The Children's Book Council of Australia's (CBCA) Book of the Year Awards for 2001 include a new category--Book of the Year: Early Childhood. This category was introduced because some contemporary picture books are for mature readers, and it was recognized that books for young children were often being overlooked. This guide explores books in all categories of the CBCA shortlist (Early Childhood, Picture Book, Younger Readers, Eve Pownall Award for Information Books) except Book of the Year: Older Readers. The guide cites 23 books in all. It includes discussion points that enable teachers and children to focus on significant aspects of each book. (NKA)
The eagerly awaited shortlist for the Children’s Book Council of Australia Book of the Year Awards has once again been announced. The 2001 awards include one extra category — Book of the Year: Early Childhood. This new category was introduced because some contemporary picture books are for mature readers, and it was recognised that books for young children were often being overlooked.

This guide explores books in all categories of the CBCA shortlist except Book of the Year: Older Readers. It includes discussion points that enable teachers and children to focus on significant aspects of each book.

As they come to a book, children should be encouraged to evaluate its originality and appeal, starting with the cover. As they engage with the body of the text, children should consider the ways in which language works to create a theme and style. In association with that process, children might also consider the effect of illustrative elements on mood and meaning, along with features of overall book production. With picture books, the unity of artistic and literary elements is an important consideration.
