Preface

Dental Hygiene Research Synopsis

Articles, books, Web sites, and other materials listed at the end of each course were considered during the revision process. *ADHA Journal of Dental Hygiene* and the *Commission on Dental Accreditation* were especially useful in providing insight into trends and issues in the field. These references are suggested for use by instructors and students during the study of the topics outlined.

Industry advisory team members from colleges throughout the state were asked to give input related to changes to be made to the curriculum framework. Specific comments related to soft skills needed in this program included initiative, punctuality, great personality, and people skills, as well as dependability and team cooperation. Occupational-specific skills stated included instrumentation and patient education. Safety practices emphasized included infection control and universal precautions.

Instructors from colleges throughout the state were also asked to give input on changes to be made to the curriculum framework. Changes suggested for the curriculum included increasing both clinical and instruction hours as well as adding more digital components to the curriculum.

Curriculum

The following national standards were referenced in each course of the curriculum:

- CTB/McGraw-Hill LLC *Tests of Adult Basic Education, Forms 9 and 10 Academic Standards*
- *21st Century Skills*
- *2010 Accreditation Standards for Dental Hygiene Education Programs*

Needs of the Future Workforce

Dental Hygienist is among the fastest growing occupations. Job prospects will be good for most graduates, but competition will be keen in some areas. Older dentists, who have been less likely to employ dental hygienists, are leaving the occupation and will be replaced by recent graduates, who are more likely to employ one or more hygienists. In addition, as dentists' workloads increase, they are expected to hire more hygienists to perform preventive dental care, such as cleaning, so that they may devote their own time to more complex procedures. (US Bureau of Labor Statistics, 2010). The occupation is projected to grow 30 percent in Mississippi and 37 percent in the United States (EMSI, 2011).

</table>
Industry and instructor comments, along with current research, were considered by the curriculum revision team during the revision process, and changes were made as needed and appropriate. Many of the skills and topics noted in the research were already included in the curriculum framework. Specific changes made to the curriculum at the date curriculum revision meeting included:

- Competencies and objectives were reviewed to ensure accuracy and appropriateness.
- DHT 1512, formerly named Periodontics, was renamed Periodontology.
- The Recommended Tools and Equipment list was updated.

**Assessment**

Students will be assessed using the *Dental Hygiene Licensure Exam* administered by the Council of Interstate Testing Agencies (CITA). [http://www.citaexam.com/dhcontent.html](http://www.citaexam.com/dhcontent.html)

**Alternate Assessments**

No alternate assessment has been approved at this time.

**Professional Learning**

It is suggested that instructors participate in professional learning related to the following concepts:

- How to use the program Blackboard site
- Differentiated instruction – To learn more about differentiated instruction, please go to [http://www.paec.org/teacher2teacher/additional_subjects.html](http://www.paec.org/teacher2teacher/additional_subjects.html) and click on Differentiated Instruction. Work through this online course and review the additional resources.

**Program Exceptions**

Based on the following position by the American Dental Association, only a degree program is offered for Dental Hygiene:

*Dental hygienists receive their education through academic programs at community colleges, technical colleges, dental schools or universities. The majority of community college programs take at least two years to complete, with graduates receiving associate degrees. Receipt of this degree allows a hygienist to take licensure examinations (national and state or regional), become licensed and to work in a dental office.*

*It is the position of the ADHA that graduation from an accredited dental hygiene program of at least two academic years of full-time instruction in an institution of higher education and successful completion of the National Board Dental Hygiene Examination is the minimum educational preparation necessary for dental hygiene licensure and practice. The ADHA opposes reduction of educational standards and/or requirements for licensure of dental hygienists.*
Foreword

As the world economy continues to evolve, businesses and industries must adopt new practices and processes in order to survive. Quality and cost control, work teams and participatory management, and an infusion of technology are transforming the way people work and do business. Employees are now expected to read, write, and communicate effectively; think creatively, solve problems, and make decisions; and interact with each other and the technologies in the workplace. Career–technical programs must also adopt these practices in order to provide graduates who can enter and advance in the changing work world.

The curriculum framework in this document reflects these changes in the workplace and a number of other factors that impact local career–technical programs. Federal and state legislation calls for articulation between high school and community college programs, integration of academic and career skills, and the development of sequential courses of study that provide students with the optimum educational path for achieving successful employment. National skills standards, developed by industry groups and sponsored by the U.S. Department of Education and Labor, provide career and technical educators with the expectations of employers across the United States. All of these factors are reflected in the framework found in this document.

Referenced throughout the courses of the curriculum are the 21st Century Skills, which were developed by the Partnership for 21st Century Skills, a group of business and education organizations concerned about the gap between the knowledge and skills learned in school and those needed in communities and the workplace. A portion of the 21st Century Skills addresses learning skills needed in the 21st century, including information and communication skills, thinking and problem-solving skills, and interpersonal and self-directional skills. Another important aspect of learning and working in the 21st century involves technology skills. The International Society for Technology in Education, developer of the National Educational Technology Standards (NETS), was a strategic partner in the Partnership for 21st Century Skills. Each postsecondary program of instruction consists of a program description and a suggested sequence of courses that focus on the development of occupational competencies. The MS-CPAS2 blueprints are based upon the suggested course sequences to allow for year 1 and year 2 assessments for all exit options. Please refer to the blueprint online. Each career–technical course in this sequence has been written using a common format, which includes the following components:

- **Course Name** – A common name that will be used by all community and junior colleges in reporting students
- **Course Abbreviation** – A common abbreviation that will be used by all community and junior colleges in reporting students
- **Classification** – Courses may be classified as the following:
  - Career–technical core – A required career–technical course for all students
  - Area of concentration (AOC) core – A course required in an area of concentration of a cluster of programs
  - Career–technical elective – An elective career–technical course
  - Related academic course – An academic course that provides academic skills and knowledge directly related to the program area
• Academic core – An academic course that is required as part of the requirements for an associate’s degree

• Description – A short narrative that includes the major purpose(s) of the course and the recommended number of hours of lecture and laboratory activities to be conducted each week during a regular semester

• Prerequisites – A listing of any courses that must be taken prior to or on enrollment in the course

• Corequisites – A listing of courses that may be taken while enrolled in the course

• Competencies and Suggested Objectives – A listing of the competencies (major concepts and performances) and the suggested student objectives that will enable students to demonstrate mastery of these competencies

The following guidelines were used in developing the program(s) in this document and should be considered in compiling and revising course syllabi and daily lesson plans at the local level:

• The content of the courses in this document reflects approximately 75% of the time allocated to each course. The remaining 25% of each course should be developed at the local district level and may reflect the following:
  o Additional competencies and objectives within the course related to topics not found in the state framework, including activities related to specific needs of industries in the community college district
  o Activities that develop a higher level of mastery on the existing competencies and suggested objectives
  o Activities and instruction related to new technologies and concepts that were not prevalent at the time the current framework was developed or revised
  o Activities that include integration of academic and career–technical skills and course work, school-to-work transition activities, and articulation of secondary and postsecondary career–technical programs
  o Individualized learning activities, including work-site learning activities, to better prepare individuals in the courses for their chosen occupational areas

• Sequencing of the course within a program is left to the discretion of the local district. Naturally, foundation courses related to topics such as safety, tool and equipment usage, and other fundamental skills should be taught first. Other courses related to specific skill areas and related academics, however, may be sequenced to take advantage of seasonal and climatic conditions, resources located outside of the school, and other factors.

• Programs that offer an Associate of Applied Science degree must include a minimum 15-semester-credit-hour academic core. Specific courses to be taken within this core are to be determined by the local district. Minimum academic core courses are as follows:
  o 3 semester credit hours (sch) Math/Science Elective
  o 3 semester credit hours Written Communications Elective
  o 3 semester credit hours Oral Communications Elective
  o 3 semester credit hours Humanities/Fine Arts Elective
3 semester credit hours Social/Behavioral Science Elective

It is recommended that courses in the academic core be spaced out over the entire length of the program, so that students complete some academic and career–technical courses each semester. Each community or junior college has the discretion to select the actual courses that are required to meet this academic core requirement.

- Career–technical elective courses have been included to allow community colleges and students to customize programs to meet the needs of industries and employers in their area.

In order to provide flexibility within the districts, individual courses within a framework may be customized by doing the following:

- Adding new competencies and suggested objectives
- Revising or extending the suggested objectives for individual competencies
- Adjusting the semester credit hours of a course to be up 1 hour or down 1 hour (after informing the Mississippi Community College Board [MCCB] of the change)

In addition, the curriculum framework as a whole may be customized by doing the following:

- Resequencing courses within the suggested course sequence reflecting the new assessment format
- Developing and adding a new course that meets specific needs of industries and other clients in the community or junior college district (with MCCB approval)
- Utilizing the career technical elective options in many of the curricula to customize programs

Program Description

The Dental Hygiene Technology Program is a general education and clinical dental hygiene experience to prepare one for a career in the dental hygiene profession. All phases of dental hygiene education are covered and practiced by clinical experience. CPR-Health Care Provider is a prerequisite for the program. The curriculum requires a minimum of 85 semester hours of study. The program requires 50 hours of dental hygiene courses, 32-33 academic hours leading to an Associate Degree in Dental Hygiene, and an additional 3 hour elective. A graduate will be eligible to take the examination of the National Board of Dental Examiners as well as individual state board examinations for dental hygiene.

The Career-technical courses in the following list are required in the Dental Hygiene Technology curriculum:

- 5 semester credit hours (sch) Fundamentals of Dental Hygiene
- 4 sch Dental Radiology
- 5 sch Clinical Dental Hygiene I
- 2 sch Dental Anatomy
- 2 sch Head and Neck Anatomy
- 3 sch Dental Hygiene Materials
- 2 sch Oral Histology and Embryology
- 5 sch Clinical Dental Hygiene II
- 2 sch Periodontics
- 2 sch Dental Pharmacology
- 6 sch Clinical Dental Hygiene III
- 3 sch Community Dental Health
- 2 sch Dental Ethics/Law
- 1 sch Dental Hygiene Seminar I
- 1 sch Dental Hygiene Seminar II
- 1 sch Dental Hygiene Seminar III
- 1 sch Dental Hygiene Seminar IV
- 3 sch General/Oral Pathology

The following academic courses are required in the Dental Hygiene Technology curriculum:

- 4 sch Anatomy and Physiology I (BIO 2514)
- 4 sch Anatomy and Physiology II (BIO 2524)
- 3 sch Math/Science Elective
- 3 sch Written Communications Elective
- 3-4 sch Microbiology (BIO 2923 or 2924)
- 3 sch Social/Behavioral Science Elective*
- 3 sch Humanities/Fine Arts Elective
- 3 sch Oral Communications Elective
- 3 sch Principles of Nutrition or Nutrition (HEC 1233 or 1253)
- 3 sch General Psychology I (PSY 1513)

* Introduction to Sociology I (SOC 2113) is required by national standards.
An additional 3 hour elective should be selected from the following list:

- English Composition II (ENG 1113)
- Introduction to Chemistry (CHE 1113)
- General Chemistry I (CHE 1213)
- General Chemistry Laboratory I (CHE 1211)
- Introduction to Computer Concepts (CSC 1113)
- Fundamentals of Microcomputer Application (CPT 1113)

Industry standards are taken from the Commission on Dental Accreditation’s Accreditation Standards for Dental Hygiene Education Programs (2011).

- General Chemistry I (CHE 1213)
- General Chemistry Laboratory I (CHE 1211)
- Introduction to Computer Concepts (CSC 1113)
- Fundamentals of Microcomputer Applications (CPT 1113)
Dental Hygiene Technology Courses

Course Name: Fundamentals of Dental Hygiene

Course Abbreviation: DHT 1115

Classification: Career-Technical Core

Description: This course will provide the dental hygiene student with the fundamental knowledge and skills necessary for interaction with clients. The lecture portion will focus on the history, philosophy, and theories relevant to the profession of dental hygiene. Lecture highlights will include discussion of the latest health care settings, trends, and approaches to comprehensive care. The preclinical portion will provide the student with opportunities for the development of psychomotor skills and opportunities for interaction with clients, which will provide emphasis on trust, care, and responsibility as part of becoming a professional. (5 sch: 2 hr. lecture, 6 hr. lab)

Prerequisite: None

Competencies and Suggested Objectives

1. Discuss the history, philosophy, and theories relevant to the dental hygiene profession. DHT
   a. Define, in writing and through conversation, medical and dental terminology.
   b. Apply professional practices/behaviors and utilize the ethics of the profession of dental hygiene.
   c. Demonstrate knowledge concerning the historical movement that precipitated the profession of dental hygiene.
   d. Assess the need for procedures involved in maintaining, cleaning, and operating dental equipment.
   e. Explain the rationale behind operatory and office aseptic techniques.
   f. Analyze the need for examination and scaling instruments.
   g. Explain the rationale behind manual and motor-driven polishing procedures.
   h. Assess the rationale behind and importance of operator expertise in answering client questions.

2. Discuss the issues relevant to establishing trust, care, and responsibility with clients. DHT, DH4
   a. Apply professional behaviors that promote respect for both the health care professional and client.
   b. Explain what can be learned of the client’s story or dialogue history.
   c. Assess the latest health care settings, trends, and approaches of the dental hygiene profession.

3. Develop psychomotor skills necessary for the delivery of dental hygiene services. DH3, DH4
   a. Demonstrate the ability to operate the dental chair and other operatory equipment.
   b. Demonstrate the ability to position the patient and self to obtain maximum visibility, accessibility, and comfort.
   c. Maintain the clinical equipment used in the dental hygiene clinic.
   d. Demonstrate the procedure to sterilize and disinfect specific clinical materials, equipment, and instruments.
e. Perform an assessment of vital signs on a patient.
f. Access intraoral and extraoral conditions using palpation and visual detections for abnormalities.
g. Document intraoral and extraoral clinical manifestations on charts.
h. Discuss emergency procedures given specific emergency situations.
i. Formulate an appropriate, sequential Dental Hygiene Treatment Plan for individuals with specific needs based on the results of data gathered during assessment procedures.
j. Demonstrate use of examination and scaling instruments.
k. Practice manual and motor-driven polishing procedures.

<table>
<thead>
<tr>
<th>4. Recognize the basic etiology of dental disease, related treatment, and preventive measures. DH3, DH4</th>
</tr>
</thead>
<tbody>
<tr>
<td>a. Explain basic constituents and the appearance of plaque and dental calculus, and its effect on the dental health of the client.</td>
</tr>
<tr>
<td>b. Identify types, causes, and possibilities for removal of specific stains and accretions.</td>
</tr>
<tr>
<td>c. Apply the concept of selective polishing procedures for all clients.</td>
</tr>
<tr>
<td>d. Apply procedures necessary for the dental prophylaxis polishing techniques (materials, methods, and equipment).</td>
</tr>
<tr>
<td>e. Counsel patients on available sources of fluoride for use as a dental disease preventive.</td>
</tr>
<tr>
<td>f. Demonstrate all topical fluoride techniques.</td>
</tr>
</tbody>
</table>

**STANDARDS**

*Standards Based on the Commission on Dental Accreditation*

| DH1 | General education content including oral and written communications, psychology, and sociology. |
| DH3 | Dental sciences including |
| DH3A | tooth morphology; |
| DH3B | head, neck, and oral anatomy; |
| DH3C | oral embryology and histology; |
| DH3D | oral pathology; |
| DH3E | radiography; |
| DH3F | periodontology; |
| DH3G | pain management; and |
| DH3H | dental materials. |
| DH4 | Dental hygiene science including |
| DH4A | oral health education and preventive counseling, |
| DH4B | health promotion, |
| DH4C | patient management, |
| DH4D | clinical dental hygiene, |
| DH4E | provision of services for and management of patients with special needs, |
| DH4F | community dental/oral health, |
| DH4G | medical and dental emergencies including basic life support, |
| DH4H | legal and ethical aspects of dental hygiene practice, |
| DH4I | infection and hazard control management, and |
DH4J the provision of oral health care services to patients with blood borne infectious diseases.

Course Name: Head and Neck Anatomy

Course Abbreviation: DHT 1222

Classification: Career-Technical Core

Description: A detailed study of skeletal, muscular, vascular, and neural features of the face, head, and neck. (2 sch: 2 hr. lecture)

Prerequisite: None

Competencies and Suggested Objectives

1. Explain the skeletal features of the face, head, and neck.
   a. Identify, by their position and relationship to one another, the bones which make up the head, spine, face, and neck.
   b. Identify the sutures, openings, foramina, and canals relating to the bones that make up the head, spine, face, and neck.

2. Explain the muscular, vascular, and neural features of the face, head, and neck.
   a. Identify the location and actions of the muscles of mastication, the hyoid muscles, and the sternocleidomastoid muscles.
   b. Trace the blood supply to and from structures in the head and neck, the nerve supply, and the lymphatic drainage from these structures.
   c. Identify the structures relating to the temporomandibular joint, the salivary system, the nasal cavity, and the paranasal sinuses.

STANDARDS

Standards Based on the Commission on Dental Accreditation

DH3B Dental sciences content must include head, neck and oral anatomy.

Course Name: Oral Histology and Embryology

Course Abbreviation: DHT 1232

Classification: Career-Technical Core

Description: This course studies the microscopic structure and development of types of cells, tissues, and organs of the human body. Also given is a survey of the elements of embryology emphasizing the area of the head and neck, as related to the development of the dental arches, salivary glands, buccal mucosa, pharynx, and tongue. (2 sch: 2 hr. lecture)

Prerequisite: Dental Anatomy (DHT 1212) and Head and Neck Anatomy (DHT 1222)

Competencies and Suggested Objectives

Postsecondary Dental Hygiene Technology
SUGGESTED REFERENCES

Course Name: Dental Radiology

Course Abbreviation: DHT 1314

Classification: Career-Technical Core

Description: This course involves a broad scope of study of radiology and its use by the dentist as a diagnostic aid. Also covered are techniques for making radiographs with safety for hygienist and patient, the processing and mounting of exposed film and their interpretation, and study of anatomical landmarks evident in periapical films. (4 sch: 3 hr. lecture, 2 hr. lab)

Prerequisite: None

Competencies and Suggested Objectives

1. Explain the theory and scope of radiology as related to dental hygiene.
   a. Identify landmarks of the skull, maxilla, and mandible that are significant to the correct interpretation of dental radiographs.
   b. Discuss scientific principles related to the production of radiographs.

2. Apply the theory and scope of radiology as related to dental hygiene.
   a. Produce radiographic exposures according to stated criteria in regard to safety to both operator and patient, including the use of film holders.
   b. Prepare radiographs that are of satisfactory diagnostic quality including periapical (adult and pedo), bitewing, and occlusal.
   c. Utilize extraoral radiographical techniques.
   d. Observe, interpret, and evaluate radiographs in regard to the normal and abnormal.
   e. Use and evaluate manual and automatic processors.
   f. Understand and demonstrate correct techniques of film duplication.

STANDARDS

Standards Based on the Commission on Dental Accreditation

DH3E Dental sciences content must include radiography.

Course Name: Clinical Dental Hygiene II

Course Abbreviation: DHT 2425

Classification: Career-Technical Core

Description: This course is a continuation of the principles and techniques involved in the practice of dental hygiene. Emphasis will be on theoretical background needed to provide advanced clinical skills. Clinical experiences will focus on treatment of clients with moderate to advanced periodontal disease. (5 sch: 1 hr. lecture, 12 hr. clinical)

Prerequisite: Periodontics (DHT 1512) and Clinical Dental Hygiene I (DHT 1415)

<table>
<thead>
<tr>
<th>Competencies and Suggested Objectives</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Provide care for clients with moderate to advanced periodontal disease.</td>
</tr>
<tr>
<td>a. Name the parts of the ultrasonic scalers and air polishers, and know the function of each.</td>
</tr>
<tr>
<td>b. List the precautions, indications, and contraindications for using the ultrasonic scaler and air polisher.</td>
</tr>
<tr>
<td>c. Discuss the operating techniques of the ultrasonic scaler and air polisher, and demonstrate how to use it/them on clinical patients to efficiently remove calculus and/or stain.</td>
</tr>
<tr>
<td>d. Demonstrate the daily maintenance of the ultrasonic scaler and air polisher.</td>
</tr>
<tr>
<td>e. Demonstrate the procedure for unit preparation, client preparation, instrumentation, and post-operative instructions when using ultrasonic instrumentation.</td>
</tr>
<tr>
<td>f. Differentiate between scaling and root planning.</td>
</tr>
<tr>
<td>g. Give reasons to root plane completely.</td>
</tr>
<tr>
<td>h. Demonstrate the process of performing a root planing on a clinical client.</td>
</tr>
<tr>
<td>i. Explain the difference between gingival, subgingival, and surgical curettage.</td>
</tr>
<tr>
<td>j. List objectives of curettage.</td>
</tr>
<tr>
<td>k. Demonstrate the use of subgingival irrigation techniques.</td>
</tr>
<tr>
<td>l. Explain how topical anesthesia is applied prior to curettage.</td>
</tr>
<tr>
<td>m. Describe instrumentation for curettage.</td>
</tr>
<tr>
<td>n. List the effects of instrumentation for curettage.</td>
</tr>
<tr>
<td>o. Explain steps in the healing process and factors that interfere with healing.</td>
</tr>
</tbody>
</table>

2. Utilize skills in caring for all special needs clients.
   a. Analyze reasons that certain clients experience pain and are anxious about dental treatment and be able to deal with these clients in a manner which instills confidence.
   b. Utilize skills in caring for special needs clients including the geriatric, oral surgery client, client with a fractured jaw, the pregnant client, client during puberty/menopause/adolescence, and the client with a physical or sensory handicap.
STANDARDS

Standards Based on the Commission on Dental Accreditation

DH3G Dental sciences content must include pain management.

DH4 Dental hygiene science content must include

DH4A oral health education and preventive counseling,
DH4B health promotion,
DH4C patient management,
DH4D clinical dental hygiene,
DH4E provision of services for and management of patients with special needs,
DH4I infection and hazard control management, and
DH4J the provision of oral health care services to patients with blood borne infectious diseases.

**SUGGESTED REFERENCES**

Course Name: Dental Hygiene Materials

Course Abbreviation: DHT 2613

Classification: Career-Technical Core

Description: This course offers the study of materials used in dentistry, their physical and chemical properties, and proper manipulation as used in the operatory and laboratory. (3 sch: 2 hr. lecture, 2 hr. lab)

Prerequisite: None

Competencies and Suggested Objectives

1. Discuss selected dental materials within the dental hygienist’s scope of practice.
   a. Discuss materials used in dentistry.
   b. Demonstrate the ability to manipulate plaster, stone, impression materials, dental amalgam, dental cements, bases, composite resins, and abrasive agents.
   c. Describe the armamentaria and techniques of restorative materials.
   d. Perform allowable procedures which meet the stated criteria as designated by the State of Mississippi Board of Dental Examiners.
   e. Demonstrate conversant knowledge of various laboratory techniques for full denture, partial denture, fixed bridge, crown, and inlay preparations; fluoride trays; and night guards.

2. Demonstrate the use of selected dental materials within the dental hygienist’s scope of practice.
   a. Identify materials used in dentistry.
   b. Demonstrate the ability to manipulate plaster, stone, impression materials, dental amalgam, dental cements, bases, composite resins, and abrasive agents.
   c. Describe the armamentaria and techniques of restorative materials.
   d. Perform allowable procedures which meet the stated criteria as designated by the State of Mississippi Board of Dental Examiners.
   e. Demonstrate conversant knowledge of the various laboratory techniques for full denture, partial denture, fixed bridge, crown, and inlay preparations; fluoride trays; and night guards.

STANDARDS

Standards Based on the Commission on Dental Accreditation

DH3H Dental sciences content must include dental materials.

SUGGESTED REFERENCES

Course Name: Dental Pharmacology

Course Abbreviation: DHT 2712

Classification: Career-Technical Core

Description: This course gives a basic introduction to drug actions, their mechanisms, and the reactions of the body to these drugs. Special emphasis is given to the drugs used in the modern dental office including emergency procedures. (2 sch: 2 hr. lecture)

Prerequisite: None

### Competencies and Suggested Objectives

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1.</td>
<td>Discuss the drug laws and usage as related to the dental practice.</td>
</tr>
<tr>
<td></td>
<td>a. Explain the laws governing drug use and procurement with special emphasis placed on those specifically spelled out in the practice acts of Mississippi.</td>
</tr>
<tr>
<td></td>
<td>b. Identify the most reliable sources of drug information.</td>
</tr>
<tr>
<td>2.</td>
<td>Apply knowledge of pharmacology to the practice of dental hygiene.</td>
</tr>
<tr>
<td></td>
<td>a. Describe pharmacological terms, prescriptions, and dosages.</td>
</tr>
<tr>
<td></td>
<td>b. Interpret a drug prescription.</td>
</tr>
<tr>
<td></td>
<td>c. Manage clinical situations involving drugs and drug-related techniques encountered in general dental practice.</td>
</tr>
<tr>
<td></td>
<td>d. Utilize various drugs as adjuncts to dental hygiene procedures that are administered by the dental hygienist.</td>
</tr>
<tr>
<td></td>
<td>e. Demonstrate the ability to take critical drug information from each client, evaluate it, and translate it into how it may or may not alter the course of dental hygiene treatment.</td>
</tr>
</tbody>
</table>

---

### STANDARDS

Standards Based on the Commission on Dental Accreditation

- **DH2** Biomedical science content must include content in anatomy, physiology, chemistry, biochemistry, microbiology, immunology, general pathology, nutrition, and pharmacology.
- **DH3G** Dental sciences content must include pain management.
- **DH4G** Dental hygiene science content must include medical and dental emergencies including basic life support.

Course Name: Dental Hygiene Seminar IV

Course Abbreviation: DHT 2941

Classification: Career-Technical Core

Description: This course provides the student the opportunity to discuss the written registry exam, the clinical simulation exam format, and professional development. (1 sch: 1 hr. lecture)

Prerequisite: Dental Hygiene Seminar III (DHT 2931)

<table>
<thead>
<tr>
<th>Competencies and Suggested Objectives</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Participate in leadership activities.</td>
</tr>
<tr>
<td>a. Develop progressive leadership skills.</td>
</tr>
<tr>
<td>b. Establish professional goals.</td>
</tr>
<tr>
<td>c. Utilize group dynamics as a means of enhancing professional growth.</td>
</tr>
<tr>
<td>d. Participate in professional activities.</td>
</tr>
<tr>
<td>2. Explain written registry exam format.</td>
</tr>
<tr>
<td>a. Complete mock exams.</td>
</tr>
<tr>
<td>b. Discuss exam content areas.</td>
</tr>
<tr>
<td>c. Discuss test taking strategies.</td>
</tr>
<tr>
<td>3. Explain clinical simulation exam format.</td>
</tr>
<tr>
<td>a. Complete clinical simulation.</td>
</tr>
<tr>
<td>b. Discuss exam content areas.</td>
</tr>
<tr>
<td>c. Discuss test taking strategies.</td>
</tr>
<tr>
<td>d. Develop case studies.</td>
</tr>
<tr>
<td>e. Develop care plans.</td>
</tr>
<tr>
<td>f. Critique care plans.</td>
</tr>
</tbody>
</table>

STANDARDS

Standards Based on the Commission on Dental Accreditation

DH1 General education content must include oral and written communications, psychology, and sociology.

DH2 Biomedical science content must include content in anatomy, physiology, chemistry, biochemistry, microbiology, immunology, general pathology, nutrition, and pharmacology.

DH3 Dental sciences content must include

DH3A tooth morphology.
DH3B head, neck and oral anatomy,
DH3C oral embryology and histology,
DH3D oral pathology,
DH3E radiography,
DH3F periodontology,
DH3G pain management, and
DH3H dental materials.

DH4 Dental hygiene science content must include
DH4A oral health education and preventive counseling,
DH4B health promotion,
DH4C patient management,
DH4D clinical dental hygiene,
DH4E provision of services for and management of patients with special needs,
DH4F community dental/oral health,
DH4G medical and dental emergencies including basic life support,
DH4H legal and ethical aspects of dental hygiene practice,
DH4I infection and hazard control management, and
DH4J the provision of oral health care services to patients with blood borne infectious diseases.

Related Academic Standards

R1 Interpret Graphic Information (forms, maps, reference sources)
R2 Words in Context (same and opposite meaning)
R3 Recall Information (details, sequence)
R4 Construct Meaning (main idea, summary/paraphrase, compare/contrast, cause/effect)
R5 Evaluate/Extend Meaning (fact/opinion, predict outcomes, point of view)
M1 Addition of Whole Numbers (no regrouping, regrouping)
M2 Subtraction of Whole Numbers (no regrouping, regrouping)
M3 Multiplication of Whole Numbers (no regrouping, regrouping)
M4 Division of Whole Numbers (no remainder, remainder)
M5 Decimals (addition, subtraction, multiplication, division)
M6 Fractions (addition, subtraction, multiplication, division)
M7 Integers (addition, subtraction, multiplication, division)
M8 Percents
M9 Algebraic Operations
A1 Numeration (ordering, place value, scientific notation)
A2 Number Theory (ratio, proportion)
A3 Data Interpretation (graph, table, chart, diagram)
A4 Pre-Algebra and Algebra (equations, inequality)
A5 Measurement (money, time, temperature, length, area, volume)
A6 Geometry (angles, Pythagorean theory)
A7 Computation in Context (whole numbers, decimals, fractions, algebraic operations)
A8 Estimation (rounding, estimation)
L1 Usage (pronoun, tense, subject/verb agreement, adjective, adverb)
L2 Sentence Formation (fragments, run-on, clarity)
L3 Paragraph Development (topic sentence, supporting sentence, sequence)
L4 Capitalization (proper noun, titles)
L5 Punctuation (comma, semicolon)
L6 Writing Conventions (quotation marks, apostrophe, parts of a letter)
S1 Vowel (short, long)
S2 Consonant (variant spelling, silent letter)
S3 Structural Unit (root, suffix)

CAPITALIZED ITEMS

1. Air Polishing Unit (1 per 5 students)
2. Autoclave, Steam (1 per 5 students)
3. Cart, Stainless Steel with Shelves (1 per student)
4. Cleaner, Ultrasonic (1 per 4 students)
5. Computer w/Monitor (1 per 4 students)
6. Dental Chair (1 per operatory)
7. Dental Light (1 per operatory)
8. Film Developer for Daylight (1 per program)
9. Handpiece, Slow Speed (1 per student)
10. Instrument/Handpiece Cart (1 per operatory)
11. Intraoral 35 mm Camera (1 per program)
12. Intraoral Video Camera (1 per program)
13. Light Curing Unit (1 per 2 students)
14. Manikin, X-ray, Adult (1 per x-ray room)
15. Manikin, X-ray, Mixed (1 per x-ray room)
16. Mechanical Spatulator (1 per program)
17. Microscope, Phase w/Monitor (1 per program)
18. OSHA Compliance System (1 per program)
19. Printer, Laser (1 per 2 computers)
20. Probe, Electronic Periodontal (2 per program)
21. Scaler, Sonic (1 per 5 students)
22. Spore Test Incubators (1 per program)
23. Stool, Operator (1 per operatory)
24. Tank, Oxygen (2 per program)
25. Tester, Pulp Vitality (1 per 5 students)
26. Trimmer Model (1 per 5 students)
27. Ultrasonic Scaler (1 per 3 students)
28. Vacuum Forming Machine (1 per program)
29. Vibrator, Dental Office (1 per program)
30. X-ray Automatic Film Processor (1 per program)
31. X-ray Extra-Oral Machine (1 per program)
32. X-ray Pano Apron (1 per x-ray room)
33. X-ray Processing Tanks (1 per program)
34. X-ray Intra-Oral Unit (1 per x-ray room)
35. X-ray View Box (1 per operatory and 1 per x-ray room)
36. Nitrous Oxide Machine (1 per program)
37. Automated External Defibrillator (1 per program)
NON-CAPITALIZED ITEMS

1. Bench Mount (1 per student)
2. Chair Mount (1 per chair)
3. Dentiform (1 per student)
4. Emergency Medical Kit (1 per program)
5. Engine, Bench with Handpiece (1 per 5 students)
6. Film Duplicator (1 per program)
7. Handpiece, High Speed (1 per 3 students)
8. Lathe (1 per 5 students)
9. Screen, Extra-Oral Rare Earth (1 per program)
10. Amalgam Instruments (1 per 5 students)
11. Articulator, Hinged (1 per 5 students)
12. Boley Gauge (2 per program)
13. Bowl, Lab Mixing, Medium (1 per student)
14. Bowl, Lab Mixing, Large (1 per student)
15. Burners (2 per program)
16. Carver, Roach (2 per program)
17. Cassette, Instrument (2 per student)
18. Eye Wash (1 per lab)
19. Holder, Cotton Roll (1 per operatory)
20. Irrigator, Intra-Oral (1 per 5 students)
21. Knife, Lab (1 per student)
22. Mirror, Mouth (2 per student)
23. Mirror, Hand (1 per student)
24. Prophy Angle (1 per student)
25. Slab, Glass Mixing (1 per 3 students)
26. Spatula, Plaster (1 per student)
27. Sphygmomanometer (1 per 2 students and 1 per operatory)
28. Spill Kit (1 per program)
29. Splash Hood with Lucite Shield (1 per lathe)
30. Stethoscope (1 per student)
31. Syringe, Aspirating (1 per 5 students)
32. Thermometer, Digital (1 per operatory)
33. Tray, Impression, Perforated (Maxillary & Mandicular), Small Set (2 per program)
34. Tray, Impression, Perforated (Maxillary & Mandicular), Medium Set (2 per program)
35. Tray, Impression, Perforated (Maxillary & Mandicular), Large Set (2 per program)
36. Ultrasonic Insert #1 (1 per 3 students)
37. Ultrasonic Insert #3 (1 per 3 students)
38. Ultrasonic Insert #7 (1 per 3 students)
39. Ultrasonic Insert #10 (1 per 3 students)
40. Ultrasonic Insert EWPP (1 per 3 students)
41. Ultrasonic Insert PzR (1 per 3 students)
42. Ultrasonic Insert PzL (1 per 3 students)
43. X-ray Apron w/Thyroid Collar, Adult (1 per x-ray room and 1 per program)
44. X-ray Apron w/Thyroid Collar, Pediatric (1 per x-ray room and 1 per program)
45. X-ray Darkroom Light (1 per darkroom)
46. X-ray Film Hanger (1 per student)
47. X-ray Film Holders (1 per 2 students)
48. X-ray PID, 16" (1 per program)
49. X-ray Thermometer, Floating (1 per program)
50. Model, 2.5 x Natural Size Teeth Model (1 per 5 students)
51. Model, Developmental, Newborn (1 per 5 students)
52. Model, Developmental, Child/Adolescent (1 per 5 students)
53. Model, Developmental, Adult (1 per 5 students)
54. Skulls, Plastic Human (1 per 2 students)
55. Skull, Sagittally Sectioned (1 per 2 students)
56. Screen, Projector (1 per program)
57. Model, Malocclusion (1 per 5 students)
58. Stethoscope, Teaching (1 per program)
59. Teeth, Individual Synthetic (6 sets per program)

RECOMMENDED INSTRUCTIONAL AIDS

It is recommended that instructors have access to the following items:

Suggested References (1 per program except where otherwise noted):

American Dental Association regulatory compliance manual. Updated annually by the American Dental Association.

Videos/DVDs (1 per program unless otherwise noted):

OSHA Guidelines
Polishing
Ultrasonic Scaling
Sealants
Fluoride
Extra-oral/Intra-oral
Vital Signs
Instrumentation
Sharpening
Patient Operator Position
Radiology Techniques
Managing Implants

Software (1 per program unless otherwise noted):

Board Review (Published by Saunders)

Slide Sets (1 per program unless otherwise noted):

Atlas of Histology
Basic Human Histology Set
Oral Cavity
Teeth and Their Function
Oral Pathology for the Dental Hygienist
ADA Oral Pathology
Appendix A: 2010 Accreditation Standards for Dental Hygiene Education Programs\(^1\)

DH1 General education content must include oral and written communications, psychology, and sociology.

DH2 Biomedical science content must include content in anatomy, physiology, chemistry, biochemistry, microbiology, immunology, general pathology, nutrition, and pharmacology.

DH3 Dental sciences content must include
   DH3A tooth morphology,
   DH3B head, neck and oral anatomy,
   DH3C oral embryology and histology,
   DH3D oral pathology,
   DH3E radiography,
   DH3F periodontology,
   DH3G pain management, and
   DH3H dental materials.

DH4 Dental hygiene science content must include
   DH4A oral health education and preventive counseling
   DH4B health promotion
   DH4C patient management
   DH4D clinical dental hygiene
   DH4E provision of services for and management of patients with special needs
   DH4F community dental/oral health
   DH4G medical and dental emergencies, including basic life support
   DH4H legal and ethical aspects of dental hygiene practice
   DH4I infection and hazard control management and
   DH4J the provision of oral health care services to patients with blood-borne infectious diseases.

Appendix C: 21st Century Skills

CSS1-21st Century Themes

CS1 Global Awareness
1. Using 21st century skills to understand and address global issues
2. Learning from and working collaboratively with individuals representing diverse cultures, religions, and lifestyles in a spirit of mutual respect and open dialogue in personal, work, and community contexts
3. Understanding other nations and cultures, including the use of non-English languages

CS2 Financial, Economic, Business and Entrepreneurial Literacy
1. Knowing how to make appropriate personal economic choices
2. Understanding the role of the economy in society
3. Using entrepreneurial skills to enhance workplace productivity and career options

CS3 Civic Literacy
1. Participating effectively in civic life through knowing how to stay informed and understanding governmental processes
2. Exercising the rights and obligations of citizenship at local, state, national, and global levels
3. Understanding the local and global implications of civic decisions

CS4 Health Literacy
1. Obtaining, interpreting, and understanding basic health information and services and using such information and services in ways that enhance health
2. Understanding preventive physical and mental health measures, including proper diet, nutrition, exercise, risk avoidance, and stress reduction
3. Using available information to make appropriate health-related decisions
4. Establishing and monitoring personal and family health goals
5. Understanding national and international public health and safety issues

CS5 Environmental Literacy
1. Demonstrate knowledge and understanding of the environment and the circumstances and conditions affecting it, particularly as relates to air, climate, land, food, energy, water and ecosystems
2. Demonstrate knowledge and understanding of society’s impact on the natural world (e.g., population growth, population development, resource consumption rate, etc.)
3. Investigate and analyze environmental issues, and make accurate conclusions about effective solutions
4. Take individual and collective action towards addressing environmental challenges (e.g., participating in global actions, designing solutions that inspire action on environmental issues)

CSS2-Learning and Innovation Skills

CS6 Creativity and Innovation
1. Think Creatively
2. Work Creatively with Others
3. Implement Innovations

CS7 Critical Thinking and Problem Solving
1. Reason Effectively
2. Use Systems Thinking
3. Make Judgments and Decisions
4. Solve Problems

CS8 Communication and Collaboration
1. Communicate Clearly
2. Collaborate with Others

CSS3-Information, Media and Technology Skills

CS9  Information Literacy
1. Access and Evaluate Information
2. Use and Manage Information

CS10 Media Literacy
1. Analyze Media
2. Create Media Products

CS11 ICT Literacy
1. Apply Technology Effectively

CSS4-Life and Career Skills

CS12 Flexibility and Adaptability
1. Adapt to Change
2. Be Flexible

CS13 Initiative and Self-Direction
1. Manage Goals and Time
2. Work Independently
3. Be Self-directed Learners

CS14 Social and Cross-Cultural Skills
1. Interact Effectively with Others
2. Work Effectively in Diverse Teams

CS15 Productivity and Accountability
1. Manage Projects
2. Produce Results

CS16 Leadership and Responsibility
1. Guide and Lead Others
2. Be Responsible to Others
