This guide was developed in response to a mandate for music teachers in Transcona-Springfield School Division No. 12 (Manitoba, Canada) to generate a set of music learning outcomes to guide and standardize assessment and evaluation practices across the division. The currently legislated K-6 music curriculum (Manitoba Department of Education, 1978) was re-fashioned to reflect new outcomes, curriculum models, and content areas deemed developmentally appropriate by the profession, as well as music curriculum and instruction practices in the divisional context. The new curriculum framework describes general and specific music learning outcomes for grades 1-5 and is written with the general music program in mind. The learning outcomes identify what the learner should know or be able to accomplish in music at the end of each grade level. The goal is for all learners across the division to strive for and attain the same high, consistent standards of achievement. These outcomes integrate the concepts, processes, skills, behaviors, and conventions unique to the discipline of music. To help the students reach these outcomes, Transcona-Springfield teachers provide their elementary children with opportunities to explore music through singing, moving, listening, playing instruments, creating, reading, writing, and technology. INTRODUCTION

*General and Specific Outcomes for Grades 1 to 5 Music* was developed in response to a specific mandate for music teachers in Transcona-Springfield School Division No. 12 to generate a set of music learning outcomes for the purposes of guiding and standardizing assessment and evaluation practices across the division. Essentially, the currently legislated K to 6 Music Curriculum (Manitoba Department of Education, 1978) was re-fashioned to reflect new outcomes, curriculum models, and content areas deemed developmentally appropriate by the profession (i.e. Music Educators National Conference, 1996; Waterloo Country Board of Education, 1995), as well as music curriculum and instruction practices in the divisional context. To some extent, the document is based on the professional work of the author with music teachers in Fort Garry School Division No. 5 and River East School Division No. 9.

With the support of a facilitator and writer from the University of Manitoba, the document was initially developed by a sub-committee of Judy Ruchkall (Music Coordinator), Elaine Enns (Music Specialist, Anola School), Kristen Osiowy (Music Specialist, Harold Hatcher School), and Karen Zilinek (Music Specialist, Joseph Teres School) during two half day in-services held on November 3 and 24, 2000. The document was then presented to all elementary music teachers for further review, revision, and approval during a full day in-service on January 31, 2001. *Music Developmental Profiles: Grades One to Five* was also prepared as a companion document with an aim to assist and support music teachers with their assessment and record keeping responsibilities.

The new curriculum framework describes general and specific music learning outcomes for grades one to five and was written with the general music program in mind. The learning outcomes identify what the learner should know or be able to do in music at the end of each grade level. The goal is for all learners across the division to strive for and attain the same high, consistent standards of achievement. These outcomes integrate the concepts, processes, skills, behaviors, and conventions unique to the discipline of music. In attempting to reach these outcomes in unique and diverse ways, Transcona-Springfield teachers believe elementary children should have many opportunities to explore music through singing, moving, listening, playing instruments, creating, reading, writing, and technology.
