ABSTRACT

There are two broad views about what determines language teacher effectiveness. One focuses on teachers' language and methodological knowledge/skills. The other concentrates on personality (intelligence, self-awareness, and rapport). This paper presents a framework that reconciles the two views, proposes a way to visualize their interrelations, and takes into account research findings that indicate that teachers' practices are mostly influenced by their interpretation of methodological frameworks. The framework includes three elements: personality, methodology, and language. Teacher effectiveness is depicted as the area of a triangle, with each side representing the extent to which each element is developed. The larger the area, the higher the effectiveness. Three categories include the following: all elements are equally developed, one element is far less developed than the others, and one element is far more developed than the others. Given the perimeter of a triangle, an equilateral triangle will have the largest area from any other triangle with the same perimeter. This points to the benefits of a balanced development of all three areas. (Contains 14 references.) (SM)
The Shape of the Language Teacher

© 1998-2002 Costas Gabrielatos
Introduction

There are two broad views on what determines the effectiveness of a language teacher. One focuses on teachers’ language and methodological knowledge/skills (e.g. Rivers, 1972; Shulman, 1994; Woods, 1996). The other concentrates on personality, for example teachers’ intelligence, self-awareness, and rapport (e.g. Bridges, 1993; Prodromou, 1998; Ur, 1997).

Here I present a framework which:

- Reconciles the two views, giving equal weight to all elements: language knowledge/skills, methodological knowledge/skills and personality.
- Proposes a way to visualise their interrelations.
- Takes into account research findings which indicate that teachers’ practices are mostly influenced by their interpretation of methodological frameworks (e.g. Karavas-Doukas, 1996; Roberts, 1998; Ulichny, 1996; Woods, 1996).

Elements

Julian Edge (2002) proposed the term “person-who-teaches” to stress the personality factor. I have expanded the term into person-who-teaches-language. Each word points towards an indispensable element in a language teacher’s profile (Fig. 1).

[Figure 1: PERSON \(\downarrow\) PERSONALITY \(\downarrow\) TEACHES \(\downarrow\) Methodology: knowledge and skills \(\downarrow\) LANGUAGE \(\downarrow\) Language: knowledge and use]

In the following tables I outline the key aspects of each element (adapted from Gabrielatos, 1999, 2000, 2001).

This is a summary of my paper given at the 36th International Annual IATEFL Conference, University of York, 25 March 2002. It was published in Pulverness, A. (ed.) 2002. IATEFL 2002: York Conference Selections, IATEFL (pp. 75-78). Here I have added the references and bibliography, which were omitted from the IATEFL version.
Unavoidably, there is some overlap among the elements. For example, teachers' perception and knowledge of language will influence the way they teach (Woods, 1996: 187); teachers' general level of self-awareness will affect their awareness of their beliefs about language and learning, which, in turn, will influence the content and mode of their teaching.

Interrelations

In this framework, the effectiveness of a teacher is depicted as the area of a triangle, with each side representing the extent to which an element is developed (Gabrielatos, 1999, 2000, 2001). The larger the area, the higher the effectiveness (Fig. 2).

Apart from comparing the size of different triangles, it is also helpful to compare the sides of individual triangles, that is, examine the relative degree of development of each element. In that respect, we can identify three categories.

1. **All elements are equally developed.** In this case, all elements are utilised to their full capacity and combined for the maximum possible effect (Fig. 2).

2. **One element is far less developed than the others.** Here, the less developed element will limit the effect of the others. This representation can also help explain why teachers using different methodologies show comparable success in learning outcomes (e.g. Clarke, 1999). Combinations of different levels of development can produce equal triangles (Fig. 3).
3. One element is far more developed than the others. Here, the more developed element cannot be fully utilised (Fig. 4).

![Figure 4](image)

Some observations

Given the perimeter of a triangle (i.e. the sum of its sides), an equilateral triangle will have the largest area from any other triangle with the same perimeter. This points towards the benefits of a balanced development of all three elements.

It is essential that all three elements are well developed, or at the very least, developed above a 'threshold of acceptability'. True, any cut-off points are arbitrary, but such thresholds are already used in education and in determining entrance to professions.

Limited or faulty language knowledge will communicate an inaccurate picture of the target language. Inappropriate methodology will make learning too time-consuming and may discourage learners. An uninterested or offensive teacher will offer very little support and few opportunities for learning, and may de-motivate learners.

Reservations

The triangle framework is only a crude representation of the multitude of complex interrelations that make up the profile of a language teacher. It is proposed only as a point of departure, a helpful way to visualise the interaction of the basic elements contributing to a language teacher's effectiveness.

II. REPRODUCTION RELEASE:

In order to disseminate as widely as possible timely and significant materials of interest to the educational community, documents announced in the monthly abstract journal of the ERIC system, Resources in Education (RIE), are usually made available to users in microfiche, reproduced paper copy, and electronic media, and sold through the ERIC Document Reproduction Service (EDRS). Credit is given to the source of each document, and, if reproduction release is granted, one of the following notices is affixed to the document.

If permission is granted to reproduce the identified document, please CHECK ONE of the following three options and sign at the bottom of the page.

The sample sticker shown below will be affixed to all Level 1 documents
PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL HAS BEEN GRANTED BY

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 1

Check here for Level 1 release, permitting reproduction and dissemination in microfiche or other ERIC archival media (e.g., electronic) and paper copy.

The sample sticker shown below will be affixed to all Level 2A documents
PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE, AND IN ELECTRONIC MEDIA FOR ERIC COLLECTION SUBSCRIBERS ONLY, HAS BEEN GRANTED BY

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 2A

Check here for Level 2A release, permitting reproduction and dissemination in microfiche and in electronic media for ERIC archival collection subscribers only.

The sample sticker shown below will be affixed to all Level 2B documents
PERMISSION TO REPRODUCE AND DISSEMINATE THIS MATERIAL IN MICROFICHE ONLY HAS BEEN GRANTED BY

TO THE EDUCATIONAL RESOURCES INFORMATION CENTER (ERIC)

Level 2B

Check here for Level 2B release, permitting reproduction and dissemination in microfiche only.

Documents will be processed as indicated provided reproduction quality permits. If permission to reproduce is granted, but neither box is checked, documents will be processed at Level 1.

I hereby grant to the Educational Resources Information Center (ERIC) nonexclusive permission to reproduce this document as indicated above. Reproduction from the ERIC microfiche or electronic/optical media by persons other than ERIC employees and its system contractors requires permission from the copyright holder. Exception is made for non-profit reproduction by libraries and other service agencies to satisfy information needs of educators in response to discrete inquiries.

III. DOCUMENT AVAILABILITY INFORMATION (FROM NON-ERIC SOURCE):

If permission to reproduce is not granted to ERIC, or, if you wish ERIC to cite the availability of the document from another source, please provide the following information regarding the availability of the document. (ERIC will not announce a document unless it is publicly available, and a dependable source can be specified. Contributors should also be aware that ERIC selection criteria are significantly more stringent for documents that cannot be made available through EDRS).
