### **State Summary of Library Statistics**

Each year the State Library sends annual report forms to California's public, academic, special, state agency, and county law libraries. Statistical data from those reports are tabulated in this publication, with directory listings published in the companion volume, *California Library Directory*. Public libraries are required by the Education Code to report annually to the State Librarian. Although the statistics program and these publications are promoted as widely as we can, participation by academic, special, state agency and county law libraries is voluntary.

California cooperates with the Institute of Museum and Library Services (IMLS) through the Public Library Statistics Cooperative (PLSC) in the collection of uniform public library statistical data nationwide for compilation and publication.

#### **FISCAL YEAR 2007 - 2008**

For this fiscal year, three hundred and eighty nine libraries of all types submitted data to this program. One public library, Vernon, did not submit an annual report and appears with almost no data in the tables of this publication. We estimate there are at least 1,000 libraries in operation in California, exclusive of school libraries, so data in this publication is about 39% complete this year. Statewide Summary data appears on pages 4 - 9, below.

For public libraries, compared to FY 2006-2007, there was a 4.7% increase in local government income. Library visits per capita increased by 2.55%. Circulation per capita increased by 6.32%. There was a 8.10% increase in the number of public access computers per capita. The number of reference questions per capita reversed a downward trend and increased by 7%. During the last five years service counts per capita increased for visits (4%), circulation (5%) and Internet terminals per 1000 population (23%).

As the state population grew 1.3% from the previous fiscal year, 133 libraries had increases in population served, 47 had a decrease and one had no change (Glendale).

By type of library, those reporting data and included in this statistics publication are:

181 public libraries:

- \* By jurisdiction, there are 46 county, 117 city, 12 district and 6 Joint Power Authority public libraries.

By level of service, in this fiscal year, California public libraries included:

- \* 2,012 total public service points, including mobile library service stops.
- \* 167 main libraries. Administrative headquarters are not included, and some county or district libraries have no main library.
- \* 645 branch libraries. A branch is an extension library open some part of each of five days a week, has at least 1,400 square feet of floor space, a general book collection of at least 7,000 volumes, and is staffed with the equivalent of at least one librarian and one clerical employee during hours open for service.
- \* 308 library stations. A station is a library structure smaller than a branch, providing a lower level of service.
- \* There are 63 mobile libraries operated by 42 libraries with 891 mobile library stops. A mobile library stop is a location visited by a bookmobile or other traveling library.
- \* Combining main, branch, station and the number of mobile libraries, there are 1,184 public library outlets reported. Excluding mobile libraries there are 1,121 library outlets.

Public Library coverage of special note:

Emeryville and Piedmont are included with Oakland.

Glenn County is served by Orland and Willows city libraries.

Hillsborough is served by Burlingame and San Mateo city libraries.

Santa Barbara County is served by the three city libraries of Lompoc, Santa Barbara and Santa Maria.

Shasta County is served by the Redding Public Library and the Anderson and Burney outlets.

Sierra County is included with Plumas County.

91 academic libraries:

- \* 20 state supported academic libraries.
- \* 51 community college libraries.
- \* 20 private academic libraries.

89 special libraries:

- \* 9 law libraries.
- \* 20 medical libraries.
- \* 5 libraries operated by for profit organizations.
- \* 30 libraries operated by non-profit organizations.
- \* 5 libraries for U.S. government agencies and installations.
- \* 10 resident libraries at state institutions and schools.
- \* 10 special libraries at state government offices.

36 of the 58 county law libraries.

There are 58 county law libraries in the state, 39 of which provided report data this year.

In the State Summary table that follows on the next two pages, the current year plus the two preceding years are shown. Totals reflect the level of participation in the survey itself. Participation levels for academic, special and county law libraries vary much more than those for the public libraries.

# Five Year Public Libraries

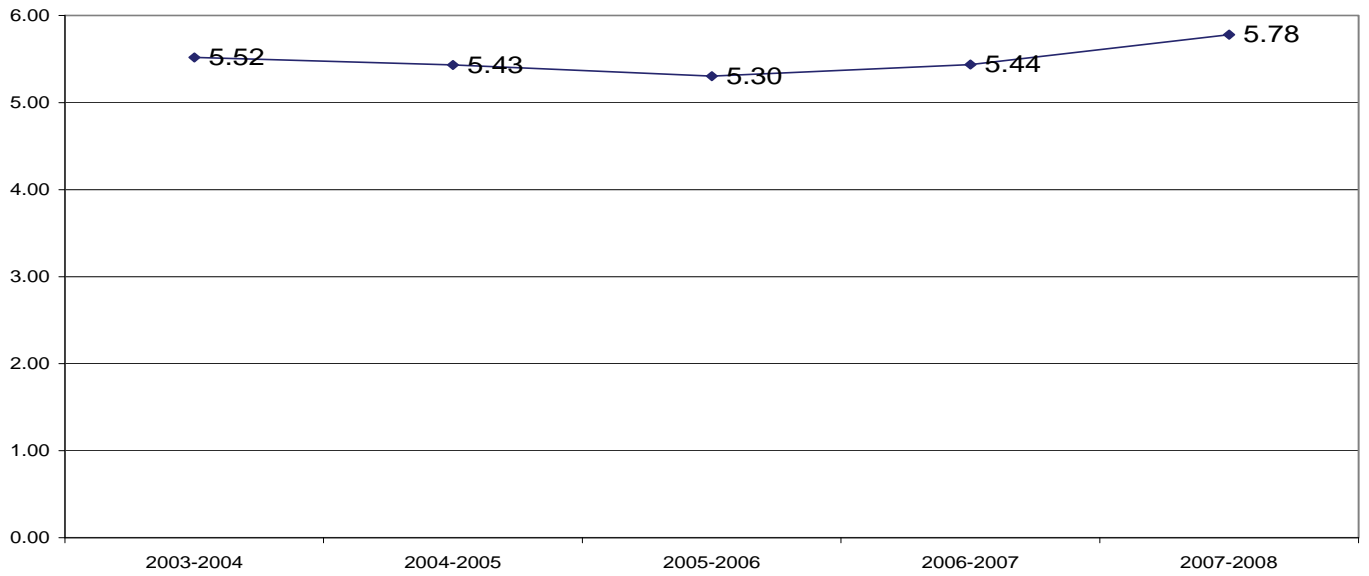

## Trend Charts

The data for each of the charts is generated by summing the item for all responding libraries and then dividing by the sum of the population served for those libraries to obtain the per capita figure. Not all libraries report all items for all years, but the number of non-respondents is relatively small and the per capita approach reduces the influence of the number of respondents, skewing the results.

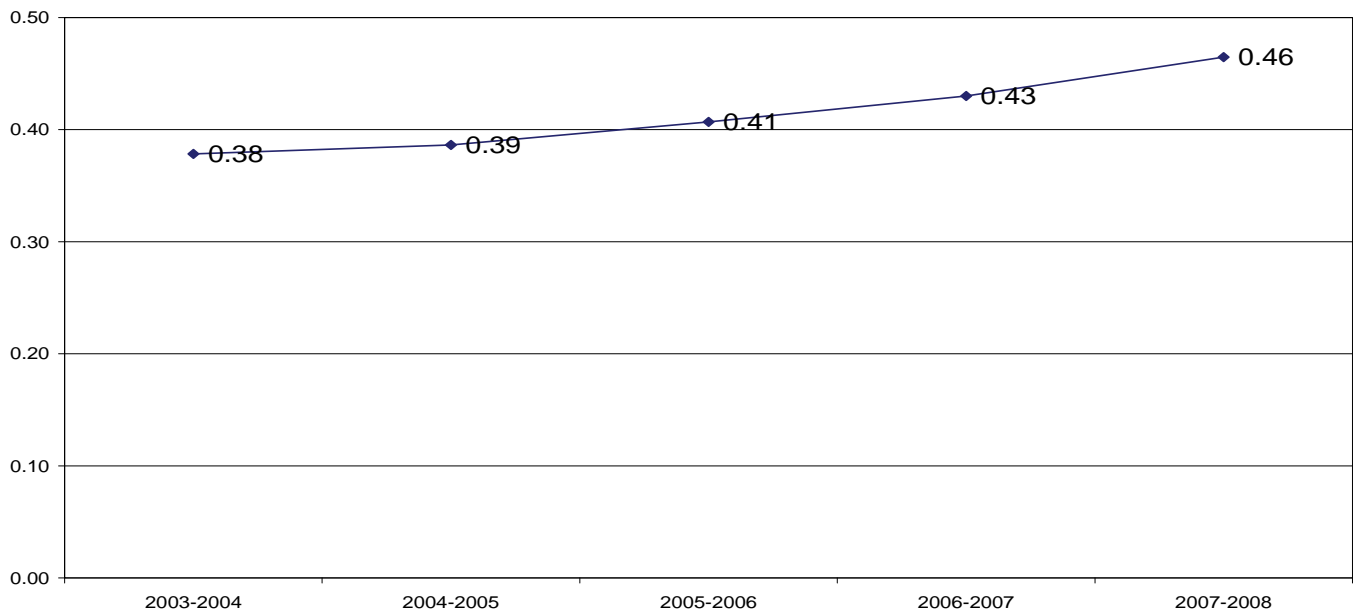

Each library serves a unique clientele and therefore local trends may vary from the statewide aggregate. The statewide figures are helpful in analyzing broad changes in services and as a background for understanding local experiences.

## Public Libraries

California's 181 public libraries are departments of local government: city, county and special district. They vary widely in size and strength, from Alpine County with fewer than 1300 residents to the City of Los Angeles with over 4 million, and cover the state with a network of branch libraries, bookmobiles and other extension services. Most participate in cooperative library systems and/or inter-type networks comprised of libraries in adjacent counties, offering equal access and sharing of resources among all library users.

There are eleven tables:

Profile	Population, service facilities, staffing
Income	Local and federal revenue, state allocations
Expenditures: Detail	Format expenditures, salaries and benefits, preservation, etc.
Collections	Print, microform, audiovisual
Services	Circulation, ILL, reference
Services to Children	Borrowers, materials, programs
Library Literacy Services	Adult and family literacy services
Salaries	Starting and ending salaries for a variety of positions
Electronic Services	Public Access Computers, E-Rate usage
Library Comparisons	Per capita and other comparative measures
Mobile Libraries	Bookmobile services, staffing, circulation

Data on the tables are taken from annual reports submitted to the California State Library. Preliminary data were compiled from these reports and provided to reporting libraries for review. Additions and corrections received from libraries up to the cut-off date are incorporated in the tables in this *California Library Statistics* publication and are also available to California libraries and networks through the California State Library web site and private vendors providing statistical comparison tools.

No annual report was received from Vernon public library this year.

Public libraries are grouped into seven categories by size of population served:

- Group 1, over 500,000 population (16 libraries)
- Group 2, 150,000 to 500,000 population (33 libraries)
- Group 3, 100,000 to 150,000 population (26 libraries)
- Group 4, 70,000 to 100,000 population (20 libraries)
- Group 5, 50,000 to 70,000 population (27 libraries)
- Group 6, 25,000 to 50,000 population (28 libraries)
- Group 7, under 25,000 population (31 libraries)
