development in a higher education environment.

TO APPLY: APPLICANTS SHOULD SUBMIT A STATEMENT OF PHILOSOPHY, A RESUME AND THREE PROFESSIONAL REFERENCES. Submit application materials to: Human Resources, University Services Center, 6300 Ocean Drive, Corpus Christi, TX 78412. Review of applications will begin on December 15, 2000 and continue until the position is filled.

A&M-CC is an Equal Opportunity Employer committed to diversity.

MIT Media Laboratory
Tenure Track Faculty Position

The Media Laboratory is seeking new Faculty. Candidates should have demonstrated expertise in human expression, communication, or learning, and the invention of technologies related to these areas.

Responsibilities Include: teaching (graduate and under-graduate), research, and supervision of graduate students. Appointments will be principally at the Assistant Professor level.

Qualified candidates should submit a resume, representative materials or portfolio, the names of three references, and a concise summary of their teaching and research interests by Thursday, March 1, 2001 to: Faculty Search Committee, MIT Media Laboratory, E15-218, 20 Ames Street, Cambridge, MA 02139-4307. Inquiries should be sent to: search@media.mit.edu. For additional information about the Laboratory, see our web page: http://www.medias.mit.edu. MIT is a non-smoking environment.

Massachusetts Institute of Technology
Faculty Positions:
DEPaul UNIVERSITY, SCHOOL OF EDUCATION, 2000-2001

Well known for its reputation for excellence and as the largest Catholic university in the United States, DePaul University has been educating Chicago for over 100 years. As DePaul, you will work in a collaborative environment that lives its values, supports diversity and encourages professional development. The School of Education's mission is to cultivate urban, professional, multicultural educators, and to provide educational experiences that facilitate social justice. Diversity, multiculturalism, reflective practice, and social justice are a commitment to building and maintaining a diverse community and seeks faculty who will enhance this mission.

The School of Education seeks applications for six approved and funded positions, beginning in the 2001-2002 Academic Year: Director of Ed.D. Program; Senior-Level Position; Assistant Professor of Educational Leadership; Assistant Professor of Human Development; Assistant Professor of Physical Education; Reading; Assistant Professor of Secondary Education. The School actively seeks to build and maintain a diverse faculty. For all positions, the School seeks faculty members who bring a critical perspective to the issues of urban education, diversity, multiculturalism, reflective practice, and social justice.

Director of Ed.D. Program * Senior-Level Position:
Responsible for providing leadership and direction for the doctoral program in Educational Leadership and Curriculum Studies. The Director will monitor program quality and create possibilities for other program development, including possible emphases in higher education, instruction, social and cultural studies, and educational technology, and is expected to work with program faculty to develop and coordinate the program. The Director will be responsible for developing new courses and programs and for disseminating program research. The Director is expected to work with the University's Mission and position objectives in mind.

Position requires an Associate/Full Professor in education with a background in one of the program areas of the School - curriculum studies, early childhood educational leadership, elementary education, human services and counseling, physical education, language, literacy, and special education. The candidate should have experience in curriculum development, research, and program evaluation. Strong interpersonal skills and the ability to foster shared working relationships within the University are necessary. Excellent written and oral communication skills are required. The position is expected to provide leadership and direction for the doctoral program in Educational Leadership and Curriculum Studies. The Director will be expected to develop and coordinate the program, and to disseminate program research. The Director will be expected to collaborate with faculty and students in research and program development.

Assistant Professor-Human Development:
The individual we seek requires expertise in Human Development or Developmental Psychology with a background in Cultural Psychology or cross-cultural research. This individual should have a strong academic and professional background in ethnographic research related to lifespan development in socio-cultural context. Primary teaching responsibilities will be to graduate and undergraduate courses in Human Development across the lifespan, as well as courses in the social and cultural foundations of development and research methods at the graduate level. This individual should also have experience with culturally diverse urban populations.

Assistant Professor-Physical Education:
The individual we seek will have expertise in Physical Education with particular emphasis in Fitness Management, Fitness Assessment and Health Education. The primary teaching responsibility will be to graduate and undergraduate courses in the Physical Education Program that offers concentrations in Teaching K-12 and Fitness Management. Additionally, the individual will advise Fitness Management majors through their courses, clinical requirements, and internship. The successful candidate will work in our new $14 million state-of-the-art Fitness and Wellness Center, collaborate with the Director of the Recreation Facility, and contribute to community outreach programs.

Assistant Professor-Reading:
The individual we seek will have expertise in Elementary Reading with an emphasis in Intermediate and Middle School Levels. The individual should have experience in urban education, experience in elementary teaching, and a clearly defined research agenda. Additional expertise in technology issues is welcome.

Assistant Professor-Secondary:
The individual we seek will be a teacher educator with expertise in teacher professional development at the secondary level and commitment to helping anchor introductory general education courses at the undergraduate and graduate level. Responsibilities include teaching in teacher education, curriculum studies, field instruction, or related field with a scholarly record or demonstrated scholarly interest in teacher professional development. Additional responsibilities include teaching in teacher education, curriculum studies, field instruction, or related field with a scholarly record or demonstrated scholarly interest in teacher professional development. The position is expected to collaborate with faculty and students in research and program development, and to contribute to community outreach programs.

Assistant Professor-Educational Leadership:
The individual we seek requires expertise in one or more of the following areas: school finance, school law, and capacity to integrate technology into administrative decision making and accountability. Recent administrative experience in a large urban school system with a culturally and linguistically diverse population is preferred. The individual should have experience in teaching graduate courses in the Master's programs and the Ed.D. program in Educational Leadership. The individual should have a strong academic and professional background in ethnographic research related to lifespan development in socio-cultural context. Primary teaching responsibilities will be to graduate and undergraduate courses in Human Development across the lifespan, as well as courses in the social and cultural foundations of development and research methods at the graduate level. This individual should also have experience with culturally diverse urban populations.

Required qualifications for all positions:
Earned doctorate required for appointment; defined research agenda; ability to work collaboratively within and across programs; areas of expertise to contribute to the School; recent experience with culturally diverse urban populations; commitment to urban education; and excellence in teaching, service and scholarship or demonstrated potential.

Send all applications and materials to: Nancy S. Williams, Associate Dean, School of Education, DePaul University, 1220 North Dearborn, Chicago, IL 60610. Fax: 312-226-7190. Application received by e-mail will not be accepted. DePaul University is committed to diversity and equality in education and employment.

KENYON COLLEGE
ART — DRAWING

The Department of Art at Kenyon College is conducting a search for a one-year Visiting Assistant Professor to teach our introductory level drawing course each semester, intermediate level courses each semester, and a senior studio seminar one term or five courses for the school year 2001-2002. This is a one year sabbatical replacement position. Candidates must have an MFA degree and a commitment to teaching. Studio Art is a six- person discipline. Each member has a strong professional involvement and a commitment to diversity. A shared position is acceptable.

To apply, please send a slide portfolio, vita, a letter briefly describing your philosophy of teaching and prospects in your artistic work, three letters of reference and SASE to: Search Committee, Department of Art, Kenyon College, Gambier, Ohio 43022. The application deadline is: February 1, 2001.

Sarah Lawrence College, a small liberal arts college with a unique pedagogy based on small classes and individual tutorials, invites applications for a tenure track position in the cultural, intellectual and institutional history of modern China. Some knowledge of modern Chinese history is desirable. Teaching experience is also desirable. Send CV, three letters of recommendation, descriptions of two courses you would like to teach, and a letter describing your teaching and research interests to: Chinese History Search (NCHEE), c/o Nadine Forbes, Faculty Secretary, Sarah Lawrence College, 1 Mead Way, Bronxville, NY 10708. The deadline for applications is March 1, 2001. For information on Sarah Lawrence College, our curriculum, teaching methods, and philosophy of education, please see our Web site at http://www.slc.edu.

Sarah Lawrence College is an EEO employer.
The faculty and administration of the College of Education at Ohio University are currently seeking applicants for the faculty positions listed below. Located in the city of Athens, Ohio University is a multi-campus Doctoral/Research-Extensive institution enrolling over 19,000 students on the Athens campus and over 10,000 students on five regional campuses. The College of Education is accredited by NCATE and the University is a member of the Association of Research Libraries. Sponsored research at Ohio University in 1999-00 exceeded $49 million. In addition to its commitment to excellence in residential undergraduate education and to increasing its research capacity, Ohio University has a long tradition of educational outreach through its regional campuses, external degree programs, and partnerships with educational institutions in other countries.

Department of Counseling and Higher Education

The program in Higher Education Administration seeks candidates for the following tenure track positions beginning September 2001:

**Associate Professor in Higher Education Administration:** Teaching responsibilities will be in the areas of organization, management, and leadership in higher education. A number of courses will be taught to masters and doctoral cohort groups. Experience with distance education is desired. Other essential considerations include:
- an earned doctorate in higher education administration or related discipline
- administrative experience in relation to the teaching areas
- interests in and familiarity with needs in two and four year college sectors
- experience working with doctoral students and directing dissertations
- a successful record of research and publication

**Assistant Professor in College Student Personnel:** The successful candidate will assume teaching responsibilities in the program area specializing in college student personnel. Experience in student affairs administration is required. Other essential considerations include:
- an earned doctorate in higher education administration, or related discipline
- ability to teach courses on the psychology of student development, students and environments, multicultural student development, and student affairs administration.
- interests in and familiarity with needs in two and four year college sectors
- interest in working with doctoral students and directing dissertations
- interest and ability to initiate and conduct research
- ability to work closely with the leadership in the division of student affairs at Ohio University regarding recruitment, program development and student affairs practice
- familiarity with teaching through non-traditional delivery modes.

Applicants must submit letters of application and/or nomination; resume or credentials with three current letters of reference with names, addresses, and phone numbers; and graduate transcripts to: Dr. Robert Young, Chair of the Department of Counseling and Higher Education, Ohio University, 261 McCracken Hall, Athens, OH 45701-2979. All inquiries, nominations, and applicants will be treated confidentially.

Department of Teacher Education

The Department of Teacher Education seeks candidates for the following positions beginning September 2001:

**Assistant Professor in Mathematics Education:** This is a tenure track faculty position in Mathematics Education. The successful candidate must have an earned doctorate in Mathematics Education and three years teaching experience in primary and/or middle school (or equivalent). Other essential considerations include:
- commitment to teaching excellence
- commitment to scholarship in math education
- commitment to program reform and development
- commitment to service and advising

**Assistant Professor in Secondary Education:** This is a tenure track faculty position in secondary education. The successful candidate must have an earned doctorate in Curriculum and Instruction and three years teaching experience in junior/secondary schools (or equivalent). Other essential considerations include:
- expertise in Praxis (Planning, Instruction, Teaching and Learning) for Adolescent/Young Adult population
- commitment to teaching excellence
- commitment to scholarship in teaching learning research
- commitment to collaboration with diverse partners within the university and the field
- commitment to program reform, development and service

**Instructor/Assistant Professor in Secondary Education:** This is a non-tenure track (one academic year 2001-2002 term appointment) faculty position in Secondary Education. The successful candidate must have expertise in general secondary methods (planning, instruction, teaching and learning) and comprehensive social studies methods. An earned doctorate is desirable, however, ABD’s will be considered. Three years of teaching experience with middle/secondary populations (or equivalent) is required. Responsibilities include:
- teaching secondary planning and instruction
- teaching social studies methods
- advising
- supervising field placements
- collaborating with university and field based professionals

**Instructor/Assistant Professor in Special Education:** This is a non-tenure track (one academic year 2001-2002 term appointment) faculty position in Special Education. The successful candidate must have expertise in Middle and Secondary level instructional adaptations in inclusive settings. An additional emphasis in methods of teaching students with moderate to intensive educational needs (multiple/severe disabilities) is desirable. An earned doctorate is desirable, however, ABD’s will be considered. Three years of teaching experience (or equivalent) with special populations is expected of the successful candidate. Responsibilities include:
- teaching methods and adaptive instruction courses
- advising
- supervising field placements
- program development
- collaborating with university and field based professionals

**Instructor/Assistant Professor in Reading/Literacy:** This is a non-tenure track (one academic year 2001-2002 term appointment) faculty position in Reading/Literacy. An earned doctorate in Reading Education is desirable, however, ABD’s and Masters will be considered. Three years of teaching experience at the preschool, elementary or middle childhood level is essential. A record of college teaching experience is desirable. Other responsibilities include:
- full-time undergraduate teaching in Reading at the early and middle childhood levels
- collaboration with university and field-based partnerships
- collaboration with other professionals
Instructor in Mathematics Education. This is a non-tenure track (one academic year 2001-2002 term appointment with possibility of reappointment for up to 3 years) faculty position. Master's in mathematics education with at least three years teaching experience at the preschool, elementary or middle childhood level. Responsibilities include full-time undergraduate teaching in mathematics methods at the early/middle childhood level at regional sites. Position includes the opportunity to pursue Ph.D. in mathematics education.

Applicants must submit a letter of application, current comprehensive vita, transcripts for graduate work, and the names, addresses and phone numbers of three professional references. If possible, submit sample syllabi, teaching evaluations and copies of scholarly work to: Dr. Marta Roth, Chair, Department of Teacher Education, Ohio University, 210B McCracken Hall, Athens, OH 45701-2979. All inquiries, nominations, and applications will be treated confidentially.

Department of Educational Studies

The Department of Educational Studies seeks candidates for the following positions to begin September, 2001:

**Associate Professor in Educational Administration**

This is a tenure track faculty position in Educational Administration. The successful candidate will be expected to teach graduate courses on one or more campuses, conduct research in a field of specialization, supervise dissertations, supervise interns in field placements and coordinate an annual leadership colloquium.

Candidates must have an earned doctorate in educational administration or related discipline, with an emphasis on building-level leadership, school law, computer applications in educational administration, or collective bargaining. Applicants must also demonstrate evidence of successful experience as a school principal (5 years preferred) engagement with reflective practice, and experience teaching educational administration courses at the university level (5 years preferred). Experience serving as the chair of doctoral dissertation committees is preferred. Candidates should have a well established research portfolio commensurate with the department’s minimum standards for promotion to associate professor. Other essential considerations include:

- interest in providing direct service to local school administrators in rural and Appalachian schools
- a commitment to societal justice

**Visiting Assistant Professor in Instructional Technology**

This is a non-tenure track two year term faculty position beginning September 2001. Candidate must have an earned doctorate in education with an emphasis in Instructional Technology and thorough knowledge of educational software, productivity tools, hypermedia, multimedia, and the Internet. Experience in instructional design, web-based instruction, and distance learning is desirable; K-12 teaching is strongly preferred. Job responsibilities include:

- teaching undergraduate and graduate courses at the master’s and doctoral levels
- collaborating with education faculty in integrating technology into the curriculum
- advising graduate students
- engaging in scholarship and sponsored research and service including dealing critically with issues involving the interface of technology with various socio-cultural contexts.

Applicants should send letters of application or nomination; complete vita; three current letters of recommendation; and name, addresses, phone numbers, and e-mail addresses of references. Recent graduates are asked to submit transcripts of all academic work to: Dr. Aimee Howley, Chair, Department of Educational Studies 206 McCracken Hall, Ohio University, Athens, OH 45701-2979

All positions are contingent upon funding, and salary will be competitive and commensurate with qualifications and experience. Nominations are encouraged. The review of applications will begin January 5, 2001 and will continue until the positions are filled.

Ohio University is an Affirmative Action, Equal Opportunity Employer. The College intends to increase its diversity and encourages women and minorities from underrepresented groups to apply.

Boeing Endowed Professor of Global Learning

Wichita State University invites applications and nominations for an innovative leader and educator to serve as the Boeing Professor of Global Learning. The Boeing Professor will report to the Dean of the College of Engineering, and will be responsible for leading the University to prominence in the era of global learning. By working closely with faculty, staff, students, and the community to develop, implement, and assess pedagogical and curricular distance learning activities through the use of advanced technology, the Boeing Professor will assist the University in meeting the educational needs of students in their places of employment, schools, and homes anywhere in the world.

Wichita State University is located in the state’s largest metropolitan area, enrolls 14,800 students in 61 undergraduate programs, 46 master’s programs, and 10 doctoral programs and is classified as a Carnegie Doctoral/Research University - Intensive. WSU’s greatest concentration of research resides in the College of Engineering and the National Institute for Aviation Research. Many aircraft, materials, and information/communication industries are located in Wichita and Kansas, with branches around the world, presenting many distance learning opportunities in engineering, business, education, and health care.

Qualifications: Candidates for this position must have a terminal degree in an appropriate field, demonstrated visionary leadership and business acumen; senior level experience in applying advanced technology to teaching/learning methodology; success in working to facilitate team process outcomes; proven success in securing external funding; successful experience with diverse populations; excellent oral and written communication skills; and a commitment to diversity.

Applications including the names, addresses, and phone numbers of three professional references must be received no later than March 2, 2001. Direct applications, nominations and requests for information to Dr. Gerald Loper, Associate Vice President for Research, Wichita State University, 384 Fairmount, Wichita, KS 67260-0007; Phone: 316-978-3285; Fax: 316-978-3750; loper@twuwmse.cwu.edu; website: http://www.wichita.edu/online/

UNIVERSITY OF WISCONSIN OSHKOSH
COLLEGE OF NURSING
TEACHING POSITIONS

The University of Wisconsin Oshkosh College of Nursing is accepting applications for tenure-track faculty positions. The College has a basic and degree completion program at the BSN level, and since 1974 a Family Nurse Practitioner Program.

Tenure-track positions available in the areas of Adult Health Nursing (adult NP or acute care CNS/NP preferred), Family Nurse Practitioner, and Nursing Informatics. Positions are available for the upcoming academic year (9-month).

Assistant/associate professor rank dependent on experience. Earned doctorate in nursing or related field required. Applicants with substantial post-doctorate work may be considered. MSN required and eligibility for Wisconsin licensure. Teaching experience desired at the baccalaureate or masters level. Positions are available August 2001 and September 2001. Persons of color are strongly encouraged to apply.

Send letter, curriculum vitae, and three letters of reference to:

Merritt E. Knox, Dean
College of Nursing
University of Wisconsin Oshkosh
Oshkosh, WI 54901-8660

Clarion University of Pennsylvania
Clarion, PA 16214

Clarion University is building a diverse academic community and encourages minority, women, veterans, and persons with disabilities to apply. AA/EOE.

STETSON UNIVERSITY
Florida's First Private University

FACULTY DIVERSITY INITIATIVE

Building on its commitment to excellence in education, Stetson University has endorsed a comprehensive mission statement affirming the importance of diversity, social justice, and the “inherent dignity, worth, and equality of all persons” in our campus community and in the world we serve. To bring these values into our teaching and learning, the President and Trustees funded a thorough campus review by an external evaluator and agreed on measurable steps to enrich perspectives in our curriculum and increase diversity.

To emphasize the central importance of diversity to liberal education at Stetson, a University Values Council now supports curricular and co-curricular activities. We offer strong interdisciplinary programs in Women and Gender Studies and Latin American Studies and a developing program in Africana Studies. The Howard Thurman Program, in tribute to the legacy of Howard Thurman, a native son of nearby Daytona Beach, brings scholars and leaders in social justice movements to campus. Among recent lecturers have been John Lewis, Fred Shuttlesworth, Angela Davis, Andrea Young, Rabbi Herbert Baumgard, Randall Robinson, and Annette Gordon-Reed. Our Center for International Education supports seven study-abroad sites and hosts a substantial international enrollment on our campus. A newly established Cross Cultural Center works with faculty and student groups in sponsoring campus-wide activities engaging and celebrating contributions from a wide range of African and international cultures.

In this year's search, we are looking for persons in any discipline who are devoted to undergraduate teaching, who can enrich our curricular offerings, and who can add to this energetic campus conversation about diversity. The specific field for the 2001-2002 Diversity Initiative is not specified, but we have identified high-enrollment programs where a faculty member with a commitment to diversity could have great impact.

Biochemistry
Environmental Science
Exercise Science
Latin American History
Business (all fields), School of Business Administration
World Music, School of Music

Applications in any of the disciplines we teach, and in interdisciplinary specialties, are equally welcomed and will be thoughtfully considered.

In addition to the tenure-track position funded by the 2001 Diversity Initiative, we also prize the ability to teach and learn from diversity in candidates for all of our separately announced departmental openings. For descriptions of these openings, please visit our webpage:

www.stetson.edu/offices/human-resources/hrfaculty.htm

Stetson University is located in central Florida, near Orlando and Daytona Beach. The University enrolls approximately 2000 undergraduates, emphasizes undergraduate teaching, and offers competitive salaries and support for scholarly research and professional development. We are energetically committed to an education informed by values such as ethical decision-making, social and environmental responsibility, and global awareness.

Candidates should submit a current CV and a letter addressing their commitment to diversity in teaching, scholarship, and service in a liberal arts setting. Nominations are also invited, as are expressions of interest from candidates at the dissertation stage of their graduate work. Applications and nominations should be forwarded to: Dr. Leonard Nance, Associate Dean, Office of Academic Affairs, Stetson University, 421 N. Woodland Blvd., Deland, FL 32720. Screening of applications will begin February 15, 2001, and will continue until the positions are filled. Inquiries and requests for additional information about Stetson University or its Diversity Initiative to: Dr. Nance, phone 904.822.7515.

Stetson University, an equal opportunity employer, affirms the values and goals of diversity and strongly encourages the applications of women and candidates from historically underrepresented groups.

VICE PRESIDENT FOR ENROLLMENT AND STUDENT SERVICES

The University of Tulsa invites nominations and applications for the position of Vice President for Enrollment and Student Services. The Vice President for Enrollment and Student Services is the senior officer responsible for enrollment planning and management, admission, financial aid, housing, and student services. The Vice President will report directly to the President and participate with three other vice presidents in the senior leadership team of the University. The University seeks a dynamic, highly professional individual who will assume the responsibilities of the position with integrity and a sense of humor. The successful candidate will:

- Provide leadership for developing and sustaining strong programs of student recruitment and retention, and campus life programs and services
- Bring the vision of a quality educational experience to both prospective and present students
- Advocate and enhance student opportunities consistent with institutional goals
- Promote the University's commitment to cultural diversity
- Communicate effectively with all campus constituents including students, parents, staff, faculty, and the community
- Possess significant administrative experience at increasing levels of responsibility in several of the functional areas, preferably in a residential college setting
- Posses exceptional leadership, communication, and management skills
- Be experienced in planning and managing an extensive budget
- Be acquainted with the needs of international students in a campus setting
- Posses demonstrated team building skills and the ability to promote campus community
- Hold at least an undergraduate degree from an accredited institution, with preferably an advanced degree in a relevant field
- Demonstrate a strong desire to work with students, both formally and informally

The University of Tulsa has an enrollment of 4,500 including 2,900 undergraduates. Fifty-six undergraduate and graduate programs are offered in four colleges: the Henry Kendall College of Arts and Sciences, the College of Business Administration, the College of Engineering and Natural Sciences, and the College of Law. Admission to the University is selective, and a diverse student body is active in a wide range of student government, social, and professional groups. The University participates fully in NCAA sports at the Division I level. The University benefits from its location in Tulsa, a metropolitan community of 750,000 that has an uncommon commitment to culture and the arts, a strong business and technology presence, and a wide variety of recreational opportunities. For more information about the University or the city of Tulsa, visit our web site at www.utulsa.edu.

The review of applications will commence the first week of January, and continue until the position is filled. Letters of nomination or application, accompanied by a curriculum vitae and the names and telephone numbers of five references, should be submitted to:

Allen R. Soltow, Chair
Search Committee for Vice President for Enrollment and Student Services
The University of Tulsa
600 South College Avenue
Tulsa, OK 74104-3189

IOWA STATE UNIVERSITY
ASSISTANT OR ASSOCIATE
PROFESSOR OF
INDUSTRIAL TECHNOLOGY

The Department of Industrial Education and Technology seeks an individual with an earned doctorate in industrial technology, industrial education, or a related manufacturing discipline for a tenure track position available August 16, 2001. Undergraduate and graduate faculty responsibilities include teaching in at least one of these areas: automation, computer-aided drafting and design (CADD); electronics; fluid power; manufacturing; occupational safety; robotics. Salary is competitive and commensurate with qualifications and experience. Application materials should be sent to: Daniel L. Householder, Chair, Department of Industrial Education and Technology, Iowa State University, 114 I. Ed. II, Ames, IA 50011-3130. Call (515) 294-2539 or e-mail dhouseho@iastate.edu for additional information. Review of applications begins February 15, 2001.

Iowa State University is an equal opportunity/affirmative action employer.

The UNIVERSITY OF
EDUCATIONAL FOUNDATIONS

Description: The Department of Foundations and Leadership is expanding its educational foundations area. We are seeking a tenure track assistant professor to teach graduate and undergraduate courses in educational foundations. Major responsibilities will include teaching philosophical, historical, or sociological foundations of education, service on doctoral and master’s committees, and the establishment or continuation of an active research and publishing agenda. Candidates who possess the ability to teach qualitative research courses will also be given consideration.

Qualifications: Applicants should have an earned doctorate, three years public school experience or the equivalent; an established record of scholarship in foundations; and evidence of successful teaching.

Application Information: Send a letter of application, current curriculum vita, three current letters of reference, and copies of all transcripts that include relevant coursework to Sandy Chick, College of Education, University of Toledo, Toledo, OH 43606-3390.

Application Deadline: Applications will begin to be reviewed February 2, 2001.

The University of Toledo is located on a wooded 200 acre suburban campus. Local amenities include a nationally accredited, on-campus child care center, one of the nation’s top 10 art museums, an excellent symphonic orchestra, and an outstanding metro park system.

The University offers a competitive salary and excellent benefits, and is an Equal Access, Equal Opportunity, Affirmative Action Employer and Educator.

DEAN OF STUDENT AFFAIRS

Truman State University invites applications for the position of Dean of Student Affairs.

Truman State University is Missouri’s highly selective, public liberal arts and sciences university with the mission to provide outstanding educational opportunities in the arts and sciences at an affordable price. Truman is nationally recognized for its innovative assessment program and its commitment to excellence in teaching and learning. Truman is located in Kirksville, a town of 17,000 in northeast Missouri. Truman’s student body of over 6,000 students consists primarily of 18 to 22 year olds and is residential. The University recently expanded its Residential Colleges Program and now offers a residential college experience to all incoming students.

The Dean of Student Affairs is the chief student affairs officer and is responsible for providing leadership for Student Affairs including: Residential Living; Multicultural Affairs; Athletics; the Student Union; Campus Activities; Counseling Services; Student Health; Judicial Affairs; the Student Recreation Center; Services for Individuals with Disabilities; and Greek Life. For information visit our website at http://www2.truman.edu/deanofstudents.

Candidates must possess an earned doctorate (or an equivalent terminal degree) from an accredited institution. The successful candidate will be an individual who has a record of demonstrated:

- dynamic leadership, creativity, and vision that would support the continuing development of a Student Affairs program for a highly selective, competitive student body.
- strong commitment to the development and welfare of students in a liberal arts and sciences environment.
- ability to work collaboratively with students, faculty, staff, and administrators, especially in a context applicable to a residential college program.
- understanding of and commitment to the issues related to diversity.
- excellent communication and interpersonal skills.
- strong administrative, management, and problem-solving skills.
- knowledge of athletic programming and its role in student development.
- teaching experience and a good working knowledge of academic issues as they relate to Student Affairs.

Review of complete applications will begin February 15 and will continue until the position is filled. The job will begin July 1, 2001. Complete applications will consist of a current résumé, both undergraduate and graduate transcripts; the names, addresses, and telephone numbers of at least three references; three confidential letters of recommendation sent directly to the address below; and a letter of introduction that outlines the candidate’s philosophy and experience related to the position. Only completed applications will be considered. All inquiries and application materials should be sent to:

Dean of Student Affairs Search Committee
c/o Vice President for Academic Affairs
Truman State University, McClain Hall 203
100 East Normal Street
Kirkville, MO 63501
vpaa@truman.edu

Truman is an equal employment opportunity, affirmative action employer committed to cultural diversity and compliance with the Americans with Disabilities Act.
Information Design and Technical Communications

Tenure-track Information Design and Technical Communication position at the assistant or associate professor rank, beginning September 2001. Criteria for selection: expertise in information architecture, technology and design for various applications on the Web (internet, intranet and extranet); knowledge of and experience with HTML, DHTML, CSS and site management software; a proven track record in applying human factors in analysis, production and management of effective user interfaces, navigation systems, or site architecture is highly desired. An appropriate terminal degree (Ph.D. preferred) in hand by starting date, publications or evidence of scholarly potential, consulting or industry experience and a record of excellent college teaching are essential.

Bentley College is an equal opportunity employer building strength through diversity. Inquiries should be mailed to: Evelyn Shakir, Chair, English Dept., Bentley College, 173 Forest Street, Waltham, MA 02453-4705. Visit the Bentley College website at: www.bentley.edu

Winthrop University

Chair & Professor/Associate Professor

The Richard W. Riley College of Education is seeking an innovative and dynamic academic leader to serve as chair of the Department of Counseling and Leadership. The Department of Counseling and Leadership offers MEd programs in both Educational Leadership and Counseling and Development. The successful candidate must have a doctorate in Educational Administration or a closely related field, demonstrated leadership and administrative experience, a strong background in scholarship and service at the college or university level, and teaching and administrative experience in P-12 settings. The chair will teach courses in the area of educational leadership as well as provide academic leadership for a growing program.

Application review begins February 15, 2001 and may continue until the position is filled. The chair position is a 10.5-month position and begins August 1, 2001. To apply, send a letter of interest, names and e-mail addresses of five professional references, a curriculum vitae, and a professional portfolio to: Dr. Caroline Everington, Search Chair, 106 Withers Building, Richard W. Riley College of Education, Winthrop University, Rock Hill, SC 29733 (803) 323-2436.

Founded in 1886, Winthrop University has become a national-caliber university with regional prominence in the Southeast. The university’s distinctive mission is to offer challenging academic programs to a high-achieving, culturally diverse, socially responsible student body. More than 5,800 students pursue degrees in the school’s four academic divisions - arts and sciences, business administration, education, and visual and performing arts. Located in Rock Hill, S.C., minutes from the Charlotte, N.C. metropolitan area, Winthrop’s 100-acre main campus is complemented by a nearby 325-acre recreational area.

The Riley College of Education enjoys a strong reputation for preparing educational leaders at the undergraduate and graduate levels. An NCATE-accredited program, the College is a member of the National Network for Educational Renewal and has a unique twenty-five year partnership with six school districts, having over 3,500 educators and 52,000 students. Six Professional Development Schools are used within these districts as integral parts of our teacher preparation program. EOE/AA
CLARION UNIVERSITY

DIRECTOR OF FIELD SERVICES
COLLEGE OF EDUCATION
AND HUMAN SERVICES

Chemeketa Community College
President

The board of education is seeking applicants for the position of President of Chemeketa Community College. The President is the chief executive officer of the college district. Chemeketa is one of the nation's premier community colleges, noted for innovation and leadership in teaching and learning, distance and online education, educational assessment and many other efforts. Located in the northern Willamette Valley of Oregon, the Chemeketa district enjoys close proximity to the mountains, ocean beaches and the vibrant city of Portland.

We are seeking a visionary leader who promotes a climate of innovation throughout the college through an inclusive, approachable, and participatory style. The successful candidate will be an articulate and enthusiastic spokesperson for the college with a passion for students and the community college mission. The individual must be a community leader, committed to building collaborative relationships with other education providers, business and industry, government decision-makers, and community organizations.

Minimum qualifications include:
- Five years' broad-based and progressively responsible administrative experience in an accredited college or equivalent
- Record of accomplishments in innovative educational leadership and planning
- Demonstrated understanding of teaching and learning practices
- Knowledge of the legislative process and ability to represent the college with governmental decision makers
- Demonstrated sensitivity to multicultural issues
- Earned doctorate or equivalent from an accredited institution

For more information about the college and the presidential search, visit our website at www.chemeketa.edu

Application materials must be received or postmarked by the position closing date: Friday, March 2, 2001.

For a complete list of minimum and preferred qualifications, please request an application packet by contacting:

Vickie Rame, Chamberlain
Personnel Department, Chemeketa Community College
PO Box 14007 Salem OR 97309
Phone: 503/399-5300
Fax: 503/399-7810
Email: personnel@chemeketa.edu

Chemeketa Community College is an equal opportunity, affirmative action institution.
Cincinnati State Technical and Community College is an affordable, open-access, public two-year college under the authority of the Ohio Board of Regents that responds to the educational needs of the community by offering quality technical, general education, training and academic transfer courses. Governed by a nine-member Board of Trustees, the College offers 64 associate degree programs and majors and numerous certificate programs. Annually, over 20,000 students enroll in Cincinnati State courses that are offered in the day, evening, and on weekends. In addition to its academic and technical programs, the College offers many continuing education opportunities through short courses, seminars, and on-site training for area businesses and industries. The College is fully accredited by the North Central Association of Colleges and Schools and holds numerous programmatic accreditations.

The Vice President is the chief academic administrator of the college, responsible for the areas of academic policy, planning, curriculum, faculty development, faculty personnel administration, library, instructional technology, and academic budgeting. The Academic Vice President reports directly to the President of the College. The Academic Vice President supervises and works collaboratively with the four academic deans (Humanities and Sciences, Engineering and Information Technology, Health Technologies, Business Technologies) and director of the library.

We are seeking a dynamic leader to administer all aspects of Cincinnati State's academic operations with experience in promoting teaching, learning and assessment through curricular and co-curricular programs; the leadership skills to enhance the academic programs and services; and the ability to manage growth.

The qualifications for the Academic Vice President include:

- A positive agent of change who has experience in team leadership, program review, strategic planning and budgeting, and management through continuous quality improvement, preferably in a union environment;
- Significant undergraduate and/or graduate teaching experience and scholarly achievement suitable for a senior academic appointment as well as an appropriate terminal degree;
- Five or more years of demonstrated successful progressive leadership, preferably in a community college setting;
- Demonstrated ability to facilitate partnerships;
- Visionary capabilities with the ability to follow through in a globally evolving environment;
- Strong commitment to promoting equal employment opportunity, affirmative action, cultural diversity, and global awareness;
- Knowledge of policies and issues in higher education, including the preparation of students for participation in the "New Economy."

Candidates are invited to submit a letter of application addressing the position and qualifications, complete resume, and three references to:

Eugene L. Breyer, Jr.
Director of Human Resources
Cincinnati State Technical and Community College
3520 Central Parkway
Cincinnati, OH 45223-2960

Nominations and application submissions will continue to be received until the position is filled.

Cincinnati State Technical and Community College has an outstanding student body and faculty; strong partnerships with business, industry and government; and support from alumni, donors and friends. CSTCC is positioned to meet and exceed the challenges of the 21st century.

Cincinnati State Technical and Community College is an equal opportunity employer. Applications of individuals who would increase the richness of the college's diversity are welcome.
Kutztown University enrolls approximately 8200 students in graduate and undergraduate programs. The University is located in the borough of Kutztown in a charming rural setting, but is within 20 minutes driving time of the diverse metropolitan areas of Allentown/Bethlehem and Reading, and within 60 minutes of the Philadelphia metropolitan area. As a state regional university, Kutztown University is committed to serving the multicultural populations in its region. The University is searching for faculty who have had extensive experience with diverse populations, especially African American and Latino populations represented in these adjoining metropolitan areas.

SOCIOLOGIST

The department of Anthropology/Sociology is seeking to fill a tenure-track position in Sociology beginning Fall semester, 2001. Ph.D. in Sociology preferred and teaching experience desired. ABD candidates must complete the degree within one year of the date of hire. Primary preference will be given to candidates qualified to teach Methods of Social Research and at least two upper level courses. The departmental needs are in the following descending order: Criminology, Domestic Violence, Deviance, Gender Roles, and Urban Sociology. Applicants will also be expected to teach two sections of the introductory course each semester. Teaching assignments might include off-campus classes. Experience and expertise in Data Analysis, especially SPSS, and computer use are desirable. Successful interview and demonstration of ability are requisite qualifications. To apply submit a letter of application, curriculum vitae, three letters of recommendation, and official undergraduate and graduate transcripts from all colleges and universities attended to: Professor Samuel D. Westmoreland, Chair, Search Committee, Kutztown University, Kutztown, PA 19530. Review of completed applications will begin on February 15, 2001 and continue until position is filled. Kutztown University of Pennsylvania is an Affirmative Action/Equal Opportunity employer and actively solicits applications from women and minority candidates. Kutztown University of Pennsylvania is a member of the State System of Higher Education.

Senior Vice President
For Finance and Administration

Case Western Reserve University is accepting nominations and applications for the position of Senior Vice President for Finance and Administration. The senior vice president is the university’s chief business and financial officer and the principal steward of its human, financial, and physical resources and provider of services in support of the academic mission, which focuses on excellence in teaching, research and community service. The senior vice president reports directly to the president and is a member of the institution’s senior management group. Principal responsibilities include providing leadership and direction to the offices of Facilities Management, Treasurer, Controller, Human Resources, Campus Services and Internal Audit; serving as agenda officer for board of trustees committees related to the aforementioned offices; participating in the University Financial Planning and Strategy Committee; and coordinating with other university officers to exercise general stewardship over the university’s assets, including significant fiduciary and signatory authorities.

Case Western Reserve University is one of the nation’s leading private research institutions, with graduate and undergraduate programs that encompass the liberal arts, sciences engineering, health professions, law, management, and applied social sciences. Successful candidates will possess a baccalaureate degree (advanced study in relevant fields desirable), minimum of 10 years of progressive experience ideally in a major research university; in-depth knowledge of financial management and control, human resources, and facilities management; excellent management and team-building skills; proficiency in oral and written communication; excellent knowledge of contemporary information and management systems; and familiarity with the issues facing major independent research universities. Review of applications will begin immediately. To apply or submit a nomination, please send a cover letter and resume to:

Elizabeth Jaszczak, Director of Employment
Department of Human Resources
CASE WESTERN RESERVE UNIVERSITY
10900 Euclid Avenue
Cleveland, OH 44106-7047

ACADEMIC VICE PRESIDENT
Le Moyne College

The Vice Presidential Search Committee of Le Moyne College, Syracuse, New York, a college in the Catholic and Jesuit tradition, invites nominations and applications for the position of Academic Vice President, the chief academic office of the college.

The College Le Moyne College was founded as a co-educational college in 1946 and is located on a 151-acre campus. Of the approximately 2,000 undergraduate students who are enrolled in its 15 major programs, 90% are residential students. There are also approximately 800 students enrolled in its two Master's degree programs, Business and Education, and in one professional program, a two year Physician's Assistant Program. The number of programs offered and students served has grown substantially in recent years. As a Jesuit college with a highly qualified faculty of 134 full time professors, Le Moyne challenges students to achieve intellectual excellence. It invites them into the Dialogue between faith and culture, and urges them to embrace those values that emphasize service to the local and world communities, especially to populations that are generally underserved. The College is committed to academic freedom for both faculty and students and seeks to foster an environment that is inclusive, pluralistic, and diverse.

Responsibilities: The Academic Vice President reports to the President and serves as acting President in the absence of the President. He or she is expected to oversee the activities of the Dean of Arts and Sciences and the Dean of Management. She or he will direct all academic budgetary processes. The Academic Vice President provides leadership in planning, implementing, and assessing all academic programs and will supervise applications for all accreditation. The Academic Vice President will encourage excellent teaching, valuable research, and generous service among the faculty.

Qualifications: Le Moyne College seeks an academic leader who will communicate a clear vision of its mission. All applicants should hold an earned doctorate and have been faculty members whose teaching, scholarship, and service were judged to be excellent by colleagues; they should have held a senior academic rank. Experience in academic administration is necessary, preferably at the level of Dean, or higher. Accordingly, the successful candidate will be knowledgeable concerning budgetary matters, academic planning, and technology that supports pedagogy. Candidates must supply evidence of strong communication skills and of a consensus building style of leadership. Finally, there must be evidence of past decision making to the values included in the mission statement of Le Moyne College, with an emphasis on issues of justice.

Please send nominations and applications to the address below. Candidates should submit a current curriculum vitae, a letter of application which addresses the qualifications and responsibilities listed above, and the names of five referees, with their addresses and telephone numbers. Review of applications will commence immediately and continue until position is filled. All communications will be treated confidentially. The term of office begins on July 1, 2001. Please send materials to:

Vice Presidential Search Committee
Attn: Professor Nancy C. Ring, Ph.D., Chair
Search Committee
Office of Personnel and Human Resources
Development
Le Moyne College
1419 Salt Springs Road
Syracuse, NY 13214

Le Moyne College is an equal opportunity employer and encourages women, persons of color, and Jesuits to apply for employment.

**CHANCELLOR**

The University of Virginia's College at Wise

Nominations and expressions of interest are invited for the position of Chancellor of The University of Virginia's College at Wise. The Chancellor reports to the Board of UVA-Wise and to the President of the University of Virginia in Charlottesville.

The University of Virginia's College at Wise is one of the top liberal arts colleges in the South and is gaining national recognition for its growing academic excellence. Located on a 367-acre campus in the Appalachian Mountains of Southwest Virginia, UVA-Wise supports an enrollment of 1,450 and a full-time faculty of 72. UVA-Wise offers undergraduate programs in the arts and sciences as well as select undergraduate professional programs in business, nursing, teacher education, and other fields, all characterized by a strong liberal arts experience.

The College seeks a new Chancellor who will continue enhancing the quality of the undergraduate experience and strengthening the institution's faculty, student body and financial resources. The new Chancellor will be expected to possess the vision, educational credentials, personal characteristics and administrative skills to work effectively within the close-knit community of Wise, the University of Virginia and the Commonwealth. An understanding of the role and value of public liberal arts colleges is essential.

Correspondence should be directed, in confidence, to the consultants supporting this search:

Chancellor
The University of Virginia's College at Wise
p/o Educational Management Network/Witt/Kieffer

**Bloomsburg UNIVERSITY**

**DIRECTOR FOR SOCIAL EQUITY AT BLOOMSBURG UNIVERSITY**

Bloomsburg University of Pennsylvania, a member of the State System of Higher Education, is seeking nominations and applications for the position of Director of Social Equity (AA02-034). Enrolling more than 7,000 students, Bloomsburg's residential campus is located in a rural setting in north central Pennsylvania, with the metropolitan areas of Philadelphia, New York and Washington, DC within a few hours drive.

The Director for Social Equity is primarily responsible for advancing Bloomsburg University's commitment to social equity and multiculturalism. She or he will report directly to the President.

The Director will foster the campus climate for diversity, encourage multiculturalism, provide training and educational programs on social equity issues for campus constituency groups, guide university departments in developing action plans to increase and retain historically under-represented staff and students, and advise campus on equitable hiring practices and searches. A more detailed description, including salary range, is available on the web at http://www.bloomu.edu/jobs

Qualifications: Master's degree required and at least three (3) years of relevant experience; other advanced degree desirable.

Nominations and applications should be directed to: Dr. Gloria Cohen-Diao, Chair, Search Committee, Office of Social Equity, 115 Walter Administration Building, Bloomsburg University of Pennsylvania, Bloomsburg, PA 17815. To be considered, applications must be received by February 8, 2001, and must include: a letter of application relating how your education and experience have prepared you to deal with social equity issues, and a resume. Finalists for this position must communicate well and successfully complete an interview with the President.

**Northeastern UNIVERSITY**

**Associate/Full Professor**

**Department Chair**

The Department of Speech-Language Pathology and Audiology at Northeastern University, an ASHA accredited program, seeks applications from senior level scholars with administrative experience for the position of Chairperson. The chairperson is expected to be a capable administrator, a recognized scholar, and an excellent teacher. Candidates should have an earned Ph.D. or equivalent in communicative disorders or sciences; CCC-SLP and/or A is preferred. Candidates must have a demonstrated record of scholarly excellence including grant writing. Tenure on entry is possible. Salary and benefits are competitive.

Applications should include: 1) letter of intent, 2) curriculum vitae, 3) reprints evidencing scholarly and/or administrative excellence.

Inquiries should be addressed to Robert B. Redden, Ed.D., Search Committee Chair, Northeastern University Faculty Senate, 442 RV, 360 Huntington Avenue, Boston, MA 02115.

Phone: 617-373-5424 Email: hean@neu.edu

A confidential review of applications will begin February 15, 2001. Northeastern University is an equal opportunity/affirmative action employer. For additional information about Northeastern visit our website at www.neu.edu.
Kutztown University enrolls approximately 8,200 students in graduate and undergraduate programs. The University is located in the borough of Kutztown in a charming rural setting, but is within 20 minutes driving time of the diverse metropolitan areas of Allen County/Bethlehem/Reading, and within 60 minutes of Philadelphia metropolitan area. As a state regional university, Kutztown University is committed to serving the multicultural populations in its region. The University is searching for faculty who have had extensive experience with diverse populations, especially African American and Latino populations represented in these adjoining metropolitan areas.

MUSIC FACULTY
The Department of Music at Kutztown University announces the following tenure track position - Assistant Director of Bands (Marching Band) and Single Reed Specialist. Additional teaching would be in the areas of introduction to Music Literature and Woodwind Ensemble. Demonstrated performance skill on Clarinet and/or Saxophone, as well as successful experience with recruitment. Master's degree in music required, doctorate preferred, along with demonstrated evidence of success with directly matching bands. Successful interview and demonstration of teaching and playing ability are required qualifications. While the tenure track appointment begins in late August 2001, the successful candidate will hopefully be able to relocate to the area in time to accept a special summer appointment beginning on July 9, 2001 in order to prepare for the marching band program. Examination of materials begins February 1, 2001 and will continue until position is filled. Send all materials to: Band/Single Reed Search Committee, Department of Music, Kutztown University, Kutztown, PA 19530. Include letter of application, current resume, transcripts and three current letters of reference.

ACTING/DIRECTING FACULTY

ST. CLOUD STATE UNIVERSITY
A tradition of excellence and opportunity

DEPARTMENT OF EDUCATIONAL LEADERSHIP

SCSU seeks applications for an Assistant/Associate Professor of Educational Leadership and/or Associate/Full Professor of Educational Leadership, tenure track, to begin August, 2001. Salary commensurate with education and experience.

Responsibilities: Position summary: Provide graduate level pre-service and in-service instruction and facilitation for principalship, superintendency, community education directors, and special education director preparation programs leading to MS, Ed.S., Ed.D., and licensure; and other current and emerging program initiatives.

Characteristics: duties include:
1. Teach courses in a broad area of educational administration with a specialty in at least two of the following: educational law; educational finance; qualitative and quantitative research; community education; special education; and leadership.
2. Assist in providing a collaborative leadership environment for building a strong, cooperative, and congenial department which advances the missions of the department, college, and university.
3. Assist in developing and implementing: on and off campus courses; evening, weekend, ITV and WebCT courses; participating in student advising; directing student research; scheduling courses; evaluating and marketing programs for the MS, Ed.S., and Ed.D. programs; utilizing technology and teaching methods appropriate for adult, graduate learners.
4. As a faculty member, establish, accomplish, and record progress goals; demonstrated ability to teach effectively and/perform effectively in other current assignments; scholarly or creative achievements; research; evidence of continuing preparation and study; contribution to student growth and development; and service to the university and community.
5. Assist in the development and evaluation of competency-based portfolios.
6. Maintain professional contact with educational administration and leadership organizations.

Qualifications and experiences: Earned doctorate from an accredited institution in Educational Administration and Leadership or a closely related field. Preference will be given to applicants with demonstrated success as a public school administrator. Candidate should prepare to document evidence of successful leadership, teaching, and scholarly activities; successful participation and involvement with local constituencies such as public school students, staff, and community members; experience in using emerging models and technologies in support of alternative approaches to teaching and learning; ability to communicate effectively at the university, national, and international levels. The successful candidate will have demonstrated ability to teach and work with persons from culturally diverse backgrounds.

Apply to: Chair, Search Committee, Department of Leadership, EB A232, St. Cloud State University, 720 - 4th Avenue South, St. Cloud, MN 56301-4498. The screening will begin January 30, 2001, and continue until the positions are filled. A completed application will include letter of application; vita; transcripts (copies acceptable for initial screening); names, addresses, and telephone numbers of at least three references who can specifically comment upon the applicant's teaching ability, administrative experience, and professional preparation.

SCSU is committed to excellence and actively supports cultural diversity. To promote this endeavor, we invite individuals who contribute to such diversity to apply, including minorities, women, persons with disabilities, GLBT, and veterans.

MIAMI UNIVERSITY

THE JOSEPH SELBERT PROFESSOR OF MARKETING

RICHARD T. FARMER SCHOOL OF BUSINESS
MIAMI UNIVERSITY (OHIO)

The Richard T. Farmer School of Business at Miami University (Ohio) invites applications and nominations for an endowed position, the Joseph Selbert Professor of Marketing, named after the former department chair and revered faculty mentor. The candidate must demonstrate the potential to be an innovative leader capable of helping the Department of Marketing enhance its national presence, building on the strength of Miami as a leading liberal education university and on the mission of the School of Business in providing excellence in undergraduate business education.

Candidates considered for the Selbert professorship should have a Ph.D. in marketing or a related field and currently be a full professor or an associate with a strong record. The Selbert Professor's responsibilities will include: teaching marketing courses (primarily undergraduate), active involvement in research, and acting as a research mentor for faculty and involvement in professional marketing organizations. Candidates should have a well-established research record, as well as an ongoing research program. They should have shown excellence and innovation in the classroom. They should have demonstrated leadership in curriculum development. The position is a full-time, tenure-track. Strong candidates from industry with graduate degrees will be considered.

Miami University is a state-assisted university located in southwestern Ohio. Established in 1809, Miami has developed into a selective public university with a long tradition of dedication to teaching excellence and undergraduate liberal education. Miami has an enrollment of more than 21,000 students on four campuses and awards baccalaureate degrees in over 70 areas, masters degrees in 50 areas and doctoral degrees in nine disciplines. The central campus is in Oxford, a small city with a population of 10,500 located 35 miles north of Cincinnati and 45 miles southwest of Dayton.

The Richard T. Farmer School of Business Administration has 150 full-time faculty, approximately 4600 undergraduate students and 140 graduate students. It offers an associate degree, 15 baccalaureate degrees and three masters degrees. The mission of the school is to be a premier business program that provides students with the life-long ability to seek and acquire knowledge and translate it into responsible action in a competitive global environment. Towards that end, the School endorses a commitment to liberal education, as well as to future-specific curriculum. The School has been accredited by the American Assembly of Collegiate Schools of Business at the undergraduate level since 1932 and at the graduate level since 1961.

Review of applications will begin November 1, 2000 and will continue until the position is filled. Anticipated date of appointment is August, 2001. Applications should include a letter of application, resume and the names, addresses, e-mail addresses and telephone numbers of three references. Please address all communications to:

PROGRAM-ADMISSIONS SPECIALIST
The Graduate School and The Center for Continuing Education

Reporting to the assistant dean of the Graduate School and the director of the Center for Continuing Education, the programmer works collaboratively with professionals, clerical staff and advisors to design and develop programming and reporting solutions that will support their efforts to achieve recruitment, admission and student retention goals. The programmer is involved in the development and implementation of strategies to increase the enrollment of the University through enhanced data collection and reporting.

The programmer will also act as liaison between Graduate School, the Center for Continuing Education and the Office of Information Technology. Must demonstrate proficiency manipulating and analyzing institutional databases as well as a working knowledge of prospect management and correspondence control methods. Experience with the SCT Student Information Systems (SIS+) and the Focus programming language is desirable. Will act as one of the Graduate School's and the Center for Continuing Education's representatives to any project team designed to implement changes to the current SIS+ system or the addition of Web-based admission software.

Qualifications: Bachelor's degree supplemented by appropriate programming/admissions office experience at a college or university. Must have a minimum of three years' professional experience; experience with admissions offices and the SIS+ system and focus programming is preferred. Must have administrative systems programming skills, effective oral and written communication skills, interpersonal skills and ability to manage projects.

Salary: Salary is commensurate with experience.

Reply by: Review of applications will commence January 5, 2001 and will continue until position is filled.

Send letter and resume to:
Montclair State University, Box 316-HOHE, Upper College Center, Montclair, New Jersey 07043. An Equal Opportunity/Affirmative Action Institution. www.montclair.edu

RECRUITMENT SPECIALIST
U. S. MERCHANT MARINE ACADEMY

The Academy offers a four year, residential Baccalaureate degree program to prepare selected young men and women to serve the economic and defense interests of the United States as officers in the armed forces and merchant marine. The Specialist is involved with nationwide recruitment, selection, retention and financial aid, with particular emphasis on the recruitment of women and minority candidates. Applicants should have a relevant bachelor's or advanced degree. Required are experience in college level admissions programs, ability to initiate and deliver recruitment presentations, skill in developing recruitment networks to target and recruit special emphasis candidates, knowledge of admissions counseling and financial aid programs, knowledge of higher education enrollment and retention issues and trends, knowledge of computer based resources. For further information on the Academy, visit us at http://www.usmma.edu. The U. S. Government is an affirmative action and equal opportunity employer. This is a competitive service position in the Federal government. U. S. citizenship is required. Send letter of interest (refer to KP-7000) and resume immediately to:

Academy Personnel Office
U. S. Merchant Marine Academy
Kings Point, N. Y. 11024

Head of Systems

Reporting to the Associate Dean and Chief Librarian, the Head of Systems is responsible for all aspects of planning, development, implementation and maintenance of the computer and LAN network systems for four library sites; works closely with faculty in incorporating the library's electronic resources and information technology into instruction; coordinates campus network support with Instructional Computing and Information Technology; supervises the full-time and part-time members of the library system units with the assistance of unit staff, maintains, New CD-ROM works, online bibliographic and full-text databases, Internet/WWW access, and PC/MAC/multi-media products in support of public services; prepares strategic planning documents related to library automation activities; coordinates NOTIS system support with CUNY central office; works with library staff in addressing automation, training and public access computer lab issues.

Qualifications: A Bachelor's degree is required plus six years of related experience; an advanced degree is preferred. Highly desirable: Minimum two years library systems experience with some working experience in an academic library; solid understanding of the application of computers in an academic setting; knowledge of computer systems, networks, emerging technologies, Windows/NT, TCP/IP, client server platforms. Strong understanding of data management, self-direction, and ability to work independently and in a team environment; excellent leadership, communication and interpersonal skills; supervisory, teaching and training experience. Salary: $42,616 - $56,154, commensurate with qualifications and experience. Excellent fringe benefits.

Review of applications will begin immediately and will continue until the position is filled. Send resume and names (with addresses, telephone, fax numbers, email addresses) of at least three current references to: Dr. Louise Sherby, Chairperson, Hunter College Libraries, 695 Park Avenue, New York, NY 10021; email: Louise.Sherby@hunter.cuny.edu.

CLARION UNIVERSITY

Librarian/Database Management

Technical Services unit seeks experienced cataloger and database manager to develop, implement, and monitor Voyager management policy and to perform original and complex copy cataloging of monographs, monographic sets, archival materials, monographic electronic resources, and monographs in other forms for the main and branch campuses. This librarian will also classify monographic materials for all subject areas, establish standards and procedures for monographs; develop, implement and monitor quality of online catalog database; monitor vendor performance for authority control; provide supervision and support for cataloging of juvenile materials and textbooks; serve as trainer and resource person for paraprofessional cataloging staff; serve as liaison with selected academic departments. Other responsibilities will include working with catalogers of non-book and serial materials; participating in formulation of cataloging standards and classification policies; coordinating operations with systems manager; assisting with catalog maintenance, quality control, and problem solving; conducting research that will enhance library operations; submitting articles to professional journals; creating and publishing web-based publications to support faculty and student research and learning; advising staff of local, state and national cataloging and classification policies and procedures; maintaining good working relationships with all library departments. Must fulfill terms of collective bargaining agreement.

Required: ALA-accredited MLS; minimum 3 years in bibliographic control and online catalog database management; professional monographic cataloging experience including substantial cataloging of solid works; knowledge of AACR II, LCSH, LC classification, US MARC formats, OCLC, and authority control procedures; demonstrable experience with authority files and database management; evidence of excellent communications and interpersonal skills; strong analytical, organizational and computer skills; demonstrable experience in planning and budgeting; supervisory experience; and completion of a successful interview.

Preferred: Additional graduate degree highly desirable, especially in information technology, experience working in an academic library; experience with the Voyager library system; participation in state and national professional organizations; familiarity with evolving metadata standards (Dublin Core, TEI, etc.); familiarity with mark-up languages (HTML, SGML, XML, etc.); familiarity with Access and Z39.50. Nine months, full-time, tenure-track position, starting August 27, 2001, at rank of Instructor or Assistant Professor depending on qualifications. Minimum starting salary $34,342. Opportunity for faculty in work during summer sessions possible depending upon budget constraints. Reports to Library Department Chairman and Dean of Libraries. Send letter of application, resume, and three letters of reference to: Shirley M. Johnson, Library Department Search Committee, Carlson Library, Clarion University of Pennsylvania, Clarion, PA 16214. Transcripts need not be submitted in advance but will be required of all finalists. Position will remain open until filled with priority given to applications received by March 5, 2001.

Clarion University is building a diverse academic community and encourages people of color, women, veterans, and persons with disabilities to apply. AA/EOE.
Dean of Student Services

The Dean serves as the chief campus student services officer, and is responsible for providing the leadership in all aspects of student life; for coordinating the overall planning, development and general oversight for campus student services programs and staff; and for ensuring a supportive environment in which students may achieve academic goals. This individual must possess a vision for the planning, implementation and evaluation of a student services administrative unity, and also serve as a representative to the public and community in promoting and representing the campus and the College.

A Master's degree from an accredited institution in higher education administration, counseling, student personnel or other appropriate area is required; an earned doctorate or terminal degree is preferred.

Individual must demonstrate ability to supervise, monitor and evaluate campus-based student services (e.g. Enrollment Management, Orientation, Advisement, Career Counseling, Student Activities, Admissions and Registration Services, Testing and Judicial Affairs) as well as to provide campus leadership for the development and implementation of student recruitment and retention efforts. Knowledge of student information systems, CAS Standards helpful.

Individual must have a minimum of seven (7) years of progressively responsible administrative experience in student affairs or related area in a college/university setting, at a comparable level of Assistant/Associate Dean or higher.

Salary is commensurate with education and experience, with excellent benefits.

Applicants should reference position number #01-199 and send the following as a single packet: (1) letter of interest, (2) resume, (3) unofficial copy of graduate transcript(s), and (4) list of five professional references (names, addresses, e-mail addresses, telephone numbers) to: Judy Chastoney, Georgia Perimeter College, Dept. of Human Resources, 3251 Panthersville Road, Decatur, GA 30034; Fax: (404) 244-5774.

SEMINOLE COMMUNITY COLLEGE
JOIN OUR WINNING TEAM!

Dean of Business and Information Technology

Seminole Community College is a comprehensive, learning-centered Institution located just north of Orlando, Florida. The College operates a 200-acre main campus, several community centers, and a new Oviedo Campus that will become fully operational in January 2001. With a commitment to supporting Seminole County's very successful high tech economic development initiatives, the College serves nearly 30,000 students annually. Candidates must be motivated by high-energy, goal-oriented teamwork, win a focus on accomplishment and results. Also, in addition to having a great sense of humor, candidate must have a desire to do meaningful work that makes a difference in people's lives.

As an educational leader, the Dean of Business and Information Technology will provide leadership in the planning, development, and deployment of educational programs in business and information technology. The successful candidate will also link student learning and faculty development experiences with the needs of the high performance workplace, provide lifelong learning linkages through partnerships with K-12, other community colleges, and university articulation partners.

Additional credentials require a Master's degree from a regionally accredited Institution. A Doctorate degree is preferred. Unique experiences in industry, government, and/or education will be considered in lieu of MBA and doctoral preferences. College level teaching experience is strongly preferred along with demonstrated expertise in learning systems and/or curriculum development.

EXECUTIVE DIRECTOR
BUSINESS AND WORKFORCE DEVELOPMENT

The Executive Director will provide overall leadership and direction in the planning, development, and deployment of education and training services to businesses, workforce development agencies, their employees, and their clients. The successful candidate will also develop and manage partnerships, identify opportunities for growth in all services provided by the College, assume a strong external orientation, with an emphasis on technology-based employers in Central Florida and statewide workforce development groups, along with identifying needs and delivering solutions.

Additional credentials require a Master's degree from a regionally accredited Institution with an MBA or equivalent preferred. Unique experiences in industry, government, and/or education will be considered in lieu of MBA. Experience with workforce development organizations, corporate training programs, consultative selling or related activities preferred. Proven entrepreneurial skills along with relevant leadership experience preferred.

SCC offers a competitive salary and a comprehensive benefits package. To request job announcements and application materials for these team-oriented positions, contact:

Human Resources at: hrmail@seminole.cc.fl.us or call (407)-328-2101.
Visit our web site at: Seminole.cc.fl.us/jobs.

Open until filled and subject to close without notice.
An Equal Access/Equal Opportunity Community College
STATE UNIVERSITY OF NEW YORK COLLEGE AT BROCKPORT
Expect the Extraordinary!

EDUCATIONAL OPPORTUNITY PROGRAM DIRECTOR

SUNY Brockport is a prominent, comprehensive public institution that emphasizes academic excellence through teaching, scholarship, and service, serving more than 8,500 students at both the undergraduate and graduate levels, offering 29 undergraduate majors, 13 undergraduate teacher certification areas and 18 graduate degrees. The College has seen an unprecedented increase in applications and in the quality of its student body over the past two years. The College’s 435-acre campus is located on the Erie Canal in the historic Village of Brockport, just west of the city of Rochester, New York.

The Position: The Director is primarily responsible for the overall administration and coordination of the Educational Opportunity Program, including planning, evaluation and reporting. Along with the directors of admissions and financial aid, the Director is responsible for ensuring that all EOP students meet required eligibility criteria; and provides input as needed to support the student services/retention objectives of the College. The Director reports directly to the Vice President for Enrollment/Management and supervises a full-time staff of five. The EOP is part of SUNY System Administration, Office of Opportunity Programs.

Essential Functions of the Position: The Director is responsible for coordinating services to support the well being of program students; supports advisement services by providing assistance to staff to serve as generalist advisors; supports the College’s admissions objectives; provides assistance in the development of data-based management as part of the student support/retention objectives of the College; is responsible to support the College’s mission statement whose prime objective is to support student success. Duties include the development and supervision of a department budget. The Director will also be expected to promote the program and to advocate for legislative issues in support of EOP.

Required Qualifications: Must have a Master’s degree in college student personnel, counseling, higher education administration, or a related field with a minimum of 3-5 years of full-time professional experience in higher education. Must have demonstrated the ability to effectively and efficiently supervise professional staff in college administration, and possess a collaborative leadership style with strong organizational and programming skills. Must have excellent written, oral, interpersonal, and organizational skills, and the ability to work with culturally diverse populations. The Director must be fully committed to sustaining and advancing the goals of recruitment, retention, and matriculation of students, faculty, and staff.

Preferred Qualifications: Direct experience with EOP related opportunities programs, and experience with the use of data bases for reporting, research and planning purposes.

Salary: $50,000 - $60,000, with an attractive benefits package.

Application and Nomination: Review of applications will begin on January 22, 2001, and continue until the position is filled. Interested applicants or nominations should be sent to: Chair, IFA Executive Director Search Committee, Office of the Dean, College of Public Affairs and Administration, PAC 440, University of Illinois at Springfield, P.O. Box 19243, Springfield, IL 62794-9243. Applications should include a vita, a discussion of the candidate’s academic and administrative experiences/demonstrations of interest in the position; and the names, addresses, and telephone numbers of five references. Consideration of applications will begin on February 6, 2001 and continue until an appointment is made. The anticipated start date for the appointment is August 1, 2001.

For more information about the University of Illinois at Springfield, visit our web site at: WWW.UIS.EDU

SUNY Brockport is an affirmative action, equal opportunity employer and encourages qualified female and minority candidates to apply.

DIRECTOR OF ENROLLMENT AND REGISTRATION SERVICES

Search Extended

The campus-based Director of Enrollment and Registration Services will work with external constituencies, faculty and staff to attain enrollment and retention goals. The Director oversees operational and management operations on the campus including registration and records; marketing and recruitment; admissions and student retention; and works in collaboration with the appropriate administrative areas to establish campus enrollment priorities.

A Master’s degree in higher education administration, educational research, Student Personnel or related field is required. The candidate must also have a minimum of five years of progressively responsible experience in higher education administration in an enrollment management environment.

Review of applications will begin February 5, 2001 and continue until the position is filled.

Salary commensurate with education and experience with excellent benefits.

Applicants should reference position number (#01-200) and send the following as a single packet: (1) letter of interest, (2) resume, (3) unofficial copy of graduate transcript(s), and (4) list of five professional references (names, addresses, e-mail addresses, telephone numbers) to:

Judy Chastony
Human Resources Department
3251 Panthersville Road
Decatur, GA 30034
Fax: (404) 244-5774

SAINT FRANCIS UNIVERSITY

SOCIOLGY FACULTY

Saint Francis University invites applications for two tenure-track positions in Sociology at the Assistant Professor level to begin Fall, 2001. Preference will be given to applicants with specialties in Social Inequality, Medical Sociology, Applied Sociology, or Law and Society/Criminology. Applicants should have a strong commitment to excellence in undergraduate teaching and should be generalists who can assume responsibility for Sociology courses within the University’s general education program as well as courses in the Sociology major. Course responsibilities may include General Sociology, American Social Problems, Minorities, The Family, and Urban Sociology. The new faculty will assist in revising the Sociology major, including goal setting, curriculum development, and formulation of new concentrations. Other responsibilities include advising, internship supervision, scholarship, and participation in department and college governance. Qualifications include a Ph.D. in Sociology (qualified ABD’s will be considered) and an interest in involving students in research and/or community-based learning.

Send a letter of application, resume, transcripts, three current letters of recommendation, and a one-page statement of teaching philosophy to Sociology Search Committee, c/o Office of Human Resources, Saint Francis University, PO. Box 600, Loretto, PA 15940 by January 31, 2001. The Sociology Search Committee will begin reviewing applications on February 1, 2001, and continue until the positions are filled.

AA/EED Women and Minorities are especially encouraged to apply.
VICE PRESIDENT AND GENERAL COUNSEL

Northwestern University invites application and nominations for the position of Vice President and General Counsel, the University’s chief legal affairs officer.

The Search Committee will begin reviewing applications in January and will continue until the position is filled. Nominations or applications should be sent to: Marilyn McCoy, Chair, Search Committee for Vice President and General Counsel, Northwestern University, 633 Clark Street, Evanston, Illinois 60208

Information about the University is available at: www.northwestern.edu

The University is an Equal Opportunity/Affirmative Action Employer.

California State University, Sacramento (CSUS)

CSUS invites applications for the position of Associate Vice President, Facilities Management. Reporting directly to the Vice President for Administration, the Associate Vice President is the key University officer responsible for Facilities Management and a critical member of senior administration. With primary management and leadership responsibility for facilities planning, construction, operation, maintenance and repair, environmental health and safety; and management of building space, the position oversees 212 employees, an annual operating budget of approximately $12,000,000, and a capital construction budget of $10,000,000 to $50,000,000.

To apply, submit a letter summarizing management philosophy, career accomplishments, and qualifications for the position, with a current resume and the names and telephone numbers of three professional references to: Selection Committee Chair, Box AVFM4, 6000 J Street, SAC 273 Sacramento, CA 95819-6638, Phone: (916) 278-6312, Fax: (916) 278-5783. Screening begins January 15, 2001. Position open until filled. For details, visit our web site: http://www.csus.edu/fa/admfac.htm.

VICE PRESIDENT FOR ENROLLMENT MANAGEMENT

Hiram College
Hiram, OH

Founded in 1850, Hiram College is a private, selective liberal arts college located in the Western Reserve of Northeast Ohio, less than an hour from Cleveland. Privately endowed and non-sectarian in outlook and teaching, Hiram College is recognized as a Baccalaureate I institution by the Carnegie Foundation for the Advancement of Teaching. Enrollment in Hiram’s traditional residential program is approximately 900 with 350 adult learners in its Weekend College program. There are 67 full-time faculty, 95% hold a doctorate or terminal degree in their discipline. Hiram’s academic calendar, known as the Hiram Plan, is unique to the nation. Each of Hiram’s 15-week semesters has a 12-week term and a 3-week term. The 12-week terms are for extended coursework. The 3-week terms are devoted to intensive, seminar-style classes, and experiential learning experiences. More than 50% of Hiram students study abroad during their four years at the institution. The College recently completed a $42 million fund-raising campaign, which included a new library and a new science facility.

The College seeks a Vice President for Enrollment Management (VPEM) who will have a broad-based responsibility for creating and implementing admission, marketing, financial aid, and retention strategies. The new VPEM will lead and oversee the areas of Admission, Financial Aid, Registrar, International Student Recruitment, and Student Life. An officer of the College, the VPEM will report to the President and serve as a member of the senior administrative team. The position will begin on or before July 1, 2001.

The successful candidate will have exceptional ability to lead senior staff, expertise in strategic enrollment management, and a deep understanding of and commitment to the inherent value of an undergraduate liberal arts education, and a record of successful career accomplishments. An advanced degree is preferred.

Hiram College invites nominations and expressions of interest for the position. Correspondence should be directed, in confidence, to the consultants supporting this search:

LIU is an Affirmative Action/Equal Opportunity Employer.
UNIVERSITY OF ILLINOIS

Vice President for Academic Affairs

The University of Illinois invites nominations and applications for the position of Vice President for Academic Affairs.

The University of Illinois (<http://www.uillinois.edu>), an international leader in higher education, includes three distinctive campuses with combined student enrollments of 66,000. The campuses at Chicago (25,000 students) and Urbana-Champaign (37,000 students) are classified as Doctoral/Research Universities - Extensive. The newest campus, located in the State capital of Springfield (4,000 students) is classified as a Master's Comprehensive University I.

The Vice President for Academic Affairs is the senior academic officer of the University and reports directly to the President. The Vice President for Academic Affairs advises the President on matters of educational policy, academic programs, academic personnel actions, and capital and operating budget development. The Vice President is responsible for the overall coordination of planning and budgeting at the University and represents the interests of the University to the Illinois Board of Higher Education on matters pertaining to academic programs and priorities. Among other duties, the Vice President exercises direct line authority over certain University wide units and programs, including the Institute of Government and Public Affairs, the University Office for Academic Policy Analysis, the University of Illinois Press, UI Online, the President’s Leadership Program, and the University Office of Outreach and Public Service.

Progressively responsible administrative experience with academic policies, personnel, and budgets is required for the position. An earned doctorate or equivalent and a record of teaching and scholarship that would merit appointment as a tenured professor at the University of Illinois are required. The ability to understand and work effectively in a complex academic culture influenced by multiple campuses, a land-grant university tradition and a medical school is also required.

To insure full consideration, nominations and applications (that include a comprehensive current resume) should be sent by February 15, 2001 to:

Professor Donald L. Uchtmann, Chair
Search Committee, University of Illinois
University Senate Conference Office
807 S. Wright, Suite 370
Champaign, Illinois 61820
Telephone: (217) 333-5227
E-mail: vpsearch@uillinois.edu

The appointment of the new Vice President is anticipated to take effect on or before August 1, 2001.

The University of Illinois is an affirmative action/equal opportunity institution.

THE UNIVERSITY OF TOLEDO

Chair, Foundations and Leadership

Description: The Department of Educational Foundations and Leadership is seeking a facilitative leader who can work with diverse program faculty to implement the mission of the department by supporting program areas in Educational Administration and Supervision, Higher Education, and Foundations, The successful candidate must have previous experience in curriculum, motivation, and management to sustain cutting edge programs in a dynamic educational environment. The chair, as a member of the Educational Administration and Supervision faculty, is expected to coordinate all program areas, direct dissertations and theses, teach Administration coursework, advise students, and engage in research and field activities.

Qualifications: Earned doctorate in Educational Administration and Supervision or closely related area. Successful track record appropriate to appointment as tenured Associate or Full Professor with Graduate Faculty status. Administrative expertise in diverse educational settings, including the development of cutting edge programs and curricula. Experience in central administration in pre-K-12 settings is preferred. Research and teaching experience with educational partners in public schools, business, and post-secondary institutions.

Educational Administration

Description: The Educational Administration and Leadership Program in the College of Education at The University of Toledo invites applications for a tenure-track position (rank open) to teach graduate courses in school administration and leadership.

Qualifications: An earned doctorate is required. Desired qualifications include demonstrated excellence in teaching experience directing dissertations; expert knowledge on linking research policy, curriculum, learning, and successful school organization; and specialized knowledge, skill, and practical experience in promoting academically rich and purposeful education that enhances the intellectual quality of student learning equally for students of all social backgrounds. The successful candidate will also possess special interest in serving as a catalyst for effective school reform and systemic change of K-12 education; and in strengthening established partnerships between The University and school systems, both public and private.

Application Information: Send a letter of application, current curriculum vita, three current letters of reference, and copies of all transcripts that include relevant coursework to Sandy Chick, College of Education, University of Toledo, Toledo, OH 43606-3990.

Application Deadline: Applications will begin to be reviewed February 2, 2001.

The University of Toledo is located on a wooded 200 acre suburban campus. Local amenities include a nationally accredited, on-campus child care center, one of the nation’s top 10 art museums, an excellent symphonic orchestra, and outstanding metro park system. The University offers a competitive salary and excellent benefits, and is an Equal Access, Equal Opportunity, Affirmative Action Employer.
Nominations and applications are invited for the full-time position of the Director of the Institute of Aviation. The Director is the chief academic and administrative officer of the Institute of Aviation. The Institute of Aviation offers a B.S. degree in Aviation Human Factors, which is composed of two core programs: the Professional Pilot core and the Aviation Human Factors core. In addition, the Institute operates the University of Illinois-Willard Airport, which provides scheduled commercial air service for East Central Illinois. The Director reports to the Vice Chancellor for Administration and Human Resources regarding Willard Airport matters. The Director of the Institute of Aviation is also Director of the Center for Public Safety, which is composed of two institutes: the Police Training Institute and the Fire Service Institute, each of which has its own director. The administrative level of the Director’s position is that of a college dean, and the Director reports to the Provost.

A candidate must be a recognized scholar in aviation human factors or an aviation-related field and must have a proven record of research, executive leadership and program administration. The Director must possess a Ph.D. in psychology, industrial engineering or other related discipline. Certification as a pilot (private pilot or higher), i.e., commercial pilot or certified flight instructor, is desirable. Experience in commercial operations or similar management experience is desirable. The Director is expected to promote aviation education and to stimulate research in aviation human factors. With the heads of the Departments of Psychology and Mechanical/Industrial Engineering, the Director is expected to promote the Interdisciplinary Program in Human Factors. The Director is also expected to stimulate activities in the Intelligent Human Computer Interaction thrust within the Beckman Institute. The Director must be adept at communicating the activities and the needs of the Institute of Aviation within the University of Illinois at Urbana/Champaign and with local, state and federal agencies. The Director is also responsible for providing executive leadership for the Center for Public Safety.

The salary is commensurate with experience. The beginning date is August 21, 2001. Although interviews may begin before the closing date, applicants who have submitted their resume by January 26, 2001, are assured full consideration. Please send applications to:

Professor Edward J. Shoen
Office of the Provost
217 Swanlund Administration Building
601 East John Street
Champaign, Illinois 61820
(Phone: 217/333-4493; Fax: 217/244-5639)

Affirmative Action, Equal Opportunity Employer

WESTERN CONNECTICUT
STATE UNIVERSITY
EDUCATION
FALL 2001, TENURE-TRACK

WCSU is seeking applications for a tenure-track appointment in the Education Department. Primary responsibilities will include teaching graduate courses in curriculum and instruction in a newly developed Master's degree program leading to Connecticut Certification in Elementary Education (Grades 1-6). Candidate will also be responsible for recruitment of students into yearly cohorts.

The successful candidate must fulfill the following criteria: 1) must hold, or have held, certification as a classroom teacher; 2) a demonstrated record of successful public school teaching experience in an elementary education classroom environment; 3) currently possess, or be willing to seek, a Connecticut CORE/BEST training certificate; 4) an earned doctorate in curriculum and instruction or related field. Prior university teaching experience in an NCATE accredited institution preferred. The position will be filled at either the Assistant Professor or Associate Professor rank. Rank and salary will be determined based on prior university teaching experience and other relevant prior experience.

Send a cover letter, a current vita, undergraduate and graduate transcripts, evidence of effective teaching and three letters of recommendation by January 25, 2001 to: Dr. Thomas A. Cordy, Chairperson, Education and Educational Psychology Department, Western Connecticut State University, 181 White St., Danbury, CT 06810.

WCSU is an Affirmative Action/Equal Opportunity Educator/Employer.

Elmhurst College
Department of Education

Elmhurst College seeks an Assistant or Associate Professor of Literacy in its Department of Education. This is a tenure-track position, beginning September 1, 2001.

Desired qualifications include an earned doctorate degree in literacy; at least three years of experience as a certified teacher, or reading specialist in any public K-12 setting; and evidence of effective college teaching. Also, we seek a record of scholarship in literacy appropriate for rank; interest and experience in teaching diverse populations; and interest in pursuing the integration of technology with teaching and learning. Preference will be given to candidates with research involving second language learners, at-risk readers, or special education populations.

Major responsibilities are to teach courses in literacy for early childhood, elementary, special education, and secondary majors, including diagnosis and remediation, early literacy, middle school literacy, and content area reading; to supervise students in a reading practicum course required for the reading endorsement; and to supervise student teachers. Salary and benefits commensurate with Chicago-area private schools and universities. Elmhurst College is an EOE employer and we seek candidates with demonstrated ability to contribute positively to a multicultural campus community.

Please send letter of application indicating area(s) of expertise, curriculum vita, three recent letters of recommendation with at least one indicating evidence of effective teaching, scholarship, and service, and at least one example of academic writing to: Literacy Search Committee, Department of Education, Elmhurst College, 190 Prospect Ave., Elmhurst, IL 60126 by January 25, 2001.

Elmhurst College is a private, church-related liberal arts college 16 miles west of Chicago. It offers undergraduate and graduate programs which are accredited by NCATE, the North Central Accreditation Association, and the Illinois State Board of Education. The College has approximately 2,750 students of which approximately 750 are pursuing teacher certification. Our web site is: http://www.elmhurst.edu.

NEW YORK CITY TECHNICAL COLLEGE

The New York City Technical College is the designated college of technology of The City University of New York, currently offering both baccalaureate and associate degrees, as well as specialized certificates. The college, located in downtown Brooklyn adjacent to the MetroTech corporate and academic complex, enrolls 11,000+ students in the technologies of the arts, business, communications, health, engineering; human services and law related professions; technical and occupational education; and liberal arts and science and has approximately 275 full-time faculty.

DEAN OF THE SCHOOL OF PROFESSIONAL STUDIES

The dean will report directly to the provost/senior vice president for academic affairs and serves as the chief academic leader of the School of Professional Studies including curriculum and instructional design, annual and long-term academic and fiscal planning, personnel evaluation; enrollment and retention initiatives; and the development of a teaching/learning environment.

DEAN OF CONTINUING EDUCATION

The dean will report directly to the provost/senior vice president for academic affairs and serves as the chief administrator of the division to provide leadership in developing grant proposals for funded programs: personnel evaluation; and oversees the development of new credit and noncredit programs in response to changing needs of business professionals and other residents and organizations of the New York metropolitan area.

The successful candidates will have a demonstrated record of developing new programs and the ability to manage and direct institutional change. A doctorate or a relevant discipline and a minimum of eight years of experience in administrative positions in a college or university setting is required. Opened until filled. Applications should be sent to: Michelle Schlein, Human Resources, New York City Technical College, 307 Jay Street, Room Nannm 321, Brooklyn, NY 11201; www.cuny.edu (for detailed description) AA/EEO/ADA/IRCA

NEW YORK CITY TECHNICAL COLLEGE
THE CITY UNIVERSITY OF NEW YORK
The UNIVERSITY OF TOLEDO

Special Education (Severe Disabilities)

Description: Tenure track position. Advanced assistant or associate professor to support undergraduate and graduate degree programs in the area of severe disabilities with an emphasis on persons with mental retardation and associated disabilities.

Qualifications: Candidates should have an earned Ph.D., established record of teaching, publications, conference presentations, grant support, and professional service. The area of severe disabilities has had USDA and/or State of Ohio external funding since 1989.

Application Information: Send a letter of application, current curriculum vita, three current letters of reference, and copies of all transcripts that include relevant coursework to Sandy Chick, College of Education, University of Toledo, Toledo, OH 43606-3390.

Application Deadline: Applications will begin to be reviewed February 23, 2001.

Special Education (High Incidence Conditions)

Description: Tenure-track assistant or associate professor to support undergraduate and graduate degree programs in the areas of mental retardation, learning disability, and/or SEI. Experience in middle grades/secondary education, including academic area content instruction (e.g., social studies, math), behavior intervention planning, transition planning, social skills training, and effective use of instructional technology are expected.

Qualifications: Candidates should hold an earned Ph.D. and have emerging or established records of teaching, publication, conference presentations, grant support, and professional service.

Application Information: Same as above.

Application Deadline: Applications will begin to be reviewed February 2, 2001.

The University of Toledo is located on a wooded 200 acre suburban campus. Local amenities include a nationally accredited, on-campus child care center, one of the nation's top 10 art museums, an excellent symphony orchestra, and an outstanding metro park system.

The University offers a competitive salary and excellent benefits, and is an Equal Opportunity, Affirmative Action Employer and Educator.

The Department of Psychology at Auburn University seeks an Assistant Professor (tenure-track) in the clinical psychology program. Area of research interest is open, although preferences will be given to candidates with expertise in areas such as clinical issues in adolescent development, the relationship of emotion and psychopathology, behavioral medicine, or prevention practices and policy issues in clinical psychology. Strong candidates from other areas will be considered. The Department particularly is interested in recruiting a new faculty member who will add to our cultural diversity. Women, veterans, members of minority groups, and persons with disabilities are especially invited to apply. A Ph.D. is required at the time of appointment (August 2001). All applicants must be eligible for licensure at the time of appointment (August 2001). Contributions to the undergraduate curriculum will be given significant consideration when evaluating candidates. A strong commitment to teaching undergraduates and supervising both research and clinical work of graduate students is crucial. Auburn University has slightly over 23,000 students and is located in a small town in eastern Alabama that is 1 1/2 hours southwest of the Atlanta airport. Additional information about the Department is available at:

http://www.auburn.edu/academic/liberal_arts/psychology.

Review of applicants will begin on February 1, 2001. Interested candidates should submit a curriculum vitae and 3 references to:

Roger Blashfield, Ph.D.
Professor and Director of Clinical Training
Department of Psychology
Auburn University, AL 36849
(334) 844-6465 or blashfi@auburn.edu.

Auburn University is an Equal Opportunity/Affirmative Action Employer.

**History Education West Chester University**

African-American and American South: The Department of History at West Chester University seeks applicants for a tenure-track Assistant Professor position beginning August 2001 to teach undergraduate and graduate level courses in African-American and American South in addition to departmental surveys. Supporting field in Latin American history a plus. As is the ability to offer courses in American Women's history. Applicants must demonstrate teaching effectiveness and scholarly potential. Minimum qualifications include effective communication and teaching as demonstrated by a classroom presentation/lesson during the on-campus interview. Ph.D. expected by September 1, 2001. West Chester University is a comprehensive state university located in Philadelphia's suburban areas. For information about the university and department, see www.wcupa.edu. Send letter of application, c.v., graduate transcripts, and three letters of recommendation to Dr. Charles Hardy III, Chair, African-American Search Committee, Department of History, West Chester University, West Chester, PA 19383. All materials must be postmarked by February 9, 2001. West Chester University is an AA/EO and strongly encourages applications from women and minorities.

**Mathematics Faculty School of Arts & Science**

Iona College, dedicated to personal teaching in the tradition of the Christian Brothers and American Catholic Higher Education, and an equal opportunity employer, is seeking applicants for the position of Assistant Professor in the Mathematics Department beginning September 2001.

Responsibilities include 12 hours of teaching per semester, scholarship, and service to the College community. Qualifications are an earned doctorate in mathematics or mathematics education and should be prepared to teach a broad range of mathematics courses in a liberal arts environment. A commitment to continued scholarship and an expertise in the teaching of analysis in both a traditional undergraduate program and a graduate teacher education program is essential. Familiarity with the use of technology in the teaching of mathematics is also required.

Interested applicants should send a CV, a letter of application including a personal statement of one's teaching philosophy, and three letters of reference to:

Dr. James Carpenter
Chair, Mathematics Department

715 North Avenue
New Rochelle, New York 10801

Applications will be accepted until February 14, 2001.

**Director of Equal Opportunity and Affirmative Action**

Virginia Polytechnic Institute and State University, a comprehensive, research institution located in Blacksburg, Virginia, is seeking candidates with both the technical and intellectual skills to fill the position of Director of Equal Opportunity and Affirmative Action. The director reports to the Vice President for Multicultural Affairs. The University employs over 6,200 faculty and staff and enrolls over 25,000 undergraduate and graduate students, and seeks a candidate who is committed to the goal of increasing diversity at all levels of the institution.

The Director of Equal Opportunity/Affirmative Action develops and monitors institutional goals and plans related to equal opportunity compliance obligations of the university. The director also develops and monitors recruitment and appointment procedures for faculty and develops or revises policies related to EO/AA as needed. The director analyzes and prepares various university reports on the progress made toward fulfilling university EO/AA commitments, including faculty and staff recruitment and hiring results, and assists where appropriate in analyzing and reporting on student recruitment and retention trends. The director investigates and resolves discrimination complaints through internal procedures as well as by working with outside agencies.

The director, working with the Office of Multicultural Affairs, is also responsible for developing training and education programs on affirmative action and equal opportunity laws, policies, and procedures, as well as issues of sexual harassment and discrimination. The director collaborates with and provides technical support to all college and administrative units, including the Cooperative Extension, Institutional Research, and Personnel offices.

Candidates must possess a graduate or professional degree (doctorate or equivalent preferred). Five years of relevant experience in equal opportunity and affirmative action work, including complaint resolution is also required. Knowledge of Title VII, Title IX, the Americans with Disabilities Act (ADA), and other EEO and AAP laws and regulations is required, along with strong interpersonal and communication skills. Experience in higher education and evidence of effective supervisory and managerial skills is highly desired.

Virginia Tech offers a competitive package of compensation and benefits. Salary is commensurate with experience and qualifications. Send cover letter, resume, and names of three current references including titles, addresses, and phone numbers to:

Dr. Benjamin Dixon, Vice President
Office of Multicultural Affairs
332 Burruss Hall, (0176)
Blacksburg, VA 24061
Fax: 540/231-1818

Review of applications will begin January 29, 2001 and continue until position is filled.

Robin Atkins at 540/231-1820 or TTY 540/231-9460
**Associate Director of Admission**

Provide cooperative leadership to the Director of Admission and guidance to the Office of Undergraduate Admission in the overall planning, managing and executing of strategic departmental and institutional enrollment goals. Coordinate daily office operations and visitor programs; administer the freshman application review cycle; and organize recruitment activities and travel. In addition, you will train and mentor staff in the development of various programmatic and office sponsored initiatives.

You must have at least seven years of admission experience with progressive management responsibilities, a bachelor's degree (master's preferred) and a commitment to diversity and outstanding customer service. Excellent communication, interpersonal, and project management skills and ability to supervise and delegate proactively in order to meet assigned goals. Computer and web literacy as well as some travel are also required. Job Code: HO-30399

---

**Associate Director of Admission**

Manage and promote international and ALANA student enrollment for the Office of Undergraduate Admission at Bentley College. As a senior member of the admission staff, you will provide leadership, oversee employees and lead staff in the training and development of international and ALANA admission and recruitment activities. You will participate in strategic planning, program development and the implementation of office goals and objectives. Also, evaluate applications from different educational systems and serve as liaison for the college’s special academic programs.

Requires: At least seven years of experience in admissions or related field; experience with International and ALANA populations desired. You must be team oriented, self-motivated and able to effectively organize time and tasks. A commitment to diversity and the ability to work well with diverse populations are necessary. Computer and web literacy with a bachelor's degree is a must; master's degree preferred. Domestic and international travel required. Job Code: HO-30185

---

**Senior Associate Director**

Take a leadership role in the admission for the Graduate School and yield conversion activities to ensure that a comprehensive, coordinated approach to admission processing, decision-making and yield activities is achieved. Manage the application, decision processing and function as liaison among various groups such as the Boston-area MBA consortium, five-year program administration staff and other divisions of the college. You will also coordinate the communication process for applicants and accepted applicants as well as play a key advisory role in both international and domestic recruitment and travel planning.

You must have excellent communication, interpersonal and project management skills; the ability to supervise and delegate proactively in order to meet assigned goals along with the ability to work with faculty, program directors, perspective students and alumnii. Computer and web literacy and a minimum of five years' admission experience are necessary. Bachelor's degree required; master's degree in business, higher education or student personnel preferred. Job Code: HO-30705

---

**Manager of Library Technical Services**

In this full-time position you will manage and oversee all aspects of acquiring, processing and adding to the library’s integrated consortium Sisisi, catalog all books, periodicals, serials, videos and electronic information services. You will also serve as head cataloger. Strong supervisory and change management experience will be expected. Requires MLS degree from an ALA-accredited program; a minimum of three years' recent experience cataloging materials in all formats using MARC and AACR2 on OCLC and local automated library system; familiarity with all aspects of Serials and Acquisitions processes; minimum of two years' supervisory experience in a technical services department of an academic library and excellent oral and written communication skills. Familiarity with the Sisisi automated system is a definite plus. Job code HO-30161

Please apply to: Human Resources, Job Code #, Bentley College, 175 Forest Street, Waltham, MA 02452. Or apply online at: www.bentley.edu
The University of Florida is recruiting a Vice President for Administrative Affairs. The 2,000 employees of the Office of Administrative Affairs facilitate the academic and research mission of the institution by providing support services to faculty, staff, students, visitors, alumni and friends of the university. The Vice President will serve each of these constituent groups, coordinating efforts to achieve the common vision of excellence at the university. The University of Florida is a comprehensive land-grant university recognized by the Association of American Universities, of which it is a member, as one of the nation’s leading institutions in the areas of graduate education and research. UF is one of the nation’s largest universities, enrolling 46,000 students annually. As one of the largest employers in North Central Florida, the university has an annual operating budget of $1.8 billion and is home to almost 12,000 faculty and staff members.

The Vice President for Administrative Affairs serves as the university’s chief fiscal and business officer with accounting or direct responsibility for all budgetary units, and also serves as the fiscal and business advisor to the President. Divisions reporting to the Vice President through the Associate Vice President and two Assistant Vice Presidents include: Business Services, Facilities Planning and Construction, Environmental Health and Safety, Finance and Accounting, Information Systems, Operations Analyst, Personnel Services, Physical Plant, Purchasing, Small Business and Vendor Diversity Relations, the Stephen C. O’Connell Center and the University Police Department.

Qualifications: The minimum state requirements are a master’s degree in an appropriate area of study and eight years of related experience or a bachelor’s degree and ten years of experience. Prior experience in an academic setting is strongly preferred. The successful candidate should possess strong organizational, financial management and human resource skills as well as significant managerial experience in a complex organization. We seek a leader who has demonstrated ability to represent the university at the state and national levels, who appreciates collaborative governance and who has the judgment and ability to make independent decisions.

Application Procedures: Send a cover letter, résumé and a list of three references to:

Jennifer Curtis, Personnel Services
University of Florida
PO Box 115002
Gainesville, FL 32611-3157
Fax: (352) 392-7094
Email: jen-curtis@ufl.edu

Foral review of applications will begin on March 1, 2001 and will continue until the position is filled. If an accommodation due to a disability is needed in order to apply for this position, please call (352) 392-4621 or TDD (352) 392-7734. AA/EEO.

search chairman Dr. Charles Frazier at:
(352) 392-1301 or fax (352) 392-8735.
The University of Minnesota is seeking an experienced leader for the position of Dean of the College of Continuing Education. The Dean is responsible for the University's continuing education programs including fiscal management, personnel management, academic oversight, coordination of administrative service and service units, coordination and implementation of strategic planning efforts, development of academic and institutional policy related to connecting the University's education programs to Minnesota's needs statewide. The successful candidate will be expected to exercise leadership in working with business, government and other educational providers in shaping and leading the extensive continuing education programs of the College.

The College of Continuing Education, a major educational outreach unit of the University of Minnesota, collaborates with the academic colleges in providing educational programs that are responsive to market needs. Its mission is to provide high-quality continuing education and lifelong learning opportunities for professional development, personal enrichment, career transitions, and academic growth. Based on the Twin Cities campus, in partnership with the University's other campuses at Crookston, Morris, Duluth and Rochester, the College serves over 75,000 learners annually through credit and non-credit educational programs.

Qualifications include: An advanced degree (an earned doctorate preferred) and academic preparation and experience in broad interdisciplinary programs. Demonstrated effectiveness in leading the development and delivery of market responsive programs based on sound business planning and collaborative development. An appreciation of effective design of new methodologies and technologies in the delivery of academic programs to non-traditional academic audiences or venues. Successful experience is creating an environment that sustains change, growth and risk taking. Demonstrated accomplishments in strategic planning, in forming successful partnerships with external organizations and other educational agencies, and in developing fiscal and human resources. Anticipated start date is July 1, 2001.

Review of applications begins February 5, 2001 and will continue until the position is filled. To apply, submit: 1) letter indicating interest in and qualifications for the position; 2) curriculum vitae; 3) description of commitment to diversity; 4) names, addresses and telephone numbers of three references. Applications are due to: College of Continuing Education, Search Office of Jill Luits, Office of the Associate Vice President for Outreach. 233 Peters Hall, 1404 Gortner Ave., St. Paul, MN 55108. A full position description available at www.umn.edu/chf/jobs.

The University of Minnesota is an equal opportunity educator and employer.

AA/EEO.
Women and Minorities are encouraged to apply.
Community Development of Campus Life invites applications for the position of Residence Hall Director – Latino Living Center. Community Development is committed to providing a residential experience of the highest quality for each of its residents. Paramount to achieving our mission are the advocacy of academic inquiry, student development, respect for the individual, and the development and promotion of just communities within our residence halls. We strive to provide a safe, comfortable, residential experience designed to educate, challenge and develop our students so they may be able to achieve an examined life.

Responsibilities: The Residence Hall Director of the Latino Living Center will have primary responsibility for coordinating outreach programs and services which serve the campus community through the Latino Living Center which houses approximately 60 students. S/he will be responsible for collaborating with students, the Latino Studies Program, COSEP Office and others at the university to ensure that quality program initiatives are fostered through the center. Provides individual assistance to Latino and non-Latino students to ensure their academic and personal success. Serves as a liaison between Arts and Sciences/Arts/Latino Studies Program and the Latino Living Center. In addition, s/he will provide supervision of 3 staff members, community and program development, administrative management, counselling, facilitation and support of faculty-student interaction.

Qualifications: Bachelor’s degree in Student Personnel/Higher Education or closely related field. Experience in staff supervision, program development, counselling, advising, policy enforcement, and working with the U.S. Latino/a community. Experience in residential administration, community development and supervision is essential. High-level visibility and commitment to student interaction is a must. This is a full-time, live-in, 12 month appointment.

Benefits: Include competitive salary and Cornell University endowed benefits such as TIAA-CREF/Fidelity pension plans, health care, furnished apartment, meals to support workplace interactions, and professional development opportunities.

To Apply: Submit letter of interest, resume, and names and telephone numbers of 3 references to Regina Duffey, Human Resources Manager, Campus Life, Cornell University, 2117 N. Balch, Ithaca, NY 14843-1401. Position will be open until the successful candidate is identified. We will be recruiting at the following conferences: National Association of Student Personnel Administrators, American College Personnel Association, and the O’Keeffe Placement Exchange. Visit the department’s web site at www.campsilife.cornell.edu.

Cornell University is an Affirmative Action/Equal Opportunity Employer and Educator.

Please list publications, but do not send copies at this time.

E-mail address: ryanj@tamug.tamu.edu
Telephone: (409) 740-4494

DARTMOUTH COLLEGE
FINANCIAL AID OFFICE

The Dartmouth College Financial Aid Office has openings for an Associate Director and an Assistant Director.

Qualifications: Associate Director: Bachelor's degree (advanced degree preferred) and 5-7 years of progressively responsible experience in financial aid administration and supervisory work; strong communication and writing skills; experience with and the ability to work in a team-based organizational structure; and familiarity with financial aid systems (BANNER). Assistant Director: Bachelor’s degree with 3-5 years of financial aid experience. Salary is competitive with experience, education, and skills.

Review of applications will begin in January and continue until the positions are filled. A cover letter clearly indicating the position desired, resume, and the names, addresses, and telephone numbers of three professional references should be sent to:

Financial Aid Office
6024 McNaught Hall
Dartmouth College
Hanover, NH 03755

Complete job descriptions are also available from the same address.

Dartmouth College, an equal opportunity employer, takes pride in its commitment to diversity within the student body, the faculty, and the staff and encourages applications from women and minority groups.
The College of Mount Saint Vincent, a private liberal arts college on the banks of the Hudson River, invites applications for three new positions funded by the U.S. Department of Education under Title V (Hispanic Serving Institutions). This grant in part funds the development of a Teacher-Learner Center to provide increasingly sophisticated training and support for faculty in the acquisition, development, and use of alternate teaching/learning strategies and multimedia instructional tools for our diverse student population.

**INSTRUCTIONAL DEVELOPMENT SPECIALIST**

Acts as the Director of the Teacher-Learner Center. Duties include developing and offering a faculty development training program to faculty each fall; developing and administering evaluation and assessment instruments; developing teaching strategy profiles for faculty; assisting the College in designing, selecting, and evaluating equipment for “smart classrooms.”

Qualifications include a doctoral degree with experience in college teaching and teaching training/staff development, curriculum development and technology integration. Experience working with college faculty and special needs students, including learning disabled and linguistically different learners preferred. Proficiency in cross-platform applications (Windows and Mac), discipline-specific instructional software, and the Internet preferred along with knowledge of multimedia, hypermedia, and telecommunications activities to support instruction.

This is a five-year, full-time, grant-funded position.

**INSTRUCTIONAL TECHNOLOGY SPECIALIST**

Assists the Director in offering the training program to faculty and assists faculty with integration of multimedia and computer-based technologies into course curricula. Helps assist College with the design of “smart classrooms” and selection and purchase of appropriate multimedia and computer hardware and software. Assists in the development of multimedia and multimedia applications.

Qualifications include a bachelor’s degree in educational technology (masters preferred). Candidate should have experience in developing multimedia systems, knowledge of computer hardware, software, and applications. Ability to work well with groups of people, particularly educators.

This is a five-year, half-time, grant-funded position.

**ADMINISTRATIVE ASSISTANT**

Assists the Project Director in the day-to-day tasks of the entire grant. Duties include grant follow-up and reporting; tracking of all expenditures; maintaining records; compiling all required documents; budget management; taking minutes of grant task force meetings

Qualifications include excellent computer skills, including all aspects of MS Office; excellent oral and written English language skills; ability to interact with college faculty and administrators. An associate degree is required; a bachelor’s degree preferred. Experience in a higher education setting a plus.

This is a five-year, half-time, grant-funded position.

Please submit letter of interest, current vitae, and names, addresses and phone numbers of three references to: Dr. Barbara Smukler, Dean for Academic Resources, College of Mount Saint Vincent, 6301 Riverdale Avenue, Riverdale, NY 10471. Review of applications will begin immediately. A May 1st starting date for all positions is anticipated.
**The University of TOLEDO**

**CURRICULUM & INSTRUCTION**

**Literacy Education**
Description: Open rank tenure/tenure track position in literacy education with a focus on early childhood literacy development, especially the teaching of phonics. Teaching undergraduate and graduate classes in literacy education; collaborate with colleagues and school personnel in teacher education program development; maintain an active research program; participate within the university, community, professional organizations, and assist in advising students.

Qualifications: An earned doctorate related to literacy education, evidence of successful teaching experience in K-8 schools, experience in university/school collaboration and evidence of active scholarship in literacy related fields.

**Mathematics Education**
Description: Tenure track Assistant/Associate/Professor of Mathematics Education. Teach undergraduate and graduate courses in elementary or middle grades mathematics curriculum and methods, mathematics concepts, and/or mathematics for the young child. Supervise student field experience. Advise graduate and undergraduate students. Develop and carry out an ongoing research program with external support.

**Social Studies 7-12**
Description: The College of Education is seeking a person with expertise in the area of social studies education, grades 7-12. Teaching responsibilities include undergraduate and graduate courses in the social studies curriculum and could include values education, urban education, and current issues. The position also involves supervising student teachers, and other field experiences, as well as advising graduate and undergraduate students. A productive line of scholarly research and development to include publications and grants acquisition is expected.

Qualifications: Earned doctorate in the field of social studies education or related field, and at least 3 years of teaching experience in secondary schools.

Application Information: Send a letter of application, current curriculum vita, three current letters of reference, and copies of all transcripts that include relevant coursework to: Sandy Chick, College of Education, University of Toledo, Toledo, OH 43606-3399.

Application Deadline: Applications will begin to be reviewed February 22, 2001.

The University of Toledo is located on a wooded 200-acre suburban campus. Local amenities include a nationally accredited, on-campus child care center; one of the nation’s top 10 art museums; an excellent symphony orchestra, and an outstanding metropolitan park system.

**Eastern College, a Christian college of the liberal arts and sciences, invites applications for the following faculty positions for the 2001-2002 academic year. In fulfilling its mission of “the whole Gospel for the whole world,” Eastern is dedicated to preparing undergraduate and graduate students for thoughtful lives of Christian faith and service. This multicultural community of Christian scholars embraces and promotes diversity among its faculty, students, staff, and administration. Located in suburban Philadelphia on a scenic, park-like campus, Eastern College is accessible to the educational and cultural resources of the major metropolitan centers of New York City, Baltimore and Washington, D.C.**

The Eastern College community seeks faculty who:
- Understand and support the Eastern College mission statement
- Are gifted teachers with a strong interest in student life
- Inspire students to follow Jesus Christ by modeling the integration of faith, life and learning
- Have the potential for making a significant contribution to their field of study
- Value collegiality, teamwork and service in a multicultural learning environment
- Are able to integrate disciplinary content with a Christian worldview

Generally, faculty duties include teaching four courses each semester, advising students during scheduled office hours, and participating in faculty meetings and working committees. Each position is full-time and tenure-track. Rank and salary are commensurate with experience.

The College invites applications for the following positions: 1) New Testament with competence in teaching Greek (Job # 0074), 2) Social Work (Job #0057), 3) Communications with focus in mass media and new technology (Job #0080), 4) Biology and Biokinetic Science with ability to teach anatomy and physiology with microbiology desirable (Job #0079), 5) Business positions with concentrations in leadership, finance, technology/ecommerce and international economic development (Job #0081), 6) Technology/ecommerce, and 0084-International Economic Development and 6) two positions in Education with competence in multicultural education (Job #0058) and educational administration (Job #0067). Details are available at www.eastern.edu or you may send a letter of application for a specific position, with a curriculum vitae, transcripts, and names, addresses and phone numbers of three professional references to:

Eastern College
Office of Human Resources
Attn: Faculty Job Search # ___

St. Davids, PA 19087-3696

Eastern College is an equal opportunity/affirmative action employer. Women and members of minority groups that are under-represented in academia are especially encouraged to apply.
FACULTY OPENINGS

Brookdale Community College is recognized for its focused commitment to its students and community. Brookdale provides a world of opportunities for study, learning and working experience, in the traditional classroom, via the Internet, through experiential learning opportunities, and by distance education courses. Brookdale has grown dynamically into an institution with limitless horizons, as it continues to meet the evolving needs of its students and its community. Located on 220 acres in central coastal New Jersey, the sprawling campus provides a pastoral setting, and is approximately 50 miles south of New York City and 70 miles northeast of Philadelphia.

The College invites applications for Faculty positions for September 2001. Brookdale is an innovative, comprehensive open admissions two-year college with an enrollment of 11,500 credit students (approximately 7,500 FTE). We seek colleagues who share our unequivocal commitment to quality instruction, collaborative relationships and who value service, diversity, innovation and technological literacy. These are full time, tenure track entry level positions.

COMPUTER SCIENCE
(Not: This position may be staffed at the Assistant Professor level.) Master’s degree in Computer Science or Master’s degree in another field with a BS degree in Computer Science or Mathematics or Engineering. Preferred knowledge of C, C++, Visual Basic, JAVA, Data Structures, Local Area Networks, Web Design and Microsoft Office suite.

COUNSELING (INSTRUCTOR)
Master’s degree in Counseling or closely related field required. Counselors employ a variety of individual/group counseling methods to provide a full range of professional counseling and advisement services. There is an increasing emphasis on planning and implementing innovative programmatic strategies and interventions to support student growth and development and facilitate academic success in today’s highly transitional and diverse educational environment. A highly flexible team orientation, facility with current technology applications in counseling, a collaborative organizational approach and an understanding of the diversity of today’s student population are essential. Some evening work and travel within Monmouth County may be required.

ENGINEERING TECHNOLOGY (Instructor)
Master’s degree in Electrical Engineering, Computer Science or related field with experience or certification in Cisco, A+ or other related technologies. Ability to teach a variety of courses in electronics, electrical engineering, router internetworking, or computer repair. Some background or experience in curriculum development in their fields would be as helpful as well. The Master’s degree requirement may be waived for a very strong candidate with a number of the relevant certifications and related experience.

INTERIOR DESIGN (Instructor)
Master’s degree in Interior Design or Bachelor’s degree in Interior Design with NCIDQ certification. Will consider Master’s degree in Architecture with undergraduate degree in Interior Design. Professional experience in Interior Design required. Courses to be taught include but are not limited to Interior Design Studies, Drafting, Textiles and Materials, Lighting, CAD, History of Furniture and Business Practices. Candidates invited for in-person interview will be requested to present a teaching demonstration and portfolio.

MATHEMATICS (Instructors)
Two positions available. Master’s degree in Mathematics or a closely related field with at least 21 graduate credits in mathematics. Familiarity with instructional technology (i.e., graphing calculators & appropriate computer software in mathematics). Use of a variety of teaching styles to work with a variety of learning styles. Curriculum development is an essential part of this position. Evening or early morning class will be part of the teaching load.

MUSIC (Instructor)
Master’s degree in Vocal Music or equivalent. Candidates should be comfortable in various performance styles including Broadway, Opera and Pop. Teaching and performance experience is preferred. Candidates must have sufficient piano skills to accompany singers in class.

SPEECH (Instructor)
Master’s degree in Speech Communication or equivalent required. Speech generalist with experience in teaching public speaking preferred. The ability to teach or design curriculum in additional speech communication interest areas is desirable. Teaching responsibilities include primarily courses in Public Speaking.

THEATER (Instructor)
Master’s degree or MFA degree in Theater is required. Individuals will teach four levels of acting, directing, theater appreciation and dramatic literature. Will have knowledge and experience in producing and directing major productions on a college or professional level. Will be responsible for supervision and selection of adjunct instructors and guest directors. Will also be in charge of theater curriculum.

WRITING (Instructors)
Four positions available. Master’s degree in English or English Education required. Knowledge of current English writing pedagogy, ability to teach a wide range of courses in English composition and research writing, proficiency in the use of computers for writing and teaching writing. Knowledge or experience in curriculum design and assessment is preferred.

Additional Preferences: Candidates should have familiarity with current technological advances related to the discipline. Positions may require participation in community-based activities. Candidates invited for an in-person interview may be required to present a teaching demonstration.

Compensation: Annual salary range for Instructor level for September 2001 is currently under negotiation. (Salary range for 9/1/00 - 8/30/01 was $33,096-$38,060.) Positions are entry level and salary is commensurate with qualifications and experience within the identified range.

The only position that may be staffed at the Assistant Professor level is the noted Computer Science position. Faculty members teaching extra courses during the academic year and in the summer receive additional compensation.

APPLICATION PROCESS: Applicants interested in any of above positions should submit letter of application (indicating desired position), curriculum vitae, unofficial copy of graduate transcripts and three letters of recommendation to:

Brookdale Community College
Human Resources Department
765 Newman Springs Road • Lincroft, NJ 07738

Visit our website: http://www.brookdale.cc.nj.us

Brookdale Community College is an Equal Opportunity/Affirmative Action Employer and its staffing process is pursued through an unwavering commitment to diversity, not only as a compliance responsibility, but as an active conscious effort to build and develop diversity within the faculty and staff.

FACULTY POSITIONS

The University of La Verne is an independent, nonsectarian institution of higher education founded more than 100 years ago that offers a strong liberal arts curriculum for its undergraduate students. The University has developed graduate and undergraduate programs at a variety of sites in California, Alaska, and Greece. As a result of a diverse student body, the University has been designated by the Department of Education as a minority- and Hispanic-serving institution and we are currently a member of the Hispanic Association of Colleges and Universities. We are actively seeking candidates who have experience and skills in creative teaching approaches with such a diverse population.

The University of La Verne anticipates the following tenure-track positions for Fall, 2001:

- School of Business and Global Studies: This rapidly growing School is seeking two tenure-track positions at the Assistant/Associate level to augment its full faculty in the areas of finance and marketing. The successful candidate will teach undergraduate and graduate courses in their area of expertise.

- Education Department: This is a 12-month tenure-track position at the assistant/associate level. The responsibilities include teaching courses and advising students in the Teacher Education Program as well as committee work, supervising student teachers, and other duties as required.

- The History & Political Science Department: This is a tenure-track position in the areas of Political Theory and Public Law at the Assistant Professor level. Responsibilities include teaching courses in Classical Political Philosophy, Modern Political Theory, Constitutional Law and Contemporary Legal Issues.

- Public Administration Department: This is a tenure-track position at the Assistant/Associate level in the School of Organizational Management. The successful candidate will have demonstrated strong background in the theories of public administration and possess capabilities in the following areas: 1) Administrative/ Organizational Behavior; 2) IGR/Regionalism/ Community Development/Community Building; 3) Non-Profit Management; or 4) Qualitative or Quantitative Research Methods.

For more information about these positions and the required qualifications, please see our Internet address: Jobs@ulv.edu.

For all positions, the hiring rate is commensurate with experience, degrees, and internal equity. A comprehensive benefits plan includes immediate free tuition for employee to attend the university. The spouse and dependent children receive discounted tuition. The university contributes an additional 10% of employee's pay to supplement the employee's 5% contribution, into the TIAA-CREF retirement plan. Interested candidates should send a curriculum vitae, a cover letter, and the names and telephone numbers of three professional references to: Director, Human Resources Department, University of La Verne, 1950 Third Street, La Verne, CA 91750 or you may FAX your application materials to (909) 392-9508 or use our Internet address.
Pratt Institute invites applications for the following tenure-track Chairperson and faculty positions available Fall semester 2001. Please submit c.v., cover letter and the names and addresses of three references as indicated.

**CHAIRPERSONS**
Selected candidates will recruit students and faculty, develop curriculum, advise students, teach, develop and monitor departmental budgets, serve on committees and represent their departments within the Institute and their fields. These 12 month per year administrative appointments are tenure-track and carry concurrent full-time faculty rank and status.

- **COMPUTER GRAPHICS AND INTERACTIVE MEDIA:** The School of Art and Design seeks an active artist/designer and course-style leader to guide the continued growth of the department. We require a terminal degree or its equivalent in computer graphics, interactive media or a related discipline; administrative experience and management standing in the field. Refer to: Chairperson Search Committee, Dean’s Office, School of Art & Design, Main 420, by March 15, 2001.

**Dean of Admissions**

Northeastern University, a major private urban research university founded in 1898, known for its professional education, liberal arts and sciences and cooperative education programs, invites nominations and applications for the position of Dean of Admissions. Located in Boston, the University enrolls approximately 19,000 full and part-time undergraduate and 4,500 graduate and professional students in eight schools.

Responsibilities: Reporting to the Vice President for Enrollment Management, the Dean of Admissions will:

- Provide leadership in the development and execution of a comprehensive and sophisticated admissions program that enrolls a talented class representing excellence and diversity.
- Provide direct supervision for the staff, budget, and daily operations of the Admissions program creating a collaborative team environment.
- Serve as a member of the Vice President’s leadership team, with critical involvement in the planning of the enrollment effort.
- Work with the schools and colleges throughout the admissions process to ensure the smooth enrollment of the incoming class.
- Work closely with the Director of Financial Aid to create a scholarship and aid strategy for new students and to facilitate the delivery of Financial Aid.
- Manage research data for the Admissions operation, including the development of tracking mechanisms for prospects, applicants, and matriculants.
- Develop communication vehicles which share progress with a broad range of university constituencies.
- Work collaboratively in developing a marketing strategy with the Office of University Relations.

Requirements: Candidates must have a successful track record as a leader in admissions with a sophisticated understanding of enrollment planning and admissions strategies, including market research, admissions recruitment, financial aid, and student information systems. The position requires strategic thinking and planning skills, superb organizational and supervisory abilities, strong written, oral, and interpersonal communication skills, and the ability to work collaboratively with faculty and staff at all levels in a complex diverse environment. An advanced degree is preferred.

Please send resume and cover letter by January 26 to: Amy Dalrymple, Manager of Operations and Administration, Office of Enrollment Management, 137 Richards Hall, Northeastern University, Boston, MA 02115. The position will remain available until a final candidate is selected. Please contact Margot Lanning at Lanning & Associates at 781-237-1754 or lanning@mediane.net for further information.

Northeastern is an Equal Opportunity/Affirmative Action, Title IX Employer.

The Board of Trustees for the El Paso County Community College District invites qualified candidates for the position of:

**PRESIDENT**

**THE COLLEGE AND COMMUNITY**

In 1969, the citizens of El Paso County established the El Paso County Community College District, which opened its doors in 1971. The College has become a very dynamic and innovative educational institution, with five campuses and over 30 community locations, serving approximately 28,500 students each semester. The College serves a very diverse population and is truly a multi-cultural institution. The city of El Paso, located in the heart of the sunbelt, is a flourishing west Texas metropolis of over 700,000 people. Across the Rio Grande River lies its sister city of Juarez, Mexico. The warm, dry climate, multi-cultural heritage, and diverse business environment have made El Paso one of the fastest growing and the 17th largest city in the United States.

**QUALIFICATIONS**
The El Paso County Community College District seeks a College President who is an educational leader, exemplifying honesty, integrity, credibility, accountability, and personal responsibility with sensitivity, friendliness, and is highly visible within the institution and the community. The successful candidate must be committed to, the college's mission and educational goals, academic excellence with dedication and sensitivity to the teaching/learning process; and, shared governance with a participatory, collaborative management style which involves students, faculty and staff at all levels.

**APPLICATION MATERIALS**

- Master's Degree from an accredited institution required, an earned doctorate highly desired.
- Demonstrated successful senior-level administrative experience in a complex organizational setting.
- Successful teaching experience desired.
- Demonstrated commitment to the mission of a comprehensive, multi-sited community college that uses innovation to deliver both traditional and technology-based instruction in liberal arts, occupational education, lifelong learning, and basic skills studies in a culturally diverse region.
- Bilingual/bi-literate ability in English and Spanish is desired.

**COMPENSATION**
Salary, benefits and length of contract and other terms and conditions of employment will be competitive and are negotiable.

**BEGINNING DATE**
Employment is expected to commence by September 1, 2001 or upon a mutually agreed date.

**APPLICATION MATERIALS MUST BE RECEIVED OR POSTMARKED NO LATER THAN MARCH 15, 2001.**

To obtain an application, please contact:

El Paso County Community College District Personnel Service Department
Attn: Presidential Search c/o Dunbar, Arrendale, Crowley & Hegeman LLP 1700 North Stanton Street El Paso, TX 79902 (915) 834-6016/6100 TDD (915) 834-6064

THE EL PASO COUNTY COMMUNITY COLLEGE DISTRICT IS AN EQUAL OPPORTUNITY EMPLOYER AND EDUCATOR.

---

Northwestern University
Broward Community College (BCC) is a large, multi-campus urban institution in Broward County located in Southeast Florida. Founded in 1959 as the first public higher education institution in the county, Broward Community College functions as the principal provider of undergraduate higher education for the residents of Broward County. Through a wide variety of degree and certificate programs and continuing education courses, the college attracts a great diversity of students, including individuals planning to complete a bachelor's degree program, people seeking to acquire job-entry skills, employees desiring to upgrade skills for promotion or career change, and individuals seeking education for their personal enrichment. In addition, the college is also a source of cultural enrichment; a resource for community development, business, and industry; an avenue for continued skill upgrading and enhancement and retraining. As a public comprehensive community college, the college serves well its role as a significant segment of America's higher education effort.

**FACULTY POSITIONS**

BCC is seeking candidates to fill tenure-track positions. These positions are for a 163-day contract, and most will begin in Fall, 2001. Minimum salaries are $30,882 (Master's degree with 18 graduate semester hours in discipline); $36,441 (Doctorate degree with 24 graduate semester hours in discipline).

**Aviation Maintenance Faculty, #233**
Bachelor's degree and FAA Airframe and Powerplant certificate. Experience in Aviation Maintenance field and teaching required. Will be required to teach on the evening shift of 6:00 PM to 11:15 PM. Position begins May, 2001.

**Biology Instructor, #990**
Master's degree with eighteen graduate semester hours in field; to include microbiology.

**College Preparatory English Instructor, #462**
Bachelor's degree in English with experience teaching grammar and writing. Experience in multimedia and/or computer assisted instruction. If the candidate does not have a Master's with eighteen graduate hours in field, he or she must be willing to complete it within three years of hire.

**College Prep Mathematics Instructor, #254**
Bachelor's degree in Math with teaching experience; Master's degree preferred. Applicant will teach college preparatory Mathematics, with option of college-level Mathematics for supplemental pay. Applicant must be willing and able to incorporate technology in the classroom, and must be open to new teaching strategies to enhance student success. Must be willing to work the evenings for part of the teaching load.

**Computer Science Instructor, #207 & #268**
Master's degree with eighteen graduate hours in Computer Science or a closely related discipline. Certification to teach Oracle (Application Developer and/or DBA), Sun Java Developer, CIW (Site designer, Site administrator, and/or Enterprise Developer), Microsoft (MCSD and/or MCSE), Cisco (CCNP), Novell (CNE), and/or A+ courses. Applicants who hold a desired certification(s), but a lesser academic degree, will be considered.

**Computers Science Instructor, #992 & #993**
Master's degree with eighteen graduate hours in Computer Science or related discipline. Knowledge of Microsoft's visual development tools, networks, data communications, web technology, Java, Operating System (Windows, Unix, etc), and database systems/administration using Oracle, Delphi, Object Oriented Programming. Certification to teach the latest Microsoft courses (MCSE and/or MCSD) highly desirable. Knowledge of e-commerce a definite plus. Consideration will be given to applicants who do not possess all of the above programming skills, but must demonstrate an eagerness to learn new programming skills as technology evolves.

**Education/ Psychology Instructor, #986**
Master's degree with eighteen graduate semester hours in Education and eighteen graduate semester hours in Psychology.

**Education/ Social Science Instructor, #427**
Master's degree with eighteen graduate semester hours in Education and eighteen graduate semester hours in Geography, Psychology, or Sociology.

**English Instructor, #150 & #157**
Master's degree with eighteen graduate hours in field. Experience teaching college prep English, college composition and introductory Literature courses or Professional and Technical Writing. Experience in multi-media applications and/or computer instruction.

**English Instructor, #204**
Master's degree in English, literature, or related field and teaching experience at the developmental/college - preparatory level. Demonstrated expertise in and commitment to developmental/college-preparatory writing preferred. The individual filling this position should look forward to teaching mostly college preparatory writing courses.

**ESL Instructor, #988**
Master's degree with at least eighteen graduate credit hours in TESOL and a minimum of three years community college teaching experience desired. Some administrative experience desirable for ESL Program Coordinator. Some evening and Saturday hours may be required.

**Hospitality/ Tourism Instructor, #366**
Master's degree, preferably in Hospitality or Tourism/Travel. Experience in industry is required.

**Reading Instructor, #994**
Master's degree with eighteen graduate semester hours in Reading and/or Reading Education. Three years college community college teaching experience in College Preparatory Reading, College Level Reading, and/or ESL Reading required.

**Religion Instructor, #310**
Master's degree with eighteen graduate hours and experience teaching in the discipline of religion. Doctoral degree preferred. Should possess broad competency in world religions, the various approaches to the study of religion, and the ability to take the initiative to create and teach courses in Religion under the special topics designation.

**Spanish Instructor, #059**
Master's degree in Spanish or closely related field. Proficiency in Spanish and English; previous post-secondary teaching experience required. Demonstrated excellence in community college teaching; basic proficiency in a third language (French) is preferred.

**Speech Instructor, #1008**
Master's degree in Speech or Communication with a minimum of eighteen graduate hours in Speech required. Preference given to candidates with experience in teaching diverse students and who possess multi-disciplinary experience and/or credentials in the areas of Speech and Radio/Television.

**ADMINISTRATIVE POSITIONS**

Salaries are based upon qualifications and experience.

**Vice President of Academic Affairs, #063**
Under the general direction of the President, serves as the chief academic officer providing college-wide administrative direction for the academic programs. Included are the college transfer program, international education, educational technology, distance learning, developmental education, and the honors program. The Vice President is integrally involved in developing and maintaining close relationships with the college's university, business and secondary school partners, ATEC college liaison for instructional programs on the local, state and national basis. Recommends long and short range goals consistent with the mission and philosophy of the college.

The successful candidate will possess a doctorate degree and have substantial administrative experience at the Dean's level or higher. Must have a demonstrated commitment to high standards in student learning and faculty development.

**Aviation Institute Director, #033**
The Aviation Director oversees A.S. programs for aircraft technicians, pilots, aviation administrators and airport operations agents; manages the Institute's budget; hires and supervises faculty and staff; and works with industry partners to ensure the growth of Institute programs.

**Dean of Business Affairs, #753**
Reporting to the Provost, this position oversees the preparation of the campus budget, directs overall operations of safety/security, physical plant, cashier's office, child care center, and contract services, and serves as main campus contact for all college wide departments (Human Resources, Finance and Information Technology). The successful candidate will coordinate construction, renovation, remodeling and maintenance with ongoing campus operations and develop specifications for Requests for Proposals and/or bids for Campus.

**Dean of Business Affairs, #753**
Master's degree with a concentration in business or a directly related field, along with at least five years business/managerial experience, preferably in a college setting. Reporting to the campus Provost, the successful candidate will be responsible for the development and maintenance of the campus budget, directing and coordinating physical plant operations including campus security, facilities, maintenance, grounds and custodial services.

**Natural Sciences and Wellness Department Head, #212**
Reporting to the Dean of Academic Affairs this position is responsible for the overall operation of the instructional department in accordance with College policies, procedures, and contractual agreements. The candidate will develop faculty schedules, supervise the activities of program coordinators, prepare and manage the budget, establish and implement departmental goals, and develop and revise curricula for the department.
Master's degree with eighteen graduate semester hours in Biological, Physical or Environmental Sciences or Wellness; or a related discipline and four years of experience in education, instruction, and administration or a related area. Curriculum development and grant writing experience desired.

**Science Department Head, #914**
Reporting to the Dean of Academic Affairs this position is responsible for the overall operation of the instructional department in accordance with College policies, procedures, and contractual agreements. This includes matters relating to personnel, students, scheduling, curriculum implementation, instruction, and all financial considerations relating to the department.

Master's degree with eighteen graduate semester hours in a science discipline offered by the Department and three years full time post secondary teaching experience.

Preferred qualifications include an earned doctorate with eighteen graduate semester hours in a physical science and evidence of successful administrative experience in an educational setting.

**Director of Instructional Design, #911**
Reporting to the Associate Vice President of Instructional Technologies, the candidate will develop and implement comprehensive faculty development program to encourage the thoughtful application of technology in the classroom and on the web. The person will also guide faculty in the design, redesign, and development of course goals, content and instructional strategies and activities for web enhanced and fully on-line courses.

Master's degree and three years experience, or Bachelor's degree and five years of experience integrating technology into teaching/learning process. Demonstrated knowledge of multimedia instructional technologies (especially the web), distance education, and instructional design and assessment methodologies. Demonstrated ability to design, create and deliver instructional materials using appropriate development tools, and to train and lead faculty in these endeavors. Successful candidates must have strong project management and written/verbal communication skills. Higher education teaching experience is desirable.

**Director of Learning Technologies, #953**
BCC announces an opening for the Director of Learning Technologies, a new position created to assist and support faculty integrating technology into their teaching. The job requires the integration of high technology and teaching skills, and the ability to relate to the needs of college faculty that are experimenting with and using technology. This person must have advanced technology skills, especially in web courseware support and web development, but must also be able to teach and lead faculty with varying experience in technology. As such, this person is a colleague, a consultant and a technologist. The position calls for exceptionally well-developed communications skills and the ability to assist in a way that is not intimidating, but encouraging.

Master's degree in Computer Science, Information Systems, Educational Technology or related field and three years' experience, or Bachelor's degree and five years' experience, implementing technology initiatives, including web site development, multimedia authoring, technology evaluation and selection, and technology training. Demonstrated ability to use contemporary web authoring tools, imaging software and course management tools is required. Teaching or corporate training experience is desirable.

**Continuing Education Program Developer, #1837**
The position is responsible for the development, implementation and evaluation of selected non-credit offerings throughout Broward County. This position reports to the Director of Continuing Education and will be expected to represent the College in the community and at college meetings and functions.

Bachelor's degree and three years experience in related field. Experience and knowledge in the development of courses and programs required and/or desired by the residents of Broward County is essential.

In order to be considered, interested candidates are requested to submit a cover letter, detailed resume, a list of references and transcripts of academic transcripts as well as a completed BCC employment application by 01/31/2001, unless another date is indicated. Please forward to:

GOVERNORS STATE UNIVERSITY

MASTER OF SOCIAL WORK FACULTY

Governors State University (GSU) invites nominations and applications for two (2) tenure-track faculty positions for our new and developing MSW Program. This is an opportunity to join a new team of graduate faculty in the development of the program. We currently have four (4) full-time tenure-track faculty and strong administrative support for the development of the program. We are seeking experienced social work educators whose role is dedicated to preparing advanced social work students to work effectively with vulnerable and at-risk populations. The positions involve teaching at both the foundation and advanced level curriculum. Currently, we offer two concentrations: Child and Family Services and Health and Mental Health. Student advisement and work on CSWE accreditation writing, as well as participation in both college and university activities, are also required.

POSITION I

This position requires an individual who has substantive practice experience with children and families in either the public or private sector and who can assume leadership for the development of generalist practice courses on the foundation level and advanced practice in the Child and Family Services Concentration. Minimum Qualifications: MSW from a CSWE accredited program, doctorate preferred; seven or more years post MSW practice experience with children and families; preference will be given to candidates who have teaching experience in a graduate social work education program; an understanding, sensitivity and commitment to diversity.

POSITION II

We are seeking candidates who have full-time teaching experience in a graduate social work education program accredited by the Council on Social Work Education and who have knowledge of and experience in the accreditation process. Minimum Qualifications: MSW from a CSWE accredited program, doctorate preferred; ABD candidates will be considered; demonstrated knowledge and experience in the accreditation process; five or more years of teaching experience at least two curriculum areas in a graduate social work education program; demonstrated leadership in the development and revision of this curriculum for accreditation purposes; demonstrated leadership abilities in the development of curriculum at the graduate level in the writing of a self-study, an understanding, sensitivity and commitment to diversity.

APPLICATION AND NOMINATION PROCEDURE

The position is available August 2001. The review of applications will begin immediately and will continue until the position is filled. To apply, interested candidates should send a letter of application addressing qualifications and desired position; a current vita/resume, and the names, addresses and appropriate contact information of three personal references to: Wanda Branch, Ed.D., MSW Faculty Search Committee, College of Health Professions, Governors State University, University Park, IL 60466. PH: (708) 534-3954.

If you would like more information about the University, please visit our Web site at: www.govst.edu

Sullivan County Community College is seeking to fill the following positions:

DEAN OF ENROLLMENT MANAGEMENT AND STUDENT DEVELOPMENT

Reporting to the Vice President of Academic and Student Affairs, the Dean of Enrollment Management and Student Development is responsible for providing leadership for counseling, student activities, health services, student residence life and housing, admissions, enrollment management, registration, and job services. Qualifications: Master’s degree in counseling, developmental education, student personnel administration, or related discipline; doctorate preferred. Five years of higher education experience, three years of which should be in the department chair/director level or above. An understanding of the need to integrate services with the academic components of a student’s experience, ability to work and communicate with students from a variety of backgrounds. Excellent interpersonal communication, supervisory, planning, budget management, human resources, conflict resolution, student life services and enrollment management skills. Duties and responsibilities: Supervises student personnel staff and activities, chairs the committee on academic standards related to students and special programs. Fosters collaborative relationships among the faculty, staff, students and parents, directs activities related to student recruitment and retention. Promotes cultural and racial awareness and diversity, provides input into the development of an enrollment management plan and provides leadership in the implementation, and in the development of plans for the College’s first student residence facility.

DIRECTOR OF ADMISSIONS AND REGISTRATION SERVICES

Individual must have a minimum of 3 years of recent experience working in admissions, registration and enrollment management. The ideal candidate must clearly demonstrate an understanding of the entire enrollment process and be able to work with various student and academic affairs areas of the college. Additionally the individual must have excellent computer and communication skills. The director is expected to supervise the daily operations of admission and registration services, which includes both professional staff and support staff. A Master’s degree is required. Salary range: $50,000.00 - $55,000.00

Send cover letter, resume and names, addresses and phone numbers of five (5) references to: Office of Human Resources, Sullivan County Community College, 112 College Road, Loch Sheldrake, NY 12759-5151 or Email to ciperce@sullivan.suny.edu. Resumes will be accepted until positions are filled. Minorities, handicapped and veterans are encouraged to apply. Affirmative Action/Equal Opportunity College.
A post-baccalaureate degree from an accredited college or university and professional credentials in architecture, urban planning, or civil engineering are highly preferred. In addition to having sensitivity to and experience with design practices of universities or comparable institutions, candidates must be able document their ability to manage large complex facilities, effectively lead a diverse, professional staff, and competently administrate university funds. Successful candidates must be effective communicators and able to work successfully across all levels of the university, demonstrating collaborative decision-making skills.

Letters of Application should be sent to:

Morris & Berger
201 South Lake Avenue, Suite 700
Pasadena, California 91101
Fax: (626) 795-6330, E-mail: mb@morrisberger.com

A current resume should be included with the letter of application. Refer to Job # 1492. Preferred dates for receipt of application is February 1, 2001. Starting salary for this position will be competitive and commensurate with the candidate’s experience. The position includes a broad and attractive benefits package.

The University of California, Santa Barbara is an Equal Opportunity and Affirmative Action Employer and Educator.

**DEAN COLLEGE OF ENGINEERING AND COMPUTER SCIENCE**

California State University, Fullerton (CSUF) seeks nominations and applications for the position of Dean of the College of Engineering and Computer Science. A comprehensive baccalaureate and masters degree granting institution, enrolling over 28,000 students, is one of the 23 campuses of the California State University System. CSUF is located in Southern California which, among the US metropolitan areas, has one of the largest concentrations of high-tech industries. Rapid recent growth in these industries has resulted in the region being ranked fourth in the nation in job growth of new businesses. The College, one of seven at CSUF, currently offers baccalaureate and masters degrees in the departments of Computer Science, Electrical, Mechanical, Civil and Environmental Engineering, and General Engineering Program. By blending theory and practice, the College provides solid foundations to prepare its students for success in exciting high-tech engineering and computer science careers. This year the College has 1251 undergraduate students, 322 graduate students, and 43 full time faculty.

**Responsibilities:** The Dean provides leadership in planning, faculty recruitment and professional development, college and community relations, curricular and fiscal management, external fund raising, and accreditation. The Dean will lead the College in establishing and promoting a shared vision that responds to the changing demands of society and the high-tech marketplace. The Dean will motivate faculty, students and staff to aspire to that vision, guide long-range planning efforts, and develop new relationships with business and industry, government, leader schools, and the community. A commitment to affirmative action is essential.

**Qualifications:** Ph.D. or equivalent degree in Computer Science, Engineering or related discipline, progressively responsible administrative experience, academic credentials appropriate for appointment at the rank of full professor in a department of the College and demonstrated excellence through a combination of senior rank, tenure, publications, research, and relevant experience working with industry are required. The successful candidate should also possess the requisite knowledge in the emerging fields of engineering and computer science to lead the College's efforts in pursuing various growth strategies in these areas. The capability and willingness to lead by personal example with a commitment to collaborative and collegial decision-making is essential. A proven record of success in securing private and governmental support is desirable.

**Salary:** The effective date of appointment is summer 2001 but before the beginning of the fall semester August 17, 2001. The salary is competitive and an excellent benefits package is included.

Nominations are welcome and encouraged. Screening of applications will begin on March 15, 2001 and will continue until the position is filled. Applications must include a cover letter stating qualifications, interest, and vision statement describing the applicant's approach to leading a College of Engineering and Computer Science in a fast growing high tech environment. A recent Curriculum Vitae, and names, addresses, telephone numbers, and e-mail addresses of at least four references are required.

Send all materials to:

Dr. Kolf Jayewar, Chair Search Committee for Dean ECS
Office of the Vice President, Academic Affairs
California State University, Fullerton
Fullerton, CA 92834-9400

CSUF is an Affirmative/Average Opportunity/Title II/ADA Employer

WESTERN CONNECTICUT STATE UNIVERSITY
HEALTH CARE ADMINISTRATION POSITION
ANTICIPATED FACULTY POSITION

Search Reopened

WCSU has available a tenure-track position in Health Care Administration beginning August 2001. A twelve-hour per semester teaching load will be shared between the Master of Health Administration program and the Bachelor of Business Administration program. Primary emphasis is on teaching; scholarly productivity and service to the university are expected. The Management Department includes 8 full-time faculty, plus adjunct instructors, provides a BBA Management major, an MHA degree, and supports an MBA program. The position will be filled at the appropriate rank depending on the qualifications of the final candidate.

Qualifications: An earned doctorate in Health Care Administration or a related field; ABDs near completion will be considered. Demonstrated teaching and Health Care Management experience are preferred. Evidence of research productivity is required. Teaching assignments may include Managing Health Service Organizations, Health Services Quality, and Health Services Marketing in the MBA program as well as courses in the BBA program. Also important are a strong interest in interactions with health care organizations as well as potential development into the role of MHA coordinator.

Application Process: Interested applicants should Email, send, or fax a letter of application, a current vita, three letters of reference, unofficial transcripts to: Dr. Stanley Bazan, Chair, Search Committee, Bazans@wesu.ctstateu.edu, Management Department, Western Connecticut State University, 181 White Street Danbury, CT 06810 (203) 837-8527 Fax.

Prior candidate need not reapply and will continue to be considered as applicants. The application deadline is February 16, 2001.

WESTERN CONNECTICUT STATE UNIVERSITY
LIBRARIAN - ARCHIVES AND SPECIAL COLLECTIONS LIBRARIAN

Responsibilities include the selection, preservation, organization, and providing access to the University Archives and other historical material including local history collections relating to Danbury, CT and its environment; developing and implementing the policies of the Archives/Special Collections; developing and maintaining the library's Archives/Special Collections Website; supervising Archives/Special collections staff; and participating fully in the general responsibilities of the library faculty, including serving as liaison to one or more academic departments and staffing the reference desk (includes some evenings and weekends).

Candidates must have an MLS from an ALA accredited program; successful experience working with special and/or archival collections in an academic environment, including manuscript materials, archival records, and historical collections in a variety of formats such as paper, microform, photographic, video, and digital; experience with online cataloging using MARC-AMC format; and working knowledge of conservation/preservation techniques. Evidence of excellent interpersonal, oral, and writing skills; self-motivation and ability to work independently; and successful public service and outreach activities is also required. It is preferred that candidates have supervisory experience; formal education in archival management/techniques; and experience with MS Office and Web applications. Minimum salary: $40,886.

Western Connecticut State University is seeking qualified applicants for a tenure-track position. Send letter of application and resume to Vijay Nair, Chair, Library Faculty Search Committee, Ruth Haus Library, WCSU, 181 White St., Danbury, CT 06810. Applications received before February 15, 2001 will receive first consideration.

WCSU is an AA/EOE Educator/Employer

WESTERN CONNECTICUT STATE UNIVERSITY
MANAGEMENT DEPARTMENT
ANTICIPATED FACULTY POSITIONS

Search Reopened

Two tenure-track positions anticipated beginning August 2001. A twelve-hour per semester teaching load will be carried in the Bachelor of Business Administration program. Faculty will teach primarily in the Management program in Waterbury but also may be required to teach at the Danbury campus. Primary emphasis is on teaching; scholarly productivity and service to the university are expected. The Management Department includes 8 full-time faculty, plus adjunct instructors, provides a BBA Management major, an MHA degree, and supports an MBA program. Positions will be filled at the appropriate rank depending on the qualifications of the final candidate. Prior candidate need not reapply and will continue to be considered as applicants.

Operations Management: Qualifications include an appropriate terminal degree in Operations Management or a related field; ABDs near completion will be considered. Other graduate degrees coupled with professional experience in Operations Management that is relevant, BBA Management major, an MHA degree, and supports an MBA program. The position will be filled at the appropriate rank depending on the qualifications of the final candidate. Prior candidate need not reapply and will continue to be considered as applicants.

Human Resource Management or General Management: Qualifications include an appropriate terminal degree in Human Resource Management or General Management or a related field; ABDs near completion will be considered. Other graduate degrees coupled with professional experience in Human Resources or General Management that is relevant, BBA Management major, an MHA degree, and supports an MBA program. The position will be filled at the appropriate rank depending on the qualifications of the final candidate. Prior candidate need not reapply and will continue to be considered as applicants.

Application Process: Interested applicants (specify which position you are applying for) should Email, send, or fax a letter of application, a current vita, three letters of reference, unofficial transcripts to: Dr. Stanley Bazan, Chair, Search Committee, Bazans@wesu.ctstateu.edu, Management Department, Western Connecticut State University, 181 White Street Danbury, CT 06810 (203) 837-8527 Fax.

Application deadline is April 1, 2001.

EXECUTIVE DIRECTOR
OF ADMISSIONS

The University of New Hampshire is seeking an effective leader to guide the efforts of our Office of Undergraduate Admissions.

RESPONSIBILITIES: The Director, working with a strong and experienced team of professionals, will help to shape our outreach and interaction with a talented and increasingly diverse group of prospective students. The Director will hold overarching responsibility for enrollment, budget, and supervision of staff. The Director will direct the undergraduate admission review process. The Director will provide leadership, advise on the day-to-day management of the Office, and participate in the development and implementation of admissions policies and processes to meet the University's enrollment objectives. The University seeks an individual who can contribute to a collegial working environment with administrative colleagues, faculty members and students. Candidates must have a demonstrated commitment to fostering excellence and inclusiveness.

MINIMUM QUALIFICATIONS: Master's degree and at least seven years of relevant experience in college admissions, guidance, or a related field are required. The expectation is that the successful candidate will present a record of progressively responsible management positions with clear evidence of administrative excellence. Preferred qualifications include experience with schools in New Hampshire and New England, and a record of successful leadership in a selective college admissions environment, and a working knowledge of opportunities for the appropriate introduction of technology into the college admissions process.

Minimum starting date is negotiable through July 31, 2001.

Salary is commensurate with experience.

Send cover letter, resume and names, addresses, telephone numbers of 3 references to:

GOVERNORS STATE UNIVERSITY

DEAN OF THE COLLEGE OF HEALTH PROFESSIONS

Governors State University (GSU) is the only upper division university in the State of Illinois offering junior and senior-level courses leading to a bachelor’s or master’s degree. Governors State University, currently sending more than 6,000 learners to the greater Chicago area, aspires under its new President to become a premier teaching, student-centered university of the 21st Century. With the strong and active support of faculty, administrators, students, staff, and the community, Governors State University is poised for a dynamic new era in its accomplished history of serving a high percentage of non-traditional students since it opened in 1969. The University is now recruiting a senior-level educational leader who will join us in making the vision a reality.

The College of Health Professions houses eleven degree programs: Communication Disorders (undergraduate and graduate), Master of Social Work, Bachelor of Social Work, Master of Health Science in Addictions Studies, Health Administration (undergraduate and graduate), Nursing (undergraduate and graduate), Master of Occupational Therapy, and Master of Physical Therapy. The Dean is responsible for day-to-day operation of the College of Health Professions which includes two division chairpersons, 11 support staff, 37 tenure-track faculty, 13 full-time lecturers, and approximately 40 part-time faculty, teaching more than 500 graduate and undergraduate students. Qualifications: Earned doctorate degree; record of teaching, scholarship, and professional services sufficient to be considered as a tenured professor in one of the divisions in the College; record of successful involvement with academic and/or professional accreditation activities; minimum of four years of effective administrative experience at the level of division/departament chair, or above, in an institution of higher education; commitment to quality and excellence in education; record of strong leadership ability; experience with a faculty union environment in higher education; record of successful development and support of programs; success in fostering collegial relationships within the university and external community; record of promoting diversity among faculty, staff, and students; record of excellence in communication and human relations skills. The start date is July 1, 2001, or sooner, and a review of applications will begin January 2001. Please review the complete position description on the GSU website and send a letter of application addressing qualifications; a curriculum vita; and the names, addresses, and telephone numbers of five professional references to: Michael Worthington, Coordinator, Dean of College of Health Professions Search Committee, Office of the President, Governors State University, University Park, IL 60466.

Please see our website for more information about the university and a full position description: www.gvsu.edu

The Indiana University Libraries, Bloomington are seeking a creative and enthusiastic individual for the position of Multicultural Services Librarian within Undergraduate Library Services.

The Indiana University Libraries are one of the leading academic research libraries in North America, providing strong collections, quality service and instructional programs, and leadership in the application of information technologies. The university community includes approximately 92,000 students and 4,600 faculty on eight campuses. The IU Libraries consist of 20 libraries on the Bloomington campus, five libraries in Indianapolis, and a library at each of the six campuses across the state.

The IU Libraries are active members of regional and national associations and consortia, including the Committee on Institutional Cooperation, the Association of Research Libraries' SPARC project, Digital Library Federation, the Center for Research Libraries, and the Research Libraries Group.

Undergraduate Library Services (UGLS) provides services and collections that target the curriculum needs of IU's undergraduate students. During the coming year, the plan to renovate that promotes the use of advanced information technology, including multimedia equipment, the UGLS public services will become an Information Commons. This area will be a hub for library and complementary campus-partnership services—drawing users into an attractive, secure, and highly interconnected environment with help available for information and technical needs. The Information Commons will extend the concept of the traditional library to include complementary services that users demand in a large, centrally located facility such as the Main Library. The Information Commons will include over 200 individual and group workstations providing access to research databases, multimedia and productivity software, reference services, career information, and writing tutorial help.

RESPONSIBILITIES: Under the direction of the Head of Undergraduate Library Services, the librarian will develop outreach, educational and collection specific programs and activities to promote library services to students from different ethnic and cultural backgrounds on the IU-Bloomington campus. The librarian will serve as liaison to the Office of Academic Support and Diversity and its programs to promote equity and excellence such as the Minority Achieves Program/Minority and Science Scholarship Program, Groups Student Support Services Program, Upward Bound Program, and the Campus Cultural Centers. The librarian will play an active role in the UGLS instruction program and develop specialized user education opportunities for persons from different ethnic and cultural backgrounds. The position participates actively and fully in all programs of Undergraduate Library Services sharing responsibility for general reference service (including some night and weekend hours on a rotating basis), for orientation activities, development of web resources, and selection of UGLS materials. The librarian will advise collection managers regarding the collection needs of the multicultural community. The position will share in the planning, delivery and evaluation of UGLS services and collections.

QUALIFICATIONS: Required: An ALA-accredited master's degree or equivalent combination of education and experience; demonstrated experience in program planning and development; and in library public service and outreach; excellent oral and written communication skills and a demonstrated ability to effectively work with all elements of a diverse community. Ability to meet the requirements of a tenure-track appointment. Preferred: Demonstrated experience in bibliographic instruction; demonstrated familiarity with current trends and issues in information competency/critical thinking; experience with development of web-based resources; proficiency in a language relevant to this position.

SALARY AND BENEFITS: Salary and rank are negotiable and competitive dependent upon qualifications and experience. This is a tenure-track academic appointment that includes eligibility for sabbatical leave. Benefits include a university health care plan, TIAA/CREF retirement/annuity plan, group life insurance, and liberal vacation and sick leave.

TO APPLY: Send letter of application, professional vita, and the names, addresses, and phone numbers of four references to:

Indiana University is an affirmative action/equal opportunity employer.
Public discomfort with an ever-increasing percentage of the population that seeks identity through language—Spanish—continues. The “one nation, one language” banner cry is, however, without substance.

The Summer Institute of Linguistics’ *Ethnologue*, a language atlas, shows some 6,703 languages spoken throughout the world—1,000 in the Americas and 225 in Europe. The number far exceeds the number of sovereign nations.

“One nation, one language” is not a universal truth. It is not even true for Europe, with the smallest number of distinct languages.

What factors in U.S. history have led to the equation of nationhood and monolingualism?

Colonial America was linguistically diverse. Within the 13 colonies, French, Dutch, German, and Spanish were spoken, and many indigenous languages. This early diversity eventually gave way to English hegemony. Westward expansion increased contact with Spanish-speaking settlers living north of the Rio Grande. And sowed the seeds of conflict—a conflict that is a leitmotiv in Chicano literature in the 20th century: the loss of land and concomitant loss of language and cultural identity. The Mexican American has been reluctant to assimilate, both culturally and linguistically.

The continued use of Spanish by significant sectors of the Southwest and California populations several generations removed from their Mexican ancestors might explain in part the political attacks against Spanish in particular in the “English only” campaigns. The perseverance of the language is unerving to those who believe that “one nation, one language” is the norm. The Linguistic Society of America’s Statement on Language Rights notes that the majority of the world’s nations are bilingual if not multilingual, that the U.S. was the home of hundreds of languages prior to the arrival of the Europeans and of numerous immigrant languages other than English, many predating colonization by English speakers.

These points effectively counter arguments put forth by “English only” strategists. It is often forgotten that Spanish predates the arrival of English in the Americas by more than a century. And Spanish, like English, is truly a global language—spoken in the Americas, Europe, Africa, and the Pacific rim. *Ethnologue* ranks it second only to Mandarin Chinese with approximately 382 million speakers, followed by English with 322 million speakers.

In the U.S., Spanish is by far the most-spoken second language. In California, the number of English learners in kindergarten is 165,776. Of these, 141,181 (85%) are Spanish-speaking. It is essential to view Spanish in an appropriate perspective: as a global language with significant ties to the U.S. from the period of discovery to the end of the 20th century.

How does one explain, then, the deep-rooted antagonism toward the use of other languages? Former Senator Paul Simon of Illinois commented in *The Tongue-tied American* that the aversion to the use of other languages in public life is paradoxical, an “unusual, deep-seated phenomenon...,” but as a scholar of political science and public policy, he provides some explanations. To the west and east, the U.S. is bounded by oceans. The country to the north is also English-speaking and of similar background; the country to the south marks a clear divide between Anglo-America and the rest. The U.S., therefore, is a very insular country.

One can conclude that the U.S. is ill-equipped to deal with linguistic diversity. English predominates in its public life—education, the workplace, mass media, and artistic endeavor. It is clearly the vehicular language; however, in many parts of the U.S., Spanish is an important vernacular language—the language that predominates at the personal level among friends and family. This is really at the heart of the “English only” issue.

While federal, state, and local law can determine the language of instruction in schools, the language in which laws shall be written and promulgated, it cannot intervene at the level of personal communication. Separating public from personal interaction is not easy. In a brief interchange in Spanish with a retail employee who is a family friend an infringement of public space with the forbidden language? These are gray areas, but it is hoped that common sense, not litigiousness, will prevail.

References to diversity are ubiquitous in campaign rhetoric, public policy statements, institutional missions and goals. Bilingualism and multilingualism must be subserved as concomitant to diversity if the U.S. is to fulfill its motto: *E pluribus unum.*

QUINNIPICAC UNIVERSITY

Quinnipiac University is a private, ecclesiastical, non-sectarian institution located in Hamden, Connecticut, 90 minutes north of New York City and two hours from Boston. Quinnipiac has 250 full-time faculty and enrolls 4,500 full-time undergraduates and 2,000 graduate students in 50 undergraduate and 15 graduate programs of study in Business, Health Sciences, Law, Liberal Arts, and Communications. Quinnipiac consistently ranks among the top northern regional universities in U.S. News and World Report’s America’s Best Colleges.

FACULTY POSITIONS

All applicants should consult the University’s web site at www.quinnipiac.edu/services/jobs/default.asp to obtain more detailed job descriptions and important information such as required application material and application review dates. Unless otherwise specified, candidates for faculty positions must have a doctoral degree (Ph.D. or equivalent). However, outstanding ABD candidates will be considered for appointment at the Assistant Professor level. Such candidates must complete their degree programs within one year of their appointment.

COLLEGE OF LIBERAL ARTS

Assistant Professor of Sociology

The Department of Sociology, in Quinnipiac University’s College of Liberal Arts, invites applications for a tenure-track Assistant Professor position, beginning in Fall 2001. The successful candidate should have a Ph.D. in Sociology by the time of appointment and will be expected to teach courses from among the following areas: social problems, inequality, social control and deviance. Additionally, the candidate must show evidence of dynamic teaching as well as professional and scholarly activity in his/her area of specialization. The appointment will begin on a fast-growing department that is open to new teaching areas and current offers undergraduate majors in Sociology, Social Services, Gerontology, and Criminal Justice.

Assistant/Associate Professor of Psychology

This is a tenure-track position, effective Fall 2001, in addition to the position previously advertised. We invite applications from candidates with completed Ph.D.s in Psychology, who have a record of teaching excellence and a well-articulated, successful research agenda. The area of specialization is open. The successful candidate will have displayed a serious commitment to undergraduate education in the liberal arts tradition. Teaching will be in the person’s area of expertise, and in other courses as needed in this growing Department. The 11-member Department at Quinnipiac has over 300 majors.

Interactive Digital Design

We have two tenure-track positions in Interactive Digital Design starting Fall 2001. Rank is open. The successful candidates will form the basis for a new major at the University starting Fall 2001, and contribute to its growth within a Department of Computer Science and Digital Design. We are looking for generalists able to work effectively as team members in a multidisciplinary environment that involves Computer Science and Graphic Arts. The candidates must have solid teaching credentials, strong organizational skills, and demonstrated abilities with a wide range of software and hardware. Skills in interactive design and animation required; scripting and programming skills a plus. Master’s degree required; terminal degree in an appropriate relevant field preferred.

SCHOOL OF BUSINESS

Assistant/Associate Professor of Marketing

The Department of Marketing and Advertising in our AACSB accredited School of Business is seeking an Assistant or Associate Professor for a tenure-track faculty position. The position involves teaching courses in marketing, as well as teaching the marketing components of integrated business courses. Continuing scholarly research and service to the University are also required. Successful candidates must have a Ph.D. in Marketing and a record of excellence in teaching and research.

Computer Information Systems

The Department of Computer Information Systems is seeking candidates for a tenure-track position open to all ranks depending upon qualifications, starting in the Fall of 2001. ABD candidates will be considered for Assistant Professor positions. Teaching experience, industrial and/or consulting experience and publications in refereed journals are required for advanced rank. Specific industry experience or research in the areas of distributed processing, data communications, networks, client-server technology, object-oriented methodologies and languages such as Visual Basic, C++, JAVA and/or advanced multi-user operating system environments such as UNIX are highly desirable. A doctorate or ABD in Information Systems or related area is preferred. A person with outstanding credentials in the areas of scholarship and teaching, and who has established relationships with information technology organizations may qualify for the Ferencz Endowed Professorship which is available to support the Department’s acquisition of an outstanding faculty member.

Assistant/Associate Professor in International Business

The Department of International Business at the School of Business, Quinnipiac University, is inviting applications for a tenure-track position in International Business at the Assistant or Associate Professor level. The successful candidate should have a Ph.D. or DBA in international business related areas. We are looking for individuals in any one or combination of these areas: import and export operations and international marketing (preferably with experience and expertise in Global Electronic Commerce), global supply chain management (preferably with some experience in ISO certification issues), and International Human Resource Management. Preference will be given to candidates with international business experience and foreign language competence, and a willingness to interact with the business community.

SCHOOL OF COMMUNICATIONS

Assistant/Associate Professor Electronic Multimedia

The School of Communications is seeking a versatile individual with a broad set of theoretical and practical skills to join a new degree-granting program in Digital Media. He/She should have insight into the interrelationships between new media and society and a strong record of digital inter-platform work. The successful candidate should also have significant experience in the following: advanced web site design, interactive multimedia authoring, digital graphics and audio, and industry-standard software for electronic design and publishing. Teaching experience and a master’s degree are highly desirable. The successful candidate will teach graduate and undergraduate digital media classes.

SCHOOL OF HEALTH SCIENCES

Associate/Full Professor Adult Acute Care Nursing

The Department of Nursing invites applications for a 12-month tenure-track faculty position that is available starting July 2001. The position is for an Associate/Full Professor of Adult Acute Care Nursing. The Department of Nursing at Quinnipiac offers a generic baccalaureate, RN to BSN, and graduate programs in nursing. The baccalaureate program is accredited by the NLNAC and has preliminary approval by the CCNE. Responsibilities include didactic, campus lab and clinical teaching in courses dealing with adult acute care content, and coordination of an accredited BSN program for non-nursing college graduates (approval pending). Opportunity for graduate teaching exists. Qualifications include an earned doctorate in nursing or related field, proven teaching experience, certification as a clinical specialist in acute care/clinical care nursing, master’s preparation in nursing, current clinical experience, and licensure or eligibility for licensure in the State of Connecticut.

Assistant/Associate Professor Athletic Training Education Program

The ideal candidate will organize and oversee the clinical component and share teaching responsibilities in the Athletic Training/Sports Medicine program. He/She will also be responsible for advising students, participating in the University committees, and developing professional scholarship activities. Qualifications include a Ph.D. in Athletic Training/Sports Medicine, Kinesiology or Exercise Physiology (or related field), and a minimum of two years of athletic training experience. Clinical and academic experience relevant to the position of Assistant/Associate Professor and a current NATA/BOC Athletic Training certification are necessary. Knowledge of the CAAHEP accreditation process would be highly desirable. ABD will be considered. This full-time, 9.5-month, tenure-track position is available September 1, 2001 at the Assistant or Associate Professor rank, depending on experience and qualifications.

Visit our web site at: www.quinnipiac.edu

Quinnipiac University has a strong commitment to the principles and practices of diversity throughout the University community. Women, minorities and individuals with disabilities are invited and encouraged to consider this opportunity and to apply.

Aid Is Available, If You Know How to Find It

By Gustavo A. Mellander

For those of us who admit to being over 39, it is pleasant to realize how very much "going to college" has changed since we attended. In the past, one needed money, real money, to go to college. Oh, there were a few Horatio Alger types who worked their way through college, and some scholarships and fellowships existed as well.

But before Russia launched its Sputnik satellite in 1957, there was very little direct federal government assistance for education. Students or, more accurately, their parents, were on their own.

Financial Assistance

Much has changed since then. So much so that it is hard to think of any circumstance wherein a needy potential student can not receive financial assistance to go to college. Since the majority of Hispanics in this country have limited incomes, many qualify for assistance.

The Department of Education administers a variety of student financial aid programs, including grants, work-study, and loans. One doesn't have to pay back grants Work-study programs allow students to earn money while studying. Low-interest loans are also available. Research shows that Hispanics are reluctant to seek out loans. It might be wise to study the benefits of accepting loans before rejecting them.

State financial aid programs and private philanthropy should be explored as well. Check with high school counselors and with the college one plans to attend. And search the Internet, using key words such as "financial aid," "student aid," or "scholarships."

In short, nowadays, there are multiple federal, state, local, and private sources of financial aid. But before rushing off to seek financial aid, it would be wise for would-be students to first refine their goals. What do they hope to secure? An education? A career? Training to secure a well-paying job? Which college to attend is one of the most important decisions students need to make.

The Chronicle of Higher Education offers a searchable database of tuition at more than 3,000 colleges and universities. They can be searched by state, Carnegie classification, type of institution, or any combination of those. See: http://chronicle.com/stats/tuition.

Education after high school costs time, money, and effort. It's a big investment, and students should carefully evaluate the school they are considering. Just because a college participates in the federal student financial aid programs does not mean the government endorses the quality of its education. The government does not approve a college's curriculum, policies, or administrative practices, except as they relate to how the college operates the federal student financial aid programs. Therefore, it is up to every potential student to check out the colleges being considered.

Securing Information

Much useful information can be found in a college's catalog or in its introductory brochures. Also, the reference section of one's local library has many books that provide information about colleges.

If you know someone who attends or attended a college you're considering, ask that person for an opinion of the school.

Secure a copy of the college's accreditation and licensing documents. Those associations evaluate colleges and provide a "report card."

Explore a college's loan default rate (the percentage of students who attended the school, took out federal student loans, and later failed to repay their loans on time). One might not be able to get aid from some programs at a college that has a high default rate.

A college's job placement rate (the percentage of students who are placed in jobs relevant to their course of study) is also an important indicator. If a college advertises its job placement rates, it must also publish the most recent employment and graduation statistics, and any other information necessary to back up its claims. This information must be available at, or before, the time one applies for admission.

Students need and have the right to receive the following information: location, hours, and counseling procedures of the school's financial aid office, financial assistance available, including all federal, state, local, private, and institutional financial aid programs; application procedures and deadlines for each available financial aid program; how a college selects financial aid recipients and determines your financial need; how the college determines each type and amount of assistance in your financial aid package; how and when you will receive your aid; how the school determines whether you're making satisfactory academic progress, and what happens if you're not (whether you continue to receive federal financial aid depends, in part, on whether you make satisfactory academic progress); and, if you're offered a federal work-study job, what the job is, what hours you must work, what your duties will be, what the rate of pay will be, and how and when you'll be paid.

On their own, students should talk to high school counselors, local employers, and the state higher education agency, seeking advice about the college or school they are considering.

See if any complaints about a proprietary school have been filed with the local Better Business Bureau or consumer protection division of the state attorney general's office. Contact these organizations if you have a complaint about a school.

Find out the school's completion and transfer-out rates. A school is required to disclose to current and prospective students the percentage of its students who complete the school's programs and the percentage of students who transfer out of the school.

Bottom line: you're paying for a quality education--in time, delayed income, and expended energy. Make sure you secure an education that will help you recoup your "investment."

Dr. Mellander is a professor at George Mason University.
Exquina Editorial

Selecting a college, and all that that entails such as comparing tuition costs, researching and applying for scholarships, deciding whether to attend full or part time, or to live on or off campus, is an exciting but wearying endeavor for college-bound students. It can also be very discouraging, particularly for first-generation college students, who lack the financial support necessary to make the process a little easier.

While the pursuit of higher education has become a reality for many Latinos, there are still many more who need resources and incentives to help them follow their dream. Throughout this issue, HO discusses challenges and changes involving financing a college education. Jeff Simon’s article, on Low-Income Students Working and Borrowing More Than Ever, notes how students have been forced to dip into their wallets and apply for loans to meet rising college costs. The College Board’s Pricing report revealed that in the last 10 years, tuition at four-year public schools rose 167 percent, and at four-year private ones, by 33 percent.

The Fiscal 2001 budget includes increases of $823 million for programs that enhance educational opportunity for Latinos. One of these budget proposals suggested new tax incentives, such as the College Opportunity Tax Cut, which would make college more affordable. But many in the Latino community ask “affordable for whom?” During the recent presidential campaign several proposals included a new of 10 percent account that would allow families to contribute up to $2,500 per year in education tax-free savings funds. President-elect George W. Bush proposed a federal grant program that would cover one-third of state costs associated with establishing a merit program that would reward students who take an advanced or recommended college-prep curriculum in high school. However, most Hispanics won’t benefit from these creative tax breaks. Many Latinos and other underrepresented communities still rely on need-based grants such as the Pell Grant. So we hope that those in charge understand the original vision behind need-based grants and aid, and its purpose to equalize college opportunities for less fortunate aspirants.

In our next issue, read about Hispanic Think Tanks, The National Hispanic Leadership Agenda and its goals for 2001, and much more.

Hasta la próxima

Letters To HO

Jurisprudence

Dean Larry Velvel joins me in extending our appreciation of Amalia Duarte’s article that appeared in HO (“Massachusetts School of Law Challenging ABA,” Nov. 6). Her attention to accuracy and detail are commendable.

We have hopes that as this story is told, more will join us in our efforts to end these discriminatory practices as exercised by the American Bar Association in their accrediting process. Thank you for doing your part by diligently investigating and reporting this story and ultimately bringing it to public awareness.

Sincerely,
Beth Roth, Esq.
Assistant to the Dean
Massachusetts School of Law at Andover

Diversity Issues

I am writing to compliment Marilyn Gilroy on the HO article that quoted both Carol Schneider, president of the Association of American Colleges and Universities, and myself (“Renewed Debate Rages over Diversity,” Sept. 22). We both thought that she did a wonderful job of describing some of the different arguments currently being made about campus diversity. I think that Art Levine, president of Teachers College at Columbia University, Carol, and I are all in agreement on the importance of diversity in higher education today, but we do have disagreements about the progress that is being made nationally. She captured the differences in our perspectives very well.

Thanks for the chance to comment in the article. Feel free to call if there is anything else with which we can help.

Sincerely,
Debra Humphreys
Director of Programs
Office of Diversity, Equity, and Global Initiatives
Association of American Colleges and Universities
Low-Income Students Working and Borrowing More Than Ever

Expert Perspectives on Tuition and Student Aid

By Jeff Simmons

Thomas Mortenson wants students to have as many options as possible. But the costs of attending college are steadily limiting those opportunities. And this, he steadfastly maintains, needs to be addressed.

It's one thing to go to college, reasons Mortenson, but it's completely another thing to go to the college of your choice.

Mortenson, a senior scholar with the Center for Study of Higher Educational Opportunity, in Washington, D.C., is troubled by the climbing costs of higher education. Even during periods of slight to moderate increases, he says, students are disproportionately affected.

"Increasingly, we see low-income students attending public, two-year colleges as opposed to four-year colleges," says Mortenson, who pens the monthly publication Postsecondary Education Opportunity. "We see low-income students working more than they ever have before and to some extent borrowing more than they ever have before."

His fears were somewhat borne out recently by The College Board, even if The Board adopted a positive tone in its announcement. The Board released two annual reports, Trends in College Pricing and Trends in Student Aid.

The Board reported that tuition and fees during the 2000-2001 academic year increased by seven percent or less in all categories of institutions.

"A college education is still well within the grasp of all Americans," says Board President Gaston Caperton. "The best way to sustain our current economic prosperity and invest in the nation's future growth is support of education."

According to The Board's Pricing report, college prices have been rising twice and sometimes three times the Consumer Price Index over the last two decades. And in the last 10 years, tuition at four-year public schools rose 51 percent over inflation.

www.collegeboard.com
Loan aid has increased by 125 percent since 1990, while grant aid has increased by 55 percent.
Council on Education, points out, echoing other experts, that tuition increases aren’t generated by colleges and universities wasting money.

Instead, he says, they are trying to meet greater needs—societal, community, technological, and more. Colleges and universities are between a rock and a hard place, he says.

"If they don’t increase tuition, they’ll be unable to keep up with scientific and technological knowledge, and the quality of education will surely deteriorate. On the other hand, if college prices go up too fast, then it will become a financial burden for students and families that they just cannot afford."

As a result, he says, “What we are seeing is that families are digging deeper and students are borrowing more money or they are working more hours.”

**Student Aid Report**

The second report pointed out that a record $68 billion in student aid was available during the 1999-2000 academic year. That represented a four percent increase after adjusting for inflation, and included all federal aid and most state and institutional assistance available to postsecondary education students.

Over the last 10 years, total aid has increased by nearly 90 percent. But researchers noted that the most significant trend to emerge has been the growing reliance of students on loans to attend colleges and universities.

The relaxing by Congress of ceilings on borrowing, which occurred eight years ago, triggered those actions.

Loan aid has increased by 125 percent since 1990, while grant aid has increased by 55 percent. Further, loans comprise 59 percent of the total aid available to students, compared to 49 percent in 1990.

The federal government distributes about 70 percent of direct aid to students, and about 60 percent of that is in the form of loans. Additionally, non-federal loans continue to surge, from $1.3 billion four years ago to an estimated $3.8 billion during the 1999-2000 academic year.

Mortenson worries about this shift.

"Low-income people don’t view loans the way that middle-income people view loans," he says. "Middle-income people have more positive experiences with credit and tend to be better academically prepared for college."

Mortenson suggests that one of the first steps be to increase the maximum individual Federal Pell Grant awards. When they were created a quarter-century ago, Pell Grants were intended to be the foundation of federal student assistance.

Funding for the Pell Grant program is now under review, with Democrats and Republicans recommending conflicting increases. Nevertheless, the maximum $3,125 Pell Grant is far below the purchasing power it had two decades ago.

The College Board reports that the maximum Pell Grant covers 39 percent of tuition and fees and room and board at a four-year public college, and only 15 percent of the costs at a four-year private institution.

It is a public policy, commitment issue, Mortenson says. "We need to restore the purchasing power of the Pell Grant award, because students are having to work more to afford college."

Still, Board researchers maintained that recent increases in Pell appropriations helped to stabilize the overall loan-grant balance in the aid system.

John Thelin, president of the Association for the Study of Higher Education, says that institutions should adjust the way they distribute aid to combat the escalating costs.

"I prefer need-based student financial aid," he says. "I like to improve access not just by having merit scholarships. Financial aid should be based on your need."

"Institutions should get the word out to applicants that financial aid based on their need is available, and that’s a message you have to get out to encourage high school students, that if they have the educational and academic record and personal qualities, they are not going to be turned away. If we ever neglect that, opportunities are going to diminish."

The proportion of federal aid that has been distributed based on need has steadily dropped since the mid-1980s. The College Board found this was triggered by a growth in unsubsidized, non-need-based borrowing.

Need-based aid represented about 80 percent of all federal aid 10 years ago, but now accounts for less than 60 percent.

A key obstacle is lack of awareness. Experts say that families feel overwhelmed by the costs, often because they’re unaware of the available dollars.

It is crucial for families to plan ahead and save whatever they can for their children’s higher education. The investment will definitely pay off.

1999 - 2001

Financial Aid for Hispanic Americans

Gail Ann Schlachter and R. David Weber

AND NEVER, EVER USE AN OUTDATED DIRECTORY

By Adalyn Hixson
Searching for funds for college is not easy. Help is desirable if not imperative at every step. Thus suggestion No. 1 is get help.

This article was approached with 493 pages of help in hand—Financial Aid for Hispanic Americans, 1997-1999, written by Gail Ann Schlachter and R. David Weber—"A List of Scholarships, Fellowships, Loans, Grants, Awards, and Internships Open Primarily or Exclusively to Hispanic Americans."

But Carol García, online coordinator for its publisher, Reference Service Press, says that you should never, ever, ever use an older financial aid directory, no matter who publishes it—and explains why

"We did a study for all of our directories, looking at one-year, two-year, or three-year publishing cycles," and learned there were very few changes in one year, "but after two years, you just had to have a new edition."

HO can support her claim. Its first five phone calls using the 1997-1999 edition generate a familiar litany, "We are sorry. Your call did not go through. Would you please check the number and call again." "We are sorry. Your call cannot be completed as dialed. Would you please check the number and call again." There are some apologetic screeners of a fax machine encounter, which seem downright discourteous in comparison. HO next sends 10 e-mails to programs listed in the directory. Eight are promptly returned, five "User Unknown," three "Host Unknown."

Address changes, telephone area code changes, and such are what García calls "substantive changes—the things that affect your ability to contact and apply for the program. The address, the deadline date, eligibility requirements. Changes in the money are usually upward, but those three are the most important things."

"At least 65 percent or 75 percent of one or more of these changes every two years," she says. García noted that people might consider an Internet site the most up-to-date information source because it is relatively new technology, but cautions them to beware. Updates are costly, she says, and often new listings are added, but old ones are not amended for as much as three years. Applicants don’t find out, says García, until the letters they’ve sent out are returned.

Asked if there are any website referral sources she likes, García recommends two. They are not good for programs aimed at Hispanics. They are more general. Each covers about 3,000 entries. They have about 20,000, which is why we can offer four directories. But I believe these programs have quality and you can have confidence in them. One is College Quest by Peterson’s—www.petersons.com/resources. The other one is Expon, by The College Board. It is a small website, and they only update once a year, but very nice for a general search—cbweb1.collegeboard.org/fundfinder. They sell Fundfinder for quite a bit of money, but they take some and put in on the Web under this name."

Editions Past and Present

When Reference Services Press began in 1984 to issue a biennial Directory of Financial Aids for Minorities—"the only up-to-date and comprehensive listing of funding opportunities available to African Americans, Asian Americans, Hispanic Americans, and Native Americans"—the book garnered high praise in high places. The Grantsmanship Center called it "a must for every organization serving minorities," and Small Press said, "It is hard to imagine what else might be needed."

Financial Aid for Hispanic Americans and companion volumes targeting three other groups were published as a four-volume Minority Funding Set, writes the publisher, based on the "proliferation of funding programs" and on feedback from users indicating a preference for division by ethnic group. García tells HO that African American is the most requested title now, with Hispanic American second, Asian American third, and Native American fourth.

 Asked how the current edition of Financial Aid for Hispanic Americans, released in late 1999, differs from the one HO has in hand, García says the book’s structure is unchanged, as is what seems the very reasonable price of $35, but the entries are different. Seventy-five percent of the continuing programs reported substantive changes since 1997.

"More than 300 new entries have been added," says García. "Other programs have been taken out, and profiles of continuing programs have been rewritten to reflect their current operations." Entries total more than 1,400.

Thoughtful Indexing

The information is separated into categories: scholarships, fellowships, grants, awards, and internships. It is also indexed in six categories. (More specific details are noted from the 1997-1999 edition.)

Under Program Titles, you will find the Ralph W. Ellison Prize rubbing elbows with Ramon’s Mexican Food Scholarship, the César Chávez Memorial Leadership Award preceded by the CIA Undergraduate Scholar Program.

The Sponsoring Organization Index takes up nine pages, one and a half of them devoted to entries that begin “U.S.” Thirteen listings start with the word “California.” Only two each for Texas and New Mexico. The field of journalism seems unusually well represented. At quick glance, 38 of the states have at least one listing. There also is a smattering of religious organizations and corporations. This section is interesting in terms of who is NOT in it, and perhaps should or could be. Carol García confirms that not many Hispanic organizations seem to be offering scholarships, in either edition.

The Residency Index is less fun to stroll through, but critical, no doubt, to a student or parent. It organizes information by the residency requirement—city, county, state—of the scholarship, fellowship, grant, award, or loan. Modesto and Dallas are there, along with Japan and Guam. A listing for this author’s hometown, Baltimore, shows only “Loans.”

The Tenability Index identifies the geographic locations where the programs listed in this directory may be used. The A list starts with Aberdeen Proving Ground, a military testing site, as I recall, and includes Africa, American Samoa, Antarctica—areas not known for the vigor of their Hispanic communities. But Albuquerque, Arizona, and Austin are here too, as are Amherst, Ann Arbor, Annapolis, Georgia’s Athens and Atlanta, and Illinois’ Argonne and Aurora. The location with the most listings is “United States.”

The Subject Index brings into sharp relief a picture of national priorities in education. Based on available financing, those priorities are math, science, and engineering—and they dwarf the competition. One stroll through this index could inspire a parent in a low-income school district to take to the streets, demanding the higher math and science and AP courses and the computers often denied the disadvantaged. It would appear that a student with a high aptitude and good follow-through could have a very solid career, with training through graduate school and beyond largely financed by others.

This index is far less encouraging for those interested in other fields, and has surprisingly few listings mentioning the Spanish language, given the times.

The sixth and final is the Calendar Index—the one to which all procrastinators will likely rush for openers. It shows filing dates by month within each category—scholarships, fellowships, etc. It would also be helpful for those planning well ahead.

733
Expert Advice

Carol García shared with HO some tips about launching a scholarship search.

First, she says, try getting the information via e-mail. "Printing out a letter, folding it, putting a stamp on it, sending it off, following up comes to a lot of money per letter. We always try e-mail first. And our e-mail response is about 10 percent.

"Our number one way of getting a response is to write to the address, send a self-addressed stamped envelope [aka SASE], and include a very brief request letter that indicates how the student qualifies. If it is open to Hispanics in Ohio, say in the letter, 'I am Hispanic and a resident of Ohio.' Or whatever makes it clear you are eligible.' If you show a return address that is not in Ohio, says García, you need to explain why not—for example, you are enrolled at a college in another state. Otherwise you might not get a response.

Her response rate with a letter, she says, is 85 percent.

"I don't like this e-mail route. There are two reasons why it doesn't work. It costs money for the sponsoring organization to respond and send out an application. It can be very expensive, so many have a rule. If they don't receive a SASE, they don't respond. They don't have the ability. Another reason why e-mail addresses often don't work—they give this year's organization secretary, who next year is somebody else.

"We have a certain number of rules that we try to communicate when we talk to students. Never apply if you don't qualify. Apply for all programs that you qualify for. The amount of the award doesn't matter. Some people say, well, for $250, I'm not going to bother with that. But people like to give scholarships to students who have received other scholarships. They ask you to list them.

"This is like looking for a job, so you have to customize your responses. Every essay has to be customized...the whole system approach will never work.

"The last rule is: If it were easy, everybody would have a scholarship." The key, she says, is persistence. "Research, research, research."

"For a left-handed person in Ohio who wants to major in culinary arts—you say, this listing is no good." Wrong, says García. "This is exactly the kind of program you do want to find that meets your qualifications. The more restrictive the program, the more likely it is that fewer people will meet the requirements—the better your chances are. The really general ones that don't have any restrictions—those are the hardest to win. The easiest to win are the ones that are specific.

HO talks with García about how much work is entailed—agreeing it is really too much for one person. But, she says, as a group activity, it is a "wonderful bonding operation."

"I did it with my children, using the resources here, and it was exciting and fun and taught all kinds of organization skills and great gratification skills and lots of other things—a great family activity.

Asked how they made out, she says, "We did great. The children are now grown, one a lawyer and one a researcher at Hewlett Packard. But when we started, I knew where to look for the resources, and that is what made the difference." The directory, she says, achieves this goal for those counselors, Hispanic students, and parents fortunate enough to have access to it.

The Search Continues

HO's phone call to the Washington-based Radio and TV News Directors Foundation in search of information on the $5,000 Ed Bradley Scholarship listed in the directory yields no response, despite a cordial reception and messages HO left on voicemails. Persistence required. An e-mail to jfreasoner@matsci.uah.edu at the Alabama Space Grant Consortium Teacher Education Scholarship Program is answered within the hour.

Jackie Reasoner at the University of Alabama in Huntsville, assistant director of the Consortium, wants to be sure HO knows that its scholarships and grants are for students attending member universities in Alabama only. This requirement had been noted in the directory listing, along with the 3.0 GPA floor, and the statement that the program encourages minorities to apply, including people with disabilities and women of all races. It is, however, open to all—in science and math, and, for graduate fellowships, in the space sciences.

"We typically have about 10 applications for our Teacher Education Scholarships and around 50-60 applications for our Scholarship Program," says Reasoner. Asked how many are granted, Reasoner reports about five or six for the former and 35 for the latter.

CONTACTING SCHOLARSHIP PROGRAMS

85% Responded to a letter with SASE enclosed

"We also have graduate fellowships which are more competitive. We will have about 35-40 applicants for 12 slots." According to Financial Aid for Hispanic Americans 1997-1999, the graduate fellowship award for 12 months is $16,000 for a student stipend and up to $4,000 for a tuition/student research allowance. The duration is 36 months.

Reasoner notes that the percentage of Hispanics at Alabama four-year public colleges is about one percent, and that Alabama Space Grant "has awarded scholarships to equal the above percentage over 10 years."

She offers to get up-to-date addresses of 10 consortia members for HO "by morning," noting that universities typically make lots of changes in staff and e-mail servers change, as well as area codes.

In the Trenches

With one phone call, HO reaches Vivian Riccio, executive director of the Esperanza Scholarship Fund, serving the Cleveland area.

Every Hispanic of any age looking to go to college or continue at college should be so lucky as to run into such a woman and such a program.
Especially the ones whose GPAs did not yet reach the dizzy heights.

Esperanza's multicultural scholarship committee opted for a minimum 2.0 GPA standard "because of the problems that various students have had in school which may not be their own fault," says Riccio.

"We find that a lot of the testing is biased and they take inappropriate classes because of the lack of counseling. Those who should be in AP are excluded from AP classes merely because they don't offer them at the particular school they go to." Lincoln West, a major Cleveland high school with a multicultural population, has not a single AP course, a distinct disadvantage, she says, when competing with suburban students.

"We hashed this over...and decided that 2.0 would be a fair entry-level GPA. Our application asks for more detail regarding financial status and the reasons certain courses were chosen in school to see if those are mitigating factors in this student's application. We ask that in the essay they write, they speak about their experience as Hispanics and how those experiences have shaped their vision for the future. That is for the students who apply up front.

"We also have staff here go out and do workshops and a lot of outreach to students in the counties that we serve, talking about the scholarship process. And taking them into applying, because the word 'scholarship' intimidates them. It makes them think, 'Well, I have to have, on paper, top grades.'"

The fact that they are minorities presents a multitude of barriers, she says, "so we take all those factors into consideration. It is a very open process."

"We start distributing the applications in November. The review and interview process is in March and April when they are graduating seniors, or already in college—from freshmen all the way through graduate school." A certain number of scholarships target the graduating seniors, and another number target the nontraditional students—"those who may have been out of school for a while, or just got their GED."

Esperanza aims for a very wide distribution of whatever funds it gathers, she says.

The process is different for high school seniors than for the nontraditional, who are likely to "sound a bit more sophisticated..."

"We have workshops on interviewing because we encourage students to apply for whatever financial aid and other scholarships are available. We have workshops on the SAT and ACT, starting with sophomore year. Education to us is a right, not something that should be exclusive to a few."

"Last year we distributed 1,500 applications, and we received about 350. Of those, we interview 150." The 1997-1999 directory indicates that about 30 scholarships of $500 to $1,500 are awarded annually, to "students of Hispanic descent" in the Cleveland area. Esperanza's other services, however, go to those who request them, regardless of race and ethnicity.

Scholarships are supported by members of the corporate community in the Cleveland, Lorain, Summit county area, and by individual donations. An endowment fund now stands at $50,000. One of Esperanza's first donors was the foundation of the Cleveland Indians, which has provided major support "every year since we've been doing this, and we're now in our 10th year," says Riccio. Other major donors include National City Bank, Third Federal Savings & Loan, and BP Amoco.

"This is extremely important work to our community. The dropout rate is so high, we are losing the battle before the kids even get to the senior year. They are dropping out at eighth...ninth grade. We have staff in some of the middle schools doing intensive tutoring and mentoring to help get them over the hump." But the need outstrips the resources, she says, and two impending factors could worsen the situation.

"The State of Ohio passed legislation whereby children in fourth grade who do not pass the reading and writing sections of the proficiency test will not be promoted to fifth grade—they will be held back. It is exactly those portions of the test that are culturally biased, so it is a controversial decision because the state itself does not have the resources to maintain a larger group of children in the fourth grade. It will get even worse.

"A school that is about 57 percent Hispanic has no bilingual services whatsoever, so we are still trying to play catch-up here.

"Also just passed, they're moving the ninth grade proficiency test, taking it to junior year. You must pass this test to graduate from high school. A science section was just added, so what was a four-section test now has five sections, raising the standards, but not providing any extra teachers or smaller classes—not providing what the students need to be successful."

The lack of awareness of what is available and of the process for seeking financial aid and scholarships is what Riccio deems a critical problem. "The family must be involved in the application process. We and a few other organizations are working on the problem. We're doing early-awareness programs, working through parent liaisons in the elementary schools, and we're giving information to parents to prepare them over a lifetime—This is what is available. These are the courses they must take. These are the questions you have to ask the teachers."

"Parents who are learning and motivated will also motivate their child. We take students as early as fifth and sixth grade on campus visits and have the information available in both languages. We work with the Cleveland Municipal School District directly, with individual parochial and suburban schools, with the county through the Board of County Commissioners. We work with the Cleveland Scholarship Program, the United Negro College Fund, and with the Ohio Board of Regents. We've developed relationships with as many schools in Ohio as we can get a hold of about matching our scholarships or having summer programs or vacation workshops."

KD
University of Illinois at Urbana-Champaign
First among Big 10 for Hispanic Enrollment and Graduates

BY ROGER A. DENTZ

According to Chancellor Michael Aiken, "The University of Illinois at Urbana-Champaign is gaining a reputation as a leader in international programs."

"Our faculty and students," he says, "can be found all around the globe, and we are establishing collaborative partnerships that will allow us to lead international research in the 21st century."

Aiken suggests that as a land-grant institution, the missions of the University of Illinois were established long before the first students "walked up to a single building surrounded by prairie and shook the hands of faculty members who had gathered there to welcome them." He continues, "Illinois' new university was to provide education to the children of farmers and industrial workers, create knowledge through research, and share the knowledge and expertise generated with all of the people of Illinois."

The chancellor reports that this mission continues to guide the world-class university as it always has, with one notable exception. Aiken explains, "The people whom we serve and the people with whom we share our knowledge are no longer found just around the state, but around the globe. Today, if we are to maintain our standing as a world-class university, we must also provide students with an understanding of the international dimension of knowledge." To meet these challenges of "an increasingly interdependent world," Atkins points out, the school has invested in developing "international competence."

He tells us, "We have added new international faculty lines and increased the number of study-abroad opportunities for students. We have developed new research partnerships with colleagues around the world and added new international courses and international degree programs throughout our campus. We are also initiating a new International Living and Learning Community to facilitate interaction between our domestic and international students. Excellent visiting scholars and faculty will engage them in important international issues."

On the domestic front, the chancellor makes it clear that there have been great strides as well. Aiken reveals, "Thirty years ago, in 1970, underrepresented minorities constituted 4.5 percent of the students on our campus; 20 years ago, that number was 5.1 percent. Ten
years ago, 1990, the underrepresented minority population was 10.2 percent, and since 1993, we have maintained an underrepresented minority student population that is more than 11 percent of our total enrollment. If you add the Asian American population to the other minorities, this campus has a total minority student population this year of 25.3 percent—more than a quarter of our student body.

"Among Big Ten Schools, Illinois ranks fourth in the number of African American enrollments, first for both Asians and Latinos, and second for total minorities." The chancellor also reports that on the basis of 1998 data, Illinois at Urbana-Champaign ranks No.1 in the number of bachelor's degrees awarded to minorities and first as well in the number of bachelor's degrees awarded to Hispanics. On the basis of that data, his university is fifth in the Big Ten in the number of bachelor's degrees awarded to African Americans and second in the total number of master's degrees and doctorates conferred on all minorities.

"We have been working to increase minority representation among our tenured and tenure-track faculty as well," Chancellor Aiken adds. "From the fall semester of 1998 through fall 1999, the number of minority tenured and tenure-track faculty has nearly doubled, and as a percentage, it has more than doubled. In the latest figures available (1997), Illinois ranks second among Big Ten Schools in the percentage of minority faculty. We rank first in Hispanic faculty, third for Asian American faculty, and fifth for African American faculty. Minority representation among academic professionals on this campus has also shown consistent growth. In the past 20 years,

we've built our staff of academic professionals by nearly one thousand jobs, and 25 percent of those new hires have been minorities."

"We have a track record on this campus of providing the opportunity of an excellent education to an increasingly diverse student body," says Aiken. "We have a track record on this campus of providing multicultural role models for those students so they will leave here with a broad appreciation of the people and the cultures of the world. This is our heritage. We are a land-grant university charged with providing education to diverse masses. We are Illinois' flagship university, and
through each of our missions—education, research, and public service—we serve all of the people of Illinois. That heritage will not change, and our commitment to diversity will not change."

The student body at the University of Illinois at Urbana-Champaign totals 36,738: 27,889 undergraduates (91 percent Illinois residents) and 8,849 graduate and professional students. Of the total, 53 percent are male, 47 percent are female, 4.7 percent are Hispanic, 31.1 percent are Asian American, and 0.2 percent are Native American. Undergraduates typically come from all 50 states; 50 percent of the graduate ranks are international students. The eight undergraduate colleges and one institute offer 4,000 courses and 150 programs of study. About 80 percent of all class sections have fewer than 30 students; 46 percent have fewer than 20. Special Programs include a Campus Honors Program, New Student Convocation, Discovery courses, and a First Year Impact program. There is a President's Award Program for Outstanding Minority Undergraduates. Also, the institution has the seventh largest study-abroad program at a major research institution, offering exchanges with more than 100 universities abroad.

There are 3,000 computer workstations for student use. Over half of seniors seeking post-university employment are employed before graduation, and more than 90 percent of seniors obtain positions within nine months of graduation. Each year, more than 180 graduates are accepted to medical school, and 252 more are accepted to law school. According to a 1998 survey of thousands of 1997 graduates, more than 90 percent indicated that they would choose Illinois if they were to make their choice again. Annual tuition and fees for Fall 2000 ranged from $5,020 to $5,596 for Illinois residents and $12,468 to $12,445 for nonresidents. All eligible students who apply for need-based aid receive some type of assistance.

The faculty is made up of 1,860 tenured members, including 887 professors, 547 associate professors, and 430 assistant professors. Many have been recognized for exceptional scholarship with memberships in the American Academy of Arts and Sciences, the National Academy of Sciences, and the National Academy of Engineering. Recognition also comes from the National Medal of Science and the Fields Medal in Mathematics, as National Science Foundation Young Investigators, and from such organizations as the National Endowment for the Humanities, Guggenheim Memorial Foundation, National Academy of Education, and the Alfred P. Sloan Foundation.

Full-time-equivalent employees include 2,550 academic personnel and 5,500 staff. There are 341,754 who have been graduated by the Urbana-Champaign campus. 85,116 are members of the Alumni Association. Among these are 10 Nobel laureates and 17 Pulitzer Prize winners. Seven Nobel laureates have served on the faculty, including John Bardeen, who won the Nobel Prize for Physics in 1956 and 1972, the only person to win the physics prize twice.

The University of Illinois at Urbana-Champaign was founded in 1867 as a state-supported, land-grant institution, one of the original 37 created within 10 years of the signing of the Morrill Act by Abraham Lincoln in 1862. On March 2, 1868, three of the original 10 faculty members of the Illinois Industrial University welcomed the very first student—James Newton Matthews. The University's inaugural student body, made up of 50 men, grew to 77 by the end of the school year. Since that first year, the University has earned a reputation as a first-rate institution of international stature, recognized for the high quality of its academic programs and the outstanding facilities and resources it makes available to students and faculty. Scholars and educators rank it among a select group of the world's greatest universities.

The University is situated about 140 miles south of Chicago, 120 miles west of Indianapolis, and 170 miles northeast of St. Louis, located in the twin cities of Champaign and Urbana (population 100,000) and throughout the surrounding area. It is a residential campus of classrooms, laboratories, libraries, residence halls, and recreational and cultural facilities with 211 major buildings on 1,470 acres. Nearby are the University's 1,600-acre Willard Airport; Robert Allerton Park, its 1,708-acre nature and conference center; and 3,600 acres of agricultural land. An additional 3,700 acres of farmland are located elsewhere in Illinois. This land is used by the College of Agriculture, and by Consumer, and Environmental Sciences, mostly as experimental fields.

Nearly every facility on campus is accessible to people with physical disabilities. The University's policies and services for people with disabilities have served as models worldwide. University landmarks include the Illinois Union, the Quad, Assembly Hall, Foellinger Auditorium, Morrow Plots, Altgeld Hall, Beckman Institute for Advanced Science and Technology, Memorial Stadium, and Krannert Center for the Performing Arts. Then there is La Casa Cultural Latina.

The mission of La Casa Cultural Latina is to foster a broad appreciation of the significant contribution of Hispanics, Latinos/as among University of Illinois students, faculty, and staff, and throughout the Central Illinois region. It also aims to initiate cultural programs and activities that complement the educational experience of Latino/a students at the University and contribute to their retention and graduation. In December 1995, La Casa Cultural Latina moved from its original home at 510 East Chalmers Street, Champaign to its present location on Nevada Street in Urbana, a location that was home to University of Illinois presidents before the current president's house was built on West Florida Avenue. The site is equipped with state-of-the-art computer labs that are dedicated to students, staff, and registered student organizations for use in producing newsletters, multimedia cultural presentations, literary publications comprised of student writings, and other such activities. Additionally, the cultural center has a conference room, an art presentation room, and a small seminar room that can be used for public lectures and media communications programs that allow the University community to view and interact with student and professional artists.
High schools across America have found that the college room on their campus encourages students to actively pursue a higher education. These rooms are packed with everything high school students need to know about college, from college videos and applications to testing dates and scholarship books; are generally staffed by a full-time counselor; and are open to students during their lunch period, during classes (with a pass, of course), and after school.

According to The Washington Post, September 4, 2000, "School guidance counselors and college recruiters report that such rooms are sometimes vital in motivating students to apply to college, especially those who are from low-income homes or whose parents didn't get a higher education."

Kay Ochi, college and financial aid advisor at Fairfax High School in Los Angeles, describes the college room as a "huge support and motivating factor."

One of Fairfax's senior-year students, Kevin Williams, "could've had a free period," he says. Instead, Williams chose to spend one daily class period assisting Ochi in the college room and developing his own college plan, which includes applying to several University of California schools and California State. "Especially for seniors," he says, "it's a necessity to be in here."

At Fairfax, where nearly 55 percent of the 2,500 students are Hispanic, the college room is about the size of a classroom and includes bookcases with catalogs, videos, SAT and ACT registration packets, brochures about college requirements, and tons of other items. "It's crowded with information," Ochi says, but she explains that the crowding is actually a benefit: "It means everyone has options."

"I think for high school kids, they're confused and overwhelmed by the prospect," Ochi says. And after six years as college advisor (and a total of 16 years at Fairfax), Ochi says she understands how to overcome students' fears. "We try to be welcoming and friendly," she says, "a home away from home."

As a result, students feel comfortable going to the room during their lunch period or after school to ask questions and obtain information.

Kathy Moore, career information coordinator at Wheaton High School in Wheaton, Maryland, echoes many of Ochi's sentiments: the college planning process "is overwhelming, especially for first-generation college students who..."
Can the Internet Replace College Rooms?

It is undeniable that the Internet offers a wealth of information for high school students, including scholarship listings and virtual college tours. Some think that, with increasing Internet access, college rooms will become obsolete.

High School in Silver Spring, Maryland, says Barbara Weintraub, the career information coordinator. The school, which has been open for only three years, was designed to include a "Career Center" that holds up to 30 students at one time. The brightly decorated room, lined with bookshelves and college give them confidence," she says.

In Montgomery County, Maryland, says Moore, and in many areas of the U.S., a substantial number of children don't have computers at home or access to the Internet.

At Wheaton, also in Montgomery County, the library now includes only one computer, but next year, the

A typical day at the Fairfax College office

At Fairfax High in Los Angeles, where the physical presence of the room alone is a motivating factor. "Having a room you know is always there" is encouraging," he says. "It's a visual thing too," he adds. "It helps you remember."

A strong visual appeal is precisely what distinguishes the college room in James Hubert Blake posters and banners, is also strategically located on the main hall so that students must pass by it on their way to class.

And, Weintraub says, a markerboard on the outside wall of the room--listing important dates, facts, and daily updates--is also hard to miss. Also at Blake, students have orientation to the college room as early as ninth grade, so they become familiar with the room and aware of its contents, which include a television set, VCR, and four computers with Internet access.

This does not mean, however, that the Internet can fulfill the role of the college room, says Weintraub. "Students need the one-on-one experience to encourage them and

school is building an addition that will contain 15 computers, says Moore. Nevertheless, she says, "Kids are not ready to do this all by themselves," asserting that "the internet and the room complement each other."

And, in her experience, Moore says, students "like to sit down and see the information in print."

Infantino adds that students need the interaction. "They have to be motivated," she says, "and interaction with other students makes them look ahead."

Multipurpose Rooms

Surprisingly, college rooms provide students with much more than written materials, videos, and computer access. They also serve as a
Representatives from such government programs as Upward Bound also visit Fairfax, and Ochi plans field trips to nearby college campuses approximately once a month, she says.

Blake's college room also offers these field trips, and Weintraub says she notifies students of community events such as the Latino Empowerment Youth Conference or a county-sponsored Hispanic financial aid workshop.

Other college rooms, including Fairfax's, organize their own evening workshops, such as the application workshop, providing students and parents with step-by-step guidelines on how to complete the college application.

Wheaton invites parents to the college room once or two evenings each month, Moore says.

At Lamar High School in Houston, parents play a central role in their college room, which is dubbed the "college corner," says Dean and Associate Principal Sue Paige. Parent volunteers often staff the college corner, she explains, "so kids get the adult assistance, and parents get the college information they want for their children."

**Are College Rooms Effective?**

College rooms are relatively new features in high schools, so there are still some kinks in the system. For starters, not all high schools can afford to have them, and even in schools with college rooms, they differ vastly in size and contents.

To add to the disparity, many universities focus their mailings on elite high schools. Moore, at Wheaton, says she sometimes has had to badger Harvard University to send her materials, but says she's always managed to obtain them in the end.

Despite these setbacks, are the rooms effective?

"College recruiters...say the rooms show students that their school believes they can go on to higher education," reports *The Washington Post*.

However, Letona, UCLA's recruiter, notes that they're not miracle workers: "Those students without an inkling of desire to attend college are not suddenly persuaded."

But, he adds, to those with the desire to pursue a higher education, college rooms are a physical place where they can realize their goals.

In Montgomery County, Maryland, high schools are required to have college rooms—a policy that in and of itself suggests their efficacy.

Also in Montgomery, 86 percent of polled students said they planned to attend college, surpassing the 60 percent national figure; and seniors' college acceptance rates are generally higher than national rates.

Ochi reports that at least 85 percent of Fairfax students proceed to higher education, 30 percent attending four-year colleges, and 55 percent attending two-year colleges.

Although no one has investigated the connection between these impressive statistics and the role of the college room, the notion does not seem farfetched.

But perhaps the most poignant indices of a college room's impact are the testimonies of students who benefit from them. Kevin Williams, the Fairfax senior who is in the college room every day, says, "This is a very necessary room."

Wheaton's Lourdes Acuna says she feels lucky to have access to so much information. And Elizabeth Melchor, who came to the United States from Mexico at age three and is in the first generation in her family to go to college, did all of her college planning in Wheaton's room.

She is now a first-year student at Notre Dame University in Indiana, financing nearly her entire tuition through scholarships she researched in Wheaton's college room.
These days, almost everyone could use a little help paying for college costs. But the situation is especially critical for those who have the desire and drive to go to college but are facing personal obstacles that threaten to put their dream out of reach. How can single parents, recent immigrants and their children, welfare recipients, individuals who have spent time in prison, or even those who are saddled with enormous debts from credit cards find financial aid for the education that will help them build a better life?

The good news is that assistance is available from the Higher Education Information Center (HEIC), located in Boston, Mass., which was created to help young people and adults, particularly those who are the first in their families to attend college, find a way to enroll and pay for higher education.

Individuals who seek assistance from HEIC are met by a staff of full-time and part-time counselors who will assist them in navigating the overwhelming amount of information and complexity of forms that accompany the process of college admissions and financial aid. Services are free and open to the public.

"We focus on low-income, first-generation students," said Dr. Arturo Iriarte, executive director of HEIC. "We provide a very personal connection in this process, and that can make the difference in whether or not someone succeeds."

To illustrate this point, Iriarte recalled that at a recent reception celebrating HEIC's 15 years of service, he met a student who explained that she had been told in high school that she was not college material. Undeterred, she came to HEIC, worked with one of the counselors, and now maintains a 3.8 grade point average as a student at Simmons College.

This kind of experience, said Iriarte, is the most rewarding part of his job. "After all," he said, "you can get some of the information that we supply online from other dot-org sources, but what clients get from us is the personal attention that they need."

The Center handles an impressive number of requests as it tries to match students with less-than-obvious sources of school funding. Last year, HEIC fielded more than 84,000 inquiries through walk-in traffic at the Center, website hits, off-site services, hotline calls, and youth programs.

Counselors at the Center work with students to find funding leads, but they also end up providing advice on academic programs, career counseling, and personal support. If language is a barrier, the Center's staff can offer assistance in a total of six languages. Weihong Wu, a student from China who struggled with poor English skills and the many layers of college programs and procedures, was fortunate enough to meet HEIC's Annie Zhang.

"She explained the American education system to me and helped me apply for financial aid," said Wu. "I was able to finish my studies at Bunker Hill Community College and was accepted to Northeastern University with scholarship money, a grant, and some low-interest loans.

"Anytime I needed to make some decision about my education or I have some problems, I always ask Annie. She gives me very useful suggestions. When I need help, Annie is always there."

Wu's story is just one of thousands that have become a part of HEIC's legacy. Founded in 1984, HEIC is funded by a unique partnership that includes federal and state monies and support from local colleges, founda-
tions and corporations, and the Boston Public Schools. It is a division of The Education Resources Institute (TERI), which is a national nonprofit organization offering education loans for undergraduate, graduate, and professional study. HEIC is housed in the Boston Public Library, which has donated space in the basement of its Copley Square location.

"This center was started by Ann Coles, who is now a senior vice president at TERI," said Iriarte. "Funding came from the DeWitt Wallace Fund, and Ann got the space rent-free from the Boston Public Library. The only proviso is that we maintain hours that parallel those of the library."

That means being open seven days a week, no easy task for a staff that is also running outreach programs and early awareness programs. HEIC works with schools, community groups, churches, and neighborhoods with large numbers of low-income individuals, and sponsors a variety of activities including workshops and information tables at college fairs. HEIC also distributes college planning publications for students, parents, and adult learners.

In addition, the Center coordinates youth programs that focus on young people who will be the first in their family to attend college. For example, HEIC's Educational Talent Search program provides low-income middle and high school students with intensive counseling and support around college planning. This includes selecting courses to meet admissions requirements, choosing the right college, and understanding financial aid. Last year, the program achieved an extraordinary success rate with 85 percent of the 2000 Educational Talent Search graduates attending college in the fall.

Two other programs form the nucleus of HEIC's efforts to encourage the possibility of higher education. The Kids to College program (K2C) introduces sixth grade students from five Massachusetts cities to 50 college campuses and offers their families early planning information. HEIC has also begun to administer a new federal program, Gain Early Awareness & Readiness for Undergraduate Programs (GEAR UP). Starting in 7th grade and continuing through high school, GEAR UP provides comprehensive services including mentoring, tutoring, counseling, and other supplemental college readiness activities. Last year, 220 seventh grades participated.

At the heart and soul of all these programs is the commitment to helping people find access to higher education and navigate the complex world of financial aid. Using a database called Fund-finder, counselors can usually offer funding possibilities that tie together scholarships, grants, and loans for a financial aid package. HEIC encourages individuals to look for private scholarships based on an applicant's field of study, church affiliation, community and civic group participation, or competitions sponsored by local businesses. When students are overwhelmed by the possibilities, counselors will help them choose the most suitable options and get them started. Sometimes it means filling out eight-page application forms that are detailed and daunting; other times it is finding ways to help people qualify for need-based loans. This can be an especially tricky process for people under the age of 24 with no children who must include their parents' income on the application. These students are also likely to have worked full-time to help meet family expenses.

As one counselor said, "The problem is inherent in the system. State and federal loans are based on previous income. If you work full-time, it looks like you must have socked away enough money to go back to school."

Then there are other clients who cannot afford to drop out of the workforce to go back to school and need to tap into one of the weekend or accelerated programs offered at local colleges.

Even though HEIC has been incredibly responsive to its clientele, the fact is that with college costs continuing to rise and higher education clearly the route to a better life, the Center will probably have to do more, not less.

Dr. Iriarte said that the HEIC is trying to use technology to help handle the increasing demand for financial aid information. "Our walk-in traffic remains heavy, but the real increase is the online business," he said. "We are experimenting with services that will connect people with a counselor in a chat room. Response to our hotline service is also growing."

Iriarte is upbeat and enthusiastic about the challenges he faces. His own background as a son of immigrants and his 30 years of experiences in education have forged his commitment to the Center's mission and goals.

"I was always involved in working with first-generation minority students," he said. "I have lived through some of these experiences."

Iriarte was born in Cuba but grew up in Queens and got a degree from St. John's University. He became a classroom teacher in special education and moved to higher education in 1969. A former Fulbright Lecturer and Woodrow Wilson Hispanic Leadership Fellow, Iriarte was previously at Lasell College as vice president for academic affairs. He also held administrative and senior-level positions at the Middle States Association on Higher and Education and at several universities.

When he joined HEIC last August, Iriarte recognized that changes were needed because the demands on the Center had grown dramatically.

"When I was hired, a consultant reviewed our structure and recom-
mended that we hire an associate executive director," he said. "That individual is now in place and is handling most of the outreach efforts while I focus on overseeing grants and fundraising."

He has already begun work on plans that would expand the reach of HEIC, build a stronger financial foundation, and help ease the staffing crunch.

"We have been exploring a possible partnership with the Catholic archdiocese that would bring a new funding source. We are also looking into expanding into rural Massachusetts," he explained. "In addition, I would like to get the endowment to a comfortable level without having to run a capital campaign."

As for staffing, Iriarte has reviewed the operations of the HEIC-replicated sites in St. Louis, Missouri, Louisville, Kentucky, and Washington, D.C. All use the same model of funding from various sources and support from member colleges.

"At the Washington site, admissions personnel from member colleges work at the center," said Iriarte. "I am hoping to try that here by getting our member colleges to volunteer some of their staff for us."

As HEIC continues the quest for funding and staff, it carries the assurance that it provides an absolutely essential service for those who are often hardest hit by lack of resources and information on how to plan for college. That reinforcement comes from students like Sabine Jules, who is a junior biochemistry major at Suffolk College. Jules recently thanked HEIC for making a difference.

"When I was in high school, I went to school every morning with the hope that one day I would go to college. Unfortunately, I didn't know what to do to get to college or where I would find the money to pay for it. As a low-income student, I was very skeptical, and in the fall of 1998, my hope was dying. I was the first kid in my family to try and attend college, and I didn't have basic information on how to fill out the application."

"But some very special people at West Roxbury High led me to the right path. Through HEIC's ACCESS program, I found help with my school tuition bill every year, and the scholarship they provide is renewable. I urge every student to utilize the service they provide. I guarantee you will benefit from it!"

The Higher Education Information Center can be reached through its toll-free information hotline at 1-877-ED-AID-4U or its website at http://www.heic.org

MEMBER COLLEGES

Collaboration has been critical to the Center's success in reaching students and parents. By providing speakers for educational awareness workshops, opening their campuses to numerous student groups, and communicating with the Center about what their college can offer visitors, HEIC's member colleges contribute significantly to its efforts. The following colleges and Universities are members and supporters:

- Babson College
- Bay State College
- Bentley College
- Boston College
- Boston University
- Brandeis University
- Bunker Hill Community College
- Cambridge College
- Curry College
- Emerson College
- Emmanuel College
- Fisher College
- Franklin Institute of Boston
- Harvard University
- Lasell College
- Lesley College
- Massachusetts College of Art
- Massachusetts College of Pharmacy and Allied Health Sciences
- Newbury College
- Northeastern University
- Pine Manor College
- Regis College
- Roxbury Community College
- Simmons College
- Suffolk University
- University of Massachusetts at Boston
- Urban College of Boston, ABCD
- Wellesley College
- Wentworth Institute of Technology
- Wheaton Wheelock College
The Federal Pell Grant, first implemented in 1972, continues to be an important part of the student financial aid package. But given inflation and the rising cost of college tuition, the famous Pell has lost some of its purchasing power and advocates. Some government entities and leaders question the effects of Pell Grants on student persistence rates and college completion. Others say that while the Pell alone can not help enroll and graduate more students, it is undoubtedly an enabler without which many students would not go to college.

Republicans and Democrats supported an increase in this need-based aid program during the Clinton administration, but until a few weeks ago the jury was still out on how much the Pell Grant would increase, if at all. More than two months after the 2001 fiscal year began, Congress gave final approval to a massive spending bill that would raise the maximum Pell Grant by $50 to $3,750.

As candidates for president, Bush and Gore highlighted somewhat different funding approaches. George W. Bush proposed increasing the Pell Grant to $5,100 for first-year students, and providing an extra $1,000 to Grant recipients who took college-level mathematics and science courses in high school. Vice President Al Gore suggested increases in the Pell Grant and in other federal student assistance programs.

While the federal government continues to expand student aid, the vast majority of this growth has come in the form of borrowing. According to data from The College Board, student loans represent 59 percent of all aid, compared to about 41 percent in 1980-81. Pell grants cover only 39 percent of fixed costs (tuition and fees, room, and board) at four-year public institutions and 15 percent at four-year private colleges.

What's Happening to the Pell

In President Clinton’s weekly radio address of December 2, he urged Congress to keep its commitment to the education budget. Why? Could there possibly be a problem after a bipartisan agreement was reached to increase education investments that would have brought the Pell Grant maximum to $3,800 a year?

When Congress adjourned in November, prior to election day, both Republicans and Democrats had agreed to certain education budget increases. But, according to President Clinton’s Dec 2 address, the agreement was “only to be abandoned at the last minute by the Republican leadership.”

Diane Hampton, legislative analyst, American Council on Education (ACE), comments on the situation, “The appropriators had reached an agreement with a good number of increases, most of them in student aid. There was a $500
increase for the Pell Grant. Now because they think there may be a Bush administration, Republican leaders may be trying to reserve money for other priorities. The education budget agreement was taken out the hands of the appropriators and put into the hands of the house leaders—[Republicans] Richard Armey, majority leader from Texas, and Tom DeLay, majority whip from Texas, and Trent Lott, senator from Mississippi.”

This would affect students entering school after July 1st, 2001. The increase, adds Hampton, “was even higher than President Clinton’s request. The higher education community is saying to the Republicans, ‘This is what you campaigned on—gains in education. You said that this was important.’ And they were going to work toward this goal, and they claimed victory that they had increased student aid, etc. And now they are going to renege on that promise? The Bush camp is maintaining a low profile.

The education community is appalled, and so, it seems, are many moderate Republicans and even conservatives who agree that “this is what we campaigned on,” adds Hampton.

According to an ACE update from the Division of Government Public Affairs, the education community was worried that Congress might give up on the previously agreed upon increases and pass a continuing resolution to maintain last year’s funding for six months. In Clinton’s radio address, he stated, “Back from the consensus budget plan and freezing funding at FY 2000 levels would jeopardize critical increases agreed to by budget negotiators on both sides including...$14 billion for Pell Grant increases. The maximum Pell Grant scholarship for needy students would not increase by $500, to $3,800, denying increased aid to nearly four million low-income college students.”

The president outlined some of the critical implications for education in many states.

“Among the five largest states,” said Clinton, “California could lose almost $715 million in additional education funds, Texas could lose more than $100 million in support for emergency school repairs, New York could lose more than $40 million for more after-school and summer school programs, Florida could lose almost $20 million to hire additional high quality teachers to reduce class sizes in the early grades, and Illinois could lose almost $70 million in additional support to educate students with disabilities.”

Roberto Haro, César Chávez Institute, San Francisco State University, president of the Hispanic Coalition of Higher Education, says, “We want the Pell increased for a couple of reasons. We know that Latino students are going to increase in the college-age cohort, so they’ll need resources to go on to college. Right now, Pell is not enough for students who are really needy.

“Admittedly, many of our students are going to two-year colleges. But they are not going to stay there forever. To make it into their institutions of choice, they need incentives. Pell Grants are good if they are coupled with other aid. California, for example, has come up with generous aid that will help students.” If a student aid package does not cover major costs, he says, “you have to go to other sources of money. In many instances that means loans. The more we can provide need-based students, the better it will be. Most financial aid counselors can say, ‘This block of money will always be there for your child.’”

Despite the Pell and other available forms of scholarships, student loans have become a given for many. Haro says that the middle and upper-middle class, those not eligible for need-based aid, are pushing for an increase in non-need grants and aid, which can detract from Pell Grants and other need-based assistance.

“Pell Grants are being assaulted by the middle class, who want to use other strategies to secure financial assistance, irrespective of need, like the Hope Scholarship, which is merit-based. A kid who graduates in the top 10-12 percent of the class can receive aid that is tied in to merit. I

(excludes federal loans)

An issue raised by the education community concerns the importance of gauging the value of Pell Grants so that government leaders and institutions alike understand how students can not go without this need-based program. Haro notes that Congress has some fuzzy notions as to the benefits of the Pell, and who is most directly affected by it. More clarification is necessary.

"Congress is not paying attention to creating a domestic pipeline. It's meeting the demands of technology and corporations, which need to fill high-skill, technology-based positions. So, they are investing in bringing in foreigners. It's a revolving door of people coming in and out, and meanwhile our community hasn't the data sets or systems to compete. This is a country that pays attention to the wheel that squeaks the loudest."

**ABCs of the Pell Grant**

Unlike a loan, a Federal Pell Grant does not need to be repaid. It is a need-based grant awarded to disadvantaged, low- and moderate-income students. According to the *Student Guide 2000-01* publication of the Department of Education, Pell Grants are awarded only to undergraduate students who have not earned a bachelor's or professional degree. It is possible for a Pell Grant recipient to be eligible for other aid.

The maximum award for the 1999-2000 academic year was $3,125. The Pell Grant amount depends on a student's expected family contribution (EFC), the cost of attendance, status (part-time or full-time), and whether a student plans to attend for a full academic year or less. A student can receive only one Pell Grant a year.

According to data from the Student Aid Alliance, a coalition of 60 organizations representing students, colleges, and universities who support federal funding for student financial aid, nearly four million students, with an average family income of $44,500, received Pell Grants last year.
Minority Gains Impressive at EQUITY 2000 Sites

"Math for Mexicans" No Más

The success rates became 72 to 74 percent...a vast increase from the 45 percent success rate of students who had once been in remedial courses.

Ray Mialovich was a math teacher and department chair at Piedmont Hills High School in San José, California, when EQUITY 2000, a pilot program initiated by The College Board in 1990, came to his school. He was also an athletic coach.

Back then, his school, like many others throughout the country, considered tracking [a process by which students are separated into class levels according to abilities] a part of normal conduct, although there were those who believed this procedure to be ineffective and discriminatory. For Mialovich, tracking was no different than having a sports team that goes out onto the field to play a game without expectation or determination to win. Today, having completed the EQUITY 2000 pilot program, Mialovich is noticing drastic changes from his tracking days. "We are not saying anymore that you can and you can't," he said. "We are all first place teams now."

EQUITY 2000 was developed by The College Board to help close the gap in college-going and success rates between minority and non-minority, and advantaged and disadvantaged, students so that all students are better prepared to succeed in their education and careers. Its aim has been to eliminate tracking in schools by helping establish high standards for all students, while simultaneously restructuring school district policies, practices, and resources to support that goal.

This program was created in response to The Board's published study, Changing the Odds: Factors Increasing Access to College, which
yielded the following findings: low-income and minority students who master algebra and geometry and who expect to go on to college actually enroll in college at the same rate as their non-minority peers with those same academic experiences. These results are similar to recent findings by the Department of Education (Answers in the Tool Box: Academic Intensity, Attendance Patterns, and Bachelor’s Degree Attainment), which demonstrate that curriculum levels, more than test scores and GPA, play an extremely important role in determining bachelor degree-completion rates for all students, and especially for Latinos. The results of the study also showed that of all pre-college curricula, the highest level of mathematics one studies in secondary school has the strongest continuing influence on bachelor’s degree completion.

EQUITY 2000 began as a K-12 mathematics reform initiative in Forth Worth, Texas. Within a year, six other districts throughout the country that were interested in improving the educational performance of minority and disadvantaged students signed letters of agreement with The College Board to participate in the project.

EQUITY 2000 set out to break the cycle of tracking students, particularly minority and disadvantaged students, who are most negatively affected by it. To do this, The College Board helped create district-wide policy changes, established ongoing professional development, helped improve school involvement with students’ parents and families, developed academic safety nets, formed school-community partnerships, and maintained data on the students’ achievement.

In each district, a core group that included teachers, counselors, principals, and other members of school hierarchies would be trained in methods of working with students and cultivat-
can do this,” said Mialovich. “And we are getting more kids with a transcript that gives them more options.” His most memorable experiences during his years implementing EQUITY 2000 were the phone calls he received from many Latino parents asking whether their children could attend lower-level courses out of concern that they wouldn’t make it in the higher-level ones. To this, Mialovich would tell them that he believed their children could be successful in the higher levels, and then went on to list the ways in which EQUITY 2000 would help (tutoring, Saturday academies, summer school programs, college assistance, and programs at San José State). “They would respond by saying to me, ‘That’s great! No one ever told me that about my daughter.’ I can’t tell you how many times I’ve heard that,” he said. “EQUITY got us to look at parents and students in the eye and say, ‘Yes, we can do this.’”

San José hasn’t been the only place where EQUITY 2000 has implemented drastic change within school systems in order to bring about equity in education. From New Haven, Connecticut, and Richmond, Virginia, to Milwaukee, Wisconsin, EQUITY 2000’s six-year pilot phase, from 1991 to 1997, included 700 schools and nearly half a million students. Since then, into its dissemination phase, a total of 22 districts throughout the country have been involved.

The College Board, a nonprofit organization composed of nationwide educators, has for the longest time been associated with standardized tests such as SATs. It has served as a gatekeeper to higher education. Through programs such as EQUITY 2000, The Board has moved into a role beyond that of gatekeeper. The organization is now systematically intervening to help motivate, prepare, and connect students to college. It has been a leader in the national school reform movement, proving beyond a shadow of a doubt that students are capable of succeeding in the more challenging college preparatory classes and thus of increasing their chances of going to college.

The results in EQUITY’s pilot program sites are impressive.

Ninth grade enrollment in Algebra I or higher increased from 16,527 to 33,816 across the pilot sites, an increase from 44 percent to 92 percent. Of these figures, Latino enrollment went from 38 percent to 55 percent. Although not as high, the results for geometry enrollment also increased dramatically. From 1991 to 1998, the percent of ninth grade students who passed Algebra I by the end of ninth grade rose from 40 to 66 percent across pilot sites. More ninth graders passed Algebra by the end of 1998 than were even enrolled at the start of the project. Also, the number of students taking AP exams increased at various sites.

EQUITY 2000 has been incorporated into The College Board System, which includes other professional development and reform strategies that will be available to all 50 states, and more school districts have become involved. Meanwhile, in those districts that were part of the pilot program, what once was EQUITY 2000 has become institutionalized and has, in many places, moved beyond mathematics initiatives into system-wide subjects such as English and science.

Mary Henry, who began with EQUITY 2000 in 1991 as a site coordinator in Milwaukee, Wisconsin, has personally seen the results that the program achieved for students beyond high school. Since EQUITY 2000, more students from her district have been accepted into universities. The University of Wisconsin has seen a significant increase in the number of students from those schools and has specifically attributed it to higher math abilities. And, said Henry, “More students are earning scholarships of a diverse nature.”

“EQUITY 2000 was the beginning of the reform initiative in our school district. It really shook people out of the doldrums in terms of math. It has put us in a mindset that all students should have equal access, opportunities, and support to succeed. That’s what we’re all about.”

Rafael Rentiera was principal of Silver Creek High School in San José, California, when he first got involved with EQUITY 2000, in 1994. Prior to EQUITY, he had attempted to untrack curricula in his school, but had found it extremely difficult to convince others to do so. When The College Board came along, it facilitated this process and made the idea of eliminating tracking sound reasonable and possible. According to Rentiera, EQUITY 2000 in his school resulted in “a success unparalleled, especially for the underrepresented populations such as Latinos and African Americans.” Before the program was initiated, students enrolled in remedial math, a class often called “Math for Mexicans.” At that time, only 25 percent of students were pre-selected for Algebra I in ninth grade, and these students averaged a 75 percent success rate. Strangely enough, reported Rentiera, once all students were in the same Algebra I class, the success rates became 72 to 74 percent, only slightly lower than those numbers achieved by the “cream of the crop.” These numbers, however, are a vast increase from the 45 percent success rate of students who had once been in remedial courses.

Rentiera remembers how, prior to Equity 2000, he saw many students who had been placed in remedial classes yet seemed much more capable. “They said to me that they were bored,” he said. “The system delivered the message that ‘You cannot do it;’ even when they themselves said, ‘Yes, I can.’” And he added, “I have fought for the rights of my son. I’ve seen it. I’ve seen it with other students. I’ve even had parents of different backgrounds saying, ‘My kids can’t do it because I couldn’t do it. But we are doing it here.’”

The impact of EQUITY 2000 goes beyond success in higher-level courses. The true test is whether all students have an equal opportunity to go to college and complete these years triumphantly.

For Rentiera, there is no doubt that the untracking of curricula has and will continue to produce more college-eligible students. “The minority population has in fact challenged the system and gained admission into four- and two-year universities,” he said. “Students are saying, ‘Yes, I’m going to go to college.’”
Kean University, the largest producer of teachers in the state of N.J., was recently awarded a $1.2 million grant to diversify its education graduates. Project BECA, Bilingual Education Career Advancement, is intended to enhance recruitment procedures, scholarship opportunities, and job placement in high-need school districts. The project also is expected to increase support for minority and bilingual education initiatives.

The University is reputed to have one of the best and largest bilingual teacher education and ESL programs in the densely and diversely populated Garden State. Kean's excellent reputation in the area of scholarship was especially important to receiving the award, says Dr. Annette López, BECA director.

When you write grant applications, she says, "you need to show the strength of the institution, the support services, and the coordination with other programs."

The BECA proposal was primarily written to provide students in Kean's pre-college programs who want enroll at Kean with tuition assistance. BECA is geared toward the needs of LEP, Limited English Proficient, students in primary and secondary schools. According to López, their numbers in grades pre-K–12 have tripled in the last 10 years. Nationally, one out of five children in America is now brought up speaking a language other than English, and Latino children account for 73 percent of the LEP population.

"We need to pay serious attention to LEP youngsters," said López. "We already have Project Adelante (pre-college program), which provides the opportunity for us to reach these children at an early age and teach them valuable leadership skills. BECA encourages them to earn a teaching degree so that they can give something back to their communities."

Project BECA will complement both Project Adelante and another of Kean's pre-college academic offerings—the Orientation to Teaching Careers Program. Begun in the summer of 1988, Project Adelante serves about 200 Latino students from four urban New Jersey school districts, from grades six–12. The students attend classes on Kean's campus on Saturday during the
school year, and spend five weeks on campus during the summer. The teachers in the program come from the same school districts as the students.

Adelante's curriculum is part of the New Jersey Commission on Higher Education’s college-bound program, and is intended to increase high school and college graduation rates among Latino students. The initiative provides these children with academic enrichment in math, science, computers, and the use of technology, and since Adelante is exclusively for Latino children, support in ESL is also provided. However, students must already be in a bilingual education program or have recently graduated from one.

Adelante succeeds primarily because it incorporates key components that studies have shown to be important in maintaining Hispanic students. Cabezudo is pursuing a master's degree in counselor education.

As a young girl coming from the Dominican Republic, Cabezudo could not speak a word of English. The Adelante program proved a tremendous help to her because it enhanced her English skills and provided her extra help in doing homework.

"The people in Adelante were like family to me. Without the program, I wouldn't have been able to accomplish so many of my goals, such as continuing my education," said Cabezudo.

Looking back upon her involvement with the program and the education curriculum at Kean, Cabezudo said the whole process of becoming a teacher seemed very natural, mostly because she was cultivating her teaching skills.

If you're looking for a motivational speaker, consider James Arcilla. A peer liaison in the Center for New Students, James is enthusiastic about life's opportunities and excited about Kean. The first in his family to attend college, James is out to make the most of it. "I try to take advantage of every opportunity at Kean because I'm here for a reason," says the math major. "I'm not satisfied unless I know I've done the very best I can do.

And James wants freshmen to succeed, too. As a peer liaison in the Center for New Students, he looks after the interests of students in the Freshman Seminar he helps teach. For James, the seminar is more than an introduction to college life. It's a chance to inspire students to push their limits. Like Yoda in Star Wars, James insists: "There is no try. Do."

These include parent and family involvement, the use of language and culture of the students for instruction, a high level of cooperation with the school districts, and the availability of role models.

Of the original group of 83 students who began Adelante in 1988, 92 percent have graduated from high school. Nineteen are now in college (12 attending Kean), six have completed B.A. degrees, and two are in graduate school.

María Cepin-Cabezudo is one of Adelante's success stories. She started in the program 13 years ago when she was an eighth grader at the McGuiness Middle School in Perth Amboy, N.J. After finishing Adelante and graduating from high school, Cabezudo attended Kean, earning a bachelor's degree in Elementary Bilingual Education. She now teaches at the same middle school, McGuiness, and also teaches in the Adelante program. Cabezudo loves being a teacher and indicates that her preparation has given her the confidence to do a good job, especially when it comes to classroom management and lesson planning. She believes Adelante is a success because of people like herself, who have come full-circle through the program.

And Cabezudo doesn't mind having an extended workweek, teaching in Adelante on Saturdays. Rather, it is a joy for her to be there, and she hopes to continue doing so well into her old age, if she is allowed, she jokes.

Adelante participants like Cabezudo are important to the program's mentoring component, which provides each student with a classroom teacher men-
tor, a faculty mentor, and a university mentor. Students who complete Adelante and attend Kean, in turn, remain in the program as tutors. Many are recruited into teaching careers, but some will pursue other academic degrees. Those who graduate will in turn be helped with job placement, especially in urban school districts.

"Many of these students come from families with very special needs," said López. "Many are immigrants themselves. Some of their parents work two and three jobs just to make ends meet. So, attending the University is a 'super-big' luxury." Besides helping with tuition, BECA also provides money for college fees and books.

The response by student recipients to project BECA has been positive and filled with expressions of gratitude. Participants feel relieved that the financial help they are receiving will leave them with more time to focus on their studies. "We can really study now," is a response that López hears often from her students.

Overall, López believes BECA will help provide the University with a stronger base for recruiting, retaining, and training bilingual teachers. But it will also support Kean's Orientation to Teaching Careers Program. This program addresses on behalf of students from New Jersey's largest high school—Elizabeth High School—by helping juniors and seniors explore a career in teaching. The students use the same foundations of teaching text as Kean's own sophomores, and they tutor children in elementary schools. This provides them with a valuable "hands-on" experience in the classroom, says Dr. Ana María Schumann, dean of the School of Education.

The high school participants also visit Kean's campus several times during the year so they can be accredited to college. They meet with financial aid representatives and admission directors, as well as with education professors who speak with them about college life and provide workshops about teaching. But most importantly, says Schumann, the students spend an entire residential week at the Kean campus where they work with education faculty and students in the childcare center.

"I think it is very important for them to have access to this program—in order to encourage them to go into teacher education. This provides them with a "hands-on" experience with children, and a realistic view about what teaching is all about. We try to encourage them early to consider teaching as a career."

After obtaining experience in the field, some students might decide a career in the classroom is not for them, Schumann says, but at least they have had early exposure.

But the real goal of all the initiatives, says Schumann, is diversification of the teaching profession. There are few people of color in the profession, even as the population of Latino and African Americans increases. The majority of teachers are still White females. So, says Schumann, different means of recruiting people into the teaching profession are strongly needed. One way to accomplish this is Kean's approach—exposing students at a young age, as well as strategically targeting students in other ways.

"Kean has been successful in encouraging teachers of color, particularly Latino teachers, into the teaching profession. We rank sometimes 15-17 in the numbers of degrees awarded to Hispanics," says Schumann, an impressive standing, given the number of colleges in Florida, California, and New Mexico that have large Hispanic populations.

Moreover, the University has targeted the whole pipeline of potential future instructors. This includes very young people in middle school and high school, teacher's aides, and career-changers. Kean is also working with community colleges to develop articulation agreements so that undergraduates can make an easier transition from a two-year to a four-year institution. This is especially important for Latino students, who often begin college careers at a two-year institution.

"Through programs such as BECA, prospective teachers become motivated to succeed," says Schumann. "Kean University prides itself on cultural diversity, and these efforts to produce an increased number of minority educators demonstrate this fact."

It is likely that project BECA will help a great many students in Kean's pre-college programs achieve their academic dreams. And as Maria Cepin-Cabezudo exclaimed, "If I am so excited about Project BECA, I can imagine how the kids feel."
The Changing Nature of Work in the 21st Century

Computer Literacy and Internet Skills a Must for All Teachers, Part two

BY ROANNE ANGIETTO, ED.D.

Part One of this article, I considered some of the ways in which technology and demographics are changing work and society, and the possible implications for Hispanics. Part Two looks at what the changes mean to educators and how the new style of work is changing the place in which work is done.

Academics might argue the intrinsic value of education, but publicly funded education does have the responsibility of providing a skilled workforce. Educators must, therefore, take notice of these trends and prepare students for a very different future than that of students of only a generation ago.

Although educators like to say that their goal is to teach students critical thinking, in reality, the emphasis is often placed on acquiring a predetermined set of facts. Education must now live up to its promise to focus on teaching people how to learn.

Today, the knowledge explosion makes the acquisition of other than the most basic facts almost irrelevant. Instead, we must learn how to find and evaluate the most up-to-date and accurate information. To do so, students must be proficient in the use of computer and communications technology. This, too, is not a one-time acquisition of skills but a continuous learning process as the technology advances. For this reason, it becomes all the more critical for Hispanics to close the digital divide in schools and at home.

Students must also learn to live in a global society. Information, people, and products flow across national borders. Other cultures are accessible to students today in a way that has never been possible before. How can they be taught to appreciate these cultures so they learn to work in increasingly diverse organizations and live in diverse communities? Education must and will play a critical role in this process.

In the recent dialogues about how to improve education, all sides seem to agree that teachers at every level must have more cultural sensitivity and play an active role in promoting awareness that will help ease conflicts and misunderstandings among diverse groups.

The continuous changes in technology and demographics are accompanied by simultaneous changes in work. This means that life's previously linear path from school to work to retirement to death must be rethought. Life will now, more often than not, be cyclical—from school to work to school to work and so on. Each of the cycles will require some new learning experience, whether it be in a traditional school, or via the Internet, or TV, or some medium we have not yet discovered. Not only must the workforce constantly be retrained, but also, those who prepare the workers must continually retrain. Thus, the work of teaching will itself undergo many changes.

We would all like to think that as educators, we are also lifelong learners. For many that is true; for some, perhaps, that has not been the case. But for all, this is now a necessity. How can a teacher with a conscience or a sense of professionalism enter any classroom today without some knowledge of the computer and the Internet? How can we competently teach process writing without word processing? How can we teach languages without accessing websites from the countries where those languages are spoken?

How can we teach science without knowing the latest developments? How can we teach literature without finding the latest analyses of contemporary and classical works?

And so, for many of us who are trying to "keep up," we must focus on two or perhaps three disciplines—our basic teaching area, technology, and the appropriate use of technology in our teaching area. As a college teacher today, I not only prepare my lesson the way I always did, but I also develop a PowerPoint presentation to accompany it, and add notes and assignments to my website. Teachers, too, join the ranks of the overworked as technology adds more and more to our workload.

We also must face the challenges that come as an increasing amount of education and training is offered online. Colleges and universities are struggling to provide teachers with the resources needed to adequately develop and teach online students. It is a process that requires computers, Internet connections, course designers, technical support, graphic artists, perhaps video and audio technicians. The amount of time and money required to mount these efforts can be staggering and out of reach for many poorer schools. Since Hispanic students are more likely to be concentrated in low-income, inner-city neighborhoods, their schools often lack the resources even to introduce these options. Many community colleges, where the majority of Hispanics begin their undergraduate studies, are struggling to catch up with the distance-learning movement.

Administrators and teachers alike worry about how to monitor the quality of these online offerings. After all, in the past, a bad teacher was hidden behind the closed classroom...
doors. Now, that teacher might well be on display for the entire world to see on the Internet. The for-profit sector sees money to be made from online education. Organizations such as Phoenix University are encroaching on the territory of more traditional schools, prompting concern and debate on whether or not this competition is good or is a threat to quality. How do we protect our "territory" from the Phoenix Universities, et al.? Or, should we?

The distance-learning phenomenon is paralleled by a similar trend in work—the office without walls or borderlines. One of the more interesting perspectives on the changing workplace is where work is taking place. As Grulke (1997) says, "In the new global economy, the lines between home and the workplace, occupation and recreation, time zones and international borders, have been blurred. Your work is no longer where you are. Your work is what you do."

Prior to the industrial revolution, work in the agrarian society was based in and around the home. The industrial model centralized work in the factory and fostered the development of the city as workers moved to be near the factories. Later, with advancements in transportation, the railroad and, most significantly, the automobile and the accompanying highway system, workers no longer needed to live near work, and we saw the development of the suburban bedroom community. Traffic congestion, urban blight and white flight, and the aging city infrastructure caused many organizations to establish corporate centers in these suburban communities. Consequently, we added the phenomenon of suburb-to-suburb and city-to-suburb commuting to the previous model of suburb-to-city commuting.

We now have a whole new form of commuting, telecommuting, bringing us full cycle back to the workplace of the agrarian age—the home. No longer must the worker go to a centralized factory or office. With the advances in communications and computing, much of today's work can be done anywhere, anytime—and the anywhere is often at home. And that home does not have to be near the employer's formal workplace. Workers can be thousands of miles away from their employer and often, perhaps, in other countries.

Some envision that telecommuting will redistribute population as did the industrial revolution. No longer will the residential suburbs empty out during the day as more people work—and learn—at home. Others envision a rebirth/renovation of the cities as unneeded offices and factories are converted to residential spaces.

Workers see many advantages to telecommuting. It is an opportunity to avoid traffic, to save travel time. It lets the worker adapt the workday to his or her normal daily rhythm rather than be bound to the 9-to-5 schedule. Those who need to work without interruption find the empty house is a better alternative than the crowded office. For some, the advantage of telecommuting lies in the opportunity to work in sweats or pajamas, or to forego shaving or putting on makeup. For others, it might solve some of the problems of relocating when partners change jobs or get transferred. Or it might mean they can remain in the workforce after an illness or disability that would otherwise make it impossible for them to travel to work. Perhaps child care or elder care arrangements can be accommodated more readily by the telecommuter.

Once employers overcome their concerns about accountability from the telecommuters, they realize that there are significant savings from having a substantial portion of their workforce out of the office. They need less office space and fewer parking places, consume fewer utilities, and so on. Some employers no longer allocate fixed office space to employees. They maintain a hotel-like arrangement for office space, allocating it on a daily or weekly basis to those who come in while the other employees are "tethered" to the office by laptops, cell phones, fax machines, and the like.

Joining the telecommuters who work at home are many of the free agents from the contingent workforce.

All these home-based workers face some new challenges. As of this date, very few employers offer either instruction in working outside the office or thorough training in the technology. Among the common problems with which telecommuters must deal is setting up a home work space that is organized in a way that is suited to their tasks, is ergonomically sound, and offers the privacy that is needed. Most importantly, they must also establish ground rules for themselves, co-workers, family, and friends. When are they "at work," and when are they at leisure? When can they be reached? When can they be disturbed? Family and friends often assume that because you work at home, you are free to run errands, take over child care, etc. This might be especially difficult for some whose families do not understand that telecommuting is full-time work. Co-workers might not set limits on when and how often they call.

Home-based workers must also face the isolation that comes from working alone. Although some might revel in the peace and quiet and find that it spurs creativity, virtually everyone needs some social contact. Maybe a quick chat with the mail carrier or FedEx delivery person might be sufficient. For others, scheduling lunch meetings or after-work trips to a gym might meet their needs. Those for whom the personal touch and social interaction are very important might be extremely dissatisfied with home-based work. For these latter workers, alternating an in-office and at-home schedule might be more suitable.

In addition to these common problems, different personality types will face further issues. The workaholic needs to learn how to set limits. When working in the office, the normal rhythm of office life signals when you work through lunch or work late. At home, these signals are absent, and, unless family members come home to interrupt, the tendency is often to keep on working. Even after stopping for a meal or a quick break, the computer often beckons home-based workaholic back for the "just an minute" that turns into hours. What starts out to be a flexible work arrangement can turn into a 24-hour-a-day, seven-day-a-week job.

Conversely, the procrastinator needs to set some definite work hours for the opposite reason. Without the watchful eye of a supervisor or the signals from co-workers that it's time to go back to work, the person who is not a self-starter can easily fall behind. The coffee break in front of the TV turns into a morning's worth of watching. The yard work or housework that will "only take a minute" lasts all day. It is especially difficult for the procrastinator if others are in the home. When interruptions that these others might bring are coupled with the individual's own tendency to put off work, it is a recipe for disaster.

The type of work we do, the place we work, the tools we use, and the skills we need today are clearly not the same as those of our parents, nor are they the same as those that many of us experienced when we first entered the workplace. Although we might not be able to clearly see into the workplace of the future, we know that it will be very different from that of today.

As the proportion of Hispanics in the workforce grows, they bring unique strengths to the new workplace. Many have bilingual skills that can often lead to higher salaries in the corporate world, the healthcare and service sectors, and in the technology and media fields. However, we still face significant challenges in helping Hispanics get the education and training they need to become valued members of the changing workforce, prepared to function effectively in a knowledge-based, highly technological economy.

Dr. Angiello is a professor of business administration at Bergen Community College in Paramus, N.J.
Great Support and Synergy in UTPA-Baylor Program

Premed Honors Students Offer Hope for South Texas

By Julia Benitez Sullivan

Between her rigorous studies, hospital rounds, and patient examinations, Marissa Gómez doesn’t have time to dwell on the shortage of physicians in South Texas. But the 24-year-old student at Baylor College of Medicine in Houston is part of the solution.

The McAllen Rowe High School valedictorian was one of the first recruits to the Baylor Premedical Honors College at The University of Texas–Pan American in 1994. Located in Edinburg, in the heart of the Rio Grande Valley in South Texas, UTPA has been credited with helping increase the education and income level of Hispanics in the region by providing educational opportunities to an area that had been educationally underserved.

The Premedical Honors College, in partnership with Baylor College of Medicine, has continued the tradition of offering educational opportunities to the region. The program was established to address the critical need for healthcare providers in South Texas—where 13 counties have been identified as “medically underserved” by the U.S. government.

“I feel I’m carrying the torch, and it’s a heavy torch, but I am not going to set it down,” said Gómez, who likely will be the first of the Honors College alumni to return to the Rio Grande Valley to practice medicine.

The UTPA-Baylor program—the first of its kind in the nation—has already significantly increased the number of South Texas students accepted to medical school.

The program has been so successful, it prompted Dr. William H. Cunningham, former chancellor of The University of Texas System, to challenge UT medical schools to develop similar programs. The University of Texas Medical Branch in Galveston was the first to step up to the plate, developing a comparable partnership with UTPA and three other South Texas universities: UT-Brownsville, UT-El Paso, and Texas A&M International University in Laredo.

Statistics from 1996, when the first Premedical Honors College students were sophomores, were discouraging. Only four of 30,000 students enrolled in the five undergraduate universities in South Texas were accepted to medical school.

Two years later, when Gómez and her classmates graduated with baccalaureate degrees from UTPA, the number of students entering medical school had jumped to 41—all but three from UTPA.

Of the eight successful Premedical Honors College graduates that year, four were accepted at Baylor, and four attended other medical schools. Of the four at Baylor, three decided to hold off a year before attending, leaving Gómez to carry on alone her first year.

Last year, 16 UTPA students were enrolled in medical school. Of the 40 pre-med majors in the class of 2000, 26 successfully matriculated to medical school—nine to Baylor.

“Our students’ success in being accepted to medical school is exceptional,” said Dr. Scott Gunn, associate professor and health professions advisor at UTPA. “We have a 65 percent acceptance rate; the national average is 35 percent.”
There are more than 60 pre-medical students in the pipeline, including Cecilia Sánchez, 21, a senior in the Premedical Honors College.

"This is a really good opportunity and the best path for where I want to go in life, which is to become an M.D.," said Sánchez, who was salutatorian at St. Augustine High School in Laredo. "One of the things I most appreciate is how I've gotten to know my fellow Premedical Honors College classmates. We all have the same classes, goals, and concerns."

While only a few UTPA students accepted to medical school were enrolled in the Premedical Honors College, the program is credited with the increase in enrollment and stature of the general premedical program, said Cindy Wedig, UTPA Premedical Honors College coordinator.

"UTPA already had a strong science program, producing three to four medical students each year, which was significantly higher than the other undergraduate schools in South Texas," Wedig said. "What this program did was to increase the visibility and stature of the undergraduate program as well as open up an avenue for talented Valley students to enter Baylor College of Medicine."

Thirty-one of 53 students who matriculated to medical school in 1998, 1999, and 2000 were Premedical Honors College graduates.

Cynthia Luna, 23, was one of the Class of 2000 graduates not in the Baylor program. The La Feria High School 1996 valedictorian had her pick of undergraduate institutions, but her first choice was UTPA.

Luna, now a first-year student at Southwestern Medical School in Dallas, said attending UTPA allowed her to live at home while completing her undergraduate degree.

"I'm very proud to have attended UTPA," Luna said. "I had heard that Pre-med had a very good science program. Now that I'm in medical school, I can attest to that fact. It prepared me very well for medical school."

Luna's brother, Michael, 22, a senior premedical student at UTPA, shares his sister's goals and many of her views. Class valedictorian in 1997, Luna said he misses his sister after spending three years carpooling to the University, attending classes and studying with her.

"Attending UTPA is like being with family," said Luna, who was named the state's outstanding junior by the Texas Association of Advisors for the Health Professions last year. "You study together, take classes together, and hang out together."

Last year, Mexican Americans comprised only 389 of the 16,221 students who entered medical school. UTPA alone provided three percent of those students.

"This is certainly a pioneering effort," said William A. Thomson, Baylor College of Medicine Center for Educational Outreach director. "Given the success of the program to date, we fully expect the Premedical Honors College will continue to have a strong, positive impact on the number of students from South Texas who access medical school."

Most of the Pan American students have said they plan to return to the Valley so set up their medical practices—which is exactly what UTPA and Baylor officials hoped would happen.

"As outstanding high school students, these young men and women set their goals to become medical doctors," said Dr. Ralph D. Feigin, Baylor College of Medicine president. "I'm confident the education and training these students receive will result in a major difference in the medical care available in South Texas."

The program provides a rigorous, structured curriculum and a highly supportive environment designed to prepare students for medical school. Standards are high, but students receive conditional acceptance to Baylor College of Medicine as well as four years of tuition and fee waivers at both UTPA and Baylor.

One factor that sets apart premedical students at UTPA from other undergraduate institutions is the preceptorship with local physicians. Most universities offer preceptorships to graduate-level or medical school students. Gómez, who is a third year medical student, said working with local physicians at the undergraduate level and the bonding among students in the program have helped her succeed in medical school.

"To get into medical school is so competitive," Gómez said. "I tell high school students that I speak to that if they are committed to becoming doctors, they should enroll at Pan Am. It's the best thing there is.

"At UTPA, you attend your classes together, you study together, you are given opportunities that most pre-med students don't get as undergrads, and you go into the program knowing that you will be accepted to Baylor if you meet all the requirements."

McAllen pediatrician Dr. J. J. Saenz has offered preceptorships to UTPA students since 1995, when the first group of Premedical Honors
College students completed their first year. Saenz said one of the benefits is the bonding with local physicians.

"Most physicians stay in the area where they were trained," Saenz said. "The Premed Honors College allows students to maintain their connection to the Valley, so there is a better chance for them to come back."

In 1999, UTPA's investment to the Premedical Honors College was $154,730, most of which covered tuition and fee scholarships. Baylor's investment was $184,000 for tuition and fees and $600,000 to help defray administrative costs.

The program scored a major coup in June, when UTPA was awarded a $750,000 grant to be distributed over three years from Houston Endowment, Inc.

"Houston Endowment funds have made it possible to offer a larger variety of preceptorship and research opportunities to students in the program," said Wedig. "The additional funds are expected to improve the rate of matriculation of UTPA premedical students to medical school and to enhance the transition of high school students to college by offering an outreach program."

The grant will also allow the University to redirect funds to similar or new programs, said Roland S. Arriola, vice president for External Affairs.

While the university has a reputation for producing well-prepared premedical students, those in the Premedical Honors College and Galveston program are considered the cream of the crop.

Students are selected for the program based on academic performance, SAT scores, letters of recommendation, and other factors. They must have completed and passed at least four years of high school science and mathematics, including chemistry and elementary analysis/pre-calculus, and at least one year of computer technology.

Finalists are interviewed by Baylor's Medical School Admissions Committee in much the same format used for medical school applicants.

"The University recruits students in high school, and those accepted into the Premedical Honors College are grouped together for their undergraduate classes.

Once in, students must maintain at least a 3.2 cumulative grade point average and 3.0 GPA in science. And they must score at least 25 on the Galveston has a federal mandate to serve disadvantaged students."

Melissa Ochoa, 23, a second-year medical student at Baylor, said UTPA is a "gem" that is sometimes overlooked.

"There is still a misconception in high schools that students think they could get a better education at UT-Austin or other schools," Ochoa said. "But I try to discourage students from thinking that way."

(Pictured l to r): Farah Ahmed, Cecilia Sanchez, and Samson Cantu, all seniors in the University of Texas-Pan American's Premedical Honors College

Medical College Admissions Test to matriculate to Baylor.

"This is an academically rich program at UTPA, with a high degree of structure and expectations," Thomson said. "But there is also lots of support, good synergy, the opportunity to work with physicians in preceptorships as undergrads, and summer enrichment programs at Baylor and other medical schools."

The Galveston program is similar to the Baylor-UTPA program, with one major difference—students must be educationally or financially disadvantaged, said Gunn, who advises pre-dental and pre-optometry students along with the premedical majors.

"Students in the Galveston program are subject to the same rigorous academic standards, and they also are guaranteed admission to medical school," Gunn said. "But the Pan Am students are doing just as well [at Baylor College of Medicine] as the students from Harvard or any other tier university," she continued. "The biggest benefit, though, is that you go into medical school with a ready-made support group—your classmates from UTPA. We all study together and support each other."

The shortage of physicians in South Texas reached critical mass as the region's population growth nearly doubled that of the rest of the state and quadrupled the growth in the rest of the country. There are fewer than 10 physicians practicing medicine in Starr, Zapata, Jim Hogg, Brooks, and Duval counties, and no practicing physicians in Kenedy County.

Even Hidalgo and Cameron counties—with 464 and 361 doctors, respectively—don't have nearly enough physicians to meet the areas needs.

The University of Texas-Pan American is working with the UT Health Science Center-San Antonio Medical School on a similar program that might be online as early as fall 2001, Gunn said. And, UTPA President Dr. Miguel A. Nevarez is discussing implementing similar programs with other Texas medical schools.

Gunn said the programs will help close the gap in the number of Rio Grande Valley natives, and especially Hispanic residents, who attend medical school. UTPA enrolls the largest percentage of Mexican Americans in the country and is second only to Florida International University in Miami in the number of bachelor's degrees awarded to Hispanics, according to a report published in the May 5 issue of this magazine.

While progress has been made, there is still much to be done before narrowing the gap in access and participation.

The U.S. Department of Health and Human Services reported "underrepresentation of minorities in the health professions severely limits access to culturally competent care for the 21 million minority Americans who are medically underserved." Compounding the shortage are reports that Hispanic physicians care for twice as many Hispanic patients as do non-Hispanic doctors.

The success of UTPA students in accessing and excelling in medical school will go a long way in closing the gap, said Gunn.

"Those not in any of the programs still benefit from the instruction and support afforded to all pre-med students," Gunn said. "It's an exciting time to be in the Valley, both in terms of the growth at UTPA and in seeing the fruits of our labor."

New Executive Order to Help Latinos Access Federal Services

WASHINGTON, D.C.

Accessing the federal government is a simple task for most Americans. Because they are fluent in English, many are able to obtain various services, such as health and education, without a problem. In contrast, many in the Latino community face significant hardships when attempting to access such services. They often must depend on family or friends for translations because they have yet to reach English fluency. However, as recently mandated by the president, all federal agencies and programs receiving federal funding must now ensure that their services are accessible to limited-English-proficient (LEP) individuals.

President Clinton issued Executive Order 13166, "Improving Access to Services for Persons with Limited English Proficiency," on August 11, 2000. This Order mandates that organizations receiving funding through federal departments or agencies comply with Title VI of the Civil Rights Act of 1964, which prohibits discrimination against individuals on the basis of race, color, or national origin. The Order requires agencies and programs receiving federal funding to "take reasonable steps to ensure meaningful access to their programs and activities by LEP persons."

The practical effects of this Order are extremely far-reaching. Generally, it means that no one may be denied health, education, housing, or other services just because they are not fully English proficient. The impact will affect any entity that receives federal funds. Providers will need to make stronger efforts to publish information in multiple languages, as well as employ translators or bilingual staff in their offices.

Currently, many federal services are inaccessible to eligible recipients due to language barriers. Thus, the Order stipulates that each federal agency review its programs and affirm that LEP individuals have equal access to services normally provided in English. In conjunction with this effort, federal agencies must draft amended Title VI guidelines. This Executive Order can serve to clarify that, under Title VI, any federal agency or program denying LEP persons equal access to federal services would be violating federal discrimination laws.

The Department of Justice, which will oversee this initiative, has compiled an "LEP Guidance" document to assist agencies in meeting Title VI compliance standards. Each agency and program is expected to submit its plans for LEP accessibility to the Department of Justice. Federal agencies and programs will have approximately four months to update their services.

NACE Survey Shows College Hiring to Increase 23.4 Percent

BETHLEHEM, Pa.

Employers forecast a whopping 23.4 percent increase in college hiring, according to Job Outlook 2001, a survey of employers' hiring intentions as they relate to new college graduates. The annual survey is conducted by the National Association of Colleges and Employers (NACE).

"This year's hiring projections shatter last year's 14.5 percent projected increase," said Marilyn Mackes, NACE executive director. "Employers are putting a lot of emphasis on college hiring as a way to combat the tight labor market." Employers expect to make nearly one-fifth (19 percent) of their job offers to new college graduates.

Hiring projections look strongest in the West, where employers project college hiring to rocket up 33.6 percent, but all regions of the country project healthy hiring increases. Employers in the South anticipate a 26.9 percent jump, Northeastern employers forecast a 20.5 percent increase, and companies in the Midwest expect college hiring to rise 17.9 percent.

In addition, a wide variety of employers are expected to be active this year. Among manufacturers, computer and electronic products companies, electrical and electronic machinery manufacturers, scientific equipment makers, and chemical companies are expected to be most energetic. Among service-sector employers, consulting companies, accounting firms, merchandisers, communications services organizations, insurance companies, and computer systems design firms are expected to be most enthusiastic about college hiring.

At the bachelor's degree level, competition will be fiercest for candidates with technology-related degrees and business degrees, but liberal arts majors are also expected to attract their share of attention.

Employers are also looking to plug the gaps in their workforces with international students; 38.6 percent of respondents said they plan to recruit international students for permanent full-time positions within the United States. Among those planning to hire international students, four out of five (82.6 percent) say they will seek students with engineering degrees in the computer sciences. In addition, 57.6 percent expect to hire international students with business degrees.
The Power of One Vote Says AAUW

WASHINGTON, D.C.

Aside from the vote tallying controversy in Florida, the November 2000 elections reminded us of what we have always known: women voters care about the issues and are willing to take that concern to their communities and the voting booth. And thanks to the American Association of University Women (AAUW) Voter Education Campaign activities across the country, women have increasing opportunities to voice their concerns about issues that effect their families.

“Our campaign is about getting the woman who is undecided or doesn’t regularly vote to drop that ballot into the box,” said AAUW public policy director Marion Stillson. “AAUW’s Voter Education Campaign distinguishes the candidates based on the issues, not party politics, and shows women exactly how their votes impact every aspect of their lives.”

• Members conducted about 200 public forums to inform women about the candidates running for local, state, and federal office and the issues at stake.
• Members contacted some 200,000 women voters through phone banks in the weeks before the election to encourage women to vote.
• Members distributed more than 1 million voter guides for 140 congressional races. Voter guides itemized candidates’ stands on key issues such as sending tax dollars to public, not private or religious schools; letting doctors and their patients, not insurance companies, make health care decisions; protecting a woman’s right to choose; and limiting the purchase and use of guns.
• Dozens of organizations (the NAACP, Business and Professional Women, the National Council of Jewish Women, MANA: A National Latina Organization, the National Council of Negro Women, the League of Women Voters, and more) worked with branches and states to hold forums, conduct phone banks, and distribute voter guides. The Arlington, Va., branch worked with Latina and African American groups to sponsor a candidates forum. Publicity targeted cable TV stations popular with racially and culturally diverse audiences. In North Dakota, AAUW members developed a voter guide for the at-large congressional district and collaborated with colleges and youth groups to distribute the guides statewide.

AAUW couldn’t conduct exit polls to determine the number of women who voted because they saw the AAUW voter guide or received a phone call from an AAUW member. But AAUW was, in many communities, the leading nonpartisan women’s organization getting out the vote. Said Stillson: “Members can be proud to play such a powerful role in our nation’s elections.”

Ellen Buchman

The Ayn Rand Institute on the Education Reform Fraud

MARINA DEL REY, Calif.

During the presidential campaign, both George Bush and Al Gore promised education reform. These promises range from increasing spending to more schools with computers to giving more standardized tests. Each of these “solutions” is built on false premises and will fail to save the education system, said a senior writer for the Ayn Rand Institute.

“The purpose of education is to teach students how to think, so they can lead productive, independent lives,” said Andrew Bernstein, a philosophy professor at Pace University (N.Y.). “Money, school uniforms, standardized tests, and a myriad of other proposals, including single-sex schools, school prayer, and smaller class sizes, won’t do anything to help students to learn how to think. What we need instead is an education revolution, focusing on the essential: the curriculum.”

Bernstein outlined the curriculum that would save the American education system and our children’s minds:

• Reading, emphasizing phonics and great literature
• Writing, emphasizing grammar and logical structure
• Arithmetic, emphasizing the connection of numbers and math to practical reality and actual problems
• History, emphasizing causal connections and the intellectual ideas driving historical events

• Science, emphasizing the observation of facts and the logical progression of integrating those observations into scientific principles

In an effort to help identify the problems facing the education system and offer a solution to its ills, the Ayn Rand Institute launched its Rational Education website (http://education.aynrand.org). The site includes essays on topics ranging from Ayn Rand’s “Tax Credits for Education” to “Why Johnny Can’t Think” to the Institute’s “Student Survival Guide.”
NASA Awards Grant to Cal State-Northridge

A joint team from CSU-Northridge's (CSUN's) College of Engineering and Computer Science and College of Science and Mathematics was awarded a nearly $2 million grant from NASA to study the reliability of microelectronic components in lunar and planetary spacecraft.

Three CSUN faculty members and more than 30 undergraduate students during the coming four years will work closely with the Jet Propulsion Laboratory in Pasadena to identify and possibly prevent equipment problems that can occur during space missions.

Another important program goal will be to recruit and encourage women and minority students into graduate studies and career options in the space sciences field, where they are underrepresented.

Leadership Development Institute Held in Poconos

Students from Pennsylvania's State System of Higher Education universities attended the 11th Annual Robert D. Lynch Student Leadership Development Institute. The conference, sponsored by the Pennsylvania Black Conference on Higher Education, Inc., is designed to help African American and Latino students develop skills and qualities essential to leadership on college campuses. It offers workshops that examine cross-cultural communications, interpersonal relations, inclusive environments, and cultural awareness.

Among the speakers were Ambassador Julio Chaves of Costa Rica; Sarian S. Bouma, once a down-and-out mother with nothing to feed her baby and who now heads a company with more than $3.4 million in annual revenue; and Farai Chideya, a 28-year-old journalist and author who has written for both TV and print media on topics from African American issues to punk rock.

DuPage Offers Support for Latinos

Because of the rapid growth of the Latino population in the western suburbs, College of DuPage (IL) and the Illinois Board of Higher Education are co-sponsoring Strong Education for Latinos' Future (SELF), a project that encourages students to complete high school and make a successful transition to college.

This free program provides educational information—academic and financial—and personal support to any student who shows an interest in higher education or needs academic guidance.

"Our goal is to increase, retain, and prepare more Latino students for the professional world," said Adriana Sastith, director of SELF. "DuPage and SELF want to make the Latino population aware of their knowledge and capacities and help them reach higher and better opportunities."

SUNY-Brockport Hosts Lecture on Guatemala

Juana Maurilia Gómez-Pérez and Randall Shea presented "The History of a Guatemalan Village" at the State University of New York-Brockport.

For three decades, from the 1950s-1980s, Guatemala suffered under military dictatorships sponsored and supported by the U.S. government. When the village Santa María Tzéja was attacked by military death squads, Gómez-Pérez and other survivors fled to Mexico. After more than a decade of exile, most of the residents returned to try and resettle their homeland.

Shea and Gómez-Pérez spoke about how this attack happened in the context of U.S. foreign policy and how U.S. citizens can work for change in these policies. They also shared the history of violence faced by the Mayan population, and Gómez-Pérez shared her personal experience as a survivor of state-sponsored violence.

Professor Andrea Parada helped organize the lecture. Shea and Gómez-Pérez have been occasional visitors to her class, Latin American Women.

Bethune-Cookman Fondly Remembers Barragan

Officials at Bethune-Cookman College (BCC) in Florida issued a statement in remembrance of Dr. Roberto Barragan, Jr., who recently passed away.

"Loved and respected by all who were blessed enough to come in contact with him, Dr. Roberto Barragan, Jr., was a giant of a man. This native of Mariana, Cuba, left a special mark on his alma mater, Bethune-Cookman College."

Barragan was the second Cuban to enroll at B-CC. (His uncle, Dagoberto Casanova, was recruited by Dr. Mary McLeod Bethune as B-CC's first Cuban student.) Throughout his career, he served many institutions, had many affiliations, and was noted for his genuine concern for senior citizens. At B-CC, he was director of admissions, recruitment, and alumni affairs; director of continuing education; and first advisor to what was then known as the Hispanic American Student Association, upon its founding in 1990.

Hispanic Enrollment Rises at San Antonio Health Science Center

Hispanics constituted 22 percent of the graduate and undergraduate student population in the fall at the UT Health Science Center-San Antonio, the highest percentage in the past five academic years, according to preliminary enrollment figures.

The Health Science Center is officially designated by the U.S. Department of Education as a Hispanic-Serving Institution, based upon its undergraduate Hispanic enrollment of 36 percent. It provides extensive outreach programs to attract minority students to health and science career professions.
Students in all minority groups total 41.8 percent of the Health Science Center enrollment, compared to 37.2 percent the previous year.

**CU-Boulder Receives NSF Grant**

The University of Colorado (CU)-Boulder received a five-year $2.5 million grant from the National Science Foundation (NSF) Alliances for Graduate Education and the Professoriate. The grant is designed to enhance recruitment, retention, and support for minority doctoral students in science, math, and engineering.

CU-Boulder will offer 10 new chancellor's teaching assistantships to encourage first-year students to become involved in Boulder campus teacher training programs from the beginning of their doctoral studies.

The grant also provides funding for the new Colorado PEAKS Alliance, a joint venture between CU-Boulder and Colorado State University to develop a model of minority graduate education delivery in which graduate schools across the state coordinate recruiting pipelines and support programs, with faculty participation.

**Tulsa Dean Wins Leadership Award**

In Oklahoma, Tony Alonso, Tulsa Community College (TCC) Northeast Campus dean of student services, received the Year 2000 John Starks Foundation Community Service Leadership Award.

Alonso, TCC community outreach program coordinator, was recognized for his outstanding leadership “in creating and implementing community programs of substance and quality that address diversity awareness and multicultural outreach.” As a direct result of efforts by Alonso and his staff, minority student enrollment at the Northeast Campus has increased by nearly 300 percent in his 10 years as dean of student services. Alonso also coordinates the annual Day of Vision—a nationally recognized multicultural enrichment program that helps prepare high school students for college.

A member of the Hispanic American Foundation, Alonso has received a Freedom Fund community award from the NAACP, the “Keeping the Dream Alive” award from the Martin Luther King Jr. Commemoration Society, and an award for exemplary student development programs from the National Council on Student Development.

**Nazareth Stresses Education of Health Care Professionals**

Nazareth College in New York was awarded a five-year $160,000 grant from the U.S. Department of Health and Human Services, Health Resources and Services Administration, to help improve the health care of older adults in the greater Rochester area. The grant's emphasis at Nazareth College will be to educate healthcare professionals about cultural diversity and aging issues.

Nazareth College is one of five local organizations to participate in the Finger Lakes Geriatric Education Center consortium. The grant will allow Nazareth College to develop, implement, and evaluate a series of educational programs for health services professionals focused on interdisciplinary training. The programs will enhance knowledge and skill in providing culturally competent and congruent health care for older adults from diverse backgrounds. An upcoming conference to educate healthcare providers from all fields on promoting healthy aging among individuals from diverse backgrounds will take place March 30.

**Garden City Holds Hispanic Student Day**

For the 4th straight year, Garden City Community College (GCCC) hosted Kansas high school juniors and seniors during Hispanic Student Day, providing an opportunity to learn about campus support services, university programs, careers, and empowerment through both education and political involvement.

The day's events included a series of opportunity sessions covering careers in law enforcement, cosmetology, health care, and other fields; and segments such as “Empowerment through Education” and “Empowerment through Politics.”

Lydia Gonzales, former director of the LULAC (League of United Latin American Citizens) Education Service Center in Garden City, was a featured speaker along with Garden City mayor Tim Cruz and other leaders. Gonzales has earned a series of state and national awards for her efforts to improve educational opportunities for Hispanic students.

**NYU Names Associate Dean of Faculty**

New York University named Dr. Randy Martin to the new position of associate dean of faculty and interdisciplinary programs at the Tisch School of the Arts. He is administrative director of the school's new department of art and public policy as well as professor of art and public policy. Martin is former professor and chair of the department of social science at the Pratt Institute.

Martin's formal education is in sociology, but he came to New York 20 years ago to dance and study with Hanya Holm, Alwin Nikolais, and Murray Louis. In addition to dance, he has performing and teaching experience in theatre and clowning in Cuba, Italy, Nicaragua, and the United States.

**Human Rights Experts Speak at LIU-Brooklyn**

Long Island University (LIU)-Brooklyn's Latin American and Caribbean Studies (LACS) program, chaired by Professor J. Patrice McSherry (pictured), held its inaugural seminar, "The Quest for Justice in Latin America," featuring two human rights experts.

Raúl Molina Mejía discussed "The Struggle against Impunity in Guatemala." He is a visiting scholar at Columbia University's Institute for Latin American Studies, a consultant for Guatemala Human Rights Commission-USA, and the international representative of FORUM, a Guatemalan pro-democracy organization. Before being forced into exile in 1982, he was a university professor, dean, and rector at Guatemala's National University.

LACS is a new interdisciplinary minor offered at LIU-Brooklyn.
Yucatán Honors UC-Santa Barbara Professor

While visiting her hometown of Mérida, Yucatán, in Mexico, UC-Santa Barbara professor Sara Poot-Herrera was guest of honor at a reception at which Victor Cervera Pacheco, governor of the state of Yucatán, presented her with the Antonio Mediz Bolio Literary Medal.

The medal honored Poot-Herrera for her solid research in Mexican literature, particularly contemporary Mexican literature, and for her work on the life and writings of Sor Juana Inés de la Cruz. Poot-Herrera was later told that officials in Mérida also plan to name a public school in her honor.

"It was a big surprise," said Poot-Herrera, a member of the department of Spanish and Portuguese at UC-Santa Barbara. "When I was nominated for this award, I was not told about it. I was on vacation and went to see my family in Mérida, but suddenly my trip became official!"

Texas A&M Promotes Estrada

Joseph A. Estrada, former director of admissions at Texas A&M University, is now assistant provost for enrollment.

Texas A&M Executive Vice President and Provost Ronald G. Douglas said Estrada has a strong background and extensive experience in working with current and prospective students, including Hispanics and African Americans. He also said Estrada played a major role in the changes that have been adopted over the past year in more aggressively recruiting all categories of students throughout the state.

Estrada earned his undergraduate degree at George Mason University and his master's at Texas A&M University-Kingsville. He is succeeded as director of admissions by Frank B. Ashley III.

In an effort to become "a consensus 'top 10' public university" by 2020, Texas A&M commissioned its Race and Ethnic Studies Institute to determine what it can do to attract more minority students.

ACCD Director Receives Hispanics Extraordinarios Award

Dr. Eduardo Conrado, district director of international programs for the Alamo Community College District (ACCD) in Texas, was named one of the Hispanics Extraordinarios de 2000 by the La Prensa Foundation, Inc., for his contributions to the community in education.

Conrado has been involved in the development, implementation, and administration of international education programs for the past 20 years. At ACCD, his department has been awarded $8 million in grant funding for the development of international programs. He has organized and administered faculty exchange programs with Spain, student exchange programs with Germany, and a cultural exchange program with Peru and Mexico.

The La Prensa Foundation, Inc., is a non-profit organization dedicated to promoting educational opportunities in the form of scholarships awarded to Hispanic students with limited resources.

News from Borough of Manhattan Community College

- According to a study conducted by Community College Week, Borough of Manhattan Community College (BMCC) in New York graduates more minority students from associate's degree programs than does any other college in the Northeast. Among the nation's top 100 associate's degree producers, BMCC ranked second in awarding associate's degrees to minority students. Among those awarding associate's degrees to Hispanics, BMCC ranked fourth nationwide.
- The BMCC Cisco networking training program was the 2000 winner of the James C. Hall Jr. Exemplary Program Award. Participants selected for the program, which helps develop technology skills, have been mostly unemployed or under-employed Spanish-speaking residents of Upper Manhattan.
- BMCC received a GEAR-UP grant from the U.S. Department of Education to improve the academic preparation of selected at-risk middle school students in Community School District 5, located in the Harlem Empowerment Zone of Manhattan. "Our goal is to prepare and encourage more children to attend college and succeed in it," said Sandra Rumayor, director of outreach programs at BMCC.

Cruz Named Outstanding Professor at Cal State L.A.

California State University-Los Angeles named Cheryl A. Cruz a 1999-2000 Outstanding Professor.

A professor of accounting in the College of Business and Economics, Cruz has been a faculty member at Cal State L.A. since 1992. She has taught courses in principles of accounting, managerial accounting and taxation of individuals, corporations and shareholders, and partnerships and partners—receiving consistently superior evaluations from her students. Her commitment to her students is reflected in her tireless efforts to provide them with excellent career opportunities. For six years, she has been faculty adviser for the campus chapter of Beta Alpha Psi and faculty adviser for the Arthur Andersen Tax Challenge.

Cruz has been active in at least 30 university, college, and department committees, and in 1999 she received the College of Business and Economics award for "Excellence in Service" in recognition of this work.

Recent Exhibits at Lehman College Art Gallery

- Lehman College Art Gallery (N.Y.), in collaboration with En Foco, exhibited works by the four winners of En Foco's New Works Photography Awards. The annual New Works Awards program supports photographers of African, Asian, Latino, and Native American heritage in creating a portfolio of in-depth documentary/fine art photographic work.
- Colombian artist Monika Bravo created a virtual aquarium in the gallery as part of her video and sound installation "Symphysis." Taped in aquaria throughout the world, projected images filled the room with swimming sharks and drifting jellyfish, while viewers' shadows and silhouettes created a human presence and became a part of the displaced environment.
• "Syncretism" examined the work of María María Pérez Bravo, Albert Chong, and Mario Cravo Neto, artists whose photography incorporates imagery relating to the spirituality, beliefs, or ritual objects associated with Santeria, and Candomblé, as the religion is known in Brazil.

• Aixa Requena’s "Antilles Textures" captured glimpses of the rich tapestry of life in Puerto Rico. Mixing sources—personal, historic, popular culture, and the mythic—Requena created multiple layers of meaning in her paintings. For example, window-like frames in her paintings reveal photo-based images of domestic scenes, viewed as vignettes.

Cuban Diplomat Speaks at Miami University

Cuban diplomat Carlos Alzugaray spoke of "Reflections on U.S.-Cuban Relations" at Miami University in Ohio.

Alzugaray studied at the international division of Sophia University, Tokyo, Japan, and at the University of Havana, Cuba, where he earned a bachelor's degrees in diplomacy and in the history of Cuba, a master's degree in contemporary history, and a doctorate in historical sciences.

Since 1980, he has been on the faculty of the Raúl Roa Garcia Institute for Advanced International Studies and an adjunct professor at the University of Havana. He was also a foreign service officer, posted at Cuban diplomatic and consular representations in Japan, Bulgaria, Argentina, Canada, Ethiopia, Kenya, Belgium, and Luxembourg.

Padrón Named "Cervantes Outstanding Educator"

In Florida, Dr. Eduardo J. Padrón, president of Miami-Dade Community College, was honored with "The Cervantes Outstanding Educator Award," presented by Nova Southeastern University (NSU). The award, given to Padrón for his leadership in advancing the education of Hispanic students, is sponsored by NSU’s Fischler Graduate School of Education and Human Services and its Hispanic advisory board.

Padrón is the former chair of the board of the Hispanic Association of Colleges and Universities. He serves on the White House Commission on Educational Excellence for Hispanic Americans and on the editorial board of The Hispanic Outlook in Higher Education, and recently was appointed to the American Association of Colleges and Universities' Greater Expectations national panel.

Pictured left to right: Armando Rodríguez, chair, Hispanic Advisory Board; H. Wells Singleton, dean, Fischler Graduate School; Padrón; and Rey Ferrero, Jr, president, NSU.

Bermúdez Holds Interim Post at Houston-Clear Lake

Dr. Andrea B. Bermúdez became interim associate vice president for academic affairs at the University of Houston (UH)-Clear Lake.

Bermúdez joined the University in 1980 when she became chair of education-related studies for its School of Education. She was associate professor of education for seven years and named full professor in 1987. Since then, Bermúdez has been the School of Education’s director of the Research Center for Language and Culture and chair of foundations and professional studies.

"Dr. Bermúdez is an excellent choice due to her many years as both a senior faculty and department chair," said Edward J. Hayes, senior vice president and provost. "She is a recognized scholar in bilingual education, and she has numerous publications in refereed journals where she shares her findings with colleagues on a national level."

Rhode Island Hosts Multicultural Media Fair

Rhode Island College held its third annual multicultural media fair, "Promising Practices" sponsored by the Dialogue on Diversity Committee, the day-long program featured workshops, exhibits, and video screenings.

Diana Lam, superintendent of the Providence schools, the keynote, spoke on "Student Diversity and Great Expectations: Reforming Schools So That All Students Benefit" in 1999. Lam issued a new strategic plan for the Providence school system. "Rekindling the Dream" called for a community-wide effort to improve student literacy and other changes to focus the school system and community’s resources on teaching and learning.

"Promising Practices" places K-12 educators in meaningful conversation with a variety of resource individuals, exhibitors, and diversity experts. The Rhode Island Department of Education approved continuing education credits for the program.

Chemical Society Scholarship Assists Minorities

The American Chemical Society (ACS) announced a special scholarship geared toward minorities.

The ACS is sponsoring a scholarship program for qualified applicants who want to enter a variety of chemical fields—chemistry, biochemistry, chemical engineering, and other chemical science disciplines. The program is designed to encourage Hispanic/Latino, African American, and American Indian students to pursue undergraduate college degrees in the chemical sciences and chemical technology.

Latina Holds Empowerment Seminar

Latina magazine held its first-ever Latina Empowerment Seminar, a full day of panels, workshops, seminars, and networking on a wide range of subjects, with information specifically geared towards Hispanic women.

"A primary objective at Latina has always been to maximize the magazine's relationship with its loyal subscribers," said founder and publisher Christy Haubegger. "The Latina Empowerment Seminar is another way for us to reach out to our readers and help them to reach their full potential."
Latina, with guest host Cynthia Santana, a New York area Fox 5 News anchor, also honored the nine "Latinas of the Year" who were profiled in the September issue. The following nine women addressed the seminar participants with inspirational stories in their respective fields: Julia Álvarez (literature); Pam Aguirre (business); Christina Apalera (entertainment); Lydia Camarillo (politics); Jennifer Gutiérrez (sports); Dr. Nancy Ruiz (science); Vicki Ruiz (photographed), chair of the Arizona State University Chicana and Chicano studies department, and Virginia Sánchez Korrol (photographed), head of the Brooklyn College Puerto Rican and Latino studies department (education); and Cristina Saralegui (media).

Salvadoran Educator Speaks at Siena

Elsa Miriam Linares de Quiatamilla, discussed "Cross-Border Solidarity Takes on Corporate Globalization" at Siena College in New York. Born in Santa Ana and educated at the University of Central America, Linares teaches primary school in La Paz, El Salvador, and is on a municipal council. In the 1960s and '70s, she participated in two critical work strikes, one of which led to El Salvador's first collectively bargained contract. She has been a member of ANDES, the National Teachers' Association of El Salvador, for 30 years.

During the 12-year Salvadoran civil war (1980-1992), many ANDES members were killed. Today believing strongly that education is a human right, ANDES is a strong voice in the anti-privatization struggle. The group is working to halt the Salvadoran government's plan to privatize the school system, convinced that this would deny access for a majority of Salvadorans.

UNM Raza Center Captures Grant

The Resource Center for Raza Planning (RCRP) within the University of New Mexico (UNM) College of Architecture and Planning was awarded a grant of nearly $400,000 from Housing and Urban Development (HUD). The grant came through HUD's Hispanic-Serving Institutions Assisting Communities (HSIAC) program.

"The grant will provide assistance in Albuquerque's South Valley, an area where 80 percent of the population is of Hispanic origin," said Teresa Córdova (photographed), principal investigator for the grant and associate professor in community and regional planning. The federal grant is a HUD initiative to improve the presence of higher education in communities.

The Raza Center is partnering with the Rio Grande Community Development Corporation on the project. An aspect of the grant allows Córdova, her students, and community partners to construct and implement a small business incubator which will provide the conditions necessary for fragile businesses to grow and flourish.

Stetson Hosts Symposium on Cuba

Stetson University (Fla.) hosted "The Promise of Cuba," an international symposium on contemporary Cuba.

One of the featured speakers was Huber Matos, who spoke on his years as a guerrilla fighter and political prisoner in Cuba. In 1959, Matos served as a comandante, the highest rank in the rebel army of the Cuban revolution, alongside Fidel Castro. When it became apparent to Matos that Castro was turning the revolution toward communism, Matos objected strenuously. Castro accused Matos of plotting to overthrow the government and had him jailed. Matos survived more than 20 years in Cuban prisons before his release. He has since left Cuba.

Other speakers included Waldo Levy, poet and director of the Center of Community Culture in Havana; Rigoberto Fabelo, director of the Center for the Study of Inter-American Relations, Havana; Dr. Ana-Julia Jatar, an economist and senior fellow at the Inter-American Dialogue in Washington, D.C., and author of The Cuban Way; Dr. Ilana Mankin (photographed), Stetson associate professor of Spanish; and Dr. Robert Stiler, Stetson associate professor of foreign languages. Stetson senior Belkys Torres helped organize the symposium.

Library of Congress Publications

De la Vega, the music manuscript "The Magic Labyrinth" was included in a 733-page volume, Music History from Primary Sources, published by the Library of Congress in July. The two pistols colored graphic score is the month of May in the Library's 2001 wall calendar, "Classical Music."

De la Vega was born in Havana, Cuba, in 1925. He served for a time as cultural attaché at the Cuban Consulate in Los Angeles before assuming several duties in his native Cuba, including dean of the School of Music at Universidad de Oriente and music advisor to the National Institute of Culture. He toured the United States as a lecturer from 1952-1959 before becoming a music professor at Sac State College State College, which eventually became California State University-Northridge. He taught there for 34 years before retiring in 1993.

Texas A&M-Kingsville Researchers Receive Grants

Two Texas A&M University-Kingsville chemistry department researchers received approximately $240,000 each from National Institutes of Health/Minority Biomedical Research Support (NIH/MBRS) for a two-and-a-half year period spanning 2000-2002.

Dr. Maribel González-García and Dr. Rafael Pérez-Ballesteros submitted supplemental proposals to the NIH under a grant directed by Dr. Enrique Massa (photographed), assistant biology professor and director of the NIH/MBRS program. In this grant, González-García and Pérez-Ballesteros will join Massa and Dr. John C. Pérez, biology professor, and Dr. Jamie C. Lawrenz, assistant animal and wildlife sciences professor.

Pérez-Ballesteros' laboratory studies the process of nerve regeneration. González-García's research interest focuses on the study of the process of apoptosis or programmed cell death.
Diversity Leaders Attend Conference at Nebraska-Lincoln

More than 200 of the nation's most promising leaders of diversity explored a wide range of issues facing people of color in academic settings at the fifth annual national conference, "People of Color in Predominantly White Institutions," at the University of Nebraska-Lincoln. Two of the featured speakers/presenters were Refugio I. Rochín and Juan R. García.

Rochín is director of the Smithsonian Center for Latino Initiatives in Washington, D.C., and research and lecturer on Latino studies, Hispanic enterprises, and the advancement of understanding of Latino contributions to U.S. history, culture, and society. García, an author, is a consultant to colleges, universities, public and private agencies, and school districts. He specializes in Mexican immigration, Mexican American history, and ethnic and multicultural studies.

The conference brought together those who share an interest in the concerns of people of color in a manner designed to facilitate open dialogue, communication, peer support, and mutual respect.

Texas A&M-Corpus Christi Student Benefits from Internship

Osaldo Cantú, a Texas A&M University-Corpus Christi student majoring in geographic information science (GIS), received a minority undergraduate research fellowship (MURF) from the California Institute of Technology. MURFs are given to undergraduate students of African American, Hispanic, Native American, Puerto Rican, or Pacific Islander origin. Cantú was one of 25 students accepted of about 400 contenders.

The program gives students the chance to work in state-of-the-art laboratories and be guided by top scientists in the field that matches their expressed interests. "Most of the research I performed would not be related to GIS work produced in the business aspect," said Cantú, "though research such as mine is being performed by research institutions around the world."

Queensborough First CUNY School to Offer Web Registration

Queensborough Community College was the first of the City University of New York's 20 institutions to launch a Web-based registration system.

With the new system, Queensborough students can register for courses using any computer with Internet access or by using a touch-tone telephone; can instantly access a variety of student records and services; and have options previously unavailable to those registering in person, such as checking transcripts while simultaneously viewing class schedules, and the ability to view only those courses not yet filled.

California-Irvine's Villarreal Receives Presidential Award

Luis Villarreal, professor of molecular biology and biochemistry, and director of the University of California-Irvine's minority science program under the School of Biological Sciences, received the 2000 Presidential Award for Excellence in Science, Mathematics, and Engineering Mentoring.

The National Science Foundation honored Villarreal for his work in developing science education and research programs that assist minority students at the high school and university levels. He manages a number of federally funded programs created to help minority students excel in the sciences. The award comes with a $10,000 grant, which will go toward support of the minority sciences program and its activities.

Business-Higher Education Forum Names Director

The Business-Higher Education Forum, a partnership of the American Council on Education (ACE) and the National Alliance of Business (NAB), appointed Jeremiah L. Murphy as its new director. Murphy is vice president of urban development in the Washington, D.C., office of the Siemens Corporation. Forum members are chief executives from U.S. businesses, colleges and universities, and museums.

NAB is focused on increasing student achievement and improving workforce competitiveness. ACE is a comprehensive association of the nation's colleges and universities dedicated to higher education issues and advocacy on behalf of quality programs.

New Mexico State to Produce More Minority Doctorates

With a $25 million grant from the National Science Foundation (NSF), New Mexico State University's (NMSU's) Graduate School is coordinating a program aimed at tripling the number of science, mathematics, and engineering doctorates awarded to minority students in New Mexico.

In partnership with two other doctorate-granting institutions in New Mexico, the University of New Mexico and New Mexico Tech, the Graduate School will use grant funds to create the New Mexico Alliance for Graduate Education and the Professorate (NM-AGEP).

The NM-AGEP will be coordinated by the graduate schools at all three universities, with NMSU as the lead institution on the grant.

Gimenez Attains Position at Pace University

Shelly Gimenez was named Pace University's (N.Y.) associate vice president for academic affairs in the new division of adult and professional education, announced Marilyn Jaffe-Ruiz, provost and executive vice president for academic affairs.

Gimenez is responsible for program development, marketing, and recruitment of adult students within Pace University's schools and colleges, and for developing outreach programs to new corporate clients. She is interested in developing new programs to encourage former students to complete their degrees and to provide management-skills and other training to corporate employees.

Gimenez, who spent the last four years as dean of continuing education and distance
learning at William Paterson University (N.J.), "has worked with a variety of populations and understands what it means to provide high-quality service to adult students," said Jaffe-Roz.

**UT-Austin Launches Institute of Transnational Law**

The University of Texas (UT)-Austin School of Law created the Institute of Transnational Law, which will serve as a bridge for students from Latin America and Europe to come together for graduate studies in North American law and European law.

Each year as many as 10 Latin American students will study at UT-Austin towards the J.D. degree in North American law, and 10 students from Latin America will study at University College, London, towards the J.M. degree in European law. At the same time, a similar number of European students will study at UT-Austin for either the J.D. or the J.M. in North American law, and another group of European students will join their Latin American counterparts in London studying for the J.M. in European law. This cooperative program is scheduled to begin in the fall of 2001.

**Portland Community Mural Dedication Has Multicultural Appeal**

Portland Community College (PCC) in Oregon celebrated the artistic contributions of mural artist Hector H. Hernández.

"The subject of this mural reveals the cosmos in its two dimensions, the macro- and micro-cosmos," said Hernández (pictured). "Placed at the center of this cosmic order, the new human being emerges from a new spirituality, sharing the best contributions from different cultures. PCC is therefore the ideal place to develop the spiritual achievements of the new human being."

With the guidance of Professor Luz Maciel Villarroel, 24 students from PCC’s Oregon Leadership Institute (OLI) worked on the project and helped raise funds to pay for the artist’s services. The OLI is a leadership program for Hispanic high school students who are mentored by PCC students. "I think it demonstrates one of the core values the college holds, that we embrace the many cultures that make up our student population," said Mandy Ellerton, coordinator in the student activities program at the Rock Creek campus.

**Trujillo: The Death of the Dictator**

By Bernard Diederich

Generalissimo Rafael Leónidas Trujillo, known to his countrymen as "The Goat" for his many excesses, died in a hail of bullets after 31 years of brutal rule over the Dominican Republic. This is a minute-by-minute account of the plot to kill Trujillo and the ferocious wave of revenge that ensued before his regime collapsed.

**Double Victory: A Multicultural History of America in World War II**

By Ronald Takaki

World War II history is told through the lives of ordinary, ethnically diverse Americans: a Tuskegee pilot wanting to fly and fight for freedom, a Navajo code-talker using his native language to transmit battle messages, a Mexican American woman riveting B-29 bombers in an airplane factory, a Japanese American feeling betrayed by his own government, and a Jewish American soldier at Buchenwald pressing human ashes into his palms so that he would never forget what he had seen.

**Proletarians of the North: A History of Mexican Industrial Workers in Detroit and the Midwest, 1917-1933**

By Zaragoza Vargas

This study provides historical insights into the work and life experiences of Mexicans in 1920s Detroit at a critical juncture—when Mexicans were becoming mass-production workers in the auto industry. It supplies a historical base for the study of the formation of the Mexican industrial working class in the Midwest and offers a new interpretation of the history of Mexican labor in the United States.

**What You Have Almost Forgotten: Selected Poems by Gyula Illyés**

William Jay Smith, ed.

Like Robert Frost in New England and Robert Burns in Scotland, Gyula Illyés came from the common people. Many of his poems bear witness against injustice from the vantage point of his peasant roots. His work is direct, vivid, colloquial, and varied.

Introduction by the editor.

**Chicanas/Latinas in American Theatre: A History of Performance**

By Elizabeth C. Ramírez

The author shows how Latina/Latino theatre has evolved from its pre-Columbian, Spanish, and Mexican origins to its current prominence within American theatre. The
presence of women in the political arena has left its mark on the evolution of the American stage as they take their place in world culture and performance history.

paper. Indiana University Press. (800) 842-6796.

Documents of Dissidence: Selected Writings by Dominican Women
By Daisy Cocco De Filippis

The author brings the voices of Dominican women within hearing range of Latin Americanists and Caribbeanists who at present dominate a good portion of the discussion of feminism and gender issues. Scholars in colloquia will find it less easy to justify the exclusion of Dominican voices from consideration of the positions women have taken in and outside the sphere of the written text.

paper. CUNY Dominican Studies Institute. (212) 650-7496.

Birthday Parties in Heaven: Thoughts on Love, Life, Grief, and Other Matters of the Heart
By Ana Veciana-Suárez

Ana Veciana-Suárez, a nationally syndicated columnist, writes about family and the private life with great humor and insight. This book explores subjects as diverse as the pain of living in exile, the frustration of swimsuit season, the complex relationship between sisters, and the allure of motorcycles.

paper. Plume. (800) 788-6262.

Aztècs, Moors, and Christians: Festivals of Reconquest in Mexico and Spain
By Max Harris

In villages and towns across Spain and its former New World colonies, local performers stage mock battles between Spanish Christians and Moors or Aztecs that range from brief sword dances to massive street theatre lasting several days. Max Harris seeks to understand the "puzzling and enduring passion" of both Mexicans and Spaniards for festivals of mororos and popes---performances that "officially" celebrate the triumph of Spanish Catholicism over its enemies.

paper. University of Texas Press. (800) 252-3206.

Astronomy: A Self-Teaching Guide
By Dinah L. Moché

Astronomy is a self-instructional book with a unique approach to the topics that are most often presented in a college-level course. It is designed so that you can easily and quickly learn basic principles and contemporary advances. Dr. Dinah L. Moché is a professor of physics and astronomy at the City University of New York.

Black Slavery in America: An Annotated Bibliography
By Parvin Kooory

This book makes available for the first time a comprehensive annotated list of more than 900 non-print media items in different formats (audiocassettes, filmstrips, records/ tapes, kits, 16 millimeter films, slides, and videocassettes---both half-inch and quarter-inch) on Black slavery in the United States, intended for both beginners and experienced users.

cloth. Scarecrow Press. (800) 462-6420.

20,000 Spanish American Pseudonyms
By Daniel C. Scroggins

This is a compilation of writers' names and their pen names collected from a number of sources, many of which drew heavily on earlier collections. Like all the collections before it, it cannot claim to be complete. Its goal is simply to be useful.

cloth. Scarecrow Press. (800) 462-6420.

By Francesco Cordasco and Eugene Bucchi

With the 1968 edition, this text provided the first systematic effort to delineate the needs of the growing Puerto Rican mainland community, with particular reference to Puerto Rican children and their experiences in the schools. The favorable reception of this book by many working with the Puerto Rican community on the mainland has shown that its readership has not been limited to teachers and to educational contexts.

1982. 457 pgs. ISBN 0-8108-1506-0. $34.50
cloth. Scarecrow Press. (800) 462-6420.

Latin American Studies: A Basic Guide to Sources, 2nd ed.
Robert A. McNeil and Barbara G. Valk, eds.

This is a (revised and enlarged) mediaform-based, introductory guide to research on Latin America in the social sciences and...
humanities. It is designed to serve both as an adjunct to formal university courses in Latin American bibliography and research methods and as a basic handbook for other researchers embarking on investigations involving the region.

**Ethnic Minority Health: A Selected, Annotated Bibliography**

By Craig Haynes

This bibliography presents primarily monographic literature on ethnic minority health topics, focuses on the major ethnic minority groups in the United States, and annotates and organizes this literature into a single volume.

**Milenios de México**

By Humberto Musacchio

Published by Hoja Casa Editorial, this is the only up-to-date, full-color, Spanish-language encyclopedia about Mexico. The 3-volume set contains more than 8,000 full-color photographs, illustrations, maps, and graphs. Its pages contain a wealth of information about Mexico’s states, municipalities, political parties, geography, architecture, and indigenous groups, past social movements, and current organizations, including the projects that will prepare Mexico for the future.

*Many publications featured in this section are available through amazon.com.*

---

**CONFERENCES**

**AAHE Conference on Faculty Roles & Rewards**
February 1-4

This 9th annual conference will focus on the changing professoriate and the two developments most salient in driving that change—new technologies and the generational shift now taking place in the faculty. At the Tampa Marriott Waterside in Tampa, Fla.

**AAHE 2001 National Conference on Higher Education**
March 24-27

The American Association for Higher Education presents “Balancing Private Gain and Public Good.” The conference will anticipate issues, debate ideas, highlight innovation and best practice, foster leadership and professional development, and provide networking opportunities.

**ACE 83rd Annual Meeting**
February 17-20

The American Council on Education will meet on “Shaping Public Policy with New Leaders.” At Marriott Wardman, Park Hotel, Washington, D.C.

Contact: (202) 939-9410; website, www.acenet.edu.

**AACE 12th International Conference**
March 5-10

The Association for the Advancement of Computing in Education presents the Society for Information Technology and Teacher Education 2001 12th international conference.

Contact: e-mail, info@aace.org; website, www.aace.org/conf.

**2001 ASCD Annual Conference and Exhibit Show**
March 17-19

Among the Distinguished Lecturers at this year’s conference of The Association for Supervision and Curriculum Development will be Jane Escalante. The conference theme is “Reaching for Balance: Resolving Educational Dilemmas.” In Boston.

**National Association for Ethnic Studies Annual Conference**
March 29-31

This year’s conference theme: “Race, Ethnicity, and Pedagogy in the 21st Century.” In New Orleans.

Contact: Susan L. Rockwell, (602) 965-2977; e-mail, susan.rockwell@asu.edu.

**International Mentoring Association Annual Conference**
March 29-31

This year’s conference theme: “Diversity in Mentoring.” In Washington, D.C.

Contact: at Western Michigan University, (616) 387-4174.

**NCA-CIHE Annual Meeting**
March 31-April 2

**2001 Southern Region CUPA-HR Conference**
April 1-4
The Southern Region of the College and University Professional Association for Human Resources, the premiere national association of higher education human resource professionals, will convene its conference at the Richmond Omni Hotel, Richmond, Va.

Contact: Stewart Mixon, chair, (252) 328-4009; e-mail, mixons@mail.ecu.edu.

**Center for the Study of Diversity in Teaching and Learning in Higher Education National Conference**

April 18-21

"The Global Perspective: Teaching, Learning, and Student Equity" includes, among other conference highlights, concurrent sessions on critical thinking skills, curriculum, pedagogy, collaborative and interdisciplinary learning, and learning communities. At Hotel Inter-Continental, Miami.

Contact: Dr. Toni Forsyth, (408) 864-8993/8995; website, www.TeachLearn.fhda.edu.

**AACRAO 2001 Annual Meeting**

April 22-25

The 87th annual meeting of the American Association of Collegiate Registrars and Admissions Officers. At the Washington State Convention and Trade Center in Seattle, Wash.

**NISOD 2001**

May 27-30

The National Institute for Staff and Organizational Development, along with the Community College Leadership Program, present their 23rd annual international conference, "Making a World of Difference..." a unique mix of professional development activities for a unique audience of outstanding community college administrators and faculty. In Austin, Texas.

Contact: John Roueche and/or Suanne Roueche, (512) 471-7545.

**The Barahona Center Summer Workshops 2001**

June 25-27

July 9-11

July 23-25

The Barahona Center for the Study of Books in Spanish for Children and Adolescents at California State University-San Marcos will again hold three three-day workshops: Books and Reading Strategies for English Language Learners in Grades K-8, Books in Spanish for Young Readers, and (conducted in Spanish) Literature in Spanish for Children and Adolescents/La literatura en Español dirigida a los lectores infantiles y juveniles. At CSU-San Marcos.

Contact: Isabel Schon, director, (760) 750-4070; e-mail, ischon@csusm.edu.

**Deaf Education Technology Conference**

June 25-29

"Instructional Technology and Education of the Deaf: Supporting Learners, K-College," the first symposium in seven years to present current research and state-of-the-art practice for educators of the deaf, will be hosted by the National Technical Institute for the Deaf. At Rochester Institute of Technology, Rochester, N.Y.

Contact: E. William Clymer, (716) 475-6894 (v) or (716) 475-6704 (tty); e-mail, techsym@rit.edu; website, www.rit.edu/~techsym.

**2001 NACUBO Annual Meeting**

July 28-31

The annual meeting of the National Association of College and University Business Officers. At the New York Hilton and Towers and at the Sheraton New York Hotel and Towers in New York City.

---

**MADRID - SPAIN**

**SUMMER 2001**

Center For International Studies

Scholarship Program for Teachers, Counselors & School Administrators

Three or six weeks of intensive Spanish language study from July 5 to July 26, 2001, or July 5 to August 16, 2001, at the Center for International Studies in Madrid, Spain.

Includes: round trip airfare, instruction, three meals a day and room accommodations at Colegio Mayor Santa Maria de Europa of Universidad Complutense of Madrid. From: $1,999.

For information, Write or Fax your request to:

Center for International Studies
42-32 De Bruin Drive
P.O. Box 451
Fair Lawn, NJ 07410-0451

Book Review

By Rafael Hernández-Rodríguez

To be or not to be (included), that is the question. In *The Western Canon*, Harold Bloom attempts the impossible—to list the literary masterpieces of all time. The enterprise is unachievable simply because it is absurd for one individual to pretend to know and understand deeply all the cultural and linguistic traditions that constitute the so-called Western World. And because determining the value of each tradition’s literature implies an operation less innocent than we have been led to believe. On one hand, the reader might feel compelled to admire Bloom’s determination and boldness; on the other, it is evident that the selecting of “masterpieces” is not as untainted as is suggested.

The lack of innocence resides precisely in that the process of including and excluding authors and works cannot be “founded upon severely artistic criteria” only, as Bloom claims. What becomes clear is that selection takes into consideration aspects such as the social and economic influence of this or that country, the prestige of a culture supposedly higher and more sophisticated than others, and the relationship between a particular culture and the culture of the listmaker.

The importance of the English language in the past century, for example, has contributed to the dissemination and valorization of much of English literature. And due to the influence of the United States in international affairs, its culture has become synonymous with the culture of the 20th century—as with French culture and the 19th century, and Italian culture and the Renaissance. All this is inevitable and even beneficial since cultural exchanges only enrich our experience of the world. However, when these exchanges become a one-way imposition reluctant to negotiate, we can say that something is wrong with the equation.

Such is the case with Bloom’s book. What stands out in the selection is the absence of works and authors, particularly those writing in Spanish and Portuguese. Surely Cervantes is discussed in *The Western Canon*; however, Camões is not mentioned even once. Of course there is a chapter on Latin American writers, but not a single Brazilian author is brought to the discussion, and when Bloom speaks of Ibero American poetry, all he has to say is that this poetry comes from Whitman. “Whitman’s most vital influence has been upon Hispanic America,” declares the critic, somehow dogmatically.

Without any respect for those literary traditions, Bloom interprets, judges, and pontificates about the literatures written in Spanish and Portuguese in the same chapter, ignoring that they belong to a very diverse group of cultures writing in different languages. While most Hispanists would find Bloom’s association odd, it seems very natural to him. Apparently, the critic does not think it necessary to differentiate linguistic and cultural traditions in a region that he imagines as one big block that can be understood by “studding” just a few (the ones more familiar to him) literatures. With astonishing superficiality and a clear lack of knowledge, Bloom throws into the same sack three very different poets: Pablo Neruda, Jorge Luis Borges, and Fernando Pessoa, a poet who is a literature in himself. And in Bloom’s interpretations, the only thing stressed is that all of them read Whitman in the original. But if this is the only aspect that Bloom underlines, the reader suspects, it is because that aspect is the one that pleases the critic the most—or, even worse, the only one he is willing to accept.

It is hard not to wonder again and again while one reads the book whether the attempt is really worth anything. Also, given the generalizations and misinformation about the literatures written in Spanish and Portuguese, the reader asks whether it would not have been better to exclude them, since Bloom clearly could not approach them with the humility, enthusiasm, and open mind of someone not pretending to be an expert in everything.

Although the author says that Latin American literature in the 20th century is “possibly more vital than North American,” the limited number of authors included in his book and the simplicity of the discussion of the ideas they supposedly deal with do not corroborate such a statement. A well-intended reader might feel tempted, after comparing the author’s opinions and the textual evidence, to believe that Bloom is more than generous with his judgments of a “minor” literature.

Without a doubt, literature has a lot to lose here, but more than literature, it is the readers who in the end will lose the opportunity to access other important and valuable literary and artistic expressions since, perhaps because of Bloom’s opinions, those works might never get to their hands.

Dr. Hernández, professor of Spanish and Latin American literature at Southern Connecticut State University, has published articles on Latin American literature and film. His areas of interest are Mexican and Brazilian literatures and cultures as well as film and cultural studies.

Lansing Community College
Where Success Begins

www.waldenu.edu

... where graduate education knows no boundaries!

Busy professionals have turned to Walden University for online graduate programs for more than 30 years. Today, the University is a leader in distance education and many programs can be completed entirely online.

Degrees are offered in:
- Education (M.S./Ph.D.)
- Psychology (M.S./Ph.D.)
- Management (Ph.D.)
- MBA (under development)
- Health Services (Ph.D.)
- Human Services (Ph.D.)
- Public Health (M.S.)

To advance your career and education, go to www.waldenu.edu today.

For further details, e-mail info@waldenu.edu or call 1-800-444-6795 and speak with an enrollment counselor.

Walden University is accredited by the North Central Association of Colleges & Schools.
Learn More about Yourself as You Learn to Help Others.

Prepare for a fulfilling counseling career with a focus on self development and the socio-cultural context of people’s lives.

Consider a Lesley University counseling and psychology program that will help you integrate knowledge and self-awareness with practical experience in the field. Lesley takes a holistic approach to counseling in a supportive learning community that respects students, their values and life experience.

Learn from an exceptional faculty of counseling practitioners. Participate in internships where Lesley students are prized for their preparedness and understanding. Graduates are eligible for licensure as professional counselors in MA and most other states.

In Massachusetts, Licensed Mental Health Counselors are eligible for third-party reimbursement.

Qualified applicants will be reviewed without regard to race, creed, color, age, sex or national origin.
The University of Florida is now the largest metropolitan university in the Southeastern United States, with a student body of nearly 35,500 spread across four campuses. The rich, multicultural atmosphere of the university is evident not only on the main campus, but also at its branches in St. Petersburg, Sarasota-Manatee, New College, and Lakeland. USF promotes delivery systems, curricula, programs and activities that reflect the diversity of South Florida.

The university is currently recruiting for the following faculty positions:

USF is an equal opportunity/equal access/affirmative action institution, committed to excellence through diversity in education and employment.

www.usf.edu • 4202 E. Fowler Ave, Tampa, FL 33620

Florida Gulf Coast University is an Equal Opportunity/Equal Access/Affirmative Action Institution.
University of Wisconsin-Parkside

PROVOST/VICE CHANCELLOR

The University of Wisconsin-Parkside is one of 13 four-year campuses in the prestigious University of Wisconsin System, and is located on a beautiful 700-acre wooded campus bordered by Milwaukee and Racine to the north and Kenosha and Chicago to the south. Founded in 1968, the University serves a diverse student population. The University offers graduate degrees in three disciplines, undergraduate studies in 29 majors, and more than 70 academic programs. It is accredited by the North Central Association of Colleges and Schools. The University’s business programs are professional accreditations from the American Assembly of Collegiate Schools of Business, a recognition only a quarter of the business schools in the United States have achieved.

Responsibilities: The Provost/Vice Chancellor reports to the Chancellor and serves as the ranking executive officer in the Chancellor’s absence. The Provost/Vice Chancellor works with senior officers of other divisions, with faculty and academic staff governance groups, and with representatives of other University of Wisconsin institutions on system-wide issues. The directors of General Education, Assessment, Honors, and the Teaching Center report to the Provost/Vice Chancellor. She/he is responsible for:

- Providing intellectual and administrative leadership in Academic Affairs, including the University’s two schools and their departments, various centers, Information Services (including the Library and Computer Services), Center for Community Partnerships, Grants office, and other academic units; this includes but is not limited to:
  - Academic planning and assessment
  - Budgeting and resource allocation
  - Faculty recruitment, evaluation and retention
  - Programmatic and instructional quality
  - Promotion of the teaching, research, and service mission of the University
  - Fostering participation by academic units in appropriate areas related to the campus’ strategic plan

Qualifications:

- Earned doctorate or appropriate terminal degree from an accredited institution
- Excellence in teaching, research or creative activity, and service which would qualify for tenure at the rank of professor in an academic unit of the University
- Professional experience in management and other administrative responsibilities, including experience in program planning and assessment, and budgetary management.
- Successful experience involving teaching and learning with high quality scholarship, creative activity, and community engagement
- A record of commitment to successful advancement of ethnic and gender diversity among faculty, staff, and students
- Experience in expanding diversity in University programs and curriculum
- Strong oral, written, analytical, and interpersonal skills
- Demonstrated problem-solving ability
- Demonstrated ability to build consensus among faculty, staff and administrators
- Demonstrated awareness of the needs of nontraditional students and experience with nontraditional programs and curriculum

The review for nominations will begin on February 1, 2001. Applications will be reviewed as they are received. To receive full consideration, all materials should be received by February 23, 2001. This position description is also available on our website at: http://www.uwp.edu/admin/AcademicAffairs/provost.html. General information about the University and its programs can be accessed at: http://www.uwp.edu.

Please send a letter, a current Curriculum Vitae/Resume, names of references, and three letters of recommendation to:

ATTN: Terri Spring,
University of Wisconsin-Parkside,
PO Box 2000,
900 Wood Road, Kenosha, WI 53141-2000.
terri.spring@uwp.edu

*The University of Wisconsin-Parkside is an AA/EOE employer, D/M/V/W.

MIT Media Laboratory

Tenure Track Faculty Position

The Media Laboratory is seeking new Faculty. Candidates should have demonstrated expertise in human expression, communication, or learning, and the invention of technologies related to these areas.

Responsibilities include: teaching (graduate and under-graduate), research, and supervision of graduate students. Appointments will be principally at the Assistant Professor level.

Qualified candidates should submit a resume, representative materials or portfolio, the names of three references, and a concise summary of their teaching and research interests by Thursday, March 1, 2001 to: Faculty Search Committee, MIT Media Laboratory, E15-218, 20 Ames Street, Cambridge, MA 02139-4307. Inquiries should be sent to: search@media.mit.edu. For additional information about the Laboratory, see our web page: http://www.media.mit.edu. MIT is a non-smoking environment.

Massachusetts Institute of Technology

Assistant Professor of Physics-Tenure Track
Loyola Marymount University

The Department of Physics at Loyola Marymount University invites applications for a tenure-track faculty position, to begin Fall, 2001. The physics department offers strong undergraduate majors in physics and engineering physics, in addition to service courses. Applicants are expected to have a Ph.D. in physics and a commitment to excellence in undergraduate teaching. The applicant should possess the technical skills necessary to participate in the development and modernization of undergraduate labs. The applicant should plan to continue an active research program. Consideration will be given to research projects that can involve undergraduate student participation. Applicants should submit a curriculum vitae and three letters of reference to:

Dr. Vincent Coletta
Department of Physics
Loyola Marymount University
Los Angeles, CA 90045-8227

For more information about the university and the physics department, visit the website: www.lmu.edu.

Special emphasis is placed on teaching effectiveness, scholarly achievement, and service to the University for purposes of reappointment, tenure and promotion consideration. LMU offers faculty housing assistance. Women and Minorities are strongly encouraged to apply. Salaries are competitive and commensurate with background and experience.

Loyola Marymount University, established in 1911, is the only private Catholic University in metropolitan Los Angeles. Over 6,000 students are enrolled in the colleges of Liberal Arts, Business Administration, Science and Engineering, Communication and Fine Arts, and the Law School. The University invites candidates who desire to participate in a mission based on the Jesuit and Marymount traditions of higher education.

Loyola Marymount University is an Equal Opportunity, Affirmative Action Employer.

LOYOLA MARYMOUNT UNIVERSITY
Faculty Positions:
DePaul University, School of Education, 2000-2001

Well known for its reputation for excellence and as the largest Catholic university in the United States, DePaul University has been educating Chicago for over 100 years. At DePaul, you will work in a collaborative environment that lives its values, supports diversity and encourages professional development. The School of Education's mission is to cultivate urban, professional, multicultural educators, and to provide educational experiences that facilitate social transformation. We encourage applications from candidates who are committed to issues of social justice and knowledgeable about current educational policies and practices that affect youth and education in public and private institutions. DePaul University has a strong commitment to building and maintaining a diverse community and seeks faculty who will enhance this mission.

The School of Education seeks applications for six approved and funded positions, beginning in the 2001-2002 Academic Year: Director of Ed.D. Program * Senior-Level Position: Assistant Professor * Educational Leadership; Assistant Professor * Human Development; Assistant Professor * Physical Education; Assistant Professor * Reading. Assistant Professor * Secondary Education; School actually seeks to build and maintain a diverse faculty. For all positions, the School seeks faculty members who bring a critical perspective to the issues of urban education, diversity, multiculturalism, reflective practice, and social justice.

Director of Ed.D. Program * Senior-Level Position: Responsible for providing leadership and direction for the doctoral program in Educational Leadership and Curriculum Studies. The Director will monitor program quality and create possibilities for further program development, including possible emphases in higher education administration, social and cultural studies, and educational technology. The Director is expected to draw upon the program history and University Mission to elaborate and sustain a vision of the membership of service. Applicants should be prepared to teach graduate courses in the program to graduate students as well as collaborate with students and faculty in research and program development. Strong interpersonal skills and the ability to foster shared working relationships within and outside the University combined with excellent written/verbal communication skills are required. The selected individual should be committed to maintaining/expecting student diversity in accord with the University's Mission.

Position requires an Associate/Full Professor in education with a background in one of the program areas of the School – curriculum studies, early childhood, educational leadership, elementary education, human services and counseling, physical education, language, literacy and specialized instruction, secondary: English, math, science, social studies; social and cultural studies; and educational technology. A strong record of scholarship, which includes knowledge in teaching/research; considerable leadership in higher education; and demonstrated leadership competencies related to program development/implementation must be expressed. Applicants should be prepared to teach graduate courses in the program to graduate students as well as collaborate with students and faculty in research and program development. For all positions, the School seeks faculty members who bring a critical perspective to the issues of urban education, diversity, multiculturalism, reflective practice, and social justice.

Assistant Professor-Educational Leadership: The individual we seek requires expertise in one or more of the following areas: school finance, school law, and policy; to integrate technology into administrative decision making and accountability. Recent administrative experience in a large urban school system with a culturally and linguistically diverse population is preferred. Committed to urban education. Applicant should be prepared to teach graduate courses in the Master's programs and the Ed.D. program in Educational Leadership, guide students in their dissertations, and assist in the development of an urban setting.

Assistant Professor-Human Development: The individual we seek requires expertise in Human Development or Developmental Psychology with a background in Cultures Psychology or cross-cultural research. Candidates should have a strong academic and experiential background in ethnographic research related to lifespan development in socio-cultural context. Primary teaching responsibilities will include undergraduate and graduate courses in human development across the lifespan, as well as courses in the social and cultural foundations of education and research methods at the graduate level. This individual should also have experience with culturally diverse urban populations.

Assistant Professor-Physical Education: The individual we seek will have expertise in Physical Education with particular emphasis in Fitness Management, Fitness Assessment and Health Education. The primary teaching responsibility will be undergraduate and graduate courses in the Physical Education Program that offers concentrations in Teaching K-12 and Fitness Management. Additionally, the individual will advise Fitness Management majors through their courses, clinical requirements and internship. The successful candidate will work in our new $4 million state-of-the-art Fitness and Wellness Center, collaborate with the Director of the Recreation facility, and contribute to community outreach programs.

Assistant Professor-Reading: The individual we seek will have expertise in Elementary Reading with an emphasis in Intermediate and Middle School Levels. Candidates should have experience in urban education, experience in elementary teaching, demonstrated ability to integrate theory and practice, and a clearly defined research agenda. Additional expertise in technology issues is welcomed.

Assistant Professor-Special Education: The individual we seek will be a teacher educator with expertise in teacher's professional development at the secondary level and commitment to helping teacher introductory general education courses at the undergraduate and graduate level. Requirements: an earned doctorate in teacher education, curriculum studies, curriculum and Instruction or related field with a scholarly record or demonstrated scholarly interest in teaching professional development. In addition, the candidate will be expected to contribute to the program and have an appropriate undergraduate or Master's degree in one of the following areas: history/social education, middle/high school focus, Science Education (elementary/middle school focus), or Technology Education. Some experience in teaching at the middle/high school level within a multicultural setting is preferred. Responsibilities include teaching introductory secondary education courses in areas of expertise. Applications should possess the academic and experiential foundations to assist in the preparation of teachers committed to democracy, diversity, and social justice within an urban context. Women and men of under-represented groups are strongly encouraged to apply.

DePaul University

Northern Arizona University invites nominations and applications for Dean, College of Ecosystem Science and Management

The College of Ecosystem Science and Management is an independent unit within Northern Arizona University with 50 full and part-time faculty and 600 majors. The College offers undergraduate programs in Applied Indigenous Studies (BA, BS), forestry (BSF), geophysics (BS, BS Ed), parks and recreation management (BS), applied planning (BS), and graduate degrees in forestry (M.S., Ph.D.) and rural geography (MA). The College is an active and integral participant in all environmental programs offered at NAU and provides courses in the university’s general education program. The annual salary is competitive and commensurate with qualifications and experience.

01/29/2001 • HISPANIC OUTLOOK
**President**

**Bellingham Technical College**

Bellingham, WA

The Board of Trustees of Bellingham Technical College invites applicants for the position of President.

Bellingham Technical College is located in the Puget Sound Region, near Bellingham Bay, in a suburban/rural area 100 miles north of Seattle, 25 miles south of the Canadian border. In May, 2000, The City of Bellingham was ranked 19th in the country by Forbes Magazine as the "best small city to do business in." Forbes Magazine picked Bellingham as the "best city to balance work and family life."

Reporting to the Board of Trustees, the President is the chief executive officer of the College and responsible for its academic and administrative direction. The successful candidate will exhibit the highest professional standards and integrity; be results oriented and a leader who understands and embraces the uniqueness of the technical college system. The successful candidate will have strong interpersonal and advocacy skills, including communication with internal and external groups; ability to represent the College with state agencies, and advocate in the political environment at the federal, state and local levels. The individual will have demonstrated educational leadership experience; sensitivity to diversity issues and a demonstrated ability to lead an institution which values and respects differences. Master's Degree is required, Doctorate preferred.

The Board of Trustees is being assisted in this search by the executive search firm, Gold Hill Associates. To request the official application packet, including the criteria, qualifications and supplemental requirements, contact the Presidential Search Liaison, Bernice Vonesegut, by phone: (360) 736-3105 ext 306, Fax: (360) 715-8395, E-mail: bvooneseg@bellevu.edu, or website: http://www.bellevu.edu. For full consideration, applications must be received by 5 p.m. on March 19, 2001. Preferred starting date is July 1, 2001.

**Chemeketa Community College**

**President**

The board of education is seeking applicants for the position of President of Chemeketa Community College. The President is the chief executive officer of the college district. Chemeketa is one of the nation's premier community colleges, noted for innovation and leadership in teaching and learning, distance and online education, educational assessment and many other efforts. Located in the northern Willamette Valley of Oregon, the Chemeketa district enjoys close proximity to the mountains, ocean beaches and the vibrant city of Portland.

We are seeking a visionary leader who promotes a climate of innovation throughout the college through an inclusive, approachable, and participatory style. The successful candidate will be articulate and enthusiastic spokesperson for the college with a passion for students and the community college mission. The individual must be a community leader, committed to building collaborative relationships with other education providers, business and industry, government decision-makers, and community organizations.

Minimum qualifications include:

- Five years' broad-based and progressively responsible administrative experience in an accredited college or equivalent
- Record of accomplishments in innovative educational leadership and planning
- Demonstrated understanding of teaching and learning practices
- Knowledge of the legislative process and ability to represent the college with governmental decision makers
- Demonstrated sensitivity to multicultural issues
- Earned doctorate or equivalent from an accredited institution

For more information about the college and the presidential search, visit our website at www.chemeketa.edu

Application materials must be received or postmarked by the position closing date: Friday, March 2, 2001. For a complete list of minimum and preferred qualifications, please request an application packet by contacting:

Vickie Biales Chamberlain  
Personnel Department, Chemeketa Community College  
PO Box 14007 Salem OR 97309  
Phone: 503/399-2530  
Fax: 503/399-7810  
Email: personnel@chemeketa.edu

Chemeketa Community College is an equal opportunity, affirmative action institution.

**University of Florida**

**Vice President for Administrative Affairs**

The University of Florida is recruiting a Vice President for Administrative Affairs. The 2,000 employees of the Office of Administrative Affairs facilitate the academic and research mission of the institution by providing support services to faculty, staff, students, visitors, alumni and friends of the university. The Vice President will serve each of these constituent groups, coordinating efforts to achieve the common vision of excellence at the university. The University of Florida is a comprehensive land-grant university recognized by the Association of American Universities, of which it is a member, as one of the nation's leading institutions in the areas of graduate education and research. UF is one of the nation's largest universities, enrolling 46,000 students annually. As one of the largest employers in North Central Florida, the university has an annual operating budget of $1.8 billion and is home to almost 12,000 faculty and staff members.

The Vice President for Administrative Affairs serves as the university's chief fiscal and business officer with accounting or direct responsibility for all budgetary units, and also serves as the fiscal and business advisor to the President. Divisions reporting to the Vice President through the Associate Vice President and two Assistant Vice Presidents include: Business Services, Facilities Planning and Construction, Environmental Health and Safety, Finance and Accounting, Information Systems, Operations Analysis, Personnel Services, Physical Plant, Purchasing, Small Business and Vendor Diversity Relations, the Stephen C. O'Connell Center and the University Police Department.

Qualifications: The minimum state requirements are a master's degree in an appropriate area of study and eight years of related experience or a bachelor's degree and ten years of experience. Prior experience in an academic setting is strongly preferred. The successful candidate should possess strong organizational, financial management and human resource skills as well as significant managerial experience in a complex organization. We seek a leader who has demonstrated ability to represent the university at the state and national levels, who appreciates collaborative governance and who has the judgment and ability to make independent decisions.

Application Procedures: Send a cover letter, resume and a list of three references to:

Jennifer Curtis, Personnel Services  
University of Florida  
PO Box 115002  
Gainesville, FL 32611-3175  
Fax: (352) 392-7094  
Email: jen-curtis@ufl.edu

Formal review of applications will begin on March 1, 2001 and will continue until the position is filled. If an accommodation due to a disability is needed in order to apply for this position, please call (352) 392-4621 or TDD (352) 392-7734.

For additional information, see:

http://grove.ufl.edu/~seca/vpaas  
or contact

search chairman Dr. Charles Frazier at:  
(352) 392-1301 or fax (352) 392-8735.
**PROVOST**

The Provost is the chief academic officer in the President's Executive Cabinet. The Provost reports directly to the President and supervises the Deans of the eight colleges/schools as well as the Center for College Teaching, Freshman Studies, Grants and Research Services, SetonWorldwide and Special Academic Programs.

Seton Hall has clearly charted a direction and seeks a Provost to provide leadership and vision in achieving its strategic initiatives. The Provost will find an environment that is supportive, and a faculty with high expectations for a communicative and dynamic leadership style and enhanced participation in moving the University forward. The Provost will be required to actively lead the successful implementation in academic initiatives including, instructional technology, e.g. mobile computing and distance learning as well as the planned expansion of graduate programs.

The Provost will be reporting to a President whose vision for the University is to position Seton Hall in the top tier of Catholic colleges and universities. The President has assembled a highly talented and energetic central administration. It is essential that candidates be conversant with Catholic traditions and current issues impacting higher education.

An earned doctorate is required, as well as demonstrated academic administrative ability of significant substance and duration and the ability to communicate effectively with a broad range of university constituencies including students, faculty and board members. Also required are: financial expertise appropriate to the position; ability to serve as a faculty leader and advocate in the areas of teaching and learning; and personal qualities of sensitivity, integrity, change management, sense of humor, good listener, and high energy.

To apply, please send resume and names, addresses and telephone numbers of at least four references to:

**Dr. Laura A. Wankel, Chair, Provost Search Committee**
Seton Hall University, 400 South Orange Avenue, South Orange, NJ 07079

References will not be contacted until the candidate is notified and approves. Review of applications will begin immediately. Preference will be given to applications received by February 11, 2001.

Seton Hall University is committed to programs of Equal Opportunity and Affirmative Action (EO/AA) to achieve our objectives of creating and supporting a diverse racial, ethnic and cultural community. The University welcomes application from individuals who represent a broad spectrum of backgrounds and, in particular, welcomes applications from women and minority groups.

For further information about Seton Hall University visit our web page at [www.shu.edu](http://www.shu.edu)

Equal Opportunity / Affirmative Action Employer

---
Faculty Positions Available - September 2001

Stockton College, located 12 miles west of Atlantic City, is surrounded by 1600 acres of southeastern New Jersey Pinelands. It is a four-year undergraduate institution and has received national recognition for its distinctive academic programs and interdisciplinary approach to learning. Stockton's diverse faculty and student body combine a spirit of innovation with a sense of tradition for academic excellence.

Candidates for Associate Professor ($47,149-$54,225) must hold a terminal degree and have considerable experience. Candidates for Assistant Professor ($38,788-$44,608) must hold a terminal degree. Candidates for Instructor ($31,910, $36,695) must hold a Master's degree and have an ABD status and be in the latter stages of their dissertation. Salaries may be higher depending on qualifications, experience and increases in the appropriately established compensation plan.

Teaching load is 12 credit hours per semester (4 credit courses, 2 credit labs). Additional duties as expected under collective bargaining agreement, including an expectation of ongoing scholarly activity. All faculty are expected to teach general studies courses.

HISTORY, Asst. Prof., Tenure Track. Teach undergraduate courses in Southeastern Europe, the Middle East and Modern Hellenism since 1500. Ph.D. required, college-level teaching preferred. Successful applicants for this position should have a commitment to excellence in teaching and Research and Professional Development. Send letter of application, with CV, statement of teaching philosophy and three letters of recommendation to Dr. Kenneth Dollarhide, Dean of Arts and Humanities.

MANAGEMENT/MANAGEMENT INFORMATION SYSTEMS, Asstl/Assoc. Prof. of Business Studies, Tenure Track. Teach in the business program introductory and advanced MIS courses and quantitative methods at the undergraduate and graduate levels. Ph.D. required. Send letter of application, resume and three letters of reference to Dr. Dee Henderson, Dean of Professional Studies.

SOCIAL WORK, Instr/Asst. Prof., Tenure Track. M.S.W. with a minimum of two years post-M.S.W. practice experience required, Ph.D./DSW preferred. Spanish facility required and candidates should possess a thorough knowledge of and the ability to teach generalist practice, including ethnic and minority relations with expertise with one or more historically oppressed groups. Duties include the development of outreach programs with relevant community organizations. Send letter, resume and three letters of reference to William C. Jaynes, Dean of Social and Behavioral Sciences.

SCREENING WILL CONTINUE UNTIL POSITIONS ARE FILLED.

Apply to appropriate dean at The Richard Stockton College of New Jersey, AAS1, PO Box 195, Pomona, NJ 08240. Stockton is an AA/EEOC. Women and Minorities are encouraged to apply. R012272

DIRECTOR OF UNDERGRADUATE STUDIES
SMI/HEOP

COLGATE UNIVERSITY

Designs and leads the support programs and staff intended to enhance the academic development and success of 100 - 150 high achieving students who may have faced some academic or economic disadvantage. The Director works closely with students, faculty, alumni, and admission deans, as well as other university and New York State administrators. Academic advising, counseling, study skills, student development programming, mentoring programs and tutoring begin in a required five-week long, intensive pre-first-year summer program and continue through graduation.

Master's degree and relevant experience working with ALANA (African, Latin, Asian and Native America) students required. Demonstrated administrative, interpersonal and organizational skills are desired. Ph.D. and multicultural teaching experience are a plus.

Colgate is a highly selective liberal arts college of 2,700 undergraduates, approximately 15% ALANA students and is located 40 miles from Syracuse in rural/small town Central New York. Further information can be found at our websites: http://www.colgate.edu and http://offices.colgate.edu/hr.

Review of resumes will begin March 1, 2001 and continue until the position is filled. Colgate is an Equal Opportunity/Affirmative Action Employer. Send letter of interest, resume, names and addresses of three references to:

Colgate University
Attn: Director of Undergraduate Studies Search Committee
Human Resources Department
13 Oak Drive,
Hamilton, NY 13346
315 228-7411
Fax 315-228-7171

ASSOCIATE DIRECTOR, INTERNSHIPS & EXPERIENTIAL LEARNING
OFFICE OF CAREER SERVICES

BRIDGEWATER STATE COLLEGE

The Associate Director will coordinate and further develop the College internship program to complement the in-class experiences of students. The responsibilities will include collaborating with faculty, school deans, career staff and employers to provide quality internship experiences for BSC students. The Associate Director will also create a central clearinghouse of current internship opportunities and develop a marketing plan to promote these opportunities. Working with academic departments and employers, the Associate Director will develop new sites and partnerships with the College. In addition, the position includes individual advising/counseling, group presentations and the development of appropriate reports and statistics.

Qualifications: Bachelor's degree required; Master's degree in Education, Business or Counseling preferred. Experience in program coordination in a college or university setting or in business, government or human services required. Experience working with students, faculty and employers preferred. The successful candidate will also demonstrate evidence of the following skills: excellent oral and written communication ability, strong organization and planning skills, the ability to manage multiple tasks and experience with Microsoft Office (Word, Excel, Access and PowerPoint) and web page software.

Salary will be dependent upon qualifications and experience. To apply, send cover letter, resume and a list of five professional references to: Human Resources, Bridgewater State College, Bridgewater, MA 02325. Application review will begin the week of January 22, 2001 and will continue until the position is filled. BSC is an equal opportunity employer with a longstanding commitment to increasing the diversity of its employee community.
UNIVERSITY OF WISCONSIN OSHKOSH

Web: http://www.uwosh.edu/colleges/con

The University of Wisconsin Oshkosh is an equal opportunity/affirmative action employer. Minority candidates are encouraged to apply.

MIAMI UNIVERSITY
OXFORD, OHIO

Richard T. Farmer School of Business Administration
Position Announcement

The Mike Armstrong Chair of Network Technology and Management

C. Michael Armstrong is leading a technology revolution as Chairman and CEO of AT&T. He believes that the convergence of PC, telephone and Internet technology will transform business processes, relationships and strategies. Indeed, convergence has the power to transform all aspects of human interaction.

Mr. Armstrong recognized that the technology revolution has created workforce needs for individuals with broad training, and in communication and information technology. Problems and opportunities associated with a networked society will no longer fall neatly in the domain of established disciplines.

To meet this workforce need, Mr. Armstrong has decided to support a "convergence" revolution in higher education by endowing with $1 million the new Mike Armstrong Chair in Network Technology and Management. The holder of this position will provide leadership to create and deliver an undergraduate curriculum that integrates business and network technology. Graduates who complete the curriculum will be able to use network technology to solve business problems. The focus of the chair is not to simply expand the current courses taught in the management information systems program, but to develop a different kind of graduate with a richer set of skills that can succeed in the new Internet-driven economy. As e-commerce applications increasingly transform business fundamentals, technology touches every aspect of a company's operations. In this converged environment, business people need to understand technology and technology experts need to be business-savvy.

To support the Chair, a new Center for Innovation in Communication and Information Technology will be created. The new Center has already received $250,000 in seed funding. The Chair will work closely with the Center for Interactive Media Studies in the College of Arts and Sciences and the AT&T Education Alliance, a partnership of Miami University and four other leading universities. The goals for the Alliance are similar to the goals for the Armstrong Chair.

The ideal candidate will have expertise in the converging areas of business, computer technology, and communications. It is expected that the successful candidate will be a nationally visible leader from either industry, a CV or higher education. The search committee is interested in applications from both established leaders as well as "rising stars". The candidate should have strong leadership and interpersonal skills. The individual will be expected to work with both business professionals and academics across a variety of fields to build a nationally recognized curriculum.

The Richard T. Farmer School of Business Administration

The School has been recognized by U.S. News & World Report as one of the nation's top 50 undergraduate business programs. The School has 150 full-time faculty, 4,500 undergraduate students and 140 graduate students. The School has a large endowment to support faculty and program development. We are located in a small college town, 35 miles north of Cincinnati.

Application Information

Review of applications will begin immediately and will continue until the position is filled. Applications should include a cover letter, a resume, and the names at least three individuals who can serve as references. Candidates are encouraged to submit materials in a Word document via email. Nominations, applications and requests for additional information should be directed to:

Dr. Homer Erekson
Associate Dean for Academic Affairs
Richard T. Farmer School of Business
Miami University
Oxford, Ohio 45056
Fax: (513) 529-6995
Phone: (513) 529-5758
E-mail: ereskooh@muohio.edu

This search is being assisted by Dr. Charles J. Bunting, Vice President, A.T. Kearney Executive Search. Questions and materials also may be directed to him at: 330 John Carlyle Street, Alexandria, Virginia 22314; Phone: 703-739-4630; Fax: 703-518-1782; E-mail: charles.bunting@atkearney.com

Miami University does not discriminate on the basis of gender, race, color, religion, national origin, handicap or age in its programs, activities, admissions, or employment practices.
Los Angeles Valley College

Los Angeles Valley College is one of nine colleges in the Los Angeles Community College District. The college has provided outstanding education for over fifty years. It is fully accredited by the Western Association of Schools and Colleges. The college is located on a 105-acre campus in Valley Glen and has an enrollment of more than 18,000 students per semester.

Colorado State University invites applications and nominations for the position of Dean, College of Natural Sciences. The College consists of eight departments including Biochemistry and Molecular Biology, Biology, Chemistry, Computer Science, Mathematics, Physics, Psychology, and Statistics. The College offers 10 B.S. and 9 M.S. and Ph.D. degree programs and participates in two interdisciplinary graduate degree programs, ecology and cell and molecular biology.

Information about this position and the College can be found at http://www.colostate.edu/Depts/NatSci/.

**Qualifications:**

The candidate must have an earned doctorate and have a documented record of teaching and scholarly excellence sufficient to qualify for faculty appointment as a tenured Professor in the College.

The following attributes will be important in evaluating candidates:

- Evidence of effective administrative experience and leadership
- A record of successful teaching and mentoring of students
- Strong communication skills
- Ability to work with people of diverse backgrounds
- Commitment to undergraduate and graduate education and research
- Commitment to diversity of students and faculty
- Success in developing and building programs and working with the private sector

Applicants should send a letter stating their interest and qualifications for the position, including a summary of their personal innovations and accomplishments related to the above attributes. Include a curriculum vitae and the names, postal and e-mail addresses, and phone numbers of at least five references. Applicants are encouraged to submit materials electronically. Applications and nominations should be sent to:

**Dr. James L. Fry**
Dean of the Graduate School
204 Student Services Building
Colorado State University
Fort Collins, CO 80523-2015
Telephone: 970-491-6817
FAX: 970-491-2194
E-mail: James.Fry@Grad.Colorstate.Edu

Screening of candidates will begin on March 1, 2001 and will continue until a qualified candidate is selected and the position is filled.

Colorado State University is an EOE/AA employer.

DePauw University seeks candidates at the level of assistant or associate professor to direct the Speaking and Listening Center (known as the "S Center"). The Center supports a well-established program of speaking across the curriculum. Teaching duties include three courses per year within the candidate's discipline and one half-credit tutorial per semester. Director's duties include administering the Speaking and Listening Center, supervising and evaluating S Center tutors, promoting S Center services, supporting international students, and tutoring individual students and student groups.

The director will work with the S faculty development coordinator, assist with faculty development workshops, and provide instructional support for faculty members whose courses emphasize oral communication skills. The S Center director will also work closely with corresponding faculty directors of DePauw's Writing and Quantitative Reasoning Centers. Regular attendance is expected at national conferences related to oral communication and communication across the curriculum; a commitment to professional specialization in this area is required.

Candidates from any discipline who have a strong background in oral communication are encouraged to apply. Candidates must be committed to the values of teaching and service within a liberal arts college. The S Center director will be eligible for tenure in the appropriate department after the normal probationary period. Tenure decisions will be based on effective teaching and strong professional growth and service records, as well as successful performance in duties related to S Center administration.

Send letters of application, statement of teaching philosophy, curriculum vitae, graduate transcript, plans for professional growth and development, and have three letters of recommendation sent to: Speaking and Listening Search Committee, Academic Affairs, 305 Harrison Hall, DePauw University, Greencastle, IN 46135. Letters should describe in detail the candidate's background in oral communication at the college level, as well as other relevant administrative and teaching experience.

Review of applications will begin on February 15, 2001 and continue until the position is filled.

**DePauw University is an Affirmative Action, Equal Opportunity employer. Women and minority candidates are encouraged to apply.**
NC State University: The Department of Electrical and Computer Engineering invites applications for tenure track and research faculty positions at all ranks. Entry level and/or senior candidates are needed in the areas of: (1) analog, mixed signal, and low power circuit design; (2) computer engineering including embedded systems, microarchitecture and microsystems design; (3) solid state electronics and optoelectronics with emphasis on nanotechnology; the fabrication, operation, and design of novel devices and sensors using new materials technologies; (4) computer networking including optical networks, wireless networks, physical layer interfaces, and hardware implementation; and, (5) mechatronic systems including biomedical engineering and computational fabrics.

Qualifications include an outstanding academic or industrial record, a doctorate or equivalent in electrical or computer engineering or a closely related discipline, and a strong commitment to excellence in teaching and research. Successful candidates will have the opportunity to work with highly qualified and outstanding students in well equipped laboratories associated with existing multidisciplinary technical centers such as the Center for Advanced Computing and Communications, the Center for Advanced Electronic Materials Processing, and the Center for Embedded Systems Research. (For more information see the web site at www.ece.ncsu.edu.)

Applications should be sent including a publication list and the names, addresses and telephone numbers of at least four references. In addition each applicant must send a one page professional statement describing his or her goals and aspirations at NC State University. Please send applications to ECE Department Head, Department of Electrical and Computer Engineering, 222 Daniels Hall, NC State University, Raleigh, NC 27695-7911.

NC State University is an Equal Opportunity/Affirmative Action Employer. Individuals with disabilities desiring reasonable accommodations in the application process should make contact through the above address, by e-mail at phanks@eos.ncsu.edu or you may call 919/515-2336.

---

Plattsburgh State University of New York invites applications for Fall 2001 tenure track positions.

Plattsburgh State University of New York is a comprehensive, coeducational, public institution of nearly 6,000 undergraduate and graduate students. Located on the shores of Lake Champlain, the college is the intellectual and educational center for the Lake Champlain/Adirondack region of New York State. The small city character of Plattsburgh along with neighboring Burlington, VT, provides a quality of life unsurpassed for the whole family. Outdoor activities abound along Lake Champlain, in the Adirondack High Peaks and nearby Olympic resort village of Lake Placid while the urban, multicultural lifestyle is rich in neighboring Montreal, Canada, one hour’s drive from campus. Plattsburgh is easily accessible to New York City and Boston via air, bus, train and interstate 87.

Successful candidates must be committed to excellence in teaching in an undergraduate institution offering programs in the arts and sciences, education, human and health services, business and economics with an understanding of and sensitivity to minority and gender concerns. Selected candidates will have an interest in international and collaborative programs such as Women’s Studies, Latin American Studies and Canadian Studies, all of which are special foci for the College; a desire to integrate information technologies; and a willingness to participate with new distance learning programs.

The faculty is challenged to redefine their teaching roles by incorporating recent research on teaching effectiveness. The college supports faculty scholarship through the NYS/UUP bargaining agreement, minority and women faculty may apply for one-year Affirmative Action leaves to pursue scholarly projects. Other faculty funding opportunities include joint State/Union travel grants and College funded-in-House Mini-Grants to provide seed funding for research activities, Reddy Teaching Enhancement Awards, Presidential Research Awards, and Educational Technology Awards. We offer a competitive salary and an excellent benefits package. Unless otherwise stated, review of applications will begin January 24, 2002. Additional Application Materials: evidence of teaching effectiveness, sample scholarly works, three recent letters of recommendation (forwarded directly from references or placement service).

---

The Maricopa Community Colleges are an AA/EOE employer.

DIRECTOR, CENTER ON EDUCATION AND TRAINING FOR EMPLOYMENT

College of Education

The Center is an inquiry-based unit within the College that facilitates workforce improvement by providing leadership, information, training, program evaluation, and learner assessment products and services for public and private clients throughout Ohio, the United States, and the world. It aspires to be internationally recognized as the premier source of expertise and information for developing and improving work-related skills and competencies via all avenues of education needed for success in a dynamic economy.

The Center's more than fifty professional staff and thirteen principal investigators in collaboration with more than twenty center faculty scholars have helped achieve this mission by procurement of grants and contracts and by providing services since 1993 equal to $38,000,000.

We are seeking a dynamic leader who desires to enhance this mission and vision to improve the education and preparedness of the workforce in the context of a research I, Land Grant University and a College of Education. The successful applicant will have a doctorate or equivalent experience, in an appropriate area, and will have organizational management strategic planning, and resource development skills to provide leadership and innovation for workforce development and career and technical training. Salary is negotiable.

Screening of applicants will begin March 1, 2001 and continue until position is filled. Send letter of application, resume, and names of references to: Dr. Mary O'Sullivan, Associate Dean's Office, College of Education, 149 Arps Hall, 1945 N. High Street, Columbus, OH 43210-1172. Tel: 614-292-7231. Fax: 614-688-3842. Email: osullivan.1@osu.edu. Additional information available at: http://coe.ohio-state.edu/newjobs.htm and at http://www.cete.org.

The Ohio State University is an Equal Opportunity, Affirmative Action Employer. Women, minorities, veterans and individuals with disabilities are encouraged to apply.
California State University
Monterey Bay

California State University Monterey Bay (CSUMB) is a comprehensive public university committed to serving the diverse people of California, especially the working class, historically under-served, and low income populations. The university values an educational environment of cultural and linguistic diversity and gender equity; ethical reflection and practice; effective and experimental use of technologies as resources to people and catalysts for learning; and the integration of cross-disciplinary models enabling students, faculty and staff to engage in innovative instruction and coordinated service learning. The curriculum is organized around student learning outcomes. It is global in perspective, and of sufficient breadth and depth to meet local, regional, and statewide needs, specifically those of both isolated rural communities and inner-city populations. The campus is located on Monterey Bay, 100 miles south of San Francisco.

KENYON COLLEGE

HISTORY and the INTEGRATED PROGRAM IN HUMANE STUDIES

Kenyon College will be making a joint appointment in the Department of History and the Integrated Program in Humane Studies (IPHS). We are looking for an historian of ideas. Although this is a visiting one-year appointment, the position itself will become tenure-track in 2002-2003. This position will entail teaching in IPHS' year-long Art and Authority, a wide-ranging, textually oriented course with works and authors ranging from classical Greece and Rome (e.g., Thucydides, Symposium and Virgil) through the early 20th century (e.g., The Birth of Tragedy, Mary Shelley, Thomas Mann and Virginia Woolf). It will also involve teaching two courses (one each semester) in the History Department. The minimum academic qualification is a Ph.D. Teaching experience preferred, but not required. To apply, send a letter of application, dossier and three letters of reference to:

Michael Evans, Director
IPHS, Kenyon College
Gambier, Ohio 43022

The search committee will begin reviewing applications February 19, 2001.

An equal opportunity employer, Kenyon is committed to building a culturally diverse faculty, and encourages the applications of women and minority candidates.

WAYNE STATE UNIVERSITY

Associate Dean
College of Fine, Performing and Communication Arts

Wayne State University invites applications and nominations for the position of Associate Dean of the College of Fine, Performing and Communication Arts. Wayne State University is a premier institution of higher education offering more than 350 academic programs through 14 schools and colleges to more than 13,000 students in metropolitan Detroit. Located in the heart of the Cultural Center of a major industrial city, the University is within walking distance of cultural institutions such as the Detroit Institute of Arts, the Charles H. Wright Museum of African-American History, the Detroit Historical Museum and a number of theater and performing arts venues.

The Associate Dean is a full-time administrative position reporting directly to the Dean of the College of Fine, Performing and Communication Arts. The College consists of 5 departments: Art and Art History, Communication, Dance, Music and Theatre. Four of the five departments offer both graduate and undergraduate programs. There are more than 80 full-time faculty members and a student body comprised of approximately 1700 undergraduate and 300 graduate students.

The Associate Dean is responsible for many aspects of academic affairs involving faculty and students. The Associate Dean recommends and establishes policy, oversees faculty recruitment and employment, and coordinates activities such as the annual promotion and tenure program, the salary adjustment program, sabbatical leave requests, college elections for academic committees, and curricular revision. The Associate Dean oversees graduate programs, resolves student issues and works with student governance groups within the College. The Associate Dean is also actively involved in collaborative projects involving the University and community.

The successful candidate for Associate Dean should be qualified for appointment as a tenure faculty member in one of the departments in the College and should have established a strong record of research/creative activity, teaching and academic administration.

Consult http://www.ccfca.wayne.edu for additional information about the College of Fine, Performing and Communication Arts and http://www.wayne.edu for Wayne State University.

Nominations or applications, a curriculum vita and three letters of reference should be submitted to Dr. Lezlie Hart Stivala, Chair, CFCFA Associate Dean Search Committee, Wayne State University, 5104 Gulden Mall, Detroit, MI 48202. Review of applications begins February 26, 2001 and continues until the position is filled. The position is a twelve-month appointment effective July 1, 2001.

Wayne State University is an equal opportunity/affirmative action institution.

UNIVERSITY OF SOUTHERN CALIFORNIA

Marshall School of Business

Position openings for full time Lecturers and Assistant Professor to teach business courses in advanced writing and communication skills and strategies to undergraduate and graduate business students. Positions are non-tenure track and will begin Fall 2001.

Most qualified candidates will have a background in business; experience teaching written and oral communication; and experience with classroom technology, computer-aided teaching, and delivery alternatives. Ph.D. in Rhetoric, Communication, Composition or equivalent related field is preferred. Excellent teaching skills required.

To apply, send letter of application, resume or CV, and a list of three references.

Faculty Recruitment Committee
Department of Business Communication
Marshall School of Business
ACC 400
University of Southern California
Los Angeles, CA 90089-0444

Minority candidates are encouraged to apply. The University of Southern California is an equal-opportunity, affirmative-action employer.

Application materials must be received by February 16, 2001.

Receipt of materials will be acknowledged.
DIRECTOR, UNDERGRADUATE ADMISSIONS AND RELATIONS WITH SCHOOLS

The Director will manage UCLA’s Undergraduate Admissions and Relations with Schools office (UARS). Oversee the admission and ensure the quality of all entering undergraduate students to UCLA. Design and implement policies and procedures for the undergraduate admissions selection process in order to meet campus admission and enrollment targets. Design and coordinate identification, recruitment and yield activities of highly qualified and diverse undergraduates to UCLA. Work closely with all UCLA outreach efforts. Manage public relations involving all aspects of recruitment and admission. Manage an operating budget of approximately $2.7 million dollars and a staff of approximately 60 FTE. The total application pool of new undergraduates to UCLA is approximately 50,000 per year; total admissions of approximately 15,000 per year, with new undergraduate population of approximately 7,000 per year.

The position requires demonstrated ability to manage an admissions office at a medium to large educational institution with a diverse student population. Ability to work effectively with faculty and academic leadership, function effectively in committee structure in designing and implementing admissions programs and policies. Demonstrated detailed knowledge of admission policy and trends, admission and enrollment planning, and target management. Demonstrated knowledge of educational policy, recruitment and outreach and the role and responsibilities of admissions functions in meeting and exceeding campus goals and objectives. Working knowledge of admissions-related information management systems and analytical ability to evaluate system needs and develop programs responsive to student and administrative requirements. Supervisory and leadership skills sufficient to direct a large professional and administrative staff. Demonstrated ability to plan and manage a budget in excess of $2.5 million dollars. Doctorate or other terminal, professional degree highly preferred.

UCLA offers excellent and competitive salary and benefits packages. Interested applicants may apply by sending a resume and a list of three to five references by 2/15/01 to: M. Trust, Attn: UARXCH01 (1/29), Campus Human Resources, 10290 Wilshire Blvd., Suite 205, Los Angeles, CA 90024-6504; fax to (310) 794-0895; e-mail to jobs@ucla.edu. EOE/AA

DEAN, COLLEGE OF HEALTH AND HUMAN SERVICES

California State University, Sacramento is seeking to fill the position of Dean, College of Health and Human Services, effective July 2001. The Dean reports to the Provost and Vice President for Academic Affairs and provides effective leadership and manages the programs and activities of the College of Health and Human Services. To this end, the Dean is responsible for implementing approved University’s Academic and Strategic Plans in the College; providing curricular leadership including academic standards, scheduling, teaching loads, course offerings, and student advising; coordinating and supporting the development and evaluation of instructional programs, maintaining accreditation; and facilitating faculty scholarly contributions and service activities in the community, College, and University. The Dean also oversees development of annual budget requests and administration of the College’s budget; supervises the administrative duties of department chairs and directors; and makes recommendations on all College appointment, retention, tenure, and promotion requests. The Dean also has primary responsibility for external fund development including gifts, and building strong relationships that generate support in the greater community. As a senior university administrative officer, the Dean performs other duties as assigned by the Provost and Vice President for Academic Affairs and the President.

Candidates must possess the ability to communicate, orally and in writing, complex information clearly to administrators, faculty, and students; demonstrated administrative experience at progressively higher levels of responsibility and authority in higher education health and human services disciplines; demonstrated leadership with an open and transparent administrative style that includes the ability to develop good working relationships with other colleges, the university, and community; and demonstrated record of successful experience with culturally and linguistically diverse groups and populations. Candidates must also possess an earned doctorate from an accredited institution or significant experience in public service in the policy field of Health and Human Services and eligibility for a senior faculty appointment within the College of Health and Human Services, and successful record of scholarship, teaching, or professional services relevant to one or more of the disciplines in the college. Possession of evidence of successful fiscal management experience, the ability to generate external funds and strong community leadership and involvement is highly desirable.

This is a full time position defined in the Management Personnel Plan of the California State University. Salary and benefits are competitive and commensurate with experience and credentials. Candidates must submit to the Office of Academic Affairs, Box D1115, California State University, Sacramento, 6000 J Street, Sacramento, CA 95819-6016 the following: a letter of application, current resume, and the names, addresses, and telephone numbers of at least three references (not all from the same institution). The letter of application should address the candidate’s qualifications with specific reference to the required skills, knowledge, and abilities listed above. Priority review of applications will begin February 26, 2001 and will continue until the position is filled.

CSUS is an Affirmative Action/Equal Opportunity Employer.
UNIVERSITY OF CINCINNATI

Hiring Opportunities
University of Cincinnati
College of Education
Cincinnati Ohio

The Division of Teacher Education at the University of Cincinnati College of Education is seeking full-time faculty positions at its main campus. Located in the historic gaslight district of Clifton, the University is only 15 minutes from downtown Cincinnati. With a population of nearly one million, metropolitan Cincinnati has been identified as one of the five most livable cities in the United States. The University of Cincinnati is the second largest comprehensive research institution in Ohio and has an enrollment of approximately 36,000 students.

(20UC6187) Assistant Professor - Middle Childhood Education
Responsibilities: To engage in scholarly activities leading to publication and teaching graduate courses in the Middle Childhood Program, provide service and leadership to the division, college, university and community, including service and leadership on masters and doctoral committees. DEAN OF THE COLLEGE OF NATURAL SCIENCES AND MATHEMATICS

Located in the historic Pioneer Valley of Western Massachusetts and established in 1863 under the Morrill Land Grant Act, the University of Massachusetts Amherst seeks a dynamic and visionary leader with a record of scholarly achievement and professional accomplishment to lead the College of Natural Sciences and Mathematics. Amherst, the flagship campus of the five-campus University of Massachusetts system and home to 1,200 faculty, 19,000 undergraduate and 6,000 graduate students, is poised to enhance its stature as a leading public research university. UMass Amherst is a Carnegie Doctoral/Research Extensive, land-grant institution with external support in excess of $350 million annually for research and scholarship.

Reporting to the Senior Vice Chancellor for Academic Affairs and Provost, the Dean is the principal academic and administrative officer for the College of Natural Sciences and Mathematics. The College contains nine departments including Astronomy, Biochemistry and Molecular Biology, Chemistry, Computer Science, Geosciences, Mathematics and Statistics, Physics, and Polymer Science and Engineering. Four graduate degrees are offered through interdisciplinary programs including Organismic and Evolutionary Biology, Molecular and Cellular Biology, Neuroscience and Behavior, and Plant Biology. The College has 250 faculty members, and approximately 600 undergraduate majors and 450 graduate students, many of them pursuing doctorates.

Qualifications for this position include:

- A distinguished record of research and scholarship in the biological, physical or mathematical sciences appropriate for appointment as a tenured full professor in an academic department of the University;
- Demonstrated commitment to promoting, encouraging and facilitating the pursuit of excellence in teaching, research and other scholarly activities;
- The demonstrated ability to serve as a vigorous spokesperson and advocate for the College on campus, within the Commonwealth, nationally, and in the capital campaigns;
- The demonstrated ability to work effectively with faculty members, students, staff, administrators, and public and private funding agencies.

The appointment will be effective on or about September 1, 2001. To ensure full consideration, nominations and applications, including vitae, a one page statement of the candidate’s educational and administrative philosophy, and the names and addresses of three references, should be received by February 28, 2001. Accepted nominations and applications will begin immediately and continue until the position is filled. Please send nominations and applications to Dean of the College of Natural Sciences and Mathematics Search Committee, Office of the Senior Vice Chancellor and Provost, 321 Whitmore Administration Building, University of Massachusetts, Amherst, MA 01003.

The University of Massachusetts is an Affirmative Action/Equal Opportunity Employer. Women and minority groups are encouraged to apply.

UNIVERSITY OF MICHIGAN
Director, Multi-Ethnic Student Affairs

The University of Michigan, Ann Arbor, is seeking an experienced professional to provide vision, leadership, and direction to the Office of Multi-Ethnic Student Affairs (MESA). MESA is one of five units of the Multicultural Portfolio in the Dean of Students Office. The director will join a team dedicated to promoting institutional change that results in enhanced collaborative and inclusive environments for students. MESA is an active partner in the development of students of color and contributes to efforts to increase opportunities for social identity development and social justice education within the Multicultural Portfolio and the Division of Student Affairs.

The director is responsible for providing direction and leadership for the office’s administration, operations, and budget, including the William Monroe Trotter House Multicultural Center; leading professional and administrative staff; providing leadership and advocacy for student of color issues; and participating in the leadership of the Multicultural Portfolio and Division of Student Affairs. We are seeking an individual with a Master’s degree or equivalent education and experience in student affairs or counseling. Knowledge and experience regarding the concerns of student of color populations are required. The individual must have lead a diverse staff and have excellent communication/facilitation skills. This person must be able to manage multiple priorities and work in a collaborative, inclusive management environment. An understanding of social identity development, the impact of multiple identities, and the application of social justice education in a co-curricular environment are critical.

Review of applications will begin on February 12, 2001. Interested candidates should submit a letter of interest and resume to Search Committee, MESA Director, Office of the Dean of Students, 3000 Michigan Union, 530 S. State St., Ann Arbor, MI 48109-1349.

The University of Michigan is an equal opportunity, affirmative action employer.

- Psychology

These positions are subject to budget approval. To ensure full review of your application, materials should be received by 5:00 pm February 12, 2001.

For a detailed job description and application materials please call (206) 870-3751, email personelle@hecc.ctc.edu, or write to Human Resources, PO Box 98000, Des Moines, WA 98198-9800.

Highline is an Affirmative Action employer and seeks applicants with diverse backgrounds who can contribute to the College's diversity, multicultural understanding and student success.

DEPARTMENT OF PSYCHOLOGY
Visiting Professor in Psychology and Culture (rank open)

The Department of Psychology at Smith College seeks a visiting professor whose research and teaching interests emphasize cultural issues in psychology for a term of up to three years. The rank is open and we contemplate making one or several appointments that combine to span the 2001-2002, 2002-2003, and 2003-2004 academic years. We welcome inquiries and applications from those interested in visiting Smith for the entire term and from those who might consider joining us for any one of these three academic years. Although the area within psychology's open, teaching and research interests and experience that focus in some manner on the meaning of domestic or international culture, race, or ethnicity for psychology are paramount. Normally, a visitor would be expected to teach 4 or 5 courses per year, including a seminars and laboratory course in her or his specialty. Examples of courses that we are particularly keen to offer are (1) some variation of Psychology of the Black Experience, depending upon the cultural interests of the visitor and (2) Culture and Development or culture and some other psychological process. Qualifications include a minimum of a Ph.D. in psychology and demonstrated teaching excellence. Inquiries and applications consisting of a letter of interest, vita, and the names of three references may be directed to Psychology Search, Department of Psychology, Smith College, Northampton, MA 01063 or to PsychSearch@science.smith.edu. Review of applications will begin on February 12, 2001 and continue until the openings are filled.

Smith College, the nation's largest liberal arts college for women, is a member of the Five College Consortium, along with Amherst, Mount Holyoke, and Hampshire College and the University of Massachusetts at Amherst. Smith College is an equal opportunity employer encouraging excellence through diversity.
Director of Health Services
As the chief administrator of the Department of Health Services, the Director is responsible for the overall management of the department and for ensuring that the program meets the health care needs of a diverse student population and provides related campus-wide health programs. The Director will establish policies and procedures and supervise the planning and implementation of an innovative, cost-effective primary health care program to include direct consumer care, teaching, counseling and consultant services designed to promote optimal personal wellness. A Massachusetts certified/licensed Physician, Clinical Nurse Specialist, Nurse Practitioner, or master’s trained Physician Assistant or Registered Nurse, required as a minimal qualification. Five years’ experience in clinical health care environment required. Excellent administrative and oral and written communication skills required. Ability to work collaboratively required. Experience in and commitment to working with diverse populations required. Experience in health promotion and outreach education preferred. Knowledge of the organization, administration and supervision of health care services within a higher education setting or in a setting with college-age clients preferred. Salary is competitive.

Director of Conference and Event Services
Campus Life and Conference Office
Reopened
The Director of Conference and Event Services provides operational leadership and direction for all aspects of the conference service function, which serves the Bridgewater State College community and external clients. Or visit us on the Worldwide Web at: www.blackhawk.tec.wi.us

Completed application materials will be accepted until a suitable candidate is found. Review of applications will begin the week of February 5, 2001 and the most qualified applicants will be invited to participate in the next phase of the selection process.

Blackhawk Technical College is an Equal Opportunity, Access, Affirmative Action Employer and Educator.
The Richard Stockton College of New Jersey

DIRECTOR OF LIBRARY SERVICES

THE RICHARD STOCKTON COLLEGE OF NEW JERSEY is an innovative, residential, liberal arts and sciences college with a student body of 6,300 and a recognized record of academic excellence. Stockton, one of nine senior public colleges in New Jersey, is located on a 1,600-acre campus in southern New Jersey, 15 miles from the Atlantic Ocean, one hour from Philadelphia, and 2-1/2 hours from New York City. Bachelor's degrees are awarded in 27 academic programs and Masters' degrees in six graduate programs. The College has a mission to meet the needs of master's-level graduate education in southern New Jersey and currently provides programs in physical therapy, occupational therapy, nursing, business studies, Holocaust and genocide studies, and instructional technology. Plans call for the establishment of additional programs in the near future. Full-time faculty number 211; 95 percent of the faculty hold terminal degrees. The College recognizes the importance of information literacy in creating a new generation of leaders, and the library faculty are actively engaged in enriching the curriculum.

DIRECTOR OF LIBRARY SERVICES. Richard Stockton College invites applications and nominations for the position of Director of Library Services. The recently renovated library facility encompassed 65,000 square feet of space in the center of the college's educational complex and included a dedicated electronic classroom for information literacy instruction. The library has a protected formula driven acquisitions budget of $778,000. Library resources include over 292,000 volumes and approximately 1,400 active periodical subscriptions and 3,500 on-line full-text periodicals. The library has made a major commitment to technology and has its own electronic classroom. Interested candidates can review the library resources by visiting the college's web site at www2.stockton.edu.

Responsibilities:
The Director of Library Services reports to the Vice President for Academic Affairs and provides leadership for a staff of 7 professional librarians, 21 support staff, 5 part-time librarians, and a number of student assistants.

The Director oversees and coordinates library planning, budgeting, fund raising, personnel selection and supervision, and management of library services which includes an information and educational literacy program. The new Director will be expected to take a leadership role in serving traditional instruction as well as emerging technology-mediated instructional modes. Active collaboration with the College's nationally recognized Institute for the Study of College Teaching is also expected.

Qualifications:
- Minimum of an MLS from an ALA-accredited institution
- Five or more years of increasingly responsible managerial experience in a college or university library
- Knowledge of current issues and trends in higher education
- Leadership experience with emerging technologies and their implementation in academic library management
- Demonstrated understanding of the library's mission in a growing public college
- Demonstrated ability to develop, supervise, and manage productive and collaborative relationships within the library and beyond and to foster this ability in others
- Demonstrated effective decision-making abilities
- Excellent oral and written communication skills
- Successful budgetary management skills and commitment to development of private support
- Record of scholarship and the ability to support the same in others

In addition to the minimum qualifications, preference will be given to candidates holding a Ph.D., either in library science or in another area. The successful candidate will have demonstrated the ability to apply the library's technological resources in support of changing modes of instruction, and to prepare students to take advantage of new library technologies. The candidate will also be able to articulate a vision of the 21st-Century library and its role in the institution, and to be an effective advocate for that vision.

Salary is competitive and based on qualifications and experience. Applications must include a letter of interest, curriculum vitae, and the names and telephone numbers of three references qualified to comment on the qualifications outlined above. Please send to Library Search Committee, Office of the Vice President for Academic Affairs, Richard Stockton College, AAS, PO Box 195, Pomona, NJ 08240-0195. Screening begins February 19, 2001 and will continue until the position is filled.

Stockton is an Equal Opportunity/Affirmative Action Employer. Women and minorities are encouraged to apply.

R012900

Salisbury State University

CHAIR, ART DEPARTMENT
SALISBURY STATE UNIVERSITY

Nominations and applications are requested for Chair, Department of Art, Salisbury State University. The chair is responsible for the department's academic and artistic programs and leadership in ensuring that instruction is consistent with the best ideas of pedagogy within the discipline. Salary competitive. Qualified applicants should have (1) an outstanding record of teaching and mentoring students; (2) a record of strong artistic performance and/or scholarly publication in one or more specialties in art; (3) a commitment to collegiality and collaborative endeavors; (4) the ability to administer budgets and supervise personnel; and (5) Ph.D. or M.F.A. in art history. Salisbury State University aggressively seeks African-American, minority, and women faculty members and is engaged actively in diversifying its staff, faculty, student body, and curricula.

Position available August 15, 2001. Review of applications begins February 10, 2001, and continues until the position is filled. Early submission of materials insures the most complete consideration of a candidate. Send letter of application or nomination, vita, three letters of recommendation or references to Human Resources, Salisbury State University, 1101 Camden Avenue, Salisbury MD 21801. We especially encourage qualified women, minorities, and the disabled are encouraged to apply. Please see http://www.ssu.edu/hr/jobs for more information on this position or Salisbury State University.

EQUAL OPPORTUNITY POLICY

It is the policy of Salisbury State University to provide equal employment and educational opportunities without regard to race, color, religion, national origin, sex, age, marital status, handicap, or sexual orientation. More specifically, it is the University's policy to make decisions regarding educational opportunities and employment including recruitment, hiring, promotion, and other terms and conditions of employment without discrimination. Inquiries should be directed to Equal Employment Officer, Salisbury State University, 1101 Camden Avenue, Salisbury, MD 21801-1880. Telephone 410-543-6426.

Iona College, New Rochelle, NY

FULL-TIME FACULTY

Department of Mass Communication
School of Arts & Science

Iona College, dedicated to personal teaching in the tradition of the Christian Brothers and American Catholic Higher Education, and an equal opportunity employer is seeking the following positions beginning September 2001:

- Advertising:
  To teach undergraduate courses such as advertising, copywriting, media planning and campaigns.

- New Media (pending budget approval) / Journalism:
  To teach undergraduate and graduate courses in journalism and/or areas such as multi-media, desktop publishing, communications graphics and web design. Ability to teach related courses in mass communication desirable.

- Public Relations:
  To teach undergraduate and graduate courses in public relations and organizational communication. Ability to teach related courses in mass communication desirable.

Although a doctoral degree is preferred and required for tenure, initial appointment requires only a Master's degree and professional experience. Other duties include academic and professional advisement, as well as scholarly and professional activities.

Applications will be accepted until February 15, 2001. Send curriculum vitae, a letter of application and a statement of teaching philosophy, names, addresses and phone numbers of three references to:

Dr. George Thottam
Chair, Mass Communication Search Committee
Department of Mass Communication

Iona College
715 North Avenue, New Rochelle, New York 10801
ITHACA

Associate/Full Professor & Director
Center for the Study of Culture, Race, and Ethnicity

Ithaca College invites applications for the position of Director of the newly created Center for the Study of Culture, Race, and Ethnicity. The Center, formed in the spring of 1999, is interdisciplinary in nature and has a steering committee with faculty representation from the five schools of the College. The Center reports to the Office of the Provost and has a campus-wide charge that embraces curriculum development, faculty development, and co-curricular and public events.

The vision of the Center includes the creation of programs (including courses, workshops and events) which challenge oppositions between self/other and us/them. We seek to encourage students to think about identity formation as a process that occurs in the context of cultural and historical encounters between groups of people. Initial plans for the Center include the development of African New World, Latino, Asian American and Native American Studies.

Required qualifications: earned doctorate, demonstrated commitment to teaching and a strong record of scholarly publication. In addition, the individual should possess excellent interpersonal, writing and organizational skills and have a commitment to multicultural and interdisciplinary studies. Academic administrative experience in a college or university setting as well as successful grant writing experience is expected. Candidates should demonstrate the ability to promote the goals of the Center through the organization and implementation of outreach activities and public events. The Director is expected to teach at least 2 courses each year. The position is tenure-eligible; rank is dependent upon qualifications and experience.

Please submit a letter of interest, resume and three letters of reference to Dr. Asma Barlas, Chair, Steering Committee, Center for the Study of Culture, Race, and Ethnicity, Office of the Provost, Ithaca College, 350 Job Hall, Ithaca, New York 14850-7012. Review of applications will begin on January 22, 2001 and will continue until the position is filled. The position is available August 2001.

Ithaca College is an Equal Opportunity/Affirmative Action Employer. Members of historically underrepresented groups are encouraged to apply.

USF
University of South Florida

The University of South Florida is currently seeking a Director for the University Community Initiative (UCI). The UCI represents one of the prime emphases emerging from USF’s recent strategic planning effort, reinforcing the meaningful integration of the University with its external community. The UCI is part of USF’s infrastructure to help support a fully engaged university.

RESPONSIBILITIES: The Director will assume a critical role in helping USF become a university known for its commitment to and productivity in community partnerships that make a difference both at the university and in the community. The Director’s role is primarily that of a facilitator, broker, organizer, communicator, conceptualizer, and catalyst for change. The Director will reach out effectively to the community, engage both the community and the University in activities of the Initiative, and create opportunities for partnerships.

The Director should have an understanding of policy and service delivery issues in the community and be an effective representative of the university to the community. The Director should be an individual who sincerely values and respects the perspectives of community representatives, and is able to effectively communicate that respect to and actively engage community residents in the UCI. The Director would be expected to participate in numerous community activities and to facilitate and broker relationships between community leaders and university faculty.

The Director should understand the academic culture, reach out effectively to faculty, staff, and students to engage them in the activities of the Initiative, and facilitate interdisciplinary partnerships. The Director should be skilled and knowledgeable about communications and able to use technology to keep the University and the community well-informed regarding the activities of the Initiative and the opportunities it presents.

The Director of the UCI will report to the Steering Committee that governs the Initiative, represented by the Co-chairs, for performance review and related personnel matters. The Steering Committee is comprised of senior academic administrators. The Director will be responsible for overall administration of the Initiative, including: fiscal management, personnel recruitment and supervision, program administration, e.g., faculty grant program and speaker series, grant-writing and resource development; report preparation; and communications to the Steering Committee, the University, and the community.

MINIMUM QUALIFICATIONS: Earned doctorate; five years’ experience (past the doctorate) in an academic environment; history of successful community involvement; and project/program management experience.

PREFERRED QUALIFICATIONS: Experience in multidisciplinary partnerships; evidence of productive work with diverse populations; well-established administrative and leadership skills; documented history of developing a program of applied scholarship in community settings; documented history of success in developing community-based courses; community leadership activities; successful grant-writing experience; and a record of scholarly achievement related to community-based research and teaching.

This is a 12-month faculty administrative position. Please submit a cover letter, vita, and names, addresses, and phone numbers of three references to Teresa Patrasso, University Community Initiative, University of South Florida, 4202 E. Fowler Ave., SOC 107, Tampa, FL 33620. Applications must be received by March 1, 2001.

The State of Florida has a Public Meetings Law and a Public Records Law and all university searches are conducted under the terms thereof. All meetings of the Search Committee are publicly announced and conducted. All documents submitted to the Committee are treated as open material with the exception of evaluative documents specific to the performance of the faculty of the State University System of Florida.

The University of South Florida is an Equal Opportunity/Equal Access/Affirmative Action Institution. For disability accommodations contact Teresa Patrasso (813) 974-6974 at least five working days in advance.

The University of Maryland is an Equal Opportunity/Affirmative Action and Title IX Employer.
Director of School of Policy & Management, College of Health and Urban Affairs

The newly formed College of Health and Urban Affairs at Florida International University in Miami, Florida, is inviting applications for the Director of the School of Policy and Management, one of four schools within the College (School of Health, School of Nursing, and School of Social Work). This is a unique opportunity to lead a new school in a growing and dynamic research university.

The College was created to foster interdisciplinary partnerships in teaching, research, and service. The successful candidate will be a visionary leader who is committed to building interdisciplinary alliances and developing innovative programs. The College is committed to excellence in teaching, research, and service and seeks a leader who will be an integral part of its success.

The College is seeking a candidate with a Ph.D. or equivalent degree in a relevant field and a minimum of 5 years of experience in leadership and administration. The successful candidate will have a strong research record and a commitment to excellence in teaching and service. The candidate will also have excellent interpersonal skills and the ability to build and maintain strong relationships with faculty, students, and external partners.

The successful candidate will be an advocate for the College and its mission, and will be a strategic thinker who can lead the College to new heights.

The College offers a competitive salary and benefits package, and a commitment to diversity and inclusion. The College is located in one of the most dynamic and diverse cities in the world, with opportunities for professional growth and personal enrichment.

Applications are encouraged from qualified candidates and will be reviewed on a continuing basis until the position is filled. Interested candidates should submit a current CV, a cover letter, and three letters of recommendation to: Dr. David Bergwall, Search Committee Chair, Director of School of Policy & Management, College of Health and Urban Affairs, Florida International University, E-mail: dbergwall@fiu.edu

Florida International University is an Equal Opportunity/Access Employer and Institution.
Faculty Positions
Department of Industrial Engineering
University of Houston

The Department of Industrial Engineering at the University of Houston invites applications for two tenure-track positions at the Assistant/Associate Professor level with anticipated start in Fall 2001.

The successful candidates must have interests in teaching, advising undergraduate and graduate students, and be able to establish strong sponsored research programs in either manufacturing or logistics. The successful candidates must hold a Ph.D. in Industrial Engineering or closely related engineering field with an undergraduate degree in engineering. Candidates must demonstrate excellent verbal and written communication skills and the ability to qualify for professional registrations. Candidates are expected to establish a research group involving departmental strengths in applied operations research, ergonomics, simulation, facilities layout and logistics.

Manufacturing: The candidate must be able to conduct research, and teach courses in CAD/CAM, manufacturing minimization, rapid prototyping, and robotics.

Distribution and Logistics: The candidate must be able to conduct research, and develop and teach courses in logistics related to Performance Assessment, Engineering Strategies, Distribution and Warehousing, and Information Systems.

The review and screening of the credentials will begin March 15, 2001 and will continue until the positions are filled. Applicants should send a Curriculum Vitae, a short Professional and Academic Objective and the names of three references to:
Chairman, Screening Committee
Department of Industrial Engineering
University of Houston
Houston, Texas 77204-4812

Florida International University

DIRECTOR
COLLEGE OF HEALTH AND URBAN AFFAIRS

The newly formed College of Health and Urban Affairs at Florida International University in Miami, Florida is inviting applications for the Director of the School of Health, one of four schools within the College (School of Nursing, School of Social Work and School of Policy Management). The new College was created to foster interdisciplinary partnerships in teaching, research, and service. We seek a Director who is committed to building interdisciplinary alliances.

Florida International University (FIU) is a Carnegie Doctoral/Research Extensive University. Since its opening in 1972, FIU has become a comprehensive research university offering over 200 undergraduate and graduate degrees with an enrollment of over 30,000 students. FIU has a strong history of diversity and ranks in the top one percent of all US universities in campus diversity. The University has achieved a national reputation for excellence with two major campuses in Miami-Dade County, a teaching site in Broward County ( Ft. Lauderdale) and several off-campus locations. For further information visit www.fiu.edu.

The new College of Health and Urban Affairs is the result of a merger between the College of Health Sciences and the College of Urban and Public Affairs. The College is among the most productive research units in the University and is the third largest producer of PhDs in the University. We rank in the top ten nationwide for health degrees awarded to Hispanics and African-Americans.

The School of Health is comprised of the following departments: Dietetics & Nutrition (BS, MS, PhD), Occupational Therapy (BS, MS), Physical Therapy (MS), Health Information Management (BS), Communication Sciences & Disorders (MS), and Public Health (MPH).

The Director will be the founding Director of the School in the new College organization and report to the Dean of the College. The successful candidate will have the requisite credentials to be appointed at the rank of full professor and will:

- Provide direction and leadership
- Facilitate interdisciplinary collaboration
- Develop and manage sponsored research
- Fundraise
- Support the development of web-based programs for distance education
- Have standing within the community of health professions
- Manage School’s resources

Salary will be commensurate with the candidate’s academic credentials and experience. The deadline for submission is March 15, 2001. Please send names of three references, curriculum vitae, and a letter of introduction to:

Dr. Ray J. Thomlinson
Director, School of Social Work
College of Health and Urban Affairs
University Park, ECS 460
Miami, Florida 33199

New York University
A private university in the public service

DEAN OF THE SHIRLEY M. EHRENKRANZ SCHOOL OF SOCIAL WORK

New York University invites applications and nominations for the position of Dean of the Shirley M. Ehrenkranz School of Social Work. The primary mission of this School of Social Work is to educate committed professionals for direct social work practice with individuals, families, groups, and communities in a complex urban environment.

The Dean is responsible for academic leadership and strategic planning; fostering and enhancing linkages with the broader University, professional associations, alumni, the larger community, governmental and philanthropic agencies; administrative oversight of personnel; curriculum development and program design; and budgeting. Currently 1,300 full and part-time students are enrolled in programs leading to Bachelor of Science, Master of Social Work and Doctor of Philosophy degrees. Also offered are Advanced Certificate and continuing education programs in a variety of clinical areas.

The main campus is located on Washington Square Park in the Greenwich Village area of New York City, with program offerings at three branch campuses. New York University is a private research university founded in 1831. The Dean is one of fourteen members of the President’s Council of Deans and is expected to play an important role in University affairs and a leadership role in community affairs.

The ideal candidate must have an earned doctorate in social work or a master’s degree in social work and a doctorate in a related field; credentials and experience to warrant tenure including outstanding scholarship in the field and evidence of a strong commitment to teaching, practice, research and service; experience in creating and sustaining programmatic innovations; a strong record of fund raising; and knowledge of the Council on Social Work Education evaluation process.

Applications are requested by February 28, 2001. Send C.V. and cover letter to:
Professor Morton O. Gold, Chair, School of Social Work Search Committee,
70 Washington Square South, #1206, New York, New York 10012;
Fax: 212-995-4300.

Excellence requires all points of view. New York University is an equal opportunity employer/education institution. Candidates of all backgrounds are encouraged to apply.

Columbia University
Associate Dean, Center for Career Services

The Position

Reporting to the Dean of the College and responsible to the Center for Career Services Advisory Board, the Associate Dean of Career Services assumes responsibility for the overall leadership, direction, coordination and delivery of career services for students and alumni of constituent schools (Columbia College, Fu School of Engineering and Applied Science, Graduate School of Arts and Sciences, General Studies, School of the Arts and Graduate School of Architecture). The incumbent is responsible for the oversight and coordination of career counseling, career-related workshops and panel discussions, full-time job development and recruiting programs, career fairs, experiential education program, career resource center, and services to graduate students and alumni. Working closely with Student Affairs and Academic Affairs, the incumbent will be responsible for developing a multi-level career education program in the undergraduate schools that will assist students in setting and attaining career objectives, which includes designing, developing and implementing a specific career development program over four years that will lay a foundation of career exploration knowledge and skills and an understanding of the job search process. The Associate Dean will provide reports to the Advisory Board, various schools, and administrative divisions, prepare and manage the departmental budget, and serve as the direct liaison to the six schools serviced by the Center for Career Services, senior administrators, and the Athletic Department.

Qualifications

A bachelor’s degree is required, with an advanced degree desirable. The successful candidate will possess a minimum of eight years of substantial related experience in a University environment or in a corporate or higher education human resources setting, particularly college relations and recruiting. The position requires demonstrated oral and written communication skills, along with presentation and interpersonal skills. Experience with information systems technology and budget management and administration required.

Application and Nomination

Review of applications will begin on February 2, 2001 and will continue until the position is filled. Nominations of individuals for this position may be sent to the address below. A resume, with an accompanying cover letter, may be submitted by e-mail attachment to mail@spelmanjohnson.com or online at www.spelmanjohnson.com. If you are unable to submit materials electronically, please mail a resume and cover letter to:

The Spelman & Johnson Group
Columbia - Associate Dean (HO), Katherine Johnson, Vice President
38 Mulberry Street, Box 304, Leeds, MA 01053, Phone: 413-584-7089
Visit Columbia University’s web site at: www.columbia.edu

Minorities are especially encouraged to apply.

Equal Opportunity/Affirmative Action Employer
DEAN, COLLEGE OF COMMUNICATION

DESCRIPTION:
Rowan University is seeking applications and nominations for the position of Dean of the College of Communication. The Dean provides the intellectual and academic leadership of the College of Communication. The successful candidate will be prepared to lead a relatively new College to the next level of excellence. The College of Communication is comprised of 50 full-time faculty and approximately 900 majors in the following departments: Communication Studies, Journalism and Creative Writing, Public Relations/Marketing, Radio/TV/Film and College Writing. The College also offers two graduate programs, a nationally distinguished masters of arts in public relations and the new and innovative masters of arts in writing. Established in 1996, the College houses a variety of student publications and organizations, including the award-winning and nationally recognized radio station (WGLS-FM), weekly campus newspaper (The Whit), and local chapter of the Public Relations Student Society of America. Specific responsibilities of the Dean include all aspects of planning, budgeting and staffing (including recruitment, selection and evaluation), academic program review, curriculum development and working with external constituencies. The Dean reports directly to the Provost of the University and serves as a member of the Council of Deans and the President's Extended Cabinet.

QUALIFICATIONS:
Candidates must have 1) an earned doctorate and/or appropriate terminal degree in a related field; 2) an established record of teaching and scholarship that would warrant appointment to the rank of full professor; and 3) a record of successful leadership and increasing levels of responsibility in higher education administration. In addition, the successful candidate will demonstrate the following:
- The capacity to be an innovative leader
- A commitment to excellence in teaching, learning and scholarship
- Experience in faculty development, curriculum design, and assessment
- A commitment to share governance and affirmative action
- Strong team building skills within the College and the University

ROWAN UNIVERSITY:
Rowan University (formerly known as Glassboro State College) is a selective, medium-sized, state university located in southern New Jersey close to Atlantic City and Philadelphia. In 1992, Rowan University received a $100 million gift from Henry and Betty Rowan, one of the largest gifts ever bestowed on a public university. The gift has been a catalyst for Rowan's transformation into a university of regional prominence. Founded in 1923 as a normal school for teachers, the University now enrolls over 9,200 students in degree programs ranging from bachelors through doctorate. The University is divided into six colleges (Business, Communication, Education, Engineering, Fine & Performing Arts, and Liberal Arts & Sciences) and a Graduate School. The 200-acre campus contains 31 buildings, including six residence halls and three apartment complexes. The University was also the site of the historic Summit Conference between President Johnson and Soviet Premier Kosygin in 1967. Additional information about Rowan University and the College of Communication can be found on the World Wide Web at http://www.rowan.edu.

START DATE: July 1, 2001

APPLICATION PROCESS:
Applications and nominations for the position are invited. Applications should include: a narrative letter indicating how the individual's experience and background relates specifically to the listed position qualifications; a complete curriculum vitae; and the name and current title, address, and telephone number of five (5) professional references. Applications will be reviewed beginning February 15 and continue until the position is filled. Applications and nominations should be sent to:

Chair, College of Communication Search Committee
Office of the Provost
Rowan University

The University of Colorado at Denver
School of Education

The CU-Denver School of Education is an NCATE-accredited program committed to preparing educators and counselors in diverse, urban communities through professional education, research, and engagement with schools, businesses, and agencies. We seek faculty members whose experience, scholarship and teaching will strengthen our partnerships, expand our connections to diverse communities, and contribute creative solutions to difficult problems of practice in urban settings. We seek applicants for the following positions to begin in Fall 2001:

School Psychology. Tenure track Assistant Professor to teach, conduct research and support community partnerships in the School Psychology licensing and Educational Specialist programs and to support the Initial Teacher Education program in matters related to assessment and children's mental health. Doctorate in School Psychology or closely related field, three years experience as a school psychologist, and evidence of successful teaching and research are required.

Elementary Education. Tenure track Assistant Professor to teach, support professional development partner schools, and conduct related research in the Initial and Professional Teacher Education program. Doctorate in Elementary Education or closely related field, successful experience in public schools with diverse populations, and evidence of excellent teaching and research in topics related to initial teacher education in partner schools are required.

Counseling Psychology and Counselor Education. Two tenure-track Assistant Professor positions to teach graduate courses in the Counseling Psychology and Counselor Education program. Candidates must hold a Ph.D. or Ed.D. in Counseling Psychology or related field. Requires doctorate in counseling or closely related field, evidence of excellent teaching and research related to issues of family counseling, and demonstrated abilities to create partnerships with community agencies.

Educator Professional Development. Tenured faculty position to serve as Chair of a newly established interdisciplinary division, organized to establish innovative partnerships for ongoing professional development of educators. The division includes programs in mathematics, science, English, bilingual and ESL education, literacy, instructional and learning technologies, library media services, and school psychology. We seek an individual with nationally recognized research related to educator professional development who can provide leadership for a network of innovative partnerships that support professional development. Requires an outstanding record of teaching, research, partnership development, and professional leadership.

Special Education. One year renewable term Instructor position in Special Education with particular strengths in assessment. Doctorate in Special Education or closely related field, successful experience in public schools with diverse populations, and evidence of excellent teaching in topics related to assessment in special education and partner schools are required.

Secondary Education. One year renewable term Instructor position in secondary education with expertise to teach courses in social studies and foundations. Doctorate in Special Education or closely related field, successful experience in public schools with diverse populations, and evidence of excellent teaching in topics related to social studies and foundations are required.

The Colorado Open Records Act (C.R.S. 24-72-204) applies.

EEOMWDV
ASSOCIATE PROFESSOR OF LANDSCAPE ARCHITECTURE

Applications are invited for a full-time, academic year, tenure track position to begin July 1, 2001. The position involves 80% teaching and 20% research/creative/scholarly work. The main focus of teaching will be graphic communications and basic design. Other teaching will include upper level design studios, computer technology, landscape construction and planning design. The new faculty will be encouraged to develop courses in their areas of interest. Active engagement in research/creative work, service to the department, university and community and student advising is expected.

The applicant should have a Masters degree in Landscape Architecture. Education and experience in related fields such as: horticulture, environmental design, art, planning are advantages. Five years of teaching, research and/or professional practice, professional licensure or eligibility for licensure and membership is highly desirable. The successful candidate should also have excellent verbal, written and graphic communication skills and the ability to integrate computer technology as a design and presentation tool.

The Landscape Architecture program is integrated with Horticulture in the Department of Landscape Architecture and Horticulture. The Department also offers BS and AS degrees and Certificate programs in Horticulture. The Department of Landscape Architecture and Horticulture is housed in Ambler College, on a 187-acre suburban campus, 20 miles north of Temple's main campus in Philadelphia.

The pedagogical goal of the LA curriculum is to promote ecological principles, design theory, and technological expertise. Hands-on experience and community outreach is also emphasized using the rich horticultural and ecological heritage of the Ambler College Campus.

To apply, send a letter of interest, resume, portfolio of work (optional) and names of three references to the following address by March 15, 2001. Interviews are anticipated in April 2001 with the selection of the candidate in May.

Send to: Elizabeth A. Slezak, Search Committee, Department of Landscape Architecture and Horticulture, Ambler College, Temple University, 880 Meeting House Road, Ambler, PA 19002, E-mail: ls/ht@blue.temple.edu.

Temple University is an affirmative action/equal opportunity employer.

ALLAN HANCOCK COLLEGE
EEO/AA Employer

Buffalo State State University of New York

Exceptional Education Department

TENURE-TRACK ASSISTANT PROFESSOR

Position Description: Teach courses and supervise students in an undergraduate site-based cross-categorical and/or graduate teacher preparation program. Teach and supervise students in one or more of the following master's-level concentrations: bilingual special education, early childhood special education, mild disabilities, secondary/transitional special education, severe disabilities, and/or severe emotional disturbances. Participate in departmental and college committees. Serve as advisor to undergraduate and graduate students. Engage in scholarly activities.

Required Qualifications: Earned doctorate or ABD in special education or related field (completion within one year). Successful teaching experience with individuals with special needs in elementary, middle, or secondary schools. Demonstration of extensive knowledge and expertise in special education.

Preferred Qualifications: Degree in special education. Certification in special education (or eligible for certification). Evidence of successful teaching experience at the post-secondary level. Record of research and/or publications. Record of effective research and/or teaching in instructional methods and curriculum practices in special education. Experience with collaborative models of service delivery. Experience in site-based teacher preparation. Experience working with individuals with disabilities from diverse backgrounds.

Salary and benefits are competitive; commensurate with qualifications and experience. Benefits estimated at 30% of base salary on 10-month contract. Salaries of teaching appointments may be available for additional salary.

To apply: Send a letter of application along with vita, transcripts, and three letters of recommendation to: Dr. Judith Bondurant-Uz, Search Chair, Exceptional Education Department, Buffalo State College, Keohun 110-C, 1300 Elmwood Avenue, Buffalo, NY 14222-1095.

Review of applications will continue until the position is filled. Starting date is September 1, 2001.

Buffalo State is an affirmative action, equal opportunity employer. The colleges serves nearly 11,000 students and offers 155 undergraduate and graduate programs.
SCIENCE FACULTY! Opportunities for Outstanding Students

NATIONAL INSTITUTES OF HEALTH
Undergraduate Scholarship Program

The UGSP is sponsored by the National Institutes of Health (NIH), the Federal Government's premier biomedical research and research training agency. NIH offers scholarships to qualified students who are committed to a career in biomedical research.

Scholarships of up to $20,600 per year support tuition, educational, and qualified living expenses (room, board, transportation) while students pursue an undergraduate degree. For each award year, scholars work 10 weeks with salary benefits in our research laboratories in Bethesda, Maryland. They are assigned mentors, participate in developmental and science enrichment seminars, and are provided with housing and transportation. After graduation, they work 1 year of full-time employment at NIH for each year of scholarship award.

THIS IS A SPECIAL OPPORTUNITY FOR SPECIAL STUDENTS!

Advise students to apply if they:
- Are committed to a career in biomedical research;
- Are from a disadvantaged background;
- Have a GPA of at least 3.5 or are in the top 5% of their class;
- Are a U.S. citizen, national, or permanent resident;
- Are enrolled or accepted for enrollment as a full-time student at a qualified accredited institution.

For more information, contact the UGSP at:
http://ugsp.info.nih.gov  E-mail: ugsp@nih.gov
Phone: 1-800-528-7689  TTY: 1-888-352-3001

NIH is dedicated to building a diverse community in its training and employment programs.

UNIVERSITY OF MINNESOTA MORRIS
VICE CHANCELLOR FOR STUDENT AFFAIRS

The University of Minnesota, Morris (UMM) invites nominations and applications for the position of Vice Chancellor (VC) for Student Affairs. This appointment begins July 1, 2001 or as soon thereafter as possible.

The University of Minnesota, Morris established in 1859 is a residential public liberal arts college of 1900 undergraduate students. The college is recognized for its distinctive mission: its excellent faculty, student body and staff; and its participatory campus life. The campus has a strong commitment to multiculturalism. Admission is selective, and the student body is hardworking and serious.

We are seeking a VC who can provide leadership for a comprehensive student affairs program. The VC will be responsible for creating and sustaining an environment that advances student success; serves diverse constituencies; and fosters a sense of community within student affairs and across campus. Areas reporting to the Vice Chancellor include athletics, career planning, counseling, health services, the minority student program, residential life and student activities. This position reports directly to the Chancellor of UMM. The VC is expected to build on UMM's current student affairs structure and programs and enhance the college's environment for student affairs.

The successful candidate must possess the following:
- A master's degree in counseling, higher education administration, student personnel, or a related field. An earned doctorate is desired.
- A minimum of seven years of administrative and supervisory experience is required at the college or university level in a broad range of student affairs activities. Experience in athletics is desirable.
- Demonstrated ability to effectively and efficiently manage diverse offices and organizations.
- A record of effective management within the framework of shared governance.
- Excellent interpersonal and communication skills.
- Demonstrates understanding of and commitment to the value of a liberal arts education.
- A strong commitment to professional development.
- A commitment towards a diverse student body, faculty, administration and staff.
- A commitment to sustaining and advancing the mission of UMM.

Nominations, expressions of interest, and applications should be directed to Pheona Lawrence, VCSA Search Committee, c/o Jenny Quam, University of Minnesota, Morris, 300 Bohmier Hall, Morris, MN 56270.

Applications must include a cover letter addressing the qualifications noted above, a resume, three letters of references, and the names and phone numbers of two additional references. Salary and compensation are competitive. Applications will be accepted until filled but review of applications begins on March 10, 2001.

For more information on UMM, visit our web site at www.mrs.umn.edu or contact Jenny Quam, (207) 585-6024, quamj@mmm.umn.edu to request disability accommodations.

The University of Minnesota is an equal opportunity educator and employer.

Empire State College
State University of New York

ASSISTANT DIRECTOR
Center for Workforce Advancement

The Center for Workforce Advancement (CWA) of Empire State College, State University of New York, provides non-credit, contract training to public, private and not-for-profit organizations. This position is full-time, based in Saratoga Springs, NY. Key responsibilities include developing and implementing marketing plans, building prospect and customer relationships, making sales calls, preparing proposals and contracts, directing the work of project personnel, expanding services in on-line course delivery, and developing a statewide network of subcontract trainers and consultants.

A bachelor's degree required; with preference for an advanced degree. Five or more years of experience in the training and development field, including developing and delivering training to state government agencies and/or private sector business and industry; understanding the prospecting and selling process; superior written and oral communication; and exemplary interpersonal and managerial/leadership skills. Preference will be given to candidates who evidence professional networks in the government or private sectors of New York state; experience in continuing higher education/adult learning; experience with the development and delivery of e-learning courses, familiar with basic office computer applications; demonstrated entrepreneurial thinking and evidence of continuing professional development activity. The salary is competitive with full benefits.

The search committee begins review on January 29, and the position will remain open until an appointment is made. Letter and resume to: Ms. Shelley Dixon, Director, CWA, SUNY ESC, 2 Union Avenue, Saratoga Springs, NY 12866-4390 (shelley.dixon@esc.edu).

ESC is an AA/EOI/RCA/ADA employer.

Brown University

PRINCIPAL ASSOCIATE-LEADERSHIP-PROVIDENCE, RI

The Annenberg Institute for School Reform (AISR) is seeking a Principal Associate to conduct research and develop programs around innovative and effective forms of leadership, programs that focus especially on principals and superintendents. The Principal Associate will support school districts in developing effective programs of literacy instruction; work with external groups to conduct in-depth analysis of specific leadership functions; and will contribute to the dissemination of research results through written publications. In addition, the Principal Associate will coordinate the efforts of external partners working with specific aspects of AISR's leadership program.

Required: A Doctorate (PhD or EdD) or equivalent combination of education and experience. Must possess extensive experience with and knowledge of urban schools, schools, and districts, and well as excellent oral and written communication skills; must have experience designing and facilitating professional development for educators; and must have administrative experience in schools serving urban communities and/or disadvantaged children. We are looking to fill this position as soon as possible.

The Annenberg Institute for School Reform has as its mission to develop, share, and act on knowledge that improves the conditions and outcomes of schooling in America, especially in urban communities and in schools serving disadvantaged children.

Please send cover letter and resume to Brown University, Human Resources, Box 1879 Job # B00057, Providence, RI 02912. Brown University is an Equal Opportunity/Affirmative Action employer.

Hispanic Outlook 0 01/29/2001 900
Established in 1855, Kean University is committed to excellence and access and to developing, maintaining and strengthening interactive ties with the community. Kean University takes pride in its continuing efforts to build a multicultural professional community to serve a highly diverse student population of 12,000.

ASSISTANT VICE PRESIDENT
for Academic & Instructional Technology

Kean University is seeking an experienced professional to provide leadership and vision in the application of the latest information technologies to support teaching, learning and research. The Assistant Vice President for Academic and Instructional Technology reports directly to the Provost and is responsible for all academic computing and academic technology functions within the Division of Academic Affairs.

Responsibilities: The primary responsibilities of this position include oversight and development of academic computing resources, particularly as they apply to distance education, smart classroom development and applications, and the development of new instructional modalities. The position also includes oversight responsibilities for faculty training and instructional support related to technology, campus media services and media production facilities.

Requirements: The successful candidate will demonstrate the ability to articulate and implement a unified vision for academic technology development, proven experience in a broad range of information and academic technologies, an ability to understand both technical and user environments, experience in strategic planning, budgeting and management, strong change management and interpersonal skills, an ability to work effectively and collaboratively with faculty, administrators, staff and students and a commitment to diversity.

Qualifications: A minimum of five years of experience in the advancement of academic technology and/or academic computing in a higher education setting is required. College-level teaching experience is highly desirable; doctoral or AB degree in academic discipline is required. Experience in working with faculty to enhance the teaching and learning process is essential.

Salary and Benefits: Salary is competitive and commensurate with qualifications and experience. Comprehensive benefits package included.

Application: A current resume and three letters of reference should be sent to: Chairperson, Search Committee for Assistant Vice President for Academic and Instructional Technology, Office of the Provost, Kean University, 1000 Morris Avenue, Union, New Jersey 07083. Consideration of applicants will begin February 15, 2001 and will continue until a successful candidate has been identified.

INSTRUCTIONAL DESIGN SPECIALIST
FALL 2001

Responsibilities: The Instructional Design Specialist (IDS) will work one-on-one with faculty from across the University in the development and implementation of technology-dependent educational activities. In addition, will conduct workshops that focus on tools used for technical and practical practices, particularly in the use of multimedia and the technologies of distance education. Candidate will work collaboratively with grading in the development and delivery of educational activities.

Requirements: Master's Degree in instructional design or a closely related field and a minimum of 4 years of experience in the development of contemporary instruction in a higher education setting. A working knowledge of WebCT or Blackboard and multimedia development software and experience as a plus. Significant postsecondary teaching experience is highly desirable and excellent communication skills are required.

Salary & Benefits: Salary is competitive and commensurate with experience. A comprehensive benefits program is included.

Application: Review of applications will begin immediately and continue until position is filled. Qualified applicants should forward their resumes and cover letters to: Dr. Eleanor V. Laudicina, Associate Vice President for Academic Affairs, Kean University, 1000 Morris Avenue, Union, NJ 07083-0411. Minorities and women are strongly encouraged to apply.

Where Tradition and Technology Meet

Kean University is an EEO/AA Institution.

For information on these exciting opportunities in teacher preparation, please visit our Web site at www.casuio.edu/coe.

Cleveland State University is an AA/EOE committed to nondiscrimination. M/F/D/V encouraged.

Associate Dean
of Students
ARTS, SCIENCE & ENGINEERING
Assists Dean of Students in providing supervision and leadership to the departments within the Student Affairs division and serves as a representative on various university committees. Oversees administrative after-hours on-call system for intervention and response to campus and student emergencies, providing initial response, as well as follow-up measures when necessary. Also oversees medicalizzard and special needs system for the university. Advanced degree and 5-10 yrs. exp. required. Ability to interact with diverse groups of people, handle multiple tasks, and meet frequent deadlines essential, as well as knowledge of higher education issues, university policies and awareness of issues/challenges facing Black, Asian, Latinx, LGBT, and International students. Must possess strong counseling/mentoring, training and presentation skills.

Please apply by fax (617) 627-3725, email (hr-erumse@tufts.edu) or mail two copies of your resume and cover letter to: Tufts University, Human Resources, 169 Holland St., Somerville, MA 02144. For more information, visit www.tufts.edu. Tufts is an Affirmative Action/Equal Opportunity Employer.
ASSOCIATE PROVOST FOR ACADEMIC PROGRAMS AND SERVICES

Millersville University of Pennsylvania invites applications and nominations for the position of Associate Provost for Academic Programs and Services. Millersville University, founded in 1834, is one of 14 institutions of the Pennsylvania State System of Higher Education. As a student-centered institution, the University is highly regarded for offering quality instruction and its strong commitment to the principles of client services and diversity. Nationally ranked as one of the top regional public institutions of higher learning by U.S. News and World Report, Millersville is also listed among Kiplinger’s 100 “Best Value” universities in the nation. The University has an honored history of providing excellent teacher education and a strong liberal education curriculum in the arts, sciences, and humanities. The University enrolls 7,500 undergraduate and graduate students, and employs 250 staff and 350 full-time faculty.

Located in historic Lancaster County, the campus is within three hours drive of numerous cultural and recreational opportunities in the cities of Baltimore, Philadelphia, Washington, New York, the Pocono Mountains, and the Jersey shore beaches. Because of its economic diversity, Lancaster County is among one of the most prosperous counties in the country. For more information, contact Millersville University’s Web page at www.millersville.edu.

RESPONSIBILITIES: The Associate Provost provides direction and administrative leadership for the following offices and programs:

- Admissions
- Registrars
- Academic Advisement
- Act 101
- Cooperative Education
- Interdisciplinary Programs
- Learning Disabilities Services
- Learning Support (Tutoring)
- New Faculty Orientation
- Academic Component of New Student Orientation
- International Affairs
- Undecided Majors Program
- Upward Bound Program

The Associate Provost also serves as the Academic Hearing Officer and works with the Faculty Senate on academic policy matters.

The Associate Provost must be able to assume a university-wide perspective, work, and communicate effectively with students, faculty, administrative, external organizations and institutions in a diverse community. The Associate Provost must encourage and promote the recognition, understanding, and respect of cultural and human diversity in the faculty, staff, students, and curricula, and must be committed to increasing diversity within the University. A capacity and willingness to listen, create consensus, solve problems, and assume responsibility are essential.

QUALIFICATIONS: Candidates must demonstrate the capacity to be an innovative and visionary leader. Candidates must possess an earned doctorate and a record of teaching, scholarship, and service in higher education. Candidates need to present a record of progressive and effective academic administrative experience in a university performing such duties as: planning; program development; team building within and among programs and offices for which they have been responsible; programmatic outcomes assessment; and personnel and budget management. Evidence of sensitivity to educationally and economically disadvantaged students is essential. Candidates must demonstrate an appreciation of the role of technology in education and administration and the ability to function effectively in a team-oriented, collective bargaining environment. Candidates must have experience in faculty development, the liberal arts, and academic freedom; and evidence of success in building and maintaining community. A successful interview is crucial.

APPLICATIONS: Applicants must include a letter detailing their experiences relating to the qualifications for the position; a vita; and the names, addresses, and telephone numbers of at least three professional references. Full consideration will be given to complete applications received by February 23, 2001. Anticipated starting date is July 1, 2001. Electronic submissions will not be accepted.

Section

The School

The School of Agriculture has 12 departments and includes 285 faculty, 2500 undergraduate students, and 500 graduate students. In addition to campus-based specialists, the Cooperative Extension Service includes a statewide system of more than 300 professionals on campus and in all 92 counties who deliver effective research-based programs to citizens across the state.

Responsibilities

The Director is responsible for articulating a clear vision to faculty and administration regarding program development within the School of Agriculture. He/she encourages the creation of learning environments that assist in fulfilling the university mission, values, and goals. The Director oversees all academic programs within the School including curricula, instruction, recruitment and admissions, student services, scholarships, careers, and faculty development. He/she assists with institutional planning, recommends allocation of academic resources, and is the primary liaison within the University regarding these issues. In addition, the Director coordinates graduate and professional programs within the School and works in collaboration with other Schools within the University. The Director is responsible for forging effective linkages with research, Cooperative Extension, statewide institutions, corporations, and international institutions. He/she will serve as liaison with other educational institutions within the state. The Director reports directly to the Dean of Agriculture, and represents the School of Agriculture at internal and external meetings and across the University.

Qualifications

The candidate must have an earned Doctorate in a field related to the academic departments of the School, and have academic credentials in program areas related to agriculture, food and natural resources to merit appointment at the rank of full professor in one of the School’s academic departments. Candidates must be able to communicate effectively with students, faculty, staff, administrators, and the public, and have a vision for educating agriculture and food systems professionals of the future. Demonstrated characteristics should include administrative effectiveness and the ability to work successfully as part of a leadership team.

Application Procedure

Applications will be reviewed beginning February 10, 2001, and will be accepted until a suitable candidate is chosen. Qualified persons are requested to submit a letter of application, a complete curriculum vitae including the names, addresses, and telephone numbers of at least three professional references, and a statement of administrative philosophy. This statement should emphasize ability to foster program growth in the 21st Century. It should include the candidate’s vision for education including viewpoints regarding current and future non-traditional audiences. Please send nominations or applications to:

Dr. Victor L. Lechtenberg, Dean of Agriculture
Purdue University
1140 Agricultural Administration Building, Room 114

Email: vdl@agsci.purdue.edu

Purdue University is an Affirmative Action/ Equal Opportunity Employer; Women and Minorities are Encouraged to Apply.
Western New Mexico University is a public, comprehensive, regional institution serving a diverse multicultural population of 3,000 students, is located in Silver City in southwestern New Mexico surrounded by the Gila National Forest in a beautiful desert-mountain environment along the Continental Divide. WNUSA's academic programs include nursing, occupational therapy, education, business, social work, and the child development center. WNUSA offers a variety of two and four year programs in vocational education, the arts and sciences, education, business, and social work. Exemplary teaching, quality programs, commitment to diversity, and expanded regional service characteristics make WNUSA an attractive option.

Applications are invited for the following anticipated openings for nine-month tenure-track faculty positions to start in Fall 2021. All positions emphasize excellence in teaching. In addition, the successful candidates will be involved in advising, program development, university service, scholarly activity and community service as appropriate. All candidates will be expected to make a thirty (30) minute presentation in an actual classroom situation at the time of interview. Previous teaching experience in higher education, past successful professional experiences with groups from diverse backgrounds, and proficiency in Spanish is preferred for all positions. Housing is contingent upon funding.

DIRECTOR
MARINE/FRESHWATER
BIOMEDICAL SCIENCES CENTER
Oregon State University

Oregon State University (OSU) in Corvallis, OR, seeks a Director for its Marine/Freshwater Biomedical Sciences Center. This NSF-NSF-supported center comprises a number of investigators representing three Colleges at OSU and two other universities. The Center's mission is to foster creative scientific activity among various disciplines, that share a common interest in the development of the rainbow trout and other aquatic species. The Center's goals are to promote collaborative research, to provide leadership in the development of aquatic sciences, and to facilitate the exchange of ideas and information among researchers. The Director will direct the Center's activities and will work closely with the Vice Provost for Research and Development to develop strategic plans and policies. The Director will be appointed for a five-year term and will be responsible for the Center's operations, including program development, grant writing, and personnel management. The Director will be expected to develop and maintain strong relationships with key stakeholders, including academic and government partners. The Director will also be responsible for developing new initiatives and partnerships, as well as identifying and securing funding opportunities. The Director will be required to have a Ph.D. in a relevant field, with a background in aquatic sciences and/or related fields. The Director will also be expected to have a strong record of research and publication. Applications are due by 11:59 PM (PST) on January 31, 2021. For more information, please visit the OSU website: www.oregonstate.edu.
Peralta Community College District

College of Alameda, California
Merritt College, Oakland, California
Vista Community College, Berkeley, California

-An ACCT Search-

The University of Iowa
Iowa City, Iowa

The University of Iowa invites applications and nominations for the position of Dean of the Graduate College and Associate Provost for Graduate Education.

The University of Iowa is a comprehensive research university that is ranked among the top 20 public universities and research universities in the US. The University is an attractive campus located along the bluffs of the Iowa River. Iowa City is part of a growing metropolitan area that retains the charms and conveniences of a small town.

The Graduate College is one of eleven colleges at the University. Eighteen UI programs are ranked in the top 10 nationwide; four are the best in the country. The successful candidate will provide leadership to build upon this reputation and move graduate education at the University of Iowa to even higher levels of national recognition.

The Dean must have the skills to develop a vision of the direction of graduate education for the University of Iowa and the ability to communicate that vision and energize others toward its realization. Working with an elected Graduate Council, the Dean initiates and reviews all policies related to the Graduate College, sets and maintains high standards for existing graduate programs, and coordinates the review of new and continuing graduate programs. As Dean of the Graduate College and as Associate Provost for Graduate Education, the successful candidate will collaborate with the Provost and the Vice President for Research to strengthen the integration of all instructional and research components of graduate education.

The successful candidate must have an earned doctorate; a clear commitment to graduate education and research; a proven record of scholarly activity, and teaching and service accomplishments commensurate with a tenured faculty appointment at the rank of professor; excellent writing, oral, and presentation skills; a demonstrated commitment to building the cultural diversity necessary for enhancing the quality of graduate education; evidence of successful academic leadership and higher education administrative experience; effective managerial skills; extensive experience with agencies providing external research support; and the desire and ability to actively seek increased resources and promote the wise use of resources to attract high quality graduate students and enhance graduate experiences.

The University of Iowa recognizes a special responsibility to ensure that this search identifies qualified candidates who are women or ethnic minorities.

The projected starting date for this position is August 2001. The application should include a resume and the name, email, and surface addresses, and telephone numbers of five references. References will not be contacted until the later stages of the search. Screening of applications will begin January 15, and applications will be accepted until the position is filled. Send nominations and applications to:

-An ACCT Search-
DEAN
NORTHEAST CENTER

SUNY Empire State College invites applications and nominations for the position of Dean of the Northeast Center. The Dean is the chief executive and academic officer of the Center, reporting to the VPAA, and participates in College-wide planning and administration as a member of the President’s Council. The Dean is responsible for the high quality of the academic program; enrollment, budget and facilities management; faculty and staff hiring, development and evaluation; student services; local administrative, academic and governance processes and planning; and effective leadership within an academic community that values shared governance. The Dean also represents the College externally and develops initiatives to meet workforce needs in the public and private sectors.

Founded in 1971, ESC is a recognized leader in designing and delivering innovative programs that meet the needs of more than 10,000 students each year. Students, mostly working adults, enroll in associate, baccalaureate and master’s programs through instructional locations across New York State and at several international sites, as well as through the College’s Center for Distance Learning. Faculty members serve as mentors to students and work with them in one-on-one, small group and residency formats as well as in on-line and other distance formats. Drawing on interdisciplinary and generalist interests, mentors establish unique, collaborative relationships with students as they design individualized degrees and pursue their studies. ESC is a pioneer in awarding credit for college-level learning acquired through life and work experience.

Based in the state capital of Albany, the Northeast Center serves over 800 students annually at offices in Albany, Cohoes, Hudson, Johnstown, Queensbury, Saratoga, Schenectady and Troy. The Center has about 35 full- and part-time faculty and eight professional employees, and houses FORUM/East, a vigorous residency-based management degree program that serves 200 students each term.

ESC is a highly distributed organization and all employees must be proficient in computer use. ESC's internal network provides groupware and other electronic support for administrative and instructional applications. College-wide and local professionals offer technical and instructional design support.

Candidates should have a background that includes significant college-level teaching and administrative experience and appropriate credentials, including an earned doctorate. Preference will be given to candidates who demonstrate familiarity with the education of adult learners, individualized and interdisciplinary programs, prior learning assessment, learning technologies and innovative program delivery. Salary and benefits are competitive.

For additional information, please visit the College's web site (www.escc.edu).

The search committee will begin consideration of applications after March 9, 2001. The anticipated appointment date is June 1, 2001, or after. Please send letter of application and resume to:

LEADERSHIP STUDIES DOCTORAL FACULTY

The Interdisciplinary Doctoral Program in Leadership Studies at Our Lady of the Lake University has over 70 doctoral students. Due to our rapid growth, we have two vacancies beginning August 2001, for tenure-track or provisional faculty at the Assistant or Associate Professor level. Candidates must demonstrate interest and competency in teaching at the doctoral level. A record of research, scholarly publications and funded projects, or evidence of potential success in these areas, is also required. Applicants are encouraged to be explicit about their skills, knowledge and experience. Review of candidates will begin immediately and continue until the positions are filled. Salary is competitive and commensurate with experience. Send letter of interest, current curriculum vitae and the names of five references to: Search Committee, c/o Raymond Borrceta, Center for Leadership Studies, Main 101, Our Lady of the Lake University, 411 S.W. 24th Street, San Antonio, Texas 78207.

Public Policy

Candidates must have a J.D. or an earned doctorate in a discipline related to the development of policy, such as Public Policy, Government, Political Science, Educational Policy or Health Care Policy. Candidates should have experience developing and implementing policy at a high level.

Leadership

Candidates must have an earned doctorate and a history of successful teaching at the graduate level. Senior leadership experience and/or experience teaching leadership in a collegiate environment are desirable.

We invite interested candidates to visit the Center for Leadership Studies web site at www.leadershipstudies.org/FacultySearch or e-mail the Search Committee at bory@lakeollusa.edu. Our Lady of the Lake University is accredited by the Southern Association of Colleges and Schools, the American Psychological Association, and the Association of Collegiate Business Schools and Programs, and seeks employees who are committed to the values of Catholic higher education. Women and minorities are encouraged to apply. AA/EEO

CSU Cleveland State University

Tenure-Track Positions for Fall 2001

College of Education

Assistant Professor of Early Childhood Education

Assistant Professor of Special Education/Mild Disabilities

Assistant/Associate Professor of Special Education/Behavior Disorders

The University, located in the heart of metropolitan Cleveland, is dedicated to urban education. In addition to a long-standing commitment to research and quality teaching, the College of Education faculty work collaboratively with both urban and suburban schools and community agencies to prepare future teachers and to provide program leadership, development, evaluation and consultation services. For information on these exciting opportunities in teacher preparation, please visit our Web site at www.csuohio.edu/coe/.

Cleveland State University is an AA/EEO committed to nondiscrimination. M/F/D/V encouraged.
The Florida State University is classified as a Research 1 University by the Carnegie Foundation for the Advancement of Teaching and is located in the State Capitol. The College of Education has a long and honored history as the second founded College in the University. The institution and the unit hold numerous accreditations. The advanced graduate and research mission is central to the College with 21 doctoral degree programs. Undergraduate education and the cooperative improvement of K-12 education are essential to the mission.

The College seeks accomplished, motivated, enthusiastic, and energetic candidates for the following positions:

**Assistant/Associate Professor**
**SPORT ADMINISTRATION**
(Tenure-earning)

The Department of Physical Education seeks a faculty member to teach graduate and undergraduate level courses in Sport Administration, mentor masters and doctoral students' research, advise undergraduate and graduate students, contribute to the department and university growth and to a sport administration community of scholars. This person must have an active research agenda with a focus in an appropriate content area of sport administration. All candidates should be able to teach research methods at the graduate level.

Minimum qualifications include: An earned doctorate in Sport Administration or related field. College/university teaching experience and evidence of scholarly activity. Some sport business industry experience is preferred. Candidates with college/university experience must have experience directing graduate student research, have a record of scholarly publications that shows a clear research focus, and provide evidence of national visibility.

Please send application package to Dr. E. Newton Jackson, Chair, Sport Administration Search Committee, Department of Physical Education, 109 Tully Gym, College of Education, Florida State University, Tallahassee, FL 32306-4280. For further information contact Dr. Jackson at (850) 644-5773, fax (850) 644-6975, or by email at njackson@coe.fsu.edu.

**Assistant Professor**
**LD/EH/VE**
(Tenure-earning)

The Department of Special Education seeks a faculty member in a program preparing teachers to work with students with learning and behavioral disabilities. Responsibilities include conducting scholarly research, teaching undergraduate and graduate classes, advising students, supervising field-based experiences, and engaging in service to the community and university.

Minimum qualifications include: An earned doctorate. A record of beginning scholarly productivity, a commitment to teaching and three years experience teaching in K-12 is required. Competence and knowledge in instructional adaptations to assist the learner with mild/moderate disabilities in accessing the general education curriculum are preferred as the basis for directing research, teaching, and service activities. Expertise in alternative assessment is preferred.

Please send application package to Dr. Bruce Munchetti, Chair, Special Education Search Committee, Department of Special Education, 205 STB, College of Education, Florida State University, Tallahassee, FL 32306-4880. For further information contact Dr. Munchetti at (850) 644-8414, fax (850) 644-8715, or by email at bmenchet@garnet.acns.fsu.edu.

**Assistant Professor**
**HISTORY & PHILOSOPHY**
(Tenure-earning)

The Department of Educational Foundations & Policy Studies seeks a faculty member with a well-defined research area in educational studies. The position entails teaching graduate level philosophy of education courses to students' college-wide, directing graduate majors, and advising graduate students in the college and university on philosophical aspects of their research. The person will be expected to teach sections of the undergraduate course in social foundations of education and have K-12 experience helpful to students interested in pursuing careers in education. The successful candidate will have expertise in philosophy of science and policy and practice issues such as feminist perspectives, relations of theory to practice, social philosophy, teaching, curriculum and learning and/or cultural studies.

Minimum qualifications include: An earned doctorate in Philosophy of Education or Philosophy with scholarship in educational studies. The person hired will be expected to further the development, visibility, and national reputation of the university by virtue of his/her own research and publication.

Please send application to Dr. Emmanuel Shargel, Chair, History & Philosophy Search Committee, Department of Educational Foundations & Policy Studies, 306 STB, College of Education, Florida State University, Tallahassee, FL 32306-4451. For further information contact Dr. Shargel at (850) 644-8173, fax (850) 644-6401, or by email at shargel@coe.fsu.edu.

**Assistant/Associate Professor**
**HIGHER EDUCATION**
(Tenure-earning)

The Department of Educational Leadership in Higher Education seeks a faculty member to assist in the preparation of individuals for positions of leadership in colleges and universities and related agencies whose activities impact higher education. We intend to appoint a faculty colleague who will continue the program's leadership in the area of student affairs, build a sponsored research emphasis in student related research in higher education, help enhance the enrollment and quality of graduate students, and work closely with the student affairs staff at Florida State in an on-going program of internships and graduate assistantships. The assignment will require teaching, research, and service in a program that grants the Masters of Science, education Specialist, Doctor of Education and Doctor of Philosophy degrees. Service on doctoral committees will be expected, and will require advanced preparation in and experience with current research methods.

Minimum qualifications include: An earned doctorate in higher education or student affairs. Candidate must provide evidence of exceptional promise as a academic in an ambitious research university, be active in the profession, and have the experience and maturity to work closely with advanced graduate students from varying backgrounds. A candidate for the associate level should present evidence of a coherent body of published research within the areas identified below. A candidate for the assistant level should present evidence of potential for developing a well defined research thrust relevant to the identified areas. The successful candidate will have expertise in student affairs, higher education and student development theory and one or more of the following: minority student development, student support programs, institutional effectiveness, applications of technology, distance learning or higher education policy. We expect this person to qualify for graduate faculty status and, within a reasonable period of time, meet the college and university requirements for doctoral directive status.

Please send application package to Dr. Beverly Bower, Chair, Higher Education Search Committee, Department of Educational Leadership, 113 STB, College of Education, Florida State University, Tallahassee, FL 32306-4452. For further information contact Dr. Bower at (850) 644-7084, fax (850) 644-1258, or by email at bower@coe.fsu.edu.
Associate Professor/Full Professor
EDUCATIONAL ADMINISTRATION
(Tenure-earning)

The Department of Educational Leadership seeks a faculty member to assist in a program that prepares individuals to assume leadership roles in schools, school districts, Department of Education and related policy-making agencies. The position will require teaching, research and service in a program that grants Master’s, Specialist, Doctor of Education, and Doctor of Philosophy degrees. The program seeks a person with knowledge of instructional leadership and curriculum design and expertise in one or more of the following areas: information management and distance learning technology; charter and alternative schools; and collaborative arrangements advancing public education. A successful candidate will develop a research and publication agenda that reflects an understanding of contemporary education issues and will be successful in securing external funding for research and development. This position requires competence as a teacher/advisor working with graduate students of varying backgrounds, the ability to work across related disciplines in the College/University; and evidence of commitment to professional development and service to the profession.

Minimum qualifications include: An earned doctorate with an emphasis in educational administration, evidence of promise as an academic in a major research university, and leadership experience in public school settings.

Please send application package to Dr. Judith Irvin, Chair, Higher Education Search Committee, Department of Educational Leadership, 113 STB, College of Education, Florida State University, Tallahassee, FL 32306-4452. For further information contact Dr. Irvin at (850) 644-6447, fax (850) 644-1258, or by email at irvin@coe.fsu.edu.

Assistant Professor
INSTRUCTIONAL SYSTEMS
(Tenure-earning)

The Department of Educational Research at Florida State University seeks a faculty member who is able to teach graduate courses, conduct a program of research, and engage in service to the university and profession. A strong systems focus is required. The expertise of the individual can be in any of the areas offered by the Instructional Systems Program, including instructional design, performance technology, K-12 applications, change process, distance education, or interactive technologies. The candidate will typically teach graduate courses in his/her area of specialty and other core courses in the department. Candidates should demonstrate strong potential for scholarly achievement and the ability to secure external funding for research projects.

Minimum qualifications include: An earned doctorate in Instructional Systems, Educational Technology or closely related field such as Educational Psychology. Candidate should have a record of publications, presentations, and other scholarly activity commensurate with experience in the field. Evidence of preparation to teach educational technology courses at both the undergraduate and graduate levels, and ability to work in a collaborative environment is required. College teaching experience is highly desired. Summer teaching responsibilities may be possible dependent upon programmatic need and University resources.

Please send application package to Dr. Amy Baylor, Chair, Instructional Systems Search Committee, Department of Educational Research, 307 Stone Building, College of Education, Florida State University, Tallahassee, FL 32306-4458. For further information, contact Dr. Baylor at (850) 644-5203, fax (850) 644-8776, or email at baylor@coe.fsu.edu.

Associate Professor/Full Professor
INSTRUCTIONAL SYSTEMS
(Tenure-earning)

The Department of Educational Research at Florida State University seeks a faculty member to teach graduate courses in ID/PT, conduct a program of research, and engage in service to the university and profession.

Minimum qualifications include: An earned doctorate. A strong background in instructional design/performance technology (ID/PT) is required. Experience in applying ID/PT in business and industry is highly desired. Candidates should have a strong record of scholarly achievement. Evidence of ability to secure external funding is highly desired.

Please send application package to Dr. Robert Reiser, Chair, Instructional Design Search Committee, Department of Educational Research, 307 Stone Building, College of Education, Florida State University, Tallahassee, FL 32306-4458. For further information, contact Dr. Reiser at (850) 644-5203, fax (850) 644-8776, or email at reiser@mailer.fsu.edu.

Assistant Professor
PROGRAM EVALUATION
(Tenure-earning)

The Department of Educational Research seeks a faculty member who has experience in qualitative methods of research and program evaluation. Responsibilities include teaching graduate courses in program evaluation and qualitative methods, conducting a program of research, and engaging in service to the University and profession. There is a strong evaluation network in the southeastern region, in Tallahassee, and at Florida State University, and the successful candidate will be expected to become active in this network.

Minimum qualifications include: An earned doctorate in Evaluation, Educational Psychology, or related field. Candidates should demonstrate potential for scholarly achievement and the ability to secure external funding for research projects.

Please send application package to Dr. Marc Driscoll, Chair, Program Evaluation Search Committee, Department of Educational Research, 307 Stone Building, College of Education, Florida State University, Tallahassee, FL 32306-4458. For further information, contact Dr. Driscoll at (850) 644-8776, fax (850) 644-8776, or mdriscoll@mailer.fsu.edu.

Assistant Professor
OPEN AND DISTANCE LEARNING
(Tenure-earning)

The Department of Educational Research seeks a faculty member who is able to teach distance courses, continue program development, and advise students in open and distance learning. Candidate will conduct a personal program of research related to some aspect of distance learning for the open and distance learning program. The position is part of a new graduate major that was developed in a collaborative effort between FSU and the Open University of Great Britain. The program was implemented three years ago and is offered entirely on-line through web-based technologies. Florida State University’s Master’s Degree in Open and Distance Learning is characterized by the convergence of instructional systems and distance learning technologies.

Minimum qualifications include: An earned doctorate in Instructional Systems, Distance Education, or related field. Experience in the design, development, and implementation of distance courses delivered by text, telecommunications, and computer networks; and evidence of potential for scholarly productivity related to distance learning is required.

Please send application package to Dr. Robert Morgan, Chair, Open and Distance Learning Search Committee, Learning Systems Institute, 4605 UCC, Florida State University, Tallahassee, FL 32306-2540. For further information, contact Dr. Morgan at (850) 644-2570, fax (850) 644-3783, or email at rmorgan@isi.fsu.edu.

Application package should include letter of application documenting interest and qualifications; current vita; and list of names, addresses and telephone numbers of five references who may be contacted.

Applications for these positions will close on February 16, 2001. Position will begin no later than August, 2001.

The Florida State University is an equal opportunity, affirmative action employer, and women, minorities, and individuals with disabilities are strongly encouraged to apply.
UNIQUE OPPORTUNITY
PASSIONATE ABOUT THE ACADEMIC SUCCESS OF LATINO YOUTH?

As a new national model, Project Impact seeks high energy, visionary leaders committed to creating and implementing innovative strategies aimed at the academic success of Latino students in Minnesota. Commissioned by Illinois Governor George Ryan and Chicago Mayor Richard M. Daley, Project Impact will become a benchmark for best practices in promoting the educational success of Latino youth, ages 5-18.

The following leadership positions on Project Impact's management team are available:

- Director of Strategy and Research, 3-5 years of experience in social/education policy; minimum M.A./M.S.; Ph.D./Ed.D. preferred
- Director of University/College Relations, 3-5 years experience in program development; minimum M.A./M.S.; Ph.D./Ed.D. preferred
- Director of Learning Technologies, 3-5 years school-based information technology experience with interactive web sites; minimum B.A./B.S. in IT or IS
- Director of Marketing/Communications, 3-5 years of experience in marketing/public relations/media relations; brand management/image building experience; minimum B.A./B.S.; strong bilingual (oral & written) skills required (Spanish/English)
- Director of Development, 3-5 years of successful fundraising experience from institutional sources; corporate relations/sales experience a plus; minimum B.A./B.S.
- Director of Mentoring, 3-5 years of experience in K-12 environment; some volunteer management experience; minimum B.A./B.S. degree; bilingual (English/Spanish) required

- Instructional Services Librarian
- Librarian
- Public Services Librarian
- Social Work/Sociology Instructor
- Speech Instructor

Stephen F. Austin State University President

Stephen F. Austin State University (SFA) invites applications and nominations for the position of President. The President reports directly to the Board of Regents, whose nine members are appointed by the Governor of Texas. The university's focus is on excellence in undergraduate education complemented by superior graduate education, vital community outreach programs, and the advancement of knowledge and creativity.

Founded in 1923 as a teacher's college, SFA is among the top producers of teachers and school administrators in Texas. SFA is a comprehensive university offering more than 60 undergraduate majors, 40 graduate majors and doctorates in two fields. The university provides instruction in seven academic colleges: Applied Arts and Sciences, Business, Education, Fine Arts, Forestry, Liberal Arts, and Sciences and Mathematics; and has a full enrollment of approximately 12,000 students. SFA is a member of the Southland Conference and an NCAA Division I school.

SFA is located in the East Texas town of Nacogdoches (pop. 32,000), approximately 140 miles north of Houston, 150 miles southeast of Dallas-Fort Worth, and 80 miles southeast of Shreveport, Louisiana. The 400-acre campus contains 28 major instructional buildings and 14 dormitories set in the midst of an impressive setting of pine trees and natural beauty. SFA has a student-to-faculty ratio of approximately 20-to-1 and an average class size of 28. SFA employs 590 faculty and 925 staff members. The university's 2001 budget is approximately $17 million.

Applicants and nominees must possess high academic and personal standards, be energetic and persistent in the pursuit of excellence, and have the ability to work effectively with the Board of Regents. The principal professional qualifications sought include, but are not limited to, an appropriate combination of the following types of attributes: academic leader, evaluator/planner, effective administrator, community developer, and resource acquirer. Advanced degree is required, earned doctorate or terminal degree is preferred.

Applicants should submit a letter of interest addressing each of the professional qualities listed, a current curriculum vita, and the names, addresses, business and home telephone numbers of five references. Individuals wishing to nominate candidates for the position should submit a letter of nomination, including the name, position, address and telephone number of the nominee. For best consideration, applications should be submitted prior to February 21, 2001. Review of applications will begin immediately and continue until an appointment is made.

Applications and nominations should be sent to:
Dr. Jan Greenwood, Vice President
A. T. Kearney, Inc.
Southern F. Austin State University Presidential Search
333 John Carlyle Street
Alexandria, VA 22314
greenwoodjan@skakearney.com

Stephen F. Austin State University is an equal opportunity employer committed to diversity within the workplace.

ROMERO’S SPIRIT LIVES ON IN SALVADORAN PEOPLE

El Salvador is the only nation in the world named after the Christian Savior. This Central American country, the size of Massachusetts with a population of six million, recently fought a 12-year civil war, which ended in a negotiated settlement. A peace accord was signed in 1992.

As a political scientist examining root causes of conflict, just war theory, conflict resolution, and the transition to democracy, I became interested in El Salvador in the early 1980s. Teaching in a Catholic university, I was drawn to study the civil war by reading about the assassination of the Archbishop of San Salvador, Oscar Romero, killed while celebrating Mass. After his death, four American churchwomen on the road between the airport and San Salvador were abducted, beaten, raped, then murdered. The military committed the murders. The assassination of priests, nuns, and lay Christians became a metaphor for the suffering of the people.

The more I studied El Salvador, the more I felt called to travel “to the savior.” After my first trip to Central America in 1986, I returned every year until the peace accords were signed in 1992. And three times since, most recently in March, for a week of events and ceremonies commemorating the 20th anniversary of Romero’s assassination.

The spirit of Romero is important for postwar reconciliation, even though the archbishop remains controversial. Why is Romero so loved and feared?

Romero was appointed bishop and archbishop because he was a conservative, traditional theologian, a pastoral priest, and a charismatic preacher. As the military dictators increased the repressive measures (arrest, torture, disappearances, and assassinations) against anyone opposed to the government, the victims came to include practitioners of a theology of liberation, a theology rising out of political oppression and extreme poverty in Latin America. Lay parish leaders, catechists, and religious individuals who worked to organize and raise the consciousness of the poor were considered communists by the economic oligarchy and military.

Leaders of Christian base communities made regular visits to Archbishop Romero to tell him of the increased repression. Then a Jesuit priest, the Rev. Rutilio Grande, a friend of Romero, was assassinated for speaking on behalf of the poor. Gradually, the spirit of the poor transformed Archbishop Romero. This is the beauty of Christian base communities rooted in a theology of liberation. Lay and religious persons live with the poor not to convert them but to be spiritually transformed by them.

Archbishop Romero’s spiritual transformation led him to become a prophetic voice on behalf of El Salvador’s poor. This moved him to condemn state-sanctioned violence and repression against them. For this, he was martyred.

There is a movement there to have the Vatican recognize Archbishop Romero as a saint. While symbolically important, canonization would only confirm what the poor and marginalized already know. Romero is their saint, regardless of Rome’s decision.

In San Salvador, 1986, I made my first visit to the cathedral there that Romero, as archbishop, refused to finish refurbishing, saying, “How can I justify spending money on a building when so many of God’s children are suffering?”

I sat in the sanctuary near Romero’s tomb for more than an hour watching the poor pray and talk to their children about Romero being a Salvadoran child of God. On leaving, I saw a woman cuddling a newborn baby. I asked if I could take a photo of the spirit of Archbishop Romero. She smiled and held the baby so he faced the camera. This materially poor and homeless woman knew exactly what I meant and felt.

On every trip to El Salvador, I research the status of the peace accords and the transition to a more just and democratic state. That is the political scientist in me. But on every trip to the tiny nation, I am spiritually transformed by poor campesinos and the marginalized of El Salvador’s Christian base communities. They teach me the relevance of a theology of liberation. In the midst of a civil war and a difficult postwar period, they continue to be a people of faith and hope. They grant me a wonderful gift—the spirit of Archbishop Oscar Romero.

If interested in submitting a Punto Final! “think piece," please e-mail us at sloutlook@aol.com for guidelines.
Targeting Latinos
Vacancies

Blue Ridge Community College, one of 23 colleges in the Virginia Community College System, is nestled in the historic Shenandoah Valley near the beautiful Blue Ridge mountains. The College serves a growing population of about 200,000 which includes three counties and the progressive cities of Waynesboro, Staunton, and Harrisonburg. The area is also home to several four-year institutions including James Madison University; the University of Virginia is about 45 miles away in Charlottesville. The College's geographic location offers the advantages of a small town lifestyle with easy access to the cultural and recreational facilities of major metropolitan centers such as Washington, D.C. and Richmond, Virginia.

Blue Ridge Community College is seeking energetic faculty members for the following teaching positions:

Information Systems Technology

Responsibilities include teaching courses in at least two of the following subject areas: Visual Basic, Visual C, JavaScript; Oracle; Unix, Windows, DOS, and operating systems; telecommunications and networking; web page development; graphic design; and e-commerce. Some teaching in Microsoft Office may also be required. The successful candidate must also be prepared to assist in the creation of a web development specialization. Required qualifications include a Bachelor's degree in Information Systems Technology or a related field and 2 years related occupational experience. A Master's degree in Information Systems Technology or a related field may be substituted for occupational experience. If the successful candidate does not possess a Master's degree with 18 graduate semester hours in Information Systems Technology or a related field, he or she will be expected to obtain one within 5 years with an emphasis that directly supports the needs of the IST program. The College provides support for professional development to assist the employee in achieving this requirement.

Speech Communication

Responsibilities include teaching courses in speech communication. Additional responsibilities include providing leadership in the development and implementation of an expanded speech communication program. The College is interested in pursuing the development of a theatre arts program and the successful candidate would be expected to contribute significantly to identifying the need for and resources required to establish a viable program. Additional responsibilities include collaborating with colleagues in the humanities and English department on implementing new initiatives and cultural affairs events. Required qualifications include a master's degree with 18 graduate semester hours in Speech Communication.

Mathematics

Responsibilities include teaching courses in mathematics. Required qualifications include a Master's degree with 18 graduate hours in mathematics. Preferred qualifications include teaching experience in precalculus and calculus and their applications to science, engineering, and business.

English

Responsibilities include teaching courses in English and World Literature as well as college composition. Required qualifications include a master's degree with 18 graduate semester hours in English. Preferred qualifications include graduate work in English and World Literature as well as rhetoric/teaching composition.

Qualifications and Responsibilities Common to All Faculty Positions

Qualifications required for all positions include a demonstrated commitment to teaching, a commitment to applications of instructional technology, and an understanding of the community college environment and mission. Community college or university teaching experience is preferred. In addition to teaching, responsibilities for all faculty include student academic advising; service on college committees; participation in scholarly and professional activities; mentoring adjunct faculty within the discipline, and institutional service. Teaching assignments may include a combination of day and evening classes at one or more locations served by the College. Candidates for all positions should be familiar with and supportive of the College's Mission, Values, and Strategic Directions. (These may be found on the College's Home Page, at the address listed below). Depending on credentials and experience, salary range for Instructor is $31,818-$39,295 and $56,591-$54,022 for Assistant Professor. All of the above positions are full-time, nine-month, renewable appointments with a start date of August 16, 2001.

Blue Ridge Community College is also seeking qualified applicants for the following administrative position:

Coordinator of Institutional Research

Reporting directly to the President, the position is responsible for: federal, state and local reports; institutional and program assessment support; development and execution of institutional research studies; and coordination and support of college grants.

Qualified candidates will possess the following: an earned Master's degree in a relevant area; at least two years experience in planning, research, and evaluation; demonstrated skills in written and oral communications, analysis, and presentation; knowledge and experience working with appropriate software including SPSS and SAS; experience working with maintaining databases for reporting and decision making; and commitment to the philosophy of a comprehensive community college.

This is a full-time, twelve month, renewable administrative appointment with a starting salary range of $46,666-$63,424. A start date of July 1, 2001 is anticipated.

Application Deadline for All Positions is March 09, 2001

See the college website at www.br.cc.va.us/employment/ for complete announcement and application process details, or call the Personnel Office at 540-234-9261, Ext 2213 (TDD 540-234-0848). Blue Ridge Community College is an Equal Employment Opportunity/Affirmative Action employer. Minorities are strongly encouraged to apply.

Congress: Salaries and Perks

This month, many Americans will pause to honor George Washington and Abraham Lincoln, successful politicians of days gone by. Revered in death as they rarely were during their lifetimes, they certainly suffered Shakespeare's "slings and arrows."

Washington was called serpent-like, an unprincipled fortune hunter, and desirous of being crowned a king. Lincoln was depicted as a gorilla, a country bumpkin totally lacking in class or breeding. Neither enjoyed many perks. Washington never lived in the White House. Lincoln did so while cows and pigs grazed on the front lawn and his wife hung laundry in the living room.

A politician's job is often thankless. The hours are long, the many constituents and pressure groups never satisfied. Much of what you do is done at times inaccurately publicized. And while you might love publicity, you don’t want bad publicity.

Congress has 100 senators, 13 of them women, and 435 representatives, 99 of them women. It is as political as any entity in the country. But it is also a club. Rancor and posturing displayed publicly, especially when TV cameras are present, are rarely in evidence behind closed doors. More than 90 percent of its incumbents are invariably re-elected. Some in Washington, such as the National Taxpayers Union, consider congressional benefits and compensation a dream package.

Salaries

The salaries are relatively modest, given the obligations and workload. They start at $141,300. Those in top posts, such as the House Speaker, receive $181,400. The salaries are certainly less than these talented people could command in the private sector. It's the perks and quirks that irritate some. Their pay raises are automatic, unless they vote to stop them. They can start collecting a pension at age 50. A large office staff and free parking at work and at nearby airports are provided. They have the franking privilege—virtually unlimited free postage—that allows them to send out flyer after flyer, paving the road to re-election. They can also spend weeks away from the job on other business—such as campaigning—and still get paid. Wonder no so many are re-elected so effortlessly.

The National Taxpayers Union reports that the House Speaker, a top 25 retiring lawmaker, could face $7 million in expenses to settle an income tax audit. The Internal Revenue Service said the Speaker's income was properly calculated from the various places he worked. It is true that Congress has re-elected so effortlessly because it is a member's club, with an internal culture of insulation from public opinion and public scrutiny.

The National Taxpayers Union, written by Peter J. Sepp, likens congressional pensions to "a Rolls-Royce among Cadillacs." He correctly points out that they are two to three times more generous than are private pensions of six-figure earners. "Today, a sitting lawmaker who retires at age 60 with 15 to 20 years of service will likely collect at least $1 million in inflation-compensated lifetime pension benefits," says the report. "Some will collect four or five times that amount."

Former members can retire at 50 and collect their pensions even if they are well-paid lobbyists making far more than they ever did while in Congress. And many do. Sepp reports that 12 percent of all members who have retired since 1970 are listed as lobbyists in the 1998 edition of Washington Representatives.

Former congresspersons can even collect their pensions if they are in prison for malfeasance while in office. And some have.

Perks

Some of the criticism in the NTU report seems unreasonable. Of course congresspersons need a large office staff to handle constituent services and other duties. But the franking privilege, it could be argued, constitutes public financing of political campaigns—for incumbents only. It is hard for a challenger to overcome the barrage of official-looking good publicity.

Federal law calls for reducing their pay for each day absent, unless the absence is due to personal or family illness. The NTU points out that both Democrats and Republicans routinely violate that regulation, especially during the ever-growing campaign season.

In years past, taxpayer-paid junkets to exotic points in the dead of Washington's dank winter were far more widespread. But travel was cut back. The heat of public exposure was just too much. Lawmakers do retain access to 150 free parking spaces at Reagan National and Dulles airports. Senator John McCain's 1994 resolution to end the airport parking subsidy failed 53-44.

Other perks continue, enabling congressional pols to live much better than most of their constituents. Two IRS "customer service centers" help lawmakers and Capitol Hill staffers complete their tax returns. Now congresspersons pay a token amount for their once-free haircuts, but taxpayers still subsidize the Senate barbershop and beauty salon.

Until 1992, all members could enjoy modern health clubs staffed by government-paid masseurs and such, free of charge. But after media attention, members levied a $400 annual fee for their gymnasiums, which include swimming pools, saunas, steam baths, body-building equipment, and other amenities.

Members also seem quick to spend taxpayer money to enhance their offices: 232 of the House's 435 members moved their offices after the 1996 election. The moving and redecorating expenditure exceeded $600,000. Not much of an example of frugality.

Dr. Mellander is a professor at George Mason University. 
Think tanks, or policy research institutes, have existed for some time, although their proliferation has become a worldwide phenomenon in recent years. Their purpose—to research and influence the social and political environment. Led by “great” thinkers, these “cerebral entities” have charged themselves with tracking, researching, and analyzing the impact of technology, education, economics, politics, globalization, and the like on the state, America, for instance, and disseminating its findings and positions.

According to the National Institute for Research Advancement (NIRA), there are 289 institutes from 72 countries and regions in its present directory of think tanks. One of our features recognizes some of the oldest think tanks in the country. It also introduces a new breed—ethnic think tanks, Hispanic think tanks among them—that have developed out of a need that mainstream Washington, D.C., think tanks have not met. The article discusses what their goals are and their reception by other think tankers.

Our article “Ranking the Tanks” notes that Hispanic think tanks are “the new kids on the block.” It states, “How many there are and how many fit the strict definition of a pure research center is difficult to assess because most of these ethnic institutions blur the distinction between research and advocacy.” The National Council of La Raza (NCLR), in Washington, D.C., has earned think tank distinction. Tomás Rivera Policy Institute (TRPI), founded in 1985, also bills itself as “the Premier Latino Think Tank.” And there are others too that perform high-profile research and analysis in a variety of Latino-related issues.

Our next issue, dedicated to Women in Higher Education, looks at Latina accomplishments as well as disparities that continue to overshadow progress. An update from the American Council on Education regarding college presidents, reveals that “since 1986, the percentage of women college presidents doubled, from 95 percent to 19 percent, and the percentage of minority presidents increased from eight percent to 11 percent.” But in 1998, Hispanics comprised three percent of the total number of college presidents, up one percentage point from 1986. Another story takes a look at faculty diversity pre- and post-Proposition 209, which suggests that while it might be too soon to gauge the impact of Prop 209, the future looks bleak.

What do you think? Write to us. 

M. Gammert
One hundred and twenty years ago, the Sisters of Charity of Incarnate Word founded Incarnate Word College in San Antonio, Texas, as a center of higher education for women. The first student to graduate from the school was a Mexican American.

Today, the University teaches both men and women and spreads over 110 acres in the charming Alamo Heights area of San Antonio, yet remains true to its original tenets, promoting lifelong learning and attending to the needs of the whole student. While continuing to graduate a large percentage of Hispanics (it was listed by The Hispanic Outlook as one of the top 50 in this regard), UIW is also building on the technology and diversity of the future.

This unique combination of tradition and technology provided for its students is a vision brought to the University by its president, Dr. Louis Agnese. In 1985, Agnese came on board as the youngest president of a four-year institution of higher learning in the United States. He remembers very clearly the beginning of his term. "The school did not reflect the South Texas population, which was a very Latino population," he said. "It was really serving the area around it—Alamo Heights, a richer area."

In 1986, Agnese launched a very aggressive marketing campaign in English and in Spanish to attract the Latino students. His was the first university to advertise in Spanish. "The result is that it transformed the college to reflect the population of South Texas," said Agnese. "Many institutions, if you look at them and see a large minority population, were either founded to do so, or if they..."
Flags of more than 20 countries with sister programs adorn the $6 million International Language Center, which hosts training and conferences.

 weren't founded to secure this population, then the neighborhood around them changed. We decided it would be a market we would serve.

The growth in enrollment since Agnese's beginnings with the University are definitely impressive. Currently, 3,702 students are enrolled, a 155 percent increase since 1985, and the Hispanic population has grown from 419 to 1,858 in the same 15 years. Today, about 50 percent of the campus is Latino of an approximate 71 percent minority, a much more accurate reflection of South Texas than when Agnese first entered office.

But Agnese didn't stop there. His vision from the beginning was not only of attracting the appropriate number of Latinos and minority students to his school, but also of finding a means of support for this less-affluent group of students and providing them with a global and proactive education. Since, as Agnese stated, "We not only brought ethnic balance to this university, but also balanced the economic background [25 percent affluent and 25 percent very poor]," it has been crucial for him to increase the aid available for less-affluent or first-time students. Today Incarnate Word boasts a large percentage of first-time students, thanks to an aid package of $92,564,002 this past year. It's Agnese job to raise money, and his success has been laudable.

He admits, "The chief function of my job is as a pick-pocket. This flows through me." The result has been that "you can't tell who's the rich or the poor kid on our campus. We look like an Ivy League."

It's this desire to give students the same exposure that they would have at an Ivy League school that inspired Agnese to begin a global program in 1992. This has meant building "sister schools" around the world, from Mexico and Brazil to Turkey, Australia, and most recently China. All in all, the school currently has approximately 60 such sister schools where students can study abroad for one semester or an entire year and earn degree credit. UIW is now the first foreign institution of higher learning to issue degrees in China. "Many of our students never left Texas," said Agnese. "But we wanted Latinos to understand the cultures that they are going to compete with. We needed to broaden that individual's understanding of the world."

Today, a leader in international education, UIW also runs a $6 million facility, the International Language Center, opened in 1996. Flags of more than 20 countries with sister programs adorn the building, which hosts training and conferences. Beyond attracting more diversity to campus, with students from around the world taking advantage of the facilities and courses, the Center is home to the Office of International Initiatives. It is here that faculty, students, support staff, and businesspeople learn more about one another and the process of globalization.

In 1996, Agnese transitioned the university from what was then Incarnate Word College to the University of the Incarnate Word to better reflect its growing services and its actual role. UIW currently offers 43 undergraduate and 24 graduate programs, including business, nursing, art, and music industry Studies.

A unique aspect is its partnership with Sony Music Publishing through the foreign language department. To find more Spanish songwriters, this pre-eminent Latin music label, which promotes such artists as Gloria Estefan, Ricky Martin, and Julio Iglesias, has been conducting auditions and workshops with students interested in publishing their songs in Spanish. Amalia Mondríguez, who runs this partnership with Sony, spoke with full enthusiasm about the effects of UIW's partnership with Sony. "It was so wonderful," she said of auditions held with 60 students this past summer. "There are still people calling in from different parts of the state! Our students participated and got to see the real thing." Mondríguez recalled one specific writer of Mariachi who came in extremely shy but left elated by the enthusiastic words of Sony's creative director: "¡Tienes un palo! (You have a hit!)"

Mondríguez teaches children's literature in Spanish, the only university in San Antonio to do so. Noticing a void in children's music in Spanish, she is also organizing students and faculty to record Spanish lullabies for a label. "We are excited about the project," she said, acknowledging that any proceeds will go
to scholarships for students and to poor children. "It is a creative way to help."

Mondragón has watched how her students who have participated in various internships through the University are now working in television and related fields. Dr. Gilberto Hinojosa, dean of the School of Graduate Studies and Research and professor of history, has seen the same successes.

"It is a wonderful learning experience that takes them beyond their small circle of friends," he said of the internships offered by nearly every discipline. What has really moved him about his experience at UIW, however, especially after coming from the University of Texas at San Antonio about eight years ago, is the personal attention that students receive from teachers and the school.

When he first arrived at UIW, he wasn't able to receive tenure until he was seen in the classroom. Attention to students was key. Typical classroom size at UIW is 25 students. He recalled how two to three weeks into his work, he was gathering with other faculty, one of whom asked him about one of his students. Having come from large lecture halls, Hinojosa had given up on remembering students' names. He didn't recognize the name of a student in his class of 25. The colleague was appalled. Said Hinojosa, "Knowing each student is what Incarnate is all about. It is a sense of security and belonging that allows students to flower." The concern for each student is so great, he explained, that when students miss more than three classes, another student is hired to call them up and help them. "Where else is a student hired to check up on you if you miss three classes?" asked Hinojosa. Although all the support might make for a better academic year for students, he added, "they have to work hard."

The result of working hard and having a supportive network to do it in is high retention and graduation rates, especially for Latinos who average much lower nationally than at UIW. "Two years ago, we compared our retention rate for Hispanics at 72 percent favorably to the national rate of 17 percent," said Jim Dalglish, director of public relations.

It seems, when talking to Agnese, that his vision for UIW is ever expanding, from the campus that is Incarnate to the community that makes up South Texas. One area of importance for him has been what he has deemed "The Brainpower Connection," an alliance of schools from pre-kindergarten through university with coordinated curriculum and resources. As he described it, the University was at its inception an elementary school with a college charter that covered elementary through college. In 1881, the college was added. "In our history, we were one system," said Agnese. From 1988 to 1994, he brought together those schools that were once part of this system, and included other high schools and lower-level schools. "From day one in kindergarten, they will be exposed to college, from the very beginning," said Agnese.

Enrollment in the schools now under the Incarnate system has more than doubled since the change, and in some, with a large proportion of the students being Latino, almost 100 percent of the students are going on to college.

But Agnese's vision doesn't stop there. His latest implementation is visible in all locations throughout campus. It has to do with technology, which, like his globalization efforts on campus, is being brought to students to give them the same advantages that someone at an Ivy League would have. As part of the largest IBM Thinkpad distribution in the Southwest, 900 laptops were given to all full-time sophomores and juniors this past fall, with sophomores, juniors, and seniors expected to receive them this year. "A student whose family never thought they'd own a computer will now have one," said Agnese. The agreement requires students to pay $590 per semester for the computer. After six semesters, the laptop becomes the student's. Also provided have been printers, carrying cases, and a Microsoft suite, which, all in all, costs the University $800 per student per year, $680,000 in total. "As a Hispanic-serving institution, we might be one of two or three in the country doing this," said Agnese. "It is very important to us here."

To top this, UIW is also "going wireless." What this means is that not only will it be implementing laptop use in the curriculum, but UIW is installing wireless technology throughout campus. Using wireless cards, students will be able to prop their computers up anywhere on campus and be able to connect to sensors placed near trees, in the library, and in different locations on campus. With this, students can access the Internet and conduct research from multiple locations.

It is hard to imagine what the University of the Incarnate Word would be like today without Agnese. After all, the school has grown in leaps and bounds during his presidency and continues to reach for the very best. Agnese's marketing savvy might be a factor. In 1999, he was honored by the American Marketing Association as the Marketing Person of the Year.

What Agnese holds close to his heart, however, is the fact that he was named the Hispanic Educator of the Year in 1994. "It was probably one of the greatest honors," he said, especially since "I am not Latino." (Agnese is Italian American.)

Recognizing that his presidency at the University of the Incarnate Word is not about race but rather about giving opportunity to a diverse group of students from South Texas, Agnese ended our interview saying, "Our children have the opportunity to do what they want, but it is not possible if you can't give them the tools and confidence. We just hope to continue being that kind of place that helps students reach for the stars."

"Knowing each student is what Incarnate is all about. It is a sense of security and belonging that allows students to flower."
Developing National Security Strategists

500 Graduate Degrees Offered by National Defense University

BY INÉS PINTO ALICEA

Since 1976, the National Defense University (NDU) has quietly been preparing future leaders of the armed services, State Department, and other civilian agencies for high-level policy, command, and staff responsibilities.

Although it is an accredited graduate-level institution and an important force within the education community, it has little recognition outside of Washington, D.C.

NDU grants some 500 graduate degrees in studies related to national security strategy, studies seldom found at other universities. An educational and research institution under the chair of the Joint Chiefs of Staff, NDU has a mission to educate military and civilian leaders through teaching, research, and outreach in national security strategy, national mili-
tary strategy, and national resource strategy, joint
and multinational operations, information strategies,
operations and resource management, acquisition,
and regional defense and security studies.

The main campus is at Fort Lesley J. McNair
in Washington. It also offers some programs at
Norfolk Naval Base in Va.

"What goes on here is strategic thinking," said James M. Keagle, its vice president for aca-
demic affairs. "We train and educate future
thinkers in strategy."

The university has had under
its auspices several facilities. The
National War College and The
Industrial College of the Joint
Forces, created long before NDU,
grant graduate degrees and now
fall under the NDU.

National War College, established in 1946, conducts a
senior-level course of study in
national security strategy and
national security in policy
process. Nearly 200 students
enroll annually. Each branch of
the armed services has its own
war college. The National War
College is the first multi-service
institutions.

The Industrial College of the
Joint Forces prepares selected
military officers and civilians for
senior leadership and staff posi-
tions by conducting postgradu-
ate executive-level courses and
associated research dealing with
the resources component of
national power, with special
emphasis on material acquisition
and its integration into
national security strategy. Some
300 students enroll annually. It
was created in 1924 to train military officers in the
intricacies of industry’s mobilization for
modern war. In addition, the Industrial College
of the Armed Forces (ICAF) places special
emphasis on acquisition and joint and strategic
logistics and their integration into unified strategy.
Grades of this 10-month program get an
MS in National Resource Strategy. Each agency
or armed services sector pays for the tuition and
fees of the students it sends.

The Colleges are Middle States accredited.
Since its creation, the University has seen marked
growth in its support and research functions. The
written exams. While enrolled, they attend full
time while receiving full salaries, said Keagle.

The average age is 42, and average rank,
senior lt. commander/Navy commander, junior lt.
colonel/Navy captain or civilian equivalent, with
20 years of service. Three-quarters are U.S. mil-
itary officers from all branches. The rest are from
the Department of Defense or other federal a-
encies, and a small number from the private sector.
Three-quarters already hold a master's degree.

Faculty members are both civilian and mili-
tary, are not tenured, and tend to serve three-
year tours, said Keagle. Nearly all civilian faculty
have doctoral degrees. Military faculty have
master's degrees and are themselves war college
graduates. There are no Latino faculty members
at either college, according to officials at both.

Diversity

"Diversity is important to us," said Keagle. "Our
programs are open to all. These are the rising
stars of their organizations." Each institution that
supplies the nominees, he said, is responsible for
seeking diversity.

"We think we are colorblind
in our admissions process and
how we treat our students when
they are here."

The University as a whole, with all of its affiliated institu-
tions, employs six civilian Latinos
and one military Latino. The
National War College has three
Latinos in this year’s class. The
ICAF has six Latinos enrolled.

Many of the NDU officials
interviewed note that there is
diversity in that there are repre-
sentatives from the different
branches of the armed services
and that diversity enhances
classroom discussions.

Indeed, the armed services
are considered relatively
diverse—the U.S. Department of
Defense is not. In the Defense
Department, Latinos comprised
about 6.2 percent of its 710,000
or so employees. And 14 Latinos
comprise 1.2 percent of the 1,211
employees in the highest govern-
ment grade—the senior executive
service, according to Defense
Department statistics. Latinos
represent only 2.9 percent or
2,114 of the 72,023 employees in the next highest
ranking grades in the federal government—GS
13-15.

But, Commander Paul R. Martínez, enrolled
at ICAF, said he has been pleased with the diver-
sity in the student body he has seen at ICAF.

A benefit is that "discussions on major issues
that face the world and our nation today will
have numerous perspectives, allowing the entire
student body to have a better understanding of
each individual's concerns," said Martínez.

"As a Naval officer, education is an integral
part of our military career," said Martínez. "$\text{Dr. Margaret Daly Hayes, first director of the Center for Hemispheric Defense Studies} $\text{823 02/12/2001} \text{HISPANIC OUTLOOK}$
Nearly all civilian faculty have doctorates. Military faculty have master's degrees and are themselves war college graduates.

U.S. military...encourages all its people, officers and enlisted, to pursue advanced education. With the growing complexity of the world, brought about by advances in technology, education becomes paramount....”

Martínez said the year of study will help him immensely.

"Professionally, this year enhances my understanding of the resources component of national security," he said. "It develops my ability to think at the strategic level and helps prepare me to work effectively in the complex and uncertain environment of national security decision-making."

Martínez said the U.S. military provides "unique opportunities for personal and professional growth that might be more difficult to find in other parts of our society."

The demand and need for the programs offered by the Colleges and NDU continue to grow, according to officials. Keagle said NDU is trying to expand its master's degree programs so they can be offered to non-resident students, using different technologies to help them complete their studies.

John Yaeger, dean of faculty and academics at the ICAF, said the end of the Cold War has brought substantial changes to the two schools' curricula.

"Before, we had one enemy to think about it, and it was a fairly easy strategy to come up with," said Yaeger. "If they did X, we did Y. With globalization of the world, the question is who the powers in the future will be."

Yaeger said it is important for the students to take a break from the daily grind of their jobs. "People get so involved in their day-to-day actions," Yaeger said. "The programs give them a chance to step back and think. We put them in an educational environment so they can discuss and anticipate problems they might face in the future."

Dr. Cynthia Watson, associate dean of the National War College, said national security issues encompass many areas, including drug trafficking, people trafficking, terrorism, and environment. But economics is a thread common to all, so a greater emphasis has been placed on it.

"The economic elements of power are infinitely more important than they used to be," said Watson. "It's still hard to find people who have an emphasis on economics. We are not a quantitative society."

Watson said she believes the Colleges will continue to offer master's degrees and not expand to Ph.D.s because the students need what is offered from a master's.

"Most of our students want practical, analytical tools that they can take back to their jobs," said Watson.

Other NDU Programs

There are several other educational centers and programs under the NDU, including four centers for regional security studies, including the Center for Hemispheric Defense Studies (See Sidebar), Center for the Study of Chinese Military Affairs, Near East-South Asia Center for Security Studies, and Africa Center for Strategic Studies.

There is the Joint Forces Staff College, Information Resources Management College, Institute for National Strategic Studies, Capstone, Reserve Components National Security Course, NATO Staff Officer Orientation Course, Center for Defense Leadership and Management Program, International Fellows Program, Net Assessment, and the National Security Education Program.

Scholarships, Fellowships, and Grants

The National Security Education Program awards undergraduate scholarships and graduate fellowships to U.S. citizens for study abroad and provides grants to U.S. colleges and universities, including community colleges, for international studies and language programs that develop and enhance programs of study in world areas and languages critical to U.S. national security.

Ed Collier, its deputy director, said the program would like to see more minority-serving institutions and community colleges participating in the program, either through scholarships for students or for grants for the institutions themselves. Moreover, he said, representatives from his office are willing to travel to venues where several institutions gather to meet with students and college officials to discuss details of the program. Collier said some 27 percent of scholarship and fellowship recipients are minority. Different educational organizations handle the NSEP scholarships, fellowships, and grants.

Information about undergraduate scholarships is available through its website at www.iie.org.nsep or by calling International Education at (202) 326-7697; about graduate fellowships by contacting the Academy for Educational Development at (202) 884-8285; and on grants to institutions by contacting Carol Ann Spreen at (703) 696-1991.

Since the program's inception in 1991, more than 1,500 college students have studied international subjects and languages important to national security. One condition is that recipients must agree to seek employment in a federal agency with national security responsibilities.

The NDU Press publishes Joint Force Quarterly, McNair Papers, Strategic Forum series, and numerous books about national security issues.

Visit NDU at www.ndu.edu.
In post-Cold War times, countries around the world are expressing a renewed interest in defense studies as there is growing collaboration among civilians and military, as well as a need to redefine each nation's concept of security and defense.

"Civilians are now more interested in the evolution of democracy," said Dr. Margaret Daly Hayes, director of a relatively new defense studies center established to address that demand. "People are realizing that the armed forces are an institution that belongs to their countries and that good governance is important."

The Center for Hemispheric Defense Studies (CHDS) is focusing its efforts on Latin America and the Caribbean and trying to build a program that will soon offer graduate credits and possibly a new degree in defense studies. Few universities in the Americas offer defense studies degrees, and in the United States, defense studies programs often have lacking "legitimacy and acceptance within university and governmental circles," according to the Center's annual report. The Center is located next to Fort McNair in Washington.

A Center publication indicates that the few institutions in Latin America and the Caribbean offering defense studies conduct them at the post-graduate level and perhaps tangentially.

Participants at the first meeting of the Ministers of Defense of the Americas, in July 1995 in Williamsburg, Va., agreed there was a need to increase civilian expertise in military and defense matters. Dr. William J. Perry, then U.S. Secretary of Defense, offered to help develop such a center, and thus CHDS was born. Daly Hayes, a former professor at George Mason University in northern Virginia and a well-known expert in international affairs and military issues, became its first director.

Established in September 1997, the CHDS has the mission of developing civilian specialists in defense and military matters from all the democratic countries in our hemisphere, including the U.S. It offers graduate-level courses, seminars, and continuing outreach programs in defense planning and management, executive leadership, civil-military relations, and interagency operations. Most participants are civilians with defense-related duties in government, or they are MP officers, or academics and media personnel covering defense issues. Seventy-five percent are civilians. Of those, half are in government. CHDS activities are tailored to requirements identified by the various countries. Most classes are taught in Spanish.

One of the challenges, said Daly Hayes, is to make sure that the courses are not presented within a "superpower framework" but in a manner relevant to all the participating countries, each with its own "unique twists" and defense needs.

"We are responding to the demands from 33 different countries..." said Daly Hayes. "There is a real enthusiasm and demand for this kind of material. Defense studies programs that do exist in the United States face several daunting challenges that have made them struggle for legitimacy in academic circles." Often they are allocated insufficient funds for defense and security education, she said, and the lack of civilian professor specialists in defense studies at the doctoral and even the master's level limits the course offerings and research.

A CHDS annual report says that military officers of educational institutions "often lack an advanced background in either an academic discipline or educational administration and tend to be rotated out of their positions before they have had the opportunity to develop or implement educationally sound programs." That practice, it says, is "fairly widespread."

So Hayes is reaching out to universities, particularly in Latin America, to collaborate with them so that the program, described as academically intense, can offer participants graduate credit. She hopes eventually to offer a full master's degree in defense studies. One program goal is to help participants build a network of people interested in these studies who can encourage educational institutions in their home countries to incorporate more defense studies coursework.

One ideal expressed in the annual report is a "much broader sponsorship base, with national governments and civilian universities taking the lead, as well as providing adequate funding." Daly Hayes said issues of national defense impact all sectors of society and should not be viewed as the exclusive domain of the armed forces.

"The prospects for collaboration among civilians and military are increasing due to a better understanding of the common interest between military, academics, associations of retired military personnel, universities, non-governmental organizations, international foundations, and pressure groups, among others," said the report. "Few civilians have knowledge about the military to play effective roles as leaders and managers of this sector."

"Many countries in the hemisphere have histories of authoritarian regimes," Hayes said. "Helping these countries—often relatively new democracies—to develop effective defense ministries to unify their military services is extremely worthwhile," she said.

"All of the activities are important for strengthening democracies," said Daly Hayes. She likens many countries participating in the seminars to the U.S. before the creation of the Department of Defense—each service with its own budget and its own identity.

But Hayes said funding for the Center has been tight compared to the demand for its offerings. Last year's budget was $4.7 million.

The Defense Planning and Resource Management Seminar, a three-week graduate-level core academic program offered in Washington four times a year, looks at the traditions, values, and ethics of the military institution; resource management; personnel matters, including training; legislative oversight; and public relations.

Short seminars are conducted at sites in Latin America and the Caribbean on themes identified with foreign counterpart institutions. A one-week seminar is held annually in Washington for military/police attaches and military officers assigned to foreign embassies. Short seminars held at sites in Latin America and the Caribbean center on themes.

The Center conducts an annual meeting for national legislators and senior government executives with defense responsibilities, and undertakes individual and collaborative research. It stays in touch with graduates, and provides curriculum-related assistance and continuing education through the Internet and through other tools.

The Center has served more than 500 participants so far from all countries in the Americas except Cuba and Haiti. Competition for limited slots each session is keen.

"One of the things people say they get out of our program is that they learn about the security perspectives of their neighbors," said Daly Hayes. "They also learn from each other about the best practices throughout the region. We measure our success in part by the word-of-mouth support that comes from the region and the increasingly good relationships we have with the defense ministries."

One or two U.S. participants are selected for every session, which Hayes said helps them "learn about how Latin Americans see their defense and security issues." They come from government, military, academia, media, or non-governmental organizations.

To participate, people can nominate themselves or have their organizations support their applications.

Candidates must have a university degree and must be able to use the knowledge garnered in the program in their current positions. All housing, food, and tuition expenses of participants are paid by the Center.

Daly Hayes has worked at the Inter-American Development Bank, Council of the Americas, and for the Senate Foreign Relations Committee.

She also has worked with Johns Hopkins School of Advanced International Studies, the Commission of the United States-Brazil Relations, and the Policy Sciences Division at CACI, Inc. Her Ph.D. in political science is from Indiana University.
Northern Arizona University
Hispanic Enrollment Reaches 10 Percent

BY ROGER A. DEITZ

Some distinctions are too prominent to keep quiet about. The numbers tell the story. This past year, Northern Arizona University granted the most master's degrees in the nation to Native Americans, while ranking 40th overall for the number of master's degrees granted to students of color. NAU also ranked first in the granting of master's degrees in education to Native Americans and first in the granting of master's degrees in education to Hispanics. Other categories in which NAU was among the top 100 nationwide include the granting to Hispanics of a master's in social science and history (35th), Hispanic doctorates in education (19th), and Asian American master's in education (38th).

Northern Arizona University officials were excited last fall when the Hispanic student population reached 10 percent for the first time ever. This past year, The Hispanic Outlook again selected NAU as one of the top 100 universities granting degrees to Hispanics. In addition to figures already cited, NAU ranked NAU ninth in the nation in granting master's degrees to Hispanics, 59th for granting bachelor's degrees, and 78th for Hispanics earning doctorates.

Clara M. Lovett, NAU president, says, “Our goal is to keep improving on the number of Hispanics who graduate from NAU. We are committed to serving the dynamic, growing Hispanic community with our full array of innovative uses of technology in distance learning as well as more traditional instructional settings on the Mountain and Statewide campuses.”

Successes have come in part from the development of a “Statewide Campus” that brings the classroom to many learners in distant communities. One program is the National Science Foundation Research Experience for Undergraduates in Neural and Behavioral Sciences, which prepares minority and first-generation college students for graduate work in related fields of neural and behavioral sciences. Another program is the National Institute for Health Minority Student Development Program, which gives minority students interested in biomedical careers an opportunity to be active in various disciplines of biomedical research. NAU’s Statewide Campus expands the school’s reach into “traditionally strong Hispanic communities,” towns such as
Yuma and Nogales. The Statewide programs bring education to the people, and continue to increase in depth of offerings and variety of delivery systems—from traditional classrooms to IIITV (interactive instructional television) to Web-based courses. Meanwhile, NAU "continues to study other ways to increase the representation of Hispanics." President Lovett adds, "An academic world that more closely resembles the makeup of the world around us can only be beneficial."

Northern Arizona Normal School (NANS) opened its doors on September 11, 1899, "with twenty-three students, one professor, and two copies of Webster's International Dictionary bound in sheepskin." The school's first president, Almon Nicholas Taylor, is said to have scoured the countryside at the reins of a horse and buggy, seeking students to fill the classrooms of the original school building, a structure now called Old Main. From that original class, four women made up the first graduating class of 1901. They received lifetime teaching certificates for the Arizona Territory. In 1925, the school became Northern Arizona State Teachers College, a four-year institution with the authority to grant the bachelor's of education degree.

On July 1, 1929, NASTC became Arizona State Teachers College (ASTC) at Flagstaff. The timing brought the opening within months of the Great Depression, with the only bank in town closing its doors by June of 1932. ASTC President Grady Gammage recognized that higher education was a "depression industry" that fared well in hard times. The College provided jobs to more than 400 students. One student bartered bags filled with potatoes for tuition, and another used a Holstein cow to underwrite his tuition. In 1957, graduate work at ASTC became possible with the introduction of a Master of Arts degree in education. In 1959, Ida Mae Fredericks became the first Hopi Indian to receive a college degree.

Interestingly enough, enrollment at ASTC rose during the Great Depression from 221 students during the 1929-1930 academic year to 535 by 1940. Enrollment dropped during World War II to just 161 students in 1944-1945, but the College was useful to the war effort, as it...
served as a site for the Navy V-12 Training Program. By the 1950s, students could earn a Master in Arts and Sciences and an education specialist degree. The school's forestry program was created in 1958, and research increased on campus. The Arizona Board of Regents became Northern Arizona University on May 1, 1966.

In 1968, NAU received authorization to grant Doctorates of Philosophy and Education. The first doctoral candidates were graduated in 1973. Today, NAU's enrollment ranks in the top four percent of schools and colleges in the nation, with the University serving approximately 20,000 students statewide. NAU has established partnerships with colleges and universities throughout the world, enhancing comprehensive learning programs. Under the leadership of Dr. Lowell, its thirteenth president, NAU is positioning itself to meet the challenges of a global society and the needs of its students into the 21st century and beyond.

The main NAU campus is located in Flagstaff at the base of the San Francisco Peaks, at an altitude of 7,000 feet. Flagstaff is a cosmopolitan community of about 55,000 people, situated in the Coconino National Forest. NAU offers about 100 baccalaureate degrees, more than 40 master's degrees, and nine doctoral degrees. The University's learning environment is enriched by small classes. Students receive personal attention. Undergraduate courses average fewer than thirty students, and graduate-level courses average about eighteen students. More than three-quarters of NAU's classes are taught by full-time faculty members.

NAU serves about 14,000 students on its main campus in Flagstaff and nearly 6,000 more at its sites across Arizona and through the World Wide Web, interactive instructional television, and satellite course delivery. Ninety-five percent of recent graduates report they are employed or in advanced studies. Eighty percent report that their employment is directly related to their major at NAU.

Total enrollment is at 19,964 for Fall 2000 with 2,013 Hispanics, 1,413 Native Americans, 346 African Americans, and 316 Asian American/Pacific Islanders. Aggressive recruitment and an expansion in services have led to a dramatic increase in the number of Native American students attending NAU. In the last year, there has been a 60 percent increase in Native American enrollment at the Statewide Campus and a two percent increase in Native American students at the Mountain Campus. Now NAU ranks second in the nation for baccalaureate degrees earned by Native Americans, just behind Northeastern Oklahoma State. Fred Hurst, dean of distributed learning, said that an expansion of degree programs offered at the Navajo/Hopi Statewide Campus sites has contributed to the enrollment increase of 246 students in 1998-1999 to 393 in Fall 1999.

"I think the main reason for the increase in enrollment has to do with the opportunity being made available to place-bound students. More courses leading to more degree program options are being offered in more locations around the state."

There are 678 full-time instructional faculty; 32 are Hispanic, 15 are Native American, six are African American, and 12 are Asian/Pacific Islanders. Last spring, the Arizona Board of Regents approved the Applied Indigenous Studies degree at Northern Arizona University. This undergraduate major combines contemporary tribal management skills with knowledge of indigenous culture, wisdom, values, and beliefs. It is the only university degree program in the country giving students real-world experience working on issues critical to Indian nations. The program recently gained a hands-on interim director and chair, Ronald L. Trosper.

"We are tying ourselves to the Indian self-determination movement," says Trosper. This Harvard-educated economist is an enrolled member of the Confederated Salish and Kootenai Tribes of the Flathead Indian Reservation in Montana. He is also director of NAU's Native American Forestry Program within the College of Ecosystem Science and Management, the only college of its kind in the nation. NAU President Lovett notes, "Dr. Trosper has made several significant contributions since he came here in 1989. He is perfectly suited to help launch the AIS program because his professional background includes working on economic development issues for tribal governments."

The Minority Student Development Program (MSD) at Northern Arizona University offers unique opportunities for underrepresented minority students interested in careers in the biomedical sciences. The Program recruits talented graduate and undergraduate students and provides exceptional learning experiences that enhance career potential. There is academic enrichment in first-year- and sophomore-level biology and chemistry courses as well as the opportunity to participate in biomedical research. Research participation leads to the chance for students to co-author journal articles and present findings at regional and national meetings. The program is a way to increase rates of acceptance into and completion of postgraduate degree programs in biomedical sciences at NAU as well as other institutions.

MSD students are placed in laboratories with faculty for intensive research experience. Students may work up to 20 hours per week during the academic year and full-time during the summer. Participants receive training in research techniques, including data collection and analysis, interpretation of results, and dissemination of conclusions.

For about 80 percent of all MSD graduates, the program has been a springboard into successful careers in the biomedical sciences—in medicine, medical research, biology, and chemistry.
Ranking the Tanks

La Raza and Rivera Lead; IUPLR “New Paradigm”?

BY CARLOS CONDE

Think tanks are big business in the United States. An informal count via the Internet shows close to 2,000 entities that list themselves as “think” tanks, commonly regarded as centers where learned minds do scholarly research. Many of them serve the makers and shakers of modern society in advancing their causes and issues. There seems to be a think tank for every segment of the American community except Elvis fans.

There is the Center for Paleo Orthodoxy, which “sheds biblical light on modern issues,” the Center for What Works, and even Farlopp Stavros, a one-man brain center working “to control this planet and maybe one or two others.”

There are the venerable Washington-based Brookings Institute, the Urban Institute, the American Enterprise Institute for Public Policy Research, the Carnegie Endowment for International Peace, and the Cato Institute. Across the country, there are the prestigious Rand Institute, The Aspen Institute, the Hoover Institute.

Then there are the Hispanic think tanks, the new kids on the block. How many there are and how many fit the strict definition of a pure research center is difficult to assess because most of these ethnic institutions blur the distinction between research and advocacy. Others existing in cavernous university departments are still establishing their personalities or, like Chicano Studies centers, are considered by some as too narrow in focus and too partisan to have a measurable effect on public policy.

Perhaps best known is the National Council of La Raza (NCLR), in Washington, D.C., but it’s probably better known for its advocacy activities than for its research. Nevertheless, it promotes itself as the Latino “pre-eminent” think tank and the intelligentsia/lobby in Washington for the Hispanic community. Its description is fitting because NCLR has proven itself adept at lobbying the Latino policy and issues studies that it produces.

Its studies in education, poverty, immigration issues, and housing are well regarded by politicians, rainmakers, and pundits in Washington and in areas across the nation where heavy Latino concentrations have an impact on the systems of government.

Because of its topical studies, its longevity (it was established in 1968), its omnipresence in Latino issues of all genres, and the tenacious public persona of its long-time leader, Raúl Izaguirre, it is arguably the most quotable source on Hispanic issues. NCLR studies often serve as the backdrop for politicians and the national mainstream media when they are pursuing Hispanic issues.

Reputation begets community support begets resources begets staff. NCLR in 1999 had a $16 million operating budget, which puts it up there with the think tank big boys in Washington. However, NCLR’s financial muscle doesn’t flex that big for pure think tank activities. It has a staff of 80 people, but only 15 work in research, advocacy, and legislative affairs, which in the 1999 budget accounted for about $650,000. It has 230 affiliates in 39 states and Puerto Rico and a 25-member board of advisors from the blue-bloods of corporate America.

Interestingly, corporations and the philanthropic foundations that support NCLR provide more imagery than money. According to an NCLR spokesperson, in 1999, only $1.3 million came from corporations and foundations. The federal government basted the corporations in support with $2.8 million in federal grants. NCLR raises the larger part of its budget through conferences, community contributions, membership drives, and direct-mail appeals.

An ethnic think tank with a growing reputation as one of the more sober students of Latino sociology and approaching NCLR in stature is the Tomás Rivera Policy Institute (TRPI). Founded in 1985, it also bills itself as “the Premier Latino Think Tank.”

TRPI operates from two centers, Claremont Graduate University in Claremont, Calif., and the University of Texas in Austin. Like NCLR, it involves itself in high-profile research and analysis such as Latino suffrage and, lately, Latinos in the entertainment industry and Hispanics in philanthropy. It is particularly noted for its data interpretation of the Latino voter potential and participation in state and national elections.

Led by its ubiquitous and always quotable president, Dr. Harry Pachón, TRPI has a smaller staff and a paltry budget compared to NCLR, but it can outdo NCLR with its ability to call upon a large cadre of well-qualified, experienced
researchers, most of them university-affiliated Ph.Ds, from its so-called "scholar network" that now numbers 22.

Its staff of 23 includes 13 researchers and research assistants in addition to its scholar network. Its operating budget for 2000 was $2.6 million, with more than 80 percent spent on research activities, according to TRPI Director of Development Mary Kashmar.

Dr. Pachón doesn’t belittle NCLR’s credibility as a think tank, but he says there is one big difference between the two institutions. "The Tomás Rivera Institute concentrates totally on research," he said, "It does not do any advocacy."

"Having said that, I consider the term ‘think tank’ somewhat pretentious, although we fall under that technical description," Dr. Pachón added. "The extent may differ with each institution, but in the end, we are all involved in research that impacts on the Latino community."

Like NCLR, the Rivera Institute has a blue-ribbon cast of corporations and philanthropic institutions, and they provide two-thirds of the operating funds. The rest comes from private donations. The annual appropriations are much larger if you factor in the in-kind contributions of the scholar network.

Another Latino think tank organization with a large alliance of scholars is the Inter-University Program for Latino Research (IUPLR). Created in 1983, IUPLR is a consortium of university study centers or departments specializing in Latino studies that pool their intellectual resources to develop and work on ethnic research projects. In 1998, the Smithsonian Institution joined the IUPLR family with a scholars program that studies the Latino contributions to US. history, culture, and society.

IUPLR has a rotating headquarters, moving this year from the University of Texas-Austin to the University of Notre Dame.

IUPLR has perhaps the most effective system among the Latino think tanks, even though its method departs from that of the traditional research tanks. The IUPLR, with a 15-member core group spread across the country on university campuses, can mobilize the best and the brightest of the TRPI, the university-based researchers consider their end product as vehicles for social policy and legislation affecting Latinos.

Despite this coordinated brotherhood, all of the institutes — such as the Center for Puerto Rican Studies at Hunter College-CUNY, the Cuban State University, Stanford University, City University of New York, University of Notre Dame, University of Massachusetts, University of California at Los Angeles, The University of Texas-Austin, the University of Texas-El Paso, De Paul University, Wayne University, the University of New Mexico, and the University of Colorado at Denver. There are also the niche study groups, some of which can turn out quality studies and analyses on Latino issues but often are seen as either too parochial or narrow in scope to get much attention.

One exception might be the William C. Velásquez Institute (WCVI) named for its late founder, a San Antonio political activist in Latino suffrage. An offspring of the Southwest Voter Research Institute, it conducts research and interprets data to improve "the level of political and economic participation in Latino and other underrepresented communities."

WCVI, chartered in 1985, says it fills a gap in the Latino community not served by the purer think tanks, and, indeed, it has steadily gained a reputation for its impeACHioned but sound research on the Latino population and its voting patterns. It has also started to venture into the socioeconomic field and, through its Inter-Mestizo Affairs project, into training programs for leaders in Mexico, Central America, and the Caribbean.

The WCVI, with offices in San Antonio and Los Angeles, makes no pretense of being a think tank, even though it produces quality surveys and analyses of the Latino plebiscite, primarily the Mexican American.

"What's a think tank?" WCVI President Antonio González mockingly asked.

WCVI operates with a 10-person staff that includes three full-time researchers and a $1.1 million budget provided by private foundations.
and government grants. It also hires contract researchers as the occasion demands. A perception, perhaps unfair, among some observers of WCVI is that it is an institution with a narrow field of studies and a regional concentration, even when its work shows its capabilities and reach to be much wider.

The same observation could apply to other regional Latino institutions, such as the Center for Puerto Rican Studies at Hunter College in New York, headed by Felix Matos-Rodriguez. Founded in 1973, it is one of the oldest ethnic studies institutes. Its research activities are confined largely to the Puerto Rican community, mostly in the northeast.

With a staff of 14, five of them researchers, and an annual budget of a little over one million dollars, and in-kind support from Hunter, the Center focuses on migration and education issues and the history and culture of the Puerto Ricans.

Existing since 1994, the Cuban Research Institute at Florida International University in Miami makes no bones about the fact that its research, teaching, and service are aimed primarily at the Cuban community in South Florida and on its menace across the Florida straits, Fidel Castro’s Cuba. Affiliated with FIU’s Latin American and Caribbean Center, it has a four-person staff headed by its founder, FIU anthropologist Lisandro Pérez. One of its latest studies was on the Cuban boat people.

CCNY’s Dominican Studies Institute, headed by Silvio Torres-Saillant, studies Dominican life in the U.S. and in the island nation.

The Julian Samora Research Institute (JSRI) concentrates on Latino issues in the Midwest. Like other university-affiliated research centers, the JSR operates with a small core staff and a cadre of faculty members/researchers and contract specialists. Its general curriculum revolves around the economic, educational, and political conditions of Midwest Latino communities. By belonging to the IUPLR family, JSRI, like its other regional colleagues, has considerably more resources and programs that can take it beyond its territory.

The Mauricio Gastón Institute think tank society. Among the Fund’s missions are studies that help integrate Latino immigrants into American society. Its biggest import is having a captive audience of NALEO politicians in policy and decision-making positions.

Whatever their status or effect, provincial investigations such as bilingual education or migrant abuses. Admittedly also, diversity is not now nor has it ever been a preoccupation of theirs.

There’s also the contention that there are not that many Hispanics with the background and academic credentials that the large, mainstream think tanks seek. Another factor cited by several of those interviewed is that many of the Latino scholars seem content working in their own environment among their own colleagues pursuing their own parochial interests.

Luis Plascencia, the assistant director of the Tomás Rivera Policy Institute’s regional office at the University of Texas, considers Washington’s think tanks a closed society.

“They tend to be homogeneous in their thinking and to view everything from a Washington, D.C., perspective,” Plascencia said. “They think that’s the view throughout the country and that all roads lead to Washington.”

Plascencia’s contention supports a common lore in academic and political circles that the Washington think tanks are a good-old-boy network or holding stations for temporarily displaced politicians or out-of-power administration officials, along with a few selected media heavyweights and about-town egghead celebrities.

Among them are former Speaker Newt Gingrich; former Federal Reserve Bank board member Alice Rivlin; commentator Rush Limbaugh; Lynne Cheney, wife of vice president Richard Cheney; former UN Ambassador Jeanne Kirkpatrick; and local media biggies James Glassman and E.J. Dionne of the Washington Post and Ben Wattenberg of the Washington Times.

It’s difficult for Brookings Institute Human Resources Director Zarikna Durrani to dispute the roster of well-connected, high-wattage personalities in
Washington think tanks, but she also need to do more networking. That's an important part of the process and you can't get anywhere without this.”

Two Latinos, Ralph Fernández Acosta and Carlos Paredes, working at Brookings; two, Jacobo Rodríguez and Ian Vásquez, at the Cato Institute; and two at the Urban Institute, Carlos Majárrrez and Jorge Ruiz de Velasco.

Ruiz de Velasco’s résumé? Thirty-nine years old, undergraduate degree, government, Harvard University; law degree, University of California at Berkeley; Ph.D., political science, Stanford University, De Velasco, a Brownsville, Texas, native who is working on an education project, describes how he landed at the Urban Institute.

“I submitted my application and résumé to the education policy center; I was invited for an interview; we talked about the research and my dissertation; and I got the job.”

The future, as Matos-Rodriguez predicts, will see more Hispanics like Ruiz de Velasco in establishment think tanks and for the simple reason that the upcoming generations will produce more Latino brainpower as the educational opportunities increase exponentially with the growth of the ethnic population.

Meanwhile, the Latino think tanks are carrying the load with some inventiveness, resourcefulness, and the satisfaction of being pioneers in ethnic studies that influence public policy.

“There's still so much to be done; there is tons of research begging to be done,” Ms. Pérez said. “We have to start looking at the Latino population in terms of national policy and issues that need to be addressed because the time is coming when Latinos will be the main support of the national economy.”

Ms. Durrani, who participates in the hiring at the Brookings Institute, says not facetiously that all one needs is a Ph.D. in the right discipline and a good résumé to get in and if that person is well known in the field, so much the better.

“With Latinos, there's a small pool to begin with, so that makes fewer to choose from,” Ms. Durrani said.

“I agree there is a small pool of Latino talent presently because few have a Ph.D. in the right disciplines and the institutions have rigid standards,” Ms. Pérez said. “However, some Latinos [with the credentials] are not interested in doing this type of work or working for these institutions.”

A random survey of the Washington think tanks showed
Hispanic Coalition on the Move Politically

National Hispanic Leadership Agenda Educates Congress

BY
MICHELLE ADAM

No one foresaw the Election Day aftermath that kept Americans glued to their TV screens for days and weeks on end. What began as an extremely close race between the Democratic candidate Albert Gore and the Republican candidate George W. Bush ended in a lengthy dispute over votes cast in the deciding state of Florida, a dispute halted by a U.S. Supreme Court decision that left many shaking their heads.

During that process, The Hispanic Outlook in Higher Education was busy interviewing members of the National Hispanic Leadership Agenda, a coalition of major Hispanic organizations and distinguished leaders whose very purpose has been to effectively voice their needs to the next administration.

"Hispanic Americans participated at the polls and will be a larger force to contend with than two years ago," said NHLA Chair Manuel Mirabal.

The NHLA's 71-page agenda, which covers issues from education and health care to civil rights and economic development, had already been sent to the respective candidates, and it was only a matter of time before Mirabal would seek a meeting with the new president to voice the needs of multiple Latino voters.

With a total U.S. Hispanic population of more than 36 million and growing, Mirabal has a strong case to argue. And compared to 1991, when NHLA was formed, that argument has become a lot more refined and powerful.

NHLA was founded as a loose bipartisan coalition of powerful

NHLA became heavily involved in efforts to protect Latino-friendly programs being challenged by the Republican Congress beginning in 1996.

Manny Mirabal with Congressman Xavier Becerra at the NHLA summit
Hispanic groups that recognized it was time to unite in order to better affect national policy on behalf of Latinos. This earlier coalition, formed by such groups as the League of United Latin American Citizens (LULAC) and National Council of La Raza (NCLR), recognized the importance of preparing a consensus agenda that could then be presented at the beginning of each new administration—the first administration being that of Bill Clinton.

Preparing an agenda was just the first step in an ongoing relationship NHLA has since had with Capitol Hill. The group became heavily involved in efforts to protect Latino-friendly programs being challenged by the Republican Congress beginning in 1996. At stake was bilingual education, and on the table were laws regarding immigration, block grants, and welfare reform.

"Back then, we became very aggressive," said Mirabal. NHLA fought hard for earned income credit, given that more than half of working Latinos would be eligible for this tax break. The group also fought the Senate to move more quickly on nominations for judicial posts in order to get more Hispanic Americans appointed in areas with high Hispanic populations. At one point, 100 stormed into the Senate to challenge the eight years of footdragging on the nomination of the eminently qualified Richard Paez of California to a district court post. "He was a candidate who waited the longest in the history of the Senate to get a judicial hearing," said Mirabal. Paez finally became a 9th Circuit judge in early 2000.

NHLA also activated what it calls "a score card," whereby the group maintains and publishes information reviewing how each congressional representative voted on issues relating to Hispanic Americans. "Past 'O' report cards no longer have '0's on their cards," said Mirabal, pleased that the group's efforts have had an impact.

As for the executive branch, he said that the Clinton administration finally, last year, moved forward concrete plans by federal agencies to address issues in education and housing affecting Hispanics.

Any progress by NHLA, however, will require continued follow-through with the new administration and Congress. That is why the coalition gathered again last October to share and forward its agenda to other Hispanic groups, as well as the larger society. The 37-member board of directors, comprised of representatives of 31 national Hispanic civil rights and public policy organizations, elected officials, corporate executives, and prominent Hispanic Americans, spent more than a year preparing a new agenda and, on October 18, presented it at the National Hispanic Leadership Summit 2000 in Washington, D.C. Representatives of candidates Gore and Bush attended, as did Steve Case, president and CEO of America Online, CNN Journalist Geraldo Rivera, and Senator Orrin Hatch.

Education always has been an issue of great concern for Hispanics, and has had its place at the summit. Antonio Flores, president of the Hispanic Association of Colleges and University (HACU) and an NHLA board member who helped organize the summit agenda, spoke passionately on the issue.

"If you review poll after poll of Latinos, we all agree that education is the top priority of our country and of Latinos," he said. "While the Latino community has been growing by leaps and bounds over the past decades and will continue to grow in the next 50 years, there has been a very small, gradual, incremental response to the educational needs of this burgeoning population. What is going to happen to the high Latino dropout rates, the scarcity of teachers, and the low rates of admission and graduation from college?"

The concerns about education expressed by Flores mirror others presented in NHLA's 71-page agenda at the October summit. The bottom line is that Hispanics are growing not only in numbers but in power, yet as a group, they rank low in enjoying equal access and opportunities. The following is an excerpt from the introduction to the agenda:

"In the political arena, Hispanics are decisive voters in 11 key states with 27% of the 270 electoral votes needed to win the presidential election. The growing representation in almost every aspect of the U.S. political system—political parties, and the executive and legislative branches of government—has been shaping critical legislation and policies on a wide range of issues. In the economic arena, revenues from Hispanic-owned businesses currently exceed $485 billion annually, and the purchasing power of Hispanics, now over $400 billion, is expected to total $1 trillion by the year 2010."

It continued: "Nearly a quarter of the Hispanic community continues to live in poverty. Hispanics are more likely to live in inadequate housing. Eleven million of the 43 million uninsured individuals in this country are of Hispanic descent, and Hispanics are disproportionately affected by higher rates of certain diseases, such as diabetes and HIV/AIDS. More than three times as many Hispanic children drop out of school compared to their non-Hispanic White counterparts. Hispanics still lack representation at many levels of our political and civic institutions and face discrimination in the workplace, in housing, and in our educational and healthcare systems."

Looking more specifically at education, NHLA research presented in the agenda gives an equally challenging picture. During the past 20 years, the proportion of Hispanic public school students has increased from 6% to 15%, with a majority of students in the large urban schools of California, Florida, and Texas being Hispanic.

More than 39 percent of Hispanic children live in families with an income below the poverty line, and their dropout rate is about 30 percent nationally. Also, Hispanic children under five years of age are less likely to be enrolled in early childhood education programs, and the older children consistently score lower than do White children in national tests. As written in the agenda, "In 1994 and 1996, fewer than 43 percent of Hispanics in the fourth grade participating in the NAEP (National Assessment of Educational Progress) scored in the "basic" achievement category for math, reading, history, and geography. In contrast, over 70 percent of their White counterparts scored in the "basic" achievement category for the same subject matter."

In response to these concerns, the agenda contains policy recommendations in education, specifically in preschool, elementary and secondary education, bilingual education, assessment, higher education, and other categories. In elementary and secondary education, NHLA is asking for the recruitment and retention of qualified teachers, since a shortage of good teachers has its greatest effect on largely high-poverty areas and minority students. Another recommendation includes implementing effective outreach strategies for Latino and minority communities. In the area of bilingual education, the agenda promotes continued support of the Federal Bilingual Education Act, and support of policies that help all children learn a second language.

The NHLA recognizes that when it comes to higher education, Hispanics continue to lag behind in enrollment. It also sees that Hispanic-Serving Institutions suffer disproportionately lower commitments in state and federal funding. Recommended is an increase in federal funds to HSIs under Title V of the Higher Education Act. According to Flores, HSIs are receiving $7300 per year per student
on average in support funds, whether it is federal, state, or any outside funds, whereas on average most other institutions are receiving $14,000.

According to the agenda, federal funds should also be significantly increased to HSIs to create and strengthen their graduate institutions. Currently, only 20 percent of all HSIs offer master’s degrees, and less than 12 percent offer a doctoral degree. NHLA also recommends addressing high-stakes testing, which often has an adverse impact on Hispanics and other disadvantaged student populations because of apparent cultural and socioeconomic bias. It seeks an increase in federal grant assistance, rather than relying so heavily on loans, which create increased debt burden, especially for the financially disadvantaged.

While Flores and others recognize that policymakers are aware of these concerns in education for Hispanics, as he put it, “there are political moves in the country that counteract that. It’s a mixed signal being sent to everyone.” Examples of this include anti-affirmative action efforts such as Proposition 209 in California and the Hopwood decision in Texas, and, most recently, Arizona’s decision to prohibit bilingual education. While America has become “satisfied” with Latino music, food, and popular culture, said Flores, beyond the surface, people fail to understand the negligence in such acts as repressing bilingual education.

“They don’t seem to value what we all know is so important to the future of the economy. What we need is more fluency and more than English,” said Flores. And he added, “The federal government has to set the example in terms of equity issues. It is for the well-being of the nation, especially when the nation is depending on the education and training of our population. Everyone really gains. That’s what we want society to get. We repre-
sent a resource that is not being tapped into as well as it should be.”

The NHLA argues that addressing the concerns of a group that will soon be the largest minority of the country will only help raise up the nation as a whole. Mirabal pointed out, for example, that companies are currently experiencing a shortage of workers in high tech. To alleviate this problem, a large number of visas are being approved in order to attract foreign workers to this country. Meanwhile, Hispanics, the country’s fastest-growing and youngest population, are not graduating to jobs of the future, when, with the proper support, they could be trained to fill this workforce gap and in turn would add to the economy by providing a larger tax base and higher spending capacity.

As she sees it, “There are more pressing issues today for Latinos in education than four years ago.” Part of that has to do with a sheer increase of Hispanics in schools, especially in urban areas. “The teacher shortage is a serious issue for us. We need to prepare Latinos to be teachers and help teachers learn how to work with Latinos,” she said. Pompa has seen the professional development monies increase for Latinos in the past two years, but recognizes that more is needed. She notes that on the local level there is an understanding of the need to recruit bilingual teachers.

If there is a time for Latinos’ concerns to be heard, it is now, with the new administration and Congress in place. That is why roughly 10,000 copies of the agenda have been distributed to the administration, members of Congress, policy organizations, think tanks, and groups throughout the country. Having NHLA in place from the beginning is a definite plus.

“The greatest change I have seen in how policies can benefit Latino students is if there is somebody at the table from the very beginning,” said Pompa. “The agenda has been received well across the country. It will be a useful tool for us as we work with a new president and Congress.”

Looking back at the past eight years, NHLA is finally witnessing some of the fruits of its work. Said Mirabal, during the year 2000, the administration approved and incorporated federal mandates that will begin to address issues concerning Hispanics in education and housing. He expects to work with the new administration and, regardless of party, continue pushing forward issues on behalf of Hispanics.

This process has been anything but easy and quick. But, if the National Hispanic Leadership Summit 2000 was any indicator of the future, there is plenty of reason for hope. “It was very energizing,” said Pompa of the summit. “It was a real affirmation of the strength of our numbers and of our commitment to making the concerns of our community known to the entire country.” And, Flores reflected, “We know the best is yet to come. There was a reeducation and a sense that we need to keep working together in the years ahead for the good of the community. We have a lot of hope for better times in education for our people.”
For a while, the Mexican American Studies Center at the University of Texas at Arlington was thrust into the eye of a philosophical hurricane and a biting legal skirmish. Various officials at the school split over what direction the Center would take.

In 1993, state legislators had crafted a budget that earmarked funding for the new Center. Within two years, the Center was mired in controversy. A lengthy dispute between administration and the Center director prompted his removal.

In 1999, as the rolling waters eventually began to still, a new director stepped into the role.

"It was a challenge," says the director, Dr. Manuel García y Griego, "and an opportunity."

An opportunity, he says, to look beyond the divisive tug-of-war and chart a direction for the Center. "It's an opportunity both to promote a research agenda for the Center and to help develop Latino Studies."

García y Griego says, "I prefer to think of this as Latino Studies, rather than narrower Mexican American Studies, at an important Texas University."

That role is pivotal to drawing more students into the fabric of university life, of helping many understand their identity, forge bonds with classmates, and plant the seeds of research. More than 85 percent of Hispanic students at UTA are Mexican American.

In the fall of 1999, UTA unveiled a minor in Mexican American Studies so students could enroll in courses counting toward a certificate. Enrollment has been small and struggling. During its first year, UTA had only been able to offer three courses; this academic year, it has only two.

Admittedly, García y Griego says, the program still has a long way to go. "It takes a while to get these things off the ground."

That could be taken literally as well. Recently, Center staff packed up their files and hiked across campus to spacious new offices in the student center. The move, it is hoped, will cast a wider net and attract more students to its work, even allow student organizations to use its facilities for meetings.

"The Center has been extremely valuable," says University President Dr. Robert Witt, who joined the school in 1995. "It has provided very important outreach activities."
A Hispanic Advisory Council comprised of business, political, civic, and community leaders works closely with the Center, and that, he says, has been fruitful.

"They have provided me with very useful feedback, how the University can best meet the needs of the Hispanic community," Witt says.

UTA officials say that is crucial because of the growing diversity on campus, which reflects the rapid growth system-wide. UTA, which is a century old, is the second largest of 15 academic institutions within the 124-year-old University of Texas system. Overall, the system has grown to enroll more than 148,000 students during the last academic year, and employs close to 75,000 faculty members and staff.

The entire system's diversity has shifted, and for the first time, in 1998, White students represented less than half—48.3 percent—of the entire student body. Hispanics accounted for 32 percent of students, African Americans, 44 percent, and Asian Americans, eight percent.

The 390-acre Arlington campus—the sixth largest school in Texas—enrolled 19,479 students over the last academic year, and employed 4,403 faculty and staff. The most recent figures available on its diversity are from the previous academic year, and they show that Hispanic student enrollment is dramatically lower than White enrollment.

Figures from Fall 1998 show that there were 11,682 Whites enrolled, 1,978 Asian students, 1,904 African American, 1,661 Hispanics, 1,306 international students, and 131 Native Americans. The school enrolls students from 47 states and 89 countries.

The campus currently is about 10 percent Hispanic and 11 percent African American, numbers that have grown at a moderate pace over the last four years, Witt says.

Outreach Success

"This fall, the number of new Hispanic students on campus is 18 percent greater than the number of new Hispanic students the last year," the college president says. "We have had a very significant outreach effort."

Much of that outreach falls squarely on Michele Bobadilla. As assistant vice president for outreach services, Bobadilla doesn't spend much time behind her desk. She's most often out in the field.

"We decided we would make a very concerted effort to take the points out, "it's not just about our institution, but any institution."

"The goal of the program is to help them prepare for college admission and find the best college that suits them," she says. Her outreach efforts target students starting in ninth grade. Colleagues work with guidance counselors at all high schools, but concentrate heavily on four.

Each school has about 200 to 300 students poised to graduate to an interviewer," she says, like a proud parent, "and we work with parents on how to complete financial aid applications. We set up nights at the school where we complete forms with parents, so they understand what's going on."

Their work in the trenches of the public school system has paid off. Though students are helped to apply to the schools they choose, quite a few are attracted by UTAs presence on their campuses. Last

According to the Texas Higher Education Coordinating Board, in 1998, state public universities had a total of 8,827 tenured faculty of whom 4.8 percent, or 424, were Hispanic.
One factor, she says, could be the recently approved Texas Common Application, a process by which many students learn they are eligible for a college tuition waiver that can save them thousands of dollars.

The McGee Factor

College officials say location also is a key factor in attracting students. The campus is midway between Dallas and Fort Worth, and Arlington is a growing city, home to the Texas Rangers and their stadium, The BallPark at Arlington. On campus, the school has a celebrated sports team with a now-famous star player, one who drew much attention to the campus this past fall.

Most students on campus knew Eddie McGee from his athletic prowess on the school's wheelchair basketball team, the Movin' Mavericks. The team had won national championships for several years, and McGee, who has one leg, has been a leading player.

This fall, America got to know him better, too. He was the remaining survivor in the CBS television series Big Brother, the last member to leave a house cut off largely from society and head home with a half million dollars.

"It has brought the campus a lot of attention," says Witt, who fielded quite a few media calls to comment on the junior's success. "It has raised the visibility of the University, and could cause some students who might not have thought of attending our university to attend."

"I think the fact that Eddie has been so successful as an athlete and student, and now in this competition, offers a great deal of inspiration to individuals who have physical handicaps."

Witt, who first stepped into a classroom as a teacher 30 years ago, says the experience has been enlightening at UTA. He now spends the better part of his time trying to devise ways to bring students to the school, and then another part making sure they thrive.

"We want UTA to be known as a university where students come first, and that's something I can honestly communicate to students. Every decision we make at the University has to pass a litmus test: is it consistent with students coming first?"

María Balderas agrees that students do come first. Part of that, she

---

The 71-year-old League of United Latin American Citizens, LULAC, recently commended UTA for providing access to good education and handed Witt its National Education Award.
notes, has been the determination and will to have the Mexican American Studies Center thrive. She works there to help make ends meet.

"I see students come in here all the time," says Balderas, taking a break between work and studies on a recent day. "I have learned a lot here." She does, however, note that there aren't as many Hispanic faculty faces on campus as she would like to see. The school's own statistics bear that out, but it's not an isolated problem.

A recent study by the Texas Association of Chicanos in Higher Education lamented the underrepresentation of Hispanic faculty and administrators on Texas college campuses. According to the Texas Higher Education Coordinating Board, in 1998, state public universities had a total of 8,827 tenured faculty of whom 4.8 percent, or 424, were Hispanic.

In Fall 1998, Hispanics accounted for only 1.4 percent of tenured professors, 3.6 percent of associate professors, and none were assistant professors, for an average 2.3 percent of the faculty.

According to the school's Equal Opportunity Office, the campus has experienced growing pains in this area. There were three Hispanic tenured professors in the fall of 1999, and this year, there still are three.

In Fall 1999, there were eight Hispanic tenured associate professors, and that fell by one this current academic year. The number of associate professors on the tenure track has remained constant at nine. Also constant has been the number of full-time Hispanic executive administrative staff, which is still at eight.

As far as the administration goes, UTA's 2.9 percent Hispanic rate is well below the state's 11.8 percent rate.

"Yes, it has been difficult, but there has been an effort," says Diane Walker, the school's director of equal opportunity and affirmative action. "It's so competitive, and getting individuals to come on board takes time. Many times there are other offers."

Walker's office maintains lists of Hispanics earning postgraduate degrees, and forwards this to the school's search committee. "We ask them to be creative in their efforts to recruit," she says, without elaborating.

Witt admits the hurdles are difficult to overcome. "It's a challenge," he says, "because the supply of Hispanic Ph.D.s is not nearly large enough to meet the demand. We've made progress in the last two or three years."

He points to Dr. García y Griego as an example.

"He has been given the resources to lead recruiting efforts to bring Hispanic scholars to various academic areas," Witt says. "There is an ongoing recruitment effort to add two more Hispanic faculty."

A majority of UTA students are declared business administration majors. The other more popular schools and programs are engineering and liberal arts, though UTA does attract sizable numbers to its nursing, science, and education schools.

The curriculum is evolving as well. Witt says UTA recently began a new accelerated Master's in Business Administration program and has launched a distance learning program. "We have developed an online master's degree in education, and added two new master's degrees in science and a new master's degree in music," he says.

The school is forging ahead with its plan to open a new science building with student labs and research space next fall.

UTA opened a 600-bed state-of-the-art residence hall this fall that is already 98 percent filled. More students, approximately 3,000, are living on campus than ever before, and three out of four are from the surrounding Tarrant and Dallas counties.

"This is a university that makes a profound difference in the lives of its students, and we draw about 75 percent of them from the two counties. So with the majority of our students from nearby, the presence of a strong, high-quality, public university makes an important difference to the local community," that, he says, speaks to why he took the job initially. "The University had a great deal of potential growth in size and programs, and in quality, and that seemed exciting," Witt says.

He has reason to believe his efforts are working. The 71-year-old League of United Latin American Citizens, LULAC, recently commended UTA for providing access to good education and handed Witt its National Education Award.

"In the past, we've had a rocky and stormy relationship with the University," says Dr. Hector Flores, the organization's national treasurer. He points to the friction experienced over the direction of the Center for Mexican American Studies.

"From that conflict, things have begun to turn around and change," Flores says. "There is ongoing dialogue, and they have made strong overtures to our community to try to open the door for our kids to have access to a university degree."

"It is a much more friendly place than it was five years ago. They've turned a corner."
Teaching Shakespeare, Reaching Students

The Human Frailty Connection

BY REGINALDO CORNEJO

Be honest. When was the last time you thought to yourself: Yes! I get to teach Shakespeare to my Hispanic/minority students.

If you're an English professor who has paid his or her dues, and you're smart enough to know that preparing a lesson plan is a necessity rather than a luxury, it might be time to consider your Hispanic/minority students' ethnic backgrounds when you present Shakespeare's plays, rather than just deciding "Shall I teach a tragedy or a comedy this week?"

In general, minority students (and most any students) tend to find Shakespeare boring, too hard, and, dare I say it, a waste of time, because "Those stories are so old. What do they have to do with me in the 21st century?"

The question causes some to stumble, but there is an answer, to wit: although Shakespeare's characters are often depicted in the plays as larger than life or colossuses, eventually they are presented as human beings with human frailties, just like 21st-century people.

This bit of knowledge is very important because it is a good starting point for any class dialogue. Take for example Stanley Wells's discussion of Caesar's greatness and pending doom as he enters Rome in Shakespeare's Julius Caesar: "Shakespeare allows Caesar his full measure of worldly greatness, [but] he also lets us see that the world-conqueror will before long—and sooner than he may expect—be 'barreled up in brazen urn no
bigger than a bowl...” (Shakespeare: A Life in Drama, 193-194). “[As for] Caesar's vulnerability, [it] is implicit in what he says about himself: 'I rather tell thee what is to be feared. Than what I fear; for always I am Caesar. Come on my right hand, for this ear is deaf...”’ (193-194).

Turning to another human weakness, it goes without saying that “In Shakespeare’s England, the existence of a pervasive tradition of color prejudice...has been convincingly documented by historians and literary scholars...Also well documented is the presence of overt racist attitudes—the impulse to regard black men in set negative ways in Shakespeare’s Othello,” says Dr. Solomon O. Iyasere (“Teaching Shakespeare’s Othello to a Group of Multi-Racial Students, California English/Fall 1994, 8).

Why make this observation and approach this sensitive topic? Well, for one thing, many Hispanic and minority students deal with racial stereotyping in the 21st century. This fact was documented in the Los Angeles Times “Metro” section by Al Martinez, whose piece, “The Frito Bandito Syndrome,” discusses the continued use of minority stereotyping (June 4, 2000), and Debra Dickerson’s Opinion piece, “Racial Profiling: Are We All Equal in the Eyes of the Law?” (July 16, 2000), which addresses racial profiling by America’s police departments when deciding which cars to stop for possible drug violations.

“You must read the play to learn more about yourself, about what others think of people who are like you, both 500 years ago and today.”

DR. SOLOMON O. IYASERE

Although Shakespeare’s Othello does not take on either of the aforementioned newspaper topics, it does deal with the contemporary problem that won’t go away and what Dr. Iyasere notes is this day a topic of a sensitive nature, “Interracial marriage and the difficulties of racism and interracial relationships (8).” “The fact is,” adds Iyasere, “although interracial marriages are no longer illegal, as Davidson points out, ‘The marriage of a middle-aged Black man and a young White girl must, then and now, touch sensitive nerves in Black and White’ (8).” “Since this issue remains sensitive in the 21st century, we again see the connection between the past and present, and find a great place to start a discussion.

By now many instructors are thinking, ‘Why use this volatile approach to discuss these plays?’ Well, since minority students must deal with all these volatile topics on a daily basis, why not give them a chance to voice their opinions on them and apply them to Shakespeare’s plays. Dr. Iyasere “Paradoxically”, says Iyasere “the existence of racial problems in Othello...affects our idea of Othello and makes a difference to the action and catastrophe...the absence or presence of racial attitude inevitably determines one’s response to Othello...” He continues, “To avoid teaching the play because of the emotionally charged, sensitive nature of its subject is to deny students the opportunity of experiencing one of Shakespeare’s most memorable tragedies and of confronting, through the play, the difficulties of racism and interracial relationships which continue to trouble us today” (8).

Given that many minority students carry their own responses to race, which might be have been conceived through some personal experience, the instructor must walk a fine line when presenting Shakespeare via this approach. A student’s negative or positive experience could, as Dr. Iyasere says, “[arouse] their own latent prejudices, which would then interfere with their emotional and intellectual apprehension for the play”. Yet, this problem can be avoided if instructors remember the introductory premise that Shakespeare’s characters and topics are still contemporary because they are presented as human beings with human frailties. Approaching these works in this manner helps us teach our students to deal with their own experiences and social prejudices in a nurturing and scholarly atmosphere, and allows them to vent in a non-threatening situation.

As instructors, our job is to help our students learn to pose academic questions, find answers through organized research methods, and communicate in a professional manner so they can learn to function in society. If you accept this statement, then why not present Shakespeare in a context of contemporary issues, which gives students a chance to sharpen these skills, master Shakespeare’s great plays, and deal with their personal prejudices. Scary as this idea might seem, isn’t it worth the challenge to help them learn to understand the greatness of Shakespeare and, as Dr Iyasere says, “...see what is there, in the play, as distinct from merely seeing a narcissistic mirror of their own experiences and social prejudices (8)”?

You might ask, “How can I be sure that my students won’t lose their focus when they discuss hot topics that might cause anger or degrade their exist-
The Value of a College Education

for Minorities and for the Nation

BY
ANGELA PROVITERA MCGLYNN

Those of us who are believers in the value of higher education point to its many virtues in enriching a person's life. We talk about college having the capacity to expand not only a person's knowledge base, but also facilitating the development of critical thinking skills. We say that a good college education should help people learn how to think rather than what to think. In fact, educators suggest that college can be a life-transforming experience.

As a result of a good college education, people should develop oral and written communication skills, quantitative skills, and research skills, and they should also develop the capacity to use technology to further their learning. Hopefully, higher education enhances people's appreciation of their world, as for example, their understanding of literature, history, and the arts. In addition to all of this, as we move into the 21st century and a changed and continually changing demography, college-educated people ought to develop a greater appreciation of diversity and a greater understanding of multiculturalism.

If all this sounds a bit lofty and academic, it is! It is what we in the academic world strive for—and hope the students we teach achieve. There is, however, a secondary gain related to higher education that cannot be ignored, and that is economic gain. The reality is that in our society, for the most part, the college-educated will earn a significantly better income than will those with high school diplomas.

In a recent New York Times article entitled, "The Classroom Ceiling: Making Sense of a Stubborn Education Gap," Louis Uchitelle states: "Just as near-universal high school education was one of the great achievements of 20th-century America, politicians and business leaders have long sought to lure more students to college, reasoning that the college-educated would earn more in a 'new economy' that now more than ever rewards a bachelor's degree. College, they believed, could help close the gap between the economic haves and haveyots."

Those of us in academia certainly believe that college education has the capacity to help close that economic gap. Many business leaders and employers say they see a college degree as evidence that a potential employee has learned to think and has learned how to work hard and to complete tasks. The problem, according to Uchitelle's data, is that "the proportion of Americans who have only a high school diploma has barely budged for 30 years, through good (economic) times and bad." Over the last three decades, one-third of American adults possess, at most, a high school diploma.

If one-third of American adults are now considered "undereducated" for our new world economy, that number is alarmingly high. If the lack of sufficient education is contributing to economic disparity, this statistic is even more cause for concern. Of course, many factors contribute to the gap, the ever-widening gap, between the haves and the have-nots in our society. As Uchitelle points out, Labor Department reports say that there is a demand for both higher-level jobs for the college-educated and for lower-paying jobs that require only high school training. Just as there is a growing demand for higher-skills
jobs, there is a growing need for retail salespeople, cashiers, truck drivers, office workers, and home healthcare workers. We have only to notice all the help-wanted signs in our own neighborhoods.

Despite the need for these non-college-educated workers, the wages of people with only a high school diploma have fallen far behind the wages of the college-educated population. The study stated that there would actually be a decrease of these two populations in proportion to their college-age populations. Furthermore, more than half of the overall increase in college students over the next 15 years will be concentrated in only five states with large Hispanic American populations. The study stated that with the lowest educational attainment. This is cause for alarm for the future of Hispanic Americans and for the future of our nation.

Uchitelle points to the fact that union strength has declined in America. Unions once accounted for higher-paying jobs that were available to high school graduates. Additionally, the minimum wage, adjusted for inflation, is actually lower than it was in the late 1960s! These factors, lack of union strength and diminished minimum wage, undoubtedly contribute to the economic gap between the college-educated and the non-college-educated.

I am not arguing that everyone must go to college. There is a great need for all kinds of workers who do not require a college education. I believe that as a society, we must value those jobs and those workers, and pay them adequate salaries so they do not live with economic hardships. My concern is with the disproportionate numbers of minorities included in the one-third of non-college-educated American adults.

Although some studies have pointed to a great increase of minorities in college, the numbers are deceiving. A recently released Educational Testing Center study, discussed in a New York Times article entitled, "Swell of Minority Students Is Predicted at Colleges," May 26, 2000, made some interesting points. ETS reported that although the minority student college population is indeed mushrooming, the numbers of African Americans and Hispanic Americans in college would not reflect the 18- to 24-year-old African American and Hispanic American overall populations: Arizona, California, Florida, New York, and Texas.

If we look at current data rather than projections, the picture here too is bleak. For example, consider completion rates of bachelor's degrees for Americans 25 years and older. The completion rate of non-Hispanic Whites is 25.6 percent. For Blacks, it is 13 percent. Notice that Hispanics have the lowest completion rates and the highest school dropout rates of any group in the United States. This is indeed cause for concern—to see the fastest-growing minority group by the fact that nearly 60 percent of Hispanic American students who drop out of the educational system have less than a 10th grade education. (In a previous HO article, "Improving the Future for Hispanic Americans: The Role of Community Colleges," I discussed the complex, interwoven factors contributing to this lesser educational attainment of Hispanic Americans. I proposed that some of the factors included socioeconomic status, overt and covert discriminatory practices and policies, socialization factors, and the educational system's deficiencies. I also offered suggestions for how community colleges could improve retention rates and promote Hispanic American completion-to-degree rates.

Not only are we witnessing the gap between the college- and non-college-educated, and another college education gap between the White and minority populations, we are also seeing a minority-group gender gap in higher education. In "Hispanic Women, Academia, and Retention," HO, I pointed to some U.S. Census Bureau statistics: the college-completion rate for Hispanic American women is 69 percent, for Black women in America, 10.2 percent, and for White women, 17.6 percent. About one in five Hispanic American women leaves high school by age 17, a rate higher than that of Hispanic American males, and of any group of females in America.

A New York Times article, "Report on Black America Finds a College Gender Gap," draws on a perspective from the National Urban League. The report "offers a picture of two Black Americas: one taking advantage of economic opportunity and another mired in deprivation." The study shows a growing Black middle class, but also states that Blacks represent a disproportionately high number of adults and juveniles in prison and those dying of cancer, AIDS, and other diseases. This other Black America still has twice the rate of unemployment as Whites in America. And another troubling gap, this time between Black males and Black females, is in educational attainment. The report shows that Black women were awarded more than twice the number of BA degrees and nearly five times as many master's degrees as Black men.

Michael Netles, a University of Michigan education professor, suggests this gap might be partly explained by the fact that Black men might have more options than Black women after high school. For example, Netles notes that Black
women outnumber Black women among college-age military groups. Professor Nettles says that there might also be greater family expectations for Black males to contribute to family income after high school than for Black females to do so. Nettles further states that Black males are dramatically overrepresented in special education classes for students with low test scores or behavior and discipline problems, and severely underrepresented in advanced placement settings. He suggests that teachers might be using subjective criteria that have embedded biases and lower expectations for Black males in their classrooms. The implications for the low numbers of Black males completing college are frightening. Black males will remain rare among the economically successful and the powerful decision-makers in America unless the current situation changes.

If part of the solution to the economic disparity in our society, the ever-widening gap between the economic haves and the have-nots, can be found in educational attainment, how do we encourage more Americans, particularly American minorities, to attend and complete college? There are groups and commissions, such as the President's (President Clinton) Advisory Commission on Educational Excellence for Hispanic Americans, that are making valuable suggestions for creating a more inclusive society through educational attainment. (See Our Nation on the Fault Line: Hispanic American Education, September, 1996.) And many educational institutions and many educators are committed to higher educational attainment for all Americans who want to achieve it.

It seems to me that as a society, we need to recognize the power of higher education to enhance the quality of people's lives in so many dimensions. Then we need to concentrate our efforts on making the possibility of a college education more of a reality to a larger proportion of Americans, particularly a larger proportion of American minorities.

National Board for Professional Teaching Standards Announces Unprecedented 4,694 Teachers Achieve National Board Certification

ARLINGTON, Va.

NBPTS announced that 4,694 primary and secondary school teachers from 49 states and the District of Columbia have earned the highest professional credential in the field of teaching—National Board Certification—for the 1999-2000 school year.

This record number of new National Board Certified Teachers (NBCTs) almost doubles the previous year's announcement of 2,970, pushing up the total of NBCTs to 9,498.

National Board Certification, a voluntary process established by NBPTS, is achieved through a rigorous performance-based assessment that takes nearly a year to complete. Through the assessment process, teachers document their subject matter knowledge, provide evidence that they know how to teach their subjects to students most effectively and demonstrate their ability to manage and measure student learning.

“This impressive level of achievement is a milestone for our organization, the teaching profession, and the nation as a whole,” said NBPTS President Betty Castor. “Parents, policymakers, and the public recognize that when it comes to quality education, teaching matters. This is why the National Board for Professional Teaching Standards was created in the first place. We believe the heart of education reform rests directly with the teacher in the classroom.”

Castor added, “With this announcement, we believe we’re well on our way to reaching our goal of 100,000 National Board Certified Teachers by 2006. We have already received more than 10,000 applications for the 2000-2001 school year. Our vision is that our standards of accomplished teaching become the standards for excellence in teaching across America.”

States with the highest number of teachers achieving National Board Certification for 1999-2000 included North Carolina (1,115), Florida (699), California (440), Mississippi (389), South Carolina (331), and Ohio (319).

“We at the National Board are thrilled,” said NBPTS Chair Barbara Kelley, an elementary school physical education teacher from Bangor, Maine. “Every teacher achieving National Board Certification can attest to a heightened awareness of the needs of individual students. And while each NBCT is unique, the shared experience of thousands of teachers working to meet our high and rigorous standards is having a positive impact on the entire teaching profession.

“Assisting us in the process is the fact that across the nation, school districts, universities, teachers’ associations, and other National Board Certified Teachers have put in place various types of support for candidates.”

Report Shows More Foreign Students Are Studying in the United States, Says ACE

WASHINGTON, D.C.

The American Council on Education says that, according to the annual report on foreign students released by the Institute of International Education, the number of international students enrolled in the nation's colleges and universities increased by five percent to a record level of 514,723 during the 1999-2000 academic year.

- The five percent increase in international enrollment continues an upward trend that began two years previous, after a four-year period of minimal growth. The enrollment of international students rose by two percent in 1998-99; five percent in 1997-98; 09 percent in 1996-97; 03 percent in 1995-96; 06 percent in 1994-95; and by 25 percent in 1993-94.
- More than half (54 percent) of all international students were from Asia (280,146, up two percent). However, a continued slump in enrollment was noted in several parts of Asia affected by economic downturns, including Indonesia (down seven percent), Thailand (down 12 percent), Hong Kong (down 14 percent), and Malaysia (down 22 percent).
- The number of international students attending all types of postsecondary institutions has risen by 15 percent since 1993. However, the enrollment of foreign students has been particularly strong at community colleges, which experienced a 46 percent increase in enrollment since 1993 and a six percent increase (to 85,817) in 1999.
- The most popular majors among international students were business and management (20 percent), engineering (15 percent), and math and computer sciences (19 percent).
- International students made up only three percent of all postsecondary students enrolled in U.S. institutions in 1999-00, but contributed more than $12 billion to the U.S. economy in money spent on tuition and living expenses. Sixty-seven percent of international students received the majority of their educational funds from family and personal sources.
National Council of La Raza Comments on Bush Cabinet Appointments

WASHINGTON, D.C.

The National Council of La Raza (NCLR), upon learning of three Bush Cabinet appointments, released the following statement by Raul Yzaguirre, NCLR president:

"We welcome two of the Cabinet appointments announced. Commerce Secretary Norman Mineta, who served in the House as Chairman of the Transportation Committee, is a wise choice to be the next Secretary of Transportation. We also know that Secretary Mineta will be a strong advocate for the interests of all minorities in the Bush administration.

"Sen. Spencer Abraham, R-Mich., has demonstrated an ability to confront complex, difficult issues and forge bipartisan compromises, as he did so often on immigration policy. We are confident that he will bring these same qualities to the new administration as Secretary of Energy.

"The third appointment, however, is disturbing. Linda Chavez is smart and talented, and she has been a forceful and effective advocate for her often-controversial views. Unfortunately, many of her views are largely out of step with the interests of American workers, and her record in public service does not encourage confidence in her ability to lead the U.S. Department of Labor. She was a polarizing figure, especially in the civil rights community, during her tenure as staff director of the U.S. Commission on Civil Rights. There, she attacked long-standing principles of affirmative action, troubling behavior in someone who as Labor Secretary would oversee the Office of Federal Contract Compliance, which is charged with monitoring the affirmative action plans of federal contractors.

"She has consistently opposed increased federal investments and involvement in education and training, worker protection, and civil rights—ironically the principal functions of the department she is being nominated to head. And, on virtually every policy issue of the day, her views are out of step with those of the vast majority of Hispanic Americans. For this reason, we question the wisdom of this appointment and urge a vigorous and thorough exploration of these and other issues by the Senate during the confirmation process."

(Ed. note: Linda Chavez withdraw her name from nomination on Jan. 9, 2001.)

NELI Helps Companies Cater to Up-and-Coming Big Spenders: African Americans and Hispanics

KANSAS CITY, Mo.

The National Eagle Leadership Institute (NELI), a leadership program for African American and Hispanic/Latino professionals and college students, is offering solutions to companies that are looking for new and creative ways to sell their multicultural image.

Billions of dollars in the consumer arena are waiting to be claimed, and marketing professionals are jumping at the opportunity to tap into a resource that has been ignored for years. According to a recent issue of CareerFOCUS magazine, African American and Hispanic/Latino groups represent the up-and-coming big spenders. A survey conducted by Ehrlich Transcultural Consultants and Multicultural Marketing Resources, Inc., says the past five years have seen an increased interest in multicultural marketing because of basic demographic data and the rise in population of African Americans and Hispanics.

The purchasing power of African Americans is nearly $500 billion annually. Over the past 10 years, this population segment has increased its buying power by nearly 14 percent, or by $200 billion since 1990.

The Hispanic/Latino culture also fuels consumer buying power. According to statistics compiled by the SRDS Hispanic Media & Market Source, the Hispanic market almost rivals the African American market trend. Hispanic spending power was more than $400 billion in 1998 and is expected to top $500 billion by 2010.

When it comes to serving the growing number of African American and Hispanic/Latino families in America, marketers are becoming savvy. They realize that in order to be successful—to be able to build ties with and fulfill the needs of these largely untapped consumer markets—they have to appreciate the culture of the consumers. "Marketers have to be sensitive to each culture so as not to appear exploitative or patronizing," said David Morse, chief operating officer of the Cultural Access Group of Access Worldwide Communications.

NELI, based in Kansas City, is helping companies do just that. Committed to discovering leaders and nationally recognizing individual achievement, this not-for-profit organization celebrates the leadership achievements of culturally diverse professionals and empowers them to help others succeed.
Ecarma Assistant Professor at Campbellsville

Campbellsville University in Kentucky named Dr. Reginald E. Ecarma assistant professor of communications.

A onetime researcher for CBN News in Virginia Beach and managing editor of the Kentucky Journal, Ecarma was an adjunct faculty member at Campbellsville University from 1999-2000 and taught at the University of Louisville, Jefferson Community College, Kentucky State University, and Midway College. He has a bachelor's degree from the University of Louisville and a master's and doctorate from Regent University.

Texas A&M-Corpus Christi Newsmakers

Tenor Eduardo Mendoza, trombonist Robert Méndez, trumpeter Kevin Graham, and violinst Elsa Munguía, all Texas A & M-Corpus Christi students, were featured in music recitals this past fall. Pianist Alene Burch accompanied Mendoza.

Méndez and Graham were joined by Arlene Long on piano and by the A&M-Corpus Christi/DEL Mar Trombone Quartet, featuring Dr. Eileen Russell, Becky Gabbard, Luis Peña, and Méndez. Violinist Munguía was accompanied by Joyce Wilcox on piano.

The University also exhibited artwork of students Shawna Lee Leahey, Jorge Silva, Clay Kronke, and Omar Díaz.

UT-Austin President Exorts "Top 10 Percent Law"

Larry R. Faulkner, president of University of Texas (UT)-Austin, recently reported that the "Top 10 Percent Law" is working in Texas. The law guarantees admission to any of the state institutions of higher learning to all who graduate from a Texas high school in the top 10 percent of their class.

"I often encounter the perception that the Top 10 Percent Law is causing a large number of qualified applicants to be denied admission to UT-Austin," said Faulkner. "That is not really the case. The law has enabled us to diversify enrollment with talented students who succeed."

Faulkner said that while the law requires admission of some who have lower standardized test scores than those who are rejected, those same students earn much higher grades in college than do non-top 10 percent students who have SAT scores "200 to 300 points higher." He also said that minority students earned higher GPAs in 1999 than in 1996, the year before the Hopwood decision prohibited the consideration of race in admissions policies.

Minority students also have higher retention rates. An impressive 85.8 percent of 1998 Hispanic first-year students returned for their second year at UT-Austin. "The law is helping us to create a more representative student body and enroll students who perform well academically," he said.

Oklahoma Museum Announces Discovery of New Mammals

Curators from the Sam Noble Oklahoma Museum of Natural History at the University of Oklahoma (OU) and from the University of Tucumán in Argentina announced the discovery of two new genera and species of mammals from Argentina. These rodents live along the edges of vast salt flats in different provinces in Argentina, a zone that, according to Dr. Michael A. Mares (pictured), OU professor of zoology, is not known to harbor many species because the environment is so harsh. Mares and Dr. Janet K. Braun are co-principal investigators on the project, which is funded by the National Science Foundation.

Both species, the Chalcilherio Vizcachha Rat and the Golden Vizcachza Rat, are described in the same report, which was recently published in the Occasional Papers of the Museum of Texas Tech University. The authors of the report are: Mares, director and curator of mammals, Sam Noble Oklahoma Museum of Natural History; Braun, staff curator of mammals, Sam Noble Oklahoma Museum of Natural History; Dr. Rubén M. Bárquez, associate professor of vertebrate zoology and curator of mammals, National University of Tucumán, and investigator, CONICET (Consejo Nacional de Investigaciones Científicas y Técnicas); and Dr. M. Mónica Díaz, postdoctoral research associate, Sam Noble Oklahoma Museum of Natural History, teaching assistant in vertebrate zoology and curatorial assistant in mammals, National University of Tucumán.

This team of researchers has discovered three new genera of mammals and more than two dozen new species in the last several years.

Sasscer Attains New Position at Northern Virginia

Northern Virginia Community College named Dr. Mónica Sasscer associate dean for instructional technology. She assumes responsibility for the College's Extended Learning Institute and the Technical Applications Center and reports to the dean of information technology.

Sasscer, a native of Argentina, joined the faculty in 1968, teaching Spanish through the Extended Learning Institute at the Alexandria campus, and was named acting director in January 2000. Her other positions at Northern Virginia were acting division chair, assistant division chair, coordinator of learning laboratories, and director of the TICCT computer-assisted learning project at Alexandria. She also was a consultant on instructional technology for corporate clients.
Sasscer has a bachelor's degree from St. Joseph's College in New York, a master's from Georgetown University, and a doctorate from Virginia Tech.

**UTSA Students Recognized at MAES Symposium**

An interdisciplinary team of students from the UT-San Antonio (UTSA) chapter of the Mexican American Engineers and Scientists (MAES) created the prototype of an environmentally safe car for the Ford Design Competition held in conjunction with the MAES 26th International Symposium and Career Fair. Ford Motor Company officials were so impressed with the originality and feasibility of the team's work that they urged the group to seek a patent.

"The fact that this design was created using an interdisciplinary approach is significant because that's the approach taken in industry," said Jesse García, UTSA's MAES student chapter adviser. Team members are Crystal Lynn Flores, Ricardo Ramírez, Lee Ann Vargas, Rebecca Martínez, and Vivian Troche. Ramírez, president of the student chapter, received the MAES presidential scholarship, and UTSA student Jacqueline Kay Román, the MAES graduate scholarship. The team was invited to present its work at the University of California-Irvine and at Los Alamos National Laboratory in New Mexico.

**DePaul Students Join in Protest at Georgia Army Base**

A group of DePaul University (Ill.) students, sponsored by University Ministry, joined students from college campuses across the country at a weekend non-violent protest of the U.S. Army School of the Americas (SOA) in Fort Benning, Ga. The students are part of a national movement calling for the closing of the SOA, which trains soldiers in combat, counterinsurgency, and counternarcotics.

The activists believe that graduates of the SOA are responsible for some of the worst human rights abuses in Latin America, including the 1980 assassination of Archbishop Oscar Romero and the 1981 El Mozote Massacre of 900 civilians in El Salvador. According to the protesters, the SOA's 60,000 graduates include notorious dictators Manuel Noriega and Omar Torrijos of Panama; Leopoldo Galtieri and Roberto Viola of Argentina; Juan Velasco Alvarado of Peru; Guillermo Rodríguez of Ecuador; and Hugo Banzer Suárez of Bolivia.

DePaul students have participated in the protests annually since 1997.

**Northeastern Professor Addresses Leadership Alliance**

"As students of color, you are likely to be bombarded by negative messages that will cause you to doubt your own abilities or make you feel like an impostor. You really have to tune out those negative messages and be confident about yourselves," advised Dr. Gilda Barabino, vice provost for undergraduate education and professor of chemical engineering at Northeastern University (Mass.). Barabino addressed the Leadership Alliance 2000 Annual National Symposium and its audience of many undergraduate students from underrepresented groups.

"Today, in this country, Blacks, Latinos, American Indians, and Asian Americans remain terribly underrepresented in higher education, especially at the graduate level." She also said that ethnic faculty members make up less than 12 percent of the professorate.

Barabino graduated magna cum laude with a bachelor's degree from Xavier University of Louisiana and earned a doctorate from Rice University.

**Texas A&M-Kingsville Student Honored at SACNAS Conference**

Yvonne Puente, Texas A&M University-Kingsville senior chemical engineering major, received a $200 award for her poster presentation at the 2000 Society for Advancement of Chicanos and Native Americans in Science (SACNAS) National Conference.

Puente's research, "Pressure Dependence of the Apparent Unimolecular Rate Constant for the Pyrolysis of Cyclopentene," studied the rate of reaction for cyclopentene at progressively lower pressures to search for the transition pressure predicted by the Lindemann Mechanism Theory of unimolecular reactions.

Puente said she had never presented this research before and was really interested in seeing what other researchers were doing. "I received feedback from scientists who were interested in student research," Puente said. After obtaining her bachelor's degree in May, Puente plans to pursue a doctorate.

**Northern Colorado Names Director of Chávez Center**

Scott VanLoo was named director of the César Chávez Cultural Center at the University of Northern Colorado (UNC). VanLoo replaces Vicki Leal, who left in 1998 to pursue a doctorate. Silvana Carlos had served in the interim. Before joining UNC, VanLoo served Greeley-Evans District 6 schools as equity/diversity/community liaison. Earlier he taught special education.

"The César Chávez Cultural Center has a rich history of cultural pride, tradition, education, and caring. I am honored to be part of the Center and to work with such talented students, faculty, and staff," said VanLoo. The Center works to enhance student recruitment, retention, and graduation, with a focused emphasis on UNC's Latino students.

VanLoo has a bachelor's degree and master's from UNC and is working on a doctorate at the University of Colorado-Denver.

**U S WEST, Inc. CEO Speaks at Southern Colorado**

Solomon D. "Sol" Trujillo, immediate past chair, president, and chief executive officer of U S WEST, Inc., delivered the commencement address to Fall 2000 graduates at the University of Southern Colorado (USC).

Trujillo became president and CEO of U S West in 1998 when the U S West Communications Group and MediaOne, the cable and international business unit, were separated into two freestanding companies. He was named chair in 1999. Under his leadership, he achieved many "firsts," leading the telecommunications industry in the deployment of high-speed data services and affordable high-speed data solutions for Internet customers.
in both consumer and business markets. He has an undergraduate degree in business and a master's from the University of Wyoming, which conferred an honorary doctorate of law on him last year.

"Mr. Trujillo is an excellent example for our graduates as they begin new lives for themselves," said Tito Guerrero III, USC president.

**Manhattan Community Set to Increase Minority Participation**

Borough of Manhattan Community College (BMCC) in New York was awarded a $244,000 grant from the U.S. DOE’s Minority Science Engineering Improvement Program (MSEIP).

The three-year grant will allow BMCC’s computer information systems, mathematics, and science departments to strengthen curricula and purchase equipment for a student computer laboratory. "This will give us a running start in making long-range improvements in science education at BMCC and increase the flow of underrepresented ethnic minorities, particularly minority women, into scientific careers," said BMCC president Antonio Pérez. MSEIP seeks to improve access of undergraduate minority students to careers in the sciences, mathematics, and engineering and computer sciences.

**Galván Assumes New Post at Cal State LA.**

California State University-Los Angeles named José L. Galván associate dean for graduate studies and research, his interim post since 1998. A professor of education in the division of educational foundation and interdivisional studies, he joined the faculty in 1990.

As associate dean, Galván will contribute to leadership and service in graduate studies and research through strategic planning, administration of several campus-wide graduate student programs, oversight of selected institutional grants, review of proposal budgets in assigned areas, and expansion of international grants and contracts.

Galván has a bachelor's degree, a master's, and a doctorate from the University of Texas-Austin. From 1992 to 1998, he was program coordinator for the TESOL program at Cal State LA.

**Texas A&M Program Assists Migrant Workers**

To help provide migrant workers living near the border with the education and personal development skills they need to better their living standards, Texas A&M University is offering a high school equivalency program in four colonias in Hidalgo and Willacy counties. These counties have the highest concentration of migrant and seasonal farmworkers in the U.S. Colonias are the small, rural, underdeveloped communities along the American side of the Texas-Mexican border, said Kermit Black, director of Texas A&M's Center for Housing and Urban Development.

The colonias program is expected to aid 100 migrant workers per year in the two counties.

**Texas Independent College Fund Elects New Treasurer**

Pearl Garza Fracchia, director of national constituency relations for Southwestern Bell in Dallas, Texas, was elected to a two-year term as treasurer of the Texas Independent College Fund.

As treasurer, she serves on the executive committee and as chair of the finance committee. A director of the fund since 1995, she succeeds DeLora Wilkinson.

Founded in 1952, the Texas Independent College Fund has raised and distributed more than $25 million to its 32 member colleges and universities. Members include Dallas Baptist University, Southern Methodist University, the University of Dallas, Southwestern Christian College, and Austin College.

**Santa Barbara Community President Named to State Board**

Luis Villegas, president of the board of trustees of the Santa Barbara Community College (SBCC) District in California, was appointed to the board of directors of the California Community College Trustees.

Villegas, on the SBCC board since 1993, is on the board of directors of the Channel Islands YMCA and the Santa Barbara Hispanic Chamber of Commerce, and co-founded the Chamber's Hispanic Business Council. He is a member of the California Community College Latino Trustee Association.

Villegas has an associate degree from Santa Barbara City College, a bachelor's from the University of California-Santa Barbara (UCSB), and did graduate work at both UCSB and Universidad Autónoma de México, Mexico City.

**Rancho Santiago District Receives Grant for Worker Training**

Rancho Santiago Community College District in California was awarded a $736,036 U.S. Department of Labor grant to develop systems to train workers for high-skill jobs in areas where companies are facing labor shortages. It was one of 13 colleges and universities serving predominantly minority populations to receive a portion of more than $14 million in federal grants.

The College District will use the funds to develop a Bridge to Careers Consortium to evaluate the workforce situation in Orange County.

"Our district was awarded this highly competitive grant to build partnerships that will identify and address workforce needs within a high-tech environment," said Dr. Edward Hernández, college district chancellor. "Partnering with others is a district strength, so we're delighted to use this asset to improve the regional economy."

**Fratelli Honored at CUNY Fair**

New York City Councilman Guillermo Linares and Bronx Community College honor student Patricia Fratelli celebrated her 4.0 GPA during a City University of New York (CUNY) college information fair, an event open to all interested in higher educational opportunities at the University's senior colleges, community colleges, graduate center, law school, and medical school.

Participants had available to them details of CUNY's ESL program, basic skills immersion program, and basic language immersion.
program, which offer CUNY students intensive English instruction before they start their matriculated course work. The basic language immersion program is designed as an affordable option for entering first-year students who want to strengthen their English skills before starting their first semester and without using valuable federal and state financial aid.

"CUNY is continuing its historic mission of preparing immigrants for careers and lifelong learning," said Linares.

**Pennsylvania Rebuilds Romance-Languages Department**

The University of Pennsylvania's romance languages department has been undergoing a mild makeover. Upon losing five faculty members, the department has filled three positions and celebrated the appointment of a new chairperson, Ignacio Javier López. It is energizing its Latin American studies curriculum, stressing its importance in correlation to Spanish and Portuguese literature.

Former Emory University Professor Carlos J. Alonso (pictured) joined the department. The editor of *Publications of The Modern Language Association*, Alonso writes about Latin American intellectual history and literary theory. Reinaldo Laddaga, former visiting lecturer at Penn, became an assistant professor. An art critic and published novelist, Laddaga concentrates on the literature of Argentina, Chile, and Brazil. Maurice Silverus joined the department's French section. Interested in cultural studies, his work concentrates on 19th-century history.

**NYU Honors Queen Sofia of Spain**

New York University (NYU) bestowed a honorary Doctor of Humane Letters degree on Her Majesty Queen Sofia of Spain, recognizing her long-standing efforts in the areas of health, education, agriculture, and the betterment of women, as well as her support of the arts and humanities. Participants at the special academic convocation included NYU President L. Jay Oliva, NYU Board of Trustees Chair Martin Lipton, and NYU President Emeritus John Brademas.

**Mateo Elected to Mercy College Board**

Ted Dunn, chair of Mercy College's (N.Y.) board of trustees, announced the election to the board of Fernando Mateo.

Mateo is president of the New York State Federation of Taxi Drivers, an organization representing 15,000 livery drivers in New York City. He is the owner of Carpet Fashions Floor Coverings in Manhattan; is founder and chair of Goods for Guns Foundation, Inc., an exchange program used in different parts of the world that aims to remove illegal guns from the streets; and is on the board of directors of the Robert A. Taft Institute of Government, New York/New Jersey Minority Purchasing Council.

**Conference at Nebraska-Lincoln Examines Race in America**

As part of a national conference on race in America, the University of Nebraska-Lincoln hosted a town hall meeting, "Overcoming Problems of Race: Are Law, Politics, and Protests Enough?"

Moderated by Lucius J. Barker of Stanford University, the discussion featured Eduardo Bonilla-Silva of Texas A&M University, Mack Jones of Clark Atlanta University, Linda Williams of the University of Maryland-College Park, Rick Thomas of the Santee Sioux tribe of Nebraska, Dianne Pinderhughes of the University of Illinois at Urbana-Champaign, William Nelson of Ohio State University, and John Hibbing and Miguel Carranza (pictured) of Nebraska-Lincoln.

"The conference on race permits the examination of race in a diversity of ways and approaches," said Michael Combs, professor of political science at Nebraska-Lincoln.

**Essex County Student Receives Scholarship Award**

In New Jersey, Ana Muñoz, an Essex County College (ECC) student, received SCORE's (Service Corps of Retired Executives) 2000 Nathan Hart Scholarship Award for Excellence in Business Studies.

Muñoz, who graduated in December with an AS degree in business administration, received a $1,000 scholarship and plaque from Charles Scherwin, a volunteer with SCORE Chapter 15. Scherwin plans to transfer to the New Jersey Institute of Technology (NJIT) after completing ECC requirements and has already taken several courses at NJIT under the cross-registration arrangement between the two schools.

Muñoz is the fifth ECC student to receive the SCORE award from Scherwin in the past five years. Scherwin, a retired accountant, became acquainted with ECC several years ago when he took some computer classes at the West Essex campus.

**Miami-Dade Hosts International Book Fair**

Miami-Dade Community College (Fla.) hosted Miami Book Fair International 2000, an eight-day celebration of the written word.

The enormous gathering boasted more than 250 participating authors, 300 booksellers and publishers, and more than half a million visitors, making it the largest book fair in the nation.

Some of the most renowned contemporary authors talked about their life and work, gardening, cooking, health, spirituality, personal relationships, culture, and literature. The Ibero-American authors program featured prominent Spanish authors from around the world. Rare books, maps, and other documents from the 15th to 20th centuries were displayed, appraised, bought, and sold at the Antiquarian Annex. And an extravagant three-day outdoor street fair capped off the events.

The official book fair poster (pictured), designed by artist David Lee Csicsko, conveyed the importance of families reading together.
Hostos Community College Shows Puerto Rican Films

"Ateeno Puertorriqueño's Cine sin Pantalla," the highly praised series featuring long-lost Puerto Rican films, premiered in The Bronx, N.Y., as part of Borough President Fernando Ferrer's Puerto Rican Heritage Month celebration. Hostos Community College screened four Puerto Rican motion pictures believed to have been permanently missing.

"Film is a wonderful medium to preserve our heritage and culture," Ferrer (pictured) said. "There is no better way to celebrate Puerto Rican Heritage Month 2000 than bringing back to New York audiences these jewels of Puerto Rican cinema."

Founded in 1876, Ateeno Puertorriqueño is the oldest and most active cultural institution in Puerto Rico. A not-for-profit organization, its mission is to preserve and promote Puerto Rican arts, culture, identity, and values. Its film unit, headed by Professor José Orraca, owns Cine Nuestro, the largest collection of Puerto Rican motion pictures in the world.

Directed by writer and director Roberto Ramos-Perea, Cine sin Pantalla is a special project to recover and revive long-lost Puerto Rican movie classics.

Southern Colorado Supports Minority Participation in Research

The University of Southern Colorado (USC) received a $370,000 grant from the National Institutes of Health for a project designed to engage Hispanic students at regional community colleges in biomedical research programs at the University.

USC Assistant Professor David Gonzales (pictured) is grant coordinator for the two-year Puente Project: Bridges to Biomedical Careers, which aims to increase the pool of minority applicants who pursue biomedical careers. The project will include 18-20 Hispanic students and three biology instructors from Pueblo Community College, Lamar Community College, and Trinidad State Junior College. Students and instructors will participate in an intensive five-week workshop on research techniques on the USC campus this summer, working with Gonzales in reproductive physiology, associate professor of chemistry Sandra Bonetti in protein chemistry, and associate professor of biology Dan Caprioglio in molecular biology.

Grant to Help SDSU Tutor El Centro Students

In California, San Diego State University (SDSU) Foundation announced the receipt of a $600,000 grant from the U.S. DOE Office of Post-Secondary Education to tutor middle school students from the El Centro School District in literacy and build student awareness of college opportunities—a three-year program that began in October. The SDSU Pre-College Institute, which coordinates the SDSU Upward Bound and Talent Search programs, will partner with the El Centro School District, the SDSU Imperial Valley campus, and the Imperial Valley College (IVC) Upward Bound program to bring the best practices of these federally funded programs to 200 middle school children, as well as faculty.

Dr. Khosrow Fatemi, dean of SDSU Imperial Valley, is principal investigator of the program. Dr. Cynthia Park, executive director of the SDSU Pre-College Institute, Rosa Moreno, assistant dean of SDSU Imperial Valley, and Rosalie López, director of Upward Bound at IVC, are co-directors.

Imperial Valley County has the highest percentage of Latino students in California. More than 55 percent of all students in the county are classified as below the federal poverty level. SDSU Imperial Valley is located in Calexico, a city of 30,000 located directly across the U.S.-Mexico border, and has an 80 percent Latino student population.

North Carolina-Chapel Hill Hosts Cuban Art Exhibit

The University of North Carolina-Chapel Hill University Center for International Studies and the Institute of Latin American Studies held the exhibit "Passion and Beauty: Three Artists from Cuba," coinciding with a Cuban symposium. The three featured artists, Alberto Carol, Liliam Cuenca, and Giro Quintana, are all Cuban-born painters who relocated to the United States to gain more freedom to express their artistic visions. Rodney Derrick, an art collector who loaned the paintings for the exhibit, presented a conversation on "Collecting Cuban and Latin American Art."

Carol, born in Havana in 1945, studied at Cuba's National School of Art. (Pictured is Carol's 1993 acrylic on paper, "Día y Noche") Cuenca, born in Cuba in 1944, studied at the San Alejandro Academy of Art and the Taller Experimental de Gráfica in Havana. Quintana, born in Havana in 1964, studied under Carol at the National School of Art.

García y Griego Authors Report for Mexican Studies Center

University of Texas-Arlington Center for Mexican American Studies (CMAS) director Manuel García y Griego (pictured) co-authored a report concerning California state government and how social policies might be improved to better integrate the large foreign immigrant population in that state.

The report "Immigration and Immigrant Integration in California: Seeking a New Consensus" was co-authored with University of California-Davis Professor Philip Martin. It is the first research report prepared in part under CMAS's auspices.

(Ed. note: See also pp. 24-27)

City College of San Francisco Hosts Diego Rivera Lecture

City College of San Francisco (Calif.) presented a lecture, "Diego Rivera's Influence on California Art," at its Diego Rivera Theater. Paul Karlstrom, West Coast regional director of the archives of American art at the Smithsonian Institution, presented the free public lecture, part of the Diego Rivera lecture series funded by the California Council for the Humanities.

Columbia Theological Seminary Holds Scholars Seminar

Ofelia Ortega was among a distinguished group of scholars and pastors who initiated Columbia Theological Seminary's (Ga.) first Campbell Scholars Seminar, "Mission of the Church in the Twenty-First Century." Named in
honor of Columbia's former trustee and benefactor John Bulow Campbell, the seminar is intended to help Columbia and the church think more clearly about the character and work of mission in the new century. A critical component of each seminar is the presence of scholars and pastors from around the world.

Ortega, president of the Evangelical Theological Seminary in Matanzas, Cuba, is a greatly respected leader among the burgeoning Protestant churches of Latin America. Other international scholars included: Russel Botman, University of Stellenbosch, South Africa; Douglas John Hall, McGill University, Canada; Damayanti Niles, St. John's College, University of Cambridge, England; and Janos Pasztor, from Budapest, Hungary. Joining them were two Columbia graduates and distinguished U.S. pastors, Joanna Adams and James Lowry; Columbia Professor Walter Brueggemann; and Acting Dean of Faculty Erskine Clarke, director of the seminar.

Grant to Help LaGuardia Train Hispanic Workers

LaGuardia Community College (N.Y.) received a $750,000 grant from the U.S. Department of Labor to prepare poor Hispanics for entry into careers in the telecommunications field.

The 30-month planning grant will fund a consortium, led by LaGuardia, Brooklyn Workforce Innovations, and New York City Technical College, that will analyze skills shortages in entry-level telecommunications jobs. Together with representatives from the Communications Workers of America and other key stakeholders from business and local communities, the consortium will design effective training programs for eligible Hispanics in Brooklyn and Queens.

LaGuardia was among 13 minority colleges and universities throughout the country to share $14 million in Department of Labor grants to develop new systems to train workers for high-skills jobs in areas where companies are facing labor shortages. The competitive grants were awarded to colleges and universities that have a reputation for partnership-building and skills training.

UC-Santa Barbara Hosts Catholic Scholars

UCSB Demetria Martinez, novelist, poet, journalist, and columnist for the National Catholic Reporter, will visit the University of California-Santa Barbara (UCSB) in May to speak on Catholic social activism and the Latino experience in the United States. She will base her remarks on her involvement in the Central American Sanctuary Movement of the late 1980s and early 1990s and her involvement in the protesting of vigilante attacks on undocumented immigrants along the Arizona-Mexico border.

In November, UCSB hosted University of Notre Dame history professor Jay Dolan, a leading expert on American Catholicism, in what organizers hope will become an annual UCSB series focusing on Catholicism and American life. The departments of Chicano studies and religious studies sponsored Dolan's lecture, "Religion and Ethnicity: Ties That Bind, Ties That Burn," in which he compared the experiences of German American and Latino Catholics in the United States.

Father John Coleman, Jesuit priest and professor at Loyola Marymount University, will lead a discussion in March—"Catholicism and the Engagement with Public Life."

Rochester Scholar Studies History of Minority Access to College

Harold S. Wechsler, professor at the Margaret Warner Graduate School of Education and Human Development at the University of Rochester (N.Y.), received a $380,000 grant from the Spencer Foundation to study the development of minority access to higher education and how institutional policies and actions affected it.

Wechsler will work with graduate student assistants to analyze a dozen U.S. colleges and universities by examining ethnic and racial histories, documents, surveys, and other materials that reveal student demographics, enrollment patterns, and institutional accommodations for minorities and women.

The three-year project allows Wechsler to bridge his previous research on early 20th-century admissions policies with his studies of minority access to college since 1970. Other historians have looked at elite Eastern colleges and how they handled the academic and social lives of minority students and women. Wechsler is taking the next step by tracking how women, African American, Jewish, Hispanic, and Asian college students fared at municipal and state institutions.

CCNY Receives $28 Million for Research

City College of New York (CCNY) received more than $28 million in research grants and support from government agencies, corporations, and private foundations during 1999-2000. The amount was the largest yearly total ever at CCNY and the most for any college in the City University of New York (CUNY).

The total includes nearly $10 million in support for sponsored research in the division of science, from such agencies as the United States Department of Energy and the National Science Foundation.

Other major recipients are the School of Engineering, with more than $6 million in grants; the School of Education, $3.8 million; and CCNY’s Sophie Davis School of Biomedical Education/CUNY Medical School, $2.5 million.

In the News at Eastern New Mexico-Roswell

- David Rodriguez was the featured speaker at the 34th commencement convocation at Eastern New Mexico University (ENMU)-Roswell. A local chapter president of the Phi Theta Kappa honor society, Rodriguez was named to the All-State Academic Team and was nominated to the All-USA Academic Team. After graduating from ENMU-Roswell, he plans to pursue a bachelor's degree and a master's in business administration.

**Latino Magazine Announces Literary Prize Winners**

ANDAR, a national magazine that covers political and cultural trends in the U.S. Latino community, announced the winners of its Prize for Literary Excellence. The first of its kind, the contest had national prominence, was inclusive and bilingual. In an effort to raise the level of recognition of writers, several accomplished authors, including Isabel Allende, Sandra Cisneros, Ileana Stavans, and Gary Soto, founded the award competition and/or judged the essays.

Renato Rosaldo won the first place prize in the poetry category for his work El ángel de la guarda; Jessica Barksdale-Inclán topped the fiction category with Open Eyes; and Sara Inés Calderón's The Remains earned her the first place Paula Award for Young Writers (sponsored by Isabel Allende).

el ANDAR was founded in 1989 by its publisher, Jorge Chino, in Santa Cruz, Calif. It went national in 1998.

**Robinson Delivers Martin Luther King, Jr., Lecture at Nazareth**

Renowned author and civil rights advocate Randall Robinson delivered Nazareth College's (N.Y.) Martin Luther King, Jr., Day lecture.

Robinson, a graduate of Harvard Law School, is an internationally respected human rights advocate and leader in the African American community. He is president of TransAfrica and TransAfrica Forum, organizations established to promote and improve U.S. policies toward Africa and the Caribbean, and to educate the American public about those policies. He is a leader of the Free South Africa Movement; he participated in a 27-day hunger strike to persuade the United States to halt its "discriminatory policy" toward Haitian refugees; and he is renowned for his efforts to alert Americans to the causes and implications of America's overcrowded prisons.

**TC3 Seeking Minority Faculty**

In New York, the Tompkins Cortland Community College (TC3) board of trustees approved a diversity staffing plan that commits the college to an intensive effort to recruit racial and ethnic minorities. TC3 is planning to hire 14 faculty members, primarily to replace retirees, over the next year.

"We have witnessed the value of diversity on our campus through our successful Global Connections program," said Carl Haynes, TC3 president. "We're trying to teach our students the value of connecting to a diverse, global society, and to have more diversity in the classroom and on campus. The enriched learning environment will benefit everyone."

The diversity staffing plan includes a commitment from Haynes to present a diverse field of candidates to the board for approval. If, despite all the efforts of the college, applicant pools are not satisfactorily diverse, a faculty diversification scholarship program will be created.

**SAC Students “Win” with Lottery Commission**

Several San Antonio College (SAC) students who study statistics with mathematics professor Gerald Busald won a victory for truth in advertising when they testified before the Texas Lottery Commission. They convinced the commission to clarify the language that describes the odds of winning, which by law must appear on scratch-off lottery tickets.

The Texas Lottery, in its eight years of existence, has always considered someone a winner who “breaks even” by winning back only the value of the ticket.

Busald's students, who originally suggested a study of lottery odds, believe this practice is deceptive and distorts the odds of actually winning. After they testified before the Lottery Commission, Linda Cloud, commission executive director, promised to change the language on the tickets to say, “Overall odds of winning any prize, including break-even prizes.”

This is one of several instances in the last three years when Busald's students have found errors in lottery advertising, resulting in the withdrawal of inaccurate advertising materials.

Pictured here (l. to r.) are Busald, Efren Delgado, Nicole Cunningham, Kris Whitney, and Kristin Brohemman.

**This Craft of Verse: Jorge Luis Borges—The Charles Eliot Norton Lectures, 1967-1968**

Calin-Andrei Mihăilescu, ed.

Transcribed from tapes only recently discovered, these lost lectures given in English at Harvard in 1967-1968 by Jorge Luis Borges return to us a recovered tale of a lifelong love affair with literature and the English language. He draws on a wealth of examples from literature in modern and medieval English, Spanish, French, Italian, German, Greek, Latin, Arabic, Hebrew, and Chinese.

**Loving in the War Years: Lo que nunca pasó por sus labios, 2nd ed.**

By Cherrie L. Moraga

Cherrie Moraga has added a new generational perspective to her classic collection of essays and poetry, *Loving in the War Years*. The four new essays in this 20th-anniversary expanded edition are written in a voice that is nearly a generation older than the one that echoes off the pages that Moraga first wrote in the late 1970s and early 1980s. Moraga maintains her focus on issues of race, sexuality, ideology, and political power.

**Cuba Today and Tomorrow: Reinventing Socialism**

By Max Azcηri

Covering the turbulent period of the 1990s, this book examines such issues as the impact
on Cuba of the Soviet Union’s collapse, the country’s social malaise under economic scarcity, the reorganization of its economy, changes in its political system, problems in its relations with the United States, and the renaissance of Cuban religious life in the aftermath of the pope’s visit.

Torner and Santa Anna: The Writer and the Caudillo, Mexico 1795-1853
By Will Fowler

José María Torner y Mendivil (1795-1853) was one of Mexico’s leading politicians and writers during the three decades that followed independence. Associated with Antonio López de Santa Anna for most of his life, Torner was severely condemned and criticized by some of his contemporaries, who accused him of being a turncoat and having no political integrity. This is a study of the life of Torner and his relationship with Santa Anna.

Latin American Popular Culture: An Introduction
William H. Beezley and Linda A. Curcio-Nagy, eds.

This book gives readers a firsthand look at the popular culture of Latin America—its dance, cooking, art, carnival, music, romance, funerals, monuments, medicine, and humor. It includes theoretical approaches to Latin American popular culture, such as the invention of traditions, the creation of national identity, the formation of gender roles, and the prevalence of ethnicity.

Transforming Classroom Grading
By Robert J. Marzano

Transforming Classroom Grading is about designing grading systems that are both precise and efficient. Robert Marzano clarifies the basic purpose of grades and discusses what should be included in them, how to use a rubric-based approach to assessment and reporting, how to compute final topic scores and final grades, and how technology can streamline the grading process.

El Mesquite: A Story of the Early Spanish Settlements between the Nueces and the Rio Grande
By Elena Zamora O’Shea

Even though most of the settlers in the 19th-century Texas open country between the Nueces River and the Rio Grande had Hispanic names, they were, until very recently, rarely admitted into the pages of Texas history. In 1935, Elena Zamora O’Shea found an ingenious way to publish the history of her region and her people at a time when neither Tejanos nor women had much voice: she told the story from the perspective of an ancient mesquite tree.

La Raza Unida Party: A Chicano Challenge to the U.S. Two-Party Dictatorship
By Armando Navarro

Born in the idealism of the Chicano movement of the 1970s and early 1980s, La Raza Unida Party (RUP) elected Chicanos a voice in a white-dominated society. Here, noted Chicano movement theorist Armando Navarro traces the RUP from its beginnings in 1970 to its demise in 1981. He describes events, leaders, ideology, structure, and more. In addition to discussing the party’s national and international politics, Navarro suggests options for future political action, a “Prospectus for a New Party and Movement.”

How to Be an Instant Expert: 6 Steps to Being an Authority on Any Subject
By Stephen J. Spigesi

Any writer, teacher, or speaker who has been given the task of writing a book or an article, putting together a presentation for a class, writing a research paper, or crafting an informative speech probably asks the same question each time he or she faces a new assignment: Where do I begin? Here is Stephen Spigesi’s 6-step system for becoming an instant expert on almost any subject.

The Gold Rush Diary of Ramón Gil Navarro
María del Carmen Ferreyra and David S. Reher, eds.

Upon hearing the rumors in 1848-1849 that there was gold to be gathered in California, Ramón Gil Navarro, an Argentinean political exile living in Chile, co-organized and accompanied 120 workers to Stockton and began prospecting. After witnessing racial and ethnic intolerance, swift and cruel justice, and experiencing great hardships, Navarro returned to South America without success. He became a national representative in the Argentinean Congress and worked as a journalist, never returning to California.

Constitutional Process: A Social Choice Analysis of Supreme Court Decision-Making

By Maxwell L. Stearns

This is a comprehensive analysis of how the collective nature of Supreme Court decision-making affects the transformation of the justices' preferences into constitutional doctrine. The author offers new insights into Supreme Court decision-making that have profound implications for understanding the outcomes in a number of cases and the resulting doctrinal development within constitutional law that traditional analyses have proven ill-equipped to explain.

The Contested Homeland: A Chicano History of New Mexico

Erlinda Gonzales-Berry and David R. Maciel, eds.

Many books deal with New Mexico's past, but the 12 original essays here reinterpret that history for the first time from a Chicano perspective. Self-determination, resistance, and cultural maintenance are the recurring themes in the lives and struggles of Nuevomexicanos from 1848 to the present.

Cuba, the Elusive Nation: Interpretations of National Identity

Damián J. Fernández and Madeline Cámara Betancourt, eds.

This anthology brings together scholars from a variety of disciplines who look at one main question: What constitutes Cuban identity?

Encouraged to go beyond received ideas and time-worn methodologies, they offer revisionist perspectives that argue for a "Cubanness" marked more by tension and diversity than by harmony and similarity, more impure than pure, more elastic than static.

The Novels of Fernando del Paso

By Robin W. Fiddian

Fernando del Paso is said to be one of Mexico's most prestigious authors. In this first book-length comparative study, Robin Fiddian evaluates del Paso's relationships to Mexican, Spanish American, European, and North American narrative traditions, placing him in the context of other Latin American writers such as Fuentes, Cortázar, and García Márquez.

The Autobiography of María Elena Moyano: The Life and Death of a Peruvian Activist

Diana Miloslavich Tupac, ed.

In 1992, at age 33, Peruvian activist María Elena Moyano was assassinated by guerrillas of the revolutionary movement Sendero Luminoso. Her murder—a warning to others in the women's movement—galvanized the Peruvian people against Sendero Luminoso and its leader, Abimael Guzmán Reynosa. Good friend Diana Miloslavich Tupac tries to recover the voice of Moyano, a voice echoed by thousands of Peruvian women. Translated by Patricia S. Taylor Edmisten.

CONFERENCES

ACE 83rd Annual Meeting
February 17-20

The American Council on Education will meet on "Shaping Public Policy with New Leaders." At Marriott Wardman, Park Hotel, Washington, D.C.
Contact: (202) 939-9410; website, www.acenet.edu.

AACE 12th International Conference
March 5-10

The Association for the Advancement of Computing in Education presents the Society for Information Technology and Teacher Education 2001 12th international conference. In Orlando, Florida.
Contact: e-mail, info@aace.org; website, www.aace.org/conf.

2001 ASCD Annual Conference and Exhibit Show
March 17-19

Among the Distinguished Lecturers at this year's conference of The Association for Supervision and Curriculum Development will be Jaime Escalante. The conference theme is "Teaching for Success: Resolving Educational Dilemmas." In Boston.

AAHE 2001 National Conference on Higher Education
March 24-27

The American Association for Higher Education presents "Balancing Private Gain and Public Good." The conference will anticipate issues, debate ideas, highlight innovation and best practice, foster leadership and professional development, and provide networking opportunities. At the Marriott Wardman Park Hotel in Washington, D.C.
National Association for Ethnic Studies Annual Conference
March 29-31

This year's conference theme: "Race, Ethnicity, and Pedagogy in the 21st Century." In New Orleans.
Contact: Susan L. Rockwell, (602) 965-2897; e-mail, susan.rockwell@asu.edu.

International Mentoring Association Annual Conference
March 29-31

This year's conference theme: "Diversity in Mentoring." In Washington, D.C.
Contact: at Western Michigan University, (616) 387-474.

NCA-CIEHE Annual Meeting
March 31-April 2

The North Central Association of Colleges and Schools/Commission on Institutions of Higher Education presents "Serving the Common Good: New Designs in Higher Education. At the Hyatt Regency Chicago Hotel in Chicago, Ill.

2001 Southern Region CUPA-HR Conference
April 1-4

The Southern Region of the College and University Professional Association for Human Resources, the national association of higher education human resource professionals, will convene its conference at the Richmond Omni Hotel, Richmond, Va.
Contact: Stewart Mixon, chair, (252) 328-4009; e-mail, mixons@mail.ecu.edu.

Center for the Study of Diversity in Teaching and Learning in Higher Education National Conference
April 18-21

"The Global Perspective: Teaching, Learning, and Student Equity" includes, among other conference highlights, concurrent sessions on critical thinking skills, curriculum, pedagogy, collaborative and interdisciplinary learning, and learning communities. At Hotel Inter-Continental, Miami.
Contact: Dr. Toni Forsyth, (408) 864-8309/8993; website, www.TeachLearn.hhsa.edu.

UCSB
Director of Admissions

The University of California, Santa Barbara invites applications and nominations for a Director of Admissions. A senior administrative position in Enrollment Services, a unit within the Division of Student Affairs, the Director is responsible for the recruitment and admission of undergraduate students. Related functions include managing a comprehensive information and recruitment program; processing freshman and undergraduate transfer applications; implementing UC admission policies and meeting campus enrollment goals; and developing and maintaining positive relations with community colleges and public/private secondary schools. The Director provides leadership in achieving a high-quality, diverse student body and in creating and maintaining a campus climate that supports multiculturalism and promotes academic achievement.

The successful candidate will have significant experience in undergraduate admissions; a knowledge of current recruitment and marketing trends; budgetary and personnel management skills; and a history of working in a collaborative and collegial manner in a large institutional environment.

Qualifications include:
- Master's degree or an equivalent combination of education and experience and five to 10 years of experience in a related area within higher education;
- Demonstrated commitment to diversity and the academic success of underrepresented students;
- Excellent verbal and written communication skills
