**43rd Annual Survey Report on
State-Sponsored Student Financial Aid**

**2011-2012
Academic Year**

**National Association of State
Student Grant and Aid Programs**

About NASSGAP and this Report

The National Association of State Student Grant and Aid Programs (NASSGAP) is dedicated to the promotion, strengthening, encouragement, and enhancement of high standards in the administration and operation of student grant and aid programs, in order that these programs be available to students in all states to expand and further their postsecondary educational opportunities.

NASSGAP serves as a forum for the development and exchange of information, ideas, policy positions, procedures, and needs for student financial assistance for the benefit of member agencies and other organizations. NASSGAP also acts as a collective voice of reasoned opinion before state, regional, and national councils with respect to student financial aid programs.

NASSGAP conducts research, publishes reports, holds conferences, and otherwise engages in activities which help existing student aid programs to become more responsive to federal, regional, and state public policy goals and objectives.

Each year, NASSGAP completes a survey regarding state-funded expenditures for postsecondary student financial aid. This report, the 43rd annual survey, represents data from academic year 2011-12. Please note row and column data in the tables may not add to row and column table totals throughout the report due to rounding.

Comments, suggestions, or questions concerning this report may be directed to NASSGAP at 202.721.1186 or nassgapsurvey@nassgap.org.

Electronic Resources

NASSGAP's Web site is www.nassgap.org. The site has many elements of interest to student aid policymakers and researchers including position papers and an online library (www.nassgap.org/Library) of student aid research. Electronic copies of this report, and reports from several previous years, are available in PDF format free of charge at the site.

An online query tool that will allow for customized queries of survey data is available at: www.nassgap.org/customquery.

A State Data Quick Check tool which shows expenditures by programs for a selected year is available at: www.nassgap.org/survey/state_data_check.asp.

A PDF version of the this year's survey instrument is available at: www.nassgap.org/survey/NASSGAP_Survey_Instrument_2011-12.pdf.

An explanation of the terms used in the survey and a copy of the survey instrument are available on the NASSGAP web site.

Executive Summary

Is college relevant? Even with financial aid, a college education is expensive. Many students proceeding to college directly from secondary schools seem completely unprepared to do college level work. Many no longer seem to value educational exploration and the four-year, residential college "experience." Students coming from the workplace or studying online don't seem to want to complete general education requirements and are looking for courses immediately and directly applicable to either getting a job or keeping their current one. Graduates trying to get by in today's economy with a large amount of student debt can have limited choices.

Higher education must adapt to this changing customer base. We really have no choice. The facts remain that as a whole, college graduates still make more contributions to society than those with less education. The need for college educated persons in the work force and in society continues. Solving the current problems facing postsecondary education (tuition costs placing many schools simply out of reach for a majority of students, a lack of state revenue to support college operations, employer pressure to potentially over-narrow the college curriculum, a student/teacher/administration/alumni relationship that doesn't result in fundamental skills acquisition or completion rates acceptable to many) may not be easy, but in general the problems the planet faces aren't getting any easier and we need all the college educated help we can get.

This report provides data regarding state-funded expenditures for student financial aid and illustrates the extent of efforts made by the states to assist postsecondary students. Information in this report is based on academic year 2011-12 data from the 43rd Annual National Association of State Student Grant and Aid Programs (NASSGAP) survey.

Data Highlights

- In the 2011-12 academic year, the states awarded about \$11.1 billion in total state funded student financial aid, an increase of about .7 percent in nominal terms, but a decrease of 0.7 percent in constant dollar terms from the \$11 billion in aid awarded in 2010-11.
- The majority of state aid remains in the form of grants. In 2011-12, almost 4.2 million grant awards were made representing about \$9.4 billion in need and nonneed-based grant aid. This represents an increase of about 1.7 percent from the \$9.2 billion in grants awarded in 2010-11. Of the grant money awarded in 2011-12, 74 percent was need-based and 26 percent was nonneed-based, a notable increase in the percentage of need-based aid from previous years.
- Funding for undergraduate need-based grant aid increased nationwide from about \$6.4 billion in 2010-11 to about \$6.8 billion in 2011-12, an increase of 6 percent. In nominal terms
- Eight states (California, New York, Texas, Pennsylvania, Illinois, New Jersey, Washington and North Carolina) collectively awarded about \$4.8 billion in undergraduate need-based grant aid, accounting for about 70 percent of all aid of this type.
- States provided about \$1.7 billion in nongrant student aid, including loans, loan assumptions, conditional grants, work-study, and tuition waivers, down almost 4 percent from last year. Loans and tuition waivers accounted for 76 percent of nongrant funds awarded.

Most states reported state-funded undergraduate programs with a need component, however, four states reported no need based aid programs. Twenty six states identified undergraduate programs which made awards based only on merit. Exclusively need-based aid constituted 47 percent of all aid to undergraduates, exclusively merit-based aid accounted for 19 percent, with the rest, 34 percent, accounted for by other programs and by programs with both need and merit components. The amount of undergraduate aid awarded in 2011-12 through programs with a merit component remained level at about \$3.9 billion. This compares to \$4.7 billion awarded to undergraduates through programs based only on need.

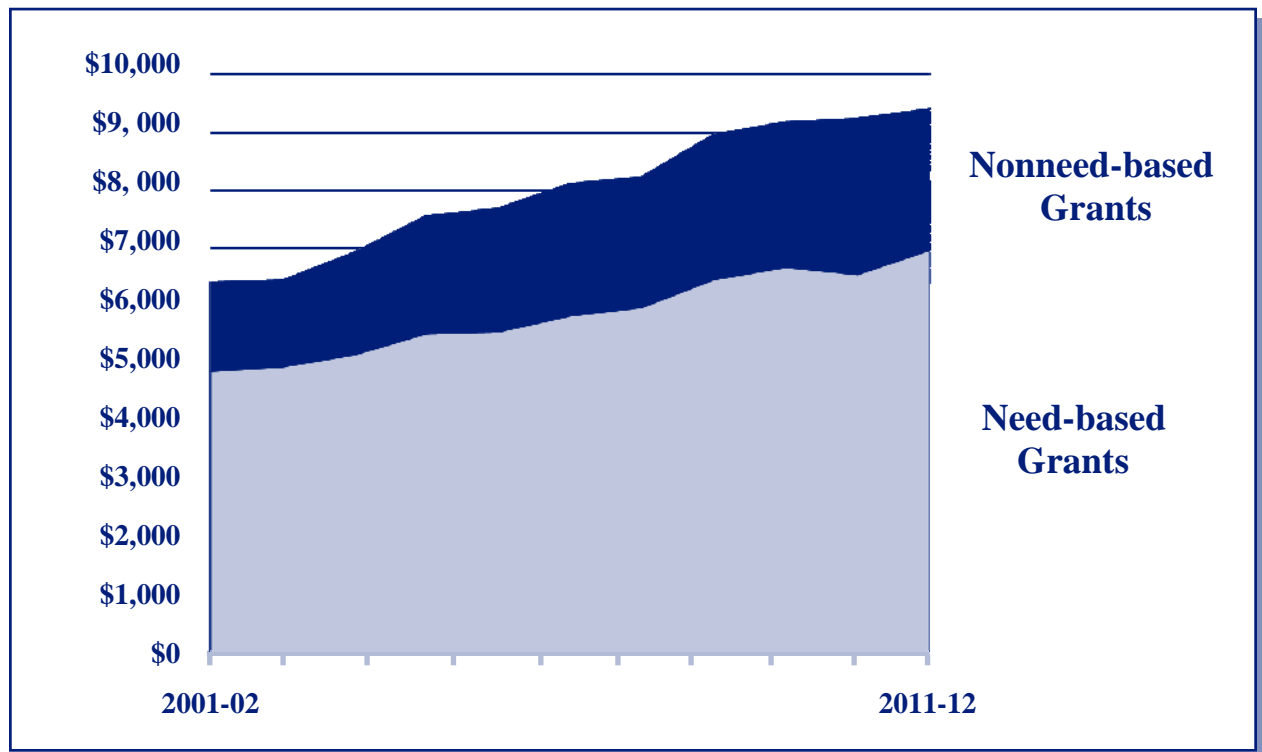

South Carolina, Tennessee, Georgia, and Washington DC provided the greatest amount of grant aid on a per capita basis. South Carolina, Georgia, and Tennessee provided the most undergraduate grant dollars compared to undergraduate full time equivalent enrollment. South Carolina, Tennessee, Pennsylvania, Vermont, and Washington had the highest proportion of total expenditures for state-funded grants compared to State fiscal support for higher education.
