Abstract: In this study, the Learning Environment Research-Bibliography includes studies on Educational subject. We have analyzed many journals, books, and theses published in international. The references listed here primarily focus on the empirical research related to the learning environmental research as an educational goal; along with a few learning environment works by such authors as Fraser, Doppelt, Dorman, Johnson, Roth, Goh, Fisher, and others. While not exhaustive, the list should prove useful to educators, and scholars in other fields, interested in the Learning environment and how its understanding can be realized as a goal of education. The authors welcome correspondence regarding omissions from the list, and on-going additions that can be made to it.

Key words: Learning Environment Research-Bibliography
