ABSTRACT

This is a prewriting activity for personal memoir or autobiographical writing. Grade 6-8 students brainstorm for important memories, create graphics or symbols for their most important memories, and construct a life map on tag board or construction paper, connecting drawings and captions of high and low points with a highway. During four 50-minute sessions, students will: identify key moments, people, and places in their lives; create an evaluative scale, from high points to low points, ranking the key moments; order key moments in chronological order; and create illustrations and text that relate to the key moments. The instructional plan, lists of resources, student assessment/reflection activities, and a list of National Council of Teachers of English/International Reading Association (NCTE/IRA) Standards addressed in the lesson are included. A rubric graphic life map and a roadmap of life are attached. (PM)
Graphic Life Map

Grade Band
6-8

Estimated Lesson Time
Four 50-minute sessions

Overview
Students sometimes have difficulty recalling important events in their early lives to write about. Brainstorming as a whole class helps students recall pivotal moments in their lives. Working together to create graphic symbols for these moments, people, and places, helps students recall the details. Narrowing memories to eight to ten specific high and low points and connecting them on a map will help them see some kind of pattern. The graphic life map will not only give them specific instances to write about; creating a graphic for each memory will help bring the events to life.

From Theory to Practice
Working in groups helps students clarify their thinking, and the use of graphics helps the students recall memories. The use of graphics teaches students to think metaphorically, and “a side benefit from working with graphics is that of both short- and long-term memory improvement.” This lesson is an adaptation of Linda Rief’s Positive-Negative Graphs.

Further Reading

Student Objectives
Students will

- identify key moments, people, and places in their lives.
- create an evaluative scale, from high points to low points, ranking the key moments.
- order key moments in chronological order.
- create illustrations and text that relate to the key moments.

Instructional Plan

Resources

1. General classroom materials (tag board, poster paper, construction paper, colored markers, crayons, other supplies for drawing the maps)
2. Instruction sheet for students
3. Model of a graphic life map (use Web sites provided)

Preparation

Assemble resources. Be familiar with graphic life map instructions. Perhaps construct your own life map as an example for students.

Instruction and Activities

1. The teacher should discuss with students the idea of symbols for events in life. For instance, symbol of birth could be a stork or baby; divorce in family could be a drawing of stick people with a lightning strike down the middle. Have students practice a couple of graphic symbols for common events. Explain that drawings on maps can be either symbolic or realistic, but explain that graphics should be drawn.
2. Divide students into groups of 3 to 4.
3. Go over directions for graphic life map and procedure.
4. Help students start brainstorming for important events, people, and places in their lives.
5. Have students list individual memories and draw a graphic for each memory.
6. Have students limit their memories to the 8 to 10 most important and transfer these to a piece of tag board or construction paper.
7. Have students draw graphics and add caption for each memory, and connect their memories with a road or highway.
8. Display student maps or put in their portfolios.

Extension Activities

If your class has access to computers with a drawing program, the life maps could be done on the computer, but be sure the students still draw their graphics and do not just insert clip art.

Writing. After this prewriting exercise, students can use selected events on their maps to write individual autobiographies.

Student Assessment/Reflections
Since this is a prewriting activity, I often do not grade it. I do give participation points simply for
completing the activity. However, if you feel the need for grading, I would suggest not grading the
literary quality of the map but rather the recognition of important events and effectiveness of the design.

A rubric is available.

NCTE/IRA Standards

5 - Students employ a wide range of strategies as they write and use different writing process
elements appropriately to communicate with different audiences for a variety of purposes.

Roadmap of Your Life

To help you plan for writing autobiography, you will construct a roadmap of the high and low points of your life. You will create a graphic representation of important events, people and places in your life.

Follow this procedure:

1. Get in groups of 3 to 4 students and start brainstorming significant events in your life. These can be happy memories, sad memories, scary memories, important places, important people, life changing events - your choice.
2. Choose your individual memories and draw a graphic representation or symbol for each memory.
3. Narrow your choices to the 8 to 10 most important memories and arrange them in chronological order (by the years in which they occurred).
4. On a piece of tag board or colored construction paper, mark these memories - happy memories above the center of the paper and sad memories below the center of the paper. Connect the dots with a two-lane road or highway.
5. In your groups brainstorm for more symbols for the events on your map.
6. Using markers or crayons, draw your quick draw graphic or other symbol for each event. (Example - symbol of birth could be a stork or baby, Divorce in family could be a drawing of stick people with a lightning strike down the middle.
7. Write a brief caption for each symbol so that people viewing your map will understand the event.
8. Complete map, going over drawings and words and highway until it is clear and easy to read.
