Communication Interaction: It Takes Two

By Kathleen Stremel, MA

What is Communication?

Communication is the exchange of a message between two or more people. Everyone communicates in many different ways and for many different reasons.

Communication can be expressive or receptive. Children who are deaf-blind may never learn to talk. However, they can express themselves to you. They can receive the messages you send them.

Through communication, children can make changes in their world. They can express their wants and needs. They can make choices.

Through communication, you can teach your child to play, to learn about the world, to interact with you, to do daily tasks, and to work.

How Can We Increase Communication?

One of the best indicators of a child’s use of effective communication is the rate of communication. What does this mean? The more a child communicates, the better he/she will communicate. How does he communicate more? Children communicate more when they are provided frequent opportunities to communicate. Opportunities to communicate should be included across functional activities and caregiving routines.

Let’s take a look at the functional activities that occur at home or at school. For the younger child, these may be eating, bathing, changing clothes, and playing with a sister or brother. For an older child, these may include swimming, cooking, and working. Providing opportunities and being responsive are two of the most frequent methods to increase a child’s communication.

1. Ask the following questions:

- How many different people interact with your child or your student in a day?
- How many interactions occur in teaching an activity?
- What are the daily activities in which you interact with your child or student?
- How many opportunities to communicate with you does the child have in different activities? None? One? Five? Ten?

2. Notice your child’s actions during functional activities. For example —

<table>
<thead>
<tr>
<th>Functional Activity</th>
<th>Ways Child May Communicate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Eating</td>
<td>Opens mouth for “more.”</td>
</tr>
<tr>
<td>Drinking</td>
<td>Extends cup for “more.”</td>
</tr>
<tr>
<td>Swimming</td>
<td>Raises hand for “out.”</td>
</tr>
<tr>
<td>Dressing</td>
<td>Touches Mom for “help.”</td>
</tr>
<tr>
<td>Working</td>
<td>Signs “More.”</td>
</tr>
<tr>
<td>Transitioning</td>
<td>Says, “Bye.”</td>
</tr>
</tbody>
</table>

- In what ways is your child communicating with you?

3. Make sure every person who interacts with the child knows how he or she receives and sends messages.

Each child will do this in unique ways. It is necessary to stop, watch the child, and read the message.

- Does each person take time to watch and listen to the child?
- Are good records being kept so each caregiver knows what to expect?
Parents and teachers need to work together to do the following:

- Increase the opportunities the child has to communicate.
- Increase the different ways in which the child communicates.
- Increase the different reasons the child has to communicate.
- Increase the number of people, things, and activities the child communicates about.
- Increase your attention to support positive communication attempts.

What Can You Do?

In the following material, we will use the name “Lee” to represent an infant, child, or young adult who is deaf-blind. Think of Lee as your child, or as the student in your classroom.

What can you do for Lee to increase his interactive communication?

1. Interact often with him. Give Lee a chance to understand what you are going to do before you do it. Give Lee a chance to make a choice, or to request “more.”

2. Allow Lee to participate in activities as much as possible.

3. Make sure Lee has a name sign. This may be the first initial of Lee’s name to be worn on Lee’s chest.

4. Make sure that you have a way to identify yourself to him.
   - For Sister, her long braids.
   - For Dad, his beard.
   - For Mom, her rings.
   - For teacher, her short hair.

5. Give Lee an opportunity to communicate with you.

6. Always communicate to Lee what will happen next or where Lee is being taken before the activity or movement takes place.

7. Post an actual example of an interaction in your classroom; so that, everyone (peers, buddies, and all service providers) can follow this.

An Example of Communication Interaction for Lee:

- Approach Lee slowly; let Lee smell or sense your presence.
- Use Lee’s name sign.
- Let Lee know your identification cue, as in Mom’s ring.
- Let Lee know you are going to the car by letting Lee take or feel a set of keys.
- Have Lee open or close the car door.
- Let Lee buy something at the store.
- Help Lee hand the money to the clerk if Lee can’t do this by himself.
- Let Lee know the activity is finished by putting the keys in a box or on a hook.
Communication is Worth the Effort

♦ Learn the most effective ways to express your messages.
♦ Listen and watch in order to receive messages from your child.
♦ Give your child practice in receiving and expressing messages.
♦ Make sure your child’s Individual Education Plan contains both receptive and expressive communication objectives.
♦ Help your child WANT to communicate. Let your child see that communication gives power.
♦ Initially, help your child communicate in the “here and now.”
♦ Communication is a critical self determination skill at all ages.

Additional Resources

DB-LINK has extensive resources on the topic of Communication. Please contact us with your questions about the availability of these or other materials.

A communication skill assessment tool to be used with individuals operating at the earliest stages of communication. This no cost, online version allows the user to enter data on a child and print out a profile and a list of communicative behaviors and intents. A print version is also available. This document is available on the web at: http://www.communicationmatrix.org

Assessment instrument designed to help teachers, educational specialists, speech-language therapists, psychologists, and other service providers evaluate the communication skills of persons with multiple disabilities including severe or profound mental retardation and deafblindness. Available from DB-LINK, (800.438.9376) or info@nationaldb.org.

This material is divided into three segments: Key Concepts, Communication, and Orientation and Mobility. Each of these segments is, in turn, divided into 20 self-contained modules which present essential information about deaf-blindness, how deaf-blindness affects learning, and how students who are deaf-blind can develop critical communication and O&M skills. Available from: AFB Press. Publisher’s web site: http://www.afb.org

Federally funded model demonstration project to investigate and identifying effective tactile strategies for deaf-blind children who also have cognitive or physical disabilities. Outcomes for the project, including tools and strategies, are available online at: http://www.projectsalute.net
Remarkable Conversations: Guide to developing meaningful communication with children and young adults who are deafblind - Miles, Barbara (Ed.); Riggio, Marianne (Ed.) Perkins School for the Blind: 1999, 308.

A practical guide for teachers, family members or other service providers playing a role in the life of a child who is deafblind. Good communication is emphasized and illustrated with stories that are based on positive, real experiences. Available from Perkins School for the Blind. Telephone: (617) 972-7328; fax: (617)972-7334.

This set of 24 instructional videos covers all aspects of communication and demonstrates techniques including: signals, turn-taking, active vs. passive, and choice-making. Available from HOPE, Inc., phone/fax: (435) 752-9533; http://www.hopepubl.com
