This article summarizes the development of the Tanacross practical orthography, highlighting the crucial differences between practical and technical orthography used in some linguistic publications. Three stages of Tanacross orthography are exemplified in research from the 1980s. A fourth stage is a hybrid of the second and third stages, incorporating the vowel system and tri-graph dental affricates of the third stage but without distinguishing semi-voiced fricatives with underscore. A fifth stage, exemplified in publications of the Yukon Native Language Centre, adds five types of vowel tone markings. This system recognizes three distinctions in fricative voicing. The vowel system uses five vowel symbols to represent six phonemic vowels. Each vowel symbol may occur alone or in a sequence of identical symbols. Tone is marked on vowels using a diacritic. Low tone syllables are not marked for tone. Only the first of a sequence of orthographic vowels is marked for tone. Nasalization is marked with the Americanist nasal hook. Both vowels of a vowel sequence are marked with the nasal hook if the vowel is nasalized. Glottal stop is not written in word-initial position. Words spelled with an initial vowel actually begin with a glottal stop. (SM)
Tanacross practical orthography

Gary Holton
gary.holton@uaf.edu
Alaska Native Language Center
August 2000

As of this writing there are not many written materials available in the Tanacross language. However, an orthographic standard has developed over the past decade, largely through the work of the John Ritter of the Yukon Native Language Centre (YNLC), and more materials are likely to appear in the coming years. In this article I summarize the development of the Tanacross practical orthography and provide a guide to the crucial differences between the practical orthography and the technical orthography used in some linguistic publications. It is hoped that this discussion will aid speakers and linguists wishing to access existing and future publications in the Tanacross language.

Many different practical orthographies have been used to write Tanacross in pedagogical and linguistic publications. Leer (1982) recognizes three distinct phases of Tanacross orthography. The first stage is exemplified by Nancy McRoy’s work in the early 1970’s (cf. McRoy 1973). The second stage is exemplified in the work of Ron Scollon later in the same decade (Scollon 1979; Paul 1980). The third stage is exemplified by Leer’s work with Alice Brean in the early 1980’s. The system employed in Kari’s work can be said to represent a fourth stage chronologically, though it is in many ways a hybrid of the second and third stages (Kari 1991b, 1991a). Kari’s system incorporates the vowel system and tri-graph dental affricates (tth and ddh) of the third stage but does not distinguish semi-voiced fricatives with underscore. A fifth stage of Tanacross orthography is exemplified by publications of the Yukon Native Language Centre (Solomon 1994, 1996; Isaac 1997). The YNLC orthography incorporates the stage three changes and adds five types of vowel tone marking. This system is employed in most current Tanacross work, including that presented in this document. The consonant chart is shown below.

indicate that their pronunciation in this position differs from that of a fully voiced or voiceless
fricative. In fact, as discussed in above, these semi-voiced fricatives are actually conditioned
allophones of the voiced fricatives, with the exception of the underlyingly voiced palatal
fricative, which always occurs semi-voiced. However, these semi-voiced fricatives are very
striking and clear to native speakers, and writing them as distinct segments captures an important
and unique feature of the Tanacross sound system (John Ritter, p.c.). The YNLC orthography
also recognizes /w/ as a distinct segment from its allophone /m/.

The vowel system of the YNLC orthography is shown in the table below. Five vowel
symbols are used to represent six phonemic vowels. Each of five vowel symbols may occur
either alone or in a sequence of identical symbols. (Diphthongs are represented as nuclear vowels
followed by the approximant <y>, as in <ey> /ei/.)

Sequences of identical vowel symbols usually represent long vowels, but not always. The mid-
front vowel /e/ is represented orthographically as <ee>; the lower mid-front vowel /ɛ/ is
represented by <e>. For the other vowels the length distinction is in many cases not phonemic.
For example, vowels in open stem syllables are almost always long, so there is usually no
possibility of a length contrast in this position. Where length is not phonemic, there is a great
deal of variation among literate speakers as to the way vowel length is written. In such cases,
there is a customary tendency to write stem vowels double and prefix vowels single. Often this
distinction is lexicalized. For example, there is no length contrast in mid-back vowels in closed
stems, yet we write <shos> ‘bear’ and <ganhook> ‘dancing stick’.

There is in general no difference in quality between the double and single vowels <uu>
and <u> or between <oo> and <o>. Each of these vowels is pronounced similar to its cardinal
phonetic value. The vowel <u> represents a high back round vowel. The vowel <o> represents a
mid-high back round vowel, somewhat higher than its cardinal value. The doubled version of
these symbols have identical phonetic values to their single counterparts. In contrast, the single
vowel <i> varies quite a bit in height, ranging from a high front vowel to a mid-high front vowel.
Thus compare:

(1) Phonetic realizations of <i>

| <shtth'î> | [ʃθ̩θʰiʔ] | ‘my head’ |
| <xdélth'îh> | [xtɛlθʰiʔ] | ‘they’re sitting’ |
| <sînt’êh> | [sint’eh] | ‘he/she is’ |
| <îhtsax> | [ʔihtsʰax] | ‘I’m crying’ |

As noted above, the distinction between double <ee> and single <e> almost always corresponds
to a quality difference in addition to a potential quantity difference. For example,

(2) Phonetic realizations of <e> and <ee>

| <seek> | [sek] | ‘saliva’ |
| <šêk> | [-šêk] | ‘torso’ |
The vowel <aa> represents a low central unrounded vowel. Its single counterpart <a> may be phonetically identical to <aa> but is also used to represent an allophone of short <e> which occurs before velar fricatives. Thus the vowels in <séh> and <sáx> are spelled differently even though they are both underlyingly the same phonemic vowel.

Tone is marked on vowels using a diacritic. Low tone syllables are not marked for tone. Only the first of a sequence of orthographic vowels is marked for tone (in contrast to Navajo). Low tone is unmarked. Extra-high tone is marked with a double acute accent.

(3) Tone markings

\[ \begin{array}{ll}
\text{v} & \text{low tone (unmarked)} \\
\text{v} & \text{high tone} \\
\text{v} & \text{falling tone} \\
\text{v} & \text{rising tone} \\
\text{v} & \text{extra-high tone} \\
\end{array} \]

Nasalization is marked using the Americanist nasal hook. Both vowels of a vowel sequence are marked with the nasal hook if the vowel is nasalized, e.g., <snaa> ‘my mother’.

Glottal stop is not written in word-initial position. Words spelled with an initial vowel actually begin with a glottal stop. To distinguish words which phonetically begin with a vowel, an appropriate sonorant is written preceding the vowel. Thus <yi> for initial /i/ and <wu> for initial /u/. A hyphen is used to distinguish ejective consonants from sequences of pulmonic stop plus glottal stop. Thus /nekʔeh/ ‘I’m looking’ is written as <nek-’eh>.

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce and disseminate the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY

__________ Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 1

Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g., electronic) and paper copy.

The sample sticker shown below will be affixed to all Level 2A documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE, AND IN ELECTRONIC MEDIA FOR ERIC COLLECTION SUBSCRIBERS ONLY, HAS BEEN GRANTED BY

__________ Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 2A

Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only.

The sample sticker shown below will be affixed to all Level 2B documents

PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE ONLY HAS BEEN GRANTED BY

__________ Sample

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 2B

Check here for Level 2B release, permitting reproduction and dissemination in microfiche only.

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but no box is checked, documents will be processed at Level 1.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce and disseminate this document as indicated above. Reproduction from the ERIC microfiche or electronic media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS.)
