

**THE JOURNAL OF THE INTERNATIONAL ASSOCIATION
OF PUPIL PERSONNEL WORKERS:
TITLE/TOPIC INDEX—1956-1992**

by

James G. McCullagh and Shirley S. Craig

The purpose of this study was to develop a Title/Topic Index of all articles, notes, comments, editorials, convention notices, and most other information published in each issue of the *Journal* of the International Association of Pupil Personnel Workers from its inception in December 1956 to the Summer 1992, when the last issue was published. Each issue of the *Journal* was examined and classified under various headings as indicated below. The title/topic index, a comprehensive index, is the only complete topical source for identifying various papers published in the *Journal*. It will be an invaluable source for educators, historians, social scientists, and others interested in the development of pupil personnel work.

The International Association for Truancy and Dropout Prevention began its storied history in 1911 as the National League of Compulsory Education Officials (McCullagh, 2002). In 1936 the League changed its name to the National League to Promote School Attendance. The League, from 1923 until 1940, published proceedings of each convention which were indexed by McCullagh, Byrne, & Wunderlich (2003/2004). From January 1944, and perhaps earlier, the League published a newsletter until September 1956. In October 1956, the League was renamed the International Association of Pupil Personnel Workers, and in December the inaugural issue of the *Journal* was published. In the summer 1992, the last issue of the *Journal*, volume 36, number 2, was published by the Association. The subsequent issue – Winter 1992 – was renamed *The Journal for Truancy and Dropout Prevention*.

The Title/Topic Index includes a listing of all articles, notes, comments, editorials, convention notices, and most other information included in the *Journal* for all issues published

from December 1956 through the summer 1992. This index does not include Association information related to membership applications and benefits; availability of consultants, speakers, and trainers; and instructions for authors. Product endorsements and advertising information were also excluded.

The *Journal* was a major vehicle for the communication of developments in pupil personnel work. As the official organ of the International Association of Pupil Personnel Workers, the *Journal* served as a primary source for articles relating broadly to pupil personnel workers, including visiting teachers or school social workers, attendance workers or truancy officers, school counselors, and others. It also included summaries of papers and presentations at various Association meetings and its annual conferences, and as a newsletter for its members. The Title/Topic Index, a comprehensive index, is the only complete topical source for identifying various papers published in the *Journal*. It will be an invaluable source for educators, historians, social scientists, and others interested in the development of pupil personnel work.
