The New Mexico State Department of Education received a federal grant to provide educational and assistive technology for American Indian children living in the Pueblos of Laguna and Acoma, New Mexico. During the 2-year project, more than 229 assistive technology items were purchased, and some form of assistive technology was provided to 121 children aged 3-22. The goal of establishing a working educational and assistive technology loan program for children aged birth to 2 was not implemented because two other nonprofit organizations were already providing this service. Two objectives of establishing a working educational and assistive technology loan program for youth aged 3-21 and 18-21, were implemented 90 and 80 percent, respectively. The objective of identifying alternative funding sources was 75 percent implemented. Two objectives were implemented 100 percent: developing culturally appropriate awareness information and resources about the project, and developing support documents about project activities and outcomes for a diverse audience and making them available through Web sites, presentations, and publications. Program weaknesses included a lack of inclusion of the pueblos in planning and writing the project, poor communication with Laguna concerning supervision and reporting, insufficient decision-making authority by the Native American consortium, the lack of a needs assessment of assistive technology, and understaffing. Appendices present program materials and a case study. (TD)

Abstract

The New Mexico State Department of Education, Division of Vocational Rehabilitation received a federal demonstration grant in the amount of $346,362 to provide educational and assistive technology services for Indian children who were living in the Pueblos of Laguna and Acoma, New Mexico. The project began October 1, 1999 and ended June 30, 2002.

Project staffing included one half time director from the New Mexico Technology Assistance Program, one half time Laguna Technology Coordinator and one half time by a Laguna occupational therapist. The Laguna staff was hired through a Joint Powers Agreement with the Laguna Education Department. Thus the Laguna staff members were employees of the Laguna Education Department. After Laguna withdrew from the project after the first year, the only staff member remaining was the one half time Project Director who then hired consultants to assist her and provide services to Acoma Pueblo.

During the two-year period some form of assistive technology was provided to 121 children who lived in Laguna and Acoma Pueblos and attended Head Start, Elementary School, Middle School, or High School. The age range of the students who received these services was 3 through 22.

More than 229 assistive technology items were purchased through grant to assist children, parents and teachers with equipment, computers and software. These items were catalogued in a database using File Maker Pro. They were made available to educational entities of both Pueblos through a data base file.

During the two years of the project, five of the six objectives were implemented to some degree and in some cases 100%. Goal 1, Objective 1 was not implemented because two other non-profit organizations were providing services for the birth to age 2 children on the pueblos. Goal 1, Objective 2 was implemented at least 90%. Children at both Laguna and Acoma were evaluated for assistive technology services and some students were provided these services. A loan bank was established through the Native American Consortium. Items were purchased for the loan bank and some trial loans were conducted. Reasons for not awarding this objective 100% completion was that the loan bank was not in operation at the time of this evaluation. Many of the components for Goal 1, Objective 3 were implemented with a several older students but no loan bank was currently operating. Thus this objective was only 80% implemented.
Goal 1, Objective 4 required that alternative funding sources were identified. Some were identified, thus 75% of this objective was implemented.

The two objectives for Goal II were implemented 100%. Through the guidance of the Native American Consortium, all published materials reflected the communities and culture of Laguna and Acoma pueblos. Specific communication devices were adjusted for student usage to reflect the local environment. (Objective 1) Support documents were developed and made available to a diverse audience that accurately described the project. (Objective 2)

In conclusion, this project was implemented with Laguna and Acoma Pueblos. The implementation of this project provided a new awareness of the needs for assistive technology in Native American communities and provided opportunities to obtain items and service to help the disabled children, ages 3 to 21, who live in Laguna and/or Acoma Pueblos.
Introduction

The United States Department of Education awarded the New Mexico State Department of Education a grant award of $346,362 to provide educational and assistive technology for Indian children who were living in the Pueblos of Laguna and Acoma, New Mexico. The grant was funded for two years beginning October 1, 1999 and ending June 30, 2002. A contract extension of six months was added so that more assistance could be provided to the pueblos. The award number was S299A990001-00. The grant was written as a special projects demonstration grant, 84.299A. The purpose of the project was to provide on-site assistive technology services at the Laguna and Acoma Pueblos, New Mexico, for Indian children with disabilities, ages birth through 21. The services provided would utilize educational and assistive technology devices and provide intensive technical assistance. The objectives of the project were the following:

Goal 1, Objective 1: Establish a working educational and assistive technology loan program compatible with Early Childhood Development Plans for children ages birth to 2 in the Acoma and Laguna Pueblos.

Goal 1, Objective 2. Establish a working educational and assistive technology loan program for youth (ages 3 to 21) in the Acoma and Laguna Pueblos

Goal 1, Objective 3. Establish a working educational and assistive technology loan program for youth (ages 18 to 21) in the Acoma and Laguna Pueblos.

Goal 1, Objective 4. Identify funding sources for purchase of devices and services for children ages 0-21 in the Acoma and Laguna Pueblos.

Goal 2, Objective 1. Develop culturally appropriate awareness information and resources about the Consortium Project and about the effective educational/assistive technology applications in school and community settings.

Goal 2, Objective 2. Develop and make available support documents about the project through Consortium and Acoma and Laguna Internet websites, presentations and publications of articles on project activities and outcomes.

The purpose of this report was to evaluate the implementation of the above objectives and thus the purpose of this project. What was accomplished and by whom? What were the strengths of the project? What were the weaknesses? What was learned? Data to evaluate the
above objectives was collected from the various written project documents provided by the project director, the Laguna occupational therapist and the Acoma Sky City Director of Special Education and from a series of on site and telephone interviews with the project director and personnel from Laguna and Acoma who were involved with the project.

**Staffing**

One person, half time, staffed the project. Kathy McWhorter was appointed Director of the Laguna and Acoma Pueblos Technology Opportunities project, (LAPTOP). Her other half time responsibility was the Director of the Assistive Bank of Loanable Equipment, (ABLE) Replication Program for the Navajo Nation. She reported to Andy Winnegar, Deputy Director of Special Services Unit of the Division of Vocational Rehabilitation. Alan Klaus, Director of the New Mexico ABLE program, also assisted her.

McWhorter, as Director, was to coordinate all the administrative aspects of the grant, supervise project staff, and provide guidance to individuals hired or contracted to accomplish the objectives of the project. Members of the project staff were hired through a Joint Powers Agreement with the Laguna Department of Education. (Appendix A)

The Joint Powers Agreement included a staffing position for the Laguna Education Technology Coordinator, contractual positions for therapists and specialists, and for one Laguna/Acoma Liaison person as a peer mentor. Other items included were fringe benefits, travel, rental of space, supplies, equipment, and indirect cost. The subcontract with Laguna Department of Education was for $177,421 and officially was signed on April 27, 2000 by Laguna Superintendent of Education, Gilbert Sanchez and Terry P. Brigance, the New Mexico State Division of Vocational Rehabilitation Director. Documentation of progress by Laguna to the state was verified by quarterly financial and progress reports from James Ashmore, controller for the Laguna Board of Education. (Appendix A)

Superintendent Sanchez appointed Michael Chambers, Laguna Middle School Special Projects Coordinator as the half time Laguna Education Technology Coordinator. Half of his salary was paid through the Joint Powers Agreement. McWhorter hired Tatiana D. Abras as the occupational therapist for the project. As the project proceeded, Abras changed positions and was hired by Mike Chambers and worked half time for the project and half time for Laguna...
Evaluation Report Of LAPTOP

Middle School. Project records revealed that one parent applied and was to be hired as the peer mentor. She declined the position and thus it was not known if any person was hired as a mentor.

Chambers' job duties included the coordination, scheduling, and supervision of project activities, contracting with consultants, providing administrative support, purchasing assistive devices and equipment, implementing innovated programming for pre-school children, establishing a working assistive loan bank and program, assisting with the development, testing, and demonstration of effective technology and training services and coordinating the Native American Consortium. (Appendix A)

Abras' job duties included the evaluation of children recommended to the project by the Native American Consortium, teachers and parents, establishing IEP meetings for children, recommending assistive technology, training teachers and parent in the use of specific assistive technology, conducting follow up evaluations and setting up the assistive technology loan bank at Laguna Middle School. (Appendix B)

After the first year of the project's implementation, Laguna Department of Education rescinded their participation in the Joint Powers Agreement. Laguna withdrew from the project. At this time Acoma, Sky City Community School, a Bureau of Indian Affairs (BIA) school was asked to accept the Joint Powers Agreement contract and administrate the project. Because of the red tape of the BIA, accepting the contract responsibilities was not feasible. Sky City Community School could accept services but was not equipped to handle the fiscal responsibility of the Joint Powers Agreement. Thus in the second year of this project, McWhorter provided direct services to Acoma Head Start and Sky City Community School with the assistance of the consultants she hired for specific services. All invoices for supplies and equipment were submitted to McWhorter who submitted the request to the State of New Mexico. (Appendix B)

Demographics of the Children Who Received Services from the Project

Children with disabilities, from birth through 21, were eligible to receive services from this project. Reviewing the project records and gathering data from the interviews indicated that the following children received services from this project.

In summary, 105 Laguna and Acoma children were referred for testing to determine their assistive technology needs. Of the 105, 18 were evaluated and 121 students received some type of follow up services during the two years of the grant period.

Little data was available to determine how many children currently were using assistive technology in Laguna. The special education director at Acoma Sky City School, Barbara Alvarez, indicated that currently she had two students who were using assistive technology.

Another document obtained from the project director indicated that during the first year of the project, 30 students were receiving services. Of the 30 students, 19 were from Laguna Elementary School, 8 were from Laguna/Acoma High School and 3 were from Acoma Sky City School. Of the 30 students, 18 were boys and 12 were girls. Their ages ranged from six (6) to twenty-two (22) years old. The majority of the students, eight, were 10 years old followed by five students who were 9 years old. The youngest were 6 years old (three) and the oldest was 22 years old (one).

The occupational therapist, Tatiana Abras, was asked by the evaluator to write a case study of one of her Laguna students to demonstrate the plan or process used in this project to provide assistive technology to students. She selected a 10-year-old female with a diagnosis of mental retardation. She described her interview process with the child, her parents and teachers and how she worked with the child’s special education team. Her assessment provided her with information about the type of assistive technology needed for the child. She then described her interaction with the child, her parents and the teacher to train them in the use of the technology.
Finally, she described her follow up sessions with the child and the improvement in the child's performance because of the assistive technology. (Appendix C) It was safe to assume that the process described in the case study was used for all children who received assistive technology services from this project. (Appendix D)

Evaluation of the Objectives

Goal I of this project indicated that a plan for using assistive technology would be implemented with children from Laguna and Acoma, ages birth through 21. Four objectives were written to accomplish this goal. The next part of this report will evaluate each of the four objectives for measurability, results, and with a discussion of the results. The discussion will include what was learned and accomplished or what was not accomplished.

Goal 1, Objective 1: Establish a working educational and assistive technology loan program compatible with Early Childhood Development Plans for children ages birth to 2 in the Acoma and Laguna Pueblos.

Measurability: This objective was measured by reviewing the records of the project as provided by the project director, the occupational therapist, and Acoma Sky City Special Education Director. Interviews with all three also provided information to measure this objective.

Results: As written, this objective was not implemented in either pueblo because two other non-profit groups provided assistive technology services for children ages birth to 2.

Discussion:

On-site interviews at Laguna and Acoma with various personnel involved in the project indicated that this objective was not accomplished during this project because two other non-profit organizations were funded to provide Laguna and Acoma birth to age 2 children with assistive technology services. According to Barbara Alvarez, the two groups were the Native American Parents Project Replication (NAPPR) and the Pueblo Indian Parent Education Program (PIPE).

She described NAPPR as a project that provided service in Laguna and Acoma for families. The services were funded by the State of New Mexico. The project was nine years old.
and directed by Jane Larson. PIPE was another home based program founded by the State of New Mexico as part of the Southwest Communication Resources, Bernalillo, NM. Norman Segel was the director.

Project personnel interviewed at Laguna and Acoma included Mike Chambers, Tatiana Abras, Gilbert Sanchez, Barbara Alvarez, Harold Chino, Cyrus Chino and Kathy McWhorter. The majority of those interviewed indicated that the needs of the Head Start, Elementary, Middle School and High School children were so great that the resources provided through this grant were better used for that age group. They felt that the two early childhood programs were better equipped with personnel and resources to deal with the assistive technology needs of children from birth to 2 years old.

Goal 1, Objective 2. Establish a working educational and assistive technology loan program for youth (ages 3 to 21) in the Acoma and Laguna Pueblos.

Measurability: Data to measure this objective was obtained by reviewing written project records provided by the project director and the personnel from Laguna and Acoma. On site and telephone interviews with personnel involved with this project from both Laguna and Acoma were also conducted.

Results: Based upon the literature review of materials from this project and interviews with personnel involved with this project, at least 90% of this objective was implemented during the two years of this project.

Discussion:

Much progress was made in developing a working educational and assistive technology loan program for Laguna and Acoma children, ages 3 to 21. During the first year of the project, New Mexico State Division of Vocational Rehabilitation and the Laguna Department of Education signed a Joint Powers Agreement. The State of New Mexico subcontracted the development and the implementation of this objective to personnel within the Laguna and
Acoma Pueblo. Mike Chambers, Special Education Director for Laguna Middle School was appointed half time as the Laguna Technology Coordinator. Wishing to establish an educational and assistive technology loan program, Chambers organized a Native American Consortium of all educational and tribal agencies in Laguna and Acoma who provided assistive services to disabled children. He sponsored monthly meetings to organize the group, drafted and had each member sign cooperative agreements agreeing to participate in the project and had the group establish their own policies and procedures. Members of the group were Laguna Head Start, Laguna Elementary, Laguna Middle School, Laguna/Acoma High School, Grants Public Schools, Acoma Head Start, Acoma Sky City Community School and the Laguna/Acoma Rehabilitation Center. Each sent representatives to the monthly meetings. (Appendix E)

Reviewing the data from written project files indicated that during the first year, nine meetings were held with the consortium members. Some meetings were for organizational purposes and others were to demonstrate various items of assistive technology. Meetings were held on the following dates:

<table>
<thead>
<tr>
<th>Date</th>
<th></th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>5/25/00</td>
<td>6/12/00</td>
<td>8/31/00</td>
</tr>
<tr>
<td>9/6/00</td>
<td>9/14/00</td>
<td>10/19/00</td>
</tr>
<tr>
<td>2/9/01</td>
<td>5/4/01</td>
<td>9/28/01</td>
</tr>
</tbody>
</table>

During his interview with the evaluator, Chambers felt that the major outcome of his participation during the first year of the project was the bringing together and the organizing of tribal, public and BIA agencies to establish together an educational and assistive technology loan program for children with disabilities in Laguna and Acoma communities. He felt that the project would have completed this objective 100% if Laguna had continued to manage the project.

Laguna Education Department decided to not sign a joint powers agreement for the second year of the project. Thus the actual loan program of assistive technology was designed but never finalized and implemented. (Appendix E)

During the first year of the project, Laguna did establish and implement an educational and technology loan program through the services provided by the occupational therapist, Tatiana Abras. According to her interview and her project records, 125 children were referred to the project for assistance, 18 were evaluated using the Wisconsin Assistive Technology Checklist, classroom observations, and interviews. (Appendix F). She assisted and trained the
teachers of these 18 students in the selection and use of the assistive technology for each child. She conducted 121 follow up sessions with parents, teachers and children. Appendix G)

One of the major accomplishments of this objective was the development of a database of the items purchased through this grant and stored at Laguna Middle School. Abras and McWhorter purchased and cataloged approximately 229 assistive technology items with grant money to be used as loaner items to disable children in Laguna and Acoma. They also established an equipment database of all the items using Filemaker Pro software. All 229 items were cataloged according to category, media, model/version, and serial number, funding sources, date purchased, date entered, cost and current assignment. (Appendix H) This accomplishment has provided an excellent resource for personnel in Acoma and Laguna educational agencies.

During the second year of the project, the project direction shifted to the Acoma agencies and schools. Project director, McWhorter, worked directly with Acoma Head Start and Acoma Sky City Community School. She hired consultants and provided training for Acoma personnel. She continued the consortium meetings at Acoma during the second year of the project. She provided the following dates to the evaluator for consortium meetings.

<table>

</tbody>
</table>

After Tatiana Abras resigned from the project and accepted a contract from Laguna Middle School, consultants were hired to provide student evaluations and design assistive technology solutions for children. According to written records the following people provided assistance:

Linda Coleman, a specialist in assistive technology,
Cherie Masitti, physical therapist,
Susan Mason, occupation therapist.
Scott Cooper, mentor and trainer,

Interviews with Barbara Alvarez and Harold Chino revealed that they did receive services for their students during the second year of the project. She indicated that approximately $98,000 of the grant money was spent to purchase assistive technology items for use by Acoma children.

Two Acoma students in grades 3 and 4 received extensive assistive technology and two more were on the waiting list. Alvarez and Chino seemed pleased with the services provided to these children. Both indicated that equipment was purchased for use at Acoma because the equipment stored at Laguna Middle School was not available. Alvarez indicated that she had borrowed a few items and had returned them to Laguna Middle School. She said that it was much easier for separate items to be purchased for the use of Acoma children. According to her the loaning of equipment was not feasible.

According to these interviews, items such as computer systems and software were purchased, had arrived at the school but were still boxed. None was set up during the evaluator’s visit to demonstrate assistive technology in action.

During the second year of the project, Acoma Head Start staff and children were also involved with the project. Seventy-five (75) children in five classrooms, their teachers and their classroom assistants were provided information, training, and guidance in using assistive technology. The staff participated in several training sessions including sessions on adapted toy boxes, switches and interface toys, extensive movement and mobility equipment and computer usage. An adapted toy box was purchased for both Laguna and Acoma Head Start programs. Acoma Head Start also received three custom computer-learning centers with printers and the appropriate learning software. Both McWhorter and Alvarez confirmed this information.

In summary, a working educational and assistive technology program was established and implemented to a great degree with both Laguna and Acoma Pueblos. Both pueblos received services from this project. Both received equipment to assist their children who were disabled. What was lacking in completing this objective was the development and implementation of a loan program or a loan plan to borrow assistive technology equipment from either Laguna Middle School or Acoma Sky City School.
Goal 1, Objective 3. Establish a working educational and assistive technology loan program for youth (ages 18 to 21) in the Acoma and Laguna Pueblos.

Measurability: This objective was measured by the data collected from reviewing the project records and from the data collected from telephone and on-site interviews with project personnel and members of the Native American Consortium.

Results: Approximately 80% of this objective was implemented based upon the services provided to the older students by Abras, Anaya, Alvarez, and Prewett.

Discussion:

According to interviews with Abras, Alvarez, and Anita Anaya (Laguna/Acoma Vocational Rehabilitation), few students, ages 18-21, needed assistive technology in either Laguna or Acoma. Anaya indicated that personnel from her department always participated in any IEP meetings held for Laguna and Acoma students, ages 14 to 22. She indicated in her telephone interview that she knew about this project but did not have any older students with assistive technology needs. Both she and George Potter, from her program, participated in the Native American Consortium.

During her interview, Abras indicated that she had evaluated and provided assistive technology for one older student from Laguna/Acoma High School. She and her staff customized a communication device to include digital photography of the local environment so that the student could better relate to the devise and the software. She also indicated that the Special Education from Laguna/Acoma High School, Carol Prewett, had actively participated in the project and attended the Native American Consortium meetings. Prewett saw the need for adapted software for her students and purchased this software for the school. This was a result of what she had learned because of her involvement with the project.

Alvarez indicated that this project had increased public awareness in Acoma concerning the need for older students to have assistive technology. She and Harold Chino were asking the Acoma tribal council to provide a group home for older students in need of educational and assistive technology programs so that they could be better prepare with skills and assistive technology to enter the work force.
McWhorter indicated in her written materials and her interview that seven (7) high school and older students were referred for services. She reported the ages of five (5) of the students. Their ages ranged from 19 to 22.

In summary, some services were provided for this age group. Some assistive technology items were adapted to meet the needs of this age group. Two other outcomes of the implementation of this objective were the changes in assistive technology within the Laguna/Acoma High School program (purchased software) and the increased community awareness of the needs of this age group. No actual loan assistive technology program was established for this age group as indicated in the objective.

<table>
<thead>
<tr>
<th>Goal 1, Objective 4. Identify funding sources for purchase of devices and services for children ages 0-21 in the Acoma and Laguna Pueblos.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Measurability: This objective was measured by the data gathered by interviewing project personnel and members of the Native American Consortium.</td>
</tr>
<tr>
<td>Results: Several potential funding sources were identified for the purchase of devices and services for children ages 0-21. Thus approximately 75% of this objective was implemented.</td>
</tr>
<tr>
<td>Discussion:</td>
</tr>
<tr>
<td>Interviews with Mike Chambers and Tatiana Abras concerning this objective revealed that the Native American Consortium was planning to locate revenue and other funding sources to continue this project after the grant period ended. One of their plans included the sharing of the cost of operating the loan bank of assistive technology by partners in the Native American Consortium. Each partner would bear a proportion of the actual cost. This plan was not actuated after Laguna withdrew from the project.</td>
</tr>
<tr>
<td>Discussion with Acoma personnel revealed that McWhorter had written another federal grant seeking money to continue the project. They were waiting on the results of this grant to see if the project could continue next year.</td>
</tr>
</tbody>
</table>
Acoma personnel also indicated that they were willing to approach their tribal council with various needs for assistive technology, especially a group home. Joking, they indicated that funding for this project could be raised the old fashioned ways, "bake sales."

McWhorter was in the process of preparing a list of potential federal and private foundations sources interested in the disabled population. DVR and Medicaid were included on the list. She will present this list to the personnel in Acoma.

In summary, much discussion with the Native American Consortium and among community members occurred on possible funding sources to continue this project. Currently some new funding sources were approached to assist the project. Some funding sources were listed for use in the future.

Goal 2 of this project included two objectives. Both objectives were written to produce and disseminate culturally appropriate materials about the project so that others may replicate the project and assist more disabled Native American children. The purpose of this goal was carried out in the following two objectives.

Goal 2, Objective 1. Develop culturally appropriate awareness information and resources about the Consortium Project and about the effective educational/assistive technology applications in school and community settings.

Measurability: Information gained from reviewing the project records was used to measure this objective. Also the data collected from staff interviews was used to document accomplishments.

Results: Based upon the pamphlet produced for this program and the modification of assistive technology software, this objective was 100% implemented.

Discussion:

Culturally appropriate awareness information was defined by several of the Laguna and Acoma project staff participants as the inclusion of pictures and symbols that reflected the local...
environment and the traditional symbols of both of the pueblos. According to Abras every attempt was made to include pictures from the local environment by using a digital camera and collecting images from the communities. She indicated that she used these images to modify communication displays in the development and publication of awareness information.

Alvarez and Chino of Acoma indicated that during the monthly Native American Consortium Council meetings, the members reviewed informational documents and resources for cultural appropriateness. Both reported that the group did suggest changes to some of the documents and these changes were made to include specific pictures, information about the pueblos and the use of symbols from both Acoma and Laguna. The council approved the final draft of the pamphlet. Reviewing the material in the pamphlet provided the evaluator with an excellent description of the project from purpose, to services provided, and how to request assistance. The pamphlet was well designed and easy to read and comprehend.

(Appendix I)

In summary, every attempt was made to involve and follow the directive of the Native American Consortium concerning written materials that would represent the project and the people in the project. Changes and adjustment were made for cultural relevance and sensitivity when recommended by the Consortium.

Goal 2, Objective 2. Develop and make available support documents about the project through Consortium and Acoma and Laguna Internet websites, presentations and publications of articles on project activities and outcomes.

Measurability: This objective was measured through downloading the website and searching project records for proof of presentations and the publication of articles about the project.

Results: An excellent web site provided detailed information about this project. Four regional/national presentations were given to share information about this project and several articles were published in the State of New Mexico A.T. Life Reporter. Based upon these facts, 100% of this objective was implemented.
Discussion:

A review of the project records indicated that the LAPTOP project was presented locally several times to community members and the Native American Consortium. Besides local presentations, the project director, McWhorter presented regionally and nationally. A review of her records indicated the following presentations.

One of the major outcomes of this objective and of the project was an excellent web site (www.laguna.k12.nm.us/LAPTOP/) developed for sharing information about the project. This evaluator found the web site on the Internet. She found the web site very informative. The various pages of the web site provided information about Laguna and Acoma Pueblos Technology Opportunities Project (LAPTOP). Different links explained the purpose of the project, the names of people involved in the project, and how to obtain services. Two forms were included for student referrals and parental permission. Both forms were easy to read and complete with the necessary information. The site also included types of services, related links to many state and national resources for occupational therapy. Much information about occupational therapy and assistive technology was provided to the reader. The role of Laguna was also clearly defined in the web site. (Appendix J)

Reviewing the newsletter about Assistive technology for People with Disabilities, A.T.LIFE REPORTER, written and published by the New Mexico Technology Assistance Program (NMTAP), this evaluator found several articles that related to projects that provided
assistive technology to Native American children. Some of the articles related to the Navajo-ABLE program and some to the Laguna/Acoma LAPTOP. Each one of the articles provided concrete examples of how children were able to better their lives because of the technology.

The article in Volume IX, Issue 3, Fall 2000, spotlighted Paul Lavato and how assistive technology provided him with the necessary tools to attend college, a life-changing event. In the Fall 2001, Volume X, Issue 4, the LAPTOP project funded by this grant was described. Tatiana Abras was introduced as the site coordinator and her job responsibilities were described. The Native American Consortium was also mentioned as the organization that oversees the project.

Two articles were written about the Navajo assistive technology project with applications to the Laguna/Acoma project in the Spring 2002 issue, Volume XI, Issue 2. One article described the Rez-Tech 2002 conference held in Window Rock, AZ in April, 2002. Project staff from the Laguna/Acoma project was invited to attend and some did attend. The second article in this issue highlighted an interview and an article published about NMTAP's McWhorter and the Navajo-ABLE project. This interview was published in the national magazine, “Advance for Directors in Rehabilitation.”

Finally an article about Acoma Sky City School and their participation in the project appeared in the Winter 2002, Volume XI, Issue 1. This article described the demonstration classroom for assistive technology. (Appendix K)

In discussion with Alan Klaus, Director of the New Mexico ABLE program, about the distribution of the A.T.LIFE REPORTER, it was learned that the publication is mailed to all 88 the public districts in the state, approximately 140 schools. Copies were also sent to the BIA schools. He indicated that the mailing list was approximately 5000 people or organizations.

In summary, this project was shared and published within the communities, the region and the nation. Presentations were given, articles were published and an excellent web site was developed to share information about the project.
Summary of Findings and Conclusion

The New Mexico State Department of Education, Division of Vocational Rehabilitation received a federal demonstration grant in the amount of $346,362 to provide educational and assistive technology for Indian children who were living in the Pueblos of Laguna and Acoma, New Mexico. The project began October 1, 1999 and ended June 30, 2002.

Project staffing included one half time director from the New Mexico Technology Assistance Program, one half time Laguna Technology Coordinator and one half time by a Laguna occupational therapist. The Laguna staff was hired through a Joint Powers Agreement with the Laguna Education Department. Thus the Laguna staff members were employees of the Laguna Education Department. After Laguna withdrew from the project after the first year, the only staff member remaining was the one half time Project Director who then hired consultants to assist her and provide services to Acoma Pueblo.

During the two-year period some form of assistive technology was provided to 121 children who lived in Laguna and Acoma pueblos and attended Head Start, Elementary School, Middle School, or High School. The age range of the students who received these services was 3 through 22.

More than 229 assistive technology items were purchased through the grant to assist children, parents and teachers with equipment, computers and software. These items were catalogued in a database using File Maker Pro. They were made available using computer software as a working data base file.

During the two years of the project, five of the six objectives were implemented to some degree and in some cases 100%. Goal 1, Objective I was not implemented because two other non-profit organizations were providing services for the birth to age 2 children on the pueblos. Goal 1, Objective 2 was implemented at least 90%. Children at both Laguna and Acoma were evaluated for assistive technology services and some students were provided these services. A loan bank was established through the Native American Consortium. Items were purchased for the loan bank and some trial loans were conducted. Reasons for not awarding this objective 100% completion was that the loan bank was not in operation at the time of this evaluation. Many of the components for Goal 1, Objective 3 were implemented with a few older students but no loan bank was currently operating. Thus this objective was only 80% implemented.
Goal 1, Objective 4 required that alternative funding sources were identified. Some were identified, thus 75% of this objective was implemented.

The two objectives for Goal II were implemented 100%. Through the guidance of the Native American Consortium, all published materials reflected the communities and culture of Laguna and Acoma pueblos. Specific communication overlays were adjusted for student usage to reflect the local environment. (Objective 1) Support documents were developed and made available to a diverse audience that accurately described the project. (Objective 2)

In conclusion, this project was implemented with Laguna and Acoma Pueblos. The implementation of this project provided a new awareness of the needs for assistive technology in Native American communities and provided opportunities to obtain items and service to help the disabled children, ages 3 to 21, who live in Laguna and/or Acoma pueblos.

Recommendations

Much was learned from this project that could assist other State Departments of Education, other Indian Nations, and anyone working with Native American disabled populations. The following comments were made to highlight the Strengths and Weaknesses of this project. The comments were made in good faith to provide further assistance to current and future people who wish to work within Native American communities.

Specific key strengths of this project included the following

1. A new awareness about assistive technology in both communities, its purpose and usage, was an outcome of this project. Both communities may be willing to support another similar project to provide assistance to their children.

2. Over 229 items were purchased with grant money and were stored at Laguna and Acoma to become part of a loan bank for both communities. These items were catalogued and became part of a database for use by many people in and outside of Native American communities.

3. Many Laguna and Acoma children (121) received assistive technology information and services because of this project. Many staff members of the various school entities involved in this project became aware of how assistive technology could help their students become effective learners. Many parents and community members develop greater aware of assistive technology, its purpose and how to obtain assistance.
4. Acoma Sky City School personnel were willing to locate more funding and keep the project alive. They also were approaching their tribal council to donate a house so that an assistive technology home could be established in the community to help older students in transition to college or work.

5. The forming and organization of the Native American Consortium to oversee the project and by the bringing together various, diverse educational entities that provide educational services in Laguna and Acoma was a major strength of this project and a major strength for building trust and working relationships among diverse entities.

6. The willingness of the State Education Department to enter into a Joint Powers Agreement with the Laguna Education Department so that local people could manage the project using local school personnel from Laguna and Acoma was another major outcome.

7. Another strength was the involvement of the Consortium members in reviewing and designing the project pamphlet for local and cultural pictures, symbols and appropriateness. Acceptance of their recommendations for change demonstrated good faith in their guidance by the project director.

8. Finally the development of the Laguna LAPTOP Website was an excellent outcome of the project. For this evaluator, it was a major learning tool.

Specific weaknesses that become apparent during the project included the following:

1. Interviews with people for Laguna and Acoma indicated that they would have preferred inclusion in the actual planning and writing of the project. Some felt that they were an “after thought”. They expressed the following feelings; when the project was funded the state needed a place to park the project to save face. Early communications with the educational agencies, not the governors would have provided better communications throughout the project.

2. Lack of communication with Laguna could have caused conflict in the job descriptions between the project director and the Laguna technology coordinator. Both positions needed better job tasks described in writing to avoid conflict. Also, it was important to clarify the supervision aspect of the Laguna staff members because of the Joint Powers Agreement with the Superintendent of Laguna Education.
Department. Who supervised whom? Who reported to whom? These conflicts caused
distrust on both sides and could have been the reason for not completing the loan
library.

3. Some participants in the Native American Consortium felt that the Consortium should
have more time for discussion and real decision-making. Some felt that they were
only a rubber stamping body for the ideas presented to them.

4. Better research was needed on funding opportunities such as other federal programs
and non-profit foundation programs. Many are available.

5. It appeared to this evaluator that a Needs Assessment of Assistive Technology should
have been conducted with both pueblos. Questions such as what assistive technology
were already in place? how many children? in what age groups? etc. should have
been part of the assessment. If one was conducted, no copy was given to the
evaluator.

6. It appeared to this evaluator that this project was understaffed. A full time person for
Project Director was needed. Some secretarial assistance was needed for better
documentation. More on-site people were needed as consultants to carry out local
needs and provide direction to the Project Director.

7. A working plan for the loaning of assistive technology items from Laguna Middle
School and from Acoma Head Start and Acoma Sky City Community School was not
completed and implemented for daily operation and use by the various educational
entities. Much equipment has been purchased. What will happen with the assistive
technology items purchased with grant money?

The Native American Consortium of Educational and Assistive Technologies for Indian Children Living on the Acoma and Laguna Pueblos

Amended Joint Powers Agreement
Effective Date: April 27, 2000

Modified in Collaboration with
Alan Klaus, NMTAP Program Director
NMTAP/DVR/DOE

June 24, 2000
JOINT POWERS AGREEMENT
BETWEEN
STATE OF NEW MEXICO
STATE DEPARTMENT OF EDUCATION
AND
PUEBLO OF LAGUNA DEPARTMENT OF EDUCATION

THIS AGREEMENT made and entered into by and between the State of New Mexico, Division of Vocational Rehabilitation, hereinafter referred to as the "Agency" acting through Terry Brigance, Director, hereinafter referred to as the "Director", and Pueblo of Laguna Department of Education hereinafter referred to as "Pueblo of Laguna" are hereinafter referred to collectively as the "Parties", which Parties enter into this Agreement by the authority granted to them by the New Mexico Joint Powers Agreement Act, Section 11-1-1 et seq., NMSA 1978, 29 USC 721 (a) (20), Section 504 of the Rehabilitation Act of 1973, as amended, 29 USC 794, and the Pueblo of Laguna Code, and regulations duly promulgated under such statutory provisions.

IT IS MUTUALLY AGREED BETWEEN THE PARTIES:

PURPOSE

The State of New Mexico has applied for a grant award from the U.S. Department of Education to implement a Demonstration Program for Indian Children, CFDA No.: 84.299A. As a result of a grant award, the purpose of this Agreement is to set forth the working arrangements between the Agency and the Pueblo of Laguna as to accomplishing the goals and objectives contained in the prime grant award to the State of New Mexico. The overall goal of the agreement of the prime grant is to work in partnership to implement the Native American Consortium of Educational and Assistive Technologies for Indian Children Living in the Acoma and Laguna Pueblos to improve the educational opportunities and achievement of children and youth with disabilities to prepare for school and to transition from school to a first job.

SECTION ONE
SCOPE OF WORK

The Agency will provide the following:

A. Hire or assign a Pueblos Project Director (Educational Transition Services Coordinator) in a half-time position with responsibility for the supervision of expert consultants and overall coordination of project activities.
B. The Pueblos Project Director will meet monthly with the Laguna Education Technology Coordinator, consultants, and other project staff to provide direction and ensure project activities are implemented according to the plan.

C. The Pueblos Project Director in conjunction with the Laguna Education Technology Coordinator will be responsible for coordinating and scheduling all project staff activities to develop a plan to test, and demonstrate the effectiveness of the project services.

D. Provide office space in Santa Fe, New Mexico for Pueblos Project Director.

The Pueblo of Laguna will:

A) Employ a Laguna Education Technology Coordinator who will be an employee of the Pueblo of Laguna and have responsibility for the on-site coordination, scheduling and supervision of project staff activities in conjunction with the NMTAP Pueblos Project Director.

B) Contract with Early Childhood Specialists, Occupational Therapist, Speech Pathologist and/or Physical Therapist, Assistive Technology Specialist, Job Coaches and Job Placement Specialist.

C) Provide administrative support for these positions.

D) Purchase assistive devices and equipment to start up the educational and assistive bank of loan equipment (ABLE) for the Acoma and Laguna Pueblos as approved by the NMTAP Pueblos Project Director.

E) Implement innovative educational and assistive technology programs including educational assessment and service delivery for preschool children.

F) Establish a working assistive technology loan program compatible with the Individualized Family Service Plans (IFSP) for children ages birth to 2 years.

G) Develop an educational and assistive equipment loan program for youth with disabilities ages 18 through 21 years during their transition to employment or post-secondary institutions with emphasis to prepare for a job.

H) Coordinate with the Pueblos Project Director to assist in the development, testing, and demonstration of the effectiveness of the technology and training program services.

I) Participate as a member of the Native American Consortium of Educational and Assistive Technologies for Indian Children Living in the Acoma and Laguna Pueblos.

Grants and Services

Direct grants made to schools and local government [JPA 141,493]

Miscellaneous Other Expenses

Expenditures which do not qualify under the aforementioned Other Operating Costs line item criteria. Includes charges for money orders and cashier checks, plaques for special recognition, retirement, and appreciation.

Total Approved Budget $177,421
SECTION TWO
ADMINISTERING AGENCY

The Agency shall be the administering agency under this Joint Powers Agreement. The administering agency of the Joint Powers Agreement is the Division of Vocational Rehabilitation of the New Mexico State Department of Education.

SECTION THREE
COMPENSATION

A. The Pueblo of Laguna shall submit quarterly invoices to the Agency. The Agency will remit payment to the Pueblo of Laguna within 20 working days upon receipt of an approved detailed invoice and quarterly report to be paid by the Agency.

PERSONNEL
Laguna Education Technology Coordinator $25,000.00
Fringe Benefit 5,050.00

TRAVEL
Travel for mileage and per diem costs for personnel 2,000.00

OTHER EXPENSES
Rent space ($300 per month X 12 months) 3,600.00
(To pay for rental facilities on the Pueblo of Laguna for office space and storage space for assistive technology equipment.)

SUPPLIES
To purchase assistive technology devices/systems 42,743.00
for the Native American Consortium Loan Bank as determined by local needs assessment and approved by NMTAP Pueblos Project Director.

CONTRACTUAL
Therapists, Job Coaches, and Specialists Variable hourly rates for a total 30,000.00
Laguna/Acoma Liaison/Peer Mentor 12,000.00
Indirect Costs 21,100.00

Grand Total $141,493.00

SIC PSC rev 7-97 1 03

BEST COPY AVAILABLE
B. The New Mexico Gross Receipts Tax levied on the amounts payable under this agreement to be paid: The Pueblo of Laguna is exempt from payment of Gross Receipts Tax.

Total amount of compensation under this contract shall not exceed $141,493.00

All property or equipment acquired as the result of expenditure of funds from this joint powers agreement shall become the property of the Pueblo of Laguna upon termination of this agreement.

SECTION FOUR
TERM

This Agreement becomes effective on the date it is approved by the Department of Finance and Administration. This Agreement shall terminate on September 30, 2001 unless earlier terminated pursuant to paragraph 4 of this agreement.

SECTION FIVE
TERMINATION

This Agreement may be terminated by either of the parties hereto for any reason whatsoever upon written notice delivered to the other party at least 10 days prior to the intended date of termination. By such termination, neither party may nullify obligations already incurred for performance or failure to perform prior to the date of termination. This provision is not exclusive and does not waive other legal rights and remedies afforded the State in such circumstances as the Pueblo of Laguna Default/Breach of Contract.

SECTION SIX
STATUS OF THE PUEBLO OF LAGUNA
DEPARTMENT OF EDUCATION

The agents and employees of the Pueblo of Laguna are not employees of the State of New Mexico and shall not accrue leave, retirement, insurance, bonding, use of state vehicles, or any other benefits afforded to employees of the State of New Mexico as a result of this Agreement.

SECTION SEVEN
ASSIGNMENT

The Pueblo of Laguna shall not assign or transfer any interest in this Agreement or assign any claims for money due or to become due under this Agreement without the prior written approval of the Agency.
SECTION EIGHT
SUBCONTRACTING

The Pueblo of Laguna shall not subcontract any portion of the services to be performed under this contract without written approval of the agency, other than those services stated in the Section One: Scope of Work and Section Three: Compensation.

SECTION NINE
RECORDS AND AUDITS

The Pueblo of Laguna shall maintain financial records, supporting documents, statistical records, and all other records pertinent to this contract for a period of three years following the submission of the final request for payment. These records shall be subject to inspection by the Agency, the Department of Finance and Administration, and the State Auditor. The Agency shall have the right to audit billings both before and after payment. Payment under this Agreement shall not foreclose the right of the Agency to recover excessive and/or illegal payments. This contract is subject to a contract specific Financial Statement Audit in accordance with the United States General Accounting Office Government Auditing Standards, 1994 revision. A system audit in accordance OMB Circular A-133 can substitute for a contract specific audit where the Pueblo of Laguna qualifies under the A-133 guidelines.

SECTION TEN
APPROPRIATIONS

The terms of this Agreement are contingent upon sufficient appropriations and authorization being made by the U.S. Congress and the Legislature of New Mexico for the performance of this Agreement. If sufficient appropriations and authorizations are not made, this Agreement shall terminate upon written notice being given by the Agency to the Pueblo of Laguna or Pueblo of Laguna to the Agency. The Agency's decision as to whether sufficient appropriations are available shall be accepted by the Pueblo of Laguna and shall be final.

SECTION ELEVEN
RELEASE

The Pueblo of Laguna, upon final payment of the amount due under this agreement, releases the Agency, its Officers and employees, and the State of New Mexico from all liabilities, claims and obligations whatsoever arising from or under this agreement. The Pueblo of Laguna agrees not to purport to bind the State of New Mexico to any obligation not assumed herein by the State of New Mexico, unless the Pueblo of Laguna has express written authority to do so, and then only within the strict limits of that authority.
SECTION TWELVE
CONFIDENTIALITY

The Agency and the Pueblo of Laguna will maintain such records as are required by State and Federal laws or regulations, and establish safeguards to permit the release or disclosure of any information obtained hereunder to its own employee and to limit its use to performance of this Agreement.

SECTION THIRTEEN
PRODUCT OR SERVICES--- COPYRIGHT

All materials developed or acquired by the Pueblo of Laguna under this agreement shall become the property of the State of New Mexico and shall be delivered to the Agency no later than the termination date of this agreement. Nothing produced, in whole or in part, by the Pueblo of Laguna under this agreement shall be subject of an application for copyright by or on behalf of the Pueblo of Laguna Agreement.

SECTION FOURTEEN
CONFLICT OF INTEREST

The Pueblo of Laguna warrants that it presently has no interest and shall not acquire any interest, direct or indirect, which would conflict in any manner or degree with the performance of services required under this Agreement. The Pueblo of Laguna certifies that the requirements of the Government Conduct Act, Sections 10-16-1 et seq. NMSA 1978 (1994 Supp.) regarding contracting with a state employee, former state employee, or legislator, has been followed.

SECTION FIFTEEN
AMENDMENT

This Agreement shall not be altered, changed, or amended except by instrument in writing executed by the parties hereto.

SECTION SIXTEEN
SCOPE OF AGREEMENT

This Agreement incorporates all the agreements, covenants, and understandings between the parties hereto concerning the subject matter hereof, and all such covenants, agreements and understandings have been merged into this written Agreement. No prior agreements or understandings, verbal or otherwise, of the parties or their agents shall be valid or enforceable unless embodied in this Agreement.
SECTION SEVENTEEN

NOTICE

The Procurement Code, Sections 13-1-28 through 13-1-199, NMSA 1978, imposes civil and
criminal penalties for its violation. In addition, the New Mexico criminal statutes impose
penalties for illegal bribes, gratuities and kickbacks.

SECTION EIGHTEEN

EQUAL OPPORTUNITY COMPLIANCE

The Pueblo of Laguna agrees to abide by all Federal and State laws, rules, regulations, and
executive orders of the Governor of the State of New Mexico, pertaining to equal employment
opportunity. In accordance with all such provisions, the Pueblo of Laguna assures that no person
shall, on the grounds of race, color, national origin, gender, age or handicap, be excluded from
employment with or participation in, be denied the benefits of, or be otherwise subjected to
discrimination under any program or activity performed under this contract. If the Pueblo of
Laguna is found to be out of compliance regarding these requirements during the term of the
contract, the Pueblo of Laguna agrees to take appropriate steps to correct these deficiencies.

SECTION NINETEEN

APPLICABLE LAW

This Agreement shall be governed by the laws of the State of New Mexico.

SECTION TWENTY

COMPLIANCE WITH FEDERAL GRANTS CONDITIONS

The Pueblo of Laguna shall abide by all grants conditions set out in the Grant Award from the
U.S. Department of Education/Special Education to the State of New Mexico.

SECTION TWENTY-ONE

DISPUTE RESOLUTION

All disputes and controversies of every kind and nature between the parties to this Agreement as
to the existence, construction, validity, interpretation or meaning, performance, non-performance,
enforcement, operation, breach, continuance, or termination of this Agreement shall be submitted
to arbitration pursuant to the procedures set forth herein.

A. Either party may demand such arbitration in writing, which demands shall include the name
of the arbitrator appointed by the party demanding arbitration, together with a statement of
the matter of controversy.
B. Within 20 days after such demand, the other party shall name its arbitrator, or in default of such naming, such arbitrator shall be named by the American Arbitration Association, and the two arbitrators so selected shall name a third arbitrator within 20 days, or, in lieu of such agreement on a third arbitrator by the two arbitrator so appointed, a third arbitrator shall be appointed by the Federal District Court for the District of New Mexico. In the event said Court fails to appoint a third arbitrator with 30 days of the request thereof, the appointment shall be made by the American Arbitration Association.

C. The arbitration costs and expenses of each party shall be borne by that party. All arbitrators’ fees and other expenses shall be borne equally by both parties.

D. The arbitration hearing shall be held at such time and place as designated by the arbitrators on at least 20 days written notice of the parties.

E. An award rendered by a majority of the arbitrators appointed pursuant to this AGREEMENT shall be final and binding on all parties to the proceeding, and the parties hereto agree to be bound by such award.

F. As to any procedures regarding the conduct of the arbitration that are not specified either in this AGREEMENT or in another written agreement signed in advance of the hearing, the parties shall follow the Commercial Arbitration Rules of the American Arbitration Association.

G. The parties stipulate that the arbitration provisions of this Agreement shall be a complete defense to any suit, action, or proceeding instituted in any federal, state, or tribal court or before any administrative tribunal with respect to any controversy or dispute arising during the period of this Agreement and which is arbitrable as set forth in the Agreement.

H. The arbitration provision of this Agreement shall, with respect to such controversy or dispute, survive the termination or expiration of the Agreement.

I. Nothing contained in this Agreement shall be deemed to give the arbitrators any authority, power, or right to alter, change, amend, modify, add to, or subtract from any of the provisions of this Agreement.

J. Failure by either party to arbitrate any dispute pursuant to the procedures set forth herein when a demand to do so has been made by the other party or failure by either party to comply with the arbitration award shall amount to material breach of the Agreement and shall entitle the party who demanded arbitration to cease performance of any obligation set forth in this Agreement at the sole discretion of that party.

K. This Agreement is not subject to enforcement under the Uniform Arbitration Act, (NMSA 1978, Section 44-7-1 through 44-7-22). or Section 44-78-1 et seq., NMSA 1978.

SECTION TWENTY-TWO
OTHER PROVISIONS

The Agency will not be liable for any actions, proceedings, claims, demands, costs, damages, attorney's fees, and other liabilities and expenses of any kind from any source which may arise out of this Agreement if caused by the tortious act of omission of the Pueblo of Laguna, its officers, employees, and/or contractors.

The Single-Point-of Contact for the purpose of the administration of this Agreement shall be the Agency's NMTAP Director.
IN WITNESS WHEREOF, the parties have executed this Agreement as of the date of execution by the State Contract Officer, below.

CASE STUDY

A 10-year-old female with a diagnosis of mental retardation was referred by the occupational therapist to determine her assistive technology needs. The initial interview with the occupational therapist, speech-language pathologist, physical therapist, and student’s teacher and educational assistant revealed an in-depth assistive technology assessment was needed.

On 01/12/01, information of student’s strengths and needs were compiled with the use of the Wisconsin Assistive Technology Initiative Checklist, classroom observation, and interview with student’s school personnel. Parent interview was attempted without success (phone contacted x 2) however consent was provided for the evaluation to occur.

Previous medical history indicated that student was delivered 3 weeks early and was admitted at four months of age due to seizures and cyanosis. Later at 9 months, a similar event occurred and she was admitted where several medical exams were completed without any results to suggest why she was having seizures. Other medical complications included chronic respiratory problems, feeding, and digestive difficulties. At the time of the assessment, student was not taking any medications and was eating a regular diet. Information obtained from the student’s teacher revealed she needed glasses but removed them often. Hearing screening was not provided due to student’s communication difficulty.

Student’s communication with others in a purposeful manner was indicated to be the primary goal of the school staff. Per observation and staff report, student’s preferred communication method was included screaming, hitting, pinching, and grabbing. Some complete sentences of two words were noted but in an infrequent manner. Simple commands were followed with verbal cues, ample time to process the information, and physical cues.

Assessment information of available assistive technology included access to a G3 Mac computer with sound card, a standard QWERTY keyboard, and mouse. Observation of student’s behavior with one-to-one assistance revealed student attended to tasks that incorporated the visual, tactile, and auditory system. Initiation, participation, and completion of task all required one-to-one assistance. If left unattended, student would sit and stare in front of the computer. Student when placed in front of the classroom mirror, however, was observed singing parts of familiar nursery songs (Itsy Bitsy Spider).

Recommendations following the assessment were to provide student with computer software and various types of switch-activated equipment that focused on the development of cause and effect relationship (the first component in developing a communication system). Since student enjoyed a multisensory approach to learning, software provided included music and was specifically designed to interact directly with the user. Additionally, a Tech Talk communication device was offered to facilitate greater communication during specific activities.
Staff training on the software program occurred during the visit on 2/2/01 with and without the student. To facilitate access to the software program a touch screen was also provided. Icons developed for the Tech Talk consisted of some digital photos and simple drawings from Boardmaker. Staff training was provided on the use of Boardmaker and videotape provided to further assist with program use.

Following one week of providing the above equipment, a follow-up visit was done to reassess student's use of the equipment. Observation and staff interview revealed student was beginning to interact with some aspects of the software independently instead of sitting and staring at the computer.

The icons developed to represent student's favorite music were finished and placed on the Tech Talk by 4/5/01. Student was observed and reported to access each of the six icons successfully with one to two verbal cues. During a circle time activity, student was able to participate by using the Tech Talk and develop social skills such as turn taking without hitting others. Additionally, sign language such as “more” was introduced with the Tech Talk use and successfully used.

On 4/20/01, the student was still interacting with the delivered assistive technology and staff requested more software programs. Two other software programs were delivered on 4/23/01. School staff also reported being comfortable in using the equipment and requested that consultation visits occur following 3 to 4 weeks instead of 1 to 2 weeks.

Subsequent visits continued to reveal student was still using assistive technology with some assistance from school staff. Communication methods were further explored and a Picture Exchange Communication System (PECS) was developed with use of Boardmaker and digital picture icons.

In conclusion, assistive technology services with staff support were observed to:
1. Facilitate student's interaction with others as demonstrated by her ability to turn take with other children while using the Tech Talk;
2. Enhance student's understanding of cause and effect relationship as demonstrated by her ability to touch the computer screen to interact with the software, and
3. Expand student's communication skills as demonstrated by her ability to use some sign language and participate in the PECS program.

Additionally, school staff obtained greater skills and knowledge in using assistive technology as demonstrated by their ability to:
1. Develop communication icons with use of Boardmaker and digital photo images:
2. Request a greater number of software programs,
3. Utilize delivered equipment without abandonment,
4. Ask for other types of equipment that could also foster cause and effect relationships,
5. Try the equipment with other students, and
6. Decrease follow-up visit intervals.

What activities/events do you feel boost the person's sense of self-esteem, feelings of accomplishment and personal confidence?

__________________________________________________________________________

__________________________________________________________________________

What times of the day does the person perform the best?..... the worst?

__________________________________________________________________________
Communication

How would a communication system and/or computer change this person's performance?

__________________________________________________________

Describe your comfort level with electronic communication devices and computers:

Are you familiar with any devices? If so, which ones?

__________________________________________________________

Have you received any training on communication devices?

__________________________________________________________

Do you use a computer? If so, what kind?

__________________________________________________________

Does the person currently use or have access to a computer?  Yes  No

If so, where?

__________________________________________________________

what kind?

__________________________________________________________

what software?

__________________________________________________________

what accessories/ peripherals are attached?

__________________________________________________________

What problems/concerns do you have about the current computer system?

__________________________________________________________

What environmental barriers, problems or considerations would need to be considered if a device is recommended?

__________________________________________________________

What questions or concerns would you like to see addressed during this evaluation?

__________________________________________________________

Please mail completed referral questionnaire and any relevant evaluations that may assist us in determining appropriate adaptive equipment for this person to the address below:

LAPTOP • Laguna & Acoma Pueblos Technology Opportunities Project
Laguna Middle School • P. O. Box 268 • Laguna, NM 87026 • Phone (505) 552-9091 • Fax (505) 552-6466
The Laguna - Acoma Pueblos
Technology Opportunities Project
(LAPTOP)
Laguna Department Of Education

COOPERATIVE AGREEMENT

This Agreement is entered into between the Laguna - Acoma Pueblos Technology Opportunities Project, Pueblo of Laguna Department of Education, hereinafter referred to as LAPTOP, under the Individuals with Disabilities Education Act (P.L. 105-17), the State Department of Education, and the ______________________, hereinafter referred to as “Parties” who jointly agree as follows:

I. Purpose of Agreement:

The purpose of this Agreement is to effect coordination between the LAPTOP, and Local Education Agency under the Individuals with Disabilities Education Act of 1997 (P.L. 105-17) for provision of appropriate assistive technology devices and services. The devices shall be provided through the Assistive Bank of Loan Equipment (ABLE) and can serve to evaluate the assistive technology needs of students with disabilities ages 3-21. The ultimate goal of the ABLE Loan Bank is to increase, maintain or improve the functional capabilities of students with disabilities to achieve their educational goals regarding free appropriate public education (FAPE) in the least restrictive environment (LRE) as defined in the students’ individualized educational programs (IEP) or Individualized Family Service Plan (IFSP).

In addition, devices provided through the ABLE-LAPTOP inventory will be available for use by students 14 to 21 years old with identified transition needs and services defined in the students’ Individual Transition Plans (ITP) of their IEPs.

II. Target Group:

Individuals to be served under this agreement will be individuals with disabilities, between the ages of 3 to 21 years, determined as eligible for special education programs under the Educational Standards for New Mexico Schools and the Individuals with Disabilities Education Act of 1997 (P. L. 105-17).

Individuals with disabilities, 14 to 21 years old, with identified transition needs and services in ITPs/IEPs are served through this agreement regarding ABLE-LAPTOP equipment.
III. **Scope of Services:**

A. Individuals with disabilities, 3 to 5 years old, in preschool special education programs, will be served through this agreement by temporary provision of assistive technology devices for evaluation, trial use for IEP and/or Individualized Family Service Plan (IFSP) development, purchase, and/or checkout for certain educational activities conducted at school and home.

B. Individuals with disabilities, 6 to 21 years old in primary and secondary school special education programs, will be served through this agreement provision of temporary use of assistive technology devices for evaluation, try-out for IEP development, purchase, and/or checkout for certain educational activities conducted at school, home and/or transitioning. Individuals with disabilities, 14 to 21 years old, will be served regarding the ABLE-LAPTOP with identified transition needs and services in ITPs/IEPs.

IV. **Responsibilities:**

A. The LAPTOP agrees to:

1. Identify, make available and maintain assistive technology devices owned by ABLE-LAPTOP, other service providers and Local Education Agency, and requested by qualified ancillary personnel (e.g., therapists, teachers, and other parties) to meet individual educational needs of students with disabilities;

2. Coordinate under appropriate policies and procedures the checkout, tracking, training and technical assistance for qualified ancillary personnel, teachers, and other parties associated with Local Education Agency activities to identify, adjust and adapt the assistive technology devices to meet the individual educational needs of students with disabilities and associated family members; and

3. Provide payment for the shipment, and shipment insurance costs of a particular assistive technology device, to the Local Education Agency.

B. The Local Education Agency agrees to:

1. Implement appropriate policies and procedures for the checkout, tracking, training and technical assistance with assistive technology devices by qualified personnel, such as therapists and teachers, to meet the individual educational needs of students with disabilities and associated family members, and other parties associated with the activities in school, home, work and/or community transitioning;

2. Provide the technical support of Local Education Agency staff person(s) who are trained in the use of the technologies with students, family members, teachers, personnel, and other parties associated with the Local Education Agency activities;
3. Enter into a separate loan agreement for each assistive technology device checked out through ABLE-LAPTOP;

4. Provide insurance coverage for the use of the assistive technology device for use in school, home and transitional work sites, as needed;

5. Assume all responsibility for theft, vandalism, neglect, or loss;

6. Assume responsibility for returning the assistive technology device/s to the LAPTOP office.

7. Submit a completed evaluation of the utilization of the assistive technology device and its role in furthering the goals of the student’s ITP/IEP and/or IFSP. This evaluation will be submitted per each student who uses an ABLE-LAPTOP assistive technology device or system.

V. Terms of Agreement:

This Agreement shall become effective on the date when signed by all parties and shall terminate on August 31, 2003.

VI. Termination:

Any party may terminate this Agreement by notifying the others in writing at least 60 days prior to the intended date of the termination. In the event that Federal or State laws are amended or judicially interpreted so as to render fulfillment of this agreement on the part of any of the parties impossible, LAPTOP and the Local Education Agency shall be discharged from further obligations under the terms of this Agreement.

VII. Confidentiality:

Confidentiality of information provided to or developed by LAPTOP and the Local Education Agency in the performance of this Agreement shall be maintained. Students and Parent or Guardian, where appropriate, shall sign a release to the Local Education Agency of information for evaluation and other documents involving use of ABLE-LAPTOP assistive technology devices. Any documents regarding uses of ABLE-LAPTOP assistive technology devices developed by the Local Education Agency shall be subject to inspection by the LAPTOP. The Local Education Agency shall maintain these documents for no less than three (3) years following termination of this agreement.

VIII. Compensation:

Through this Cooperative Agreement funds will not be payable to, nor transferred between, any of the parties.
IX. Records and Audit:

The Local Education Agency shall maintain detailed records regarding the maintenance, use, and condition of the assistive technology device(s) loaned to the Local Education Agency through ABLE-LAPTOP. These records shall be subject to inspection by the Pueblo of Laguna Department of Education. The Local Education Agency shall maintain these records at the Local Education Agency for at least three (3) years following termination of this Agreement.

X. Product of Services - Copyright:

All materials developed or acquired by the Local Education Agency under this Agreement regarding use of ABLE-LAPTOP assistive technology devices shall become the property of the Pueblo of Laguna Department of Education and shall be delivered to the LAPTOP no later than the termination date of this Agreement. Nothing produced, in whole or in part, by the Local Education Agency under this Agreement shall be the subject of an application of copyright by or on behalf of the Agreement.

XI. Amendments:

This Agreement shall not be altered, changed or amended except by instrument in writing executed by the parties hereto.

XII. Scope of Agreement:

This Agreement incorporates all agreements, convenants, and understandings between the parties hereto concerning the subject matter hereto and all such agreements, convenants and understandings that have been merged into this written Agreement. No prior agreements or understandings concerning the Scope of Service, verbal or otherwise, of parties or their agents shall be valid or enforceable unless embodied in this Agreement.

XIII. Applicable Law:

This Agreement shall be governed by the laws of the State of New Mexico.

XIV. Title, Maintenance and Disposition of Equipment:

A. Title to the assistive technology device(s) owned by ABLE-LAPTOP shall remain with the LAPTOP throughout the term of this Agreement. The Local Education Agency shall take reasonable care to secure the assistive technology device(s) from theft or loss. The Local Education Agency shall inventory the assistive technology device(s) on an ongoing basis, shall be liable to the LAPTOP for the theft or loss of an assistive technology device, and shall provide an immediate accounting for all assistive technology devices found to be missing.

B. The Local Education Agency shall maintain the assistive technology device(s) in good and safe condition. The LAPTOP and Local Education Agency agree that
the use of the assistive technology device(s) for the purposes contemplated in this Agreement involve the possibility of damage to and/or destruction of the assistive technology device(s). The Local Education Agency shall carry insurance to protect against liability for damage to and/or destruction of the assistive technology device. The Local Education Agency shall inventory the assistive technology device(s) on an ongoing basis, and shall provide an immediate accounting for all assistive technology device(s) found to be damaged or destroyed.

The Local Education Agency shall inspect the assistive technology device(s) prior to its provision to any individual or entity and assure that the assistive technology device(s) is in good and safe working order prior to the loan of the assistive technology device(s) to any individual or entity.

C. Upon the termination of this Agreement, the Local Education Agency shall deliver all assistive technology device(s) not previously returned to the LAPTOP. If any assistive technology device(s) is found to be damaged to the point that it cannot be repaired for safe use, or destroyed, the affected assistive technology device(s) shall be immediately returned to the LAPTOP for disposition by the LAPTOP.

Under no circumstances shall the Local Education Agency dispose of any of the assistive technology device(s) in a manner not provided for under this Agreement.
The ABLE-LAPTOP provides a cost effective way for students with disabilities to try out an assistive device or an adaptive solution on a short term basis for evaluation. Appropriate device determination and training in school, home, community and school-to-work contexts as defined in the student’s Individualized Education Program (IEP). The loan system can be used by special education programs as a resource to save budget dollars when considering the purchase of appropriate device(s).

The ABLE-LAPTOP has the following types of devices for student trial and use: alternative and augmentative communication (AAC) devices, adaptive setups for existing computers (Macintosh, Windows), mounting and positioning devices, alternative input and output devices, and special software programs that enhance student productivity.

How Does ABLE-LAPTOP Work?

The loan bank functions through Cooperative Agreements between LAPTOP and participating special education programs in BIA schools, contract and grant schools, and New Mexico school districts that extend into the Pueblos of Acoma and Laguna.

In accord with the Cooperative Agreements, LAPTOP provides on-site training, coordination, maintenance, and tracking of the ABLE device(s). Throughout the loan period, these services are available to the student, family, and school personnel as defined in the student’s IEP. Other resources may be used to assist in needs assessments, student evaluations, and in the determination of existing devices the school district(s) might already have. As needs are identified, project personnel will assist in seeking funding strategies that will support the procurement and maintenance of the devices.

How Does the Student Get Involved?

In order to participate, special education personnel and/or the student’s family may initiate contact by calling ABLE-LAPTOP staff.

The following information may be requested:

- The student’s family will need to complete a LAPTOP application or a Release of Records form as well as provide the student’s current IEP and pertinent therapy evaluations. Family support is available if requested.
The IEP should specify:

1) the skills or academic objectives that are targeted for the student;
2) in what settings the technologies will be used (e.g., school, home, school-to-work program);
3) the projected loan period; and
4) the anticipated outcomes.

The student and family may also request assistance in identifying potential funding sources such as Early Intervention, Special Education, Vocational Rehabilitation, Medicaid, Medicare, Private Insurance and Veterans Affairs.

What Is a Recommended Evaluation Procedure to Use?

1. A representative from the IEP Team will amend the student's present IEP to reflect the required functions or features of the technology (examples: positioning and mounting mechanisms, alternative augmentative communication devices, computer access adaptations and modifications, assisted listening systems). An assistive technology evaluation will provide a structure for the identification and determination of specific device features.

2. Following an evaluation or a case review by project staff, ABLE-LAPTOP will then loan a device that meets the identified requirements. For example, a teacher may state that the student needs an alternative method of generating written reports to meet IEP objectives related to writing. Once a potential device or solution is identified, the system will be loaned to the school to be used by the student for a specific period of time. The writing products realized throughout the trial loan period will be examined and compared to her/his handwriting without the technology. Consideration of speed, accuracy, efficiency, and energy output will help determine whether the equipment contributes positively to academic gains, or whether a different solution should be implemented. A realistic time frame may range from only a few days to perhaps eight weeks, depending on the complexity of the solution and the learning curve required for independent operation.

3. The results of the device trial(s) will be documented in a report by school personnel and/or therapists, and will address progress or gains across settings and across academic tasks. An IEP meeting will then be convened to discuss modifications, accommodations, or adaptations to the student's academic goals, based on the support of assistive technologies.
Check-Out/Check-In Procedures

1. A call from school or community program personnel to the LAPTOP Project Coordinator starts the loan process. The LAPTOP will conduct an intake and check into the availability of the requested device.

2. A copy of the student’s IEP (including release/addendum/evaluation info) is required prior to loaning a device.

3. The ABLE-LAPTOP staff will provide the intake information (Student IEP/Release of Records Form/AT Device Needed) to the appropriate staff person, who will check to make sure the device is in working order and that the IEP documentation is complete.

4. The ABLE-LAPTOP staff will then prepare a Loan Agreement to accompany the equipment, and will ship the item(s) to the requesting person. The Loan Agreement must be signed by the requesting school staff and the Project Director.

5. On the return/check-in of the device:

ABLE-LAPTOP staff will:

a. Check to ensure that all components and pieces are returned;

b. Prepare the device(s) for future checkout (charge batteries, count cords, clean cases, etc.); and

c. File the Loan Agreement (indicating the date returned) and record outcome evaluation data.

Additional Information/Contacts

For questions relating to student needs, equipment availability, or personnel support, please call Mike Chambers, LAPTOP Coordinator, at (505) 552-9091 or (505) 980-1692.

For questions relating to LAPTOP grant administration, please call Kathy McWhorter, Project Director (800) 866-2253, or send email to: kathym@state.nm.us
The Laguna - Acoma Pueblos
Technology Opportunities Project
(LAPTOP)
Laguna Department Of Education

ADVISORY COUNCIL

I. Designation

The organization referred to in this document shall be known as the Advisory Council for the Laguna and Acoma Pueblos Technology Opportunities Project (LAPTOP), hereinafter referred to as the “Council” for the New Mexico Native American Consortium for Educational and Assistive Technologies for Indian Children Living on the Acoma and Laguna Pueblos.

II. Authorization

The Advisory Council is authorized by a federal grant award (S299A990001), a Demonstration Grant for Indian Children, Office of Elementary and Secondary Education, U.S. Department of Education, to the New Mexico Technology Assistance Program (NNMTAP) within the Division of Vocational Rehabilitation (DVR) of the State Department of Education.

III. Purpose

The purpose of the Council is to provide guidance and advice to LAPTOP regarding all activities funded by this grant including the development, implementation, operations and continuation of the Assistive Bank of Loan Equipment (ABLE) to serve educational and assistive technology needs of Indian children with disabilities.

IV. Duties

Through its planning, coordination, monitoring, and evaluation activities, the Council shall encourage and support the development of a model program to meet the needs of Indian children with disabilities from birth to age 21. Duties of the Council may include, but are not limited to, the following:

- Meet on a regularly scheduled basis as determined by the Council but not less than once every three months.
Advise and assist in the implementation of the LAPTOP Work Plan including revisions to the plan and specifying or alerting priority tasks and outcomes.

Provide input and have decision making authority by a majority vote of the Council regarding services provided by the model ABLE program.

Provide input on various working committees to achieve the goals and objectives of the LAPTOP to assist children with disabilities to locate, secure, and maintain the assistive technology and services needed to achieve greater control and independence in their lives. This will include service and training coordination, funding, consumer oversight and quality assurance, public and private partnerships, public awareness and cooperative funding through IDEA and LEA responsibilities.

Review the identified needs of children with disabilities and prioritize service delivery based on standardized criteria and procedures.

Criteria for determining level of need:

1) Determine immediacy of need and level of need based on perceived impact of the equipment or devices on enhancement of daily living skills and functional independence, and
2) Assess whether other funding is available to purchase equipment, to contribute to the total cost, and/or to procure similar equipment, if there is a "good match."

V. Membership

All members of the Council are appointed and serve at the request of the LAPTOP Project Coordinator, and the DVR Grant Administrator(s).

The Council shall be composed of representatives of principal local community service agencies and shall provide the Council Chairperson, Project Coordinator of LAPTOP, with a letter from their agency indicating recognition of their membership on the Council and their authority to represent their agency in all matters of the Council.
Consumers of Assistive Technology = Minimum of 2 Members

Advisory Council membership is to include parent representatives who have a child with a disability, and/or representatives at large who are consumers of assistive technology.

Agencies/Organizations = 6 Members

Agency representation shall consist of one representative of each of the following agencies:

1) Acoma Head Start
2) Laguna Head Start
3) Sky City Elementary
4) Laguna Elementary
5) Laguna Acoma High School
6) Laguna Acoma Vocational Rehabilitation

The right of a Council member to designate another individual as proxy shall be recognized, providing that written notification of such designation is received by the Chairperson prior to the start of the meeting at which the proxy will vote. An individual may carry only one (1) proxy vote.

If a Council member misses two (2) consecutive meetings without proxy representation, they will be notified that they may be removed from the council.

VI. Council Leadership

The Chairperson shall be the Project Coordinator of the Laguna and Acoma Pueblos Technology Opportunities Project (LAPTOP) and serve as presiding officer at the Council and special committee meetings, and represent the Council on issues the Council has adopted. The Chairperson will have responsibility for coordinating with the DVR Grant Administrator(s).

VII. Council Meetings

A minimum of four (4) full Council meetings will be held annually at the call of the Chairperson in consultation with appropriate representatives of the Council. Notification of such meetings will be given at least ten days in advance. An agenda will be submitted to members for additions and
comments. Special or emergency meetings may be called by the Council Chairperson.

VIII. Voting

For Council meetings, all council members or their proxies who are present (including the Chairperson) shall be entitled to one (1) vote on all matters before the Council. All votes shall be recorded.

Voting to obtain the Council’s recommendation may be accomplished by a simple majority vote of members or their proxies present at the meeting.

All matters voted on by the Council shall be recorded in the minutes of the meeting and may apply to matters of conducting business of the Council and decision making relative to prioritizing assistive technology purchases or service delivery to individual consumers.

Effective: August, 2000
## Wisconsin Assistive Technology Initiative
### Assistive Technology Checklist

### Reading, Studying, and Math

**Reading**
- Changes in text size, spacing, color, background color
- Book adapted for page turning (e.g., page fluffers, 3-ring binder)
- Use of pictures with text (e.g., Picture It, Writing with Symbols)
- Talking electronic device to pronounce challenging words (e.g., Franklin Bookman, American Heritage Dictionary)
- Scanner w/ OCR and talking word processor
- Electronic books

**Alternate Computer Access**
- Keyboard w/ Easy Access or Access DOS
- Word Prediction, abbreviation/expansion to reduce keystrokes
- Keyguard
- Arm Support (e.g., Ergo Rest)
- Track ball/track pad/ joystick w/ onscreen keyboard
- Alternate keyboard (e.g., IntellitKeys, Disc. Board, TASH)
- Mouth stick/head pointer w/ standard/alternate keyboard
- Head Mouse/Head Master/Tracker w/ onscreen keyboard
- Switch with Morse Code
- Switch with scanning
- Voice recognition software

**Learning/Studying**
- Print or picture schedule
- Low tech aids to find materials (i.e., index tabs, color coded folders)
- Highlight text (e.g., markers, highlight tape, ruler, etc.)
- Voice output reminders for assignments, steps of task, etc.
- Software for manipulation of objects/concept development (e.g., Blocks in Motion, Toy Store) - may use alternate input device, e.g., switch, touch window
- Software for organization of ideas and studying (e.g., Inspiration, Claris Works Outline, PowerPoint, etc.)
- Recorded material (books on tape, taped lectures with number coded index, etc.)

**Math**
- Abacus/Math Line
- Calculator/calculator with print out
- Talking calculator
- Calculator w/ large keys and/or large LCD print out
- On screen calculator
- Software with cueing for math computation (may use adapted input methods)
- Tactile/voice output measuring devices (e.g., clock, ruler)

**Recreation & Leisure**
- Adapted toys and games (e.g., toy with adaptive handle)
- Use of battery interrupter and switch to operate a toy
- Adaptive sporting equipment (e.g., lighted/bell ball, velcro mitt)
- Universal cuff to hold crayons, markers, paint brush
- Modified utensils (e.g., rollers, stampers, scissors)
- Ergo Rest to support arm for drawing/painting
- Drawing/graphic program on computer (e.g., Kid Pix, Blocks in Motion)
- Playing games on the computer
- Music software on the computer

### Writing

**Mechanics of Writing**
- Pencil/pen with adaptive grip
- Adapted paper (e.g., raised line, highlighted lines)
- Slantboard
- Typewriter
- Portable word processor
- Computer
- Other:

**Alternate Computer Access**
- Keyboard w/ Easy Access or Access DOS
- Word Prediction, abbreviation/expansion to reduce keystrokes
- Keyguard
- Arm Support (e.g., Ergo Rest)
- Track ball/track pad/ joystick w/ onscreen keyboard
- Alternate keyboard (e.g., IntellitKeys, Disc. Board, TASH)
- Mouth stick/head pointer w/ standard/alternate keyboard
- Head Mouse/Head Master/Tracker w/ onscreen keyboard
- Switch with Morse Code
- Switch with scanning
- Voice recognition software

**Composing Written Material**
- Word cards/word book/word wall
- Pocket dictionary/thesaurus
- Electronic/talking electronic dictionary/thesaurus/spell checker (e.g., Franklin Bookman)
- Word processor w/ spell checker/grammar checker
- Word processor w/ word prediction (e.g., Co:Writer) to facilitate spelling and sentence construction
- Talking word processor for multisensory typing
- Multimedia software for expression of ideas (assignments)
- Voice recognition software

**Communication**
- Communication board/book with pictures/objects/letters/words
- Eye gaze board/frame
- Simple voice output device (e.g., BigMack, Cheap Talk, Voice in a Box, MicroVoice, talking picture frame, Hawk)
- Voice output device w/ levels (e.g., 6 Level Voice in a Box, Macaw, Digivox, Voice output device w/ icon sequencing (e.g., AlphaTalker Liberator, Chatbox)
- Voice output device w/ dynamic display (e.g., Dynavox, Speaking Dynamically w/ laptop computer/Freestyle)
- Device w/ speech synthesis for typing (e.g., Cannon Communicator, Link, Write:Our Loud w/ laptop computer)

### Other:

Rev. 9/98
Wisconsin Assistive Technology Initiative
Assistive Technology Checklist

Activities of Daily Living (ADLs)
- Adaptive eating devices (e.g. foam handle on utensil)
- Adaptive drinking devices (e.g. cup with cut out rim)
- Adaptive dressing equipment (e.g. button hook, reacher)
- Other:

Mobility
- Walker
- Grab rails
- Manual wheelchair
- Powered mobility toy (e.g. Cooper Car, GoBot)
- Powered wheelchair w/ joystick, head switch or sip/puff control
- Other:

Environmental Control
- Light switch extension
- Use of Powerlink and switch to turn on electrical appliances (e.g. radio, fan, blender, etc.)
- Radio/ Ultra sound/ remote controlled appliances
- Other:

Positioning & Seating
- Non-slip surface on chair to prevent slipping (e.g. Dycem)
- Bolster, rolled towel, blocks for feet
- Adapted/alternate chair, side lyer, stander
- Custom fitted wheelchair or insert
- Other:

Vision
- Eye glasses
- Magnifier
- Large print books
- CCTV (closed circuit television)
- Screen magnifier (mounted over screen)
- Screen Magnification Sftwr. (e.g. CloseView, Zoom Text)
- Screen color contrast (e.g. CloseView)
- Screen reader (e.g. OutSpoken), text reader
- Braille translation software
- Braille printer
- Enlarged or Braille/tactile labels for keyboard
- Alternate keyboard with enlarged keys
- Braille Keyboard and Note taker (e.g. Braille N Speak)
- Other:

Hearing
- Pen and paper
- Computer/portable word processor
- TTY for phone access w/ or w/o relay
- Signaling Device (e.g. vibrating pager)
- Closed Captioning
- Real time captioning
- Computer aided notetaking
- Screen Flash for alert signals on computer
- Personal amplification system
- Hearing Aid
- FM system
- Loop system
- Infrared system
- Phone amplifier
- Other:

Comments:

Rev 9/98
Wisconsin Assistive Technology Initiative
Assistive Technology Consideration Guide

1. What task is it that we want this student to do, that s/he is unable to do at a level that reflects his/her skills/abilities (writing, reading, communicating, seeing, hearing)? Document by checking each relevant task below. Please leave blank any tasks which are not relevant to the student's IEP.

2. Is the student currently able to complete tasks with special strategies or accommodations, if yes, describe in column A for each checked task.

3. Is there available assistive technology (either devices, tools, hardware, or software) that could be used to address this task? (If none are known, review WATT's AT Checklist) If any assistive technology tools are currently being used (or were tried in the past), describe in column B.

4. Would the use of assistive technology help the student perform this skill more easily or efficiently, in the least restrictive environment, or perform successfully with less personal assistance? If yes, complete column C.

5. Are there assistive technology services (more specific evaluation of need for assistive technology, adapting or modifying the assistive technology, technical assistance on its operation or use, or training of student, staff, or family) that this student needs? If yes, describe what will be provided, the initiation and duration:

Follow-up Plan

Who & When - Set specific date now

Lynch & Reed (1997), Incorporation from SETT framework (Zabala, 1994)

Note: It is not intended that you write on this page. Each topic should be written where everyone can see them, i.e. on a flip chart, board or overhead projector - information should then be copied on paper for file or future reference.
Wisconsin Assistive Technology Initiative
Assistive Technology Assessment Procedure Guide
for School Districts/Birth-3 Programs

School District: ________________________________
School: ________________________________
Student: ____________________________
Grade: ____________________________
Team Members: ____________________________

Date Completed: ____________________________

Before the Meeting:

Step 1: Team Members Gather Information. Review existing information regarding child's abilities, difficulties, environment, and tasks. If there is missing information, you will need to gather the information by completing formal tests (e.g. Bruininks-Oseretsky, Peabody, etc.), completing informal tests, and/or observing the child in various settings. The WATT Student Information Guide and Environmental Observation Guide are used to assist with gathering information.

Step 2: Schedule Meeting. Schedule the meeting with team. Team includes: Parents, student (if appro.), service providers (e.g. Spec. Ed. Teach., Gen. Ed. Teach., SLP, OT, PT, Admin.), and others.

At the Meeting:

Step 3: Team Completes Problem Identification Portion of AT Planning Guide. Choose someone to write all topics where everyone participating can see them. The emphasis in Problem Identification is identifying tasks the child needs to be able to do and the relationship of the child's abilities/difficulties and environment to the child's performance of the tasks.

Note: Team should move quickly through listing "Student's Abilities/Difficulties related to tasks" (5-10 min). Team should move quickly through "Environmental Considerations" (5-10 min.), listing key aspects of the the environment in which the child functions and the child's location and positioning within the environment. Identifying the Tasks the child needs to be able to do is important because the Team cannot generate AT Solutions until the Tasks have been identified.

Step 4: Choose Tasks for Solution Generation. Identify 1 (or possibly 2) critical tasks for which the team will generate solutions.

Step 5: Solution Generation. Brainstorm all possible solutions.

Note: The specificity of the solutions will vary depending on the knowledge and experience of the team members; some teams may generate names of specific devices with features that meet the child's needs, other teams may simply talk about features that are important, e.g. "needs voice output", "needs to be portable", "needs few (or many) messages", "needs input method other than hands", etc. Teams may want to use specific resources to assist with Solution Generation. These resources include: the AT Checklist, the ASNAT manual, the Tool Box in Computer Resources for People with Disabilities, AAC match or Needs First software, Trace Resource Book. Closing the Gap Directory, and/or WATT consultant.

Step 6: Solution Selection. Discuss the solutions listed, thinking about which are most effective for the student. It may help to identify solutions which can be implemented 1) immediately, 2) in the next few months, and 3) in the future. At this point list names of specific devices, hardware, software, etc. If the team does not know the names of devices, etc., use resources noted in Step 5.

Step 7: Implementation Plan. Develop Implementation Plan (including trials with equipment) - being sure to assign names and dates and Follow Up Plan.

Reminder: Steps 3-7 occur in a meeting with all topics written where all participants can see them because decision making is a process which involves service providers who work with a child in his/her customary environment and the child's parents. Use a flip chart, board or overhead during the meeting and ensure that someone transfers the information to paper for the child's file or future reference.

After the Meeting:

Step 8: Implement
Step 9: Follow Up on Planned Date

6/10/2002
Acoma Pueblo, also called Sky City, is one of nineteen pueblos in New Mexico and Arizona. It is located west of Albuquerque and approximately twelve miles east of Grants. Acoma means "People of the White Rock."

Nearby Laguna Pueblo ("Lake People") consists of six villages and is the largest Keresan speaking pueblo. It is located approximately 45 miles west of Albuquerque on Interstate 40.

Students in the Laguna and Acoma communities may attend public, private, grant, or BIA (Bureau of Indian Affairs) schools during the course of their education, and maintain deep connections to their traditions and cultures through participation in feasts, celebrations, sporting events, and dances. Both pueblos have well-established programs in early intervention and child care.

Technologies are being employed at all levels to maximize the learning capacity of students, to increase personal independence, and to enhance career opportunities upon graduation. Visitors are welcome in these communities, and are encouraged to see the technology demonstration centers. Please call or make arrangements through the school contacts identified within this brochure.
Who We Are

The Laguna & Acoma Pueblos Technology Opportunities Project (LAPTOP) is a special outreach project of the New Mexico Technology Assistance Program. The project is funded as a Demonstration Grant for Indian Children under the U.S. Department of Education, Office of Elementary and Secondary Education.

What We’re Doing

We have developed a Consortium of agencies and schools who work together to meet the assistive and instructional technology needs of Indian children with disabilities. Our primary goal is to build local capacity within the community that will enable us to 1) meet the specialized needs of our students, and 2) establish a loan bank of assistive and adaptive technologies.

We realize that technologies are sometimes complex and sophisticated; a loan bank will offer students an opportunity to try a device before any decisions are made to purchase a solution that may not be the best match for the student.

Types of Services

Through our Consortium efforts and Cooperative Agreements with schools, we have designed a program that is responsive to the unique needs of students and is sensitive to the cultural values and practices of Native American families. Direct services provided through the grant include:

- individualized training that’s customized to meet the needs of therapists, teachers and parents of children who are receiving assistive technology devices and services

- access to New Mexico’s Technology Assistance Program (NMTAP) personnel and technical assistance

- information related to all facets of AT use, including articles, reports, videos, newsletters, Internet sites, support groups, local service providers, and device manufacturers (vendors).

- opportunities to network with other students and families who are using assistive technology devices and receiving services

- assistance in seeking funding options when and if purchase is warranted.

How to Request Assistance

Teachers and school personnel have access to Student Referral Forms for AT services. Each school and agency has a contact person who attends regular meetings of the Advisory Council. These individuals bring referrals and issues to Council members, who then prioritize the referrals according to the potential impact of technology on student needs. Parents and families may request assistance through Kathy McWhorter, Project Coordinator, at (505) 798-0425, email: kmcwhorter@state.nm.us or through Barbara Alvarez, Special Education Coordinator at Sky City Community School (505) 552-6671, email: alvarez_bja@hotmail.com

Contacts and representatives include:

Acoma Head Start: Barbara Antonio and LouAnn Tenequer
Laguna Division of Early Childhood: Rebecca Viers
Sky City Comm School: Barbara Alvarez
Laguna Elementary: Karen Antonio
Laguna Middle School: Tatiana Abras
Laguna Acoma High: Carol Prewett
Laguna Acoma Vocational Rehab: George Potter and Dr. Marilyn Johnson
Laguna Middle School is owned and operated by the Pueblo of Laguna Indian tribe, under the auspices of its own Department of Education. The school serves approximately 200 students in grades 6, 7, and 8. LMS is located on the Pueblo of Laguna Indian reservation, approximately 50 miles west of Albuquerque, New Mexico.

What are the laws that require AT consideration?

Reauthorization of PL 94-102 or Individuals with Disabilities Education Act (IDEA) extends assistive technology device and service definitions to education. This law reauthorized by Congress in 1991 mandated that local educational agencies be responsible for providing assistive technology devices and services if these are required as part of the child's educational or related services or as a supplementary aid or service. Any recommendations, however, must be directly related to the child's educational program.

LAPTOP PROJECT
Parent Permission/Release Form

By my signature below, I am granting permission for the Laguna-Acoma Pueblos Assistive Technology Project to conduct assessment for use of assertive technologies for my daughter/son.

I understand that these assessments will only be used to identify specific technology needs that may support my child's individualized educational program in school. I further agree to allow the school/organization to release necessary information to LAPTOP personnel to assist in evaluation.

This is where you can find basic information on occupational therapy, diagnosis and therapy strategies.

### Understanding the Basics of Occupational Therapy

**What is Occupational Therapy (OT)?**

Occupational therapy is a profession that uses therapeutic activities, assistive technology, and environmental modifications, to help people who have a physical, cognitive, sensory, motor, and/or psychological disability become as independent as possible in their work, self-care, and leisure activities.

**Where do occupational therapists work?**

1. School systems
2. Hospitals
3. Nursing homes
4. Home health agencies
5. Juvenile and adult jails
6. Psychiatric hospitals
7. Hand therapy clinics
8. Outpatient clinics
9. Universities and colleges
10. Community programs such as homeless shelters
11. Early intervention programs
12. Residential facilities
13. Independent living facilities
14. Hospice programs
15. Volunteer agencies such as Easter Seals
16. Private practice
17. Work hardening programs
18. Rehabilitation centers

Who receives OT services?

1. **At-risk newborns** who might be having difficulties in the areas of play, self-help skills (i.e., feeding, sleeping), behavioral (i.e., attaching to family members), speech language, communication, vision, hearing, fine and gross motor skills (i.e., moving arms and legs)

2. **Infants and toddlers** who might be having developmental delays in the areas of speech language, communication, vision, hearing, fine and gross motor (i.e., rolling, standing, walking, running), self-help skills (i.e., feeding, dressing, bathing, toileting), behavior (i.e., understanding and comprehending information, following verbal directions, playing with others, interacting with adults and peers), play skills (i.e., playing with toys)

3. **Children** who might be having problems in the areas of learning (i.e., cutting, coloring, learning letters and colors), speech language,
What are some of the diagnosis that occupational therapists work with?

1. **Developmental Disorders**: cerebral palsy, mental retardation, attention deficit disorders, child abuse, learning disabilities, various syndromes (Rett’s), and spina bifida

2. **Sensory Disorders**: visual impairments or blindness, deafness, chronic pain

3. **Nervous System, Injuries, and Cardiopulmonary Disorders**: amyotrophic lateral sclerosis, strokes, pulmonary diseases, coma, epilepsy, multiple sclerosis, Parkinson’s disease, muscular dystrophy, amputations, athletic injuries of the hands, back injuries, carpal tunnel syndrome, fractures, spinal cord injuries

4. **Musculoskeletal Disorders**: arthritis, osteoporosis

5. **Systemic, Immunologic, and Skin Disorders**: AIDS, cancer, diabetes, kidney disease, scleroderma, burns

6. **Mental/Emotional Disorders**: depression, substance abuse, autism, elder abuse, attachment disorders, bipolar, schizophrenia, eating disorders, personality disorders

What is the educational requirement for occupational therapists (OTR) and certified occupational therapy assistants (COTA)?

**Occupational Therapists** (OTR): must have at least a baccalaureate degree with courses in biology, behavioral sciences, pathology, and specific occupational therapy techniques. The educational program must be accredited by the American Medical Association Committee on Allied Health Education and by the American Occupational Therapy Association.
After completing all baccalaureate coursework, occupational therapists must complete a minimum of 6 months of full-time internship. Following the internship, occupational therapists are eligible to take the certification examination to become a registered therapist (OTR). All states requiring licensure accept the certification and educational requirements for state licensure. In the near future, occupational therapists will be required to have a master's degree prior to completing the internship and certification.

Certified Occupational Therapy Assistants (COTA) must complete two years of coursework in an accredited program and complete a two-year internship. COTAs also take a certification examination and must be supervised by an OTR.

NMTAP is a program of the New Mexico State Department of Education, the Division of Vocational Rehabilitation (DVR).

The NMTAP/DVR is funded under a grant from the National Institute on Disability and Rehabilitation Research (NIDRR), U.S. Department of Education. This electronic publication does not necessarily reflect the views of NIDRR, and no official endorsement of material should be inferred.
**NMTAP’s Special Projects**

**The Navajo Assistive Technology Project**

An Assistive Device Loan Equipment Program for the Navajo Nation

The Navajo Assistive Bank of Loanable Equipment (Navajo-ABLE) is a program on the Navajo Nation that provides assistive technology devices, services, technical information, funding information, and training for Navajo children and youth with disabilities.

**Who is Eligible for Assistance?**

Our mission is to help Navajo people enhance their quality of life through the use of assistive technologies. Services are available for Navajo individuals, family members, educators, therapists and others who live on the Navajo Nation as well as in the Alamo, Canoncito and Ramah Reservations.

**Services and Programs**

**Training:** Our staff can bring training and consultation to you. We can tailor the experience to meet your needs.

**Advocacy:** We can help you find a technology solution that will enhance your skills and increase your independence.

**Device Labs and Demonstrations:** We can
demonstrate a range of assistive technology options and systems for you.

**Short-Term Loans:** We have in place a special loan program that will help individuals try out various assistive devices before purchasing one.

**Workshops & Trainings:** We have designed training materials and resources that are available for you to use. We can also “bring the program to you.” Some of our training topics include:

- Introduction to Assistive Technology (AT)
- Assistive Technology in the Classroom
- Enhancing Communication with AT
- Using AT in Early Intervention Programs
- Adapting Toys for Young Children

For more information about the Navajo-ABLE project, please contact:
Kathy McWhorter, Navajo-ABLE Project Director (800) 866-2253 or via e-mail kathym@state.nm.us.

Or you may contact the Navajo Nation Assistive Technology Coordinator at The Office of Special Education and Rehabilitation Services in Window Rock, Arizona at (502) 871-6338.

---

**The Laguna & Acoma Pueblos Technology Opportunities Project “LAPTOP”**

A Community-Based AT Consortium Supporting the Unique Needs of Indian Children Living in the Laguna & Acoma Pueblos

**Who We Are**

The Laguna & Acoma Pueblos Technology Opportunities Project (LAPTOP) is a special outreach project of the New Mexico Technology Assistance Program.
What We're Doing

We have developed a Consortium of agencies and schools who work together to meet the assistive and instructional technology needs of Indian children with disabilities. Our primary goal is to build local capacity within the community that will enable us to:

1. Meet the specialized needs of our students, and
2. Establish a loan bank of assistive and adaptive technologies.

We realize that technologies are sometimes complex and sophisticated; a loan bank will offer students an opportunity to try a device before any decisions are made to purchase a solution that may not be the best match for the student.

Types of Services

Through our Consortium efforts and Cooperative Agreements with schools, we are designing a program that is responsive to the unique needs of students and is sensitive to the cultural values and practices of Native American families.

Direct services include:

- individualized training that's customized to meet the needs of therapists, teachers and parents of children who are receiving assistive technology devices and services;
- access to New Mexico's Technology Assistance Program (NMTAP) personnel and technical assistance;
- information related to all facets of AT use, including articles, reports, videos, newsletters, Internet sites and device manufacturers.

How to Request Assistance

The referrals are prioritized according to need. The process works like this:

Teachers and school personnel have access to Student Referral Forms for Assistive Technology (AT) services. Each school and agency has a contact person who attends regular meetings of the LAPTOP Advisory Council. These individuals bring referrals and issues to the Council, who then prioritize the referrals according to the potential impact of technology on student needs.
Parents and families may request assistance through Mike Chambers, the LAPTOP Project Coordinator, at Laguna Middle School.Contacts and agency representatives include:

**Acoma Head Start:** LouAnn Tenequer  
**Laguna Head Start:** Catherine Jarcofsky  
**Division of Early Childhood:** Paula Pino  
**Sky City Elementary:**  
**Laguna Elementary:** Peter Carlson-McQueen  
**Laguna Middle:** Mike Chambers  
**Laguna Acoma High:** Charlene Silva  
**Vocational Rehabilitation:** George Potter

LAPTOP project staff would like to thank the Governor of Acoma Pueblo, the Governor of Laguna Pueblo, and the Superintendent of the Laguna Department of Education for their vision and for their support of this project.

### How to Find Us

For more information, call LAPTOP at 800-866-2253 or contact us at one of the sites below.

**Project Coordination:** Mike Chambers, Special Education Director, Laguna Middle School (505) 552-9091

**Grant Administration:** New Mexico Technology Assistance Program (NMTAP) Kathy McWhorter, LAPTOP Project Director  
800-866-2253 or via e-mail at kathym@state.nm.us

---

**Assistive Device Lemon Law**

The Assistive Device Lemon Law became effective on July 1, 1998 and helps protect people with disabilities from getting stuck with an assistive device that is a “lemon.” Here are some Frequently Asked Questions (FAQs) about the Assistive Device Lemon Law:

**What Devices Does The Law Cover?**
The law covers any assistive device used for "a major life activity", including:

**Mobility:** Manual & motorized wheelchairs, motorized scooters & motorized wheelchair lifts that allow access to motorized vehicles.

**Communication:** Hearing aids, telephone communication devices for the deaf, assistive listening devices, and other aids that enhance a person's ability to hear.

**Vision:** Voice synthesized or voice-activated computer software, optical scanners, augmentative communication devices and Braille printers.

**How Does The Law Work?**

If a device doesn't function and it is still under warranty:

The consumer is responsible for:

1. Reporting it to the manufacturer, dealer, or lessor (whomever the consumer purchased the device from), and
2. Making the device available for repair during the warranty period (by mailing it, delivering it, etc.)

The manufacturer is responsible for:

1. Repairing the device at no charge to the consumer.

**What If the Device Isn’t Repaired by the Manufacturer?**

If the device cannot be repaired by the manufacturer after four (4) attempts or is out of service for a cumulative total of 30 days within the warranty period, then:

The consumer is responsible for:

1. Notifying the manufacturer

The manufacturer is responsible for:

1. Replacing the device with a comparable device at no charge to the consumer, or
2. Refunding the full purchase price to the consumer, or
3. Refunding the appropriate proportion of the purchase price to the lessor and the consumer.

**What Do I Do If A Manufacturer is Not Complying**
With The Law?

Contact the Consumer Protection Division of the New Mexico Attorney General's Office at 827-6060 or 800 678-1508.

Home Modifications to accommodate people with disabilities

In the Four Corners area, www.sici.org or call Tom Peoples at San Juan Center for Independent Living (505) 334-5805.

In the Santa Fe region, www.openhands.org or call Chris LaPointe at Open Hands (505) 428-2320 or via e-mail at Chris@openhands.org.

In the Albuquerque area, contact Mark Define at the Independent Living Center 1-800-260-5022.
Here you will find basic information about assistive technology devices and systems.

Basic Definition of Assistive Technology (AT)

Public Law 100-407 defines an assistive technology device as "any item, piece of equipment or product system whether acquired commercially off the shelf, modified, or customized that is used to increase or improve functional capabilities of individuals with disabilities." Assistive technology services are defined as any service that directly assists an individual with a disability in the selection, acquisition or use of an assistive technology device. This means that many of the adaptations, modifications and accommodations made for a person, in order for him or her to participate in their work or home environment, may be considered as assistive technology.

Some examples of AT

Specific areas considered in AT will depend on the person's needs. This section focuses on equipment that could be used with children either within the home or in their school environment.

1. Positioning systems such as wheelchairs, scraps, standing aids, bean bag chairs, walkers, canes, ergonomic chairs
2. Self-care: adapted utensils, raised toilet seats, special devices for dressing, feeding, bathing, grooming, and toileting
3. Augmentative Communication: symbol systems, communication boards, electronic communication devices, speech synthesizers, and communication enhancement software
4. Environmental Control: remote control switches
5. Assistive Listening and Visual Aids: hearing aids, personal FM units, closed caption TV, enlarged images, tactile and auditory materials, cassette tape recordings, large print books, brailed materials, computer screen reading software
6. Computer Access: input devices such as switches, expanded keyboards, mouse, trackball, touch window, speech recognition, head pointers, key guard, text enlargement
7. Computer Based Instruction: software that help with written language, spelling, calculation, reading, basic reasoning, and higher level thinking

Who should be considered for AT?

All children who are identified as having exceptional educational needs must be considered for AT. There are no exceptions, or prerequisites, and the determination of whether an AT device or service is required must be made on an individual basis.
What are the laws that require AT consideration?

Reauthorization of PL 94-102 or Individuals with Disabilities Education Act (IDEA) extends assistive technology device and service definitions to education. This law reauthorized by Congress in 1991 mandated that local educational agencies be responsible for providing assistive technology devices and services if these are required as part of the child's educational or related services or as a supplementary aid or service. Any recommendations, however, must be directly related to the child's educational program.

Basic Definition of Assistive Technology (AT)

Public Law 100-407 defines an assistive technology device as "any item, piece of equipment or product system whether acquired commercially off the shelf, modified, or customized that is used to increase or improve functional capabilities of individuals with disabilities." Assistive technology services are defined as any service that directly assists an individual with a disability in the selection, acquisition or use of an assistive technology device. This means that many of the adaptations, modifications and accommodations made for a person, in order for him or her to participate in their work or home environment, may be considered as assistive technology.

Some examples of AT

Specific areas considered in AT will depend on the person's needs. This section focuses on equipment that could be used with children either within the home or in their school environment.

1. Positioning systems such as wheelchairs, scraps, standing aids, bean bag chairs, walkers, canes, ergonomic chairs
2. Self-care: adapted utensils, raised toilet seats, special devices for dressing, feeding, bathing, grooming, and toileting
3. Augmentative Communication: symbol systems, communication boards, electronic communication devices, speech synthesizers, and communication enhancement software
4. Environmental Control: remote control switches
5. Assistive Listening and Visual Aids: hearing aids, personal FM units, closed caption TV, enlarged images, tactile and auditory materials, cassette tape recordings, large print books, brailled materials, computer screen reading software
6. Computer Access: input devices such as switches, expanded keyboards, mouse, trackball, touch window, speech recognition, head pointers, key guard, text enlargement
7. Computer Based Instruction: software that help with written language, spelling, calculation, reading, basic reasoning, and higher level thinking

All children who are identified as having exceptional educational needs must be considered for AT. There are no exceptions, or prerequisites, and the determination of whether an AT device or service is required must be made on an individual basis.
Thanks to NMTAP, Students Able to Begin College & Careers

Paul Lovato is a charming and articulate 18-year-old who graduated last spring from Gallup High School. Paul has a skin condition called epidermolysis bullosa, which causes severe blistering of his skin, and for which there is no cure. According to Paul, his skin is "not as tough as everybody else's" and the disease especially affects his hands, feet, and elbows.

In order for Paul to attend his elementary school classes, his mother purchased a scooter for him. Then, while in high school, Paul obtained a laptop computer from the school district to use for his school and homework, and he also received a loan from the district of a new scooter when he outgrew his old one.

However, like other transitioning students, once he finished high school, Paul would no longer be able to use the scooter and the laptop because they belong to the school district. Paul was not sure how he would fulfill his goal of attending college without these assistive devices.

Fortunately for Paul, one of his teachers, Ms. Mandrell, had heard of a program for transitioning students run by NMTAP's ABLE (Assistive Bank of Loanable Equipment) Program. After contacting NMTAP, an IEP (Individualized Education Plan) meeting was held with Paul, his teachers, and therapists to identify the assistive devices that would most benefit Paul.

Now, thanks to a loan from ABLE, Paul is attending the Gallup branch of the University of New Mexico on his new Invacare Lynx LX3 Scooter. He uses a Panasonic Toughbook laptop along with Dragon Naturally Speaking, a type of voice recognition software that he uses when his hands are sore. When asked what he thought of this whole process to get new equipment for college, Paul said, "I'm glad NMTAP helps people like me. I'm also happy my teachers were kind enough to tell me about the program."

Paul is just one of nine transitioning high school students who received assistive technology this past year with funds appropriated by the New Mexico State Legislature to NMTAP's ABLE program in 1999.

Another recipient of an ABLE loan is Kelli VanCuren, from Los Lunas, NM. A 20-year-old with Cerebral Palsy, Kelli attends TACL (Transition to Adult and Community Living), a program in Los Lunas which works with young adults with disabilities who are 18 to 22 years old. Kelli uses a Dynamyte augmentative communication device in all aspects of her life, but once she turns 22, she will no longer be eligible to use that device because it belongs to the Los Lunas Public Schools' Special Education Department. Kelli is currently working in two supported employment positions, and must use an assistive device to communicate in her jobs.

Haven Cloward, Kelli's Speech Language Pathologist, notified Kelli about the ABLE program, and Kelli has just received a new Dynamyte. Kelli's mother, Sallie VanCuren, stated, "We need more programs like this here in New Mexico. The money allocated by the legislature is way short of what we really could use, and there are more families in our state who need access to these kinds of resources."

We wish the best of luck to Paul & Kelli as they embark on their journey to adulthood!

Tatiana Abras Named AT Coordinator for LAPTOP

On Friday, September 28, a large turnout of representatives from the Acoma and Laguna school communities came to join the new AT Coordinator for the Laguna and Acoma Pueblo Technology Opportunities Project (LAPTOP), Tatiana Abras, OT, present a multimedia overview of the project. Tatiana's presentation, which included music and photos, gave attendees of the LAPTOP Consortium meeting a chance to hear about the project and its assistive technology loan bank for students on the Acoma and Laguna Pueblos. LAPTOP is a federally funded outreach effort of NMTAP that provides assistive technology services and expertise to assist the Acoma and Laguna Pueblos in meeting the unique educational needs of Indian students with disabilities.

As AT Coordinator, Tatiana will be managing the loan bank, initiating procurement for new devices (from LAPTOP Consortium funds) and working with Mike Chambers the Project Coordinator at Laguna Middle School. She'll be inventorying, tracking, updating, and delivering AT equipment, and will be responsible for maintaining and programming the devices, as well as conducting student assessments and coordinating Consortium meetings. Tatiana will continue working half-time as an Occupational Therapist for the Laguna Schools and half-time AT Coordinator. She recently became a certified Assistive Technology Practitioner, joining NMTAP's Kathy McWhorter as one of the only seven ATPs in New Mexico.

Thanks to funding from LAPTOP, over $50,000 worth of equipment is in place in the AT loan bank. AT devices and equipment range from special software for students with visual impairments and learning disabilities, to adaptive computer hardware such as touch screens and extended keyboards, to adapted toys for infants and toddlers.

The next meeting of the Consortium will be held on November 7, 2001 at the Sky City Casino. This luncheon meeting will be a community forum to discuss ways to continue this important program once funding ends next year. For more information on the luncheon meeting, or details on LAPTOP, please contact Tatiana at (505) 552-9091 or e-mail her at tabras@surfcom.com.

5 Once the AT equipment is returned, the client and counselor are required to complete the final portion of the Loan Agreement, submitting a brief summary of how the equipment was used and how it worked.

Rehabilitation Counselors are encouraged to call the NMTAP office with suggestions for equipment they would like to see in the ABLE loan bank and any AT equipment trainings they would like to receive. For more information about ABLE, please call Lone Gulley at 800 866-2253 ext. 8529, or (505) 954-8529, or via e-mail at gulley@state.nm.us. Or, visit NMTAP's website at www.nmtap.com.

Fall 2001 162
Navajo-ABLE Featured in National Magazine Story and in Navajo Times

NMTAP's Kathy McWhorter and Navajo-ABLE were featured in the March 2002 edition of "Advance for Directors in Rehabilitation" magazine. Entitled "Missed Chances," the article discusses the obstacles that Kathy and others have faced with bringing assistive technology to students on the Navajo Nation. Communication issues, the vast, rugged distances between homes on the reservation, and access to funding are just a few of the barriers reviewed in the article. The article ends with an appeal for more professionals to consider working with the Navajo to bring the same services other communities enjoy to the Navajo Nation.

In addition to the national exposure that the program received in "Advance" magazine, a full page report on Rez-Tech 2002 appeared in April in the "Navajo Times", complete with five photos.

Kathy is concluding her work with NMTAP this spring as the grants for both the Navajo-ABLE and LAPTOP programs end on June 30, 2002. Look for an article in our summer newsletter from Kathy as she reflects upon the impact that these programs have had upon the Laguna and Acoma Pueblos and the Navajo Nation.

Attention New Mexico Teachers and Therapists

NMTAP is now lending out AT equipment during the summer from its ABLE Loan Bank to special education teachers and staff whose schools have Cooperative Agreements with NMTAP. This special offer is for those teachers and therapists who want "hands-on" experience with assistive technology for students with disabilities. For more information, please call us at (800) 866-2253 and ask for Lorie Gulley.

New Mexico Technology Assistance Program

Local School Districts Access AT Equipment Through ABLE Loan Bank

Over the past 9 years, many of New Mexico’s school districts have taken advantage of NMTAP’s free loan bank of assistive devices for students. Since 1991, public schools and special education programs have been able to try out and evaluate assistive technology equipment on a short-term basis from NMTAP’s Assistive Bank of Loanable Equipment (ABLE). While we are pleased that so many districts are using the ABLE program, we would like to encourage full participation in this wonderful program by ALL of New Mexico’s school districts and Regional Center Cooperatives. Current participants include:

- Alamogordo Public Schools
- Belen Consolidated Schools
- Central Consolidated Schools
- Cobre Consolidated Schools
- Deming Public Schools
- Espanola Public Schools
- Farmington Municipal Schools
- Gadsden Independent Schools
- Gallup-McKinley County Public Schools
- Los Alamos Public Schools
- Los Lunas Public Schools
- Lovington Public Schools
- Moriarty Municipal Schools
- Pojoaque Valley Public Schools
- Rio Rancho Public Schools
- Roswell Independent Schools
- Santa Fe Public Schools
- Silver Consolidated Schools
- Taos Municipal Schools
- Tucumcari Public Schools

Regional Center Cooperative #1
High Plains Regional Center Cooperative #3
Northeast Regional Center Cooperative #4
Regional Center Cooperative #6
Lea Regional Center Cooperative #7
Pecos Valley Regional Center Cooperative #8
Regional Education Cooperative #9
Southwest Regional Center Cooperative #10

If your child’s school or RCC is not on this list, please urge them to join our program by calling Lorie Gulley at (800) 866-2253 extension 8529. If your school already has an agreement and you want to borrow equipment, please contact Lorie by phone or by e-mail at igulley@state.nm.us. A list of devices available for loan can be found on our website at www.nmtap.com.

AT Action at Sky City Community School

NMTAP’s Native American ABLE program, led by Kathy McWhorter, has recently teamed with the Acoma Pueblo to establish a demonstration classroom at Sky City Community School to showcase AT equipment for Acoma and Laguna students with disabilities.

With examples of classroom applications of assistive technology for students with visual, speech, hearing, cognitive and mobility impairments, the demonstration classroom is open for school personnel and families to observe and learn ways that AT can enhance the educational opportunities for students with disabilities. The AT equipment, devices and components are available for trial use by students, and their teachers, therapists, family members in other settings, as well. “The new classroom provides a wonderful opportunity for students and their teachers, therapists and family members to see AT in use and to borrow it for trial periods,” said Kathy McWhorter, Director of the Native American Project.

The Native American Project is also establishing “adaptive toy chests” at the Early Intervention Centers in the Acoma and in the Laguna Pueblos, which include all sorts of AT devices and toys for infants and toddlers with disabilities. If you are interested in learning more about these Pueblo projects, please contact Kathy McWhorter at (505) 670-4712 or via e-mail at kathym@state.nm.us.
