This final report describes activities and accomplishments of the Through Shared Windows (TSW) Outreach Project, a 4-year project at the University of New Mexico designed to improve services to young children with disabilities and their families. Three major outcomes were accomplished. First, a Web site was developed that focuses on observational assessment in early childhood and intervention and promotes recommended practices including innovative assessment models, processes, and resources. Second, an undergraduate and graduate course was designed and offered for 3 semesters to 55 students at the University of New Mexico. The course was based on the "Performance Competence Framework," an interdisciplinary holistic approach to assessment and intervention. The third outcome was the national dissemination of information about the "Performance Competence Framework" by a 4-week abridged online course provided to faculty members in eight states. Individual sections report on the project's scope of work, the outreach model, methodological or logistical problems and resolutions, evaluation findings, the project's impact, and future activities. Appendices include details of the TSW online course and its evaluation, details of the Early Childhood Resources Web site and its evaluation, information on faculty participation, and TSW resources including the instructors' guides for both the traditional and online course, and the TSW course outline. (Contains 45 references.) (DB)

Through Shared Windows (TSW) Outreach Project  
Executive Summary  
July 1, 1999 to June 30, 2003

The Through Shared Windows OUTREACH Project accomplished three major outcomes. The outcomes included: the development and refinement of a public assessment web site, Early Childhood Resources: New Assessment - www.newassessment.org; the development and provision of an innovative online assessment course, Through Shared Windows; and the design and implementation of a Faculty Institute for the participating partner states. All of these outcomes were designed to improve the quality of services to young children, with disabilities and their families. All of the project’s efforts were coordinated with state agencies and statewide organizations that were involved with early intervention and preschool services.

The first outcome involved the development of a web site to advance the field of early childhood and intervention in the area of assessment by promoting recommended practices including innovative assessment models, processes and resources that benefit young children and their families. The site was periodically refined over the project period making it easier to navigate and creating an accessible version of the site for people with disabilities. A new feature was created and added to the site the final year, ‘Visiting Expert’, to showcase innovative information related to assessment from a variety of professionals in the field. In addition, the faculty members at the University of New Mexico and participating partner state’s institutions were invited to display information on the site and/or use it as a resource for their students.

The second outcome involved designing an undergraduate and graduate level course through the University of New Mexico and offering it for three semesters. The course is based on the Performance Competence (PC) Framework that promotes a holistic view of the child within the context of the child’s personal characteristics, preferences, environments, family and culture. It provides a structure for team members from a variety of disciplines to understand and interpret key issues and plan appropriate supports. It is not a new set of information or knowledge to be memorized, rather a re-ordering of known information into a holistic picture that provides a reference for understanding a larger body of information. The Framework was developed to identify critical factors that support and compromise a child’s performance and competence. Each semester the feedback from the student and faculty evaluation of the online course guided the course revisions.

During the three semesters the course was offered, 55 students enrolled through the University of New Mexico (25 students in the spring 2001 semester, 8 students in the fall 2001 semester and 22 students in the spring 2002 semester). These students were in upper level undergraduate or graduate programs in Early Childhood Multicultural Education, Family Studies or Speech Language Pathology or were employed in New Mexico Early Intervention Programs.
Evaluation Data was collected from students at the end of each semester and Follow-Up Surveys were mailed three months after each semester ended to gather information on the impact of the course on student's assessment philosophy and practice.

The final outcome was to disseminate information nationally on the Performance Competence Framework by providing the course to faculty members around the country in participating states. Part C and/or 619 Coordinators in eight partner states (New Mexico, Hawaii, Washington, North Dakota, Texas, Connecticut, Colorado, and Utah) identified higher education faculty and inservice trainers for participation in the project. Faculty members were asked to commit to taking a four-week abridged online course based on the Performance Competence Framework in the summer 2001, implementing an application activity at their institution in the fall 2001 and attending a Faculty Institute in the Spring 2002 in Albuquerque. The Colorado and Utah faculty participants were unable to commit to the requirements.

Participants from six of the states (Connecticut, Hawaii, New Mexico, North Dakota, Texas, and Washington) took the online course and completed evaluations. Each participant designed, planned and executed an Application Activity at their institution using the PC Framework content and collected evaluation data. Eight faculty members from University of Hawaii, New Mexico State University, University of Washington, Seattle Pacific University, University of North Dakota, Tarlatan State University/TX, and Gateway Community College/CT attended the Faculty Institute to learn the content and technology needed to deliver the course online at their institution. During the Institute each participant developed a plan on how they were going to incorporate the course material at their institution. Participants were provided a variety of materials to facilitate their ability to disseminate the information in a variety of ways including the *TSW Online Course (HTML format)*, the *TSW Curriculum*, the *TSW Instructor Guide*, and the *TSW Inservice Training Manual*.

In addition, during the Institute the group discussed and planned further participation in a continuation project based on TSW Outreach. The participants agreed to work collaboratively on a new Outreach proposal where they would serve as mentors to other faculty at other institutions to learn the content and technology involved in delivering the TSW Online Course. Each participant was asked to develop a one-page project description of how they would implement the project in their state.

Goals, Objectives, Activities, Final Update
GOAL: Provide training, technical assistance, and dissemination to professionals, families, and state Personnel in the Through Shared Windows (Performance Competence) model components of assessment in order to improve the developmental outcomes for young children birth through elementary school.

1.0 Objective: Establish management, recordkeeping, evaluation, and communication procedures for the Outreach Project.

ACTIVITIES

1.1 Implement project management plan to accomplish all objectives:
- set up fiscal & record keeping files;
- set up project phases using management by objectives;
- develop detailed timelines and responsibilities;
- initiate evaluation plan;
- set up program for data entry, and conduct periodic analyses and summaries of data.

1.2 Contact partner states and review goal and objectives. Determine policies and procedures for training and technical assistance and for data gathering that are responsive to state needs and preferences.

1.3 Establish advisory committee for project composed of state personnel, parents, and professionals - set up contact schedule and mail project information.

1.4 Establish listserv for agency personnel in partner states.

UPDATE

Fiscal and record keeping files were set up. Additional technical staff was hired including graduate assistants. Roles and Responsibilities were assigned (see Appendix A) and each team member was assigned activities/tasks to address their responsibilities. Weekly work sessions with technical team were scheduled. NEC*TAS provided a consultation on distance education, on line learning instruction, and evaluation of distance training.

PI made initial contact with Partner states. Follow-up packets were sent to articulate state criteria and responsibilities. Timelines established for course and data systems. Director had ongoing discussions with states regarding their role and participation in project. (See Appendix - List of State Agency Participants)

Advisory committee was established for input on the public web site, New Assessment: Early Childhood Resources. Two half day facilitated brainstorming meetings were conducted (see Appendix C).

Listserv for agency personnel was established and updated to reflect new personnel and participants. Access to the Listserv was through the New Assessment Web Site.
1.5 Provide written procedures and guidelines for the development of each state's action plan to include timetables, roles and responsibilities.

1.6 Develop state action plans.

1.7 Design data base for documenting activities within each state – add additional state factors as requested by states.

The format for a needs assessment that aided in creation of the state Action Plan was developed (see Appendix D).

Needs assessment process was ongoing with state agency personnel and plans were developed and modified as personnel and priority changes occurred.

On Line Data base was developed for each state and is accessible through the web site.
2.0 Objective: Implement initial support and agency coordination plans with the partner states.

3.0 Objective: Complete state action plans and deliver correspondence and on-line courses to participant teams in the states.

**ACTIVITIES**

3.1 Complete state action plans with each state to include initial training teams, (Note: some states want to start by targeting particular districts or geographical areas, other states want to select teams from around the state, and some states are interested in teams that could become “trainer teams”.) contact information, support agreements, timelines and evaluation data collection and reporting.

3.2 Establish planning, preparation, activities, outcomes, cost analysis, and site arrangements for all training activities.

3.3 Send out state action plan for review, revise and finalize.

3.4 Review recruitment plan and materials with each state and mail.

3.5 Finalize content and sequence for correspondence self-study modules, consult with instructional designer and potential participants within New Mexico (pilot review) and finalize.

3.6 Finalize presentation, content, sequence and protocols for on-line course, consult with instructional designer, programmer and pilot on UNM Home Page -- finalize on-line course.

3.7 Establish detailed timelines and course syllabus for each training option (e.g. four month course or self-paced course), secure CEUs, set up recordkeeping procedures and procedural guidelines for training participants.

**UPDATE**

Washington, Utah and New Mexico identified training teams to participate in the online course that started in August 2000. The other five states developed action plans for the Fall 2000.

A cost analysis was determined. Initial site arrangements were discussed.

Action plans were reviewed in July 2000.

Recruitment plans were reviewed and flyers and faculty information packets were sent to each state agency contact to disseminate.

This timeline was revised to Fall 2000 because there was not a request for a correspondence course.

Online course outline, sequence, course content, activities, protocols, and evaluation component were finalized (see Appendix E). The course was piloted in July 2000 with 6 students.

Timelines, record keeping system, and guidelines for the Fall course were established (see Appendix).
3.8 Mail correspondence self-study modules to participant teams in each state and set up first audio conference.

3.9 Prepare flyers for on-line course and mail to states.

3.10 Deliver on-line course to selected participants from each of the states.

3.11 Conduct monthly review of state action plans and participant progress.

This activity was eliminated because there were no requests for a correspondence course. The online course has been printed in a notebook format and could easily be adapted for self-study purposes (see Appendix).

Flyers were prepared and mailed to states for dissemination. Separate registration brochures were developed for credit and certificate courses.

The first four modules of the online course were piloted during the summer 2000 with 6 students. Thirty students were selected from the first three participating states to take the course during the Fall semester 2000. Twenty-four students were selected from New Mexico to take the course during the Spring 2002 semester (see Appendix E – Student Data).

Plans were reviewed periodically during the course.
4.0 Objective: Provide states with an in-depth, comprehensive and interactive telecommunications system to support quality assessment of young children.

ACTIVITIES

4.1 Meet with website designer/programmer and instructional designer to determine the initial format and programming for website. (Model websites related to early childhood were identified, e.g. "Early Childhood and Family Web Corner").

4.2 Complete website design and programming to include friendly graphics, cues, and consistent movement and feature patterns.

4.3 Develop links to relevant sites and post notices of assessment website to each of these sites.

4.4 Develop new resources and provide on-line (e.g. summaries of research data related to assessment of young children to include specific types of developmental disability such as Autism/PDD.)

4.5 Establish e-mail, bulletin boards, chat rooms, facilitated chats, and online seminars.

4.6 Provide crossover sites to include synchronous and asynchronous formats for interaction and information exchange.

4.7 Establish search engines and intelligent software, prepare on-line, print and telephone information guidelines for addressing, customizing and using website features.

4.8 Establish on-line data collection and evaluation features.

4.9 Launch website and provide on-line support for four hours each day.

COMPLETION DATE

On going work sessions with design team and graduate students as well as input from the Advisory Committee provided the guidance on the format and the content for the web site (see Roles and Responsibilities in Appendix A and Advisory Committee Feedback in Appendix C).

Instructional designers completed the web site with friendly graphics and easy navigation tools (see Appendix C or www.newassessment.org).

Relevant links to relevant sites were selected and included on the site as pop up pages that keep web browsers on the site.

Hired graduate student to provide ongoing gathering and loading of information on the site and develop the 'Expert Consultant' feature.

Various communication systems were loaded on the web site including e-mail, bulletin boards, and chat rooms. Online seminars were replaced with the 'Visiting Expert' feature.

Both synchronous and asynchronous formats were developed for the course and asynchronous formats for the public web site.

A module was developed to address the technological aspects of taking an online course. Information guidelines for use of features for navigating the web site and Help Section were added.

A thorough evaluation plan was developed and an open-ended data collection and knowledge management center was set up (see Evaluation Management Plan in Appendix F). Both qualitative and quantitative data were gathered.

This timeline was revised. The web site was launched summer 2000 with support each day.
### 5.0 Objective: Establish detailed evaluation, oversight, and quality assurance plans for all aspects of the Outreach Project

**ACTIVITIES**

5.1 Identify procedures for evaluating training competencies and for gathering formative data to evaluate content and evaluation of instructors.

5.2 Develop quality indicators for all program objectives and activities with overall quality assurance guidelines - establish matrix to assure all quality indicators are addressed through data collection.

5.3 Establish checkpoints, key decision points and specific outcomes for oversight functions.

5.4 Review all software programs for capabilities to address quantitative and qualitative evaluation questions.

5.5 Identify online data collection and evaluation features to include comment boxes, site counters, pre/post measures, and outcomes measures.

5.6 Determine data analysis and reporting formats (for project and for reports to individual states)

5.7 Conduct instructional utility survey with parents and interventionists

5.8 Develop formats for analysis and reporting of trainee satisfaction, competencies and impact data.

5.9 Review data analysis and prepare reports.

**COMPLETION DATE**

5.1 Procedures for evaluating training competencies and for gathering data on individual instructors were designed.

5.2 Quality indicators and benchmarks were developed as part of the evaluation plan.

5.3 Oversight functions were included with a Decision Point Chart.

5.4 Software programs were chosen to gather both qualitative and quantitative data.

5.5 Software programs were chosen for their evaluation features and ability especially outcome measures.

5.6 Reporting formats were chosen. Periodic updates were provided to State Agencies on Faculty Participation. Annual Progress reports included summary of data collected (see Appendix - Evaluation Data).

5.7 This activity was revised because a large percentage of the students were not working in the field yet. Follow-up surveys with students were included.

5.8 Data formats were designed. Evaluation of course and Follow-up Survey were designed as part of the online course.

5.9 Data analysis was reviewed after each semester and incorporated into annual and final reports.
6.0 Objective: Increase the capacity of states to replicate and adapt the Through Shared Windows Model on an ongoing basis using effective and cost efficient strategies.

ACTIVITIES

6.1 Identify and involve faculty from the IHES in Partner States in guiding and evaluating the Outreach training.

6.2 Identify faculty in Partner States to provide training on the Through Shared Windows Model in cooperation with the National on-line course.

6.3 Conduct a faculty institute to provide materials, and training on pre-service coursework designed for the Performance Competence Model (Through Shared Windows).

6.4 Prepare a descriptive narrative of all distance delivery strategies/options.

6.5 For each strategy/option summarize evaluation data, discuss difficulties/barriers encountered and how resolved, successes, and changes over time.

6.6 For each section, provide a full list of resources used in conceptualization, implementation, and evaluation.

6.7 Prepare a list of the steps taken to identify, implement, and evaluate each strategy option.

6.8 Develop a section with procedural guideline for delivering training, technical assistance, and dissemination using distance learning strategies.

6.9 Finalize the Guide and distribute to partner states at no cost and announce availability to other states at cost through NASDSE and NEC*TAS as well as through website and postings to other sites.

COMPLETION DATE

The NM Faculty person from UNM was actively involved in the project, guiding and evaluating the training. He co-taught the online course with the project director.

Faculty was identified in six states: CT, HI, ND, NM, TX and WA.

Faculty from Washington State, Texas, North Dakota, New Mexico and Connecticut attended the Faculty Institute in March 2002.

Faculty at the Institute received the following materials: TSW Online Course Notebook and HTML CD ROM, TSW Curriculum and Instructor Guide (for a traditional course), TSW In-service Training Manual

Barriers and resource for delivery the Through Shared Windows course were identified during Faculty Institute (See Appendix – Faculty Institute).

List of Resources was developed.

List of steps for each strategy was developed.

Procedural guidelines for delivering training and technical assistance and dissemination of information using distance education strategies were developed. (See Faculty Institute: See Agenda

Guide was finalized and distributed.
7.0 Objective: Based on formative and summative evaluation data, refine, adapt, and increase training, technical assistance and dissemination options available to states.

**ACTIVITIES**

7.1 Prepare summaries of comment boxes with descriptive and narrative information that ties comments to dates, events and areas of interest.

7.2 Prepare summaries of all evaluation data from trainees by type of training selected and state. Conduct analysis to determine what features of the training were successful relative to trainee competencies, outcome objectives achieved, instructional utility rating, and interviews.

7.3 Review time logs, anecdotal records, and cost data kept by outreach instructors to determine capacity, barriers, solutions, and successful aspects of training.

7.4 Review all data collected online to determine where strongest areas of interest are, what requests are being made, what documents are accessed or downloaded, etc.

7.5 Revise correspondence modules and on-line course content and process as suggested by the evaluation data.

7.6 Revise and update website training, technical assistance, communication, and interactive features as suggested by data.

7.7 Distribute summary of findings and updates on new and increased training, technical assistance, and dissemination options to states.

**COMPLETION DATE**

- Features developed and the data is collected and summarized.
- Faculty Participants collected evaluation data from their Application Activity in the Fall 2001. Data is summarized in Appendix.
- Faculty agreed to provide information for the next two years including student satisfaction data, follow-up survey data, and compilation of capacity, barriers and solutions to delivery the course online.
- Review of data and report on interests and requests developed. Compiled a list of online information requests from the web site.
- Online course content modules have been revised each semester based on input from students and co-teachers.
- Web site was updated periodically based on comments from the field and requests for information.
- Updates on the TSW online course offerings have been distributed to participating states.

Performance Lifespan
Competence Framework

A Narrative Discussion
by Meave Stevens Dominguez, Ph.D.

The Performance Competence Framework is not a new set of information or knowledge to be memorized. Rather it is a re-ordering of known information into a holistic picture that provides a reference for understanding a larger body of information. The Framework was developed to present “shared windows,” critical factors that support and compromise a child’s performance and competence. Philosophically, the model promotes a holistic view of the child within the context of the child’s personal characteristics, preferences, environments, family and culture. It provides a structure for team members from a variety of disciplines to understand and interpret key issues and plan appropriate supports and interventions.

The strength of the Framework (as in all models) lies in its applicability to all persons, with or without developmental delays and/or disabilities. If we use the analogy of a person (or child) being like a large mansion full of windows, then specific disciplines (i.e., health, education, occupational therapy, physical therapy, family, speech and language therapy) see through certain windows with special clarity (related to their disciplines). We are dependent on these individual disciplines for specific knowledge that they gain from their particular windows. There are other windows through which all disciplines can see with some clarity. These are common windows of knowledge and allow a shared view of critical factors that affect a child’s (or person’s) performance and competence. Disciplines discuss and share knowledge by referring to these common windows or areas to promote a fuller understanding of the child.

Before discussing the various areas within the Framework, the definitions of the words “performance” and “competence” are presented as used within this model. The developers of the Framework are aware of the many subtle differences across fields of both the definitions and connotations for the terms “performance” and “competence”.

Performance:
The way or manner in which you act, or are able to express yourself or respond, given different situations and requirements.

Personal Competence:
Performing in a way or manner that one (as an individual) feels good about.
Specific Competence

The ability to perform a task or activity in a way that meets some specific standards (e.g., standardized tests, qualifying time for a sports event, repeating the alphabet).

Explanation of the Broad Areas on the Framework

It is helpful in learning to use the Framework as a reference for interdisciplinary work, to look first at the broad areas on the Framework. These broad areas are depicted in Figure 1. The areas are discussed beginning at the bottom of the circle and then moving clockwise around the circle. The center of the model is discussed last and represents not only critical factors but provides an oversight function for reviewing recommendations. The Framework is dynamic, expanding (responses to disequilibrium, stresses, illness) and contracting (equilibrium, adaptive response, sense of comfort/safety) as the person responds to events. Positive or negative impacts (as perceived differently by each person) may hit initially at one point in the Framework and then impact at multiple points. Think of the model as a fluid sphere. When things are going well, the sphere holds its shape and presents an even mix of multiple colored lights. When things are not going well, the sphere begins to lose its shape, the parts begin to separate and the colored lights begin to group together. The lights may shine brightest in certain areas, representing where the individual is experiencing the most difficulty. Some actual examples will be discussed later for clarity.

- How We Started - This area represents information that we can count on or that is fairly consistent over time. We have included in this area basic biological foundations and predispositions that we believe are present at birth. Examples include genetics/culture, temperament, health issue (e.g., anomalies) and genetic disorders.

- How We Process Information - This area represents key factors operating within the central nervous system that underlie individual performance. All performance emerges as an adaptive response. Examples of this would include changes in breathing to accommodate oxygen levels, increased muscle tone to reach and grasp an object, weight shifts to ride a bicycle, writing down information in order to retain it. Each factor in this area plays a key role in making an efficient adaptive response. When looking at Regulation of Physiological status, it is easy to see that a person who has a fever and is nauseous would have difficulty maintaining arousal/alertness, might have reduced Freedom and Control of Movement and subsequent difficulty with all factors underlying efficient adaptive responses. This same sequence could be applied to a child with Down Syndrome who has low muscle tone and frequently experiences respiratory difficulties.

20
What Happens When We are Comfortable and Safe can be viewed as a dynamic and circular process that underlies performance. We, as adults, have and have had innumerable experiences of being able to perform with competence under some circumstances and not under others. For example, when speaking in front of a group of people, an individual may experience a range of feelings related to Comfort and Safety. This range is dependent upon factors such as familiarity with the group members, the content of the speech and the confidence, willingness to take risks and eventual ability to demonstrate competence. In early learning, these cycles are especially vulnerable to varying outcomes. For example, children who have cerebral palsy may frequently feel unsafe or uncomfortable when attempting motor tasks due to poor postural control, limitations in motor control, and/or difficulty communicating fear, etc. (Comfort/Safety). Children who have unintelligible speech may feel unsure about their ability to interact with people and therefore lack the Confidence to attempt social interactions. Children with sensory defensiveness may have such negative experiences engaging in a particular activity that they may be unwilling to attempt that task or any similar tasks again (Risk-Taking). In all three examples, these children will have difficulty acquiring and demonstrating the associated Competence.

How We Interact - This area represents both what we know about early development in children and how we acquire information throughout our adult lives. We learn by “doing,” that is by Mentally Interacting through exploring, problem solving, thinking and reading. We interact with objects and people (Physical and Social Interaction) and exchange information (Communication). When learning how to use a computer, we might begin by reading the manual and learning about the machine’s possibilities. Next we experiment with those possibilities, take a computer class with co-workers and/or ask for help (Physical and Social Interaction). Finally, we are able to use a computer competently to Communicate with others.

Who We Are covers the areas that we typically address in standard types of assessment, as well as areas we sometimes overlook or address with words like “poor self-image.” We look at Physical (body and movement related), Intellectual (ability to reason, understand or perceive), Emotional (feelings about self, situation, task) and Spiritual (overall sense of self, purpose and “specialness”). In our individual disciplines we learn to focus on these areas given our training and available assessment tools. These areas are often where we first pick up information that something may not be going well for a person. It may be the first place that we begin to question and explore. The Performance Competence Framework provides pathways to other areas of exploration and meaning.

© 2001 Stevens Dominguez & Harrison, University of New Mexico
(The) Individual in Their Culture and Environment is the area that addresses what is unique to the individual, including one's Quality of Life, Membership and a Personal Sense of Competence. This area is the ultimate "yardstick" for determining if we are on the right track in our assessments and in looking at information to plan supports. The supports we plan should impact these areas positively, never negatively. As such, this area of the model becomes the place for looking at quality assurance. If we provide therapy to a young child during outdoor play, we may reduce his opportunity for peer play (Membership) and have an unhappy child (Quality of Life). If we try to get a child to engage in group manipulatives with requirements outside his range of ability, then we may have a child who feels poorly about his performance (Personal Sense of Competence). If we design a language stimulation program for a young Navajo child that encourages language use frowned on by her culture, then we may produce threats to all areas (Quality of Life, Membership and a Personal Sense of Competence).

Specific Factors Within Each of the Broad Areas

Figure 2, depicts the full Performance Competence Framework. The words used to describe each area of the Framework in Figure 1 are now given more specific titles. The previously used titles are provided in italics to facilitate the transition to the full model. The specific factors within each of the broad observation areas are identified and are meant to illustrate the constant interaction possibilities within the Framework. The focus is on the individual with respect to Quality of Life, Membership and Personal Sense of Competence. Definitions and examples of each of the areas to be observed follow. The small circle to the right of each area in the text represents Figure 2, the section of the Framework being presented. The area presented is darkened to assist the reader. This list is followed by some "people" examples to illustrate both the individual factors and the possible interactions. It is important to remember that there are no "right" answers to the scenarios resulting from a particular event (or combination of events) as each person is unique in both how she experiences the world (internal and external) and how she responds. It is our goal to "see" as clear a picture as possible in order to support positive performance and competence for each individual.
Areas for Consideration and Observation

GIVENS (How we started)

Basic Biological Drives
Definition: Biological principles related to understanding how living things function and what are basic characteristics driving survival.
Examples:
- The drive to integrate processes (e.g., suck/swallow/breathe, integration of sight and hearing)
- Internal drive (e.g., human drive to go upright)
- Effort to maintain homeostasis (e.g., equilibrium, breathing adjustments to amount of oxygen available)
- Preprogrammed motor skills

Predispositions
Definition: Characteristics believed present at birth related to genetics and physiological status.
Examples:
- Temperament - difficult to easy, may be related to physiological status or genetic factors
- Purposive system (Spark, persistence, drive, curiosity)
- Genetics & culture - activity levels, physical characteristics
- Physiological status - health, organic status/anomalies
- Styles - social vs. object orientation, visual/auditory/kinesthetic/participatory

KEY FACTORS UNDERLYING AN EFFICIENT ADAPTIVE RESPONSE (How we process information)

Sensory Processing and Integration
Definition: How information is taken in and organized for use.
Examples:
- Presence or absence of sensory defensiveness
- Time needed to orient, process & respond
- Uses one sensory system to support another
- Integrates multiple sensory input
- Uses information to organize, implement and evaluate responses
- Produces efficient adaptive responses (a response that works for the individual within a context)

© 2001 • StevensDominguez & Harrison • University of New Mexico
Orientation  ➔ Discrimination
Definition: Attaching value, relevance and meaning to a sensory motor event (internal &
external).
Examples:
• Movement of head, eye, body toward or away from stimulus
• Reactions to stimulus (eye blink, gag, shudder, smile)
• Responses to experiences perceived as threatening or non-threatening
• Response to relevant stimuli
• Response to irrelevant stimuli

Freedom & Control of Movement
Definition: Ability and opportunity for movement and physical interaction
Examples:
• Strength
• Endurance
• Range of motion
• Ability to isolate and coordinate movement patterns
• The variety of mobility (ability to move the body or a body part) and transition movements used to meet needs, explore and interact with the environment and people
• The variety of stability (ability to hold or position a body part or the whole body) patterns available to support controlled movement, interaction with activities and attention

Regulation of Levels of Arousal
Definition: The ability to achieve, maintain, and change levels of arousal appropriate to
situation or task.
Examples:
• Behavior that reflects well being or flight, fright, fight
• Variability of arousal
  - stationary vs. moving
  - interest vs. non interest
  - good stress vs. distress
• What decreases or increases the child’s ability to modulate (environment, tasks, sensory
  motor experiences)
• Strategies the child uses to achieve situation appropriate alertness
  - scanning, monitoring, movement, vocalization, touch, oral, novelty/repetition/structured/unstructured (sensory diet)

Regulation of Physiological status
Definition: Body’s ability to maintain homeostasis
Examples:
• temperature
• Ingestion, digestion, elimination and sleep/wake
• Suck/swallow/breathe synchrony
• Heart rate and respiration
• Orientation to novel stimulus

BEST COPY AVAILABLE
COMFORT AND SAFETY CYCLE

*(What Happens When We Are Comfortable and Safe)*

**Comfort/Safety**
Definition: The cycle of growing and learning that shows how varying degrees of comfort/safety can affect the outcome of competence.

Examples:
- Relaxed appearance
- Tasks, environment, expectations, and interaction styles well within range of abilities and tolerance
- Degree of safety as perceived by the person & others
- Rules and/or structure as expressed or perceived by the person

**Confidence**
Definition: I feel ready for this - I have what I need.

Examples:
- Interest in environment & people
- Initiates interactions/actions
- Physical or verbal expressions of self confidence

**Risk Taking**
Definition: Taking chances, “stretch” of abilities in physical, intellectual, spiritual, and emotional areas.

Examples:
- Attempts activities at the edge of or beyond current abilities
- Attempts interactions at the edge of or beyond current abilities
- Tries variations of current abilities

**Competence**
Definition: Skill, proficiency in physical, intellectual, spiritual, and emotional areas.

Examples:
- Demonstrates quality & skill in activities or interactions
- Degree perceived by the person & others

AREAS OF FUNCTION (Who We Are)

**Physical**
Definition: Of or relating to the body, motor skill level

Examples:
- Physical characteristics, size, shape, gender, strength
- Executes familiar or unfamiliar motor tasks
• How person uses motor skill to learn & demonstrate knowledge

Spiritual
Definition: The essence of an individual's feelings/beliefs about self, a sense of self within the world
Examples:
• A sense of self/specialness
• Personal goals, values and beliefs

Emotional
Definition: Any specific feeling; any of various complex reactions with both mental and physical manifestations
Examples:
• Demonstrates a variety of feelings about ;
  • Self
  • World
  • Self in world
  • Specific situations, people, tasks

Intellectual
Definition: Knowledge, abilities and skills related to understanding, perceiving, and reasoning.
Examples:
• Demonstrates ability to send and receive messages/information
• Functional level of skills (conceptual, perceptual, analytical)
• Demonstrates problem solving strategies
• Information gathering, storing and retrieval
• Able to learn and demonstrate knowledge

AREAS OF INTERACTION (How We Interact)

Mental Interaction
Definition: Acquiring/verifying information and checking perceptions based on exchanges with people and physical environment
Examples:
• Interaction with objects to discover their properties/characteristics
• Problem solving strategies
• Explores to gain information
• Has ideas
Definition: The ability to organize information about sensory motor experiences in order to learn from and interact with the environment
Examples:
• Grading, timing, sequencing
• Organizes
• Imitates
• Initiates/terminates
• Sensory motor strategies used to regulate/monitor/direct motor activity
• Age level of skills
• How person uses motor skill to interact with environment and people

Social Interaction

Definition: The way a child initiates and responds to interaction with people in their environment

Examples:
• Interactions with people ("roughhousing" vs. verbal interaction)
• Who initiates
• How responsive child is when others initiate—responsivity to others' initiations
• Joint attention
• Turn taking
• What form does interaction take
• Body language (facial expression, postural & motor)
• Does behavior match with environment/expectations
• Expression of feeling
• Response to others’ feelings
• Integration of emotions (ability to manage feelings)
• Dimensions of temperament (adaptability, activity level, reactivity, etc.)

Communication

Definition: How the person receives and sends messages including the ability to express needs, wants and information to others

Examples:
• How person communicates (nonverbal, vocal, verbal)
• What is the person’s communication about (content)
• For what purpose is person communicating (request, direct, comment)
• Is communication intelligible (can the person get the message across)
• Is communication intentional/functional
• What does the person understand
• Cultural influences/determinants
• Topic maintenance/turn taking/joint attention
• Repair (can the person take steps to improve the communication when it’s not working)
• Play/playful

THE INDIVIDUAL
(Individual in His/Her Culture and Environment)

Quality of life:
Definition: Degree of satisfaction related to personal circumstances

Examples:
• Safety security needs met
• Emotional needs met
• Feelings of self worth supported
• Basic health needs met
• Happiness

BEST COPY AVAILABLE

© 2001 • StevensDominguez & Harrison • University of New Mexico
Through Shared Windows

Membership:
Definition: Distinct part of a whole: belonging
- Acceptance
- Invites and/or is invited into interactions
- Participates in family, community and society

Personal Sense of Competence:
Definition: Satisfaction with one’s own capabilities and achievements
- Awareness of abilities
- Pride in accomplishments
- Feelings of success
- Has opportunities and abilities to be in control of situations

Applying the Performance Competence Framework

There are several ways to use the discussion examples provided below from the lives of Sarah and Jesse. You can 1) read the first paragraph and go to Figure 2 and explore the factors that are interacting to affect performance and competence, or 2) you can read the entire example and refer to Figure 2 as you do so. Find each factor on the chart and look at its position and how it relates to other factors. Keep in mind that the information provided here only partially explores the implications presented for both Sarah and Jesse.

Discussion Example #1

Sarah is in the tenth grade. During the first six months of school she has grown 6 inches. Her grades (As and Bs) have dropped drastically. She feels uncomfortable, tired, irritable and fearful. She doesn’t know what is going on and her teachers are complaining. Her family has rallied to support her, as many of them (all very tall people), have experienced the same rapid growth in their pasts.

It may well be that the first information that led to questioning how things were going for Sarah came from the observable area of intellectual functioning (academic performance). Her grades had dropped and the teachers were concerned. Since her academic performance had always been fine, we look to the other areas of observable performance - physical, emotional and spiritual - and we talk to Sarah and her family. We hope that they have noted the surge in growth. All of the information we find would lead us into Factors Underlying an Efficient Adaptive Response: we would look at how sudden, rapid growth affects factors like Regulation of Physiological Status and Freedom & Control of Movement. We see that these areas are affected and we then realize there are likely effects in Sensory Processing and Integration. All of these in turn, will then affect the Comfort & Safety Cycle. Sarah is feeling uncomfortable (maybe unsafe). She feels a lack of confidence and probably has reduced her risk-taking (new learning). A feed-forward loop is being created...
where the Comfort/Safety Cycle is not working effectively, resulting in poor academic performance; the poor performance results in lack of confidence, which feeds back into the Comfort/Safety Cycle.

Sarah is also experiencing a decrease in her Quality of Life and Personal Sense of Competence. Fortunately, her family (Membership, Quality of Life) has rallied to support her. They have shared their own experiences and have let her know this time will pass. It is their support that finally helps Sarah recover from this major event, and (after growth has stabilized) reestablish her successful learning sequences and maintain her emotional self and her spirit. This information also helped Sarah's teachers understand her performance difficulties, so that they could provide support, concentrating on Sarah's positive attributes and her Quality of Life, Membership and Personal Sense of Competence. The school personnel rearranged her schedule so that the more difficult subjects were in the morning. They scheduled PE right after lunch time so that she would have a chance to recharge, and they worked to provide support, following Sarah's lead.

Discussion Example #2

Jesse is 18 months old. At 8 months, he suffered a life threatening case of meningitis, followed by seizures. He now has serious motor difficulties, and his motor abilities are at approximately the four-month level. He has some difficulty gaining weight and may lose weight during the winter months because of respiratory illness. He eats soft foods and drinks from a bottle. It takes a long time to feed him. He likes music and movement, recognizes family members and tries to look at them as they move around the room, making noises to indicate anger, annoyance, pleasure, and need for attention. He tries to reach and play with toys using his right hand when he is lying on his left side. When held in a supported position, he holds and plays with toys. He laughs at his parents' "teasing" play and loves to roughhouse with his father. He is very alert for most hours of the day with one 2-hour nap around 1:00 PM. His mother describes him as a happy and easy child. His parents are very worried about his not being able to play or express himself.

While issues are immediately observable in the Physical and Intellectual areas, it is the Quality of Life, Membership and Personal Sense of Competence factors that appear to be most critical. There is a discrepancy between his motor abilities and his intellectual abilities. The effect of this gap is a decrease in his Quality of Life, Membership and Personal Sense of Competence. This broad area is the "yardstick" for looking at our interventions; and, in this case, this is the area where we want to focus our attention. If we look at the underlying factors, we see some immediate concerns and several powerful strengths. His strengths are his Spirit, Purposive System and his ability to Regulate Level of Arousal. Serious concerns exist in the areas of Freedom and Control of Movement, orientation to stimulus and Sensory Processing and Integration.
These areas, particularly Freedom and Control of Movement, are interfering with his ability to make efficient adaptive responses and move through the Areas of Interaction and Areas of Function. He is frustrated in his efforts to show his understanding of the world (intellectual) and to interact with the world (Physical, Emotional, Intellectual, Membership, Personal Sense of Competence and Quality of Life). Some of the issues that we need to deal with are his respiratory system, weight gain, and freedom and control of movement. Increased independent movement patterns should have positive effects on respiration and weight gain, as well as on the other areas of concern. The early intervention team needs to provide intense OT/PT services aimed at increasing strength, functional movement and movement transitions. At the same time, adults need to learn options for positioning and handling to assist Jesse in his interactions. Adaptive devices (switches on toys, chair for feeding) should be explored. Most important, efforts should be focused on: 1) improving Jesse’s opportunities for Membership, both with other children and in family activities; 2) increasing his Personal Sense of Competence by giving him more control over movement, choices and activities, and 3) a higher Quality of Life through improved health.

The issues for Jesse are many (communication, motor, play, etc.), and the discussion could go on at great length. What is important to realize is that in many programming discussions, planning for Jesse might have resulted in professionals developing several specific goals in the areas of gross and fine motor, speech, language development and oral motor functioning (eating). Through shared windows and a common framework, intervention is focused on how to improve his Quality of Life, Membership and Personal Sense of Competence. While we work on motor development and other areas, we will be using (with Jesse’s help) these areas (Quality of Life, Membership and a Personal Sense of Competence) to assess the effectiveness of our efforts.

The Performance Competence Framework is a lifespan model. Figure 2 shows the primary areas (Application Strategies and Environmental Influences) that are used when adapting the model for a specific intervention situation and/or range. In adapting the model for Project NEW Teams, these two areas were developed as follows:

Application Strategies

Definition: Those strategies that in concert with the Performance Competence Framework, represent best practice in using information from the framework to address the needs of a specific population and purpose. Early intervention. In, the population is young children birth to age eight and their families and the purpose is observational assessment by a team to identify support strategies/interventions.

Primary Strategies

- Family Centered Practices
- Team Observation
- Multiple Environments and Activities
Through Shared Windows

- Information to Families & Service Providers to Support Performance
- Focus on Key Factors Underlying Development

ENVIRONMENTAL INFLUENCES
Definition: Those environments, and the factors within those environments, that may support or compromise a child’s performance.

Environments Considered
- Home
- Day Care
- Preschool
- Community
VI. Outreach Model

Outreach Model Components: Description

Outreach Model Components: Chart

Adoption Sites

Implementation Plans for TSW Online Course
Outreach Model Components

The Through Shared Windows Outreach Project Components were developed and implemented simultaneously during the project period. These components included partnering with state agency personnel, obtaining commitments from faculty members in participating states, developing and offering a traditional and online course and designing and offering a Faculty Institute for delivering the online course.

The first component, partnering with state agency personnel, involved establishing rapport and securing a commitment from the seven partner states (Connecticut, Hawaii, New Mexico, North Dakota, Texas and Washington). This process was ongoing and insured goodness-of-fit between the participating states and dissemination activities and resources. The process began with obtaining a commitment from the Early Intervention and 619 Lead Agencies and conducting a needs assessment to identify issues and resources within their state. Agency coordinators identified faculty and inservice trainers in their states as potential participants and future disseminators of the course and materials.

The second component, obtaining commitments from faculty members in participating states, involved securing a commitment from faculty members to a three-phase process involving taking a summer online course, incorporating the material into their existing coursework, and participating in a Faculty Institute to learn how to offer the course online. In addition, faculty participants were asked to design a plan for delivering the course or part of the course at their institution and collect evaluation data after the project ended.
The third component, developing and offering a traditional and online course, began with developing 16 sixteen modules based on the Performance Competence Framework of Assessment. The modules were designed for online delivery and included readings, power point presentations with audio, asynchronous and synchronous activities, a video case study, online notebook and assignments. The 3-credit graduate/undergraduate course was piloted and revised twice. It was advertised and offered to all participating states and delivered online through the University of New Mexico.

The final component, designing and offering a Faculty Institute, provided a format for faculty participants to learn both the technical and practical aspects delivering course work online. Faculty members convened onsite in Albuquerque for two-days and were provided workshop sessions and individual technical assistance. They received the complete online course along with various resources and materials to assist them in delivering the course or parts of the course to students at their institution.

VII. Methodological or Logistical Problems and Resolutions

Problems and Resolutions: Description
VII. Problems and Resolutions

Although the project completed all the stated objectives and achieved the outcomes specified in the initial proposal, there were ongoing revisions to the workscope activities and timelines as the project progressed. These revisions were due primarily to the technical aspects of the online course development and faculty participants in the project.

The staff of the TSW Outreach Project learned a tremendous amount during the project about delivering training at a distance and developing web sites and the online courses. The hiring of several graduate students in the filed of Organization, Learning and Technology was an additional bonus for the project. The students' technology expertise was an asset and allowed the expansion of the project and produced products beyond what was originally proposed. As a result of these additional resources and learning experiences some revisions to both the workscope activities and timelines occurred.

The major deviation in the project activities was a commitment to developing a 'best practices' online course and web site, which involved much more time and effort, then was originally proposed. This resulted in offering the course only three semesters during the project period and the total number of participants for taking the online course was less than originally proposed. Now that the course is fully developed and all the supporting materials are available so the course can be offered at our institution as well as the universities and colleges of each of the participating faculty members from Connecticut, Hawaii, North Dakota, Texas and Washington.

NEW ASSESSMENT WEB SITE SURVEY

What would motivate you to visit our site on a regular basis?

- Comprehensive site, perhaps with tips on hard to give test items – sometimes the manuals do not make sense.
- Clear, easy to understand info; up-to-date info.
- Just to stay current, I would visit this site quarterly. Also, I plan to become a school or pediatric therapist.
- Wanting state-of-the-art information, materials, and TA so that Nevada children are better served.
- The most commonly used assessments used in the public school system and an explanation, for parents, on what scores qualify children for special services.
- Reliable, research information, references, resources and reading material/manuals.
- Research and up-to-date assessment instrument for minority population w/culture and language in mind.
- New information being added regularly – research and assessment information.
- Up-to-date information on a variety of assessment approaches.
- Advanced notice of upcoming features.
- Need for.
- New information on a regular basis, e.g., updated bibliography.
- Weekly updates of info, insights, Q & A’s, sample assessment reports linked to sample IFSP’s.
- Student friendly assessment tools/instructions.
- U-to-date information on all areas of assessment – especially the role parents can play.
- Information relevant to my role developing materials for parents in the EIP.
- Newsletter that previewed what new information would be on the site.
- Updated information that is easily accessible.
- Summaries of latest research examples of successful practices.
- A Web design that is multifaceted – information (instructive) pages downloadable options – up-to-date list, great links!!

What assessment resources do you recommend we include on this site?

- Links bother sites – sites related to assessments, diagnoses, etc.. Therapy skill builders.
- Aims, ages and stages.
- Notice of conferences, workshops, training opportunities in the area of early assessment would be very useful. Links to similar web sites.
- List of assessment for different ages, assessments categorized for development areas or developmental delays or disorders.
- I would be interested in variety and applicable assessment instruments for children of minority, taking the language, culture and environment into consideration.
- I have none to recommend at this time, but will let you know if I run across something.
- Don’t know.
- Tom Linder’s Transdisciplinary Play-Based Assessment Ages & Stages Questionnaire.
- Training in the use of Competence Performance Framework. Feedback from higher ed faculty who teach this model. Lists of appropriate videos.
- NA at this time.
- How parents can be involved – checklists for families – background re assessment tools for families.
- Training and certification courses that are offered as well as purchasing info.
- Validity and reliability articles on assessments.
- I'm too new in the field to help here.
- Many. I will be happy to work with you to research these.

</tr>
<tr>
<td>14 What did you like most about the course?</td>
<td>(No answer provided)</td>
<td>I really enjoyed the flexibility of this course. I have learned so much new information, and look forward to looking back and applying it to the real life situations I encounter.</td>
<td>I liked being able to complete the course from home, in my own space and in my own time.</td>
<td>Doing the course from home.</td>
<td>Course content was interesting.</td>
</tr>
<tr>
<td>15 What are you recommendations for improving the course?</td>
<td>1. Reduce workload. Pick meaningful assignments. 2. Reduce article critiques. 3. Weekly feedback needed. 4. More interactions with classmates needed.</td>
<td>No article critiques for a weekly module assignment. Maybe having a couple, but they are extremely time consuming, and with the other work we were having to put in it really was a stressor.</td>
<td>Eliminate the chats and have more e-mail interaction between the student and the instructor.</td>
<td>Groups need to be thought out depending on the level of the student (completion vs. credit).</td>

</table>

In the beginning it was too much with the article critiques. Those were taking up at least 4-5 hours. Too much toward the end of the semester. I felt like I was repeating myself. Some of the directions were very confusing. There was conflicting information about expectations. The pace was fine. Easy to follow but required a fair amount of dedication. Graduate assignments need to be placed toward the top of the syllabus so due dates aren't missed. I have worked in this area for one year and have quite a bit of training. Most of the information was very functional and easy to follow. I did have difficulty understanding some of the articles we were asked to critique. It was presented nicely, and I learned so much... so to me that is all valuable information! Down's syndrome child used as an example - difficult - don't know norm. Lots of information was very functional and I have incorporated into my work.

NEW ASSESSMENT: THROUGH SHARED WINDOWS Online Course
FOLLOW-UP SURVEY (COMPiled)

The following survey is intended to gather both quantitative and qualitative responses. These questions are based on changes that may have occurred as a result of your learning experience during the New Assessment: TSW online course. We want to capture the uniqueness of each individual's on-going experience with the course content. Specifically, we are interested in learning ways in which the material has effected your attitudes toward assessment principles and practice and whether any changes in attitude have been translated into changes in your actual practice. Both kinds of changes, changes in thinking and changes in practice, are of equal interest to us.

PLEASE MAIL SURVEY BY FEBRUARY 1, 2002 • THANK YOU FOR YOUR PARTICIPATION

USE OF NEW ASSESSMENT: THROUGH SHARED WINDOWS
ONLINE COURSE CONCEPTS AND MATERIAL

1. I have referred to my class notes, class handouts, the illustrated graphic of the Performance Competence Framework and/or the readings for the course.

A GREAT DEAL | OFTEN | SOMETIMES | SELDOM | NOT AT ALL
---|---|---|---|---
5 | (.25) | (.63) | (.12) | 1

2. I have shared ideas, handouts, the Performance Competence Framework graphic and/or the readings with other professionals:

A GREAT DEAL | OFTEN | SOMETIMES | SELDOM | NOT AT ALL
---|---|---|---|---
5 | (.25) | (.63) | 2 | 1

3. I have shared ideas, handouts, the illustrated model of the Performance Competence Framework graphic and/or the readings with families:

A GREAT DEAL | OFTEN | SOMETIMES | SELDOM | NOT AT ALL
---|---|---|---|---
5 | (.25) | (.38) | (.12) | (.25)

4. I have not referred to and/or shared ideas from my class notes handouts, the Performance Competence Framework graphic and/or the readings with other professionals and families because:

Because I am not currently working with children and families in an assessment capacity (I am an ASL and cannot yet assess).
In my last semester of grad school, I can only refer to my attitude and how I hope to change my practice and not how I am actually practicing.
[I don't have the opportunity or time to spend w/families.]
1A. CHANGES IN ATTITUDE

1. My thinking about assessment planning has changed since my exposure to the TSW online course and the Performance Competence Framework.

2. Examples of this change are:
   [The team is looking at play-based assessment and intervention-based assessment. OT/PT share assessment time.]  
   [I allow more time to become acquainted with the child and family before the assessment begins. The information I acquired through the course re-affirmed practices I utilize and made me more comfortable about the assessment process.]

3. My current thinking about assessment planning has not changed because:
   [I was already taking a transdisciplinary approach - this offered new terminology and different (somewhat) areas of focus but didn't change the essential way in which I think about assessment.]  
   [I had many of the concepts a part of my own philosophy of assessment.]

1B. CHANGES IN PRACTICE

1. My assessment planning (i.e. the steps I actually take to prepare for an assessment) has changed since my exposure to TSW online course and the Performance Competence Framework.

2. Examples of this change are:
   [I have not yet conducted an assessment, however, it would change by:  
   a) being aware of individual's culture & beliefs & b) conducting assessment in a comfortable environment.]  
   [Renew teacher observation, and parent observation.]  
   [I allow more time to become acquainted with the child and family before the assessment begins. The information I acquired through the course re-affirmed practices I utilize and made me more comfortable about the assessment process.]

3. I have not change my current assessment planning practice because: [I already used a child-centered approach.]
CHANGES IN ATTITUDE

1. My thinking about communicating with families has changed since my exposure to TSW online course and the Performance Competence Framework.

   Examples of this change are:
   - Use less scores, more description of how child learns.
   - I have always treated families as I would want to be treated, if I were them. Your course has re-affirmed the need for respect always, and the necessity of unloading our own “baggage” before interacting with children and their families.

2. My current thinking about communication with families has not changed because:
   - I use a very thoughtful, family inclusive approach.

CHANGES IN PRACTICE

1. The way in which I communicate with families has changed since my exposure to TSW online course and the Performance Competence Framework.

   Examples of this change are:
   - Talking to them in way which they understand what is going on w/their child – and staying away from the use of jargon.
   - Considering the cultural background of the family and try to understand some of their communication variables.
   - More open-minded and tolerant.
   - Ask more open ended questions.
   - I try to put myself in the family’s shoes and try to portray a considerate and caring attitude towards the whole family.
   - I focus more on their input first.
   - I take more time to listen to their background info and concerns.

2. I did not change my current communication practice with families because:
   - I use a very thoughtful, family inclusive approach.
CHANGES IN ATTITUDE

My thinking about the way in which I gather information on a child prior to an assessment has changed since my exposure to the TSW online course and the Performance Competence Framework.

1. My thinking about the way in which I gather information on a child prior to an assessment has changed since my exposure to the TSW online course and the Performance Competence Framework.

2. Examples of this change are:

INFORMATION GATHERING

A GREAT DEAL OFTEN SOMETIMES SELDOM NOT AT ALL
(.12) (.50) (.38) (.12)
5 4 3 2 1

a) Talk to teachers, parents, family, and any other people who have observed the child to get a good collection of accurate and helpful data.
b) Communicate with a variety of sources (i.e., parents, caregivers, teachers, and other therapists) to gain well-minded and most informed perspective of the child.
a) I try to look at the other activities both the child and their family are involved in besides their need for the assessment.
a) More persistent in gathering information from varied environments – particularly natural environments.
a) Higher value for parent's information.
a) I look into more nooks and crannies to understand the family's dynamics.

3. My current attitude about information gathering has not changed because:

[Child Find gathers information – I have a timeline and unable to do more right now.]

3B. CHANGES IN PRACTICE

1. The way in which I actually gather information about a child prior to an assessment has changed since my exposure to the TSW online course and the Performance Competence Framework.

2. Examples of this change are:

INFORMATION GATHERING

A GREAT DEAL OFTEN SOMETIMES SELDOM NOT AT ALL
(.25) (.25) (.12) (.25)
5 4 3 2 1

a) I try to look at the other activities both the child and their family are involved in besides their need for the assessment.
a) More persistent in gathering information from varied environments – particularly natural environments.
a) I feel more comfortable in my preference for naturalistic and play-based assessment. b) I can be flexible and also feel assured that this is ultimately a better way to assess than with studied objectivity as most assessment require.

3. I did not change my current information gathering practice because:

[Child Find gathers information – I am not currently assessing children.] [I have always used many sources to evaluate young children.]
### 4A. CHANGES IN ATTITUDE

My thinking about the way in which families should be given information following an assessment of their child has changed since my exposure to TSW online course and the Performance Competence Framework.

2. Examples of this change are:
   - [More functional based information, less scores.]

   a) Families should be told about their child's assessment in jargon-free conversation.  
   b) The clinician should express her availability to the family so they are able to ask questions at the time of assessment or at a later date.

   a) Family friendly format (no jargon!).  
   b) Results should be verbally explained and written in user friendly report.  
   c) Family should be made to feel comfortable about asking questions and expressing further concerns.

   a) They need to be given information in a respectful manner that portrays a caring attitude.  
   It is important that we realize our assessment affects everyone in the family, not just the child.

3. My current attitude about information giving has not changed because:
   - I have been happy with the ways in which I share information with families.  
   - It incorporates much of the Through Shared Windows approval.
   - I believe strongly in sensitivity to parent issues and have traditionally tried to deliver difficult information in a sensitive, caring way.

### 4B. CHANGES IN PRACTICE

1. The way in which I actually give information back to families following an assessment has changed since my exposure to TSW online course and the Performance Competence Framework.

2. Examples of this change are:
   - [I have not had to do this, but it would have been changed] 
   [More functional based information, less scores.]

   a) Sit down in a comfortable area where parents can concentrate on information.  
   b) Allow time for questions.  
   c) Offer my number to family for any later questions they may have.

   a) They need to be given information in a respectful manner that portrays a caring attitude.  
   It is important that we realize our assessment affects everyone in the family, not just the child.

   a) On the whole my thinking is broader, deeper understanding of normal as depending on where you stand.  
   b) Urges me to take more of a family approach than the individual one that is my custom.

3. I did not change my current information giving practice because:
   - I have been happy with the ways in which I share information with families.  
   - It incorporates much of the Through Shared Windows approval.
   - I believe strongly in sensitivity to parent issues and have traditionally tried to deliver difficult information in a sensitive, caring way.
**5A. CHANGES IN ATTITUDE**

1. My thinking about report writing has changed since my exposure to TSW online course and the Performance Competence Framework.

2. Examples of this change are:
   - I still don't like it, but make sure the important components are present.
   - I used to think all report writing as just delivering the info to other professionals and family w/out thinking about their feelings at the other end. Now I know that the report should be carefully written for all to see and get information from and work with.
   - Again, user friendly format and jargon-free language.
   - Will try to integrate report between disciplines.
   - I've always been pretty gentle but the course has given me reason to be more so. b) I check in more/ (i.e., how does this feel to you)?
   - I'm more aware of the negative connotation that the things I observe/write about may have. I'm more likely to state things from a growth potential perspective rather than as negative or static.

3. My current attitude about report writing has not changed because:
   - I received a lot more exposure to this topic in my other classes and in my practicum experiences.
   - I have always been very child-centered.

**5B. CHANGES IN PRACTICE**

1. My report writing practice has changed since my exposure to TSW online course and the Performance Competence Framework.

2. Examples of this change are:
   - More interpretive info more info on modifications needed to aid learning.
   - I am careful with jargon use. b) I am sure to list child's positive actions/abilities. c) The disorder is written in careful and sensitive terms.
   - I received a lot more exposure to this topic in my other classes and in my practicum experiences.
   - More descriptive. b) More integrated with other disciplines
   - A broader range of goals is possible. More attention is paid to the supports for early learning and how those may be improved.

3. I have not change my current report writing practice because:
## 6A. CHANGES IN ATTITUDES

1. My thinking about communicating with other professional has changed since my exposure to TSW online course and the Performance Competence Framework.

2. Examples of this change are:
   - [Listening to SLP play-based cognitive info.]
   - I have always been open and cooperative in communicating with other professional's.

<table>
<thead>
<tr>
<th>COMMUNICATION WITH OTHER PROFESSIONAL</th>
<th>A GREAT DEAL</th>
<th>OFTEN</th>
<th>SOMETIMES</th>
<th>SELDOM</th>
<th>NOT AT ALL</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(.25)</td>
<td>(.25)</td>
<td>(.38)</td>
<td>(.12)</td>
<td>(.12)</td>
</tr>
</tbody>
</table>

   a) I think about teamwork instead of not sharing ideas with another. It seems that much more can be accomplished when a team works together to benefit the item at hand.
   b) I have always focused on the importance of communication – this Model has reinforced my thinking in this area.
   c) Encourage others to adopt a more child-centered, less standard – scope approach.

3. My current attitude about communication with other professionals has not changed because

## 6B. CHANGES IN PRACTICE

1. My actual communication practice with other professionals has changed since my exposure to TSW online course and the Performance Competence Framework.

2. Examples of this change are:
   - [Sometimes this is a "Catch 22" situation when families are reluctant to allow other professionals to service their children due to personality conflicts. I have learned a few "Neutralizing" techniques thru your course.]

<table>
<thead>
<tr>
<th>COMMUNICATION WITH OTHER PROFESSIONALS</th>
<th>A GREAT DEAL</th>

<th>SOMETIMES</th>
<th>SELDOM</th>
<th>NOT AT ALL</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>(.25)</td>
<td>(.25)</td>
<td>(.38)</td>
<td>(.12)</td>
<td>(.12)</td>
</tr>
</tbody>
</table>

   a) I ask for their opinion/advise/new information on client or topic of interest.
   b) I now often seek input from other professionals so that I can most effectively serve my students (i.e., OT resources, reading and classroom teachers).
   c) I thought more information on this subject could have been included, but the information given was helpful.
   d) Right now it is often I listen to their differences – they expect English to be spoken in their presence, etc., and find I am more patient, more accepting and we have entered their space – not the other way around.

3. I have not changed my current communication practice with other professionals because: [I have always stressed this area in my assessment practice.]

| Susan Sandall  
Washington | University of Washington | Comprehensive in terms of supporting materials and resources | Potential to use online course as a regular schedule course or Continuing Ed course | • Learned about teaching online  
• Gained information on new model of assessment  
• Discovered the complexities of online delivery of coursework |
| Mary Jo Schill  
North Dakota | University of North Dakota | Content excellent. Well organized into meaningful instructional modules. Application activities helpful, Written manual and support materials make course transferable. | I see it as being taught as a ‘piece’ of a course, taught through a workshop format and eventually as an online course through this University (perhaps through Continuing Ed) | • Disseminated course content in the state of ND  
• Trained someone from this state in PC Framework |
| Pam Lindsey  
Texas | Tarleton State University | Modules incorporated into existing courses | PC Framework – an assessment model that is child-centered. Believe it is a model that would vastly improve our assessment process for students with disabilities. | • Learned about online course construction  
• Met with colleagues face to face and online  
• Added to my professional knowledge regarding current best practices in assessment  
• Shared knowledge with students |
| Nancy Baptiste | New Mexico State University | Course provided a new, holistic approach to assessment and a variety of learning strategies to support diversity of learning styles. | Information of particular value to NM Training & Technical Assistance Programs. Staff would benefit from this observation and could also become course instructors for staff from community early childhood programs. | • Enhanced knowledge base about assessment  
• Networking with colleagues  
• Technology enhancement in a new web-based environment  
• Rich and varied resources |
|---|---|---|---|---|
| Earnestine Kirtland | Gateway Community College | Course materials would facilitate collaboration between faculty members in special education and early childhood. | TSW course and the PC Framework would improve the Spec. Ed. Intro. & Assessment courses at the Community College | • Learned how to transfer the online course materials  
• Understood the material on the Framework in a new way |
| Jean Johnson | University of Hawaii | Course provided a new, holistic approach to assessment and a variety of learning strategies to support diversity of learning styles. | TSW course and Framework share with other islands and groups associated with UAP. | • Learned new Framework for assessment  
• Understood online delivery of course and transfer |
1. Do you think that the Institute adequately prepared you to teach the New Assessment: Through Share Windows course at your institution?

(4) Yes  (2) No  (2) Somewhat

Why and/or why not. [Lots of opportunities for questions & dialogue] [Yes, faculty were terrific] [The Institute provided a good overview of the framework and stimulated my thinking about the options for offering this course] [The Faculty did an excellent job. I feel comfortable that I can teach the content face to face and their videoconference. I have the tools to provide the course on-line, but my concern is the tech support/trouble shooting] [I think I know how to teach parts of the course and include it in two of my courses. I could also provide an orientation to Early Childhood Ed. and provide training for them. Mary BK provided a wealth of info on the "how to"] [I just need more time to study the content]

2. Did participation in the institute increase your knowledge and understanding of delivering an on-line course?

(6) Yes  (2) No  (2) Somewhat

Comments: [Great to have an opportunity to discuss with developer] [Lots of opportunities for questions and dialogue] [The presentations were a good review. I need to spend some time interacting with the material] [Absolutely. Many questions were answered-some I didn't even know how to ask] [Yes, Meave did an excellent job of explaining the model - giving examples to make points clear]

3. Did participation in the Institute increase your knowledge and understanding of delivering an on-line course?

(5) Yes  (1) No response  (2) Somewhat

Comments: [Much hands-on activities] [I have been using Web CT as a course enhancement. The only way for me to learn new technology is to have it written out.] [My limited experience is more of a limiting factor then what was offered here] [David Porter's presentation (although limited)]

4. How prepared do you feel to offer the on-line course through your institution? Rate your level.

(1) High  (5) Medium  (5) Low

Share any reservation you might have: [Opportunity] [I know I will need other technical assistance at the time] [I feel that I will just need to jump in and try the on-line course; my questions will emerge]
5. Which Institute sessions were most helpful? (Discussions) (Framework with Meave and lessons learned) ("Going with the Flow" - appreciated hearing Mary's teaching experience with the course) (Game was invaluable with real time feedback, Meave's comments helped a lot. Adaptations. Info regarding on-line course, Interactive discussions and problem solving, and I was excited about wire video) (All, especially the explanation of the Performance Competence Framework and options for using model presented by Mary) (David's tech game)

6. What suggestions do you have for improvement of the institute?

(Have tech instructions written out) (I don't know what could be eliminated, but I would have benefited from more tech time especially the Blackboard and HTML) (I needed more tech support - WebCT Blackboard. Real examples to carry out an assignment of transforming info to WebCT and Blackboard) (Process time, brain breaks, hands on activities - a bit too much lecture!) (Better instructions on the "Game") (Constrict time slots - they were probably more appropriate for a larger group)
IX. Project Impact
IX. Project Impact

Description of Disseminated Products

The products developed and disseminated during the Through Shared Windows (TSW) Outreach Project provided faculty member participants a variety of formats to use in both understanding and application of the Performance Competence (PC) Framework and in incorporating and offering the material in their coursework at their institution. The products also were offered to others interested in the PC Framework or the TSW course. The products reflect training techniques that staff has found to be particularly effective (visual and auditory presentations, individually paced, practice and application) with the training techniques that research has shown to be effective (feedback and follow up).

These products (see Product List) include Through Shared Windows (TSW) Online Course, a 16-Module Online Course in HTML format based on the Performance Competence Framework for assessment of young children and their families that was distributed to Faculty Participants to deliver at their institution. Faculty were asked to sign a Course Transfer Agreement that allows them to offer the online course to students at their institutions. As a companion to the HTML course, the TSW Online Course Instructor Guide was developed to provide guidance and support in delivering the online course. The Guide included a CD-ROM of power point presentations with audio for each area of the Framework and tips for organizing and facilitating the online course.
Two other products, the Through Shared Windows (TSW) Curriculum and the Traditional Course Instructor Guide, were developed to provide faculty members an alternative to delivering the course online. The Through Shared Windows (TSW) Curriculum provides a collection of readings on the Performance Competence Framework and the Traditional Course Instructor Guide provides guidance in delivering a traditional face-to-face semester course. The Guide includes a syllabus, class schedule, power point presentations (CD-ROM and note format), additional overheads, activities, and assignments.

The third product disseminated was the TSW In-service Training Manual that provides guidance in designing and delivering a workshop or in-service training session. The Manual includes information on working with families, conducting observational assessments, applying the PC Framework, forms, and practice activities. An overview of the PC Framework is provided for review. The PC Framework is an observational assessment process that is used to identify intervention/support strategies for children birth to eight years old.

In addition, two supporting products were made available to project participants for the application of the Performance Competence Framework, the video Justin: A Case Study and the PC Framework Game. The Justin video looks at a young child as he interacts with his family at home, plays and engages in activities at his preschool, and visits his grandparents. Justin's family and teacher share their concerns, discuss Justin's strengths, and talk about what they would like to see happen for Justin, now and in the future. Justin is almost three years old and has Down Syndrome. His family is concerned about his language development and other developmental issues. Justin is very engaging.
and the video is a delight to view. It is a great tape to show students, to discuss development and to practice observing behavior in teams. The **PC Framework Game** provides an engaging application activity of the PC Framework to Justin and his family. The game allows students to apply information learned from the cases study to the Framework during a team activity.

Performance Competence Framework: Through Shared Windows
A New Framework for Observational Assessment of Young Children

Presented by
Holly Harrison, Ph.D. - UNM Center for Family & Community Partnerships
At the
19th Annual Pacific Rim Conference on Disabilities
Honolulu, Hawaii
February 10-11, 2003

This presentation provides a brief introduction to the Performance Competence Framework for observational assessment, which focuses on the child within the context of personal characteristics, preferences, environments, family and culture. The Framework re-orders known information into a holistic picture that provides a reference for understanding a larger body of information and requires attention to neurological underpinnings of performance and consideration of how all aspects of the child’s abilities interact. The purpose of the Framework is to present ‘shared windows’, through which family members and professionals may look in assessing or providing services to young children. The ‘shared windows’ encourage the inclusion of critical factors that support and compromise a child’s performance and competence.

AGENDA

Introduction/Overview

Brief overview of the PC Framework
  • Core of the Model (Quality of Life, Membership, Personal Sense of Competence)
    • Givens
    • Key Factors Underlying an Efficient Adaptive Response
    • Comfort and Safety Cycle
    • Areas of Function and Interaction

Application of the PC Framework
  • PC Framework Game

Questions?

Holly Harrison
University of New Mexico/CFCP
Hokona Hall Room 377
Albuquerque, New Mexico 87131
(505) 277-0204
hharriso@unm.edu
www.newassessment.org
The Performance Competence Framework
Through Shared Windows
A Framework for Observational Assessment of Young Children

The Performance Competence Framework
• Is a structure into which students and professionals may incorporate existing knowledge and skills
• Is applicable across all disciplines
• Is useful at all stages of professional development
• Allows a quality assurance check for all recommendations

Performance Competence Framework
• Assures family-centered care
• Calls for culturally sensitive assessment
• Looks at both external and internal factors
• Allows team members from multiple disciplines a shared viewpoint
Key Questions

- What Supports This Child's Behavior?
- What Compromises This Child's Behavior?

PERFORMANCE

The way or manner in which you act or are able to express yourself or respond, given different situations and/or requirements.

SPECIFIC COMPETENCE

The ability to perform a task or activity in a way that meets some specific standards.
**INDIVIDUAL**
The child or individual (or family) under consideration.

**Framework Core**
The Framework Core provides the quality assurance yardstick. Each intervention recommendation should be 'tested' by considering its effects upon each component of the Core.

**QUALITY OF LIFE**
Sense of well-being, safety, happiness, emotional security, health, and basic living conditions as defined by each individual or family.
MEMBERSHIP
Ways in which the individual interacts and feels part of his or her family, kin, clan, and community.

PERSONAL SENSE OF COMPETENCE
Performing in a way or manner that one (as an individual) feels good about.

Performance Competence Framework Components
- Givens
- Key Factors Underlying an Efficient Adaptive Response
- Comfort and Safety Cycle
- Areas of Function
- Areas of Interaction
GIVENS

The contributions of genetics and physiological status, which are present at birth.

GIVENS

- Regulation of Physiological Status
- Regulation of Levels of Arousal
- Freedom and Control of Movement
- Orientation and Discrimination
- Sensory Processing and Integration
- Efficient, Adaptive Response

KEY FACTORS

Underlying an Efficient Adaptive Response

- Sensory Processing & Integration
- Orientation/Discrimination
- Freedom and Control of Movement
- Regulation of Levels of Arousal
- Regulation of Physiological Status
COMFORT AND SAFETY
If children are healthy and experience their environments as safe and comfortable, they feel confident and are willing to take risks. As they take the necessary risks, they begin to develop competence.

AREAS OF FUNCTION
- The typical areas of testing are included here: physical, emotional, intellectual
- The snapshot of ability at any one time

SPIRITUAL
- Not typically included in assessment models
- May be defined slightly differently by different individuals
- Includes a sense of self in the world
AREAS OF INTERACTION

- Areas of Function applied to current environmental circumstances.
- The ongoing 'video tape' of abilities as they are demonstrated in various circumstances, in various environments, and at various times.

Application Strategies
Environmental Influences

Outside the Framework
Vary with the Individual and Population Served

Return to the Framework Core

- QUALITY OF LIFE
- MEMBERSHIP
- PERSONAL SENSE OF COMPETENCE

- To refocus on the individual
- To determine the effect of chosen intervention strategies
- To maintain proper perspective
XI. Future Activities

Description of Future Activities
X. Statement of Future Activities

Through Shared Windows (TSW) Co-Principle Investigator/Director is planning and working on several activities to insure the TSW materials and products continue to be disseminated locally and nationally after the end of the Project. These activities include obtaining continuation funding through local and federal sources, ongoing dissemination of information on request, publishing the developed materials, and continuing to host the New Assessment web site. In addition, faculty participants from seven universities or colleges will be incorporating the material into their pre-existing courses and/or offering the online course to their students at their institution.

Below is a list of specific future activities:

1. Staff will be developing a proposal that will adapt the TSW materials to an AA program for paraprofessionals. The new proposal will be based on the TSW Outreach but will be a collaborative project involving the New Mexico leaders working on addressing the charge in the “No Child Left Behind” Act.

2. Staff will continue to provide training both locally and nationally on the Through Shared Windows and the Performance Competence Framework in response to requests from the field, present information on the Framework and Process in the University of New Mexico classes, and submit proposals to present information on the TSW Process at conferences.

3. Faculty members from the six participating states (Connecticut, Hawaii, New Mexico, North Dakota, Texas, and Washington) have agreed to offer the course or incorporate the material into existing coursework at their institutions by next year. They also have agreed to collect data on their offerings.
4. The Through Shared Windows Curriculum, Instructor Guide and Inservice Training Manual have been submitted to VORT Corporation for review and possible publication.

5. The Director will continue to monitor the web site, which is currently partially supported by another project.
XI. Assurance Statement
XI. Assurance Statement

I, Holly Harrison, Co-Principle Investigator for Through Shared Windows (TSW) Outreach Project certify that the full and final report on TSW funded by United States Department of Education, Office of Special Education and Rehabilitation Services (OSERS) has been sent to ERIC and copies of the title page and abstract have been sent to the other addresses on the attached sheet.

Course Structure

Welcome

The materials for this online course are organized into modules. Modules contain learning activities such as readings, PowerPoint presentations, group discussion projects, and communication activities. All the modules will be available the first day of class to allow you to review all course materials.

You can navigate through the course using the menu bar located on the left hand side of the web page. Hypertext links (text that is linked to other web pages) is another easy way to navigate to different sections of the course. Most student activities in the modules will have hypertext links to the reading documents, PowerPoint presentations, discussion board area, chat room, student notebooks, E-Reserve Library, etc.

Each course menu category is explained below.

Welcome:
The welcome page is the first page you will see after you have been authenticated. Its purpose is to welcome you to the course and to introduce you to your instructor.

Syllabus:
The Syllabus page provides information on:
- Course Goals and Objectives
- Student's Role/Requirements
- Instructor's Role
- Target Audience
- Hardware and Software Requirements
- Student Assessment/Evaluation Plan
- Tuition for the Course
- College Credit Information

Modules:
There are 15 modules for this online course. It is expected for each module to take a week to complete with the exception of Module 2, which is scheduled for 2 weeks. Modules are made up of readings, group activities and individual projects. Each module contains the current module number, prep quiz, title, completion date, introduction, and the readings, activities and assignments associated with the particular module. In Modules 6 & 7, there are assignments which require you to view video tapes. The ordering information to purchase these videos follows:

"Flexible, Fearful & Feisty" (ordering information)
"Child Observation Techniques" (ordering information)

If you do not want to purchase these videos, you can do the alternative assignments which are listed in these modules.

The Prep Quizzes are provided to give you an idea of what knowledge you will acquire by the completion of each module. All quizzes are for self-assessment and the results will NOT be shared with the instructor or other students.

For Students:
This page is for students to learn about each other and exchange information. Each student will develop a simple web page that can be updated anytime while in the course. We strongly encourage that you share information about yourself so that other distant students will learn about your hobbies, professional interests and personal interests. Please provide us with a picture of yourself or another favorite photo that you wish to have posted on your web site.

http://www.newassessment.org/online/Help/Course_Structure.htm

97 BEST COPY AVAILABLE
Resource Room:
This page contains a list of links to most of the resources that we have provided. From here you can access your personal notebook, PDF documents, PowerPoint presentations, glossaries, web links, prep quizzes, Frequently Asked Questions (FAQ's), video information and E-Reserve Library research articles.

Communication:
This page offers you direct access to contact information for other students, discussion boards, chat rooms and the listserv.

Help/Utilities:
This section was designed to give you step-by-step instructions on how to solve the most common technical problems.

Search:
This page is designed to help you locate information on our web site only. This particular search engine can even search through PDF documents.

Management:
This section is reserved for instructors and course designers.
Goal

Participants will be able to provide comprehensive, family-centered, and culturally responsive services through the use of an assessment framework. This framework depicts the uniqueness of each child and family and opens shared windows through which various disciplines may view young children, thus complying with mandates of the Individuals with Disabilities Education Act (IDEA).

Learning Objectives

Students will be able to:

1. Understand and illustrate the basic principles of the Performance Competence Framework (PCF) in their own lives, a case study, and their practice.

http://www.newassessment.org/on-line/syllabus/descriptionpage.cfm
• Describe and explain the core elements of the PCF and the "oversight" function provided by these elements;

• Identify underlying factors which both support and compromise a child’s performance.

2. Explain the basic tenants underlying family-centered practice:

• Identify and describe practices that are family-centered within their own work/practicum environments;

• Summarize the basic components of family systems theory;

• Articulate a personal philosophy incorporating family systems theory into their own work with families.

3. Explain the social, political, and academic forces that have influenced assessment practices within the fields of early intervention:

• Evaluate current assessment practices with young children.

4. Identify and describe basic biological/genetic factors, temperament styles, cultural influences and basic biological drives that affect everyone in daily life.

5. Describe the basic principles, philosophies, and practices of qualitative observation:

• Explain the differences between the observation of behavior and the interpretation of behavior, events, and actions.

6. Identify, describe and apply principles and techniques of effective communication with families including use of appropriate vocabulary, location, content, and culturally respectful strategies.

7. Describe potential modifications of an assessment for a child from a different culture within a workplace or practicum site.

8. Describe the sensory processing system, differentiating between the neurophysiological components and behavioral correlates.

9. Explain the comfort, safety, confidence, risk, and competence cycle experienced throughout an individual’s lifespan predicting possible or actual comfort and safety issues in novel learning situations.

10. Demonstrate the ability to work on an interdisciplinary team with a shared perspective of an integrated framework.

**Target Audience**

Early Childhood Professionals (teachers, interventionists, therapists, administrators, etc.) and Family Members of Young Children with Special Needs

**Prerequisites**

Bachelor’s degree required for graduate credit. Individuals without

http://www.newassessment.org/on-line/syllabus/
descriptionpage.cfm
bachelor's degrees may receive undergraduate credit, certificate of completion or University of New Mexico Continuing Education Credits (CEU's).

Classwork will be conducted individually, in pairs and in teams of 4 people. You will be assigned to a pair and team at the beginning of the semester.

**Instructional Materials**

**Printed Materials:**
- Student Guide
- Reading Packet of Articles
- PC Framework Graphic

**CD-ROM:**
- Video Lectures
- PowerPoint Presentations with audio
- Child Video Clips

**Video Tape:**
- "Justin" Case Study

**Online Materials:**
- Readings - PDF & MS Word Format
- Activities
- Assignments
- E-Reserve Library - Research Article

**Student Requirements and Role**

- Students must have access to a computer with the minimal requirements (see Software and Hardware Requirements below)
- Students must participate in team activities and assignments.

Each student is required to actively PARTICIPATE!

Participation involves:

1. Taking the time to read the online course materials and using the resources to actively apply the concepts that this course is promoting.
2. Reading other students' responses (listserv and discussion board messages) and relating your experience with theirs. We wish to create a learning environment similar to a traditional classroom.
3. Responding to reading materials, video clips, chat room discussions, discussion board postings, activities, and to the instructor and other students with questions and comments (examples, analogies, experiences) to help yourself and others apply what you have learned.
4. Providing feedback to your instructor about the modules, learning activities and assignments.

**Instructor Role**

Your instructor is there to guide you, encourage critical thinking skills, and independent learning skills and encourage students to interact and learn from each other. Your instructor will help you find the answers to your

http://www.newassessment.org/on-line/syllabus/descriptionpage.cfm
questions. You can expect your instructor to:

- Read individual messages and respond to questions within a reasonable time. Instructors, however, will not actively participate in the discussion board area.
- Respond to student comments and student-to-student discussion board comments with encouragement and additional information if warranted.
- Post additional supporting materials throughout the class.
- Ask questions throughout the course to generate group discussions.
- Direct students to the answers versus giving the answers and encouraging students to share their outcomes.

Hardware and Software Requirements

- A pentium class PC machine or Macintosh with monitor
- Modem connections 28.8kbps or faster
- CD-ROM 4X or higher
- Audio Speakers
- Web Browser:
  - Explorer 4.0 (FREE at http://www.microsoft.com/downloads/search.asp)
  - (AOL web browser users might experience technical difficulty)
- Adobe Acrobat Plugin (Free)
- Real Audio/Video Plugin (Free)

Student Evaluation Plan

Your grade will be based on the following:

Undergraduate Students:
50% - Graded Assignments - 4 assignments and the Final Paper
20% - Non-graded Assignments - 6 assignments
20% - Participation - 6 Discussion Forums and 2 Chat Activities
20% - Online Notebook - 16 Entries

Graduate Students
Assignments above plus additional requirements in Module 16.

Tuition of the Course

CREDIT: Application fee - Non UNM Students $10.00
Undergraduate Credit (3 hrs): $378.30
Graduate Credit (3 hrs): $417.00
Continuing Education Credit (CEUs): $20.00
Certificate of Completion: Complimentary
Materials Fee (required): $35.00

Evaluation Data

Evaluation survey results have been posted on our web site. Most of the pilot test participants provided us with feedback (N=6). We will discuss the data from the survey at the meeting.

http://www.newassessment.org/management/eval_results.cfm

Debrief from Pilot

The pilot test indicated that we still have a lot of work to do. I personally felt that the test provided us with some good data about student navigation and what types of support resources are still needed to make things run easy and fast for the online student. We should focus on providing lots of hands-on materials about the course even before the students start taking the course. A small "users manual" can illustrate the basic components, categories, guiding philosophies, student and computer requirements, and anything else that needs to be explained in order to reduce the students online course confusion and concerns. Novice computer users were confused and experienced frustrations with the technology part of our course. Our target audience will appreciate helpful materials to make the learning paradigm shift a little bit easier.

I believe still that having a "Student Packet" will improve student satisfaction with obtaining ALL the readings for this course. The expense will be covered by the "student supply fees".

Evaluation is still important part of this course and I will continue to obtain data form all the stakeholders of this project as we continue to get closer to our Spring deadline. Your comments and suggestions are always appreciated.

Another instructional design meeting has to take place in the beginning of Sept. We will discuss the learning objectives, activities and support resources for the other modules. This might be a 2-3 day meeting.

Changes to be made to course

Content:

- Modify/revise current content for chapter 1-4.
- Ensure that content and instructional activities are approved by all instructors before it goes online.
- Ensure that content and support features are compatible and utilized appropriately.
- Ensure that all readings are made available online via PDF. If not possible, then the readings should be mailed out to students.
- Ensure that all activities have clear and easy to understand instructions
- Provide a rich amount of Frequently Asked Questions for students (content and tech stuff).
- Evaluate the student notebook design
- Provide several interactive activities to build confidence and experience in taking our online course for the first two weeks.
- Ensure that students are being supported with any questions or concerns about the course. 800 Help Line?
- Ensure that we have at least two conference calls with students at a distance.
- Create and distribute Research Articles Packet.
- Create more PowerPoint presentations
- Create some interactive quizzes to provide Check For Understanding (CFUs) activities for students

Technology:

http://www.axm-multimedia.com/notes/outcomes.htm
- Resize HTML pages for 800x600 with scroll equal to "no".
- *Redo all videos. Mary B.K was too dark. Guide Tour needs to be carefully narrated and chucked into sections.*
- Create new videos if necessary.
- Provide Windows tip sheets for online students.
- Create a Tech Glossary
- Create Weekly Tech Tips for Mac and PC users
- Discussion Board - have a total number of participating messages by each topic
- Downloading choices and instructions.
- Tech savvy survey should have Mac related questions.
- Tech team will train instructors and interested staff members on how to upload and manage web course.
- Create Tech FAQ
- Create the "Coffee Lounge"
- Ensure that no "trunctations" occurs with form entries
- Activate the "Module Learning Resource Grid"

**Administrative:**

- Obtain university credit approval
- Obtain costs for state and out-of-state tuition.
- Determine how many students will be register for this course, how many courses and how many instructors.
- Recruit online students
- Create online student packets
- Finalize notification letters and promotional brochures
- Obtain CEU credits
- Register online course with UNM Records Department

**Responsibilities/Action Plan/Timelines**

H. Harrison: Director, Final Decision Maker, provides project direction and content expert
M. Stevens Dominguez: content expert
P. Turner: content expert
D. Atencio: content expert
A. Nolla: resource researcher
T. Johnson: administrative and tech support leader
A. Martinez: lead tech team on design, development and evaluation of course
V. McWilliams: support tech team on design, development and evaluation of course
B. Jackson: provide administrative, and resource support
N. Turley: provide tech support
D. Valiant: provide tech support

  PC, PC, PC, PC, PC, PC, PC, PC, PC, PC

What is your gender?
  Female all respondents
Age is: 40, 50, 23, 45, 41, 23, 42, 34, 37, 64,

Ethnicity: White (Non-Hispanic/Latino), White (Non-Hispanic/Latino), White (Non-Hispanic/Latino), White (Non-Hispanic/Latino), not provided, White (Non-Hispanic/Latino), Hispanic/Latino (non-white), White (Non-Hispanic/Latino), White (Non-Hispanic/Latino), White (Non-Hispanic/Latino)

Education level: Bachelors Degree, Bachelors Degree, Bachelors Degree, Bachelors Degree, Masters Degree, Bachelors Degree, Masters Degree, Bachelors Degree, Bachelors Degree, Doctorate/Professional Degree

What did you like least about the course?
No answer provided, Overload to complete a module/week, I didn’t think some of the directions were worded as clearly as they needed to be, Time factors to do course, Work load and the lack of feedback, At the end everything just seemed to get crazy that as no one’s fault but my own, but the article reviews/critiques were so much for us to handle, Having to work our chat sessions with other members of the class., Expectations not always clear for assignments, non-consistent directions., Lots of time spent printing things out, would have liked more feedback., Jumping from module to module, team assignments were different and not productive.

What did you like most about the course?
No answer provided, The course content and applying the content to really learn the content and the feedback on assignments that was professional., I liked the course material and the stories that we got to read to help us apply the material we were learning to real life situations., New Assessment., no answer provided, I really enjoyed the flexibility of the course, I have learned so much NEW info and look forward to looking back and applying it to the real life situations I encounter., I liked being able to complete the course from home in my own space and in my own time., Doing the course from home., Course content was interesting., The careful planning that had gone to taking the concepts and putting in internet form.,

What are your recommendations for improving the course?
No answer provided., Evaluate the load. This online course was a wonderful experience., More clearly stated directions on module assignments., Independent study work would be better for this student., Reduce workload, pick meaningful assignments, reduce article critiques, weekly feedback needed, more interactions with classmates., No article critiques for a weekly module assignment. Maybe having a couple, but they are extremely time consuming and with the other work we were having to put in it really was a stressor., Eliminate chats and have more email interactions with student and instructor., Groups need to be thought out depending on level of student (completion vs. credit)., No answer provided., see above.
The online course was: (1 wonderful, 5 terrible)
3, 5, 4, 3, 2, 4, 3, 2, 5  Average = 3.4
Comments: It provided a refresher on the content, but gave a new way to view that information. A wealth of info and a learning method with repetition and application that really works for learning and remembering what has been learned. I really enjoyed the course material and felt it ran smoothly most of the time. No comment., No feedback makes it difficult to complete course I have no idea if I have done expected work or if I missed the point of the entire course. I was thankful that the critiques were taken out of the weekly modules. Those were extremely time consuming!, Provided good new info., no comment., no comment., I applaud the folks who developed the courses. It was carefully prepared I was amazed by the flow.

The Online course was: (5 exciting, 1 dull)
3, 5, 4, 3, 2, 5, 4, 3, 3, 4  Average = 3.6
Comments: It provided the theory for the evaluation process that I began changing a year ago., No comment., No comment., No comment, It was difficult to maintain interest at times because of the lack of human communication., No comment., Provided new info., No comment., No comment., Not a fair question for someone who is involved in assessment and shares your philosophical base.

The Online course was: (5 Flexible, 1 rigid)
2, 5, 4, 1, 4, 5, 3, 2, 5  Average = 3.4
Comments: I guess you have to have a timeline but I didn’t like the deadlines., No comment., No comment., No comment., It was nice to have some flexibility on assignment due dates when things got sticky., Very nice and flexible-perfect for my schedule., No comment., No comment., No comment., The flexibility may be in relationship to the bits and pieces that we were responsible for completing.

The Online Course was: (5 just right, 1 too much)
3, 3, 3, 1, 4, 2, 3, 2, 5  Average = 2.7
Comments: Too much with the article reviews for a weekly assignment. Also when there were other Project Life obligations it was very difficult to spend added time on the online assignments., It only seemed overwhelming when I got behind, but was also difficult to work in with my work schedule., No comment., No comment., No comment., I knew that the rule of thumb is 9 hrs for a 3 hr course but that is time the student is expected to put in to a course, not be forced to put into the course. It left no time for reflection or review because of the stress of completing the required work., Very nice and flexible-perfect for the rest of my schedule., Too much toward the end of the semester I felt like I was repeating myself., No comment., No comment., Felt course load was reasonable.

The Online Course was: (5 easy to follow, 1 difficult to follow)
3,4,2,3,5,4,2, 2,5,4  Average = 3.4
Comments: Clarification was fairly quick coming when I did not understand to work in my work schedule., Sometimes the directions for certain activities were no written clearly and left the student wondering if they were doing the correct thing., No comment., No comment., No
Some of the directions were very confusing, there was conflicting information about expectations. Confusing you sent copies of readings and also had online. Several modules were difficult to understand. Module 7 is the one that was most difficult for me.

The Online Course was paced: (5 just right, 1 too fast)
3, 3, 1, 4, 5, 3, 2, 5, 3  Average = 3.2
Comments: No comment., No comment., Not good for me as a single working parent., The pace was alright, but the work was too much., No comment., The pace was fine., No comment., No comment., Not really sure how this question differs from question 13., Just right without the article reviews and added assignments for Project Life.

The Online Course was: (5 easy, 1 difficult)
4, 3, 2, 3, 4, 4, 3, 2, 5, 3  Average = 3.3
Comments: It fit the information that I had been working on, as well as my mind set toward looking at it differently., No comment., No comment., No comment., No comment., Easy to follow but required a fair amount of dedication., No comment., No comment., On could of taken the course quizzes without reading the material., Challenging but not easy or difficult.

The Objective of the course were (5 clear, 1 unclear)
3, 4, 3, 3, 5, 3, 3, 3, 5  Average = 3.5
Comments: No comment., No comment. No comment. No comment. No comment. No comment. Graduate assignments need to be placed toward the top of the syllabus so due dates aren't missed. No comment. No comment. Confused about the objective about the framework? Or information to assess?

What is your level of experience in the assessment of infants-young children ages birth to 5 years?
4, 1, 3, 2, 3, 3, 3, 1, 4  Average = 2.7
Comments: Been assessing children birth to 5 years for 13 years., No comment., No comment., No comment., I have worked in this area for one year and have quite a bit of training., No comment., No comment., No comment., No comment., I have years of experience in audiology and developmental assessments as an expert.

Given your level of experience in the assessment of your children, how would you rate the level of difficulty or complexity of the information presented?
3, 3, 3, 2, 3, 3, 3, 1, 4  Average = 2.8
Comments: For me it was just right, but a person with less experience may have found it difficult., No comment., No comment., Most of the information was very functional and easy to follow. I did have difficulty understanding some of the articles we were asked to critique., It was presented nicely, and I learned so much so to me that is all valuable info., No comment., No comment., Down's syndrome child used as example difficult don't know norm., Not fair question it was simple but should it not be for someone with so much gray hair.
The Online course provided me with info and/or skills, which I can use directly in my chosen field.
4,5,5,4,5,4,4,4,5          Average = 4.5
Comments: No comment., No comment., No comment., No comment., Lots of info was very functional and I have incorporated it into my work., No comment., No comment., No comment., Information resources and concepts were presented that I could use training but not assessment.

I feel the content has value for me as a person.
4,5,5,4,5,4,4,4,5          Average = 4.9
Comments: No comment., No comment., No comment., No comment., see above., No comment., No comment., I learned new skills chat room, set up web page, more comfortable with computer.

The Reading Packet (received in the mail) was [helpful to not helpful]
2,5,2,5,3,3,5,3,?, 5          Average = 3.6
Comments: No comment., No comment., No comment., No comment., No comment., No comment., Served as a nice backup to all the material., No comment., No comment., Good articles.

Readings and articles (Adobe Acrobat PDF) were:
4,5,4,4,3, 5,4,5,3,5          Average = 4.2
Comments: I had to print the articles in order to absorb the material., No comment., No comment., No comment., I enjoyed these articles and I could print them out to highlight and read them., Good sources of information., No comment., No comment., Appreciated powerpoints!

Prep-Quizzes were:
1,2,2,1,1, 4,3,2,?,1          Average = 1.89
Comments: No comment., No comment., No comment., No comment., Nice to see how much info I knew before going into the module and realizing how much I was learning., Fun!, No comment., No comment., Too simplistic.

PowerPoint presentations were:
1,4,3,3,3,3,3, 3,3, 5          Average = 3.1
Comments: No comment., No comment., No comment., No comment., Would prefer a different format so that the info could be printed more easily., A good review of the readings., No comment., No comment., Great.

Video clips (on the CD-ROM) were:
4,5,5,3,1, 5,4, 3,5,?          Average = 3.89
Comments: No comment., No comment., No comment., No comment., No good., It was nice to see a face once in awhile even if it was the computer screen., Cool., No comment., No comment., Don’t remember any did I miss something?
Discussion Board were:
3,5,5,5,1,5,1,3,3,1   Average = 3.2
Comments: No comments., No comment., No comment., I could not always be there to participate but learned much from the others., Not functional., Fun to read other classmates work-see how they interpreted the assignments., Difficult because not everyone participated., No comment., No comment.,

Chat Sessions were:
3,5,3,1,1,3,1,1,2,1   Average = 2.1
Comments: No comment., No comment., No comment., No easy at all to coordinate same time to chat with others., What chat sessions?, No comment., Disastrous it proved extremely difficult to connect with other people at specific times., Frustrating the way it was set up., No comment., No comment.,

Online Journal was:
2,5,3,3,1,5,4,4,5,4   Average = 3.6
Comments: No comment., No comment., No comment., No comment., Is this the online notebook?, No comment., I enjoyed the activity., No comment., No comment., Easy to use but missed feedback.

Online Web Links was:
1,5,3,3,2,3,5,3,?, Comments: No comment., No comment., No comment., No comment., Not available in a timely fashion during some units., No comment., No comment., No comment., No comment.,

FAQ were:
1,5,3,3,1,4,3,1,?,1   Average = 2.4
Comments: No comment., No comment., No comment., No comment.,???, No comment., No comment., No comment., No comment., Didn’t use.

Glossary of Terms were:
3,5,3,5,2,4,5,2,4,1   Average = 3.4
Comments: No comment., No comment., No comment., No comment., No comment., No comment., Very helpful for operational definitions., No comment., No comment., No comment. Already knew words.
Listserv was:
3,5,5,1,2,4,1,2,?,5
Average = 3.11
Comments: No comment., No comment., No comment., I wasn’t on the list., No comment., Never had my correct email address so I was out of the loop most of the time., No comment., No comment., Helpful!

Help and Utility Center was:
5,5,3,4,2,3, 2,?,?
Average = 3
Comments: Initially, invaluable, but once I got the hang of it I didn’t use it., No comment., No comment., Please delete my picture, I tried but failed., No comment., No comment., No comment., No comment., No comment., Never used.

Online Search ability was:
1,5,3,1, 4,4,2,?, ?
Average = 2.88
Comments: No comment., No comment., No comment., No comment., ????, No comment., No comment., No comment., No comment., Never used.

The instructor provided feedback in a timely manner.
4,5,5,4,1,5,2,2,2,5
Average = 3.5
Comments: No comments., Excellent and useful feedback., No comment., No comment., No feedback on assignments. We ran blind through the entire course., I was pleased with the time span she took to respond to our assignment., I still don’t know how I did on the individual assignments aside from the letter grade assigned., No comment., Would have liked feedback sooner., Not fair considering it was during vacation for students and faculty.

The instructor was available most of the time for my telephone calls.
4,5,5,5, ?, 5, 3,?,?,?
Average = 4.5
Comments: No comment., No comment., I didn’t ever call the professor but she was very quick to respond with questions I had over email., Holly., No comment., I never phoned her, but always responded promptly to an email., No comment., Didn’t try to call., No comment., Never called.

The instructor provided the needed help and guidance I needed to succeed in the course.
4,5,5,5, ?,5,2,3,?,5
Average = 4.25
Comments: No comment., No comment., No comment., Holly., The tone of many of the e-mails was negative and instructor did not seem conductive in the help department., No comment., I disagree because I didn’t receive feedback in a timely manner., No comment., No comment., No comment.

The instructor contacting me by email was helpful.
5,5,5,5,2,5,5,3,4,5
Average = 4.4
This was very helpful and proved to be the best way to keep in touch.

The instructor evaluated my performance according to the stated course objectives and requirements.

Concepts and techniques were explained clearly.

You were encouraged to actively participate in the course.

Your individual questions/problems were discussed to your satisfaction.

Online course facilitated opportunities to apply content.

Online course related content to real situations.

New Assessment Web Site Survey
Summarization of Questions 2 & 4

Question 2: What would motivate you to visit our site on a regular basis?

Responses: Case studies for different pre-primary children training updates. New info/contacts. Good info. Practical info written in laymen’s terms so that anyone could understand it without a dictionary. Ideas, activities, suggestions for professionalism for assessment of children infants to five years. Being a student at UNM and working with multiple impaired children at NMSUH. Any info regarding research you are doing. More info in an already interesting topic. Useful practical suggestions and clarification of theoretical references to articles. Current info that will help me be a better teacher and be able to implement them. Recent research assessment that is directly related to teaching in the classroom. Internet dial up from home. New current ideas about education and assessment. Up to date info on the above aspects. Free stuff. Up to date and accurate info about assessment techniques. Things I can do in the classroom that will help a diversity of students. Easy access to the site. New info on a regular basis. Current info about the topics in question 1. Information concerning behavior problems in an out of the classroom. Current ideas and new topics regarding education. Info about early childhood education topics. Downloadable resources either papers on assessment or assessment tools. Current research.

Question 4: What assessment resources do you recommend we include on this site?

Responses: Current data other SELF type assessment teacher tools for assessment. How to assess with culturally/linguistically diverse, alternative assessment for children with disabilities, assessment without bias that is a valid and reliable indication of a child development level. Info on observations what is necessary in a child’s portfolio, where parents can find info about agencies that can help them and their children. Things on the Oregon Project and Carolina. SELF Reg. I would hope that many resources would be included. Research conducted hands on theories. Actual forms of assessment. Resources for classroom for child development. Resources that teachers can apply in the classroom that are easy to use while teaching also assessment resources that parents can take hope for more insight on their child’s development level. What types of assessment there are and samples of each. Different forms of assessment techniques, pros and cons of these different forms, assessment questions an answer section. Actual assessment forms. How to assess bilingual children, assessing children in a different areas of development, resources that would help me to assess children in the classroom. Something that would help all professionals assesses children (make simple and understandable nothing technical) working models. Projects for early childhood student’s curriculum for early childhood students.
### 1. What is the purpose/goal of this Web site? (Goal Statement)

**Brainstormed Idea:**

The purpose/goal of the New Assessment Web site is to inform, instruct, guide, and provide resources to families and others interested in recommended practices for assessing young children.

**Overall goal of the Web site (Looking at the whole child)**

- Provide tools & information for people to be able to assess young children
- Cover legal issues
- Develop an awareness of other models on assessment
- Assessing within multiple environments
- Holistic view of children by all
- Provide information to families on normal development and assessment

**Brainstormed Idea**

1. Provide tools & Information for people to be able to assess young children
2. Cover legal issues
3. Develop an awareness of other models on assessment
4. Assessing within multiple environments
5. Holistic view of children by all
6. Provide information to families on normal development and assessment

- Course Transfer Agreement
THROUGH SHARED WINDOWS:
THE PERFORMANCE COMPETENCE FRAMEWORK
Application Activity
Submitted by Mary Jo Schill
University of North Dakota

Activity Description:

A 2.5 hour presentation was designed to introduce graduate students in speech-language pathology to the Performance Competence Framework and how it might be applied to transdisciplinary assessment of young children. The information was presented on December 5, 2001 to 18 graduate students enrolled in CSD 583: Advanced Diagnostic Procedures at the University of North Dakota. Both lecture and discussion were used as the primary instructional strategies.

Evaluation Data:

All 18 students completed a short written evaluation at the end of the class period. The data from this survey is summarized below.

Question 1: Did you find the PCF easy to understand?

All 18 students responded “Yes” to this question. Comments included:

- It was easy to understand once it was broken down and explained.
- It makes sense and is logical.

Question 2: If no, what was confusing?

Not applicable as all students responded “Yes” to question 1.

Question 3: Do you feel that you could apply the concepts of PCF model to your profession?

All 18 students responded “Yes” to this question. Comments included:

- I think it ties in well. Observation is a critical part of what we do in terms of assessment and intervention.
- With some adaptations

Question 4: If yes, how would you apply the model?

All 18 students responded with the following comments:

- Use observation and look for all areas that the model describes.
- Would apply in assessment & intervention; gives great overview of communication areas.
- Sometimes I just look at one specific area and leave out other aspects; if I look at the child with a different perspective, I can learn more.
You could look at the different areas of the model to figure out what is affecting the child's quality of life and then set this as a goal area.

By using the different areas, one can obtain a pretty detailed picture of an individual during assessment. One would probably gain more information by using this model than more traditional approaches (which often focus on specific areas).

Compare the child's level of competence to performance; figure out the child's strengths and weaknesses in all areas, not just communication skills.

By working closely with all the other professionals and the parents to get a complete picture of the child.

By incorporating and analyzing the information from each of the components of the model during assessment; I think we do some of it anyway, but not in as much depth as the model suggests.

Look at all the different areas and how performance affects the child's quality of life; this will help in planning intervention.

By observing children and their reactions in many different environments.

By including all of the different observations that are so important. The model organizes the different aspects of the child's life that will have an impact on them.

By observing children in many different environments as part of the assessment process.

Look at different areas of the model to determine strengths and weaknesses; it helps to evaluate many aspects of the child as a whole.

The observation included would serve as a great supplement to any formal assessment procedures that may be used.

I would focus less on a specific competence, which we tend to do, and look at the "whole child".

By getting a better "overall" picture of the child; understanding communication skills in a variety of settings.

By looking at all areas of the individuals' development; provides good areas to look at when observing.

Following this model would provide great organization when assessing a child as part of a transdisciplinary team.

Question 5: In learning about and applying the model, what instructional strategies do you feel would be most helpful (e.g. case studies, videos, reading, lectures, projects etc.)?

Strategy is listed with the number of those who indicated that strategy:

- Videos/observation: 18
- Case studies/examples: 12
- Discussions: 8
- Readings/handouts: 5
- Projects/group assignments: 3

Question 6: Are you interested in learning more about this model?

17 responded "Yes"
1 responded "No"
Application Activity

Pam Lindsey – Tarleton State University – Stephenville, TX

I incorporated some parts of the Through Shared Windows course into my online special education law course and into my Severe-Profound Assessment course during the summer.

Evaluation of the PC Framework Application Activity

They loved it. We did the ‘Little Bit story through a threaded discussion and we actually used the Framework to assess a four year old with Autism. We looked at his formal "assessment" data and made some judgments based on his folder, then we met him at school with his teacher and mom. We videotaped him with his teacher doing all kinds of language, motor and play activities, interviewed his mom, etc.

We talked about how our clinical impressions and our functional impressions were alike and different. They were amazed at how the clinical data (IQ etc) had very little relevance to how he was in real life. We talked about how we need to look at the whole kid. I think they will be much better diagnostians because of it.

For the law class, we looked at some due process hearing decisions concerning young kids and assessment. The students tried to decide how the school could have done a better job of assessing the whole kid based on the issues brought up at the hearing. This was not as powerful as the other demonstration, but again, the bottom line was we need to look at more than just clinical data.
Application Activities for the Fall/Spring Semester

Earnestine Kirtland  
Gateway Community College

Introduction to Special Education Course  
20 students - sophomores  
Provided lecture on the Performance Competence Framework Overview  
Students participated in the ‘Little Bit’ Application Activity  
Students participated in a focus group activity and provided positive feedback on the PC Framework and the activity

Assessment Course  
8 students – sophomores  
Provided lecture on the Performance Competence Framework Overview  
Students participated in the ‘Little Bit’ Application Activity  
Students participated in a focus group activity and provided positive feedback on the PC Framework and the activity

Mary Fischer  
Washington State Department of Education

Washington State ICC Personnel Preparation Committee  
Provided an overview of the PC Framework during a committee meeting.  
Discussed how the course would fit into both the inservice and preservice training for early interventionists in Washington State.  
The content and format of the course was well received.

Nancy Baptiste  
New Mexico State University

Undergraduate Early Childhood Courses  
Provided a unit based on the Comfort and Safety Module  
The students rated this unit as one of the highest for the course.
Agenda

Friday, March 8:
5:30 - 7:30  Welcoming Reception/Dinner
Radisson Hotel – Room 369

Saturday, March 9:
8:30 - 9:30  Performance Competence (PC) Framework Game
David Atencio

9:30 - 10:30  PC Framework Overview, Meave StevensDominguez

10:30 to 10:45  BREAK

10:45 to 12:00  Overview Continued

12:00 to 1:00  Lunch – Frontier Restaurant

1:00 to 1:15  Uri Bronfenbrenner Video

1:15 - 3:00  Online Pedagogy, Holly Harrison and David Atencio

3:00 - 3:15  BREAK

3:15 - 4:00  HTML Online Course Overview, David Porter

4:00 - 5:00  *Individual Support Sessions,
TSW Outreach Project Staff
Agenda

Sunday, March 10:

8:30 - 10:30    Adaptations for Traditional Course
                Mary Bolton Koppenhaver

10:30 - 10:45   BREAK

10:45 - 11:30   Adaptations and Options for Online Course, TSW Project Staff

11:30 - 12:00   Blackboard, Web CT Overview and Implementation
                David Porter

12:00 - 1:00    LUNCH - Catered

1:00 - 2:00     Student Performance Assessment for an Online Course
                Dick Howell and David Sanchez

2:00 - 2:15     BREAK

2:15 - 2:45     Transfer of the Course, Agreements and Commitments

2:45 - 3:00     Participation in Future Outreach Project

3:00 - 3:10     Wrap-Up and Evaluation

3:10 to 5:00    *Individual Support Sessions, TSW Outreach Project Staff

* Individual Support Sessions may be scheduled with any of the following,
TSW Outreach Project Staff on Saturday and Sunday.

Sessions involving course content:
  * Meave Stevens Dominguez
  * Mary Bolton Koppenhaver

Sessions involving online teaching:
  * Holly Harrison
  * David Atencio

Sessions involving technology:
  * David Porter
Knowing Your Learners

- Adult Learners
- Diverse Learners
- Learner Assessment
- Tips for getting to know your learners
- See guiding principles for adult learners

Virtual Learning Environment

- Creates feelings of warmth and comfort
- Orient the learner
- Uses theme or metaphor
- Is thought provoking
- Focuses attention
Virtual learning environment:
- Is appropriately stimulating
- Promotes in-depth study
- Uses real life context
- Is user-friendly

Learner safety and comfort:
- Is organized
- Not overwhelmingly visually
- Facilitates learner involvement
- Fosters group cohesiveness
- Provides clear instructions
- Meets diverse learning needs

Learner safety and comfort:
- Includes references for pre-existing knowledge
- Is visually appealing for diverse learners
- Accommodates for different learning styles
- Is accessible for learners with visual
- Accommodates for low bandwidth
- other technical challenges
Active learning

- Encourages learner participation
- Involves more than intellectual learning
- Uses a variety of learning activities
- Potential for changes in learners' knowledge, skill, or attitude

Structuring the learning experience

Designing interaction: Interaction

- Straight discussion
- Collaborative learning projects
- Active learning strategies
- Seeking information
- Social interaction and networking
- Expert consultation
- Strategies: Web Mapping

Linear and non-linear instruction

- Learner or teacher-directed
- Poses questions to encourage exploration of thought and interpretation
- Teaching mode is facilitative
- Allows learners to make their own meaning
- Facilitates problem solving
- Divergent Thinking
Learner Motivation

- Use learner's experience and in context
- Activities relate to real-life situations
- Involves learners
- Encourages exploration and problem solving
- Uses multimedia in meaningful ways

Learner motivation (2)

- Builds opportunities for learners, included by peers
- Is safe and respectful environment
- Respects and builds on diversity
- Builds learner experiences in which the learner feels successful

Time Continuum Model of Motivation

- Beginning of the Learning
  - Learner starts the learning
  - Enhancing learners' prior posture, attitude towards the content
  - Recognizing the learner
  - Forming intersubjectivity
Time Continuum Model of Motivation
- During the Learning Process:
  - Learner immersed in achieving
  - Stimulation
  - Emotional affect
  - Feedback (information/; Corpo)
- Ending Phase:
  - Learner finishes up the learning
  - Developing learner's competence
  - Providing reinforcement

Remember
- Motivation = Goal X Arousal
- Personal Agency Beliefs:
  - Perceptions of Capability (Competence)
  - Perceptions of Context (Responsive)
- Competence = Skill X (Responsive Environment)
  - (Martin Ford, 1992, Motivation Systems)

Basic Questions for Planning Activities
- What can be done to facilitate goals for this learning sequence?
- How can the needs of the learner be identified in learning sequence?
- What will provide stimulation in the learning sequence?
- How can I facilitate a positive and emotional climate for learners?
- What strategies can be used to boost learner's feelings of competence sequence?
- What reinforcement can be given at the conclusion of this learning sequence?
Course Transfer Agreement

This agreement is between the University of New Mexico and in order to effect the transfer of the online course, "New Assessments: Through Shared Windows (TSW)." The following provisions constitute the parameters that govern the transfer process, and the period of use of the online course materials:

1. All TSW course content remains the intellectual property of the creators and The University of New Mexico regardless of the format and delivery systems used to transmit the course.

2. Any use of TSW course content must be appropriately attributed to The University of New Mexico in a prominent location regardless of distribution format.

3. All uses of TSW course content are restricted to the institution of higher education (IHE)/educational agency (EA) listed as the primary recipient in this agreement and only to those students within the state wherein said IHE/Agency is located.

4. The TSW course content may not be exported under any circumstances without the express written permission of the creators and The University of New Mexico.

5. Teaching faculty in the aforementioned IHE/EA must submit a yearly report for the first two years after transfer to the "Center for Family and Community Partnerships" providing information on the following aspects of the TSW experience at their institution:
   a. Number of students in all sections of the course during that fiscal/academic year
   b. Demographic profile of all students including: occupation, age, education level, and ethnicity.
   c. Student evaluative data regarding satisfaction with the course content and applicability to their profession/occupation.

Instructor Guide

Application of the Performance Competence Framework - A New Framework for Observational Assessment of Young Children

Meave Stevens Dominguez, Ph.D.
Holly Harrison, Ph.D.

Note: This material represents the delivery of the traditional face-to-face course. The online application of the course uses some of these strategies plus additional content and strategies to enhance online learning.
Through Shared Windows (TSW):
A Framework for Observational Assessment of Young Children

This material represents the delivery of a traditional sixteen week face-to-face course. The TSW online course uses some of these strategies plus additional content and activities to enhance online learning. This course is designed for graduate level work but can be offered for upper level undergraduate credit.

Through Shared Windows Course Chart

The TSW chart displays the objectives for each Module and corresponding class structure including lecture topics, assignments, activities and readings.

Course Structure

The course is divided into sixteen modules, an introductory Pre-module and 15 content Modules based on the Performance Competence Framework for Observational Assessment of Young Children. Each Module is cross-referenced with the TSW Curriculum. Modules contain an Overview Sheet for structuring a class session and Lecture Topics, Lecture Note Sheets, Overheads, Handouts, and Suggested Activities and Assignments.

In addition, the Power Point presentations are provided on disk for class lecture overheads or computer-based presentations.
TABLE OF CONTENTS

Through Shared Windows Course Outline

Pre-Module: Introduction to the Course
Module One: Overview of the Performance Competence (PC) Framework
Module Two: Application of the Performance Competence (PC) Framework
Module Three: Setting the Stage for Family-Centered Practice
Module Four: The PC Framework Core
Module Five: The Assessment Process: Historical Perspectives and
Current Practices
Module Six: Givens: The Biological Basis for Behavior
Module Seven: Observational Assessment
Module Eight: The PC Framework Applied: Justin Case Study
Module Nine: Family-Centered Communication Skills
Module Ten: Environmental Influences: Family System Theory
Module Eleven: Performance Competence Framework: Review and Practice
Module Twelve: Key Factors Underlying an Efficient, Adaptive Response
Module Thirteen: Comfort and Safety Cycle
Module Fourteen: Areas of Function & Areas of Interaction
Module Fifteen: The Performance Competence Framework applied
Through Shared Windows Course Outline

Required Text: *Through Shared Windows (TSW): A Framework for Observational Assessment of Young Children*

Goal: Students will be able to provide comprehensive, family-centered, and culturally responsive services through the use of an assessment framework. This framework depicts the uniqueness of each child and family and opens shared windows through which various disciplines may view young children.

Each Module includes knowledge, skill and/or application objectives, lecture topic, activities, assignments and readings.

<table>
<thead>
<tr>
<th>Module</th>
<th>Objectives</th>
<th>Lecture Topic, Assignments, Activities, Readings,</th>
</tr>
</thead>
</table>
| Pre-Module: Introduction to the Course | • Understand the objectives and requirements of the course | Course Requirements  
Response Paper Assignments  
TSW Pre-test: Assessment Philosophy and Practices  
Reading: *TSW: Charting a New Course for Assessment* |
| Module 1: Overview of the Performance Competence (PC) Framework | • Understand the basic principles of the Performance Competence Framework (PCF) and how they govern the assessment process.  
• Explain assigned scenarios based upon segments of the PCF. | Lecture: PC Framework Overview  
Activities: 'Little Bit' Story  
Personalizing the Framework and Application Strategies  
Reading: *The PC Framework: A Narrative Discussion* |
| Module 2: Application of the Performance Competence (PC) Framework | • Identify underlying factors that both support and compromise an individuals performance  
• Apply the basic principles of the Performance Competence Framework (PCF) in a fanciful and personal application | Lecture: Little Bit Story and the Mystery Solved  
Activities: Little Bit Behavior Activity  
PC Framework Game  
Reading: *A Performance/Competence Model of Observational Assessment* |
| Module 3: Setting the Stage for Family-Centered Practice | • Explain the basic tenants of family-centered practice  
• Identify and describe family-centered practices in work/practicum environments | Lecture: Family-Centered Practice  
Small Group Activities:  
• Sharing Who We Are  
• Choosing Where You Are On the Continuum  
Assignment: Family-Centered Interview  
Reading: *The PC Framework Up Close*  
*The Framework Core: What is it that We Really Want?* |
| Module 4: The PC Framework Core | • Explain the social, political, and academic forces that have influenced assessment practices in the field of early intervention  
• Evaluate current assessment practices with young children | Lecture: The PC Framework Core  
Presentation: Parent Panel  
Activity: Applying the Core  
Individual & Family Support Issues Model  
Assignment: Pink Slip Activity  
Reading: *The PC Framework Core* |
Review: Major Historical Landmarks  
Assignment: Historical & Theoretical Context of the Major Shifts in Early Childhood Assessment  
Reading: Instructor’s choice about history of early childhood assessment |
<table>
<thead>
<tr>
<th>Module 6: Givens: The Biological Basis for Behavior</th>
<th>Describe the basic principles, philosophies, and practices of qualitative observation.</th>
<th>Lecture: Givens: The Biological Basis for Behavior View: 'Flexible, Fearful, &amp; Feisty' or another Temperament Video. Activities: Givens Activity. Assignment: Temperament Web Site Assignment. Reading: <em>Givens: The Biological Basis for Behavior</em>.</th>

A New Framework for Observational Assessment of Young Children

Including Application of the

Performance Competence Framework
Application of the Performance Competence Framework -
A New Framework for Observational Assessment of Young Children

The materials in this text can be used to support the delivery of University coursework on new methods of assessment. Information also is provided to support inservice training and workshops. The University of New Mexico Faculty and Staff use the materials to deliver a three credit course on assessment, Through Shared Windows, through both online and traditional formats.
