
FISCAL YEAR 2021 SPRING ENROLLMENT

March 2021

**Headcount and Full-time Equivalent (FTE)
 Impacted by COVID-19 Pandemic
 Online Enrollments Soar**

Community colleges report general opening spring term enrollment figures to the Illinois Community College Board using a brief web based survey. These figures reflect student enrollments as of the end of registration for the Spring 2021 semester—usually the 10th day of the term.

Illinois Community Colleges have implemented campus measures to ensure a safe instructional environment during the ongoing pandemic and employed substantial adjustments to instruction by transitioning many courses to remote or online modalities. With community colleges being open-access institutions and serving a significant number of at-risk students, the pandemic has heightened issues for that population ranging from fiscal to technological.

Overall, compared to the same term one year ago, statewide Spring 2021 headcount enrollments and full-time equivalent (FTE) enrollments have been substantially affected by COVID-19. The Spring 2021 semester headcount was 240,056 compared to 279,771 last year (a headcount decrease of 39,715 or -14.2 percent). The latest FTE count was 131,176 compared with 152,349 a year ago (an FTE decrease of 21,173 or -13.9 percent). FTE figures reflect the total number of credit hours being taken by students divided by 15—the number of semester hours traditionally considered a full-time class load.

Table 1 contains comparative statewide spring tenth-day enrollments for the last five years.

**Table 1
 SUMMARY OF OPENING SPRING ENROLLMENTS IN
 ILLINOIS PUBLIC COMMUNITY COLLEGES FROM 2017 TO 2021**

	Spring 2017	Spring 2018	Spring 2019	Spring 2020	Spring 2021
Headcount	302,741	289,611	283,146*	279,771	240,056
Percent Change	-5.0%	-4.3%	-2.2%	-1.2%	-14.2%
FTE	167,294	160,396	154,740*	152,349	131,176
Percent Change	-4.9%	-4.1%	-3.5%	-1.5%	-13.9%

* Adjusted Total

It should be noted that despite the continued enrollment decreases statewide, most Illinois community colleges continue to produce an elevated number of graduates annually. With 65,707 earned collegiate-level degrees and certificates, fiscal year 2020 had the sixth highest annual number of statewide graduates recorded from the Illinois Community College System. For detailed student graduate data by community college see the [ICCB Data Book](#) (Section III).

Table 2 provides a comparison of fiscal year 2017 through fiscal year 2021 spring headcount enrollments for each community college. Among the 48 community colleges, since last year headcount increases were reported at only two colleges (1.0 percent or higher). Forty-six colleges saw decreases (1.0 percent or more) compared to last year. No colleges reported little or no change (less than 1.0 percent) versus last year. Longer term, statewide headcount enrollments were down 20.7 percent compared to Spring 2017.

Table 3 contains a comparison of full-time equivalent (FTE) enrollments for the same five-year period. Compared to last year, Spring 2021 FTE increases were reported by none of the colleges, decreases were reported by 46 colleges, and two colleges indicated little or no change. Longer term, statewide FTE enrollments were down 21.6 percent compared to Spring 2017.

Table 4 provides fiscal year 2017 through fiscal year 2021 spring opening course enrollments (duplicated) in internet-based courses at each community college. Spring enrollments in online courses have been steadily growing across the most recent five years. Adjustments in educational offerings due to COVID mitigation efforts reflect the massive spike in online courses as colleges adapted to meet student needs and follow recommended safety protocols. This spring's enrollment in internet-based courses reflect an increase of more than 200 percent compared to last year. At the beginning of the Spring 2021 semester, there were 357,685 course enrollments (duplicated) in internet courses compared to 116,732 in Spring 2020 (an increase of 206.4 percent) and 103,727 in Spring 2017 (an increase of 244.8 percent). Compared to last year, Spring 2021 duplicated internet enrollments increased at 42 colleges, decreased at five colleges, and had little or no change at one college. Figure 1 provides a trend line of online course offerings by Spring term for the last five years.

Figure 1. Opening Spring Online Course Enrollment Trends In Illinois Public Community Colleges from 2017 to 2021

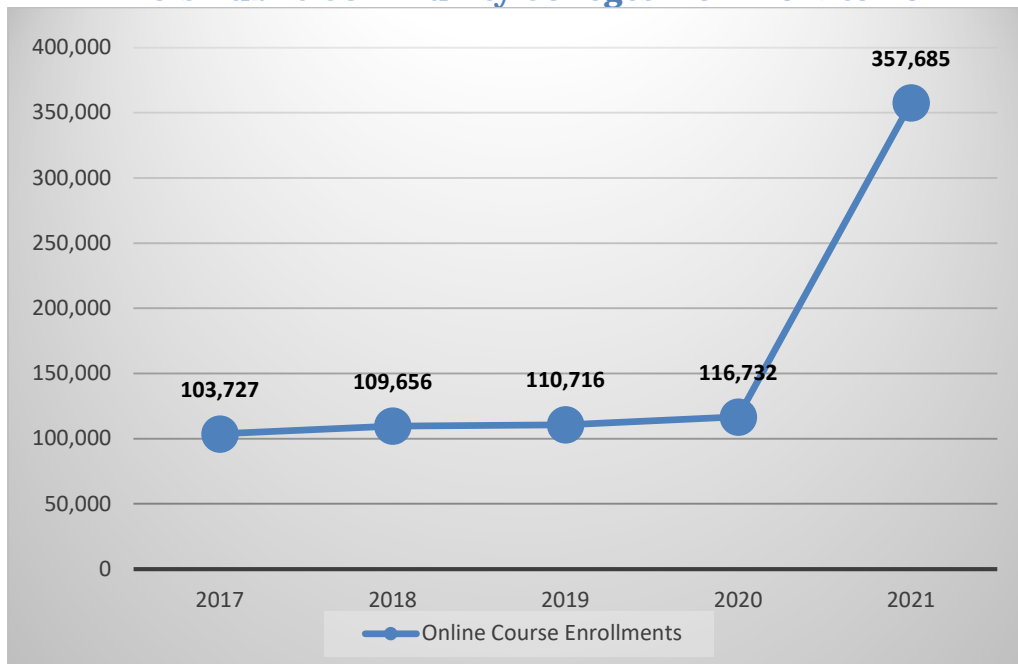

Table 5 provides fiscal year 2021 spring opening enrollments by instructional program area. This is a new table within the report reflecting additional items collected for the first time as a part of the Spring survey process. The collection of more granular data at the instructional program area level will allow for a deeper understanding of enrollment trends. The newly collected items reflect that Baccalaureate/Transfer was the largest instructional program, accounting for 60.2 percent. Career and Technical Education was the second largest instructional program, accounting for 25.2 percent of enrollments in Spring 2021. Students in Adult Education (ABE, ASE, and ESL) comprised 7.2 percent of enrollments, while 6.4 percent of enrollments were in General Associates programs. Enrollments in Vocational Skills (0.9 percent) and General Studies (0.2 percent) programs represented only about one percent of enrollments in Spring 2021.

Table 6 provides opening headcount enrollments of dual credit students in Spring 2021. Like table 5, this table reflects the addition of new items collected in the Spring survey beginning with the 2021 collection and will establish a baseline for future comparison with enrollment at the 10th day of the Spring term. At the beginning of the Spring 2021 semester there were 48,471 enrollments for dual credit students, which represented about one in five enrollments (20.2 percent).

Additional Background: The Spring 2021 preliminary summary student counts in this report (Spring 2021 Opening Enrollment Report) derive from the web-based ICCB Spring 2021 Enrollment Survey. Spring opening enrollment information for credit-generating students are recorded by the colleges at the end of the regular spring registration period, which is typically the 10th day of class. Beyond the survey, which allows ICCB and the Illinois Community College System to timely and broadly address stakeholder inquiries about spring enrollment, ICCB also annually collects student-level data from community colleges for the spring term via its annual academic year student-level collection. Upon finalization of the data in late-summer, the nuanced data will allow ICCB to more fully analyze the impact of the COVID-19 pandemic on instructional areas, demographics, and other student characteristics

It should be noted these counts also only provide a "snapshot" of opening spring term enrollment for year-to-year and institution-to-institution comparisons. The diversity of the community college system and its students is not fully captured in these opening enrollment snapshot data. Community college flexible scheduling (e.g., modules, other intensive late start classes, etc.) is necessary to accommodate student schedules and compete successfully in the marketplace. Hence, enrollment trends are more fully captured through use of annual data. More complete data are available via [ICCB's Data Book](#). The joint ICCB-IBHE [Illinois Postsecondary Profiles](#) platform also provides pertinent trend information on Enrollment, Affordability, Progress, Advancement, and Completion for all 2- and 4-year higher education institutions in Illinois
