# Highlights From TIMSS 2011 

Mathematics and Science Achievement of U.S. Fourthand Eighth-Grade Students in an International Context

Appendix E: Standard Error Tables

DECEMBER 2012

Table E-1. Standard errors for table 3: Average mathematics scores of 4th-grade students, by education system: 2011

| Grade 4 |  |  | Grade 4 |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Education system | Average | s.e. | Education system | Average | s.e. |
| TIMSS scale average | 500 | 0.0 | New Zealand | 486 | 2.6 |
| Singapore ${ }^{1}$ | 606 | 3.2 | Spain | 482 | 2.9 |
| Korea, Rep. of | 605 | 1.9 | Romania | 482 | 5.8 |
| Hong Kong-CHN ${ }^{1}$ | 602 | 3.4 | Poland | 481 | 2.2 |
| Chinese Taipei-CHN | 591 | 2.0 | Turkey | 469 | 4.7 |
| Japan | 585 | 1.7 | Azerbaijan ${ }^{1,5}$ | 463 | 5.8 |
| Northern Ireland-GBR ${ }^{2}$ | 562 | 2.9 | Chile | 462 | 2.3 |
| Belgium (Flemish)-BEL | 549 | 1.9 | Thailand | 458 | 4.8 |
| Finland | 545 | 2.3 | Armenia | 452 | 3.5 |
| England-GBR | 542 | 3.5 | Georgia ${ }^{3,5}$ | 450 | 3.7 |
| Russian Federation | 542 | 3.7 | Bahrain | 436 | 3.3 |
| United States ${ }^{1}$ | 541 | 1.8 | United Arab Emirates | 434 | 2.0 |
| Netherlands ${ }^{2}$ | 540 | 1.7 | Iran, Islamic Rep. of | 431 | 3.5 |
| Denmark ${ }^{1}$ | 537 | 2.6 | Qatar ${ }^{1}$ | 413 | 3.5 |
| Lithuania ${ }^{1,3}$ | 534 | 2.4 | Saudi Arabia | 410 | 5.3 |
| Portugal | 532 | 3.4 | Oman ${ }^{6}$ | 385 | 2.9 |
| Germany | 528 | 2.2 | Tunisia ${ }^{6}$ | 359 | 3.9 |
| Ireland | 527 | 2.6 | Kuwait ${ }^{3,7}$ | 342 | 3.4 |
| Serbia ${ }^{1}$ | 516 | 3.0 | Morocco ${ }^{7}$ | 335 | 4.0 |
| Australia | 516 | 2.9 | Yemen ${ }^{7}$ | 248 | 6.0 |
| Hungary | 515 | 3.4 |  |  |  |
| Slovenia | 513 | 2.2 | Benchmarking |  |  |
| Czech Republic | 511 | 2.4 | education systems |  |  |
| Austria | 508 | 2.6 | North Carolina-USA ${ }^{1,3}$ | 554 | 4.2 |
| Italy | 508 | 2.6 | Florida-USA ${ }^{3,8}$ | 545 | 2.9 |
| Slovak Republic | 507 | 3.8 | Quebec-CAN | 533 | 2.4 |
| Sweden | 504 | 2.0 | Ontario-CAN | 518 | 3.1 |
| Kazakhstan ${ }^{1}$ | 501 | 4.5 | Alberta-CAN ${ }^{1}$ | 507 | 2.5 |
| Malta | 496 | 1.3 | Dubai-UAE | 468 | 1.6 |
| Norway ${ }^{4}$ | 495 | 2.8 | Abu Dhabi-UAE | 417 | 4.6 |
| Croatia ${ }^{1}$ | 490 | 1.9 |  |  |  |

${ }^{1}$ National Defined Population covers 90 percent to 95 percent of National Target Population (see appendix A).
${ }^{2}$ Met guidelines for sample participation rates only after replacement schools were included.
${ }^{3}$ National Target Population does not include all of the International Target Population (see appendix A).
${ }^{4}$ Nearly satisfied guidelines for sample participation rates after replacement schools were included.
${ }^{5}$ Exclusion rates for Azerbaijan and Georgia are slightly underestimated as some conflict zones were not covered and no official statistics were available.
${ }^{6}$ The TIMSS \& PIRLS International Study Center has reservations about the reliability of the average achievement score because the percentage of students with achievement too low for estimation exceeds 15 percent, though it is less than 25 percent.
${ }^{7}$ The TIMSS \& PIRLS International Study Center has reservations about the reliability of the average achievement score because the percentage of students with achievement too low for estimation exceeds 25 percent.
${ }^{8}$ National Defined Population covers less than 90 percent, but at least 77 percent, of the National Target Population (see appendix A).
NOTE: Education systems are ordered by 2011 average score. Italics indicate participants identified and counted in this report as an education system and not as a separate country. Participants that did not administer TIMSS at the target grade are not shown; see the international report for their results. All U.S. state data are based on public school students only. Standard error is noted by s.e.

## — Not available. <br> $\dagger$ Not applicable.

\# Rounds to zero.
${ }^{1}$ The change in average score is calculated by subtracting the 2007 or 1995 estimate, respectively, from the 2011 estimate using unrounded numbers.
${ }^{2}$ National Defined Population covers 90 percent to 95 percent of National Target Population for 2011 (see appendix A).
${ }^{3}$ Met guidelines for sample participation rates only after replacement schools were included for 2011.
${ }^{4}$ National Target Population does not include all of the International Target Population for 2011 (see appendix A).
${ }^{5}$ Nearly satisfied guidelines for sample participation rates after replacement schools were included for 2011.
${ }^{6}$ Exclusion rates for Azerbaijan and Georgia are slightly underestimated as some conflict zones were not covered and no official statistics were available for 2011.
${ }^{7}$ The TIMSS \& PIRLS International Study Center has reservations about the reliability of the average achievement score because the percentage of students with achievement too low for estimation for 2011 exceeds 15 percent, though it is less than 25 percent.
NOTE: Education systems are ordered by 2011 average scores. Italics indicate participants identified and counted in this report as an education system and not as a separate country. Data are not shown for some education systems because comparable data from previous cycles are not available. Participants that did not administer TIMSS at the target grade are not shown; see the international report for their results. All U.S. state data are based on public school students only.
For 1995, Korea, Portugal, Ontario-CAN had National Defined Population covering 90 to 95 percent of National Target Population; England-GBR had National Defined Population that covered less than 90 percent of National Target Population (but at least 77 percent) and met guidelines for sample participation rates only after replacement schools were included; Netherlands, Australia, and Austria did not satisfy guidelines for sample participation rates. For 2007, the United States, Quebec-CAN, Ontario-CAN, and Alberta -CAN had National Defined Population covering 90 to 95 percent of National Target Population; the United States and Denmark met guidelines for sample participation rates only after replacement schools were included; the Netherlands and Dubai-UAE nearly satisfied guidelines for sample participation rates after replacement schools were included; Georgia had a National Target Population that did not include all of the International Target Population; Dubai-UAE tested the same cohort of students as other countries, but later in the assessment year at the beginning of the next school year. Standard error is noted by s.e.

${ }^{1}$ National Defined Population covers 90 percent to 95 percent of National Target Population (see appendix A).
${ }^{2}$ National Defined Population covers less than 90 percent, but at least 77 percent, of the National Target Population.
${ }^{3}$ Nearly satisfied guidelines for sample participation rates after replacement schools were included.
${ }^{4}$ National Target Population does not include all of the International Target Population (see appendix A).
${ }^{5}$ Exclusion rates for Azerbaijan and Georgia are slightly underestimated as some conflict zones were not covered and no official statistics were available.
${ }^{6}$ The TIMSS \& PIRLS International Study Center has reservations about the reliability of the average achievement score because the percentage of students with achievement too low for estimation exceeds 15 percent, though it is less than 25 percent.
${ }^{7}$ The TIMSS \& PIRLS International Study Center has reservations about the reliability of the average achievement score because the percentage of students with achievement too low for estimation exceeds 25 percent.
NOTE: Education systems are ordered by 2011 average score in number domain. Italics indicate participants identified and counted in this report as an education system and not as a separate country. Participants that did not administer TIMSS at the target grade are not shown; see the international report for their results. All U.S. state data are based on public school students only. Standard error is noted by s.e.
SOURCE: International Association for the Evaluation of Educational Achievement (IEA), Trends in International Mathematics and Science Study (TIMSS), 2011.

\# Rounds to zero.
${ }^{1}$ National Defined Population covers 90 percent to 95 percent of National Target Population (see appendix A).
${ }^{2}$ Met guidelines for sample participation rates only after replacement schools were included.
${ }^{3}$ National Target Population does not include all of the International Target Population (see appendix A).
${ }^{4}$ Exclusion rates for Azerbaijan and Georgia are slightly underestimated as some conflict zones were not covered and no official statistics were available.
${ }^{5}$ Nearly satisfied guidelines for sample participation rates after replacement schools were included.
${ }^{6}$ The TIMSS \& PIRLS International Study Center has reservations about the reliability of the average achievement score because the percentage of students with achievement too low for estimation exceeds 15 percent, though it is less than 25 percent.
${ }^{7}$ The TIMSS \& PIRLS International Study Center has reservations about the reliability of the average achievement score because the percentage of students with achievement too low for estimation exceeds 25 percent.
${ }^{8}$ National Defined Population covers less than 90 percent, but at least 77 percent, of the National Target Population (see appendix A).
NOTE: Education systems are ordered by percentage at Advanced international benchmark. Italics indicate participants identified and counted in this report as an education system and not as a separate country. The TIMSS international median represents all participating TIMSS education systems, including the United States, shown in the main part of the figure; benchmarking education systems are not included in the median. Participants that did not administer TIMSS at the target grade are not shown; see the international report for their results. All U.S. state data are based on public school students only. Standard error is noted by s.e.

\# Rounds to zero.
${ }^{1}$ The TIMSS \& PIRLS International Study Center has reservations about the reliability of the average achievement score because the percentage of students with achievement too low for estimation exceeds 25 percent.
${ }^{2}$ The TIMSS \& PIRLS International Study Center has reservations about the reliability of the average achievement score because the percentage of students with achievement too low for estimation exceeds 15 percent, though it is less than 25 percent.
${ }^{3}$ National Defined Population covers 90 percent to 95 percent of National Target Population (see appendix A).
${ }^{4}$ National Target Population does not include all of the International Target Population (see appendix A).
${ }^{5}$ Exclusion rates for Georgia are slightly underestimated as some conflict zones were not covered covered and no official statistics were available.
${ }^{6}$ Nearly satisfied guidelines for sample participation rates after replacement schools were included.
${ }^{7}$ National Defined Population covers less than 90 percent, but at least 77 percent, of the National Target Population (see appendix A).
NOTE: Education systems are ordered by male-female difference in average score. Italics indicate participants identified and counted in this report as an education system and not as a separate country. Participants that did not administer TIMSS at the target grade are not shown; see the international report for their results. All U.S. state data are based on public school students only. Standard error is noted by s.e. SOURCE: International Association for the Evaluation of Educational Achievement (IEA), Trends in International Mathematics and Science Study (TIMSS), 2011.

Table E-11. Standard errors for figure 7: Average mathematics scores of U.S. 4th- and 8th-grade students, by race/ ethnicity: 2011

| Race/ethnicity | Grade 4 |  | Grade 8 |  |
| :---: | :---: | :---: | :---: | :---: |
|  | Average score | s.e. | Average score | s.e. |
| White | 559 | 2.1 | 530 | 2.8 |
| Black | 489 | 3.4 | 465 | 4.1 |
| Hispanic | 520 | 2.3 | 485 | 3.2 |
| Asian | 583 | 5.7 | 568 | 7.8 |
| Multiracial | 554 | 5.0 | 513 | 4.5 |

NOTE: Reporting standards were not met for American Indian/Alaska Native and Native Hawaiian/Other Pacific Islander. Black includes African American, Hispanic includes Latino, and Asian includes Pacific Islander and Native Hawaiian. Racial categories exclude Hispanic origin. Students who identified themselves as being of Hispanic origin were classified as Hispanic, regardless of their race. Although data for some race/ ethnicities are not shown separately because the reporting standards were not met, they are included in the U.S. and state totals shown throughout the report. See appendix A in this report for more information. Standard error is noted by s.e.

\# Rounds to zero.
${ }^{1}$ The change in average score is calculated by subtracting the 2007 or 1995 estimate, respectively, from the 2011 estimate using unrounded numbers.
${ }^{2}$ National Defined Population covers 90 to 95 percent of National Target Population for 2011 (see appendix A).
${ }^{3}$ Met guidelines for sample participation rates only after replacement schools were included for 2011.
${ }^{4}$ National Target Population does not include all of the International Target Population for 2011 (see appendix A).
${ }^{5}$ Nearly satisfied guidelines for sample participation rates after replacement schools were included for 2011.
${ }^{6}$ Exclusion rates for Azerbaijan and Georgia are slightly underestimated as some conflict zones were not covered and no official statistics were available for 2011.
${ }^{7}$ The TIMSS \& PIRLS International Study Center has reservations about the reliability of the average achievement score because the percentage of students with achievement too low for estimation exceeds 15 percent, though it is less than 25 percent for 2011.
NOTE: Education systems are ordered by 2011 average scores. Italics indicate participants identified and counted in this report as an education system and not as a separate country. All education systems met international sampling and other guidelines in 2011, except as noted. Data are not shown for some education systems because comparable data from previous cycles are not available. Participants that did not administer TIMSS at the target grade are not shown; see the international report for their results. All U.S. state data are based on public school students only. For 1995, Korea, Portugal, and Ontario-CAN had National Defined Population covering 90 to 95 percent of National Target Population; England-GBR had National Defined Population that covered less than 90 percent of National Target Population (but at least 77 percent); England-GBR, Netherlands, Australia, and Austria did not satisfy guidelines for sample participation rates. For 2007, the United States, Quebec-CAN, Ontario-CAN, and Alberta-CAN had National Defined Population covering 90 to 95 percent of National Target Population; the United States and Denmark met guidelines for sample participation rates only after replacement schools were included; the Netherlands and Dubai-UAE nearly satisfied guidelines for sample participation rates after replacement schools were included; Georgia had a National Target Population that did not include all of the International Target Population; Dubai-UAE tested the same cohort of students as other countries, but later in the assessment year at the beginning of the next school year. Standard error is noted by s.e.

| Abu Dhabi-UAE | 2 | 0.3 | 10 | 0.9 | 30 | 1.9 | 55 | 2.1 |

\# Rounds to zero.
${ }^{1}$ National Defined Population covers 90 to 95 percent of National Target Population (see appendix A).
${ }^{2}$ Met guidelines for sample participation rates only after replacement schools were included.
${ }^{3}$ National Target Population does not include all of the International Target Population (see appendix A).
${ }^{4}$ Exclusion rates for Azerbaijan and Georgia are slightly underestimated as some conflict zones were not covered and no official statistics were available.
${ }^{5}$ Nearly satisfied guidelines for sample participation rates after replacement schools were included.
${ }^{6}$ The TIMSS \& PIRLS International Study Center has reservations about the reliability of the average achievement score because the percentage of students with achievement too low for estimation exceeds 15 percent, though it is less than 25 percent.
${ }^{7}$ The TIMSS \& PIRLS International Study Center has reservations about the reliability of the average achievement score because the percentage of students with achievement too low for estimation exceeds 25 percent.
${ }^{8}$ National Defined Population covers less than 90 percent, but at least 77 percent of National Target Population (see appendix A).
NOTE: Education systems are ordered by percentage at Advanced international benchmark. Italics indicate participants identified and counted in this report as an education system and not as a separate country. The TIMSS international median represents all participating TIMSS education systems, including the United States. The TIMSS international median represents all participating TIMSS education systems, including the United States, shown in the main part of the figure; benchmarking education systems are not included in the median. Participants that did not administer TIMSS at the target grade are not shown; see the international report for their results. All U.S. state data are based on public school students only. Standard error is noted by s.e.

\# Rounds to zero.
${ }^{1}$ National Defined Population covers 90 to 95 percent of National Target Population (see appendix A).
${ }^{2}$ Nearly satisfied guidelines for sample participation rates after replacement schools were included.
${ }^{3}$ National Defined Population covers less than 90 percent, but at least 77 percent of National Target Population (see appendix A).
${ }^{4}$ National Target Population does not include all of the International Target Population (see appendix A).
${ }^{5}$ Exclusion rates for Georgia are slightly underestimated as some conflict zones were not covered and no official statistics were available.
${ }^{6}$ The TIMSS \& PIRLS International Study Center has reservations about the reliability of the average achievement score because the percentage of students with achievement too low for estimation exceeds 15 percent, though it is less than 25 percent.
NOTE: Education systems are ordered by percentage at Advanced international benchmark. Italics indicate participants identified and counted in this report as an education system and not as a separate country. The TIMSS international median represents all participating TIMSS education systems, including the United States, shown in the main part of the figure; benchmarking education systems are not included in the median. Participants that did not administer TIMSS at the target grade are not shown; see the international report for their results. All U.S. state data are based on public school students only. Standard error is noted by s.e.

    $\dagger$ Not applicable.
    \# Rounds to zero.
    ${ }^{1}$ The change in average score is calculated by subtracting the 2007 or 1995 estimate, respectively, from the 2011 estimate using unrounded numbers.
    ${ }^{2}$ National Defined Population covers 90 to 95 percent of National Target Population for 2011 (see appendix A).
    ${ }^{3}$ Nearly satisfied guidelines for sample participation rates after replacement schools were included for 2011.
    ${ }^{4}$ National Target Population does not include all of the International Target Population for 2011 (see appendix A).
    ${ }^{5}$ Exclusion rates for Georgia are slightly underestimated as some conflict zones were not covered and no official statistics were available for 2011.
    ${ }^{6}$ The TIMSS \& PIRLS International Study Center has reservations about the reliability of the average achievement score because the percentage of students with achievement too low for estimation for 2011 exceeds 15 percent, though it is less than 25 percent.
    NOTE: Education systems are ordered by 2011 average scores. Italics indicate participants identified and counted in this report as an education system and not as a separate country. Data are not shown for some education systems because comparable data from previous cycles are not available. Participants that did not administer TIMSS at the target grade are not shown; see the international report for their results. All U.S. state data are based on public school students only. For 1995, Lithuania's National Target Population did not include all of the International Target Population; the Russian Federation and Lithuania had a National Defined Population that covered 90 to 95 percent of National Target Population; England-GBR had a National Defined Population that covered less than 90 percent of National Target Population (but at least 77 percent); the United States, England-GBR, and Minnesota-USA met guidelines for sample participation rates only after replacement schools were included. For 2007, Lithuania, Georgia, and Indonesia had National Target Populations that did not include all of the International Target Population; Massachusetts-USA, Quebec-CAN, and Ontario-CAN had National Defined Population that covered 90 to 95 percent of National Target Population; Hong Kong-CHN, England-GBR, and Minnesota-USA met guidelines for sample participation rates only after replacement schools were included; Dubai-UAE nearly satisfied guidelines for sample participation rates after replacement schools were included. Detail may not sum to totals because of rounding. Standard error is noted by s.e.
