PUBLIC SCHOOL FINANCE ASSESSMENT 
PROJECT ALIGNED WITH ELCC 
STANDARDS*

D. Michael Risen

Abstract

This is a detailed description of an assessment that can be used in a graduate level of study in the area of public school finance. This has been approved by NCATE as meeting all of the stipulated ELCC standards for which it is designed (1.1, 1.2, 1.3, 1.4, 1.5, 2.1, 2.2, 2.3, 2.4, 3.1, 3.2, 3.3, 4.1, 4.2, 4.3, 5.1, 5.2, 5.3).

This course of study appropriate for this assessment is both skills and knowledge focused. The assessment measures the student’s ability to think critically and requires students to identify and analyze real school district data regarding revenue and expenditures, a formula for predicting needed staffing levels and a comprehensive listing of personnel data detailing all expenditures per employee. Finally, the assessment provides students the opportunity to role play experiences one might have during a district-wide administrator meeting and during a public school board meeting by presenting their recommendations via a formal presentation with their peers serving as school board members and the professor as the school district superintendent.

NOTE: This module has been peer-reviewed, accepted, and sanctioned by the National Council of Professors of Educational Administration (NCPEA) as a scholarly contribution to the knowledge base in educational administration.

BUDGET REDUCTION PROJECT
Directions to Candidates:
This is a team project. You have just received completed budget information for your school and district and the proposed staffing formula information for the coming year from the superintendent and the preliminary revenue information is not encouraging. Additionally, you have been provided with strategic plan information related to current year and coming year strategies for the five year plan. Your school board has

*Version 1.1: May 21, 2008 9:49 am -0500
†http://creativecommons.org/licenses/by/2.0/
passed a policy for the superintendent to implement that is a staffing formula based upon specified student to teacher ratios and tied to past student enrollment figures. As the principal, you must use all of this information to work with the other four school administrators on your team to plan, organize, evaluate and develop a plan of budget reductions for your schools that will support balancing the district’s budget for the coming school year. Each team member will represent one of the district’s site administrators (either principal or assistant principal – 5 team members in all). The proof of your success will be realized in providing recommendations from each of the four buildings that will result in a combined reduction of $2.5 million for the coming school year for the district budget. You will provide both a written report to the superintendent and a Power Point presentation to be presented by your team to the Board of Education. Class time will be devoted to simulated administrator meetings where the Professor will play the role of the Superintendent conducting these meetings with each of you as the school site administrators to discuss strategies for the completion of these reports and Board of Education presentations. (30 possible points)

The following components should be addressed in your budget reduction plan:

- The candidate’s report reflects recommendations that are clearly consistent with the district’s stated vision (1.1a).
- The report is written professionally and based on data and research from the district’s strategic information packet (1.2b).
- The detailed report reflects ideas to motivate staff, students and families to support the recommendations (1.3a).
- Students demonstrate through the simulated meetings a significant understanding of the role effective communication plays in the process (1.4a).
- The Power Point presentation highlights recommendations that will likely be effective in involving all stakeholders in the implementation of the recommendations (1.5a).
- Identified reductions reflect that candidates considered the relevant school culture issues related to the demographics of the district (2.1a).
- Reduction recommendations provide a clear rationale to support that the remaining staff and programs will continue to facilitate effective instructional practices and provide appropriate curricular materials (2.2a).
- Reductions are also clearly consistent with an understanding of appropriate research strategies that continue to promote an environment for improved student achievement (2.3c).
- Recommended reductions also reflect careful consideration by the candidate that principles of effective professional growth were considered and provided for in the plan (2.4c).
- The Executive Summary clearly highlights the candidate’s attention to using data driven decision making for applying indicators of equity, effectiveness, and efficiency to support the identified reductions (3.1a).
- The Executive summary includes information that reflects the candidates used research based data and group process skills to build support for the plan and align the plan with the organizational vision (3.2a).
- The Executive Summary also reflects the candidate’s use of problem-solving skills and strategic planning (3.3a).
- The presentation reflects a clear understanding of the methods needed to secure community support and understanding of the identified budget reductions (4.1c).
- The presentation definitely highlights how the candidates propose preserving programs for students with both special and exceptional needs (4.2c).
- The presentation also strongly discusses ways to provide new resources and funds that might appropriately and effectively encourage the community to provide new resources to address the emerging student problems created by the identified reductions (4.3c).
- The presentation appropriately avoids identifying individuals affected by the recommended reductions so as to protect their dignity and maintain confidentiality (5.1a).
- Recommendations also reflect clear reductions that are to be implemented such that they are fair,
arrived at impartially, and sensitive to the diversity of the district and community (5.2a).

- The recommended reductions are designed such they are clearly consistent within the legal and ethical parameters expected of Illinois candidates (5.3a).

Each student will contribute to both the written report portion of the project as well as the design and implementation of the public presentation.

The team will make a fifteen to thirty minute presentation to the class. The non-presenting members of the class will serve as the school board in this scenario and the professor will play the role of the superintendent. Each team member must be an active participant in all phases of the research, preparation and presentation of the proposed program.

A copy of the proposed written summary of the program and an electronic copy of the Power Point portion of the presentation must be provided to the instructor prior to the night of the presentation. The written document will be a minimum of three typed and/or word processed pages double spaced. The format of this paper will be similar to a grant proposal or an action plan but is open to the creativity of the team.

Recent years have seen public school administrators more and more responsible for effectively financing public schools for the local, state and federal levels. If you become a school administrator in Illinois, you likely will be involved in this type of activity at least once in your career.

Some class time will be provided for team meetings.

| FIXME: A LIST CAN NOT BE A TABLE ENTRY. Identify the formula changes recommended, their impact and the rationale for each change recommended. Target – 7 points Acceptable – 5 points Unacceptable – 0-4 points Candidate’s proposal relates to vision, strategic planning, staff motivation, effective communication and involving all stakeholders. ELCC Standards: 1.1, 1.2, 1.3, 1.4, and 1.5 | The candidate’s report reflects recommendations that are clearly consistent with the district’s stated vision. (1.1a) The report is written professionally and based on data and research from the district’s strategic information packet. (1.2b) The detailed report reflects ideas to motivate staff, students and families to support the recommendations. (1.3a) Students demonstrate through the simulated meetings a significant understanding of the role effective communication plays in the process. (1.4a). The Power Point presentation highlights recommendations that will likely be effective in involving all stakeholders in the implementation of the recommendations. (1.5a) | The candidate’s report reflects some recommendations that are clearly consistent with the district’s stated vision. (1.1a) The report is written professionally and based on some data and research from the district’s strategic information packet. (1.2b) The report reflects only some ideas to motivate staff, students and families to support the recommendations. (1.3a) Students demonstrate through the simulated meetings some understanding of the role effective communication plays in the process. (1.4a). The Power Point presentation highlights recommendations that may be effective in involving all stakeholders in the implementation of the recommendations. (1.5a) | The candidate’s report does not reflect recommendations that are consistent with the district’s stated vision. (1.1a) The report is not written professionally and based on data and research from the district’s strategic information packet. (1.2b) The report is not detailed enough to reflect ideas to motivate staff, students and families to support the recommendations. (1.3a) Students do not demonstrate through the simulated meetings any understanding of the role effective communication plays in the process. (1.4a). The Power Point presentation fails to highlight recommendations that will likely be effective in involving all stakeholders in the implementation of the recommendations. (1.5a) |}

Identified reductions reflect that candidates considered the relevant school culture issues related to the demographics of the district. Reduction recommendations provided for in the consideration of demographic issues related to the demographics of the district. Reduction recommendations provided for in the consideration of demographic issues related to the demographics of the district. Reduction recommendations provided for in the consideration of demographic issues related to the demographics of the district.
