## ABSTRACT

Data from a variety of sources confirmed that the opening of the 2001-2002 academic year brought a return to reduced appropriations for higher education and higher tuition increases. As the impact of the continued economic slowdown and the financial blows from the September terrorist attacks become known, policymakers continue to reduce budgets for education. The return to tight budgets and tuition hikes will collide with steady and significant enrollment increases over the next 10 years. The rate of tuition and fees at public 4-year institutions increased at a significantly higher rate than last year. And room and board charges increased at a full percentage point above the rate of increase for the previous year. Selected pieces of state legislation related to higher education tuition are reviewed, and other developments in state financial support of higher education are explored. It is apparent that two coming events will bring student finance issues into sharper focus: the 2002 elections and the reauthorization of the Higher Education Act. Two appendixes list selected student charges at member institutions of the American Association of State Colleges and Universities and the National Association of State Universities and Land Grant Colleges. (Contains 7 tables and 34 endnotes.) (SLD)

## Overview

The opening of the 2001-2002 academic year confirmed for public campuses nationwide that the unfolding economic slowdown signals a return to reduced appropriations and higher tuition increases.

As the impact of the nation’s continued economic slowdown coupled with the financial blows from September terrorist attacks becomes known, federal and state policymakers continue to pare budgets—and expectations—for the year ahead. As a result, the news on the tuition and financial aid fronts is likely to get worse before it gets better. In some states, the fiscal situation is serious enough to warrant discussion of mid-year tuition increases to close higher education funding gaps.

Unfortunately, the return to tight budgets and tuition hikes will collide with steady and significant enrollment increases over the next decade. This confluence of trends will severely test state and federal commitments to higher education opportunity for the next several years.

## Highlights

### Tuition and Fees

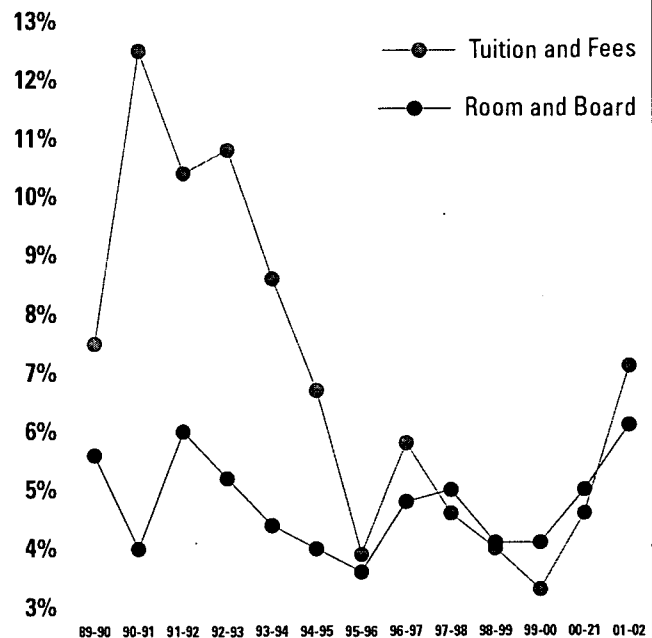

The rate of tuition and fees at public four-year institutions increased at a significantly

higher rate than last year (7.1 percent, compared with 4.6 percent for 2000-01).<sup>1</sup> This is the largest single-year increase in almost a decade. [see Figure 1]

Despite this increase, more than half of the states (30) reported undergraduate tuition and fee increases at or below the national average.<sup>2</sup>

Figure 1

Percentage Increases in Student Charges, Public Four-Year Institutions, 1989-90 to 2001-02

Source: The College Board, *Trends in College Pricing 2001*.

## Student Charges and Financial Aid 2001–2002

The majority (53.0 percent) of public four-year institutions still charge less than \$3,500 for tuition and fees.

### Room and Board

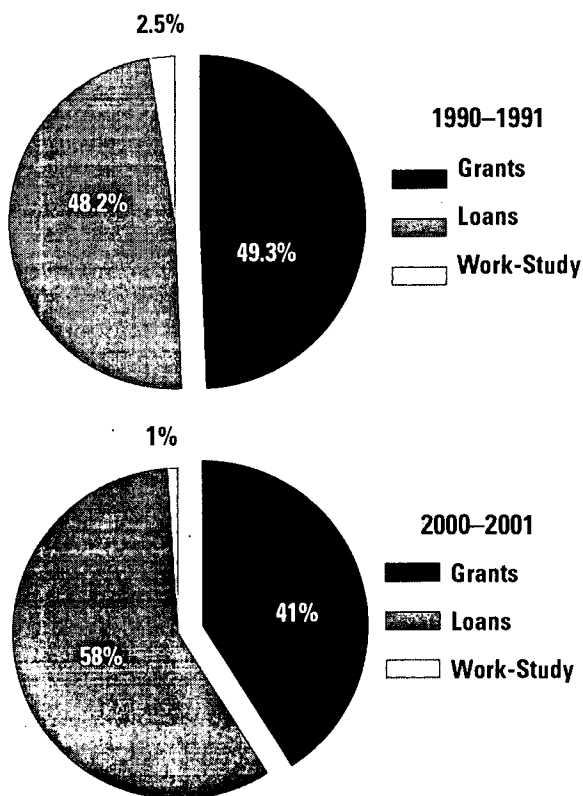

Room and board charges increased at a rate of 6.1 percent for 2001–02. This is a full percentage point above the rate of increase for the previous year (5.0 percent).<sup>3</sup>

### Trends and Indicators

Over the past few years, the cost of attending college as a percentage of family income has stabilized for those in the middle or high income brackets. The percentage of family income required remains particularly high for low-income families, for whom the cost of attending a public four-year institution represents almost 60 percent of annual income.<sup>4</sup>

Figure 2

### Grants, Loans, and Work-Study as a Share of Total Aid, 1990-91 and 2000-01

Source: The College Board, *Trends in Student Aid, 2001*.

### Financial Aid

Financial aid to postsecondary students in the United States increased approximately 7.1 percent in current dollars between 1999-00 and 2000-01, growing to \$74.0 billion. Federal and state aid expenditures increased 5.2 and 12.3 percent on the year, respectively. Institutional and other grant expenditures increased 9.0 percent between 1999-00 and 2000-01.<sup>5</sup>

Loans constituted 58 percent of all postsecondary student aid in 2000-01, while grants comprised 41 percent, and work-study accounted for 1 percent. This represents a significant shift from a decade earlier, when grants comprised 48 percent of aid and loans only 49 percent.<sup>6</sup> [see Figure 2]

### State Policy

State appropriations for higher education increased 7 percent from FY2000 to FY2001, to \$60.6 billion. Accordingly, the

five-year annual average increase in appropriations grew to 6.4 percent for the most recent period.<sup>7</sup> The economic downturn, however, is slowing appropriations and boosting tuition increases, thus underscoring the correlation between the two. [See Figure 3]

As states struggle to balance their Fiscal Year 2002 budgets and develop Fiscal Year 2003 budgets, students in many states are bracing for significant tuition hikes for the next academic year. In a handful of states, there is even the possibility of a mid-year hike during the current year.

## Findings

### Tuition and Fees

Average tuition and fees for resident undergraduate students at public four-year colleges and universities increased 7.1 percent from 2000-01 to 2001-02 (\$3,514 to \$3,763). [see Table 1] Resident undergraduate tuition at AASCU institutions rose 5.8 percent (\$3,197 to \$3,383) over this period [see Table 2], while resident undergraduate tuition at NASULGC institutions increased 7.6 percent (\$3,765 to \$4,053) over the same period. [see Table 3] All the increases significantly outpaced the national inflation rate as measured by the Consumer Price Index, which rose 2.7 percent from August 2000 to August 2001.

Figure 3

**Change in Resident Undergraduate Student Charges and State Appropriations, Public Colleges and Universities, 1990-91 to 2001-02**

Sources: *The College Board*; *Grapevine* (Illinois State University)

Note: The 5 percent change in state appropriations noted for 2001-02 is based on an AASCU estimate.

The one-year increase in tuition and fees for nonresident undergraduate students shows a similar pattern. Average tuition and fees for nonresident undergraduates rose 5.9 percent (\$9,838 to \$10,419) at all public four-year colleges and universities from 2000-01 to 2001-02. [see Table 1] At AASCU institutions, the increase totaled 4.9 percent (\$8,646 to \$9,066) over the period [see Table 2], while nonresident under-

- Notes:
- Data in this table are based on institutions that provided tuition and fee and full-time undergraduate enrollment data to the survey in the two year period.
  - Average tuition and fees are weighted by full-time undergraduate enrollment.
  - Room and board charges are weighted by an estimated number of undergraduates in on-campus housing.
  - Insufficient data were available to calculate room and board charges at the master's and doctoral level.

and fees grew 7.3 percent at public four-year institutions (\$4,486 to \$4,813), and 7.9 percent (\$3,590 to \$3,874) at AASCU institutions. [see Tables 1 and 2] At NASULGC institutions, the average rate of increase for master's students was 6.6 percent (\$4,973 to \$5,302) and 6.6 for doctoral students (\$4,984 to \$5,312) over this period. [see Table 3]

From 2000-01 to 2001-02, two states (Massachusetts, and Virginia) posted decreases in their resident undergraduate tuition and fee rates. Tuition in the District of Columbia remained unchanged from the previous year. Another five states increased tuition

graduate tuition at NASULGC institutions rose an average of 6.5 percent (\$10,788 to \$11,492) over the same period. [see Table 3]

at or below the rate of increase for the Consumer Price Index for Fiscal Year 2001 (2.7 percent). [see Table 4]

Graduate tuition and fees posted similar one-year increases. Resident tuition and fees for master's students at public four-year institutions rose 7.1 percent (\$4,365 to \$4,675) from 2000-01 to 2001-02. [see Table 1] At AASCU institutions, the increase was 7.3 percent (\$3,531 to \$3,787) over this period. [see Table 2] For doctoral students, resident tuition

Just over half (52.8 percent) of public four-year colleges and universities charged less than \$3,500 in resident undergraduate tuition and fees for 2000-2001. More than two-thirds of AASCU institutions (67.6 percent) charged less than \$3,500 in resident undergraduate tuition and fees, and almost two-thirds (64.9 percent) of full-time

## Student Charges and Financial Aid 2001–2002

undergraduates at AASCU institutions paid less than \$3,500 in resident undergraduate tuition and fees. [See Tables 5 and 6] For NASULGC institutions, just over half (52.8 percent) charge less than \$3,500 in tuition and fees, and just over half (50.3 percent) of all full-time resident undergraduates at those institutions paid less than \$3,500 in resident undergraduate tuition and fees. [see Table 7]

institutions. The 6.1 percent increase in room and board charges also represents an increase over the 5.0 percent increase of the previous year. [see Figure 1]

From 1990-91 to 2001-02, tuition and fees at public four-year colleges and universities increased 48.4 percent (from \$2,529 to \$3,754) in constant (infla-

### Room and Board

Room and board charges increased at a similar rate during this period. At public four-year institutions, average room and board rose from \$4,956 in 2000-01 to \$5,259 in 2001-02, a 6.1 percent increase. [see Table 1] AASCU institutions posted a one-year increase of 6.6 percent (\$4,538 to \$4,837), while NASULGC institutions posted an increase of 5.9 percent for the same period (\$5,241 to \$5,550). [see Tables 2 and 3]

### Trends and Indicators

The annual tuition and fee increase of 7.1 percent in 2001-02 represents a significant increase over the previous year, for which the rate of increase was 4.6 percent at public four-year

• Insufficient data were available to calculate room and board charges at the master's and doctoral level.

private institutions rose 19.3 percent in constant dollars during the same period, from \$4,782 to \$5,704.<sup>9</sup>

The price of college attendance at four-year public institutions, as a percentage of family income, remains stable. This percentage has held relatively steady for middle and high-income families since the early 1980s. However, student charges as a percentage of family income escalated significantly for low-income families throughout the 1980s and 1990s.<sup>10</sup>

## Analysis and Policy Implications

tion-adjusted) dollars. Tuition and fees at private four-year institutions rose 38.3 percent (from \$12,380 to \$17,123) in constant dollars during the same period.<sup>8</sup>

Room and board charges at public four-year institutions rose 21.8 percent in constant dollars between 1990-91 and 2001-02, increasing from \$4,070 to \$4,956. Room and board charges at

### State Policy Developments

With the economy down and state budgets in limbo, tuition limitation and reduction has quickly slipped from the radar screens of many governors and lawmakers. In fact, a number of policymakers may even be looking to tuition as an "escape valve" from mounting fiscal pressures, as an analyst from the National Conference of State

Legislatures recently stated that, “There is often widespread bipartisan support for K to 12 . . . [M]ost policymakers look at tuition as an additional way to fund higher education.”<sup>11</sup> Accordingly, tuition-setting authority is likely to be an issue that surfaces in a number of statehouses this year.

Moreover, as campuses grapple with rising costs in areas such as health care, technology infrastructure, and energy supply, student fees may once again become an issue of contention. Finally, tighter budgets are likely to focus even more attention on tuition rates for nonresident students, as policymakers continue to push for rates for these students that cover the full cost of their instruction.

### Selected 2001 Tuition Legislation

#### Tuition—Setting Authority

**Connecticut**—Lawmakers considered, but did not pass, a measure that would have required approval of the Board of Governors of Higher Education for tuition increases in excess of the Consumer Price Index for a given year.

**Louisiana**—The Legislature passed a bill allowing institutional boards to increase tuition up to three percent per year, subject to the approval of the Joint Legislative Committee on the Budget.

**North Carolina**—Legislators considered but did not approve a measure that would have transferred tuition-setting authority from the University of North Carolina Board of Governors to the General Assembly.

**Oklahoma**—Governor Frank Keating signed into law a measure that will allow the Oklahoma State Regents for Higher Education to increase resident tuition up to 7 percent and nonresident tuition up to 9 percent for each of the next 5 years.

**Washington**—Legislators considered, but did not approve, a measure that completely removed tuition setting authority from the state’s colleges and universities.

#### Residency Requirements/Nonresident Tuition

**Alabama**—The Legislature debated, but did not approve, measures that would have changed the calculation of the nonresident undergraduate tuition rate.

**Minnesota**—Lawmakers proposed, but did not pass, phasing out the state’s tuition reciprocity program and extending resident undergraduate rates to students from selected states and provinces.

**Mississippi**—Legislators considered but failed to approve a measure that would have increased nonresident tuition rates for students who do not maintain continuous enrollment at a state institution.

## Student Charges and Financial Aid 2001–2002

**North Carolina**—The General Assembly considered but did not approve a bill that would have set the nonresident tuition rate at the full cost of instruction for those students.

### Disclosure

**New York**—Legislators proposed, but did not pass, a measure that would require the release of course grades to parents of dependent students that contribute at least one-half of the tuition and other expenses imposed by an institution.

**Utah**—The Legislature approved a bill that requires institutions to hold public hearings prior to approving tuition increases.

### States To Watch

**Florida**—In a meeting with presidents of the state's public colleges in mid-December, Governor Jeb Bush stated that he supports granting more tuition-setting powers to institutional boards of trustees. Those powers currently reside with the Legislature.<sup>12</sup>

**Iowa**—The state's Board of Regents voted in November to increase tuition 18.5 percent for 2002-2003—the largest hike in two decades. The decision came after university presidents told the board that smaller increases approved in September simply would not be enough to fully fund enrollment.<sup>13</sup>

**Kansas**—University and state officials are considering plans that could boost tuition at the University of Kansas by 16 to 24 percent for next fall, with hikes for freshmen as high as 60 percent.<sup>14</sup>

**Louisiana**—After obtaining authorization to charge students an energy fee for the 2001-2002 academic year, the state's Board of Regents is urging institutions to reduce those fees due to lower than expected energy costs.<sup>15</sup>

**Massachusetts**—Facing an austere state budget,

University of Massachusetts trustees voted in early December to raise tuition for the first time in five years.<sup>16</sup>

**Michigan**—Following a round of double-digit tuition increases for 2001-2002 and proposals for another round for 2002-2003, Lt. Governor Dick Posthumus has called for restrictions on further tuition and fee increases. Posthumus has announced his candidacy for governor in 2002.<sup>17</sup> Citing what he feels are some of the highest tuition rates in the country, former Governor (and candidate for governor in 2002), James Blanchard, has proposed that state lawmakers roll back tuition immediately. Both candidates agree that universities should be penalized for increases greater than the rate of inflation. They differ on how to enforce such limits.<sup>18</sup>

**Minnesota**—On the heels of a double-digit tuition increase at the University of Minnesota and Minnesota State Colleges and Universities, Governor Ventura has told state agencies to prepare budget plans for both a 5 and a 10 percent budget reduction in order to address

the states expected \$1.95 billion budget shortfall. Both systems are preparing budget-reduction plans that include program cuts and further tuition increases to address funding losses. The Minnesota Higher Education Services Office has also prepared a reduction plan that estimates more than 9,000 students would lose state grant funding, or have it significantly reduced if the office is forced to make a 10 percent cut. Under a 5 percent reduction plan, 3,400 students would lose their grants or have them reduced.<sup>19</sup>

**Mississippi**—Double-digit tuition increases at the state's public universities has contributed to a

## Student Charges and Financial Aid 2001–2002

one-year increase of 66 percent participation in the Mississippi Prepaid Affordable College Tuition program.<sup>20</sup>

**New York**—Amid stories of double-digit tuition hikes, the governor and key lawmakers are intent on maintaining a tuition freeze established in 1995. The severity of the economic slowdown, however, may force a tuition increase for 2002-2003. Meanwhile, the City University of New York (CUNY) announced in November that it will raise tuition for illegal immigrants, who had previously been paying resident tuition rates, following a review of institutional policies and procedures.<sup>21</sup>

**Ohio**—Students returning from winter break came back to higher tuition. An anticipated budget deficit of \$1.5 billion resulted in \$610 million in statewide cuts ordered by Governor Taft. Under the cuts, higher education funding was reduced by 6 percent. In addition to other austerity measures, 5 of the states 13 public four-year institutions instituted midyear tuition increases averaging 7.1 percent.<sup>22</sup>

**Virginia**—Higher education leaders are calling for an end to the state's five-year freeze on resident tuition in light of a state budget shortfall approaching \$1 billion.<sup>23</sup> In addition to the 6 percent cuts Governor Gilmore's 2002-2004 biennium, the Governor has also

suggested an additional round of nearly equivalent cuts that institutions could make up by increasing tuition up to \$200 a year per student.<sup>24</sup>

**Washington**—A state superior court judge ruled in November that the University of Washington exceeded its legal authority in assessing an energy fee on students. University students had brought suit to protest the fee, set at \$3 per credit hour for main campus courses and \$1 per credit hour for branch campus courses.<sup>25</sup> Meanwhile, to close a \$1.2 billion

hole in the budget, Governor Locke has proposed trimming \$54 million from higher education funding, in addition to other cuts. This would be achieved by cutting four-year institutional budgets by 5 percent and the two-year college system budget by 3 percent. To make up for the lost revenue, the Governor has proposed allowing colleges unlimited authority to raise tuition in the coming year. This means an institution could raise tuition as much as 18 percent instead of the previously authorized 6.1 percent.<sup>26</sup>

### Financial Aid Developments

Financial aid developments this year largely represent a continuation of trends of the past decade. At the state level, the shift toward merit/non-need-based aid continues. Following hefty increases in federal loan volume in the mid-to-late 1990s, the shift in the overall proportion of postsecondary aid provided to students via grants versus loans appears to be steady.

### General Developments

The percentage of postsecondary aid constituted by grants and loans has held relatively stable over the past four years, at approximately 40 and 60 percent, respectively. One decade ago, in 1989-90, the ratio of these aid categories was almost equal; grants and loans constituted 48 and 49 percent, respectively, of total postsecondary aid to students.<sup>27</sup>

### Federal Developments

Postsecondary aid to students from federal sources increased 74 percent between 1989-90 and

1999-00. Despite its significant growth over the entire decade, federal aid increased only 1.7 percent between 1998-99 and 1999-2000, marking the second consecutive year for an increase of less than 2 percent. The average annual increase in federal postsecondary student aid between 1989-90 and 1990-00 was 6.4 percent.<sup>28</sup>

The bulk of the preceding decade's increase in federal student aid has been channeled into loan programs. Between 1989-90 and 1999-00, expenditures for federal loan programs increased 104 percent. Expenditures for federal grants grew only 17.6 percent during the same period. In 1989-90, grants constituted approximately 32 percent of federal postsecondary aid to students. By 1999-00, grants constituted about 22 percent of federal student aid. During the same period, the proportion of federal student aid represented by loans increased from 65 to 76 percent.<sup>29</sup>

The federal budget approved for Fiscal Year 2001 (FY01) brought substantial gains in grant/need-based aid programs, including the Pell Grant, Leveraging Education Assistance Partnerships (LEAP, which provides seed money for state need-based grant efforts), and GEAR-UP programs. Funding for the Pell Grant program increased 14.6 percent from FY2000, and the maximum Pell award increased 13.6 percent from \$3,300 to \$3,750. LEAP program funding increased 37.5 percent from FY2000, from \$40 to \$55 million.

FY01 federal increases had a significant, positive impact on making a postsecondary education

## Student Charges and Financial Aid 2001–2002

more affordable for the nation's neediest students. However, significant additional funding will be required to restore the purchasing power of these cornerstone student aid programs. The purchasing power of the Pell grant remains significantly below what it was a decade ago. In 1989-90, the maximum Pell grant covered approximately 49 percent of tuition and fees at a public four-year institution. By 1990-00, the Pell covered about 39 percent of those charges. Despite two consecutive

years of increased appropriations, constant dollar funding for the LEAP (formerly SSIG) program in FY01 is almost 30 percent lower than the program funding in FY91.<sup>30</sup>

### State Developments

In 1999-2000, states awarded \$4.1 billion dollars in need-based and non-need-based grants and scholarships, a 12.6 percent increase over the \$3.7 billion awarded in 1998-99. Over the one-year period, funding for need-based grants and scholarships rose 8.6 percent, while funding for non-need-based grants and scholarships jumped 28.9 percent.<sup>31</sup>

In 1989-90, need-based grants and scholarships comprised 89 percent of state student aid to undergraduates, with non-need-based aid representing 11 percent of awards. Just a decade later, the share of total state student aid to undergraduates comprised by need-based awards fell to 79 percent, while the share represented by non-need-based aid rose to 21 percent.<sup>32</sup> [see Figure 4]

### Institutional Developments

Institutional aid to postsecondary students increased at an annual rate greater than federal grant aid, and at a rate only slightly lower than state aid. Between 1999-2000 and 2000-01, institutional and other grant aid to postsecondary students increased approximately 9.0 percent in current

Figure 4

#### Need-Based and Non-Need-Based State Grant Aid as a Share of Student Aid 1989-90 to 1999-2000

Source: National Association of State Student Grant and Aid Programs (NASSGAP).

dollars, while federal and state grant aid increased 5.2 and 12.3 percent, respectively.<sup>33</sup>

Similarly, institutional and other grant aid to students has grown at a greater rate than federal and state grant aid over the past decade, increasing 92.4 percent between 1990-91 and 2000-01. Federal aid increased 82.7 percent during the same period, while state grant aid grew 90.4 percent.<sup>34</sup>

### Conclusion

Looking ahead, economic uncertainty will dominate the policy landscape, at least for the immediate term. During the legislative sessions that open for most states in January, lawmakers face two daunting tasks—remediating the growing gaps in the current year’s budget, and approving realistic budgets for the year ahead. These issues will render policymakers’ attention harder to get.

Two events on the horizon, though, will bring student finance issues into sharper focus:

The 2002 elections, where pressures to hold the line on tuition and fully fund student aid programs may figure in campaign rhetoric.

The reauthorization of the Higher Education Act (HEA), the federal law that governs student financial aid. The upcoming review of HEA will likely focus on issues such as loan limits and grant eligibility conditions (e.g. retention, completion)

However these events play out, they will take shape against the backdrop of a growing and diversifying student population, which will bring a host of unforeseen challenges and opportunities to the nation’s public colleges and universities.
