ABSTRACT

A survey of spring 2001 non-enrollees found that students generally changed their minds about attending due to work schedules or the costs of attending. Family responsibilities were also an issue for many students.

The admissions process was perceived as very satisfactory, but students who attempted to then register on the web were often frustrated. A majority of students who attempted to register had neither attended orientation nor received advising.

To better serve student needs, respondents suggested more classes in general, particularly during evenings and weekends. Off-campus classes especially internet classes were also a popular suggestion. Parking, of course, was another issue with students.

Why don't students attend Boise State despite having applied and been admitted?

Each year a number of students apply to Boise State. Most are admitted. Still, a number fail to enroll. For new freshmen, about 85% of applicants are admitted, and of those admitted, slightly more than 60% enroll. What causes the other 40% of students to fail to follow through with their educational plans?

In order to better understand the reasons that students do not attend Boise State University despite having applied and been admitted, a short survey was administered during the Spring 2001 term. Developed by Barbara Fortin, Director of Undergraduate Admissions, Brian Newkirk of the Graduate College, Mark Wheeler, Dean of Enrollment Services, and Marcia Belcheir of the Office of Institutional Assessment, the survey included common reasons for not enrolling and several questions on the quality of service encountered during the admissions and registration process. The survey concluded with an open-
ended question where students were asked to identify how Boise State could better serve their needs and increase the likelihood of their attendance.

The survey was mailed to 1,327 students who applied and were admitted but did not enroll. A total of 247 responses or 18.6% were received from a single mailing of the survey. About half the respondents said that they were planning on pursuing an undergraduate degree, and an additional 25% simply wanted to take undergraduate courses of interest to them. The remaining fourth planned to pursue a graduate degree (16%) or take graduate courses of interest (9%). Almost 70% of those returning the survey were female, a percentage somewhat higher than that found for enrolled students.

**Reasons for Not Enrolling**

The following table illustrates the percentage selecting each reason for not attending. As previously reported from a survey of non-returning students (RR 97-03), the main reasons for not enrolling were work conflicts and lack of funds. Family responsibilities also played a sizeable role.

Other reasons that students gave are listed in Appendix A. While the reasons were diverse, lack of classes appeared to be the main theme. A secondary theme was illness.

Satisfaction with the Registration Process

About half of the students who were admitted also attempted to register before eventually failing to enroll. Of these, very few students attended orientation (only 17% of undergraduates and 23% of graduates). In addition, only about 30% of undergraduates and 50% of graduates received advice about classes prior to registering. Only about one-fourth registered for classes using the internet, and more than half of this group found the process frustrating. When asked to comment on their difficulties, a number of students indicated that their problems were (1) full classes, (2) difficulty with prerequisites which respondents said had been fulfilled at another college, or (3) passwords that didn’t work. See Appendix C for further details on comments.

Recommendations to Better Serve Needs and Increase Likelihood of Attending

The top recommendation students had was to increase the number of classes and/or offer them during the evenings and weekends (N=22). The second more frequent recommendation also had to do with classes: students wanted more classes off-campus (N=15). Suggestions on where the classes should be located ranged from the internet to Micron to Mountain Home, but the most
frequent suggestion was internet courses. In third place was parking—students wanted more of it at reduced costs (N=14). Other recommendations mentioned by at least four people were: providing more contact with advisors or counselors (N=13), reducing the cost of attending (N=12), providing more or better information on majors and course offerings (N=9), eliminating rude faculty and staff and providing better customer service (N=5), and modifying the admissions and/or registration process (e.g., need to reapply) (N=4). The full text of recommendations can be found in Appendix D.

Summary

Each semester a number of admitted students fail to take the final step and enroll at Boise State. A survey sent to these students in the Spring of 2001 was designed to find out why these students didn’t enroll and what improvements Boise State might make in increase their probability of enrolling in the future.

Problems with work schedules and money were the two main reasons that respondents indicated that they did not enroll. Family responsibilities were a third reason.

Students were generally very pleased with the admissions process. While everyone experienced admissions, registration was experienced by only half of the respondents. When students did register, they typically had neither attended orientation nor received advising. A small group tried to register on the Web and were often frustrated by the experience. Lack of class availability also seemed to be a registration issue.

As a result, students recommended scheduling more courses, especially at non-traditional times like evenings and weekends. They also encouraged the university to provide more courses off the main campus, especially through the internet. Gaining access to information through advising and improving parking were also frequent suggestions.

Results of this survey indicate that most of the “no-shows” are due to problems in respondents’ lives. There is little the university can do about job schedules and costs, except to offer more courses at times and venues which appeal to working students. A minority of students, however, indicate that Boise State personnel were perceived as rude and unhelpful. This characterization covered faculty as well as administrative staff. This is certainly an area under control of the university and capable of improvement.

Offering registration hours and advising information that is after working hours was great. Keep up the meeting the needs of the non-traditional student
Better, cheaper parking, no admission lines, no need to re-apply for single interest class. Your staff is friendly and pleasant

Graduate level:
Parking, parking, parking
Increase funding for library. The library needs to buy more complete journal sets.
Faculty was too busy to give me the support I needed (counseling on thesis)
Offer education courses individually not in a block format
Not possible, I have talked three people out of attending BSU because of my experience, I will do more when given the opportunity. Frankly, I am embarrassed that I attended. I know this information...
Addressing the parking needs/costs for someone attending for 3 hours a week
Offering classes in Mountain Home to complete teaching certificate and/or graduate coursework.
Offering more night classes. Allowing graduate students seeking specific degrees first choice at classes.
Eliminating out of state fee rates differential

• Specifying internet classes in a separate category or differentiate from regular classes.
• Getting to attend school, I want to go to BSU
• More convenient parking and flexible class hours so that full time working students could attend full-time
• Tell me what classes I would need if transferring.
• Providing counselors who are correctly informed about majors, their requirements, and class selection
• Not assuming that everyone knows about college and how credits work
• Letting me know what classes I need
