COMMON CORE: Fact vs. Fiction

Think informational text = boring? Reinvent your reading lessons with dinosaurs, artists, and geologists!

BY KIM GREENE

Second-grade teacher Erin Klein says her students gravitate toward informational text. “They are naturally curious,” says Klein, who teaches in Bloomfield Hills, Michigan. “Nonfiction helps quench their thirst for answers.”

Despite students’ interest in informational text, it has played second fiddle in literacy instruction for years. In 2000, Nell Duke’s groundbreaking study “3.6 Minutes per Day: The Scarcity of Informational Texts in First Grade” found that primary teachers dedicated the vast majority of instructional time to fiction.

Now, though, nonfiction is getting its turn in the spotlight. The Common Core State Standards require that students become thoughtful consumers of complex, informative texts—taking them beyond the realm of dry textbooks and self-selected reading.

“We live in an exciting time where our information isn’t solely from thick textbooks but rather from websites, blogs, and magazines,” says Klein. “By introducing students to print-rich materials and digital media, we are shaping an authentic experience for the way they take in information.”
Why Now?

What has triggered the push for more informational text? For one, the goal of Common Core is to prepare students for college and career, both of which require a reservoir of knowledge about the natural, physical, and social world around them. And that’s exactly what informational texts provide them.

“About 90 percent of what most adults read is informational text,” says Laura Candler, a retired teacher of grades 4 through 6 from North Carolina. “Yet in school, it seems we’ve spent far more time reading fiction.”

Another rationale can be summed up in one word: assessment. The developers of the standards sought to align the instructional balance of literary and informational text with that of the National Assessment of Educational Progress, or NAEP—tests administered across the country at grades 4, 8, and 12. According to this model, fourth-grade students should receive a 50-50 balance between the two types of texts across the school day.

Informational Text 101

Ready to master the basics of informational text and Common Core? What follows are answers to some commonly asked questions.

What is informational text?

Common Core uses “informational text” as another term for “nonfiction text.” This category includes historical, scientific, and technical texts that provide students with factual information about the world. Typically, they employ structures such as cause and effect, compare and contrast, and problem and solution. They also contain text features like headlines and boldface vocabulary words.

Because of their narrative structures, biographies and autobiographies do not look like other nonfiction texts. In fact, they are often classified as literary nonfiction. But the Common Core considers them to be informational text as well.

Another category of informational texts includes directions, forms, and information contained in charts, graphs, maps, and digital resources. Simply put, if students are reading it for the information it contains, it’s informational text.

Who is expected to teach it?

Just about everyone. In grades K to 5, teachers are expected to use informational texts throughout the school day. “I’ve always included a fair amount of informational text in my instruction,” says Klein. “However, the way I teach it has evolved. I now integrate my content areas in a manner that allows for cross-curricular themes, rather than teaching concepts or themes in isolation. The connections between literacy and social studies and science engage students at a much higher level.”

In grades 6 to 12, one strand of informational text standards falls to English teachers. A separate strand includes literacy in history and social studies, as well as literacy in science and technical subjects. That means

BUILD YOUR LIBRARY

The Common Core’s Appendix B lists “text exemplars,” but they aren’t required. Look beyond the exemplars and try our choices.

**Like This?** | **Try This**
---|---
**Grades K–1**
From Seed to Pumpkin by Wendy Pfeffer | The Pumpkin Book by Gail Gibbons
**Grades 2–3**
So You Want to Be President? by Judith St. George | If I Were President by Catherine Stier
**Grades 4–5**
Discovering Mars by Melvin Berger | Mars by Seymour Simon
**Grades 6–8**
Freedom Walkers by Russell Freedman | Claudette Colvin by Phillip Hoose
“About 90% of what most adults read is informational text. Yet in school, it seems we’ve spent far more time reading fiction.”

—Laura Candler, retired teacher, grades 4–6

What’s the difference between academic and domain-specific vocabulary?

Across all grades, informational text standard 4 calls for students to determine the meaning of unfamiliar vocabulary. The phrase “academic and domain-specific vocabulary,” which appears several times, refers to words readers often encounter in textbooks across all subject areas. Among such words are analyze, which might be unfamiliar to a second-grade student, and discourse, which could be a new vocabulary word for a seventh grader.

Domain-specific vocabulary words, on the other hand, are likely to be encountered only in a particular content area. For example, a word such as photosynthesis falls within the realm of biology.

Putting It Into Practice

With an understanding of what the standards are calling for, it’s time to start thinking about what instruction in informational text could look like in your classroom. Here are a few ideas.

**Grades K–2**

LESSON: Text Features in the News

**GRADES:** 1–2

**STANDARD:** 5 (Know and use various text features.)

**THE GIST:** Laura Candler, the retired teacher from North Carolina, suggests using Scholastic News Weekly Reader to identify text features. Students can complete a three-column chart to extend their understanding.

LESSON: Author Study Preview

**GRADE:** K

**STANDARD:** 5 (Name the author and illustrator and define the role of each.)

**THE GIST:** Kick off an author study unit by displaying several of the author’s books. Have students identify the author’s and illustrator’s names on the
cover of each book (sometimes they are one and the same). Discuss the contributions made by each. Then have students team up in author-illustrator duos to create their own books.

**Grades 3–5**

**LESSON:** Word Detectives  
**GRADES:** 4–5  
**STANDARD:** 4  (Determine the meaning of general academic and domain-specific words.)  
**THE GIST:** Prompt students to identify “suspect” words that may be hindering their understanding of a text. They can flag the suspects with sticky notes or write them on a separate sheet of paper. Have them find contextual clues to determine their meaning. Such clues usually come in the form of outright definitions, neighboring synonyms or antonyms, or other information that can yield useful inferences.

**LESSON:** Pinterest Pictures  
**GRADE:** 3  
**STANDARD:** 3  (Describe events, ideas, or concepts using language that pertains to time, sequence, and cause and effect.)  
**THE GIST:** “For many students, there is a learning curve to understand the vocabulary of informational text,” says third-grade teacher Suzy Brooks of Massachusetts. She uses images from a Pinterest board to introduce these concepts. To teach sequencing, for example, Brooks shows a photo of a dog chasing a ball and asks students what likely happened both before and after the photo was taken.

**LESSON:** Slice of the Pie  
**GRADES:** 6–8  
**STANDARD:** 6  (Determine an author’s point of view or purpose.)  
**THE GIST:** Draw a pizza P.I.E. (“persuade, inform, entertain”) organizer on the board and discuss what is meant by “author’s purpose.” Talk about several informational texts and classify the purpose or purposes of each by writing the title in the appropriate slices of the pie. (Yes, an informational text can be intended to persuade and entertain!)

**LESSON:** State Your Case  
**GRADES:** 6–8  
**STANDARD:** 8  (Trace and evaluate the argument and specific claims in a text.)  
**THE GIST:** After they’ve read an informational text with a central argument, have students pretend that they are lawyers in a courtroom. Ask them to state the author’s main claim, and provide ample evidence from the text to back it up. The goal is to convince the classroom jury to agree with the author’s argument.

When you’re ready to make a greater impact  
When you’re ready to advance your career  
You are ready for American Public University

American Public University is ready to help you move your career forward. We offer respected degrees in Online Teaching and Learning, Instructional Leadership, Administration & Supervision, and more — completely online. And people are taking notice. We’ve been nationally recognized by the Sloan Consortium for effective practices in online education, and 99% of employers surveyed would hire one of our graduates again.*

When you’re ready, visit StudyatAPU.com/instructor

*APUS Alumni Employer Survey, January 2011 - December 2011
We want you to make an informed decision about the university that’s right for you. For more about our graduation rates, the median debt of students who completed each program, and other important information, visit www.apus.edu/disclosure.
