

## MEMORANDUM

April 10, 2015

TO: School Board Members

FROM: Terry B. Grier, Ed.D.  
Superintendent of Schools

SUBJECT: **STATE COMPENSATORY EDUCATION REPORT**

CONTACT: Carla Stevens, 713-556-6700

Attached is the State Compensatory Education report for the 2013–2014 school year. The State Compensatory Education (SCE) program is designed to reduce dropout rates and increase academic performance of students identified as being at-risk of dropping out of school. SCE operates as a funding source to supplement instructional services and offer academic support to students who meet the SCE at-risk criteria established by the state. Funds allocated under SCE law are to be channeled toward programs and services that eliminate disparities in performance on assessment instruments administered under Subchapter B, Chapter 39.

Some of the highlights are as follows:

- Of the 211,552 students attending HISD, 69 percent were identified as being at-risk according to SCE criteria.
- Districtwide, on the 2014 English language STAAR, the gaps in the percentage of students meeting the satisfactory standard between not at-risk and at-risk students were 38 percentage points in reading, 33 percentage points in mathematics, 39 percentage points in writing, 42 percentage points in science, and 47 percentage points in social studies. The gaps increased in all subjects from 2013 to 2014.
- Districtwide, on the 2014 STAAR EOC, the gaps in the percent of not at-risk and at-risk students who met the satisfactory standard ranged from 14 percentage points in U.S. History to 53 percentage points in English I. The gap in Algebra I performance increased from 2013 to 2014, while the gap in Biology decreased.
- For the class of 2013, 89.9 percent of not at-risk students and 74.5 percent of at-risk students graduated from HISD. The completion rate (which includes graduates, continuers and GED recipients) for not at-risk students was 93.1 percent and the at-risk rate was 85.4 percent. The gaps between the two groups increased from 2012 to 2013 for both graduation and completion rates.
- In general, the 2014 English STAAR and STAAR EOC results indicate that passing rates of students who received and/or participated in various SCE programs and services did not exceed the passing rates of all at-risk students in the district, with the following exceptions: JJAEP students on the English STAAR Writing and students who received pregnancy-related services on the English STAAR Reading and English II EOC exam.

Should you have any questions, please contact my office or Carla Stevens in the Research and Accountability Department at 713-556-6700.

# AN EVALUATION OF STATE COMPENSATORY EDUCATION 2013–2014

## Executive Summary

### Program Description

The State Compensatory Education (SCE) program is designed to reduce dropout rates and increase academic performance of students identified as being at-risk of dropping out of school. SCE operates as a funding source to supplement instructional services and offer academic support to students who meet the SCE at-risk criteria established by the state. Funds allocated under SCE law are to be channeled toward programs and services that eliminate disparities in performance on assessment instruments administered under Subchapter B, Chapter 39. Further, programs designated for SCE funding should reduce disparities in the rates of high school completion between students who are at-risk of dropping out of school and all other students. The Stanford 10 and Aprenda 3 served as the assessment measures for grades 1 and 2, the State of Texas Assessments of Academic Readiness (STAAR) served as the state assessment measures for grades 3 through 8, STAAR End-of-Course (EOC) served as the state assessment measures for grades 9 through 11 for the 2013–2014 school year. In order for SCE funds to be allocated to a campus, the campus must not only meet the state criteria for percent of students at-risk of dropping out of school, but the services provided to students must also be described in the district and/or campus improvement plan.

As defined by law, SCE programs and/or services are designed to supplement the regular education program that districts offer to students and funds must provide additional support for at-risk students. Supplemental costs include costs for program and student evaluation, instructional materials and equipment and other supplies required for quality instruction, supplemental staff expenses, salary for teachers of at-risk students, smaller class sizes, and individualized instruction (TEC §42.152(c)).

### Program Cost and Funding Source

The annual budget for SCE programs in HISD for the 2013–2014 academic year was \$127,965,710. This figure included \$54,365,832 of supplemental campus-based funds. These amounts are budgeted amounts and not final expenditures for 2013–2014.

### Highlights

- Of the 211,552 students attending HISD, 145,254 students (69 percent) were identified as being at-risk according to SCE criteria. More males were identified as at-risk than females (71 percent vs. 66 percent, respectively).
- The ethnic composition of at-risk students was 69 percent Hispanic, followed by 25 percent African American, 4 percent white, two percent Asian/Pacific Islander, and less than one percent American Indian. Eighty-eight (88) percent of at-risk students were economically disadvantaged.
- Districtwide, on the 2014 English language STAAR, the gaps in the percentage of students meeting the satisfactory standard between not at-risk and at-risk students were 38 percentage points in reading, 33 percentage points in mathematics, 39 percentage points in writing, 42 percentage points

in science, and 47 percentage points in social studies. The gaps increased in all subjects from 2012 to 2013.

- Districtwide, on the 2014 STAAR EOC, the gaps in the percent of not at-risk and at-risk students who met the satisfactory standard ranged from 14 percentage points in U.S. History to 53 percentage points in English I. The gap in Algebra I increased from 2013 to 2014, while the gap in Biology decreased.
- For the class of 2013, 89.9 percent of not at-risk students and 74.5 percent of at-risk students graduated from HISD. The completion rate (which includes graduates, continuers and GED recipients) for not at-risk students was 93.1 percent and the at-risk rate was 85.4 percent. The gaps between the two groups increased from 2012 to 2013 for both graduation and completion rates.
- When comparing gaps in the percentage of students scoring at or above the 50<sup>th</sup> percentile on the Stanford 10 between at-risk and not at-risk students in the first and second grades districtwide, not at-risk students outperformed at-risk students by 42 to 59 percentage points. Districtwide, the largest gap was on the reading section (59 percentage points).
- Districtwide performance on the Aprenda 3, among students in the first and second grades, indicated that not at-risk students outscored at-risk students on all sections by two to ten percentage points. Districtwide, the largest gap in the percentage of students scoring at or above the 50<sup>th</sup> percentile on the Aprenda 3 was on the mathematics section (10 percentage points).
- In general, the 2014 English STAAR and STAAR EOC results indicate that passing rates of students who received and/or participated in various SCE programs and services did not exceed the passing rates of all at-risk students in the district, with the following exceptions: JJAEP students on the English STAAR Writing and students who received pregnancy-related services on the English STAAR Reading and English II EOC exam.

## Recommendations

1. From 2012–2013 to 2013–2014, performance gaps between at-risk and not at-risk students increased on the Stanford exam. The smallest increase was a 15 percentage point increase and the largest was 18. This gap came about from not at-risk student performance increasing, while at-risk performance stayed relatively the same. This indicates that schools should focus on maintaining the same level of growth for at-risk and not at-risk students in first and second grade.
2. STAAR performance increased from 2012–2013 to 2013–2014 for not at-risk students, while at-risk student performance remained relatively the same. This led to an increase in the gap between the two groups. Elementary and middle schools need to focus on ensuring that at-risk students are growing at the same rate as not at-risk students if not at a higher rate.
3. The completion rate for not at-risk students increased from the class of 2012 to the class of 2013, while the at-risk completion rate decreased, thus furthering the gap between the two groups of students. High schools need to investigate why the two groups are diverging in outcomes with respect to at-risk status.

### **Administrative Response**

The State Compensatory Education Department has reviewed the 2013–2014 State Compensatory Education evaluation report that assessed the implementation of the State Compensatory Education programs in the Houston Independent School District (HISD). The evaluation met the department's expectations in terms of providing budgetary, implementation, and assessment data for all schools and the three (3) centralized programs. These programs include (1) the district Disciplinary Alternative Education Programs (DAEPs); (2) Pregnancy Related Services; and, (3) all campus-based State Compensatory Education Programs and Services. The evaluation included three specific recommendations which address achievement gaps between at-risk students and not at-risk students. Many individual campuses did not show much growth for at-risk students as compared to not-at-risk students. In many instances, this led to the disparity between the two groups' achievement gaps widening instead of narrowing.

The recommendations cited in the report will be reviewed with upper administration for potential improvement in the campuses and program's strategies.

## Introduction

### Program Description

The State Compensatory Education (SCE) program is designed to reduce dropout rates and increase academic performance of students identified as being at-risk of dropping out of school. SCE operates as a funding source to supplement instructional services and offer academic support to students who meet the SCE at-risk criteria established by the state. Funds allocated under SCE law are to be channeled toward programs and services that eliminate disparities in performance on assessment instruments administered under Subchapter B, Chapter 39. Further, programs designated for SCE funding should reduce disparities in the rates of high school completion between students who are at-risk of dropping out of school and all other students. The Stanford 10 and Aprenda 3 served as the assessment measures for grades 1 and 2, the State of Texas Assessments of Academic Readiness (STAAR) served as the state assessment measures for grades 3 through 8, STAAR End-of-Course (EOC) served as the state assessment measures for grades 9 through 11 for the 2013–2014 school year. In order for SCE funds to be allocated to a campus, the campus must not only meet the state criteria for percent of students at-risk of dropping out of school, but the services provided to students must also be described in the district and/or campus improvement plan.

As defined by law, SCE programs and/or services are designed to supplement the regular education program that districts offer to students and funds must provide additional support for at-risk students. Supplemental costs include costs for program and student evaluation, instructional materials and equipment and other supplies required for quality instruction, supplemental staff expenses, salary for teachers of at-risk students, smaller class sizes, and individualized instruction (TEC §42.152(c)).

### Program History

Since the early 1960s, federal, state, and local governmental agencies have demonstrated concern regarding the provision of equitable and appropriate learning opportunities for economically disadvantaged youth served in public educational institutions. The growing number of disadvantaged students, particularly in large, urban school districts, helped fuel the compensatory education movement. The underlying assumption was that many students were at an educational disadvantage because of circumstances associated with their minority and/or socioeconomic status, which ultimately contributed to their lowered academic achievement. Supporters of the movement maintained that these students should be provided extra assistance to “compensate” for those disadvantages (Rossi and Montgomery, 1994).

In 1975, Texas joined the compensatory education movement by enacting the first of a series of legal and administrative guidelines, which, in amended form, shaped compensatory education programs in Texas. Then, in 1997, Senate Bill 1873 amended Section 42.152 of the Texas Education Code and placed new restrictions on compensatory education. The bill required that school districts develop reporting and auditing systems to monitor the use of compensatory education funds.

The next major change came in 2001 when Senate Bill 702 (TEC §29.081), amended the sections of the Texas Education Code that governed the SCE Program. First, the statute required school districts to use student performance on basic skills assessment and achievement tests administered under Subchapter B, Chapter 39, to design and implement appropriate compensatory, intensive or accelerated instructional services for students at-risk of dropping out of school to enable these students to perform at grade level at the conclusion of the subsequent regular school term. SCE legislation later expanded funding to cover mentoring services to at-risk students (Senate Bill 16 of the 78th Legislature), accelerated reading

programs, and programs helping students who have dyslexia or a related disorder (House Bill 1691 of the 78th Legislature).

In 2003, House Bill 3459 amended the sections of the Texas Education Code that govern the SCE Program to allow use of the compensatory education allotment to fund costs that are attributed to programs that are specifically designed to serve students at-risk of dropping out of school, as defined by Texas Education Code Section 29.081. The bill also lowered the required threshold percentage for low income students on a campus to 40 percent (or greater), which was expected to permit expanded use of the SCE allotment to supplement school-wide components of federal *No Child Left Behind* projects.

Senate Bill 16 in 2003 amended Subchapter C, Chapter 29 of the Texas Education Code so programs that provide mentoring services to students at risk of dropping out of school are eligible to be charged to the state compensatory education allotment.

In 2009, House Bill 2703 added a provision to §29.081 that changed the compensatory education definition of “student at risk of dropping out of school” by excluding a student who did not advance from prekindergarten or kindergarten to the next grade level only as the result of the request of the student’s parents. Previously, any student who was not advanced from one grade level to the next was defined by §29.081(d)(1) as a “student at risk of dropping out of school.”

Under House Bill 5, the age of students considered “at-risk” for dropping out of school increased from 21 to 26 years of age for state compensatory education eligibility purposes. House Bill 5 also amended TEC §29.081 to require school districts to offer, without cost to a student, additional accelerated instruction in any subject if the student failed to perform satisfactorily on an EOC assessment test that measures the knowledge and skills in that course and is required for graduation. The LEA is required to separately budget and prioritize state compensatory education funding and any other funding necessary for additional accelerated instruction for students who fail to perform satisfactorily on an EOC assessment instrument.

The LEA should also determine whether the student meets any of the other criteria under TEC §29.081(d). An LEA should also review local eligibility criteria adopted by the board of trustees in accordance with TEC §29.081(g) to determine whether the student is eligible for services/supports.

A more detailed history of recent legislative changes is provided in **Appendix A** (see page 27)

### Program Cost and Funding Source

The annual budget for SCE programs in HISD for the 2013–2014 academic year was \$127,965,710. This figure included \$54,365,832 of supplemental campus-based funds. These amounts are budgeted amounts and not final expenditures for 2013–2014. The money allocated for state-funded compensatory education programs and/or services was based on the number of economically disadvantaged students in the district. A detailed description is provided in **Appendix B** (see page 29).

### Purpose of the Evaluation Report

The purpose of this report is to describe and evaluate the SCE funded programs in HISD as required by law. The district must evaluate and document the effectiveness of instructional programs in reducing any disparities in performance on the Stanford, Aprenda, STAAR, and STAAR EOC and disparities in the rates of high school completion between students at-risk of dropping out of school and all other district students. This evaluation compares at-risk students’ performance on the Stanford, Aprenda, STAAR, and STAAR EOC with the performance of their not at-risk counterparts. As required by the TEA (2004),

differences in passing rates between at-risk and not at-risk students are reported for the past three years when data are available so that movement in reducing the disparity in passing rates can be ascertained.

In compliance with guidelines specified by the TEA (2004), high school completion rates are reported for at-risk and not at-risk students attending HISD. As will be discussed in more detail in the Methods section of this report, the reported completion rate includes students who graduated, received a GED, or continued to be enrolled.

Additionally, the district must evaluate and document the effectiveness of instructional programs in reducing any disparities in performance on the Stanford, Aprenda, STAAR, and STAAR EOC and disparities in the rates of high school completion between students at-risk of dropping out of school and all other district students. These evaluations are required annually. SCE resources must be redirected when evaluations indicate that programs and/or services are unsuccessful in producing desired results for students at-risk of dropping out of school (TEA, 2004).

Finally, this evaluation provides a profile of the SCE programs and services offered to at-risk students in HISD during the 2013–2014 school year. For the purpose of this report, programs and services were grouped according to the following programmatic categories:

- Disciplinary Alternative Education Programs (DAEP): Beechnut School, Juvenile Justice Alternative Education Program (JJAEP), and Elementary Disciplinary Alternative Education Program (EL DAEP);
- Supplemental campus-based programs and services;
- Pregnancy-Related Services (PRS); and
- Districtwide Initiative: Excess Cost Model.

The evaluation of individual programs and services is summarized in the abstract that precedes each set of profiles. Four SCE programs and services were profiled. Each profile includes a program description, student demographics, budget allocations, staffing/funding, school improvement plan information, program-specific student outcomes, and an executive summary.

## Methods

### Data Collection

Student data were obtained using a variety of sources. In HISD, the Public Education Information Management System (PEIMS) database served as the foundation from which students were matched and information was combined with other sources of data for analysis. PEIMS is a statewide data collection and reporting system operated by the state, which includes extensive information on students, staffing, and school budget/finances and serves as the fundamental database for many statewide reports on public education, such as the Academic Excellence Indicator System (AEIS) and the new Texas Academic Performance Report (TAPR). PEIMS contains information from the “fall snapshot” of students taken on the last Friday of October each academic year. Most student demographic information and at-risk status are taken from the PEIMS October 2013 snapshot. Completion status and attendance data were also obtained from PEIMS.

Student performance on the STAAR and STAAR EOC were extracted from their respective databases. Information for multiple years was extracted with the number of years dependent on state reporting requirements. Similarly, student performance on the Stanford 10 and Aprenda 3 were obtained from the Stanford and Aprenda databases. Only non-Special Education students in the first or second grade were included in the Stanford and Aprenda profiles.

## Data Analysis

### *At-Risk Status*

Students were identified as being at-risk if they were labeled as such in the PEIMS database. If a student was identified as at-risk in the PEIMS database, then that information was attached to the student's scores in the STAAR, STAAR EOC, Stanford 10, and Aprenda 3 databases. A detailed description of how students are identified as at-risk by the state and district is provided in **Appendix C** (see page 30).

### *Attendance Rate*

Attendance rate outcomes were calculated by dividing the total number of students' days present at the educational program or service by the students' total number of days eligible to participate in the program or service for the 2012–2013 and the 2013–2014 school years. Attendance rates for specific programs were analyzed by matching the electronic file submitted by program personnel to the summer resubmission of the Average Daily Attendance (ADA) database. Students in all grades were included in the calculations with the exception of students with multiple impairments.

### *Completion Rate Indicator*

The annual TAPR report provides a completion rate indicator for individual campuses and districts in the state of Texas. The formula used by the TEA was adopted for this report. The completion rate is calculated based on a cohort of students identified at ninth grade for the first time and tracked longitudinally for four years. Students are excluded from this cohort as specified in TEC §39.053. To become a member of the cohort, a student must have attained one of the following final statuses: (i) graduated, (ii) received a GED, (iii) continued in a Texas public high school in the fall following the completion year of interest, or (iv) dropped out. All four of these calculations use the number of first-time ninth graders in the longitudinal cohort, plus transfers in, minus transfers out, which is the denominator of the rate calculations. The results presented are with exclusions applied.

For the numerator of the rate calculation, the first three of the above outcomes (high school diplomas, GEDs, and continuing students) are summed. These three indicators are then divided by the number of students in the 9th grade cohort of interest (the sum of all four outcome indicators). This is referred to as the completion indicator. Completion rates are calculated separately for at-risk and not at-risk students.

Completion rate is a lagging indicator, meaning that information is only available to report one year after the completion of the previous academic year. Thus, completion information is available only for the class of 2013 and previous academic years.

### *STAAR Performance*

The report provides information pertaining to the proportion of at-risk and not at-risk students on the English and Spanish STAAR assessments for grades 3–8 for 2014 who met the satisfactory standard at the current phase-in 1 standard. Differences in percentages of students meeting the satisfactory standard between at-risk and not at-risk students are also reported. Student performance was reported for the overall district and at the school level. The only students whose scores were included in the analysis of school and district-level performance were those students who were present during the “fall snapshot.” That is, students who transferred into the district after that point in October were not included in these analyses.

### *STAAR EOC Performance*

The report provides information pertaining to the proportion of at-risk and not at-risk students who met the satisfactory phase-in 1 standard on the STAAR EOC tests for Algebra, Biology, English I, English II, and

US History for 2014, expressed as a percent. Differences in percentages of students meeting the satisfactory standard between at-risk and not at-risk students are also reported. Student performance was reported for the overall district and the school level. The only students whose scores were included in the analysis of school and district-level performance were those students who were present during the “fall snapshot.” That is, students who transferred into the district after that point in October were not included in these analyses.

#### *Stanford 10/Aprenda 3 Performance*

To make comparisons between at-risk and not at-risk students in first and second grades on the Stanford 10 and Aprenda 3, the percentages of students scoring at or above the 50<sup>th</sup> percentile for those two grade levels are reported for 2011, 2012, and 2013. School and district-level performance is based on first and second grade students, who were not enrolled in Special Education courses and were present during the “fall snapshot.”

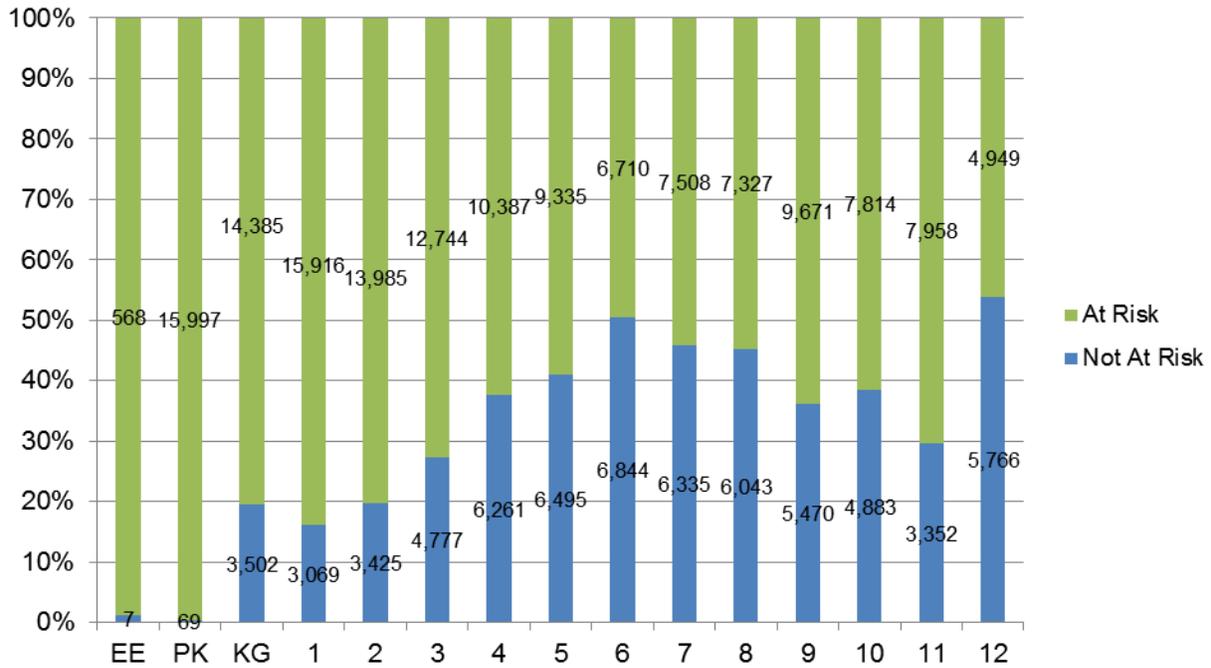

## Results

### Demographic Characteristics: At-Risk Students

- Of the 211,552 students attending HISD at the fall snapshot for the 2013–2014 school year, 145,254 students (69 percent) were identified as being at-risk according to SCE criteria (see **Table 1**).
- The majority of students attending HISD in 2013–2014 identified themselves as Hispanic. Hispanic students accounted for the largest number of at-risk students (99,686). Students who identified themselves as African American made up the next largest group, and 35,859 were at-risk. White students made up the third most populous group where 5,701 were at-risk (see **Table 1**).
- In 2013–2014, more male (71 percent) than female (66 percent) students were identified as at-risk (see **Table 1**).
- Forty-one percent of non-economically disadvantaged students were identified as at-risk while 75 percent of economically disadvantaged students were identified as at-risk (see **Table 1**).
- The highest percentage of students identified as at-risk were in prekindergarten with 99.6 percent (see **Figure 1**, page 10). This is expected since at-risk criteria are similar to prekindergarten eligibility criteria.

Table 1. Districtwide Not At Risk and At Risk Student Distribution: 2013–2014						
Demographics	Total	Not At Risk		At Risk		
		N	%	N	% of Total	% of At-Risk
Total	211,552	66,298	31	145,254	69	100
Gender						
Female	103,890	34,985	34	68,905	66	47
Male	107,662	31,313	29	76,349	71	53
Ethnicity						
African American	53,297	17,438	33	35,859	67	25
American Indian	435	154	35	281	65	< 1
Asian/Pacific Islander	7,595	4,559	60	3,036	40	2
Hispanic	131,062	31,376	24	99,686	76	69
White	17,313	11,612	67	5,701	33	4
Two or More	1,850	1,159	63	691	37	<1
Economically Disadvantaged Status						
Not Economically Disadvantaged	41,456	24480	59	16,976	41	12
Economically Disadvantaged	170,096	41818	25	128,278	75	88

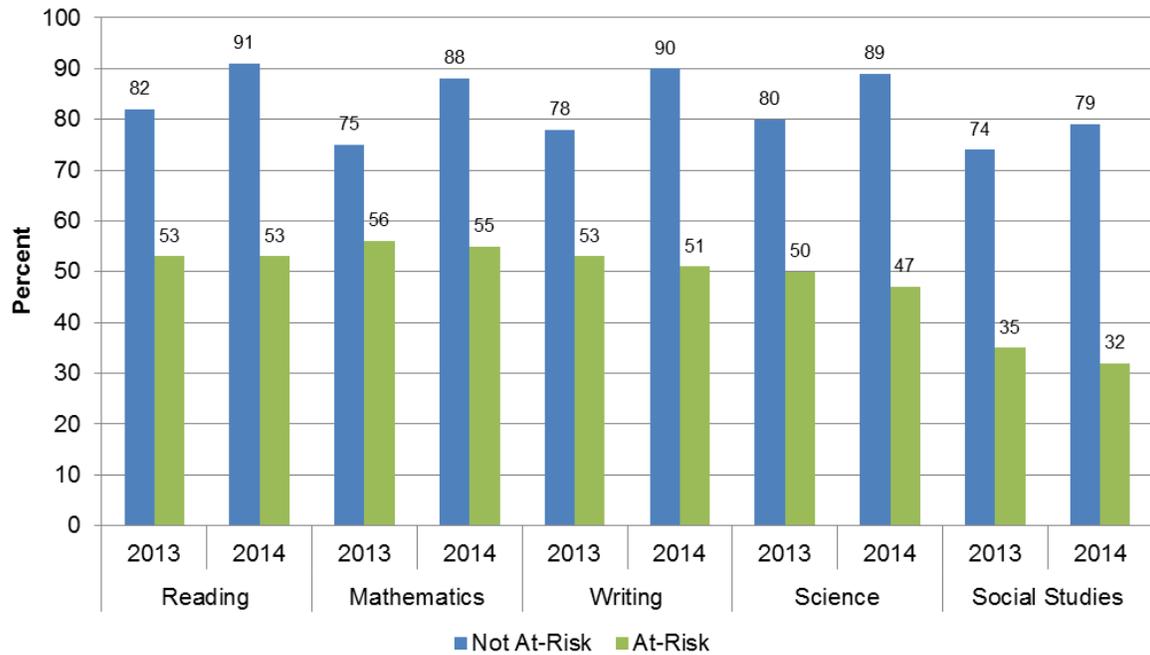

**Figure 1. Districtwide not at-risk and at-risk student distribution by grade, 2013–2014**

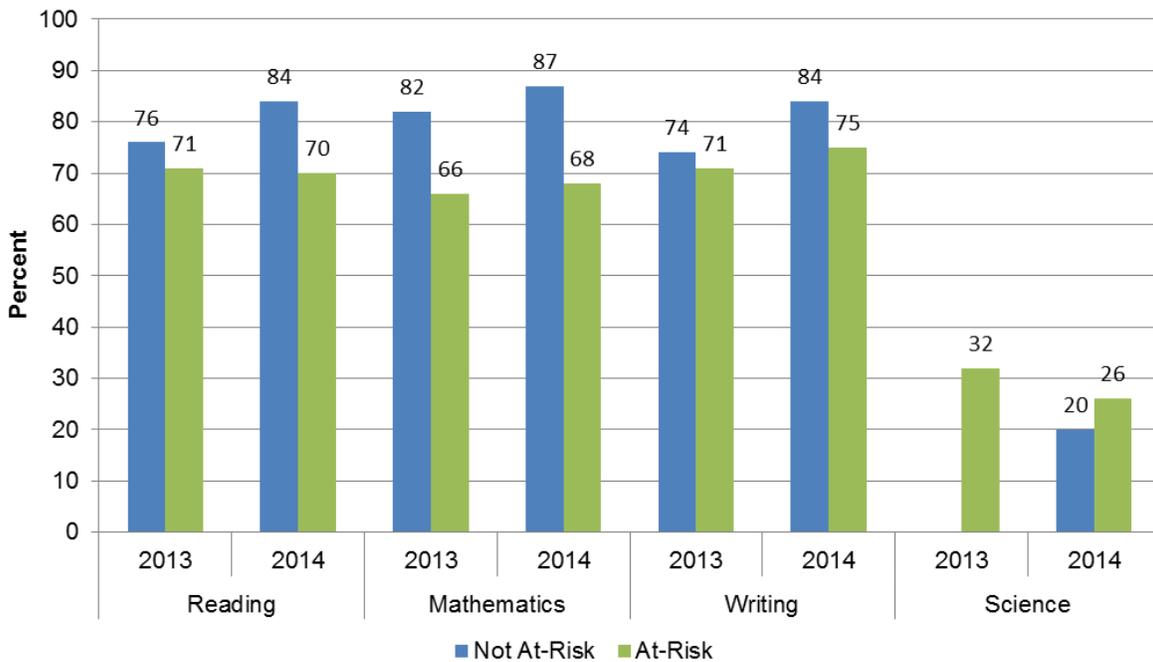

**STAAR Performance Grades 3–8**

- Overall, on the English language STAAR, the gap in the percentage of students meeting the satisfactory standard between not at-risk students and at-risk students was at least 24 percentage points on all tests and at all grade levels (see page 33).
- Not at-risk students outperformed at-risk students districtwide on the English STAAR by a margin of 33 to 47 percentage points: the gap was 38 percentage points for reading, 33 percentage points for mathematics, 39 percentage points for writing, 42 percentage points for science, and 47 percentage points for social studies. Gaps increased in all subjects from 2013 to 2014 (see **Figure 2**, page 11).
- On the Spanish language STAAR, not at-risk students performed better than at-risk students on all tests except science and at most grade levels. The gaps were 14 percentage points in reading, 19 points in mathematics, and nine points in writing. Gaps increased in all subjects from 2013 to 2014 (see **Figure 3**, page 11).

**Figure 2. Districtwide English STAAR percent of students who met level II satisfactory standard for not at-risk and at-risk students, 2013–2014**

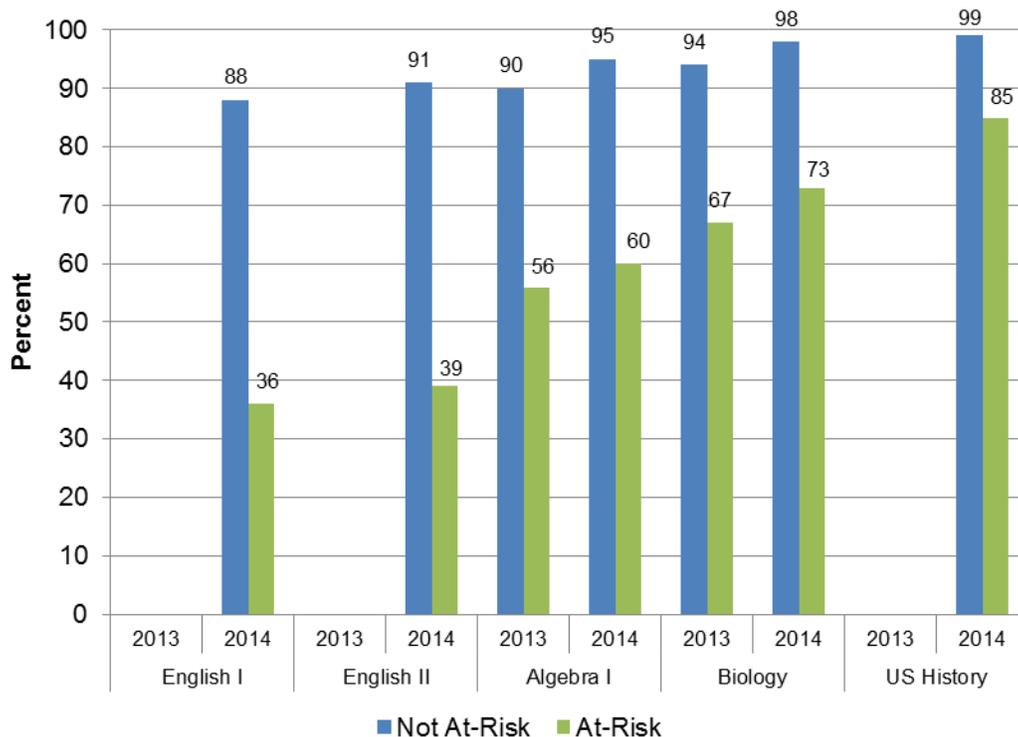

**Figure 3. Spanish STAAR percent of students who met level II satisfactory standard for not at-risk and at-risk students, 2013–2014**

### STAAR EOC Performance

- Performance on the Algebra I and Biology STAAR EOCs at the phase-in 1 satisfactory standard increased from 2013 to 2014. In 2014, the largest gap in the percent of not at-risk and at-risk students who met the satisfactory standard was 53 percentage points in English I, followed by 52 percentage points in English II, 35 percentage points in Algebra I, 25 percentage points in Biology, and 14 percentage points in US History. The gap in Algebra I increased from 2013 to 2014 while the gap in Biology decreased (see **Figure 4**).

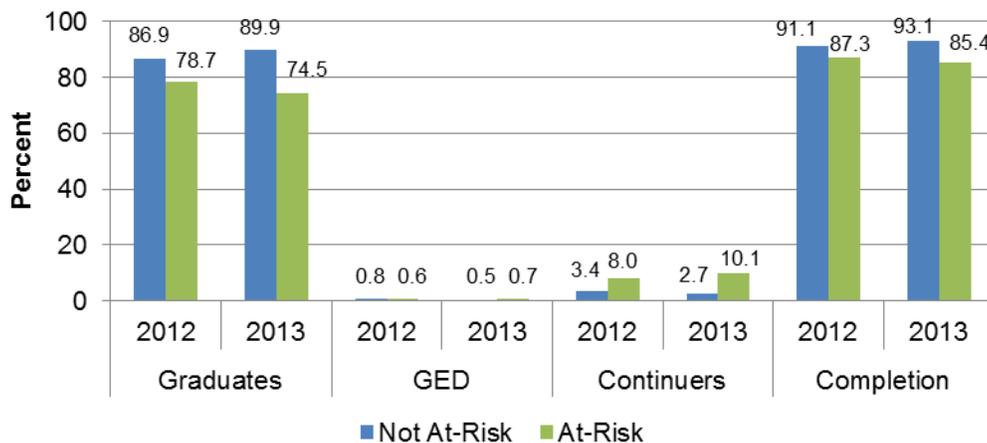

**Figure 4. STAAR EOC percent of students who met level II satisfactory standard for not at-risk and at-risk students, 2013–2014**

### Completion Rates

- Overall, graduation and completion rates of not at-risk students increased from 2012 to 2013, while at-risk students' graduation and completion rates decreased from 2012 to 2013 (see page 32).
- For the Class of 2013, 89.9 percent of not at-risk students and 74.5 percent of at-risk students graduated from HISD four years after starting ninth grade (see page 32).
- The completion rate for not at-risk students was 93.1 percent and the at-risk rate was 85.4 percent (see page 32).
- The gaps in the graduation and completion rates increased from 2012 to 2013 (see **Figure 5**, page 13).

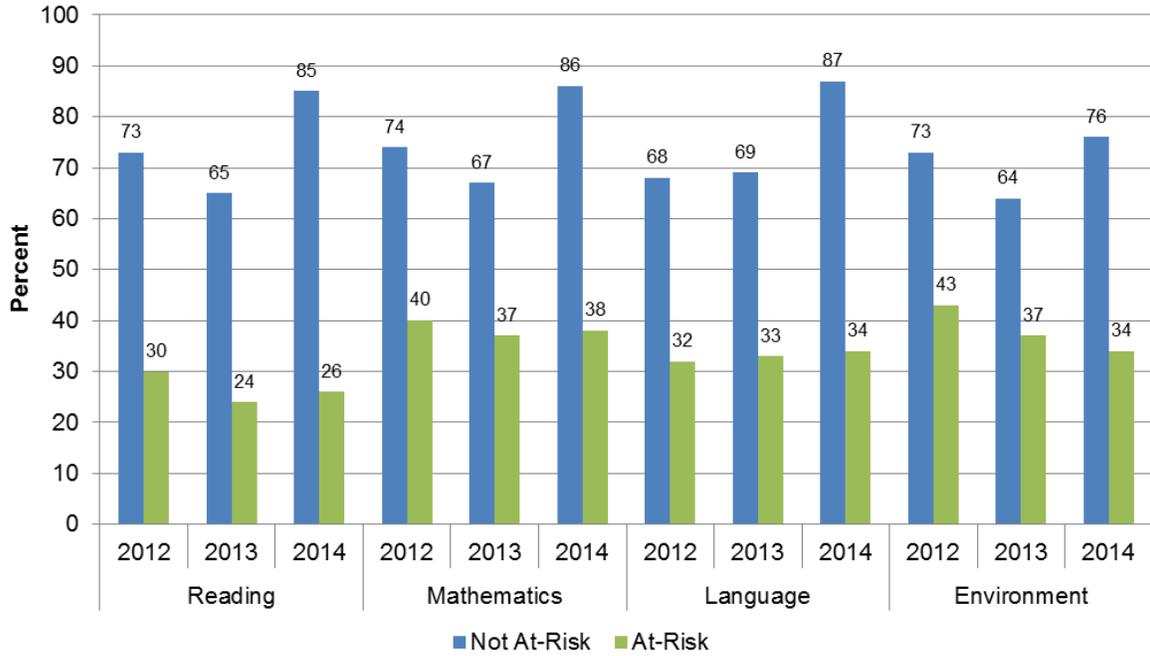

**Figure 5. Districtwide completion rates for not at-risk and at-risk students in the class of 2013 and the class of 2012**

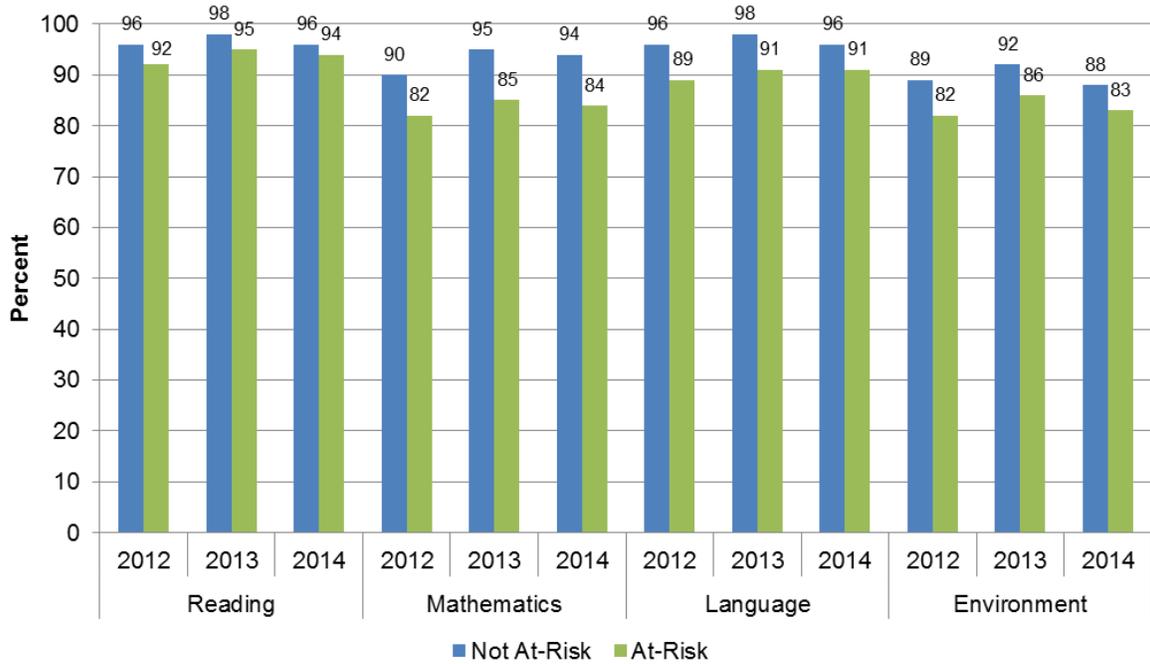

#### Stanford 10 and Aprenda 3 Performance

- In 2014 among non-Special Education students, on the Stanford 10 in grades 1 and 2, not at-risk students outperformed at-risk students by 42–59 percentage points (see page 33).
- Districtwide, the largest gap was on the reading section of the Stanford 10 (59 percentage points), followed by the language (53 points), mathematics (47 points), and environment (42 points) sections (see **Figure 6**, page 14).
- From 2013 to 2014, the districtwide performance gap between not at-risk and at-risk students increased in all subjects on the Stanford 10 (see page 33).
- Districtwide performance on the 2014 Aprenda 3 among non-Special Education students in the first and second grades indicated that not at-risk students outscored at-risk students on all sections by 2–10 percentage points (see page 33).
- Districtwide, the largest gap in scores on the Aprenda 3 was on the mathematics section (10 percentage points), followed by the language (5 points), environment (5 points), and reading (2 points) sections (see **Figure 7**, page 14).
- The gap in performance on the Aprenda 3 between at-risk and not at-risk students decreased in reading, language, and environment and stayed the same in mathematics from 2013 to 2014 (see page 33).

**Figure 6. Percent at or above the 50<sup>th</sup> percentile on the Stanford 10 for not at-risk and at-risk students in grades 1–2, 2012–2014**

**Figure 7. Percent at or above the 50<sup>th</sup> percentile on the Aprenda 3 for not at-risk and at-risk students in grades 1–2, 2012–2014**

For specific SCE programs, the following findings are relevant.

- In general, the 2014 English STAAR and STAAR EOC results indicate that passing rates of students who received and/or participated in various SCE programs and services did not exceed the passing rates of all at-risk students in the district, with the following exceptions: JJAEP students on the English STAAR Writing and students who received pregnancy-related services on the English STAAR Reading and English II EOC exam.
- The Excess Cost Model was implemented to reduce class sizes through the provision of additional instructional positions. Program effectiveness was measured through attendance rates and completion rates. Districtwide attendance rates have decreased from 95.7 to 95.6 percent from 2012–2013 and 2013–2014. Graduation and completion rates decreased for at-risk students from 2012 to 2013. The overall passing rates of not at-risk students exceeded those of at-risk students on all tests of the STAAR Grade 3–8 and STAAR EOC and at all grade levels except for STAAR Spanish Science (see pages 25–26).

Detailed findings at the school office and campus level are presented beginning on page 33 of this report. In particular, completion rates are presented at the district, school office, and school levels. Results are presented for at-risk and not at-risk students by grade at all levels. The next section of the report also provides detailed information about the SCE-funded disciplinary alternative education programs and centers and pregnancy-related services.

## Discussion

Overall, the findings from the State Compensatory Education Report indicated that at-risk students underperform their not at-risk counterparts in every measure. Continued support for students at risk of dropping out of school is necessary in order to improve their performance and close the achievement gap. At-risk students represent a large proportion of the students in HISD. While gap reductions occurred in the Aprenda subject tests and the Biology EOC exam for the 2013–2014 school year, there were still large gap increases the same year for the Stanford exam and the STAAR English and Spanish subject tests. Similarly, graduation rates for at-risk students continue to lag further behind those of not at-risk students.

Despite the widening achievement gap between at-risk and not at-risk students, there are some schools that are closing the gap in one or more subject areas. For example, Crispus Attucks Middle School closed a 40 percentage point gap with all students passing the Algebra I EOC exam this school year; Mirabeau B. Lamar High School decreased the gap between not at-risk (96% passing) and at-risk students (81% passing) by 21 percentage points from the 2012–2013 to the 2013–2014 school year on the Algebra I EOC exam; Booker T. Washington High School decreased their gap between not at-risk (95% passing) and at-risk students (84% passing) by 17 percentage points on the Biology EOC exam; Stephen F. Austin High School decreased the gap by 15 percentage points on the EOC Algebra I exam with 92% of not at-risk students passing and 69% of at-risk students passing; Thomas Alva Edison Middle School also decreased their gap by 15 percentage points on the EOC Algebra I exam with 98% of the not at-risk students passing and 95 percent of the at-risk students passing.

HISD continues to implement programs to address student achievement and graduation rates. The district is focusing on the recruitment of highly qualified teachers and supporting them with on-going professional development. Additional emphasis in high school is provided to help students complete credits for graduation. At the elementary and middle school levels, the achievement gaps between at-risk and not at-risk students have not been satisfactorily reduced. Further efforts are needed to improve the achievement of at-risk students in the K–8 grade levels.

At the high school level, the gaps between at-risk and not at-risk students also increased, but not to the same magnitude as the elementary and middle school levels. The performance gap from English I and English II drives the result of the performance gap increasing from the 2012–2013 to the 2013–2014 school year. Previous measures of performance on English EOC exams had similarly sized gaps, therefore if a directly comparable measure of English I or English II existed, then the growth between the gap seen in the report could disappear.

The SCE-funded programs in HISD serve students who are considered at-risk. Enrollment in each program is inconsistent and relatively short-term, making it difficult to draw conclusions and attribute performance patterns to the programs. However, that does not necessarily mean these programs are ineffective. For instance, support from Pregnancy-Related Services assists in the retention of young women who use these services, a result that would not be reflected by test scores.

## Beechnut Academy (#303)

### Program Description

This program is a privately managed Disciplinary Alternative Education Program (DAEP) for middle and high school students with behavioral problems. Its primary purpose is to provide a continuum of academic and social services for students who have been removed from a regular education program for serious violations of the Code of Student Conduct. The academic goal of Beechnut Academy is to provide an academic program comparable with the program offered at the student's home school. The program utilizes individualized computer-program-assisted instruction as well as teacher-directed instruction. A student is approved and accepted into the program for a minimum of 30 days and a maximum of 180 days of successful attendance. Upon successful completion of the program, students return to their regular school settings. The expected outcomes include development of grade-appropriate academic and social skills necessary to be successful upon returning to the home school campuses.

## **Beechnut Academy (cont.)**

### **Executive Summary**

Beechnut Academy offered educational instruction and support services to a total of 1,879 students over the 2013–2014 school year. The majority of students were male (72 percent). The racial/ethnic composition of students consisted mostly of Hispanic (55 percent) and African American (42 percent) students. Eighty-three percent of the students served were classified as at-risk according to SCE criteria.

The budget allocation for Beechnut Academy increased from \$11,985,518 in 2012–2013 to \$12,046,223 in 2013–2014.

Program effectiveness was measured using the attendance rate, and test performance data on the STAAR and EOC tests. The attendance rate decreased from 79.5 percent in 2013 to 76.2 percent in 2014. Performance decreased or stayed the same from 2013 to 2014 on the English language STAAR in every subject and grade level except sixth grade reading and mathematics. On the STAAR EOC, performance increased from 2013 to 2014 in Biology and Algebra I. Performance from students at Beechnut Academy still lags behind that at the district level.

Based on these findings, it is recommended that the program administration continue efforts to improve the attendance rate and focus on all subject areas that are tested by identifying instructional approaches that are more effective for students with behavioral issues. Since this is a short term placement program, most of the students tested and served each year are not the same students unless they are being served again for additional placement (repeaters).

## Juvenile Justice Alternate Education Program (#320)

### Program Description

Juvenile Justice Alternate Education Program (JJAEP) is a program for middle and high school students who have been placed by the courts in detention and residential facilities managed by the Harris County Juvenile Probation Department. Its primary purpose is to provide a continuum of academic and transition services for middle and high school students who have been removed from a regular education program for serious criminal activity or serious misconduct.

The focus of JJAEP is to promote academic growth and behavioral skills that will allow students to transition back into school upon the completion of their sentences. Additional services such as probation-related requirements, mentoring, counseling, mental health services, substance abuse intervention, health services, and prevention-related services are available. JJAEP also provides after-school programs as well as summer school. JJAEP is funded by the Texas Juvenile Probation Commission, local school districts, and state and federal grants. The expected outcomes include development of grade-appropriate academic and social skills necessary to be successful upon returning to the home school campuses.

Biology	4	*	World Geography	6	17			

### Executive Summary

JJAEP offered educational instruction and support services to a total of 44 students during the 2013–2014 school year. The majority of students were male (86 percent), and the racial/ethnic composition of the students was mostly Hispanic (59 percent) and African American (34 percent). Ninety-one percent of the students served were considered at-risk according to SCE criteria.

The budget allocation for JJAEP decreased from \$1,497,203 in 2012–2013 to \$1,435,450 in 2013–2014.

Program effectiveness was measured using the attendance rate and test performance data on the STAAR and EOC tests. The attendance rate increased from 84.9 percent in 2013 to 86.4 percent in 2014. Performance decreased from 2013 to 2014 on the English language STAAR in every subject except writing. On the STAAR EOC, performance decreased from 2013 to 2014 in Algebra and stayed the same in Biology.

Based on these findings, it is recommended that the program administration continue efforts to improve the attendance rate and continue to introduce instructional strategies that reflect best practices for improving academic performance. Since this is a temporary placement facility, most of the students served and tested each year are not the same unless they are being served again for an additional placement (repeater).

## Elementary Disciplinary Alternative Education Program (#466)

### Program Description

Elementary Disciplinary Alternative Education Program (EL DAEP) is a Disciplinary Alternative Education Program (DAEP) for elementary school students. The Texas Education Code prohibits children under the age of ten years old from being expelled so students are placed in EL DAEP. Initial placement is for fifteen days. The program's primary purpose is to provide a structured, rigorous, and individualized behavior and academic curriculum for elementary school students who have been removed from a regular education program for serious criminal activity or misconduct.

3	12	50	12	25				
4	9	44	10	30	11	18		
5	14	29	14	29			13	38
<b>Total</b>	35	40	36	28	11	18	13	38

### Executive Summary

EL DAEP offered educational instruction and support services to a total of 34 students during the 2013–2014 school year. Eighty-five percent of the students were male, 68 percent were African American, 29 percent were Hispanic, and 50 percent were classified as at-risk according to SCE criteria.

The budget allocation for EL DAEP was \$470,863.

Program effectiveness was measured using the attendance rate and STAAR performance test data. Since the EL DAEP program began during the 2012–2013 school year, there is only one year of previous data for comparison. Attendance decreased from 89.7 percent in 2013 to 83.3 percent in 2014. Performance on the English STAAR exam decreased for every subject from 2012–2013 to 2013–2014 except for mathematics.

Based on these findings, it is recommended that the program administration implement practices that will raise student performance to meet or exceed that at the overall district level. Since this is a temporary placement facility, most of the students served and tested each year are not the same unless they are being served again for an additional placement (repeater).

## Pregnancy-Related Services (#634)

### Program Description

Pregnancy-Related Services (PRS) are support services for pregnant students to help them adjust to pregnancy and parenting, and to remain in school during the pregnancy and postpartum periods. The program is offered at all high schools and all middle schools that have referrals. Any pregnant high school student is eligible for services under the PRS Program. Services include: counseling, career guidance, school and other health-related services, transportation, referrals to external agencies, education on child development, parenting and job-readiness training, child care, case management, service coordination, and specialized counseling. Additionally, Compensatory Education Home Instruction (CEHI) is provided during the prenatal and postpartum periods. The CEHI component allows teachers to provide academic services to students at home or at the hospital, when students are unable to attend school. CEHI consists of at least four hours per week of instruction by a certified teacher.

### Pregnancy-Related Services (cont.)

STAAR End-of-Course Percent Met Satisfactory Standard, 2012 through 2014								
2014			2013			2012		
Subject	N Tested	Percent	Subject	N Tested	Percent	Subject	N Tested	Percent
English I	87	25	English II	110	41	Algebra I	65	35
Biology	53	45	US History	70	71			
English I			English II			Algebra I	69	55
Biology	77	55	US History					
English I			English II			Algebra I	48	46
Biology	48	50	US History					

#### Executive Summary

During the 2013–2014 school year, 456 students received pregnancy-related services. The racial/ethnic composition was dominated by Hispanic students (67 percent) and African American students (31 percent). Ninety-six percent of these students were considered at-risk according to SCE criteria.

The budget allocation for this program increased from \$590,285 in 2012–2013 to \$676,564 in 2013–2014.

Program effectiveness was measured with test performance data on the STAAR and EOC. English language STAAR performance increased or stayed the same from 2013 to 2014 in reading and science but decreased in mathematics and social studies. EOC performance decreased in all subject areas that were tested in 2013 and 2014.

Based on these results, program administrators should continue to implement best instructional practices for improving academic performance. Since this is a temporary placement facility, the students served and tested each year are not the same.

## Excess Cost Model (#999)

### Program Description

HISD used SCE funds to help supplement the regular educational program by reducing class sizes. District recommended student to teacher ratios are as follows:

- Grades PK-4 22:1 (State Requirement)
- Grade 5 26:1
- Grades 6-8 28:1
- Grades 9-12 30:1

The district determines the appropriate level of funding for each campus based on the following formulae:  
Elementary Campuses

Number of students by grade level ÷ recommended class size = standard number of teachers required.

Secondary Campuses

[Total number of students in a subject area ÷ recommended class size] ÷ standard number of classes (6) = standard number of teachers required.

The standard number of teachers required is compared to the actual number of teachers for that subject area. The value in excess of the standard requirement is considered excess cost and coded accordingly to the appropriate IA code.

\*Source: PEIMS Fall Snapshot

### Executive Summary

As part of a districtwide initiative, the Excess Cost Model was implemented in order to reduce class sizes below the district's class-size guidelines by providing additional instructional positions. For the 2013–2014 school year, a total of 211,552 students were served. The budget allocation for the 2013–2014 school year was \$44,981,274. In 2013–2014, the racial/ethnic composition for the district consisted of 25 percent African American, four percent Asian/Pacific Islander, 62 percent Hispanic, less than one percent Native American, and eight percent White students. Regarding gender, 51 percent of the students were male and 49 percent were female. Districtwide, 69 percent of students were identified as at risk.

Program effectiveness was measured using the following outcome indicators: attendance rates, completion rates, STAAR, and STAAR EOC performance. Attendance rates and completion rates were collected over a two-year period so that the presence or absence of progress on these indicators could be ascertained. As shown on the outcomes portion of this page, the districtwide attendance rate declined from 95.7 percent to 95.6 percent from 2012–2013 to 2013–2014, although that remains a high rate for a large urban district.

Analysis of districtwide results reveal that, overall, the performance of not at-risk students exceeded those of at-risk students on all tests of the STAAR, STAAR EOC, Stanford, and Aprenda in 2014 and at all grade levels. The performance gap on the STAAR exam between at-risk and not at-risk students was the highest in social studies (47 percentage points), followed by science (42 percentage points), writing (39 percentage points), reading (38 percentage points), and mathematics (33 percentage points). The gaps increased in all subjects from 2012–2013 to 2013–2014. The magnitude of the increase in the performance gap more than negated the decrease that was seen between the 2011–2012 and 2012–2013 school years.

On most subjects of the 2013 STAAR EOC exams, the gap in performance between at-risk and not at-risk students was quite large. The performance gap for Biology decreased from 2012–2013 and 2013–2014. The performance gaps for English I, English II, and Algebra I were especially large (greater than 30 percentage points).

While the graduation and completion rates for not at-risk students increased from 2012 to 2013, the rates decreased for at-risk students. Academic intervention for at-risk students must begin early in order to put them on track for graduation.

Based upon these findings, it is recommended that the district's and schools' administrative staffs focus on instructional strategies to increase student achievement for at-risk students in all subject areas.

## APPENDIX A

### RECENT LEGISLATIVE CHANGES TO SCE

In 2003, House Bill 1691 of the 78th Legislature also amended Section 42.152 of the Texas Education Code to allow charges to the state compensatory education allotment (in proportion to the percentage of students that meet the criteria in Section 29.081(d) or (g)) for programs that serve students that are enrolled in accelerated reading program under Section 28.006(g) or that are enrolled in a program for treatment of students who have dyslexia or a related disorder as required by Section 38.003.

Senate Bill 16 of the 78th Legislature also amended Subchapter C, Chapter 29, of the Texas Education Code, by adding Section 29.089, relating to mentoring services. According to Section 29.089, programs that provide mentoring services to students at risk of dropping out of school, as defined by Section 29.081, are also eligible to be charged to the state compensatory education allotment.

The electronic reporting and auditing system implemented in Update 11 of the Financial Accountability System Resource Guide assesses the risk that schools did not use the state compensatory education allotment “to fund supplemental programs and services designed to eliminate any disparity in performance on assessment instruments administered under Subchapter B, Chapter 39, or disparity in the rates of high school completion between students at risk of dropping out of school, as defined by Section 29.081, and all other students (see Texas Education Code Section 42.152(c).” One primary purpose of the risk assessment activities by TEA staff is to test whether the school district or charter school complied with this general requirement for the expenditure of the supplement funds from the SCE allotment. In most all instances, schools will not be burdened in the future with the cost of obtaining a separate audit of state compensatory education, if only effective strategies, programs and activities are supported by the SCE allotment.

In 2009, House Bill 2703 of the 81st Legislature added a provision to §29.081 (added Subsection (d-1) to §29.081, Education Code) that changed the compensatory education definition of “student at risk of dropping out of school” by excluding a student who did not advance from prekindergarten or kindergarten to the next grade level only as the result of the request of the student’s parents. Previously the law under §29.081(d)(1) included in the compensatory education definition of “student at risk of dropping out of school” any student who was not advanced from one grade level to the next.

Also in 2009, another change to Section 42.152(c), Education Code was the amendment of the indirect cost allotment for the compensatory education allotment. The allotment was raised from 45 to 48 percent. In Section 53 of the bill, a new category of compensatory education, funding for the military dependent allotment was established. Section 53 of the bill amends Section 42.152, Education Code, by adding Subsections (s), (s-1), (s-2), and (s-3) to provide a compensatory education allotment of \$650 per ADA for students who have a parent or guardian on active duty in a combat zone and for students who have a parent or guardian on active duty who have transferred to a school district as a result of a change related to an action taken under the Defense Base Closure and Realignment Act of 1990. Districts would be permitted to use this funding only to serve eligible students.

In 2014, Under House Bill 5 high school students are now required to pass five State of Texas Assessments of Academic Readiness (STAAR®) end-of-course exams to meet the new graduation requirements. There are exams that are no longer being required and some students were classified as at-risk based on their failure on the assessments that are no longer in use. A student who was identified as at risk based on this category last year was considered to be identified as at risk this school year, but the at risk status should be removed at the end of this school year.

HB5 also increased the age of students considered “at-risk” for dropping out of school from 21 to 26 years of age for state compensatory education eligibility purposes.

House Bill 5 also amended TEC §29.081 to require school districts to offer, without cost to a student, additional accelerated instruction in any subject if the student failed to perform satisfactorily on an EOC assessment test that measures the knowledge and skills in that course and is required for graduation. The LEA is required to separately budget and prioritize state compensatory education funding and any other funding necessary for additional accelerated instruction for students who fail to perform satisfactorily on an EOC assessment instrument. State compensatory education funds cannot be used for any other purpose until your district or charter school has sufficiently funded additional accelerated instruction. Program Intent Code 24 must be used when coding additional accelerated instruction expenditures.

TEC §29.081 as amended by HB 5 also requires each school district to evaluate the effectiveness of accelerated instruction programs for high school students and to hold an annual public hearing to consider the results of the evaluation.

The LEA should also determine whether the student meets any of the other criteria under TEC §29.081(d). An LEA should also review local eligibility criteria adopted by the board of trustees in accordance with §29.081(g) to determine whether the student is eligible for services/supports.

## APPENDIX B

### Funding Source

The money allocated by the state for compensatory education programs and/or services was based on the number of economically disadvantaged students in the district. The number of economically disadvantaged students is determined by averaging the best six months of enrollment for those who qualify in the national school lunch program for free- or reduced-price lunches for the preceding school year. Districts are entitled to receive an additional annual allotment equal to the adjusted basic allotment, multiplied by 0.2, for each student who is economically disadvantaged and who does not have a disability. Students must reside in a residential placement facility in a district in which their parent or legal guardian does not reside. Districts are also entitled to receive an annual allotment equal to the adjusted basic allotment, multiplied by 2.41, for each full-time equivalent student in a remedial and support program because the student is pregnant or a parent (TEC §29.081).

## APPENDIX C

### CRITERIA FOR IDENTIFYING AT-RISK STUDENTS

#### State Criteria

TEC §29.081 defines a student at-risk of dropping out of school as each student who is under 21 years of age and who:

1. Was not advanced from one grade level to the next for one or more school years;
2. Is in grades 7, 8, 9, 10, 11, or 12 and did not maintain an average equivalent to 70 on a scale of 100 in two or more subjects in the foundation curriculum during a semester in the preceding or current school year or is not maintaining such an average in two or more subjects in the foundation curriculum in the current semester;
3. Did not perform satisfactorily on an assessment instrument administered to the student under TEC Subchapter B, Chapter 39, and who has not in the previous or current school year subsequently performed on that instrument or another appropriate instrument at a level equal to at least 110 percent of the level of satisfactory performance on that instrument;
4. Is in pre-kindergarten, kindergarten, or grades 1, 2, or 3, and did not perform satisfactorily on a readiness test or assessment instrument administered during the current school year;
5. Is pregnant or is a parent;
6. Has been placed in an alternative education program in accordance with TEC §37.006 during the preceding or current school year;
7. Has been expelled in accordance with TEC §37.007 during the preceding or current school year;
8. Is currently on parole, probation, deferred prosecution, or other conditional release;
9. Was previously reported through the Public Education Information Management System (PEIMS) to have dropped out of school;
10. Is a student of limited English proficiency, as defined by TEC §29.052;
11. Is in the custody or care of the Department of Protective and Regulatory Services or has, during the current school year, been referred to the department by a school official, officer of the juvenile court, or law enforcement official;
12. Is homeless, as defined by 42 U.S.C. Section 11302, and its subsequent amendments; or
13. Resided in the preceding school year, or resides in the current school year, in a residential placement facility in the district, including a detention facility, substance abuse treatment facility, emergency shelter, psychiatric hospital, halfway house, or foster family group home.

#### Local Criteria

In addition to the 13 state criteria outlined in TEC §29.081 for identifying students who are at-risk of dropping out of school, there is a provision that allows the board of trustees of a school district to adopt local eligibility criteria (TEC §29.081(g)). The following local criteria also identify students who are at-risk for dropping out of school:

1. Students who are identified as dyslexic under general education; or
2. Students who are placed into a Disciplinary Alternative Education Program for reasons other than those in TEC §37.006, such as continued misbehavior in the classroom.
