Guide to Education Planning and Results Reporting

Requirements for Alberta school boards and francophone school authorities and their schools

April 2005
Guide to Education Planning and Results Reporting

Requirements for Alberta school boards and francophone school authorities and their schools.

This document provides the requirements for

- Three-year education plans for 2005–2008 (These plans cover the 2005/06, 2006/07 and 2007/08 school years and are due on June 24, 2005.)
- Annual education results reports for the 2004/05 school year, based on the three-year education plans for 2004 – 2007 submitted June 30, 2004 (Reports are due on November 30, 2005.)

For more information or for additional copies of this document, contact

GUIDE TO EDUCATION PLANNING AND RESULTS REPORTING

What’s Changed?
The information in the guide has been reformatted and streamlined for clarity and to reduce duplication. Planning and reporting requirements have been reduced to enhance flexibility and to focus on results.

### Jurisdiction Plans and AERRs:

<table>
<thead>
<tr>
<th>Requirement</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Reporting on measures has been clarified. Reporting comparable provincial results is required only for Provincial Achievement Tests (PATs) and diploma exams; including provincial targets is only required for PATs.</td>
<td>6, 8, 11-12, 34-36</td>
</tr>
<tr>
<td>The description of the department’s review of jurisdiction plans and reports has been updated, consistent with the Accountability Pillar. Changes since the March draft are highlighted.</td>
<td>4, 10</td>
</tr>
</tbody>
</table>

The following changes to jurisdiction requirements start with the November, 2005 AERRs, and also apply to education plans for 2005-08 and November 2006 AERRs:

- Two survey measures in the Accountability Pillar have been dropped, and replaced with two objective measures: the annual dropout rate of students aged 14 to 18 and the high school to post-secondary transition rate.
- The required measure for PATs is cohort results, consistent with the Accountability Pillar; reporting results for writers is optional.
- The board selected Review Committee on Outcomes measure is optional (no longer required).
- The professional development measure has been restated to better reflect the survey question.
- Jurisdictions are to include a link to their AISI report on their web site instead of including highlights of their AISI projects in their AERR.
- Jurisdictions are to include a link to their verified class size report on their web site instead of reporting preliminary class sizes in their AERR.

The following change applies to jurisdiction November 2006 AERRs:

- In addition to reporting the most recent five years of data for performance measures, jurisdictions report a three-year rolling average for the most recent three years of results.

### School Plans and AERRs:

The following changes to school requirements start with the 2005 school results report and also apply to school plans for 2005-08 and 2006 results reports:

- The required Provincial Achievement Test measure has been changed from students writing to the cohort, consistent with jurisdiction requirement. Reporting results for writers is optional.
- Schools are to include a link to their verified class size report on the jurisdiction’s web site instead of reporting preliminary class sizes in their AERR.

The following change applies to school results reports in 2006:

- In addition to reporting the most recent five years of data for performance measures, schools report a three-year rolling average for the most recent three years of results.

### What’s Been Deleted

- Provincial priority areas for improvement and strategies and measures for each priority in jurisdiction plans, and reporting on these in jurisdiction AERRs, are no longer required.
- Specific strategies and measures for special student populations and for provincial initiatives are no longer required in jurisdiction plans. Results for special populations are included in overall results.
- Strategies related to the Alberta Commission on Learning (ACOL) and Provincial Initiatives are no longer required in jurisdiction plans.
- Links are no longer included to reduce duplication; all requirements for 2005/06 are listed in the main sections of the document, and the 2004/05 revised reporting requirements are in an Appendix.

Four appendices from the 2004 Guide have been removed:

- Legislative Authority (covered in the background section),
- the Definition of Basic Education (available in the Guide to Education online at: <http://www.education.gov.ab.ca/educationguide>),
- the list of outcomes and measures developed by the Review Committee on Outcomes (available online at <http://www.education.gov.ab.ca/rco/Finalized.asp>) and
- provincial results and targets for required measures (built into the optional plan format and in Alberta Education Business Plans and Annual Reports).

The jurisdiction survey instruments were removed from the appendix on surveys (provided to jurisdictions by email in February 2005 and posted on the Internet at <http://www.education.gov.ab.ca/educationsystem/Satisfaction/>).
Background

Section 16(2) of the Government Accountability Act requires organizations under the jurisdiction of government ministries to prepare business plans and annual reports for each fiscal year “in the form and at a time acceptable to the Minister.”

School jurisdiction plans and reports align with and build on Alberta Education’s vision, mission, goals and outcomes for the basic education system. In this way, they help ensure that the entire learning system is focused on key priorities that meet the educational needs of Alberta students. At the same time, jurisdiction plans and reports incorporate local goals, priorities and outcomes that reflect the unique characteristics and circumstances of their communities. In short, they reflect local needs and priorities within the context of a province-wide framework.

Accountability Framework

Accountability in the basic education system is an ongoing cycle that enables continuous improvement and critical reflection. Key components are measuring progress and using results to inform decision making. For school authorities, the cycle involves:

- developing plans aligned with provincial goals and outcomes;
- incorporating community input;
- identifying and implementing strategies to improve student learning;
- allocating resources to achieve goals and improve results;
- monitoring progress;
- measuring and assessing results;
- using results to identify priorities and design or adjust strategies; and
- communicating with stakeholders (staff, learners, parents, school councils, the public, and Alberta Education) about school jurisdiction and school plans and results.

Accountability Pillar of the Renewed Funding Framework

Accountability for results was strengthened with the implementation of the Renewed Funding Framework for school jurisdictions, which is based on three
GUIDE TO EDUCATION PLANNING AND RESULTS REPORTING

pillars: Flexibility, Accountability and Formulas and has the following fundamental characteristics:

- equitable distribution of funds;
- provision of maximum flexibility to facilitate local decision making; and
- public accountability for the use of resources and the results achieved.

The Accountability Pillar places increased emphasis on achieving outcomes, reporting results and using results for informed decision making for the purpose of improving programs and student results in subsequent years. Building on existing accountability processes and practices, school boards continue to be accountable for meeting the learning needs of all students and ensuring that provincial policy, legislation and regulations and standards are met. School jurisdiction performance is measured, assessed and reported by comparing current results against past performance and provincial standards on a common set of measures for all jurisdictions. These measures are listed on page 7.

Figure 1: The accountability framework links each level of planning and fosters continuous improvement throughout the basic education system.

Accountability Cycle: Process/Steps
Education Plans for School Jurisdictions

An Overview of the Process

Preparing Education Plans

The education plans prepared by school jurisdictions and schools encompass a three-year cycle, updated each year and aligned with Alberta Education’s three-year plan. As one year is completed, another is added. At the same time, strategies and priorities are adjusted in response to the past year’s performance results and changes in the operating environment. This approach allows school jurisdictions to be responsive to students and community needs while focusing on continuous improvement and maintaining continuity from year to year.

The ultimate authority for a school jurisdiction’s three-year education plan rests with the school board or francophone school authority that is accountable for the plan. The elected board provides overall direction for the education plan. In consultation with parents, jurisdiction and school staff and other stakeholders in their community, the jurisdiction administration develops a planning process that meets jurisdiction needs and is responsible for preparing the content of the plan for approval by the board.

Schools plan and implement three-year education plans aligned with school jurisdiction and provincial direction. Education plans for schools are developed by school administrators and teaching staff, in consultation with school councils and jurisdiction staff.

Updating Education Plans

School jurisdictions and schools update their three-year education plans each year. Annual updates take the following considerations into account:

- jurisdiction and school results
- input from stakeholders such as school councils, students, parents and the public
- available resources
- Alberta Education’s annual three-year business plan and performance results
- feedback from Alberta Education.
Although entirely new plans are prepared infrequently; components such as strategies and targets are updated each year, and components such as the vision, mission and beliefs (foundation statements) should be revisited and refreshed every few years. Such reviews are particularly appropriate when a new board begins its term.

**Communicating Education Plans**

**Three-year education plans are public documents.** School jurisdictions are required to post their plans on their websites, including subsequent amendments or updates. They are also encouraged to use a variety of methods to communicate their plans and their achievements to the broader community. Appropriate tools may include newspaper inserts, brochures, jurisdiction report cards and community meetings.

**Submitting Education Plans**

School jurisdictions submit their updated three-year plans to Alberta Education by sending an email to your zone director. The email message should advise that the plan has been posted to the jurisdiction’s website and provide the web-link to the plan. If plans are revised after submission, advise your zone director by e-mail of the changes and that the revised plan has been posted.

**Due Dates**

Three-year education plans for school jurisdictions are due by May 31 of each year. They must be posted on the jurisdiction’s website by this date, and the department must be notified of this posting (i.e., by e-mail to your zone director).

**Note:** The due date for the 2005/06 – 2007/08 plan has been extended to June 24, 2005.

**Reviewing Education Plans**

Alberta Education staff review three-year education plans to assess:

- performance over time has been taken into account, and the plan includes actions (strategies) to improve results where there are shortfalls in performance, demonstrating the jurisdiction’s commitment to improvement,
- alignment with provincial requirements, and
- implications for provincial planning.

Department staff prepares reports (i.e., *Analysis of School Jurisdiction 2003-2006 Education Plans*) of their findings for internal use. These reports also are provided to school jurisdictions and posted on the Alberta Education website.
The Components and Requirements of Education Plans

[Components are required unless otherwise identified. Components are defined in Appendix 4, page 24]

Education plans for 2005/06 – 2007/08 include the following components:

- A message from the board chair (optional).

- An accountability statement, worded as follows:
  The Education Plan for (name of jurisdiction) the three years commencing September 1, (year) was prepared under the direction of the Board in accordance with the responsibilities specified in the School Act, the Government Accountability Act, Alberta Education Policy 2.1.1 (“Accountability in Education: School Authority Accountability”) and the provincial government’s accounting policies. This Education Plan was developed in the context of the provincial government’s business and fiscal plans. The Board is committed to achieving the results laid out in this plan.

- Information on how the plan was or will be communicated to parents and the public. Also include a link to the plan posted on the jurisdiction’s website.

- Foundation statements (optional) (i.e., vision, mission, principles and beliefs) that articulate the jurisdiction’s values and purpose. If included, these are consistent with the corresponding statements in Alberta Education’s business plan.
  - vision: describes a possible and desired future state that the jurisdiction strives to achieve; it focuses on student achievement and programs or services that maximize student learning.
  - mission: provides a clear, concise description of the jurisdiction’s purpose and role.
  - principles and beliefs: provide statements of the principles and beliefs that guide the jurisdiction’s decision-making.

- A profile of the jurisdiction (optional). Profiles include information about the jurisdiction, such as:
  - characteristics of communities and students
  - education programs
  - schools (size, location and other details)
  - planning environment, including emerging trends and issues that affect operations.
• **Provincial goals, related outcomes, performance measures and targets.** Required goals, outcomes and performance measures are listed on page 7. Include the most recent year of jurisdiction results for all the required measures. For achievement tests, include jurisdiction and provincial results and targets for each subject and grade, and for overall results (all subjects and grades combined). For diploma exams, include jurisdiction and provincial results and participation rates for each exam. Also set improvement targets for all required Accountability Pillar measures for which there is more than one year of comparable data, as follows:

- a target for the first year of the plan when there are two years of results,
- targets for two years when there are three years of results,
- targets for all three years of the plan when there are four or more years of results,

• Additional local goals, outcomes and performance measures (optional). Include goals that address local needs and circumstances, as appropriate. For each local goal, include at least one outcome as well as appropriate strategies and performance measures.

• Local strategies (at least one strategy for each outcome in the plan), including strategies that address learning needs and achievement of outcomes for all students.

• **Budget highlights.** This section presents highlights from the board’s budget for the first year of the three-year plan in a way that is easily understood, transparent and meaningful to the public. Budget highlights must provide key financial information about the upcoming school year, focusing on anticipated material changes from the current year. This section may refer to budgeted changes in enrolment, certificated and un-certificated staff, programs, funding, revenues and expenses, annual surpluses or deficits and accumulated surpluses. This section must include:

  — Guiding principles the board uses in financial planning.
  — Charts/tables that summarize information from the board’s budget.
  — A web-link to the jurisdiction’s Budget Report Form.

• **Highlights of facility and capital plans.** Include:

  — A brief description of major school renewal or construction projects underway or planned over the next three years (if applicable) and their benefit to students.
  — A brief description of the jurisdiction’s capital priorities.
  — A web-link to more detailed information on the jurisdiction’s facility and capital plans as submitted to Alberta Infrastructure and Transportation.

An optional format is provided in Appendix 6 (pages 27 - 33) that includes all the required elements of the school board plan.
Required Goals, Outcomes and Performance Measures

Listed below are all the required goals, outcomes and performance measures for school jurisdiction three-year education plans for 2005/06 to 2007/08. Note: Measures that are not part of the Accountability Pillar are shaded and do not require targets. Targets for Accountability Pillar measures should focus on improvement.

Goal 1: High Quality Learning Opportunities for All

Outcome: The education system meets the needs of all learners, society and the economy.
- Percentage of teachers, parents and students satisfied with the opportunity for students to receive a broad program of studies, including fine arts, career, technology, and health and physical education.
- Percentage of teachers, parents and students satisfied with the overall quality of basic education.
- Percentage of teachers, parents and students satisfied with services for students in schools (e.g., academic counseling, career counseling, library services, supports for students with special needs).

Outcome: Schools are safe and caring.
- Percentage of teacher, parent and student agreement that: students are safe at school, are learning the importance of caring for others, are learning respect for others and are treated fairly in school.

Outcome: Children at risk have their needs addressed through effective programs and supports.
- Annual dropout rate of students age 14 to 18.

Goal 2: Excellence in Learner Outcomes

Outcome: Learners demonstrate high standards.
- Percentages of students who achieve the acceptable standard, and the percentages who achieve the standard of excellence on Grades 3, 6 and 9 Provincial Achievement Tests (cohort results for each subject/grade and for overall results – all subjects and grades combined).
- Percentages of students who achieve the acceptable standard and percentages who achieve the standard of excellence on diploma examinations. (Targets not required for diploma examinations until there are two years of directly comparable results.)
- Participation rates of Grade 12 students in diploma examination courses.
- Percentages of Grade 12 students eligible for Rutherford scholarships.

Outcome: Learners complete programs.
- Percentages of students who completed high school within three, four and five years of entering Grade 10. (Targets required for the five-year rate.)

Outcome: Learners are well prepared for lifelong learning.
- High school to post-secondary transition rate within four and six years of entering Grade 10. (Targets required for the six-year rate.)

Outcome: Learners are well prepared for employment.
- Percentages of teachers and parents who agree that students are taught attitudes and behaviours that will make them successful at work when they finish school.

Outcome: Learners are well prepared for citizenship.
- Percentages of teachers, parents and students who are satisfied that students model the characteristics of active citizenship.

Goal 3: Highly Responsive and Responsible Jurisdiction

Outcome: Improved results through effective working relationships with partners and stakeholders.
- Percentage of teachers and parents satisfied with parental involvement in decisions about their child’s education.

Outcome: The jurisdiction demonstrates leadership and continuous improvement.
- Percentages of teachers and parents indicating that their school and schools in their jurisdiction have improved or stayed the same the last three years.
- Percentages of teachers who agree that professional development opportunities made available through the school jurisdiction are focused on priorities and effectively address their ongoing professional development needs.

Notes:
Data for all the required measures are provided by Alberta Education.
A jurisdiction selected Review Committee on Outcomes (RCO) measure is optional.
Requirements for School Improvement Plans

A school's three-year education plan reflects and is aligned with the jurisdiction's three-year plans. Each jurisdiction outlines its own requirements for the process and schedule schools follow to prepare these plans. In addition to the required provincial elements listed below, each jurisdiction also establishes additional requirements regarding the content of school plans. Although Alberta Education does not collect or review individual school plans, the department stipulates the following requirements to ensure consistency among school, jurisdiction and ministry plans. It is the responsibility of school jurisdictions to ensure that these requirements are met:

- Every school must prepare a three-year education plan that identifies goals, outcomes, strategies, performance measures and targets.

- School plans must include the goals of Alberta Education, which are presented in the ministry business plan, strategies for achieving the goals and performance measures for assessing achievement, including required measures (and most recent school, jurisdiction and provincial results) specified for goal 2 below.

  - Goal 1: High quality learning opportunities for all
  - Goal 2: Excellence in learner outcomes
    - Percentages of all students in Grades 3, 6 and 9 who achieve the acceptable standard and the standard of excellence on provincial achievement tests (the cohort).
    - Participation rates in provincial achievement tests.
    - Percentages of students who achieve the acceptable standard and the standard of excellence on high school diploma examinations.
    - Participation rates for Grade 12 students in diploma examination courses.

  **Note:** The information for these measures is available to schools on the Alberta Education Extranet. Targets are required for each year of the plan for student results on provincial achievement tests. Include school, jurisdiction and provincial targets (see page 29 for provincial targets).

  - Goal 3: Highly responsive and responsible school

In addition:

- School councils must have the opportunity to participate in the development of the school’s three-year education plan, including input on strategies.

- School plans must describe how the school council was involved in the development of the plan.
Results Report
An Overview of the Process

Preparing Results Reports

Each year, school jurisdictions measure their performance and report on their progress toward achieving the goals and outcomes of their three-year education plans in their Annual Education Results Report (AERR). The performance measure results are a primary source of information for assessing and reporting on performance, and for determining where improvements are needed.

The annual results report informs stakeholders where the jurisdiction is in relation to where it wants to be in achieving its goals and outcomes. It demonstrates that the school board is accountable for results and for the wise use of resources to provide quality programs for students and to address areas for improvement. AERRs provide jurisdictions and schools with the opportunity to summarize their accomplishments, in addition to reporting on performance.

In preparing their results reports, school jurisdictions compile and assess information that pertains to the performance measures identified in their three-year education plans. This information comes from:

- Alberta Education (which provides results for provincially required measures on the Extranet):
  - provincial surveys* of students, parents and teachers.
  - results from provincial achievement tests and high school diploma examinations.
  - high school completion rates, dropout rates, high school to post-secondary transition rates and Rutherford Scholarship eligibility rates.

- local sources (schools and jurisdictions) including locally developed surveys† used to collect information for optional local performance measures.

---

* The Alberta Education surveys used to collect information for education results reports are available in PDF format on the department’s website: <http://www.education.gov.ab.ca/educationsystem/Satisfaction/>.

† To support school jurisdictions in their local efforts to survey stakeholders, Alberta Education prepared a useful handbook, How to Conduct Satisfaction Surveys: A Practical Guide to Conducting Surveys within Alberta’s Education System. The handbook can be downloaded from the department’s website: <http://www.education.gov.ab.ca/educationsystem/Satisfaction>.
GUIDE TO EDUCATION PLANNING AND RESULTS REPORTING

Reporting-Related Communications

Annual education results reports are public documents. School jurisdictions are required to post these reports on their websites. They are also encouraged to use tools such as newspaper inserts, brochures, jurisdiction report cards and community meetings to make the information more broadly accessible.

Reporting information that is summarized for public distribution must include results for all performance measures identified in the jurisdiction’s three-year education plan.

A school jurisdiction’s annual education results report must identify how the report was or will be communicated to the public. It must also indicate how the results reports prepared by schools in the jurisdiction are communicated to parents and to the community.

Submitting Results Reports

School jurisdictions submit their results reports to Alberta Education by sending an email to your zone director. The email message should advise that the report has been posted to the jurisdiction’s website.

Due Dates

School jurisdiction’s annual education results reports are due by November 30 of each year, for the previous school year. The reports must be posted on the jurisdiction’s website by this date, and the department notified of the posting by email to the zone director.

Reviewing Annual Education Results Reports

Alberta Education staff review school jurisdictions’ annual education results reports to assess:

- current performance has been compared with prior years’ results and desired levels of performance (targets),
- implications of results for the next update of the jurisdiction plan have been considered, e.g., how shortfalls in performance will be addressed,
- alignment with provincial requirements,
- consistency with the related education plan, and
- implications for the department’s planning and priority-setting.

Reports of the reviews are prepared for use by the department. These reports are also provided to school jurisdictions and posted on the Alberta Education website at: <http://www.education.gov.ab.ca/educationsystem/planning.asp>
The Components of an Annual Education Results Report
for 2005/06 (due November 30, 2006)

[Components are required unless otherwise specified. Components are defined in Appendix 4, page 24.]

Annual education results reports include the following components:

- A **message** from the board chair (optional)

- An **accountability statement**, worded as follows:
  The annual education results report for *(name of jurisdiction)* for the *(year)*
school year was prepared under the direction of the board in accordance
with the responsibilities specified in the School Act, the Government
Accountability Act, Alberta Education Policy 2.1.1 (“Accountability in
Education: School Authority Accountability”) and the provincial government’s
accounting policies. The board is committed to using the results in this
report, to the best of our abilities, to improve the quality of education for
students in our jurisdiction. We will use the results to develop sound
strategies for our three-year education plan to ensure that all our students
can acquire the knowledge, skills and attitudes they need to be self-reliant,
responsible, caring and contributing members of society.

- Information on how the report was or will be communicated to parents and
  the public.

- Information on how the results reports prepared by schools in the jurisdiction
  were or will be communicated to parents and to the community.

- Highlights for the previous school year of the jurisdiction’s
  **accomplishments** (impact of major activities/strategies), including a
  web-link to the jurisdiction’s AISI annual report, and to the jurisdiction’s class
  size report.

- Report the jurisdiction’s **performance measures results** in relation to
  their goals and outcomes (see page 7 for list of required measures),
  including:

  — the most recent five years of jurisdiction results; for **provincial**
    achievement tests and diploma exams also include provincial results for
    the same years;

  — the three-year rolling average (three most recent years), for **jurisdiction**
    results; for provincial achievement tests and diploma exams also include
    the comparable provincial three-year rolling average.

  — the 2005/06 results in relation to jurisdiction targets for that year; for
    achievement tests also include both provincial and jurisdiction targets, and
GUIDE TO EDUCATION PLANNING AND RESULTS REPORTING

- clearly identify the Accountability Pillar measures (a sub-set of the measures in the jurisdiction plan)
- assessment of results (e.g., improved, no change, declined; met or did not meet target) and factors affecting performance.

- Identify **future challenges**, including areas for improvement and how the jurisdiction will address these.

**Summary of financial results:**

- provide key financial information about the school year, such as significant changes over the prior year, the annual operating surplus or deficit, accumulated operating surplus, and capital reserves,
- include program expenditure information in a table or graph format for the primary audience – parents and other members of the community;
- indicate where more information on the jurisdiction’s sources of school generated funds and their uses can be obtained (e.g., link to the Audited Financial statements, contact at central office) and that comparative information is available in a provincial report – provide the web-link to the provincial roll up of jurisdiction AFS information: <http://www.education.gov.ab.ca/funding/afs/>.
- provide a web-link to the jurisdiction’s Audited Financial Statement.

**Capital and facilities projects:** highlight for parents and the public progress on major facilities projects – building renewal and construction funded by Alberta Infrastructure and Transportation – for the previous school year, as applicable, focusing on benefits to students.

**Note:** A template for reporting results is under development.
Requirements for School Results Report on the 2005/06 School Year

A school’s annual education results report is closely aligned with the AERR prepared by the jurisdiction. Each jurisdiction establishes requirements for the process and schedule schools follow to prepare these reports. In addition to the elements listed below required by Alberta Education, each jurisdiction also outlines its own requirements for the content of school reports.

Although Alberta Education does not collect or review the annual results reports prepared by individual schools, it stipulates the following requirements. It is the responsibility of school jurisdictions to ensure that these requirements are met. A school report must include:

- Results information related to all the goals, outcomes and performance measures - both local and provincial - identified in the school’s education plan, including the four measures required by the department for the Alberta Education goal – Excellence in learners outcomes and Outcome - Learners demonstrate high standards:
  - Percentages of all students in Grades 3, 6 and 9 who achieve the acceptable standard and the standard of excellence on provincial achievement tests (the cohort).
  - Participation rates in provincial achievement tests (PATs) for Grades 3, 6 and 9.
  - Percentages of students who achieve the acceptable standard and the standard of excellence on diploma examinations.
  - Participation rates of Grade 12 students in diploma examinations.

- School results reporting for these measures must include an assessment of progress in relation to past performance (five most recent years of results and a three-year rolling average of the three most recent years), and to targets set for the current year for achievement test results.

- School results also must be reported in relation to comparable provincial and jurisdiction results for all above measures, and the school result in 2005/06 must be reported in relation to jurisdiction and provincial targets for PATs for 2005/06.

**Note:** Schools can access the information they need for student achievement and participation rates on Alberta Education’s Extranet.

- A web-link to the school’s class size report on the jurisdiction’s website.
- Additional information, as required by the school jurisdiction.
Performance Measurement

Performance measures in school authority and school plans and results reports provide information on achievement of outcomes on key aspects of the education system. This information is an essential part of accountability that enables the organization to:

- Assess and report on progress, what is working well and what needs improvement.
- Determine priorities for improvement and set improvement targets.
- Make program and budget decisions to maintain good performance and improve performance in areas requiring improvement.

Measures typically provide quantifiable information on key aspects of education. This information is generated quantitatively through tests, surveys, and data analysis or through qualitative means, such as observation, interviews and portfolio reviews. Whether quantitative or qualitative, measures demonstrate observable change. To be meaningful, measures information is obtained regularly (e.g., annually) and is normally expressed in percentages, ratios or numbers in relation to a total.

Types of Performance Measures

- **Outcome measures:** These provide information on progress toward desired results in key areas – effectiveness of programs, impacts on clients.

- **Intermediate outcome measures:** For some desired outcomes, results may not be known for several years. In such instances, it is useful to measure intermediate steps – milestones or landmarks – toward the desired outcome.

The measures in school authority and school plans and in results reports focus on outcomes and constitute the core set of measures for assessing and reporting on progress and achievement.

Other types of measures, listed below, are important for managing resources, providing programs and services, and reporting contextual information:

- **Output measures:** information on number of clients served and types of services provided.
• **Process measures:** information on activity and efficiency. These measures indicate demand for services and cost per unit of providing service.

• **Input measures:** information on resources allocated to programs, such as funding, personnel, and equipment. These measures provide information on cost or numbers of staff involved in providing programs and services.

**Characteristics of good performance measures**

Good performance measures provide information that is:

• Understandable – clear and sufficient to provide an understanding of the organization or system to staff, community and government

• Valid – meaningful and credible (sound, defensible)

• Relevant and appropriate – timely, related to important aspects

• Reliable – unbiased, error-free and verifiable

• Comparable – show change over time and/or among similar organizations

• Discrete – provides information in distinct, non-overlapping categories

• Empowering – useful for decision making, promote improvement

• Practical – can be reliably assessed with reasonable effort

**References:**

Measuring Performance Through Surveys

Introduction

Gathering feedback and perspectives from stakeholders and beneficiaries of the learning system provides insight on the attitudes and opinions of Albertans on the performance of the learning system. Conducting survey research is an important tool for determining what is working well, where improvement is required and how it can be achieved.

Required Provincial Surveys for Accountability Pillar Measures

The Accountability Pillar consists of a set of measures selected by the Funding Framework Review Committee from the work of the Review Committee on Outcomes (RCO). Some of these are survey measures. To ensure consistency in results for the Accountability Pillar measures across the province and support jurisdictions in gathering and reporting these results in their Annual Education Results Reports in 2003/04, Alberta Education implemented annual census surveys of grades 4, 7, and 10 students and their parents and teachers. Starting in 2004/05, the surveys of students and teachers, administered at schools, were available to complete online, and the teacher survey was expanded to include all teachers. The survey instruments are posted on Alberta Education’s website at: <http://www.education.gov.ab.ca/educationsystem/Satisfaction/>.

Jurisdiction Surveys

Many school jurisdictions routinely survey a variety of client groups. As the new provincial surveys are limited to the survey measures in the Accountability Pillar and those related to the Commission on Learning recommendations, jurisdiction surveys are expected to continue. These jurisdiction surveys provide a wealth of information that informs management and decision-making. Their continuation also adds to existing longitudinal data and provides more complete parent and student information for schools and school boards. Jurisdictions may choose to include local survey measures in their three-year plans as measures for provincial or local goals and to report these survey results in their AERRs.

Note: Results from surveys conducted by school jurisdictions or groups of jurisdictions cannot be used to report on the Accountability Pillar measures, as the methodologies are different from jurisdiction to jurisdiction or between jurisdictions and...
the province. Only the provincial survey results can be used to report on the Accountability Pillar measures.

**Survey Resources**

There are many published resources on conducting surveys. To assist school jurisdictions in planning, designing and implementing surveys, a handbook was prepared (under contract to Alberta Learning) and tailored to the type of surveys conducted by school jurisdictions. This document, *How to Conduct Satisfaction Surveys: A Practical Guide to Conducting Surveys within Alberta’s Learning System*, is available online at <http://www.education.gov.ab.ca/educationsystem/Satisfaction/> and describes in detail (pages 4-33) the key steps from the following checklist for those involved in conducting satisfaction surveys in Alberta’s basic learning system.

**Phases of the Survey Process**

**Planning a Survey**

- Develop a description of the satisfaction survey project.
- Define the survey population (students, parents, teachers or citizens).
- Identify key research questions or objectives.
- Establish the project budget and timelines, including determining if the survey will be conducted in-house or contracted to a survey research firm.

**Designing the Survey**

- Determine the data collection techniques.
- Design the survey tools and instruments (e.g., questionnaire).
- Pre-test the survey tools and instruments.

**Conducting the Survey**

- Prepare instruments, staff and equipment for survey administration, including selecting a contractor, if used.
- Collect data from respondents.
- Prepare data for analysis.
- Analyze the data.

**Communicating Survey Results**

- Identify stakeholder groups to report survey results.
- Determine methods to report survey results.
- Prepare survey results report.
- Communicate results to interested individuals or groups.
**Implementing Survey Results**

- Develop and implement initiatives to address the survey results.
- Gain additional feedback from stakeholders.
- Evaluate the successes and challenges of the survey project.
- Plan future satisfaction measurement issues.

Another useful resource on conducting surveys in the public sector (*Client Satisfaction Surveys*, October 1998) was prepared by the Alberta Auditor General’s Office. This document is available on the Internet at [http://www.oag.ab.ca](http://www.oag.ab.ca) under “Reading Room.”

**Statistics and Survey Research Terms**

**Statistical Inference:** Using information from a sample to draw conclusions (inferences) about the population from which the sample was drawn.

**Population:** Any entire collection of persons or things from which we may collect data. It is the entire group we wish to describe or draw conclusions about.

**Sample:** A subset of units selected from the larger group (the population). Samples are studied, for reasons of efficiency, to draw valid conclusions about the population.

**Census Sample:** A sample drawn from a finite population that includes all members of the population.

**Random Sample:** A subset of a population where every item in the population has the same probability of being in the sample. The primary goal of survey research is to use information collected from a sample to characterize a certain population.

**Convenience Sample:** A sample where cases are selected, in part or in whole, at the convenience of the researcher (e.g., selecting a sample of students in a school by standing in the hall and interviewing those students who walk by).

**Stratified Sample:** A sample selected to ensure that key characteristics of the target population (e.g., gender, age, geographic distribution) are adequately represented.

**Judgement Sample:** (also referred to as “purposive sampling”) A sample selected based on the researcher’s assessment of their suitability for inclusion in the sample (e.g., selecting persons to a sample who, in the researcher’s judgement, are likely to be well informed about the issue under study).
Confidence Interval: A survey result obtained from a random sample of the target population has a confidence interval, expressed as a percentage above and below the obtained result, which indicates the expected variation from the obtained survey result as a consequence of sampling and diversity among respondents. Confidence intervals indicate whether differences in survey results over time (or differences among respondent groups to the same question) are likely the result of sampling variation or represent actual differences.

Standard Deviation: A measure of the spread or dispersion of a set of data. The more widely the values are spread out, the larger the standard deviation.

Survey Instrument (Questionnaire): A set of questions designed and used to gather specific information from survey respondents.

Scales (Measurement type): A basis for ordering or categorizing data to facilitate meaningful comparisons of the aggregate data. Nominal scales are used for categorizing/ordering data having a limited number of possible outcomes that cannot be placed in any order representing the intrinsic properties of the measurements (e.g., male/female). Ordinal scales are used when the relative values of the data being collected are defined in terms of being lesser, equal to or greater than data elements (e.g., strongly agree, agree, disagree, strongly disagree). Interval scales are used when the magnitude of the differences among the observational units is defined in quantitative terms (e.g., amount of money expressed in dollars, weight in pounds, age in years).

Mean: The mean (or “average”) of a set of observations is simply their sum, divided by the total number of observations.

Weighted Average: A procedure for combining the mean of two or more groups of different sizes that takes the size of the groups into account when computing the overall average.
Setting Targets for Performance Measures

Targets are relevant for performance measures at all levels of Alberta’s learning system, including school, jurisdiction and provincial levels of performance. The information provided below relates specifically to school and jurisdiction target-setting.

Definition

A target is a desired level of performance to be attained by a specified time. Targets are a commitment to improvement.

Purpose

Targets support continuous improvement and are used to assess and report achievement in relation to the desired level of performance. Targets indicate the extent of improvement the organization is striving to achieve by a point in time (e.g., by a certain year), and provide a focus for efforts to achieve improvement, including resource allocation, staffing and strategy development and implementation.

Targets are required for the required measures in jurisdiction and school plans, as data becomes available. Jurisdictions assess their performance on the required measures against targets they have set.

Principles

1. Targets for performance measures are a valuable part of planning, assessment and reporting.
2. Targets should be meaningful, achievable and challenging.
3. Targets should benefit students and help improve student learning.
4. Target setting should be an interactive process that takes a variety of qualitative and quantitative information into account. Jurisdiction and provincial targets for measures provide a frame of reference for each school in the jurisdiction to use in setting school targets. Targets will vary from school to school, taking into consideration school and community characteristics, past results and other information. Likewise, jurisdiction...
targets reflect the jurisdiction’s context and results, as well as provincial and school targets.

5. Targets should be communicated to parents and the public so that Albertans are part of the system-wide efforts to improve education for students.

Target Requirements for Required Measures

1. Targets need to be expressed quantitatively in relation to a whole (e.g., percentages, ratios).

2. Jurisdiction targets need to be set in relation to school and provincial targets and results, as well as to jurisdiction results for provincial achievement tests.

3. Jurisdiction targets are required for measures for which there is historical data. Specifically: one-year targets when there are two years of data, two-year targets when there are three years of data, and three-year targets when there are four or more years of data.

4. Targets need to focus on improvement to attain a high level of performance.

Note on phase in of targets for student results on diploma examinations:
Diploma examinations are being made directly comparable from year to year by building a common set of questions (anchor items) into the machine-scored portion and equating cut scores. Once the exam is comparable for a course, jurisdiction targets will be required for diploma exam results. See the table on page 23 for implementation of comparable exams and targets for diploma exam results over the next few years. The information on the Diploma Examination Program available online at <http://www.education.gov.ab.ca/k_12/testing/diploma/dip_gib/> will be updated as more information becomes available about diploma exam comparability over time.

Guidelines for Setting Targets

1. Consider a wide variety of information in setting targets: past performance, including trends over time on the measure under consideration as well as related measures (e.g., using prior years’ Grade 3 achievement test results to set Grade 6 achievement test results), student or school characteristics, resources, both financial and human, that can be applied to achieve improvement, etc.

2. Target setting should be consistent with data collection methods. Data reliability and variability should be considered in target setting.
3. Involve stakeholders in setting targets at each level. School councils and staff should have input in setting school-level targets; community representatives should have input to jurisdiction targets.

4. When setting targets, prioritize to focus on areas needing improvement, and ensure organizational capacity and resources are in place, including budget, staff and concrete actions of benefit to student learning that will be taken to improve results and achieve the targets.

5. Set targets in relation to other targets, (i.e., measures that impact each other). For example, performance on achievement tests in Grade 3 has implications for performance in Grade 6 three years later.

6. Visual displays, such as trend-line graphs and projections, aid in illustrating results and in setting targets. Trend lines based on at least five years of historical data or rolling three-year averages to smooth out year-to-year variability (particularly evident in smaller jurisdictions), shift the focus from smaller, year-to-year changes to providing information about the longer term direction of the data, including estimates of future results.

7. Professional judgment that takes the local context into account, as well as local and provincial results, is needed for setting targets. In other words, trend data, graphs and projections are an aid to target-setting – they do not in themselves determine the targets.
**Timelines for Diploma Exam Equating/Target Setting**

Alberta Education is working to make the results of diploma examinations directly comparable from year to year. This is being done by building in a common set of test items (anchor items) and adjusting student scores so the diploma examination standards remain constant over time (equating). The process varies in relation to subject-specific challenges.

Provided below is the schedule Alberta Education is using over the next few years for enhancing comparability of the results of diploma examinations and for setting targets for the exams. Jurisdictions will be required to start setting targets for their examination results when there is one year of results that can be compared to the baseline year results (i.e., two years of equated results). Detailed information will be provided online as it becomes available at [http://www.education.gov.ab.ca/k_12/testing/diploma/dip_gib/](http://www.education.gov.ab.ca/k_12/testing/diploma/dip_gib/).

          • Two years of comparable results available.  
| 2007/08 | • Five years of comparable results available.  
          • Assess achievement of 2007/08 targets.  
          • No targets set for 2009/10 – 2011/12 plan (new curriculum is implemented in 2009/10).  
          • Four years of comparable results available.  
          • Assess achievement of 2007/08 targets.  
          • Three years of comparable results available.  
          • Set targets for 2009/10 and 2010/11 (1st and 2nd years of 2009/10 – 2010/11 plan). |
| 2008/09 | • Six years of comparable results.  
          • Assess achievement of 2008/09 targets.  
          • No targets set for 2010/11 – 2012/13 plan (new curriculum is implemented in 2009/10).  
          Cycle continues; target setting and assessment of results roll forward a year.  
          • Four years of comparable results available.  
          • Confirm targets for 2009/10 and 2010/11 and set targets for 2011/12 (3rd year of 2009/10 – 2011/12 plan).  
          • Assess achievement of 2008/09 targets. |
| 2009/10 | New curriculum implemented.  
          Cycle continues; target setting and assessment of results roll forward a year.  
          Cycle continues; target setting and assessment of results roll forward a year. |

**Note:** Alberta Education will establish baseline examinations for English versions of the exams only (not Français 30 or French versions, due to small populations). Similarly, there will not be an equating process established for Science 30 exams, because of small populations. Jurisdictions will be advised of any changes to the schedule.
Planning and Accountability Terms

Accountability:  An obligation to answer for assigned responsibilities, e.g., for use of funds, results achieved and for taking action to make continuous improvement and achieve desired results.

Baseline:  A set of data used as a starting point to measure changes over time using the same methodology.

Continuous Improvement:  Using performance results to adjust strategies and practices so that improvement in performance is achieved over time.

Goals:  Goals are broad statements that look towards the long term and steer organizations in the direction of realizing their vision.  Goals are typically expressed as desired conditions or aims.

Issues:  An issue is a condition that may affect the organization’s ability to fulfill its mandate or achieve its goals.

Mission Statement:  A mission statement is a clear, concise description of a school jurisdiction’s overall purpose and role.  It gives direction to the programs and services that the jurisdiction provides for its students.

Outcomes:  Outcomes are measurable statements of what school jurisdictions and schools seek to achieve.  In broad terms, they answer the question, “What will this look like when we get to where we want to be?”

Performance Measures:  Performance measures provide information on important, quantifiable aspects of the education system.  They enable jurisdictions to assess progress toward achieving goals and outcomes.

Principles and Beliefs:  Principles and beliefs guide decision-making and provide a foundation for developing mission, vision and goals.

Profile:  A profile is a brief description of the school jurisdiction or school that gives context for the plan.  Profiles include characteristics of communities, students, programs and location.

Strategies:  Strategies are actions that school jurisdictions and schools take to achieve goals and desired outcomes that meet the needs of all
their students. They address local circumstances, issues, trends and opportunities.

**Targets:** Targets show desired levels of performance to be attained by a certain time. Targets are expressed quantitatively.

**Trend:** A trend shows a direction of data over time, e.g., enrolment growth.

**Vision:** A vision describes a possible and desired future state for the organization, grounded in reality, which inspires and guides decisions and actions.

**Testing Related Terms**

**Test Equating:** Test equating is a procedure that establishes the relationship between scores from two or more tests and places those scores on a common scale so that student test results from different forms can be directly compared. This procedure is usually applied in situations where multiple test forms, similar in content but possibly different in test difficulty, are administered on different test dates. A variety of different statistical procedures can be used to equate tests scores. Equated scores from different forms can be directly compared. Equated scores typically will represent the same level of achievement, no matter which form the student wrote.

**Anchor Item:** Anchor items are used in the test-equating procedures currently applied by the Learner Assessment Branch. Since all students answer the same set of anchor items, it is possible to determine the relative difficulty of the different forms and adjust student scores appropriately. Sets of anchor items are chosen to represent the curriculum and the range of item difficulties as broadly as possible. In order to preserve the validity of the anchor items, they must be kept secure.

Requirements and Sample Format for School Board Plans

The list below and format that starts on the next page contain the requirements for education plans for 2005/06 – 2007/08. School jurisdictions may wish to use this information as a checklist, even if they choose to use a format of their own design. All elements are required, unless otherwise identified.

- **Message from the Board Chair** (optional)
- **Accountability Statement. Must be phrased as follows:** The (jurisdiction’s name) education plan for the three years commencing September 1, (year), was prepared under the direction of the board in accordance with responsibilities specified in the School Act, the Government Accountability Act, Alberta Education Policy 2.1.1 (“Accountability in Education: School Authority Accountability”) and the provincial government’s accounting policies. The priorities outlined in this education plan were developed in the context of the provincial government’s business and fiscal plans and Alberta Education’s business plan. The board is committed to achieving the results laid out in this education plan.

- **Publication** School jurisdictions must post their education plans on their websites by May 31st (for this year, extended to June 24, 2005). Indicate how the education plan was or will be communicated to the public.

- **A Profile of the Jurisdiction** (Optional).

- **Goals, Outcomes, Strategies, Performance Measures and Targets**
  See sample layout starting on the next page that shows the goals, outcomes, performance measures and targets that must be included in the education plan for 2005/06 – 2007/08. See the chart on page 7 for an at-a-glance list of performance measures required by Alberta Education.

- **For provincial goals and outcomes, identify appropriate local strategies** Additional local outcomes and performance measures (optional).

- **Budget Highlights**

- **Highlights of capital and facilities plans**
Goal One: High Quality Learning Opportunities for All
Outcome 1.1: The education system meets the needs of all learners, society and the economy.

</table>

Strategies:

* 2004-05 survey data will be provided to school jurisdictions by the end of May.
Revised Reporting Requirements for November 2005 AERR

The 2005 Annual Education Results Report includes the following components:

- A message from the board chair (optional)

- An accountability statement, worded as follows: The annual education results report for (name of jurisdiction) the (year) school year was prepared under the direction of the board in accordance with the responsibilities specified in the School Act, the Government Accountability Act, Alberta Education Policy 2.1.1 (“Accountability in Education: School Authority Accountability”) and the provincial government’s accounting policies. The board is committed to using the results in this report, to the best of our abilities, to improve the quality of education for students in our jurisdiction. We will use the results to develop sound strategies for our three-year education plan to ensure that all our students can acquire the knowledge, skills and attitudes they need to be self-reliant, responsible, caring and contributing members of society.

- Information on how the report was or will be communicated to parents and the public.

- Information on how the results reports prepared by schools in the jurisdiction were communicated to parents and to the community.

- Highlights for the previous school year of the jurisdiction’s accomplishments (impact of major activities/strategies), including a web-link to the jurisdiction’s AISI annual report, and to the jurisdiction’s class size report.

- Report the jurisdiction’s performance measures results in relation to their goals, outcomes and targets (see page 36 for list of required measures), including:
  - The most recent five years of jurisdiction results for all measures; for achievement tests and diploma exams also report the provincial results for the same years,
The 2005/06 results in relation to jurisdiction targets for that year for all measures; for provincial achievement tests also report the 2005/06 jurisdiction result in relation to the provincial target.

Clearly identify the Accountability Pillar measures (a sub-set of the measures in the jurisdiction plan), and

Assessment of results (e.g., improved, no change, declined; met or did not meet target) and factors affecting performance.

**Summary of Financial results**

Provide key financial information about the school year, such as significant changes over the prior year, the annual operating surplus or deficit, accumulated operating surplus and capital reserves,

Include program expenditure information in a table or graph format for the primary audience – parents and other members of the community;

Indicate where more information on the jurisdiction’s sources of school generated funds and their uses can be obtained (e.g., link to the Audited Financial statements, contact at central office) and that comparative information is available in a provincial report – provide the web-link to the provincial roll up of jurisdiction AFS information: <http://www.education.gov.ab.ca/funding/afs/>.

Provide a web-link to the jurisdiction’s Audited Financial Statement.

**Capital and Facilities Projects**: highlight, for parents and the public, progress on major facilities projects – building renewal and construction funded by Alberta Infrastructure – for the previous school year (if applicable), focusing on benefits to students.

Identify future challenges, including areas for improvement and how the jurisdiction will address these.

**Note**: A template for reporting results is under development.
Required Performance Measures for 2004/05 School Board AERRs:

Listed below are all the required measures (revised) for school jurisdiction three-year annual education results reports for November, 2005. The measures that are not part of the Accountability Pillar are shaded. Report five years of prior provincial and jurisdiction results and the 2004/05 results in relation to provincial and jurisdiction targets for 2004/05 in the education plan for 2004/05 – 2006/07. If five years are not available, report the available data (e.g., two years of survey results).

**Goal 1: High Quality Learning Opportunities for All**

**Outcome: The learning system meets the needs of all learners, society and the economy.**
- Percentage of teachers, parents and students satisfied with the opportunity for students to receive a broad program of studies including fine arts, career, technology, health and physical education.
- Percentage of teachers, parents and students satisfied with the overall quality of education in Alberta.
- Percentage of teachers, parents and students satisfied with services for students in schools (e.g., academic counseling, career counseling, library services, supports for students with special needs).
- Percentage of teachers, parents and students agreeing that: students are safe at school, are learning the importance of caring for others, are learning respect for others and are treated fairly in school.

**Outcome: All Albertans can participate in quality learning.**
- Annual dropout rate of students aged 14 to 18 (new).

**Goal 2: Excellence in Learner Outcomes**

**Outcome: Learners demonstrate high standards.**
- Percentages of students in Grades 3, 6 and 9 (cohort results) who achieve the acceptable standard, and the percentage who achieve the standard of excellence on provincial achievement tests.
- Percentages of students who achieve the acceptable standard and percentages who achieve the standard of excellence on diploma examinations.
- Participation rates of Grade 12 students in diploma examination courses.
- Percentages of Grade 12 students eligible for Rutherford Scholarships.

**Outcome: Learners complete programs.**
- Percentages of students who completed high school within three, four (new), and five years of entering Grade 10.

**Outcome: Learners are well prepared for lifelong learning.**
- High school students to post-secondary transition rate within four and six years of entering grade 10 (new).

**Outcome: Learners are well prepared for employment.**
- Percentages of teachers and parents who agree that students are taught attitudes and behaviours that will make them successful at work when they finish school.

**Outcome: Learners are well prepared for citizenship.**
- Percentages of teachers, parents and students satisfied that students model the characteristics of active citizenship.

**Goal 3: Highly Responsive and Responsible Jurisdiction**

**Outcome: Improved results through effective working relationships with stakeholders.**
- Percentages of teachers and parents satisfied with parental involvement in their children’s education.

**Outcome: The jurisdiction demonstrates leadership and continuous improvement.**
- Percentages of teachers and parents surveyed who indicate that their school and schools in their jurisdiction have improved or stayed the same in the last three years.
- Percentages of teachers who agree that professional development opportunities made available through the school jurisdiction are focused on priorities and effectively address their ongoing professional development needs.

**Notes:**
- In addition to the outcomes and measures in the above table, reporting on the outcome and measure selected by the board from the set of Review Committee on Outcomes (RCO) list of outcomes and measures, is optional.
- The new required measures above, replace survey measures. Data will be provided by Alberta Education.
Revised Reporting Requirements for School Annual Education Results Report on the 2004/05 School Year

Schools assess and report annually to their board, parents and their communities on student achievement and use of resources. The reports include the results information in relation to all goals, outcomes and performance measures in the school’s plan, including required provincial student achievement measures. School reports also include specific elements required by the board.

**Required measures:**

School reports must report on the required provincial measures listed below — student results on provincial achievement tests and diploma examinations — for the learning system goal, excellence in learner outcomes, and include an assessment of their results.

- Percentages of students in Grades 3, 6 and 9 who achieved the acceptable standard, and the percentages who achieved the standard of excellence on provincial achievement tests (five years of school results), in relation to jurisdiction and provincial results for each year, and the current year results in relation to school, jurisdiction and provincial targets for 2004/05 (cohort results).

- Percentages of students in Grades 3, 6 and 9 writing provincial achievement tests (five years of school participation rates) in relation to jurisdiction and provincial participation rates for each test.

- Percentages of students writing Grade 12 diploma examinations who achieved the acceptable standard, and the percentages who achieved the standard of excellence (five years of school results) in relation to jurisdiction and provincial results for each examination.

- Student participation in diploma examination courses in relation to jurisdiction and provincial participation rates (five years of school participation rates for each course).

In addition, schools are required to report on all measures and targets in their plans, include any other information required by their board, and include a web-link to the school’s class size report on the jurisdiction’s website.

**Note:** changes since the 2004 edition are shaded. Reporting provincial achievement test results for writers is optional. Including the class size report is no longer required.
