Demand for MBA and Business Master’s Programs: Insights on Candidate Decision Making

Supplemental Report

mba.com Prospective Students Survey 2019

April 2019
Demand for MBA and Business Master’s Programs: Insights on Candidate Decision Making Supplemental Report, mba.com

Prospective Students Survey 2019 is a product of the Graduate Management Admission Council (GMAC), a global, mission-driven association of 223 leading graduate business schools. Founded in 1953, we are actively committed to advancing the art and science of admissions by convening and representing the industry and offering best-in-class products and services for schools and students. GMAC owns and administers the Graduate Management Admission Test™ (GMAT™) exam, used by more than 7,000 graduate programs worldwide. Other GMAC assessments include the NMAT by GMAC™ exam, for entrance into graduate management programs in India, South Africa, and the Philippines, and the Executive Assessment, specifically designed for Executive MBA programs around the world. The Council is based in the United States with offices in the United Kingdom, India, and China.

Introduction

Nearly 10,000 mba.com registrants worldwide responded to the mba.com Prospective Students Survey in 2018

Each month, the Graduate Management Admission Council (GMAC) surveys a random sample of individuals who three months prior registered on mba.com—the GMAC™ website for prospective graduate business students. Their survey responses provide an inside look into the decision-making process of people currently considering applying to a graduate business school program. The findings detailed in this supplemental report are based on responses from a total of 9,617 individuals surveyed between January and December 2018.

Survey respondents represent demand for various MBA and business master’s program categories, including full-time MBA, professional MBA, executive MBA, and business master’s programs. Each program category contains specific program types. For example, full-time MBA programs include full-time one-year and full-time two-year MBA programs. Professional MBA programs include part-time, flexible, and online MBA programs. Business master’s programs include Master in Management, Master of Finance, Master of Data Analytics, and Master of Accounting, among others.

This report—a supplement to the Demand for MBA and Business Master’s Programs: Insights on Candidate Decision Making Summary Report—provides detailed breakdowns of 2018 candidate survey responses by a number of variables of interest to school professionals, including by program type, candidate country of citizenship and residence, and candidate preferred study destination.

About the Data

The results of this survey do not necessarily reflect a statistically representative sample of the global prospective student population. Rather, the results reflect responses from prospective students who register on mba.com. Because of this limitation, the results of this research study should not be used to generalize about the global prospective student population, but rather the mba.com registrant population.

Explore and Filter the Data for Yourself

An Interactive Data Research Tool accompanies the mba.com Prospective Students Survey 2019. Available exclusively to school professionals at GMAT™ score-accepting institutions, the tool allows users to customize data searches by multiple survey response variables, such as candidate segment, citizenship/residence, gender, age, preferred program type, and more. Access it with your gmac.com login at:

www.gmac.com/prospectivestudents.

Business School Participation in GMAC Research

GMAC Research offers graduate business schools opportunities to gather data and generate insights about the business school pipeline.

Schools can sign up to participate in the GMAC Application Trends Survey and Corporate Recruiters Survey on our survey sign-up page:

www.gmac.com/surveyssignup.
Program Specific Analyses

This section features data by program type, including:

• Candidate consideration and preference for the program type
• Candidate consideration of the program type by demographics, including gender, age, world region of residence, and undergraduate major
• First business school decision among candidates considering the program type
• Ranking of factors in the school selection decision among candidates considering the program type
