Teacher Satisfaction With Salary and Current Job

The Teacher Questionnaire was administered as part of the 2015–16 National Teacher and Principal Survey (NTPS), which is a nationally representative sample survey of public K–12 schools, principals, and teachers in the 50 states and the District of Columbia.

Are public school teachers satisfied with their teaching salary, and does this vary by school and teacher characteristics?

Public school teachers were asked how much they agreed or disagreed with the statement “I am satisfied with my teaching salary” (strongly agree; somewhat agree; somewhat disagree; strongly disagree). Overall, 45 percent of teachers agreed that they were satisfied with their salary, and 55 percent disagreed (figure 1).

Similar percentages of teachers at traditional public (45 percent) and charter schools (46 percent) agreed they were satisfied with their salary.

A lower percentage of teachers in rural schools agreed they were satisfied with their salary than teachers in city, suburban, and town schools (42 percent compared to 44, 47, and 46 percent, respectively). A lower percentage of teachers in city schools agreed they were satisfied than teachers in suburban schools.

A lower percentage of teachers of elementary grades (43 percent) agreed they were satisfied with their salary than teachers of secondary grades (48 percent).

A higher percentage of teachers who were a member of a teachers’ union or an employee association similar to a union (49 percent) agreed they were satisfied.

How does public school teachers’ satisfaction with their jobs vary by their satisfaction with their salary?

Public school teachers were asked to what extent they agreed or disagreed (strongly agree; somewhat agree; somewhat disagree; strongly disagree) with various statements about their current job. A higher percentage of teachers who were satisfied with their salaries agreed, “The teachers at this school like being here; I would describe us as a satisfied group,” than teachers who were dissatisfied with their salaries (82 percent compared to 70 percent). Similarly, a higher percentage of teachers who were satisfied with their salaries agreed, “I like the way things are run at this school” (80 percent compared to 67 percent) (figure 2).

A higher percentage of teachers who were dissatisfied with their salaries agreed, “The stress and disappointments involved in teaching at this school aren’t really worth it” (30 percent), “If I could get a higher paying job I’d leave teaching as soon as possible” (45 percent), “I think about transferring to another school” (38 percent), “I don’t seem to have as much enthusiasm now as I did when I began teaching” (37 percent), and “I think about staying home from school because I’m just too tired to go” (31 percent) than teachers who were satisfied with their salary (18 percent, 23 percent, 23 percent, 37 percent, and 19 percent, respectively).
