Ensuring America’s Future by Increasing Latino College Completion  •  www.EdExcelencia.org

LATINO COLLEGE COMPLETION: MISSOURI

For the U.S. to regain the top ranking in the world for college degree attainment, Latinos will need to earn 5.5 million degrees by 2020.

To reach the degree attainment goal by 2020, Missouri can:
1) close the equity gap in college completion;
2) increase the number of degrees conferred; and,
3) scale up programs and initiatives that work for Latino and other students.

The following is a framework for tracking Latino degree attainment in Missouri.

STATE RANKING
Missouri had the 30th largest Latino population in the U.S.1

K-12 POPULATION
In Missouri, 4% of the K-12 population was Latino.2

STATE POPULATION
In Missouri, 4% of the state population was Latino.3 Projections show a continued increase.

MEDIAN AGE
The median age of Latinos in Missouri was 24, compared to 39 for White non-Hispanics.4

DEGREE ATTAINMENT
In Missouri, 23% of Latino adults (25 to 64 years old) had earned an associate degree or higher, compared to 36% of all adults.5

Equity Gap in Degree Completion
Closing the equity gap in college completion can be tracked by the 3 measures provided below. Alone, none of these measures capture the entire “story” of equity in degree completion. However, in combination, they provide a useful picture of the equity gap in degree attainment between Latino and white cohorts in Missouri in a single year (2007-08) and the persistence of the gap over time (2006-08).

Degrees Conferred
Another metric to benchmark college completion is to track the progress of total degrees awarded over time. This measure may be the result of an increase in overall enrollment numbers rather than an increase in rates of completion. From 2005-06 to 2007-08,

- the number of Hispanics who earned an undergraduate degree in Missouri increased about 5% from 2006-08, while all other race/ethnic groups increased 2%.
- among the 50 states, Missouri ranked 37th for the increase in degrees conferred to Latinos over 3 years.

For more information on these metrics, download Benchmarking Latino College Completion to Meet National Goals: 2010 to 2020 and Degrees Conferred to Latinos: 2006-2008 at www.EdExcelencia.org/research/EAF/Benchmarking

Examples of What Works for Latino Students
There are institutions that are showing success in enrolling, retaining, and graduating Latino students. The following are examples of institutional programs across the country with evidence of effectiveness in serving Latino students nominated for Examples of Excelencia.

**Mesa Community College Program – University of California**

The MESA (Mathematics, Engineering, Science Achievement) Community College Program (MCCP) provides academic and social support needed to succeed in science and math, and to transfer to four-year institutions as majors in those fields. A major MCCP initiative is to develop a strong peer Science, Technology, Engineering and Mathematics (STEM) network for its students. As most community college students are commuters (with many holding jobs while attending school and/or shouldering significant family responsibilities), they lack the benefit of the informal connections developed by full-time students residing on campus while attending four-year institutions. Latinos comprise nearly 50% of the students served by MCCP and by MESA. In 2006-07, 467 MCCP students transferred to four-year institutions. Of these students, 95% transferred as majors in STEM fields. Latinos comprised 41% of all transfers. (http://www.ucop.edu/mesa/)

**Graduation Achievement Project – Colorado State University - Pueblo**

GAP integrated services to expedite and ease the return of Latino/Latina students with 90 credits hours or more who left the university in good standing without completing a Bachelors degree. The project coordinator evaluated students’ transcripts to determine the courses to be completed for graduation and then worked closely with each student to complete all necessary forms, a program of study with a timeline, register for face-to-face and/or on-line courses that meet the needs and schedule of each student, contacted faculty when necessary, and essentially acted as a concierge, guiding each student through graduation. CSU Pueblo contacted 375 students who had completed 90 credits or more, of those 88 students enrolled, 40 (46%) completed a degree, 44 (50%) are continuing, and 4 (4%) stopped out.
