Analysis of Gender Roles in Primary School (1st to 4th Grade) Turkish Textbooks*

Derya ARSLAN OZER1, Zeynep KARATAS2, Ozge Ruken ERGUN3

ABSTRACT

Purpose: Textbooks can directly or indirectly affect gender stereotypes. In this study, text characters and pictures of textbooks were examined to find out how the messages were given about gender. This study examined text characters and the pictures in the primary school Turkish textbooks respectively in terms of Bem’s Sex-Role Inventory and gender stereotypes.

Research Methods: This paper explored the roles of text characters and pictures in the primary school Turkish textbooks through document analysis. The material for this study consisted of twelve primary school Turkish textbooks from the 1st to the 4th grades. Textbooks were selected out of the ones used in Burdur in the 2015-2016 academic years. A “Text Character Evaluation Form” arranged in line with Bem’s Sex-role Inventory and “Picture Evaluation Form” was used in the study.

Results: The texts included male characters with feminine and masculine roles, and female characters with feminine and masculine roles. The first, second, third and fourth grade textbooks had more male pictures than female pictures. All colors were used for both males and females in the textbooks examined in this study. Dress, skirt, shirt and t-shirt were mostly worn by the females in the textbooks. Male clothes consisted of trousers, shirt and t-shirt.

Implications for Research and Practice: It is observed that text characters have androgynous roles, and it can be argued that using more texts with characters possessing such qualities may have a positive effect on children’s opinions about gender.

Introduction

It is necessary to determine how the practices within the education system affect gender perception of children so that the child can be comfortable with both his/her own sex and the opposite sex. Textbooks are carrying the gender’s model for girls and boys. This study aims to reveal how the gender roles are described both in pictures and texts of textbooks and to come up with suggestions in this regard.

Textbooks have become a research topic in education, sociology and many other scientific fields as they are one of the oldest lesson materials, easily accessible and cheaper than most materials (Esen, 2003; Yanpar, 2006), and serve as a significant tool for preventing social conflicts (Pingel, 2010). The information and messages in textbooks can have a positive or negative effect on the cognitive, affective and social development of children through implicit or explicit images and writings (Sever, 2003). The characters and situations in books introduce children to what the world may look like through others’ eyes, and offer a chance to construct their own views of self and the world (Mendoza, & Reese, 2001, 1). A textbook is and must be a medium for obtaining correct information and protecting the right to obtain correct information. As an objective communication medium, a textbook must be structured as to protect both the right to receive education and the right to access correct information (Cotuksoy, 2003) as well to be in line with the student’s level (Ozbay, 2006).

Some information and messages given in textbooks are related to gender either implicitly or explicitly. It must be ensured through all kinds of media, types of literature (Gol, 2011) and textbooks that children understand both males and females, who have many differences in biological and/or sociological aspects according to the gender role approaches, but are first of all humans and valuable beings in all circumstances. There have been many studies in this field which examine textbooks in terms of gender (Chick & State Altoona, 2006; Elgar, 2004; Gharbavi & Mousavi, 2012; Gumusoglu, 2008; Gunas, 2008; Kirsasoglu Kilic & Eyup, 2011; Sano, Lida, & Hardy, 2001; Worland, 2008; Yayli & Kitis Cinar, 2014; Yildiz, 2013), female figures (Ozkan, 2013), female characters (Vannicopulou, 2004), sexism (Asan Tezer, 2010), the gender concept (Cubukcu & Sivasligil, 2007) and inclusion of female authors (Kuscu Kucukler, 2014). In addition, female characters in children’s books (Cinar, 2015), genders of parents (Anderson, Hamilton, 2005), gender roles in children’s literature (Poarch, Monk-Turner, 2001) are fields of interest as well.

Biology-based differences are accepted as “sex”, while social differences between males and females, stemming from socio-cultural reasons, which are created by males and change across time, culture and even family, are regarded as “gender” (Bhasin, 2014; Dokmen, 2015; Giddens, 2013). Images related to both genders exist in everything ranging from dietary habits to dressing style, from toys to books, cartoons, computer games as well as in textbooks first encountered by students at school (Yayli & Kitis Cinar, 2014). Some behaviors and traits expected by society from males and females as a group are called gender stereotypes (Dokmen, 2015). According to Cuceloglu (1993), the stereotypical perceptions of people about behavior and trait differences between the genders may not be related to reality at all, but people believe
stereotypes as if they were true. Some studies have been carried out with the aim of examining gender stereotypes in children’s books (Anderson & Hamilton, 2005; Catalcalı Soyer, 2009; Lee & Collins, 2009; Paterson & Lach, 1990). Catalcalı Soyer (2009) states that children meet stereotypes of the adult world through children’s books and become candidates for the adult world via these stereotypes.

Studies dealing with sex, gender etc. in textbooks examine pictures (Esen & Baglı, 2002; Özkan, 2013; Yaylı & Kitis Cınar, 2014) and pictures and texts (Asan Tezer, 2010; Kılıç Kırbasoğlu & Eyüp, 2011). The number of male-female pictures (Özkan, 2013); the people, actions, places and objects with which adult figures are depicted (Esen & Baglı, 2002); roles of males and females in texts and images, gender roles, roles within and outside the family, professional roles, housework roles and personality roles (Kırbasoğlu Kılıc & Eyüp, 2011); main and side characters of texts and pictures; individuals, actions and places where people come together are analyzed according to the sexes. One of the frequently used tools for determining sex roles in quantitative research is the Sex-Role Inventory developed by Bem.

This study uses the Sex Role Inventory in order to evaluate the sex roles of text characters. Bem’s (1974) inventory is based on the gender schema theory developed by herself. Children realize their own sex. Then, as they learn the content of the gender schema, they learn which qualities are related to their own sex. Bem developed the Sex-Role Inventory with the aim of measuring the perception of sex roles. This is a frequently used tool in psychology and other fields because it measures masculine and feminine sex roles separately, it can measure androgyny and has psychometric properties (Holt & Ellis, 1998). The main point of Bem’s notions is that masculinity and femininity are two separate dimensions. Sex role orientations of individuals are determined by considering the level at which they possess the qualities in these two separate dimensions. Individuals with high femininity and low masculinity have feminine sex role orientation while individuals with high masculinity and low femininity have masculine sex role orientation (Demirtas, 2000). According to Bem (1974), mixed or androgynous self-perception may enable the individual to break free from traditional masculine and feminine sex role orientations and to perform both masculine and feminine behaviors freely. This study examines the roles of text characters in terms of feminine, masculine and social acceptability adjectives in Bem’s Sex-Role Inventory, and pictures in terms of gender stereotypes in primary school Turkish books. With this aim, the main research questions of this study were determined as follows:

1. How are the gender roles of text characters in primary school Turkish Textbooks (1st to 4th grades) depicted in terms of feminine, masculine and social acceptability adjectives in Bem’s Sex-Role Inventory?

2. How are the number of males and females, the colors used for males and females, the clothes of males and females, the environment where males and females are depicted, the division of labor, professions and physical attributes expressed in pictures according to gender stereotypes?
Method

Research Design

Qualitative research model was used in this research. This paper examines respectively the text characters and text pictures in terms of Bem’s Sex-Role Inventory and gender stereotypes in the primary school Turkish textbooks from the 1st to the 4th grades through document review. Document review is a method of qualitative research (Yıldırım & Şims, 2005).

Research Sample

The materials in this study consisted of primary school Turkish textbooks from the 1st to the 4th grades. Textbooks were selected out of the ones used in Burdur in the 2015-2016 academic years. The references section provides information about the books reviewed.

Primary school Turkish student books consisted of three books and the first part of each book was the textbook, and the second part was the workbook. The first parts of the first and second books consisted of a section for teaching reading and writing only in the first grade. Four sets of Turkish textbooks used from the 1st to the 4th grades of primary school, which were equal to twelve books, (4x3), were reviewed during the study. A total of twelve textbooks for four grades, twenty-four themes included in those twelve textbooks, and one hundred and eighteen texts included in those themes were reviewed. Themes about Atatürk and the texts within that theme were not included in the study. In addition, as the listening texts were not in the student books, they were also excluded from the research.

Research Instruments and Procedures

A “Text Character Evaluation Form” arranged in line with Bem’s Sex-role Inventory and “Picture Evaluation Form” were used in the study. Firstly, the research about the textbooks were reviewed. Some studies include only picture reviews (Esen & Baglı, 2002; Ozkan, 2013) while others examine both pictures and texts together (Asan Tezer, 2010; Kırbasoğlu Kilic & Eyup, 2011). This study also reviews text characters and pictures together.

Text character evaluation form. Bem developed a scale for testing sex roles. It consisted of three sub-scales of masculinity (20 adjectives), femininity (20 adjectives) and social acceptability (20 adjectives) with a total of sixty items. The short version of Bem’s form (20 feminine and 20 masculine) was adapted to Turkish by Kavuncu (1987), and the validity and reliability check was performed by Dokmen (1999). The remaining twenty adjectives which were related to social acceptability were translated into Turkish by the second researcher, and checked by an expert from the English Teaching Department. The final text evaluation form consisted of the theme title, text title, character name, roles, feminine, masculine and social acceptability adjectives.

Picture evaluation form. Firstly, the literature was examined (Esen & Baglı, 2002; Kırbasoglu Kilic & Eyup, 2011; Ozkan, 2013), and an item pool was prepared based on
the literature. The form took its final shape according to expert opinions and a pilot study. The picture evaluation form consisted of the number of males and females, colors used for males and females, clothes, division of labor, professions and physical appearances of the characters. The third Turkish book of the 3rd grade was examined separately by three researchers in terms of both text characters’ roles and pictures. The inter-rater reliability score (Miles, Huberman, 1994) of the picture evaluation form was determined to be .81.

Data Analysis

The text character evaluation form and picture evaluation form were used to evaluate the text characters and pictures, respectively. The data were evaluated through descriptive analysis, which is a qualitative research analysis method. The pictures were examined by the first and the second researcher. Frequency was used for evaluation.

The process of text character analysis is given below:

1. The first and second researchers read the texts together and determined the personality roles of the text characters.
2. The determined roles were compared with sixty adjectives consisting of twenty masculine, twenty feminine, and twenty social acceptability adjectives developed by Bem. The text character evaluation form was used.
3. The comparison revealed the sex role of the character as feminine, masculine or socially acceptable. A sample evaluation is shown in Table 1.

<td>Arrogant</td>
<td></td>
<td>Arrogant</td>
</tr>
</tbody>
</table>

One of the characters in the text, “Big Ant”, was determined to be a leader and sensitive as shown in Table 1. According to Bem’s Sex-role Inventory, the mentor is the leader (masculine) and compassionate (feminine). The responsive of being sensitive is to be sensitive to wishes of the others (feminine). The other character in the other text, “Three Young Man”, was arrogant. According to Bem’s Sex-role Inventory, arrogant is the arrogance of social acceptability. After this analysis, the characters’ sex role could be easily seen, if she/he acted feminine, masculine or and in a social acceptability role.
The number of males and females, colors used for males and females, clothes, division of labor, professions, and physical appearances of the characters in textbooks’ pictures were evaluated via descriptive analysis. Picture evaluation form was used.

Results

Findings about Gender Roles of Text Characters in terms of Bem’s Sex-Role

Gender roles of the text characters in the textbooks according to Bem’s Sex-Role is shown in Table 2.

As can be seen in Table 2, eleven female characters in the first grade Turkish textbook had nine feminine and seven social acceptability roles. Eight male characters in the texts had eleven feminine, five masculine, and one social acceptability roles. The texts in the books had characters that were explained without stating any sex. Some characters were depicted as females or males in the pictures although their sexes were not stated in the text. Nine characters whose sexes were not stated in the texts had six feminine, seven masculine, and seven social acceptability roles. The second grade Turkish textbook depicted five female characters with seven feminine and four social acceptability roles. Twelve male characters in the texts had eleven feminine and seven social acceptability roles. Twenty characters whose sexes were not stated in the texts had seven feminine, fourteen masculine, and twelve social acceptability roles. The books also had a couple (e.g. parents) of characters, and these characters had masculine roles.

The third grade Turkish textbook depicted fourteen female characters with twenty-four feminine, eleven masculine, and twelve social acceptability roles. Twelve male
characters in the texts had twenty-four feminine, twenty-eight masculine, and ten social acceptability roles. Seventeen characters whose sexes were not stated in the texts had twenty-two feminine, seven masculine, and thirteen social acceptability roles. The fourth grade Turkish textbook depicted seven female characters with five feminine, six masculine, and two social acceptability roles. Twelve male characters in the texts had eight feminine, eleven masculine, and three social acceptability roles. Six characters whose sexes were not stated in the texts had four feminine, three masculine, and three social acceptability roles. The books also had a couple (e.g. parents) of characters, and these characters had masculine roles.

**Findings about the Evaluation of Pictures in terms of Gender Stereotypes**

The number of males and females, the colors used for males and females, the clothes of males and females, the environment where males and females were depicted, the division of labor, professions, and physical attributes were examined in the textbooks’ pictures.

Primary school Turkish textbooks from the 1st to the 4th grades were examined, and numbers of female and male pictures were determined as shown in Table 3. The first grade text books had two hundred and sixteen female and two hundred and sixty-three male pictures; the second grade textbooks had one hundred and thirty-two female and two hundred and seventy male pictures; the third grade textbooks had one hundred and seventy-three female and two hundred and forty-four male pictures; and the fourth grade textbooks had one hundred and fifty-five female and two hundred and twenty-five male pictures.

The colors used in the female and male pictures in the textbooks were examined. The most used colors in the first grade textbooks were green (n = 52), white (n = 52), blue (n = 45), red (n = 41), pink (n = 31), purple (n = 25), orange (n = 25), yellow (n = 22), and brown (n = 19) for females, while the most used colors for males were green (n = 110), white (n = 73), brown (n = 49), blue (n = 47), grey (n = 36), orange (n = 34), yellow (n = 28), red (n = 24), and purple (n = 19). The most used colors in the second grade textbooks were white (n = 68), green (n = 20), yellow (n = 17), blue (n = 17), checkered (n = 16), grey (n = 15), orange (n = 14), red (n = 13), pink (n = 12), and black (n = 12) for females, while the most used colors for males were white (n = 120), brown (n = 80), green (n = 62), red (n = 44), blue (n = 34), black (n = 25), grey (n = 23), and orange (n = 21). The most used colors in the third grade textbooks were blue (n = 33), green (n = 27), orange (n = 23), purple (n = 21), pink (n = 21), red (n = 10), and brown
(n = 5) for females, while the most used colors for males were brown (n = 64), green (n = 56), blue (n = 51), orange (n = 37), yellow (n = 28), purple (n = 27), white (n = 20), red (n = 17), and purple (n = 7). The most used colors in the fourth grade textbooks were white (n = 38), blue (n = 33), pink (n = 13), orange (n = 11), yellow (n = 10), black (n = 8), and red (n = 7) for females, while the most used colors for males were blue (n = 34), white (n = 30), grey (n = 25), green (n = 18), brown (n = 16), orange (n = 13), yellow (n = 10), and red (n = 9). Female and male characters wore different colors. Examples of pictures are given below in Figure 1 and 2.

**Figure 1.** Colors (Third Grade)              **Figure 2.** Colors (First Grade)

The clothes of males and females in the primary school Turkish textbooks were examined. The clothes worn the most in the first grade textbooks were in the following order: dress, shirt, t-shirt, and skirt for females; shirt, trousers, t-shirt, and vest for males. The most frequently worn clothes in the second-grade textbooks were in the following order: skirt, t-shirt, shirt, trousers, blouse, and dress for females; shirt, trousers, t-shirt, shalwar, and sweater for males. The clothes worn in the third grade textbooks were in the following order: skirt, dress, shirt, and trousers for females; shirt, trousers, military uniform, and shalwar for males. The most frequently worn clothes in the fourth-grade textbooks were in the following order: shirt, blouse, trousers, t-shirt, and shalwar for females; trousers, shirt, jacket, and t-shirt for males. It was observed that females were depicted wearing dresses and skirts in general while males were depicted with trousers and shirts. Examples of pictures are given below in Figure 3-4.

Table 4 shows the amount of males and females depicted in and out of the home in the primary school Turkish textbooks from the 1st to the 4th grades. Males and females were depicted more outside their homes in all textbooks. The number of pictures showing males at home was more than the ones showing females at home.

Another aspect reviewed in the textbooks was the co-operation in the pictures. The primary school (1st to 4th grade) textbooks had the following pictures: a mother looking after her child (n = 19), a woman in the kitchen (n = 3) (Figure 6), a grandmother looking after children (n = 2), a woman doing shopping (n = 1), a woman cleaning (n = 1), a women doing the laundry (n = 1), a woman doing handicraft (n = 1), women by the fountain (n = 1), men working outdoors (n = 8), man riding a bicycle (n = 2), and a father looking after his children (n = 6). The textbooks had more home-related pictures of females. Furthermore, there were pictures depicting males and females together doing the following: playing games (n = 17), working (n = 8), taking a holiday (n = 5),
catching fish (n = 2), wandering (n = 2), watching television, doing sports, swimming in the sea, planting saplings, talking, flying a kite, walking, collecting garbage, and riding bikes. Also there were activities performed as a family such as reading books (n = 1). Moreover, there were family pictures and pictures showing parents and children together (n = 4). In one picture, the mother was looking after her child while the father was helping his daughter with her lessons (Figure 5). Examples of pictures were given below in Figure 5-6.

![Figure 5. Co-operation (Fourth Grade)](image)

![Figure 6. Co-operation (Second Grade)](image)

Occupations of males and females were examined in the Turkish textbooks. Females were depicted as students (n = 16), farmers (n = 8), teachers (n = 5), workers (n = 4), sportswomen (n = 3), soldiers (n = 3), scientists (n = 3), nurses (n = 2), greengrocers, doctors, waitresses, receptionists, and astronauts. Males were depicted while dealing with many occupations such as soldiers (n = 39), shepherds (n = 10), farmers (n = 9), students (n = 8), astronauts (n = 6), scientists (n = 4), sultans (n = 4), sportsmen (n = 4), architects (n = 3), apprentices (n = 3), engineers (n = 3), beekeepers (n = 2), bakers (n = 2), doctors (n = 2), trainers (n = 2), ice cream sellers, football players, grooms, greengrocers, stallholders, drummers, barbers, teachers, canteen owners, referees, policemen, insurance brokers, matadors, waiters, chauffeurs, and newsmen etc. Examples of pictures are given below in Figure 7 and 8.
Physical appearances were examined in the primary school Turkish textbooks in terms of weight, hair color, and hairstyle, skin color for females; and hair color, hair length, and skin color for males. Females and males were depicted mainly as slim with the exception of a few overweight females and males. Females in the first, second, third and fourth grade Turkish textbooks had black, brown, red or yellow hair. Their hair was depicted with a knob, double or single pony tails. Haircuts were usually pageboy style; and short hair was rare. Females were depicted with normal height and weight. Very few overweight people were included, and they were old people. Females in the pictures were mostly light skinned. Males’ hair was mostly neither very short nor very long in the first, second, third and fourth grade textbooks. The hair colors were black, brown, white, and red. Males were depicted as light skinned with a shaven beard. There were also bald and bearded men. Examples of pictures are given below in Figure 9-10.
Discussion, Conclusion and Recommendations

Textbooks are one of the most important, indispensable, cheap, and easily accessible education materials. It is easy for a teacher to ask students to have textbooks instead of other materials so that the students can follow the course, and their influence on individuals is important. This fact makes text books a significant topic of research. Expressions included in textbooks affect stereotypes of societies. One of these stereotypes is gender stereotypes. This study aims to evaluate the text characters and pictures in the primary school Turkish textbooks from the 1st to the 4th grades in terms of Bem’s Sex-role Inventory and gender stereotypes, respectively.

Textbooks are an important factor in the educational dimension. The part played by textbooks, and the number of people reached by them cannot be denied. The qualities of the characters in primary school Turkish textbooks, the distribution of sex roles, and their effect on gender stereotypes within society must be evaluated. The importance of androgyny and “being stuck in traditional gender roles” must be emphasized and considered especially at the “educational” dimension (Demirtas, 2002). The texts included male characters with feminine and masculine roles, and female characters with feminine and masculine roles. It was observed that the characters had androgynous roles and it can be argued that using more texts with characters possessing such qualities may have a positive effect on children’s opinions about gender. One of the most significant properties of some texts was that the sexes of the characters were not stated. This may enable the reader to envisage the characters based on his/her own sex, and break down social gender stereotypes. However, the fact that the designers of the text images depicted the sexes not specified in the texts as male in some sections reinforces gender stereotypes.

The number of males was more than the number of females in the primary school Turkish textbooks. There are other studies that have revealed the same results in different textbooks (Chick & Altoona, 2006; Cubukcu & Sivasligil, 2007; Gharbavi, & Mousavi, 2012; Lee & Collins, 2009; Yaylı and Kitis Cınar, 2014). Yaylı and Kitis Cınar (2014) state that characters are depicted in harmony with gender stereotypes. It was seen that colors that were in contrast with gender stereotypes were used in the textbooks. Similar colors can be used for males and females. Cınar (2015) states that females are depicted in pink. All colors were used for both males and females in the textbooks examined in this study. It was seen that males were shown with pink, green, yellow etc. in traditional texts such as Kaloghlan, Nasreddin Hodja etc. Dress, skirt, shirt, and t-shirt were mostly worn by the females in the textbooks. Male clothes consisted of trousers, shirt, and t-shirt although there were texts including traditional clothing as well. Cınar (2015) stated that the children’s books he examined included an apron, ribbon, skirt, and dress as the most common clothing materials reflecting the appearance of females. Although females use trousers frequently in daily life, they were depicted mostly with skirts and dresses in the pictures.

As there were more males in the pictures, all settings, including individual settings, favor the male. The reason was that the number of males was more than the number
of females in the books, and this affected the number of pictures showing males in and out of their homes. On the other hand, the number of females out of their homes had increased in direct proportion to their number. It could be said that males were seen at home more frequently. Poarch & Monk-Turner (2001) state that pictures showing females out of their homes have increased in award-winning children’s books. The textbooks had more home-related pictures of females. It was seen that the division of labor between males and females was not reflected sufficiently in the textbooks. Anderson and Hamilton (2005) state that mothers establish more relationships with their children, feed their children, and express their feelings more than the fathers in children’s books. According to Poarch & Monk-Turner (2001), even award-winning children’s books more frequently depict female characters doing housework.

It was seen that females were depicted as students, farmers, workers, teachers, sportswomen, scientists, soldiers, nurses, waitresses, receptionists, and astronauts. Males were depicted dealing with many other different jobs. Various studies have revealed that males and females deal with traditional occupations (Lee, & Collins 2009; Yaylı & Kitis Cinar, 2014). Cubukcu and Sivasligil (2007) state that females are depicted as students, teachers, nurses etc. while males are depicted doing many different jobs in the 7th grade English textbook. The job varieties of females had increased in the examined textbooks but they could not keep up with the variety in male occupations.

Apart from the sex differences between female and male pictures, males and females were not much different among themselves in terms of physical appearance. This may limit children’s male or female perception to certain types, and cause them to act with prejudice, negative and exclusionary attitudes towards individuals with different physical qualities. This will cause stereotypes on physical appearance.

In recent years, violence against women in Turkey is getting more frequent. Children can live or watch this violence, and all these affect their gender perception. Moreover, this situation makes families nervous especially who have girls. The solution of this problem is showing the similarities of both women and men by means of textbooks, television etc. Textbooks constitute a significant medium when the subject of sex is discussed through similarities instead of differences. It is emphasized in the textbooks of various countries (Australia, the USA, Japan, Iran etc.) that male and female sexes must be included equally in pictures and texts. The Ministry of National Education and the authors of textbooks have a major responsibility for realizing the aim of raising gender awareness and overcoming inequality (Kucukler, 2014). Teachers may select supplementary books after reviewing them in terms of gender stereotypes even though they cannot choose the textbooks. Publishing houses that are sensitive about this subject should be praised and rewarded by the Ministry of National Education. Speaking about negative examples reinforces the negative behavior, but more people can be made aware of good examples. Texts including androgynous characters can be placed in textbooks. Furthermore, sex roles of text characters may be examined with adjectives other than those included in Bem’s Inventory.

İlkokul (1-4. Sınıf) Türkçe Ders Kitaplarında Toplumsal Cinsiyet Rollerinin Incelenmesi

Atıf:

Özet

Araştırmanın Amacı: Bu çalışmada ilkokul 1-4. sınıf Türkçe ders kitaplarındaki metin karakterlerinin cinsiyet rolleri BEM’in Cinsiyet Rolleri Envanteri ve resimler ise toplumsal cinsiyet kalıbı yargılarnı açısından incelenmiştir.

Araştırmanın Yöntemi: İlkokul 1-4. sınıf Türkçe ders kitaplarındaki metin karakterlerinin cinsiyet rolleri BEM’in Cinsiyet Roleri Envanteri, resimler ise

Araştırmanın Bulgarları: Metinlerdeki karakterlerde kadın, erkek ve sosyal kabul edilirlik rolleri incelenmiştir. Üçüncü sınıf Türkçe Kitabında 14 kadınsı karakter; 24 kadınsı, 11 erkeksi, 12 sosyal kabul edilirlik rollerine sahip olarak betimselmiştir. Metinlerdeki 12 erkek karakter; 24 kadınsı, 28 erkeksi ve 10 sosyal kabul edilirlik rollerine sahiptir. Metinlerde cinsiyeti belirtilmemiş 17 karakter, 22 kadınsı, 7 erkeksi, 13 sosyal kabul edilirlik rollerine sahiptir. Araştırımda resimlerde birinci sınıf ders kitabı 216 kadın, 263 erkek, ikinci sınıf kitabı 132 kadın, 270 erkek, üçüncü sınıf kitabı 173 kadın, 244 erkek, dördüncü sınıf kitabı 155 kadın, 225 erkek resmi bulunmaktadır. Kadınlardı; öğrenci (n=16), çiftçi (n=8), öğrenci (n=5), işçi (n=4), sporcu (n=3), asker (n=3), bilim insanı (n=3), hemşire (n=2), manav, doktor, garson, resepasyon görevlisi, astronot olarak resimlenmiş. Erkekler; asker (n=39), çaban (n=10), çiftçi (n=9), öğrenci (n=8), işçi (n=8), astronot (n=6), bilim adami (n=4), sultan (n=4), sporcu (n=4), mimar (n=3), çırak (n=3), mühendis (n=3), arıcı (n=2), firinci (n=2),
doktor (n=2), antrenör (n=2), dondurmacı, futbolcu, seyis, manav, pazarci, davulcu, berber, öğretmen, kantinci, hakem, polis, sigortacı, matador, garson, şoför, spiker gibi erkekler bir çok mesleği yapmaktadır.

Anahtar Sözcükler: Ders kitapları, Toplumsal cinsiyet, Androjenlik, Bem.
