This thematic curriculum unit on the adolescent novel, "The Outsiders" (S.E. Hinton) discusses issues that are relevant to students' lives and important to their future decisions. In the unit, students will discuss issues relevant to the novel and will use the novel as a bridge to analyze their own lives. The unit, with an overall theme of "discrimination," states that the main issues of concern will include: (1) Stereotypes (identification of stereotypes; discussion of stereotypes); (2) Identity (self-discovery; who you are--character traits, personal tastes, etc.); (3) Choices (consequences/rewards of choices; every choice has an effect); (4) Group Membership (characteristics of groups/cliques/gangs; why groups are formed; discussion of why groups are good); and (5) Environment (identification of different home environments; how home environments lead to different perceptions on life). For each lesson topic, the unit gives student objectives; lists materials needed; outlines a motivation activity; provides detailed classroom procedures; suggests closure activities; addresses evaluation methods; and presents self-evaluation questions. The unit discusses integration with other discipline content (social studies, science, and math) and modifications depending on student disability. (Contains 12 references.) (NKA)

Your guidelines should be designed with the purpose of bringing the two groups together and moving them toward accepting each others' differences. Create a poster to display your guidelines.

The group will present the chart and guidelines to the class. Responsibility for the presentation must be divided equally among the group members. Provide thorough explanations throughout the presentation.

Integration with other Content

Integration with other content will be possible within the language arts classroom or with the assistance of other teacher disciplines. The integration of content into other classrooms will be determinate on the cooperation and attitudes of other teachers. Some classroom activities may be more adaptable to other classrooms depending on the subject matter. The best integration will result from teacher to teacher communication and cooperation.

Social Studies:
+ Students can research the statistics of gang violence during the time period *The Outsiders* takes place.
+ Teachers can draw a map of the major areas in the novel and label major places such as movie theatres, hangouts, etc.
+ Teachers can assign a paper/project that jointly addresses issues in both the Social Studies and Language Arts classroom.

Science:
+ Students can study the effects of cold and warm weather to human health.
+ Students can research fire. Research how flame color indicates fire warmth, etc...
+ Teachers can assign a paper/project that jointly addresses issues in both the Science and Language Arts classroom.

Math:
+ Students can do a survey on gang membership and calculate percentages, statistics, and other math elements.
+ Students can look at crime records in the past and currently. The students can then calculate the differences and state them in percentages.
+ Teachers can assign a paper/project that jointly addresses issues in both the Math and Language Arts classroom.
Modifications for Inclusion

Modifications will be made depending on the student disability. There is a large span of adaptations that can be made and variances fluctuate student to student. The teacher can help students with disabilities by staying updated on latest technology advancements, communicating with special education teachers, and staying informed on current articles dealing with special education matters.

Quizzes, tests, and other work assigned may be adapted to help the student to succeed. The student will also be able to take tests, quizzes, etc with the aid of the special education teacher if necessary. Extra time on deadlines, evaluation, tests, and quizzes will also be allotted if necessary. Other issues will be addressed when they occur. Overall, all endeavors will be pursued to make the student’s education fair and meaningful.

Depending on the student’s disability other ends may need to be sought. Several different forms of resources may need to be used. Resources such as... audio tapes, lecture notes, class notes, special learning devices, different textbook materials, student/teacher tutoring, fellow student partnerships, front/back seating arrangement, awareness of health factors, medications/insulin’s, and any other resource that will help the student to adapt to the classroom.

The amount of modification will vary student to student. The needs a student requires should be established as soon as possible to ensure the student is able to excel and feel comfortable within the classroom. Overall, inclusion helps students to realize the importance of diversity and show empathy rather than deride their fellow students.
